4-H POULTRY FLOCK RECORD CARD

For Recording Egg Production, Meat Production, Disposal, and Mortality
(Hang in the poultry house for recording daily)

1. Enter egg production, meat production, disposal, and mortality figures daily. Use the Cull column for birds culled, sold, or used at home for meat. Use the Died column for birds that died or were removed because of poor health.
2. Add the columns at the end of each month.
3. Enter your average number of birds. Figure birds added or disposed of during month on basis of number of days they actually were in the flock.
4. Record eggs per hen, as determined by dividing eggs laid by average number of hens.
