Gasoline Economy

(0:40)

The Environmental Protection Agency has released a list of gasoline mileage ratings for 1974 model cars sold in the United States.

The miles-per-gallon figures are based on tests for car manufacturer's compliance with the agency's standards for air pollution control.

The actual mileage per gallon a consumer receives depends on several factors. These include the manner in which the car is driven, frequency of cold starts, and use of power-absorbing accessories such as air conditioning, power steering and automatic transmission.

For a free copy of EPA's listing of miles per gallon for 1974 cars, write to "Fuel Economy," Office of Public Affairs, Environmental Protection Agency, Washington, D. C. 20460.
