The Faculty Dancing club of the University of Minnesota will enjoy its first formal party of the spring quarter, a post-Lenten dance, Thursday evening (April 10). More than 200 members and their guests are expected to attend, according to Dr. Tracy F. Tyler, president of the club. Dancing will be from nine until midnight in the Main ballroom of Coffman Memorial union.

Preceding the dance will be a social period during which members and their guests will complete their dance programs. Mrs. Alfred O. C. Nier and members of her refreshment committee will preside at the punch bowl during intermission.

Several members of the club will hold small dinner parties in their homes prior to the dance.

Arrangements for the party, the seventh of the current school year, are in charge of committees having the following chairmen: Dr. William R. McKuen, general arrangements; Mrs. Charles V. Neta, hospitality; Dr. Ralph A. Piper, music; and Mrs. Alfred O. C. Nier, refreshments.

The professors, who with their wives, constitute the executive committee of the club are: Samuel T. Coulter, William L. Hart, William S. Howell, William R. McKuen, Charles V. Neta, Alfred O. C. Nier, Edmund A. Nightingale, Norville G. Purvier, Ralph A. Piper, Clayton O. Root and Tracy F. Tyler.

The search for more constructive uses for atomic power lies in the future for Thomas Edmund Carey, Jr., a freshman in the School of Chemistry at the University of Minnesota.

The son of Mr. and Mrs. Thomas E. Carey, of 520 Tenth street, Red Wing, Mr. Carey is one of the 16,428 veterans who registered for the fall quarter at the University.

After serving 18 months in Europe as a machine gunner in the infantry, he took advantage of the G.I. Bill by enrolling in the University's Institute of Technology.

He plans to major in physics, and after his graduation in 1950, hopes to do atomic research.

SPECIAL TO: THE RED WING REPUBLICAN-EAGLE

Script-writing for radio is the favorite extra-curricular activity of Raymond William Campbell, son of Mr. and Mrs. R.W. Campbell, of Route #2, Red Wing, who is now enrolled in a pre-law course at the University of Minnesota.

When he's not busy with homework for his classes in politics, history, English, speech, ethics and logic, Mr. Campbell spends his time with the Workshop of the University Radio Guild.

He was auditioned by the Guild last fall, and now joins in dramatic presentations over Radio Station KUOM. This 5,000 watt station is operated by the University of Minnesota, and has studios on the main campus in Minneapolis, and on the farm campus in St. Paul.

Now a third-quarter freshman, Mr. Campbell hopes to enter Law School in 1948, and after his graduation there in 1952, he looks forward to a career in politics.

During his senior year at Central High School in Red Wing, in 1946, he did some sports writing for the Red Wing Republican-Eagle.

Eleven years as a certified public accountant in the business world were behind Robert C. Beattie, of 1102 East avenue, Red Wing, when he returned to the academic world at the University of Minnesota to work on a law degree.

Mr. Beattie first graduated from the University in 1933, with a major in business. Since then, he has married and become the father of two children.

While attending classes in Law School, in which 627 students are registered for the spring quarter, Mr. Beattie has been teaching a course in accounting in the School of Business Administration. He is also the graduate counselor for his fraternity, Phi Gamma Delta.

Now a senior law student, Mr. Beattie expects to receive his second degree from the University in June. He will then return to Red Wing to open a law practice.

A combined course in mechanical engineering and business administration keeps James Richard Bandelin busy every minute of his time at the University of Minnesota.

Mr. Bandelin is the son of Mr. and Mrs. O.A. Bandelin, of 927 East avenue, Red Wing. In the Institute of Technology, in which he is enrolled, 4,911 students are registered for the spring quarter.

After five years of work, specializing in heating and ventilating, he will receive his combination degree in the spring of 1949.

On campus, Mr. Bandelin is a member of Phi Delta Theta, social fraternity, and recently retired as treasurer of this group. He is active in committee work for his fraternity, and also participates in intra-mural sports on the fraternity teams.

In addition, he is listed on the membership rolls of Pi Tau Sigma, honorary mechanical engineering society.

SPECIAL TO: THE RED WING REPUBLICAN-EAGLE

After 15 months in India as an Army nurse, Frances Benson, daughter of Mr. and Mrs. C.E. Benson, of Route #2, Red Wing, is back on the University of Minnesota campus, studying nursing education.

Miss Benson, who trained at University Hospital, the largest nursing school in the United States, was graduated in nursing in 1943.

Soon after her graduation, she went into duty with the Army Nurse Corps, and returned to the University last year for more schooling under the G.I. Bill.

Her lessons occupy most of Miss Benson's spare time. Some of her "homework," for instance, involves spending 18 hours a week on ward duty at General Hospital in Minneapolis. For another of her courses, she practices teaching nursing for several hours every week.

Miss Benson is also a member of the Newman Club on campus. After her graduation in the summer of 1948, she plans to do supervisory work in a large hospital.

Activities musical, social and journalistic, as well as matters academic, are part of Al Olson's life at the University of Minnesota. He is the son of Mr. and Mrs. Elmer W. Olson, of 1256 Sixth street, Red Wing.

Mr. Olson is a junior in the School of Journalism, in which seven out of every ten students enrolled are men. He was elected last year to a two-year term on the University's Board of Publications.

Outside of school work, a large part of Mr. Olson's time is spent on duties in his fraternity, Acacia, where he is the Junior Dean and serves as social chairman. He is also a member of the Christian Science student group on the campus.

In addition, Mr. Olson finds time to study music, and is the assistant organist at Andrew Presbyterian Church in Minneapolis.

Elected last fall to Sigma Delta Chi, professional journalism fraternity, Mr. Olson expects to graduate from the University in the spring of 1948.

Minneapolis, April - More than 600 Minnesota educators attending the thirty-third annual University of Minnesota short course and Schoolmen's week will hear Dean M. Schweikhard, state commissioner of education, speak on "Progress in Education in Minnesota", during the Thursday morning sessions (April 3) in Coffman Memorial Union.

The course and program, closing Thursday, is aimed at surveying postwar educational problems, such as the dwindling supply of teachers, the rising cost of education and the international clash of ideologies.

Gov. Luther Youngdahl was scheduled to address the traditional "Knights of the Hickory Stick" banquet at 6:15 p.m. Wednesday in the Union junior ballroom.

The short course will close at 2 p.m. Thursday with a joint open meeting of the Minnesota Education association educational policies commission and the commission of teacher education and professional standards.

W. E. Peik, dean of the University's college of education, will address the joint meeting on "The Emergency in Teacher Preparation and How to Meet It".

Minneapolis, April - "Ivan the Terrible", a Soviet film biography of Czar Ivan IV, will be shown as the first of the University of Minnesota Film Society's six foreign films in Northrop Memorial auditorium Thursday, April 10, at 4 and 8 p.m.

The Russian movie, written, produced and directed by Sergei Eisenstein, will be shown by the University's Visual Education service with English subtitles. Nikolai Cherkassov, Russia's leading dramatic actor today, as Ivan, plays one of the most difficult figures to portray in Russian and world history.

The basic story of the film is the struggle of Ivan IV against the Boyars, a handful of titled barons who split up Russia into numerous warring principalities and feudal holdings.

Sergei Prokofieff, top-ranking Soviet composer whose symphonies, suites and ballet and theater music are considered outstanding examples of the best in modern music, makes his second contribution to cinema music with his symphonic score for "Ivan the Terrible".

Other foreign films to be shown in the University Film society's series will include, "Maria Louise", a German release, April 25; "The Raiders", a British picture, May 22; "Portrait of a Woman", a French film, May 29; "Man's Hope", a Spanish release, June 5, and an unscheduled release for June 12.

Minneapolis, April - The University of Minnesota gallery will exhibit "Fine Arts Under Fire", a "Life" magazine photographic exhibition showing World War II damage to cathedrals, works of art and public buildings of Western Europe, starting Thursday, April 10 in Northrop Memorial auditorium.

Prepared in collaboration with the American Commission for the Protection and Salvage of Artistic and Historic Monuments in War Areas, the exhibit will be shown daily.

The 30 enlarged photographic panels depict the various kinds of damage to historic monuments and the technical problems of preservation and salvage in Italy, France, Belgium, Germany and Austria. Of the five countries, Italy has had the greatest documentation of damage to date.

The photographs also show the commission's personnel at work under combat conditions, and the care of looted and displaced works of art. The exhibit will close April 30.

SPECIAL TO: THE RED WING REPUBLICAN-EAGLE

When James Ross Bennett received his discharge from the Army, he moved his wife and two children to Minneapolis, and entered a pre-law course at the University of Minnesota. He is one of the more than 3,300 married veterans attending the University.

The son of Mr. and Mrs. James Bennett, of 717 Seymour, Red Wing, Mr. Bennett spent more than two years in the Aleutians as a radio operator with the Airways Communications System.

Mr. Bennett lives with his family in a snug three-room apartment at University Village, near the campus. Now a freshman in Law School, he expects to graduate in June, 1950.

Carrying a full course in the Law School, Mr. Bennett reports that he has little time for extra-curricular activities. Some of his classes include the study of property, the relationship between employer and employee, criminal law, and a course in ancient English law.

SPECIAL TO: THE PLAINVIEW NEWS

When the University of Minnesota chorus and symphony orchestra presented "The Seven Last Words of Christ," a sacred cantata by DuBois, at a convocation during Holy Week, Jeanne Douglass, of Plainview, was among the singers.

Miss Douglass, the daughter of Mr. and Mrs. George L. Douglass, of Plainview, is majoring in Spanish, and plans a career as an interpreter in the diplomatic corps after her graduation in June, 1949.

A life-long lover of music, she brought along her collection of records when she moved into Coastock Hall, a women's dormitory on the University campus.

In addition to her courses in Spanish literature, humanities, and French, Miss Douglass keeps up her interest in music with the University chorus, and by taking a course in ensemble singing, where she works with eleven other students on opera scores.

SPECIAL TO: THE LAKE CITY GRAPHIC

Ralph Herbert Link's first love is flying, so it was only natural that he enrolled in a course in aeronautical engineering when he came to the University of Minnesota.

He is the son of Mr. and Mrs. Herbert J. Link, of 420 Lakewood avenue, Lake City. A veteran of World War II, he spent more than two years as a navigator in the Army Air Corps.

In the winter of 1949, Mr. Link will graduate from the University's Institute of Technology, where he is one of the 4,337 veterans registered for the spring quarter.

SPECIAL TO: THE LAKE CITY GRAPHIC

Two Minnesota farms, totaling 550 acres, will be the testing ground for Norbert Leo Ring's four-year course in agriculture at the University of Minnesota.

His parents, Mr. and Mrs. John Ring, live on the family's two farms on Route #4, Lake City. Norbert plans to return to his home this summer to "practice" what he has learned this year at the University.

Mr. Ring will graduate in June, 1950, from the School of Agriculture, Forestry, and Home Economics, the university school of agriculture in the United States.

During this spring quarter, he is studying dairy husbandry, rhetoric, poultry husbandry, and sociology. In addition, he is taking a course in agricultural engineering, for which he works with tractors and farm machinery in the Engineering Building on the Farm campus in St. Paul.

SPECIAL TO: THE BRECKENRIDGE GAZETTE-TELEGRAM

The art of everyday living is subject for study to Shirley Lea Sagness, daughter of Mrs. Ray Sanders, of Breckenridge, who is majoring in home economics education in the College of Agriculture, Forestry, and Home Economics at the University of Minnesota.

Although she reports that she is "not a very good cook," Miss Sagness gets plenty of practice in food preparation in the laboratories of the Home Economics Building on the Farm campus in St. Paul.

Child care is another of her courses, and she gains experience in this field in two weeks of caring for nursery children at Pillsbury Settlement House in Minneapolis.

Since Miss Sagness plans to teach home economics after her graduation next fall, she spends several hours a week practicing teaching at the Farm Campus High School and at other Twin Cities schools. Her graduation will help fill the demand for home economics graduates, which, University officials report, far exceeds the supply.

Miss Sagness also takes courses in psychology, science and English, and finds time from her school work for sports, painting and music.

SPECIAL TO; THE BRECKENRIDGE GAZETTE-TELEGRAM

The business world will have another potential Certified Public Accountant when Lynn Morris Kloster graduates from the School of Business Administration at the University of Minnesota in the winter of 1949.

Now in his junior year, Mr. Kloster is the son of Mrs. Tillie Kloster, of Breckenridge. He is one of the 1,305 veterans who comprise the greatest part of a new record high enrollment of 1,465 students in the School of Business Administration.

His service with the armed forces includes 30 months in the Pacific area with an infantry band, in which he played the trumpet and the tuba. He also toured 25 states along the East coast of this country with an army band unit.

Although homework for his accounting courses takes up most of his time, Mr. Kloster is looking forward to warmer weather when he can get out on a golf course for relaxation.

SPECIAL TO: THE BRECKENRIDGE GAZETTE-TELEGRAM

One of the polite voices which answer telephone calls to Pioneer Hall, men's dormitory on the campus at the University of Minnesota, belongs to Wallace George Olson, son of Mr. and Mrs. A.J. Pickus, of 222 South Fourth street, Breckenridge.

Mr. Olson, who is studying personnel management in the School of Business Administration at the University, does extra work at the dormitory switchboard to add funds to his government subsistence check.

A veteran of 26 months in the Pacific with a Marine Corps artillery unit, he is one of the more than 16,000 veterans who are enrolled at the University. He will graduate in June, 1949.

In addition to his work for courses in sociology, speech and economics, Mr. Olson finds time to be a member of the Canterbury Club, the Episcopalian student's group. He is also secretary and treasurer of the Social Council at Pioneer Hall.

Minneapolis, April - Publication of a revised second printing of "Northern Fishes" by Samuel Eddy and Thaddeus Surber was announced this week by the University of Minnesota Press.

Out of stock for the last year, "Northern Fishes" was first published in 1943. Now, revised by its authors, the book is again available to angling enthusiasts just in time for the opening of the 1947 fishing season.

A reliable and standard reference for the sportsman, "Northern Fishes" is a study of 153 fresh water fishes found in the lakes and streams of this section of the continent. It contains 93 illustrations including nine in color.

Fishes have furnished one of the oldest and most popular sports throughout the world and among all peoples. Since primitive man invented the fish-hook, his descendents have been searching for a sure method to make fishes take it.

To become a successful angler, one must have patience, perseverance, some degree of luck and some knowledge of the habits and requirements of the various species of fishes.

The authors of "Northern Fishes" supply some of ~~that~~ knowledge, not in the sense of giving explicit directions for catching any particular fish but in the sense of providing such information as will enable the ardent and intelligent fisherman to direct his fishing effort more wisely.

The successful fisherman must study and know fishes. It also has become necessary for him to discover how to conserve and maintain an abundant supply of fishes in order to fish successfully. Ignorance and utter disregard of natural laws, destruction of forests, soil erosion, drainage and stream pollution are just some of the reasons for the disappearance of our fish life discussed by the authors of "Northern Fishes".

Outstanding authorities in the field of stream improvement, Eddy and Surber, on the basis of their original research answer many questions of interest to the sportsman and explain methods which can be employed by fisherman and conservationist alike to protect our lakes and streams.

Minneapolis, April - One of the nation's foremost neurologists, Dr. Johannes M. Nielsen of Los Angeles, Calif., will deliver the annual John B. Johnston lecture at the University of Minnesota's school of medicine Friday (April 11) at 8:15 p.m.

Dr. Nielsen, who is associate professor of medicine at the University of Southern California school of medicine and senior attending physician in neurology and associate neuropathologist at the Los Angeles General hospital, will speak in the Medical Science amphitheater at the University.

Author of several standard texts on neurology, Dr. Nielsen, for the last 17 years, has been special lecturer in neuropsychiatry at the College of Medical Evangelists' school of medicine in Los Angeles. He also is consultant in neurology in many Los Angeles hospitals.

The annual John B. Johnston lecture at the University of Minnesota honors the memory of the former dean of the University's college of science, literature and the arts, a noted neuro-anatomist and educational administrator, whose death occurred in 1939.

Dr. Nielsen's lecture will be one of a series of special spring quarter lectures by outstanding men in the medical fields scheduled by the University's medical school which is headed by Dr. H. S. Diehl.

Other lectures scheduled include: the annual E. Starr Judd lecture, April 15, by Dr. I. S. Ravdin, professor of surgery at the University of Pennsylvania; the annual Journal-Lancet lecture, April 29, by Professor G. Hevesy, Nobel prize winner in 1945, a member of the staff of the University of Copenhagen's institute of theoretical physics; and a Minnesota Pathological society special lecture, May 13, by Professor G. Heymans, another Nobel prize winner, from Ghent, Belgium, whose lecture topic will be "The Role of Pressure- and Chemoceptors in the Regulation of Respiration".

Regents' scholarships for civil service personnel employed at the University of Minnesota have been granted to 14 applicants for the spring quarter, according to Hedwin C. Anderson, director of the University's civil service personnel and student employment department.

The scholarships allow full-time civil service employees of the University to take as much as six credits a quarter without tuition charge. Time off from their job is allowed for class attendance.

According to Anderson, the scholarships are granted to employees for courses relating to their civil service work, or for promotional opportunity.

Spring quarter scholarships were awarded to the following civil service employees with their jobs and the courses they will take listed below.

Minneapolis residents granted scholarships were: Elvie M. Berggren, 134 W. Diamond Lake road, secretary in the University gallery office, art history and appreciation; Josephine P. Bjornson, 20 Groveland avenue, informational representative in the publications office of the department of agriculture, choice and care of clothing;

Mrs. Irene Daniels, 1336 Irving avenue N., a technologist in the department of pathology, histology and organology; E. Lorraine Evenson, 2721 Elliot avenue, a laboratory technician in the department of psychiatry and neurology, histology and organology;

Roger F. Erickson, 5108 Tenth avenue S., a laboratory machinist in the department of experimental engineering, differential calculus;

(More)

Bernice Alvina Gjovig, 1706 Como avenue S.E., a clerk in the agriculture extension division, office management;

LaVonne Janet Gustafson, 3300 Hennepin avenue, a clerk-stenographer in the administration department, beginning and intermediate shorthand; Mrs. Martha Frances Hilgeman, 5430 Thirty-fourth avenue S., a laboratory technologist in the dairy division, dairy chemistry and lipides;

John Kissel, 708 Twentieth avenue S., a gardner in the botany department, general botany; Mary Louise Smith, 3729 First avenue S., a secretary in the admissions and records department, shorthand; and James H. Rothenberger, 3007 Oakland avenue S., a senior medical photographer in the dentistry department, radiology.

St. Paul residents awarded grants were: Edmund Louis Mallet, 601 Topping street, a laboratory technologist in the school of public health, human psysiology; Dorothy Marie Porter, 380 Pleasant avenue, a clerk in the office of admissions and records, psychology laboratory, and Kenneth W. Sandberg, 1299 Gleveland avenue N., a poultry worker in the poultry department, hatchery management.

UNIVERSITY OF MINNESOTA
NEWS SERVICE
April 7, 1947

For release 11 a.m. TUESDAY,
April 8

Minneapolis, April - A bugaboo of some homes---the condensation of moisture in walls and ceilings---can be prevented or overcome, reports Professor Frank B. Rowley, director of the University of Minnesota's engineering experiment station.

Paper or sheet vapor barriers built into new construction, or suitable paint applied inside existing houses can do the job, Professor Rowley points out in a new free circular on "Moisture Condensation". Prepared and issued by the Small Homes council of the University of Illinois and based on Rowley's research at the University of Minnesota, this non-technical circular has been published for the benefit of home-owners, planners and builders.

Moisture condensation may be evident in many ways, such as damp spots on ceilings and room-side surfaces of exterior walls; water and ice on inside surfaces of windows; moisture on basement side-walls and floors; water-filled blisters on outside paint surfaces; and marbles of ice on attic floors resulting from condensation of water at points of nails in roof boards.

Old houses, with uninsulated and porous walls, usually do not have these troubles. The warm moist inside air passes through the walls. Insulation, which prevents heat loss frequently brings about condensation when the moisture meets the low temperature inside the wall. A vapor barrier prevents inside moist air from getting into the wall.

(More)

For new houses, the barrier is installed between plaster or other finish and the wall structure. Metal foil, usually paper-backed, or specially-treated moisture-tight building paper is used. Ordinary felt roofing paper is not satisfactory, Rowley says, cautioning also that the barrier must be continuous and unbroken, and that the joints must be lapped and securely fastened.

For existing houses, paint can provide the barrier. "Paints which are effective," Rowley points out in the circular, include most aluminum, asphalt, and lead and oil paints, and varnishes. Water emulsion paints as a group are not good barriers."

Basement moisture usually is a summer problem in contrast with the wintertime moisture condensation problem in the rest of the house, and is caused by humid outdoor warm air coming into the cool basement. Among remedies suggested are ventilation, insulation, the use of moisture absorbing material, and the insulation of pipes with "anti-sweat" covering.

Other information, drawings, and details are presented in the new free circular, which is the result of a meeting on condensation control held in 1944 by representatives of industries concerned. As a result of this meeting, Professor Rowley, an outstanding authority in the field, passed on his research findings to the University of Illinois for publication as the sixteenth in its series of non-technical circulars on small home building and maintenance.

Copies of the circular (index number F6.2) may be obtained on request from the Small Homes council, Mumford House, University of Illinois, Urbana, Ill.

Directed by Sergei Eisenstein, the film features Nikolai Cherkassov, noted Russian dramatic actor. Although the dialog is in Russian, the picture will be shown with English subtitles.

The Russian picture will be the first of a series of six foreign films to be presented by the society and the University's visual Education service at Northrop auditorium during the spring quarter.

Other foreign films to be shown in the University Film society's series will include, "Maria Louise", a German release, April 25; "The Raiders", a British picture, May 22; "Portrait of a Woman", a French film, May 29; "Man's Hope", a Spanish release, June 5, and an unscheduled release for June 12.

###

Minneapolis, April - Experimenting with radiant or panel heating for homes and industrial plants of the future, two graduate students in the University of Minnesota's institute of technology are conducting a series of detailed tests to determine the efficiency of the hot-water floor panel heating system.

Donald Grunditz, 4728 Stevens avenue S., Minneapolis, and Dudley Fitz, Fairmont, Minn., each received a \$1,000 fellowship recently from the Minneapolis Honeywell Heat Regulator company to conduct experiments with the floor panel type of home-heating.

The two students have just completed building a 12 by 12 experimental structure adjacent to the experimental engineering building on the campus and have equipped the building with apparatus to measure the output of heat, its distribution and its loss from the central floor panel heating system.

Grunditz and Fitz first dug the foundation hole six feet deep, burying more than 120 "thermocouplers", heat measurement devices, directly beneath the site of the building and in the ground immediately surrounding the site.

Filling in the excavation, the two students then laid nine inches of crushed rock on the ground over which a continuous coil system of heating pipes was installed. Concrete was then poured around the pipes so that they were entirely enclosed in the concrete slab which forms the base of the building.

Thermocouplers were also installed within the concrete slab itself to determine the distribution of heat between the pipe coils.

(More)

The two students then built the frame structure on the concrete slab. The building is windowless and insulated on all sides so that the least amount of heat will be lost through the building sides and ceiling.

"Even the door into the structure is specially made so that the loss of heat there will be negligible," Fitz said.

The actual heating system they will be using, the two students explained, will be hot water supplied from the University's system. Through a series of regulating valves, they can regulate a constant flow of heat into the coils.

"Then with results gained from a special recording apparatus supplied by the Honeywell company, we can determine accurately the heat distribution and loss not only within the building but on the outside walls and roof and throughout the ground outside the building," Grunditz said.

With the results of series of heating checks, accurate information on the radiant or panel heating will be available to the public, according to the two students.

"The cost of installation of the floor panel type of heating for either homes or factories is comparable to the present cost of conventional hot water heat," Fitz pointed out.

The heating survey is a cooperative project between the University and the Honeywell company, according to Professor A. B. Algren, head of the University's division of heating, ventilating and air conditioning, who is supervising the project.

First actual results of the project will be made available to the public sometime in June, Grunditz and Fitz indicated.

George Tani, 2257 Hillside avenue, St. Paul, first year medical student at the University of Minnesota, was awarded the United States of America Typhus Commission medal Tuesday by Dr. Harold S. Diehl, University dean of the medical school.

According to the citation from the Typhus commission the medal was awarded for "meritorius service he rendered in connection with the work of the United States of America Typhus commission in the control of typhus fever in Japan from November 1945 to June 1946".

Tani was graduated from the University of California in 1939 with a B.A. degree and worked in Mercy hospital in Chicago, Ill., until he enlisted in the United States army in 1944.

He attended the Fort Snelling Japanese language and military intelligence school, and was then assigned as translator and interpreter to the typhus commission serving under the chief surgeon's office in the general headquarters in Tokyo.

The 31-year-old Nisai was discharged from the army in November, 1946 and returned to his St. Paul residence, his wife, Yoshi, and their 11-month-old son, Paul, to enroll in the University's medical school.

Minneapolis, April - First annual debate tournament for college freshmen of the Northwest area will be held at 11 a.m. Friday and Saturday, (April 11-12) at Coffman Memorial Union on the University of Minnesota campus with freshman debate teams from Minnesota, North Dakota and Wisconsin competing.

Mayor Hubert H. Humphrey, Minneapolis, will welcome the teams Friday after which the nine college teams will begin the first of a series of 64 debates on the question "Should Labor be Given a Direct Share in the Management of Industry?"

The University of Minnesota speech department will hold a banquet for the participating teams and for the 40 finalists in the Minnesota State High School Debate tournament at 6:30 p.m. Friday in the junior ballroom of the Union.

Val Bjornson, a member of the St. Paul Dispatch Pioneer Press editorial staff, will be the principal speaker at the Friday night banquet.

Awards will be presented to the winning freshman teams at an award banquet held at 6:30 p.m. Saturday at the Campus club in the Union.

College and university teams participating in the tournament will include those from: the University of Minnesota; Concordia college, St. Paul, Minn.; Mankato State Teachers college, Mankato, Minn.; St. Olaf college, Northfield, Minn.; Hibbing Junior college, Hibbing, Minn.; the University of North Dakota, Grand Forks, N.D.; St. Thomas college, St. Paul, Minn.; Eau Claire State Teachers college, Eau Claire, Wis., and Carleton college, Northfield, Minn.

"Faust in Modern Miniature", a carefully condensed version of the best music in Gounod's opera, will be presented at the University of Minnesota convocation program Thursday (April 10) at 11 a.m. in Northrop Memorial auditorium.

(correct)

The streamlined opera company is headed by Gean Greenwell, appearing as Mephistopheles and the narrator of the opera. He has sung with the New York Philharmonic, Philadelphia and Cleveland orchestras, and won a fellowship at the Julliard Graduate school of Music upon his arrival in New York.

The role of Faust will be sung by Edward Nyborg, tenor, who has appeared in leading tenor roles with the Philadelphia Opera company. Nancy Trickey, who has studied voice under the former Metropolitan Opera star, Marie Sundelius since she was fifteen, will sing the role of Marguerite.

Pauline Pierce will be heard in the roles of Siebel, Martha, and the Angel. The performance will be presented in modern dress and sung in English with piano accompaniment by Ruth Cumbie.

Greenwell and his company have made several tours of the country presenting operas of the streamlined type such as "Carmen", "The Marriage of Figaro", and "The Merry Wives of Windsor".

Their present tour is under the direction of the Community Concert and Lecture Service of the University of Minnesota and will take them to more than 20 communities in Minnesota and North and South Dakota.

and the Fosston Thirteen Towns

A "straight A" student, Alice Irene Bjella, daughter of Mr. and Mrs. L.A. Bjella, of McIntosh, received top marks in all of her classes at the University of Minnesota for the past quarter.

Miss Bjella is majoring in psychology, with a minor in mathematics, and plans to take graduate work after her commencement in the summer of 1948. Eventually, she hopes to do clinical psychology work in a large hospital.

A veteran of more than two years in the Women's Army Corps, Miss Bjella did personnel work while in service. One of the more than 500 women veterans registered at the University, she is attending college on the G.I. Bill, and plans to continue her studies through this summer.

Her classes include a course in psychology laboratory, for which she works with psychological experiments and tests. She is also studying ethics, trigonometry, and social organization.

There will be two dentists in the Johnson family of Morris when Gordon O. Johnson graduates from the School of Dentistry at the University of Minnesota in 1952.

Mr. Johnson, the son of Dr. and Mrs. O.T. Johnson, of 701 Pacific avenue, Morris, is now enrolled in a pre-dental course. He entered the University last fall, after 10 months overseas as a radar mechanic with the Army Air Forces.

He plans to enter the School of Dentistry in the fall quarter of 1948. In his junior and senior years, he will treat patients in the University's dental clinic, one of the largest and most modern dental clinics in the world.

Mr. Johnson is a member of Delta Upsilon, an academic fraternity on the campus, and lives in the fraternity house. Among the classes in his pre-dental school course are chemistry, English and a two-quarter series in psychology.

SPECIAL TO THE MORRIS SUN

and to The Morris Tribune

Following in her father's medical footsteps, Louise Martha Behmler in enrolled in the School of Nursing at the University of Minnesota, the largest nursing school in the United States.

She is the daughter of Dr. and Mrs. F. W. Behmler, of 1007 Idaho avenue, Morris.

At the end of her five-year course, Miss Behmler will be a graduate nurse, and will also receive a Bachelor of Science degree. She is now finishing her class work, and will enter training in University Hospitals in June.

A highlight of her University life this spring was her pledging, April 9, by Alpha Tau Delta, a professional nursing sorority on the campus.

Miss Behmler lives in Sanford Hall, a women's dormitory on the main campus, and she is active on committee work in the dormitory. Included in her course are classes in physiology, nursing arts, history of nursing, and pharmacology.

After her graduation in 1949, Miss Behmler plans to work in a city hospital.

April 9, 1947
For Immediate Release

Minneapolis, April - Dr. Lyle Joseph Hay of Worthington, who is working on his doctor of philosophy degree in surgery in the University of Minnesota's medical school, plans to publish his doctor's thesis, "Problems of Carcinoma Transplantation" this fall.

Dr. Hay was graduated from the Worthington high school in 1930 and received his doctor of medicine degree from the University in 1938. Following his internship at the University hospitals he joined the army's Minnesota hospital unit in February 1942.

He served three years with the Twenty-sixth General Hospital staff in England, Africa and Italy, and was discharged from the army with the rank of captain in 1945, when he returned to the University to continue his medical work.

Dr. Hay was appointed a cancer research fellow in July 1946, to do work supported by funds from the National Cancer institute and the Jane Coffin Childs foundation.

His research work is under the direction of Dr. Owen H. Wangensteen, head of the University's department of surgery, and Dr. Robert G. Green, newly appointed head of the department of bacteriology of the medical school.

The ultimate aim of the cancer research project is to establish a "cancer detection clinic" at the University, Dr. Wangensteen said.

(More)

Dr. Hay has completed his preliminary examinations for his advanced degree and will take his final oral examinations in May. He will receive his doctor of philosophy degree in November, 1947.

Among Dr. Hay's publications is listed "Gastric Acidity Before and After Operative Procedure with Special Reference to the Role of the Pylorus and Antrum" on which he collaborated with Dr. Wangensteen, and Dr. Richard L. Vareo of the University staff. The article was published in the "Annals of Surgery", October, 1940.

Another article Dr. Hay published in collaboration with Dr. Wangensteen, Dr. Vareo, and Dr. Charles F. Code in August 1942 was, "Experimental Product of Gastric and Duodenal Ulcers in Laboratory Animals by the Intramuscular Injection of Histamine in Beeswax". The article was published in "Surgery, Gynecology and Obstetrics".

Dr. Hay lives at 1015 Fourteenth avenue, S.E., Minneapolis with his wife and three children, John, six, Michael, five, and Elizabeth, nine months.

###

SPECIAL TO: THE PLAINVIEW NEWS

A career in the diplomatic service lies in the future for Frances Elizabeth Rother, who is a freshman at the University of Minnesota.

Miss Rother is the daughter of Mr. and Mrs. Charles J. Rother, of Plainview. She is now studying related arts in the College of Agriculture, Forestry, and Home Economics at the University, but plans to transfer next year to the College of Science, Literature and the Arts.

Living in Meredith Hall, a women's dormitory on the Farm campus in St. Paul, Miss Rother is taking courses in Spanish, psychology and English literature during the spring quarter.

She expects to major in languages, and after her graduation in June, 1950, she plans to work in foreign translation in the diplomatic corps.

----- # -----

SPECIAL TO: THE PLAINVIEW NEWS

Marshall Edward Cook, son of Mr. and Mrs. Clarence Cook of Plainview, is laying the foundations for a successful professional life by his work on a pre-dental course at the University of Minnesota.

Mr. Cook, a veteran of convoy duty at sea with the Coast Guard, took advantage of the G.I. Bill when he entered the University last fall. He is one of the 4,905 veterans currently enrolled in the College of Science, Literature and the Arts, at the University.

On the campus, Mr. Cook lives in Pioneer Hall, a men's dormitory reserved exclusively for the use of veterans. He plays basketball and softball on the dormitory teams, and is active on the hall bowling alleys.

In preparing for admittance to the School of Dentistry, Mr. Cook is studying psychology, English, zoology, and a chemistry course - qualitative analysis. He hopes to enter the dental school for the fall quarter of 1949.

----- # -----

SPECIAL TO: THE BRECKENRIDGE GAZETTE-TELEGRAM

One of the 926 veterans registered for the spring quarter in the College of Agriculture, Forestry, and Home Economics at the University of Minnesota, is Ralph J. Kurka, of Breckenridge.

The son of Mrs. Emma Kurka, of 702 North Ninth street, in Breckenridge, Mr. Kurka is majoring in forestry and will receive his degree in 1950. He spent seven months in Europe during the war, as an aerial gunner with the Army Air Forces, and returned to school on the G.I. Bill last fall.

A member of the Forestry Club on the campus, Mr. Kurka meets with this group every two weeks to study the problems of their profession. As a part of his curriculum, he will spend five weeks this summer doing forestry work at Itasca State park.

For this spring quarter, he is enrolled in courses in mechanical drawing, trigonometry, and botany. He is also registered for dendrology, for which class he joins in field trips to study tree identification.

SPECIAL TO: THE LAKE CITY GRAPHIC

Robert S. Wallace's fascination for airplanes began when he was a member of a B-24 crew in the Army Air Forces during the war, and he carried this interest over into his education when he returned to the campus of the University of Minnesota.

The son of Mr. and Mrs. William Wallace, of 520 High street, Lake City, Mr. Wallace spent nine months in Italy, as a radio gunner on a heavy bomber. He is now studying aeronautical engineering.

Before entering the service, he attended classes at the University for two years. He returned to enroll in the Institute of Technology a year ago, and will continue his studies through the summer in order to graduate in the spring of 1948.

Mr. Wallace is married and has brought his wife to live in Minneapolis while he completes his education. He is one of the more than 3,300 married veterans registered at the University.

Included in his engineering course are classes in aerodynamics, strength of materials and dynamics. Mr. Wallace is a member of Phi Kappa Sigma, a social fraternity on the campus.

SPECIAL TO: THE GLENWOOD HERALD

and the Glenwood Tribune

Thomas Scott Andrews' greatest ambition, he says, is to catch the biggest fish in Lake Minnewaska, near Glenwood. For the time being, however, he is busy with preparations to enter the School of Dentistry at the University of Minnesota.

He is the son-in-law of Mr. and Mrs. M.E. Christilaw, of Glenwood, and his wife and two children are living in Minneapolis with him while he completes his education.

Mr. Andrews received his first degree, a Bachelor of Arts, from William and Mary College. He then entered the Navy, where he spent two years in the Pacific, flying all types of planes for the Air Transport Service.

He is among the 4,905 veterans who are registered in the College of Science, Literature and the Arts for the spring quarter at the University, and he plans to enter the School of Dentistry next fall.

Included in his present schedule are classes in chemistry, zoology and history of the Northwest.

SPECIAL TO: THE ANOKA HERALD

and the Anoka Union

When the University of Minnesota football team turned out for spring training at the end of March, Arvid H. Bergsten, son of Mr. and Mrs. F.R. Bergsten, of Anoka, was among the players.

Mr. Bergsten played football for Anoka high school during his senior year there, and tried out for the college squad when he enrolled at the University last fall. He played tackle on the "B" team throughout the last season.

Now one of the 4,905 veterans registered in the College of Science, Literature and the Arts, Mr. Bergsten will enter the School of Business Administration within the next year, after completing his preparatory courses.

During the war, he served as a motor machinist's mate in the Navy, and saw sea duty in all the various theaters of war, for a period of 20 months. He has just moved into Pioneer Hall, a men's dormitory on the main campus.

Included in Mr. Bergsten's present course of study are classes in accounting, family life, economics, and English communication. When he is graduated from the University in 1950, he plans to enter business with his parents in Anoka.

SPECIAL TO: THE ANOKA HERALD

In a battered Chevrolet of ancient vintage, Robert Gerald Hagen commutes daily from his home on Route 4, Crooked Lake, Anoka, to his classes at the University of Minnesota.

Mr. Hagen, whose wife and two children live near Anoka, is one of the more than 150 married student veterans who have two or more children. During the war, he spent several months in Europe as a pilot with the Eighth Army Air Force.

He entered the University last summer, and is enrolled in the School of Business Administration. He plans to attend classes during the summer in order to graduate in December, 1948.

For his business course, Mr. Hagen is studying classes in labor problems, trade unionism, commerce algebra, psychology and accounting. He hopes to enter the insurance business after his graduation.

— # —

SPECIAL TO: THE ANOKA HERALD
and the Anoka Union

Many months in Germany with an Army armored division were behind Harold Eugene Blewett, of Anoka, when he returned to the campus of the University of Minnesota.

The son of Mr. and Mrs. Harold Blewett, of 420 Jackson street, Anoka, Mr. Blewett spent two years at the University before the war, and returned to his classes at the Institute of Technology last spring.

He is majoring in architectural engineering, and will graduate in 1949. His course includes classes in building materials and methods, architectural design, history of architecture and structural design.

On the campus, Mr. Blewett lives in Pioneer Hall, a men's dormitory reserved exclusively for veterans. He is one of the more than 16,000 veterans enrolled at the University for the spring quarter.

Although his scholastic work leaves him very little time for extra-curricular activities, Mr. Blewett is looking forward to the warmer weather when he can get out on the golf course for relaxation. He plans to work for an architectural firm in Minneapolis during his summer vacation.

Minneapolis, April - Frank L. Fuller, former director of the University of Minnesota's surplus property administration, was appointed superintendent of the University's newly established Rosemount Research Center Friday (April 11) by the Board of Regents.

Twenty-three miles south of the Minneapolis campus, the new research center is being developed on the site of the former Gopher Ordnance Works, a large portion of which is being acquired by the University from the federal government.

Fuller attended the United States Naval Academy at Annapolis, Md. for four years and was graduated from the University of Michigan with a Bachelor of Science degree in mechanical engineering.

Commissioned an ensign in 1941, Fuller was graduated from the Army Industrial college, Washington, D.C., and was assigned to the Army-Navy Munitions board in Washington. Further assignment as naval advisor of the War Production board for Minnesota, North and South Dakota completed his military service.

He joined the University staff in 1946, as the director of the surplus property administration. Immediate plans concerning the new Rosemount Research Center include the establishment of a civil engineers' summer surveying camp; establishment of aviation medical research and the further development of the poliomyelitis and cancer research programs already in progress.

Fuller is married to Dr. Elizabeth Metchem Fuller, principal of the University of Minnesota's Nursery school.

Minneapolis, April - The University of Minnesota will be host to more than 1,400 rural educators from eight states at the fifth annual Midwest conference on rural life and education Thursday through Saturday (April 17-19).

Sponsored by the University, the rural department of the National Education association, the Minnesota state department of education and the Minnesota State Teachers' association, the conference will be devoted primarily to the discussion of problems of rural life and education.

Educators from Oklahoma, Kansas, Missouri, Iowa, North and South Dakota, Nebraska and Minnesota will participate in the sessions of the three-day meeting which will be held in the University's Coffman Memorial Union.

Exhibits including books, publications of agricultural colleges, plans for the reorganization of rural schools in various sections of the Midwest and a traveling art exhibit from the University of Nebraska, will be on display on the balcony of the Union's main ballroom throughout the conference.

Among the principal speakers at the conference will be Howard Dawson, director of the department of rural education of the National Education association, Washington, D. C. He will speak on "Education for Community Leadership".

As a feature of the meeting, the rural educators will be offered the opportunity to visit and inspect 20 rural district schools in counties near the Twin Cities.

UNIVERSITY PLANS
SERIES OF SPECIAL
SPRING EVENTS

Minneapolis, April - The University of Minnesota is looking forward to a series of special spring events which will start with the annual Mothers Day program on Saturday, May 10, and culminate in the 75th annual Commencement exercises on Saturday, June 14.

Mothers of all University students will be urged to visit the campus on Mothers Day. An entertainment program has been arranged for the afternoon, and the annual Mothers Day dinner will be served in the ballroom of Coffman Memorial Union that evening.

Cap and Gown Day convocation, the annual spring event devoted to honoring students for special scholastic achievements and marking also the first occasion on which seniors appear in their traditional caps and gowns, will be held Thursday, May 15, at 11 a.m. in Northrop Memorial auditorium. Decked in their academic costumes, all seniors and other candidates for degrees will assemble on The Knoll at 10:30 a.m. and will march in procession to the auditorium.

Honors and elections to honorary societies will be announced at the convocation, and President J. L. Morrill will address the assembled students, their relatives and friends.

One of the University's distinguished alumni, the Rev. Russell Henry Stafford, will deliver the sermon at the traditional baccalaureate service Sunday, June 8, at 11 a.m. in Northrop auditorium.

(More)

Dr. Stafford will be observing the 35th anniversary of his graduation from the University. He at one time was pastor of the First Congregational church in Minneapolis and subsequently served as pastor of the Pilgrim Congregational church in St. Louis, Mo., and the Old South Church in Boston. Since 1945, he has been president of the Hartford Seminary foundation, Hartford, Conn.

Leading off the commencement events will be the annual Alumni Day on Friday, June 13, the day preceding commencement. In accordance with Minnesota alumni tradition, assembling in reunion will be the graduating classes of those years ending in "2" and "7".

The 50-year class, that of 1897, will be entertained at a luncheon that day by Dr. Charles N. Spratt of Minneapolis who made the same gesture of goodwill toward his classmates at the fortieth reunion 10 years ago.

The Minnesota Alumnae club will follow its practice of sponsoring a luncheon for all alumni from classes graduated more than 50 years ago. Many classes will hold individual luncheons and reunions during the day.

Traditionally taking the lead in Alumni Day activities, is the 25-year class which this year will be the Class of 1922. Skuli Rutford, assistant director of agricultural extension at University farm, has been named chairman of the Class of 1922 committee on arrangements.

As usual, with weather permitting, commencement ceremonies on Saturday, June 14, at 8 p.m., will be held outdoors---in Memorial Stadium. Deans of the various colleges will present their candidates for degrees and President Morrill will deliver the charge to the class.

Estimates by the office of admissions and records indicate that the June graduating class will number between 1,200 and 1,500. While this number of graduates seems rather low in comparison with the University's total enrollment of well over 25,000, it reflects the fact that no more than two years ago, the student body was very much smaller so that the senior class is still relatively small, the extremely heavy enrollments being in the present freshman and sophomore classes.

SPECIAL TO: The Old Shads' Association
Shattuck School
Faribault, Minnesota

Attention: Rev. J.M. McKee

Two days after his graduation from Shattuck School in June, 1944, Wallace Earl Lunden, Jr., went into the service with the Navy. He served during the war as a signalman, third class, and spent a year on duty in the Aleutians and in the South Pacific.

The son of Mr. and Mrs. Wallace E. Lunden, of 3437 Holmes Avenue, S., Minneapolis, he returned home last fall and enrolled at the University of Minnesota in September.

He is now majoring in accounting in the College of Science, Literature, and the Arts, at the University, and plans to transfer next year to the School of Business Administration. After his graduation in 1950, he expects to go into business with his father.

A highlight of Mr. Lunden's first few months on the campus was his pledging by Alpha Kappa Psi, a professional business fraternity at the University. His extra-curricular activities also include participation in intramural athletics.

During the spring quarter, his course of study includes classes in the mathematics of investment, English composition, and a study of money and banking.

SPECIAL TO: THE RED WING REPUBLICAN-EAGLE

The Mechanical Engineering Building on the main campus of the University of Minnesota is "just like home" to Richard William Chamberlain, son of Mr. and Mrs. Floyd Chamberlain, of 1627 Greenwood Street, Red Wing.

A sophomore in the University's Institute of Technology, Mr. Chamberlain is majoring in mechanical engineering and takes most of his classes in the building which houses that department.

One of the more than 4,300 veterans registered in the engineering school for the spring quarter, Mr. Chamberlain served as an Army Air Forces mechanic during World War II. He was released from service late in 1945, and enrolled at the University in January, 1946.

A highlight of his college career came last week when he was elected president of the Farm Campus Camera Club. He is also a member of the Wesley Foundation, the Methodist student group on the campus, and makes his home at the Foundation building.

Included in his spring course of study are classes in calculus, physics, and mechanical design. He also studies the theories of foundry work and forging, and then, for practical experience, does his "homework" in metal casting in one of the engineering laboratories.

SPECIAL TO: THE RED WING REPUBLICAN-EAGLE

A part in Moliere's comedy, "L'Avare," is on the May calendar for Guy Thomas Colling, son of Mr. and Mrs. A.G. Colling, of 517 Plum Street, Red Wing, who is a junior student at the University of Minnesota.

Mr. Colling, who is majoring in political science and French, has been chosen for the cast of the French drama, to be presented by the Department of Romance Languages on May 8, at University Theatre in the Music Hall on the main campus.

In addition to his language work, Mr. Colling is specializing in the field of international relations in the College of Science, Literature, and the Arts. After his graduation in June, 1948, he plans to take some graduate courses, and later go into teaching or government work.

During the spring quarter, Mr. Colling is busy with homework for his classes in public administration, modern European history, a survey of French literature, and French conversation.

He is also a member of the French club at the University.

SPECIAL TO: THE RED WING REPUBLICAN-EAGLE

As a soprano in the University of Minnesota Chorus, Ann Claydon, of Red Wing, will participate in the presentation of Mozart's "Requiem," to be sung by the chorus with the Minneapolis Symphony Orchestra, on May 4.

The concert is scheduled for Northrop Memorial Auditorium on the University's main campus in Minneapolis. Miss Claydon is the daughter of Mrs. Judith A. Claydon, of 1004 West Fourth street, Red Wing.

Now a freshman in the College of Education at the University, Miss Claydon is majoring in voice. She plans to transfer next fall to the College of Science, Literature, and the Arts, and will graduate in 1950.

Miss Claydon is pledged to Chi Omega, a national social sorority, and is now living in Sanford Hall, a women's dormitory on the campus. She is active on the social committee there, and has also participated in several fund-raising drives at the University.

Her course this spring includes classes in English, personal orientation, physical education, and music appreciation. In addition, she spends a total of 15 hours a week practicing for her lessons in voice and piano.

SPECIAL TO KUOM

SPOT ANNOUNCEMENTS

If you are a woman between 18 and 35, married or single, with a high school diploma and interested in practical nursing, write at once to the University of Minnesota's School of Nursing for information concerning a four-quarter course, beginning June 16, leading to a non-professional nursing certificate.

—0—

Non-professional nursing service is needed in general hospitals in both urban and rural localities. Women between the ages of 18 and 35, married or single, who hold a high school diploma are eligible for the University of Minnesota's four-quarter course opening June 16, which leads to a certificate in practical nursing. Address all inquiries to the School of Nursing, University of Minnesota for complete information on the course.

—0—

Residents of Minnesota, Wisconsin, Michigan, North Dakota, South Dakota, Iowa and Montana are eligible for a four-quarter course in practical nursing offered by the University of Minnesota's School of Nursing, starting June 16. Women between the ages 18 to 35, married or single, who are high school graduates, may obtain complete information concerning the course by writing to the University's School of Nursing.

—0—

Women between the ages 18 to 35, married or single, who hold high school diplomas, are eligible to apply for a four-quarter practical nursing course offered by the University of Minnesota's School of Nursing beginning June 16. The purpose of the program is to prepare women for needed non-professional nursing service in general hospitals, both urban and rural. Inquiries concerning the course will be answered by the University's School of Nursing.

SPECIAL TO: THE RED WING REPUBLICAN-EAGLE

After three months' work at the University of Minnesota, Franklin W. Dunn, of Red Wing, went into the Army Air Forces and served throughout the war as a navigator-gunner on a B-17 bomber.

Now, however, Mr. Dunn is out of uniform and back on the University campus. The son of Dr. and Mrs. F.W. Dunn, of 1115 Central Avenue, Red Wing, he is majoring in physics at the University's Institute of Technology.

During the war, he spent a year in Italy with the Fifteenth Air Force. Now enrolled in a five-year technical course, he is one of the more than 16,300 veterans studying at the University this spring.

After his graduation in 1949, he plans a career in atomic research.

Included in Mr. Dunn's extra-curricular activities is work on the Student Housing Council, which studies the great problem of living accommodations for undergraduates at the University. He is also a member of the Newman Club on the campus.

Although most of his time is occupied in classes on physics, differential equations, humanities and organic chemistry, Mr. Dunn is looking forward to the warmer weather when he can get out on the University golf course for relaxation.

SPECIAL TO: THE LACROSSE TRIBUNE LEADER-PRESS

Working hard on plans for Engineers Day at the University of Minnesota is Eugene Bruha, son of Mr. and Mrs. Leo J. Bruha, of 1248 West Avenue, South, LaCrosse, Wisc. He is one of the more than 5,000 students enrolled in the University's Institute of Technology this spring.

The 45th annual "E Day," scheduled for April 25-26, involves knighting ceremonies, a parade from the Minneapolis loop to the University campus, two dances, and technological exhibits by the various engineering departments at the University.

Mr. Bruha is serving on the committee for the "E Day Brawl," a semiformal dance to be held April 25 in the Calhoun Beach Club, on the shores of Lake Calhoun, in Minneapolis.

His major field of study at the University is mechanical engineering, and he expects to graduate in 1948.

BY DR. LORENZ G. STRAUB

(Head of the Department of Civil Engineering at the University of Minnesota and director of the St. Anthony Falls Hydraulic Laboratory, Dr. Straub flew to Madras, India, recently to serve as engineering consultant to the government of the Province of Madras on the construction of a huge dam on the Godivari river.)

Madras, India, April 8 - Although I've been away from U.S.A.

less than three weeks, it is like a lifetime in observations and experiences. Particularly, from the moment our Pan American plane landed at the port of entry to India, Karachi; the present moment I've been curiously impressed with the extremes of life and enterprise here. I was in Karachi only a half day but saw so much, it would take a week to tell about it.

I stood on a street corner poorly concealing my continual photographing of unusual sights. Lines of camel drawn carts, donkey teams, bullockcarts, goat herds pass along and over downtown streets; huge scavenger birds, crows, vultures ready to pounce on any rubbish or dead carcass, on one case pestering a dog that had one badly crippled leg swarming on him and darting away from his snaps and yaps; women in saris carrying huge baskets heavily loaded on their heads and simultaneously with babes infants and parcels in their arms, men naked except for a loin strap pushing and pulling heavy loads of cement, timber, their raw materials; rigid natives squatting on the ground or park bench mumbling some sort of prayer in queer bewildering tones, etc., etc.,; all in the short morning in Karachi.

(More)

I flew to Bombay in the afternoon, and here these variations were less accentuated, but there extremes of poverty and well-being, people--natives squatting on sidewalks and literally eating from the streets and mansions for others. Sium? Why we have no idea what they are in America. A dozen or more people living in an impoverished area about 10 feet square; not in secluded spots but for blocks on blocks; cows, goats, and fowl in the same area treated far more kindly than the natives. -- I walked through these places asleep. I could hardly believe what I saw, let alone comprehend it. -- In Bombay the "only hotel livable for an American" was far overcrowded, but I was fortunate in having befriended the director of the Swedish Match company in India who made me a guest at his spacious home with servants whose equal I have never experienced. In Bombay, I also visited relatives of friends in Minneapolis.

My next hop was by air to Madras where I quickly got deeply immersed in the professional mission for which I came to India. The government people have arranged everything superbly for me, particularly considering the lack of modern conveniences inherent to this country. I have been out of the city most of the time on two excursions; one on jungle-bordered Godavari river some 300 miles north of Madras, and the other to a new waterways experiment station which the provincial government is developing some distance west of Madras.

My main purpose here is as a consulting engineer to the government and to try to work out a plan for carrying on experimental hydraulic studies for the project. The project, known here as the Ramapadanager reservoir and irrigation development, which has legendary significance attached to the name, is no ordinary undertaking even with the American concept of greatness.

The dam itself will be the second largest in the world, far exceeding anything heretofore constructed in the British Empire. It will provide two-drop irrigation for over 1,000,000 acres of fertile land, now barren for lack of water and one-drop irrigation for another one million acres.

In addition, a great amount of hydroelectric power will be developed, more than is needed to supply the combined requirements of Minneapolis and St. Paul. There will be about 8 million cubic yards of concrete in the dam. Many unprecedented difficulties will be encountered in its construction. These are aggravated by the great flood flows of the Gedarvari river in the early fall of each year, equalling the summer floods and late spring floods on the lower Mississippi river.

There are in particular, two construction difficulties: first, the foundation of the dam over much of its length will be more than 200 feet below the stream bed so that over 20 million yards of earth excavation will be required, and second, enormous quantities of water will have to be pumped while the dam is under construction. The river diversion problem is therefore most difficult during the long construction period, and it is this with which I am most concerned.

The cost of the project including the dam and irrigation canals and power plant is estimated at 850 million rupees or about 275 million dollars. The annual value of the crop and hydro-power made available by the project is 100 million dollars. So you see, it is a super-large undertaking, particularly in India where the production of greater amounts of food is of great importance as a bulwark against the starvation of large numbers, of the country's population, although my observation is that the distribution problem is even more important to the economic well-being of India.

Though my mission here is primarily engineering, I incidentally come into contact continually with the political element, including some of the highest state officials. They are all very enthusiastic over India's forthcoming independence, even tho they see grave problems ahead in the transition. I think they have a democratic outlook in general and look to the American pattern of government.

(More)

Some of the leaders have indicated particularly to me their desire of ridding the country of the caste system, which I think is the primary cause of the great inequalities that I described earlier in this letter. Titles were abolished a year ago. In the Madras province, a bill passed a few days ago opening temples legally to all castes. But last night I had occasion to talk with the proposer and chief spokesman for the bill; he heralded it as a great step in the direction of democratic principles, but admitted at present it is only a legal victory and that much is required in swaying the ingrained prejudices of the classes. Different castes seldom intermarry.

Hellion among the Hindus is the most difficult of social institutions in India for me to understand. I have talked with various people of eminence among my Indian colleagues in particular, and seem to have entered mostly conflicting reactions in my diary. Probably one of my shortcomings in this connection is a belief in Christianity with so many quite definite dogmas; while religion under Hinduism is so illusive, the concept and worship of idols is hard for me to grasp. I must say, however, there are great numbers of very religious Hindus, and I don't mean superficially.

Coming direct from Minnesota to tropical southern India was somewhat of a shock for me. Daily temperatures of over a hundred in the shade with little shade available to the weary white traveler on venturesome tours through the city streets is not easy to take. However, thus far, probably in part due to the judicious use of medical aids, insect repellents, insect repellents, and proper choices of foods, I have been in the pink of health without even a touch of dysentery which I was told I could not possibly avoid.

I have had an isolated few Indian dinners, somewhat Americanized for my benefit; and while I greatly enjoyed the experience and the cordiality of my hosts, I'm afraid I can't take it too often. They have quite a variety of foods on the "table" (they usually eat on the floor), of the socially high natives, it's just about all rice followed by some fruit usually under-ripe bananas and very good

(Here)

oranges. They grow "some hundred varieties of bananas", some "much more tasty" than others, but so far they're all just under-sized bananas to me.

And the food variety? - Well it's rice mixed with coconuts, rice mixed with peppers, a special rice GRUY, rice baked, rice powdered, rice whole, rice etc., rice etc., etc.-- Then there are many kinds of rice.

The Indian, even the socially elite uses no plate, no knives, forks or spoons, no table. He eats on the floor off of a nice fresh latex leaf (if available) because it repels water. He uses his hands to take food off of the central "tray" and uses his hands to mix it and put it to his mouth. I've witnessed my aides and colleagues do it; there's no exaggeration.

These and other queer (to me) customs result in my being pretty much of a "lone wolf" in my intercourse with the Indians; but the social classes with whom I deal are familiar with and for the most part have experienced European customs, and they make every effort to give me what I'm used to in a world that's only so constituted in places where the European has established himself, but not in general.

Normally, I eat alone, establish my own hours as far as practicable, and am given every aid to do so. When I go on a trip, I usually have at least three aides to look after me and my luggage, all dressed (more or less) in some native costume. Included, for example, is a "electric" who is sort of a boss man. He buys my tickets, arranges for food, tries to anticipate all my needs. Then there is the fellow who (Oh, my! -- I've used up almost all my stationery, and that's bad over here because it's almost impossible to get. Most of my official government communications are even on some sort of wrapping paper of various sizes and descriptions -- I had no idea I could be so wordy without a secretary to talk to -- and that's one of my biggest handicaps in doing engineering work over here. Well, here goes.) gets my bath ready, makes my bed (when traveling on the train at night one must take his own sheets and bedding); there's the cook who knows how to make American dishes, etc. There certainly is no servant problem here.

(More)

Life is very rudimentary in this part of India; at least I'm told other parts are far different. Thousands of people in the City of Madras are homeless, sleep on the sidewalks, streets, and I've seen in the very early morning about 20 in sunflower petal style sleeping around what might have been a fountain at a multiple street intersection.

I have now completed the first stage of my work, namely that of inspecting the dam site, making a boat trip on the river in its lower reaches, and reviewing the hydrologic data available. I shall now stay in Madras for at least several days to a week or more preparing a technical report and making recommendations, particularly with reference to hydraulic model studies.

I hope we can effect an agreement for the University of Minnesota to contribute materially on this phase of this huge development. But there is provincial pride among the people here, and they want to do at least as much as possible of the experimental design; so I have agreed to help them to set up this aspect. In fact, they did some preliminary work already, and I am trying to establish certain routines of procedure. We can probably work out a program which will best serve their needs by a collaborative effort divided between India and Minnesota. At any rate, that will be my recommendation.

Just now, one of my problems is getting stenographic help that can understand my jargon. I've tried several here, and while I think they understand English, they do have their problems in understanding me, and many of the dictating vernaculars seem to be different. I have a man "expert" stenographer and secretary now, but most of the time I can't understand his English and he doesn't do much better understanding mine! I've never written so much long-hand in years.

The working hours at the Public Works Dept. Offices: they're something to be noted. The second morning that I got to the office -- it was 8:30 a.m. -- I found none of my staff of three people, a secretary, a computer and a technical assistant, had come around till 11 o'clock. Finally, on inquiring as to the reason, I found working hours are from 11 a.m. to 5 p.m. with no time for lunch. We changed

(None)

that immediately for my part of the staff; it's 8:30 to 5 with an hour for lunch. I'm afraid they regard me as a bull in a china closet, but I've just got to get finished and back to U.S.A. and the University.

Almost no one around these parts -- that is, among the natives -- wears shoes. Well, the people of authority do, but that's a very low figure indeed. I'm staying at the Commemara hotel, by far the best in town, but all the help go barefooted except a few key officials, including the head waiter and the principal room clerk. And talk about adequate personal attention: I've never seen as many waiters in the dining room as there are guests and normally there are about three times as many. And that holds for other activities in the hotel and elsewhere as well. At the experiment station at Poonda, I've seen six aides line up at the end of a river model so as to drop candles in simultaneously and watch the flow pattern.

The top native government engineers get \$10,000 per year and the more skilled mechanics and workers up to about \$2 a week. I don't know what the general flunkies get, but I dare say its only a few pennies a day at post-war high prices. However, don't think it's cheap to live here; actually, I find that for value received, the U.S.A. is no more expensive.

###

SPECIAL TO: THE SPOKANE CHRONICLE

and the Spokane Spokesman-Review

Patty Moore, daughter of Dr. and Mrs. K. C. Moore, of 3107 Manito Blvd., Spokane, is one of the candidates for Queen of Engineer's Day, to be celebrated on the campus of the University of Minnesota, April 25-26.

More than 350 senior engineering students will participate in the 45th annual "E Day," with a schedule of knighting ceremonies, a parade, two dances and exhibits at the University institute of technology planned for the event.

Miss Moore, a member of Delta Delta Delta, social sorority at the University, is being sponsored in her candidacy by Theta Tau, a professional engineering fraternity.

The names of the queen and her attendants will be kept secret until the queen's banquet in Coffman Memorial Union on the Minneapolis campus, on April 23.

Minneapolis, April - Dr. William A. O'Brien, director of postgraduate medical education at the University of Minnesota, rates the title, "Doctor to a Million", in the May issue of "Radio Mirror", for his featured public health programs on station WCCO since 1928.

According to the article in the radio magazine, Dr. O'Brien chooses his subject matter for his programs on the most common afflictions in order to gain universal appeal.

"My best supporters," Dr. O'Brien said, "are physicians. They cooperate 100 per cent and never dictate." A surprisingly great number of people go directly to a physician following one of the general medical programs, the doctor stated.

###

Regular army commissions in the lower grades are now available to male University of Minnesota students who served as army officers during World War II and who will receive their degrees or complete their graduate work before June 15, Col. Richard A. Ericson, head of the University's military department, reported today.

Two War Department boards of officers will visit the campus next week, Col. Ericson said, the first, on Tuesday, April 22, to explain the commission opportunities to student veteran officers who are interested, and the second, on Thursday, April 24, to interview all eligible applicants for regular army commissions.

Meeting in the auditorium of Murphy hall from 2 to 4 p.m. Tuesday, the first board will explain the program under which the War Department is seeking to augment the regular army in the lower commissioned grades and will accept applications from those students who are eligible.

The second board will interview applicants at the Armory all day Thursday, Col. Ericson stated.

Applicants for commissions in the promotion list departments of the army must be less than 28 years of age as of July 15, 1947, and must have been commissioned in the Army of the United States or any of its components subsequent to July 15, 1944, according to Col. Ericson. Applicants for commissions in the Judge Advocate General's department, Air Corps, Medical Corps, Dental Corps, Veterinary Corps and Chaplains' Corps are not subject to the 28-year age rule nor to the requirement of having been commissioned in the AUS subsequent to July 15, 1944.

To be eligible all applicants must meet the general qualification requirements for commissions and must receive their University degrees prior to June 15, 1947.

SPECIAL TO: THE RED WING REPUBLICAN-EAGLE

A hard-working member of the committee planning Engineers Day at the University of Minnesota is John A. Madson, son of Mr. and Mrs. Henry Madson, of 747 McSorley Street, Red Wing.

One of the more than 5,000 students enrolled in the University's Institute of Technology this spring, Mr. Madson is helping to work out details for the 45th annual "E Day," scheduled for April 25-26.

The celebration will include knighting ceremonies, a parade from the Minneapolis loop to the University campus, two dances, and technological exhibits by the various engineering departments of the University.

Mr. Madson is serving on the committee for the "E Day Brawl," a semiformal dance to be given April 25 at the Calhoun Beach Club, on the shores of Lake Calhoun, in Minneapolis.

A major in architecture in the Institute of Technology, Mr. Madson expects to be graduated from the University in 1949. Following his graduation, he plans to leave for Stockholm, Sweden, where he will enroll in the Royal Academy for graduate work.

After his first two quarters of work at the University, Mr. Madson joined the Army Air Forces, and during the war he served as a fighter pilot in England, France, and Belgium. He returned to the University early in 1946.

Kept busy with homework for his courses in French, history of architecture, strength of materials, and architectural design, Mr. Madson does find time to lead one of the popular dance bands on the campus.

He is also an active member of the University chapter of Delta Tau Delta, a national social fraternity, and is listed on the rolls of the Minneapolis branch of the Reserve Officers Association.

As a member of the Air Reserve Association, he puts in at least four hours flying time a month at Wold-Chamberlain Field in Minneapolis.

"Marie Louise", a French and Swiss-German film release, tracing the experiences of a French child who was evacuated from her home in Rouen to Switzerland when France was occupied, will be shown in Northrop Memorial auditorium Friday (April 25) at 4 and 8 p.m. as the second of the University of Minnesota Film society's spring series of six foreign film showings.

The film is the typical story of many French children who lost their homes and happiness in the wake of the war. For a time thousands of them were evacuated to Switzerland for a three-month's stay. There they were either adopted by foster parents or boarded in Chalets maintained by co-operative efforts of factory owners and their employees.

Produced by Lazar Wechsler, the movie was made with background shots of the magnificent Swiss Alps. The cast includes the child, Josiane, who was actually evacuated from Rouen during the war, Heinrich Gretler and Margrit Winter. Leopold Lindtbert is the director.

Other foreign films to be shown in the University Film society's series will include, "The Raiders", a British picture, May 22; "Portrait of a Woman", a French Film, May 29; "Man's Hope", a Spanish release, June 5, and "On Approval", an English comedy, June 12.

Donald E. Coles, 1807 Hague avenue, St. Paul, World War II veteran and senior in the University of Minnesota's institute of technology has been selected as one of nine men throughout the country to receive the Tau Beta Pi association fellowship of \$1,000 for the school year 1947-48.

Coles, 23, who is sixth among 313 Minnesota seniors scheduled for bachelor of science degrees this spring, plans to take his graduate work for a master of science degree at the Colifornia institute of technology.

His experience while in the military service included a year at the Boeing School of Aeronautics, the A.S.T.P. course in mechanical engineering at the University of Michigan, practical work at Pratt and Whitney Aircraft and four semesters at the University of Minnesota.

His graduate work will be in the field of aerodynamics where he has begun a program of research on a stability problem involving an inverted vee tail surface.

The fellowships are the first to be awarded for three years and were increased from \$650 to \$1,000 to cover the increased cost of living throughout the United States.

and the Grand Rapids Herald-Review

Harry Lewenstein, son of Mr. and Mrs. Sam Lewenstein, of Marble, Minn., was chosen this week as the new editor of the Technolog, publication of the Institute of Technology at the University of Minnesota.

A sophomore majoring in electrical engineering, Mr. Lewenstein will serve as editor of the Technolog for the school year 1947-1948. He expects to graduate from the University in 1949.

Mr. Lewenstein served for two years in the Navy as a radio technician, and is one of the more than 4,300 veterans of World War II enrolled in the Institute of Technology for the spring quarter.

Before entering the service, Mr. Lewenstein was graduated from Greenway high school in Coleraine in 1944. He was editor of "The Blast," the high school annual, during his senior year there.

Among his extra-curricular activities, Mr. Lewenstein holds membership in Phi Epsilon Pi, academic fraternity. He is also secretary-treasurer of the Tech Party, a group representing technical students at the University. He was elected last week to a two-year term on the All-University council, which governs student affairs on the campus.

His course of study includes classes in physics, mathematics, fundamental electrical engineering, differential equations and economics.

Registration for the University of Minnesota's Reserve Officers Training Corps for the school year 1946-47 will open Monday, (April 28) at the armory, Col. R. A. Eriksen, professor of military science and tactics, announced yesterday.

"Veterans who will have two years remaining in school after September, 1947, and non-veterans who will have four years in school after that date are eligible for enrolment," he said.

The University military department operates the ROTC as only another University course, Col. Eriksen emphasized. "Enroled students remain in a civilian status and are not subject to army duty," he said.

The ROTC courses now constitute the only means available to the Federal government to select and train college graduates for leadership in future national emergencies, he pointed out.

"It has long been recognized that college graduates constitute the greatest pool of potential leaders available to the nation," the colonel said. "Students who are citizens and interested in the national security, should avail themselves of the opportunity to prepare themselves to render the maximum effective service to the nation if required."

Minneapolis, April - Education Day will be observed Thursday, May 1, at the University of Minnesota, and a series of special events have been mapped out for the day by the faculty and students of the college of education.

Highlights of the Education Day program will include an all-University convocation, noontime indoor picnic, a student-faculty softball game, a twilight dance and informal reception and a banquet.

Speaker at the Education Day convocation will be Dr. Alain L. Locke, professor of philosophy at Howard university, Washington, D.C., who will speak on "Creative Democracy". The convocation will be held in Northrop Memorial auditorium at 11 a.m. Dr. Locke also will be interviewed on KUOM, the University radio station, at 2 p.m., in a special Education Day broadcast.

The great hall of the University Y.M.C.A. will be the scene of the indoor picnic at noon. Dr. Locke and three members of the University's teaching staff will participate in a discussion of the problems of education at the picnic.

College of education faculty members and students will play a softball game on the University high school athletic field at 2:30 p.m., and at 4 p.m. a twilight dance and informal reception will be held in the junior ballroom of Coffman Memorial union.

Concluding Education Day will be a banquet at 6 p.m. in the grand ballroom of the union. Presentation of the college of education award for leadership and service will be made at the banquet.

Presiding over Education Day will be a queen who will be chosen the previous day from among a group of candidates, all of whom are majoring in education. The queen's slogan will be: "Teachers, Too, Can Be Beautiful".

SPECIAL TO: THE DASSEL DISPATCH

Norman Edward Groth, son of Mr. and Mrs. Fred Groth, of Dassel, Minn., ^{during the spring quarter} was elected this week to the presidency of the All-University council at the University of Minnesota.

Mr. Groth is a junior student in the School of Business Administration at the University, and is majoring in merchandising. He will receive his Bachelor of Business Administration degree next spring, and after his graduation, he plans to go into sales organization work.

A veteran of service with the Navy, Mr. Groth spent a year at sea in the Pacific during World War II. He served as a radio officer aboard a light cruiser.

This is really Mr. Groth's "second hitch" at the University. He first enrolled after graduation in 1942 from Dassel high school, where he was active in football and basketball.

During his first college year, he enlisted in the Naval Reserve Officers Training Corps, and received his Navy commission and a Bachelor of Science degree in naval science and tactics upon his graduation from the University in February, 1945.

In addition to his class work, Mr. Groth finds time to act as president of the junior class at Minnesota. He is also a member of the Committee of Student Affairs of the University Senate.

His fraternities include Delta Tau Delta, academic group, and Anchor and Chain, honorary Navy Society. Too, he is a member of the sales staff of the Gopher, University yearbook, and has aided in promotion for the campus Chest drives.

Continuing his Navy activities, Mr. Groth has joined the reserve organization in Minneapolis, and plans to spend two weeks this summer on a cruise with the group.

He is vice chairman of the University of ~~Minnesota~~ Alumni Association in Dassel. *Dassel High School*

Minneapolis, April - The University of Minnesota chorus under the direction of Dr. James Aliferis, assistant professor of music, and accompanied by the University symphony orchestra will present the first campus performance of Mozart's Requiem Mass at 4:30 p.m. Sunday (May 4) at Northrop Memorial auditorium.

Vern Reindollar, tenor, and James W. Scheu, bass, chorus members and students at the University, will be featured as soloists. Mrs. Shirley Fisher, soprano; Mrs. Elaine Schussler, alto; and Edwin Fritsen, baritone, also will appear as soloists.

The program will open with organ music played by Edward Berryman, instructor of music at the University and will be followed by the Requiem Mass. Mozart's score is 84 pages long and requires 45 minutes for presentation.

According to music history, Count von Walsegg, hoping to pass the work off as his own, secretly commissioned Mozart to write the Requiem. Mozart, however, died before finishing the music, but his wife, afraid that the count might demand his money back, persuaded one of Mozart's pupils, Francois Suessmayer, to finish the Mass.

After completion, the music was published as Mozart's, although Suessmayer actually wrote only about a fourth of the entire composition, and even this part was based on fragmentary notes found on Mozart's desk.

SPECIAL TO: THE MANKATO NEWS

and the Mankato Free Press

A former student at Mankato State Teachers College, George James Lorentz, Jr., is now enrolled in the School of Business Administration at the University of Minnesota.

The son of Mr. and Mrs. George J. Lorentz, of 1028 North Fourth street, Mankato, he is one of the 1,249 veterans studying business administration at the University. Now a sophomore student, he expects to do management or advertising work following his graduation in 1950.

Mr. Lorentz was graduated from Loyola high school in Mankato in 1942, and after a year at Mankato State Teachers College, he went into the Army. He spent a total of 14 months on duty in both the European and Pacific theaters before the war ended.

Registering at the University last fall, Mr. Lorentz was assigned to Pioneer Hall, a large campus dormitory now reserved for veterans. He is chairman of the social council at Pioneer, and plans many of the activities for the residents there. He also participates in intramural softball and golf with the dormitory teams.

In addition, Mr. Lorentz is a member of the Veterans' club and the Newman club on the campus. His classes for the spring quarter include accounting, economics, and statistics.

SPECIAL TO: THE MANKATO NEWS

Betty J. Wykoff, daughter of Mr. and Mrs. G.I. Wykoff, of 304 State street, Mankato, was one of the students honored last week at the annual dinner of Theta Sigma Phi, national honorary fraternity for women in journalism, at the University of Minnesota.

Miss Wykoff's name has been engraved on the Theta Sigma Phi leadership plaque which hangs in the office of the University's School of Journalism. The plaque was presented by the Twin Cities Alumnae chapter of the fraternity, and the honor goes each year to the girl who contributes the most to the active chapter on the campus.

A senior student majoring in journalism, Miss Wykoff will be graduated from the University in June. She is the president of Theta Sigma Phi, and was chairman for the Matrix Table, the dinner at which she was honored.

For two of her college years, Miss Wykoff was a reporter and night editor on the staff of the Minnesota Daily, student publication at the University. She is also a member of the Lutheran Students' association on the campus.

After graduation from Mankato high school, she spent a year at Mankato State Teachers College, where she helped to edit the College Reporter. Now, in addition to her college work, she is editing an employee publication for an electric company in Minneapolis.

During the spring quarter, her course of study includes classes in humanities, current newspaper problems, a political science study of problems of the Pacific, and music appreciation.

SPECIAL TO: THE MONTEVIDEO NEWS
and the Montevideo American

After more than two years in South America as a cryptographer with the Army Air Forces, Gale Timothy Warner returned to civilian life and enrolled at the University of Minnesota.

The son of Mr. and Mrs. Timothy Allan Warner, of Montevideo, he is now a sophomore in the University's School of Business Administration. With credits earned through the correspondence work of the general extension division of the University, before the war, Mr. Warner will be eligible for graduation in 1949.

On the campus, Mr. Warner lives at Pioneer hall, a dormitory reserved solely for Minnesota veterans of World War II. At Pioneer, he serves on the Social Council, which plans activities for the dormitory residents.

He also participates in intramural basketball games, and with the advent of warm weather, he will join the ranks of University golf enthusiasts.

During the spring quarter, Mr. Warner is studying courses in statistics, accounting and humanities. For the summer, he will be director of the trading post at a Boy Scout camp at Mary Point lake.

Following his graduation, he plans to use the knowledge of South America which he gained during his military service, by entering the business world "south of the border."

SPECIAL TO: THE MONTEVIDEO NEWS

and the Montevideo American

One of the more than 4,600 veterans of World War II registered in the College of Science, Literature, and the Arts at the University of Minnesota is Warren M. Campbell, son of Mrs. Elma B. Campbell, of Montevideo.

A junior student majoring in political science, Mr. Campbell expects to be graduated from the University in June, 1948. Following his graduation, he plans to take further work and then teach his subject in a Minnesota high school.

Mr. Campbell spent a year studying at the University before the war, and after joining an Army infantry unit, he saw service for 15 months in the European theater of war. He returned to the Minneapolis campus last summer.

His course of study includes a minor in history. During the spring quarter, he is attending classes in world politics, French and History. Among his political science courses are two theory studies of recent and modern political thought.

SPECIAL TO: THE MONTEVIDEO NEWS

and the Montevideo American

A month before his release from the Army Air Forces, Harry Edward Jarvis had registered and was attending classes at the University of Minnesota. He is the son of Mr. and Mrs. Harry P. Jarvis, of Montevideo.

Mr. Jarvis spent five years flying for the Army. He tested planes during his first three years in uniform, and for the last 28 months of the war, he flew fighters, bombers and cargo planes in Australia, New Guinea and the Philippines.

Carrying his aeronautical interests into civilian life early in 1946, Mr. Jarvis enrolled in the University's Institute of Technology. He is one of the 4,206 veterans now attending the institute.

Included in his present course of study are classes in calculus, physics, and aerodynamics. He is a member of the Minneapolis chapter of the Army Air Forces Reserve.

Planning to attend school this summer, Mr. Jarvis will be graduated in aeronautical engineering in the fall of 1949.

The new president of the Board of Publications at the University of Minnesota is Lowell Dwight Mills, son of Mrs. C.E. Mills, of Montevideo. Mr. Mills was elected to his post at a meeting of the group late last week.

Mr. Mills is now serving a two-year term with the Board of Publications, which supervises the daily newspaper, the yearbook, and the humor magazine at the University. The Board is composed of nine student members and three faculty members.

A junior student majoring in journalism, he plans to attend summer school at the University, in order to be graduated in March, 1948.

Before the war, Mr. Mills took a year of University correspondence work through the general extension division. After more than a year in the Pacific, as a Navy yeoman with public relations and supply units, he resumed his education on the Minneapolis campus last April.

At the University, Mr. Mills lives at Pioneer hall, a large dormitory now reserved for Minnesota veterans of World War II. He is one of the counselors for the veteran students there, and is also the advisor for the "Piper," the weekly publication of the dormitory.

In addition, he is a member of the Commons club, a social and service organization sponsored by the University Y.M.C.A. He also serves on the Union Twilight Dance committee and is a supervisor of ushers for the Artists Course and Minneapolis Symphony orchestra concerts.

James B. Reed, 4120 W. Forty-fourth street, Minneapolis, has been named cadet colonel of the University of Minnesota's Army Reserve Officers Training Corps, Col. R. A. Ericson, professor of military science and tactics at the University, announced today.

Reed spent more than 36 months in the army and saw action in North Africa and Italy. The appointment was made on the basis of experience in service, ROTC scholastic standing, college grades, military bearing and demonstrated interest in ROTC.

According to Colonel Ericson, the selection of cadet officers is aided by the students who help in grading and appraising their fellow students. Reed is enrolled in the school of business at the University, a member of the U. of M. ski club, Pershing Rifles and Scabbard and Blade, honorary military fraternities.

SPECIAL TO: THE GRAND RAPIDS HERALD-REVIEW

James Edward Erskine's war-time Navy training led him into the Institute of Technology when he returned to civilian life and enrolled at the University of Minnesota. He is the son of Bruce Erskine, of 519 Third Avenue East, Grand Rapids.

Mr. Erskine was rated a radio technician during his Navy service, and is now majoring in electrical engineering at the University. He spent 13 months on duty in the Pacific during the war.

Now a freshman student, he registered at the University last fall, and expects to be graduated in 1950. After commencement, he hopes to own his own electrical business.

Mr. Erskine is a graduate of Grand Rapids high school, where he was active in football, basketball, and track. His present course of study includes analytic geometry, descriptive geometry, English, and a chemistry course in qualitative analysis.

On the campus, Mr. Erskine lives in Pioneer hall, a large men's dormitory now reserved exclusively for Minnesota veterans of World War II. He is one of the more than 4,200 veterans now attending the Institute of Technology.

His summer plans include work in his field of electricity. As a member of the naval reserve program at the University, he will also participate in a two-week summer cruise, probably to Hawaii.

SPECIAL TO: THE WASECA HERALD
and the Waseca Journal

After 18 months in the Pacific area as a scout and sniper with the Third Marine division, James A. Bower, of Waseca, returned to civilian life last year and enrolled at the University of Minnesota in the fall.

Mr. Bower, the son of Edward F. Bower, of 400 East Elm avenue, Waseca, is majoring in wild life management in the forestry department of the University's College of Agriculture, Forestry, and Home Economics.

Now a freshman student, he plans to work in the conservation department following his graduation in 1950.

A graduate of Sacred Heart high school in Waseca, Mr. Bower worked on the staff of the "Torch," the school newspaper while he was a student there. On the University campus, he is a member of the Newman club, the Wild Life Managers club, and the Forestry club.

During the spring quarter, Mr. Bower is studying courses in zoology, botany, dendrology, and a class in discussion and debate.

Although his plans for the summer are still tentative, Mr. Bower may spend several weeks at the forestry station at Itasca State park. He may also gain some experience with the Minnesota wild life department.

SPECIAL TO: THE DASSEL DISPATCH

Another graduate of Dassel high school has received recognition at the University of Minnesota. He is Roland Paul Dille, who was recently named editor of "Undergrad," a new student publication at the University.

Mr. Dille, the son of Mr. and Mrs. Oliver Dille, of Dassel, is a sophomore student majoring in English composition in the University's College of Science, Literature, and the Arts.

At Dassel high school, where he was graduated in 1942, Mr. Dille was co-captain of the basketball team and was a staff member of the "Dazzler," the school newspaper. From high school, he went to the University for a year before entering the Army.

During the war, he spent more than a year on duty with an infantry unit in Europe. Still overseas at the war's end, he took several classes at Biarritz American university in France. He is one of the more than 4,600 veterans of World War II now enrolled in Minnesota's arts college.

Mr. Dille returned to the campus last September, and is now studying classes in advanced writing, French, Shakespeare, and ancient history. He expects to be graduated in June, 1949, and plans then to teach at the university while working on his master's degree.

As editor of "Undergrad," he will be developing a laboratory publication, sponsored by the English department to encourage student writers. The magazine will be published six times a year, with the first issue scheduled for early in May.

Mr. Dille is president of the University of Minnesota Alumni association in Dassel. He plans to spend the summer on his family's farm.

SPECIAL TO: THE GRAND RAPIDS HERALD-REVIEW

One of the 5,000 students enrolled in the Institute of Technology at the University of Minnesota is Duane William Elliott, son of Mrs. Martha Elliott, of Grand Rapids.

A major in civil engineering, Mr. Elliott is studying this spring such courses as technical mechanics, physics, surveying and drafting. Now a sophomore student, he expects to be graduated from the University in June, 1949.

After graduation from high school in Grand Rapids, Mr. Elliott studied for a year at Itasca Junior college. During the war, he spent more than two years as a fighter pilot in the Army Air Forces.

Mr. Elliott returned to civilian life last year, and registered at the University during the winter quarter.

Among his extra-curricular activities on the campus is membership in the student chapter of the American Society of Civil Engineers.

Minneapolis, April - More than 3,200 contestants in the East-Central State Regional contest of the Minnesota Public School Music league will compete in six music classifications at the University of Minnesota Friday and Saturday (May 2-3).

According to Gerald R. Prescott, University band director and general manager of the contest, only contestants receiving an "A" rating in the district contests are eligible to enter the state competition.

Competitors from 80 Minnesota schools will send bands, orchestras, instrumental and vocal ensembles and soloists in voice and instruments to the contest, Prescott said.

Sponsored by the Minnesota Public School Music league, the elimination contests will be held in Northrop Memorial auditorium, the Museum of Natural History auditorium, the Music building auditorium and the Music building library on the University campus.

Judges for the vocal solos will be: Norman C. Johnson, vocal director of the Duluth public schools; Jack Ehlert, Duluth State Teachers college; and Roy Schuessler, voice instructor at the school of music at the University.

Bands and orchestras will be judged by: Ronald Riggs, St. Cloud State Teachers college; Myron Russell, Iowa State Teachers college, Ames, Iowa; and Arnold Alstad, director of the high school band, Jackson, Minn.

Judging instrumental solos and ensembles will be: R. W. Winslow, head of the music education department at the University; James Aliferis, director of the University chorus and assistant professor of music at the University; and Paul S. Ivory, instructor of music at the University.

Minneapolis, April - The first of a series of five state-wide meetings sponsored by the Minnesota Library association will be held at Coffman Memorial Union and Murphy Hall on the campus of the University of Minnesota Saturday (May 3).

Emily Mayne, librarian of the Martin county library and past president of the Minnesota Library association and Dr. William P. Tucker, librarian of Macalester college, St. Paul, will be the scheduled speakers at the campus meeting, according to Dr. Donald E. Strout, associate professor in the University's division of library instruction, and vice president of the association.

Maryan Reynolds, field representative of the Washington State library and former Minneapolis resident, will be the featured speaker at afternoon sessions of each district meeting on the subject, "The Librarian -- Crusader in a Confused World".

Nellie Yantes, librarian of the Vasca county library and Dr. E. W. McDiarmid, University librarian, will speak at the second meeting of the association in the club room of the Rochester Public library, Monday (May 5).

Alice Lewis, librarian of the Worthington public schools and second vice president of the association, and Mrs. Agatha L. Klein, librarian of the State Library division, will speak at the association's meeting at the Marshall high school little theater, Wednesday (May 7).

J. Archer Eggen, librarian of the Fergus Falls public library, and Dr. Strout, will speak at the fourth meeting of the association at the public library and at the Detroit Lakes high school auditorium Thursday (May 8).

Lee F. Zimmerman, director of the State Library division, and Alfred G. Trump, librarian of the Virginia Junior college, will speak at the concluding association meeting at the Roosevelt high school auditorium in Virginia, Saturday (May 10).

SPECIAL TO: THE NORTHFIELD INDEPENDENT
and the Northfield News

There's more to home economics than learning to cook. That's the opinion of Kathryn Ann Albers, of Northfield, who is majoring in related arts, a home economics course in the College of Agriculture, Forestry and Home Economics at the University of Minnesota.

Miss Albers is the daughter of Mr. and Mrs. Alfred W. Albers, of Route 3, Northfield. She is now a junior student, and after her graduation in June, 1948, she will be prepared to enter either the merchandizing or the interior decorating fields.

Included in her present course of study are classes in advanced interior design, community hygiene, design applied to crafts, child care, and home management.

In addition to her class work, Miss Albers is a member of the Home Economics association, an organization for major students in that field, and of the Newman club.

A music lover, she sings in the Agriculture Campus chorus, which furnishes music for activities in that branch of the University. She also collects records as her hobby.

SPECIAL TO: THE NORTHFIELD INDEPENDENT
and the Northfield News

To her chosen career of nursing, Betty Jane Crouch recently added another career, matrimony, when she became Mrs. Gerald Schoenfelder. Mrs. Schoenfelder is a senior nursing student at the University of Minnesota.

The daughter of Mr. and Mrs. J.W. Crouch, of Route 1, Northfield, she will be graduated from the University Hospitals in June, and will complete her three-year course of training in September.

Mrs. Schoenfelder finished her University classes in January, and is now at Miller hospital in St. Paul for six months of practice in medical work, surgery, obstetrics and other phases of her field.

Members of the Newman club on the campus, Betty Jane and her husband were married in April in the Newman chapel. Mr. Schoenfelder, a student in animal husbandry in the University's College of Agriculture, Forestry and Home Economics, will be graduated in June, 1948.

After her graduation, Betty Jane plans to work in a Twin Cities hospital.

SPECIAL TO: THE ST. JAMES COURIER

and the St. James Plaindealer

Jeanne Gunn, daughter of Mr. and Mrs. F.T. Simons, of St. James, is getting plenty of practical experience in her field, along with her class work at the University of Minnesota.

Majoring in recreational leadership in the University's College of Education, Jeanne spends every spare hour working in the Wells Memorial Settlement House in Minneapolis. Here, she teaches classes in cooking, crafts and dancing, and often has charge of the nursery school.

Jeanne lives at the settlement house, and this summer will carry on her work at the Wells summer camp at Big Lake.

Now a senior student, she expects to be graduated from the University next March, and plans to do recreational work in a city hospital following her graduation.

Jeanne was graduated in 1944 from St. James high school, where she was editor of the school paper, a member of the chorus, band and orchestra, and participated in girls' athletics.

Her twin brother, Jim, was also a student at the University until last June, when he entered the Army. Now a civilian again, Jim will return to his University classes in the fall, according to Jeanne.

SPECIAL TO: THE ST. JAMES COURIER
and the St. James Plaindealer

One of the blue-uniformed public health nurses now answering sick calls in Minneapolis is Dorothy L. Eppeland, of St. James. She is working in public health as a part of her nursing training at the University of Minnesota.

The daughter of Mr. and Mrs. E.A. Eppeland, of St. James, Dorothy enrolled in the five-year nursing course at University Hospitals in 1945. She expects to be graduated in nursing and to receive her bachelor of science degree in June, 1948.

In addition to her six weeks of public health experience, Dorothy will train in psychiatry at General hospital in Minneapolis, and will work in the tuberculosis sanatorium at Glen Lake.

For the present, she is living in Harrington Hall, a nurses' dormitory at General hospital. In September, she will return to the main campus of the University for her last months of class work.

Dorothy was graduated in 1943 from St. James high school where she was an honor student, co-editor of the school paper, and a member of the chorus, band and orchestra.

During her two resident years at the University, she sang in the school chorus, and was a member of the Women's Athletic association.

Golf, tennis and softball may be just plain sport to most people, but to Ora Dyrstad, daughter of Mr. and Mrs. Oscar Dyrstad, of St. James, these games are subject for much hard study.

Ora is majoring in physical education in the College of Education at the University of Minnesota. Now a sophomore, she expects to be graduated in June, 1949, and will teach in some Minnesota school after commencement.

Included in her course of study this spring are classes in anatomy, psychology, and a number of physical education subjects, such as badminton, tennis, swimming, modern dance, softball, rhythm, and golf.

In addition to this extensive schedule, Ora also works for 15 hours each week in Pillsbury Settlement House in Minneapolis, where she teaches classes in tumbling, volleyball, and basketball, and conducts dancing groups for teen-agers, as well as exercise classes for adults.

Too, she finds time for membership in the Women's Athletic association, the University Y.W.C.A., and the Lutheran Students' association on the campus. She also served on a committee for Education Day at the University.

STUDENTS ALL OVER WORLD TAKE
'U' CORRESPONDENCE COURSES

Minneapolis, April - A stamp-collector's paradise is the correspondence study department at the University of Minnesota. Every day, from all over the world, inquiries from prospective students and lessons from those already enrolled are handled by the University's correspondence department personnel.

Most of the odd stamps from Tanganika, Syria, or Gibraltar, are snatched up when the mail first hits the office, but there are many others from countries all over the world.

Subject matter carried to the University's correspondence department by the assorted foreign stamps, ranges from beekeeping to solid geometry.

Established in 1913, as a department of the University's general extension division, the correspondence department handled its peak load of students during the war years of 1944-45, according to Jennie Williams, assistant head of the department.

"In 1942, there were approximately 4,000 students enrolled in correspondence work," Miss Williams explained, "but with the service men swelling the enrollment during the war, the total number of students soared to about 12,000 between 1944 and 1945.

Enrollment dropped to about 7,000 in 1946, and approximately the same number are taking correspondence courses this year, according to Miss Williams.

One serviceman in the Pacific theater of operations during the war took writing courses from the University because, he wrote: "On my day off there is nothing to do in the islands."

Another serviceman, a British major stationed in Africa, requested a course in radio writing, but for some reason known only to himself and the British censors, was unable to send the money to cover the cost of the course, Miss Williams continued.

(More)

"Instead of sending money," she said, "the major forwarded an old book, published in England in 1630, entitled, 'Thankfull Remembrances of God's Mercie in an Historical Collection of the Great and Merciful Deliverances of the Church and the State of England'. Fortunately, the University Library was able to purchase the book, and the major was able to take the course."

Harry B. Garland, Dawson Creek, British Columbia, and Agathangelos H. Michael, London, England, are enrolled in the beekeeping course offered by the department under the direction of Mykola H. Haydak, associate professor of entomology at the University Farm.

According to Miss Williams, Professor Haydak publishes articles on his subject in seven different European countries, and has a wide variety of students taking the beekeeping course.

A small mystery is the case of Mrs. Sola Holmen, who enrolled in a course in intermediate Norwegian in the University's correspondence department --- from Oslo, Norway. Briefly, Mrs. Holmen wrote that she is a housewife in Oslo and wanted to take the advanced Norwegian language course. The correspondence department wondered why she didn't apply to one of the Norwegian schools, but enrolled her anyway

Servicemen are apparently still finding leisure time hanging on their hands because Pfc. Arthur C. Krause, Wahpeton, N.D., serving with the Alaskan Communications System, Curry, Alaska, is taking a course in solid geometry through the University's correspondence department.

Robert P. Koenig, Shakopee, Minn., who is a United States government worker on the island of Guam, must be expecting a transfer to Germany soon, according to Miss Williams because he is now taking a beginning course in German.

Among "appropriate subject" students is Arturo Cantu, a refrigeration technician in torrid Mexico City, who is taking a course in his specialty, refrigeration.

"Once Minnesotans leave the state, they usually write back for courses from the department," Miss Williams concluded. "For instance, Helen Kantén, from Milan, Minn., is not only an assistant dietitian at the Kamahameha Boys' school in Honolulu, but she is also furthering her education at the University by taking a composition course from the correspondence office."

Heading the University's correspondence study department is F. Lloyd Hanson.

Minneapolis, March__ Degrees were awarded by the University of Minnesota to 567 students in the winter quarter commencement exercises Thursday (March 20) in Northrop Memorial auditorium.

Speaking on "Ideas and Individuals," Dr. Frederick L. Hovde, 1929 University graduate and former football star, now president of Purdue university, Lafayette, Ind., said there has never been a civilized society which thought its education was good enough.

"The job of education probably cannot be done in time to save man and his world from himself," Dr. Hovde continued, "but we, as individuals, must strive to educate ourselves, for it is in the striving that we grow, even though we may never reach perfection."

President J. L. Morrill conferred the degrees, and Rev. George P. Conger, chairman of the University's philosophy department, gave the invocation. Deans of the individual colleges were seated on the stage of the auditorium during the ceremonies.

Among those receiving degrees was/were, from

XXXX

Byron:

**Ronald Leslie Anderson - Bachelor of Arts degree, College of Science, Literature,
and the Arts.**
