May 9, 2003

Congratulations to all of the members of the University of Minnesota Medical School class of 2003. Today you will be receiving your doctoral hoods and entering the second phase of your education as a physician. Soon you will be starting your residencies, both here in Minnesota and across the country. You have all worked very hard to get to this point in your academic careers, aided in no small part by the dedication and devotion of your families, partners, and friends.

You will be heading for many different careers in medicine, from specialty practice to primary care and from practice in small rural communities to large academic medical centers. However, wherever you go and whatever your specialty, you will be connected by the mission of the medical professional which connects us all. You will all be engaged in some way in improving the lives of patients through diagnosing, treating, and preventing disease. You will see many changes in the way medicine is practiced and what we know about human health and disease during the years of your practice and so the commitment to learning which you began long before you started medical school must continue to guide your practice throughout your academic careers.

You also will be guided by the traits which have characterized the art of medicine from its earliest inception, namely to insure the welfare of your patients, to exhibit compassion, and to remember that the communication between doctor and patient is the highest form of the art of medicine. The oath for new physicians, which you will recite today, should be your guide as you meet the needs of the health care issues of an increasingly diverse society.

Today you will receive your doctoral hoods. The colors of the hoods that you wear in the ceremony, maroon and gold, represent the University of Minnesota Medical School and the proud traditions of medicine here which are passed on to our graduates. The green velvet symbolizes the color of the medical profession.

On behalf of all of the faculty and staff of the University of Minnesota Medical School, I would like to say that we wish you well and congratulate you on your very significant achievements. We are extremely proud of you and of all that you have accomplished. Wherever you go in your medical careers you will always be part of Minnesota medicine and we will welcome you back at any point to visit with us. You represent the future of medicine and we know that because of you the future of medicine in this country is very bright indeed.

Sincerely yours,

Deborah E. Powell, M.D.

OATH FOR NEW PHYSICIANS

In the tradition of Hippocrates and the men and women through the ages who have dedicated their lives to the art and science of medicine I make the following pledge:

The respect and dignity of patients and the confidential nature of our relationship are foremost in my service to them. I will value their lives as I value my own.

I acknowledge my limitations and need for continued education. I will seek the knowledge and inspiration of my colleagues, friends, and patients.

My work shall be dedicated to improving the quality of life for those who seek my assistance. I will honor the wishes and needs of the patient, recognizing that death is not always an enemy. I will do no harm.

I will strive always to improve the practice of medicine, to provide a level of care that is ethical, moral, and just. I expect the same standards from my colleagues and will not tolerate their indifference, greed, or unethical behavior.

My profession is an honored one. I will not violate the trust society has placed in me by allowing race, religion, sexual orientation or social standing to affect my judgment or ability to take care of patients. I will be humble.

I will consider the tools of my profession to be knowledge, compassion, and patience. I will share these tools freely with my colleagues and patients alike.

I shall do my utmost to provide the vulnerable members of society the care and attention they need to assure their health, dignity, and protection. I see all life as sacred.

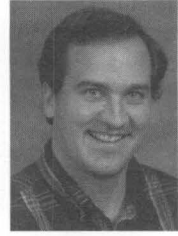

In the presence of my teachers, my family, and my friends I make these promises solemnly and freely. With this oath I willingly assume the rewards and responsibilities of a physician.

Troy Allan Sikkink
July 27, 1968 to February 25, 2003

M.D. degree granted, posthumously, May 10, 2003

Each one of us is born for a specific reason and purpose, and each one of us will die when he or she has accomplished whatever was to be accomplished. The in-between depends on our own willingness to make the best of every day, of every moment, of every opportunity. The choice is always yours.

~Elisabeth Kubler-Ross

Although Troy has been taken from us much too soon, he will forever live on in the lives that he touched. To know Troy in any way was to be his friend. I pray that the passion and excitement Troy had for medicine will continue to live on through all of his colleagues and friends.

~Eileen Sikkink

The University of Minnesota is committed to the policy that all persons shall have equal access to its programs, facilities, and employment without regard to race, religion, color, sex, national origin, disability, age, veteran status, sexual orientation, creed, marital status, or public assistance status.
