\*\*\*\*\*HOLIDAY HOURS\*\*\*\*\*

The UCC will be closed  
from 2 PM on July 3rd  
through 6 PM on July 5th.  
Have a happy holiday!

In addition to the special holiday hours,  
the Computer Center will also close early  
on July 1st. The Center will be closed  
from Midnight to 8 AM rather than the  
normal hours of 4 - 8 AM. (This is a  
"once-only" change necessitated by our end-  
of-year accounting procedures.)

## FROM THE WEST BANK

West Bank Computer Center

As of July 1, the default value for page eject, which is currently set at 62 lines per page, will be set at 66 lines per page to bring the West Bank printer to compatible spacing with other CDC 6600 printers. This means that output will print continuously from one page to the next unless you select a page eject or reset the default value for automatic eject. To reset the default value to 62 lines per page, output an "R" in column one. To return to the 66 lines per page, output a "Q" in column one.

SPSS Short Course

A one-week short course on SPSS (Statistical Package for the Social Sciences) will be offered by the Social Sciences Research Facilities Center from Monday, June 21 through Friday, June 25. The course will be held between 4:00 and 5:00 PM in Room 205 Blegen Hall. A number of the manuals, "SPSS", by Norman H. Nie et al. (McGraw-Hill, 1970), have been ordered by the West Bank bookstore. Manuals are desirable but not necessary for the course.

The SPSS system is a series of statistical programs that share a wide variety of modification, transformation, and annotation features desirable to social science researchers. The SSRFC feels that this system, considering ease of use, is probably the best general-purpose statistical package now available at the University.

The course is free and there is no registration necessary. Those desiring more information on the course should call the SSRFC at 373-5599.
