May 2, 2009

Congratulations to all the members of the University of Minnesota Medical School Class of 2009. Today you will receive your doctoral hoods and enter the second phase of your education as a physician. Soon you will start your residencies, whether here in Minnesota or across the country. You all have worked very hard to get to this point in your academic careers, aided in no small part by the dedication and devotion of your families, partners, and friends.

You will head into many different careers in medicine, from specialty practice to primary care and from practice in small rural communities to large academic medical centers. Wherever you go and whatever your specialty, however, you will be connected by the mission of the medical profession that connects us all. You will improve the lives of patients through diagnosing, treating, and preventing disease. You will see many changes in the way medicine is practiced and in what we know about human health and disease during the years of your practice. So, the commitment to learning you possessed long before you started medical school must continue to guide your practice throughout your careers.

You also will be guided by the traits that have characterized medicine from its inception: to ensure the welfare of your patients, to exhibit compassion, and to remember that the communication between doctor and patient is the highest form of the art of medicine. The modern version of the Hippocratic Oath, which you will recite today, should be your guide as you meet the health-care needs of an increasingly diverse society.

Your doctoral hoods also are important. The colors of the hoods that you will receive today, maroon and gold, represent the University of Minnesota Medical School and the proud traditions of medicine here that we pass on to our graduates. The green velvet symbolizes the medical profession.

On behalf of the faculty and staff of the University of Minnesota Medical School, I wish you well and congratulate you on your very significant achievements. We are extremely proud of you and of all that you have accomplished. Wherever you go in your medical careers, you will always be part of Minnesota medicine. We will welcome you back at any time to visit with us. You represent the future of medicine. We know that, because of you, the future of medicine in this country is very bright indeed.

Sincerely yours,

Deborah E. Powell, M.D.

OATH FOR NEW PHYSICIANS

In the tradition of Hippocrates and the men and women through the ages who have dedicated their lives to the art and science of medicine, I make the following pledge:

The respect and dignity of patients and the confidential nature of our relationship are foremost in my service to them. I will value their lives as I value my own.

I acknowledge my limitations and need for continued education. I will seek the knowledge and inspiration of my colleagues, friends, and patients.

My work shall be dedicated to improving the quality of life for those who seek my assistance. I will honor the wishes and needs of the patient, recognizing that death is not always an enemy. I will do no harm.

I will strive always to improve the practice of medicine, to provide a level of care that is ethical, moral, and just. I expect the same standards from my colleagues and will not tolerate their indifference, greed, or unethical behavior.

My profession is an honored one. I will not violate the trust society has placed in me by allowing race, religion, sexual orientation, or social standing to affect my judgment or ability to take care of patients. I will be humble.

I will consider the tools of my profession to be knowledge, compassion, and patience. I will share these tools freely with my colleagues and patients alike.

I shall do my utmost to provide the vulnerable members of society the care and attention they need to assure their health, dignity, and protection. I see all life as sacred.

In the presence of my teachers, my family, and my friends, I make these promises solemnly and freely. With this oath, I willingly assume the rewards and responsibilities of a physician.
