

Minnesota County Report:

**The Economic Impact of
Expenditures By Travelers
On Minnesota Counties and Regions**

June 2005 – May 2006

Prepared for:

Explore Minnesota Tourism
State of Minnesota

UNIVERSITY OF MINNESOTA

and

**Minnesota Arrowhead Association
Minnesota Heartland Tourism Association
Southern Minnesota Tourism Association
Metro Tourism Committee**

Prepared by:

Davidson-Peterson Associates
A Division of Digital Research, Inc.
201 Lafayette Center
Kennebunk, ME 04043

Table of Contents

1.0 Traveler Expenditures Ranked Numerically

2.0 Traveler Expenditures by Quarter

3.0 Direct Economic Impact of Expenditures by Travelers by County

4.0 Total Economic Impact of Expenditures by Travelers by County

5.0 Direct Economic Impact of Expenditures by Travelers by Region and Quarter

6.0 Total Economic Impact of Expenditures by Travelers by Region and Quarter

Please note that the study objectives and the details of procedures used to develop the impacts reported here may be found in the state report entitled, "The Economic Impact of Expenditures by Travelers on Minnesota, June 2005 – May 2006."

3.0 Direct Economic Impact of Expenditures by Travelers by County

The Direct Economic Impacts of Expenditures by travelers are those economic benefits due directly to the traveler expenditures. For example, when traveler expenditures pay the salary and benefits for a hotel desk clerk, that amount would be considered in the direct impact for both jobs and wages.

Please note that the sum of the impacts on the four regions will not equal the State totals. Such a result occurs because the impacts which cross region boundaries (leakage from one region to another) are counted in the State impacts – but are excluded from the regional totals.

County impacts are allocated from the regional totals but leakage from one county to another is not taken into account. Thus the sum of the county impacts will equal the total for the region. Counties should note that the impacts are actually modestly lower than those presented since correcting for county leakage is not done in these tables.

4.0 Total Economic Impact of Expenditures by Travelers by County

The Total Economic Impacts of Expenditures by Travelers include all of the direct impacts but also include the estimated indirect impacts. Indirect impacts are the additional jobs and wages supported during additional rounds of spending. For example, the front desk clerk pays income tax and property tax which are an indirect result of tourist expenditures. The front desk clerk also pays her utility bills, buys food for her family, shops for gifts, etc. Those dollars create the indirect impact of the initial traveler expenditures through many additional rounds of spending in the economy.

Please note that the sum of the impacts on the four regions will not equal the State totals. Such a result occurs because the impacts which cross region boundaries (leakage from one region to another) are counted in the State impacts – but are excluded from the regional totals.

County impacts are allocated from the regional totals but leakage from one county to another is not taken into account. Thus the sum of the county impacts will equal the total for the region. Counties should note that the impacts are actually modestly lower than those presented since correcting for county leakage is not done in these tables.

5.0 Direct Economic Impact of Expenditures by Travelers by Region and Quarter

The Direct Economic Impacts of Expenditures by travelers are those economic benefits due directly to the traveler expenditures. For example, when traveler expenditures pay the salary and benefits for a hotel desk clerk, that amount would be considered in the direct impact for both jobs and wages.

Please note that the sum of the impacts on the four regions will not equal the State totals. Such a result occurs because the impacts which cross region boundaries (leakage from one region to another) are counted in the State impacts – but are excluded from the regional totals.

County impacts are allocated from the regional totals but leakage from one county to another is not taken into account. Thus the sum of the county impacts will equal the total for the region. Counties should note that the impacts are actually modestly lower than those presented since correcting for county leakage is not done in these tables.

6.0 Total Economic Impact of Expenditures by Travelers by Region and Quarter

The Total Economic Impacts of Expenditures by Travelers include all of the direct impacts but also include the estimated indirect impacts. Indirect impacts are the additional jobs and wages supported during additional rounds of spending. For example, the front desk clerk pays income tax and property tax which are an indirect result of tourist expenditures. The front desk clerk also pays her utility bills, buys food for her family, shops for gifts, etc. Those dollars create the indirect impact of the initial traveler expenditures through many additional rounds of spending in the economy.

Please note that the sum of the impacts on the four regions will not equal the State totals. Such a result occurs because the impacts which cross region boundaries (leakage from one region to another) are counted in the State impacts – but are excluded from the regional totals.

County impacts are allocated from the regional totals but leakage from one county to another is not taken into account. Thus the sum of the county impacts will equal the total for the region. Counties should note that the impacts are actually modestly lower than those presented since correcting for county leakage is not done in these tables.
