POLITICAL CONFERENCE
PLANNED AT 'U' MORRIS CAMPUS

(FOR IMMEDIATE RELEASE)

A number of prominent Minnesota political leaders will participate in the 40th annual meeting of the political science section of the Minnesota Academy of Sciences Thursday and Friday (May 4 and 5) at the University of Minnesota, Morris.

The conference will open at 1 p.m. Thursday in Edson auditorium with a discussion on extremism chaired by Mulford Q. Sibley, University of Minnesota political science professor. Among the panel participants will be Earl Craig, who challenged Hubert H. Humphrey in the last DFL Senate primary, and Thomas Hopkins, a division chief for the Bureau of Indian Affairs.

A discussion on Chinese issues at 3 p.m. in Science auditorium will include papers by a number of experts from state colleges and the University.

Former Minneapolis Mayor Arthur Naftalin will chair a panel on urban politics which begins at 7 p.m. at the Sunwood Inn. Among the participants will be J. Edward Anderson, a University authority on urban transit; Robert A. Barrett, director of the Urban Studies Institute at Mankato State College; and James J. Solem, a director for the Minnesota State Planning Agency.

David Fogel, Minnesota commissioner of corrections, will be among the participants on a panel on criminal justice at 9 a.m. Friday in Science auditorium on campus.

A panel on politics and higher education will be chaired by John Q. Imholte, provost of the University campus at Morris. The discussion will be at 11 a.m. Friday in Edson auditorium.

Panelists will be Charles J. Graham, president of St. Cloud State College; G. Theodore Mitau, chancellor of the Minnesota State College System; John L. Olson, chairman of the State Senate higher education committee; James A. Robinson, president of Macalester college; and Rodney Searle, chairman of the education division of the State House of Representatives appropriations committee.

Participants in a 2 p.m. discussion on the 1972 presidential election will include Larry Bye, assistant to former presidential candidate Eugene McCarthy; and Benjamin J. Wattenberg, former aide to President Lyndon Johnson.

U OF M HOSPITALS
WILL GET 62
INTERNS JULY 1

(FOR IMMEDIATE RELEASE)

University of Minnesota Hospitals will have 62 interns in training starting July 1.

In addition, the department of family practice and community medicine is sending 30 first-year residents to five affiliated community hospitals. They are Bethesda Lutheran Hospital, 12; St. John's, 6; North Memorial, 4; Methodist, 4; and Fairview-St. Mary's, 4.

(While most doctors spend their first year after graduation as interns and then go on to become first-year residents, the programs in family practice and in psychiatry do not have internships, and thus their new graduates immediately become first-year residents.)

University departments and the number of interns they will have are surgery, 17; pediatrics, 15; obstetrics and gynecology, 3; pathology, 2; and psychiatry, one first-year resident. The medicine departments at the University and Veterans Administration Hospital will jointly train 24 interns.

Half of the new interns are University Medical School graduates.

MORE 'U' MED SCHOOL GRADS
WILL INTERN IN STATE

(FOR IMMEDIATE RELEASE)

More than half of this year's record University of Minnesota Medical School graduating class will be interning in the state.

Some 115 seniors in a class of 207 will remain in Minnesota for their one-year internship which begins July 1. Last year 103 seniors accepted internships in the state.

According to the National Intern and Resident Matching Program, 151 graduating seniors from other states also will come to Minnesota, giving the state a net gain of 59 doctors in their first year of postgraduate work.

Minnesota hospitals and the number of University Medical School graduates interning there are Hennepin County-General, 34; University Hospitals, 31; St. Paul-Ramsey, 28; Duluth hospitals, 10; Northwestern Hospital, 7; Mayo Clinic, 4; and Twin Cities private hospitals, 1.

\$20,000-A-YEAR MAN
TO MOVE FAMILY TO WILDERNESS

by Bill Huntzicker
University News Service

Dick Swanson works hard for the issues he believes in. He is assistant dean of the University of Minnesota Law School. He's 31 years old and makes \$20,000 a year.

But in June, he will give it all up.

Dick and his wife, Bonnie, will sell their suburban Minnetonka home and move with their twin children, Brian and Lynn, age 6, into a tent in an isolated area of northern Minnesota.

"After thinking about my life style and my career," Swanson said in an interview, "I found they are not really related to my values. I work for many things I don't really believe in and I work hard."

Swanson said he has found his career satisfying but, he said, he wants to quit before he becomes more economically tied to it.

A 1966 graduate of the University Law School, Swanson has been assistant state public defender for Hennepin county and an attorney with the firm of MacLaughlin and Harstad in Minneapolis.

As assistant dean, Swanson has been in charge of admissions, scholarships and job placement. He has helped to increase minority enrollment in the Law School.

(MORE)

Although he is concerned about the "cop-out implications" of his action, Swanson said he preferred to retreat, at least temporarily, to the wilderness "rather than to sacrifice my life and that of my children in an effort to slow a machine that can't be stopped anyway."

"I spent two rather satisfying years helping poor people who were charged with crimes. But this came to be excessively demanding on my time and my family," he said. "And it seems that with any job you're working on you have to support too many things you don't believe in yourself."

Last fall, Swanson purchased a four-acre lot at the end of a road near the Canadian border and the Boundary Waters Canoe Area in the northeastern tip of the state.

He said he and his wife have saved enough money to live there for one year, without electricity or a telephone.

"We hope that by the time it gets too cold to live in a tent, we will have a cabin built," he said. "We will cook and heat with wood and light with kerosene."

"I expect to work with my hands and my back a little bit. There will be furniture to build," he said. "My principal occupation will be the sustaining of life. And we will have to educate the children who will not be in school next year."

Swanson's wife is enrolled in a correspondence course from London to study the Montessori system of education. "From this, we get ideas about educational projects for the kids," he said.

Swanson expects to get to know his family better. "I haven't had the time to know my children as my wife has."

After his year in the wilderness, Swanson doesn't know what he will do.

"I like security as much as anyone," he said. "There may not be a doctor handy in the north country and the job market may not be very good when the year is over. There were a lot of serious questions which we had to face."

He admits that he is able to afford the retreat because of the income he has received as a lawyer. But, he said, many students entering Law School don't know what they're getting into.

"If you're going to be a 'successful' lawyer, you have to work within the system 100 per cent. Most lawyers' goals in life are \$40,000 to \$50,000 a year," Swanson said.

He said a small percentage of law students are more interested in social issues than their own economic stability.

TOY INSTRUMENTS, SLIDES,
ELECTRONIC TAPES FEATURED
IN FREE COFFMAN CONCERT

(FOR IMMEDIATE RELEASE)

Richard Bunger, pianist and specialist in new music, will perform with the First Minnesota Moving and Storage Warehouse Band, University of Minnesota contemporary music ensemble, in a free concert Sunday (May 7) at 8 p.m. in Coffman Union junior ballroom.

One of the featured works will be Jon Appleton's "The Bremen Town Musicians," commissioned by Bunger in 1971 with the assistance of a grant from the Martha Baird Rockefeller Fund.

The modern musical mini-concerto setting of the Grimm brothers' tale will be narrated and conducted by Bunger who will play a three-octave toy piano and be accompanied by an 11-member ensemble also performing on toy instruments.

Slide projections by Bunger and electronic tapes by Appleton, head of the electronic studio at Dartmouth Colleg, will be used.

Other works featured on the program include a concerto by Henri Lazarof, and works for solo piano by John Cage, Carlton Gamer and Harold Budd.

Bunger, who has received degrees from Oberlin Conservatory and the University of Illinois, has appeared with the National Symphony and performed concerts in England, Norway and Germany. He will return to Europe in June for a concert tour as soloist with the Orchestre de Musique Contemporaine de Paris.

Those interested in observing the final stages of preparing these unusual works for performance may attend an open rehearsal on Saturday (May 6) from 2 to 3 p.m. in Coffman junior ballroom.

A carillon prelude at 7:30 p.m. will precede the concert on Sunday. The public is invited.

'U' THEATRE TO PRESENT
FIRST PRODUCTION OF
'THE WINTER'S TALE'

(FOR IMMEDIATE RELEASE)

William Shakespeare's "The Winter's Tale" will be presented for the first time by the University Theatre Tuesday through Sunday (May 2-7) in Shevlin arena theater.

Richard Geer, a graduate student from San Diego, Calif., is directing the production. Toni McNaron, associate professor of English, is the faculty adviser. Cast in the leading role of the king, Leontes, is Douglas Hamilton, a graduate student and Bush fellow, from Moorhead, Minn. His wife, Hermione, is played by Bea Morris, a graduate student from Wayzata. Polixenes, the king whom Leontes accuses of infidelity with Hermione, is played by Michael Boyle, a senior from St. Paul. Paulina, the woman who defends Hermione from the unjust accusations, is played by Susan Osborne, a sophomore from St. Anthony Village. The clown is played by Sonny Linder, a sophomore from Clayton, Mo. The play combines fantasy and reality.

Performances are at 8 p.m. Tuesday through Saturday and at 3:30 p.m. Saturday and Sunday. This is the last University Theatre play of the season for which coupons may be used. For reservations, call 373-2337.

U OF M LEUKEMIA STUDY
GIVES CLEARER PICTURE
OF DRUG'S EFFECT

(FOR IMMEDIATE RELEASE)

A five-year study of adults with acute leukemia at the University of Minnesota has given further evidence of the effectiveness of the drug Daunorubicine and also indicated what type of patients will most likely respond favorably to treatment.

Reporting today to the American Association for Cancer Research in Boston, Mass., Dr. Clara Bloomfield stressed the importance of early diagnosis and treatment, saying the more leukemic cells in the blood at the onset of treatment, the less chance for improvement.

Twelve of the 45 patients treated with a combination of prednisone and Daunorubicine experienced a complete remission of leukemic cells---meaning the leukemia could not be detected by normal blood testing. The average (median) remission lasted approximately seven months but some had a complete remission for up to three years.

Dr. Bloomfield, an instructor in the department of medicine, also reported the best results were in adult women of any age and in younger men. Reasons for the differences are not yet known.

She emphasized the improved results in treatment were aided by improved support techniques including the use of a continuous flow cell separator to provide transfusions of normal white blood cells to combat infection and normal platelets to prevent hemorrhage.

Other team members include Dr. Athanasios Theologides, associate professor of medicine; Dr. Richard Brunning, associate professor of laboratory medicine; and Dr. B. J. Kennedy, professor of medicine and director of medical oncology.

VICE PRESIDENT AMONG
RETIRING FACULTY AT U OF M

(FOR IMMEDIATE RELEASE)

A University of Minnesota vice president and 26 other faculty members will retire July 1.

After almost 43 years at the University, Laurence R. Lunden, vice president and consultant to President Malcolm Moos, is retiring. He has been on leave for the past year.

Lunden came to the University in 1929 to work on his doctoral degree and served as an instructor in the College of Business Administration before being named an associate professor in 1937. He was appointed a full professor in 1957 after having served as University comptroller and treasurer.

Lunden and the other retiring faculty members will be honored guests at a Spring Buffet Thursday (May 11) at 6 p.m. in the Campus Club in Coffman Union. The buffet is an annual event, sponsored by the Campus Club, at which faculty members honor retiring colleagues.

Among the other retirements are the following:

Annie L. Baker, professor and director of Social Services at University Hospitals since 1949.

Samuel T. Coulter, professor and head of the department of food science and industries in the College of Agriculture since 1966.

(MORE)

Harold C. Deutsch, professor of history and former chairman of the department. Deutsch is known to many Minnesotans for his WCCO radio program in the early 1940s, and his WTCN-TV news program in 1961.

Mark A. Graubard, professor and chairman of the natural science program since 1964.

Regents' Professor E. Adamson Hoebel, former chairman of the department of anthropology. Hoebel was named Regents' Professor in 1966.

Ancel Keys, professor and director of the division of physiological hygiene in the School of Public Health. Keys is known to many ex-servicemen by the wartime K-ration he developed. The subject of a Time magazine cover story in 1961, Keys last year developed a simple "ice water test" to help predict whether a person will develop coronary heart disease.

Ralph G. Nichols, professor and head of the department of rhetoric in the College of Agriculture since 1948.

Edmund A. Nightingale, professor in the College of Business Administration since 1952.

Paul M. Oberg, professor and former chairman of the department of music.

Raymond G. Price, professor and head of the business education program in the department of secondary education.

Professor Frank H. Wood, former head of the German department.

Florence A. Ehrenkranz, professor and chairman of the School of Home Economics at the Duluth campus.

Professors Anne W. Oren and Lyndell B. Scott, both in the School of Social Work, are leaving July 1 under an experimental early retirement program.

MEMO TO NEWSMEN

The monthly meeting of the University of Minnesota Board of Regents is scheduled for 10 a.m. Friday (May 12) in the Regents room, 238 Morrill hall.

Long-range physical planning for the St. Paul campus will be discussed by the physical plant committee at 7:30 p.m. Wednesday (May 10) in the fireside room of McNeal hall in St. Paul.

Guidelines for the University's 1973 legislative requests will be discussed at 10 a.m. Thursday (May 11) in the Regents room at a joint meeting of the educational policy and long-range planning committee and the budget, audit and legislative relationships committee.

Other scheduled committee meetings are as follows:

Thursday

Health sciences, 8:30 a.m., B-12 Morrill hall;

Contracts, gifts and grants, 8:30 a.m., Regents room;

Public affairs, 9 a.m., B-12 Morrill;

Investment, insurance and retirement, 9 a.m., Regents room;

Joint meeting on the budget, 10 a.m., Regents room;

Educational policy and long-range planning, 2 p.m., Regents room;

Physical plant, 3 p.m., Regents room.

Friday

Faculty, staff and student affairs, 8:30 a.m., Regents room.

Committee appointments for the coming year are expected to be announced by the Regents this week. They will also discuss faculty and civil service retirement plans, agricultural and athletics information and public relations programs, and a proposed policy on radio broadcasting.

CHINESE MEDICINE IS BLEND
OF NATIVE, WESTERN TRADITIONS

by Bob Lee
University of Minnesota News Service

Twentieth-century physicians may yet heed the words of the "Yellow Emperor's Classic of Internal Medicine."

Written more than 2,000 years ago, the book details the five levels of traditional medicine in China.

Chinese lore has been especially popular in this country since President Nixon's trip and nothing has gotten more attention than acupuncture---the ultimate method of treatment in traditional Chinese medicine.

The philosophy behind the use of acupuncture needles and a general view of Chinese medicine were the subjects of an Earth Week lecture at the University of Minnesota.

Eric Utne, now working with Twin Cities food co-ops, spent most of the past three years studying and living with acupuncture practitioners in this country and England.

He lived 18 months with a Japanese family in Boston and studied with a graduate of the Chinese Acupuncture School of England.

In ancient China, traditional medicine was preventive medicine---the people paid a doctor to keep them healthy; if they got sick, he paid them.

The physician used five methods or levels of treatment starting with spiritual and turning to nutrition, herbal remedies, massage, and acupuncture if the preceding methods failed.

(MORE)

Health was defined as smooth-flowing energy---the body's invisible electromagnetic energy that we cannot measure---according to Utne.

A good Chinese physician 2,000 years ago depended on his sensitivity and intuition to diagnose. He had to maintain his own good health to properly help his patients.

In the early 1900's traditional medicine was officially neglected in favor of western education. More recently Mao Tse Tung claimed much could be learned from tradition and encouraged an interest in and revival of the past. For example, in recent times acupuncture as an anesthetic has been in use only since the Cultural Revolution of 1966. Traditionally physicians never used surgery because it was considered a violation of the body.

A doctor trained in acupuncture asks many questions of his patient. But pulse taking---measuring the body's energy flow---is the most essential aspect of diagnosis. A physician will often take 60 different pulse measurements. This energy flow is closely associated with the elemental principles of Yin and Yang---two opposites working together dynamically: Cool and heat; contracting and expanding; passive and active; female and male.

Health is governed by the flow of energy along 12 meridians in the body. Each meridian directly affects an internal organ. By stimulating one of 700 points on the meridians by acupuncture or by massage, one affects the organ.

For example, a point on the ear, after stimulation by acupuncture, can allow a physician to do open heart surgery without further anesthetic, according to Utne.

Maxibustion---lighting small cones of treated wormwood in the skin---often precedes placement of the acupuncture needles. In adults the slender needles can be inserted up to an inch deep with little pain or bleeding.

Even though acupuncture techniques have been studied and used for many years in European countries, the medical community in this country remains dubious. Utne contends this skepticism is good because when acceptance comes, acupuncture will have the medical establishment's full support.

Just as the traditional Chinese physician treated man as a whole, Utne hopes American physicians will begin to do the same.

ANTI-TUMOR COMPOUNDS
DEVELOPED BY U OF M
MEDICINAL CHEMIST

(FOR IMMEDIATE RELEASE)

A new class of chemical compounds with cancer-fighting properties have been synthesized in the laboratory of a medicinal chemist at the University of Minnesota.

Dr. Robert Vince in the College of Pharmacy has received an \$80,000, three-year grant from the National Cancer Institute for further testing and development.

Presently six compounds have been created which block protein synthesis and inhibit the growth of both bacterial and mammalian cells.

Dr. Vince, an associate professor of medicinal chemistry, and his co-workers will be attempting to modify the molecular structure of the compounds to find one that will selectively inhibit only the growth of tumor cells.

He believes that tumor and normal cells have subtle differences in their structural makeup and in their respective protein-producing components.

"By isolating these components and comparing them," he asserted, "it may be possible to design a drug that will combine selectively with the tumor cell component and block protein synthesis in the tumor cells while allowing normal cells to continue growing."

'U' PROF AUTHORS
TEACHERS' BOOK

(FOR IMMEDIATE RELEASE)

A subjective point of view should be incorporated into the social studies classes of elementary and secondary schools, according to a book co-authored by a University of Minnesota professor.

Eugene M. Anderson, associate professor of clinical experiences in the College of Education, and Gary Wehlinge of the University of Wisconsin are the authors of "Social Studies Curriculum in Perspective" which has just been published by Prentice-Hall.

"The central theme of this book is that knowledge within the area of social studies should be derived from both subjective and objective perspectives," the authors stated.

"Justification for including both frames of reference rests on the belief that within the process of making social decisions in a democratic society, individual as well as group perspectives need to be considered.

"Thus as a part of our theme we suggest that a social studies curriculum ought to provide content and experiences that enable students to become sensitive to the riches existing in a variety of individual outlooks, as well as to become socialized to commonly held, objective perspectives."

Social studies courses should prepare the students for civic action and not be restricted to college preparation, the authors said. They foresee an emphasis on such experiences as sensitivity training, human relations and sociopolitical action in social studies classes.

DEBATE OVER AMERICAN
MOOD SEEN IN NEW BOOK

(FOR IMMEDIATE RELEASE)

The constitution, welfare, civil liberties, federal aid, public opinion polls, foreign policy and city politics are among the issues debated in a collection of essays co-edited by Samuel Krislov, chairman of the University of Minnesota political science department.

The book, "American Government: The Clash of Issues," begins with a debate over the current American mood.

"The militancy of the late 1960's has evolved into a complex montage of apathy, disillusionment, and empty realism," the authors stated. "Yet, for others, now that the voting age has shifted, the era promises opportunities for reform within the system."

The book is designed for young voters and sets out to "emphasize and elucidate the significant, controversial, and relevant issues in American government."

Selections from the works of authors with views ranging from those of conservative Sen. Barry Goldwater to liberal former Sen. Eugene McCarthy and from the Students for a Democratic Society to the John Birch Society are included in this volume.

Views on the media from Vice President Spiro Agnew are placed against those of Federal Communications Commissioner Nicholas Johnson. Views on voting behavior range from the "centrism" of Richard Scammon and Ben Wattenberg to the "sexual politics" of Kate Millett.

The book, published in paperback by Prentice-Hall, costs \$4.50.

'U' THEATRE PRESENTS
'CHARLIE BROWN'

(FOR IMMEDIATE RELEASE)

"You're a Good Man Charlie Brown," based on the "Peanuts" comic strip by Charles M. Schulz, is the 1972 production of the Young People's University Theatre.

The play, aimed at youngsters aged 8 to 12, is currently being presented every weekday afternoon for school groups. There will be two public performances at 2 p.m. Saturday and Sunday, May 20 and 21, in Scott hall auditorium.

Kenneth L. Graham, director of the University Theatre, is directing the production. Robert Engels, a senior theater major from Minneapolis, plays the leading role of Charlie Brown. The cast of University Theatre students also includes James Miller as Linus Van Pelt; Ann Winchester as Patty; Paul Deaner as Schroeder; Warren Bowles as Franklin; Deborah Noe as Peppermint Patty; David Vining as Snoopy, and Priscilla Tjornhom as Lucy Van Pelt.

#

NEWSMAN: Representatives of the news media are welcome at any of the weekday performances at 1:15 p.m. through May 26, although these performances are not open to the public. Please call Judy Vick at 373-7515 for reservations.

PROF SAYS HIGH COURT
REFLECTS U.S. CRISES

(FOR IMMEDIATE RELEASE)

Striking a balance between individual liberty and public security has been one of the central issues facing the U.S. Supreme Court in this century, according to a University of Minnesota history professor.

Paul L. Murphy has traced the complex history of the high court in "The Constitution in Crisis Times 1918-1969," a book published recently by Harper and Row. The work places the court in the social and political context at the times important issues were raised.

"Constitutional government, American-style, has been under a constant state of challenge since Woodrow Wilson's wartime 'dictatorship' of 1917-18," Murphy said.

Since that time, he said, the court has gone through a number of stages. At times it has been the protector of wealth and property and in other periods it has been the jealous guardian of individual liberty.

Following World War I, the Court upheld many wartime laws ranging from government operation of service industries to restrictions on free speech and press, Murphy said. Espionage acts and the Selective Service Act of 1917 were upheld.

A number of judges at that time, however, saw law as a valid instrument for social change, Murphy said. "Such legal empiricists clearly called for law immediately adaptable to concrete postwar social and economic needs."

(MORE)

In 1921, former President William Howard Taft became chief justice with the view of safeguarding private property against what he believed to be "its most dangerous enemies---Socialists, Communists, Progressives and militant champions of labor and labor unions," Murphy said.

Murphy said Taft saw "judicial activism" as a means to recreate laissez-faire governmental policies. "The liberty on whose side the Court came up was liberty of business to continue its practices and the liberty of the public to accept and adjust to them on business's terms," Murphy said.

Evolution of civil rights has been complex. Murphy said the Court upheld the right of black people to a fair trial saying, "The rack and torture chamber may not be substituted for the witness stand."

But the same court which ruled against state discrimination refused to force the Democratic Party as a private body to allow black people to run in primary elections, Murphy said. Aliens and pacifists were also denied access to the political system.

Later, the New Deal and economic crises saw a "general underwriting of federal activism" by the court in allowing federal agencies to supervise certain aspects of the economy, Murphy said.

During World War II, it upheld a number of national security provisions including the government management of industries and relocation camps for Japanese-Americans, Murphy said.

Later the court ruled that America had won the war "without abandoning our traditional faith in and reliance upon private enterprise and individual initiative devoted to public welfare," Murphy said.

(MORE)

Murphy's work reveals a number of other ironies in the court's history. Chief Justice Earl Warren, under whose leadership the court was most vigorous in its support of individual rights, had been the California attorney general who supported the relocation of Japanese-Americans during World War II, Murphy said.

Justice Hugo L. Black, whose nomination was opposed because he had been a member of the Ku Klux Klan, became one of the court's strongest proponents of civil and equal rights, Murphy explained.

"Under our constitutional system," Black wrote in 1940, "courts stand as havens of refuge for those who might otherwise suffer because they are helpless, weak, outnumbered or because they are non-conforming victims of prejudice and public excitement."

Murphy, who is on leave to establish an American studies program at the University of Lagos in Nigeria, is the author of "Liberty and Justice" and "The Meaning of Freedom of Speech: First Amendment Freedoms from Wilson to F.D.R."

This latest book has been chosen as a featured selection of the Lawyer's Literary Book Club.

CIVIL SERVICE COUNCIL
TO BE PROPOSED TO REGENTS

(FOR IMMEDIATE RELEASE)

A Civil Service Council for employees at the University of Minnesota may be a reality by the fall of this year.

A proposed constitution for the council will be presented to the Regents' committee on faculty, staff and student affairs Friday (May 12). Before acting on the constitution, the Regents will hold an open hearing for staff members, probably in June.

The constitution calls for council elections in November.

Central officers of the University have already given their endorsement to the proposal, which was drawn up by a task force headed by Carol Flynn, senior executive secretary in conferences and institutes.

"We need to be recognized as a part of the University community," said Mrs. Flynn, "and this is a step in that direction."

According to the proposed constitution, the council will provide "a two-way medium for the exchange of information between the University and its employees relative to problems of mutual concern."

Regents and administrators may seek the advice of the council on policy matters affecting civil service staff, or the council may initiate discussion on various issues.

Representation on the council, which will serve civil service staff members at all campuses and branch stations of the University, would be on the basis of administrative units, according to the constitution. One representative would be elected for each 100 staff members or portion thereof from administrative units with 20 or more employees. Units with fewer than 20 staff members would choose the unit with which they wanted to be associated.

Ten student civil service employees also would be elected to the council.

The chairman of the council would also preside over a smaller advisory committee which would conduct the business of the council.

WILSON NAMED REGENTS SECRETARY;
BRIGGS TO BE MOOS' EXECUTIVE ASST.

(FOR IMMEDIATE RELEASE)

Duane A. Wilson, former Minnesota commissioner of agriculture, was appointed secretary of the University of Minnesota Board of Regents at the annual meeting of the Regents today (Friday, May 12).

Rodney A. Briggs, former University of Minnesota, Morris provost who has been acting secretary of the board, was named executive assistant to President Malcolm Moos.

Wilson, who is currently a professor and district supervisor for area and county personnel programs in the southwest district of the state for the University, was commissioner of agriculture from 1961 to 1964, when he joined the University. From 1946 to 1961 he was Sibley county agricultural agent.

In his new fulltime position, Wilson will receive an annual salary of \$24,600.

Briggs has been acting secretary since August, 1971. From 1969 to 1971 he was associate director and director of Research at the International Institute of Tropical Agriculture in Ibadan, Nigeria. He has been a member of the University of Minnesota faculty since 1953 and served as the first provost on the Morris campus.

In other action the Regents named Professor Van D. Mueller as chairman of the division of educational administration in the College of Education.

He will be filling the position left by Clifford P. Hooker, professor and chairman of the division since 1964.

Mueller, 42, has been assistant chairman of the division since the fall of 1969. He was formerly a school finance consultant for the Department of Public Instruction in Michigan. He received his doctorate in educational administration from the University of Michigan in 1964.

GREEK LEADER SAYS U.S.
BECOMING TOTALITARIAN

(FOR RELEASE WEDNESDAY, MAY 17)

A leader of the Greek democratic government which was ousted by a military coup in 1967 says the United States is moving toward a more totalitarian system of government and economy.

Andreas G. Papandreou, professor of economics at York University in Toronto and leader of the Greek democratic government in exile, stated his views in "Paternalistic Capitalism," a book published today by the University of Minnesota Press.

The United States economy is being planned by a managerial elite which is interested only in high profits and not the social implications of their work, Papandreou said.

"The privatized planning is not carried out in the interest of the consumer, but in the interest of the system; thus 'paternalistic' is intended to convey the autocratic, big brotherish aspect of the process," he said.

Papandreou said the system is supported by an "ideological bias" which is instilled by the educational system and the political process.

"To begin with, it is strongly associated in the Western world with the concept of personal freedom, with distrust of central authority, and with democratic institutions, although in fact no one has established the necessary logical (as against merely historical) connections among these phenomena.

"This faith that a market economy is a necessary or a sufficient condition for a free society is itself a strong source of ideological bias," Papandreou said.

(MORE)

State fiscal policy and monetary management are used to control the demand factor in the economy, he said, and this is advocated by the managerial elites who favor a larger state.

"Education---especially education that is intended to increase the supply of specialists needed by the modern corporation---becomes legitimately a State responsibility.

"The major technological breakthroughs, especially those that have to do with space exploration and armaments, may also be assigned to the State, their cost being assumed by the citizens."

Papandreou, who has been chairman of the economics department at the University of California, Berkeley, said economists display an ideological bias when they claim to remain neutral on such "ethical" problems as the distribution of wealth.

By building fences around their own "analytical and empirical territory," Papandreou said, social scientists are being blinded to a basic analysis of the system they are studying. Thus, many become problem solvers and lend their weight to the status quo.

He said a number of trends, including the increasing cost of technology and the growth of the state's involvement in the economy, indicate a trend toward totalitarianism.

This is particularly true, he said, with regard to the growing involvement of the defense department as a factor in the economy. "Thus, the Pentagon is emerging as a potential central planning board of U.S. society."

He said that through extended war and Cold War policies, the process of militarizing the economy could reach a "mature stage" in which "the U.S. economy will have taken on all the characteristics of a centrally planned economy. With a difference: the planning will be essentially in private (corporate) hands and it will have the flavor of a distinctly militarized society."

Papandreou, 53, taught economics at the University of Minnesota from 1947 to 1955. He was a cabinet minister in Greece at the time the military junta seized power. He was imprisoned before he was exiled.

"The basic themes of 'Paternalistic Capitalism' evolved over a number of years as a result of an increasingly intense realization that my conceptual apparatus---as an economist---was woefully inadequate for giving me even a reasonable understanding of the realities of the power structure that dominate life in the contemporary society of the West," he said.

U STUDENT HEALTH SERVICE
HEAD RECEIVES AWARD

(FOR IMMEDIATE RELEASE)

Dr. Donald W. Cowan, who will retire this summer after 11 years as director of the Student Health Service at the University of Minnesota, was recently honored by the American College Health Association.

Dr. Cowan, professor of public health since 1961, received the Ruth E. Boynton Award in recognition of his many years' dedication to the association.

A Rochester, Minn., native, Dr. Cowan was graduated from the University of Minnesota in 1931 with B.S., M.S. and M.D. degrees. After five years at the University of Iowa he returned to the University and joined the administrative staff of the Student Health Service.

He has been secretary, vice president and president of the North Central section of the American College Health Association and has served several terms as secretary-treasurer of the national association. Dr. Cowan is also a diplomate of the American Board of Preventive Medicine and Public Health.

#

SUPPLEMENTARY INFORMATION:

The ACHA, founded in 1920, has a membership of health workers from more than 500 colleges and universities.

The Ruth E. Boynton Award is named for Dr. Cowan's predecessor at the Student Health Service. Dr. Boynton directed the Student Health Service for 36 years and served as **president** of the ACHA in 1940 and its first fulltime secretary-treasurer upon her retirement from the University in 1961.

HANDICRAFTS, DANCING, ART WORKS
FEATURED AT INTERNATIONAL OPEN HOUSE

(FOR IMMEDIATE RELEASE)

An open house and lawn party on Sunday (May 21) from 1 to 5 p.m. will celebrate the redecoration of the Minnesota International Center's headquarters at 711 E. River Road near the University of Minnesota campus.

Special features of the open house will include Japanese and Latin American dancing, Korean folk singing, American square dancing, strolling musicians and hostesses in national costumes.

Handicrafts made by wives of foreign students will be displayed and sold. Art works from Iran, Turkey, India and Japan, on loan from the private collection of Mrs. Abbey Grey, will be on exhibit in the center foyer. Light refreshments and beverages will be served from lawn tents. Games and special events are planned for children.

The International Center, a non-profit community volunteer organization which forms a connecting link between foreign students, visitors and the people of Minnesota, has been refurbished to form a drop-in center for foreign students and serve as a facility for small group meetings of international organizations.

The public is invited.

STUDENTS ORGANIZE
POSITIVE PROTESTS

(FOR IMMEDIATE RELEASE)

War protesters at the University of Minnesota are seeking to broaden their base of support through a "people's referendum" campaign and a speakers bureau organized to explain the students' views of the Indochina war and the recent violence on the Minneapolis campus.

"A lot of people appear concerned about what has happened on campus and don't understand it," according to Jeanne Stevens, an organizer of the speakers bureau.

Miss Stevens, a senior from Minneapolis, said speakers will present slides and films on the war as well as their views of the behavior of Minneapolis police on campus last week.

"The speakers bureau will provide people who want to go to speak with church groups, in living rooms and high schools," she said. "Any group, even a group of neighbors, can ask for a speaker."

Numbers to call for the speakers bureau are 376-7499 or 373-2545. Miss Stevens can also be contacted by mail at 225 Coffman Memorial Union on the Minneapolis campus.

The "people's referendum" is an effort, begun several months ago by the Honeywell Project and Clergy and Laymen Concerned, to get three propositions on a Minnesota statewide ballot.

The first proposition---the total and immediate withdrawal of American men, machines and money from Indochina---was endorsed by Gov. Wendell Anderson following President Nixon's recent announcement of the mining of North Vietnamese harbors.

The other propositions call for "conversion of the U.S. economy from dependence on war and war production to a peace-oriented economy" and that this conversion be "planned and supervised by democratically elected councils of workers from affected industries."

The groups working for the people's referendum are urging constituents to contact their state legislators in support of the proposal.

A defense fund has been established for the people who were arrested during police-student clashes last week on campus. The Movement Legal Defense Fund has been established at the University National Bank and supporters say they have raised \$1,900 so far.

NEWSMEN: On Tuesday (May 16) a group of faculty, students and one Civil Service representative met in Washington, D.C., with Minnesota's Congressional delegation. The group will report on their trip Friday (May 19) at 2 p.m. in Mayo auditorium.

FRASER AND KARTH TO ATTEND
WAR HEARING AT 'U' MONDAY

(FOR IMMEDIATE RELEASE)

A public hearing on the war in Southeast Asia and discussion of ways to end it will take place at the Minneapolis campus of the University of Minnesota on Monday (May 22).

DFL Congressmen Donald Fraser and Joseph Karth, who represent the Twin Cities, have agreed to attend the hearing which will convene at noon in the Coffman Union main ballroom.

The hearing, sponsored by the Twin Cities Campus Assembly, is free and open to the public. Groups or individuals who wish to make presentations during the hearing should make prior arrangements with Professor Warren Ibele at 373-3316. Ibele is a member of the assembly's steering committee.

Persons who contact Ibele will be placed on an agenda and allowed to make brief presentations during the hearing. These probably will include delegations from various colleges around the state, which are being contacted. Then the meeting will be opened up for anyone who wishes to ask questions of the congressmen.

The role of the congressmen in the hearing will be mainly to respond to the questions and concerns of the audience.

The assembly sent a group of students, staff and faculty to Washington, D.C., on Tuesday to inform Minnesota's congressional delegation of the University community's sentiment about the war. The group invited the state's eight representatives and two senators to come to campus for a hearing.

Fraser and Karth made definite commitments to attend, and Rep. William Frenzel (R-Third District) and DFL Sen. Walter Mondale indicated they might attend.

Persons who do not contact Ibele may be allowed time for presentations after the agenda is covered.

ART WORKS DONE IN MEXICO
BY 'U' STUDENTS TO BE SHOWN (Carol Johnsen)

"Winter Quarter in Mexico," an art exhibit featuring the work of some 20 University of Minnesota students who spent the winter quarter in Mexico working with native Mexican craftsmen, will be offered Friday (May 19) to May 28 at the Matthews Community Center, East Twenty-fourth street and Twenty-eighth avenue S. in Minneapolis.

The students lived in and near Tlaxiaco, a small village in southeastern Mexico, which is noted for its skilled craftsmen in ceramics and metal work. The exhibit includes ceramics, wood carving and related sculpture, forge work, weaving and jewelry. The public is invited.

CZECH FILM DIRECTOR
TO VISIT 'U' CAMPUS (Carol Johnsen)

Czech film director Ivan Passer, whose "Intimate Lighting" was featured recently on KTCA's "Film Odyssey" series, will be on the University of Minnesota campus for three days next week for seminars with film students and presentation of his films. He will be the guest of the University Film Society.

Passer's first American film, "Born to Win," completed last fall and starring Karen Black and George Segal, will be shown at 7:30 p.m. Wednesday, May 24, in the Bell Museum of Natural History. Passer will discuss the film after it has been shown.

"Intimate Lighting" will be shown in a film class at the University at 3:15 Wednesday in Murphy hall auditorium. Following the showing Passer will analyze scenes and discuss the work of director and scriptwriter.

WAR SPARKS CAMPUS DISSENT

by Bill Huntzicker
University News Service

Another escalation of the war. More frustration on the nation's campuses, and police-student clashes at the University of Minnesota.

But last week was much quieter at the University than a week earlier which saw Minneapolis police and National Guardsmen on the campus to protect the ROTC building and to keep traffic moving on Washington avenue.

"The tension is still simmering beneath the surface now," observed Hyman Berman, a history professor. "It could go any direction, but hopefully it will go in a positive one."

Rallies and demonstrations scheduled last week drew few students compared to the thousands who would appear almost daily a week earlier to hear noon-hour speakers condemning the U.S. presence in Asia.

Fewer than 200 were involved in Monday's two-hour takeover of Johnston hall, an administrative building, and the number of militant activists seemed to decline from there.

GRIND IS NO FUN

"A lot of recently radicalized people just discovered that the day-to-day grind of politics is no fun, especially if it is a politics with no power except personal determination behind it," said Pat Aufderheide, a graduate student from Duluth.

(MORE)

But the number of positive peace activities has increased.

"Out of the frustration of last week has come a surprising amount of community-outreach activity," Miss Aufderheide said. "The number of people involved is a lot smaller but that's to be expected."

A speakers' bureau was established to send students and faculty members to community groups to discuss the war and events at the University in recent days. Leafleting the community is planned.

Protesters are seeking to pressure their state legislators into supporting a "people's referendum" calling for immediate withdrawal from Indochina and conversion of the U.S. economy from war-related industries.

STRONG FORM OF PROTEST

"If we could set the state government and the people of Minnesota against the federal policy, that would be a strong form of protest," Jeff Johnson, a member of the New American Movement, told a workshop.

The Committee of Concerned Asian Scholars, a group of faculty and students who specialize in Asia, are compiling a packet of materials for use by business, high school and church groups who wish to discuss the war.

A Constituent Assembly was elected during a Washington-avenue demonstration, but its meetings have become bogged down in discussions of organizational methods. Another group, Committee for Open and Peaceful Education (COPE), was sanctioned by the University administration and vowed to talk people out of actions which could bring in police.

(MORE)

"The University is a microcosm of the country at large," said Edward L. Farmer, assistant professor of Chinese history. "We have some people here calling themselves revolutionaries, but nobody here is carrying on a real revolution." But Farmer said the University should be opened up for discussion of the war as a major social problem.

"It's perfectly reasonable for a University to use its faculty to deal with that problem," he said. "In agriculture, when you have a major problem with corn blight, people are put to work on it. Why not allow people to work on this major social and political problem?"

Farmer said the University has already become politicized. "We have ROTC, but we don't have one course on Vietnam."

Edward Coen, a professor of economics, said he disagreed with the methods of war protesters. "The only useful thing students could do is to work for McGovern in the primaries in Oregon, California and New York."

'DON'T HAVE ANY IMPACT'

He described the student mood as desperate. "They feel they have to do something and the traditional things they've done don't seem to have any impact."

Coen said most people seem to overreact to student demonstrations. "They seem more upset by a few broken windows around here than the slaughter by our bombs of thousands and thousands of people in Vietnam," he said.

One University librarian, Margaret Mathers, who was not involved in any of the antiwar activities defended the blockading of Washington avenue. "I think it's necessary to stop people from acting as though nothing is happening, and one of the best ways to do that is to stop their cars," she said.

Meanwhile, speakers at rallies urged people to continue working against the war. "The people in Africa, Asia and Latin America," said Monte Bute, a member of the New American Movement, "have been fighting for 20 years but we're tired after a week."

CIVIL SERVICE EMPLOYEES
TO AIR GRIPES, SEEK SOLUTIONS

(FOR IMMEDIATE RELEASE)

Civil service employees on the University of Minnesota's Twin Cities campus will hold a rally and speak-out at noon Wednesday (May 24) to air their major employment gripes and possibly get together on seeking solutions.

The rally will begin at noon in Coffman Union junior ballroom.

Five speakers will give summaries of problem areas on which they have worked over the last few months, and an open mike will be set up for employees to speak about their grievances and suggestions for change.

Among the issues on which employees have become vocal are their non-representation on any campus or University-wide governing body and on most ad hoc committees; "an unwieldy and ineffective grievance procedure," according to Carol Flynn, senior executive secretary in Continuing Education and Extension; expansion of career counseling, training and promotional opportunities; and apparent pattern of sex discrimination in some job categories; and the structure of the faculty-dominated Civil Service Committee.

The meeting, to be moderated by Alice Kingsley, a secretary, is sponsored by the civil service division of the Council for University Women's Progress.

#

SUPPLEMENTARY INFORMATION:

Speakers will include Wilma Gary, former employment counselor in the Civil Service Department, speaking on the need for career-oriented training and counseling; Carol Flynn, speaking on the proposed Civil Service Advisory Council (presented to Board of Regents in May); Sue Maricle, reviewing the promotion-from-within and female-and-minority hiring program; Ann Cartwright on hospital workers' tactics; and Nancy Pirsig on various activities toward improvement of the civil service system.

WOMEN'S PROGRAMS TO OFFER COURSE
ON STATUS AND ROLE OF WOMEN

(FOR IMMEDIATE RELEASE)

The position of women as a "minority" in today's society will be studied in a two-week workshop offered this summer by the department of women's programs, part of Continuing Education and Extension at the University of Minnesota.

Registration is under way for "Status and Role of Women," an interdisciplinary course for teachers and counselors which may interest others as well. Offered in cooperation with the College of Education, the program has been designed to deal with the current concern for the status, roles and functions of women in contemporary society.

The course will run from 9:30 a.m. to noon Monday through Friday, from June 19 through June 30.

Professor Clarke A. Chambers, chairman of the department of history at the University, is coordinating instructors from the fields of education, history, psychology, sociology, American studies and others. Chambers himself will lead the session dealing with the history of women. A panel of women representing different life styles is expected to be a highlight of the course.

Professor Lorraine (Sunny) Hansen, of counseling and student personnel psychology, will head three sessions dealing with counseling of women June 27, 28 and 29.

Tuition is \$45, and the course may be audited or taken for three credits in education. It will be held in room 225 of the Food Science and Industries Building on the St. Paul campus.

For registration or further information, contact the Department of Women's Programs, 200 Westbrook Hall, University of Minnesota, Minneapolis, 55455; or phone 373-9743.

AAUP ELECTS
'U' OFFICERS

(FOR IMMEDIATE RELEASE)

Paul L. Murphy, University of Minnesota history professor, has been elected president of the American Association of University Professors (AAUP), Twin Cities campus chapter.

Murphy succeeds Law Professor C. Robert Morris as president of the 624-member faculty professional organization, which is primarily interested in questions of academic freedom and faculty welfare and self-governance.

Murphy, who is currently on leave to establish an American studies program at the University of Lagos in Nigeria, is the author of "The Constitution in Crisis Times" recently published by Harper and Row.

Elected vice president of the group was Douglas C. Pratt, botany professor. Mahmood A. Zaidi, professor of industrial relations, was named secretary-treasurer.

Elected as directors were Robert H. Peck, chairman of the department of history and philosophy of education, and Morton Hamermesh, head of the School of Physics and Astronomy.

HEALTH CARE COSTS
PANEL SET THURSDAY

(FOR IMMEDIATE RELEASE)

The economic aspects of health care will be discussed at the University of Minnesota Thursday (May 25) by a panel including Congressman Donald Fraser (D-Minn.).

The panel is part of a meeting of the Twin City chapter of the Engineering in Medicine and Biology Group of the Institute for Electrical and Electronic Engineers.

Other panelists are John Haines, administrator of Unity Hospital in Fridley, and Dr. Richard DuBois, health care technology division, National Center for Health Care Research and Development, National Institutes of Health.

A chapter dinner and business meeting precedes the 8:30 p.m. program in Murphy hall auditorium which is open to the public.

U OF M MEDICINE PROF.
TO HEAD HIGH BLOOD PRESSURE GROUP

(FOR IMMEDIATE RELEASE)

Dr. Louis Tobian, professor of medicine at the University of Minnesota, has been named president-elect of the Council for High Blood Pressure Research.

The council is a national organization of researchers who have made significant contributions to the understanding, prevention and treatment of high blood pressure. Dr. Tobian will take office next year at the council's annual meeting in Cleveland.

Born in Texas, Dr. Tobian graduated from the University of Texas and Harvard Medical School. He joined the University of Minnesota faculty in 1954 after five years at the University of Texas Southwestern Medical School at Dallas and two years at Harvard Medical School as a research fellow in biological chemistry. He also held an Established Investigatorship from the American Heart Association from 1951 to 1956.

A diplomate of the American Board of Internal Medicine, Dr. Tobian is a member of several professional societies and editorial boards and is a recent appointee to the National Institutes of Health Advisory Committee for Hypertension Research Centers.

VARIOUS COMMENCEMENT EXERCISES
SET AT UNIVERSITY OF MINNESOTA

(FOR IMMEDIATE RELEASE)

An internationally known scientist will be a commencement speaker at one of several graduation exercises and recognition events being held by the various collegiate units at the University of Minnesota.

Athelstan Spilhaus, dean of the Institute of Technology at the University from 1949 to 1966, will speak at the I.T. graduation ceremonies at 7:30 p.m. Saturday, June 10, in Northrop auditorium.

Other notable commencement speakers will include William O. Hall, director general of the U.S. Foreign Service, who will be present at the ceremony for the College of Business Administration at 7:30 p.m. Friday, June 16, in Coffman Union main ballroom; and Willard L. Boyd, president of the University of Iowa, who will speak at the Law School ceremonies at 7:30 p.m. Wednesday, June 14, in Northrop. Boyd, a Minnesota graduate, will receive an Outstanding Achievement Award from the University at that time.

The all-University commencement will be held in the Minnesota State Fairgrounds starting at 7:30 p.m. Thursday, June 15. Students are not required to attend any graduation exercise.

Elmer L. Andersen, chairman of the University's Board of Regents, will be the speaker at the graduation for the School of Dentistry at 2 p.m. Saturday, June 3, in Northrop.

Lyle A. French, vice president for health sciences, will be speaking at two events---at 3 p.m. Saturday, June 10, in Mayo auditorium for the College of Pharmacy, and at 7 p.m. Tuesday, June 13, at Southview Country Club for the School of Public Health.

(MORE)

Other graduation events, in chronological order, are:

Mortuary Science, 7:30 p.m. Wednesday (May 24) Coffman Union main ballroom, with Rabbi Earl A. Grollman, author and specialist with children and death, counseling, and suicide;

School of Social Work, at 8 p.m. Friday, May 26, Coffman Union junior ballroom;

College of Agriculture, 5:30 p.m. Thursday, June 1, on the St. Paul campus Mall and in the North Star ballroom in the Student Center; Theatre Arts, 3:15 p.m. that same day, on the Showboat;

College of Home Economics at 7:30 p.m. Friday, June 2, North Star ballroom;

College of Forestry, 3 p.m. Saturday, June 3, in Green hall auditorium, St. Paul campus; also on that day, University College, at 2 p.m. in the North Star ballroom, and Physical Therapy at 7 p.m. in Coffman Union junior ballroom;

English Department, at 1 p.m. Sunday, June 4, in Como Park, and Medical Technology at 2 p.m. that day in Mayo auditorium;

The College of Education will have a special multi-media recognition of both bachelor of science and advanced-degree graduates at 8 p.m. Tuesday, June 6, in the Hall of States of the Leamington hotel, Minneapolis;

General College will be honoring its first students graduating from the new four-year program at 7:30 p.m. Wednesday, June 7, aboard the Jonathan Padelford, St. Paul; and Occupational Therapy will hold an informal dinner at a student's home at 6:30 p.m. that evening for its graduates;

Medical School, at 2:30 p.m. Friday, June 9, in Northrop and Coffman's main ballroom;

College of Veterinary Medicine, at 2 p.m. Saturday, June 10, in the North Star ballroom;

School of Nursing at 8 p.m. Wednesday, June 14, Coffman Union main ballroom; and also the department of communication disorders at 7 p.m. in the Campus Club, Coffman Union, that same day;

and the College of Biological Sciences will honor its graduates at 1:30 p.m. Thursday, June 15, Coffman Union main ballroom.

MOOS SUPPORTS HOUSE
ANTIWAR RESOLUTION

(FOR IMMEDIATE RELEASE)

WASHINGTON, D.C. -- University of Minnesota President Malcolm Moos has supported a Congressional resolution calling for the withdrawal of American forces from Vietnam by Oct. 1.

"The disintegrating forces at work in our land, combined with the disillusionment of youth, outweigh the risks of prompt withdrawal from the war," Moos said.

Moos' statement on "the continuing impact of the war on the younger generation" was made in testimony Tuesday (May 23) before the House Foreign Affairs Committee. Moos and Robert F. Goheen, president of Princeton University, talked on internal consequences of the war.

The University of Minnesota was the scene of student-police clashes two weeks ago.

Moos said that as a result of the war a "disbelieving generation" has emerged with "a growing conviction that the will of the people has been manipulated or, still worse, simply ignored by those who conduct the nation's foreign policy."

Moos said that earlier massive campus demonstrations were based on a belief that the nation's leadership would respond to protest.

But he said, the "quieter mood" of today is "something that hovers over us like a deadly mist.

(MORE)

"What we are witnessing is a generation moving into adulthood, poisoned by the most profound skepticism and cynicism about our institutions and their legitimacy," Moos said. "Credibility and faith in our institutions, including our great universities, is being dismantled daily, and is threatened with collapse."

Moos said the manner in which the nation entered the war was an evasion of constitutional procedures.

He added the theory of American government calls for legislative review of presidential authority and that the manner in which the United States was taken into war was an evasion of constitutional procedures.

"To its latest action," Moos said, "the present administration has made it abundantly clear that it has neither the intention to seek legislative approval for measures that might ultimately lead to a major power confrontation, nor the inclination to accord any deference to a review of these measures by the Legislature."

"It is not my purpose to assign blame," Moos said. "There is more than enough for us all. I simply urge as directly as I can that Congress at long last reassert its proper responsibility in foreign relations.

"Act to terminate the hostilities in Indochina. For if you do not, the fissure in our national life, opened by the inconsistency between what citizens expect and believe their government will do, and what in fact it does, will widen and rupture."

5 U OF M STUDENTS
WILL LIVE WITH
ALASKAN ESKIMOS

(FOR IMMEDIATE RELEASE)

An expedition of University of Minnesota students will spend six weeks this summer at a primitive Eskimo village near the Arctic Circle.

Co-sponsored by Modern Medicine magazine and the Bell Museum of Pathology, the Alaskan trip will be led by Museum Conservator Dr. Stacy B. Dav.

The multidisciplinary group, including three Medical School freshmen, an Institute of Technology sophomore, and a biology senior, will leave July 15 for Anak Tu Vak Pass in the Brooks Mountain Range, 200 miles southeast of Barrow.

They will be taking \$5,000 worth of goods donated by Minnesota firms as a gift for the 200 Eskimos living in what has been called the last primitive enclave of traditional Eskimo life.

Jeff Sudeith, IT sophomore, will be the base radio operator; Connie Stieger, biology senior, will be studying the soil ecology of the area; and the medical students (Mark Bonnell, Renner Anderson, and Paul Bubak) will be conducting physiological and psychological tests on themselves as they attempt to live by Minneapolis time during 20-hour periods of sunlight. One of the students, hopefully, will be able to live with an Eskimo family and share their diet and lifestyle.

SUPPLEMENTARY INFORMATION:

Financial backers of the expedition, in addition to Modern Medicine magazine, include the Medical Student Council, Dr. Ivan Frantz, Dr. Leonard Veston, Kallestad Laboratories and Dr. Robert Good.

Donators of supplies include the E. F. Johnson Co. of Waseca, Crystal Sugar, Red Owl, Green Giant Corp., Geo. A. Hormel Co., the North Star Dairy Co., and the H. A. Bauman Co.

Students and their hometown addresses are Benner Anderson, 4600 Browndale Ave., Edina Minn.; Paul Eubak, Route 2, Box 31, Sisseton, So. Dak.; Mark Ponnell, 220 Adams Street, Anoka, Minn.; Constance Stieger, 1327 Blair Ave., St. Paul, Minn.; and Jeff Sudeith, 1277 Hall Ave., West St. Paul, Minn.

'U' GENERAL COLLEGE TO GRADUATE
FIRST-4-YEAR STUDENTS IN JUNE

(FOR IMMEDIATE RELEASE)

Sometime during the evening of June 15, at the all-University commencement, a General College student will have a baccalaureate degree symbolically conferred upon him, the first four-year degree ever granted by the University's General College.

Though many General College students in the past have transferred out of the two-year General College and graduated from four-year units of the University, all of the degrees granted by the College itself have been two-year associate in arts (AA) degrees. This spring, for the first time in its 40-year history, the college has students finishing baccalaureate-degree programs.

By action of the Regents in 1970, the General College was permitted to begin implementation of a long-studied plan to experiment with four-year programs leading to the bachelor's degree. The college now has about 120 students working on four-year degrees, about 20 of whom are expected to graduate this spring.

The General College's new degrees are the bachelor of general studies (BGS) and the bachelor of applied sciences (BAS). Both programs are limited during their experimental stages to a small number of students.

Unlike traditional baccalaureate curriculums, both the BGS and the BAS are highly individualized. In addition to taking course work in subject-matter areas, students earn credits on the basis of supervised work experience, non-collegiate post-high-school education, independent study, participation in community projects and other unconventional learning experiences.

Prospective four-year students in GC prepare their own curriculums in consultation with an adviser and then defend and justify their proposals before a faculty-student admissions committee. A strict requirement is that student-prepared curriculums must not resemble or overlap with any existing four-year program at the University.

Students graduating this Spring have completed work in a variety of skills areas, occupations and paraprofessions, some of which are not yet clearly defined by standard job titles.

MOOS TO SPEAK
IN RED WING

(FOR IMMEDIATE RELEASE)

University of Minnesota President Malcolm Moos will visit Red Wing Thursday (June 1) to speak to the local Kiwanis Club and meet with area agricultural leaders.

Moos will give a noon luncheon address to the Red Wing Kiwanis Club and invited guests meeting at the St. James Hotel and is expected to speak on state educational issues to be brought before the upcoming Minnesota Legislature.

Following the luncheon, Moos will hold a short news conference and then travel to the Paul Wenzel farm, Route 2, Red Wing (section 35 of Basa Township), for a 2:45 p.m. reception and informal meeting with county farm leaders.

In traveling to Red Wing, Moos is answering an editorial invitation extended last fall by Philip Duff, Jr., editor of the Red Wing Republican Eagle. Duff is serving as coordinator of the trip, which is the tenth in a series Moos has made in attempting to make outstate Minnesotans more aware of the services and programs offered by the University.

DON ELLIS TO APPEAR
IN FREE U OF M CONCERT

(FOR IMMEDIATE RELEASE)

Don Ellis, noted jazz trumpet virtuoso and composer, will appear in a free concert with the University of Minnesota Concert Band Ensemble on Friday, June 2, at 8 p.m. in Northrop auditorium on the University campus.

Ellis, composer of the film score for "The French Connection," will play trumpet and drums as well as conduct some selections including his own compositions, "Idea," "Concerto for Trumpet," and "Final Analysis."

Featured selections on the program include Stravinsky's "Symphonies of Wind Instruments" and Chavez' "Sinfonia India." Bandmaster Frank Bencriscutto will conduct the U of M Concert Band Ensemble.

Also scheduled on the program are "Mind Flowers," "Reach," and "Celebration," a trio of cantatas for winds, percussion and 150-voice chorus (made up of select individuals from metropolitan area high schools and colleges.)

In addition a new work by Ellis, which was commissioned for the band by the University's music department, will be premiered at the concert.

Ellis is a graduate of West High School in Minneapolis.

Those wishing free tickets should mail a request to "Don Ellis Concert," 14 Northrop Auditorium, University of Minnesota, Minneapolis 55455 or phone (612) 373-3431.

'U' WILL KEEP MANNED POSTAL OFFICE
IN BASEMENT OF COFFMAN UNION (Claude Chmiel)

The 48-year-old post office in the basement of Coffman Union on the University of Minnesota Minneapolis campus will not be closed down as previously planned, according to James F. Brinkerhoff, vice president for finance, planning and operations.

The unit was set to be closed and replaced by a self-service station on June 30, as a result of a cost reduction recommendation supported by the University Senate expanded consultative committee during the discussions on retrenchment and reallocation.

A number of faculty, staff and students opposed the move, along with the Minneapolis Post Office which felt that a self-service facility was inadequate to handle the volume of mail now processed at the Coffman Union post office.

LATIN AMERICAN POLITICIANS,
COLOMBIAN SENATORS, LEARNING
U.S. POLITICAL SYSTEM

(FOR IMMEDIATE RELEASE)

"American Politics in a Presidential Election Year" is the theme of a United States program designed to provide young Latin American politicians with an understanding of the political-electoral processes in this country.

Thirteen young Latin American political leaders are in the Twin Cities today through Monday (May 25 through 29) to meet with local politicians as part of their education in campaigning methods and techniques and 1972 political issues in various regions of the country.

While in the Twin Cities the group will meet with House minority leader Martin Sabo; John Vance, staff member of the Metropolitan Council; Gladys Brooks, Minneapolis alderwoman; George Thiss, Executive Director, Upper Midwest Council; and Congressman Donald Fraser. They will also speak with assistants in the offices of Senators Mondale and Humphrey.

Two Colombian Senators, Victor Mosquera Chaux, liberal senator from the Department of Cauca, Colombia, and Mrs. Hilda Martinex de Jaramillo, senator from Tolima, will be in the Twin Cities from May 25 to 28 during which time they will meet with Secretary of State Arlen Erdahl and Congressman Fraser.

The visitors' Twin Cities activities are being arranged by the Minnesota International Center at the University of Minnesota. The program is sponsored by the U.S. State Department.

POLL SHOWS 'U' STUDENTS
APPROVE DEMONSTRATIONS,
DISLIKE POLICE ACTIONS

(FOR IMMEDIATE RELEASE)

More than 90 per cent of students surveyed recently at the University of Minnesota support the idea of non-violent anti-war demonstrations and 50 per cent approve of the recent demonstrations on campus.

However, 74 per cent of the students polled doubt that demonstrations have any influence on changing national policy.

Ninety-two per cent of the students said non-violent demonstrations are a legitimate means of protesting the war in Southeast Asia and one half of those polled indicated mild to strong agreement with the campus war protests which began May 9.

In contrast, 40 per cent said they mildly to strongly disagree with recent anti-war demonstrations at the University.

On the issue of the war, 78 per cent mildly or strongly disagree with U.S. military involvement in Southeast Asia, and 71 per cent disagree with the new objectives announced by President Nixon, including the mining of Haiphong harbor.

Nearly three-fourths (71 per cent) were either somewhat dissatisfied or very dissatisfied with the way police handled the demonstrations, and 55 per cent did not think the National Guard should have been called to the campus.

About 20 per cent of the students polled were satisfied with police handling of the demonstrations and one-third felt the National Guard presence was justified.

The poll, conducted through the Office for Student Affairs by a professional telephone pollster, was commissioned by the department of University relations.

(MORE)

Students were polled the week of May 16 to May 23 about events which began May 9. Out of a random sample of 633 day school students, 473---slightly over one per cent of the Twin Cities campus student body---responded to the survey.

While the majority of students, 54 per cent, said they had been moderately or slightly involved in the recent demonstrations, 42 per cent said they had not been involved at all. Four per cent said they had been strongly involved.

Asked to specify their involvement in anti-war protests, the students responded:

55 per cent attended campus peace rallies
45 per cent did not

2 per cent participated in attempts to occupy buildings
98 per cent did not

14 per cent occupied streets and highways
86 per cent did not

12 per cent marched to the state capitol (May 13)
88 per cent did not

Although three-fourths of the students felt the police were justified in clearing blocked streets during the demonstrations the majority did not approve of police methods. Asked to rate justification for police actions in four areas, students responded:

clearing the blockaded streets

yes 75 per cent
no 18 per cent

attempting to clear the mall (on campus)

yes 14 per cent
no 79 per cent

using force to clear the streets

yes 32 per cent
no 62 per cent

spraying the mall with tear gas

yes 7 per cent
no 84 per cent

(The remainder were undecided.)

More students (49 per cent) were very satisfied or somewhat satisfied with the way the University administration responded to the demonstrations than those (38 per cent) who were somewhat or very dissatisfied.

There have been calls for students to strike the University for the rest of the quarter and 74 per cent of the students polled favored various grading options which would allow a student to withdraw from school without penalty. Twenty-one per cent of the students said the University should continue as usual for the rest of the quarter and no one was in favor of closing the University without giving grades.

According to Russell Tall, director of University relations, the poll was commissioned because "we felt there was a lack of understanding, both on and off campus, of the degree of student participation in the demonstrations."

Tall said the poll was also designed to survey the degree of student concern about the war.

SUMMER REGISTRATION OPEN
FOR 'U' CHILDREN'S ART CLASS

(FOR IMMEDIATE RELEASE)

Registration is now open for summer session children's art classes at the University of Minnesota's Institute of Child Development.

The nine sessions will be held Tuesdays and Thursdays from 1 to 3:30 p.m. beginning June 20 and running through July 20.

Professors Thomas Slettehaugh and George K. Olson of the University art education department are supervisors of the program. Classes are taught by graduate students in the department.

A variety of creative materials are used in exploring new ways to express artistic ideas---plaster, burlap, melted crayon, sand, paint and film.

Children from five to eight are eligible. Preference is given to those who have not previously been enrolled in an art class at the institute. Classes are limited to 20 children.

Fee for the series is \$15. For further information and registration materials call the Institute of Child Development, 373-2390.

RETIRING FACULTY, STAFF TO BE
HONORED AT UNIVERSITY RECEPTION

(FOR IMMEDIATE RELEASE)

University of Minnesota President Malcolm Moos will speak at a reception honoring retiring faculty and civil service employees with 10 or more years' service at the University.

The reception, an annual event, is set for 3 p.m. Friday, May 30, in the Coffman Union main ballroom, Minneapolis campus. There are 27 faculty retiring as of June 30, and 38 civil service workers.

Rodney Briggs, executive assistant to Moos, will be master of ceremonies for the program which will honor faculty and staff from the coordinate campuses as well as the Twin Cities campus.

Stella Melbostad, 647 N. Snelling ave., has the longest service of those retiring next month, 49 years. Now a senior secretary in agronomy and plant genetics, Miss Melbostad joined the University in 1923.

Service certificates will be presented to retiring faculty by William G. Shepherd, vice president for academic administration. James F. Brinkerhoff, vice president for finance, planning and operations, will present certificates to retiring civil service workers.

MET'S KURT ADLER
TO CONDUCT "WAR REQUIEM"
IN FREE 'U' CONCERT

(FOR IMMEDIATE RELEASE)

Benjamin Britten's "War Requiem" will be presented in a free concert on Thursday, June 1 at 8 p.m. in Northrop auditorium on the Minneapolis campus.

Kurt Adler of the Metropolitan Opera will conduct the performance which features the Minneapolis Civic Orchestra, the 300-voice University Chorus and the Schubert Club Boy's Choir.

The "War Requiem," which was completed in 1961, is a setting of the Latin Mass for the Dead and the poems of Wilfred Owen, English poet of the First World War. Deeply moved by the young poet's words, Britten saw that "they could stand beside the sacred liturgy of the Mass for the Dead, and, musically, be combined with it."

Both the Mass and the poetry concern death, and the interweaving of the intensely personal poetical expression about war and "the grief of man for man" with the "formal expression of mourning" in the Mass results in a work of great dramatic and emotional power.

Adler, who has conducted several times before in Minneapolis, will rehearse separately with each of the performing groups and conduct two full rehearsals before the performance.

Soloists for the performance will be Barbara Brandt, soprano; Barry Busse, baritone; and Clifton Ware, tenor. The University Chorus will be directed by Charles Schwartz. Arnold Caswell, professor in the University's department of music education, will direct the Schubert Boy's Choir. Charles Sigmund prepared the Minneapolis Civic Orchestra.

The concert is open to the public.

INDEPENDENT STUDY COURSE
AT 'U' RECEIVES AWARD (Claude Chmiel)

The department of independent study at the University of Minnesota has been awarded a certificate of merit by the National University Extension Association for development of an efficient reading course.

The certificate, one of nine awarded annually to universities for development of outstanding independent study courses, was awarded for Rhetoric 1-147: Efficient Reading, which was written by James I. Brown, professor of rhetoric at the University.

The course is offered for three credits, and, according to Roger Young, director of independent study, is designed to improve reading skills in comprehension, vocabulary and speed by utilizing both written materials and audio cassette tapes. The department of independent study is part of Continuing Education and Extension (CEE) at the University.

'EVENING WITH MARK TWAIN'
RE-SET FOR JUNE 5 AT 'U' (Claude Chmiel)

"An Evening with Mark Twain on Places, People and Perdition," a one-man show by Warren Frost, will be presented at 8 p.m. Monday, June 5, in Scott Hall auditorium on the University of Minnesota Minneapolis campus.

The event was previously scheduled for May 11 and was cancelled because of demonstrations on the campus.

Frost, a professional stage, television and motion picture actor, is an assistant professor of theatre arts at the University.

The program, sponsored by the department of theatre arts and the Campus Committee on Convocations and the Arts, is open to the public with no admission charge.

TRAUTWEIN TO CONDUCT
'U' ORCHESTRA CONCERT

(FOR IMMEDIATE RELEASE)

The University Symphony Orchestra, under the direction of Minnesota Orchestra associate conductor George Trautwein, will present a free concert Sunday, June 4 at 4 p.m. in Northrop auditorium.

The program will include Beethoven's "Egmont Overture," Wieniawski's "Concerto No. 2" with LuCinda Marvin as violin soloist, and "Symphony No. 1" by Sibelius. The concert is the final University offering in the "Scandinavian Music Festival."

Before Trautwein turned to the art of conducting he had achieved distinction as a violinist with orchestras in Baltimore, Md., Washington, D.C., and Cleveland, Ohio. His study of conducting was done in this country and at the Mozarteum in Salzburg with such masters as Serge Koussevitzky, Leonard Bernstein, Antal Dorati, Herbert von Karajan, George Szell and the Mozart authority, Bernhard Paumgartner.

The concert is open to the public.

**'MATHEMATICS IS MYSTICISM'
YOUNG U OF M MATH WIZARD SAYS---**

by Bill Hafling
University of Minnesota Science Writer

Foretelling the future by the stars, sun and moon, or by means of computer---
which mystifies people more?

Is there really something to a person's palm prints which can reveal aspects
of his personality or foretell what is likely to come to pass in the clouded future?

For that matter, is this year's income tax form any less mystical to many
people than stars or palm prints?

In varying degrees, these are the questions that fascinate David Thornley, who
placed 36th out of 1,500 entries in national mathematical competition this year.
Thornley, a sophomore at the University of Minnesota, recently turned 18.

The contest, the William Lowell Putnam Mathematical Competition, is generally
entered by well trained and highly creative graduate students in mathematics.

Thornley became aware of his unusual ability in mathematics when he was "sent
out of the room" by his sixth-grade school teacher one day following a discussion
of the theory behind fractions.

"I had answered a question on the reciprocal of fractions by saying they were
just fractions turned upside down. She said I was right but that the class hadn't
got that far yet. She felt I was disrupting things so she had me leave the room.
They started on work with reciprocals the next day."

(MORE)

Since then, much of his math has been self-taught with the aid of friendly teachers who have supplied him with books to study. A 1970 graduate of Marshall-University high school in Minneapolis, he is now taking graduate-level mathematics courses at the University.

"Many mathematics problems are easy to solve once you catch on to the little trick involved in them," Thornley said. "Some problems, unsolved for centuries, are just waiting for someone to figure out just the right little trick in them.

"You can get into many unexplored realms rather quickly by using mathematics. Of course, you're never sure if what you arrive at is quite true or not. The better the mathematical model for some problem, then the more likely the predictions from it will be true."

RELATING MATH AND MYSTICISM-

For Thornley, "mathematics is mysticism." At present, in addition to reading large quantities of science fiction, he works on astrology charts.

"I find that astrological charting helps me to understand myself and others better," Thornley said. "Even though I doubt that the stars affect what we do on Earth very much, I still feel that certain personal events may be predictable from astrology."

Thornley foresees himself carrying out a plan to subject mystical activities to mathematical analysis.

"I would like to get palm print analyses from palmists, star chart analyses from astrologers, and various predictions from various other mystics to see how well they agree with one another and how well what they foretell matches up with the people they are talking about," he said.

NO ONE DIES IN WAR GAMES-

Very bothered by war, Thornley subscribes to "Strategy and Tactics," a war gaming magazine.

"The competition in the war games is fascinating," he said. "Here, something may be resolved intellectually and no one is hurt. Nothing gets burned, nothing gets broken. I draw the line at violence."

"One thing you learn from playing war games, in which you start by re-creating battles from history, is how many times lives have been lost needlessly due to the blunders of military commanders. In the Russo-Finnish War for example, one general remarked after it was over, 'we gained enough ground to bury our dead in.'

Thornley---who says he could have beaten any World War I general in strategy, and that if a decent general had been on either side in that war, that side would have won---is planning to apply for a military deferment as a conscientious objector.

U OF M BIOMED LIBRARY
GETS COMPUTER HOOKUP
TO NATIONAL MED LIBRARY

(FOR IMMEDIATE RELEASE)

A telephone link to a computer at the National Library of Medicine is a new service to regional health practitioners from the Biomedical Library at the University of Minnesota.

Medline, a bibliographic search service, will enable physicians, for example, to ascertain within minutes the latest medical literature available on any given medical problem.

Using a \$9,200 grant from Northlands Regional Medical Program and Medtronic Inc. (a Minneapolis manufacturer of implantable medical devices such as heart pacemakers), the Biomedical Library has purchased a \$3,800 typewriter-like terminal that utilizes a telephone hookup to Bethesda, Md. The balance of the grant will be used to train personnel to use the terminal and to pay for line charges.

Previously, a manual search through the catalogued literature took a medical librarian two to four hours for a typical inquiry. Now the answer takes about 15 minutes.

The University hookup is one of a dozen now in operation around the country. Eventually more than 100 institutions will be served by Medline.

Glen Brudvig, director of the biomedical library, explained the new system will be used to aid University faculty and researchers, medically oriented firms, and outstate health professionals who may have an urgent clinical problem to solve.

(MORE)

Medline contains more than 400,000 article titles from more than 1,100 major medical journals---or almost 60 per cent of the medical information printed since 1969. Additional references are being added constantly.

This new medical library service is one-fourth of the Minnesota Medical Information Service (MMIS) sponsored by Northlands Regional Medical Program, a federally financed project to promote innovative health programs. The other three components, accessible by a single telephone number, are Dial-Access Tapes on a variety of topics, a drug information service, and medical-dental specialty advice.

#

NOTE TO EDITORS: A demonstration of the new service will be given at 10:30 a.m. Friday (June 2) in 555 Diehl hall. Representatives from Medtronic Inc., Northlands Regional Medical Program, the Biomedical Library, and University Hospitals will be present.

TRAVEL TO OLYMPIC GAMES
OFFERED FOR CREDIT BY 'U'

(FOR IMMEDIATE RELEASE)

A travel-study experience encompassing the drama and competition of the Olympic Games in Munich, Germany, will be offered by the University of Minnesota this summer.

The coeducational course will take place in Munich from Aug. 24 through Sept. 11, at a total cost of \$888. This includes tuition, round-trip transportation from the Twin Cities, bed and breakfast, tickets for the opening and closing Olympic ceremonies and other events, taxes and tips, and a trip director to provide continuity and assistance.

Professor John F. Alexander, chairman of the department of physical education for men at the University, will teach the course, traveling with the students to Munich. The class carries two graduate or undergraduate credits, or it may be audited.

The course is offered by the Minnesota World Affairs Center, a part of Continuing Education and Extension at the University. It offers University credit for off-campus courses conducted by various departments.

William C. Rogers, director of the World Affairs Center, emphasized that "not only are the Olympics the world's greatest physical education and sporting event, they are also a tremendous force for international amity and good will."

The center must receive 45 registrations in order for the course to be held. For a brochure, contact the World Affairs Center at 3300 University ave. SE., Minneapolis, Minn. 55414; telephone (612) 373-3709.

90 PER CENT OF 'U' MED SCHOOL
FRESHMEN ARE STATE RESIDENTS

(FOR IMMEDIATE RELEASE)

More than 90 per cent of this fall's entering class at the University of Minnesota Medical School are state residents.

Most of the rest, according to the director of admissions, have some tie to the state: they are former residents or they attended college in the state, for example.

Assistant Dean W. Albert Sullivan also pointed out that the 227 freshmen mark the third year in a row the University has been able to use special federal funds to increase enrollment from the usual class size of 160.

The 1,716 applicants were the largest number in the school's history and included 249 more Minnesotans than ever before. Dr. Sullivan pointed out there were eight applicants for every opening and stressed the continuously rising pressure to gain admission to the country's medical schools.

"There may be a relative shortage of physicians in this country but there is no shortage of applicants to Medical School," he said.

The entering class---though the list cannot be finalized until classes begin September---is expected to include more than 30 women and 16 students listed as "minority"---both new highs. Dr. Sullivan explained about 20 per cent of the women applicants were accepted compared to about 15 per cent of the male applicants.

There were more applications this year from minority students (Indians, blacks and Chicanos) than ever before, too. Dr. Sullivan noted the 120 applications reflected a national trend for more minority students to seek medical careers.

"These students meet the same qualifications as all other students," he said.

ALCOHOL AND DRUG ABUSE
TO BE STUDIED AT LEGAL CLINIC

(FOR IMMEDIATE RELEASE)

One of the most controversial problems confronting society today is that of alcohol and drug abuse. A one-day legal course titled "Legal Problems and Law Enforcement in the Areas of Alcohol and Drug Abuse" will be held Saturday, June 10, at the Employees Club at Fort Snelling.

The course is designed to help both lawyers and law enforcement officials understand not only the nature of the problem but also how each, in his professional capacity, can best perform his duties.

The morning session will be devoted to alcohol abuse. Topics to be discussed include "Dram Shop Law in Minnesota Today," "Alcohol, Intoxication and Observable Intoxication" (including a videotape presentation) and "Recent Legislative Changes and Proposed Additional Changes."

Drug abuse will be the subject of the afternoon sessions. Topics include "Critical Law Enforcement Problems Re: Drug Cases" (search warrant affidavits, arrests, use of informants and undercover agents), "Defending the Accused in a Drug Case," "Placement of the Offender---Rehabilitation Institutions and Agencies," and "Marijuana---The Debate Continues" (a panel discussion and question-answer session).

Faculty for the course which is sponsored by the University of Minnesota's continuing legal education department, will be the following:

- Mario A. Arcy - assistant to the narcotics counsellor for the NARA program, St. Paul.
- Lindsay G. Arthur, Jr. - attorney at law (Hagglund and Johnson), Mpls.
- Robert C. Bell - state representative and vice chairman, judiciary committee (Peterson, Bell & Converse), St. Paul
- Dr. Robert G.B. Bjornson - Saint Paul Ramsey Hospital, St. Paul
- James P. Cullen - attorney at law (Richards, Montgomery, Cobb & Bassford), Mpls.
- Ann Alton Hartgen - assistant Hennepin county attorney, Mpls.
- Lew W. Larson - state senator and chairman, regulated industries committee, Mabel, Minn.
- Paul E. Lindholm - assistant Ramsey county attorney, St. Paul.
- Don Neuenfeld - supervisor of chemical testing, Mpls. Police Dept.
- Warren E. Peterson - Ramsey county public defender, St. Paul.

Fee for the course is \$30. For further information and to register contact Continuing Legal Education, 338 Nolte Center, University of Minnesota, Minneapolis, 55455; phone (612) 373-5386.

'U' FILM SOCIETY
ENDS 10TH SEASON
WITH BERRYMAN FILM

(FOR IMMEDIATE RELEASE)

The University of Minnesota Film Society will complete its 10th year on campus this Friday and Saturday (June 2 and 3) with the presentation of three films at the Bell Museum of Natural History.

A film of the late University poet and professor John Berryman, reading his poems in a Dublin pub and talking with British critic A. Alvarez will be shown once only at 9:30 p.m. on Friday.

The 22-minute film was made while Berryman was on a leave of absence from the University during the 1967-68 school year and was working on "Dream Songs," his major poetic work.

In the film, which was made for British television, Berryman discusses his role as a poet and explains the structure of some of his poems.

Also on the program this weekend will be a new film from Poland by young filmmaker and director Krystof Zanussi. "Behind the Wall" will be shown at 10 p.m. on Friday.

The recent Japanese film, "Double Suicide," will be shown at 7:30 p.m. both Friday and Saturday.

COLLEGIUM MUSICUM
TO PRESENT FREE CONCERT (Carol Johnsen)

The University of Minnesota's Collegium Musicum, directed by Thomas Lancaster, will present a free concert of music by Josquin Desprez at the University Baptist Church at 8 p.m. Friday (June 2).

The music includes an a cappella chanson, instrumental pieces, works for one to six singers with instruments, and a deploration on the death of the composer Ockeghem for singers and instrumentalists. Josquin's sacred works will be represented by the "Missa de Beata Virgine."

The Collegium includes 23 singers and 10 instrumentalists who play modern reproductions of Renaissance instruments such as the regal, shawm, lute, recorder, krummhorn and viola da gamba.

'U' WOMEN'S CHORUS
WILL GIVE FREE
CONCERT AT COFFMAN (Carol Johnsen)

The University Women's Chorus, directed by Charles Blattner, will present a free concert at 8 p.m. Sunday (June 4) in Coffman Union main ballroom on the University of Minnesota campus.

The concert will feature the fourth movement of Vaughan Williams' "Five Tudor Portraits" with soloist Constance Wilson, University voice instructor; Jim Woodhouse, high school senior and musician, and his Contemporary Ensemble with some of today's "pop" sounds; and John Gardener's "Five Hymns in a Popular Style."

A full symphony orchestra of area musicians will accompany the Williams and Gardener works. Curt Oliver of station KUOM will be the concert commentator.

OPEN SCHOOLS TO BE
SUBJECT OF MEETING

(FOR IMMEDIATE RELEASE)

Breaking the traditional walls of American education will be discussed during a two-day conference on open schooling June 15 and 16 at the Diamond Path School in Rosemount, Minn.

The conference will consist mostly of small workshops on such issues in open schooling as goals of elementary and secondary education, community involvement, school design, teacher training, curriculum design, instructional strategies, research and administration.

A questionnaire is being sent to all who register asking just what they believe openness means in a school. The conference's first session will take up the results of that questionnaire, so each participant will understand the spread of opinion on the question, and where he stands within that spread.

This information, hopefully, will stimulate discussion of such questions as whether open schooling means special staff training or carpeting; changing the ways teachers deal with students, or changing the way classes are scheduled; architectural or psychological openness. In addition to theories or elements of openness, the conference will take up ways of implementing them and the problem of evaluating their effectiveness.

Wayne Jennings, director of a public Open School in St. Paul; Vito Perrone, director of the New School at the University of North Dakota; and Education Professor Vince Rogers of the University of Connecticut are among the educators on the program.

Other faculty members will include university faculty from Minnesota and Wisconsin, staff members of the Minnesota State Department of Education and others who have worked in open schools.

Cost of the meeting is \$30. More information or reservations may be obtained from the Director, Department of Conferences and Institutes, University of Minnesota, Minneapolis, Minn. 55455.

'U' WILL HONOR THREE GRADS,
LOCKHART AND RYMAN AT
ALUMNI ASSOCIATION MEETING

(FOR IMMEDIATE RELEASE)

The University of Minnesota will present two Alumni Service Awards and one Outstanding Achievement Award to former students at the 68th annual meeting of the Minnesota Alumni Association.

The meeting is set for 6 p.m. Tuesday (June 6) at the Radisson South hotel.

Dr. William A. Hanson, 16017 Temple lane, Minneapolis, and Lawrence E. ("Duke") Johnson, 1317 W. Minnehaha pkwy., Minneapolis, each will receive an Alumni Service Award. Fred J. Agnich, of Dallas, Texas, will be presented with the Outstanding Achievement Award. University President Malcolm Moos will make the presentations.

In addition, William B. Lockhart, retiring dean of the University Law School, and Marshall W. Ryman, retired athletic director, will receive special citations.

Lockhart, the main speaker at the meeting, will be named Honorary Alumnus of the Year by the Alumni Association. Lockhart chaired the controversial President's Commission on Obscenity and Pornography and in his talk will assess the impact of the commission's findings two years after their release. He will remain on the Law School faculty after retiring June 30 as dean.

Ryman will receive a Citation of Merit from the Alumni Association for his work as Gopher athletic director.

(MORE)

Dr. Hanson, who received his M.D. at the University in 1921, is one of the co-founders of the University of Minnesota Medical Foundation. He has helped to establish several medical scholarships at the University, and during the years 1941 to 1950 was team physician for both the football and basketball teams, receiving only token payment.

Johnson, currently an administrative assistant for Northern States Power Co., graduated from the University in 1929 with a bachelor's degree in architectural engineering. He has served in several different positions for the Minnesota Alumni Association, including vice president in 1951-52 and treasurer, 1952-54.

Johnson was also alumni representative on the Senate Committee for Inter-collegiate Athletics for 1956-58. As treasurer and chairman of the Alumni Association investment committee, he helped institute a new policy in the handling of the association's life endowment fund.

Agnich, who received a B.A. in geology from the University in 1937, is a Texas businessman and was recently named national Republican committeeman for that state, as well as recently being elected minority leader of the Texas House of Representatives.

The Outstanding Achievement Award is given to former University students who have achieved high distinction in their chosen field.

REGENTS' COMMITTEE TO HOLD HEARING
ON CIVIL SERVICE COUNCIL AT 'U'

(FOR IMMEDIATE RELEASE)

Open discussion on a proposed advisory council for civil service employees at the University of Minnesota will be held at the monthly meeting of the Regents' committee on faculty, staff, students and public relationships.

The meeting is set for 3 p.m. Wednesday (June 7) in Room 4 Mechanical Engineering on the Minneapolis campus.

Discussion on the civil service council, which was presented to the committee at the May meeting, will follow the routine matters on the committee agenda. Public discussion will be limited to those recognized by committee chairman Fred A. Cina. Two representatives from campus employee unions have already asked to be recognized at the meeting, and others wishing to do so should contact the office of the Board of Regents.

According to the proposed constitution for the council, it will provide "a two-way medium for the exchange of information between the University and its employees relative to matters of mutual concern."

Central officers of the University have already given their endorsement to the proposal, which was drawn up by a task force headed by Carol Flynn, senior executive secretary in the department of conferences of Continuing Education and Extension.

MEETING AT 'U' TO DISCUSS
COMMUNITY INVOLVEMENT

(FOR IMMEDIATE RELEASE)

A group of educators and persons involved in human relations work will meet Tuesday at the University of Minnesota to discuss ways to involve the wider community in educational services offered at the University.

"I hope that we can exchange ideas on how to shake the community---especially the minority segment---out of its apathy toward institutions of higher learning," said Ethel Rasmussen, community services coordinator in the department of University relations, organizer of the 11:30 a.m. luncheon in the Campus Club in Coffman Union.

Mrs. Rasmussen said the group will also discuss ways to bring to the community, and especially minorities, an awareness and some measure of trust of services offered by universities and colleges.

Those invited to the luncheon meeting include Bert Davis, director, and Harry (Spike) Moss, assistant director, The New Way; Kay Williams, director, Sabathani Community Center; Lillian Warren, First National Bank of Minneapolis; Emily Peake, administrator for the Indian Center; Christopher Durand, a community coordinator; Esther Brown, community resource specialist for Manpower Services; and Harry Davis, Minneapolis Urban Coalition and Board of Education.

Representatives from the University at the luncheon will include Esther Wattenberg, director of the Career Development Office; John Taborn, staff consultant for the Center for Youth Development in the Center for Urban and Regional Affairs; Professor Frank Wilderson, Jr., assistant dean of special education; and Lenora Taylor and Berry Blackhawk, coordinators for the Martin Luther King program.

MEMO TO NEWSMEN

The monthly meeting of the University of Minnesota Board of Regents is scheduled for 10 a.m. Thursday (June 8) in the Regents' room, 238 Morrill hall.

The date was changed from the regular Friday meeting schedule because several administrators will attend the Legislative Building Commission meeting in Duluth on June 9.

The Regents will act on the question of continuing student representation on Regents' committees at the faculty, staff, student and public relationships committee meeting at 3 p.m. Wednesday in room 4 Mechanical Engineering. The Regents will also act on the student services fee proposal at the committee meeting.

A review of the University's 1973 legislative requests and a faculty retirement plan will both be acted on at the physical plant and investments committee meeting at 3 p.m. Wednesday in room 300 Morrill hall.

Other scheduled committee meetings are as follows:

Wednesday

Educational policy and long-range planning, 1:15 p.m., B-12 Morrill hall;

Budget, audit and legislative relationships, 1:15 p.m., Regents' room.

Thursday

Health sciences, 9 a.m., Regents' room.

After the close of regular business during the meeting of the full board on Thursday, the Committee for Concerned Asian Scholars will make a presentation on University efforts in Southeast Asia.

14-MEMBER COMMISSION NAMED
TO STUDY RECENT VIOLENCE AT 'U'

(FOR IMMEDIATE RELEASE)

University of Minnesota President Malcolm Moos Thursday named a commission of inquiry to study the recent anti-war demonstrations and student-police clashes on the Twin Cities campus May 9 through May 15.

The commission was requested by a meeting of the student-faculty Twin Cities Assembly in an emergency session on May 12 while Minnesota National Guardsmen were on the campus.

Moos asked the commission to recommend ways to prevent similar events in the future and to suggest "changes in current University policies and practices that may have contributed to the difficulties we experienced."

The 14-member commission, which will be chaired by Professor John Darley, chairman of the psychology department, includes three students, three faculty members, three civil service employees, three representatives of the community and two ex-officio members.

"This commission assumes a very heavy responsibility," Moos said. "For the first time in our University's history, we experienced major violence and the presence of National Guard troops to maintain security and safety.

(MORE)

COMMISSION

-2-

"It is imperative that we know as completely as possible what happened on our campus and why it happened," Moos said.

Darley, Joyce Hughes, associate professor of law, and Barbara Stuhler, associate director of the World Affairs Center, will be the faculty members of the commission.

Students in the group are Katherine Sasseville, a second-year law student and president of Law Council; John Holland, a graduate student and teaching assistant in political science; and Howard Schwartz, College of Liberal Arts sophomore who is executive vice president of the Minnesota Student Association.

The three civil service employees on the commission are Janice Bouman, office supervisor in the College of Business Administration; David Kanatz, assistant director of the Student Financial Aid office, and Bill Huntzicker, a writer for the University News Service.

Community representatives will include former Minnesota Supreme Court Justice Robert Sheran, who is now an attorney in Minneapolis, and Robert Forsythe, an Edina attorney. The third community member has yet to be named.

The two ex-officio members are Lloyd Lofquist, assistant vice president for academic administration, and George Donohue, a sociology professor who will represent the University social policy committee.

**MPLS. PEDIATRICIAN, 81, RECEIVES
GOLD HEADED CANE AWARD FROM U OF M**

(FOR IMMEDIATE RELEASE)

A 250-year-old traditional award for excellence in medicine has been brought to the University of Minnesota.

Dr. Lawrence F. Richdorf, emeritus clinical associate professor of pediatrics, will receive a Gold Headed Cane Award Wednesday (June 7) for 50 years of professional leadership and outstanding contributions to the pediatric department at the University's Medical School.

Dr. Richdorf, 81, was cited by Dr. John A. Anderson, professor and chairman of pediatrics, at the award ceremony for having the prime responsibility for the establishment of the American Legion Memorial Heart Research Professor in Pediatrics in 1940. Dr. Richdorf was chairman of the legion's child welfare program at the time.

The first recipient of the professorship was Dr. Lewis Thomas, now professor and chairman of pathology at Yale University. The current holder is Dr. Robert A. Good, Regents' Professor of Pediatrics and Microbiology and chairman of the pathology department at the University of Minnesota.

Dr. Richdorf, who received both his M.D. and Ph.D. degrees from the University, is semi-retired but continues to practice at several Minneapolis hospitals. He and his wife reside at 6936 Nicollet ave., Minneapolis.

In the tradition of the Gold Headed Cane, first presented to Dr. John Radcliffe in England, Dr. Richdorf will nominate the Cane's next recipient.

'U' PRESS BOOK CITED
IN AWARD COMPETITION

The book "Mentally Retarded Children: What Parents and Others Should Know" by Harriet E. Blodgett, published by the University of Minnesota Press, has been cited as a runner-up in the competition for the annual Educator's Award of the Delta Kappa Gamma Society.

The society is an international honor organization of women in education. The award honors women whose professional contributions are of special significance. Author Blodgett is the program director of Sheltering Arms in Minneapolis, a day school and research program for mentally retarded children.

4 MINNEAPOLIS STUDENTS
RECEIVE ESSAY AWARDS

Four University of Minnesota students from Minneapolis have received cash awards for original historical essays in the annual Class of 1889 Prize competition.

A first-place award of \$200 went to Richard Ryan, 2329 Ninth st. S., for the best essay by a graduate student while the second-place award of \$100 went to Winifred Bolin, 612 Morgan ave. S.

Two seniors, Martin Leren, 3115 Hennepin ave. S., and James Doran, 3900 Dupont ave. N., received cash awards of \$100 each for best essays by undergraduates.

LUNDBERG ELECTED TO BOARD

Walter O. Lundberg, director of the Hormel Institute, was elected recently to the board of directors of the American Oil Chemists' Society foundation. The society is pursuing several philanthropic activities and the foundation was formed two years ago to raise funds for these activities.

Dr. Lundberg is a past president of both the American Oil Chemists' Society and the International Society for Fat Research. The Hormel Institute, located in Austin, Minn., is a research facility of the University of Minnesota, with work concentrated on lipid research.

U OF M MED STUDENT
ELECTED HEAD OF SAMA

(FOR IMMEDIATE RELEASE)

George Blatti, third-year medical student at the University of Minnesota, has been elected national president of the Student American Medical Association (SAMA).

Another University medical student, sophomore Tom Kottke, was elected a regional trustee at SAMA's recent annual meeting in Los Angeles.

SAMA represents 16,500 medical students at 94 medical schools. Since 1968 they have sponsored a series of health projects in Appalachia, on Indian reservations, in migrant worker camps, in rural community hospitals and in inner-city community clinics.

Blatti, as a sophomore, served as North Dakota director of a SAMA program for freshman and sophomore medical students designed to provide early educational contact with patients and to introduce students to health care in community hospitals.

This year, as speaker of SAMA's House of Delegates, he worked to increase extracurricular educational opportunities for medical students in areas related to health-care delivery.

(MORE)

Blatti said he hopes to be able to refine SAMA's existing programs and work for curriculum and legislation to improve interdisciplinary understanding and cooperation among students in the health professions.

SAMA has recently developed a videotape series for medical students dealing with sexuality, alcoholism and the free-clinic movement. Future topics include drug use, venereal disease and national health insurance.

Both Blatti and Kottke are active in the Council for Health Interdisciplinary Participation (CHIP) at the University. Kottke, CHIP president, is a recent recipient of a Student Achievement Award from the Minnesota Medical Foundation and the Hennepin County Medical Society Foundation. He is also a member of the Medical Student Council and a curriculum committee.

#

SUPPLEMENTARY INFORMATION:

George Blatti is the son of Mr. and Mrs. Milton R. Blatti of Mankato and Tom Kottke is the son of Dr. and Mrs. Frederic Kottke of Minneapolis.

SUMMER COURSE REGISTRATION OPEN
IN WOMEN'S PROGRAMS AT 'U'

(FOR IMMEDIATE RELEASE)

Registration is now under way for summer classes offered by Women's Programs, part of Continuing Education and Extension at the University of Minnesota.

Limited registration is proceeding for "Status and Role of Women," "Love and Death in the Modern World," "Virginia Woolf: Woman on Women," and "Conversational Spanish."

"Status and Role of Women," coordinated by Professor Clarke A. Chambers, chairman of the University history department, will be a two-week workshop running Monday through Friday, 9:30 a.m. to noon, from Monday, June 19, through Friday, June 30. Meeting in the Food Science and Industries building on the St. Paul campus, the class will consider the position of women as a "minority" in today's society. Fee for the course, which carries three credits in education, is \$45.

"Virginia Woolf: Woman on Women," taught by Toni McNaron, associate professor of English, will deal with Virginia Woolf's female characters as reflections of certain social norms and expectations, and how the author responded to those expectations. The class will meet on Tuesdays, June 20 and 27 and July 11 and 18, from 9:30 to 11:30 a.m. Fee for the course, which will meet in Room 324 Coffman Union, is \$28, and it may be taken for two credits or audited.

The relationship of love to "varieties of death" in the 20th century will be discussed in "Love and Death," taught by Makka Abhishaker, humanities instructor. The class will meet Wednesdays, 9:30 to 11:30 a.m., for five sessions, June 21 through July 19, in Room 305 Coffman Union. Credit for the class may be arranged with the instructor. Fee is \$20.

Persons with either high school or college training in Spanish are eligible for a non-credit course in "Conversational Spanish," which will meet Monday and Wednesday noons, 12:05 to 12:55 p.m., June 19 through July 19. Taught by Janet Mobley, Spanish instructor, the course has an \$18 fee and will be held in Room S-132 Kolthoff hall, Minneapolis campus.

For further information on summer courses, contact Women's Programs, 200 Westbrook Hall, University of Minnesota, Minneapolis 55455, or phone 373-9743.

UNIVERSITY OF IOWA PRESIDENT
TO RECEIVE OUTSTANDING
ACHIEVEMENT AWARD FROM 'U'

(FOR IMMEDIATE RELEASE)

The president of the University of Iowa will be presented with an Outstanding Achievement Award by the University of Minnesota at the graduation ceremony for the Law School at 7:30 p.m. Wednesday, June 14, in Northrop auditorium.

Willard L. Boyd will be the speaker at the ceremony as well as receiving the award. He holds two degrees from the University, a bachelor's degree in 1949 and a law degree in 1951.

Named president at Iowa in 1969, Boyd has written a number of articles and monographs in his professional field, most of them dealing with international law, decedents' estates and workmen's compensation.

An Alumni Service Award will be presented to Julius E. Davis, a Minneapolis attorney, at the same ceremony. Davis, who lives at 1650 Dupont ave. S., received a B.A. in 1933 and a law degree in 1936. In the early 1960's, Davis negotiated a guaranteed student bank loan program for the Law School which has provided hundreds of thousands of dollars in loans to law students on very favorable terms.

A senior partner in the Robbins, Davis and Lyons law firm, Davis is a former president of the Law Alumni Association. During his term he planned the Law School Fund, a program which provides private funds of more than \$100,000 annually for strengthening the Law School through the appointment of outstanding professors, salary supplements and research grants to faculty.

FOUR 'U' FACULTY MEMBERS
TO RECEIVE STANDARD OIL-
HORACE T. MORSE AWARDS

(FOR IMMEDIATE RELEASE)

Four University of Minnesota faculty members will be recognized as outstanding teachers at the University Commencement Ceremony at 7:30 p.m. Thursday, June 15, in the grandstand at the State Fairgrounds.

E. Fred Koller, professor of agriculture and applied economics; Warren G. Meyer, professor and chairman of the department of distributive education; Lewis G. Palmer, assistant professor of mechanical engineering; and Leon Reisman, professor and head of the General College division of literature, communication and philosophy, will be presented their awards by William G. Shepherd, vice president for academic administration.

University President Malcolm Moos will be the main speaker at the commencement which will honor 5,930 undergraduate and graduate students: 1,217 from winter quarter and an estimated 4,713 degree candidates from spring quarter. Around 15,000 people are expected to attend the ceremony which will include an address by Jack Baker, recently re-elected president of the student body.

The Standard Oil (Indiana)-Horace T. Morse award carries a grant of \$1,000, and criteria for selection emphasize significant contribution to undergraduate education. The criteria also include superior undergraduate classroom teaching, advising, and counseling, and significant contributions to the art and science of undergraduate instruction.

(MORE)

Koller, 65, lives at 1466 Hythe st., St. Paul. He received his M.A. at the University in 1934, and followed that with a Ph.D. in 1938. Named an associate professor of agricultural economics in 1942, Koller made a study on the financing and business management of farmers' cooperative marketing and purchasing organizations.

That study, made in 1946-47, was sponsored by the National Bureau of Economic Research. Koller was also named a full professor that year. In 1964-65, he was acting head of the department of agricultural and applied economics, and received the University's Outstanding Teacher Award in 1967.

Meyer, 62, received his B.A. at the University of Wisconsin in 1932 and then attended the New York University School of Retailing for an M.S. in 1933. Now residing at 5829 Portland ave. S., Minneapolis, Meyer went to the University in 1946 as an assistant professor. He was named an associate professor in 1949, and became a full professor in 1966. Meyer has been chairman of the department of distributive education in the College of Education since 1970.

Palmer, 63, received his B.S. at Stout Institute in Wisconsin in 1932. He began at the University in 1942 as an instructor of drawing and descriptive geometry in the Institute of Technology. He received his M.A. at Minnesota in 1947, and was named an assistant professor that year. Palmer lives at 5546 Pleasant ave. S., Minneapolis

Reisman, 62, received a B.A. degree at the University of California, Los Angeles, in 1931. A former high school English and journalism teacher, Reisman received his M.A. from UCLA in 1944. He joined the University as an instructor in English in 1945, and became a lecturer in literature and writing in the General College in 1950.

Reisman became an assistant professor in 1962, and became head of the division of literature and writing in 1966 as an associate professor. He was named a full professor in 1968, and is now head of the division of literature, communication and philosophy. Reisman, who lives at 1815 N. Fairview ave., St. Paul, is also interested in study of motion pictures.

INTERNATIONAL WIZARD OF OZ CLUB
TO HAVE 'EMERALD CITY' MEETING

(FOR IMMEDIATE RELEASE)

The International Wizard of Oz Club will hold an Emerald City convention Saturday (June 10) (the 50th anniversary of the birth of Judy Garland) at the University of Minnesota and the Sheraton-Ritz Hotel.

About 50 adults and 40 children are expected to attend. Minnesota members who are planning the meeting include Laura Jane Musser, author, of Little Falls, Minn., Ruth Berman, a faculty member of the University English department, and Karen Nelson, curator of the University's Kerlan Collection of children's literature.

Special guests will include Matilda Gage, Aberdeen, S.D., niece of L. Frank Baum, author of "The Wizard of Oz;" Emily Kimbrough, New York, N.Y., co-author of "Our Hearts Were Young and Gay;" Russell McFall, Evanston, Ill., co-author with Frank Baum of "To Please A Child;" and Eloise McGraw, Sherwood, Ore., author of "Merry-Go-Round in Oz."

The meeting will begin Saturday at 9 a.m. with registration and coffee in room 109 of Walter Library. Ms. Nelson will present an introduction to the Kerlan Collection at 10 a.m. followed by "A Geozify Lesson" slide show by Ms. Berman. A relief map of The Land of Oz made by Little Falls seventh graders will be displayed.

A noon luncheon at the Sheraton-Ritz will be followed by attendance at a 3 p.m. performance of an operetta, "The Marvelous Land of Oz," at Armatage school, Fifty-sixth and Russell ave. S., Minneapolis. The cast includes 76 children, directed by Dorothy Benham.

The International Wizard of Oz Club is an organization of about 1,000 fans of L. Frank Baum.

The Kerlan Collection includes the original type script of Ms. McGraw's book, several illustrations by Dick Martin for "The Wizard of Oz," and several first editions of the Oz books.

WOMAN NAMED ASST. DEAN
OF UNIVERSITY LAW SCHOOL

(FOR RELEASE AT 11 A.M. THURSDAY, JUNE 8)

A 25-year-old woman was today named by the University of Minnesota Regents to the position of assistant dean for admissions and placement in the University's Law School.

Patricia Ann Lydon, 1971 graduate of the Law School, will succeed Richard W. Swanson June 19. She has spent the last year as an attorney with the Federal Trade Commission in Washington, D.C.

Born in Minneapolis, Miss Lydon received her bachelor's degree magna cum laude from the University in 1968. She was primary editor of the Law Review in 1970-71.

A director of obstetrical services at the University of Minnesota Hospitals was also named today by the Board of Regents.

Dr. Asa E. Seeds, Jr., professor of obstetrics and gynecology at Georgetown University, will have a joint appointment in the department of obstetrics and gynecology and the department of physiology. Dr. Seeds will develop a teaching, research and training program in perinatology for undergraduate and graduate students.

Also named to the obstetrics and gynecology faculty was Dr. Curtis J. Lund. Dr. Lund formerly served on the University faculty in the 1940's and is now retiring as professor and chairman of the department of obstetrics at the University of Rochester Medical School, Rochester, N.Y.

The Regents approved a year's leave of absence for Frank F. Pieper, 57, director of the department of civil service personnel. Lee H. Hart, associate director of the department, was named acting director.

Pieper was named coordinator of employee training in the Office of Civil Service Personnel at the University in 1952. He plans on spending the year studying and updating his knowledge of humanistic psychology and industrial sociology, and will spend

(MORE)

several months at the National Center for the Exploration of Human Potential at La Jolla, Calif. He also plans on updating a book he published in 1958, "Modular Management and Human Leadership."

Hart, 52, received a bachelor's degree in industrial education at the University in 1950. He was a senior personnel representative in charge of the classification division from 1956 to 1962, was named assistant director of civil service personnel in 1962 and associate director in 1966.

In other action, the Regents approved a change in the University's faculty retirement plan restricting the amount of cash a faculty member could receive if he resigns before retirement age.

Currently, a faculty member can withdraw both his own and the University's contributions to the retirement plan upon his resignation. Under the new provision--- which does not apply to current participants in the plan---he could only withdraw the amount he has paid into the program, plus interest if he has participated in the plan for more than five years. The remainder would be available to him at retirement age as retirement income.

Employees who resign with five years or less of employment will still be able to withdraw the full amount.

The board authorized the University to begin paying 4 per cent salary increases to Civil Service on July 1---increases authorized by the Legislature last session--- if state employees receive such a raise. The Regents said payment of the raises is contingent on any challenge from the Federal Wage Board, which is reviewing the pay plan for state employees.

The faculty, staff, student and public relationships committee Wednesday postponed action on proposed Civil Service rules changes because of a need to clarify the University's relationship to the Public Employment Labor Relations Act of 1971. A portion of the proposed rules change deals with negotiating with labor organizations. The committee will consider the changes at a special meeting later this month.

CITIES FINANCIAL EXECUTIVE
TO WORK ON 'U' DEVELOPMENT

(FOR RELEASE AT 11 A.M. THURSDAY, JUNE 8)

A leader in the Twin Cities financial and civic communities was named Thursday as a special advisor on University development for the University of Minnesota.

James G. Peterson, 51, chairman of the executive committee of Dain, Kalman & Quail, Inc., a Minneapolis-based regional investment banking firm, was named to the new position Thursday by the Board of Regents. The appointment is effective Sept. 1.

"Peterson is well qualified to work with large personal and corporate donors in our continuing effort to increase non-public sources of income for the University," according to Robert Odegard, director of University development.

Peterson joined J.M. Dain & Co., predecessor of Dain, Kalman & Ouail, in 1950 and has been sales manager, vice president and director, and president and general manager of the firm. He became board chairman in 1969.

"This new challenge is a logical extension of a long-standing interest and effort promoting this area as the financial and educational center of a highly productive regional economy," Peterson said.

"Our international reputation as a regional center for 'knowledge' industries stems largely from our high concentration of superlative educational resources epitomized by the University of Minnesota," he said.

#

SUPPLEMENTARY INFORMATION:

Peterson is a board member of the Upper Midwest Council and the Greater Minneapolis Chamber of Commerce. He was president of the Chamber in 1969-70. He has served two terms on the board of governors of the Midwest Stock Exchange.

He has been a board member and chairman of the education committee of the Minneapolis Urban Coalition and a trustee of the Plymouth Congregational Church.

A trustee of the University Foundation, Peterson received a bachelor's degree in aeronautical engineering and master's degree in business administration from the University of Minnesota. He is a St. Paul native.

NEW U OF M RADIO POLICY
URGES SHARING OF PROPOSED
STATEWIDE EDUCATIONAL NETWORK

(FOR RELEASE AT 11 A.M. THURSDAY, JUNE 8)

A new University of Minnesota Policy on Educational Radio Broadcasting was approved today by the Board of Regents.

According to Peter Roll, special assistant to the vice president for academic administration, the new policy "provides for the first time a statement of where the University stands in regard to the other educational broadcasters in the state."

The main thrust of the new proposal is for greater cooperation and sharing of facilities and programming among all educational institutions and their broadcast outlets throughout Minnesota.

The new policy includes expansion of University radio facilities to include an FM station on the Twin Cities campus which would extend the broadcast day beyond the 10:30 a.m.-to-dusk hours required under the license of KUOM, the present Twin Cities campus AM station.

A further purpose of the new policy is to provide a framework for the University to enter into discussions with other institutions and agencies to determine whether a unified educational network can be developed which will best serve the needs of the state.

The proposal states, "It should be the University's policy to work toward the establishment of a unified educational radio network for the state in which all institutions of education can participate."

(MORE)

Mutual access among stations through an educational network should, according to the new policy, possess the following properties:

- ownership or control by the institutions sponsoring the participating stations;
- integrity of program choice by the member institutions;
- equal representation in the management of the network by the member institutions.

At present, University radio broadcasts serve several areas: news and public affairs, community service programs, cultural events, programming to specific cultural and minority groups, and formal credit courses. Mass communications students and other students in contact with the state community are also included in present University broadcast activities. These services would continue and more student involvement would be encouraged under the new policy, Roll said.

The new policy acknowledges that it is open for review, revision and modification "as the University's relationships with and between other educational institutions and non-commercial broadcasting stations develop."

KUMD, the FM radio station on the Duluth campus, may also be increased in range, and a permanent staff may be added under the new policy. As broadcast activities increase on other University coordinate campuses, they may also be included in the network.

The Board of Regents also received a proposed broadcast television policy statement for information and action later, probably at its July meeting. Roll said the radio and television policies are two parts of a three-part broadcasting package which will include a statement on University use of cable television. The cable TV statement is expected to be presented to the Regents later this year.

#

SUPPLEMENTARY INFORMATION:

Peter Roll was appointed by Vice President for Academic Administration W.G. Shepherd to coordinate all educational resources within the University.

REGENTS' COMMITTEE HOLDS OFF
ACTION ON PROPOSED COUNCIL
FOR 'U' CIVIL SERVICE EMPLOYEES

(FOR RELEASE AT 11 A.M. THURSDAY, JUNE 8)

University of Minnesota Regents' action on a proposed advisory council for civil service employees was held up for a month following discussion in Wednesday's meeting of the Regents' committee on faculty, staff, students and public relationships.

Discussion centered on the legality of such a council, which is the product of nine month's work by a task force appointed by University Acting Vice President Eugene Eidenberg.

Main objection to the council was expressed by the Minnesota Teamsters Public and Law Enforcement Employees Union, Local 320, which said in a written statement that "The objectives of the Civil Service Council will be in direct competition with legitimate labor unions and would only result in the formation of a company union funded or promoted by the University of Minnesota."

If the proposed council acted in a negotiating capacity, said Jack Mogelson, Local 320 representative, it would be in violation of the 1971 Minnesota State Labor Relations Act because it would interfere with the operation of a recognized bargaining authority, in this case, various unions that represent some campus employees.

According to Carol Flynn, senior executive secretary and chairman of the council task force, the council would act only as an informational agency. "We feel we have an obligation to build this council," said Mrs. Flynn, "so you (Regents and administrators) have someone to talk to on employee matters, but we do not see the council's function as that of a negotiating or bargaining agency."

Mrs. Flynn added that only 20 per cent of the University civil service employees are represented by unions recognized as negotiating agencies, and pointed out that the proposed council constitution states that the organization of the council "shall in no way affect the right of University employees to belong to other organized groups of their choice, nor shall it preclude the functioning of such organizations."

The committee acted to lay the matter over to the July meeting on the motion of Regent Lester A. Malkerson, who felt that further discussion was needed as to the role and power of the council.

STUDENTS ROLE WITH REGENTS
IS UNDER BOARD STUDY

(FOR IMMEDIATE RELEASE)

Students will continue as members of University of Minnesota Board of Regents committees for one month past the end of the trial period while the board deliberates how they should participate in the future.

The faculty, staff, student and public relationships committee of the board voted Wednesday (June 7) to delay action after it was presented with two divergent proposals. A report from President Malcolm Moos recommended that student membership be ended and one from students said they should continue on the board with full voting rights.

The Regents voted in November to add 16 non-voting members to its eight committees on a trial basis until the end of the school year. The question of students on Regents committees---which have been consolidated to five---will now come before the board in July.

Moos' report asked the Regents to question whether students should have committee memberships without providing similar representation for the University's other two constituencies, the faculty and civil service staff. It recommends ending student membership and replacing it with a system which would provide input from students, faculty and staff. That proposal includes quarterly meetings between board committees and existing University Senate committees and a yearly meeting of the Senate consultative committee with the full board.

The student report, written by the 16 students who served on committees this year, describes a plan for continuing their participation with full voting rights. The Moos report said this would be a major departure from a student input system to a decision-making role.

Speaking to the committee on Wednesday, Jack Baker, president of the Minnesota Student Association on the Twin Cities campus, spoke in favor of the student proposal. Baker said Moos' representation system would be "inherently unbalanced" because students are outnumbered by faculty in the Senate two to one.

Baker added that taxpayers have the Regents looking out for their interest but students must have board membership to protect theirs. "We have a \$25-million annual investment in tuition," Baker said, "and there should be some structure so we can watch over that investment."

After the committee meeting Vice President for Student Affairs Paul Cashman said the fact that the Regents deferred action on student membership "shows their sincere desire for genuine student input."

The question before the Board next month will be finding the best means to continue that input.

MOOS ANNOUNCES CHANGES
IN CENTRAL ADMINISTRATION

(FOR IMMEDIATE RELEASE)

University of Minnesota President Malcolm Moos announced two major reorganizational changes in the central administration at today's meeting of the Board of Regents.

Moos said that responsibility for the University's coordinate campuses is being moved to his office, along with Stanley Kegler, who will have the new title of special assistant to the president, in addition to his old title of associate vice president.

Kegler, who also holds the title of professor of English education, has been at the University since 1951.

Moos also announced that Stanley Wenberg, vice president for coordinate campuses and educational relationships, has been given the new title of vice president for state and federal programs.

Wenberg will be the principal spokesman for the University in the Legislature next year in addition to his old duties, Moos said.

During his 28 years at the University Wenberg has served as assistant to the dean of admissions and records, assistant to the president and vice president. His title became vice president for coordinate campuses and educational relationships in 1969.

APPLICATIONS OPEN FOR
LIBERAL ARTS SEMINARS
FROM WOMEN'S PROGRAMS

(FOR IMMEDIATE RELEASE)

Applications are now being taken for registration in the annual liberal arts seminars offered through Women's Programs, of Continuing Education and Extension (CEE) at the University of Minnesota.

The seminars will meet from 9:30 a.m. to noon, generally every other week from September to June, and carry regular University credit. Enrollment is limited and registration may be made only after application has been made and accepted.

Applications may be Tuesday, June 27, which is the annual "Day in June---Woman's Day on Campus" sponsored by Women's Programs. The event, which will begin at 9:15 a.m. in Mayo auditorium, will feature Barbara Stuhler, associate director of the World Affairs Center on campus, and Vera M. Schletzer, director of counseling for CEE.

A new seminar this year is "An Analysis of Cultural Change," a broad introduction to the study of major historical changes in western culture. Faculty will include lecturers from anthropology, Afro-American studies, sociology, English classics, Middle Eastern languages, and the departments of French and Italian.

(MORE)

Students in "Arts of Reading" will read poetry, novels and drama by Virginia Woolf, Jane Austen, James Joyce and others in an English seminar designed to increase literary appreciation and criticism.

"Ideas in America," an American studies course, will examine in historical context the basic American concepts which condition U.S. political thought as well as the literature and art which have influenced the American social experience.

"Law and Society," a social science course, will explore the nature of legal rules and processes, the court system, law and the family, political freedom and privacy, regulation of mass media, and social change and the law. Faculty for the course will be drawn from political science and the Law School, as well as other departments.

The humanities seminar, "New Worlds of Knowledge," will cover developments in recent years in the sciences, social sciences, music, art and literature with an emphasis on common problems and unifying concepts.

VIETNAM WAR SEEN
AS HELPFUL TO USSR

(FOR IMMEDIATE RELEASE)

The American war policy in Vietnam has been helpful rather than threatening to both the Soviet Union and the People's Republic of China, according to John W. Strong, an authority on Sino-Soviet affairs.

"To the Soviet Union," according to Strong, "The limited war in Vietnam offered multiple advantages: (1) It kept the United States heavily committed in East Asia and thus incapable of concerted action elsewhere in the world.

"(2) It maintained a U.S. presence in Southeast Asia, which served as a deterrent to Chinese expansion into that region, and which concomitantly relieved the Soviets of any need for action in this regard.

"(3) World opinion was definitely turned against American policy in Southeast Asia.

"(4) The war created a serious domestic crisis within the United States. (5) It gave the Soviets an opportunity to test some of their modern military equipment, such as ground-to-air missiles, under combat conditions."

(MORE)

Strong, associate professor of history at Carleton University, Ottawa, Ont., said that both the Chinese and the Soviets have used the Vietnam war as a propaganda weapon. The two nations have accused each other of doing too little to aid the North Vietnamese.

Strong's views are in an essay, "The Sino-Soviet Dispute," contained in "The Communist States in Disarray 1965-1971," a book just published by the University of Minnesota Press.

The work, edited by Adam Bromke and Teresa Rakowska-Harmstone, contains studies by 15 authors on individual Communist states and discussions of general trends and patterns.

In an essay on North Vietnam, Paul F. Langer, a Rand Corporation researcher, said, "Peking and Moscow appear to be vying for the allegiance of Hanoi."

Langer said the Soviets have urged the North Vietnamese to achieve a negotiated settlement in Vietnam while the Chinese have repeatedly stressed that Hanoi should eschew compromise or negotiations with the 'imperialists' and pursue the Chinese formula of a protracted people's war until final military victory."

RICHARD JORDAN HONORED (Bill Hafling)

Richard C. Jordan, head of the University of Minnesota School of Mechanical and Aerospace Engineering, has received the ninth "Engineer of the Year" award from the Minnesota Society of Professional Engineers. It was presented "for outstanding service to the engineering profession" at the group's recent meeting in Alexandria. Professor Jordan, 63, who also heads the department of mechanical engineering, joined the University faculty in 1937 and received his doctor of philosophy degree there in 1940.

* * *

**HELMUT HEINRICH
RECEIVES TEACHING AWARD (Bill Hafling)**

The University of Minnesota Institute of Technology distinguished teaching award for 1972 has been presented to Professor Helmut Heinrich. The award is given to individuals who have made significant contributions to the institute's educational programs. A professor in the department of aerospace engineering and mechanics and the author of more than 80 technical papers and reports, primarily in aerodynamic deceleration (such as the use of parachutes and the mechanics of atmospheric re-entry of space vehicles), Heinrich is also known for his enthusiastic lecturing and friendship with students.

* * *

**ROSEVILLE COUPLE
NAMED DANFORTH ASSOCIATES (Gloria Anthony)**

A Roseville couple, Professor and Mrs. Frederick M. Waltz, have been named Danforth Associates.

(MORE)

Waltz is an associate professor of electrical engineering at the University of Minnesota. He and Mrs. Waltz are one of 177 faculty members and their spouses in colleges and universities named Danforth Associates throughout the United States. Associates work directly with students on a personal basis in an effort to improve student-faculty relations, to strengthen the teaching-learning process. Purpose of the program is to encourage the humanizing of the educational process in colleges and universities.

Professor and Mrs. Waltz live with their two children, Robert, 10, and Carolyn, 7, at 2435 Arona, Roseville.

* * *

FEIGL TO GET PRIZE (Bill Hafling)

Herbert Feigl, Regents' Professor Emeritus of Philosophy at the University of Minnesota, will be awarded a prize by the City of Vienna Monday (June 19), according to a letter received from the mayor of Vienna. This involves both a diploma and a financial award for "his contribution to the philosophy of natural science."

* * *

'U' PROFESSOR RE-ELECTED (Claude Chmiel)

Professor Robert Plunkett, director of aeronautical engineering at the University of Minnesota, has been re-elected vice president of the basic engineering department of the American Society of Mechanical Engineers. The announcement was made at the society's summer annual meeting, held recently in Washington, D.C. Plunkett, who resides at 3122 W. Owasso blvd., St. Paul, has been at the University since 1960, and has held several other positions in the American Society of Mechanical Engineers.

DR. SCHMID RECEIVES GRANT

Harald H. O. Schmid, associate professor at the University of Minnesota and head of a research section at the Hormel Institute, Austin, has received a research grant from the National Institute of Neurological Diseases and Stroke. The grant, entitled "Phospholipid Biosynthesis in the Developing Brain," will provide a total of \$26,200 for a two-year period. Research under this new project will center on the elucidation of various biological pathways involved in the formation of cell membrane components of the immature brain. The work will provide basic knowledge on the formation and function of nervous tissue.

'U' MARCHING BAND
WILL ADD WOMEN

(FOR IMMEDIATE RELEASE)

For the first time since World War II the University of Minnesota marching band will admit women to its ranks.

However, questions such as how many women will join the band and what will be the selection criteria remain open while administrators discuss the financial problems of the new arrangement.

"We're pleased something's been done but we're disturbed that it took such an inordinate amount of time," said Beryl Blaustone, a member of the Commission on the Status of Women Students (CSWS). The commission began last fall to demand that the marching band be integrated and hoped that the recruiting of women could begin this spring.

CSWS had argued that the all-male band violated the University's own equal opportunity policy and its compliance with Department of Health, Education and Welfare regulations for recipients of federal funds. The group also argued that since the band program receives student fee support, no part of the band organization should be closed to any student who wants to apply.

"Our approach to the administration last fall was that there's no case for argument on the question, only a case for implementation," Miss Blaustone added.

William G. Shepherd, vice president for academic administration, said he strongly supports admitting women to the band but he pointed out that there is a need for additional equipment and some modification of facilities before women join.

Frank A. Bencriscutto, professor of music and director of University bands, said the all-male marching band's national reputation for music and marching can continue with proper support for the integrated band.

Bencriscutto added that after the financial questions are resolved he can begin planning what direction the integrated marching band will take. The band, which had 225 members last year plays during the fall football season and occasionally at convocations.

The marching band was the only part of the band program which was restricted to males.

"We have about 200 women involved in our other band programs," Bencriscutto said, citing the pep band and five concert bands.

'U' THEATRE NAMES
BEST ACTRESSES, ACTORS

(FOR IMMEDIATE RELEASE)

A Wayzata woman and a Moorhead, Minn., man have been named "Best Graduate Actress and Actor" for 1972 by the University of Minnesota theater faculty.

The awards are given in recognition of outstanding contributions to the University Theatre productions in the 1971-72 season.

Bea Morris, Wayzata, played the lead role of Nora in the Scott hall production of Henrik Ibsen's "A Doll House" and Hermione in the Shevlin arena theater production of Shakespeare's "A Winter's Tale."

Douglas Hamilton, named Best Graduate Actor, played the Duke of Milan in the Scott hall production of "Two Gentlemen of Verona" and was a member of the acting ensemble of University Theatre's production of "365 Days" which was presented at the John F. Kennedy Center in Washington, D.C., as part of the American College Theater Festival.

Robert Engels and Karen Nienaber have been named "Best Undergraduate Actor and Actress". Both are seniors from Minneapolis. Engels played the title role in the Young People's University Theatre production of "You're A Good Man, Charlie Brown" and was a member of the cast of the Scott hall productions of "Two Gentlemen of Verona" and "Time of Your Life."

Ms. Nienaber was cast as Stella in the Scott hall production of "A Streetcar Named Desire" and was a member of the cast of the Shevlin hall production of "Ubu Roi."

Joseph Rassulo, a graduate student from Harrison, N.Y., was given the Directing Award for his direction of "The Madman and the Nun" which was presented winter quarter in the Scott hall studio theater.

Technical theater awards went to Barbara Younk, a sophomore from Minneapolis, costumes; Bill Cummins, a junior from Owatonna, lighting and sounds; and Eric Grassel, a sophomore from Bloomington, scenery.

CEE WOMEN'S PROGRAMS '
"DAY IN JUNE" PLANNED

(FOR IMMEDIATE RELEASE)

"A Day in June - Woman's Day on Campus," an annual event sponsored by Women's Programs, part of Continuing Education and Extension (CEE) at the University of Minnesota, will be held Tuesday, June 27, in Mayo auditorium on the Minneapolis campus.

This year's program will open with an address at 9:45 a.m. by Harold A. Miller, acting dean of CEE. At 10 a.m., Vera M. Schletzer, director of counseling for CEE, will speak on "The American Woman: Alive and Well in a Man's World."

At 10:45 a.m., Barbara Stuhler, associate director of the World Affairs Center at the University, will talk about "Lifestyles and Livelihoods."

Donald Z. Woods, CEE associate director, will be master of ceremonies at the noon luncheon in Coffman Union. There will be short reports and remarks on vocational trends. A film, "Growing Up Female," will be shown following the lunch.

Registration fee for the event is \$4, including the lunch. Reservations are necessary, and may be made by contacting Women's Programs, 200 Wesbrook hall, University of Minnesota, Minneapolis, 55455, or phoning 373-9743.

The event is an annual opportunity for students and teachers in Women's Programs to get together and for new students to explore the opportunities offered by Women's Programs, formerly the department of continuing education for women. Information on upcoming liberal arts seminars will also be available, and applications for registration will be accepted.

ANTI-WAR CLASS
OFFERED AT 'U'

(FOR IMMEDIATE RELEASE)

An anti-war class at the University of Minnesota is "off to a good start" after its first meeting Tuesday (June 13), according to a class coordinator.

Joel Hodroff, 2108 Elliot Ave. So., said nearly 100 people attended the first session and "they're exactly the kind of people we're looking for--- people getting involved for the first time and people who want to learn more about the war than they can get in the media."

What Hodroff, a member of the Honeywell Project-New American Movement, calls "old movement people" are also involved in the class.

The summer class is sponsored by the Constituent Assembly, a group formed during the May demonstrations on campus and now a coordinating body for anti-war activities. Although the class is not sponsored by the University, participants may arrange to receive independent study credit for their course work.

(MORE)

According to Hodroff, the classes are designed to raise the level of understanding of people new to the anti-war movement and to provide a base for unified anti-war activities in the fall.

"The classes have primarily an education function," he said. "Through class discussions we can collectively develop long-range strategy for the fall."

The proposal, prepared by organizers of the class, states that the class should "draw the most committed people back together to fill in the holes in our educations, and to analyze our past anti-war work, our current situation and our future plans."

Some of the activities that have been discussed for the fall include a program during Welcome Week for incoming freshmen and a campus-wide educational campaign.

Classes meet every Tuesday and Thursday evening through Aug. 10 at 7:30 p.m. in room 10 Blegen hall on the University's West Bank. Hodroff said anyone may attend and a fee of 50 cents per class or \$4 for the series will be charged those who can afford it.

On Tuesday, June 20, the class will discuss Vietnamese culture with a film, "Struggle for Life," produced by the Franco-Vietnamese Medical Association. Glen Boatman of the Minnesota Peace Action Coalition will discuss the role of Vietnamese culture in the war.

Other classes will discuss what the war is doing to the ecology of Vietnam, the increasingly automated nature of warfare and the relationship of the war to the U.S. economy.

STUDENTS WILL WORK, STUDY AND TRAVEL
FAR FROM CAMPUS

by Gloria Anthony
University News Service Writer

There's a veritable epidemic on the campus of the University of Minnesota. It is characterized by angry-looking red lumps on the arms of harried, hurrying students and faculty. And it is caused by "itchy feet" and a burning desire for knowledge.

From Aden to Zanzibar, now that finals are a thing of the past and summer looms invitingly, hundreds of them will take to the air or to the sea (complete with newly acquired smallpox vaccinations) in search of adventure in far-off lands.

Three groups from the University will delve far into the past, for "dig is big" in their summer plans.

*Sheila McNally, associate professor of art history, has a grant from the Smithsonian Institution to continue archeological excavation of a fourth-century palace in Split, Yugoslavia. The seaside palace was built by Diocletian, following his retirement as emperor of Rome. This is Miss McNally's fifth year with the project.

The site of Split is unique. In addition to being one of the most important and best preserved structures of the Roman Empire, it became a medieval town and remains in use today in the heart of a modern city.

*Under the huge umbrella of "human paleo-ecology," the Minnesota Messenia Expedition, directed by William A. McDonald, professor of classics, is investigating a site in the western Peloponnese in Greece. Scientists, engineers and classical scholars are all working together to unearth new evidence from the Mycenaean (Late

(MORE)

Bronze Age) era, 1600-1200 B.C., and to further document the power and wealth of Nestor, Bronze Age king.

* Khirbet Shema is about a hundred miles north of Jerusalem in Israel. It was a town with a population of about 200 which flourished in the first century after Christ was born. Sponsored by the American Schools of Oriental Research and the Smithsonian Institution and involving students and faculty from many schools, including the U of M, the dig is an attempt to learn more about Judaism and early Christianity and to generate renewed interest in Talmudic archeology.

Twenty-two American Indian students, 15 of whom are from the "U," will be participating in a comparative government course under the auspices of the American Institute for Foreign Study, College Division.

Their first two weeks will include course work at the London School of Economics as well as sightseeing and visits to Houses of Parliament, St. Pauls, Westminster, Piccadilly and the Tower of London.

Weeks number three and four involve course work at the Free University of Berlin and sightseeing in both East and West Berlin, plus visits to Dresden and Leipzig.

Moscow, Russia, complete with visits to Red Square and the Kremlin, as well as class work, will be followed by a week in Leningrad, attending classes and visiting the Hermitage Museum, Peterhof Palace and Kazan Cathedral.

Independent study and travel in smaller units will complete the final two weeks of the group's study-travel European tour.

These are but a few of the literally hundreds who will be taking off on University charter or scheduled airline flights in days to come. Multiply them by the countless college students and faculty who will be working, studying and traveling abroad; add to that the thousands whose pilgrimage to Munich and the Olympics has been planned for perhaps two years, plus the untold number whose "vacation of a lifetime" will lead them abroad this summer; and you'll have some picture of the "American invasion" taking place right now on the shores of Europe.

INQUIRY COMMISSION
REQUESTS WITNESSES

(FOR IMMEDIATE RELEASE)

Witnesses to the events that took place on the Twin Cities campus of the University of Minnesota May 9 through 15 are invited to testify at a series of hearings to be conducted by the Commission of Inquiry beginning this week.

John Darley, chairman of the University's psychology department and chairman of the commission, issued the invitation and requested that those who want to testify contact him at his campus office. The hearings will be open to news media representatives, but not to the general public.

The meetings will be held in Room 238 Morrill hall (the Regents' Room) beginning Thursday (June 22) at 7:30 p.m. Subsequent meetings will be held Tuesdays at the same time and location.

Darley emphasized that the commission does not have the power to compel attendance or the authority to grant immunity from prosecution to witnesses. He did say, however, that the commission has reserved the right to withdraw into executive session in order to protect the rights of witnesses.

The Commission of Inquiry was appointed by President Malcolm Moos in response to a request of the Twin Cities Assembly, the faculty-student governing body. The commission has been charged with "pinpointing responsibility for events of the past few days and presenting its findings to the general public as well as the University."

(MORE)

President Moos has asked it to make recommendations (1) to insure that similar events do not recur, and (2) to suggest any necessary changes in current University policies and practices that may have contributed to the difficulties we experience.

Members of the commission, in addition to Darley, are Janice Bouman, civil service employe; Robert Forsythe, Minneapolis attorney; Terrance Hanold, Pillsbury Company president; John Holland, graduate student; William Huntzicker and David Kanatz, civil service employes; Richard Purple, associate professor of neurophysiology and president of SEMPACC (Southeast Minneapolis Planning and Coordinating Committee); Katherine Sasseville, Law School student; Howard Schwartz, College of Liberal Arts undergraduate student; Robert Sheran, St. Paul attorney and former Minnesota Supreme Court justice; and Professor Barbara Stuhler, associate director of the World Affairs Center.

Ex officio members are Sociology Professor George Donohue, chairman of the University Senate Committee on Social Welfare, and Lloyd Lofquist, assistant vice president for academic administration.

Scheduled to testify Thursday are Paul Cashman, vice president for student affairs; Wesley Pomeroy, director of safety and development, and three members of the University police force. Eugene Eidenberg, acting vice president for administration, was heard at the first meeting of the commission last week.

AGING BEGINS BEFORE BIRTH

by Bill Hafling
University of Minnesota Science Writer

The word "aging" calls to mind images of lonely old people, suffering with economic and medical problems.

These terminal aspects of the aging process have received increasing, though still too little, attention in recent years.

For many people, aging is treated as a social disease and it often seems that old people are avoided by the young, as if the "disease" were somehow communicable. If aging were truly a disease, however, rather than the natural process it is, world-wide panic would ensue. The epidemic includes all the living organisms on earth---all are aging.

Babies are aging---even unborn babies. Furthermore the process of aging, beginning with the formation of life inside the mother, is also coincident with, and in a sense synonymous with, another of life's processes---that of dying.

According to Diana Bennett and Karen Tanaka, both teaching assistants and researchers in the department of zoology at the University of Minnesota, this dying process is necessary for the successful adaptation and development of living organisms.

"Certain parts of a living organism are destined to die before birth, even," Tanaka said. "The cells between our fingers, for example, must die before we are born in order for the fingers to form. Death is a process programmed in the cell, and aging begins in the development of the gametes. (The gametes are mature cells, male and female, whose union is necessary, in sexual reproduction, for the development of a new individual.)

(MORE)

From a scientific research standpoint, aging is a relatively new area of study. Researchers are particularly intrigued by the degree to which embryonic deaths in insects and amphibians, for instance, are related to the processes responsible for the aging of mature living organisms.

Cell death before birth is known to be the usual method of eliminating larval organs and tissues before birth, particularly in animals which undergo drastic metamorphosis during development.

Both Tanaka and Bennett feel that aging falls properly within their area of interest: developmental biology and embryology.

Working with purified deoxyribonucleic acid (well known as DNA, a complex protein that seems to store genetic information), which she has extracted from California squid, Tanaka is doing studies to determine how much of the "information" the DNA carries in the living system is redundant and how much is truly unique.

Though such fine laboratory analysis seems remote, basic studies such as these can ultimately contribute a great deal to an understanding of all life processes, including those of growing, aging and dying.

Tanaka said some questions on aging are very difficult to deal with and have far-reaching implications:

"Why has evolution selected animals which die off?

"What if an organism of some kind were born and never died? What if this type of organism just kept on living?

"What are the social and moral implications for man as he achieves a long life span?"

PHILIDOR TRIO TO PERFORM
2 CONCERTS AT SUGAR HILLS

(FOR IMMEDIATE RELEASE)

The Philidor Trio, members of the noted New York Pro Musica and a distinguished group in its own right, will give two public concerts Sunday (June 25) and Friday, June 30, at Sugar Hills Resort, Grand Rapids.

The two events, both at 8 p.m., will be benefits for the Grand Rapids Performing Arts Council. The Sunday concert, "The Silver Age of Venice," will include 18th-century Italian music. Friday's concert of 18th-century German and Austrian music is titled "A Musical Miscellany."

The trio will be in residence Monday through Friday (June 26-30) conducting a workshop in Early Music at the University of Minnesota's Summer Arts Study Center at Sugar Hills. It consists of Elizabeth Hume, soprano, Shelley Gruskin, baroque flute and recorder, and Edward Smith, harpsichord. Assisting the trio will be Mary Springfels, viola da gamba.

Also scheduled the week of June 26 is a seminar on Contemporary American Poetry by Sarah Youngblood, professor of English at Mount Holyoke College and former faculty member of the University of Minnesota where she received a distinguished teacher award.

Other University workshops scheduled at Sugar Hills include Voice and Movement by Robert Moulton, July 10-14; Technical Theatre by George Bogusch, July 10-14; Painting: To See a Sonnet, by Eugene Larkin, July 17-21; Humanities by Paula Giese, July 24-28; Theatre Workshop by Ezra Stone, July 24-28; Pottery by Douglas Johnson, July 24-Aug. 4; Landscape Painting by Herman Somberg, July 31-Aug. 4; Contemporary Art Aesthetics by Raymond Hendler, July 31-Aug. 4; Sculpture and Carving by Katherine Nash, Aug. 7-18; and Drawing and Painting by Knox Martin, Aug. 7-18.

MEMO TO NEWSMEN

New building requests which the University of Minnesota plans to present to the 1973 Legislature will be discussed by University officials and the Legislative Building Commission Monday and Tuesday (June 26 and 27).

The commission will meet for the two days on the Twin Cities campus of the University.

On Monday, their meetings will begin with a discussion of the long-range physical plan of the St. Paul campus at 8:30 a.m. in the North Star Ballroom of the St. Paul Student Center. At 11, they will hear a progress report of building construction.

At 1:30 p.m., the commission will hear a presentation on the health sciences requests and at 3 p.m. they will discuss the University's request for a new Law School building. Both meetings will be in the ballroom.

Building requests for the Minneapolis campus will be discussed on Tuesday beginning at 8:30 a.m. in the east wing of the Campus Club in Coffman Union.

Members of the commission will tour the St. Paul campus at 11 a.m. Monday and the Minneapolis campus at 1:30 p.m. Tuesday. On Monday evening, they will dine at the Campus Club and attend a performance of "Show Boat" on the University's Showboat.

SLOW STARTERS,
'U' STUDENTS ARRIVE IN EUROPE

by Gloria Anthony
University of Minnesota
Traveling Correspondent

London.....When anticipation is highest, delay of a trip planned perhaps a year in advance accosts the sensibilities like the impact of a bullet.

There were 179 of us, students and faculty from the University of Minnesota, waiting impatiently for our Pan American chartered plane to arrive from New York. After a brief stop for fuel in Chicago, it was to carry us directly to London where some would disembark, then go on to Amsterdam with the rest.

From 8:30 to 10:30 to 11:30 p.m., departure time kept moving back, until it was finally learned that a hydraulic problem had developed and the plane had limped into Chicago for repairs.

So all 179 of us trudged, complete with luggage, aboard two hastily chartered buses, and our European odyssey had gotten us no further than the Leamington Hotel in downtown Minneapolis.

Surprisingly, grumbling was minimal. All of us lost a half-day in Europe. Many missed prearranged railway connections, and Pan Am lost a big chunk of profit. The tab at the Leamington was about \$1,100, and breakfast for 179 came to a healthy sum, plus chartered buses back to the airport.

(MORE)

But there the plane was, finally, its hydraulic system freshly overhauled, and fueled up to go. For many, taking off at 180 miles per hour, climbing 1,400 feet per minute, and cruising along at 600 miles per hour was a new experience. Over Newfoundland, the pilot pointed out icebergs in the sea. Compared with cubes floating in our glasses, the huge chunks of ice below didn't look very formidable when viewed from five miles away.

Three stewardesses and the purser kept busy throughout the 7 1/2-hour flight, distributing Coke, coffee, mixed drinks, sandwiches and peanuts, after an ample meal of steak, eggs and champagne. Because it's such a long flight from Minneapolis to London, with no stops, there were five pilots aboard, one acting as engineer.

When descent began everyone, even seasoned travelers, craned their necks to the windows to glimpse land again. Ireland, Scotland, soon London itself came into view. For many it is the first time away from home, away from the United States. For those novice travelers, England will be a good place to start. The language is our own, although the Queen's English takes a bit of translating at times to get it into good old Minnesota English.

Those bound for Amsterdam stayed aboard and didn't get a chance to set foot on British soil as originally planned. Everything was changed a bit because of the late start and the lack of expected, helpful tail winds.

So quick goodbyes were said, students waited for their luggage so they could check through Customs, and the plane took off for Amsterdam. Adventure and excitement were all around us, waiting to be discovered.

'U' IMMIGRANT ARCHIVES
RECEIVES DONATIONS
FROM FINNISH-AMERICAN SOCIETY (Claude Chmiel)

Donations totaling \$1,175 were presented to the Immigrant Archives of the University of Minnesota Library during the recent Mid-Summer Celebration of the Finnish-American Society of Minnesota.

Gust Gustafson, Duluth, vice president of the Minnesota Finnish-American Historical Society, presented Michael Carney, research associate in the Center for Immigration Studies, with a \$1,000 donation. Carney also accepted a \$100 and a \$75 check from Arnold Alanen, president of the society's St. Paul chapter, on behalf of the Immigrant Archives. The \$75 check was a family memorial donated by Wenonah Comfort, Menlo Park, Calif.

The Immigrant Archives are a special collection within University Archives of material pertaining to the immigration to the U.S. and Canada of people from eastern, central, and southern Europe, and the Middle East. It also has a special collection of Finnish material.

'U' PROF RECEIVES AWARD
FROM FOOD TECHNOLOGY GROUP (Claude Chmiel)

Theodore P. Labuza, associate professor of food technology in the department of food science and industries at the University of Minnesota, was awarded the Samuel Cate Prescott award at the recent meeting of the national Institute of Food Technologists. Labuza, 31, lives at Route 3, Forest Lake, and received a plaque and a \$1,000 award. The Samuel Cate Prescott Award is presented for excellence in research by a person under 35 years of age.

'U' THEATRE TO PRESENT PREMIERE
OF 'ECHOES' BY N. RICHARD NASH

(FOR IMMEDIATE RELEASE)

The University of Minnesota Theatre will present the world premiere of "Echoes," a play by N. Richard Nash, author of "The Rainmaker," Thursday, July 6, at 8 p.m. in Scott hall auditorium.

Nash will be on the Twin Cities campus for about a week prior to the opening, preparing the production with the director, Stephen Kanee, a graduate student from Winnipeg, Canada.

Performances will be at 8 p.m. Thursday through Saturday, July 6 through July 8 and Thursday through Saturday, July 13 through July 15. Tickets are on sale at the Scott hall ticket office and at all Dayton's stores.

Cast in the leading roles, as two asylum inmates, are Elizabeth Rukavina, a freshman from St. Paul, who plays Tilda, and Gregg Almquist, a graduate student from Minneapolis, who plays Sam.

In addition to "The Rainmaker," Nash has written the musical adaptation, "110 in the Shade"; the book for the Broadway musical, "Wildcat," which starred Lucille Ball (also produced it with Michael Kidd); "Handful Of Fire," which received the Archer Award in 1960, and numerous other plays, sceneplays and television scripts. He has received many international awards and his works have been translated into 33 languages. Nash, who lives in New York City, is currently working on a screenplay for Peter Fonda.

The production of the play at the University of Minnesota is part of the American Playwrights Theatre program to premiere the works of well-known playwrights throughout the United States.

'U' LAW SCHOOL TO PROVIDE
LEGAL AID TO MINNESOTA PRISONERS

(FOR IMMEDIATE RELEASE)

Picture yourself as an inmate of a Minnesota prison. Your marriage is broken and you want a divorce but have no funds to hire a lawyer. What can you do?

"Legal Assistance for Minnesota Prisoners (LAMP)," a new project of the University of Minnesota Law School Legal Aid Clinic, will attempt to deal with situations such as this. Only those prisoners who are unable to afford a private attorney are eligible for the project.

The project was made possible by a federal grant received by the University's Law School, a grant large enough to hire just two attorneys. Melvin B. Goldberg, associate professor of law, has been hired and is serving as project director.

Goldberg, who came to the University from a similar position in Illinois--- executive director of the Cook County Legal Assistance Foundation, Inc.---sees the project as a challenge, but recognizes that limited funding will mean limited services to inmates, especially during the summer months.

Two students have been hired to help Goldberg during the summer. When school resumes in the fall the staff of LAMP will be made up of two lawyers and 20 to 25 law students per quarter who will be working on the project as part of a seminar for which they will receive three credits.

LAMP will take all types of cases except criminal problems handled by the public defender, cases where the client can pay an attorney, and cases which private attorneys will take on a "contingent fee" basis. The most common problems handled by LAMP are expected to be divorce, consumer credit, landlord/tenant and welfare.

Preparations for the project have been under way for some time. Saturday (July 1) is the official starting date for direct, regularly scheduled interviews of prisoners at Stillwater. It is hoped that regularly scheduled interviews will begin in October at Shakopee, St. Cloud and the Minneapolis workhouse.

UNIVERSITIES USE WRONG REASONS
FOR EQUAL RIGHTS, TWO 'U' WOMEN CHARGE

(FOR IMMEDIATE RELEASE)

Two women just returned from a conference on equal opportunity for women said in a recent interview they are disturbed that women are making headway in the academic community for the wrong reasons.

"Most universities appear to be complying with equal opportunity regulations only out of fear that they could lose their federal contracts," said Vivian Nelsen, acting director of the Minnesota Women's Center at the University of Minnesota and a graduate student.

"The whole thrust of most affirmative-action plans is to try to justify what a school is already doing," she added.

Vera Schletzer, professor and director of counseling for the University Continuing Education and Extension, agreed.

"It's more a matter of a school seeing how it can squeak by the regulations, not how to do the right thing," she said.

The two women attended a conference entitled "Women's Work Has Just Begun: Legal Problems of Employing Women in Universities" sponsored by the Institute of Continuing Legal Education at the University of Michigan, June 23 and 24.

OTHER MINORITIES

Ms. Nelsen, of 926 Thomas ave. N., Minneapolis, said her conversations with other blacks at the conference pointed up a concern about the thirst for equality for women.

(MORE)

"There is some worry that women may take priority over other minorities," she said. "The conference didn't come to grips with the idea that civil rights for all might be lost in favor of women's rights."

Both women said the 1972 Equal Opportunity Act and the just-passed higher education bill will make some difference in the fight for equal opportunity for women.

"The law now says that the fact that an institution didn't intend to discriminate is no protection," Ms. Nelsen said. "If there are patterns or policies that result in discrimination, then the best-hearted person in the world could be found in violation."

Ms. Nelsen said she was excited by a conference suggestion that each school set up its own grievance procedure so discrimination charges could be handled with speed and a decision would be final and binding.

NOT TIED UP IN COURT

"Grievances could then be handled within the school before the matter gets tied up in the courts," she added.

Both women said they met people at the conference whose grievances had been waiting up to two years without any action.

The conference also showed Ms. Nelsen that a school really reflects its commitment to equal opportunity in its budget.

"Most schools' equal opportunity officers are separated from where the real action is---in central administration, where they make up the budget," she said.

Ms. Nelsen and Ms. Schletzer used words like "hideous," "terrible," and "grotesque" to describe the status of equal opportunity for women in higher education.

"I've been working for women's rights since 1960," Ms. Schletzer said. "I thought it was a horror story then and it's gotten worse since."

(MORE)

Ms. Schletzer said she was fascinated when the conference discussed the way job skills are rated in the U.S. Department of Labor's Dictionary of Occupational Titles.

SEAL TRAINER OVER TEACHER

"A seal trainer has a higher skill rating than a nursery school teacher," she said, "and a secretary's skills are rated lower than those for a butler, a retail salesman or a pony ride operator."

Ms. Nelsen said there are two things she'd like to see happen right away in the area of equal opportunity at the University.

"I'd like to see equal emphasis on both women and minorities, not one to the exclusion of the other," she said. She also said the University should set up equitable procedures right away.

"It's much simpler to do when the heat isn't on, so the time to act is now," she added.

In all fairness to the University, Ms. Schletzer said, there is "genuine effort and concern here. We have made some progress and we might be a little better off than most places."

However, she added, "I would just hope we'd have more of an honest effort to provide equal opportunity, more than just a minimal compliance under the law. It's been just minimal up to now."

U OF M PROF RECEIVES
HIGHEST ENGINEERING
EDUCATION AWARD

(FOR IMMEDIATE RELEASE)

Regents' Professor Ernst R.G. Eckert of the University of Minnesota is this year's recipient of the Vincent Bendix Award, the highest award of the American Society for Engineering Education.

Eckert is director of the thermodynamics and heat transfer division and the heat transfer laboratory in the department of mechanical engineering at the University. A recognized authority in his field, he holds a large number of awards by academic, professional and scientific organizations.

Eckert joined the faculty of the University in 1951 and was made Regents' Professor, the highest honor bestowed on faculty members, in 1966. He was born in Prague, Czechoslovakia, in 1904 and educated there and in Germany, receiving his doctorate from the Institute of Technology, Danzig, Germany, in 1938.

UNIVERSITY OF MINNESOTA
TO STUDY SOLAR POWER

(FOR IMMEDIATE RELEASE)

The National Science Foundation today awarded \$446,600 to University of Minnesota scientists for a study of solar energy as a possible source of electric power.

Effective July 1, the grant will provide funds for a year of research. At the end of the first year, the contract is renewable for a second year at an estimated \$413,400. Subcontractor on the project is Honeywell, Inc., a Minneapolis company.

Harnessing the sun to do man's work is a centuries-old dream. Today, however, as conventional sources of power use up scarce natural resources at the same time as they pollute the environment, there are hard, practical reasons for scientifically evaluating the use of solar energy.

Under the direction of Professor Richard C. Jordan, head of the University's School of Mechanical and Aeronautical Engineering, the project includes the development of a working model of a device which will collect solar energy and convert it to usable electric power.

Ernst R.G. Eckert, Regents' Professor of Mechanical Engineering and director of the University's heat and mass transfer laboratories, will direct the technical aspects of the total program. Eckert is internationally recognized as authority on heat transfer.

(MORE)

"Using today's materials and processing," Professor Jordan said, "it appears possible to convert 20 per cent of the solar energy falling on the Earth at a given point to thermal power and then to usable electric power.

"This would mean enough power to serve the requirements of this nation for many years to come, and do it at a cost we can afford, making use of unused portions of our land---such as deserts---without pollution."

A recent editorial in Science magazine (16 June 1972) speculates that "if society chooses to invest sufficiently in solar and geothermal energy, it is possible that these technologies might be in widespread use by the end of the century."

Recent studies by the National Academy of Sciences-National Research Council show that total energy consumption in the U.S. is doubling at least every 34 years. Solar energy would provide an inexhaustible energy source with no pollution and no threat of catastrophic accidents in the process.

A sketch of the planned demonstration unit for the solar power plant looks like a field full of huge watering troughs, higher than a man's head. Underneath them sheep graze in the shade.

Closer inspection of the "troughs" reveal them to be parabolic solar reflectors containing heat pipes through the center which act as solar energy absorbers. A transfer station takes energy from the receiving station, moving it through a transfer fluid to either a storage facility or a power distribution station. Jordan said a storage unit is needed because solar heat is available only during certain time periods.

(MORE)

Jordan said the solar power plant model studied will consist of separate receiving, transfer, and storage systems. Research and development on the receiving system will end with the fabrication and test of a demonstration unit during the contract period.

Data gathered in the study will also have use in evaluating applications of solar power collection systems in home heating and industrial processes.

A major portion of the research is expected to be conducted at the University of Minnesota's 16,500-square-foot heat transfer laboratory at the Institute of Technology on the Minneapolis campus.

Research on optical properties of collector coatings and heat treating them for life-test evaluation will take place at Honeywell facilities. Honeywell personnel connected with the project include Matthew A. Sutton, general manager of Honeywell's systems and research center, and Roger N. Schmidt, senior staff scientist.

MOOS OPPOSES
TUITION PLAN

(FOR IMMEDIATE RELEASE)

University of Minnesota President Malcolm Moos said today he is opposed to a plan before the Higher Education Coordinating Commission (HECC) which would tie student tuition to the cost of higher education.

Speaking to HECC, Moos said the proposal that students pay 35 per cent of the cost of their instruction would raise the tuition costs for the average student attending the University.

"In 1972-73," Moos said, "the average undergraduate paid \$523 in tuition and the average graduate professional student paid \$730. The 35 per cent proposal would raise those averages to approximately \$636 and \$1,900 annually in 1973-74."

Moos said the plan may reduce tuition for some liberal arts students but that the overall effect would be to make the increased costs in other areas enough to force 700 to 1,000 students to forego higher education.

"We believe that the net effect of such a policy would be to limit access to the very programs we are uniquely qualified to offer. These are the programs which the commission and the Legislature have asked us to emphasize," Moos said.

"He said the policy may result in some graduate and professional students paying more than the state does toward their education. "In the case of medicine, the programs in which there is greatest federal funding, the student would pay \$2,100; the state's share would be only \$900."

The University president said that the cost of instruction is not the amount that a student pays for his education. Students must also pay for housing, board, commuting costs and foregone income, Moos said.

(MORE)

Moos called for a tuition policy which would increase access to high education.

"Subsidies for higher education, from whatever source, could be reallocated to the under-represented socio-economic groups," Moos said. "Such a reallocation will require flexible administrative procedures in the form of tuition forgiveness grants."

He said such a funding plan could increase the amount of federal aid through the Higher Education Act by increasing state-appropriated tuition forgiveness grants which may be matched by federal funds.

He said the 35 per cent proposal would increase the amount of money needed for scholarships and loans.

"Our preliminary estimates indicate that about \$3 million in additional financial aids would be required for University students alone just to meet these increased burdens," he said. "We do not have those \$3 million; as a matter of fact we are short almost \$4 million in financial aids right now."

Moos said a variety of federal loan programs are available but that students from many middle income families that need financial aid may not qualify for them.

Rising costs of higher education have increased the number of students who work and borrow money. "Almost three-fourths of our students work," Moos said. "In 1970, they earned \$15 million in part-time jobs right on the Twin Cities campus."

"The average student loan indebtedness has risen from \$1,837 for a graduating senior in 1968-69 to \$2,709 in 1971, an increase of almost \$1,000 in three years. Individual student indebtedness has been as high as \$10,060."

Moos said "Tuition charges are frequently based on the erroneous principle that higher education is a luxury and a privilege. In truth, in this age, it is a critical necessity."

The president added that tuition has increased more than 100 per cent in the majority of public institutions over the last five years and that college students in the United States pay "a greater share of the cost of their education than in any other major country, with the possible exception of Canada."

ENGLISH CHURCHMAN
TO SPEAK AT 'U'

(FOR IMMEDIATE RELEASE)

W. Moelwyn Merchant, chancellor and canon of Salisbury Cathedral in England and professor of English at the University of Exeter, will deliver two lectures on Shakespeare at the University of Minnesota Monday and Tuesday (July 10 and 11).

"Shakespeare and the Theologians" is the topic for the Monday lecture and "Shakespeare and the Artists" is the topic for the Tuesday lecture.

Both will be given at 2 p.m. in Room 5 Architecture building and are open to the public with no admission charge. They are sponsored by the English department and the Arts Advisory office of the Division of Continuing Education and Extension.

Merchant, 59, is the author of "Creed and Drama" (1965), "Shakespeare and the Artist" (1959), and "Wordsworth's Guide to the Lakes" (1952). He has also written numerous scholarly articles. In 1971 he was a visiting professor of English and Theology at the University of Chicago.

BRITISH ARTIST CREATES
'COMMUNITY INSTALLATION'

(FOR IMMEDIATE RELEASE)

A British artist is bringing several suburban communities to the Twin Cities campus of the University of Minnesota.

Andrew Leicester, 24, who has spent the last year as a sculpture instructor at the University, has created a "Community Installation" from hundreds of pounds of earth taken from six suburban Twin Cities locations.

The earth works, plus slides, films and tape recordings made during the digs, will be exhibited in Coffman Gallery Monday (July 10) through Aug. 6. There will be a public opening, featuring six cakes decorated as the landscape of each of the areas, from 7 to 10 p.m. July 10.

The gallery is open to the public with no admission charge Monday through Friday from 9 a.m. to 5 p.m.

Leicester, a conceptual artist from London, England, began his project by using his West Bank studio as a focal point and drawing a circle with a 10-mile radius on a map. He then divided the circle into 60-degree angles and in that way selected the six sites for his digs. At each location he removed the earth from an area three feet square and one foot deep. Each location was marked with a stake and a red balloon.

(MORE)

"By taking something of theirs (the community's) and putting part of it into the gallery, we are involving them and bringing to the gallery, people who may not have been there before," Leicester said. "I want to liven up art and make it less sacred---more a part of reality."

The six sites are as follows:

1. Shady Oak -- the farm of Ralph Dvorak, 5636 Feltl road, Minnetonka.
2. Zachery Lane -- the farm of Mr. and Mrs. K.R. DeVries, 5065 Zachery Lane, Plymouth.
3. Laddie Lake -- the backyard of Mr. and Mrs. Wayne Erickson, 8315 Lakewood Dr., Spring Lake Park.
4. Gem Lake -- near the property of Donald K. Johnson, 793 Berwood ave., Vadnais Heights.
5. West St. Paul -- the front yard of Mr. and Mrs. Fredric J. Henry, 386 Thompson ave. E., West St. Paul.
6. Cedar Ave. -- near the Cedar-avenue bridge in Bloomington.

Leicester has studied at the Berkshire College of Art in West London, Portsmouth Polytechnic and Manchester Polytechnic. In 1970-71 he taught and studied for his master of fine arts degree at the University of Nebraska. During the summer of 1971 he was artistic director and artist-in-residence at the University of Minnesota Summer Arts Study Center at Grand Rapids, Minn.

His works have been shown at the Royal Watercolor Society in London; the Arts Council Show in Hyde Park, London; the Museum of Modern Art in Oxford; the Haymarket Gallery in Lincoln, Neb., and at the University of Nebraska. His drawings have been included in a showing at the Minneapolis Institute of Arts and he has recently been a guest artist at Walker Art Center and at Worthington State Junior College.

U OF M OFFERS INDEPENDENT
STUDY IN LONG TERM CARE

(FOR IMMEDIATE RELEASE)

An independent study program in the administration of nursing homes and other long-term care facilities has been established at the University of Minnesota.

The program is designed for persons new to the field or those with little formal education in the field.

Eighteen quarter credits from the School of Public Health will be awarded for successfully completing three courses: Administration of Long Term Care Facilities, Services for Long Term Care Patients, and Practicum in Long Term Care.

Each of the first two courses is 16 weeks long. The practicum will be held concurrently with the second course and will include two brief seminars on the University's Minneapolis campus with the faculty.

The program, developed by the Upper Midwest Center for Long Term Care Administration, allows a student to enroll as an undergraduate at a college near him and transfer the 18 credits earned from the University.

"The independent study program is one option developed by the University in response to federal legislation requiring states to license nursing home administrators," explained Professor Kenneth Gordon, director of the center.

"Educational credentials for entry and mandatory continuing-education requirements for license renewal are now set by law."

(MORE)

Manpower projections for the nursing-home-administration field are lacking. But according to the most recent federal survey, somewhere between 110 and 190 newly credentialed administrators could be expected to enter the field in the six-state area served by the center.

Professor Gordon treats such figures cautiously, however, because of the unknown effect of the new licensure requirements. He did note an interesting employment characteristic of nursing homes: that they tend to promote new administrators from within the ranks of their present employees.

Because of the large area to be served and the number of working adults who will be seeking credentials for promotion, the center decided on the independent study program. The program has an additional advantage for community colleges in that they can now offer an additional career choice without adding faculty.

HEALTH EXPERTS
TO SPEAK AT U

(FOR IMMEDIATE RELEASE)

The fifth annual Health of the Nation summer lecture series will begin July 14 at the University of Minnesota. Physicians, a medical reporter, and a congressman will be examining various aspects of the health-care-delivery process each Fridaynoon in Mayo auditorium.

The schedule:

July 14: Dr. Effie Ellis, special assistant for health services for the American Medical Association, "Children and the Quality of Life."

July 21: Stuart Auerbach, health reporter for the Washington, D.C. Post, "Is the Media Fair With Medicine and Vica Versa."

July 28: Dr. Donald Newman, director of the Peninsular Hospital's Community Mental Health Center in Burlingame, Calif., "A New Approach to Community Mental Health."

Aug. 4: Dr. Carolyn Crawford, pediatric resident at St. Christopher's Hospital for Children in Philadelphia, "Today's Woman in Medicine."

Aug. 11: Dr. Madeline Leininger, dean of the School of Nursing at the University of Washington, "Nursing -- A Changing Role."

Aug. 18: Dr. Donald Muhich, psychiatric consultant with the Los Angeles Medical Plan, "The Year 2,000 and Beyond---Roses Versus Subtraction."

Aug. 25: Rep. Donald Fraser, DFL 5th District, "Annual Congressional Report."

Health of the Nation is sponsored by the Twin City members of the Council of Teaching Hospitals which include, Ramsey County and Charles T. Miller Hospitals in St. Paul, and Hennepin County, University, Mt. Sinai, and Veterans Hospitals in Minneapolis.

All talks are free and open to the public.

MINNESOTA AIR POLLUTION LAB
TO ASSESS CALIFORNIA PROBLEM

(FOR IMMEDIATE RELEASE)

The largest and most complex mobile air pollution laboratory ever constructed is now nearly completed at the University of Minnesota. Next week (the week of July 10) the lab will move to California to begin assessing one of the world's larger and more complex air pollution problems.

As part of a major air pollution study, the mobile laboratory will be used for air sampling in the Los Angeles Basin (called the "Bay of Smokes" by the Spanish explorer Balboa in 1513), the San Francisco Bay Area, and the San Joaquin Valley. Sampling will also take place from fixed stations in Pasadena, Riverside and Oakland. The study will be made during the late summer and fall of 1972.

Containing an estimated \$250,000 worth of the latest equipment for aerosol and particle measurement and the latest in air pollution gas analysis instrumentation, the mobile laboratory was constructed under the direction of Professor K. T. Whitby of the University's mechanical engineering department.

The specially designed semi-trailer vehicle housing the equipment was built by Thermo Systems, Inc., of St. Paul for an additional \$150,000.

"The principal objective of the experiment will be to characterize aerosols--the finely divided solid and liquid particles suspended in the air, such as dusts, smokes and mists," Professor Whitby said.

(MORE)

"These are the elements of air pollution that reduce visibility and, under some conditions, affect health. Aerosols come from both man-made and natural sources. One of the goals of the experiment is to find out how much comes from each source."

Faculty and students of the University's environmental division, under the direction of Professor Whitby, will operate the mobile lab in California from July 17 to Dec. 20, 1972.

At an open house held recently at the mobile laboratory at the University, Professor Whitby said,

"The new era of pollution control which we are entering is going to effect profound changes in many aspects of our society. The cost is going to be high both in money and effort. This type of large collaborative study is expected to provide much needed data and experience for the development of the next round of air quality and emission standards."

#

SUPPLEMENTARY INFORMATION:

The mobile laboratory was built for the Air Resources Board of the State of California under contract to the North American Aviation Science Center. Funds for the laboratory come from a 1.7-million-dollar contract to the North American Rockwell Science Center granted by the State of California.

In addition to Whitby, project personnel from the University of Minnesota are Professors Benjamin Y.H. Liu, Klaus Willeke and Virgil Marple, and Research Associate William E. Clark, mobile laboratory manager, assisted by researchers George Svedrup and David Pui.

The present program stems from a 1969 study at the California Institute of Technology (Cal Tech) by Professor Whitby, Professor S.K. Friedlander of Cal Tech, and Dr. P.K. Mueller of the California State Department of Health.

Others taking part in the present study are E.R. Stevens of the Air Pollution Research Center, University of California, and T.R. Smith of Meteorology Research, Inc., of California. Principal Investigator for the entire program is G. Hidy of the North American Rockwell Science Center.

**PUBLIC ACCLAIM BRINGS
RE-BROADCAST OF SHOW
ON WOODCARVER**

(FOR IMMEDIATE RELEASE)

A repeat of the program "Halvor Landsverk---Woodcarver" will be shown at 9 p.m. Monday, (July 17) on KTCA-TV, channel 2.

The half-hour color film, which received statewide acclaim when it was first telecast in June, was produced by Continuing Education and Extension at the University of Minnesota as one program in the series "Minnesota Life Styles---The Scandinavians."

Halvor Landsverk, 62, was born in Minnesota of Norwegian parents who pioneered in this part of the country. He has lived in the farming community of Highland Prairie all his life.

The major portion of the film concerns Landsverk's skills in the art of making "kubbestols" (tub-like chairs carved from a solid section of basswood which are later covered with elaborate designs of a Scandinavian theme.)

Other segments in the program show a seven-foot bust of Abraham Lincoln which Landsverk sculpted in white concrete with features molded from individual stones found in southeastern Minnesota, and a three-foot by five-and-one-half-foot walnut carving of "The Last Supper" which the artist donated to the Highland Prairie Lutheran Church.

Music for the program was adapted from an ancient Norwegian folk tune and contemporary music. Musicians are Rick Waltz, a 21-year-old University of Minnesota music major, who plays an eight-string Hardanger violin, an instrument used predominantly in the 14th and 15th centuries; and Shannon Simonson, a 14-year-old student at Marshall-University high school, who plays a standard violin.

MEMO TO NEWSMEN

University of Minnesota budget requests and a number of student issues will receive a good deal of discussion by the Board of Regents at its monthly meeting Thursday afternoon and Friday (July 13 and 14).

In a joint meeting of the budget, audit and legislative relationships committee and the educational policy and long-range planning committee, the progress of proposed academic budget requests for the 1973 Legislature will be discussed. The meeting will begin at 1:15 p.m. Thursday in the Regents' room, 238 Morrill hall.

At 2 p.m., the budget, audit and legislative relationships committee will take action on the 1972-73 \$282-million budget; while the educational policy and long-range planning committee will discuss a policy for educational television broadcasting and a number of curriculum and college constitution proposals. The latter meeting will be in B-12 Morrill hall.

The physical plant and investments committee will meet at 3 p.m. Thursday in the Regents' room.

Student representation on the Board of Regents, student service fees, changes in civil service rules and a proposed civil service advisory council are among the agenda topics for the faculty, staff, student and public relationships committee which will meet at 8:30 a.m. Friday in the Regents' room.

The health sciences committee will meet at 9:30 a.m. followed by the meeting of the full board at 10:30 a.m. in the Regents' room.

**'U' TRANSPORTATION EXPERTS
PRODUCE URBAN TRANSIT BOOK**

(FOR IMMEDIATE RELEASE)

What will it take to get you out of your automobile?

It may take a vehicle which travels non-stop and which limits the number of passengers to you and your immediate party.

Such a computer-controlled, electrically operated transportation system is called personal rapid transit (PRT) and it is the subject of a book published by the University of Minnesota department of audio-visual extension.

The book, which includes 26 papers delivered at an international meeting of PRT designers and urban planners last fall, is the first publication ever to deal mostly with the subject of personal rapid transit.

The four editors of the book---J. Edward Anderson, J.L. Dais, W.L. Garrard and A.L. Kornhauser---are all faculty members in the School of Mechanical and Aerospace Engineering at the University of Minnesota.

PRT refers to a transportation system made up of vehicles which are automobile-size and move along fixed guideways which conduct their electrical power. The stations are off the main line so that the flow of traffic is not interrupted by stops, the authors say.

(MORE)

But they don't see PRT as a vision of a distant future. Rather, it is a transportation system which would be feasible at the present time.

Jarold A. Kieffer, assistant administrator of the Agency for International Development, explains the advantages of the automobile which should be incorporated into urban transit systems.

The auto provides origin-to-destination service without transfers, it is available for use at any time, it can go in any direction, it doesn't have to stop to pick up passengers, and it provides privacy and safeguards against the annoyance of other people, Kieffer said.

The auto's disadvantages of air pollution, wasted space, expense, varying driver abilities, and dangers of weather conditions can all be reduced through the adoption of PRT systems, its advocates contend.

The conference on which the paperback book is based won an award from the National University Extension Association for its approach and the relevancy of the topic. A second international conference on PRT is planned for next May.

The 502-page book, entitled "Personal Rapid Transit: A Collection of Papers on a New Type of Urban Transportation," is available at \$8.75 from the Department of Audio-Visual Extension, 2037 University ave. S.E., Minneapolis, Minn. 55455.

GRANT AWARDED FOR
MINORITY GRADUATE STUDY

(FOR IMMEDIATE RELEASE)

Minority librarians who have been unable to pursue advanced degrees due to social and economic circumstances will now be able to do so at the University of Minnesota under a new grant program.

The Committee on Institutional Cooperation, of which the University is a member, has been awarded a grant to fund Phase I of a four-year minority-librarian training program. The program is being planned to provide 18 minority and disadvantaged librarians with three years of advanced study and research at the doctoral level.

Hiram L. Davis, director of the CIC program, will attempt to identify as participants minority and disadvantaged librarians who have been unable to pursue advanced degrees which would prepare them for positions of greater responsibility and leadership.

The training program will take place on the campuses of the six CIC universities with library science doctoral programs: Minnesota, Chicago, Illinois, Michigan, Indiana and Wisconsin.

For further information, contact Davis at the University of Michigan's School of Library Science, Ann Arbor, Mich.

#

SUPPLEMENTARY INFORMATION:

The program was designed and will be administered by the CIC Panel of Graduate Library School Deans chaired by Russell E. Bidlack of the University of Michigan.

The Big Ten universities and the University of Chicago form the membership of the CIC. The committee is composed of high-level university officials who meet to evaluate proposals of inter-university cooperation in the areas of research, instruction and public service.

Davis, who is now completing his own doctoral work at the University of Michigan, holds degrees from Missouri Valley College and Kansas State Teachers College.

CHILD CARE EXPERT
TO SPEAK AT U OF M

(FOR IMMEDIATE RELEASE)

A national authority on health and nutritional problems of the poor will speak at noon Friday (July 14) at the University of Minnesota.

Dr. Effie Ellis, special assistant for health services with the American Medical Association, is the first in a series of Health of the Nation speakers sponsored by Twin Cities members of the Council of Teaching Hospitals.

Dr. Ellis will speak on "Children and the Quality of Life" in Mayo auditorium.

Before joining the AMA two years ago, Dr. Ellis was director of maternal and child health for the Ohio State Department of Health. She has also chaired two recent White House panels at conferences on food and nutrition and children.

#

SUPPLEMENTARY INFORMATION:

Active in many national and regional organizations, Dr. Ellis has also been honored by the American Academy of Achievement, the Women's Auxiliary to the National Medical Association and the American School Health Association. She is a recipient of the NMA's Distinguished Service Award.

Sponsors of the fifth annual Health of the Nation lecture series include University Hospitals, Veterans Administration Hospital, and Hennepin County General Hospital in Minneapolis and Ramsey County General Hospital in St. Paul.

MOST U OF M DENTISTRY
FRESHMAN MINNESOTA RESIDENTS

(FOR IMMEDIATE RELEASE)

More than 90 per cent of this fall's entering class at the University of Minnesota School of Dentistry are state residents.

Sixty-one communities in 35 counties are represented in the class of 130 freshmen. About half are from the seven county metropolitan area.

The number of applicants increased this year from 488 to 631; about half were state residents. Four minority students and three women are included in the freshman class. This fall there will be a total of 10 women and six minority students enrolled in the school.

Class size will be expanded to 150 when the school's new building is completed in September, 1973. The school will open early this year on Sept. 5 inaugurating a new flexible curriculum. According to Erwin M. Schaffer, dean of the school, students will have the option to complete the regular course work in three years and the school will be able to offer better clinical continuity to its patients.

DEATH THREAT DOES NOT STOP SMOKERS

(Part One of a Series)

By Bill Hafling
University of Minnesota Science Writer

In the year 1623, tobacco smoking was banned by the Sultan of Turkey under penalty of death. By 1655, as smoking continued to increase, the sultan abandoned all efforts at enforcing the law. In 1638, Chinese smokers were told they would have their heads cut off---the habit increased anyway.

Times have not changed much. The threat of death to smokers in 1972 is not so direct or immediate. Instead of a ruler threatening decapitation, there are reports from the U.S. surgeon general and the American Cancer Society warning that the death rate for lung cancer is nine times as high among regular smokers of cigarettes as among those who have never smoked. And that the death rate is 20 times as high for those who smoke two or more packs a day. There were more than 64,000 deaths from lung cancer alone in 1971.

Nature's threat---cancer---aided with some publicity, seems a bit more effective as a deterrent to smoking than the harsh laws of the 1600's. U.S. Public Health Service figures show that nearly two-thirds of the adult population do not now smoke. Ten years ago, in contrast, half of all adults were smokers.

Health officials, cancer specialists, students of human behavior, and many smokers themselves are puzzled by the persistence of the habit in the face of knowledge about ill effects.

What is there about human nature---or at least the nature of some humans---that makes a seemingly trivial habit more valued than life itself?

(MORE)

Drug researchers at the University of Minnesota often find it easier to discuss the mechanics of heroin addiction or amphetamine use than to figure out the smoker. This is because the variables involved in smoking include some very subtle yet extremely complex social factors.

WOMEN AND TEENAGERS INCREASE SMOKING

The number of packs of cigarettes sold per adult person in the U.S. now averages around 200 per year. Helping to keep these figures up is the increasing consumption by women and teenagers.

"For every adult male that gives up smoking, there seem to be three teenagers who take it up," says Dr. Faruk Abuzzahab, a psychiatrist and psychopharmacologist at the University of Minnesota Hospitals.

"The anti-smoking campaign by the various health agencies seems to have worked with many adults and even seems to hold children through grammar school," he said, "but for teenagers, smoking seems to be a way of telling the world---especially other teens---'Now I'm really an adult. I'm doing something forbidden to children.'

"Smoking often marks the beginning of the first love affair, the first car, moving into the first apartment away from home, all sorts of things which this culture says are 'adult' things."

ADS AND FRIENDS KEEP SMOKERS GOING

A person's friends and associates---known to social scientists as the "peer group"---are very effective in getting that person to do a lot of things. Along with carefully researched and specially aimed advertising campaigns, friends get smokers started, kept going, and deterred from quitting when they get worried about it.

For teens "advertising plays up the adult events in their life and associates these events with smoking," Dr. Abuzzahab noted. "Cigarette advertisements are also good at appealing to the 'disenfranchised' feelings of teens and women." (A national poll of women was recently conducted for Virginia Slims cigarette company. Interestingly, the poll found that "On the whole, women are pretty satisfied with their lives today; more so than men are with their lives.")

"I think most people have some idea of the harmfulness of smoking," Dr. Abuzzahab said, "but other pressures often win out.

"Rationalization and denial, the mental processes in which a person says, 'Yes, I know these things happen, but they do not happen to me,' is commonplace. It is common for smokers to remark that 'By the time I get it, they'll have a cure for it.' Some of them probably really believe themselves," Dr. Abuzzahab said with a shrug.

A native of Beirut, Lebanon, and now a permanent U.S. resident, Dr. Abuzzahab holds a doctor of medicine (M.D.) degree from the American University of Beirut and a Ph.D. degree (major: pharmacology, minor: psychology) from the University of Minnesota. He is active both as a drug researcher and as a consulting psychiatrist.

MILLER NAMED
DEAN OF CEE

(FOR RELEASE AT 11 A.M. FRIDAY, JULY 14)

Harold A. Miller was named dean of Continuing Education and Extension today by the University of Minnesota Board of Regents, effective July 16.

He has been acting dean since Willard L. Thompson resigned from the post last July.

Miller, an associate professor in speech-communication, joined the University faculty in 1964 as assistant professor in the department of rhetoric and in 1967 was named assistant dean of Summer Session.

"During the reorganization of the General Extension Division, Hal Miller worked closely with agricultural extension and with the Center for Urban and Regional Affairs in defining a structure that would best coordinate the University's total efforts in continuing education," said Vice President William G. Shepherd.

"And he went beyond that into discussions with HECC (the Higher Education Coordinating Commission) on the role of the University in helping define state policy on continuing education.

"His strong leadership during the lengthy reorganization process, his previous experience in the division, and the support given to his candidacy by the staff of Continuing Education and Extension combined to make Hal the ideal choice for dean."

Miller holds a bachelor of arts degree from Northwestern College and a master of arts degree and doctor of philosophy degree from the University.

REGENTS APPROVE
FINAL 'U' BUDGET

(FOR RELEASE FRIDAY, JULY 14 NOON)

An estimated \$282 million University of Minnesota budget for fiscal 1972-73 was approved Friday (July 14) by the University's Board of Regents.

"The budget compares with an estimated \$269.5 million for 1971-72 but the \$12.5 million or 4.6 per cent increase will result in planned cutbacks in selected programs because of inflation and certain commitments to new or expanded programs," said James F. Brinkerhoff, vicepresident for finance, planning and operations.

The total University budget is made up of nine smaller budgets, the largest of which is the \$124 million general operations and maintenance fund which consists largely of legislative appropriations and student tuition.

An increase of \$7 million in this general fund will be financed through increased income of \$2.5 million in tuition, \$3.6 million in state appropriations and about \$1 million in other departmental receipts. Examples of departmental income would be the fee charged by the College of Veterinary Medicine for treating pets, and income from the dental clinic.

"The budget was subjected to a retrenchment and reallocation process this past academic year which resulted in the trimming of about one-half per cent of the state-funded academic budget base as well as reductions in budgets of the self-supporting units," Brinkerhoff said.

Special state appropriations which include line items financed by the Legislature include about \$21.5 million in state funds for such activities as the University Hospitals, library and educational equipment, and the technical colleges at Crookston and Waseca.

(MORE)

The total budget of these special-appropriations activities is \$51.5 million compared with \$48.5 million for 1971-72. The total budget is above the state appropriations because the hospitals charge for their services and Waseca and Crookston student tuition is included in the special appropriation budget.

Research contracts and grants, which come mostly from the federal government are expected to total about \$27 million, about the same as last year.

Some \$36.6 million is expected to be spent for University services and revolving accounts. These accounts, which include such activities as dormitories, athletics, parking, food services, student unions, bookstores, transportation, computers and University Press, will show an increase about \$1 million from last year.

These services are self-supporting. Units, such as dormitories, charge an outside fee or they obtain their finances by charging the budgets of departments which use their services. The psychology department, for example, would be billed for use of University computers. Similarly, ROTC pays from its budget for the use of University airplanes for flight training.

Student aid will amount to about \$7.8 million of the University's budget. This is an increase of \$1.2 million from last year.

Some \$1.8 million of the increase in the general fund will be the result of academic salary increases approved by the 1971 Legislature and \$1.2 million will be civil service salary increases.

"These increases are after the reductions in academic and civil service personnel caused by retrenchment policies which reflected legislative desire to reduce personnel," Brinkerhoff said.

U OF M FORMS HEALTH
EDUCATION FOUNDATION

(FOR RELEASE AT 11 A.M. FRIDAY, JULY 14)

A proposal to create a non-profit corporation for health education purposes was approved today (July 14) by the University of Minnesota's Board of Regents.

Health Education Foundation of Minnesota, a non-profit corporation, was established by the Regents to enable continued negotiations toward a contract with the Health Services Association (formerly the Northern Pacific Beneficial Association) which would offer a family pre-paid health care plan to Burlington-Northern Railroad employees and their families.

About 10 physicians (internists, pediatricians, and obstetricians) working in teams of faculty and clinical associates in advanced training would serve approximately 5,000 HSA members and their dependents starting October 1.

Much of the care would be centered in the 152-bed Samaritan Hospital and Clinic in St. Paul which presently serves the HSA. However, because of a lack of obstetrical facilities, deliveries would be performed at University Hospitals. Pediatric hospitalization would be at St. Paul hospital because of the small number of children expected in the initial population.

Dr. Lyle French, vice president for health sciences affairs, pointed out that the proposed pilot program would not only expand the training opportunities in primary health care within the University's teaching programs, but would also provide an opportunity to research improvements of the delivery system itself.

REGENTS APPROVE U OF M
CIVIL SERVICE COUNCIL

(FOR IMMEDIATE RELEASE)

A revised constitution for a University civil service staff council was approved today by the University of Minnesota Board of Regents.

The adopted council constitution, which aims to provide civil service staff members with a voice on matters of University policy, is the result of nine months' work by a task force appointed by former acting Vice President Eugene Eidenberg and chaired by Carol Flynn, senior executive secretary.

"The civil service procedures we now have do not provide adequate participation and input from the civil service people. We need communication between the administration and this large body of people. The new council may be able to accomplish this," said Regent Fred A. Cina.

According to Regent Elmer L. Andersen, "If this works the way I see it as working, there is a place for both the civil service council and the unions on this campus."

At the June meeting of the Regents' committee on faculty, staff, student and Public relationships, action on the council was postponed until questions regarding its compliance with the 1971 Public Employment Labor Relations Act could be answered.

At that time, objection to the council was expressed by Minnesota Teamsters Union, Local 320, which said in a written statement that "The objectives of the civil service council will be in direct competition with the legitimate labor unions and would only result in the formation of a company union funded or promoted by the University of Minnesota."

Revisions were made in the original constitution by Eidenberg and task force members to bring it into agreement with the state law.

WILLIAMS NAMED
BUSINESS DEAN

(FOR RELEASE AFTER 11:00 A.M., FRIDAY)

C. Arthur Williams Jr., 48, has been named dean of the University of Minnesota College of Business Administration to succeed James Don Edwards, who resigned after serving a year.

Williams has been on the Minnesota faculty since 1952 when he joined the University as an assistant professor in economics and insurance. He has written six books on property and liability insurance including an analysis of no-fault car insurance.

"Dean Williams has an outstanding record and nationwide recognition as a scholar, is highly regarded by members of the faculty, and has a solid and growing base of respect in the business and financial community," according to Walter W. Heller, Regents' Professor of Economics and chairman of the search committee to find a new dean.

Heller said his committee considered 166 applicants for the position. "We're thoroughly convinced that he's by all odds the most outstanding candidate we saw," Heller said.

Williams, who was associate dean of the college in 1971-72, served as acting dean during 1970-71 following the resignation of Paul Grambsch, who returned to teaching. Edwards was named dean in July of 1970 and resigned following a budget dispute with central administration.

Williams has been an advisor to numbers of governmental agencies on insurance policies.

"Professor Williams' involvement in general University community affairs and the frequency with which he has been called upon to service various governmental agencies is illustrated by his holding of important offices both within and outside the University," according to William G. Shepherd, vice president for academic administration.

"As acting dean, he has provided effective and distinguished leadership for the college. He is widely respected within the University and his advice has been sought, especially with respect to the University's insurance and retirement program," Shepherd said.

Williams, his wife, Roberta, and their two sons reside in Roseville.

WALLACE RUSSELL RESIGNS;
TO BECOME IOWA STATE DEAN

(FOR IMMEDIATE RELEASE)

Wallace A. Russell, associate dean of the University of Minnesota College of Liberal Arts, has resigned to accept the position of dean of the College of Sciences and Humanities at Iowa State University in Ames, Iowa.

His appointment to the Iowa post, effective Jan. 1, 1973, was approved today (Friday, July 14) by the Iowa State Board of Regents at their meeting at the University of Northern Iowa.

Russell joined the Minnesota faculty in 1949 as a assistant professor of psychology. In 1959 he was promoted to the rank of professor and in 1971 was named associate dean, after serving as acting associate dean for one academic year.

"Dean Russell has been enormously effective at the University of Minnesota, especially in the development of plans for the new School of Cross-Disciplinary Studies and related innovative programs. His work as a senior administrator of the college has made significant contributions to its progress and he will be sorely missed," said E.W. Ziebarth, dean of the College of Liberal Arts.

In addition to serving as dean at Iowa State, Russell will also be director of the Sciences and Humanities Research Institute and professor of psychology. He has a bachelor of science degree and a master of arts degree from the University of New Hampshire and a doctor of philosophy degree from the University of Iowa.

REGENTS APPROVE PRINCIPLE
OF STUDENTS ON COMMITTEES

(FOR IMMEDIATE RELEASE)

The University of Minnesota Board of Regents today approved in principle a plan which would seat students as non-voting members of board committees for another year.

The matter will come before the board for final action at a special meeting Aug. 9.

President Malcolm Moos wrote the plan which received preliminary approval to seat students on the Regents' five committees during the 1972-73 school year. The board will assess the plan at the end of the trial period.

At the faculty, staff, student and public relationships committee meeting the Regents altered the Moos plan at the suggestion of student committee member Mary Ebert.

The body that will designate the students for the committees will be the student members of the Senate Consultative Committee, instead of the University Senate as the original plan recommended.

The Board also approved in principle Regent Yngve's proposal that the original plan for 11 student members be reduced to 10.

Last month, Moos proposed that students no longer sit on committees and that a system of quarterly meetings between the Regents, civil service and existing faculty-student committees replace student participation on the board.

Moos said he made that proposal out of a concern that the practice of students on committees was circumventing existing University governing bodies, especially the University Senate. He also stated that if students sit on the board perhaps the other constituencies of the University---faculty and civil service---should also be represented.

(MORE)

His new proposal dealt with the first concern by having the University Senate select students for the five Regents' committees. (Students will not sit on the executive committee.)

Under Moos' plan the students would provide input both for the Regents and for the Senate.

Presented with Moos' plan to discard student participation last month, the Regents asked him to come up with a plan which dealt with his concern about strengthening the Senate but also provided for direct student input.

The Regents also adopted a policy on business enterprise which will apply to all business activities and services conducted within the University.

The Regents asked the administration to formulate such a policy after it authorized students to run their own bookstore last year.

The policy states that the University will continue to provide all necessary services unless students show they have a need which is not being met and that students are the most able to meet that need.

Jack Baker, president of the Minnesota Student Association on the Twin Cities, campus, said he helped draft the policy and he supports it.

"It addresses itself to the issue of student ventures on campus, which has been my concern," he said. He added, however, that the policy addresses itself only to student ventures and says nothing about commercial ventures the University might enter into.

REGENTS APPOINT NEW
HEALTH SERVICE HEAD

(FOR IMMEDIATE RELEASE)

Paul Rupprecht, associate director of the University Health Service, was named director by the Board of Regents today.

Rupprecht, 48, succeeds Dr. Donald W. Cowan, who will act as consultant to the Health Service director. Cowan will continue as professor in the School of Public Health.

Rupprecht began his career at the Health Service in 1953 as a statistician, was named assistant director in 1966 and associate director in 1971.

Now a U.S. citizen, Rupprecht was born in Hungary and attended the University of Budapest's School of Public Administration. He earned his bachelor's degree from North Dakota State College and earned his master's and doctorate degrees in sociology from the University.

Rupprecht lives at 3304 Edgemere ave. NE., Minneapolis.

MEDICAL REPORTER
IS U OF M SPEAKER

(FOR IMMEDIATE RELEASE)

The medical and science reporter from the Washington, D.C., Post will speak at noon Friday (July 21) at the University of Minnesota.

Stuart Auerbach will speak on "Is The Media Fair With Medicine and Vice Versa?" At the second Health of the Nation lecture in Mayo auditorium.

Auerbach, who has reported medicine and science for four years, has spent the last two years covering the politics of medicine---the series of hearings on national health insurance and the debate over the best way to fight cancer.

Besides the Post, Auerbach has worked on newspapers in Miami, Fla., and Pittsfield, Mass.

Health of the Nation lectures are sponsored by University Hospitals and its medical staff on behalf of local members of the Council of Teaching Hospitals: Hennepin County General and Veterans Administration Hospitals in Minneapolis and Ramsey County General Hospital in St. Paul.

'U' SEMINARS TO EXPLORE
WOMEN'S ROLES AND CHILDREN

(FOR IMMEDIATE RELEASE)

Discussion groups focusing on women's roles around the world and ways to raise children are being formed at the University of Minnesota.

The no-credit classes are free and open to the public, and day-care will be provided for children. Persons who wish credit for the courses may register through independent study and pay regular tuition charges.

"The International Role of Women," a five-week seminar beginning Tuesday, July 25, will examine the social and historical role of women in different countries, the options available to them, class distinctions which affect them and movements toward change. The discussions will be organized around the experiences of women from other nations who will attend the sessions. Class will meet from 1:30 to 3:30 p.m.

A seminar on "Raising Healthy Children" is geared especially to parents and will look at the emotional, physical and social needs of children and parents. Topics will include nutrition, health care, children's rights, socialization, sex education and raising children outside sexual stereotypes.

The five-week seminar on children is divided into two sections, one meeting for the first time on Wednesday, July 26, from 7:30 to 9:30 p.m., and the other Thursday, July 27, from 1:30 to 3:30 p.m. Participants may choose the section which is most convenient.

The courses, sponsored jointly by the Minnesota Women's Center and the Living-Learning Center, will meet at the Living-Learning Center, 1425 University ave. SE.

Applicants for either course should call Nancy Gilsenan at 373-3850, or Becky Kroll at 373-9906. The courses are open to both men and women and each session is designed for 25 to 30 participants. Day-care will be provided by the Neighborhood Youth Corps under the supervision of an adult.

BIOLOGICAL SCIENTISTS TO
HOLD 25TH ANNIVERSARY
MEETING IN TWIN CITIES

(FOR IMMEDIATE RELEASE)

Nuisance algae, ecological ethics, poisonous plants, urban ecosystems, and uniting nations for biosurvival are just a few of the topics to be discussed at the 25th (Silver Anniversary) annual meeting of the American Institute of Biological Sciences.

Primary headquarters of the meeting, expected to attract from 3,500 to 5,000 scientists from all parts of the world, will be Coffman Memorial Union on the Minneapolis campus of the University of Minnesota.

Meetings, some with long-range implications for the survival of the species, begin on Monday, Aug. 28. Final registration for the conference will be on Aug. 26, with the meeting concluding on Saturday, Sept. 1.

Members of the various societies attending the meeting will take field trips throughout the state prior to the conference. Trips to the Cedar Creek Natural History Area, for example, will be sponsored by the American Society of Limnology and Oceanography, the Ecological Society of America, and the Minnesota Academy of Science.

Another group will visit the campus and Lakeside Laboratory of the University of Minnesota, Duluth, the Federal Water Quality Laboratory of the U.S. Department of Interior and the Lake Shagawa Project of the Environmental Protection Agency in Ely, Minn. The return trip will include a visit to Reserve Mining Company in Silver Bay to view taconite operations.

U OF M SEMINAR FOR WOMEN
EXPLORES EDUCATIONAL CRISES

(FOR IMMEDIATE RELEASE)

Educational crises in primary and secondary schools, experiments in reforms, and alternatives to current educational practices will be discussed in the seminar "A Look at American Education" to be offered at the University of Minnesota from Aug. 2 to 23.

The seminar, sponsored by Women's Programs of Continuing Education and Extension, is intended to appeal to the interests of teachers, parents and students.

A variety of information on plans, criticisms and assessments of problems facing modern education will be covered.

Ronald Dorr, teaching associate in the department of rhetoric, will lead the seminar which will meet from 9:30 a.m. until 12 noon in 324 Coffman Union.

Registration is by mail through Women's Programs, 200 Wesbrook hall, University of Minnesota, Minneapolis, Minn. 55455. For further information, call (612) 373-9743.

U WOMEN'S PROGRAMS TO
OFFER SIX SEMINARS

(FOR IMMEDIATE RELEASE)

The role of women in American history, women in literature and art and female sexuality will be among the subjects covered in "Woman in America," one of six women's seminars to be offered at the University of Minnesota this fall.

Women's Programs, through Continuing Education and Extension, is offering six liberal arts seminars covering a wide range of topics. All seminars begin Sept. 25 and may be taken for credit.

A broad introduction to the study of historical change in Western culture, "An Analysis of Cultural Change" will be taught by lecturers from the departments of anthropology, Afro-American studies, sociology, English and foreign languages.

Students in "Art of Reading" will study poetry, prose and drama by such authors as Virginia Woolf, Jane Austen, Henry James, William Faulkner, T.S. Eliot and Henrik Ibsen.

A humanities seminar, "New Worlds of Knowledge," will cover recent developments in the behavioral and biological sciences, music, art and literature with emphasis on common problems and unifying concepts.

"Ideas in America," an American studies course, will examine in historical context the basic American concepts which condition political thought.

The nature of legal processes, the court system, law and the family, political freedom and privacy, regulation of mass media, social change and the law will be explored in "Law and Society," a social science seminar which will draw its faculty from the department of political science and the Law School.

All seminars will meet from 9:30 a.m. until 12 noon alternate weeks until June. "Women in America" also will be held in the evenings.

Enrollment is limited and registration is possible only after application has been made and accepted. For further information and applications, call or write Women's Programs, Continuing Education and Extension, 200 Westbrook hall, University of Minnesota, Minneapolis, Minn. 55455, (612) 373-9743.

DANGEROUS JOB AVAILABLE
FOR SKELETON AT U OF M

(FOR IMMEDIATE RELEASE)

Got any skeletons in your closet that you want to get rid of?

The popular Touch and See Room at the Bell Museum of Natural History on the University of Minnesota's Minneapolis campus needs them.

The museum's public education coordinator, Richard Barthelemy, needs a complete human skeleton---to keep. "Actually, we could use a couple skeletons and they will almost certainly be damaged," he said.

"It may be called the Touch and See Room, but the thousands of kids that come through here every year do more than touch.

"Our poor old human skeleton has lost his femur and ulna (leg and arm bones) not through malicious vandalism---just the intense curiosity of kids. They want to feel just what people are like 'with their skin off,'" Barthelemy said. "And broken bones are often the result."

A complete human skeleton will be featured at the University's exhibit at the Minnesota State Fair this year in an enlarged display in the Education building. The museum's entire Touch and See Room will be moved to the exhibit for the 11-day fair which begins Aug. 25.

Barthelemy and his skeleton hunters could borrow any of the numerous skeletons on the U campus itself, "except they're sure to get busted," he said.

So if you've got a skeleton to spare, you can write Richard Barthelemy, Bell Museum of Natural History, University of Minnesota, Minneapolis, 55455, or call, collect, (612) 373-3193 or 373-2423.

HOMOSEXUAL COURT CASES
COST U OF M \$25,000

(FOR IMMEDIATE RELEASE)

The University of Minnesota spent approximately \$25,000 to defend its decision not to hire an avowed homosexual seeking a job in the school's library system.

The amount represents fees of a private law firm and estimated University administrative and staff costs.

The expense was incurred while the University defended its refusal to hire James McConnell through the courts, according to Rodney Briggs, executive assistant to President Malcolm Moos.

Jack Baker, student-body president and an advocate of equal rights for homosexuals, has been pressuring the University to publish the amount it spent in the McConnell case.

"I want to point out to the taxpayers and the Legislature what the University is doing with its money," Baker said. "They should know how much the University has spent to uphold its right to discriminate."

McConnell was offered the job as head of the St. Paul campus library cataloguing division in April, 1970, by Ralph Hopp, University librarian.

In July, 1970, the Board of Regents refused McConnell the job. The board stated that McConnell's personal conduct "as represented in the public and University news media is not consistent with the best interests of the University."

(MORE)

Two months before the Regents' refusal, McConnell and Jack Baker sought to obtain a marriage license in Minneapolis, an event which was well-covered in the news media.

(The pair subsequently obtained a license in Mankato and consider themselves married, although their same-sex marriage has not been upheld by the courts.)

McConnell brought suit and in September U.S. District Court Judge Philip Neville ruled that the University couldn't refuse to hire a person "merely because he is an homosexual."

Neville said that the University had failed to show any relationship between McConnell's homosexuality and the qualifications for the job.

The University then appealed to the Eighth Circuit Court of Appeals which handed down a decision in the University's favor a year later.

The circuit court ruled that McConnell was demanding the right to "pursue an activist role in implementing his unconventional ideas" and to "foist tacit approval of this socially repugnant concept upon his employer."

The court said it knew of no law which requires an employer to accede to "such extravagant demands."

When the U.S. Supreme Court declined to hear the case the University's decision was sustained.

The job which McConnell sought has never been filled. Kept open during the appeal process, the position was eliminated during the University's recent retrenchment and reallocation effort.

McConnell, said Baker, is working as a bartender "while he looks for a job with a less discriminatory employer."

'U' POLICE LITTLE LEAGUERS
TO PLAY IN MEXICO CITY TOURNEY

(FOR IMMEDIATE RELEASE)

A Little League baseball team sponsored by the University of Minnesota police department and the Southeast All Sports will leave Minneapolis Friday, Aug. 4, to participate in the third annual Goodwill Baseball Association Tournament to be held in Mexico City.

Twenty-four boys from southeast Minneapolis, along with their coaches, will spend 14 days in Mexico playing and touring the country. The tournament also will include teams from California, Mexico and South America.

The team is carrying with it a Minnesota flag which will fly over each game in which the Minnesota team participates and which will be presented to the President of Mexico at the close of the tournament.

On Monday, Aug. 14, the team will travel to Acapulco to participate in two exhibition games.

The tournament is sponsored by the Goodwill Baseball Association which was formed in 1970 as a fund-raising organization for the family of James T. Sackett, St. Paul police officer who was killed by a sniper's bullet on an emergency call.

The association plans to hold an international Little League tournament in a different city each year with the proceeds going to a local charity of the host city's choice.

#

SUPPLEMENTARY INFORMATION:

The Southeast All Sports is a non-profit parents' organization which provides athletic opportunities and facilities for community children.

MENTAL HEALTH CENTER
DIRECTOR TO SPEAK AT U

(FOR IMMEDIATE RELEASE)

"A New Approach to Community Mental Health" is the topic of the third in a series of noon lectures to be held this Friday (July 28) at the University of Minnesota Mayo auditorium.

Dr. Donald Newman, the speaker, is a psychiatrist, and the director of the Community Mental Health Center of Peninsula Hospital and Medical Center in Burlingame, Calif.

A former research consultant to President Nixon's Commission on Violence, Dr. Newman also spent four years in Japan as a psychiatrist for the U.S. Air Force, visiting lecturer at the Keio University Medical School, and guest lecturer at the U.N. Far East Institute for the Prevention of Crime and Treatment of Offenders.

Health of the Nation lectures are sponsored by University Hospitals and its medical staff on behalf of local members of the Council of Teaching Hospitals: Hennepin County General and Veterans Administration Hospitals in Minneapolis and Ramsey County General Hospital in St. Paul.

DEAN OF VETERINARY MEDICINE
ANNOUNCED AT U OF M

(FOR IMMEDIATE RELEASE)

A new dean for the College of Veterinary Medicine at the University of Minnesota was announced today (July 27) by President Malcolm Moos.

He is Dr. Sidney A. Ewing, professor and head of veterinary parasitology and public health at Oklahoma State University, Stillwater, Okla.

Ewing's appointment is effective Jan. 1, 1973, but he will be spending short periods of time in Minnesota beginning late next month, according to William Shepherd, vice president for academic administration.

While the appointment will be taken to the University's Board of Regents at its special meeting Aug. 9 for final action, Regents' Chairman Elmer Andersen did mention an imminent decision on the post at the July 14 meeting when the board approved the offer to Ewing.

Vice President Shepherd said Dr. Ewing has long experience in veterinary medicine colleges at state universities, "he is the author of a large number of publications in the field, and he is an excellent teacher, having been voted Outstanding Teacher for 1970 at Oklahoma State.

(MORE)

Dr. Wesley Spink, Regents' Professor of Medicine and Comparative Medicine and chairman of the search committee, said his committee looked "for the best all-around individual: a good administrator who recognizes the problems of contemporary veterinary medicine and understands new methods of teaching as well."

Dr. Ewing, 37, holds degrees from the University of Georgia (B.S.A. and D.V.M., 1958), the University of Wisconsin (M.S., 1960) and Oklahoma State University (Ph.D., 1964). His salary will be \$35,000.

#

SUPPLEMENTARY INFORMATION:

Dr. Ewing's career includes teaching and research positions at the University of Wisconsin (1958-60), University of Michigan Biological Station (summer 1961), Kansas State University (1965-67), Mississippi State University (1967-68) and Oklahoma State (1961-65 and 1968-present).

Dr. Ewing will succeed Dr. W. T. S. Thorp who will continue on the faculty. Thorp resigned as dean as of last Dec. 31. Dr. Dale K. Sorensen, head of the department of veterinary medicine, has served as acting dean in the interim.

'U' SHOWBOAT WILL NOT MOVE

(FOR IMMEDIATE RELEASE)

Swift current in the Mississippi River will prevent the University of Minnesota's Centennial Showboat from ~~making~~ its scheduled trips to Harriet Island in St. Paul and to Fort Snelling this year.

Performances of the musical "Show Boat" were planned for St. Paul Monday (July 31) through Aug. 5 and at Fort Snelling Aug. 7-12. More than 3,700 people hold reservations for the sold-out performances. Their tickets will be honored at the Minneapolis campus landing below the Washington Avenue bridge where the performances will go on as scheduled.

River current, normally 5,000 cubic feet per second, is now at 40,000 cubic feet per second and the move would endanger the 73-year-old boat, said Dick Lambert, vice president and general manager of Twin City Barge and Towing Company, which was scheduled to move the boat. The company normally ceases all operations on the river when the current reaches 30,000 cubic feet per second.

The Showboat, which was in service as the steam-powered sternwheeler General John Newton for 58 years before it was purchased by the University and the Minnesota Centennial Commission in 1958, no longer operates under its own power because of U.S. Coast Guard regulations governing the operation of steam-powered vessels. A tug boat has been used to tow it up and down the river in the 14 years it has functioned as a theater.

ART WORKSHOPS TO OPEN MONDAY
AT SUMMER ARTS STUDY CENTER

(FOR IMMEDIATE RELEASE)

Workshops in landscape painting and the study of modern art will open Monday (July 31) at the University of Minnesota Summer Arts Study Center at Sugar Hills resort near Grand Rapids, Minn.

Workshops in the arts, open to the public, are scheduled at the center through Aug. 18.

Contemporary Art Aesthetics, a slide-lecture-discussion workshop, will be conducted by Raymond Hendler, associate professor of studio arts at the University's Twin Cities campus. Students will explore major works by the masters of modern art including Picasso, DeKooning, Pollock, Rothko, Hoffman and others.

During the same week, a workshop in Landscape Painting, Design and Drawing will be taught by Herman Somberg, assistant professor of studio arts on the Twin Cities campus. Landscape painting will be approached as a problem in creating the illusion of depth through overlapping, placement, scale and textural changes. Lectures and discussions on the history of landscape painting will be part of the workshop.

Both courses may be taken concurrently. Summer Arts Study Center courses may be taken for undergraduate or graduate credit from the University.

Family accommodations and camping facilities are available at the resort. Recreational facilities for swimming, golf and horseback riding are provided. Individual lessons in arts and crafts and recreational programs are planned for grade-school-age children, and babysitting can be arranged.

Workshops in sculpture and carving and in drawing and painting will be conducted Aug. 7-18.

Registration information is available from the Summer Arts Study Center, 320 Westbrook hall, University of Minnesota, Minneapolis, Minn. 55455, or phone (612) 373-4947.

MOOS SAYS 'U', NOT COLLEGES,
SHOULD HAVE ROCHESTER BRANCH

(FOR IMMEDIATE RELEASE)

University of Minnesota President Malcolm Moos says the University is better equipped than the State College System to provide business, engineering and health sciences education in Rochester.

Moos made his comments in a news conference called Friday to respond to a report made by a group of consultants to the Higher Education Coordinating Commission.

The report, which recommended moving the upper division and graduate portions of Winona State College to Rochester, thus leaving a junior college in Winona, opposed the establishment of the proposed University branch in Rochester.

The report said the State College System would be likely to give the Rochester institution more autonomy and that the "placing of another institution under the University of Minnesota would increase the University's dominance in higher education in the state."

Moos responded that the University's leadership is a matter of record. "In a period of limited resources, it would appear to me the greater wisdom to turn to that institution which has a national and international record of leadership and seek its assistance," he said.

Moos disagreed with the report's contention that coordinate campuses are not given budgetary autonomy.

"This flies in the face of the facts at campuses all across the country," he said. "This is a gratuitous slap at the faculties of our four coordinate campuses and to the faculties on the Twin Cities campus as well. The facts here simply have been ignored."

(MORE)

Moos said the plan, which he called a 'madcap proposal' and "short-sighted and unworkable," was written without the consultation of educators in the state and without consideration of existing facilities.

Moos said the panel "chose to ignore the proposal I made for a cooperative venture when I spoke to the Rochester Junior College Seminar last year; it also chose to ignore (State College System) Chancellor (G. Theodore) Mitau's suggested consortium model."

The Moos plan calls for the University to provide upper division and graduate education in Rochester while the Rochester Junior College would continue to provide freshman and sophomore education. He said the Rochester school is the "most distinguished and oldest junior college in the state."

"The panel chose to ignore the historical ties of the University to the Mayo Graduate School of Medicine or the establishment of a flourishing University center for continuing education and extension," Moos said.

"The panel recognized the unique health and business interests in Rochester requiring specialized educational programs," he said. "It then proceeded to ignore the one system, the University, which has expertise in such unique programs.

"It suggests moving the upper division of a state college without the University's distinguished capability in business administration and health sciences--- the kinds of programs so urgently needed in Rochester---to a community requiring highly sophisticated programs, he said.

Moos said local support for the University has been expressed through private contributions for the expansion of the University's extension course offerings in the area.

"It's my own belief that there will be a University branch in the Rochester area at some time," Moos said. "I think the question is not whether there will be a branch of the University of Minnesota at Rochester, but when."

WOMEN IN MEDICINE
IS 'U' SPEECH TOPIC

(FOR IMMEDIATE RELEASE)

"Today's Woman in Medicine" is the topic of this Friday's (Aug. 4) Health of the Nation lecture at the University of Minnesota Health Sciences Center.

Dr. Carolyn Crawford, pediatric resident at St. Christopher's Hospital for Children in Philadelphia, will speak at noon in Mayo auditorium.

Dr. Crawford is the senior associate editor of "The New Physician." She graduated from Jefferson Medical College, Philadelphia, in 1971.

Health of the Nation lectures are sponsored by University Hospitals and its medical staff on behalf of local members of the Council of Teaching Hospitals: Hennepin County General and Veterans Administration hospitals in Minneapolis and Ramsey County General hospital in St. Paul.

'TOBACCO ROAD' TO BE PRESENTED
IN NATURALISTIC, '30s STYLE

(FOR IMMEDIATE RELEASE)

The shores of White Bear Lake have served as a rehearsal set in the last few weeks for a group of University of Minnesota theater students who are preparing their production of the earthy drama "Tobacco Road."

"We are doing the play in a naturalistic, '30s style and we wanted to get the feel of real earth and real water," said director Lou Dezseran.

Dezseran, assistant professor who is directing his first play at the University, has now brought the group to the Scott hall stage for the final rehearsals before the Thursday, Aug. 10, opening.

The play will be presented in air-conditioned Scott hall at 8 each evening Aug. 10 to 12 and Aug. 17 to 19.

Dezseran, who came to the Twin Cities a year ago, has acted in local productions at the Chimera and Cricket theaters and Theatre-in-the-Round.

Originally from South Carolina (80 miles from the Tobacco Road of the play), he has been a designer, director and actor at the Bucks County Playhouse in Pennsylvania and an actor and director at the American Conservatory Theatre in San Francisco.

He has a bachelor's degree from Carnegie-Mellon university, a master's degree from Purdue and a doctor of philosophy degree from Wayne State.

#

SUPPLEMENTARY INFORMATION:

The play "Tobacco Road" was written by Jack Kirkland from the novel by Erskine Caldwell. It was first presented in New York City in 1933, became a record-setting production for number of performances, and later was made into a motion picture.

The cast for the University Theatre production includes:

Lenore Adrian, junior from White Bear Lake, as "Pearl;" Susan Jane Alexander, senior from Cold Spring, Minn., "Ellie May;" Barbara Byrne, a senior from St. Paul, "Grandma Lester;" David H. Goldstein, sophomore from St. Louis Park, "Captain Tim;" Larry Greenstein, senior from north Minneapolis, "Dude;" Richard Kline, junior from St. Paul, "Lov;" Richard Linn, junior from Ft. Dodge, Iowa, "Jeeter;" Judith E. Poplinski, senior from Minneapolis, "Sister Bessie;" Richard Scott, graduate student from St. Paul, "George Payne;" Sherry Ann Wilson, graduate student from Savannah, Mo., "Ada;" and Peter Wykes, junior from St. Paul, "Henry Peabody."

Tickets priced at \$2.50 for adults and \$1.75 for students, are on sale at Dayton's and at the Scott hall ticket office. Phone 373-2337 for reservations.

DIABETICS SOUGHT
BY 'U' FOR EYE
TREATMENT STUDY

(FOR RELEASE TUESDAY, AUGUST 1)

Diabetics whose eyesight is threatened are being sought by the University of Minnesota to evaluate new methods of treating one of the leading causes of blindness in the country.

Diabetic retinopathy---a progressive disorder of blood vessels in the eye's retina---is the subject of a 10-year 5-to-7-million-dollar research effort of the National Eye Institute, a component of the National Institutes of Health.

The University's ophthalmology department is one of eight clinical centers trying to determine whether therapy known as photocoagulation helps preserve vision in patients with diabetic retinopathy.

In this therapy an intense beam of light is directed into the eye and focused on a tiny spot in the retina. Light is absorbed by the retina and converted to heat, causing a minute burn.

In some cases the light applications are made directly over the patches of new abnormal blood vessels in an attempt to coagulate and close them. In other instances the applications are scattered in a checkerboard pattern over large areas of the retina in the hope there will be an indirect benefit to untreated areas of the retina.

The mechanism underlying diabetic retinopathy is unknown, according to Dr. John Harris, University ophthalmology department chairman. The condition seems to involve progressive alteration of the retinal vessels.

(MORE)

"Repeated attempts to produce diabetic retinopathy in animal models have not been successful, thus making study of the therapy in humans necessary," he said,

The immediate causes of blindness are bleeding into the vitreous fluid, scar tissue formation, and detachment of the retina. All of these conditions are usually preceded by growth of new blood vessels along the internal surface of the retina.

"It's from these vessels that hemorrhages into the vitreous fluid occur and it is at these sites that scar tissue forms. Subsequent shrinking of the scar tissue and of the vitreous, to which the new vessels adhere, is the immediate cause of retinal detachment," Dr. Harris explained.

Although photocoagulation has been used at the University for several years, Dr. Harris stated that its true value has not been clearly documented.

"Furthermore," he added, "the various techniques of photocoagulation have not been tested against each other."

Patients in the study will be randomly divided into three groups. One group will be treated with white light from the xenon-arc photocoagulator, a second group with the blue-green beam from the argon laser, and the third group with a combination of these two methods.

Initially only one eye of each patient will be treated; the other will be followed as a control. According to Dr. Harris, only if photocoagulation proves beneficial will treatment of the second eye be considered.

The nationwide cooperative study will eventually involve some 1,800 patients in 16 clinical centers during the next 10 years. The University is in its second year of a three-year \$111,000 grant from the National Eye Institute.

The University has already enrolled 31 patients to start treatment but two withdrew voluntarily and 13 were released from the study because of ocular complications they developed prior to treatment. After treatment is completed patients are expected to return at least three times a year over five years for check-ups.

"I want to emphasize photocoagulation is not a cure-all," Dr. Harris concluded, "but we do know it has some benefit. The study should determine what the ultimate benefits are and also determine which eyes are best left untreated."
