## MEMO TO NEWS PEOPLE

An update on plans for implementing "Commitment to Focus" is scheduled at a Friday (July 10) meeting of the University of Minnesota Board of Regents.

A timetable for discussing proposals and planning, collectively called Strategy for Focus, will be presented. The next step is forwarding controversial recommendations on restructuring programs to the university's colleges and other units for study. A campus response is expected in September and October.

Regents will also hear a semiannual progress report on General College during a Thursday (July 9) committee meeting. Acting General College Dean Keith McFarland will talk about making the college the port of entry for underprepared students in a proposed academy of arts and sciences. Discussions with the task force that developed the restructuring proposals brought up questions about General College's role on the Twin Cities campus and in relation to community colleges, about its proposed research mission and about ways to integrate tenured faculty members into other units, McFarland wrote in a memo to faculty members.

Another part of "Commitment to Focus" -- proposed enrollment targets -- will be discussed Friday. The Legislature made release of 1987-89 appropriation funds contingent on regents' acceptance of enrollment targets. For the academic year starting this fall, the Legislature set enrollment at the equivalent of 37,312 full-year students.

Regents will also adopt budget and tuition plans for 1988 during Friday meetings.

(OVER)

REGENTS' MEMO

Here is a sample of agenda items.

Thursday, July 9

--Educational planning and policy committee, 1:30 p.m., 238 Morrill Hall. Vote on amendment to the human research subjects policy; General College review.

--Physical planning and operations committee, 1:30 p.m., 300 Morrill Hall.

The following committees meet after the 1:30 meetings adjourn.

--Faculty, staff and student affairs committee, 238 Morrill. Vote on civil service class changes; report from university police department.

--Finance and legislative committee, 300 Morrill. 1988 hospital budget.

Friday, July 10

--Committee of the whole, 8:30 a.m., 238 Morrill. Votes on 1988 budget and tuition plans; "Commitment to Focus" enrollment targets; Strategy for Focus update.

--Regular monthly meeting starts after committee of whole adjourns. Final action on committee votes.

ALLEN ELECTED FELLOW OF FOOD  
TECHNOLOGY INSTITUTE

(FOR IMMEDIATE RELEASE)

C. Eugene Allen, dean of the University of Minnesota College of Agriculture and associate director of the university's Experiment Station, was named a fellow of the Institute of Food Technologists (IFT) at the organization's annual meeting in Las Vegas, Nev., in June.

IFT, a professional society of 23,000 food scientists and technologists, confers fellowship in recognition of "outstanding and extraordinary accomplishments in food science and technology." To qualify, candidates must have served in responsible positions for 10 years, been professional IFT members for 10 years and achieved outstanding accomplishments for five years.

Allen was named for "his outstanding teaching and research contributions to the field of muscle foods and meat science, and the leadership he has demonstrated in advancing this area of food technology," IFT sources said. His citation also noted Allen's considerable research on the cellular growth and metabolism of muscle and adipose tissue in livestock. He has received numerous other awards for his teaching and research.

He was one of 12 fellows named this year.

## U OF M REGENTS OPPOSE SCHOOL CLOSINGS

(FOR IMMEDIATE RELEASE)

The University of Minnesota Board of Regents voiced its opposition to proposals to close the dentistry school and veterinary medicine college Friday (July 10).

The school closing proposals, part of a task force report on ways to implement "Commitment to Focus" plans to upgrade the university, were opposed by the 12-member board, which unanimously approved a resolution "to convey our strong disposition" against such actions.

The task force suggested closing the dentistry school, the veterinary medicine college, the vocational and technical education department, KUOM radio, the University Art Museum, the mortuary science program and several other units and using the money saved to shore up programs for undergraduates. The board also voiced opposition to closing the vocational and technical education unit.

The task force, made up of faculty members and several students, said "the arts and science core of the university has declined over the past 25 years. By trying to take on too many missions, the university has left itself with insufficient funds to attend to the central academic disciplines." The task force's proposals will be evaluated by another committee before any recommendations are presented to the board for action.

Regents said they are hearing many complaints from people outside the metropolitan area concerned about the school closing proposals. People are feeling "a deep sense of hurt, a tremendous feeling of abandonment . . . and a deep sense of betrayal," said Regent Stanley Sahlstrom of Crookston.

If the schools were closed, the university probably wouldn't save any money

(MORE)

because student dollars and state appropriations would move to other schools students would start attending, Sahlstrom said.

Administrators and faculty members in the affected schools are also worried that the recommendations will become a "self-fulfilling prophecy" negatively affecting student and teacher recruiting, said Regent M. Elizabeth Craig of Minnetonka.

Opposition to the closing recommendations was made official to ease those fears, board members said.

But Regent Wally Hilke of St. Paul told board members the task force's central message -- it is time for hard decisions on university programs -- shouldn't be overlooked. The university and the board have gotten by with making easy decisions for decades, which isn't possible anymore given the amount of money the university has to work with, he said.

Many programs have been added at the expense of those for undergraduate students, Hilke said.

Judy Grew, student board representative, agreed, saying she hears complaints from students who can't get into classes, who can't find places to study, who question the quality of courses taught by graduate students and who are frustrated by confusion and red tape.

"No one said it would be easy, but we do have to make those choices," Grew said.

President Kenneth H. Keller said he was skeptical about the need to close entire units, telling regents he thinks small changes will be more appropriate. Administrators see the report as "a tremendous source of energy" spurring them to think about important issues, and any ideas that come out of it shouldn't make people angry, he said.

Another group of university staff members and administrators is studying the task force's recommendations and will forward its opinions to Keller so top administrators can develop a set of recommendations.

(MORE)

"It's a mistake to think this (task force report) is an administrative report cast in concrete," Roger Benjamin, vice president for academic affairs and Twin Cities campus provost, told the board.

Improving programs in the future may be helped by enrollment targets, adopted by the board Friday, Keller also said. The Legislature made release of the university's state funding contingent on the board's adoption of enrollment targets for 1987 through 1993. That action was in response to Keller's argument that the university doesn't have enough money for all the students it is taking in and that funding should be held constant while enrollments are allowed to drop.

Several regents said they worried about reducing access to the university, a concern that has been raised since Keller proposed "Commitment to Focus" in 1985.

But it doesn't make sense to enroll students and not have classes for them, Keller said. "We do not have adequate funding for the students we've got. Access, if it's a fraud or fake, is not access. It's cosmetically a way to make it look like we're serving people we're not serving."

If students and parents complain they can't get into the university, it's the Legislature's responsibility to provide more money so the university can preserve its history of access, said Regent Wendell Anderson of Minneapolis.

The question of access was also raised during a discussion of record student applications to General College. College administrators said they have received 2,100 applications for 1,000 spots in the school. About 670 students who applied before June 16 have been admitted, but for the first time administrators and faculty members will have to come up with criteria for deciding which of the other applicants get priority for admission.

Marjorie Cowmeadow, assistant dean for student services, said students are applying to more than one institution so many of the 2,100 applicants may go other places. An earlier application deadline in the College of Liberal Arts also affected General College, with more students deciding they had to apply earlier, she said.

Regents also adopted a tuition schedule for the coming academic year in which the minimum increase will be 3 percent and the maximum 8 percent.

## MEMO TO NEWS PEOPLE

The professional outlook for average baby boomers is not as optimistic as it was for their parents because of the overcrowding that has followed them from grade school through their climb up the corporate ladder.

University of Minnesota industrial relations associate professor Dennis Ahlburg will discuss the professional challenges facing the group in "Baby Boomers and the Corporation" Wednesday (July 15) at 6 p.m. in the Humphrey Center's management conference center on the west bank of the Minneapolis campus.

Ahlburg, a labor economist, has studied population trends and the social and economic effects of changing demographics. He has also examined changing attitudes toward job advancement, job satisfaction and organizational commitment.

A panel discussion with Wende Farrow, manager of human resources at IDS Financial Services, George Blackwell, management and placement consultant for Northwestern Bell, and Cindy Kimmel, benefits manager at Cray Research, will follow Ahlburg's lecture.

The presentation is part of an alumni reception, workshop and dinner sponsored by the Carlson School of Management's Alumni Advisory Council. Reporters are invited to attend the lecture and discussion. Contact Martha Douglas at (612) 625-0843 if you plan to attend.

## U OF MINNESOTA HOSPITAL GETS NEW CHIEF

(FOR IMMEDIATE RELEASE)

Robert M. Dickler, director of the University of Colorado Hospitals, will be recommended to become general director of the University of Minnesota Hospital and Clinic and assistant vice president for health sciences.

Pending approval by the university Board of Regents, Dickler will assume his new duties in September. He will replace former director C. Edward Schwartz, who resigned in February to become director of the University of Pennsylvania hospital.

Dickler was an administrative resident, assistant director and associate director at the University of Minnesota Hospital between 1971 and 1981, and senior associate director from 1978 to 1981. He was on the faculty of the program in hospital and health care administration. He is an assistant professor in the University of Colorado's schools of medicine and business.

"I am very happy to be back where I began my career and where my family has many close friends," said Dickler. "I plan to do whatever I can to ensure the continued success of the University of Minnesota Hospital and Clinic, a center that ranks among the world's finest in patient care and research innovation."

Dickler is a 1967 graduate of Case Western Reserve University and received a master's degree in hospital and health care administration from the University of Minnesota in 1972. He is a doctoral candidate in hospital and health care administration at the University of Colorado.

"We are delighted to have Bob back in Minnesota," said Neal A. Vanselow,

(MORE)

university vice president for health sciences. "He did a first-rate job at Colorado and we are confident he will keep our hospital in the forefront of the nation's academic health centers."

Dickler is married and the father of a daughter.

## HUMPHREY INSTITUTE NAMES ACTING DEAN

(FOR IMMEDIATE RELEASE)

John Brandl, University of Minnesota professor of public affairs and a Minnesota state senator, has been named acting dean of the Humphrey Institute .

Brandl will assume his new post pending approval by the university's Board of Regents. He said he will not remain in the position past the beginning of the legislative session in February. He succeeds Harlan Cleveland, who resigned as dean of the institute June 30.

A university professor of public affairs since 1970, Brandl, 49, received a bachelor of arts degree in economics from St. John's University and a master's degree and doctorate in economics from Harvard University. He was director of the University of Minnesota's School of Public Affairs from 1969 to 1976.

Brandl represented a south Minneapolis district as a member of the Minnesota House of Representatives from 1977 to 1978 and 1981 to 1986. He was elected to the Minnesota Senate in 1987.

Brandl has taught at the universities of Sydney, Australia, and Wisconsin, St. John's University and Harvard University. He is president of the Association for Public Policy Analysis and Management and is a director of the Center for Policy Research in Education and the Policy Studies Organization.

Brandl is married, has three children and lives in Minneapolis.

## U TO STUDY POSSIBLE GENETIC INFLUENCE IN PERIODONTAL DISEASE

(FOR IMMEDIATE RELEASE)

The possibility of a genetic link to periodontal disease will be studied by the University of Minnesota School of Dentistry and Minnesota Center for Twin and Adoption Research. Periodontal disease affects about 94 million Americans and is thought to be the primary cause of adult tooth loss.

Environmental factors, as well as possible hereditary factors, will be observed in 230 sets of same-sex fraternal and identical twins over age 35. Study director Bruce Pihlstrom, professor of periodontics in the School of Dentistry and director of the school's Clinical Research Center for Periodontal Disease, has received a three-year, \$315,000 grant from the National Institutes of Health to conduct the study, the only one of its kind in the world.

"The idea of heredity contributing to gum disease is only a hypothesis, but one we must test," said Pihlstrom. "If hereditary factors are indeed of significance, we will be at that much more of an advantage in the fight against this disease that robs so many of their natural teeth."

Study participants will be given a free periodontal health assessment and will be compensated for travel and other study-related expenses. For more information, call (612) 625-0909.

LABOR POLICY EXPERT  
TO JOIN HUMPHREY INSTITUTE

(FOR IMMEDIATE RELEASE)

Morris M. Kleiner, a professor at the University of Kansas, Lawrence, has been named a public affairs and planning professor for the University of Minnesota's Humphrey Institute and industrial relations professor for the Industrial Relations Center.

In addition to teaching core and advanced courses, Kleiner will direct a program of research studies, policy analysis and conferences on major national and international labor issues. The faculty positions and research program are supported by a \$2 million endowment from the AFL-CIO.

A noted researcher in labor policy and industrial relations, Kleiner received a bachelor's degree in economics from Bradley University, a master's degree in labor and industrial relations and a doctorate in economics from the University of Illinois. He has held positions at Harvard University, the National Bureau of Economic Research, the Brookings Institution, the U.S. Department of Labor and the National Labor Relations Board. Kleiner has been on the faculty of the University of Kansas since 1974.

Kleiner is the co-author of two books to be published this year, "Labor Markets and Human Resource Management" and "Human Resources and the Performance of the Firm." He will join the Humphrey Institute and the Industrial Relations Center Aug. 27.

KUOM TO BROADCAST  
FOCUS TASK FORCE SERIES

(FOR IMMEDIATE RELEASE)

University Public Radio, KUOM 770AM, will begin broadcasting a seven-week series Aug. 10 on the proposals and effects of a University of Minnesota advisory task force's controversial report proposing funding and program changes to improve the university's quality.

Each hour-long program in the "Focus on Focus" series will feature a representative from a unit affected by the task force's proposals. Listeners are encouraged to call in with questions or comments during the program at (612) 625-5800.

"Focus on Focus " will air as part of KUOM's "Talking Sense" program at 11:30 a.m. every Monday except Labor Day through Sept. 28.

Individual programs in the series are:

Aug. 10 --School of Dentistry with Dean Richard Elzay

Aug. 17 --Institute of Technology with Dean Ettore Infante

Aug. 24 --College of Veterinary Medicine with Dean Robert Dunlop

Aug. 31 --College of Liberal Arts with Dean Fred Lukermann

Sept. 14 --College of Biological Sciences with Dean Paul T. Magee

Sept. 21 --Continuing Education and Extension with Dean Harold Miller

Sept. 28 --Where Do We Go From Here? A look at the discussion and debate that will lead to decisions on Plan For Focus recommendations.

O'CONNOR AND HANNAN LAW FIRM  
ENDOWS U OF MINNESOTA VISITING PROFESSORSHIP

(FOR IMMEDIATE RELEASE)

The Minneapolis law firm of O'Connor and Hannan has pledged more than \$250,000 to the University of Minnesota to establish a distinguished visiting professorship for the study of law and language.

The gift is being made in the name of Frederick W. Thomas, one of the founding members of the firm, who died in 1986 and who was known for his love of good language. The endowment will come from the law firm and friends of Thomas. It will be matched by Minnesota's Permanent University Fund, a special allotment released by the Legislature in 1985.

The endowment will bring to campus each year a distinguished visiting scholar who is an expert in the relationship between law and language. The university's College of Liberal Arts and the Law School will jointly administer the position.

Joe A. Walters, a managing partner in the firm, said the O'Connor and Hannan attorneys wanted to honor Thomas as a person and for the example he set for the firm in using good language.

"Lawyers communicate through language, and the most important element of their work is the spoken and written word," Walters said. "There is need for improvement in the judicial system. For example, there is concern about the incomprehensibility of the jury instructions that are being used daily in courtroom practice. Much of it is difficult for lawyers and impossible for juries to understand."

(MORE)

VISITING PROFESSORSHIP

-2-

As envisioned, the professorship will result in research into law and language and new courses available to students in both the College of Liberal Arts and the Law School.

A search could begin as early as this fall for a scholar of international stature to fill the position for the next academic year.

## SIMILAR SUCCESS IN ONE TYPE OF LEUKEMIA FOR OWN VS. SIBLING BONE MARROW TRANSPLANTS

Acute lymphoblastic leukemia patients who receive their own cancer-purged bone marrow had cure rates that were statistically indifferent from those who received marrow from siblings, according to University of Minnesota researchers.

In a study of 45 patients who received their own marrow in a procedure called autologous transplantation, 20 percent were considered cured five years after the transplant. Of 46 patients who received the marrow of a sibling in a process called allogeneic transplantation, 27 percent were considered cured five years later. Both children and adults were included in the study; standard treatment such as chemotherapy and radiation had failed on all those in the study. Study results were published in the Aug. 20 issue of the New England Journal of Medicine.

"The importance of these findings is significant for several reasons," said John Kersey, bone marrow transplantation director at the university, laboratory medicine and pathology and pediatrics professor and the study's first author. "Before we used bone marrow transplantation as a treatment for these patients, a mere 5 percent of these patients would have survived five years after the failure of their treatment. Additionally, it is especially encouraging to see such promising results among those receiving autologous transplants, since only about one-third of the total population has a sibling who would be considered a good donor match.

(MORE)

Advancements in the monoclonal antibody treatments used to rid marrow of cancer cells make autologous transplants a viable form of treatment for not only this disease, but for other leukemias and cancers as well." Kersey also said that rates of death and complication were lower among autologous transplant patients.

Leukemia accounts for 3 percent of all new U.S. cancer cases. Half of these cases are acute; acute lymphoblastic leukemia, a cancer of white blood cells, accounts for about 15 percent of adult acute leukemia cases and 85 percent of the cases in children. In 1987, approximately 12,900 cases of lymphoblastic leukemia occurred in this country.

Kersey said he and fellow reserachers Norma Ramsay, pediatric bone marrow transplantation director and pediatrics professor, and Tucker LeBien, laboratory medicine and pathology professor, are working on improving immunological, chemotherapy and radiation treatments used on patients before and after bone marrow transplantation. "We would like to improve on the number of patients cured by improving bone marrow transplantation. Eventually, we would like to simplify the procedure by reducing the side effects of current methods," said Kersey.

The University of Minnesota performed the world's first bone marrow transplant in January 1968. As of July 31, the university had done 768 bone marrow transplants on both children and adults.

## GODOW NAMED DIRECTOR OF U OF M'S CLA HONORS PROGRAM

(FOR IMMEDIATE RELEASE)

Rew A. "Skip" Godow Jr., former honors program director at the College of Charleston, has been named director of the University of Minnesota's College of Liberal Arts (CLA) honors program beginning Sept. 1.

A proponent of curriculum development and innovation, Godow is interested in team teaching and interdisciplinary courses and hopes to get more CLA departments involved in the honors program. He views the program, which has 23,600 students, as a means for faculty development through teaching and curriculum.

In addition to his positions at Charleston, Godow, 41, served as director of the Governor's School of South Carolina, a five-week, residential, summer-school program for outstanding high school students.

The Chicago native received bachelor's, master's and doctorate degrees from the University of Illinois at Champaign-Urbana. He was named an associate philosophy professor at Charleston in 1979 and department chair in 1978. As executive assistant to the president of the University of Hartford in 1985, Godow worked on developing a governor's program for Connecticut.

## MEMO TO NEWS PEOPLE

Key policymakers and industry leaders will meet at a daylong forum called "Future Telecommunications Competition and Regulation: What's in the Public Interest?" Sept. 11 in the Cowles Auditorium at the University of Minnesota's Humphrey Center from 8 a.m. to 5:30 p.m. The forum will evaluate the effects recent changes in public policy decisions and regulatory developments are likely to have on the Midwest.

Speakers will address these and other issues: How Congress will react to upcoming court decisions on restricting Bell Telephone operating companies. Where and how federal and state jurisdictional lines will be drawn. What new information services are on the horizon and how regulation will affect their development. The future of universal service. State telecommunication legislation in your state's next legislative session.

Speakers will include Peter Huber, consultant to the Justice Department and author of "The Geodesic Network, 1987 Report on Competition in the Telephone Industry"; Rep. Ed Markey, D-Mass., chair of the House subcommittee on telecommunication and finance; Charles Denny, chair and chief executive officer, ADC Telecommunications; Bruce Hagen, North Dakota public utilities commissioner and an officer of the National Association of Regulatory Utility Commissioners; Gretchen Dumas, attorney, California public utilities commission; Alan Pearce, economist and consultant on regulatory matters; Nicholas Johnson, former Federal Communications Commission chair, author, lecturer and consumer advocate; and an FCC representative.

(OVER)

The forum is being sponsored by the University of Minnesota's Hubert H. Humphrey Institute of Public Affairs and the Midwest Telecommunications Forum Planning Committee, which is composed of representatives from ADC Telecommunications, Inc.; AT&T; Minnesota Public Television; Northwestern Bell Telephone; Norstan Communications Systems; and William Mitchell Law School. The state of Minnesota will be represented by the Attorney General's Office, the Department of Public Service, the Public Utilities Commission and the State Planning Agency.

A fee of \$150 will be waived for news people showing identification from a recognized news organization. Contact Patricia Manske at (612) 625-6621 if you plan to attend.

## MEMO TO NEWS PEOPLE

University of Minnesota regents Friday (Sept. 11) will discuss the timetable and process for review and action on Strategies for Focus, which makes the program choices called for in the university's Commitment to Focus plan for improvement.

Before the Board of Regents' Thursday and Friday meetings, university President Kenneth H. Keller will send a letter to the board outlining his recommendations on a faculty-student task force proposal to close the colleges of veterinary medicine and dentistry and the department of vocational and technical education in the College of Education. If Keller rejects the closing proposals, no board action will be necessary. The board's discussion will deal with other planning issues.

Regents will also hear a report on a long-term university study of twins reared apart. The discussion will feature Thomas Bouchard, university professor of psychology and director of the Minnesota Center for Twin and Adoption Research.

The primary objective of the multidisciplinary project is to examine environmental and genetic influences on medical and psychological traits of both identical and fraternal twins brought to the university for comprehensive medical, psychiatric and psychological assessment.

Here are some agenda items:

### Thursday, Sept. 10

--Educational planning and policy committee, 1:30 p.m., 238 Morrill Hall.  
Discontinuation of the doctorate program in industrial education; General College

(OVER)

update; discussion of twins project.

--Physical planning and operations committee, 1:30 p.m., 300 Morrill Hall. Duluth student housing report; Minneapolis Community Development Agency's proposal to sell to the university its interest in the Supercomputer Center building.

The following committees meet after the 1:30 p.m. meetings adjourn.

--Faculty, staff and student affairs committee, 238 Morrill Hall. Student study space report.

--Finance and legislative committee, 300 Morrill Hall.

Friday, Sept. 11

--Committee of the whole, 8:30 a.m., 238 Morrill Hall. Update on Strategy for Focus plan for implementing Commitment for Focus.

--Regular monthly meeting starts after committee of the whole adjourns. Final action on committee votes.

## MIDWEST FORUM

### FUTURE TELECOMMUNICATIONS COMPETITION AND REGULATION:

#### WHAT'S IN THE PUBLIC INTEREST?

Friday, September 11, 1987

8:00 a.m. - 5:30 p.m.

Humphrey Center  
University of Minnesota

#### AGENDA

7:30 a.m. Registration and Continental Breakfast

8:00 Alan Pearce Moderator  
President, Information Age Economics  
"The Washington D.C. Telecommunications Policy-  
making Scene: An Overview"

#### THE FEDERAL PERSPECTIVE

##### TOWARD THE YEAR 1992 — VISIONS FOR A COMPREHENSIVE AND COHESIVE TELECOMMUNICATIONS POLICY: HOW DO WE GET THERE?

8:30 Ed Markey Chair, House Sub-Committee on Telecommunications  
and Finance

9:00 Federal Communications Commission

9:30 Gretchen Dumas Attorney, California Public Utilities Commission

10:00 Peter Huber Consultant, Department of Justice

10:30-10:45 BREAK

11:00 Panel Discussion. Are these visions consistent with the public  
interest? Will they play in North Dakota?

Consumer advocate Nick Johnson will give opening remarks and serve  
as provocateur for the speakers and the audience.

12:15-1:30 LUNCH. Box lunches. Small group interaction.

## MEMO TO NEWS PEOPLE

The first academically organized conference dealing exclusively with biological applications for supercomputers will be Sept. 14 through 16 at the Minnesota Supercomputer Center, 1200 Washington Ave. S., Minneapolis, and Willey Hall, on the west bank of the University of Minnesota's Minneapolis campus.

Participants will discuss how supercomputers are revolutionizing biology by enabling complicated three-dimensional structures of such materials as proteins and genetic material to be visualized, said George Wilcox, a University of Minnesota associate pharmacology professor who is organizing the conference.

Better ways to manufacture antibodies to combat viruses -- possibly including the AIDS virus -- may result from supercomputer modeling of biological materials, Wilcox said. A three-dimensional model of a virus would show the shape of the molecule and the electron densities of its various parts. A supercomputer would then be used to figure out what type of molecule would best bind to the virus and inactivate it. Chemists would then synthesize a drug with the requisite properties.

Wilcox said he and University of Houston chemist J. Andrew McCammon would be the best people to talk to about applications of the new techniques. McCammon will be arrive at the Whitney Hotel Sunday night. You can reach Wilcox at 625-1474. The best time to cover the conference would probably be Tuesday night, when the group will be putting colorful models of molecules up on computer screens at the Supercomputer Center, Wilcox said.

The conference will run from 8:30 a.m. to 5:30 p.m. Monday and Tuesday and will conclude at noon Wednesday.

## U OF M REGENTS DISCUSS DECISION PROCEDURES FOR COMMITMENT TO FOCUS IMPLEMENTATION

(FOR IMMEDIATE RELEASE)

Citing the "volatile nature" of some recommendations in a June student-faculty task force report, University of Minnesota regents Friday (Sept. 11) voiced their concerns over the timetable and decision process for dealing with program choices needed for implementing the university's Commitment to Focus plan for improvement.

The most controversial task force proposals -- closing the schools of dentistry and veterinary medicine and the department of vocational and technical education -- were rejected earlier in the week in a letter to the Board of Regents from university President Kenneth H. Keller. "While we do expect some important and useful programmatic changes in these units (veterinary medicine and dentistry), the issue of phasing them out is, itself, closed," Keller wrote. He also wrote that because the vocational and technical education department is "unique in and important to the state," the university administration would not recommend its closing.

Regent Mary Schertler of St. Paul requested a systematic timetable to ensure "timely and complete discussions" of the task force recommendations so that "nothing's glossed over."

Keller explained that because the task force was appointed by Roger Benjamin, academic affairs vice president, and reported to Benjamin, its recommendations should not be treated as if they were proposals made to the regents by the administration. He said hasty action could aggravate the confusion. Allowing some

(MORE)

time to review, amend and combine some of the task force recommendations will be more constructive, he said. Keller cautioned against viewing the task force's proposals as a checklist. Proposals rejected by the administration won't need to be presented to the board, he said.

Many of the task force proposals have "long-range implications" that can't be decided in two or three months, Regent Charles Casey of West Concord said.

"There are a lot of intriguing ideas in that report that I'm concerned won't receive our attention," Regent Wenda Moore of Minneapolis said. She added that the board of regents "had an obligation" to let the affected units know what's being decided about them.

Benjamin expressed his regret over this summer's "negative publicity" surrounding the task force's proposals and the "pain and anguish" suffered by people associated with veterinary medicine, dentistry, vocational and technical education and other units recommended to be closed.

Internal debate on the task force proposals is continuing, and final administration recommendations are not expected until the end of the year. Those recommendations will be presented to the board in December or January.

The regents also heard an update on the search for the assistant vice president for minority affairs -- a position recommended by a committee appointed to find ways to improve recruitment and retention of minority students and faculty. The search process has been going slowly, not from lack of interest, but from efforts to include groups from the community in the decision, Keller said. An assistant vice president is expected to be appointed in November, and other of the committee's 22 recommended changes are "going well," said Keller.

Thursday, the regents heard student opinion on the proposal to create more student study space on the Twin Cities campus by compensating students for the Health Services Building, which was built with student fees in 1939.

The administration is willing to give \$300,000 to the Minnesota Student

Campaign -- part of the university's fund-raising effort -- for the use of developing new study space, and will agree to help obtain matching funds from the Minnesota Foundation. The students will be given a goal to raise \$300,000.

A representative from the Minnesota Student Association voiced his opposition to the proposal by reaffirming the student's claim to the building and questioning the precedent such a proposal would set.

Keller called the problem the result of viewing the university as "a federation of duchies," adding that that type of thinking "perpetuates the problem of the university which is no university. It isn't useful to think of space as belonging to a department or an individual." He called the administration's proposal "creative" and "constructive" and an opportunity to deal with a problem in a practical way.

Marjorie Cowmeadow, General College assistant dean for student services, reported on the developments in General College's planning over recent months, including guidelines for admission into the college. In their efforts to increase the number of minority applicants -- one group on the college's first priority list -- General College recruiters have adopted the practice of phoning all prospective minority students whether their application files are complete or not, Cowmeadow said.

The priority system is an added effort to admit minorities and disadvantaged students, said Cowmeadow. This fall General College plans to track its students to see if the system is working.

HISTORY AND INTENT OF THE CONSTITUTION  
SUBJECT OF U OF M LECTURE

(FOR IMMEDIATE RELEASE)

The University of Minnesota Law School will present the first of a series of fall lectures commemorating the bicentennial of the U.S. Constitution at 12:15 p.m. Thursday (Sept. 17) at the University of Minnesota.

Two hundred years after the authors of the Constitution sent it to the people for approval, Americans are still arguing over the document's interpretation and intent. University law professor Suzanna Sherry will discuss the Constitution's historical origins, the convictions of its framers and the consequences of the document's style of adjudication in her speech, "Two Hundred Years Ago Today."

A member of the university's Law School faculty since 1985, Sherry teaches constitutional law and related topics including employment discrimination, First Amendment advocacy and constitutional history. She received a bachelor's degree from Middlebury College and a law degree from the University of Chicago Law School, where she was a member of the law review and the Order of the Coif. She worked at the Washington, D.C., law firm of Miller, Cassidy, Larroca & Lewin before coming to the University of Minnesota.

Sherry's speech is free and will be held in room 25 of the University of Minnesota Law Center on the west bank of the university's Minneapolis campus.

For more information, call Betsy Baker at (612) 625-5350.

## MEMO TO NEWS PEOPLE

Six top Twin Cities executives will share their views on economic issues affecting regional business at a panel discussion Thursday (Sept. 24) at 8:30 a.m. in the Humphrey Center on the west bank of the University of Minnesota's Minneapolis campus.

### Panel members are:

- Jan Smaby, president, Spring Hill, and co-host, KTCA's "Almanac."
- John Rollwagen, chair and chief executive officer, Cray Research, Inc.
- Dick Knowlton, chair and chief executive officer, Geo. A. Hormel & Co.
- Gary Stern, president and chief executive officer, Federal Reserve Bank of Minneapolis.
- John McDevitt, corporate economist, 3M.
- Roger Hale, president and chief executive officer, Tennant Co.
- Tom Triplett, commissioner, Minnesota Department of Revenue.

Reporters are invited to attend the panel discussion, which opens a day-long executive development symposium sponsored by the Carlson School of Management's Executive Development Center.

Contact Bill Scheurer if you plan to attend and come to the Humphrey Center atrium for the exact room location.

## SHEPPARD PLEDGES GIFT FOR UNIVERSITY SWIM CENTER

(FOR IMMEDIATE RELEASE)

Dorothy Lestina Sheppard, the first inductee in the University of Minnesota Women's Athletics Hall of Fame, has pledged more than \$250,000 to initiate private fund raising for a new swim center on the university's Minneapolis campus.

The swim center, an olympic-sized pool and diving area for recreation and competition, is part of the first phase of a three-phase, long-range plan to improve university recreational, intercollegiate and physical education facilities on the Twin Cities campus.

The plan was approved by the Board of Regents last fall, and the 1987 state Legislature allocated \$8.5 million toward Phase I of the project, contingent on the raising of \$5.2 million from private sources. A \$3 million fund held by the state's Department of Economic Development for construction of an olympic-caliber swim center in the state is also contingent on the private fund raising. An additional \$4 million in student fees will support the first phase.

"With these new dollars, coupled with student fees and state funds, the university will be able to build a swim center that will do justice to its intercollegiate athletic programs, its recreational sports and physical education programs and other amateur sport championships," said Frank Wilderson, vice president for student affairs. "This is truly an opportunity for the university to be a prominent part of the amateur athletic scene in the state, as well as providing for itself a first-class facility to hold intercollegiate championship events and meets."

(MORE)

Other components of the first phase include Cooke Hall renovation, renovation of the pool and tennis courts on the St. Paul campus and enclosing a section of tennis courts on the Minneapolis campus for year-round use.

A 1929 alumnus of the university's College of Education, Sheppard has made several donations to the women's intercollegiate athletics program. She established the first scholarship endowment fund for women's athletics, which ensures 10 swimming scholarships annually. Sheppard is also an active member of the Patty Berg Development Fund Advisory Council.

"Dorothy Sheppard has played a uniquely important role in the development of the women's athletic department during the past several years," said Merrily Dean Baker, director of women's athletics. "Her financial support has been extraordinary; but, equally important, she has given of herself and is looked upon with great affection by students and staff alike . . . she is a very special person, and it is so like her to take the lead in giving a gift that will benefit so many."

Sheppard's travels to competitions with the women's swimming and diving teams at other universities have convinced her of Minnesota's need for improvements. "I had previously given money to establish scholarships," she said, "but without facilities we might miss some of the most qualified people for our swimming program. I wanted this gift to start the ball rolling for other alumni to donate to this particular facility. We need to update to compete with other cities."

Although there were no intercollegiate women's sports while Sheppard attended the university, she earned an athletic letter by accumulating 1,000 points through participation on 10 athletic teams. She was president of the Aquatic League in 1927, captain of the field hockey team and was on the Women's Athletic Association board from 1926 to 1928.

In 1985, Sheppard became the first inductee into the University of Minnesota Women's Athletics Hall of Fame, and in 1986 she was named to the University's Aquatic Hall of Fame.

U OF M LAW SCHOOL PROVIDES  
FREE LEGAL SERVICES

(FOR IMMEDIATE RELEASE)

Persons in Hennepin or Ramsey counties needing attorney services may qualify for free legal assistance through the civil practice clinic at the University of Minnesota Law School. The clinic will accept applications from Oct. 1 through mid-November.

The clinic handles cases concerning divorce, Social Security disability, unemployment compensation, landlord-tenant disputes, wills and consumer issues. Cases are handled by second- and third-year law students under the supervision of the Law School faculty.

The clinic does not handle name changes, bankruptcies or criminal cases.

To qualify, a client's income must fall below a certain level, but allowances can be made in unusual circumstances or for cases that have special educational value for the student attorneys.

For more information about the civil practice clinic, call (612) 625-5515 during business hours.

## CONFERENCE ON BERLIN'S CULTURE PLANNED FOR U OF M

(FOR IMMEDIATE RELEASE)

"Culture and Metropolis," a conference on the art and culture of Berlin from 1900 to the present, will be at the University of Minnesota's Coffman Union and St. Paul's Landmark Center Oct. 8 through 11.

Designed for teachers, scholars, students and anyone interested in German culture and the vital arts of Berlin, the conference honors the 750th anniversary of Berlin's founding. The development of the city's culture will be examined through lectures, films, musical performances, panel discussions, readings and art exhibitions.

The conference will feature Gunther van Well, West German ambassador to the United States; Berlin Free University German professor Horst Denkler; University of Minnesota art history professors Karal Ann Marling and Charles Haxthausen and German professor Heidrun Suhr; writers Michael Rutschky and Aysel Ozakin; University of Stockholm German professor Helmut Mussener; and the music of Kurt Weill.

The conference begins at 6:30 p.m. Oct. 8 with registration in the Landmark Center's Weyerhaeuser Auditorium. An opening address by university vice president for academic affairs Roger Benjamin and van Well will start at 7:30 p.m., followed by keynote speakers Denkler and Marling.

Registration is \$15 for materials, refreshments and an evening concert Oct. 10; \$8 to attend only Oct. 10 events. The Oct. 8 evening session is free. Before the conference, Walker Art Center will host a series of Berlin films to be introduced by Berlin film critic Ronald Holloway.

For more information, call Leslie Denny at (612) 625-0727.

## MEMO TO NEWS PEOPLE

Embargoed until 10 p.m. (CDT) Thursday (Sept. 24) for electronic media; Friday morning (Sept. 25) for print.

Results of the Minnesota Adolescent Health Survey will be released to reporters Thursday (Sept. 24) at 7 p.m. in the Mayo Auditorium, 420 Delaware St. S.E., on the University of Minnesota's Minneapolis campus.

The survey was completed by the university's Adolescent Health Program and the Minnesota State Health Department. A total of 36,284 Minnesota public school students in grades seven through 12 completed the survey. Data gathered from the survey will be used to develop a better source of information on adolescents ages 12 to 19 for block grant planning for adolescent researchers, curriculum development and community assessments, as well as other needs of Minnesota's adolescent population.

Lois Geer and Michael Resnick, university researchers who were among the study's principal investigators, will be available Thursday evening to answer reporters' questions.

## MEMO TO NEWS PEOPLE

James Serpell, a noted animal behaviorist at England's Cambridge University, will be the first presenter of the University of Minnesota CENSHARE (Center to Study Human-Animal Relationships and Environments) Sweatt Family Lecture Series. Serpell, the author of the popular book "In Company of Animals," will speak three times on three topics Sept. 29 through Oct. 1

Serpell is a specialist in the evolution of communicatory behavior in birds and has also done extensive analysis of the relationship between humans and domestic dogs. His recent work concerns pet ownership and the development of children's attitudes toward animals.

Serpell's talks will be at the following times and locations:

--Sept. 29, 12:15 p.m., 2-530 Moos Tower, 515 Delaware St. S.E., "The Comparison of Petkeeping Between Western and Non-Western Societies."

--Sept. 30, noon, 574 McNeal Hall, on the University's St. Paul campus, "Pets and Child Development: State of the Art and Directions for Future Research."

--Oct. 1, 7:30 p.m., Radisson University Hotel, 615 Washington Ave. S.E., Minneapolis, "Human Attitudes to Animals: Conflicts and Inconsistencies."

Reporters are welcome at all three talks.

## WORLD BANK OFFICIAL TO HEAD HUMPHREY INSTITUTE

(FOR IMMEDIATE RELEASE)

World Bank official G. Edward Schuh is expected to take over the deanship of the University of Minnesota's Humphrey Institute in early December. His appointment, which is subject to approval by the university Board of Regents, was announced Tuesday (Sept. 22) after a yearlong search.

Schuh will replace Harlan Cleveland, who retired in June as dean of the Hubert H. Humphrey Institute of Public Affairs after seven years.

Schuh, currently director of the World Bank's agriculture and rural development department, was head of the university's agricultural and applied economics department from 1979 until 1984, when he accepted the position at the World Bank in Washington, D.C.

University Provost Roger Benjamin said: "Ed Schuh is respected within the academic community as a gifted scholar and administrator, and he is also an internationalist and a firm advocate of the university's reaching out to the broader community.

"Former dean Harlan Cleveland brought the Humphrey Institute international renown. Ed Schuh will continue that tradition, and he will solidify the institute's position within the university."

Schuh has a bachelor's degree from Purdue University, a master's degree from Michigan State University and a master's degree and a doctorate from the University of Chicago. He was an agricultural economics professor at Purdue from 1959 to '79,

(MORE)

and was the first director of the Center for Public and Policy Administration at Purdue from 1977 to '78. While on the faculty at Purdue, he also served as program advisor to the Ford Foundation in Brazil from 1966 to '72, senior staff economist on President Ford's Council of Economic Advisers from 1974 to '75, and as deputy under-secretary for International Affairs and Commodity Programs at the U.S. Department of Agriculture from 1978 to '79.

Schuh has served as director of the National Bureau of Economic Research at Cambridge, Mass., director of the Economics Institute at Boulder, Colo., director of the Minneapolis Grain Exchange and director of the American Agricultural Economics Association from 1977 to '80. He was president of that association from 1981 to '82.

Schuh has had extensive international teaching, consulting and advising experience in Latin America and India, and with the U.S. government. He is particularly interested in agricultural and food policy, economic development and international trade. He is the author or co-author of numerous publications.

Schuh was elected a fellow of the American Academy of Arts and Sciences in 1977, and a fellow of the American Agricultural Economics Association in 1984. He is listed in "Who's Who in America," "American Men and Women of Science" and the "Dictionary of International Biography."

Schuh is married to Maria Ignez Angeli and has three daughters: Audrey, Susan and Tanya.

**CALLIGRAPHY COLLECTION DISPLAYED  
AT U OF M**

**(FOR IMMEDIATE RELEASE)**

A collection of 20th-century calligraphy and supporting materials is on display at the University of Minnesota through Friday (Oct. 2).

The display is part of a larger permanent collection, the Minnesota Manuscript Initiative (MMI), housed in the Special Collections area of Wilson Library on the west bank of the Minneapolis campus. The major part of the MMI is works by Irene Wellington, a master English calligrapher. Included are "In Praise of Chimney Sweepers," a small clothbound book, and "That the Trial of Your Faith," a small piece in blue, black and red with raised gold on vellum. The Wellington materials represent about 30 percent of her output and were purchased through a grant from the General Mills Foundation.

Rutherford Aris, university regents' professor of chemical engineering and materials science, has written an introduction to the collection and prepared several guides for viewing the works. Aris, who also teaches Latin palaeography in the classical studies department, is past president of the Colleagues of Calligraphy (COC), which sponsors the MMI.

The Twin Cities-based COC is now raising funds to complete the purchase of a work by Ann Hechle, a contemporary artist who studied with Wellington. "In the Beginning," Hechle's masterpiece, is a panel in vellum mounted on wood with the opening lines of Genesis and the gospel of John interwoven with a poem by modern poet David Gascoyne. It is already part of the collection. Contributions may be

(MORE)

**CALLIGRAPHY COLLECTION**

SHEAFFER, HEICHEL WIN  
U OF M NORTHRUP KING AWARD

(FOR IMMEDIATE RELEASE)

University of Minnesota professors Craig C. Sheaffer and Gary H. Heichel have won Northrup King faculty performance awards for 1987-88.

The awards are given annually to two members of the University of Minnesota's agronomy and plant genetics faculty, one for outstanding educational work and the other for outstanding research. Winners, chosen by a faculty committee, receive \$3,000 each. The awards are funded by Northrup King.

Sheaffer, the winner in the education category, joined the department in 1977 as an assistant professor. He became an associate professor in 1982 and a professor in 1986. A teacher and researcher of basic and applied aspects of forage production, Sheaffer has been involved in numerous extension education activities. In 1985 he received the Crop Science Society of America's Young Crop Scientist Award for his contributions in research and teaching, and this year he won the American Forage and Grassland Council's Merit Certificate Award.

Heichel, the research winner, is a plant physiologist, who leads the forage physiology project of the Plant Science Research Unit in the U.S. Department of Agriculture Agricultural Research Service on the St. Paul campus. He is an adjunct professor of agronomy. He was appointed to these positions in 1976. He heads a research team developing ways to breed alfalfa for better nitrogen fixation capability. He applies this knowledge to producing crops that grow more efficiently and sustain their yields longer. Heichel is fellow of the Crop Science Society of America and the Agronomy Society of America.

## COOPER NAMED TO U OF M LAW SCHOOL CHAIR

(FOR IMMEDIATE RELEASE)

Laura J. Cooper, University of Minnesota Law School professor, has been named the 1987 Julius E. Davis law professor. The Davis Chair rotates annually among Law School faculty in recognition of excellence in teaching and scholarship.

A member of the Law School faculty since 1975, Cooper concentrates her research in labor law, conflicts and arbitration. She received a law degree with highest honors from Indiana University School of Law and has written articles on labor law, welfare law and conflicts.

Cooper is president of Mid-Minnesota Legal Services and past president of the Legal Aid Society of Minneapolis and the Minnesota Chapter of the Society of Professionals in Dispute Resolution.

The Davis Chair, the Law School's first endowed chair, was established in 1981 in memory of Julius E. Davis, a 1936 University of Minnesota Law School graduate.

UNION PACIFIC DONATES \$500,000  
TO U OF MINNESOTA TO HONOR CEO

(FOR IMMEDIATE RELEASE)

The New York-based Union Pacific Corp. has given \$500,000 to the University of Minnesota to create new programs at the Carlson School of Management and the College of Liberal Arts.

The gift honors Union Pacific head and university graduate William S. Cook, and will be matched with \$500,000 from the Permanent University Fund, a special allotment released by the Minnesota Legislature in 1985.

Part of the gift will be used to establish a new Logistics Management Research Center at the Carlson School of Management. The center's goal is to become recognized nationally as a catalyst for improvement in the management of logistics, distribution and transportation, according to management sciences professor Fred Beier, who was recently named the center's director.

"Important changes in how products are distributed have been occurring as a result of changing economics, technology and the regulatory environment," Beier said. "Add to this the fact that you have multiple organizations, each with its own set of objectives, that must deal with each other in maximizing the effective flow of products. The center will be the first of its kind in the country to foster research into these kinds of problems."

Cook, chair and chief executive officer of Union Pacific, is a Duluth, Minn., native who has been with the company since 1969. He will retire Oct. 1. Cook graduated from the university in 1948 with a degree in business administration and

(MORE)

UNION PACIFIC DONATION

-2-

in 1983 was awarded a University of Minnesota Outstanding Achievement Award, the highest honor for alumni who have achieved distinction in their field.

The Union Pacific gift was made as part of the university's Minnesota Campaign, the three-year fund-raising drive that has raised more than \$275.5 million of its \$300 million goal. The university hopes to establish at least 100 new faculty chairs or professorships through the campaign.

Details of the CLA portion of the Union Pacific gift will be announced later.

## 'FOCUS' IMPLEMENTATION CALENDAR SET

(FOR IMMEDIATE RELEASE)

A calendar for discussion of the program choices needed for implementing the University of Minnesota's Commitment to Focus self-improvement plan calls for administrative recommendations in December and possible action by the Board of Regents in March.

So far, only four recommendations made by a faculty-student task force in a June report called "Plan for Focus" have been acted on. In a letter to the university community, academic vice president and Twin Cities campus provost Roger Benjamin Tuesday (Sept. 29) outlined the process for discussion of the remaining 235 recommendations.

Among the issues still to be addressed are the organization of the arts and sciences, the organization of the biological sciences, funding needed to provide high quality programs and the university's balance of graduate, undergraduate and professional education.

A document -- called "Preparing for the 21st Century" -- accompanies Benjamin's letter and calls for a campus-wide discussion of "Plan for Focus" issues before the university administration prepares its recommendations to the Board of Regents.

Proposals to close the schools of dentistry and veterinary medicine and the vocational and technical education department were rejected by President Kenneth H. Keller earlier this month, but "it will still be important for these units to develop plans which address the same objectives we have asked other academic units to accomplish,"

(MORE)

wrote academic vice president and Twin Cities campus provost Roger Benjamin.

Benjamin earlier rejected a proposal to move the Hubert H. Humphrey Institute of Public Affairs into a collegiate unit. His decision that the institute remain independent was made during negotiations with the institute's new dean, G. Edward Schuh.

Benamin's letter outlines the schedule, calling the task force's set of recommendations "sweeping" and "imaginative."

During fall quarter the administration intends to have campus-wide discussion of these issues and alternatives. Meanwhile, Benjamin and health sciences vice president Neal A. Vanselow and agriculture, forestry and home economics vice president Richard Sauer will meet with deans to discuss planning documents and task force recommendations that affect their colleges. In turn, deans will meet with groups of faculty and students.

Here is the summary calendar for planning:

--October to early December Campus-wide discussion for issues that warrant it; discussion between vice presidents and deans and within colleges for issues affecting individual colleges. Other issues will be referred to the university senate or the administration.

--Early December Provost's recommendations to president for issues of all kinds.

--December to January Discussion and review.

--February President's recommendations to regents for discussion.

--March President's recommendations to regents for action.

## MEMO TO NEWS PEOPLE

Lt. Gov. Marlene Johnson will attend the groundbreaking ceremony for the University of Minnesota's Raptor Research and Rehabilitation Program's (RRRP) new building at 2:30 p.m. Friday (Oct. 2) on the university's St. Paul campus.

The ceremony will be on the southeast corner of Gortner and Fitch avenues. A reception and displays of live birds of prey will follow in the Small Animal Clinic lobby. Parking is available in lot 104, just south of Buford Ave. across from the Earle Brown Center. All locations are on the St. Paul campus.

The building, scheduled for completion next fall, will be the first in the world specifically designed for the rehabilitation of birds of prey. Designed by Ritter, Suppes, Plautz Architects, Ltd., it will provide better laboratory space and holding areas for birds of prey, according to Barbara Walker, public relations director for the program. The program has treated more than 4,000 birds of prey, including 400 bald eagles, since its founding in 1972.

The project should be completed just before an international raptor conference at the university next fall. The project manager is Linda McCracken-Hunt, senior architect in the university's physical planning office.

Also at the groundbreaking will be Patrick Redig, RRRP director; Gary Duke, RRRP founder; David M. Lebedoff, chair, University of Minnesota Board of Regents; Bill Carlson, chair, RRRP Board of Trustees; Nancy Nelson, an active supporter of the program; Dr. Neal A. Vanselow, University of Minnesota vice president for health sciences; and Robert H. Dunlop, dean of the university's College of Veterinary Medicine.

## MEMO TO NEWS PEOPLE

University of Minnesota regents will discuss the timetable for a campuswide review of the remaining 235 "Plan for Focus" recommendations in Crookston Thursday and Friday (Oct. 8 and 9).

In a letter addressed to the university community this week, academic vice president and Twin Cities campus provost Roger Benjamin outlined plans for discussion of the program choices needed for implementing the university's self-improvement plans.

A campuswide discussion of the recommendations is scheduled to continue into early December. University president Kenneth H. Keller is expected to make recommendations to the regents for discussion in February and for action in March.

Regents will also discuss the university's proposed purchase of the Minneapolis Community Development Agency's (MCDA) interest in the Minnesota Supercomputer Center building at the intersection of Washington Avenue and 35W in Minneapolis. The purchase will allow the university to unify its computer facilities under one roof.

Many agenda items during the two days of meetings will showcase Crookston campus programs.

Here is a sample of agenda items:

Thursday, Oct. 8, 1:30 p.m.

--Faculty, staff and student affairs committee, 1:30 p.m., auditorium, Agricultural Research Center. Report on Crookston campus student life.

(OVER)

--Finance and legislative committee, 204 Dowell Hall.

The following committees meet after the 1:30 p.m. meetings adjourn:

--Educational planning and policy committee, auditorium, Agricultural Research Center. Report on Crookston campus educational programs.

--Physical planning and operations committee, 204 Dowell Hall. University's purchase of the MCDA's interest in the Minnesota Supercomputer Center building.

Friday, Oct. 9

--Committee of the whole, 8:30 a.m., auditorium, Agricultural Research Center. Strategy for Focus update and timetable, overview of agriculture, forestry and home economics programs.

--Regular monthly meeting starts after committee of the whole adjourns. Final action on committee votes.

## MEMO TO NEWS PEOPLE

The impact of National Institutes of Health (NIH) funding on University of Minnesota research will be detailed in short updates by university medical school faculty Monday (Oct. 12) from 12:30 to 2:45 p.m., at the Radisson University Hotel, 615 Washington Ave. S.E., Minneapolis. The event is being held in honor of the NIH's 100th anniversary.

The NIH was founded in August 1887, when the U.S. government provided Dr. Joseph Kinyoun with a small room in Staten Island's Marine Hospital to look for ways to prevent the spread of cholera and other infectious diseases then prevalent in the country. Government appropriations that year to the Laboratory of Hygiene totaled \$300; last fiscal year the NIH spent about \$6 billion.

The University of Minnesota is a major recipient of NIH funds. In 1986, the university's surgery department received more funding than the other 88 surgery departments that receive NIH grants nationwide.

COLUMNIST LEONARD SILK TO SPEAK  
ON WALTER HELLER

(FOR IMMEDIATE RELEASE)

New York Times economics columnist Leonard S. Silk will speak at the 25th anniversary dinner of the Minnesota Council on Economic Education at the Radisson University Hotel, Minneapolis, at 8:15 p.m. Wednesday (Oct. 14). Silk's speech is "Remembering Walter Heller."

Before becoming a columnist and member of the editorial board of the New York Times, Silk was an economics editor for BusinessWeek magazine from 1954 to 1969. He has served on a number of presidential economic policy committees and is the author of more than 20 books on economic policy and issues.

Silk has taught at American University, in Washington, D.C., Duke University, in Durham, N.C., the University of Maine and Simmons College in Boston. He received a bachelor's degree from the University of Wisconsin in 1940 and a doctorate from Duke University in 1947.

The subject of Silk's speech, Walter W. Heller, was an economic adviser to presidents John F. Kennedy and Lyndon Johnson and an economics professor at the University of Minnesota from 1946 until his death June 16.

The Minnesota Council on Economic Education is one of 50 state councils affiliated with the Joint Council of Economic Education. One of five centers in the Twin Cities is at the Center for Economic Education at the University of Minnesota.

The program begins with registration and social hour at 6 p.m. For reservations or more information, call Melody Mafi at (612) 625-6544.

## MIDWEST CONTINGENT TO VISIT NATO HEADQUARTERS

(FOR IMMEDIATE RELEASE)

Sixteen Upper Midwest opinion leaders will meet with NATO representatives at NATO headquarters in Brussels Oct. 17 through 24 and will spend two days in the Netherlands. The group was invited by the NATO information service, and the trip is being coordinated by the University of Minnesota's Humphrey Institute.

The team's schedule includes briefings with NATO General Secretary Lord Carrington and meetings with members of the Dutch Ministry of Defense and other European officials. The group will explore political and cultural issues that influence military procurement, scientific research, impending summit talks, East-West relations, intercontinental communications and arms control negotiations. Tours of Netherlands government facilities, military installations and the Mauritschuis Museum are also being arranged.

### Participants are:

- Marcia Appel, editor, Twin Cities Magazine.
- Steve Belton, president, Urban Coalition, Minneapolis.
- H. Yvonne Cheek, director, public education, Humphrey Institute of Public Affairs.
- Thomas Clifford, president, University of North Dakota.
- Sandra Gardebring, commissioner, Minnesota Department of Human Services.
- Richard Green, superintendent, Minneapolis public schools.

(MORE)

NATO HEADQUARTERS VISIT

-2-

--Roger Hale, president, Tennant Co., Minneapolis.

--Steven Hintz, professor and head, public affairs department, University of Wisconsin, Oshkosh.

--Nicholas Johnson, visiting professor, University of Iowa College of Law.

--Jayne Marecek, principal, Marecek & Cairns, Minneapolis.

--Hannah Rosenthal, executive director, Wisconsin Women's Council.

--Allen Ross, superintendent of education, Standing Rock Agency, U.S. Bureau of Indian Affairs.

--Lauren Soth, columnist, Des Moines Register.

--Robert Vanasek, speaker, Minnesota House of Representatives.

--Jack White, mayor, Sioux Falls, S.D.

--Elizabeth Williams, president, South Dakota League of Women Voters.

## U.S. CONSTITUTION SUBJECT OF LAW SCHOOL SPONSORED LECTURE

(FOR IMMEDIATE RELEASE)

The second of a series of fall lectures commemorating the bicentennial of the U.S. Constitution will be at 12:15 p.m. Oct. 29 in O'Shaughnessy Auditorium at the College of St. Catherine.

Law professor Jesse H. Choper of the University of California at Berkeley will speak on the history and intent of the U.S. Constitution. He has taught at the Wharton School of Finance, Harvard University and the University of Minnesota and specializes in constitutional law, corporation finance, corporations and legal process.

Choper's lecture will be followed by a panel discussion featuring constitutional law professors Carl Auerbach of the University of Minnesota, Ken Kirwin of William Mitchell College of Law and David Cobin of Hamline University Law School.

The lecture is cosponsored by the University of Minnesota Law School, William Mitchell College of Law and Hamline University Law School.

Choper's speech is free and open to the public.

For more information, call Betsy Baker at (612) 625-5350.

GENERAL WELFARE SUBJECT OF  
U OF M CONSTITUTION LECTURES

(FOR IMMEDIATE RELEASE)

Four lectures celebrating the bicentennial of the U.S. Constitution will begin Oct. 15 at the University of Minnesota with a discussion of poverty and public policy.

The lecture series titled "To Promote the General Welfare" examines Americans' diverse responses to the realities of poverty, inequality and dependency. Each forum will address the history, philosophy and constitutional principles of various programs for the promotion of the general welfare.

The lectures, which continue through Nov. 19, are free and will be held in Cowles Auditorium in the Hubert H. Humphrey Institute of Public Affairs on the west bank of the university's Minneapolis campus. The program is sponsored by the university's School of Social Work and the Social Welfare History Archives.

Lectures in the series are:

--Oct. 15, 4:45 p.m. "Poverty and Public Policy" will feature University of Pennsylvania history professor Michael Katz, who will discuss how the constitutional, political and cultural climate of a government determines its welfare policies and programs. Katz is a welfare policies and programs historian and has written on the topics in two recent books -- "Poverty and Public Policy" (1983) and "In the Shadow of the Poorhouse" (1986).

--Oct. 22, 4:45 p.m. "Mental Illness and American Society" will feature Rutgers University history professor and research fellow Gerald Grob, who will trace the

(MORE)

evolution of mental health programs from the creation of state insane asylums to de-institutionalization efforts of the late '60s and the more recent community-based strategies. He is the author of "Mental Institutions in America: Social Policy to 1875" (1973) and "Mental Illness and American Society, 1875-1940" (1983).

--Nov. 5, 4:45 p.m. "The Welfare of Families and Children" will feature University of Illinois, Urbana-Champaign, social work professor emeritus Lela Costin. Costin specializes in family and child welfare and in social welfare history. Among the issues she will discuss are the feminization of poverty and the pauperization of children.

--Nov. 19, 7 p.m. "The Constitution and Social Justice" will feature Mary Frances Berry, University of Pennsylvania professor of American thought and former U.S. assistant secretary of education and member of the U.S. Civil Rights Commission. Berry will explore the implications of traditions and values on equality of opportunity, public responsibility, the growth of the "under classes" and the concept of distributive justice.

WINTON CHAIR IN LIBERAL ARTS  
WILL SUPPORT INNOVATIVE RESEARCH AT U OF M

(FOR IMMEDIATE RELEASE)

David Michael Winton and Sarah (Penny) Rand Winton of Wayzata have pledged \$500,000 to establish a Winton Chair in the Liberal Arts at the University of Minnesota as part of the Minnesota Campaign. The gift, which will be matched by the Permanent University Fund, will provide a \$1 million endowed professorship.

Scholars will be chosen by the College of Liberal Arts (CLA) dean in consultation with the donors to fill the chair's seven-year term. The scholar can come from any discipline.

"It is a highly innovative approach for an endowed chair, because it provides flexibility for the college," said Julieann Carson, CLA associate dean for institutional relations. "An extraordinary scholar challenging traditional thought is the special focus for this chair."

David Michael Winton is chair of the board of Pas Lumber Co. in British Columbia. He graduated from Princeton University and Harvard University School of Business.

Penny Rand Winton was the 1985-86 president of the Minnesota Alumni Association. She is a member of the CLA campaign board, and has been involved in volunteer activities for several civic organizations. She is a 1974 CLA graduate.

The Permanent University Fund was released by the 1985 Minnesota Legislature to match private donations for endowed academic positions. The fund, now worth about \$80 million, has accumulated from timber and mineral rights on state land. The Minnesota Campaign, the university's three-year fund-raising effort, has raised \$281 million of its \$300 million goal.

SDI AND GOVERNMENT-FUNDED RESEARCH  
SUBJECT OF U OF M FORUM

(FOR IMMEDIATE RELEASE)

The Strategic Defense Initiative (SDI), government-funded research on college campuses and academic freedom are the subjects of a three-day forum at the University of Minnesota's Coffman Union beginning Oct. 26.

The forum, "Academic Freedom, University Research Policy and the Strategic Defense Initiative," will feature small-group discussions by nationally known scientists, educators and government and military professionals.

First proposed last year by university student Miguel Carter, this year's forum is sponsored by a University of Minnesota student-faculty committee, the Humphrey Institute, Coffman Union and the West Bank Union.

Here is a schedule of events:

Monday, Oct. 26

--7:30 to 9 p.m. "Prospects for Arms Control in Outer Space: Promise, Prospects and Problems" will feature Colin Gray, president of the National Institute for Public Policy, and Kosta Tsipis, senior research physicist at the Massachusetts Institute of Technology. Gray specializes in national security policy, strategic theory and military history; Tsipis is a strong critic of U.S. nuclear power and SDI. Moderator will be Hamline University Law School professor Stephen B. Young, who is on leave from the University of Minnesota Law School.

Tuesday, Oct. 27

--9 a.m. to 11:45 a.m. "The Case: Research Toward A Strategic Defense

(MORE)

Initiative: Strategy, Technology and Policy" will feature Robert Bowman, peace activist and founder and president of the Institute for Space and Security Studies, and Col. George Hess, U.S. Air Force director of survivability, lethality and key technologies in the Defense Department's SDI organization. Humphrey Institute professor and former dean Harlan Cleveland will be moderator.

--1 to 2:30 p.m. "Weapons Development and the University Scientist: Social Protection, Ethical Responsibilities and the Impact of Federal Funding" will feature Alvin Compaan, University of Toledo physics and astronomy professor, University of Minnesota Institute of Technology Dean Ettore F. Infante, MIT physics professor Vera Kistiakowsy and University of Minnesota Carlson School of Management associate professor Ian Maitland. University of Minnesota associate philosophy professor John M. Dolan will be moderator.

--2:40 to 4:30 p.m. "Academic Freedom and University Research Policy" will feature University of Minnesota President Kenneth H. Keller, Harlan Cleveland, Kosta Tsipis and all forum speakers.

--7:30 to 9 p.m. Community open forum.

Wednesday, Oct. 28

--9:30 a.m. to noon. Faculty and staff open forum.

--1 to 4:30 p.m. Student open forum.

--4:30 to 5:30 p.m. Summary and discussion: "Where Do We Go From Here?"

All events are free and open to the public. For more information, call Pam Smith at (612) 625-6178.

## 'MOURNING BECOMES ELECTRA' TRILOGY AT UNIVERSITY THEATER

(FOR IMMEDIATE RELEASE)

The University of Minnesota Theater will present the entire trilogy of Eugene O'Neill's masterpiece "Mourning Becomes Electra" Oct. 23 through Nov. 1.

Rarely performed in its entirety, the play traces the fate of the proud Mannon family of New England. Upon his return from the Civil War, Gen. Ezra Mannon is poisoned by his wife and her lover, the mysterious Capt. Adam Brant. The sea captain turns out to be a member of the disgraced branch of the Mannon family. Still, he manages to attract Ezra's self-possessed daughter Lavinia. Torn between a forbidden love and the determination to avenge her father's murder, Lavinia becomes embroiled in the evil heritage she had long struggled to escape.

O'Neill patterned the play after Aeschylus' Oresteian trilogy. On the surface, the fall of the house of Mannon parallels the fall of the house of Atreus. But on a deeper level, O'Neill has captured the passionate urgency and the horror of an inevitable doom that marks that great work.

Performances will be in the Arena Theater in Rarig Center on the west bank of the Minneapolis campus. Because of the length -- six hours -- a New England dinner will be served during intermission in the nearby Humphrey Center dining room. Shows begin at 5 p.m. Thursdays, Fridays and Saturdays, 3 p.m. Sundays. Tickets are \$6, \$5 for students, senior citizens and University of Minnesota faculty and staff. The optional dinner is an additional \$10. For more information call (612) 625-7505.

## AT&T AWARDS GRANTS TO U OF MINNESOTA

(FOR IMMEDIATE RELEASE)

Two grants totalling \$40,000 have been awarded to the University of Minnesota as part of the AT&T Foundation's Special Purpose Grants in Science and Engineering. The national grant program has awarded more than \$3 million to 39 schools this year in the annual invitational competition.

Two \$20,000 grants will go to the university's computer science and electrical engineering departments.

The computer science grant will be used to purchase equipment to develop a robot test bed for artificial intelligence and real-time programming. The mobile robot will be a basic platform for a variety of experiments and course work.

The electrical engineering grant will be used to buy a microwave spectrum analyzer to be used in research.

"In the current global economy, it is more vital than ever that American higher education maintains its position at the forefront of advanced education in the sciences and technological fields," said Dick Pedersen, head of AT&T's digital IC design department. "By supporting universities at the departmental level, we hope to enhance the quality of facilities and teaching for those students who will go on to lead America forward in technical fields in the future."

The AT&T Foundation, established in 1984, is the principal source of philanthropy for AT&T and its subsidiaries. The foundation's emphasis is on higher education, but it also supports health care, the arts and social action. The foundation matches dollar for dollar contributions made by AT&T employees to eligible colleges, universities and cultural organizations.

U OF M ENROLLMENT DECREASE  
FOLLOWS 'FOCUS' PLAN

(FOR IMMEDIATE RELEASE)

The number of new students entering the University of Minnesota's Twin Cities campus from high school dropped 758 to 4,322 -- a 15 percent decrease from last fall. The number reflects the university's Commitment to Focus self-improvement plans and a legislative agreement to decrease undergraduate enrollment at the Twin Cities campus in order to increase the resources available to each student.

The Twin Cities campus enrollment totaled 44,293 this fall, a 1.6 percent decrease.

The campus's College of Liberal Arts accounted for 576 of the new freshmen drop, although it remains the largest unit at the university with an enrollment of 17,082, up 253 students for a 1.5 percent increase. While most other Twin Cities units show declines, enrollment increased in the Graduate School, University College, the occupational therapy program and the College of Pharmacy.

An increase of 194 students was reported at the university's four coordinate campuses, where the university has not planned for decreases. Crookston's enrollment of 1,136 was down 77 students from last fall. Duluth's enrollment was 7,365, up 64 students from last fall. Enrollment on the Morris campus increased 193 students to 1,967. Waseca's enrollment of 1,163 students was an increase of 14 students.

Enrollment for the five-campus system is down 519 students -- a 0.9 percent decrease -- to 55,924.

## U.S. CONSTITUTION SUBJECT OF LAW SCHOOL SPONSORED LECTURE

(FOR IMMEDIATE RELEASE)

The third in a series of fall lectures commemorating the bicentennial of the U.S. Constitution will be at 12:15 p.m. Nov. 6 at the University of Minnesota.

University of Minnesota law professor Daniel A. Farber will speak on the role of contemporary moral values in interpreting the Constitution and the intent of the document's framers.

A member of the university's Law School faculty since 1981, Farber has taught at the University of Illinois and is a visiting professor at Stanford University Law School. He received bachelor's, master's and law degrees from the University of Illinois and specializes in constitutional law, contracts and environmental law.

The lecture is free and will be held in room 25 of the University of Minnesota Law Building on the west bank of the university's Minneapolis campus.

For more information, call Betsy Baker at (612) 625-5350.

## MEMO TO NEWS PEOPLE

Food allergies and intolerances and adolescent obesity and eating disorders will be among the subjects covered at a conference on nutrition and health Nov. 6 and 7 at the University of Minnesota's Earle Brown Center on the university's St. Paul campus.

Nationally known nutritionist William E. Connor of the Oregon Health Sciences University will speak at 8:30 a.m. Nov. 6. He and his wife, Sonja, a registered dietician, are the authors of the recently released "The New American Diet," published by Simon and Schuster. Connor will be available for reporters' questions after his presentation.

The conference, "Nutrition and Health: Moving into the '90s - Current Issues III," is sponsored by the university's adolescent health program, in conjunction with the university's division of human development and nutrition, food science and nutrition department and the continuing medical and nursing education departments. The Minnesota Health Department and the Dairy Food and Nutrition Council of Minnesota are co-sponsors.

Reporters are welcome at all conference sessions.

## UNIVERSITY FILM SOCIETY OPENS SECOND SCREENING SPACE AT U OF M

(FOR IMMEDIATE RELEASE)

University Film Society will celebrate the grand opening of its new screening space in Nicholson Hall Auditorium on the University of Minnesota's Minneapolis campus Friday (Oct. 30) at 7 p.m.

Nicholson Hall Auditorium seats about 400 and is equipped with 35mm projection. It is about as big as the society's screening space in the university's Bell Museum. The society sought a new location after losing its Cedar Theater venue this summer, following the Coffeehouse Extempore's closing. Two screening spaces are vital to the society's mission of bringing the widest possible variety of foreign and independent films to Twin Cities audiences, said Dave Monahan of the society.

"My Life As A Dog," Lasse Hallstrom's Swedish comedy of a young boy's discovery of life's joys and sorrows, will be featured at the grand opening and will play there for an extended run. Nicholson Hall is at the corner of Pleasant Street S.E. and Pillsbury Drive on the east bank of the Minneapolis campus.

For further information, call Monahan at 627-4431.

## CHILD SEX ABUSE COURSE OFFERED THROUGH U OF M INDEPENDENT STUDY

(FOR IMMEDIATE RELEASE)

Defining, preventing and intervening in child sexual abuse cases are among the topics covered in a television course offered winter quarter through the University of Minnesota's School of Public Health and department of independent study. The course is taught by Robert ten Bensel, a nationally recognized child abuse authority, a professor of public health and pediatrics and an adjunct professor of social work at the university.

The course includes 10 half-hour lectures, which can be viewed on public television channels in the Twin Cities, Duluth, Appleton and Bemidji. Videotapes of course lectures are available. Four upper-division undergraduate credits are awarded upon course completion; arrangements can be made for graduate credit.

For registration information, call (612) 624-9008 or write Department of Independent Study, University of Minnesota, 45 Wesbrook Hall, 77 Pleasant St. S.E., Minneapolis, MN 55455. Refer to the course PubH 5609/SW 5010.

## MINNESOTANS CONCERNED WITH ECONOMY, JOBS, SHOWS U OF M SURVEY

(FOR IMMEDIATE RELEASE)

Concern over Minnesota's economy has replaced taxes as the most important problem in the eyes of its citizens -- especially its rural citizens -- says a survey conducted by the University of Minnesota's Minnesota Center for Survey Research.

The survey on personal finance found a much higher level of pessimism among those living outside the Twin Cities metro area. In general, Minnesota's optimism about personal finance is comparable to the nations' average, although consumer confidence is far below national levels.

The survey of 1,215 Minnesotans conducted between May 27 and July 6 found more than two-thirds of those interviewed cited the state's economy as an important problem facing Minnesotans. Surprisingly, less than half the respondents cited taxes as a problem, said survey director William J. Craig. Historically, state taxes have been Minnesota residents' leading concern.

Though unemployment levels in the state are low, concern over job security was the single most frequently cited problem. Nearly seven out of eight outstate respondents expressed concern over the economy, while only half in the metro area did.

Seven percent more metro than outstate respondents feel they are better off financially than they were last year. As a whole, 45 percent of the surveyed Minnesotans feel they are better off this year than last, a figure comparable to a

(MORE)

national survey conducted earlier this year by the University of Michigan's Survey Research Center.

Minnesotans are 4 percent less optimistic than their national counterparts when predicting their financial situation for 1988: outstate respondents are 7 percent less optimistic than the national average, and metro respondents 7 percent more.

Minnesota differs most from the national average in consumer confidence. While 74 percent of the nation thinks now is a good time to buy major household items, only 54 percent of Minnesotans feel the same way. The largest difference between the two groups is that more Minnesota consumers are undecided and much more cautious than their national counterparts.

Metro respondents have more consumer confidence than outstate respondents -- 60 percent compared to 46 percent -- but metro optimism remains well below that of the national average.

Economic and demographic factors also affect how people respond to questions about personal finances and consumer confidence, but have less impact than on how people view Minnesota's economy. Older people, or those with lower incomes, are much more likely to say their financial situation has not improved in the past year, more likely to say they will not be better off next year and less likely to say that now is a good time to buy.

A story based on the survey findings appears in the October issue of the "Reporter," published by the university's Center for Urban and Regional Affairs (CURA).

For more information, contact Craig at (612) 627-4282 or (612) 625-1551.

## UNIVERSITY THEATER PRESENTS WEDEKIND'S 'SPRING AWAKENING'

(FOR IMMEDIATE RELEASE)

The University of Minnesota Theater presents the German classic "Spring Awakening" Nov. 6 through 15.

One of Frank Wedekind's best and most controversial works, the play is aptly described by its subtitle, "A Children's Tragedy." Put off by their elders, three young people growing up in a small German village are forced to search in secret for answers to their questions about sexuality. They are variously discovered and each in turn becomes the victim of their universal condemnation.

Because the play deals frankly with the subjects of sex and sexual hypocrisy, discretion is advised. Although "Spring Awakening" is almost 100 years old, some viewers may be offended by its theme or the action depicted in the production.

Performances will be in the Thrust Theater in Rarig Center on the west bank of the Minneapolis campus. Show times are 8 p.m. Thursdays, Fridays and Saturdays and 3 p.m. Sundays. Tickets are \$6, \$5 for students, senior citizens and University of Minnesota faculty and staff. For more information and reservations call (612) 625-4001.

JUSTICE SANDRA DAY O'CONNOR  
TO SPEAK AT U OF M LAW SCHOOL

(FOR IMMEDIATE RELEASE)

U.S. Supreme Court Justice Sandra Day O'Connor will deliver the last in a series of University of Minnesota lectures commemorating the bicentennial of the U.S. Constitution at 12:15 p.m. Nov. 20.

O'Connor's speech, "Establishing Justice," is free and will be in room 25 of the Law Building on the west bank of the university's Minneapolis campus.

Before her appointment to the U.S. Supreme Court in 1981, O'Connor was Arizona's assistant attorney general from 1965 to 1969, an Arizona state senator from 1969 to 1975, a Maricopa, Ariz., county superior court judge from 1975 to 1979 and an Arizona appeals court judge from 1979 to 1981.

O'Connor received a bachelor's degree in 1950 and law degree in 1952 from Stanford University. She has been on many legal committees and on the board of directors of the Smithsonian Associates, the Maricopa County Juvenile Detention Home, the Phoenix Historical Society and Blue Cross/Blue Shield of Arizona.

For more information, call Betsy Baker at (612) 625-5350.

ASTRONAUT NELSON TO GIVE FIRST  
KAUFMANIS LECTURE AT U OF M

(FOR IMMEDIATE RELEASE)

Astronaut George D. "Pinky" Nelson will deliver the first Karlis Kaufmanis Lecture at 7:30 p.m. Monday (Nov. 9) in Northrop Auditorium at the University of Minnesota.

Nelson, an astronomer, flew on NASA space shuttle missions in April 1984 and January 1986. He is scheduled to fly on the next shuttle mission, which will begin June 2. His lecture, titled "Reaching for the Stars and Other Space Tales," is free and open to the public.

The lecture series is supported by contributions from former students and friends of Kaufmanis, a university astronomy professor for 16 years. During that time he taught more than 26,000 students and became one of the university's best loved teachers. His "Star of Bethlehem" lecture, which he gives throughout the United States and Canada, is a popular Christmastime event.

## MINNESOTA NEW FIRMS AND ECONOMIC GROWTH FOCUS OF U OF M STUDY

(FOR IMMEDIATE RELEASE)

Targeted programs may be more effective than blanket attempts to stimulate economic growth, suggests a report on Minnesota's new firms. Such programs would provide assistance for firms with a high potential for creating jobs, sales and out-of-state exports. In contrast, blanket attempts to improve the business climate may be too diffuse to have a noticeable effect.

The 1987 Minnesota New Firms Study reports the results of a representative survey of 1,119 active firms established between 1979 and 1984. Conducted through the University of Minnesota's Center for Urban and Regional Affairs, the analysis is targeted to Minnesota's economic growth policy-makers.

Of the firms surveyed, one in four showed high growth. High-growth firms provide more than two-thirds of the jobs, four-fifths of the sales and nine-tenths of the exports reported by new firms. The best predictor of a new firm's potential for jobs and sales is the average growth in the first two years.

The report also found that:

--Between 5,000 and 10,000 new firms are started annually in Minnesota. The total jobs provided by these new firms were 42 to 99 percent of the net increase in Minnesota's jobs between 1978 and 1986.

--Although a majority of new firms are started in the Twin Cities, new firms in the rest of the state are a more important segment of the local economy in greater Minnesota. New firm jobs are a relatively larger portion of existing jobs outside

(MORE)

the Twin Cities.

--Minnesota mirrors a national trend with a relative employment increase in its business service, medical-educational-social service and consumer service sectors and a relative decrease in its retail, distributive service and construction sectors.

--Many entrepreneurs don't have four-year degrees. While about half of all contributions come from firms started by persons with a four-year degree or graduate school experience, a third are started by individuals with technical training or an associate degree and another sixth by individuals with a high school education. Entrepreneurial training is appropriate for all educational systems.

--Most new firm entrepreneurs are satisfied with the region's infrastructure, particularly its worker pool, access to customers and suppliers and quality of life. Widespread dissatisfaction with taxes exists. Many in the survey complained about the costs of worker compensation and liability insurance.

--New firm recruiters feel there's a shortage of employees with sales experience, good social skills and motivation.

Paul D. Reynolds, University of Minnesota sociology professor and the study's principal investigator, and project manager Brenda Miller began the \$90,000 project two years ago. Firms were selected from lists maintained by Dun and Bradstreet. Information was gathered through confidential mail and telephone questionnaires. More than 75 percent of the firms contacted provided information.

Other sponsors of the report are: Metropolitan Council of the Twin Cities; the Minnesota State Board of Vocational-Technical Education; Minnesota Community Colleges; the Minnesota Chamber of Commerce and Industry; the city of St. Paul; the St. Paul Port Authority; the Minnesota Department of Trade and Economic Development; the Minnesota State Planning Agency; and the Minnesota Extension Service.

Reynolds has taught management at the University of Pennsylvania's Wharton School and sociology at the University of California at Riverside and San Francisco

BAUMEISTER TO SPEAK ON POVERTY,  
HANDICAP LINK AT U OF M

(FOR IMMEDIATE RELEASE)

Alfred A. Baumeister, a nationally known expert on mental retardation and other developmental disabilities, will speak on "The New Morbidity: Poverty and Handicapping Conditions in America" at 3 p.m. Nov. 19 in room 2-690, Moos Tower, 515 Delaware St. S.E., on the University of Minnesota's Minneapolis campus.

His talk is the first in a public lecture series on major issues in developmental disabilities sponsored by the university's Institute for Disabilities Studies and the Institute of Child Development. He will focus on the relationship between handicaps and poverty, examining the question of whether the United States is developing a new generation of handicapped individuals through poverty and associated factors such as poor nutrition, drug abuse and family violence.

Baumeister has called this situation a hidden morbidity because on the surface these children do not appear seriously disabled. But, he has suggested, the cost to society of this new generation is great, with consequences that may not be easily reversed. His talk will examine the relationship between social policy and handicapping conditions.

Baumeister is the Alexander Heard Distinguished Service Professor, Harvie Branscomb Distinguished Professor and director of the John F. Kennedy Center for Research on Education and Human Development at Vanderbilt University. He has testified before Congress on social policy and the handicapped, served as an expert witness in numerous major court cases concerning the mentally retarded and has lectured around the world.

SYMPOSIUM TO COMMEMORATE 125TH ANNIVERSARY OF THE  
1862 DAKOTA CONFLICT

(FOR IMMEDIATE RELEASE)

A symposium commemorating the 125th anniversary of the Dakota conflict will be held November 13 and 14 at the University of Minnesota's Hubert H. Humphrey Institute on the west bank of the university's Minneapolis campus.

The conference will provide Indians and non-Indians an opportunity to re-examine the causes of the 1862 conflict between the United States and the Dakota nations and to reflect on how cultural traditions contributed to the mutual misunderstandings that still exist. Sponsored in conjunction with Gov. Rudy Perpich's proclamation of 1987 as the Year of Reconciliation, the symposium is one of several events planned to encourage Minnesotans to learn more about the life and culture of the Dakota people in an attempt to bring about reconciliation between Indians and non-Indians.

The conference will include the following events:

Friday, Nov. 13

--3 to 8 p.m. Sessions with Chris Cavender, coordinator of the Dakota Studies Committee, and Gary Anderson, author and professor of history at Texas A&M University, will explore the events and policies that created the conflict and the continuing implications the conflict has for Indians and non-Indians. Anderson is the author of "Kinsmen of Another Kind: Dakota-White Relations in the Upper Mississippi Valley" and "Little Crow, Spokesman for the Sioux." Vine Deloria, political science professor at the University of Arizona and author of "God is Red" and "The Nations Within," will be the guest speaker at dinner.

(MORE)

Saturday, Nov. 14

--9:30 a.m. to 4 p.m. The first session will address the treaties of 1805, 1851 and 1858, which forced the Dakotas to make major land concessions and led to the 1862 conflict. Concurrent morning workshops will focus on current and past roles of various institutions and professionals of the non-Indian community and their continuing influence. Workshops will address the roles of journalists, educators, lawyers, churches, historians and anthropologists. The afternoon session will emphasize the value and methods of reconciliation.

The basic registration fee is \$25 for the two-day conference; partial registration is \$12 for dinner only; \$15 for Friday or Saturday only. Contact Betty Radcliffe at (612) 625-0576 for reservations. Major funding for the symposium comes from the Otto Bremer Foundation, First Bank St. Paul and the St. Paul Pioneer Press Dispatch.

## MEMO TO NEWS PEOPLE

University of Minnesota regents will discuss budget and capital improvement requests for the 1988 legislative session Friday (Nov. 13).

The university is asking for \$35.4 million in operations and maintenance requests -- of which \$11 million is for rank funding adjustment to meet the university's goal of increasing the amount spent per student. The 1987 legislature approved part of the request, and the 1988 session request seeks full funding of the proposals made by the regents last year. The university is also making a special appropriations request for \$7.1 million for the Supercomputer Institute, the Minnesota Extension Service and Agricultural Experiment Station projects.

The top 20 items of the university's capital improvements request a total of \$107.9 million and include projects from all five university campuses.

Regents will also hear a report on graduation rates of the university's Big Ten certified intercollegiate athletes. The study says that 48.6 percent of the athletes who were freshmen between 1974 and 1982 graduated, compared to 49.5 percent of all non-athletes who began during the same period. Graduation rates are based on the number of students who earned a baccalaureate degree within five years of initial enrollment.

The regents will also discuss how the university allocates assets and uses investment managers for its endowment funds.

Here is a sample of agenda items:

Thursday, Nov. 12, 1:30 p.m.

--Educational planning and policy committee, 238 Morrill Hall. Library computer

(OVER)

system and viral research reports.

--Physical planning and operations committee, 1:30 p.m., 300 Morrill Hall.

Small business procurement and set-aside program annual report.

The following committees meet after the 1:30 meetings adjourn:

--Faculty, staff and student affairs committee, 238 Morrill Hall.

Intercollegiate athletics report.

--Finance and legislative committee, 300 Morrill Hall. Asset allocation and fiscal status review.

Friday, Nov. 13

--Committee of the whole, 8:30 a.m., 238 Morrill Hall. 1988 legislative request; 1988 capital request; Martin Luther King program report.

--Regular monthly meeting starts after committee of the whole adjourns. Final action on committee votes.

## U OF M RECEIVES OSTEOARTHRITIS RESEARCH GRANT

(FOR IMMEDIATE RELEASE)

A \$3 million grant to study osteoarthritis causes and treatments has been awarded to the University of Minnesota's orthopedic surgery department by the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS).

Researchers, including members of the mechanical engineering, laboratory medicine and pathology, and physical medicine and rehabilitation departments, will focus on four basic projects: threshold injury in joints that are not fractured to see if damage can be reversed; spinal arthritis; the role of knee joint looseness following ligament damages and the subsequent development of arthritis; and the role of joint damage in creating a loss of control over other limb muscles.

Joint and connective tissue disorders affect approximately 36 million Americans; 16 million people in this country suffer from osteoarthritis, the most common form of arthritis.

The grant is a Specialized Center of Research grant that will be distributed over five years and is one of three that were given to U.S. medical centers for osteoarthritis research. NIAMS, part of the National Institutes of Health, also made grants to three other centers for rheumatoid arthritis research and another three centers for the study of osteoporosis.

## AGING INFRASTRUCTURE OF EAST BANK TOPIC OF U OF M REGENTS DISCUSSION

(FOR IMMEDIATE RELEASE)

Physical and fiscal problems associated with the aging infrastructure of the east bank of the University of Minnesota's Minneapolis campus were the center of the Board of Regents' discussion Friday (Nov. 13) of the university's 1988 legislative requests.

The university plans to ask the Legislature for \$107.9 million for its top 20 building improvement items -- including updating the physical plant of the east bank, which has some century-old buildings.

"We're a couple of disasters away from closing down a significant portion of the east bank," said Stanley Kegler, the university's vice president for institutional relations and its chief lobbyist.

Kegler told the board that the highest priority in the university's building request is a \$2 million engineering and environmental impact study for replacing one to three coal-fired boilers "as quickly as possible." Projected cost of an updated heating and cooling system is \$28.5 million, with about two years to produce and install after a system is designed and funded. A consultant has already been hired to assess the problem and recommend solutions.

Regent Stanley Sahlstrom of Crookston asked whether the university routinely inspects its physical facilities. University president Kenneth H. Keller told the board that recognizing problems isn't enough if the money for solutions isn't

(MORE)

available. He also said that new management in physical plant operations is making a concerted effort to assess the university's infrastructure.

Also included in the building request is the removal and replacement of 127 transformers and two capacitors that contain PCBs. Under federal Environmental Protection Agency regulations, the university could face fines of \$25,000 per day per unit if replacement isn't completed by the early 1990s.

The top 20 items of the university's 50-item building request, which includes funding for designing and planning, could ultimately total \$300 million worth of new construction.

The Twin Cities campus request for \$12.3 million for a recreational sports center remains open, depending on progress in private fund-raising.

The board also discussed the university's \$35.4 million operating budget request, which includes \$11 million for rank funding adjustments to meet the university's goal of increasing the amount spent on each student so that the university is no lower than third among Big Ten schools in per-student spending.

The university is also making a special appropriations request for \$7.1 million, first among which is \$3 million to develop plans for the Supercomputer Institute. Other special requests include \$375,000 for the Minnesota Extension Service, \$500,000 for Agricultural Experiment Station projects and \$265,000 for the Veterinary Diagnostic Laboratory.

The university was able to cut \$1.1 million from its operating budget request since the last board meeting. Regent Charles F. McGuiggan of Marshall voiced concern over the university's ability to make such a large cut so quickly. "One of the things we've done in the past is to be honest in our needs," Keller said. "I hate to feel we're losing by not exaggerating."

The regents also discussed studies on the graduation rates of Twin Cities and Duluth campus intercollegiate athletes. The Twin Cities study tracked all freshmen student athletes whose names appeared on Big Ten and Western Collegiate Hockey

BUILDING REQUESTS

-3-

Association certified eligibility lists and team rosters between 1974 and 1982. The study says that 48.6 percent of the athletes who were freshmen between 1974 and 1982 graduated, compared to 49.5 percent of all non-athletes who began during the same period.

Of the 388 men in intercollegiate athletics last year, 55 percent were enrolled in the College of Liberal Arts (CLA), 25 percent in General College (GC) and 13 percent in the Institute of Technology (IT); of the 550 women involved, 72 percent were enrolled in CLA, 6 percent in GC and 5 percent in IT.

Last year's cumulative grade point average for students on athletic scholarships improved from the previous two years -- male athletes consistently scored above 2.6 and female athletes consistently scored above 2.8.

## HUMPHREY CENTER SCULPTURE GARDEN OPENS WITH WORK OF SIAH ARMAJANI

(FOR IMMEDIATE RELEASE)

Minnesota's first public work by sculptor Siah Armajani will be featured at the opening of the University of Minnesota's Humphrey Institute's Humphrey Garden in early December.

The 46-year old, Iranian-born Armajani is known for sculpture that treats art as public space, rather than as object or monument. The Minnesota resident has designed bridges, gardens, shelters and interiors for many public and educational institutions across the country, and is the architect of the Walker Art Center's sculpture garden's forthcoming Whitney Bridge.

The Humphrey sculpture garden is the result of a six-year collaboration between the Hubert H. Humphrey Institute of Public Affairs, the university's studio arts department and the University Art Museum. "At the university there are many aspects of research and the Humphrey project is a clear example of research in the visual arts that engages several disciplines and requires both collaboration and cooperation," said Thomas Rose, university studio arts professor and project coordinator.

Located at the north entrance to the institute, the garden is a melange of pathways, sculpture, landscaping, benches and tiles decorated with text from Humphrey's speeches. "It represents a type of public art that emphasizes public in that the design is an overall organization of an exterior space to suit the needs of a diverse group of people," Rose said.

(MORE)

Funding for the Humphrey Garden was provided by the National Endowment for the Arts, the Northwest Area Foundation, General Mills, Sage and John Cowles, Judy and Kenneth Dayton and the Dayton Hudson Foundation. A formal dedication is planned for April.

For more information, call Rose at (612) 625-8096 or (612) 625-0743.

## NINE NEW MEMBERS JOIN CARLSON SCHOOL BOARD OF OVERSEERS

(FOR IMMEDIATE RELEASE)

Nine Twin Cities executives were installed as members of the board of overseers of the University of Minnesota's Carlson School of Management at the board's annual meeting recently.

New members are: Coleman Bloomfield, chair, president and chief executive officer (CEO) of The Minnesota Mutual Life Insurance Co.; Albert D. Etchelecu, president and CEO of Diversified Energies; James J. Howard, president of Information Markets Group, US West; Gerald J. Mitchell, executive vice president of Cargill; Lawrence Perlman, executive vice president of Control Data Corp.; Terry Saario, president Northwest Area Foundation; Robert R. Taylor, president and CEO of Minnetonka; and James Watkins, president of Golden Valley Microwave Foods.

Members serve three-year terms on the board, which is an advisory group for the school. The board's membership is 42.

In his remarks at the meeting, Carlson School Dean Preston Townley presented these highlights of the 1986-87 academic year and fall enrollment:

--Undergraduate admissions were down 12 percent this fall in response to the university's Commitment to Focus self-improvement plan. This year's average

(MORE)

quarterly enrollment is expected to be 1,290 students. By 1988-89, the school hopes to achieve its target enrrollment of 1,175 students.

--Applications to the day MBA (master of business administration) program are up 39.4 percent this year. GMAT (Graduate Management Admission Test) scores and grade point averages of incoming MBA students are also up.

--The doctoral program has shown marked improvement over the last seven years, with applications increasing by 178 percent and admissions as a percent of applicants dropping from 37 to 15 percent. This drop illustrates the school's ability to be increasingly selective in its admissions, Townley said.

--Salary offers for Carlson School graduates were up last year. MBA salaries increased 7.4 percent and salaries for industrial relations master's graduates increased 8.5 percent. The number of companies visiting campus increased from 164 to 185, and 1,000 more interviews were held.

--The school raised \$7 million in private funds last year, passing \$36 million on its way to its Minnesota Campaign goal of \$40 million. The Minnesota Campaign is the university's three-year fund-raising campaign. Townley also commented on the university's Strategy for Focus planning document currently under consideration by central administration, saying that no decisions have been made so far that affect the Carlson School of Management.

NAJARIAN NAMED HONORARY  
FELLOW IN ROYAL COLLEGE OF SURGEONS

(FOR IMMEDIATE RELEASE)

John S. Najarian, chief of surgery at the University of Minnesota, was named an honorary fellow in England's Royal College of Surgeons Nov. 12 in London. Najarian also is holder of the Jay Phillips Chair in Surgery and is a Regents' Professor at the university.

Honorary fellowship in the college is limited to those who have demonstrated outstanding ability in surgery or allied subjects, or who have been of great service to the college. The number of living honorary fellows is limited to 150.

The college has been one of the world's most prestigious medical societies since its founding in the late 18th century.

UNIVERSITY THEATER PRESENTS 'BROADWAY'

(FOR IMMEDIATE RELEASE)

University of Minnesota Theater will present George Abbott and Philip Dunning's "Broadway" Nov. 20 through Jan. 10.

Speakeasies and jazz, show girls, gangsters and an array of Roaring '20s characters light up the stage in this neglected American classic.

Billie Moore, a sweet young thing, is hoofing it at the Paradise Night Club. The emcee, Roy Lane, tries to persuade her to hit the big time with him, but her sugar daddy, the rich and somewhat nefarious Steve Crandall, has other plans. The police and a Chicago gang get involved after Harlem gang leader "Scar" Edwards is shot, leading to a surprising and dramatic grand finale.

This year marks the 100th anniversary of Abbott's birth. "Broadway" was his first major success and established him as a master of fast-paced action. "Everything was perfect," Abbott later wrote. "'Broadway' was the hit of hits."

Performances will be in the Proscenium Theater in Rarig Center, on the west bank of the university's Minneapolis campus. Shows begin at 8 p.m. Thursdays, Fridays and Saturdays; 3 p.m. Sundays. Performances will be suspended after the Dec. 6 show and will resume Jan. 7. Tickets are \$6, \$5 for students, senior citizens and university faculty and staff. For more information and reservations call 625-4001.

UNIVERSITY AND MEDTRONIC TO  
PARTICIPATE IN RESEARCH PARTNERSHIP

(FOR IMMEDIATE RELEASE)

The University of Minnesota Medical School and Medtronic have agreed on a partnership to promote research and development in cardiovascular technology.

Medtronic will make a single \$195,000 gift to the university for physical assets necessary for research. Medtronic will also provide financial support of \$125,000 each for up to three university Medical School postdoctoral researchers -- one in cardiac surgery and two in cardiovascular medicine -- for at least a year. Additionally, up to six Medtronic research employees will be housed at the university for at least a year. All aspects of the agreement except the single financial gift are subject to renewal after a year.

"The university and Medtronic and the sciences of cardiovascular medicine and biomedical engineering will benefit from this unique and exciting relationship," said David M. Brown, dean of the university's Medical School. "The translation of science into the creation of innovative products that will benefit health will be enhanced by this program. This agreement will be a signpost for the development of university-industry relations."

The partnership formally began on Nov. 1 and will be up for renewal next November. "Medtronic is pleased to expand our long and productive relationship with the university with such a mutually beneficial undertaking," said Winston R. Wallin, chair and chief executive officer of Medtronic. "We are enthusiastic about the promise this partnership holds for the development of opportunities in cardiovascular therapies."

## JAPANESE COMPANY GIVES U OF M FIRST FOREIGN-ENDOWED PROFESSORSHIP

(FOR IMMEDIATE RELEASE)

The Shimizu Construction Co. Ltd. of Tokyo has pledged \$250,000 toward creation of the Shimizu Professorship in Civil and Mineral Engineering at the University of Minnesota.

The Shimizu Professorship will be formally presented at 9:45 a.m. Friday (Nov. 20) in room 238 Morrill Hall on the University of Minnesota's Minneapolis campus. Roger Benjamin, academic vice president and Twin Cities campus provost, will present a limited-edition Minnesota Campaign chair to Yorihiro Osaki, executive vice president of Shimizu, in recognition of his company's gift. Benjamin, who has studied in Japan, is expected to address the group in Japanese.

The endowed professorship is the first donated by a foreign company or person. Shimizu's Minnesota Campaign contribution will be matched by the Permanent University Fund, which was released by the Minnesota Legislature in 1985 to supplement campaign gifts. As of Oct. 1, the three-year fund-raising drive had raised \$281 million of its \$300 million goal; 110 chairs and professorships have been established through private gifts of \$250,000 or more.

For the first 10 years of the program, professorship holders will direct a research program in an area determined by the university's civil and mineral engineering department and the Shimizu Co. The research will relate to underground space utilization and underground construction. After 10 years, the professorship

(MORE)

will broaden to include any aspects of geotechnical engineering or underground construction.

Shimizu, one of Japan's largest construction companies, has been developing underground facilities and related technologies for the past few years. Its decision to fund a professorship grew out of its relationship with the civil and mineral engineering department's Underground Space Center.

U.S. JUSTICE O'CONNOR TO RECEIVE  
HONORARY DEGREE FROM U OF M

(FOR IMMEDIATE RELEASE)

U.S. Supreme Court Justice Sandra Day O'Connor will receive an honorary doctor of laws degree from the University of Minnesota Friday (Nov. 20) at 12:15 p.m. on the university's Minneapolis campus.

O'Connor will be on campus to deliver the last in a series of lectures commemorating the bicentennial of the U.S. Constitution. The speech, "Establishing Justice," will begin after the honorary degree is presented by David Lebedoff, chair of the university Board of Regents.

The presentation and speech are scheduled to be in room 25 Law Building, but may be moved to another campus location. Call Betsy Baker, assistant Law School dean, at (612) 625-5350 for details.

The honorary degree is being awarded in recognition of O'Connor's legal and judicial contributions, her interest in public causes and her accomplishments as a woman in the field of law.

O'Connor began her law career as a civil attorney with the Quartermaster Market Center from 1954 to 1957. She was Arizona's assistant attorney general from 1965 to 1969, an Arizona state senator from 1969 to 1975, a Maricopa, Ariz., county superior court judge from 1975 to 1979 and an Arizona appeals court judge from 1979 to 1981. She was appointed to the U.S. Supreme Court in 1981.

O'Connor received a bachelor's degree in 1950 and a law degree in 1952 from Stanford University. She has been on many legal committees and on the board of directors of the Smithsonian Associates, the Maricopa County Juvenile Detention Home, the Phoenix Historical Society and Blue Cross/Blue Shield of Arizona.

## TWIN CITIES BLACK FEMALE LEADERS TO ADDRESS CONFERENCE

(FOR IMMEDIATE RELEASE)

A panel of Twin Cities black female leaders will address a conference, "Courage to Lead: Major Challenges Facing Black Women Leaders Today," Dec. 5 from 9 a.m. to 3 p.m. in the Wilkins Seminar Room at the University of Minnesota's Hubert H. Humphrey Institute.

The conference, sponsored by the Humphrey Institute's Reflective Leadership Center and the Junior League of Minneapolis, is the first in a series of interactive educational programs designed to create an opportunity for black women from diverse backgrounds to recognize, develop and exercise their leadership potential and to give them impetus to assume greater leadership roles in our communities.

Drawing on the leadership experiences of the panel members, the conference will provide women an opportunity to identify major challenges they face in their personal and professional lives, to explore commonalities and opportunities for working together and to begin to develop strategies for addressing public policy and personal issues.

Panel members are: Pamela Alexander, district judge, Hennepin County; Margaret Benton Jones, president, National Council of Negro Women, Minneapolis; Gloria Hunter, executive director, W. Harry Davis Foundation; Linda Johnson, vice president and chief operations officer, Mid America Travel, and former commissioner, Minnesota Department of Human Rights; and Mary Taylor, executive director, Harriet Tubman

(MORE)

BLACK FEMALE LEADERS

-2-

Women's Shelter.

The conference is open to the public and is targeted to black women of all ages and diverse experiences. Cost of registration, which includes lunch, is \$10 for students or senior citizens, \$15 general admission and \$20 to include a contribution to the National Leadership Center for Black Women. Limited scholarships are available.

## GEOMETRY SUPERCOMPUTING PROJECT TAKES SHAPE AT U OF M

(FOR IMMEDIATE RELEASE)

The University of Minnesota's Cray-2 supercomputers will be the focal point of a three-year, \$1.5 million National Science Foundation (NSF) study of geometry.

Thirteen mathematicians at nine sites in the United States and Europe will participate in the project, the first of its kind according to university mathematician Al Marden, who organized the group.

"We're going to work with each other and with the supercomputer via NSFNET, the new national networking initiative for scientists being put together by NSF," Marden said. "In short, our project involves the exploration of uncharted mathematical seas, computing and examining mathematical structures that have never been seen before.

"You don't need a supercomputer to draw a circle, but to display on a computer monitor even something as familiar as a slinky or a complicated knot requires both mathematical analysis and the development of good algorithms for generating the picture. In general, the better the algorithm, the better the picture and the less the computing power needed to draw it; therefore, more can be computed faster. Thus our work will involve both research in mathematics itself and the development of algorithms required to compute and display mathematical objects."

Though made possible by an NSF grant, the project also involves a substantial commitment from the university and its Supercomputer Institute. The university will sponsor visiting scientists, contribute office space, pay administrative costs,

(MORE)

waive most overhead and donate 600 hours of time on its Cray-2 supercomputers. The project will be administered through the university's Office of Academic Affairs.

For more information on the project, contact V. Rama Murthy, university vice provost and associate vice president for academic affairs, (612) 625-0051, or Donald Truhlar, director of the university's Minnesota Supercomputer Institute, (612) 625-1818 or (612) 624-7555. Al Marden will be at Princeton University's Institute for Advanced Study, (609) 734-8000, until mid-December.

Members of the Geometry Computing Group are:

Frederick Almgren, mathematics professor, Princeton University

James Cannon, Orson Pratt professor of mathematics, Brigham Young University

David Dobkin, computer science professor, Princeton University

Adrien Douady, mathematics professor, Ecole Normale Superieure, Paris

David B.A. Epstein, mathematics professor, University of Warwick, Coventry, England

John Hubbard, mathematics professor, Cornell University

Benoit Mandelbrot, I.B.M. fellow and Abraham Robinson adjunct professor of  
mathematical sciences, Yale University

Albert Marden, mathematics professor, University of Minnesota

John Milnor, Institute for Advanced Study, Princeton University

David Mumford, Higgins professor of mathematics and applied science, Harvard  
University

Robert Tarjan, AT&T Bell Labs distinguished technical staff member and James S.  
McDonnell distinguished university professor of computer science, Princeton  
University

William Thurston, mathematics professor, Princeton University

Allan Wilks, AT&T Bell Labs technical staff member. Wilks is technical adviser to  
the group.

COLD CLIMATE BUILDING RESEARCH  
CENTER OPENS AT U OF M

(FOR IMMEDIATE RELEASE)

The Minnesota Cold Climate Building Research Center (MN-BRC), which was created with \$4.9 million released by Gov. Rudy Perpich from Petroleum Violation escrow funds assigned to Minnesota, will open Monday (Nov. 30) at the University of Minnesota.

University president Kenneth H. Keller will host a reception to honor the new center from 4 to 6 p.m. in the Campus Club library, Coffman Union, on the Minneapolis campus.

The university will support MN-BRC by paying administrative costs for five years.

The center will focus on creating energy-efficient, livable buildings for cold climates. University researchers will tackle problems in such areas as daylighting, indoor air quality, weatherization, building materials and commercial and residential energy use. It will also focus on transferring energy-saving technology to buildings being built or retrofitted for energy efficiency. An advisory committee for the center includes architects, mechanical engineers, representatives from utilities companies and government officials.

"This is a place where the private and public sectors can come together to work in these areas," said Mary Vogel-Heffernan, research coordinator in the university's School of Architecture and Landscape Architecture. "There have been a number of advances in energy technology in the last 10 years, but problems in

(MORE)

applying them. We need interdisciplinary research to find solutions to problems in building design and performance."

The National Association of Home Builders is considering designing MN-BRC as one of three or four regional centers for housing research. The MN-BRC office is in room 110 of the School of Architecture and Landscape Architecture. A search is under way for a director.

## MEMO TO NEWS PEOPLE

University of Minnesota regents will vote Friday (Dec. 11) on budget and capital improvement requests for the 1988 legislative session.

The university is asking for \$107.9 million for its top 20 capital improvements, \$34.3 million for operations and maintenance and \$7.1 million for special appropriations.

Regents will also hear a report on the university's proposed nuclear magnetic resonance facility. The underground construction will serve the physics and biochemistry departments in the study of chemical processes.

Here is a sample of agenda items:

### Thursday, Dec. 10

11 a.m.

--Special meeting for new regents, 238 Morrill Hall. Update on university fund-raising through the Minnesota Campaign.

1:30 p.m.

--Educational planning and policy committee, 238 Morrill Hall. International education update.

-- Physical planning and operations committee, 300 Morrill Hall. Nuclear magnetic resonance facility report.

The following committees meet after the 1:30 meetings adjourn:

--Faculty, staff and student affairs committee, 238 Morrill Hall.

--Finance and legislative committee, 300 Morrill Hall.

(OVER)

Friday, Dec. 11

--Committee of the whole, 8:30 a.m., 238 Morrill Hall. Voting on 1988 legislative requests.

--Regular monthly meeting starts after committee of the whole adjourns. Final action on committee votes.

**NOTE TO NEWS PEOPLE: IF YOU'RE INTERESTED IN  
TALKING TO KAMPELMAN SATURDAY AFTERNOON, CALL  
JOYCE WASCOE BY 4:30 P.M. WEDNESDAY.**

KAMPELMAN TO RECEIVE U OF M HONORARY DEGREE

(FOR IMMEDIATE RELEASE)

U. S. chief arms negotiator Max M. Kampelman will receive an honorary degree from the University of Minnesota at 1 p.m. Sunday (Dec. 13) at the College of Liberal Arts commencement in Northrop Auditorium on the university's Minneapolis campus.

Kampelman, who is involved in the Strategic Arms Reduction Treaty and Intermediate-range Nuclear Forces treaty negotiations with the Soviets and is an adviser to Secretary of State George Schultz, will deliver the commencement address titled "The Soviet Union: A Commencement?"

The honorary doctor of humane letters degree is being awarded to Kampelman, a University of Minnesota graduate and former faculty member, in recognition of his contributions to government and international relations, his attention to public causes and his devotion to diplomacy and scholarly productivity.

Born in 1920, Kampelman began his career as a researcher at the International Ladies Garment Workers Union in 1940. From there he became a law clerk at the New York City firm of Phillips, Nizer, Benjamin & Krim. He taught political science at the University of Minnesota from 1946 to 1948 and became legislative counsel to Sen. Hubert H. Humphrey in 1949. He was a partner in the law firm of Fried, Frank, Harris, Shriver & Kampelman from 1956 to 1985.

(MORE)

Kampelman is currently ambassador and head of the U.S. delegation to the Negotiations on Nuclear and Space Arms in Geneva. He is the founder and original moderator of the television show "Washington Week in Review" and has been on several committees, including the Anti-Defamation League of B'nai B'rith and the Friends of the National Zoo. He is the author of the 1957 book "The Communist Party vs. the CIO: A Study in Power Politics."

Kampelman received a bachelor's degree from New York University in 1940, a law degree from New York University's School of Law in 1945 and a master's and doctorate in political science from the University of Minnesota in 1946 and 1951, respectively. He has honorary degrees from Bates University, Georgetown University, Hebrew Union College and the University of Jerusalem.

## U OF M FOUNDATION ELECTS BOARD MEMBERS

(FOR IMMEDIATE RELEASE)

Five new trustees recently were elected to the University of Minnesota Foundation board, which oversees the University's private fund-raising programs.

New trustees are: Sage F. Cowles, Minneapolis dancer and choreographer; Livio D. DeSimone, executive vice president, 3M; University Board of Regents chair David M. Lebedoff, partner, Lindquist and Vennum; former U.S. Vice President Walter F. Mondale, attorney, Dorsey and Whitney; and Roger Parkinson, president and publisher, Star Tribune newspaper.

These four foundation officers will continue their terms: chair Dale R. Olseth, president and chief executive officer, Bio-Metric Systems; president Russell M. Bennett, partner, Gray, Plant, Mooty, Mooty and Bennett; treasurer Steven R. Pflaum, partner, Leonard, Street and Deinard; and secretary Luella G. Goldberg, member of numerous boards of directors.

This year, which is the foundation's 25th anniversary, was highlighted by the university's top ranking in private support among U.S. public universities during 1985-86, when the university raised \$93.7 million in voluntary support, according to figures reported by the Council for Aid to Education. Among all universities, the University of Minnesota ranked seventh, up two positions from 1984-85, when it received \$66.2 million and ranked ninth.

U OF M OKs LEGISLATIVE REQUESTS;  
PLANS TO LOBBY AGAINST SALES TAX

(FOR IMMEDIATE RELEASE)

University of Minnesota regents Friday (Dec. 11) approved the 1988 legislative requests for \$107.9 million in capital improvements, \$34.3 million in operations and maintenance and \$7.1 million in special appropriations.

A priority in the session is university exemption from the 6 percent sales tax on state agencies passed last session. Under the bill, all university units, except its hospital, are required to pay sales tax on expendable items. If not repealed, the tax is expected to cost the university \$13 million over the next biennium, said Stanley Kegler, the university's vice president for institutional relations and its chief lobbyist. The tax could translate into more student fees and interfere with the university's goal of increasing the amount spent on each student.

Topping the priority list of 20 capital improvements is a \$2 million request for an engineering and environmental impact study of the east bank of the Minneapolis campus's boiler system. The request, however, is "subject to considerable modification" before it's presented, said Kegler. Regent Charles F. McGuiggan of Marshall recommended the university adopt an energy management policy in addition to the engineering and environmental impact study.

The board heard a report on complications in constructing an Olympic-sized swimming facility for the 1990 U.S. Olympic Festival. Incorporating Memorial Stadium into the planned sports and recreation center on the university's Minneapo-

(MORE)

lis campus could be difficult, university President Kenneth H. Keller said.

The 70-meter pool required by the U.S. Olympic Committee is longer than the pool proposed in the three-phase sports and recreation center planned by the university. The increased length may mean that the swimming facility may encroach on the stadium area that would be preserved under that plan.

The regents will be asked to act on a proposed contract with the Minnesota Amateur Sports Commission next month to ensure the commission's \$3 million contribution to the construction costs. Keller stressed the need to act quickly because the commission will provide funding only if the university can guarantee that the facility will be ready for the 1990 festival.

The regents also heard a report on the internal planning progress report by Roger Benjamin, academic affairs vice president, on implementation of the university's Commitment to Focus plan for improvement. Benjamin said the administration needs the month of December to work on "an overall roadmap" to present to the regents for discussion and review. Regent action on planning recommendations will be postponed a month until April.

Benjamin spoke in support of a research policy council that would help formulate graduate research policy, the formation of a dean's council for the biological sciences and an academy or faculty of art and science, calling the proposals "evolutionary, not revolutionary."

Regents also heard a report on international education by Robert B. Kvavik, assistant vice president for international education. Kvavik stressed the need to make the university's international program more "discipline oriented," making language and research skills "a core, not just a supplement" of the program. The university needs to bring the number of students it sends abroad "up to parity" from 600 students and "out of fiscal purgatory," Kvavik said. Currently, international programs are scattered about the university in a number of non-related departments.

## MEMO TO NEWS PEOPLE

Minnesota Twins executive vice president Andy MacPhail will present the keynote address at the University of Minnesota's Carlson School of Management commencement ceremony Sunday (Dec. 20) at 2 p.m. in Willey Hall Auditorium on the west bank of the university's Minneapolis campus.

MacPhail's address is expected to last 15 to 20 minutes. About 150 students and 600 guests will attend.

MacPhail was born in 1953 in Bronxville, N.Y., and graduated from Dickinson College, Penn., in 1976. He began his career that year as business manager for the Bradenton Cubs. He was assistant director of player development and scouting for the Chicago Cubs from 1977 to 1981. He joined the Houston Astros as assistant general manager in 1982, until joining the Twins in 1985. He is the son of Lee MacPhail, former American League president, and grandson of Larry MacPhail, a general manager and baseball club owner.

## INFORMATION FOR RELEASE AFTER 5 P.M. DEC. 20

### MEMO TO NEWS PEOPLE

The University of Minnesota defeated Georgia Tech to win the 1987 national "College Bowl" championship in a match to be televised Sunday (Dec. 20) at 4:30 p.m. on The Disney Channel.

The match, taped at Walt Disney World's EPCOT Center in Orlando, Fla., was hosted by Dick Cavett. The Minnesota team won \$10,000 in scholarships.

To win the 1987 title, the Minnesota team defeated Cornell, Georgetown and Western Connecticut State universities as they advanced to the top spot among 16 teams in the single-elimination tournament. The competition began airing on The Disney Channel Sept. 13.

The 1987 team members and their telephone numbers (for your use only) are:

--Mark Erdahl, a theater student from Hopkins. Before Dec. 20, you can reach him at (612) 331-7180, and after Dec. 20 at 938-7081.

--Bob Maranto, who recently earned a Ph.D. in political science. You can reach him in Baltimore at (703) 524-8378.

--Matt Marta, 1987 team captain and tournament's most valuable player and a member of the University of Minnesota's 1984 championship team. He is a senior in economics and English and is from Chicago. You can reach him at (612) 729-6062.

--Bruce Simmons, who recently earned a bachelor's degree in mathematics. He's been on "College Bowl" teams at the university and at Duke University for three years. He's from Alexandria, Va. You can reach him at (612) 729-6062.

(OVER)

The university's college bowl team is coordinated by the West Bank Union with financial support from the West Bank Union and student and staff fundraising. Dave Dorman, University of Minnesota college bowl adviser, can be reached at (612) 625-8685; Pam Smith, of the University of Minnesota student activities center, can be reached at (612) 625-6178; and Amy Booth, a representative of The Disney Channel, can be reached at (800) 874-1687.

The program will be shown at the West Bank Union auditorium Sunday afternoon.

"College Bowl," which ended a 12-year network television run in 1971 and was known as "the varsity sport of the mind," was sanctioned by the Association of College Unions-International in 1977. Now, 500 colleges and universities hold standard-format tryouts, team selections and practices -- usually with a set of "College Bowl" questions.

PATRICIA SCHROEDER  
TO DELIVER CARLSON LECTURE

(FOR IMMEDIATE RELEASE)

U.S. Rep. Patricia Schroeder, D.-Colo., will be the next Distinguished Carlson lecturer at Northrop Auditorium at 12:15 p.m., Jan. 29. Schroeder's address, "Election '88: Are We Americans Facing the Issues?" is free and open to the public.

Free general admission tickets are available beginning Tuesday (Dec. 22) at Tickets to Go in the IDS Center, at Town Square's information booth and at these university locations: Coffman Union information desk; room 235 of the Humphrey Center; and room 42 of the St. Paul Student Center. Tickets can also be obtained by calling the Humphrey Institute at (612) 625-7514. Remaining tickets will be distributed at the door the day of the lecture. Seating is on a first-come, first-served basis.

Schroeder's talk will be broadcast live on KSJN radio (1330 AM and 91.1 FM) and KUOM radio (770 AM).

Schroeder, the senior woman in Congress, has emerged as the most prominent woman in U.S. politics, says Savvy magazine. Elected to Congress in 1972, Schroeder was victorious in a campaign in which she opposed the Vietnam War and stressed environmental issues. In her first year in the House, she won a seat on the Armed Services Committee over strong objection from the committee's chair. She was the first woman to serve on the committee. She has served in the House leadership as a Democratic whip since 1978, and this year was appointed deputy whip for arms control legislation.

(MORE)

She is also a member of the House Judiciary Committee, and chair of the Subcommittee on Civil Service of the House Post Office and Civil Service Committee, where she's a leading advocate of civil service reform and whistle-blower protection. She played a major role in the passage of the Voting Rights Act and the 1984 Civil Rights Act, and is a primary sponsor of the Equal Rights Amendment. In the House Select Committee on Children, Youth and Families, Schroeder chairs the committee's economic security task force where she has championed work and family issues. Schroeder is also co-chair of the Congressional Caucus for Women's Issues, a bipartisan group of representatives devoted to advancing women's legislation in Congress. Schroeder is the recipient of numerous honorary degrees and awards.

In 1986, she received the Peace Award from the Committee for SANE Nuclear Policy for her efforts to contribute to education, communication and outreach for peace and justice.

She is an alumna of the University of Minnesota, where she graduated magna cum laude and Phi Beta Kappa in 1961. In June, Schroeder was given the University of Minnesota's Outstanding Achievement Award, the highest alumni honor given by the university. She has a law degree from Harvard Law School and is a member of the Colorado bar.

Public parking for the lecture is available at the Harvard Street ramp and the Church Street garage, directly east of Northrop. Free shuttle bus service will be provided every 10 minutes beginning at 10:45 a.m. from the municipal ramp adjacent to the Holiday Inn Crowne Plaza Metrodome, near the west bank of the Minneapolis campus. For further information call (612) 625-7514.

The Carlson Lecture Series is managed by the Humphrey Institute's Citizen Education Program and made possible through a \$1 million gift from Curtis L. Carlson, founder and chair of the Minneapolis-based Carlson Companies. The Carlson Lecture Series brings distinguished national and international leaders to the university to speak on current topics of public interest.

## HUMPHREY INSTITUTE AND MINNEAPOLIS JUNIOR LEAGUE SPONSOR SEMINAR

(FOR IMMEDIATE RELEASE)

A 10-part seminar, Time Out for Women: Readings and Reflections on Women's Leadership, will begin Jan. 7 at the University of Minnesota's Hubert H. Humphrey Institute of Public Affairs. The seminar will explore the dynamics of women's leadership and will encourage women to think critically and to act politically through writing, speaking and other expressive activity.

The seminar series is sponsored by the Women in Leadership Program, a collaborative effort of the Humphrey Institute's Reflective Leadership Center and the Junior League of Minneapolis.

Barbara Crosby, a writer and teacher on the Reflective Leadership Center staff at the Humphrey Institute, will lead the seminar. She has just returned from a year in London, where she did comparative studies on women's leadership in the U.S. and Great Britain.

The seminar will meet on Thursdays from 7 to 9:30 p.m., in the Wilkins Seminar Room (215) in the Humphrey Center, 301 19th Ave. S., on the west bank of the university's Minneapolis campus.

Participation is limited and priority will be given to those who register first. Cost of the seminar is \$250. For more information, call Karin Lunde at the Reflective Leadership Center, (612) 625-2581.

## KEY LEGISLATIVE ISSUES SUBJECT OF SEMINAR ON WOMEN'S ROLES

(FOR IMMEDIATE RELEASE)

Key 1988 Minnesota legislative issues, including economic development, surrogate motherhood, the Minnesota tax system and child care are subjects of an eight-week seminar series beginning Jan. 12 at the University of Minnesota's Hubert H. Humphrey Institute of Public Affairs. The series, "Minnesota Issues 1988: The Power and Leadership of Women," is sponsored by the Women in Leadership Program, a collaborative effort of the Humphrey Institute's Reflective Leadership Center and the Junior League of Minneapolis.

Policy analysts Judy Corrao, DFL, and Lucy Hahn, I-R, will moderate the series. Along with gaining an understanding of current issues, participants will learn how public policy is developed and how they can influence it.

Panel discussions or small group meetings at each session will be led by Minnesota women leaders, including Kathleen Callahan, Piper Capital Management; Mary Ann Curry, Minnesota Chamber of Commerce; Kathleen Gaylord, Northwest Airlines; Marlene Johnson, Minnesota lieutenant governor; Dorothy McClung, Minnesota Department of Revenue; Abby McKenzie, Minnesota Department of Trade and Economic Development; Donna Peterson, state senator; Ann Rest, state representative; Carolyn Rodriguez, child care expert and former legislator; Kay Taylor, community activist; Constance Waterous, strategic planner and state and local fiscal policy analyst; Ann Wynia, Minnesota House majority leader; and Faith Zwempke, lobbyist.

DELUXE CHECK PRINTERS GIFT  
CREATES U OF M WRITING PROGRAM

(FOR IMMEDIATE RELEASE)

A \$1 million gift from Deluxe Check Printers will help launch a University of Minnesota program for research and development of methods for improving the way writing is assessed and taught.

The gift, which is being made through the university's Minnesota Campaign, will support research in a Center for Interdisciplinary Studies in Writing. The center will focus on an approach to writing instruction, which is known at the university as Writing Across the Curriculum because of its emphasis on improving writing in all areas of study.

The \$1 million will be matched by money from unrestricted gifts to the Minnesota Campaign.

"The ability to write clearly and effectively is essential for success in all walks of life," said Harold Haverty, president and chief executive officer of Deluxe Check Printers. "We are pleased to support the University of Minnesota in this unique program, which will help students of all disciplines develop the writing skills necessary for their chosen fields."

In its proposal to Deluxe Check Printers, the university cited the faculty's "broad consensus that we need to make writing a fundamental part of a student's entire educational experience, not just an isolated requirement to be completed in one or two courses." Proposals for an integrated writing program have originated in the university's colleges of liberal arts and agriculture and its General College,

(MORE)

the proposal says, illustrating the timeliness of the program.

The program is also timely, university President Kenneth H. Keller said, because of the university's commitment to improving undergraduate education.

In March, the College of Liberal Arts' governing body approved tougher writing requirements for admission and graduation for students entering the university's largest college beginning in 1991. The number of required writing courses will double to four, and a 10- to 25-page writing portfolio will be required for admission.

The Minnesota Campaign is the university's three-year effort to raise \$300 million. As of Dec. 1, the campaign has raised \$296 million.

## U OF M CO-SPONSORS COLLEGE ART CONFERENCE

(FOR IMMEDIATE RELEASE)

The University of Minnesota's studio arts department and the Minneapolis College of Art and Design will co-sponsor the 51st annual Mid-America College Art Association conference to be held at the Ritz Hotel in Minneapolis Wednesday through Saturday (Oct. 21 through 24).

This year's theme, "Visions and Revisions," will challenge common ideas about studio art, design, art history and criticism through four days of panel discussions, lectures and tours of public and retail galleries in the Twin Cities.

Wednesday afternoon's keynote speaker on design will be London design educator Ken Baynes, who pioneered the first design education department at the Royal College of Art. His talk will begin at 3:30. New York author Lucy Lippard, a passionate critic of art's role in a changing cultural environment, will speak on art criticism at 8 p.m. Wednesday. Charles Harrison, art history professor at the Open University, Milton Keynes, England, will deliver Thursday's keynote address on art history at 8 p.m. Artist, philosopher and theorist Robert Irwin of San Diego, whose work has been exhibited at the Museum of Modern Art, the Whitney, the Museum of Contemporary Art in Chicago and the Walker Art Center, will speak on studio arts at 8 p.m. Friday.

The Mid-America College Art Association has constituencies in 35 states to promote the teaching of art and communication of new ideas, theories and techniques.

Registration information is available from Leslie Denny at (612) 625-0727.
