## OCLC Research Update

*OCLC; edited*

Have you heard about the new OCLC Research YouTube Channel? Visit the following URL:

<http://www.youtube.com/user/OCLCResearch>

These three videos are currently available:

- *Born Digital*, which asks the question, “What does ‘born digital’ mean to you?” and provides some thoughtful answers.

- *Roy’s Treehouse #1: Up in the Clouds*, in which Roy Tennant provides a quick example of how cloud computing can make you more effective.

- *Greening ILL Practices*, which provides an overview of green packaging and shipping practices covered in the OCLC Research report.

Also check out a recently published document *OCLC Research and the RLG Partnership: A Five Year Overview of Accomplishments*:

<http://www.oclc.org/research/partnership/highlights/2006-2010.pdf>

The document highlights some of the accomplishments over the last five years that have had high impact or have changed the topography of the information landscape.

Nearly five years ago, RLG and OCLC joined to create a venue through which affiliated institutions could collectively identify, analyze, prioritize and design scalable solutions to shared information challenges. Since then, OCLC Research and the RLG Partnership have brought to fruition a globally influential program of work that has provided value to the library, archive and museum communities worldwide. Together, we’ve accomplished a large array of initiatives, publications and achievements, some of which are highlighted in the report. ■

## WorldCat Collection Analysis: Conference Call Summary

Mark Wilhelmi, Minitex/BATS

WorldCat Collection Analysis (WCA) is OCLC's online collection management service. Recently, WCA subscribers in the Minitex region came together via conference call to discuss their experiences. There were nine participants – eight from libraries in our region plus Meghan Hopkins, WCA Product Analyst from OCLC. All but two of the librarians were from academic libraries.

Everyone had at least a few words to say; some quite a bit. Some are working with WCA currently or have done so in the past; others have never used it because they haven't found the time. Those who have experience with WCA use it for specific time-limited projects as the need arises and not for ongoing analysis. The most popular use is for weeding. The majority of the participants has used WCA to support weeding or would like to. Two are culling their entire collections.

Only three have done peer comparisons, and one of the three did not find them useful. Two used WCA for program reviews. No one has used it to compare a collection with pre-defined groups, or authoritative lists or to analyze ILL or circulation activity.

There was some concern that results produced by WCA did not accurately reflect the collections. Hopkins explained that that can happen if a library has not kept its holdings up-to-date in WorldCat. Also, holdings set after the quarterly update of a library's file will not be reflected in WCA until the next update.

Meghan also told us that OCLC is developing a snapshot view of the holdings of any library that has ever subscribed to WCA or been included in a comparison group. With it libraries won't be able to compare their collections to other libraries, but they could evaluate their own collections. There would be no additional charge for this option.

In general, the group was neither enthusiastic about WCA nor particularly critical of it. It seemed that they may not expect a lot from it, but they are still interested in using it. I encouraged them to take advantage of training and documentation available from OCLC and Minitex.

Participants in the call were able to talk about what they are doing or want to do and get questions answered. After listening to their colleagues, some were inspired to

try using Collection Analysis for curriculum alignment, peer comparisons, or circulation analysis. ■

## EZproxy Hosted Service Now Available from OCLC

OCLC; edited

The new hosted version of EZproxy makes it even easier for libraries to deliver eContent and make services accessible to their users wherever they are, at whatever time they choose. A pilot version of the hosted service has been active with five participating libraries since April 2009.

Libraries that subscribe to the EZproxy hosted service receive such additional benefits as:

- Timely addition of new databases
- Reduced reliance on technical staff for initial configuration or ongoing configuration file changes
- Peace of mind provided by a secure environment and security for user information
- 24/7/365 access monitoring and reporting on usage
- Elimination of local proxy server (or other hardware maintenance)
- Automatic updating for bi-annual enhancements

EZproxy hosted service is available as a yearly subscription, based on FTE or population served. All hosted implementations will run the latest release of EZproxy, currently version 5.30. Current EZproxy client users can use their existing configuration files when moving to the hosted service. New EZproxy users also receive up to ten (10) hours of configuration time in the first year's subscription. OCLC supplies the security certificate for libraries who subscribe to the hosted service.

"Hosted EZproxy is another step toward OCLC member libraries being able to implement a single, simple electronic content solution that includes hosted EZproxy, the WorldCat knowledge base, licensed resource management, and integrated link resolution" says Andrew Pace, Executive Director, Networked Library Services.

To learn more about the hosted EZproxy service, plan to attend one of the introductory Webinars:

- Thursday, Jan. 20, 1:00 p.m. (Central)
- Friday, January 21, 9:00 a.m. (Central)

To subscribe to the EZproxy hosted service, contact [EZproxy@oclc.org](mailto:EZproxy@oclc.org) with your name, institution and FTE or community served. ■

## General

### OCLC Increases Content Accessible through WorldCat Local

*OCLC; edited*

Library users can now find more than 700 million items through the WorldCat Local service as the OCLC cooperative expands agreements with content providers to make more content in a variety of formats accessible to users.

In addition to the 200 million records contributed by OCLC member libraries worldwide, 500 million items from leading publishers, aggregators and mass digitization efforts are also now accessible through WorldCat Local.

OCLC has recently added content to WorldCat Local from EBSCO; Gale, which is part of Cengage Learning; Modern Language Association; ProQuest and the U.S. Department of Energy. There are now more than 400 million articles, 170 million books, 10 million eBooks and 1,100 databases accessible through the WorldCat Local service.

Additional agreements have been signed with ABC-CLIO, American Psychological Association, Association for Computing Machinery, BioMed Central, BioOne, Cambridge University Press, Emerald, IGI Global, Sabinet, Sage, Taylor & Francis and World Bank Publications.

In addition to new content, OCLC continues to add new features and functionality to WorldCat Local. OCLC recently added direct links to full-text articles and open access objects from the brief results in WorldCat Local and WorldCat.org. This new feature is enhanced by the new WorldCat knowledge base functionality that combines data about libraries' electronic content with linking features that enable access to the content.

### Connexion Client Tip

*Mark K. Ehlert, Minitex/BATS*

Windows 7 users may have encountered a problem after minimizing the Connexion Client application to the Windows taskbar—the inability to resurrect the client from the taskbar.

This topic came up for discussion on the OCLC-CAT e-mail discussion list a few weeks ago, and of the several options given to ameliorate the problem, Melissa Mineo, cataloger at Coutts Information Services, offered the most efficient solution<sup>1</sup>: the keyboard shortcut for maximizing active windows.

- Click on the "stuck" Connexion Client icon in the taskbar so it's made active
- While holding down the WINDOWS key found on your keyboard, press the UP ARROW key. Connexion should re-emerge from the taskbar. ■

## Cataloging & Metadata

### Upcoming ALCTS Webinars

*Sara Ring, Minitex/BATS*

The ALA Association for Library Collections and Technical Services (ALCTS) recently announced quite a few new webinars. To view their complete schedule of events, visit:

<http://www.ala.org/ala/mgrps/divs/alcts/confevents/index.cfm>

**Note:** All times given below are in Central Standard Time. All webinars start at 1:00 p.m. and last approximately one hour.

January 19:	Finding Savings in the Collection Budget
January 26:	Copyright and Contracts
February 2:	Changes from AACR2 to RDA. Part 1
February 9:	Changes from AACR2 to RDA. Part 2
March 2:	RDA and Serials Catalogers
March 16:	Linked Library Data
March 23:	The Fine Art of Weeding

<sup>1</sup> Mineo, Melissa. "Re: [OCLC-CAT] Minimizing the OCLC window." *OCLC-CAT*. OCLC, 5 Nov. 2010. E-mail. 17 Dec. 2010.

April 6:	Preparing Copy Catalogers for RDA
April 13:	Repository Metadata
April 27:	Organizing the Evaluation of Electronic Resources
May 11:	Utilizing Institutional Repositories
May 25:	Intellectual Property Issues for Librarians
June 1:	Reengineering the IR to Engage Users ■

## Cataloging & Metadata

### RDA Test Records Available for Download

Mark K. Ehlert, Minitex/BATS

With the hands-on portion of the U.S. RDA Test coming to a close at the end of December 2010, the Library of Congress (LC) has begun posting for public consumption bibliographic and authority records produced and edited by formal and informal test participants following RDA guidelines. Many of these records already exist in WorldCat; making them available from a single location. This is convenient, especially for the authority records, which are more difficult to find in the online authority file. You may download the records—published only in large batches, not individually—via the links provided on the *RDA Test Record Download* webpage:

<http://www.loc.gov/catdir/cpsol/RDAtest/rdatestrecords.html>

The records are available in two flavors: text format and MARC format. Text format records are best viewed in Microsoft Word or some other word processor. Non-roman characters and diacritics may not display correctly in simpler text viewers, such as Notepad. If a file conversion window appears when opening a file, select *Unicode (UTF-8)* or an equivalent option. MARC format records require a dedicated application such as MarcEdit for viewing. You may also import them through Connexion Client to a local save file.

#### MarcEdit Instructions

After downloading the RDA record file(s), change the filenames' *.bib* and *.aut* extensions to *.mrc*. Open MarcEdit and select the MarcEditor tool. From the MarcEditor menubar click *File --> Open*. Pick the file you wish to examine and click the "Open" button.

#### Connexion Instructions

Viewing the records in Connexion Client is a little more involved. Step-by-step instructions on using the Import Records function follow:

- Save the MARC format file(s) to your computer; revising

the *.bib/.aut* extensions is not necessary.

- In Connexion Client select from the menu *File --> Import Records..* The "Import Records" window appears.
- Select the bibliographic or authority file you wish to import by clicking the "Browse" button under the "File to Import" text box (the import mechanism can tell which set of records is bibliographic and which contain authority data).
- After the "Import File" window pops up, choose your file and click the "Open" button; the name of the import file will now display in the "File to Import" text box.
- The bottom half of the "Import Records" window offers a choice of where to deposit the records; due to the large number of records, I recommend selecting the *Import to Local Save File* option.
- Click the "Local File Manager" button to select or create default local save file(s) for the RDA records, just as you would with any other set of records (make sure the proper file type is selected in the "Choose File Type" section at the head of the "Local File Manager" window). Click the "Close" button when you are finished.
- The default local save file locations will now appear in the "Bibliographic" and "Authorities" text boxes in the "Import Records" window.
- Click the "Record Characteristics..." button to set the record standard and character set options; regardless of whether you are importing bibliographic records or authority records, the "Record Standard" option should be set to *MARC 21* and the "Character Set" option to *UTF-8 Unicode*; diacritics will not render correctly if the latter is set to *MARC-8*.
- Click the "Options..." button if you wish to apply constant data or add "My Status" text to the records.
- Click the "OK" button to import the records; larger sets of records may take 15-20 minutes to import.
- When the import process is complete, a summary report should appear on the screen; feel free to close this, then open the local bibliographic or authority save file to view the RDA records.

#### Notification

LC asks that if you download records from the *RDA Test Record Download* website you send a short message to [LChelp4rda@loc.gov](mailto:LChelp4rda@loc.gov) informing them of your interest. LC will report back to you as more records are posted to the site over the next few weeks. ■

## Upcoming RDA Training from Minitex

The Minitex Bibliographic and Technical Services (BATS) unit has scheduled the following workshops on RDA cataloging topics. RDA training sessions on other formats will be announced soon.

The workshops listed below are being presented in person at Wilson Library (room S30C), Minneapolis Campus, University of Minnesota. For those outside the Twin Cities region, webinar sessions covering the same material will be announced soon. To register, click on the following URL:

<http://www.minitex.umn.edu/Training/Default.aspx?Filter=CatMetaLive>

### RDA for Copy Catalogers: A How-To for Print Monographs

This workshop introduces the experienced copy cataloger to Resource Description and Access (RDA). We will focus our attention on the descriptive cataloging of print monographs and its application in MARC bibliographic records through lecture and hands-on exercises.

- Friday, Jan. 21, 8:30 a.m. – 4:00 p.m.
- Tuesday, Feb. 1, 8:30 a.m. – 4:00 p.m.

### RDA for Copy Catalogers: A How-To for Audiovisual Materials

This workshop introduces staff who are experienced copy catalogers of audiovisual materials to Resource Description and Access (RDA). The scope of this

training session focuses on the descriptive cataloging of A/V materials and its application in MARC bibliographic records through lecture and hands-on exercises.

- Tuesday, Feb. 15, 8:30 a.m. – 4:30 p.m.
- Thursday, Feb. 24, 8:30 a.m. – 4:30 p.m.

### RDA for Original Catalogers

This workshop provides further instruction on Resource Description and Access (RDA) for original catalogers, concentrating on the authority work and advanced aspects of descriptive cataloging that are changed under the new cataloging guidelines.

- Friday, Feb. 11, 8:30 a.m. – 4:00 p.m.
- Tuesday, Mar. 1, 8:30 a.m. – 4:00 p.m.
- Tuesday, Mar. 29, 8:30 a.m. – 4:00 p.m.

## Minitex OCLC Training

Minitex Bibliographic and Technical Services (BATS) has scheduled the following webinars on OCLC-specific cataloging topics for January. To register, click on the following url (to view only the OCLC courses, choose the filter "OCLC"):

<http://www.minitex.umn.edu/Training>

### Connexion Browser Module 1: WorldCat, MARC, & Browser Basics

Connexion Browser is a web-based interface for OCLC cataloging, often preferred by those who do lower volume or occasional cataloging, or for parts of a segmented workflow that focuses on searching.

- Jan. 20, 11:00 a.m. – 12:00 p.m., Central

### Connexion Client Module 2: Basic Searching

This class provides instruction on performing basic bibliographic searches with Connexion Client. Participants will learn how to search WorldCat for one

record at a time and to evaluate whether a record matches the item to be cataloged.

- Jan. 12, 1:30 p.m. – 2:45 p.m., Central

### Connexion Client Modules 3 & 4: Basic Editing, Record Processing, and Save File Maintenance

This course demonstrates how to use Connexion Client to process MARC records one at a time— including editing, update holdings, exporting, and creating labels. It also covers online and local save files.

- Jan. 25, 1:30 p.m. – 3:00 p.m., Central

## OCLC Courses to Maximize Your Subscriptions

OCLC; edited

This month, OCLC is offering a series of free courses to help libraries located in the U.S. and Canada get the most out of their OCLC subscriptions.

### Maximizing the Value of WorldCat.org

Jan. 11, 12:00 – 1:00 pm (Central)

<http://z.umn.edu/27r>

This course provides a brief introduction to the WorldCat.org platform and illustrates how libraries can help patrons derive maximum advantage from the service.

### Maximize the Value of Your OCLC Cataloging Subscription

Jan. 20, 12:00 – 1:00 pm (Central)

<http://z.umn.edu/27p>

This course helps cataloging and technical services managers contain costs, improve efficiency and use staff resources most effectively by helping them take full advantage of the value of their OCLC cataloging subscription. It explains the OCLC cataloging interfaces, activities and services that are included in the OCLC cataloging subscription.

### Why Do WorldCat Holdings Matter?

Jan. 14, 12:00–1:00 pm (Central)

<http://z.umn.edu/27q>

This course reviews the benefits of accurate WorldCat holdings, and provides information on the available methods for maintaining holdings. ■

## Archived ISBN Webinar

Mark Wilhelmi, Minitex/BATS

The International Standard Book Number plays a crucial role in our work. Searching WorldCat would be a lot more complicated without it. But beyond that what do we know about it? Who creates ISBNs? How did they come to be? Are they just an arbitrary string of numbers or do they contain information about the item? A few years ago, 13 digit ISBNs began to appear. Why did that happen?

If you have ever been at all curious about the ISBN, Minitex recorded a 35 minute archived webinar that can answer your questions and a lot more. To view *The International Standard Book Number . . . and How It Grew* go to:

<http://www.minitex.umn.edu/Training/Details.aspx?SessionID=138> ■

## CONTENTdm 6 Preview

OCLC; edited

Created with a user-centered design approach, CONTENTdm 6, which will be released in early 2011, offers digital content discovery with a completely redesigned end-user interface. It also offers a simple way to customize the appearance of your digital collection's public interface. You can easily apply a branded look and feel by adding a name, logo, theme, colors, collection descriptions and more - all without programming skills.

In January, OCLC is offering a webinar to help users learn more about CONTENTdm 6 and provide a demonstration of the new, redesigned end-user interface. If you haven't seen CONTENTdm in a while, come and take another look!

Wednesday, Jan. 19, 1 p.m. (Central)

<http://z.umn.edu/27u> ■

## CONTENTdm Featured Collections

OCLC; edited

This month, four collections from the CONTENTdm Collection of Collections are featured on the OCLC website. The featured collections are *University of Houston Buildings*, *The Editorial Cartoons of J.N. "Ding" Darling*, *McMillan Memorial Library Local History* and *Mathias J. Alten*.

### University of Houston Buildings

University of Houston, M.D. Anderson Library

<http://digital.lib.uh.edu/cdm4/browse.php?CISOROOT=%2Fp15195coll3>

In this collection, researchers will find photographs of University of Houston buildings from Agnes Arnold Hall to the postwar Veterans Village (no longer standing). Almost 300 images from the University Archives document the built environment of the main campus from the 1930s to the 1990s.

Additional photographs in print and negative format may be viewed by visiting the University Archives in person.

## The Editorial Cartoons of J.N. "Ding" Darling

*Drake University, Cowles Library Collection*

<http://www.lib.drake.edu/heritage/ding-darling/index.html>

Prolific editorial cartoonist Jay Norwood 'Ding' Darling was a Pulitzer Prize winner and was widely read across America. Cowles Library's extensive collection of Ding Darling artist proofs has been digitized and is presented here online. Search or browse through thousands of editorial cartoons that span the first half of the 20th Century.

## McMillan Memorial Library Local History

*McMillan Memorial Library*

<http://content.mpl.org/cdm4/browse.php?CISOROOT=/mcml>

McMillan Memorial Library of Wisconsin Rapids, WI

collects materials concerning local history. Specifically the collection includes: the Tom Taylor Books (100 years of Pictorial & Descriptive History of Wisconsin Rapids); historical postcards; photographs of Vesper, Wisconsin; early city directories and plat books; books about Wisconsin Rapids or by local residents; materials related to the cranberry, lumber and paper industries; and newspaper articles, pamphlets and brochures.

## Mathias J. Alten

*Grand Valley State University*

<http://gvsu.cdmhost.com/gvpages/mjalten.php>

Papers and paintings of West Michigan painter, Mathias J. Alten (1871-1938) represent one of the most important collections in the holdings of both the University's Special Collections and the University Art Gallery. Alten, who came to Grand Rapids as a youth, is a celebrated American regionalist. The photographs and papers document his family life and career, and support the collection of Alten paintings owned by the University. ■
