NOTICE TO THE DEPARTMENTS

There are three deliveries and collections of local mail per day on the campus. A complete collection from the Administrative offices and from each collection box on the campus is made after 5:30 in the evening. This mail, along with that collected the last collection in the afternoon, is sorted and delivered back to the departments before the offices are open in the morning, thus making one complete collection and delivery over night. The Administrative offices are again collected at 9:30 in the morning, the mail sorted, and messengers sent out in three different directions to make a delivery and collection, which is completed some time before noon. The first thing in the afternoon another delivery and collection is made to the Administrative offices, the mail sorted, and another complete delivery and collection made on the entire campus, thus completing three deliveries and collections on the campus per day.

The longest possible time that a communication should take to go from one place to another on the campus is four hours, exclusive of the hours over night. If a communication takes a longer time than this it should be reported at once. Mail incorrectly delivered or delayed, should be reported at once for it is only in this way that we can determine the cause or tell how efficiently the Post Office is running.

The numerals after the abbreviation indicate the year of the course, e.g., A22 indicates an Academic student of the class of 1922.

The numerals in parentheses after the name indicate the post-office box numbers; F preceding the numeral indicates that the box is a University Farm post-office box.

In cases where the home address differs from the local address the home address is given in parentheses. Where information is incomplete directory cards failed to reach the registrar's office by the specified time or were filled out improperly.
