## Big 'U' Year Means Big Budget Report Indicates

Annual Report of William T. Middlebrook, Business Vice-President, Given to Public

University of Minnesota expenditures for the fiscal year ending June 30, 1947, totaled \$28,640,466.27, including fund transfers and adjustments, leaving an unencumbered balance of \$8,643.45 at the close of the year, according to the statement of the University's financial operations issued by W. T. Middlebrook, vice president for business administration.

Available to the University, from its various sources of income, for the fiscal year were funds aggregating \$28,649,109.72 including an unencumbered balance of \$7,760.32 remaining from the previous fiscal year.

Heaviest expenditure by the University during the period was the sum paid out for instruction and research, \$11,126,184.71. This figure includes the expenses of college instruction and research, agricultural schools and experiment stations, the University hospitals, the summer session and agricultural and general extension activities.

Second largest outlay for the year was the \$9,797,902.05 for operating and capital expenditures for self-supporting service enterprises and revolving funds. Among these service enterprises are dormitories and dining halls, cafeterias and the University printing department.

Trust fund expenditures for teaching and research, care of the sick, scholarships, fellowships, prizes and other trust purposes drained \$2,543,574.74 from the University's funds, while the expenses of maintaining and operating University buildings and improving University land cost \$1,537,006.73.

Administration expenses of the University amounted to \$798,328.24 for the year, while \$1,146,330.81 was spent for general University items such as expenses of the library, general bulletins and publications, lectures and convocations, operation of the storehouses, truck service and the inter-campus trolley.

### Physical Plant Outlay Small

Physical plant extension resulted in an outlay of \$851,877.36 and included such items as purchases of land and real estate, \$174,206.04; trailer camp, \$226,875.92; Crookston dormitory, \$156,793.29; temporary classroom and office buildings, \$25,491.36; Rosemount Research Center, plant modification, \$14,316.92; Pioneer Hall addition, \$10,000; athletic field expansion, \$14,716.25; prefabricated houses, \$156,364.27; and addition to University hospitals, \$11,070.35.

Intercollegiate athletics cost \$502,991.34 for the fiscal year, according to Middlebrook's report. This sum included that part of the cost of physical education expense paid from the receipts of intercollegiate activities.

Transfers and adjustments of funds during the period totaled \$336,270.29 and included redemption of Coffman Memorial Union building certificates in the amount of \$90,000; depreciation on the Flour and Corn Exchange buildings in Minneapolis owned by the University, \$45,000; trust fund endowment increase, \$79,160.32; and a decrease of \$130,387.35 in outstanding obligations and allotments.

Income from self-supporting service enterprises and revolving funds which totaled \$9,485,238.30, or slightly more than the outlay by these departments.

Fees and receipts netted \$7,903,790.84 and included student tuition fees in the amount of \$4,970,565.98; Minnesota counties' share of the cost of indigent hospital patients, \$406,401.70; other University hospitals receipts, \$973,511.32; dental infirmary receipts, \$93,234.27; other departmental receipts such as laboratory fees, sales of livestock and other agricultural products, \$1,457,-

## Personnel Counselors Mark Anniversary Here

Left to right, Dr. Edmund G. Williamson, dean of students, University of Minnesota; Dr. Donald Marquis, professor and head of the department of psychology, University of Michigan and president of the American Psychological association; Dr. Donald J. Shank, director of student personnel in the New York School of Industrial and Labor Relations, Cornell University; Professor Donald G. Paterson, University of Minnesota, one of the outstanding pioneers in the field of student counseling; Dr. Robert L. Sutherland, representing the Hogg Foundation, University of Texas, Austin, Texas.

## Big Department Teaches Health, Sports, to Women

One of the largest and most effective departments on the campus of the University of Minnesota is that of Physical Education for Women, directed by Miss Gertrude M. Baker. In this department women students may study as "majors," aiming to make physical education a life work, may enroll in regular classes without being majors, may engage in practically all sports in participation programs, and may join the Women's Athletic Association and take part in its wide assortment of team sports and other body-conditioning activities.

During the spring quarter recently ended 800 different individuals were enrolled in the classes of the Department of Physical Education for Women of whom 110 were making that field their "major" subject towards graduation. Records show, according to Dr. Baker, that 1,070 girls were signed up for 3,583 different participations in sports and body-building activities.

An unusual feature of the classes in this department is the large number of auditors, or students not regularly registered, who attend to get a picture of what they can do to improve their health. There is also a large attendance at what are called "enrichment activities." These are for the most part special lectures on some phase of health, hygiene or beneficial physical activity which are conducted throughout the year as an adjunct and enrichment to the regular work. Girl students who work and have little time for attending lectures may lay out a program of enrichment through reading in the field of health and sports.

The varied areas of physical activity comprise a list that sounds like a roster of the Olympic games. Among the principal areas one may enumerate aquatics (swimming and diving), rhythm and the dance, team sports, of which the list includes basketball, kittenball, field hockey, soccer and volleyball; individual sports, such as tennis, golf, archery and fencing, and individual body conditioning programs, especially arranged for a student, with a view to the relaxation and upbuilding of her body.

Each student is given a health rating through trials and examinations, and she may enter any area of activity that her health rating is found to permit. No student may engage in sports thought to be too strenuous for her. Credits for work in Physical Education for Women differ between the several colleges. Thus the College of Education requires at least five credits in this field, while Home Economics requires three credits and permits six. Dental hygienists must take two quarters of work in physical education. Credits allowed by other colleges vary.

In the Norris Gymnasium, the women's Field House and the Pool "open participation" is scheduled each day from 4 p.m. on. At these times activities are scheduled and each girl in turn gets a chance to participate in the sports and play for which she has signed up and has been approved.

Intramural sports between teams representing sororities and other women's organizations are carried on in much the same way as are those for men. Girls who do not represent an organization sign an interest list and join informal teams in the sports and

Commemorating 25 years of student personnel work on its campus, the longest continuous program of this phase of higher education in America, the University of Minnesota conducted a special conference on "Trends in Student Personnel Work."

Leaders in higher education and student personnel work were invited to the conference from New York, Washington, D. C., and California and from selected universities and colleges in the Middle West, by Dr. E. G. Williamson, dean of students, who directed plans for the meeting. A pioneer in this work was Professor Donald G. Paterson of the Department of Psychology.

Purpose of the conference was to review and analyse the significant developments in student personnel work during the last 25 years and to project those trends into the future.

"Such explorations of the future," the dean stated, "are desirable as universities face increased demands by society for the training of societies' leaders in an increasing number of occupations. "Student personnel work plays an important part in the discovery of talents and the wise use of these talents through personal counseling," Dean Williamson added. "Educators concerned with these problems are cordially invited to attend the conference."

The University of Minnesota's contribution to student personnel work centers, according to Dean Williamson, around three principal phases:

(1) Research on techniques and testing of student aptitudes and development of counseling techniques.

(2) The development of extensive programs in counseling, testing, activities, foreign student affairs, recreation, financial counseling, faculty counseling and vocation guidance.

(3) Professional training of student personnel workers in the departments of psychology and educational psychology. Highlights of the conference were two dinner meetings in the Campus Club in Coffman Memorial Union.

Donald G. Marquis, professor of psychology at the University of Michigan, was principal speaker at the first dinner meeting, discussing "Selective and Competitive Recruiting for the Professions." Professor Marquis is president of the American Psychological association and is chairman of the

games which they prefer. Play nights also are arranged for those girls who dodge the more strenuous activities. Women's Athletic Association, a student organization, plays a large part in organizing teams and carrying on participation activities. It operates its own booth where women students may sign up at the "interest table" and all

## Mothers Day Spring Event Set for May 8

Dinner in Ballroom of Coffman Union Will Be Main Event

### VISITIN' ROUND SET

University President, J. L. Morrill, to Be Chief Dinner Speaker

The University of Minnesota's annual Mothers Day, one of the year's principal events bringing together people from off-campus to meet with faculty, students and administrative officers, will be conducted on Saturday, May 8, as an all-day affair culminating in a dinner at 5:30 p.m. in Coffman Memorial Union.

Mothers Day has been conducted for more than twenty consecutive years and has proved highly popular in that it brings mothers of students from all parts of the state. It gives them an opportunity to visit sons or daughters, to meet their friends and teachers, to visit their classes, or to stop in at the Library, Museum or other points of interest to gain an idea of the University's operation.

### INVITATION

This is your invitation to attend Mothers Day and the Mothers Day Dinner at the University of Minnesota, Saturday, May 8.

Mothers will register in Coffman Union or at the Farm Union, St. Paul Campus.

Dinner tickets at \$1.50 per person should be bought in advance through son or daughter. Tickets will go on sale Thursday, April 20, at the Information desk, Coffman Memorial Union. Dinner at 5:30 p.m. in the Main Ballroom.

Mothers who wish to attend the matinee performance of "Il Trovatore" in Northrop Auditorium may order seats from the Opera Ticket Office, 106 Northrop Auditorium. Cheaper seats are gone, but some at \$6 and \$7.20 remain.

Main events of the dinner will be a welcome to the mothers by Miss Billie B. Hull, president of Associated Women Students, a response by one of the mothers, and an address to the visiting mothers by President J. L. Morrill.

Please come, and make arrangements promptly to have your son or daughter purchase dinner tickets. They will remain on sale until the capacity of the ballroom has been filled.

**THE UNIVERSITY WELCOMES YOU**

Mothers may stop first in Coffman Memorial Union (Farm Union on the St. Paul campus) as they arrive. They will then be free to visit about the campus with their sons and daughters during the afternoon. While there is no specially arranged event at noon, many groups, such as sororities, fraternities and church groups will entertain their mothers at a luncheon at noon.

Because the Metropolitan Grand Opera Company will be singing "Il Trovatore" in Northrop Memorial Auditorium that afternoon, no special show will be produced there. However, some tickets remain for the opera, although these

committee on human resources of the Research and Development board.

Speakers at second dinner were: W. H. Cowley, professor of higher education at Stanford university, speaking on "Historical Background of Student Personnel Work"; President Emeritus Guy S. Ford, now executive secretary of the American Historical association, speaking on "Twenty-five Years at Minnesota"; and Donald J. Shank, director of student personnel at Cornell university, who presented "Greetings from the American Council on Education." President J. L. Morrill of the University of Minnesota presided at the dinner.
