AND

ANNOUNCEMENTS

FOR THE YEAR

1903-1904

BY THE UNIVERSITY

MINNEAPOLIS

1903

The University Bulletins are published by authority of the Board of Regents, six times a year,—every six weeks during the University year. Bulletins will be sent gratuitously, postage paid, to all persons who apply for them. In calling for bulletins, please state department of the University concerning which information is desired. Address,

THE REGISTRAR,

The University of Minnesota,

Minneapolis, Minn.

The University

THE UNIVERSITY OF MINNESOTA comprises the following named colleges, schools and departments :

THE GRADUATE DEPARTMENT

THE COLLEGE OF SCIENCE, LITERATURE AND THE ARTS, including—
the School of Analytical and Applied Chemistry

THE COLLEGE OF ENGINEERING AND THE MECHANIC ARTS

THE SCHOOL OF MINES

THE DEPARTMENT OF AGRICULTURE, including—
the College of Agriculture
the School of Agriculture
the Dairy School
the Short Course for Farmers

THE COLLEGE OF LAW

THE DEPARTMENT OF MEDICINE, including—
the College of Medicine and Surgery
the College of Homeopathic Medicine and Surgery
the College of Dentistry
the College of Pharmacy

The Regents of the University have also entrusted to their charge

THE EXPERIMENT STATION, including—
the Main Station at St. Anthony Park
the Sub-Station at Crookston
the Sub-Station at Grand Rapids

THE GEOLOGICAL AND NATURAL HISTORY SURVEY

THE GRADUATE DEPARTMENT. In each of the colleges, except that of medicine, there are advanced courses of study leading to second degrees. These courses are open to graduates of any reputable college upon presentation of diploma.

In the COLLEGE OF SCIENCE, LITERATURE AND THE ARTS, there is a four-year course of study leading to the degree, bachelor of arts. The work of the first two years is elective within certain limitations as to the range of subjects from which the electives are to be chosen. The work of the last two years is entirely elective. The course is so elastic that it permits the student to make the general scope of the course, classical, scientific or literary, to suit the individual purpose.

The School of Analytical and Applied Chemistry, leading to the degree of bachelor of science (in chemistry), is also organized as a part of this college.

A Summer School for Teachers. A six weeks' course of instruction is offered, in various University subjects, for those whose school duties prevent them from taking the regular University courses.

THE COLLEGE OF ENGINEERING AND THE MECHANIC ARTS offers courses of study, of four years each, in civil, mechanical and electrical engineering leading to the degrees of civil, mechanical and electrical engineer. This college offers a four-years' course of study in science and technology leading to the degree of bachelor of science, with an additional year leading to the engineer's degree in any one of the various lines offered in the college. This college also offers graduate work leading to the degree master of science.

THE SCHOOL OF MINES offers a four-years' course of study in mining and metallurgy upon completion of which the degrees, engineer of mines, and metallurgical engineer, are conferred.

THE COLLEGE OF AGRICULTURE offers a four-years' course in agriculture. The degree of bachelor of agriculture is conferred on completion of the course.

THE SCHOOL OF AGRICULTURE offers a three-years' course of study and is a training school for practical farm life and in domestic economy. The college of agriculture is open to graduates of this school who have completed the fourth year of work required for admission to the college.

The Dairy School offers practical instruction in dairying to those who are actually engaged in the manufacture of butter and cheese.

The Short Course for Farmers is designed to be of the greatest help possible to those actually engaged in farming.

THE COLLEGE OF LAW offers a three-years' course of instruction leading to the degree of bachelor of laws. There is an evening class provided in this college. Graduate work leading to the degrees, master of laws, and doctor of civil law, is offered.

THE COLLEGE OF MEDICINE AND SURGERY and THE COLLEGE OF HOMEOPATHIC MEDICINE AND SURGERY offer four-year courses of study of nine months each. Upon completion of either of the prescribed courses the degree doctor of medicine is conferred.

In the colleges of science, literature and the arts, of medicine and surgery and homeopathic medicine and surgery, there has been established a combined course of six years leading to the degree of bachelor of arts and doctor of medicine.

THE COLLEGE OF DENTISTRY offers a four-years' course of study of nine months each. Upon completion of the prescribed course the degree of doctor of dental surgery is conferred.

THE COLLEGE OF PHARMACY offers a two- or three-years' course of study leading to the degree of pharmaceutical chemist. This college also offers graduate work leading to the degrees, master of pharmacy, and doctor of pharmacy.

SPECIAL COURSES. In each of the colleges, students of an advanced age and adequate preparation, are permitted to pursue, under the direction of the faculty, one or two distinct lines of study.

•

Organization

The University was originally organized in 1851; it was re-organized in 1860, 1864 and 1868, and dates its actual beginning from the last named year.

The University is organized under the following act:

AN ACT to re-organize and provide for the Government and regulation of the University of Minnesota, and to establish an Agricultural College therein.

As amended by Chapter X of the General Laws of 1872:

AN ACT to amend Chapter I of the Session Laws of 1868, relating to the University of Minnesota.

Section 1. The object of the University of Minnesota, established by the Constitution at or near the Falls of St. Anthony, shall be to provide the means of acquiring a thorough knowledge of the various branches of literature, science and the arts, and such branches of learning as are related to agriculture and the mechanic arts, including military tactics and other scientific and classical studies.

Sec. 2. There shall be established in the University of Minnesota five or more colleges or departments, that is to say, a College of Science, Literature and the Arts, a College of Agriculture, including "military tactics," a College of Mechanic Arts, a College or Department of Law, and also a College or Department of Medicine. The Department of Elementary Instruction may be dispensed with at such a rate and in such wise as may seem just and proper to the Board of Regents.

Sec. 3. The government of the University shall be vested in a board of ten Regents, of which the Governor of the State, the State Superintendent of Public Instruction, and the President of the University, shall be members ex-officio and the remaining seven members thereof shall be appointed by the Governor, by and with the advice and consent of the Senate. Whenever a vacancy occurs therein, for any cause, the same shall be filled for the unexpired term in the same manner. Of the Regents thus appointed, two shall be commissioned and hold their offices for one year, and two for two years, and three for three years. Their successors shall be appointed in a like manner, and shall hold their offices for the full term of three years from the first Wednesday of March succeeding their appointment, and until their successors are appointed and qualified. The President of the University shall have the same rights, powers and privileges as other members, *except the right of voting, and shall be, ex-officio, the Corresponding Secretary of the Board of Regents.

Sec. 4. The Regents of the University shall constitute a body corporate, under the name and style of "The University of Minnesota," and by that name may sue and be sued, contract and be contracted with, make and use a common seal and alter the same at pleasure; a majority of the voting members shall constitute a quorum for the transaction of business, and a less number may adjourn from time to time.

Sec. 5. The Board of Regents shall elect from the members of the Board, a President of the Board, (a) Recording Secretary and (a) Treasurer, who shall hold their respective offices during the pleasure of the Board. And the President and Treasurer each before entering upon the duties of his office, shall execute a bond in the penal sum of fifty thousand dollars, with at least two sufficient sureties, to the State of Minnesota, to be approved by the Governor, conditioned for the faithful and honest performance of the duties of his office according to law, which bonds, when so approved, shall be filed at the office of the Secretary of State.

Sec. 6. The Board of Regents shall have the power, and it shall be their duty, to enact by-laws for the government of the University of Minnesota in all its departments; to elect a President of the University, and, in their discretion, a Vice-President, and the requisite number of professors, instructors, officers and employes, and to fix their salaries, (and) also the term of office of each, and to determine the moral and educational qualifications of applicants for admission, and in the appointment of professors, instructors and other officers, and assistants of the University, and in prescribing the studies and exercises thereof; and in all the management and government thereof, no partiality or preference shall be shown to one sect or religious denomination over another; nor shall anything sectarian be taught therein. And the Board of Regents shall have the power to regulate the course of instruction, and (to) prescribe the books and authorities to be used, and also to confer such degrees and grant such diplomas as is usual, in their discretion. It shall be the duty of the Recording Secretary to record all the proceedings of the Board, and carefully preserve all its books and papers; and before entering upon the duties of his office he shall take and subscribe an oath to perform his duties honestly and faithfully as such officer. It shall be the duty of the Treasurer to keep an exact and faithful account of all moneys, bills receivable and evidence of indebtedness, and all securities of property received or paid out by him, and before entering

*By the later act the President has been given a vote.

upon his duties shall take and subscribe an oath that he will well and faithfully perform the duties of Treasurer thereof. It shall be the duty of the President to preside at the meetings of the Board; and in case of his inability to preside, the Board may appoint a President pro tempore.

Sec. 7. In addition to all the rights, immunities, franchises and endowments heretofore granted or conferred upon the University of Minnesota, for the endowment, support and maintenance thereof, there shall be and is hereby inviolably appropriated and placed at the disposal of the Board of Regents thereof, to be drawn from the State treasury upon the order of the President, drawn upon the State Auditor, countersigned by the Secretary of the Board and payable to the order of the Treasurer of the Board, all the interest and income of the fund to be derived from the sale of all lands granted and to be granted to the State of Minnesota by virtue of an act of Congress, entitled "An act donating lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2d, 1867, and also all such gifts, grants and contributions to the endowment thereof as may be derived from any and all such sources.

Sec. 8. And in order to effect a settlement of all remaining indebtedness of the University, all the powers and authorities given by Chapter 18 of the laws of 1864, entitled "An act relating to the University of Minnesota," and Chapter 11 of the laws of 1866, entitled "An act to amend an act relating to the University of Minnesota, approved March 4, 1864," to the Regents therein mentioned, are hereby given to and conferred upon the Board of Regents of the University of Minnesota aforesaid, and the said acts are hereby continued and shall be in force until such outstanding indebtedness is fully liquidated.

Sec. 9. The first meeting of the first Board of Regents under the provisions of this act, shall be holden at the University building on the first Wednesday in March, 1868, at which meeting the officers of the Board shall be elected, and the annual meetings of the Board shall be holden on the second Tuesday in December in each and every year thereafter.

Sec. 10. Any person or persons contributing a sum of not less than fifteen thousand dollars shall have the privilege of endowing a professorship in the University, the name and object of which shall be designated by the Board of Regents.

Sec. 11. The said Board of Regents shall succeed to and have control of the books, records, buildings, and all other property of the University; and the present Board of Regents shall be dissolved immediately upon the organization of the Board herein provided for. Provided, that all contracts made and at that time, binding upon the Board then dissolved, shall be assumed and discharged by their successors in office.

Sec. 12. It shall be the duty of the Board of Regents herein provided for, to make arrangements for securing suitable lands, pursuant to the act of Congress, above mentioned, in the vicinity of the University, for an experimental farm, and as soon thereafter as may be to make such improvements thereon as will render the same available for experimental purposes in connection with the course in the agricultural college; and for such purpose the Board of Regents is hereby authorized to expend a sum not exceeding the amount specified by the act of Congress aforesaid.

Sec. 13. On or before the second Tuesday in December in each and every year, the Board of Regents, through their President, shall make a report to the Governor, showing in detail the progress and condition of the University during the previous University year, the wants of the institution in all its various departments—the nature, costs and results of all improvements, experiments and investigations, the number of professors and students—the amount of money received and disbursed—and such other matters, including industrial and economic statistics, as they deem important or useful. One copy of said report shall be transmitted to each of the other colleges endowed under the provisions of the said act of Congress, and one copy to the Secretary of the Interior.

Sec. 14. The President of the University shall be the President of the general faculty, and of the special faculties of the several departments or colleges, and the executive head of the institution in all its departments. As such officer, he shall have authority, subject to the Board of Regents, to give general direction to the practical affairs and scientific investigations of the University, and in the recess of the Board of Regents to remove any employe or subordinate officer not a member of the faculty, and supply for the time being any vacancies thus created. He shall perform the customary duties of a corresponding secretary, and may be charged with the duties of one of the professorships. He shall make to the Superintendent of Public Instruction, on or before the second Tuesday in December in each and every year, a report showing in detail the progress and condition of the University during the previous University year—the number of professors and students in the several departments—and such other matters relating to the proper educational work of the institution as he shall deem useful. It shall be the duty of the President of the University to make to the Board of Regents, on or before the second Tuesday in December in each and every year, a report showing in detail the progress and results of all important experiments and investigations, and such other matters, including economic and industrial facts and statistics as he shall deem useful.

Sec. 15. Chapter eighty of the laws of eighteen hundred and sixty, chapter eighty-seven of the laws of eighteen hundred and sixty-two, and so much and such parts of any and all acts and laws, whether general or special, as are inconsistent with the provisions of this act, are hereby repealed.

Sec. 16. This act shall take effect and be in force from and after its passage.

Approved February 18, 1868. Act to amend approved February 29, 1872.

The Faculty

- ✓ CYRUS NORTHROP, LL. D., President, 519 Tenth Avenue S. E.
- ✓ FRANK MALOY ANDERSON, M. A., 1629 University Avenue S. E.
Assistant Professor of History.
- WILLIAM R. APPLEBY, M. A., 911 Fifth Street S. E.
Dean of the School of Mines and Professor of Metallurgy.
- GEORGE N. BAUER, Ph. D., 814 Fourth Street S. E.
Assistant Professor of Mathematics.
- JOHN PARSONS BEACH, Harvard Chambers
Assistant Professor of Music.
- CHARLES W. BENTON, M. A., Litt. D., 516 Ninth Avenue S. E.
Professor of the French Language and Literature.
- JABEZ BROOKS, D. D., 1708 Laurel Avenue
Senior Professor of the Greek Language and Literature.
- JOHN S. CARLSON, Ph. D., 827 Seventh Street S. E.
Professor of the Scandinavian Languages and Literatures.
- ✓ JOHN S. CLARK, B. A., 729 Tenth Avenue S. E.
Professor of the Latin Language and Literature.
- FRANK H. CONSTANT, C. E., 1803 University Avenue S. E.
Professor of Structural Engineering.
- LOUIS J. COOKE, M. D., 906 Sixth Street S. E.
Director of the Gymnasium.
- ✓ JOHN F. DOWNEY, M. A., C. E., 806 Sixth Street S. E.
Professor of Mathematics.
- HENRY T. EDDY, C. E., Ph. D., 916 Sixth Street S. E.
Professor of Engineering and Mechanics.
- JOHN J. FLATHER, Ph. B., M. M. E., 1103 Fourth Street S. E.
Professor of Mechanical Engineering.
- ✓ WILLIAM W. FOLWELL, LL. D., 1020 Fifth Street S. E.
Professor of Political Science; Lecturer on International Law; Librarian.
- GEORGE B. FRANKFORTER, M. A., Ph. D., Flat 1, 602 Fourth Avenue S. E.
Professor of Chemistry and Director of the School of Chemistry.
- EDWARD M. FREEMAN, B. S., St. Paul
Assistant Professor of Botany.
- JOHN E. GRANRUD, Ph. D., 605 Delaware Street S. E.
Assistant Professor of Latin.

The University of Minnesota.

- BENJAMIN F. GROAT, B. S., 1312 Fifth Street S. E.
Assistant Professor of Mathematics and Mechanics, School of Mines.
- ✓ CHRISTOPHER W. HALL, M. A., 803 University Avenue S. E.
Professor of Geology and Mineralogy; Assistant Curator of the Museum.
- ARTHUR EDWIN HAYNES, M. S., M. Ph., Sc. D., 703 River Parkway
Professor of Engineering Mathematics.
- WILLIAM R. HOAG, C. E., 1516 Seventh Street S. E.
Professor of Civil Engineering; Topographer of the Geological and
Natural History Survey.
- ✓ JOHN C. HUTCHINSON, B. A., 3806 Blaisdell Avenue
Professor of the Greek Language and Literature.
- ✓ GEORGE FRANCIS JAMES, Ph. D., 106 Willow Street
Professor of Pedagogy.
- FREDERICK S. JONES, M. A., 712 Tenth Avenue S. E.
Professor of Physics, Dean of the College of Engineering and the Me-
chanic Arts.
- WILLIAM H. KAVANAUGH, M. E., Minneapolis
Assistant Professor of Mechanical Engineering in Charge of Experi-
mental Engineering.
- WILLIAM H. KIRCHNER, B. S.,** 618 Tenth Avenue S. E.
Assistant Professor of Drawing.
- FREDERICK KLAEBER, Ph. D., 616 Ninth Avenue S. E.
Professor of Comparative and English Philology.
- FRANCIS P. LEAVENWORTH, M. A., 1623 Fourth Street S. E.
Professor of Astronomy and Director of the Observatory.
- CHARLES F. MCCLEUMPHA, M. A., Ph. D., The Ashmore
Professor of English Language and Literature.
- E. EUGENE McDERMOTT, M. S., 1301 Sixth Street S. E.
Assistant Professor of Rhetoric and Elocution.
- HOPE McDONALD, M. S., 1216 Harmon Place
Assistant Professor of History.
- CONWAY MACMILLAN, M. A., 1004 Seventh Street S. E.
Professor of Botany; Botanist of the Geological and Natural History
Survey.
- FRANK L. McVEY, Ph. D., 621 15th Avenue S. E.
Professor of Political Economy.
- JOHN G. MOORE, B. A., 2810 University Avenue S. E.
Professor of the German Language and Literature.
- GEORGE H. MORGAN, LL. B., Captain U. S. A., Minneapolis
Professor of Military Science and Tactics.
- HENRY F. NACHTRIEB, B. S., 905 Sixth Street S. E.
Professor of Animal Biology; Zoologist of the Geological and Nat-
ural History Survey; Curator of the Zoological Museum.
- EDWARD E. NICHOLSON, M. A., 914 Seventh Street S. E.
Assistant Professor of Chemistry.

EMIL OBER HOFFER, Professor of Music.	Hampshire Arms
JOSEPH BROWN PIKE, M. A., Professor of Latin.	525 Tenth Avenue S. E.
FRANCES B. POTTER, M. A., Assistant Professor of English.	2412 Harriet Avenue
✓ MARIA L. SANFORD, Professor of Rhetoric and Elocution.	1401 Sixth Street S. E.
CHARLES A. SAVAGE, B. A., Assistant Professor of Latin.	Minneapolis
✓ WILLIAM A. SCHAPER, Ph. D., Assistant Professor of Political Science.	1009 University Avenue S. E.
CARL SCHLENKER, B. A., Assistant Professor of German.	312 Union Street S. E.
✓ GEORGE D. SHEPARDSON, A. M., M. E., Professor of Electrical Engineering.	1107 Seventh Street S. E.
CHARLES F. SIDENER, B. S., Assistant Professor of Chemistry.	1320 Fifth Street S. E.
✓ CHARLES P. SIGERFOOS, Ph. D., Professor of Zoology.	1206 Fifth Street S. E.
SAMUEL G. SMITH, Ph. D., LL. D., Professor of Sociology.	St. Paul
FRANK W. SPRINGER, E. E., Assistant Professor of Electrical Engineering.	1100 Fifth Street S. E.
JOSEPHINE E. TILDEN, M. S., Assistant Professor of Botany.	800 Fourth Street S. E.
CHARLES E. VAN BARNEVELD, B. A. Sc., E. M., Professor of Mining Engineering.	813 Seventh Street S. E.
✓ WILLIS M. WEST, M. A., Professor of History.	1314 Sixth Street S. E.
ALBERT B. WHITE, Ph. D., Assistant Professor of History.	515 Fifth Avenue S. E.
MATILDA J. WILKIN, M. L., Assistant Professor of German.	618 Fifteenth Avenue S. E.
NORMAN WILDE, Ph. D., Assistant Professor of Philosophy. (In charge of the department.)	901 Sixth Street S. E.
HENRY L. WILLIAMS, M. D., Director of Athletics; Clinical Instructor in Gynecology, College of Medicine and Surgery.	629 Fifteenth Avenue S. E.
JOHN ZELENY, B. S., B. A., Associate Professor of Physics.	Minneapolis

WILLIAM M. LIGGETT,
Dean of the College of Agriculture and Director of the Experiment
Station. St. Anthony Park

- ANDREW BOSS, St. Anthony Park
Associate Professor of Agriculture, in charge of live stock.
- SAMUEL B. GREEN, B. S., St. Anthony Park
Professor of Horticulture and Forestry and Horticulturist of the
Experiment Station.
- T. L. HAECKER, St. Anthony Park
Professor of Dairy Husbandry, in charge of the Dairy Husbandry
in the Experiment Station.
- WILLET M. HAYS, M. Agr., St. Anthony Park
Professor of Agriculture; Vice-Chairman and Agriculturist of the
Experiment Station.
- VIRGINIA C. MEREDITH, St. Anthony Park
Professor of Home Economics and Preceptress of the School of
Agriculture.
- M. H. REYNOLDS, M. D., V M., St. Anthony Park
Veterinarian of the Experiment Station; Professor of Veterinary
Medicine and Surgery.
- THOMAS SHAW, St. Anthony Park
Lecturer on Animal Husbandry.
- HARRY SNYDER, B. S., St. Anthony Park
Professor of Agricultural Chemistry; Chemist of the Experiment
Station.
- FREDERICK D. TUCKER, M. A., St. Anthony Park
Principal of the School of Agriculture.
- FREDERICK L. WASHBURN, M. A., St. Anthony Park
Professor of Entomology; Entomologist of the Experiment Station.
-
- WILLIAM S. PATTEE, LL. D., 1319 Fifth Street S. E.
Dean of the College of Law; Professor of Equity and International Law.
- HOWARD S. ABBOTT, B. L., Minneapolis
Professor of Corporation Law.
- HENRY L. FLETCHER, Minneapolis
Professor of Contracts and Real Property.
- A. C. HICKMAN, A. M., LL. B., 1301 Fifth Street S. E.
Professor of Pleading and Practice.
- JARED HOW, LL. B., St. Paul
Lecturer on Landlord and Tenant.
- EDWIN A. JAGGARD, M. A., LL. M., St. Paul
Professor of Taxation.
- ROBERT S. KOLLINER, LL. B., Minneapolis
Professor of Personal Property.
- C. D. O'BRIEN, 20 Globe Building, St. Paul
Lecturer on Criminal Procedure.
- JAMES PAIGE, M. A., LL. M., 1414 Yale Place
Professor of Torts and Criminal Law.
- JAMES O. PIERCE, 507 Eighth Street S.
Lecturer on Constitutional Jurisprudence and History.

- JOHN DAY SMITH, LL. M., 2720 Pillsbury Avenue
Lecturer on American Constitutional Law.
- HERBERT R. SPENCER, Duluth
Lecturer on Admiralty Law.
- JOHN COCHRANE SWEET, LL. M., Minneapolis
Lecturer on Mortgage Foreclosure.
- GEORGE B. YOUNG, A. M., LL. B., 240 Gilfillan Block, St. Paul
Lecturer on the Conflict of Laws.
-
- PARKS RITCHIE, M. D., Lowry Arcade, St. Paul
Dean and Professor of Obstetrics, College of Medicine and Surgery.
- AMOS W. ABBOTT, M. D., 21 Tenth Street South
Clinical Professor of Diseases of Women, College of Medicine and
Surgery.
- EVERTON J. ABBOTT, A. B., M. D., Endicott Arcade, St. Paul
Clinical Professor of Medicine and Chief of Medical Clinic, College
of Medicine and Surgery.
- RICHARD OLDING BEARD, M. D., Andrus Building
Professor of Physiology, Department of Medicine.
- J. W. BELL, M. D., Andrus Building
Professor of Physical Diagnosis and of Clinical Medicine, College of
Medicine and Surgery.
- HENRY MARTYN BRACKEN, M. D., L. R. S. C., Edinburgh, Dayton Building
Professor Materia Medica and Therapeutics, College of Medicine
and Surgery.
- HUBERT C. CAREL, B. S., Minneapolis
Assistant Professor of Chemistry, Department of Medicine.
- A. B. CATES, A. M., M. D., Dayton Building
Professor of Obstetrics, College of Medicine and Surgery.
- JAMES C. CHRISTISON, M. D., St. Paul
Clinical Professor of Diseases of Children, College of Medicine and
Surgery.
- JAMES H. DUNN, M. D., Syndicate Block
Professor of Surgery, College of Medicine and Surgery.
- FREDERICK A. DUNSMOOR, M. D., New York Life Building
Professor of Operative and Clinical Surgery, College of Medicine
and Surgery.
- CHARLES A. ERDMANN, M. D., Minneapolis
Professor of Anatomy, Department of Medicine.
- BURNSIDE FOSTER, M. A., M. D., Lowry Arcade, St. Paul
Clinical Professor of Diseases of the Skin, and Lecturer upon the
History of Medicine, College of Medicine and Surgery.
- JOHN F. FELTON, Ph. D., M. D., Lowry Arcade, St. Paul
Professor of Ophthalmology and Otolology, College of Medicine and
Surgery.

- ARTHUR J. GILLETTE, M. D., Seven Corners, St. Paul
Professor of Orthopaedic Surgery, College of Medicine and Surgery.
- CHARLES L. GREENE, M. D., Lowry Arcade, St. Paul
Clinical Professor of Theory and Practice of Medicine, College of
Medicine and Surgery.
- GEORGE D. HEAD, B. S., M. D., Minneapolis
Professor of Clinical Microscopy and Medicine, College of Medicine
and Surgery.
- CHARLES H. HUNTER, A. M., M. D., Syndicate Block
Clinical Professor of Medicine and Chief of Medical Clinic, College of
Medicine and Surgery.
- W. A. JONES, M. D., Dayton Building
Clinical Professor of Nervous and Mental Diseases, College of Medi-
cine and Surgery.
- W. S. LATON, M. D., Syndicate Block
Professor of the Diseases of the Nose and Throat, College of Medicine
and Surgery.
- THOMAS G. LEE, B. S., M. D., University
Professor of Histology and Embryology, Department of Medicine.
- J. WARREN LITTLE, M. D., Syndicate Arcade
Clinical Professor of Surgery, College of Medicine and Surgery.
- A. McLAREN, A. B., M. D., Lowry Arcade, St. Paul
Clinical Professor of Diseases of Women, College of Medicine and
Surgery.
- JAMES E. MOORE, M. D., Dayton Building
Professor of Clinical Surgery, College of Medicine and Surgery.
- WINFIELD S. NICKERSON, Sc. D., Minneapolis
Assistant Professor of Histology, Department of Medicine.
- LOUIS A. NIPPERT, M. D., Syndicate Arcade
Clinical Professor of Medicine, College of Medicine and Surgery.
- C. NOOTNAGEL, M. D., Minneapolis
Clinical Professor of Medicine, College of Medicine and Surgery.
- HENRY J. O'BRIEN, M. D., St. Paul
Clinical Professor of Surgery, College of Medicine and Surgery.
- JUSTUS OHAGE, M. D., St. Paul
Professor of Clinical Surgery, College of Medicine and Surgery.
- C. EUGENE RIGGS, A. M., M. D., Endicott Arcade, St. Paul
Professor of Nervous and Mental Diseases, College of Medicine and
Surgery.
- THOMAS S. ROBERTS, M. D., Minneapolis
Professor of Diseases of Children, College of Medicine and Surgery.
- JOHN T. ROGERS, M. D., Lowry Arcade, St. Paul
Professor of Clinical Surgery, College of Medicine and Surgery.
- J. E. SCHADLE, M. D., Lowry Arcade, St. Paul
Clinical Professor of Diseases of the Nose and Throat, College of
Medicine and Surgery.

- HENRY L. STAPLES, A. M., M. D., Syndicate Block
Clinical Professor of Medicine, College of Medicine and Surgery.
- J. CLARK STEWART, B. S., M. D., Dayton Building
Professor of Principles of Surgery, College of Medicine and Surgery.
- ALEX. J. STONE, M. D., LL. D., Lowry Arcade, St. Paul
Professor of Diseases of Women, College of Medicine and Surgery.
- ARTHUR SWEENEY, M. D., St. Paul
Professor of Medical Jurisprudence, College of Medicine and Surgery.
- FRANK C. TODD, M. D., Dayton Building
Clinical Professor of Ophthalmology and Otolaryngology, College of Medicine and Surgery.
- MAX P. VANDER HORCK, M. D., Dayton Building
Professor of Diseases of the Skin and Genito-Urinary Diseases, College of Medicine and Surgery.
- FRANK FAIRCHILD WESTBROOK, A. M., M. D., C. M., 328 Tenth Avenue S. E.
Professor of Pathology and Bacteriology, College of Medicine and Surgery.
- CHARLES A. WHEATON, M. D., Lowry Arcade, St. Paul
Emeritus Professor of Surgery, College of Medicine and Surgery.
- S. M. WHITE, B. S., M. D., Minneapolis
Assistant Professor of Pathology and Bacteriology, College of Medicine and Surgery.
-
- ALONZO P. WILLIAMSON, LL. B., M. D., Pillsbury Building
Dean and Professor of Mental and Nervous Diseases and Medical Jurisprudence, College of Homeopathic Medicine and Surgery.
- WARREN S. BRIGGS, S. B., M. D., Ernst Building, St. Paul
Professor of Clinical and Orthopaedic Surgery, College of Homeopathic Medicine and Surgery.
- GEORGE E. CLARKE, Ph. B., M. D., Stillwater
Professor of Theory and Practice of Medicine, College of Homeopathic Medicine and Surgery.
- ALFRED E. COMSTOCK, M. Sc., M. D., New York Life Building, St. Paul
Professor of Principles and Practice of Surgery, College of Homeopathic Medicine and Surgery.
- OSCAR H. HALL, M. D., Ernst Building, St. Paul
Professor of History and Methodology of Medicine, College of Homeopathic Medicine and Surgery.
- FREDERICK M. GIBSON, M. D., O. et A. Chir., Pillsbury Building
Professor of Ophthalmology, College of Homeopathic Medicine and Surgery.
- WILLIAM E. LEONARD, B. A., M. D., Andrus Building
Professor of Materia Medica and Therapeutics, College of Homeopathic Medicine and Surgery.
- HARRY M. LUFKIN, M. D., Germania Life Building, St. Paul
Professor of Diseases of Children, College of Homeopathic Medicine and Surgery.

- EUGENE L. MANN, M. A., M. D., Endicott Arcade, St. Paul
Professor of the Diseases of the Nose, Throat and Ear, College of
Homeopathic Medicine and Surgery.
- ROBERT D. MATCHAN, M. D., Masonic Temple
Professor of Principles and Practice of Surgery, College of Homeo-
pathic Medicine and Surgery.
- B. HARVEY OGDEN, M. A., M. D., Ernst Building, St. Paul
Professor of Obstetrics, College of Homeopathic Medicine and Surgery.
- GEORGE E. RICKER, B. A., M. D., Syndicate Arcade
Professor of Clinical Medicine and Physical Diagnosis, College of
Homeopathic Medicine and Surgery.
- GEORGE F. ROBERTS M. D., Pillsbury Building
Professor of Diseases of Women, College of Homeopathic Medicine
and Surgery.
- ROBERT R. ROME, M. D., 900 22nd Avenue S.
Professor of Clinical Obstetrics, College of Homeopathic Medicine
and Surgery.

-
- WILLIAM P. DICKINSON, D. D. S., Andrus Building
Dean of College of Dentistry and Professor of Materia Medica.
- THOMAS B. HARTZELL, D. M. D., M. D., Syndicate Arcade
Professor of Pathology, Therapeutics and Oral Surgery, College of
Dentistry.
- E. FRANKLIN HERTZ, D. M. D., Andrus Building
Professor of Dental Anatomy and Instructor in Prosthetic Den-
tistry, College of Dentistry.
- ALFRED OWRE, D. M. D., M. D., C. M., Minneapolis
Professor of Operative Dentistry and Metallurgy, College of Dentistry.
- OSCAR A. WEISS, D. M. D., Masonic Temple
Professor of Prosthetic Dentistry and Orthodontia, College of Den-
tistry.
- JAMES O. WELLS, A. M., D. M. D., Masonic Temple
Professor of Crown and Bridge Work, College of Dentistry.

-
- FREDERICK J. WULLING, Ph. G., Minneapolis
Dean and Professor of Pharmacology, Pharmaceutical Chemistry,
Pharmaceutical Jurisprudence and Sanitary Science, College of Pharmacy.

INSTRUCTORS AND ASSISTANTS.

- WILLIAM E. ACOMB, M. E., Minneapolis
Instructor in Drawing, College of Engineering and Mechanic Arts.
- WILLIAM AGATE, Minneapolis
Machinist, College of Engineering and the Mechanic Arts.
- E. V. APPEBY, M. D., Minneapolis
Clinical Instructor in Ophthalmology, College of Medicine and Surgery

ARNOLD AZEMAR, Instructor in French.	Minneapolis
GUSTAVE BACHMAN, Phm. C., Instructor in Pharmacy.	Minneapolis
CHARLES R. BALL, M. D., Assistant in Nervous and Mental Diseases, College of Medicine and Surgery.	Minneapolis
MARGUERITE BARBOUR, Assistant in Physical Culture.	Minneapolis
FREDERICK H. BASS, C. E., Instructor in Civil Engineering.	524 Thirteenth Avenue S. E.
JOSEPH W. BEACH, M. A., Instructor in English and Rhetoric.	Harvard Chambers
FRED S. BECKLEY, M. D., Assistant in Diseases of Women, College of Homeopathic Medicine and Surgery.	St. Paul
FREDERICK E. BECKMAN, Ph. D., Instructor in French and Spanish.	Minneapolis
A. E. BENJAMIN, M. D., Clinical Instructor in Gynecology, College of Medicine and Surgery.	Pillsbury Building
CHARLES P. BERKEY, Ph. D., Instructor in Mineralogy.	1601 Seventh Street S. E.
EMMA BERTIN, Instructor in French.	Minneapolis
*HIRAM H. BINGHAM, M. D., Assistant in Medicine, College of Homeopathic Medicine and Surgery.	Deceased
MARGARET BLAIR, Instructor in Sewing, School of Agriculture.	St. Anthony Park
GILBERT AMES BLISS, Ph. D., Instructor in Mathematics.	Minneapolis
A. E. BOOTH, M. D., Lecturer on Surgical Emergencies, College of Homeopathic Medicine and Surgery.	Andrus Building
WILLIAM BOSS, Instructor in Carpentry and Power Machinery, School of Agriculture.	St. Anthony Park
JOHN D. BRIMHALL, M. D., Clinical Instructor in Orthopædic Surgery, College of Medicine and Surgery.	Moore Building, St. Paul
WILLIAM E. BROOKS, B. C. E., M. A., Instructor in Engineering Mathematics.	Minneapolis
JULIA BRUDE, Instructor in Sweet Curd Cheese Work, Dairy School.	St. Anthony Park
COATES P. BULL, B. Agr., Assistant in Agriculture, School of Agriculture.	St. Anthony Park
MARY A. BULL, Assistant in Cooking and Laundering, School of Agriculture.	St. Anthony Park

OSCAR C. BURKHARD, B. A., Instructor in German.	Minneapolis
ANNA M. BUTNER, Instructor in Physical Culture.	500 Tenth Street S.
LEROY CADY, Assistant in Horticulture, School of Agriculture.	St. Anthony Park
R. A. CAMPBELL, M. D., Assistant in Diseases of the Nose and Throat, College of Medicine and Surgery.	Minneapolis
HERMAN H. CHAPMAN, B. S., Superintendent of Sub-Station at Grand Rapids.	Grand Rapids
WILLIAM M. CHOWNING, M. D., Junior Demonstrator of Pathology and Bacteriology, Department of Medicine.	Minneapolis
PETER CHRISTIANSON, B. S., E. M., Instructor in Metallurgy, School of Mines.	Minneapolis
HENRIETTA CLOPATH, Instructor in Drawing, College of Engineering and the Mechanic Arts.	Minneapolis
LILLIAN COHEN, M. A., Instructor in Chemistry.	Minneapolis
A. R. COLVIN, M. D., Instructor in Surgery, College of Medicine and Surgery.	Minneapolis
CATHERINE COMFORT, B. L., Instructor in English, School of Agriculture.	Minneapolis
ADA L. COMSTOCK, M. A., Instructor in Rhetoric.	Minneapolis
WM. H. CONDIT, B. S., M. D., Assistant in Materia Medica and Surgery, College of Medicine and Surgery.	Minneapolis
ROBERTSON COOK, M. E., Assistant in Mechanical Laboratory, College of Engineering and the Mechanic Arts.	Minneapolis
GEORGE M. COON, M. D., Clinical Instructor in Genito-Urinary Diseases, College of Medicine and Surgery.	Lowry Arcade, St. Paul
HANS H. DALAKER, B. A., Instructor in Mathematics.	Minneapolis
LESLIE O. DART, M. D., Assistant in Pediatrics, College of Medicine and Surgery.	Minneapolis
HERBERT W. DAVIS, M. D., Clinical Instructor in Obstetrics, College of Medicine and Surgery.	Lowry Arcade, St. Paul
LESTER W. DAY, M. D., Assistant in Clinical Medicine, College of Medicine and Surgery.	Minneapolis
SAMUEL N. DEINARD, M. A., Instructor in Semitic Language and Literature.	331 E. Franklin Avenue

WARREN DENNIS, B. S., M. D., Clinical Instructor in Surgery, College of Medicine and Surgery.	St. Paul
HARRY DIXON, Chief Engineer, College of Engineering and the Mechanic Arts.	Minneapolis
ALICE DOUGAN, B. A., Assistant in Rhetoric.	Minneapolis
J. M. DREW, Instructor in Blacksmithing and Poultry, School of Agriculture.	St. Anthony Park
A. W. DUNNING, M. D., Clinical Instructor in Nervous and Mental Diseases, College of Medicine and Surgery.	Minneapolis
HENRY A. ERIKSON, B. E. E., Instructor in Physics.	Minneapolis
R. EMMETT FARR, M. D., Assistant in Surgery, College of Medicine and Surgery.	Minneapolis
OSCAR W. FIRKINS, M. A., Instructor in Rhetoric.	1528 Fourth Street S. E.
HARLOW S. GALE, B. A., Instructor in Psychology.	Minneapolis
HARRY C. GILMOUR, Assistant in Carpentry, College of Engineering and the Mechanic Arts.	Minneapolis
JAMES T. GILFILLAN, M. D., Assistant in Clinical Medicine, College of Medicine and Surgery.	St. Paul
JUDD GOODRICH, M. D., Clinical Instructor in Surgery, College of Medicine and Surgery.	St. Paul
GEORGE D. HAGGARD, M. D., Assistant in Physiology, College of Medicine and Surgery.	Pillsbury Building
EVERHART P. HARDING, Ph. D., Instructor in Chemistry.	Minneapolis
EARL R. HARE, M. D., Prosector in Anatomy, Department of Medicine.	Minneapolis
MARY V. HARTZELL, D. M. D., Instructor in Comparative Dental Anatomy, College of Dentistry.	Minneapolis
SAMUEL HAUGDAHL, Instructor in Cultures and Starters, Dairy School.	St. Anthony Park
E. E. HEMENWAY, B. A., Assistant in Animal Biology.	Minneapolis
ANDREW M. HENDERSON, M. D., Clinical Instructor in Medicine, College of Medicine and Surgery.	Minneapolis
CARL ALBERT HERRICK, M. E., Instructor in Engineering Mathematics.	Minneapolis
PAUL A. HIGBEE, M. D., Assistant in Surgery, College of Homeopathic Medicine and Surgery.	Masonic Temple
CATHERINE HILLESHEIM, B. A., Instructor in Animal Biology.	Minneapolis

CLARA HILLESHEIM, B. A., Instructor in Chemistry.	Minneapolis
FRED E. HOBBS, B. L., LL. B., Instructor in Moot Court Practice.	Minneapolis
P. A. HOFF, M. D., Assistant in Clinical Medicine, College of Medicine and Surgery.	St. Paul
DAVID W. HORNING, A. B., M. D., Assistant in Practice of Medicine, College of Homeopathic Medicine and Surgery.	Pillsbury Building
TORGER A. HOVERSTAD, B. Agr., Superintendent of Sub-station at Crookston.	Crookston
JOHN A. HUMMEL, B. Agr., Assistant Chemist, School of Agriculture.	St. Anthony Park
ANNAH H. HURD, Phm. D., M. D., Assistant in Ear, Throat, and Nose, College of Homeopathic Medicine and Surgery.	Pillsbury Building
ETHEL S. HURD, M. D., Assistant in Ophthalmology, College of Homeopathic Medicine and Surgery.	Pillsbury Building
EDWARD JOHNSON, Instructor in Foundry Practice, College of Engineering and the Me- chanic Arts.	Minneapolis
GEORGE H. JOHNSTON, M. A., Assistant in Psychology.	Minneapolis
JANE KENNEDY, M. D., Medical Examiner for Women.	Minneapolis
CHARLES F. KEYES, B. A., Instructor in History and Geography and Registrar of the School of Agriculture.	Minneapolis
MARGARET KOCH, M. D., Assistant in Paedology, College of Homeopathic Medicine and Surgery.	Masonic Temple
ARTHUR C. KOERNER, Assistant in Music, School of Agriculture.	St. Anthony Park
ALOIS F. KOVARIK, Assistant in Physics.	Minneapolis
DAVID LANDO, M. D., Assistant in Medicine, College of Medicine and Surgery.	Minneapolis
A. A. LAW, M. D., Assistant in Operative Surgery, College of Medicine and Surgery.	Minneapolis
FREDERICK LEAVITT, M. D., Clinical Instructor in Obstetrics, College of Medicine and Surgery.	Minneapolis
ALFRED LIND, B. S., M. D., Lecturer in Mechano-Therapy, College of Medicine and Surgery.	Minneapolis
JENNINGS C. LITZENBERG, B. S., M. D., Assistant Physical Director; Clinical Instructor in Obstetrics, Col- lege of Medicine and Surgery.	Minneapolis

HAROLD L. LYON, B. S., Instructor in Botany.	Minneapolis
MARY S. MCINTYRE, B. S., Librarian of the School of Agriculture.	St. Anthony Park
EDWARD P. MCCARTY, E. M., Instructor in Mining, School of Mines.	Minneapolis
CHARLES N. MCCLOUD, Ph. C., M. D., Lecturer on Emergencies, College of Pharmacy.	Minneapolis
CHARLES MCDANIEL, Instructor in Forge Work, College of Engineering and the Mechanic Arts.	Minneapolis
E. W. MAHOOD, M. A., Instructor in Algebra and Civics and Director of the Gymnasium, School of Agriculture.	St. Anthony Park
LINDA H. MALEY, B. A., Assistant in Rhetoric.	Minneapolis
ARTHUR T. MANN, B. S., M. D., Clinical Instructor in Surgery, College of Medicine and Surgery.	Minneapolis
MARION A. MEAD, M. D., Assistant in Laryngology, College of Medicine and Surgery.	Pillsbury Building
WILLIAM H. MERRIMAN, Instructor in Machine Work.	Minneapolis
C. B. MOAK, Instructor in Dairy Laboratory, Dairy School.	St. Anthony Park
WILLIAM R. MURRAY, B. A., M. D., Clinical Instructor in Ophthalmology and Otology, College of Medicine and Surgery.	Minneapolis
MARGARET L. NICKERSON, M. A., Instructor in Histology, Department of Medicine.	Minneapolis
ELIZABETH MAY NORRIS, Instructor in Drawing, College of Engineering and the Mechanic Arts.	
OSCAR W. OESTLUND, M. A., Instructor in Animal Biology.	Minneapolis
EDD C. OLIVER, Instructor in Machine Design, College of Engineering and Mechanic Arts.	Minneapolis
A. W. PARKIN, Instructor in Cheese Making, Dairy School.	St. Anthony Park
LEVI B. PEASE, M. S., Instructor in Assaying, School of Mines.	Minneapolis
MARY G. PECK, M. A., Instructor in English.	Minneapolis
RALPH ST. JOHN PERRY, LL. D., M. D., Lecturer on Skin and Genito-Urinary Diseases, College of Homeopathic Medicine and Surgery.	Farmington

RANSOM J. POWELL, LL. B., Instructor in Justice Practice, College of Law.	Minneapolis
WALTER RAMSEY, M. D., Assistant in Pediatrics, College of Medicine and Surgery.	Minneapolis
CLARENCE B. RANDALL, Assistant in Drawing and Farm Buildings, School of Agriculture.	St. Anthony Park
H. K. READ, M. D., Demonstrator of Anatomy, Department of Medicine.	Minneapolis
SOREN P. REES, B. S., M. D., Instructor in Physical Diagnosis and Clinical Medicine, College of Medicine and Surgery.	Minneapolis
H. M. REID, D. D. S., Instructor in Prosthetic Dentistry, College of Dentistry.	Minneapolis
O. K. RICHARDSON, B. S., M. D., Lecturer on Life Insurance Examination, College of Homeopathic Medicine and Surgery.	Masonic Temple

WILLIAM B. ROBERTS, A. B., M. D., Assistant in Surgery, College of Homeopathic Medicine and Surgery.	Pillsbury Building
WILLIAM A. ROBERTSON, B. S., Instructor in Physics, School of Agriculture.	St. Anthony Park
C. OTTO ROSENDAHL, B. S., Instructor in Botany.	Minneapolis
J. L. ROTHROCK, M. D., Clinical Instructor in Pathology and Gynecology, College of Medicine and Surgery.	St. Paul
H. L. RUSSELL, Ph. D., Instructor in Bacteria in Dairy Products, Dairy School.	St. Anthony Park
BERT RUSSELL, B. A., Instructor in Chemistry.	Minneapolis
EDWARD P. SANFORD, B. A., Instructor in Rhetoric.	Minneapolis
FREDERICK W. SARDESON, Ph. D., Instructor in Paleontology.	Minneapolis
JESSIE SCHULTEN, Assistant in Rhetoric.	Minneapolis
WALDEMAR SCHULZ, Ph. D., Instructor in German.	Minneapolis
GEORGE E. SENKLER, M. D., Clinical Instructor in Physical Diagnosis, College of Medicine and Surgery.	Minneapolis
JUANITA L. SHEPPERD, M. A., Instructor in Cooking and Laundering, School of Agriculture.	St. Anthony Park
H. L. SONDEGAARD, Assistant in Butter Making, Dairy School.	St. Anthony Park

DAVID F. SWENSON, B. S., Instructor in Philosophy.	Minneapolis
JAMES M. TATE, Instructor in Wood Work, College of Engineering and the Mechanic Arts.	Minneapolis
EDITH THOMAS, B. A., Instructor in Chemistry.	Minneapolis
WILLIAM I. THOMAS, Instructor in Rhetoric.	Minneapolis
JOHN THOMPSON, B. Agr., Assistant in Agriculture, School of Agriculture.	St. Anthony Park
NELLIE STINSON TRUFANT, Instructor in Drawing and Design, College of Engineering and the Mechanic Arts.	2614 Clinton Avenue
HUGH J. TENSTEAD, M. D. Assistant in Obstetrics, College of Homeopathic Medicine and Surgery.	1829 16th Avenue N.
HENRY L. ULRICH, M. D., Assistant in Clinical Microscopy, College of Medicine and Surgery.	Minneapolis
J. A. VYE, Instructor in Penmanship and Accounts, School of Agriculture, and Secretary of the Experiment Station.	St. Anthony Park
CLAIRE C. WATERS, Instructor in French.	St. Paul
ALBERT M. WEBSTER, B. A., Instructor in Latin, College of Medicine and Surgery.	Minneapolis
JAMES M. WALLS, D. M. D., Instructor in Operative Technics and Demonstrator of Operative Den- tistry, College of Dentistry.	St. Paul
WILLIAM A. WHEELER, B. Agr., Instructor in Botany, School of Agriculture.	Minneapolis
B. D. WHITE, Instructor in Creamery Management, Dairy School.	St. Anthony Park
GRACE L. WHITTRIDGE, Assistant in Physical Culture for Women, School of Agriculture.	St. Anthony Park
M. RUSSEL WILCOX, M. D., Demonstrator of Physiology, Department of Medicine.	Minneapolis
ELEANOR M. WILKINSON, Instructor in Physiology and Dietetics, College of Medicine and Surgery.	Minneapolis
HUGH E. WILLIS, LL. M., Librarian and Quiz Master, College of Law.	Minneapolis
LOUIS B. WILSON, M. D., Senior Demonstrator of Pathology, College of Medicine and Surgery.	Minneapolis
F. P. WRIGHT, M. D., Clinical Instructor in Dermatology and Genito-Urinary Diseases, Col- lege of Medicine and Surgery.	Minneapolis

FRANK R. WRIGHT, D. D. S., M. D., Lecturer on Anæsthesia and Chief of the Anæsthetic Clinic, College of Dentistry.	Minneapolis
ANTHONY ZELENY, M. S., Instructor in Physics.	Minneapolis

 UNIVERSITY SCHOLARS.

- In Anatomy*—Karl Klemer.
- In Animal Biology*—Hal Downey, Neil S. Dungay.
- In Bacteriology and Pathology*—Chelsea Pratt, H. W. Old, D. L. Tilderquist, F. C. Schuidt, W. F. Braasch, F. W. Davis.
- In Botany*—Daisy Hone, B. A., Herman Schrader.
- In Chemistry*—W. W. Benner, Frank Grout, Joseph Hopkins, Anton R. Rose, Ralph Slye, A. E. Carr, M. Lando, B. S.
- In Draucing*—Franklin R. McMillan.
- In Histology and Embryology*—Herbert Coulter, E. E. Olander, C. W. Wilkowski, J. E. Hynes and C. C. Tyrell.
- In History*—Helen E. Camp, B. A.
- In Mathematics*—Royal R. Shumway.
- In Observatory*—Elliott Smith.
- In Pedagogy*—Charles M. Holt.
- In Philosophy*—Bernice M. Cannon, B. A., E. McM. Pennock.
- In Physical Culture*—Anna DeWitt Cook.
- In Political Economy*—Seavey M. Bailey.
- In Rhetoric*—Ella C. Ruscoe.
- In Surgical Pathology*—O. W. Rowe

Equipment

GROUNDS AND BUILDINGS.

The University grounds comprise about forty-five acres lying between University avenue and the River and between Eleventh and Eighteenth avenues southeast. The grounds command a fine view of the Falls and the city, but are sufficiently removed from the business center of the city to insure desirable quiet and retirement. The buildings upon the campus number twenty, and are valued at over \$730,000. A special clinical building for the use of the department of medicine, located in the southern part of the city, where there is an abundance of clinical material, is within easy reach of the University. The campus is valued at about \$350,000 and the equipment of the buildings at about \$275,000.

The State Experimental Farm, upon which are located the buildings of the experiment station and the department of agriculture, consist of over two hundred and fifty acres of very valuable land half way between the twin cities and within a thirty-minutes' ride of either city. The farm is valued at \$300,000, and the sub-stations located at Crookston and Grand Rapids, at \$30,000 more. The buildings and equipment of the department of agriculture are valued at over \$300,000.

LIBRARIES.

The following is a list of the libraries easily accessible to the University students:

Minneapolis—The University Libraries, 84,000 volumes; the Public Library, 125,000 volumes; the Minneapolis Bar Association, the Guaranty Loan Law, and the New York Life Insurance Law Libraries, numbering a total of about 30,000 volumes, are open under certain restrictions to law students; the Minnesota Academy of Natural Sciences, 7,000 titles.

St. Paul—The State Historical Library, 70,000 volumes; the State Library, 35,000 volumes; Public Library, 55,000 volumes.

The Libraries of the University contain about eighty-four thousand bound volumes, besides about twenty-six thousand volumes of pamphlets, magazines and reports. About one hundred twenty periodicals are received regularly by the library, not inclusive of technical magazines and newspapers.

The general library is open to students and the public from 8:00 a. m. to 9:30 p.m., every day of the University year, except Sundays and legal holidays.

Besides the general library of the University, there are a number of special libraries consisting mainly of books of reference and current periodicals relating to technical subjects in connection with the several departments in engineering, botany, animal biology, law and medicine.

The Law Library has been greatly increased during the past year. It now contains nearly all the English Reports, including those of Canada, from the earliest decisions down to the year 1900; nearly all the reports of the different states of the Union; all the reports of the United States Supreme Court, and all the Federal Court reports. It contains also the digests of these reports and an excellent selection of standard text-books and law dictionaries.

The Nelson Law Library is a rare collection of fifteen hundred volumes, donated to the University by the Honorable R. R. Nelson, of St. Paul, upon retirement from the Federal bench. It contains many old English reports, in addition to those already mentioned, and many ancient treatises upon common law.

A rare and unique addition to the Law Library has been secured by the donation of Judge Collins and former Attorney-General Childs turning over to the University all the Briefs and Paper-Books in the causes argued in the Supreme Court of Minnesota since 1888, making a fine collection of over five hundred bound volumes.

The Medical Library contains a large and well assorted collection of books, sets of journals, bound and unbound pamphlets, relating to all branches of medicine. All of the leading medical journals are on file in the reading room. The various laboratories have also reference libraries devoted to their special lines of work.

The library was greatly enriched by the bequest of the late Dean, Perry H. Millard, M. D., who bequeathed his entire private medical library to the department. This collection consists of several hundred volumes and pamphlets, including many rare and old medical works, sets of journals especially rich in surgical works.

To all these library facilities may be added the Minneapolis Public Library, which is within easy reach of the University and is opened freely to the students of the University. This library contains over one hundred twenty-five thousand bound volumes and over fourteen hundred of the leading newspapers, magazines and periodicals of the world.

MUSEUMS.

The museums of the University contain material obtained from various sources arranged with special reference to its use for illustration. Among the more notable collections are the following:

(a) *In Geology and Mineralogy*: The Kunz collection of minerals, purchased of George F. Kunz; several suites of crystalline rocks secured from various sources; the Ward collection of casts contributed in part by citizens of Minneapolis; collections of the rocks, fossils, minerals and economic products of Minnesota; upwards of 9,000 entries gathered by the geological survey of the State; the Sardeson collection of paleozoic fossils of Minnesota, Wisconsin, Iowa and neighboring states, comprising 4,500 entries and more than 30,000 specimens; a series of thin sections of typical rocks and minerals largely representing Minnesota localities; purchased material comprising a fine collection of crystals; 5,000 minerals and 3,000 specimens of economic minerals and crystalline rocks.

(b) *In Zoology*: All the material collected by the State Zoologist; a collection of mounted Minnesota birds representing about one-third of the species found in the State; a number of the mammals of the State and a few from the more western states; a collection of fishes, molluscan shells, corals and other foreign material.

The ornithological room contains the excellent Thomas S. Roberts and Franklin Benner collection of skins, nests and eggs of Minnesota birds. Other groups of animals are more or less numerously represented, and are receiving annual additions from the Zoological Survey.

(c) *In Botany*: The general herbarium numbering about 250,000 specimens and comprising the series of plants collected by the State Botanist; an alcoholic collection of material for dissection; a collection of woods of Minnesota; a limited series of carboniferous and cretaceous fossil plants, including the Lesquereaux collection from the Minnesota River localities.

(d) *The Museum of Technology*: A cabinet of specimens illustrating the products and processes of applied chemistry is being collected by the professor of chemistry, as opportunity offers. The collection embraces fuel, ores, furnace products, textile materials, both raw and manufactured, dye-woods and other materials used in dyeing; specimens illustrating the bleaching and printing of cotton, linen and woolen goods, earthenware, pottery, etc.

(e) *The Classical Museum*: Some material illustrating classical geography, topography, chronology, mythology, archaeology, and art has been collected, consisting mainly of plans and charts, casts, pictorial illustrations, fac-similes of manuscripts and inscriptions.

(f) *In English*: A few fac-similes of manuscripts, plates that may serve for the purpose of archæological instruction, publications of texts, reprints of blackletter books and of original editions, photographs and portraits have been gathered.

(g) *Civil Engineering*: The department is collecting samples of road material, typical of the various localities of the State; leading materials used in street paving, such as granite, trap rock, brick and asphaltum. A

set of standard sections of steel and wrought iron is provided for illustration in the study of structural design.

(h) *Mechanical Engineering*: The collection consists of models of mechanical motions especially relating to the work in kinematics; sectioned apparatus, such as injectors, water meters and steam separators; various collections of drop forgings in iron, steel and copper; miscellaneous samples of commercial work representing the product of special machines; groups of standard nuts, bolts and screws; samples of belting, ropes, steel and iron cables, rawhide gears, and other material especially useful for illustrative purposes.

(i) *Electrical Engineering Museum*: This museum contains a growing collection of samples furnished by various manufacturers and dealers for demonstrating the merits of different products and for illustrating modern practice; an excellent collection showing the development of electrical instruments, lightning arresters, switches, primary and secondary batteries, early forms of dynamos and motors, lighting apparatus and various industrial applications of electricity; also a collection of samples from repair shops and elsewhere, illustrating the effects of wear, accidents and abuse.

ASTRONOMICAL OBSERVATORY.

The students' astronomical observatory contains a ten and one-half inch combined, visual, photographic and spectroscopic refracting telescope, constructed by Warner Swasey and Brashear; a photographic measuring machine by Repsold; a spectrometer by Brashear; a three inch transit circle and chronograph by Fauth; a Howard astronomical clock.

GYMNASIUM.

The gymnasium is located in the Armory, and is well equipped with a variety of gymnastic appliances. The object of the gymnasium is to provide all of the students of the University opportunity for exercise to build up their general health. It also provides special training to correct physical defects and functional derangements. The gymnasium is in charge of a professional medical director and assistant and the training is under their direct supervision. A thorough physical examination is offered each student immediately before and after the gymnasium course, a record is made of the same. The examination of these records shows a marked improvement in the standard of health of the average student during his college course. The gymnasium is open at all times to all young men in the University who are free to use the apparatus and to pursue a course of physical training under the direct supervision of the director and his assistant. In some of the colleges of the University, this work is required of all men.

General Information

THE UNIVERSITY YEAR.

The University year covers a period of thirty-eight weeks beginning on the Tuesday before the first Thursday in September, and is divided into nineteen-week semesters. Commencement day comes on the first Thursday in June.

THE ONE MILE LIQUOR LAW.

A special act of the legislature provides that "it shall be unlawful for any person to sell or dispose of any spirituous, vinous or malt liquors within the distance of one mile of the main building of the University of Minnesota, as now located in the city of Minneapolis; provided that the provisions of this section shall not apply to that part of the city of Minneapolis lying on the west side of the Mississippi River."

STUDENTS' SOCIETIES.

RELIGIOUS.

THE STUDENTS' CHRISTIAN ASSOCIATION was organized by the students and faculty of the University in 1869; its object being, as stated in the constitution, to promote growth in Christian character, and to engage in such religious work as may be deemed expedient and necessary.

The Association owns a commodious building and is meant to be the rallying point of all the Christians in college. All persons in sympathy with the object of the association are eligible to membership.

THE YOUNG MEN'S CHRISTIAN ASSOCIATION has as its object the promotion of "growth in grace and Christian fellowship among its members and aggressive Christian work, by and for students." The association rents the S. C. A. building and keeps it open, with a general secretary in charge, at all times. All men in sympathy with the object of the association are eligible to membership. This building is maintained as the social and religious headquarters of all young men in the University.

The association provides an employment bureau whose services are free to students in all departments of the institution and a committee to

help students to find comfortable rooms and boarding places. The association also maintains an educational department in which students may make up their entrance conditions without any charge for instruction.

The general secretary will be pleased to correspond with any young man intending to come to the University. Address the General Secretary of the Y. M. C. A., University of Minnesota, Minneapolis, Minn.

THE YOUNG WOMEN'S CHRISTIAN ASSOCIATION is the center of Christian life among the young women of the University. Its object is "To deepen spiritual thought in the University woman, to environ her with a semblance of home, to bring to her friendship, assistance and sociability by stimulating student fellowship, to give her personal help when necessary; thus developing in her the Christ ideal of culture in womanhood."

To this end frequent socials and informal teas are given throughout the year; twice each week twenty minute prayer meetings are held, a dozen circles meet one hour a week for devotional Bible study; and from time to time interesting missionary meetings are held. The general secretary devotes all of her time to the association and will be pleased to correspond with any young woman who wishes information regarding the University.

All young women are invited to visit the Y. W. C. A. room before registering. A group of upper classmen will be there during the opening days to give advice and assistance.

THE UNIVERSITY CATHOLIC ASSOCIATION.

The University Catholic Association was organized by the Catholic students in the spring of 1900. The purpose of the association is the study of the Bible and of the doctrines and history of the Catholic church. Membership is open to any one connected with the University. Regular meetings are held every Sunday afternoon in the rooms of either the Young Men's or of the Young Women's Christian Association, through the courtesy of those organizations.

Aside from the religious objects, the association tends to promote good fellowship among its members. In the fall a reception is tendered to new students and during the year two or more socials are held.

Further information may be obtained by addressing the secretary of the association at the University.

LITERARY, SCIENTIFIC AND PHILOSOPHICAL.

Literary Societies—These societies are mainly debating clubs. Every one is cordially invited to attend the literary sessions, but the business sessions are usually held behind closed doors. Any one wishing to join should make early application to some member of the society he prefers, as the membership is limited.

The Minnesota Literary Union—Is a federation of the members of the following societies: Blackstone, Shakopean, Forum, Castalian, Minerva, Hermean and Arena. Four meetings are held each year.

Blackstone—Membership limit, 25; men: *Shakopean*—Membership limit, 35; men: *Forum*—Membership limit, 30; men: *Minerva*—Membership limit, 30; women: *Law Literary*—Unlimited; law students: *Castalian*—Membership limit, 35; men: *Kent*—Membership limit, 30; law students: *Hermean*—Membership limit, 30; men: *Theta Epsilon*—Membership limit, 30; women: *Arena*—Membership limit, 30; men.

The Philological Society—The object of the philological society is to promote philological investigation and study.

Greek Club—Is a society organized by professors and students of the department of Greek for the study of Greek life, language and customs.

Societas Latina is a society in the department of Latin, having for its special aim the securing of greater proficiency in reading and writing Latin.

The Graduate Club is a club organized for the purpose of fostering a greater interest in graduate work, for mutual help, and for the discussion of topics under investigation.

The Dramatic Club is organized for the study and practice of dramatic art. A play is put on the stage each year.

The Engineers' Club meets once in two weeks to listen to addresses by prominent engineers and for the discussion of various engineering topics.

The Geological Club is an organization of instructors and students interested in geology, for the discussion of geological problems.

The Scandinavian Literary Club is an organization whose purpose is to promote interest in the study of Scandinavian literatures.

The Federated Debating Board has charge of home and inter-collegiate oratorical contests.

The Economic Club meets twice a month for debate in economic and political subjects.

The Pedagogical Society is organized for the purpose of the investigation and discussion of pedagogical problems.

The Art Club is an organization of instructors and students interested in art work. The club meets once a month for lectures and discussion of art topics.

The Mining Society is an organization of mining engineering students who meet for the purpose of hearing lectures and discussing mining engineering problems.

The Camera Club is an organization of instructors and students interested in photography and photographic chemistry.

The Botanical Students' Journal Club is an organization of juniors, seniors and graduate students, of the department of botany, for the review of current botanical literature.

The Zoological Journal Club includes advanced students who meet for the discussion of current zoological literature.

The Zoological Reading Club is for instructors and graduate students. Its purpose is the reading and discussion of philosophical works on Zoology.

The Physical Colloquium is composed of instructors and graduate students and meets for the discussion of recent investigations in physical science.

The Glee and Mandolin Clubs give a public concert each year at the University and make a tour of the state during the holidays.

The University Band furnishes music for many University affairs.

Women's League is an organization of the women of the University for mutual helpfulness and sociability.

The Northern Oratorical League is composed of the oratorical associations of the University of Michigan, Northwestern University, the University of Wisconsin, Oberlin College, the State University of Iowa, the University of Chicago, and the University of Minnesota. Its purpose is to foster an interest in public speaking and to elevate the standard of oratory by holding annual contests. The contests are open only to undergraduates.

The Central Debating League is composed of the debating associations of the University of Michigan, the University of Minnesota, Northwestern University, and the University of Chicago. Its purpose is to discuss in public leading questions of the day and in this way to develop ready and forceful speakers.

The four universities are arranged in two groups for the semi-final debates which are held the second Tuesday in January. On the first Friday in April in each year, the winners from the groups meet in a final debate in the city of Chicago.

ATHLETICS.

The Athletic Association is an organization having for its object the general physical well-being of the students and the encouragement of a proper spirit in favor of hearty, manly sports.

Control of Athletics. The athletic sports of the University are under the supervision of a Board of Control made up of eleven members; two are members of the faculty, two are alumni and seven are students. This board has general supervision of all matters connected with athletic contests: they pass upon the eligibility of players, investigate charges of misconduct and arrange the schedule of games. It is the purpose of this board to foster a spirit in favor of fairness and honesty in all athletic contests.

Northrop Field is an enclosed athletic field containing about three and one-half acres immediately adjoining the armory.

SCHOLARSHIPS.

It is the policy of the University to establish scholarships in the different departments where extra help is needed for instruction, under regulations somewhat as follows:

1. The appointments are made by the executive committee of the Board of Regents, upon the recommendation of the department in which the appointment is desired, after approval by the general faculty.

2. Recipients of scholarships may be either graduate or undergraduate students.

3. The scholarships are not intended as gifts or benefactions from the state to the recipients, but as provisions under which services may be rendered the University.

4. It is understood that these services are of a nature which shall assist the holder of a scholarship to attain the mastery of some line of work in the department to which he is appointed.

PRIZES.

THE PILLSBURY PRIZE.

Three prizes of \$100, \$50 and \$25, offered by the heirs of the Hon. John S. Pillsbury, are awarded for the best work in the rhetorical department, as evidenced finally by an oration in public.

THE '89 MEMORIAL PRIZE IN HISTORY.

The class of 1889, at graduation, established a prize of \$25 each year, to be known as the '89 Memorial Prize, and to be given for the best thesis in history. The award is made by a professor of history in some other institution.

THE MOSES MARSTON SCHOLARSHIP IN ENGLISH.

Friends and pupils of the late Professor Marston, Ph. D., have given and pledged one thousand dollars as a memorial fund. The annual income of the fund is to be used to help some student in the long English course. The award of the income is made on the basis of pecuniary need and of deserving scholarship.

THE ALBERT HOWARD SCHOLARSHIP FUND.

Under the last will and testament of Mr. James T. Howard, of the town of St. Johnsbury, Vermont, \$4,166.81 was left to the University to establish a scholarship to be known as the "Albert Howard Scholarship." This scholarship is assigned by the executive committee upon the recommendation of the general faculty.

THE SCHURMEIER PRIZE.

Hon. T. L. Schurmeier, of St. Paul, offers through the department of Sociology, a prize of twenty dollars for the best essay presented by an undergraduate student on the subject of "The social effect of the industrial employment of women."

The essay must consist of three thousand words and should be handed to

the professor of sociology on or before May 10. Judges may reject any or all essays at their pleasure.

THE WILLIAM JENNINGS BRYAN PRIZE.

The Hon. William Jennings Bryan has given the University the sum of \$250.00 for the encouragement of studies in political science. The annual income will be given as a prize to the writer of the best essay.

The competition is open to all students of the college of science, literature and the arts.

The essays must contain not less than 2,000 nor more than 3,000 words, neatly typewritten, and must be handed to the professor of political science on or before May 10. The usual devices for securing impersonality must be adopted. The judges will be appointed by the president of the University.

THE MINNEAPOLIS TIMES "GOOD ROADS" PRIZES.

The Times Newspaper Company offers, for competition, to the sophomores of the department of civil engineering, three gold medals for the best "essays" or "studies" in good roads.

First prize—A fifteen dollar gold medal.

Second prize—A ten dollar gold medal.

Third prize—A five dollar gold medal.

The conditions for competition are as follows:

The essays are to be on some phase of the "good roads" question, to be approved by the department. Papers to contain about two thousand words. The good roads "studies" must be of some actual condition of roads in the State of Minnesota.

THE BRIGGS' PRIZE IN FOUNDRY PRACTICE.

For the encouragement of studies in foundry practice, Mr. O. P. Briggs, President of the Twin City Iron Works, offers \$75 annually, in two prizes which are to be accompanied by gold medals.

The competition is open to sophomores in the college of engineering, and the prize will be awarded for the best essay relative to the above subject.

Essays should contain about 3,000 words, and must be submitted to the professor of rhetoric on or before May first.

THE DUNWOODY PRIZE.

Mr. William H. Dunwoody, president of the St. Anthony and Dakota Elevator Company, has provided a cash prize of \$75 for the members of the team winning the inter-sophomore debate, and another prize of \$25 for the student in the sophomore class writing and delivering the best oration.

THE LOWDEN PRIZE.

Mr. Frank O. Lowden, of Chicago, offers as a prize to be competed for by the Northern Oratorical League, an endowment of \$3,000, which will yield an annual income of about \$175. A prize of \$100 will be given to the winner of the first place, \$50 to the orator who gets second place, and the remainder will be set aside each year for an interest fund to accumulate, and, in time, produce another endowment.

THE PEAVEY PRIZE.

Mrs. Frank H. Peavey has provided for a cash prize of \$75 for the members of the team winning the freshman-sophomore debate, and another prize of \$25 to the student in the freshman or sophomore classes writing and delivering the best oration. This continues the prizes provided by the late Frank H. Peavey.

THE WYMAN PRIZE.

A prize of twenty-five dollars is offered by the Honorable James T. Wyman, of Minneapolis, through the department of political science, for the best essay of three to five thousand words by an undergraduate student, on the subject of "The Trade Union as a Factor in Production."

THE ELLIOT SCHOLARSHIP LOAN FUND.

To fulfil the wish of the late Dr. A. F. Elliot to aid young men who find their efforts to obtain a practical education embarrassed through lack of means, the income of \$5,000, amounting to \$250 per year, is placed in the hands of the Board of Regents to be used as a scholarship loan fund for assisting young men in the school of mines.

The conditions of granting the scholarship loans are: The financial needs of the applicant, his scholarship, moral character, enthusiasm shown in his work and promise of usefulness in his profession. When money is available it may be loaned to pay expenses of worthy students during sickness. The loans are to be repaid, without interest, at the earliest convenience of the recipients.

PUBLICATIONS.

The University Bulletins are published by authority of the board of Regents six times a year—every six weeks during the university year. Bulletins will be sent gratuitously, postage paid, to all persons who apply for them.

The Minnesota Alumni Weekly is published every Monday during the University year. The Weekly is published entirely in the interest of the

alumni and is devoted to alumni news and such University news as may be of special interest to the alumni.

The Minnesota Daily is published five times each week during the University year by an organization of University students.

The Junior Annual, called the "Gopher," is a book published annually by the junior class of the University.

The Minnesota Magazine is a monthly magazine devoted to the cultivation of literary taste and effort among the students of the University. It is managed by a board of editors chosen from the senior class.

The Year Book of the Society of Engineers. The book is published yearly by the students of the engineers' society. It is devoted to the publication of articles upon engineering subjects by professors and students in the college of engineering and the mechanic arts.

EXPENSES OF YOUNG MEN.

At the request of University officials, in past years, a considerable number of students have kept strict accounts of their expenses, and the following statement shows fairly the possibilities as to expenses for a year's work at the University.

Class and society dues	\$ 6.00	\$ 8.25	
Room rent (9 months)	36.25]		
Board (39 weeks)	85.05 }	208.75	\$ 175.00
Laundry	9.95]		
Books and stationery	13.95	32.51	30.00
Street car fare	3.80	4.95	
Clothing	20.80	74.25	50.00
Benevolence, including amusements	17.35	24.90	
Miscellaneous	24.35	27.23]	
Railroad fare		16.25]	30.00
<hr/>			
Total expenses	\$ 217.50	\$ 397.09	\$ 285.00
Saved during summer....	\$ 35.00		
Earned during the year..	237.75	272.09	265.00
	<hr/>		
Expenses	217.50		
<hr/>			
Balance, over expenses....	\$ 55.25		
Balance		\$ 125.00	\$ 20.00

This table does not represent the fees to be paid by students, and students who are planning to attend the University should take that into account.

The students represented in the above statements are fairly representative; they were neither extravagant nor did they deny themselves unduly to get along. Board could have been obtained at a rate cheaper than was paid in any of the above cases.

The student who learns some trade before coming to the University has a great advantage over the student who has to earn his money by ordinary manual labor. Students have earned their whole expenses while attending the University, and have made good records at the same time. Other students have done so much work that they have not been able to keep up their studies, and have thus missed the one thing for which they were attending the University.

If it is possible for the student to have a part of his expenses paid, he should not attempt to earn his way entirely by his own exertions. It is a comparatively easy thing for a young man to earn half his living while attending the University and yet do good work in his classes. Students who want work seldom fail to find it. In coming to the University, the student should bring enough money with him so that he can live comfortably for a few weeks until he can find something to do.

EXPENSES OF YOUNG WOMEN.

Rent	} \$ 75.21	{	\$ 40.75	\$ 58.00
Board, light, laundry			52.42	138.00
Fuel			7.25	
Railroad fare and cartage			27.80	30.22
Street car fare	9.32		5.85	6.00
Stationery	2.16		8.97	
Amusements and membership dues	7.50		10.56	20.19
Personals and clothing	32.63		72.51	67.59
Books, fees and incidentals.....	23.26		18.94	35.60
Totals	\$ 150.08		\$ 240.05	\$ 355.60

A pamphlet has been published containing five papers (one by a young woman), relating actual experience of students who have made their way through the University.

Students who contemplate making their way through college will find here stated the stern and unpleasant side, as well as the brighter side of such a life. A copy will be sent free to any address upon application.

THE

GRADUATE DEPARTMENT

The Graduate Department

This department affords an extension of the work of the college of science, literature and arts, the college of engineering and the mechanic arts, the school of mines, the college of law, and the college of agriculture. It meets the threefold purpose of extending general culture, for which master's degrees are offered; of encouraging the mastery of a specialty for which the degree of doctor of philosophy is given, of providing for those who desire a more thorough acquaintance with particular subjects than is offered in undergraduate work, but are not candidates for degrees.

FEEES.

All students doing work in this department are required to pay a fee of ten dollars per semester. Those doing laboratory work must pay the usual laboratory fees in addition to the regular fee.

COLLEGE OF SCIENCE, LITERATURE AND THE ARTS.

I. The degree of master of arts will be conferred on a bachelor of this or any reputable college or university who, not sooner than one year after graduation, if in residence at this University, and not sooner than two years after graduation, if not in residence, shall pass an examination on certain prescribed lines of study, and present a satisfactory thesis.

II. A candidate for a degree is required to present his application on the proper blank, stating the several subjects selected in which to be examined, and the title of thesis. Graduates of other colleges or universities must present their diplomas or other credentials on filing their applications. After the approval of the application by the faculty of the college, no changes or departures will be permitted.

Applicants for graduate work must present their applications with the necessary credentials, to the committee on graduate studies and degrees, who shall examine said applicant and report accordingly to the general faculty. Provided always that the committee on graduate studies and degrees may prescribe for the candidate such preliminary studies as they may deem necessary for entrance on his work. Professors shall report to

the faculty early in second semester of each year, the names and work of the graduate students actively at work in their departments.

The professors in charge of the subjects pursued by the candidate for the master's degree, shall be the examining committee of said candidate, of which the professor in charge of the major subject selected shall be the chairman, and shall make its report to the committee on graduate studies and degrees.

III. Table of departments of study offered to candidates:

- A. Classical philology:
 1. Greek.
 2. Latin.
 3. Sanskrit.
 4. Semitic languages.
- B. Modern philology:
 1. English.
 2. French (Spanish and Italian).
 3. German.
 4. Scandinavian languages.
- C. Comparative philology.
- D. Biological sciences:
 1. Botany.
 2. Zoology.
 3. Paleontology.
- E. Physical sciences:
 1. Geology—lithological.
 2. Chemistry.
 3. Physics.
 4. Mineralogy.
- F. Mathematical sciences:
 1. Mathematics.
 2. Astronomy.
- G. Philosophical sciences:
 1. History.
 2. Economics.
 3. Politics.
 4. Philosophy.
 5. Pedagogy.
 6. Social science.
 7. Archæology.

IV. THE AMOUNT OF WORK done by the candidate shall be equivalent to that done by the senior class, viz: two semesters of four subjects each semester, with thesis in addition.

Note—It will be observed that this is equivalent to 8 semesters of work on one subject. Hence, estimates of the time are stated in eighths of a year.

V. METHOD OF SELECTING WORK :

1. The candidates shall select work in three distinct departments from the table of studies in number III.
2. One of the subjects he shall indicate as a major, the other two as minors.
3. The candidate shall devote not less than four-eighths of his work to the major, and not less than one-eighth to each minor.
4. The thesis shall be on some theme connected with the major subject.

VI. The proficiency of candidates shall be determined by examination only.

VII. All examinations shall be held at the University, at which the professors in charge of the subjects pursued by the candidate for the master's degree shall be present as the examining committee of said candidate, the professor in charge of the major subject being chairman. The examination must be completed by the second Thursday preceding commencement, and the examining committee shall make its report to the committee on graduate studies and degrees.

THE COLLEGE OF ENGINEERING, AND THE MECHANIC ARTS
AND THE SCHOOL OF MINES.

All regulations governing candidates for the master's degree apply to the candidates for second degrees in the college of engineering and the mechanic arts and the school of mines, particularly as to the amount of work done, the method of selecting work, degree of proficiency expected and the time and manner of conducting the examination.

The courses offered are a continuation of the lines of undergraduate work in that department which has conferred upon the student his first degree. Upon the completion of a full year of work and passing a satisfactory examination, with a technical thesis, the student is entitled to the degree of master of science.

THE COLLEGE OF AGRICULTURE.

The college of agriculture provides graduate work, under the same general plan as the college of science, literature and the arts. Work leading to the master's degree is open to bachelors of this or any reputable agricultural college. Applicants for graduate work in this college are referred to the dean and committee on graduate work.

COLLEGE OF LAW.

For the benefit of students who wish to pursue legal studies more advanced than they are able to secure as undergraduates, graduate courses are offered, leading to the degrees of master of laws and doctor of civil laws.

The graduate courses required for the degree of master of laws, are as follows:

- Philosophic basis of jurisprudence.
- Roman law.
- Political science.
- Constitutional jurisprudence and history.
- Theories of taxation.

Those who enter this course as candidates for the degree must have already received the degree of bachelor of laws, from this or some other law college requiring a three years' course of study. Those who spend the entire year in the work prescribed for this course, and pass a satisfactory examination upon the subjects taken, will be entitled to the degree of master of laws. Any person who possesses the requisite legal learning may, however, enter this course as a special student and pursue any or all of the studies offered.

Students who have received the degree of bachelor of laws, from this or some other law college requiring three years' course of study for said degree, and who have also received the degree of master of laws, from this or some other college after not less than one year of graduate study, and who have taken high rank in all the studies leading to these degrees, may apply to the faculty for the degree of Doctor of Civil Law. A knowledge of French or German, as well as of Latin, is required, and special proficiency in Roman history is necessary to entitle a student to entrance for such degree.

There is no prescribed time within which students are required to do their work in this course, but they must make themselves proficient in the subjects of Roman law, political science, comparative constitutional law, and the philosophy of jurisprudence before any thesis will be accepted.

Neither of the aforementioned degrees will be conferred until a satisfactory thesis is presented to the faculty by the student. The thesis for the doctor's degree must be one evincing original investigation and special excellence.

DEGREE OF DOCTOR OF PHILOSOPHY.

The degree of doctor of philosophy is conferred on bachelors of this, or any reputable college or university, under the following rules:

Applicants for the degree are referred with the necessary credentials, to the committee on graduate studies and degrees, who determine upon the fitness of said applicant for the work proposed and report accordingly to the faculty.

The candidate must elect his work in three departments, a major subject in one department, and two minor subjects in other departments. In special cases the faculty may, upon the recommendation of the committee on graduate studies and degrees, allow the work to be elected in two departments.

Candidates for this degree must devote at least three years of graduate study to the subjects approved. One of these three years, namely, that in which the final examination is held, must be spent in residence at the University. In lieu of the other years the candidate may offer an equivalent term of resident graduate work at some other university.

The candidate must pass satisfactory examinations on his major and minor subjects. In these examinations he must evince an exhaustive knowledge of the special field selected and must show such acquaintance with the minors and the entire field of his major as the committee of examination may require. The candidate must also have a reading knowledge of German and French.

The examination on the major subject is held on or before the second Tuesday in May of the year in which the candidate expects to receive the degree. The examination on the minor subjects is held at any time one year prior to the examination on the major. All examinations must be reported to the committee on graduate studies and degrees.

The candidate must present a thesis to the committee of examination on or before the first day of May of the year in which he expects to receive the degree. The thesis must give evidence of original and independent research, and must be a contribution to knowledge.

The committee of examination shall consist of five professors appointed by the committee on graduate studies and degrees, which number shall include, if practicable, the professors in charge of the candidate's work.

After the above examinations have been satisfactorily passed and the thesis approved by the committee of examination, the candidate is presented to the faculty by the professor in charge of his major subject for final examination. The presenter submits a written statement of the academic life of the candidate, of the character and scope of his examinations, and of the scope and value of the thesis. Any member of the faculty is then at liberty to ask of the candidate or of the presenter any questions he may desire. Upon the evidence before them the faculty then decide by a vote whether the candidate shall be recommended for the degree.

Regulations Governing Admission

ADMISSION.

Entrance examinations are held only at the beginning of the college year.

Students prevented from entering at the beginning of the year may be admitted at a subsequent date when the circumstances are such as to justify the action. Such students are, however, at a great disadvantage and all students expecting to enter the University are urged to be present at the beginning of the year.

All applicants should present themselves to the registrar who will furnish them with application blanks and directions how to proceed with their examinations and registration.

GENERAL REGULATIONS.

- I. Students will be admitted to the freshman class on **passing the regular entrance examinations.**
- II. No student will be admitted **if conditioned in more than three half-year subjects**, or their equivalent.
- III. Graduates of any Minnesota State high school will be admitted **with out examination, provided—**
 - (1) That the school maintain a **full four-year course** of high school work.
 - (2) That the applicant present to the registrar the principal's certificate showing the satisfactory completion of **all the studies required for admission** to the desired University course.
- IV. Graduates of Minnesota State high schools who are deficient in **not more than three half-year subjects** or their equivalent, **may be excused** from entrance examinations **in such subjects as the enrollment committee may decide**; such candidates should present themselves to that committee **not later than Tuesday of examination week.**

- V. Graduates of Minnesota State high schools whose principal's certificate shows them to be deficient in **more than three half-year subjects** or their equivalent, even though they have made such additional preparation as they deem necessary, must take, nevertheless, the regular entrance examination in all subjects, as provided in sections I and II unless excused by vote of the faculty; and persons wishing to present reasons for such excuse **should report to the enrollment committee not later than Tuesday of examination week.**
- VI. Any Minnesota high school or academy **not under supervision of the State High School Board**, but requiring for graduation **a four-year's course**, exclusive of the common school branches, conforming **essentially in distribution of time** to the entrance requirements of at least one of the University courses, will, upon application, be inspected by a committee, and, after favorable recommendation, **may be accredited by the faculty** in all respects as are the state high schools, **provided—**
- (1) That the school be **open to inspection** at any time by the University;
 - (2) That it take such **supplementary examinations as may be prescribed** from time to time.
- VII. **Graduates from schools in other states**, whose diplomas admit to **reputable colleges** in the state in which the school is located, will be received subject to the regulations that apply to graduates of Minnesota State high schools.
- VIII. Applicants from schools not coming within any of the above classes **must take the regular entrance examinations** or present State High School Board certificates.

Students bringing records from accredited schools are required to present them on the blank form provided for the purpose by the University. Blank forms may be obtained from the Registrar. No other form of certificate will be accepted. Students who do not bring their certificates on the proper form of blank will not be allowed to register until they have secured the certificate on the required form.

High School Board certificates will be accepted in lieu of an examination in the subjects which they represent.

In all cases the faculty reserves the right to require a student to take supplementary examinations if he does not sustain himself creditably in his course.

REQUIREMENTS FOR ADMISSION.

N. B.—Time element, as indicated with each subject, is essential.

A three years' course of reading in English classics.

English Composition, one year

Algebra, elementary, one year

Algebra, higher, one-half year

Geometry, plane, one year

Geometry, solid, one-half year

In addition to the above named subjects which are required and for which substitutes cannot be accepted, applicants shall present evidence of preparation in **eight** year-credits, or their equivalent, to be chosen from the following list:

NOTE—It is provided that if any language, other than the English, is offered from the list of elective subjects, at least two years of that language shall be offered.

Latin (four years).

Grammar, one year.

Cæsar, four books, one year.

Cicero, six orations, one year.

Vergil, six books, one year.

Greek (two years).

Grammar, one year.

Anabasis, four books, one year.

German (two years).

Grammar, one year.

Literature, one year.

French (two years).

Grammar, one year.

Literature, one year.

Spanish (two years).

Grammar, one year.

Literature, one year.

English.

Latin element, one year. Latin grammar will be accepted in lieu of this subject.

Literature, one year.

History, Ancient, to Charlemagne, one year.

Modern, from Charlemagne, one year.

England, one-half year.

Senior American, one-half year.

- Civics**, one-half year.
- Political Economy**, one-half year.
- Physics**, one year.
- Chemistry**, one year or one-half year.
- Botany**, one-half or one year.
- Zoology**, one-half or one year.
- Astronomy**, one-half year.
- Geology**, one-half year.
- Physiography**, one-half year.

SYLLABUS.

The following statements indicate, in a general way, the ground expected to be covered in the study of the various subjects accepted for admission.

English Classics (three years, averaging not less than three hours per week).

In order to secure a definite plan of study and unity of method on the part of preparatory schools, the requirements in English are outlined below somewhat in detail. Where texts are mentioned, they are merely suggestive and not arbitrary. Equivalents will be accepted in lieu of any of the texts mentioned.

English Classics—(a).

A critical reading, in classes, of English masterpieces, with composition work based upon the same. The following lists are suggested as well adapted for such study.

Shakespeare, "Macbeth;" Milton, "Paradise Lost," books I and II; Burke, "Cession to America;" Carlyle's essay on "Burns."

In the study of these works the student should come to know the leading facts connected with the author and his time; he should be familiar with the subject matter of the work; thoroughly at home with the story and have a clear idea of the form and structure of the work.

The teacher should call for frequent written exercises such as will naturally suggest themselves. For instance, in "The Merchant of Venice" the following are among the topics that might be suggested:

The historical setting of the play; the Jew in Europe, as depicted by the play; Shakespeare's purpose in the character of Shylock—to make him hateful or an object of pity. Portia's judgments; the comparison of certain characters.

English Classics—(b).

A less critical knowledge of other standard or classic works which may, perhaps, be read by the student at home, with written reports and brief oral discussions in class. Somewhat greater latitude is to be allowed here. The following works are noted as indicative of the minimum amount of work expected.

At least two of Shakespeare's plays, besides the one studied critically.

One of Irving's works. One of Hawthorne's novels. Stevenson's "The Black Arrow." One of Webster's orations.

English Composition and Rhetoric (one year).

Candidates are expected to show a familiarity with the principles and tech-

nical terms in ordinary high school texts upon the subject, whether acquired by the direct study of such texts or mainly by the study of selected English masterpieces. It should not be forgotten that the main purpose of this subject is to teach the student to use language correctly and forcibly. To this end students should be given constant exercise in composition writing. A knowledge of the subject matter of the texts used will be considered of less importance than the demonstration of ability to write good English.

A full year of work in the high school, five hours per week, should be devoted to this subject.

Elementary Algebra (one year).

Addition, subtraction, multiplication, division, factoring, highest common divisor, lowest common multiple, fractions, simple equations (with one, two, and several unknown quantities) followed by problems, theory of exponents, involution (including the binomial theorem for positive integral exponents), evolution, radicals, inequalities, ratio, proportion, progression, and quadratic equations with problems.

Higher Algebra, First Part (one-half year).

While this subject does not include any topics not named under elementary algebra, a much fuller treatment of those topics is expected in this work. Principles as well as processes should be learned, theorems and rules should be rigorously demonstrated, the exercises and problems should be more difficult, and students should be drilled in short methods and rapid work. Unless candidates have a good knowledge of the fundamental topics named below, they are not prepared to pursue successfully at the University the second part of higher algebra.

The topics are addition, subtraction, multiplication, division, factoring, highest common divisor, lowest common multiple, fractions, theory of exponents, involution, evolution, surds, imaginaries and simple equations with problems.

Plane Geometry (one year).

Any of the standard texts on this subject will furnish the necessary preparation. Isoperimetry, symmetry, and maxima and minima of figures are not required. The exercises requiring solutions and demonstrations should not be omitted.

Solid Geometry (one-half year).

Any of the standard texts on this subject will furnish the necessary preparation. The exercises requiring solutions and demonstrations should not be omitted.

Latin Grammar (one year).

This will include the subjects of orthography, etymology and syntax. Proficiency is particularly desired in the following subjects: the analysis of the verb forms, the rules of syntax, and the principal parts of the irregular verbs.

Cæsar (one year).

First four books, or selections from the seven books equivalent to four; or three books, with thirty pages of Cornelius Nepos, or two books with sixty pages of Cornelius Nepos. Special attention should be paid to the translation of passages of the text into correct and idiomatic English; grammatical questions connected with the text; more especially on the subjunctive mood, indirect discourse and the sequence of tenses. The pupil should be able to rewrite in *oratio recta* all the passages of *oratio obliqua* that occur in the text. The student is expected to be familiar with the life of Cæsar and an account of his wars.

Cicero (one year).

Six orations: four against Catiline and any two of the following: "Poet Archias," "Ligarius," "Marcellus," "Manilian Law" (to count as two orations), the Fourteenth Philippic. The student should be familiar with the life of Cicero and the history of his times.

Vergil (one year).

Six books of *Aeneid*, or five of *Aeneid* and one of the *Metamorphoses* of Ovid, or the *Eclogues*. The student should be familiar with the life of Vergil, and an account of his times and writings. A correct rythmical reading of the text is to be encouraged.

Greek Grammar (one year).

Xenophon's Anabasis (one year)—Four books.

English, the Latin element (one year).

Latin grammar will be accepted in lieu of this requirement.

English Literature (one year).

An acquaintance with the chief writers and events of the whole period covered by English literature is expected to be secured in the study of this subject.

German (two years).

First year—The pupil should acquire:

- (1) a correct pronunciation, training of the ear, eye and organs of speech.
- (2) a vocabulary of a thousand words of every day use; facility in combining these words into simple sentences. (As a means to this, 100 to 150 pages of easy narrative prose and poetry should be read, from which questions and answers may be formed. To test the student's memory and knowledge of the word-order he should relate or write out the story anew in his own words.)
- (3) From two to three hundred German idioms.
- (4) The essentials of German grammar, to be taught by means of oral and written exercises based upon the reading lessons.

Second year—

- (1) Read 150 to 200 pages of prose and poetry.
- (2) Practice in reading smoothly and with expression.
- (3) Carefully translate selected passages of the text into idiomatic English (to translate easy sentences which the student already understands is a waste of time).
- (4) Translate sentences from English into German, using words and idioms of the text read.
- (5) Study topically German grammar: chief rules of orthography, etymology and syntax; illustrate these by words, phrases and sentences selected or composed by the student.

French (two years).

The principles of French grammar, including acquaintance with the verb, regular and irregular; an ability to translate easy English sentences into French and simple French prose into English.

Spanish (two years).

First year—Grammar and reader.

Second year—Grammar reviewed; reading of some modern writer; composition and conversation.

Ancient History (one year).

- (a) This study should begin with from five to seven weeks upon the oriental

peoples who have most influenced European development, noting the early civilizations in the valleys of the Nile and Euphrates, the spreading and meeting of these civilizations in the intermediate region, with notice of the more important states in that district, and the union of the East under Persia. This survey should aim to give an idea of the reach of recorded history, of the distinguishing features of the successive oriental nations, and of their more important influence upon later European development.

- (b) In the Greek and Roman age emphasis should be put upon the evolution of institutions, and considerable attention should be paid to the later Hellenistic period, after the rise of Macedon, and to the Roman Empire, with its bearing upon subsequent history. Some of the work should be illustrated by the use of sources, and maps should be used constantly.
- (c) The subject should be carried down to the establishment of Charlemagne's Empire. This will bring together all the chief lines of influence which were afterwards to make our modern world, will show the meaning of the preceding eras as can not be done if the study stops at an earlier date, and will leave the subject at a period of comparative order and simplicity.

Modern History (one year).

From Charlemagne to the present. The topics to which special attention are called are the period of disorder after Charlemagne and the consequent rise of feudalism, the Holy Roman Empire and the papacy, the medieval church, the crusades, the free cities, the rise of national monarchies, the intellectual renaissance and the Protestant reformation, the French Revolution and the subsequent democratic movements in politics and industry.

It is desirable to give at least half the year to this last period from 1789.

Instead of these two subjects, Ancient and Modern History, the University will continue to accept the following:

History of Greece and Rome (one-half year).

Medieval History (one-half year).

Modern History (one-half year).

English History (one-half year).

The Saxon period should be passed over rapidly. In the remainder of the work, besides the narrative, constitutional points should receive attention, and easily accessible documents, like Magna Charter, should receive careful study.

Senior American History (one-half year).

No attempt should be made to cover the whole field in this time. Either the colonial history or the period from 1783 to 1832 offers quite enough material. In any case considerable use should be made of collections or documents and sources.

Civics (one-half year).

The subject should be approached from the historical side. The best arrangement is to combine the study with the senior American history and to give a year to the two.

Political Economy (one-half year).

Some good elementary text book should be mastered. It is desirable that students be encouraged to study local and general economic phenomena and conditions. The time should be wholly devoted to the elements of the science of political economy. The beginner should not be confused with problems of applied economics such as tariff, trusts, bimetallicism, etc.

Physics (one year).

It is suggested that the year's work be confined to four of the seven subjects mentioned below.

1. Mechanics of solids; 2. liquids and gases; 3. sound; 4. heat; 5. light; 6 and 7, electricity and magnetism (to count as two subjects but not to be divided).

Chemistry (one or one-half year).

The full year's work should include a study of both the non-metals and metals with laboratory experiments illustrating the common chemical laws and the commoner chemical reactions.

The half year's work should cover the non-metals only, with laboratory experiments similar to the first half of the full year's work.

Botany (one or one-half year).

Schools which give one-half year of botany should devote particular attention to plant relations, making the course largely ecologic in bearing. When a whole year is given to the subject, addition work upon plant structures should be offered, and together with fundamental conceptions of ecology a general idea of morphology and taxonomy should be the aim of the course.

Zoology (one or one-half year).

The course of zoology, whether a half year or a year course, should be a natural history rather than a modern morphological course. Collecting and classifying (as a means) should be encouraged as much as possible. Animals should be studied as living units, in their relation to one another and their environment. The general and special structural feature in relation to the habits, the food and manner of obtaining it, the enemies and means of protection against them, hibernation, migration, the differences in habits, form and structure between the old or mature animal and the young, the relation of parents to their offspring, etc.—in short, all about the life of the animal under consideration should be the prominent feature, and as much as possible of this should be made out by direct observation of the animal in its natural home and in confinement. The course, on the whole, should aim to foster and develop a love for nature, train the power of observation toward accuracy and give a healthful stimulation to the imagination. The pupil should be guarded against the habit of confounding the facts of observation with his interpretation, his judgments.

The animals for direct observation should be selected from as many branches of the animal kingdom as possible, and the changes during the year in the character of the fauna of the locality in general as well as of some particular region should be noted. In some localities the work will of necessity be largely restricted to land and air animals, but no locality in Minnesota is so poor in animal life that very profitable work cannot be laid out along the line indicated above.

It will be noticed that such a course of necessity includes so-called laboratory work. The amount and extent of the laboratory work will depend upon conditions, but even under the best conditions it is hardly advisable to go into detailed dissections and embryology. Continued, repeated and close observation, aided now and then, by a simple hand lens or a compound microscope, will reveal an abundance of material and opportunity for disciplining the mind.

Astronomy (one-half year).

An elementary course in general astronomy as presented in any good modern text-book.

Geology (one-half year).

These sub-divisions should receive special attention; physiographic geology, which treats of the building of the land and the evolution of its existing contours; geo-dynamics, the study of the forces, atmosphere, water, terrestrial heat, plants and animals, modifying the earth; and a brief survey of historical geology.

Physiography (one-half year).

The following topics should be emphasized: *Meteorology*, to an orderly arrangement of the leading facts relating to the atmosphere, and its phenomena, including some acquaintance with the work of the U. S. Bureau. *Land Sculpture*, as it treats of the origin, development and decadence of land forms and the influence of these processes on the physical environment of man.

ADVANCED STANDING. (See Appendix C.)

Advanced standing—The University accepts records from all reputable colleges for credit to advanced standing. Such records are accepted as far as they are equivalent to the work done in this University, subject to the approval of the departments concerned. In bringing records from other institutions, the certificate must be on the official blanks of the institution granting the certificate, and should show:

1. The subject studied; if a language, the work read, etc.
2. The time spent upon each subject.
3. Ground covered in laboratory work in case of laboratory subjects.
4. The result—it is sufficient to state that the subject was creditably completed.

Records from institutions, whose entrance requirements are not essentially equivalent to the requirement of the University, will not be accepted unquestioned; the credit to be allowed will be decided in individual cases by the enrollment committee.

DAILY ROUTINE.

Monday is taken as a holiday. The morning session begins at 8:30 o'clock; a general assembly of the faculty and students is held each day at 10:25 o'clock, at which there are brief and simple religious exercises.

EXAMINATIONS.

At the close of each term, examinations are held in the studies of the term. In order to be "passed" the student must obtain seventy-five per cent. In determining the standing of a student in any subject the result of his daily work in that subject is combined with the result of the final examination in the ratio of two to one.

Students who pursue any subject unsuccessfully are reported as "conditioned" or "failed."

A "condition" not made up before the subject is offered again becomes a "failure," subject to rules governing failures.

"Failures" must be taken over again in class.

A student who at any time is deficient in more than four studies of four

hours per week, loses his class rank and is regarded as a member of the next lower class.

Students whose absences in any term exceed four weeks in the aggregate, are not permitted to take the term examinations without special permission of the faculty.

FAILURE TO KEEP UP WITH THE CLASS.

Any student receiving three conditions or failures in the first semester shall be dropped from the rolls, and shall not be allowed to re-enter the University until the opening of the following year.

Any student failing to pass in one-half of the work of any year shall not be allowed to register until reinstated by action of the faculty upon recommendation of the committee on students' work.

FEES.

All students in the college, who are residents of the state, are charged an incidental fee of ten dollars a semester. Non-residents are charged double the fee required of residents of the state, or twenty dollars a semester. No reduction is made for late entrance or for leaving before the end of the semester. In addition to this fee, students who take work in laboratories are charged a sum sufficient to cover the cost of material and breakage. The following is a statement of fees charged per semester for freshman year. Chemistry, \$5; botany, \$3; zoology, \$3.

GRADUATION.

Students completing the course of study to the satisfaction of the faculty of the college, are entitled to receive the baccalaureate degree. Any person may undergo, at suitable times, examination in any subject, and if such person pass in all the studies and exercises of the course, he is entitled to the appropriate degree; **provided**, however, that at least one full year must be spent at the University, before such degree shall be granted, and **provided**, the examination, in every case, be held before a committee of the faculty appointed for that purpose.

UNCLASSED STUDENTS.

Applicants for admission as unclassified students must present credentials, or pass examinations, entitling them to admission to the freshman class as regular students. It is provided, however, that persons of mature years, who are well prepared for the work they wish to take, may be admitted by a vote of the faculty. Unclassified students who have been previously enrolled must renew their application at the beginning of each year as though applying for the first time.

The committee on unclassified students will meet daily during examination (the first) week of the first semester, in the president's office, to con-

sider applications, and all applications must be presented to the committee and not to individual members. Unclassed students will not be admitted after the third week of the semester. Action upon applications made after that time will be deferred until the beginning of the following semester. Students who are admitted are not allowed to pursue more than two lines of study.

No unclassified student is admitted to the work of the junior or senior year until after a full year's work in the lower classes—but the committee on unclassified students may allow exceptions in cases of persons of mature age, upon recommendation of departments concerned.

THE UNIVERSITY STATE TEACHER'S CERTIFICATE.

Upon graduation from the college of science, literature and arts, students who have completed one semester of psychology, and two semesters of pedagogy, may apply for, and will receive upon the vote of the faculty, the University State Teacher's Certificate, which by state law authorizes them to teach in the public schools of Minnesota for two years from date. After that time, upon satisfactory evidence of success, the certificate may be made perpetual by the endorsement of the state superintendent of public instruction and the president of the university.

NOTES ON THE COURSE OF STUDY.

Students will be required to complete for graduation a course of study equivalent to sixteen four-hour courses, each one year long. Of these there shall be four long courses.

NOTE—A long course shall consist of not less than two years' work in one department.

French and German shall not be begun later than the beginning of the sophomore year, except by students who pursue both Latin and Greek throughout the freshman and sophomore years, and no student is allowed to begin both French and German in the institution. But students who elect the long course of physics in the sophomore year shall be allowed to take French B₁ or German B₁ under number (4).

Course of Study.

N. B.—See notes on Course of Study, immediately preceding,

FRESHMAN YEAR.

All subjects of the freshman and sophomore years, unless otherwise specified, call for four recitation periods per week.

For outline of work covered by the various courses, see department statements as indicated.

JUNIOR AND SENIOR YEARS.

The work of the junior and senior years is entirely elective, and consists of sixteen exercises or recitations per week, selected from the following lists. Junior and senior electives are interchangeable. The only limitations imposed upon the choosing of subjects are as follows:

(a) Subjects cannot be chosen unless the work leading up to, and preparing for, such subjects has been completed.

(b) Not more than six-sixteenths of the work of the two years shall be selected from any one department.

JUNIOR YEAR—FIRST SEMESTER.

Animal Biology [4] (a). Course II—Vertebrate morphology and histology.

(b) Course III—Embryology of vertebrates.

(c) Course IV—Embryology of invertebrates.

(d) Course V—Research in morphology and embryology.

(e) Course VI—Comparative anatomy of vertebrates.

(f) Course VII—Systematic entomology.

(g) Course VIII—Physiology.

Astronomy [4]—General—Course I.

Botany [4]—(a) Plant physiology. (b) Plant morphology. (c) Elements of archegoniate and metaspermic taxonomy. (d) Elements of algology. (e) Elements of mycology. (f) Plant ecology. (g) Cellular morphology and dynamics.

Chemistry [4]—(a) Quantitative analysis. (b) Organic chemistry.

(c) Water analysis.

Comparative Philology [2]—General introduction to the science of language.

Drawing [4]—(a) Freehand. (b) Antique. (c) Design.

Elocution [4]—The physical side of vocal expression.

English [4]—(a) The Bible as literature. (b) The short story. (c) Chaucer.

French [4]—Aubert's *La Littérature Classique*: translations from English into French; readings from modern authors—Malot, Claretie, Daudet, Hugo.

Geology [4]—(a) Physical geology and geodynamics. (b) [2] Physiography.

German [4]—(a) (Second year of German) Course II—Modern prose.

(b) Faust.

Greek [4] Lyric and bucolic poetry. (b) Plato.

History [4]—(a) Course II—Rise of European nations and the Renaissance.

(b) Course IV—Europe—from the French Revolution.

(c) Course V—American constitutional history.

Latin [4] Suetonius', Lives; Tacitus', Annals; study of the early empire.

Mathematics [4]—Integral calculus. [2]—Method of least squares.

Mineralogy [4]—(a) Course I—General mineralogy; crystallography and the physical character of minerals, with a study of the rock-forming species.

(b) Course VI—[1]—Outlines of mineralogy.

Music (a) [2]—Harmony. (b) [1] Chorus—if pursued in connection with harmony. (c) [4] Pianoforte.

Pedagogy [4]—History of education.

Philosophy [4]—(a) Course IX.—Logic. (b) Course X.—History of. (c) Course XI—Principles of ethics.

Physics [4]—Electricity and magnetism. Open to those who have completed course I.

Political Science [4]—(a) Elements of economics. (b) Development of government. (c) Elements of jurisprudence.

Psychology [4]—(a) Course I—Descriptive. (b) Course VIII—Music.

Rhetoric [4]—Literary criticism.

Scandinavian (a) Language courses for beginners.

(1) [4] Swedish.

(2) [4] Danish-Norwegian.

(b) [4] Scandinavian literature.

(c) [2] Icelandic or Old Norse—elementary.

Spanish [4] Grammar by M. Montrose Ramsey, Ed. 1902. Reading of some modern novelist, as Valera, Alarcon.

JUNIOR YEAR—SECOND SEMESTER.

Animal Biology [4]—A continuation of all the studies of the first semester except physiology.

Astronomy (a) [4]—General—Course I, continued. (b)—General—Course II.

Botany [4]—(a) Plant physiology. (b) Plant morphology. (c) Elements of archegoniate and metaspermic taxonomy. (d) Elements of algology. (e) Elements of mycology. (f) Plant ecology. (g) Cellular morphology and dynamics. (h) Physiology of metabolism and irritability.

Chemistry (a) [4]—Quantitative analysis. (b) Organic chemistry. (c) [2] Theoretical chemistry. (d) [4] Gas analysis.

Comparative Philology [4]—Introduction to Teutonic philology.

Drawing [4]—(a) Freehand. (b) Antique. (c) Design. (d) Instrumental.

Elocution [4]—The psychological side of vocal expression.

English [4]—(a) Modern English prose. (b) Milton.

French [4]—Modern authors—Hugo, Mistral, Theuriot, Topffer; The modern drama.

Geology (a) [2] Historical. (b) [2] Petrographical. (c) [2] Paleontological.

German [4] (a) Course II continued—Goethe's *Egmont* or Schiller's *Wilhelm Tell*. (b) Lessing's *Laocoon* and *Dramaturgie* or Schiller's *Wallenstein*.

Greek [4]—(a) Archaeology of Greek art. (b) Tragedy.

History [4]—Courses II, IV, V, continued.

Latin [4]—Teachers' course—Cæsar and Vergil.

Mathematics—(a) [4] Determinants and solid analytical geometry. (b) Differential equations. Course (a) and (b) are offered alternately in different years.

Mineralogy [4]—Course I—General mineralogy; ores and economic minerals—continued.

Music (a) [2]—Harmony. (b) [1] Chorus—if pursued in connection with harmony. (c) [4] Pianoforte.

Pedagogy [4]—Philosophy of education.

Philosophy [4]—(a) Logic. (b) Course X—History of—continued. (c) Course XII [2]—Philosophy of religion. (d) Course XIII [2]—Æsthetics. (e) Course XIV [2]—Spencer.

Physics [4]—Sound and light. Open to those who have completed course I.

Political Science (a) [2]—Modern Industrialism. (b) [2] Theory of the State. (c) [4] Money and Banking. (d) [4] Advanced economics.

Psychology [4]—(a) Course I—Descriptive. (b) Course III—Experimental. (c) Course IV—Physiological. (d) Course VII [2]—Psychical research. (e) Course VI—Child study.

Rhetoric [4] Literary criticism.

Scandinavian (a) Language courses for beginners.

(1) [4] Swedish.

(2) [4] Danish-Norwegian.

(b) [4] Scandinavian literature.

(c) [2] Icelandic or Old Norse—elementary.

Spanish [4]—Continued.

SENIOR YEAR—FIRST SEMESTER.

- Animal Biology* [4]—See statement under junior year, first semester.
- Astronomy* [4]—Practical astronomy. Open to those who have completed the junior astronomy and mathematics.
- Botany*—For electives in botany, see junior year first semester.
- Chemistry* (a) [4]—Organic chemistry; lectures and laboratory work. (b) [4] Chemistry of carbohydrates. (c) [2] Colloquium.
- Comparative Philology* [2]—Principles of philology and semasiology.
- Drawing* [4]—(a) Still life and nature. (b) Life. (c) Modeling.
- Elocution* [4]—American oratory. Not offered in 1902-03.
- English* [4]—(a) Victorian poets. (b) Beowulf. (c) Shakespere. (d) Literary criticism. (e) Fiction.
- French* [4]—DeVigny's Cinq-Mars; lectures and composition on the literature of the XVIII century; Howell's farces translated into French.
- Geology* [4]—(a) As in the junior year. (b) [1]—Outline of general geology. (c) [4]—Paleontology.
- German* [4]—(a) Faust. (b) Modern authors.
- Greek* [4]—Tragedy (advanced course).
- History*—For electives in history (a), (b), (c), see junior year, first semester.
- In addition:
- (d) [2] Course VI—Making of the American constitution.
- (e) [2] Course VII—American history as seen in development of constitutional law.
- (f) [2] Course X—Historical masterpieces.
- (g) [2] Course XI—American diplomatic history.
- (h) [2] Course XIII—Colonial growth and administration.
- (i) [2] Course XIV—Critical study of sources of New England history.
- (j) [2] Course XVIII—Pathways of American settlements.
- (k) [2] Course XIX—England during the Tory supremacy.
- Latin* [4]—(a) Roman satire—Juvenal, Perseus. (b) [2] Patristic Latin.
- Law* [4]—This subject counts as a full elective. Students who enter the law college will receive credit for this work.
- Mathematics* [4]—(a) Modern analytical geometry. (b) Descriptive geometry with applications. (c) Mechanics.
- Medical Electives*—Students who contemplate pursuing a medical course are permitted, in the senior year, to elect the subjects of *anatomy, chemistry, histology* and *physiology*, and pursue the work in the department of medicine.
- Mineralogy* [4]—Course III—Physico-chemical methods and applications. Micro-chemical methods and determinations.
- Music* (a) [2]—Counterpoint. (b) [1] Chorus—if pursued in connection with counterpoint. (c) [4] Pianoforte.
- Philosophy* [4]—See statement under junior year, first semester.
- Physics* [4]—Course IV—Advanced laboratory work. Open to those who have completed course II.
- Political Science*—(a) [4]—Public finance and taxation. (b) [2] Corporation finance. (c) [2] Economic geography. (d) [2] Politics and administration (e) [2] Introduction to political science. (f) [2] Methods of investigation.
- Psychology* (a) [4] Course I—Descriptive. (b) Course II—Experimental. (c) [2] Course V—Research problems. (d) [2] Course VIII—Music.
- Rhetoric* [4]—Debate.
- Scandinavian*. Advanced language courses.
- (a) [4] Danish-Norwegian.

- (b) [4] Swedish.
 (c) [4] Scandinavian literature. A continuation of work of the previous year.
- Semitic*—(a) Elementary Hebrew. (b) Advanced Hebrew. (c) Elementary Arabic. (d) Advanced Arabic. (e) Elementary Aramaic or Syriac. (f) History of the Hebrews to the close of the Persian period.
- Sociology*—(a) [4] Elements.
 (b) [2] Social pathology.
 (c) [2] Social theory.
- Spanish* [4]—Fiction and drama; Cervantes, Calderon, Lope de Vega and other standard authors.

SENIOR YEAR—SECOND SEMESTER.

- Animal Biology* [4]—Continuation of the work of the first semester, with the exception of physiology.
- Astronomy* [4]—Practical astronomy—a continuation of the work of the previous semester.
- Botany* [4]—See courses of junior year—open to seniors also.
- Chemistry* (a) [2]—Electro-chemical analysis. (b) [4] Analysis of iron.
- Comparative Philology* [4]—Comparative phonology of English and German.
- Drawing* [4]—(a) Still life and nature. (b) Life. (c) Modeling.
- Elocution* [4]—British oratory. Not offered in 1902-03.
- English* [4]—(a) Fiction. (b) Modern English prose. (c) Comedies of Shakspeare.
- French* [4]—French literature in the XIX century; Romantic period; lectures; texts—Hugo, Dumas, Musset.
- Geology* [4] (a) As in junior year. (b) [4] Economic geology. (c) [4] Paleontology.
- German* [4]—(a) Lessing's *Laocoon* and *Dramaturgie* or Schiller's *Wallenstein*. (b) Modern German authors.
- Greek* [4]—(a) Epic poetry.
- History*—Continuation of the work of the first semester.
- Latin* [4]—Lucretius, Cicero, Ovid, Roman religion and worship.
- Law* [4]—For statement concerning law, see first semester.
- Mathematics* [4]—(a) Determinants and solid analytical geometry. (b) Differential equations. (c) Series and curve tracing. (d) Mechanics.
- Medical Electives*—See statement under same heading, first semester.
- Mineralogy* [4]—Course IV—Optical.
- Music* (a) [2]—Counterpoint. (b) [1] Chorus—If pursued in connection with counterpoint. (c) [4] Pianoforte.
- Philosophy* [4]—See statement under junior year, second semester.
- Physics* [4]—Course IV—Advanced laboratory work. Open to those who have completed course II.
- Political Science*—(a) [2]—Transportation. (b) [4] Money and banking. (c) [2] International law. (d) [2] Politics and administration. (e) Municipal administration.

Psychology [4]—(a) Course I—Descriptive. (b) Course III—Experimental. (c) Course V—Research problems. (d) Course VI [2]—Child study. (e) Course IV—Physiological. (f) [2] Course VII—Psychical research.

Rhetoric [4]—(a) Debate. (c) Art lectures.

Scandinavian—A continuation of the work of the first semester.

Semitic—See statement under first semester.

Spanish [4]—A continuation of the work of the first semester.

NOTE—Seniors contemplating entering the medical department are permitted to elect the courses in *anatomy, chemistry, histology and physiology* (it being understood that no repetition of work is allowed, in the medical department). The work completed in any or all of these departments will be applied toward the work required for a degree in this college.

NOTE—Members of the senior class of this college are permitted to elect as one subject throughout the senior year, work in the college of law, including the elements of contracts, domestic relations, torts and criminal law. The satisfactory completion of the above named courses will give the student a senior credit, and will entitle him to admission to the middle class of the college of law. No student will be permitted to take more than one lecture each day in the college of law, without special permission of the faculty of this college. The work must be taken with the night class in the college of law.

Course of Instruction

ANIMAL BIOLOGY.

Course I. General zoology. "Short course" or first year of the "long course." I, II. PROFESSOR SIGERFOOS, MR. OESTLUND AND ASSISTANTS
Text book, lectures, quizzes and laboratory work.

The course includes the elements of entomology, a general survey of the phyla of the animal kingdom and the elements of embryology. A collection of identified insects (which must be submitted during the first ten weeks of the course) is required of each student. Those intending to pursue the course may obtain directions from Mr. Oestlund during May and make the collection during the summer preceding the course.

Course II. Histology. Second year of the "long course."
PROFESSORS NACHTRIEB AND SIGERFOOS

Lectures, quizzes, reference and laboratory work.

- (a) General Histology. A comparative study of the characters, properties and development of animal tissues.
- (b) Vertebrate Organology. The microscopic anatomy of the organs of vertebrates.

So far as possible the student will prepare the material himself and thus acquire not only a collection of personally-made preparations, but also a practical knowledge of histological methods and technique. The text book and principal references are: Bohm and Davidoff-Huber, Text Book of Histology; Oettel, Lehrbuch der vergleichenden mikroskopischen Anatomie der Wirbelthiere; Koelliker's Handbuch der Gewebelehre des Menschen; Hertwig, Zelle und Gewebe; Ranvier, Traite Technique D'Histologie.

Course III. Embryology of vertebrates. Junior or senior I, II.

PROFESSOR NACHTRIEB

Lectures, reference and laboratory. Open only to those who have satisfactorily completed course II.

In the laboratory the student will prepare series of various stages of several vertebrates, and with these personally prepared series and the laboratory collections he will be taught to work out developmental problems as well as verify the statements of the reference texts.

The text-book and general references of the course are: Hertwig-Mark, Text Book of the Embryology of Man and Mammals; Marshall, Vertebrate Embryology; Minot, Human Embryology; Roule, L'Embryologie Comparee, and Hertwig, Handbuch der vergleichenden und experimentellen Entwicklungslehre der Wirbelthiere.

Course IV. Embryology of invertebrates. Junior or senior I, II.

PROFESSOR SIGERFOOS

Lectures, laboratory and reference work. Open only to those who

have satisfactorily completed course II.

Text references: Haddon, *An Introduction to the Study of Embryology*; Korschelt and Heider, *Text-book of Embryology of Invertebrates*; Roule, *L'Embryologie Comparee*.

Course V. Comparative anatomy of vertebrates. I, II. MR. BROWN
Lectures, quizzes, reference and laboratory work. Prerequisite, course I. The days and hours are arranged with the instructor.

Reference and laboratory guides: Flower, *Osteology of the Mammalia*; Barker and Bettany, *Morphology of the Skull*; Reynolds, *The vertebrate Skeleton*; Jayne, *Mammalian Anatomy*; Huxley, *A Manual of the Anatomy of Vertebrated Animals*; Owen, *Comparative Anatomy and Physiology of Vertebrates*; Wiedersheim, *Comparative Anatomy of Vertebrates*; Gegenbauer, *Vergleichende Anatomie der Wirbelthiere*.

Course VI. Taxonomy. Junior or senior.

Prerequisite, course I. Days and hours are arranged with the instructor.

(a) *Systematic entomology.* I, II. MR. OESTLUND

The course covers the general classification of insects and special problems in entomology.

(b) *Ichthyology.* I. PROFESSOR NACHTRIEB

The classification of fishes, with detailed work on the fishes of Minnesota.

(c) *Ornithology.* II. MR. BROWN

The classification of birds, with special reference to the birds of Minnesota.

Course VII. Nature study. Junior or senior II.

PROFESSORS NACHTRIEB AND SIGERFOOS

Prerequisite, two years of satisfactory work in the department. The days and hours are arranged with the instructors.

The course consists of lectures, reference, laboratory and field work. It is intended for those who contemplate teaching zoology and is planned to give practical instruction in collecting, identifying and preparing laboratory and museum material for general courses of zoology.

Course VIII. Physiology. Junior or senior II.

Lectures, text book and demonstrations. Open to all.

This course is at present offered on alternate years. It will be offered as an elective during 1903-4, and not during 1904-5.

Course IX. Principles of zoology. [2] Junior and senior I.

Lectures by Professors Nachtrieb, Sigerfoos and other members of the department on the life and habits of animals, the general principles of animal morphology, physiology and embryology, and a discussion of the origin and evolution of living things. The lectures will be illustrated by means of specimens, charts and lantern slides.

Course X. Problems in animal morphology, or embryology. Senior I, II.

PROFESSOR NACHTRIEB

Details arranged with the professor. Open only to those who have satisfactorily completed courses I, II, and III or IV, or their equivalents.

Course XI. Philosophical zoology.

PROFESSOR NACHTRIEB

Occasional lectures upon special topics. Days and hours determined by the professor. Open to those pursuing advanced courses.

FOR GRADUATES.

For graduates of the department and those of equal preparation from other institutions, whether candidates for a degree in the department or not, any line of research or advanced work that can be carried on profitably.

For less advanced students any regular work of the department for which the student is sufficiently prepared.

JOURNAL CLUB.

This club is composed of the professors, instructors and advanced students of the department. It meets once a week throughout the year. The object is to keep its members informed on the latest investigations carried on in the various branches of zoology through abstracts, reviews and discussions of the articles in the current periodicals. While the attendance is voluntary all advanced students are expected to take an active part.

FRIDAY NIGHT READING CLUB.

This club meets Friday nights during the winter months at the home of one of the professors to read and discuss writings not so technical as those of the Journal Club, such as the biographies and philosophical writings of prominent biologists. Attendance is voluntary.

ASTRONOMY.

FOR UNDERGRADUATES.

Course I. General astronomy. (Long course.) Junior I, II.

PROFESSOR LEAVENWORTH

A study of the general principles of astronomy, illustrated by observatory work.

Course II. General astronomy. (Short course.) Junior II.

PROFESSOR LEAVENWORTH

Course III. Practical astronomy. Senior I, II. PROFESSOR LEAVENWORTH

The theory of instruments, the use of the ephemeris and nautical almanac: the various methods of determining time, latitude and longitude, parallax, the position of the celestial bodies and the method of least squares: observatory practice including photography, and spectrum-analysis. Open to those who have completed course I. and courses I to V, of mathematics.

FOR GRADUATES.

Course IV. Extended course in practical astronomy. PROFESSOR LEAVENWORTH

Course V. Orbit work. PROFESSOR LEAVENWORTH

Course VI. Astrophysics. PROFESSOR LEAVENWORTH

Course VII. Astrophotography with photographic measurements.

PROFESSOR LEAVENWORTH

BOTANY.

Course I. General botany.

I, II. MR. LYON

This course comprises a general survey of the plant kingdom with laboratory work on the cell, on algæ, lichens, fungi, mosses and ferns, gymnosperms and flowering plants. Lectures and laboratory.

Course II. General plant morphology. First year.

MISS TILDEN

This course comprises a thorough laboratory discipline in algæ, fungi and lichens and is the introductory course for students specializing in botany. Lectures, laboratory work and collateral reading throughout the year.

Course III. General plant morphology. Second year.

PROFESSOR MACMILLAN AND MR. FREEMAN

Open to students who have completed course II, of which it is a continuation. A view of mossworts, ferns and flowering plants is given, with lectures, laboratory work and collateral reading throughout the year.

Course IV. General plant physiology.

PROFESSOR MACMILLAN

Lectures, reading and laboratory work. The course embraces about seventy-five qualitative experiments dealing with the principal functions of the plant, and one to three lectures per week. Open as an elective to all students who have followed a course in botany or zoology. Throughout the year.

Course V. Elements of archeogoniate and metaspERMIC taxonomy.

Junior or senior I, II. PROFESSOR MACMILLAN AND MR. ROSENDAHL

Lectures, reference reading and herbarium work. The course is primarily designed to afford students an opportunity to become proficient in the determination of plant species. Open to those whose preparation is deemed adequate.

Course VI. Elements of algology.

Junior or senior I and II. MISS TILDEN

Lectures, laboratory and reference work. The course includes one term's work upon the freshwater algæ, one upon the brown algæ and one upon the red algæ. Its bearing is rather toward comparative morphology than toward taxonomy. Open to those who have completed course I.

Course VII. Elements of mycology.

Junior or senior I, II. MR. FREEMAN

Laboratory and reference work. The course includes a comparative morphological and taxonomic survey of the fungi with collateral reading in Schroeter, DeBary, Ludwig, Zopf, Ward, Hartig and Brefeld. Open to those who have completed course I.

Course VIII. Plant ecology.

Junior or senior II. PROFESSOR MACMILLAN

Lectures, collateral reading and field observations. The course is designed to cover generally the domain of adaptational adjustments in plant embryology, anatomy, physiology and distribution. Particular attention is devoted to the problems of ecological distribution. Open to those who have completed course I and whose preparation is deemed adequate. Open also as a minor to candidates for the degree of master of science.

Course IX. Cellular morphology and dynamics.

Junior or senior I, II. PROFESSOR MACMILLAN AND MR. LYON

Laboratory work and collateral reading. The course includes a survey of cell-structure and the various phenomena of division, fusion and

metamorphosis, together with a review of the history of cytologic investigation from the time of Malpighi and Grew to the present. Assignments from the work of Strasburger, Henneguy, Hertwig, Wilson, Guignard, Beneden and Driesch will be made and methods of cytological research indicated in the laboratory. Open to those whose preparation is deemed adequate. Open also as a major or minor to candidates for the degree of master of science.

Course X. Physiology of metabolism and growth.

JUNIOR OR SENIOR I. II. PROFESSOR MACMILLAN

Lectures, reading and laboratory work. The course embraces a series of exact determinations of the movements of fluids in absorption, metabolism, excretion and physical processes, the principal constituents of the plant, synthesis of foods, respiration, translocation, enzymatic action, growth and its relation to environmental factors. To follow course iv and open to those eligible to that course. Open as a major to candidates for the degree of master of science.

FOR GRADUATES.

Course XI. Morphology and taxonomy.

PROFESSOR MACMILLAN

Special problems in structure, life histories, embryology, classification and phylogeny. Important literature and necessary apparatus will be provided for whatever research is entered upon under the direction of the department, and the results of the investigation will be required to be prepared for publication. The course is an elastic one and will be adapted to the special training and requirements of those pursuing it. Open as a major or minor to candidates for an advanced degree.

Course XII. Physiology.

PROFESSOR MACMILLAN

Problems in nutrition and growth. Particular attention is to be paid to the history of related investigations and the development of efficient methods of research in the subject under consideration. The results of the original work accomplished must be presented in a form suitable for publication. Open as a major to those who have completed course iii, to candidates for master of art or science, and as a major or minor to candidates for doctor of philosophy.

Course XIII. Paleobotany.

DR. SARDESON

Lectures and laboratory work with collateral reading designed to cover the historical literature. Schenck's *Handbuch* will be used as a guide in the laboratory. Open as a partial minor to candidates for the degree of master of arts or of science.

JOURNAL CLUBS.

Journal clubs are held under the direction of Professor MacMillan, and Miss Tilden, at which the attendance of students is required, as may be indicated to them.

CHEMISTRY.

FOR UNDERGRADUATES.

Course I. (a) General chemistry.

FRESHMAN I. PROFESSOR FRANKFORTER

Lectures and laboratory work. The course includes a detailed study of chemical and physical properties of the non-metals and their more important compounds.

- (b) Freshman II. PROFESSOR FRANKFORTER
Lectures and laboratory work. A continuation of course (a) with an introduction to organic chemistry.

Course II. Qualitative analysis.

- Sophomore I. ASSISTANT PROFESSOR NICHOLSON
Lectures and laboratory work. The course includes the general reactions of the metals and their qualitative separation.

Course III. Identification of the acids.

- Sophomore II. ASSISTANT PROFESSOR NICHOLSON
Lectures and laboratory work. Open to those who have completed course II.

- Course IV. Quantitative analysis.* Junior I. ASSISTANT PROFESSOR SIDENER
Lectures and laboratory work. An introduction to gravimetric analysis and a quantitative separation of the metals.

- Course V. Volumetric analysis.* Junior II. ASSISTANT PROFESSOR SIDENER
Lectures and laboratory work. A continuation of course IV.

- Course VI. Organic chemistry.* Junior I, II.
Lectures and laboratory work. The course includes the aliphatic series with a preparation of the more important compounds, supplemented by Levy's Anleitung für Darstellung Organischer Präparate. Also the aromatic series with a preparation of some of the more important compounds supplemented by Fischer's Organischer Präparate.
For further elective courses, open to juniors and seniors, see statement under school of chemistry.

COURSES FOR GRADUATE STUDENTS.

- A. *Special inorganic chemistry.*
- B. *Electro-chemistry.*
- C. *Organic chemistry.*
- D. *The alkaloids.*
- E. *Analytical chemistry.*

COMPARATIVE PHILOLOGY.

PROFESSOR KLAEBER

This department, besides offering courses in the general principles of linguistic science, affords an opportunity for elementary studies in comparative Indo-Germanic philology. The main starting point for the comparative treatment of the Indo-Germanic languages will be the Germanic family; individual old Germanic dialects also will be investigated in detail.

FOR UNDERGRADUATES.

- Course I. General introduction to the science of language.* Two hours a week.
Junior and senior I.
The principles of linguistic growth; the psycho-physical and the historical aspect of language; classification of languages; methods of comparative philology. Lectures and exercises; discussion of standard works.
This course will be sufficiently general in its nature to be of use to all students who wish to obtain an insight into the life of language.

- Course II. Principles of etymology and semantics.* Two hours a week.
Junior and senior I.
Growth of vocabulary; change of words in form and meaning. Lectures and exercises, with special reference to English and other Teutonic languages.
- Course III. Introduction to Teutonic philology.* Two hours a week.
Junior and senior II.
Outlines of the historical and comparative study of the Teutonic languages. The external history and the internal development (phonological, morphological, lexical) of the various branches of the Teutonic group.
- Course IV. Comparative phonology of English and German.*
Junior and senior II
Elements of phonetics; history of English and German sounds; orthography. The lectures will be supplemented by practical exercises.

FOR GRADUATES.

- Course V. Gothic grammar.*
The relation of Gothic to the other Teutonic dialects will be particularly emphasized. Braune's *Gotische Grammatik*; Heyne's *Ulfilas* (9th edition); Uhlenbeck's *Kurzgefasstes etymologisches Wörterbuch der gotischen Sprache*; Paul's *Grundriss der germanischen Philologie*.
- Course VI. Old Saxon.*
Grammar and interpretation of the *Heliand*.
- Course VII. Urgermanische grammatik.*
Relation of the Teutonic to the other Indo-European languages. The Germanic portions of Brugmann's *Grundriss der vergleichenden Grammatik der indogermanischen Sprachen*; Kluge's *Vorgeschichte der altgermanischen Dialekte*; Noreen's *Abriss der urgermanischen Lautlehre*; Streitberg's *Urgermanische Grammatik*; etc.
- Course VIII. Old High German.*
Braune's *Althochdeutsche Grammatik*; Braune's *Althochdeutsches Lesebuch*.
See also under "German Department."
- Course IX. Comparative grammar*
of the Greek, Latin and Teutonic languages; with a general survey of the field of Indo-Germanic Philology.
N. B.—The undergraduate courses are open to graduate students subject to the rules of the Graduate Department.
Related courses will be found under English.

DRAWING.

- Course I. Drawing.* Junior and senior I, II.
From models, casts and nature. Study of the principles of perspective and light and shade. In charcoal, line and wash.
- Course II. Antique.* Junior and senior I, II.
Studies of the human figure, from casts, in charcoal. Fractions, torsis, masks, busts, statues and groups.
- Course III. Design.* Junior and senior I, II.
The anatomy of pattern and geometrical design, planning of ornament, color harmony, plant analysis and conventionalism, traditional ornament and animate forms.

- Course IV. Instrumental.* Junior II.
Problems, projections, sections, developments and interpenetrations,
With conventional renderings in line and wash.
- Course V. Still life and nature.* Senior I, II.
Studies of groups of still life and plants and flowers. In pen and ink
or water color or oil. Open to those who have taken course I or
course II.
- Course VI. Life.* Senior I, II.
Studies in charcoal from the living model (heads and figures with cos-
tumes). Sketches in pencil, charcoal, red chalk and pen and ink.
Open to those who have taken course I or course II.
- Course VII. Modeling.* Senior I, II.
In clay, from the antique, and casting in plaster.

ENGLISH LANGUAGE AND LITERATURE.

- Course I. (a) Chaucer, (b) Spenser.* Freshman I, II. MISS PECK AND MR. BEACH
This course is also open as an elective to sophomores, juniors, seniors
and graduates who have not already completed the work.
- Course II. Early English.* Sophomore I, II. PROFESSOR KLAEBER
Introduction to the historical study of the English language.
- Course III. Shakspeare.* Sophomore I, II. MRS. POTTER
Open as an elective to juniors and seniors.
- Course IV. (a) The Bible as literature.* Junior and senior I. MRS. POTTER
(b) Milton. Junior and senior II. MRS. POTTER
- Course V. The Short Story.* Junior and senior I. PROFESSOR MCCLUMPHA
A study of American and foreign short story writers.
- Course VI. The Victorian poets.* Junior and senior I. PROFESSOR MCCLUMPHA
A study of Browning and later Victorian poets.
- Course VII. The Comedies of Shakspeare.* Junior and senior II. PROFESSOR MCCLUMPHA
A critical reading of Love's Labor Lost, Twelfth Night, As You Like
It, The Merry Wives of Windsor, and A Winter's Tale.
- Course VIII. Modern English prose.* Junior and senior II. PROFESSOR MCCLUMPHA
A study of the prose works of selected nineteenth century writers.
- Course IX. Advanced work in English philology. Beowulf.* Senior I. PROFESSOR KLAEBER
- Course X. Shakspeare.* Junior and senior I. PROFESSOR BURTON
- Course XI. Literary criticism.* Junior and senior I. PROFESSOR BURTON.
A study of development of method and view in the critical apprecia-
tion of literature.
- Course XII. Fiction.* Junior and senior I and II. PROFESSOR BURTON
A study on alternate years of the modern romance and the modern novel
of realism.
- Course XIII. Modern English prose.* Junior and senior II. PROFESSOR BURTON
A study of the present literary vernacular in its best examples.

FOR GRADUATES.

Graduate courses offered by PROFESSOR BURTON.

The essay as an English literary form.

The drama as technic.

The development of the modern drama.

(These are alternates.)

A senior seminar is also conducted in the pre-Raphaelite poets.

The junior-senior courses are open to graduate students under the rules of the graduate department.

The following graduate courses are offered by PROFESSOR McCCLUMPHA.

The English Drama from the closing of the theatres to present time.

Eighteenth Century Fiction. For 1903-04.

The following graduate courses are offered by PROFESSOR KLAEBER.

Introduction of the Middle English grammar, with reading of select texts.

Critical reading of difficult Old English texts.

Research work in Old English literature.

Historical study of English, for teachers.

N. B.—The undergraduate courses in English philology are open to graduate students, subject to the rules of the graduate department.

FRENCH.

FOR UNDERGRADUATES.

Course I. French begun. Freshman or sophomore, I, II.
De Borde's Elements of French; Kuhn's French Reader; modern plays.

Course II. Advanced grammar and composition. Freshman I, II, and sophomore I, II.
Fasnacht's Progressive French Course.
Paul Bercy's Selections for Translating English into French. The classical authors of the XVII and XVIII centuries will be read. Fortier's *Histoire de la Littérature Française* will be read.
Open to freshmen who have completed the French required for entrance.

Course III. (a). Sophomore or junior I.
Translations from English into French: modern authors—Daudet, Hugo, Malot, Merimee: history of French literature up to the classical period; the modern drama—plays from Labiche, Madame de Girardin, Scribe, etc.
(b) *The classical literature of France.* Sophomore or junior II.
Cornelle, Racine, Moliere.

Course IV. Lectures on the literature of the XVIII century. Junior or senior I.
With a view to the causes of the French Revolution. Howell's farce—*The Albany Depot*, translated into French. De Vigny's *Cannede Jonc*, V. Hugo's *Quatre Vingt Treize* and *Hernani*.
(b) *The XIX century in France.* Junior or senior II.
The romantic movement, lectures: Howell's farce—*Five o'Clock Tea*, translated into French; Texts: Dumas, Balzac, Daudet.

Course V. Italian. []

Abn's Italian course. Goldoni, Tasso, Petrarch, etc.

Senior I, II.

FOR GRADUATES.

Course VI. Romance languages. Old French.

Origines de langue Francaise par Petit de Julleville, Morceaux Choisis des Auteurs Francaise du Moyen Age, par L. Cledat. Some of the oldest monuments of the French language interpreted and translated into modern French, such as Serments de Strasbourg; La Vie de Saint Alexis; La Cantilene d'Eulalie; the chronicles of Villehardouin, La Chanson de Roland, Froissart. Phonetic changes studied and their laws examined. Special attention is given to those forms which have entered into the English language. This course is especially valuable to students in English philology.

*Course VII. History of Romantic movement.**Course VIII. Italian.* Interpretation of Dante's Inferno.*Course IX. Old Spanish.* El Poema del Cid.

GEOLOGY.

FOR UNDERGRADUATES.

Course I. Physical geology.

Junior or senior I. PROFESSOR HALL

1, Geodynamics, discussing the atmosphere, water, terrestrial heat, plants and animals, as geologic agents; 2, structural geology, explaining stratification, displacements, dislocations, fractures, induced rock-structures and mineral veins in their relations to the arrangement of material in the earth; 3, physiographic geology, pointing out the more prominent earth features and discussing their origin, significance and the agencies affecting them; 4, an enumeration of the common rock making minerals in their formation, occurrence and alterations.

Course II. Historical geology [2]

Junior or senior II. PROFESSOR HALL AND MR. UPHAM

A study of the strata of the earth. An outline of the salient features of the earth's history, discussing its several eras with their faunas and floras. The special purpose of the course is to outline the geographical history of the North American continent. Lectures and reading.

Courses I and II supplemented by either III or IV are intended primarily for students not intending to specialize in geology.

Course III. Petrographical geology. [2]

Junior or senior II. DR. BERKEY

General considerations on the origin and occurrence of rocks; i. e. Petrogenesis. The structure and texture of rocks. Preliminary studies of the mineral, physical and chemical constitution of the crystalline rocks with a view to their general description. Kemps Handbook of Rocks. Reference reading and demonstrations.

Course IV. Palontological geology. [2]

Junior or senior II. DR. SARDESON

A study of the more important types of fossils in their geological relations. Lectures and demonstrations. Open to those who have completed course I or course XI.

- Course V. Applied geology.* [2] Junior or senior II. PROFESSOR HALL
An outline of the economic relations of geology. The course comprises a discussion of the nature and distribution of the non-metallic materials of an economic value, including coal, mineral oils and natural gas; phosphates and other natural fertilizers, together with soils; the geologic conditions of water supply; abrasive and fctile materials; natural and artificial building stones; mortars and cements for construction, road-making, followed by a brief summary of the nature and distribution of ore deposits of the less and more important metals. Williams Applied Geology and reference reading.
- Course VI. Petrography.* Senior II. PROFESSOR HALL AND DR. BERKEY
An investigation of the megascopic and microscopic characters of crystalline rocks; a discussion of their crystalline habit, mineral composition and genetic relations. The course extends into an examination of some Minnesota groups of crystalline rocks. Practically a continuation of course III. Laboratory, with lectures and reference reading.
- Course VII. Palentology.* Junior or senior I. DR. SARDESON
The course treats of palentological evidence, its sources and interpretation and its relation to the theory of evolution. Lectures and demonstrations. Occasional expeditions can be arranged. Open to students of geology and biology.
- Course VIII. Paleontology.* Senior I, II. DR. SARDESON
The several chief types of organisms as represented by fossils will be studied successively. The leading fossils and their phylogenetic history will be treated with considerable detail. Lectures and demonstrations. Open to students of geology and biology.
- Course IX. Economic geology.* Senior I. PROFESSOR HALL
History of mineral discovery and development in the Americas; a discussion of the origin and distribution of ore deposits, embracing the chemical processes involved in the formation and subsequent alterations; a description of the geology and mineralogy of ore bodies, particularly those yielding gold, silver, copper, iron, lead and zinc.
- Course X. Special problems.* Senior II. PROFESSOR HALL
The investigation by individual students of particular problems, involving the field work of an investigation of some particular formation and with the laboratory investigation and reading incident to the study of the material collected. The methods of systematically recording and interpreting geological and mineralogical data as observed in the field; the keeping of note-books, preparation of geological mass, profiles and sections will be taught.
- Course XI. An outline of general geology.* [1] Junior or senior II. PROFESSOR HALL
This course treats of the leading physiographic facts and principles; the microscopic characters of the common rocks and a discussion of the general principles of petrographical and stratigraphical geology. Sections and reading supplemented by excursions and practical problems.
- Course XII. Physiography.* [2] Junior or senior I. PROFESSOR HALL
An outline discussion of the principles of earth sculpture with special reference to the ethnic movements and the commercial movements of mankind.

Course XIII. Geography and geology of Minnesota. [2]

Junior or senior II. PROFESSOR HALL

An outline of physiographic features; a review of the geography, petrology, paleontology and stratigraphy of the several periods of geologic history embraced within the state; a discussion of the mineral resources of Minnesota, particularly in building stones and metalliferous products.

Students desiring courses IX and X must take courses preparatory to the same in junior year.

FOR GRADUATES.

Course XIV. Petrographical problems.

PROFESSOR HALL

A study of rocks as geological bodies; the genesis of rocks and their chemical and dynamical alterations, illustrated in the gneisses and gabbro schists of the Minnesota river valley or the granites and basic eruptives of central Minnesota.

Course XV. The Keweenaw eruptives

PROFESSOR HALL

of eastern and northeastern Minnesota; their stratigraphic relations, textural and structural characters; or other problems to be selected on consultation.

Course XVI. Glacial geology.

PROFESSOR HALL

The local features of glacial phenomena. Field work will form the special feature of this course, embracing the formations at Minneapolis or some area accessible from it, as a survey of the glacial lakes in the vicinity, the gorge below the Falls of Saint Anthony, the Dalles of the St. Croix and other problems. The special field to be selected on consultation.

Course XVII. Paleontologic geology.

DR. SARDESON

A study of the Ordovician fauna with special illustrations from the Ordovician of Minnesota and neighboring states.

Course XVIII. Paleontology.

DR. SARDESON

The study of a selected group of fossils; a practical acquaintance with the forms and literature of the group is sought. The course is to be supplemented by a thesis.

GERMAN.

FOR UNDERGRADUATES.

Courses I and II are for students who begin German in the University and must not be taken by those who have presented German for admission to the University.

Students who have taken courses I and II in the University cannot receive credit for course III.

Students who begin German in the University will take the courses in the following order: Courses I, II, V or IV, VI.

Those who have presented German for admission will elect in this order: Courses III, IV, V, VI.

Course I. *German begun.* Freshman and sophomore.
ASSISTANT PROFESSORS WILKIN AND SCHLENKKE,
DR. SCHULZ AND MR. BURKHARDT

- (a) Whitney's Brief German Grammar, Barnhardt's German Composition and Buchhelm's German Poems.
- (b) *German prose selections.* Leander's Traumerelen, Heyse's L'Ar-rabbiata, von Hillern's Hoher als die Kirche; grammar and composition completed.
- (c) *Scientific prose.* Hodge's German Science Reader; grammar and composition completed.

Course II. *German second year.* Sophomore and junior I, II.
ASSISTANT PROFESSORS WILKIN AND SCHLENKKE,
DR. SCHULZ AND MR. BURKHARDT

- (a) Gerstacker's Irrfahrten, Zschokke's Das Wirtshaus zu Cranzac or Baumbach's Die Nonna; grammar reviewed; German conversation based on text.
- (b) Schiller's Wilhelm Tell, Lessing's Minna von Barnhelm or Freitag's Die Journalisten; grammar and composition.

Course III. *Classic prose and poetry.* Freshman and sophomore I, II.
PROFESSOR MOORE, ASSISTANT PROFESSOR WILKIN AND DR. SCHULZ

- (a) Goethe's Prosa and Gedichte, author's life and works, Spanhoofd's Deutsche Grammatik. Oral and written exercises based on text.
- (b) Schiller's Belagerung von Antwerpen, Heine's Prosa and Buch der Lieder, life and works of the authors.
- (c) Brandt & Day's German Scientific Reading, Spanhoofd's Deutsche Grammatik completed, original letters and essays.

Course IV. Sophomore I, II. ASSISTANT PROFESSOR SCHLENKKE

- (a) *Modern drama.* Sudermann's Johannes and Hauptmann's Die versunkene Glocke. Written and oral exercises.
- (b) *Classic drama.* Lessing's Emilia Galotti and Goethe's Iphigenie; letters and essays; selected outside reading throughout the year.

Course V. *Advanced subjects in literature and criticism.*

Junior and senior. PROFESSOR MOORE

- (a) *Goethe's Faust*: history of its composition. Faust legend; its treatment in literature before and since Goethe's time. The plan of Goethe's Faust; change in the order of the scenes; solution of the Faust problem in Part II. Lectures: essays by the class on related subjects.

Schiller's Ballads. German Prosody.

- (b) *German lyric poetry since the Reformation.* Selections from Lessing's Laocoon and Dramaturgy. History of German literature.

For those who have completed course II or IV.

Course VI. *German literature since the death of Goethe.* PROFESSOR MOORE
Rapid reading of recent authors. For those who have completed course V.

FOR GRADUATES.

Course VII. *Life and works of Luther.*

PROFESSOR MOORE

Course VIII. *Old High German.*

PROFESSOR KLAEBER

Braune's Althochdeutsche Grammatik; Braune's Althochdeutsche Lesebuch.

- Course IX. Seminar.* PROFESSOR MOORE
Goethe's Faust, Part II.
- Course X. Teacher's seminar.* PROFESSOR MOORE
Historical German grammar. Methods of modern language instruction.
- Course XI. H. Helmholtz.* DR. SCHULZ
Ueber die Erhaltung der Kraft. G. Kirchhoff und K. Kunsen: Chemische Analyse durch Spectral beobachtungen.
- Course XII. O. Ule und F. Langhoff:* DR. SCHULZ
Warum und Well. Zoologie and Botanik.
- Course XIII. Middle High German.* ASSISTANT PROFESSOR SCHLENKER
Study of the history and language of the period. Paul's Mhd. Grammatik. Readings from Armer Heinrich, Nibelungenlied, Gudrun, Walter von der Vogelweide.

GREEK.

There are two groups of students in Greek, known as group A, and group B. The first, A, consists of those who have completed two years or more of preparatory Greek before entering the University; the second, B, consists of those who have not previously studied the language. During the freshman year these groups are in separate classes; in succeeding years classes are combined as indicated in the statement of courses given below.

- Course I. Greek begun.* Freshman B, I.
Brook's Introduction to Attic Greek.
- Course II. Anabasis.* Freshman B, II.
Prose composition based on the text.
- Course III. Xenophon's Memorabilia.* Freshman A, sophomore B, I.
Prose composition based on the text; collateral readings in history.
- Course IV. Lysias and Demosthenes.* Freshman A, sophomore B, II.
Prose composition based on the text; collateral readings in history and antiquities.
- Course V. Plato.* Sophomore A, junior B, I.
Collateral reading and theses.
- Course VI. Tragedy.* Sophomore A, junior B, II.
Collateral reading and theses.
In courses III, IV, V, VI, a certain amount of private reading in Greek in addition to that read in the class room will be required of students in group A.
- Course VII. Lyric and bucolic poetry.* Junior A and senior B, I.
Collateral reading; study of dialects; theses; lectures.
- Course VIII. Archaeology of Greek art.* [2] Junior or senior I, II.
Lectures with collateral readings and theses.
This course is open to all students in the junior and senior classes.
- Course IX. Tragedy (advanced course).* Senior A and B, I.
(a) The Trilogy of Aeschylus.
(b) Oedipus Tyrannus; Oedipus Coloneus; Antigone.
(c) The Choephore of Aeschylus, Electra of Sophocles and Electra of Euripides.
Collateral reading; theses; lectures on epic poetry and the drama.

Course X. Epic poetry.

Senior A and B, II.

A study of Homeric language and verse; collateral readings; theses, lectures.

The *Odyssey* and *Iliad* will be offered in alternate years.

Course XI. Seminar in Greek poetry.

Senior A, and B, I, II.

One hour per week.

FOR GRADUATES.

Course XII. Greek poetry, epic, lyric, dramatic, bucolic.

An advanced course in the study of the entire field of Greek poetry in its historic development; with critical reading of authors.

Course XIII. Greek oratory.

A study of the historical development of oratory among the Greeks—reading from the various orators from Antiphon to Demosthenes.

Course XIV. The Septuagint and New Testament.

A knowledge of Hebrew is necessary for the successful prosecution of the work of this course.

HISTORY.

Course I. English constitutional history, with a brief survey of continental history.

ASSISTANT PROFESSORS WHITE AND ANDERSON, AND MISS McDONALD

Four hours a week through the year; required of all sophomores who do not elect second year mathematics—but students who have carried two years or more of history in the high schools may, upon the approval of the department, substitute course II, IV or V.

The course begins with about six weeks of introductory work on the history of western Europe from the barbarian invasions to the treaty of Verdun. The remainder of the year is devoted to a study of English constitutional history from the Anglo-Saxon conquest to the accession of the House of Hanover. Continental history will be touched upon at various points where its connection with English history makes it necessary.

Course II. European history, 10th century to 1648.

ASSISTANT PROFESSOR WHITE

Four hours a week through the junior or senior years.

Down to the Reformation the minor European states are treated only incidentally, the work being made to center about the development of the German and French nations. The course thus falls naturally into three parts:

First—History of the German Empire from the 10th century to the Reformation. A careful study is made of the German government, especially the effect upon it of the Papal-Italian connection, the main theme being the conflict of the Empire and the Papacy.

Second—History of France from Hugh Capet to Charles VIII. The special theme here is the growth of the French nation, care being taken to contrast the governmental development of France with that of Germany. Important collateral themes studied are feudalism and the crusades.

Third—The Renaissance and Reformation are studied as general European movements. Some use will be made of the sources, and, as far as possible, a first-hand knowledge gained of these movements and their leaders. The history of Europe from the middle of the 16th century to the peace of Westphalia is then covered briefly.

A thesis on some important related topic is required in connection with each of the first two divisions of the course. In part three the preparation of several short themes takes the place of this.

A reading knowledge of French, German, or Latin, while not required in this course, is an advantage.

Course III. Scotch and Irish history—political and economic.

ASSISTANT PROFESSOR WHITE

Four hours a week through the junior or senior years.

This course will not be given in 1903-1904

Course IV. Europe since 1789.

ASSISTANT PROFESSOR ANDERSON

Four hours a week through the year.

Open to juniors or seniors who have completed course I. The chief aim of the course is to put the student into appreciative contact with immediately contemporary history. Three of the four hours are given up to lectures and recitations attended by the entire class; the fourth hour is devoted to source and topical study in small sections. Much of the research work is done from periodicals, annual registers, year books and the like. In the lectures, much attention is given to the matter of political geography; a large number of maps have been specially prepared for this purpose under the direction of the instructor.

The first three or four weeks are devoted to a study of the political, economic and social condition of Europe on the eve of the French Revolution; the next ten weeks are given to the French Revolution and the Napoleon period, the history of all Europe being grouped about that of France; the remainder of the year is taken up in the study *seriatim* of the history of the leading national states, and, as far as the time permits of the minor nationalities.

During the course of the year the following books are required: *Putzger's Historischer Schul Atlas*, *Andrievs' Historical Development of Modern Europe* (student's edition), and *Mathews' French Revolution*.

Course V. Constitutional history of the United States.

PROFESSOR WEST

Four hours a week through the year. Open to juniors and seniors who have completed course I; and required for course VI, IX, and very desirable for XI and XIII and XIV. The aim is to make this a "practice course;" the work is done partly by co-operative topical reports, and students are expected to consult primary sources to a greater degree than is possible in most undergraduate courses. The work falls into the following divisions:

Colonial: the development of selected European germs in an American environment, the divergence from the European types, and the final separation in the Revolution. The topics given most attention are the development of representative government in the different colonies, especially in New England, the effects of the Stuart restoration and the critical colonial period, 1660-1689; the character of French colonization and the cause of the failure of France in the struggle for the

new world; the constitutional struggle preceding the Revolution and the progressive American standard of political rights.

The formation and organization of the Union: the transition from colonial to commonwealth governments, and the evolution of the state constitutions; the central government under the confederation; the making of the constitution; the organization of the Federalists and the centralizing tendencies they set in motion; the victory of Jeffersonian democracy and the modification of Jeffersonism in the war of 1812.

The growth of nationality: social and economic conditions in 1800; territorial expansion; the frontier and its meaning; Jacksonian democracy; the slavery struggle; civil war and reconstruction: economic development and questions.

Course VI. *The making of the constitution of the United States.* [2]

PROFESSOR WEST

An intensive course two hours a week, open to seniors who have taken course v with distinction, and to graduates. Each member of the class studies in detail the transition in one of the original colonies to commonwealth government, with the constitution of his chosen state. The work of the Philadelphia convention is then taken up and the accounts of later writers are compared with the sources. "We the people," the "compact" theory, and the province of the supreme court as "final arbiter," are topics especially investigated, with such further aids as the writings of the day and the discussions of the ratifying state conventions afford. Besides the class work each student will present a written report upon the history of some important bill providing for the admission of a state, and some constitutional question in connection with congressional legislation.

Course VII. *American history since 1789 as shown in the development of constitutional law.* [2]

PROFESSOR WEST

An intensive course, open to seniors who completed course v, to graduates, and to qualified law students. Course vi also is a desirable preparation. This course is not designed to be a systematic treatment of either history or constitutional law. It consists of a careful analysis of cases selected from Thayer's Cases on Constitutional Law, studied in their historical setting and with reference to the course of development.

Course VIII. *Constitutional history during the Civil War and Reconstruction period.* [2]

PROFESSOR WEST

Open on the same terms as vi and vii. Not given in 1903-1904.

Course IX. *Studies in American biography.* [2]

ASSISTANT PROFESSOR ANDERSON

Through the year. Open to seniors who have completed course v and to graduates.

In this course the work will each year center about the political activity of a single important character. In the choice of a subject two points will be especially borne in mind.

1. To select a character not only important *per se* but representative of some great historical movement or idea.
2. To select one who has left an abundance of material, valuable not only for his own part, but throwing light upon the action of others.

It is the aim to give each member of the class an opportunity to work up carefully topical divisions of the field and an acquaintance with the entire body of writings relating to the subject somewhat more special than can be secured in the general course. The subject for 1903-1904 will be Thomas Jefferson.

Course X. *A critical study of historical masterpieces.* [2]

ASSISTANT PROFESSOR ANDERSON

Open to seniors who have taken two courses in history, and to graduates.

Through the year. Courses ix and x are given in alternate years.

The object of this course is to develop the habit of reading history critically. Each year a masterpiece of historical literature will be minutely and critically studied. Every student will be required to read critically the entire work studied and in addition, to analyze and report upon assigned portions of it. These reports will be made the basis of the class work, which will consist mainly of discussions carried on by the students under the direction of the instructor. In 1903-1904 the masterpiece for study will be Gardiner's History of England, 1603-1641.

Course XI. *The history of American diplomacy.* [2]

ASSISTANT PROFESSOR ANDERSON

Offered to seniors and graduate students who have had two courses in history or one in history and one in international law. Through the year. History v is the best preparation. The course is designed to afford instruction upon the following matters: (1) The organization and methods of the diplomatic corps. (2) The history of the most important diplomatic negotiations. (3) The effect of the foreign policy upon the internal affairs of the country. To alternate with course XII.

Course XII. *The history of European diplomacy, 1814-1878.* [2]

ASSISTANT PROFESSOR ANDERSON

Offered to seniors and graduate students who have had two courses in history or one in history and one in international law. Through the year. History iv is the best preparation. Students will have Debidow's *Historie Diplomatique de l'Europe, 1814-1878*, second edition. Ability to read French is required. Not offered in 1903-1904.

Course XIII. *Colonial expansion and system of administration.* [2]

PROFESSOR WEST

Open to students who have completed course iv or v. The history of the colonial acquisitions of the great nations will be surveyed rapidly, and colonial institutions and governments will be studied and compared in detail.

Course XIV. *A critical study of authorities for early New England history—based upon a reading of Winthrop's New England.* [2]

PROFESSOR WEST

Open to graduates and seniors who have completed courses i and v. This is primarily a course in historical criticism. Each member of the seminar has a group of secondary authorities assigned him whom he is to criticize in the light of the original sources. The study involves also a careful comparison of the chief sources with each other, and incidentally it leads to a minute treatment of political, social and economic development in early New England. The number admitted to the course is strictly limited to eight. Courses XIV and XV are not given in the same year.

Course XV. *A history of the "Philosophy of History."* [2] PROFESSOR WEST
Open to graduates; given in alternate years with course xiv.

Course XVI. *Interpretation of medieval economic documents.*

ASSISTANT PROFESSOR WHITE

Characteristic documents relating mainly to 12th and 13th century economic history are to be carefully studied with reference both to language difficulties and historical criticism. Such documents will be selected as will tend to throw the most light on the leading economic problems of the medieval period. The work is to be based on *Documents Relatifs a L' Historie et du Commerce en France*, edited by Fagniez.

Course XVII. *English constitutional history.* [1]

ASSISTANT PROFESSOR WHITE

Through the year. Critical and detailed study of the reigns of Henry III and Edward I, with special attention to the establishment of the great Charter and the evolution of Parliament. Based on a careful reading of Bracton and the chronicles of Matthew Paris and William Rishanger. A working knowledge of Latin is required. Courses XVI and XVII are not given in the same year.

Course XVIII. *Expansion of America as studied in its highways of immigration.* [2]

MISS McDONALD

Open to students who have completed course v. This is a study of roads and methods of pioneer travel in that westward movement of population which extended the inhabited area of the United States from the seaboard to the Mississippi valley. Courses XVIII and XIX will not be given the same year.

Course XIX. *Institutional problems of English history.* [2] MISS McDONALD

Open to students who have completed course I. In this course particular attention is paid to the origin, development and functions of the public institutions of early England. Among the subjects treated are: The various forms of political organizations, local and central; the courts; systems of land tenure, and the church. Topics are assigned students, the object being a critical survey of problems not yet satisfactorily solved. Ability to read German and French is indispensable.

Course XX. *England during the Tory supremacy, 1783-1830.* [2]

ASSISTANT PROFESSOR ANDERSON

Open to those who have had course I and course II, IV or V. Throughout the year. The required readings consist mainly of extensive extracts from the writings, speeches and correspondence of Pitt, Canning, Castlereagh, Burke, Fox and Bentham. In the lectures and topics much attention will be given to the social changes of the period. Not offered in 1903-04.

LATIN.

Course I. *Sallust's Catiline and Livy, selections.*

Freshman I.

Exercises in Latin composition and a review of the syntax.

Course II. *Livy, Plautus and Terence.*

Freshman II.

Selections from Livy and one play of Plautus and one of Terence; rise and development of Roman institutions.

- Course III. Horace.* Sophomore I.
A study of his life, times, style and works; a history of Latin literature.
- Course IV. Tacitus, Agricola and Germania.* Sophomore II.
Pliny the Younger; selections from his letters.
- Course V. Cicero's letters.* Junior I. PROFESSOR PIKE
Selections from Suetonius' lives of the Cæsars and Annals of Tacitus with a study of the early empire.
- Course VI. Teachers' course.* Junior II. PROFESSOR PIKE
Cæsar:
A rapid reading of the Gallic war, Books V-VII. Drill work upon books I-IV. Latin Composition with Cæsar, and review of Grammar. Discussion of various problems in the teaching of Latin. Vergil. Selections from Aeneid VII-XII. Drill work upon books I-VI. Study of prosody and training in the quantitative methods of pronouncing Latin verse. Bennett's complete Latin Grammar. Kelsey's Cæsar and Knapp's Vergil are books required for this course.
- Course VII. Roman satire.* Senior I. PROFESSOR CLARK
Reading of Juvenal, Perseus, Horace, and fragments of early satire, with a study of the rise and development of Roman satire.
- Course VIII. Lucretius de rerum Natura, Cicero de Natura Deorum. Ovid Fasti.* Senior II. PROFESSOR CLARK
Roman religion—elements and worship.
- Course IX. Patristic Latin.* Senior I. PROFESSOR CLARK
(a) *Lactantius. Augustine and Tertullian.*
(b) *Latin Hymns.*
- Course X. Latin seminar. [2]* Juniors and seniors. PROFESSOR CLARK
A study of the Latin grammarians founded on Victorinus.

FOR GRADUATES.

- Course XI. Sanskrit.* PROFESSOR CLARK
Grammar and Nala Story not offered in 1903-04.
- Course XII. Graduate seminar.* PROFESSOR PIKE
Cicero's letters and a study of the fall of the Roman Republic.
- Course XIII. Graduate seminar.* DR. GRANRUD
Seminar in Livy and other Historians of the Roman Republic.
- Course XIV. Roman law.* PROFESSOR CLARK
Reading of the Institutes of Justinian and Selections from the Digest, with a study of the development and principles of Roman Law.

MATHEMATICS.

FOR UNDERGRADUATES.

- Course I. Higher algebra.* Freshman I.
Simple equations, inequalities, proportion, variation, progression, quadratic equations, simultaneous equations of the second degree, maxima and minima of functions, differentiation of algebraic functions, development of functions, logarithms, theory of equations and solution of numerical higher equations.

- Course II. Plane and spherical trigonometry and elements of analytical geometry.* Freshman II.
 With numerous applications.
- Course III. Analytical geometry.* Sophomore I.
 The conic sections, both by rectilinear and polar coordinates, producing equations of loci whose law of development is known, constructing and discussing such equations, transformation of coordinates, properties of loci by means of their equations.
- Course IV. Differential calculus.* Sophomore II.
 Differentiation of algebraic and transcendental functions, development of functions, maxima and minima, treatment of tangents, subtangents, normals, subnormals, asymptotes, direction and rate of curvature, evolutes, envelopes and curve tracing.
- Course V. Integral calculus.* Junior I.
 Integration of the various forms, rectification of curves, quadrature of plane and curved surfaces, cubature of volumes, equations of loci by means of the calculus.
- Course VI. Determinants and solid analytical geometry.* Junior or senior II.
 The plane, the straight line in space, quadric surfaces, applications. Each of the above courses requires all of the preceding courses.
- Course VII. Differential equations.* Junior or senior II.
 Open to those who have completed the first five courses.
- Course VIII. Modern analytical geometry.* Senior I.
 Discussion of equations of the first and second degree (tri-linear coordinates), equations of tangents and polars for the three forms of the second degree equation, the principle of duality. Open to those who have completed the first five courses.
- Course IX. Theory of equations.* Senior I.
 Based on Burnside and Panton, including a review of the elementary properties of equations, discussion of the roots of unity, the solution of the cubic and the bi-quadratic, the proof that every equation has a root, symmetric functions of the roots, introduction to the co- and in-variants. Open to those who have completed the first five courses.
- Course X. Series and curve tracing.* Junior or senior II.
 Convergence, scale of relation, n th term and summation of series by algebraic methods, and curve tracing by aid of the calculus. Open to those who have completed the first five courses.
- Course XI. Method of least squares.* Junior or senior I.
 A study of the combination and adjustment of observations and the discussion of their precision as applied especially to engineering, physics and astronomy. Open to those who have completed the first five courses.
- Course XII. Descriptive geometry.* Junior II, senior I.
 Problems relating to points, lines, planes, solids, surfaces of revolution and warped surfaces; orthographic, isometric, horizontal, oblique, and perspective projections; shades and shadows. Recitations, lectures and practice. Open to those who have completed the first three courses.
- Course XIII. Applied mechanics.* Senior I, II.
 Statics, dynamics, strength and elastic properties of the ordinary materials of construction, hydro-mechanics (study of the laws of

pressure and the flow of liquids). Recitations and lectures. Open to those who have completed the first five courses.

FOR GRADUATES.

Course XIV. Determinants.

Course XV. Advanced work in co-ordinate geometry.

Course XVI. Advanced work in differential calculus.

Course XVII. Advanced work in integral calculus.

Course XVIII. Quaternions.

Course XIX. Theory of functions.

Course XX. Hyperbolic and elliptic functions.

Course XXI. Spherical projections.

Course XXII. History of mathematics.

Courses III-XIII are offered to those who do not elect them in their undergraduate years.

MILITARY SCIENCE AND TACTICS.

HAYDN S. COLE, Lieutenant U. S. A., Commandant.

For the instruction in military drill and administration the students are organized into a corps of cadets, consisting of two battalions of infantry, and a platoon of artillery.

A uniform of prescribed pattern is worn by all cadets during drill.

The uniform consists of blouse, trousers, vest and cap, modelled after the U. S. Military Academy cadet uniform, and costs in Minneapolis about \$15, and is as neat and economical dress as the student can obtain.

Drill is required of all men in the freshman and sophomore classes.

Military drill may be taken voluntarily by others outside of the freshman and sophomore classes and to encourage this, as it is considered beneficial, not only to the individual student, but to the State generally, the extra work is considered by allowing two years' drill to count as one full credit in the second semester of the senior year. It is understood, however, that only one full credit can be thus obtained.

Military instruction is intended to be so conducted as to develop a soldier-like bearing and foster a spirit of gentlemanly courtesy, soldierly honor and obedience to lawful authority, as well as to familiarize students with company and battalion manœuvres, guards and the theoretical and practical use of fire arms.

On graduation of each class the commandant will report to the Adjutant-General of the Army the names of the graduates who have shown special aptitude for the military service and furnish a copy thereof to the Adjutant-General of the State.

The officers and non-commissioned officers are required to be good students in the other departments, soldier-like in the performance of their duties, exemplary in their general deportment and able to pass a creditable examination in drill regulations. In general, the officers are selected from the senior class; the sergeants from the junior class; and the corporals from the sophomore class.

Freshman—Practical instruction in schools of the soldier, company and battalion: signals, ceremonies; schools of the cannoneer and battery.

Sophomore—Practical and theoretical instruction in schools of the company and battalion: Advance and rear guard drill: Practical and theoretical instruction in guard duty. Gallery practice. Ceremonies.

Junior, senior—Theoretical instruction—Advance and rear guards, outposts, reconnaissance, camping: duties of company commander: articles of war: records.

CADET OFFICERS AND NON-COMMISSIONED OFFICERS.

Majors—U. S. Duncan, F. O. Fernald.

Captains—T. A. Beyer, C. L. Haney, E. R. Mosher, S. G. Collins, P. D. McMillan, B. Dibble, F. A. Stewart.

First Lieutenants—O. Sobotka (adjutant), J. B. Ladd, R. R. Knight, C. W. Brooks, M. L. Page, R. Newhall, A. C. Whitney, E. H. Williams.

Second Lieutenants—A. F. Stockman, J. D. Halleck, W. E. Smith.

R. S. Pattee, sergeant major; G. H. Stone, Q. M. sergeant; S. A. Hatch, chief musician; C. W. Colby, principal musician; J. E. Finley, chief trumpeter.

First Sergeants—L. P. Campbell, W. C. Adams, E. L. Noyes, G. L. Gillette, W. F. Rosenwald, W. W. Thorpe and C. W. Kinnard.

Sergeants—C. P. Barnum, C. W. Goodsell, R. H. Keyes, P. S. Schouten, Dwight Yerxa, A. R. Gibbons, L. P. Anderson, L. M. Powell, R. B. Taplin, C. J. Thomson, M. F. Baker, H. E. Peterson, O. G. Kelsey, A. R. Fairchild, A. B. Wells, L. S. Alden, V. H. Bosworth, C. H. Bensen, A. C. Remele, C. V. Pierce, R. C. Ten Boeck, W. S. Covey, S. Wood, R. T. Hugo, P. A. Brooks, H. E. Francis.

Corporals—G. M. Harrington, M. T. Davenport, L. H. Northrop, H. Aldrich, O. Mattison, D. I. Oakes, H. A. Puffer, H. G. Gerrish, F. H. Newell, F. C. Frary, A. M. Ormond, M. Avedovech, C. N. Hensel, A. L. Peterson, O. G. Tradewell, R. F. Sanford, G. E. Garber, A. W. Robertson, W. E. Thompson, D. T. Smith, W. V. Hughes, C. D. Robinson, R. H. Pratt, L. F. Jackson, J. R. McRae, C. N. Smith, J. A. Jardine, B. R. Fisher, J. Sanborn, J. S. Abbott, B. Fisher, F. W. Payne, A. T. Lagerstrom, A. C. Koch, H. L. Brockway, C. Poor, W. E. Streissguth, A. W. Kraft, H. E. Leach, J. H. Hartzell, O. Sorensen, A. J. Miller, K. A. Simmon, H. D. Smalley, R. H. Smith, C. R. Wright, E. H. Cressy, F. A. Olsen, P. F. Bunce, J. E. Ransom, A. T. Thompson, C. W. Burnham, C. L. Gilman, R. H. Campbell, T. Fairchild, G. Boardman, B. M. Loye, E. C. O'Brien, E. W. Spring, A. Cary, F. A. Kelley, L. C. Kells, W. E. Stout.

MINERALOGY.

Course I. General mineralogy.

Sophomore or junior 1. H. PROFESSOR HALL AND DR. BERKEY

The morphology of minerals, consisting of the elements of crystallography and the projection and construction of figures of crystals; the physical and chemical characters of minerals, with demonstrations; a study of the native elements and the rock making minerals; the basis of mineral classification.

The ores and economic minerals are described and their crystal forms, physical properties and chemical composition, together with their occurrence and association, are treated. The most important groups of minerals are studied. Minerals are discussed in their genetic relationship and distribution.

Laboratory work consists of tests illustrating the range of minerals and the application of chemical and blowpipe analysis to the determination of species. An introduction to the methods of quantitative blowpipe analysis: special topics; reference reading and discussions.

Course II. Quantitative mineralogy.

Junior II. PROFESSOR APPLEBY AND MR. CHRISTIANSON
 Determination of value of ores. Lectures, recitation and laboratory work. Course I, metallurgy, in the school of mines.

Course III. Physico-chemical methods, with their applications.

Senior I. DR. BERKEY
 The method of micro-chemical analysis described and demonstrated; the leading elements found in minerals are determined through the aid of crystalline precipitates of known compounds.

Course IV. Optical mineralogy.

Junior or senior II. DR. BERKEY
 A study of the structure of crystals and crystal grains.
 An application of methods used in determining minerals by their optical properties; goniometric and stauroscopic practice, embracing the elements of lithology. Lectures and laboratory work.

Course V. The morphology of minerals.

Senior II. DR. BERKEY
 A study of crystallography, embracing projection and the geometric relations of crystal planes.

Course VI. An outline of mineralogy [1]

Junior or senior. DR. BERKEY
 A study of methods of identification of minerals, with their applications. Conferences, reading and demonstrations. Throughout the year.

FOR GRADUATES.

Course VII.

PROFESSOR HALL AND DR. BERKEY
 Original problems in morphological and physical mineralogy.

Course VIII.

DR. BERKEY
 Special investigations in physical and chemical mineralogy.

Course IX.

PROFESSOR HALL AND DR. BERKEY
 Description of mineral occurrence and association. Genetic relationships. Field work in connection with the different phases of the particular problem in hand.

MUSIC.

Course I. Theory of music—Harmony (thorough bass.) [2] Junior I, II.

PROFESSOR OBERHOFFER AND ASSISTANT PROFESSOR BEACH
 (a) *First semester*—Intervals, scales, principal triads and their inversions; the chord of the dominant seventh and its inversions; a short practical course of ear-training to begin simultaneously with the triads.
 (b) *Second semester*—The secondary triads and secondary chords of the seventh and their inversions; the nature of modulations, suspensions, passing notes, organ point, chromatically altered chords; cross relations; chorals—ear-training to be continued part of semester, to be followed by short course of musical analysis; sonata form, the rondo, the string quartette, the symphony, illustrated on classic models.

Course II. Advanced musical theory—Counterpoint. [2]

Senior I and II. PROFESSOR OBERHOFFER
 This course is open only to students who have completed course I, or equivalent.

(a) *First semester*—Single counterpoint, imitation, canon; musical history introduced, chronological, comparative and biographical.

(b) *Second semester*—Double counterpoint, the fugue composition; musical form and history continued.

NOTE—These courses will be offered providing there be not less than twenty desiring to pursue the work.

Course III. Choral culture. [2]

Junior or senior I, II. PROFESSOR OBERHOFFER

A popular course in choral practice for four part mixed voices, with occasional selections for male voices and female voices separately; features—sight singing with hints on proper tone-production, correct breathing, vocalization and solfeggio; the art-forms in choral compositions will be studied and analyzed. (Chorus a capella, motet, cantata, oratorio.)

A single credit may be secured for chorus work, provided that students pursuing the work for credit pursue courses I or II at the same time. Students may pursue the chorus work, without credit, by paying the required fee and securing the consent of the director.

Course IV. Pianoforte (advanced)

Junior and senior I, II.

PROFESSOR OBERHOFFER AND ASSISTANT PROFESSOR BEACH

For students who intend to pursue the higher branches of the art of pianoforte playing (2 years—4 semesters,) for those who intend to fit themselves for piano teachers. While private lessons are the rule, classes of no more than four students may be arranged. Students in this course should have mastered technical difficulties of the degree of Czerny's School of Velocity and the easier Haydn and Mozart sonatas.

Resume—The practical aim of the theoretical courses is to acquaint the student with the laws underlying musical composition, enabling him at the same time through critical analysis to arrive at the keenest perception and appreciation of masterworks in music and finally to stimulate latent talent to self-expression of musical thoughts in correct form.

All students electing courses I or II must pay a registration fee of four dollars a semester; courses I and III, five dollars; course III alone, two dollars. Students electing the piano must pay, in addition, a fee the amount to be announced upon application.

Students entering the University for the express purpose of studying music, must register for at least one subject outside of the department of music.

PEDAGOGY.

Course I. History of education.

Junior I. PROFESSOR JAMES

An introductory study of educational history, conducted by means of lectures, assigned readings, with oral and written reports, and periodical summaries from various texts. The purpose of the course is the arousing of a permanent interest in educational problems, the securing of some perspective for use in current investigation, some command of the facts and some ease in the methods of educational history and study. The attempt is made to bring out education as one phase of civilization, and to show its connection with other important social institutions. Attention is focussed on a few

typical periods, and preference is given to an intensive study of certain men, periods and systems, over an extensive survey of educational history. What may be lost in comprehensiveness is made up as far as possible in definiteness of educational conception, and permanence of educational interest.

Course II. The philosophy of education. Junior II. PROFESSOR JAMES

This course includes a discussion of the nature, the aim and the elements of education, important problems in applied psychology, the proper conditions of physical, mental, and moral development, the fundamental questions of practical school organization, both in subject matter and in presentation, some discussions of materials and methods in secondary education, and a critical review of elementary school work. Current educational ideals are compared, and encouragement given to the formation by each student of an independent and substantial, even though provisional viewpoint and standard for educational theory and practice.

Open to juniors and seniors who have had not less than one semester in psychology.

FOR GRADUATES.

Course III. Educational systems and classics. [2] PROFESSOR JAMES

An advanced course in educational history. Open to graduates and to undergraduates who have completed courses I and II, or have gained an equivalent, together with actual teaching experience either elementary or secondary.

Course IV. Current problems in education. [2] PROFESSOR JAMES

An advanced course in the theory and practice of education; topics selected from school organization and administration, school legislation, the secondary curriculum and methods of instruction, present and impending school reforms.

Open on same conditions as course III.

PHILOSOPHY AND PSYCHOLOGY.

FOR UNDERGRADUATES.

Course I. Descriptive psychology.

I or II.

ASSISTANT PROFESSOR WILDE, MR. SWENSON AND MR. JOHNSTON

This course is intended to serve as a general course in psychology and as an introduction to the advanced courses offered by the department. The work consists of the study of a text supplemented by lectures and demonstrations and by the preparation of papers on some psychological topic.

Course II. Experimental psychology. Part I.

I. MR. JOHNSTON

Open only to students who have completed course I.

Eight hours a week laboratory work in the psychology of the senses, following in outline Titchener's Laboratory Course in Experimental Psychology.

Course III. Experimental psychology. Part II.

II. MR. JOHNSTON

Eight hours laboratory work in the psychology of the higher intellectual processes.

Open only to students who have completed course I.

Course IV. Physiological psychology.

II. MR. GALE

A course of lectures, demonstrations with models, a large collection of original preparations and lantern slides, and practical laboratory

dissections in the origin and development of the brain and nervous system, in the processes of sense-perception, and illusions, memory, association, willing, and pleasure-pain. Much of the modern fine histological anatomy of the brain will be shown through a rare collection of slides prepared by the instructor in the Anatomical Institute at Leipzig. This course is designed to meet the conditions of biological and medical students who wish to specialize further in nervous histology and to get more of the psychological correlations, as well as for psychological students who wish to get more physiological knowledge in a more popular and untechnical form.

Open to students of psychology or animal biology.

Course V. Research problems in experimental psychology. I and II. MR. GALE
Open only to students who have completed course II or course III.

Original research in special problems in experimental psychology or special advanced study of brain cells and tracts through original material and through the comparative and development methods. Students electing this course will be expected to spend eight hours a week in research work.

Course VI. Psychology of childhood. [2] II. MR. GALE
Open to students of course I or of pedagogy.

This course in genetic psychology will trace the development of knowledge and feeling from infancy, through childhood and adolescence. Comparison with the late work in animal psychology will be made and the pedagogical side will receive much attention. The course is based largely on material furnished by the instructor's own three children (in which a far better mass of individual psychological data has been gathered than any yet published), who are being educated in the natural surroundings of the home, and it is hoped that suggestion can be gained for the artificial education of children in the mass. References to the more important biographies and modern pedagogical studies in this field will also be given. The development of the child's brain will be shown, the methods of testing children's defects of vision, color, and hearing will be demonstrated.

Course VII. Problems of psychical research. [2] II. MR. GALE
Open only to students who have completed course I.

The phenomena of "psychical research." I. e., thought-transference, spiritualism, suggestion in the various forms of mind-cures, hallucinations, and the deceptions of the senses in the preceding phenomena and in conjuring.

Course VIII. The psychology of music. [2] I. MR. GALE

Lectures with experimental demonstrations to analyze the total aesthetic effects of music into its elementary components of tone quality and quantity, rhythm, melody, harmony, contrast, with the biographical, historical and personal associations, and its connections with poetry in songs and with the drama in opera. Based largely on original experimental material, together with such works as those of Helmholtz, Koenig, Stumpf, Riemann, Zahn, Lauier, Gurney, Gilman, Wallaschek and R. Wagner.

Extra hours will be given as illustrations in different forms of piano compositions, chamber music, song cycles of Schubert, Schumann and Brahms; piano arrangements of Beethoven's Ninth Symphony, and at least of Parsifal from Wagner's music-dramas. Special lectures will be given preparatory to the best public concerts during the musical season.

Course IX. Logic.

I or II.

ASSISTANT PROFESSOR WILDE, MR. SWENSON AND MR. JOHNSTON

A study of the nature of knowledge and the principles of formal logic. Jevons' Lessons in Logic will be used, supplemented by lectures and exercises.

Course X. History of philosophy.

I and II.

ASSISTANT PROFESSOR WILDE AND MR. SWENSON

An introductory course in philosophy for which logic and psychology are desirable, but not required prerequisites. The course falls into two divisions, either of which may, by special permission, be taken singly.

(a) Two hours of lectures designed to give such an outline of the history of thought as is desirable in a general education.

(b) Two hours of reading in class the most important works in the history of philosophy, with a view to developing the power of independent appreciation and criticism of such works.

Subjects for 1903-04: Plato, Hobbes, Berkeley.

Course XI. The principles of ethics.

I. ASSISTANT PROFESSOR WILDE

An introductory course, comprising a study of the distinction between moral and non-moral phenomena, an analysis of voluntary conduct, and a discussion of the nature of conscience, the meaning of right and wrong, the purpose of life, human responsibility, and the authority of moral law.

Course XII. Philosophy of religion. [2]

II. ASSISTANT PROFESSOR WILDE

A study of the religious consciousness, its origin, development, and significance; an analysis of the conception of God and a discussion of the place and function of religion in modern life.

Course XIII. Aesthetics. [2]

II. ASSISTANT PROFESSOR WILDE

A study of the nature and principles of beauty, and a discussion of the place and function of art in life.

Course XIV. Philosophy of Herbert Spencer. [2]

II. MR. SWENSON

The course will consist of a critical reading of the First Principles, with references also to the philosophical position of such scientists as Huxley, Tyndall, and Darwin: the aim being to discuss the epistemological foundations of science, and to consider the relative position of science among the other interests of life.

FOR GRADUATES.

Course XV. Experimental psychology of feeling.

MR. GALE

Rhythm, melody, harmony, color, proportion, movement, conduct.

Course XVI. Experimental psychology of reasoning.

MR. GALE

By question blanks, individual trials, analysis, and other means.

Course XVII. Psychology of childhood.

MR. GALE

Study of a larger mass of original material (on three children) than any yet published—especially in feeling and reasoning.

Course XVIII.

MR. GALE

Reading of psychological works in German, French and Italian.

Course XIX. Brain histology and brain microphotography.

MR. GALE

Technical practice in the methods of Golgi and Weigert, and especially

in the cutting of series. Study of a large and valuable collection of original preparations and photographs with the works of Barker, Donaldson, Edinger, Obersteiner, Kolliker, His, Flechsig, Retzius, Golgi, and Ramon y Cayal.

- Course XX. Pre-Socratic philosophy.* MR. SWENSON
A critical study of the fragments of early Greek philosophy, with attempts at systematic reconstruction.
- Course XXI. The philosophy of Aristotle.* MR. SWENSON
A critical reading of his logical treatises, the *Metaphysics*, and the *Psychology* in the original Greek.
- Course XXII. The philosophy of Kant.* MR. SWENSON
A critical reading of the three *Critiques*; the relation of Kant to the development of modern philosophy.
- Course XXIII. The philosophy of Hume.* MR. SWENSON
A critical reading of Hume's philosophical works, the position of Hume in the development of English philosophy.
- Course XXIV. The history of ethics.* ASSISTANT PROFESSOR WILDE
A critical reading of the chief works in the history of ethics.
- Course XXV. Systematic ethics.* ASSISTANT PROFESSOR WILDE
A detailed study of the principles of conduct and the basis of moral obligation.
- Course XXVI. The idealistic philosophy of religion.* ASSISTANT PROFESSOR WILDE
A study of the religious philosophy of Kant, Fichte, and Hegel.
- Course XXVII. German idealism.* ASSISTANT PROFESSOR WILDE
A critical discussion of the philosophies of Fichte and Hegel.
- Course XXVIII. Metaphysics.* ASSISTANT PROFESSOR WILDE
A critical and constructive discussion of theories of knowledge and reality.
- Course XXIX. Swedish philosophy.* PROFESSOR CARLSON
A historical review of Swedish philosophy during the XIX century and a critical study of the rationalistic idealistic system of Bastrom and his followers.

PHILOSOPHICAL SEMINAR.

The seminar meets bi-weekly in the evening during the winter months to read and discuss contemporary philosophy. The membership consists of the professors, instructors, and qualified students of the department.

PHYSICAL CULTURE.

FOR WOMEN.

MISS BUTNER AND MISS BARBOUR

The course in physical culture is offered to the women of the University as a regular part of their work in the freshman year, and may be taken in any of the following years. A full year of work, in addition to the work required in this department, counts as half a credit in the second semester of the senior year. The work consists of systematic exercises for the development of all parts of the body. Women pursuing this course are required to provide them-

selves with a gymnasium suit, consisting of a blouse waist and bloomers, with the regulation gymnasium shoes. All suits must be of black material.

It is a common observation that students often enter the University with an imperfect physical development because of an excessive use of some muscles, while others are weakened through disuse. These occasions attitudes and movements that are unseemly in appearance and unhealthy in their general effect.

The purpose of this course is to develop a strong and symmetrical physique with a graceful and easy carriage.

A physical examination is made of each student and physical measurements are taken in the fall and again in the spring.

In addition to the regular class work, "sports and pastimes" are open to all young women of the University. These include basket ball, battle ball and numerous other ball games, and also running games, all of which tend to cultivate the play instinct and give the nerve stimulus that comes from natural play.

FOR MEN.

DR. COOKE

A well equipped gymnasium in charge of a professional medical director is open for the young men. The training and exercise is under the immediate oversight and authority of the medical director and is wholly with a view to the healthful physical development of the whole student body.

All young men are required to be examined by the medical director of physical culture upon registration and during the course as often as the indications of the physical condition may require.

The decision of the director will be either:

1. Advisory, indicating what course of hygiene and exercise will best sustain and improve the health of the student, or
2. Mandatory, requiring the students to pursue the course of hygiene and physical exercise necessary for the proper care of health, and the discharge of their duties as students.

Gymnasium work is required of all men in the freshman class, one hour per week, (in two half hour periods if the director so decides) throughout the year. The required work includes a course of lectures on personal hygiene, during the first term.

PHYSICS.

FOR UNDERGRADUATES.

The mathematics of the freshman year is required as preparation for all courses in this department.

Course I. (long—first year.)

(a) Mechanics of solids and fluids.

Sophomore I.

(b) Heat and electrostatics.

With experimental lectures and laboratory work.

Course II. (long—second year.)

(a) Electricity and magnetism.

Junior I.

(b) Sound and light.

Junior II.

With experimental lectures and laboratory work.

Course III. (short.)

(a) Mechanics, heat, and electrostatics.

Sophomore I

(b) Electricity, magnetism, sound and light.

With experimental lectures.

Course IV. Advanced laboratory work.

Senior I, II

Open to those who have completed course II.

FOR GRADUATES.

Course V. Advanced work in some special field; experimental investigation being the principal feature of the work.

Course IV is also open to graduate students desiring the work.

POLITICAL SCIENCE.

FOR UNDERGRADUATES.

For a general course in economics students may take courses I, II, V.

Special course in private economics, I, II, III, IV, V, VI, VII.

In public economics, I, II, IV, VI, VII, IX, X.

ECONOMICS, PRIVATE AND PUBLIC.

Course I. Elementary. [4] Junior I. PROFESSOR MCVAY
A thorough course in the elements of economics. The aim is to inculcate accepted doctrine, and show the nature and bearings of questions unsettled. Text book, problems, lectures and discussions.

Course II. Corporation finance. [2] Senior I. PROFESSOR MCVAY
A study of the methods of financing modern corporations, and the analysis of their accounts and statements. Text books, Green, Corporation Finance; Sumner's Investment Securities; Woodlock Anatomy of a Railroad Report. Lectures, collateral reading and problems.

Course III. Economic geography. Senior I. Lecturer to be announced.

Course IV. Public finance. [4] Senior I. PROFESSOR FOLWELL
Public expenditure, national, state and local, from the standpoint of public wants.
The principles and policy of revenue and taxation.
Public debts and financial administration. Illustrated chiefly by American examples.

Course V. Methods of investigation. [2] Senior I. PROFESSOR MCVAY
A course in methods of using libraries, collecting and organizing material, followed by the actual investigation of important questions.

POLITICS.

Course I. The development of government. [4] Junior I. ASSISTANT PROFESSOR SCHAPER
An account of the government as the agent of the state: comparative historical study of the evolution of the most important governmental systems, including an account of the tribal, patriarchial, and feudal systems, the Greek, Roman, modern European and the American systems. Text book, with lectures and topical readings.

Course II. The elements of jurisprudence. [4] Junior I. ASSISTANT PROFESSOR SCHAPER
A study of those human relations requiring legal regulation considered from the American point of view; the nature and sources of law, status, rights and wrongs, sovereignty, corporations, etc. The course is intended as a preparation for active citizenship as well as for the study of law. The student will practice looking up cases summarizing principles. The course is based on a text, with lectures and assigned reading.

Course III. *Politics and administration.* [2]

Senior I. ASSISTANT PROFESSOR SCHAPER

A course in American administration, running through the year. A study of the government, national, state and local, including a study of the extra legal institution—the political party, its nature and function. In the first semester a brief sketch of the history of the science, and an analysis of the two primary functions of government, politics and administration. A text, with lectures and reading.

Course IV. *Introduction to political science.* [2]

Senior I. ASSISTANT PROFESSOR SCHAPER

Intended primarily for seniors in the college of engineering.

ECONOMICS, PRIVATE AND PUBLIC.

Course VI. *Modern industrialism.* [2]

Junior II. PROFESSOR McVEY

The development of the modern industrial system from the middle of the eighteenth century. So far as time allows the phenomena of corporations, monopolies and trusts are treated. Particular attention is paid to the question of state interference. Lectures and collateral readings.

Course VII. *Banking and money.* [4]

Senior II. PROFESSOR McVEY

Elements and principles of the subjects. Lectures, papers and text book.

Course VIII. *Transportation.* [2]

Seniors and engineers II. PROFESSOR FOLWELL

The evolution of transportation in the United States, and of railroads in particular. Economic aspects and public policy of railroading.

Course IX. *Advanced economics.* [4]

Junior II. PROFESSOR McVEY

A continuation of course I. In this course special economic topics are discussed. Hadley's economics, and Sumner's problems are used.

POLITICS.

Course V. *Theory of the state.* [4] Junior II. ASSISTANT PROFESSOR SCHAPER

A study in the theory of the state, its origin, nature, purpose and its justification; the state on its physical side, that is, the elements of population and territory. The state is considered from the philosophical, the juridical, and the historical points of view. This course follows course I. A text book with lectures and topical readings.

Course VI. *Municipal administration.* [4]

Senior II. ASSISTANT PROFESSOR SCHAPER

A comparative study in modern city charters and methods of administration. The relation of the city to the state, the delimitation of its sphere of activity, its liability for tort, and an investigation into the causes of municipal corruption and merits of proposed reforms. This course takes the place of the one on city government offered heretofore, and differs essentially from it. A text and lectures.

Course VII. *Politics and administration.* [2]

Senior II. ASSISTANT PROFESSOR SCHAPER

A continuation of course III. In the second semester the state, county

and township governments in operation are studied. The initiative and referendum, the nominating system and the new primary election plan for nominating candidates are explained in a series of lectures and readings.

FOR GRADUATES.

The particular lines and subjects of study are selected by individuals or groups after consultation with the head of the department. So far as possible instruction will be given to groups.

When insufficiently grounded in elementary subjects, graduates are permitted to join undergraduate classes, but are expected to do more work than is required of undergraduates.

Economics courses, II, IV, V, VII, VIII and IX, and politics courses III, VI and VII, are planned and conducted in a manner suitable to graduate students.

Among subjects desirable for graduates electing work in this department and in which instruction will be given so far as the duties of the teaching force will permit are:

Economic schools and movements. Evolution of economic theory. The science and technique of statistics. The doctrine of rights. Comparative politics. Neutrality of states.

The political science seminar conducted by Professor Folwell meets weekly on Fridays throughout the year. Open to all graduate students of the department, and to seniors especially interested and qualified.

Reference is made to a circular published by the departments of Political Science and History in June, 1902, for general suggestions to students specially interested in these departments.

RHETORIC AND ELOCUTION.

RHETORIC.

Course I. Rhetoric. [4]

Freshman I and II.

PROFESSOR SANFORD; MISS COMSTOCK AND MR. SANFORD

This course includes two hours a week of rhetoric, the writing of compositions, and the study of prose master-pieces; and two hours a week of the study of Shakspeare's plays. To students of high standing in this course, an elective course in argumentation is offered. It consists in theoretical study of argumentation and practical work in written and spoken debate.

Course II. English composition and rhetoric. [1] *Sophomore.* MR. FIRKINS

The students write exercises in class and weekly essays outside of class exemplifying the important points in description, narration, exposition and argumentation successively. The work consists of writing and criticism only; neither text books nor lectures are employed.

Course III. Addresses, responses to toasts, orations. [1]

Sophomore. MR. FIRKINS

This course consists of original speeches, four or five in number, which are written, learned and publicly delivered. (N. B.—Course II will probably extend over the first few weeks of the second semester.)

Course IV. Debate [1]

Sophomore I, II.

Students may elect debate in place of course II and III. Individual drill and thorough criticism precedes each debate rendered in class.

Course V. Literary criticism. Junior I, II. PROFESSOR SANFORD
Study of models of English poetry, oratory, fiction, etc., with critical essays. Open to those who have completed course I.

Course VI. Lectures upon the history of art. Senior II. PROFESSOR SANFORD
With essays on art subjects. Open to students who have completed course I.

Course VII. Debate. Senior I, II. PROFESSOR SANFORD
This course aims at the training of men in public speaking. It consists of theoretical work in argumentation. Standard debates and orations are analyzed and briefed; original debates are briefed, written and rehearsed for criticism. Special emphasis is laid upon class room debate with criticism on delivery, thought and composition.

Course VIII. Advanced rhetoric. Junior II. MR. FIRKINS
In this course essays are written twice or three times a week. They aim at some specified excellence, such as coherence, vividness, strength of imagery, or logical plan; and examples of this specified excellence from the writings of great authors are read by the students as a preparation for the work. Text books are not used; the principles of the subject are orally explained or dictated by the instructor. The first semester is occupied with narrative and description; the second with exposition and argumentation.

ELOCUTION.

Course IX. Reading. [1] Sophomore I, II.
ASSISTANT PROFESSOR McDERMOTT
Sketches from standard authors studied with special attention to articulation, enunciation, flexibility of voice and purity of tone.

Course X. The physical side of vocal expression. ASSISTANT PROFESSOR McDERMOTT
This course aims at the following objects: An understanding of the vocal mechanism; the strengthening and cultivation of the voice; the correction of foreign accent, defective enunciation and common faults of quality such as aspirated, oral, pectoral, guttural and nasal tones; the specific application of the principles of clearness, simplicity, strength and variety in delivery. Interpretation is approached from within not from without and correct thinking is made the basis of correct expression.

Course XI. The psychological side of vocal expression. Junior or senior II.
ASSISTANT PROFESSOR McDERMOTT
In this course the functions of the dramatic instinct, the will, the intellect, the imagination and the emotions are considered independently and conjointly with reference to delivery. The effect upon expression of the neglect of any one of these elements is shown, and literature is studied with a view to the harmonious development of all.

Course XII. American oratory. Junior or senior I.
ASSISTANT PROFESSOR McDERMOTT
Standard orations are analyzed; synopses, oral biographies, accounts of historical settings and expositions of the orator's style and logic are required. Forensics and debates are prepared and one original oration each semester is required, and a short selection from the

oration under consideration is committed for practice in delivery, and short stories from best modern authors are retold for fluent command of English. Besides class work each student is given a brief period for individual criticism; for this reason only a limited number can be admitted.

- Course XIII. *British oratory and ancient oratory.* Junior or senior II.
ASSISTANT PROFESSOR McDERMOTT
A continuation of course XII.

SCANDINAVIAN LANGUAGES AND LITERATURES.

FOR UNDERGRADUATES.

- Course I. *Swedish, elementary.* [4] (Two years) Sophomore and junior I, II.
Course II. *Danish-Norwegian, elementary.* [4] Sophomore and junior I, II.
Course III. *Icelandic, or Old Norse, elementary.* [2] Senior I, II.
Preparatory for graduate work.
Course IV. *History of literature.* [4] (Two years) Junior and senior I, II.
Including the literatures of all the Scandinavian countries, together with special study of works of the most prominent authors.

FOR GRADUATES.

- Course V. *Advanced language courses in Icelandic or Old Norse, Old Swedish, and Old Danish.*
Course VI. *Advanced language courses in modern Swedish and Danish-Norwegian.*
Course VII. *Advanced courses in literature.*
As preparatory work for course IV, a reasonably thorough knowledge of at least one of the Scandinavian languages is necessary; and for courses V, VI and VII the respective elementary courses are required.

SOCIOLOGY.

- Course I. *Elements of sociology.* [4] I. PROFESSOR SMITH
Course II. *Social pathology.* [2] I. PROFESSOR SMITH
Problems of pauperism, insanity, crime, and programs of social amelioration.
Course III. *Social theory.* [2] I. PROFESSOR SMITH
Treats of the history of opinion and discusses leading French, German, English and American authors.

SPANISH.

- Course I. *Spanish, begun.* Junior I, II. DR. BECKMAN
Grammar, by M. Montrose Ramsay, edition 1902. Reading of some modern novelists as Valera, Alarcon or others.
Course II. *Spanish, second year.* Senior I, II. DR. BECKMAN
Spanish fiction and drama; modern authors and Cervantes, Calderon, Lope de Vega. Spanish conversation and composition; review of Ramsay's grammar.

SEMITIC LANGUAGES.

- Course I. Elementary Hebrew.* Senior I and II. RABBI DEINARD
Harper's Elements of Hebrew and reading of easy prose passages of the Old Testament.
- Course II. Advanced Hebrew.* Senior I and II. RABBI DEINARD
Critical reading of some Old Testament book, with a review of Hebrew grammar.
- Course III. Elementary Arabic.* Senior I and II. RABBI DEINARD
Socin's Arabic Grammar and reading of the prose selections contained in it.
- Course IV. Advanced Arabic.* Senior I and II. RABBI DEINARD
Selected Suras of the Koran and a review of Arabic grammar.
- Course V. Elementary Aramaic or Syriac.* Senior I and II. RABBI DEINARD
Strack's Grammatik des Biblischen Aramaisch, and Brockelman's Syrische Grammatik.
- Course VI. History of the Hebrews to the close of the Persian period.*
Senior I and II. RABBI DEINARD
Political, religious and social. The English Bible will be used as a text book, a careful study of the Palestinian and Assyro-Babylonian inscriptions will be made, and the works of some modern writers on Hebrew history will be consulted. No knowledge of any Semitic language is required for this course.

The School of Chemistry

GENERAL STATEMENT.

The two four year courses in chemistry are designed for those who wish to become teachers of chemistry, analysts, investigators, manufacturing and applied chemists. The course in analytical chemistry leading to the degree of bachelor of science in chemistry, is arranged especially for teachers, analysts and general scientists. The course in engineering chemistry is intended for those who would become manufacturing and applied chemists and chemical technologists. The courses here presented include general, organic, analytical, technical, theoretical and applied chemistry. Besides chemistry, extended work is offered in physics, mathematics, metallurgy, mineralogy, crystallography, geology, engineering, botany, language and drawing.

Electives are offered in the senior year in order to give the students an opportunity of selecting subjects of special importance to them, but which are not included in the regular courses.

The regulations with regard to admission, unclassified students and graduate work are the same as for the regular students of the college of science, literature and the arts.

EQUIPMENT.

Laboratories. The building formerly known as Science Hall has been completely remodeled to meet the needs of the department of chemistry. The building is 108 by 78 feet, and consists of several large laboratories well equipped for a wide range of chemical work. The general laboratory is located on the first floor and is large enough to accommodate 350 students. The laboratory tables are arranged with cupboards, drawers and locks and supplied with gas and water. Connected with this laboratory by means of sliding windows, is a preparation room which is directly joined to the general store room. The remaining part of this floor is given to cloak rooms, furnace and motor rooms and a large lecture room with a gallery designed to comfortably seat 350 students. The qualitative laboratory, located on the second floor, is arranged with tables similar to those of the general laboratory and will accommodate 250 students. The library and three technical laboratories are likewise on this floor. The third floor contains the quantitative laboratory large enough to accommodate 120 stu-

dents. Directly connected with this laboratory are the balance, preparation, evaporation and drying rooms. There are also on this floor, six special laboratories, an organic laboratory, a physical laboratory, a lecture room and a museum. There is a suite of rooms on the fourth floor entirely given to photography.

Library. The chemical library contains complete sets of many of the more important journals. It contains besides these special sets, a well represented list of analytical and technical works, as well as many rare old works of great historical value. Most of the important journals are taken, thus enabling the student to keep abreast of the times. All books are easily accessible, with only the necessary restrictions to guard against injury and loss.

INDUSTRIAL MUSEUM.

Considerable space is given to a collection in industrial, technical and applied chemistry. There is a large collection of chemicals, with specimens of each in the various stages of preparation and purification. A collection of nearly all the elements, with most of their important salts; a large number of mining and metallurgical specimens, including most of the important ores, together with many rare specimens in crystallography. The collections of coals and petroleum are especially valuable for lecture and technical work. There is a large collection of dyes, organic and inorganic, mordants, textile, and other materials used in dyeing and bleaching, with a rapidly increasing collection of clays and materials used in the making of glass, earthenware, porcelain and brick. A collection of furnace products, models and series of charts, blue prints and photographs illustrating a wide range of technical and chemical processes is being added.

COURSES IN CHEMISTRY.

- Course II. (a) Qualitative analysis.* Freshman I.
ASSISTANT PROFESSOR NICHOLSON
Lectures and laboratory work. The course includes the general reactions of the metals and their qualitative separation.
- Course III. Qualitative analysis.* Freshman II.
ASSISTANT PROFESSOR NICHOLSON
Lectures and laboratory work. Reactions and identification of the acids.
- Course IV. Quantitative analysis.* Sophomore I.
ASSISTANT PROFESSOR SIDENER
Lectures and laboratory work. The course includes an introduction to quantitative and a beginning of gravimetric analysis.
- Course V. Volumetric analysis.* Sophomore II.
ASSISTANT PROFESSOR SIDENER
Lectures and laboratory work. The course includes an introduction to volumetric analysis with a discussion of standard solution and the necessary stoichiometric calculations.
- Course VI. (a) Organic chemistry.* Junior I. PROFESSOR FRANKFORTER
Lectures and laboratory work. This course includes the aliphatic series with a preparation of the more important compounds supplemented by Levy's Anleitung zur Darstellung Organischer Präparate.
- Course VII. (b) Organic chemistry.* Junior II. PROFESSOR FRANKFORTER
Lectures and laboratory work. The course includes the aromatic series with a preparation of some of the more important compounds supplemented by Fischer's Organischer Präparate.
- Course VIII. Theoretical chemistry.* Junior I. DR. HARDING
Lectures and readings. The course includes a study of Lothar Meyer's Modernen Theorien der Chemie, Oswald's Grundriss der Allgemeinen Chemie and Remsen's Theoretical Chemistry.
- Course IX. History of chemistry.* Junior I. PROFESSOR FRANKFORTER
Lectures and reading. This course includes a full historical discussion of alchemy and chemistry.
- Course X. Water analysis.* Junior I. PROFESSOR FRANKFORTER
Lectures and laboratory work. The course includes an exhaustive discussion of the chemical and sanitary properties of water.
- Course XI. Gas analysis.* Senior I. DR. HARDING
Lectures and laboratory work. The work includes an exhaustive chemical examination of the common gases, with a determination of light and heat efficiency of combustible gases.

- Course XII. The chemistry of sugar.* Senior I. ASSISTANT PROFESSOR NICHOLSON
Lectures and laboratory work. The course includes a discussion of the carbohydrate group with the important methods of analysis.
- Course XIII. Industrial chemistry.* Senior II. ASSISTANT PROFESSOR SIDENER
Laboratory work and reading. The course includes the analysis of various commercial products.
- Course XIV. Wine and beer analysis.* Senior I. DR. F. IRDING
Lectures and laboratory work. The course includes the determination of alcohol and other constituents in wine and beer, with a special study of fermentation.
- Course XV. Special problems.* Senior I. ASSISTANT PROFESSOR SIDENER
Laboratory work. The course includes the working out of various mineralogical, technological and metallurgical problems.
- Course XVI. Photographic chemistry.* Senior II. PROFESSOR FRANKFORTER
Lectures and laboratory work. The course includes a study of the compounds affected by the chemical rays of light, and a discussion of developers and fixers, photo-engraving, photo-reliefs and color photography.
- Course XVII. Electro-chemical analysis.* Senior II. PROFESSOR FRANKFORTER
Lectures and laboratory work. The course includes the qualitative and quantitative separations of the metals by electrolysis.
- Course XVIII. Micro-chemical analysis.* Junior II. DR. HARDING
Lectures and laboratory work. The course includes the methods for the determination of minute quantities of substance by means of the microscope.
- Course XIX. Food adulterations.* Senior II. DR. HARDING
An examination of common food products for adulterants.
- Course XX. Iron and steel analysis.* Junior II. ASSISTANT PROFESSOR SIDENER
Lectures and laboratory work. The course includes the rapid determination of iron by the various methods, as well as the determination of the associated elements, sulphur, phosphorus, silicon, manganese and carbon.
- Course XXI. Mineral analysis.* Senior I. ASSISTANT PROFESSOR SIDENER
The course includes the analysis of building stones and some of the most important minerals.
- Course XXII. Inorganic preparations.* Junior II. DR. HARDING
The preparation of inorganic salts, supplemented by Bender's Anorganische Preparatkunde.
- Course XXIII. Colloquim.* Senior I. ASSISTANT PROFESSOR SIDENER
A thorough quiz in general inorganic chemistry.
- Course XXIV. Colloquim.* Senior II. PROFESSOR FRANKFORTER
A thorough quiz in general organic chemistry.
- Course XXV. Special problems.* Senior I. ASSISTANT PROFESSOR SIDENER
This course includes work on ores of base metals, limestones, slags, etc.
- Course XXVI. Physical chemistry.* Sophomore II. DR. HARDING
Lectures and laboratory work. The laboratory work will include that laid down by Reychler with such references as Nernst and Ostwald.

COURSES FOR GRADUATE STUDENTS.

1. *Special inorganic chemistry.*
2. *Electro-chemistry.*
3. *Organic chemistry.*
4. *The alkaloids.*
5. *Analytical chemistry.*

THE COLLEGE OF

ENGINEERING AND

THE MECHANIC ARTS

The College of Engineering and the Mechanic Arts

FACULTY

CYRUS NORTHROP, LL. D., *President.*
FREDERICK S. JONES, M. A., *Dean.*

OFFICERS OF THE DEPARTMENT OF CIVIL ENGINEERING.

WILLIAM R. HOAG, C. E., *Professor of Civil Engineering, in charge of Road and Sanitary Engineering.*
FRANK H. CONSTANT, C. E., *Professor of Structural Engineering.*
FREDERICK H. BASS, C. E., *Instructor in Civil Engineering.*

OFFICERS OF THE DEPARTMENT OF MECHANICAL ENGINEERING.

JOHN J. FLATHER, Ph. B., M. M. E., *Professor of Mechanical Engineering.*
WILLIAM H. KAVANAUGH, M. E., *Assistant Professor of Mechanical Engineering in charge of Experimental Engineering.*
EDD C. OLIVER, B. M. E., *Instructor in Machine Design.*
WILLIAM H. MERRIMAN, *Instructor in Machine Work.*
JAMES M. TATE, *Instructor in Carpentry and Pattern Work.*
ROBERTSON COOK, M. E., *Student Assistant in Laboratory.*
EDWARD JOHNSON, *Instructor in Foundry Practice.*
HARRY C. GILMOUR, *Assistant in Carpentry.*
CHARLES MCDANIEL, *Instructor in Forge Work.*
WILLIAM AGATE, *Machinist.*
HARRY W. DIXON, *Chief Engineer.*
JOHN CATES, *Assistant Engineer.*

OFFICERS OF THE DEPARTMENT OF ELECTRICAL ENGINEERING.

GEORGE D. SHEPARDSON, A. M., M. E., *Professor of Electrical Engineering.*
FRANK W. SPRINGER, E. E., *Assistant Professor of Electrical Engineering.*

OFFICERS OF THE DEPARTMENTS OF ENGINEERING AND MECHANICS, AND MATHEMATICS.

HENRY T. EDDY, C. E., Ph. D., LL. D., *Professor of Engineering and Mechanics.*
ARTHUR EDWIN HAYNES, M. S., M. Ph., Sc. D., *Professor of Engineering Mathematics.*
WILLIAM E. BROOKE, B. C. E., M. A., *Instructor in Engineering Mathematics.*
CARL ALBERT HERRICK, M. E., *Instructor in Engineering Mathematics.*

OFFICERS OF THE DEPARTMENT OF PHYSICS.

- FREDERICK S. JONES, M. A., *Professor of Physics.*
 JOHN ZELENY, B. S., B. A., *Associate Professor of Physics.*
 ANTHONY ZELENY, M. S., *Instructor in Physics.*
 HENRY A. ERIKSON, B. E. E., *Instructor in Physics.*

OFFICERS OF THE DEPARTMENT OF CHEMISTRY.

- GEORGE B. FRANKFORTER, M. A., Ph. D., *Professor of Chemistry.*
 CHARLES F. SIDENER, B. S., *Assistant Professor of Chemistry.*
 EDWARD E. NICHOLSON, M. A., *Assistant Professor of Chemistry.*

OFFICERS OF THE DEPARTMENT OF DRAWING AND INDUSTRIAL ART.

- WILLIAM H. KIRCHNER, B. S., *Assistant Professor of Drawing.*
 NELLIE S. TRUFANT, *Instructor in Drawing.*
 HENRIETTA CLOPATH, *Instructor in Freehand Drawing.*
 ELIZABETH M. NORRIS, *Instructor in Freehand Drawing.*
 JOSEPH A. THALER, E. E., *Instructor in Drawing.*
 WILLIAM E. ACOMB, M. E., *Instructor in Drawing.*
 FRANKLIN R. McMILLAN, *Scholar in Drawing.*

OFFICERS OF THE DEPARTMENT OF POLITICAL SCIENCE.

- WILLIAM W. FOLWELL, LL. D., *Professor of Political Science.*
 WILLIAM A. SCHAPER, Ph. D., *Assistant Professor of Political Science.*

OTHER DEPARTMENTS GIVING INSTRUCTION.

- FREDERICK W. SARDESON, Ph. D., *Instructor in Geology.*
 EDWARD P. SANFORD, M. A., *Instructor in English.*
 JOSEPH BEACH, M. A., *Instructor in English.*
 HAYDN S. COLE, Lieut. U. S. A., *Instructor in Military Science.*
 FRANCIS P. LEAVENWORTH, M. A., *Professor of Astronomy.*
 WILLIAM S. PATTEE, LL. D., *Lecturer on Contracts and Torts.*

STANDING COMMITTEES.

- Enrollment*—PROFESSORS CONSTANT, FLATHER, SPRINGER.
Curriculum—PROFESSORS EDDY, FLATHER, HOAG, JONES, SHEPARDSON.
Degrees—DEAN JONES, PROFESSORS FLATHER, SHEPARDSON, HOAG.
Library—PROFESSORS SPRINGER, CONSTANT, KAVANAUGH.
Military Affairs and Athletics—PROFESSORS HOAG, HAYNES, NICHOLSON.
Students' Work—PROFESSORS HAYNES, KIRCHNER, HOAG, SHEPARDSON, KAVANAUGH, BROOKE, JONES.
Graduate Studies and Degrees—PROFESSOR EDDY.
Program—PROFESSORS KIRCHNER AND BASS.

NON-RESIDENT LECTURERS FOR 1902-03.

- EDWARD P. BURCH, E. E., *Consulting Engineer, "Heavy electric railroads."*
 EDWARD SCOFIELD, *Electrical Engineer, Twin City Rapid Transit Company, "Electric railway operation."*
 ARTHUR L. ABBOTT, E. E., *Superintendent of Construction, W. I. Gray & Co., "Interior wiring."*
 TRUMAN HIBBARD, E. E., *Chief Engineer, Electric Machinery Company, "Design of dynamo machinery."*
 GUY V. WILLIAMS, *District Manager Bryan-Marsh Company, "Incandescent lamp manufacturing."*
 CHAS. L. PILLSBURY, *Consulting Engineer, "Electric and hydraulic elevators."*
 HARLEIGH PARKHURST, E. E., *Engineer with Electric Storage Battery Company, "Management of storage batteries."*

ORGANIZATION OF THE COLLEGE.

In this college there are four regular courses of study, viz.: civil and municipal engineering, mechanical engineering and electrical engineering, leading to corresponding professional degrees.

There is also organized in this college a four years' course of study in science and technology, leading to the degree of bachelor of science, with an additional year leading to the professional degree.

DRAWING AND INDUSTRIAL ART.

A four years' course in drawing and industrial art, is offered to students prepared for admission to the freshman class, and who show a talent for such work. No degree is offered for the completion of this course.

UNCLASSED STUDENTS.

Unclassed students are permitted to pursue, under the direction of the faculty, one or two lines of study, selected from some regular course. Such students must be persons of mature years, and present preparation sufficient to admit them to the freshman class. Persons of mature years, who shall give satisfactory evidence of ability to do with credit the work applied for, may be admitted by vote of the faculty.

FEES.

All students in the college, residents of the state, are required to pay an incidental fee of thirty dollars a semester. Non-residents are required to pay double the fee required of residents, or sixty dollars a semester. No reduction is made for late entrance or for leaving before the end of the semester. In addition to this fee, students who take work in laboratories are charged a sum sufficient to cover the cost of material and breakage. The following is a statement of fees charged per semester for freshman year: Chemistry, \$5; shop work, \$1.50 for each credit hour.

ADVANCED STANDING.

Advanced standing—The University accepts records from all reputable colleges for credit to advanced standing. Such records are accepted as far as they are equivalent to the work done in this University. In bringing records from other institutions, the certificate must be on the official blanks of the institution granting the certificate, and should show:

1. The subject studied; if a language, the work read, etc.
2. The time spent upon each subject.
3. Ground covered in laboratory work in case of laboratory subjects.

4. The result—it is sufficient to state that the subject was creditably completed.

Records from institutions, whose entrance requirements are not essentially equivalent to the requirement of the University, will not be accepted unquestioned; the credit to be allowed will be decided in individual cases by the enrollment committee.

ADMISSION.

Entrance examinations are held only at the beginning of the college year.

Students prevented from entering at the beginning of the year may be admitted at a subsequent date when the circumstances are such as to justify the action. Such students are, however, at a great disadvantage and all students expecting to enter the University are urged to be present at the beginning of the year.

All applicants should present themselves to the registrar who will furnish them with application blanks and directions how to proceed with their examinations and registration.

GENERAL REGULATIONS.

- I. Students will be admitted to the freshman class on **passing the regular entrance examinations.**
- II. No student will be admitted **if conditioned in more than three half-year subjects**, or their equivalent.
- III. Graduates of any Minnesota State high school or advanced course of a state normal school will be admitted **without examination, provided—**
 - (1) That the school maintain a **full four-year course** of high school work.
 - (2) That the applicant present to the registrar the principal's certificate showing the satisfactory completion of **all the studies required for admission** to the desired University course.
- IV. Graduates of Minnesota State high schools who are deficient in **not more than three half-year subjects** or their equivalent, **may be excused** from entrance examinations **in such subjects as the enrollment committee may decide**; such candidates should present themselves to that committee **not later than Tuesday of examination week.**

- V. Graduates of Minnesota State high schools whose principal's certificate shows them to be deficient in **more than three half-year subjects** or their equivalent, even though they have made such additional preparation as they deem necessary, must take, nevertheless, the regular entrance examination in all subjects, as provided in sections I and II unless excused by vote of the faculty; and persons wishing to present reasons for such excuse **should report to the enrollment committee not later than Tuesday of examination week.**
- VI. Any Minnesota high school or academy **not under supervision of the State High School Board**, but requiring for graduation a **four-year's course**, exclusive of the common school branches, conforming **essentially in distribution of time** to the entrance requirements of at least one of the University courses, will, upon application, be inspected by a committee, and, after favorable recommendation, **may be accredited by the faculty** in all respects as are the state high schools, **provided—**
- (1) That the school be **open to inspection** at any time by the University;
 - (2) That it take such **supplementary examinations as may be prescribed** from time to time.
- VII. Graduates from schools in other states, whose diplomas admit to **reputable colleges** in the state in which the school is located, will be received subject to the regulations that apply to graduates of Minnesota State high schools.
- VIII. Applicants from schools not coming within any of the above classes **must take the regular entrance examination** or present State High School Board certificates.

Students bringing records from accredited schools are required to present them on the blank form provided for the purpose by the University. Blank forms may be obtained from the Registrar. No other form of certificate will be accepted. Students who do not bring their certificates on the proper form of blank will not be allowed to register until they have secured the certificate on the required form.

High School Board certificates will be accepted in lieu of an examination in the subjects which they represent.

In all cases the faculty reserves the right to require a student to take supplementary examinations if he does not sustain himself creditably in his course.

REQUIREMENTS FOR ADMISSION.

N. B.—Time element, as indicated with each subject, is essential.

A three years' course of reading in English classics.

English Composition, one year.

***Algebra, elementary**, one year

***Algebra, higher**, one-half year

***Geometry, plane**, one year

***Geometry, solid**, one-half year

Chemistry, one year

In addition to the above named subjects which are required and for which substitutes cannot be accepted, applicants shall present evidence of preparation in **seven** year-credits, or their equivalent, of which **four** year-credits shall be ****language subjects**, to be chosen from the following list:

Note—It is provided that if any language, other than the English, is offered from the list of elective subjects, at least two years of that language shall be offered.

Latin (four years).

Grammar, one year.

Cæsar, four books, one year.

Cicero, six orations, one year.

Vergil, six books, one year.

Greek (two years).

Grammar, one year.

Anabasis, four books, one year.

German (two years).

Grammar, one year.

Literature, one year.

French (two years).

Grammar, one year.

Literature, one year.

Spanish (two years).

Grammar, one year.

Literature, one year.

English.

Latin element, one year. Latin grammar will be accepted in lieu of this subject.

Literature, one year.

*NOTE—High school students and others, expecting to take any of the engineering courses, are urged to be especially thorough in their preparation in the mathematics required for admission. Good mathematical ability and independence of thought are necessary to the highest success in the study and practice of engineering.

Beginning with the year 1905-06, students applying for admission to this college will be required to present evidence of preparation in two of the following: **Latin, two years; **German**, two years; **French**, two years.

History, Ancient, to Charlemagne, one year.
Modern, from Charlemagne, one year.
England, one-half year.
Senior American, one-half year.

Civics, one-half year.

Political Economy, one-half year.

Physics, one year.

Botany, one-half or one year.

Zoology, one-half or one year.

Astronomy, one-half year.

Geology, one-half year.

Physiography, one-half year.

Drawing, one-half or one year.

Shop Work, one-half or one year.

For general outline of work expected to be covered in the study of the foregoing subjects, see pages 49 to 54 of this catalogue.

Drawing (one-half or one year).

As provided in the manual training course of any good high school.

Shopwork (one-half or one year).

As provided in the manual training course of any good high school.

DAILY ROUTINE.

The work of the course extends through six days of the week. The morning session begins at 8:30 o'clock; a general assembly of the faculty and students is held each day, except Monday, at 10:25 o'clock, at which there are brief and simple religious exercises.

EXAMINATIONS.

At the close of each term, examinations are held in the studies of the term. In order to be "passed" the student must obtain seventy-five per cent. In determining the standing of a student in any subject the result of his daily work in that subject is combined with the result of the final examination in the ratio of two to one.

Students who pursue any subject unsuccessfully are reported as "conditioned" or "failed." A "condition" not made up before the subject is offered again becomes a "failure," subject to rules governing failures. "Failures" must be taken over again in class.

Any student in the college of engineering whose average standing for the year is less than 75 per cent will be required on re-entering the University to pursue again all the subjects of the year in which he has not attained a grade of 80 per cent or more.

Students who receive a condition or failure in work of either sem-

ester so as to make it impossible for them to continue the same line of work in the following semester shall not be allowed to elect an advanced subject in place of the one omitted, but shall be required to devote their full time to the remaining subjects of the course.

However, those students who attain an average grade of 80 per cent in the remaining subjects pursued may elect an advanced subject in the place of the one omitted.

LEAVE OF ABSENCE.

Any student intending to absent himself from the University during any part of the college year must obtain a leave of absence from the faculty.

GRADUATION.

Students completing the course of study to the satisfaction of the faculty of the college, are entitled to receive the engineer's degree. Any person may undergo, at suitable times, examination in any subject, and if such person pass in all the studies and exercises of the course, he is entitled to the appropriate degree; **provided**, however, that at least one full year must be spent at the University, before such degree shall be granted, and **provided**, the examination, in every case, be held before a committee of the faculty appointed for that purpose.

Course of Study

FRESHMAN YEAR.

FIRST SEMESTER.

The same for all courses: Mathematics, 5; English 4; Qualitative analysis, 4; Drawing, 4; Shop work, 4½; Military drill, 2.

SECOND SEMESTER.

For the civil and municipal engineering courses: Mathematics, 4; English 4; Qualitative analysis, 4; Drawing, 4; Surveying and platting, 4; Military drill, 2.

For the mechanical and electrical engineering courses: Mathematics, 4; English, 4; Qualitative analysis, 4; Drawing, 4; Shop work, 4½; Military drill, 2.

SOPHOMORE YEAR.

FIRST SEMESTER.

CIVIL AND MUNICIPAL ENGINEERING	MECHANICAL ENGINEERING	ELECTRICAL ENGINEERING

Course of Instruction

ENGLISH.

Course I. English. [4]

Freshman I, II. MR. SANFORD AND MR. BEACH

The work for this course is planned with special reference to the needs of engineering students. Two hours a week will be given to the study of English composition, and two hours to the study of a general survey of English literature.

Essays will be required every week. Special emphasis will be given to the subjects that an engineer must write upon when, in the line of his business, he makes specifications, estimates, description of processes or of principles, and their application to given results; or when he wishes to inform the public upon engineering work, its principles and details.

While in the study of literature one object will be the general broadening of the mind by an acquaintance with the masterpieces of English prose and poetry, especial attention will be given to the work of those writers who have handled scientific subjects with clearness and power.

MATHEMATICS.

In imparting a knowledge of the mathematical subjects, special emphasis is placed upon their practical application. This gives the student a firmer grasp of the more important parts of these subjects and some appreciation of their real value, before reaching those technical studies where mathematics furnishes the only sure basis for professional knowledge and a most powerful instrument for use in original research.

Course I. Higher algebra.

Freshman I. 70 hours.

Advanced work on equations containing radicals, simple and quadratic equations, proportion, variation, progressions, summation of special series, binomial theorem, indeterminate coefficients, logarithmic series, Taylor's formula and the treatment of higher equations, including Cardan's rule for cubics.

Course II. Plane trigonometry.

Freshman I, II. 44 hours.

Trigonometric functions of acute angles, of angles in general, applications of logarithms, solution of right triangles, general properties of triangles, practical applications, including the solution of cubic equations having real and unequal roots.

Course III. Spherical trigonometry.

Freshman II. 20 hours.

Review of some truths of solid and spherical geometry. Napier's rules, solution of right spherical triangles, general properties of spherical triangles and the application of spherical trigonometry to the solution of practical problems.

Course IV. Analytical geometry.

Freshman II, 24 hours; sophomore I, 65 hours.

Coordinate systems, transformation of coordinates, algebraic equations of different degrees produced and discussed by the aid of these sys-

tems, transcendental equations and loci:—three dimensions: the point, plane, line, surfaces and solids.

Course V. Differential calculus. Sophomore I, II. 55 hours.

The differentiation of algebraic and transcendental functions, successive differentiation, series, derivatives, maxima and minima, tangents, sub-tangents, normals, subnormals, illusory forms, asymptotes, direction and rate of curvature, radius of curvature, evolutes, envelopes, singular points and curve tracing.

Course VI. Integral calculus. Sophomore II. 40 hours.

The integration of various algebraic and transcendental differentials, rectification of plane curves, quadrature of plane surfaces, areas of surfaces of revolution, cubature of volumes of revolution, and the production of the equations of loci by integrating certain conditional differentials.

Course VII. Some practical applications Sophomore II. 15 hours.

of the calculus to mechanics and physics, maxima and minima, center of gravity, center of hydrostatic pressure and moment of inertia.

The foregoing courses in mathematics are required, *in the order given*, of all under graduates in each of the engineering courses.

Course VIII. Advanced calculus and differential equations.

Junior or senior I, II. 24 hours.

Preparation courses V and VI.

Course IX. Method of least squares.

Senior I. 36 hours.

PROFESSOR LEAVENWORTH

A study of the combination and adjustment of observations and the discussion of their precision, especially as applied to engineering problems.

DRAWING AND INDUSTRIAL ART.

ENGINEERING DRAWING.

Course I. (a) Freehand. I. [2] 68 hours.

Lettering, geometric forms and engineering details in outline, including working sketches, translations and the elements of perspective.

(b) *Mechanical.* Freshman I, II. [2] 136 hours.

Conventional methods, lettering, machine and structural details and standard sizes and shapes.

(c) *Descriptive geometry.* II. [2] 34 hours.

Problems relating to points, lines, planes, solids, interpenetrations, surfaces of revolution, tangents and developments, including the constructive geometry involved. Recitations and lectures.

Course II. (a) Descriptive geometry. Sophomore I. [4]

Orthographic, isometric, horizontal, topographic, oblique, and perspective projections, shades and shadows, line shading and brush tinting. Open to students who have completed course I.

(b) *Working drawings.* Sophomore II. [2] 204 hours.

Engineering details, assembly drawing, mechanical movements, tracing and blue printing. Study of shop methods and drafting room systems. Details are obtained from actual machines and structures as far as possible.

- Course III. Instrumental.* I, II. [4] 238 hours.
Problems, projections, sections, developments and interpenetrations.
With conventional renderings in line and wash.

FINE ART.

- Course I. (a) General drawing.* I, II. [4] 272 hours.
From models, casts and nature. Study of the principles of perspective and light and shade. In charcoal, line and wash.
- (b) Antique.* I, II. [4] 272 hours.
Studies of the human figure from casts in charcoal. Fractions, torsl, masks, busts, etc. Sketch class. Studies from life in pencil. Pen and ink, crayon and wash.
- Course II. Illustration.* I, II. [4] 272 hours.
Drawing in black and white and in color from the living model (heads and figures with costumes). Character sketches and genre studies. Practice in the various mediums.
Open to those who have completed course I (a), or course I (b).
- Course III. Modeling.* I, II. [4] 272 hours.
In clay and casting in plaster. Studies from the antique and from life. Original compositions in applied art and progressive exercises of interpretation in relief and the round of sketches and original designs.
- Course IV. Water color.* I, II. [4] 272 hours.
From still life and nature. Open to those who have completed course I (a), or course I (b).
- Course V.. Pen and Ink.* I, II. [4] 272 hours.
Exercises in line work and drawing for illustrative work. Open to those who have completed course I (a), or course I (b).
- Course VI. Oil painting.* I, II. [4] 272 hours.
Studies of groups of still life, plants and flowers, and sketching from nature. Open to those sufficiently prepared.
- Course VII. Lectures and reading.* I, II. [1] 34 hours.
On the principles and methods of perspective, light and shade, color, composition, and the history of art.

APPLIED ART.

- Course I. Design.* I, II. [4] 272 hours.
The anatomy of pattern and geometrical design, composition, color harmony, plant analysis and conventionalism, traditional ornament and animate forms. Principles and practice. Open to those sufficiently prepared.
- Course II. Analysis of ornament.* I, II. [2] 136 hours.
Study of the characteristics of style. Outlines of historic ornament. Lectures, recitations and collateral reading.
- Course III. Practical designing.* I, II. [4] 272 hours.
Original designs and working drawings.
(a) Book decoration.
(b) Textiles.
(c) Furniture.
(d) General course (with applications of historic ornament).

- Course IV. Lettering.* 1. [2] 68 hours.
Study of the alphabet. Roman, medieval and modern styles. Practical exercises and collateral reading.

NORMAL ART.

- Course I. For teachers.* 1, II. [4] 272 hours.
Elementary training in drawing, including drawing from blocks, groups, sketching of animals and the poised figure, design, water color and constructive work.

- Course II. Art education.* 1, II [2] 136 hours.
Theory and practice of teaching drawing. Lectures and observation and practical work. Embracing such topics and exercises as: Art as a factor in public education; correlation of drawing with other studies; observation, comparison, and planning of courses of instruction in the public schools, in addition to the working out of lessons in detail. Preparation course I, F. A., and Course I, Teachers.

MECHANICS.

(a) APPLIED MECHANICS.

- Course I. Statics, dynamics and mechanics of materials.* Junior I. 90 hours.
The laws of equilibrium, motion, work and energy as applied to rigid bodies, and a study of the strength and elastic properties of materials of construction required in the design of beams, posts, etc. Recitations and lectures. Open to students who have completed the work of the first two years in mathematics and physics.
- Course II. Arches, hydraulic and pumping machinery.* Junior II. 90 hours.
Masonry arches and equilibrium polygon; hydraulics, including the laws of the equilibrium, pressure and flow of fluids; the theory of the action of pumps. Recitations and lectures. Open to those who have completed course I.

(b) THEORETICAL MECHANICS AND MATHEMATICAL PHYSICS.

FOR GRADUATES AND UNDERGRADUATES who have completed calculus.

- Course I. The potential function and spherical harmonics.*
Course II. Analytical statics and electrostatics.
Course III. Dynamics of rigid bodies.
Course IV. Circular, hyperbolic and elliptic functions with their physical applications.

FOR GRADUATES

who have had advanced work in mathematics.

- Course V. Directional calculus, vector analysis and determinants.*
Course VI. Analytical theory of the conduction of heat.
Course VII. Theories of elasticity and sound.
Course VIII. Wave theories of light, heat and electricity.
Course IX. Kinetic theory of gases.
Course X. Hydrodynamics and fluid motion.
Course XI. Theory of functions with applications.

PHYSICS.
FOR UNDERGRADUATES.

The mathematics of the freshman year are required as preparation for all courses in this department.

Course I.

- (a) Mechanics of solids and fluids. [5] Sophomore I.
(b) Heat, electricity and magnetism. [4] Sophomore II.

Recitations, experimental lectures and laboratory work.

Course II. *Advanced mechanics, electricity and magnetism.* [4] Junior I.

Course III. *Sound and light.* [3] Junior II

Recitations, experimental lectures and laboratory work.

Course IV. *Advanced laboratory work.* Senior I, II.

Open to those who have completed course II.

FOR GRADUATES.

Course V. *Advanced work* in some special field: experimental investigations being the principal feature of the work.

GEOLOGY.

Course I. *Geology.* Junior II. 51 hours. DR. SARDESON.

A condensed course in physical and historical geology, for civil engineers. geodynamics, structural geology, physiography, stratigraphic and historical geology are treated of successively. Excursions to typical localities will supplement work done in the class room. Lectures and references.

CONTRACTS AND SPECIFICATIONS.

Course I. *Contracts.* Senior II. 17 hours. DEAN PATTEE

Lectures on the law of contracts: essential elements of a legal contract; contracts by agents; mutual assent; misrepresentation in the contract; invalidity of contract through fraud; alterations; consideration. Agreements—oral and written; enforcement of contract.

Course II. *Specifications.* Senior II. 17 hours. PROFESSOR FLATHER

A study of engineering specifications. Classes of specifications; essential features; clauses; details. Examples. Lectures, recitations and practice in writing specifications.

ASTRONOMY.

Course I. *Practical astronomy.* Sophomore II. 34 hours.
PROFESSOR LEAVENWORTH

Spherical co-ordinates; time; latitude; longitude, and other astronomical problems. Lectures.

POLITICAL SCIENCE.

Course I. *Introduction to political science.* Senior I. 34 hours. DR. SCHAPER

A study of the state, its growth, forms and people. Lectures and reading.

Course II. *Transportation.* Senior II. 34 hours. PROFESSOR FOLWELL

The evolution of transportation in the United States, and by railroads in particular. Economic aspects and public policy of railroads.

BIOLOGY AND BACTERIOLOGY.

- Course I. Biology.* Junior II. 54 hours.
Brief course in general biology. Microscopical examination of samples of water for small plants and animals of frequent occurrence in public water supplies. Sedgwick-Rafter method.
- Course II. Bacteriology.* Senior II. 54 hours.
Brief course in general bacteriology. Preparation of media and study of cultures, especially those of pathogenic bacteria found in water and sewage.

CHEMISTRY.

- Course I. Qualitative analysis.* Freshman I, II. 272 hours.
ASSISTANT PROFESSOR NICHOLSON
The course includes the general reactions of the metals and their qualitative separation; reaction and identification of acids, followed by practical problems in qualitative analysis. Lectures and laboratory work.
- Course II. Chemical technology.* Sophomore I. 68 hours.
ASSISTANT PROFESSOR SIDENER
Includes technical analysis of materials of engineering, with especial reference to iron and steel, lectures and laboratory work.
- Course III. Quantitative analysis.* Sophomore I. 72 hours.
Volumetric and gravimetric analysis.
- Course IV. Water analysis.* Junior I. 72 hours.
Sanitary chemical analysis of water. Samples collected by the students tested for nitrogen in its several conditions, chlorine, color, turbidity, hardness.

CIVIL ENGINEERING.

MUNICIPAL AND SANITARY ENGINEERING.

For the classes graduating in 1906 and thereafter, a course of elective studies is offered to students desiring to give special attention to the problems of city engineering, particularly those having a direct bearing upon questions of public health. The departments of chemistry, biology and bacteriology and also the State Board of Health have lent their aid to the efficiency of this course. A reduction in time given to structural work and geodesy makes it possible to devote more time to design of public works.

- Course I. Hydraulic engineering.* Senior I. 72 hours.
Class room work two hours per week. Drawing room, two periods per week. Means and methods of collection, purification and distribution. Design of typical structures and systems. Irrigation, water power development. River and harbor improvement and drainage and reclamation of low lands.
- Course II. Sanitary engineering.* Senior II. 90 hours.
Class room work two hours per week. Drawing room work three periods per week. Study and design of typical structures of sewerage systems, separate and combined. Sewage disposal methods. House drainage.
- Course III. Public health.* Senior II. 18 hours.
Lectures upon general problems concerning public hygiene by the professor of bacteriology.

RAILWAY AND HIGHWAY ENGINEERING.

- Course IV. Curves and earthworks.* Junior I. 36 hours.
Problems attending final location surveys of railroads and track laying, theory of the computation of volumes and preparation of preliminary estimates. Transition curve. Woodman, text book and notes.
- Course V. Execution in field of practical problems.* Junior I. 102 hours.
Illustrating the analytical work of course IV, including the computation of earthwork of railroad grades and pits, platting profiles and construction of maps.
- Course VI. Railway location and estimates.* Junior II. 102 hours.
Reconnoitering and preliminary surveys are made, followed by field maps and final location; profiles and cross-sectioning of a new route for a railroad, involving four or five miles of relocation. Complete estimates covering the cost of earth and rock work, timber structures and right of way involved in the actual construction of the line are made, together with plans of important bridges and a right of way map of the adopted location.
- Course VII. Railway economics.* Junior I, II. 34 hours.
This course consists of a course of lectures once a week through the junior year. During the first semester the subject of structures of permanent way, related to course IV, is treated, also the economic consideration controlling in the final selection of a line, the fixing of the grade line and placing of contracts for construction. In the second semester the science of location is treated preparatory to course VI.
- Course VIII. Highway construction and maintenance.* Sophomore II. 36 hours.
The economic relation of highways in transportation, with a treatment of the practical questions relating to materials and methods necessary to maintain good streets and highways. Lectures, Baker as text, with collateral reading, reports and essays. Tours of inspection of country roads and city pavements.

STRUCTURAL ENGINEERING.

- Course IX. Stresses in framed structures.*
Junior I. 85 hours. Junior II. 85 hours.
Theory of structures and determination of stresses by graphical and analytical methods in the modern types of structures, for static and for moving loads. Theory of the deflection of framed structures. Text book work, numerous problems and lectures, drawing room work in graphic statics. Text book, Merriman, Parts I and II. Open to students pursuing the course in mechanics.
- Course X. Structural details.* Junior II. 102 hours.
Study of the method of proportioning individual members of framed structures and the designing of joints and splices in steel and wooden structures. Design and complete working drawing of a roof truss and a plate girder railway bridge. Lectures and numerous problems in class room and drawing-room for work in designing. Hand Book of Steel Manufacturers. Reference, Merriman's Part II, Bridge Series. Open to students who have completed course IX.
- Course XI. Structural design.* Senior I. 136 hours; II. 136 hours.
Theory and design of modern steel structures, including railway and highway bridges, swinging bridges, steel mill buildings, standpipes and

towers, and other problems of structural interest. In this course the student becomes familiar with the method of designing important structures, and several complete designs with necessary computations, detail drawings, specifications and estimates are made. As much of the work is done in the class room under the immediate leadership of the instructor as possible. Such drawings are made in the drawing room as may involve important principles and details, and give the student a certain facility in making structural drawings. During this year occasional shop drawings are made for the same purpose but expertness in structural draughting is not aimed at. The collection of blue prints, photographs and designs in the possession of the department is put to constant use for illustrative purposes. Reference, Johnson's *Stresses in Framed Structures*, Merriman's Part III and IV Bridge Series, Wright's *Swing Bridges*. Open to students who have completed courses IX and X.

Course XII. Masonry construction. Senior I. 119 hours.

Properties of stones, bricks, cement and concrete, and their use in engineering structures. Foundations, retaining walls, piers and abutments, dams and chimneys. Theory and design of masonry arches. Class room work and drawing room work in designing. Text book, Baker's *Masonry Construction*, Church's *Mechanics*, Howe's *Retaining Walls*, Wegman's *Dams*. Reference, Fowler's *Coffer Dam Process*, Patton's *Foundations*, and current periodical literature. Open to students who have completed course IX.

Course XIII. Experimental laboratory. Senior I. 68 hours.

Experimental tests of the properties of cements, concrete, concrete-steel, and strength of joints, columns and framed structures. Laboratory work.

TOPOGRAPHICAL ENGINEERING.

Course XIV. Surveying. Freshman II. 68 hours.

Work consists of recitations, lectures and illustrative problems relating to chaining, field problems employing chain; methods of keeping field notes; determination of area—D. M. D. and rectangular co-ordinate method; compass and transit surveying; study of instruments and their adjustment; methods for overcoming obstacles, determination of heights and distances inaccessible; methods of supplying omissions, of platting compass and transit surveys; discussions of the methods of laying out and dividing land, including the public land surveys of the United States. The care, proper use and adjustment of all instruments used are treated in field exercises. Chain, compass and transit surveys are made and circuits of level-lines run by each party. A meridian line is established by each party by observations on Polaris.

Course XV. Platting. Freshman II. 34 hours.

This time is given to construction of diagonal scales, protractors, circular and straight verniers. All surveys made in the field are platted and areas computed. Solution of problems and useful office reduction of all field notes.

Course XVI. Topography. Sophomore I. 96 hours.

The methods of conducting topographical surveys are taken up in the order of increasing accuracy. At first a text-book is used to acquaint the student with the instruments employed; method of use and theory of adjustment. Lectures are given on the details of field work; parties

of topographers are formed and each makes a complete topographic survey of a certain tract, employing stadia transit and rectangular methods.

Course XVII. Mapping. Sophomore I. 40 hours.

Notes taken in course XVI are reduced, areas computed and topographical maps made of land surveyed.

Course XVIII. Higher surveying. Sophomore II. 162 hours.

Analytical study of the aneroid and mercurial barometers and barograph is made for determining their efficiency in hypsometric surveys; of the solar compass and solar transit and various solar attachments for establishing government standard lines and the plane-table and stadia as a rapid means of prosecuting topographical surveys. Text-books. "Johnson's Theory and Practice of Surveying" and Baker's "Engineering Instruments."

Course XIX. Field work and platting. Sophomore II. 65 hours.

Observations are made with barometers for difference of level; checked with spirit level. Meridians and parallels of latitude are run with solar compass and attachments, and an outline survey made, computed and platted. A plane-table survey, employing stadia and telemeter, is made by each party, and each student makes a map of the same. A general map is compiled from all the maps, a tracing made and blue prints taken by each student.

Course XX. Geodesy. Senior II. 51 hours.

Geodetic reconnaissance; base-line measurement, employing bars and steel tape; measurements of angles, horizontal and vertical; field methods for time, latitude, longitude and azimuth; theory of computing geographical position. Lectures and text.

Making and reducing observations illustrating work of course.

MECHANICAL ENGINEERING.

SHOP WORK.

Course I. Carpentry and pattern making. Freshman I. 162 hours.

Wood working, use of tools; lathe and bench work. Patterns for moulding, core boxes. Lectures and practice.

Course II. Foundry practice and pattern making. Freshman II. 162 hours.

Patterns and flasks. Moulding, casting, mixing metals, brass work and core making. Shop practice, recitations and lectures.

Course III. Blacksmithing. Sophomore I or II. 90 hours.

Use of tools, forging, welding, tool dressing, tempering. Lectures and practice.

Course IV. Machine work. Sophomore I and II. 270 hours.

Chipping, filing, machine work, gear cutting, finishing; machine construction. Lectures and practice.

Course V. Tool construction. Junior I. 108 hours.

Tools, taps, reamers, cutters, and other special work. Lectures and practice. Preparation, course IV.

Course VI. Carpentry, joinery and wood carving. I, or II. 144 hours. (Elective.)

A course in wood working designed with special reference to the needs of teachers of manual training.

Course VII. Machine construction. Senior I or II. 144 hours. (Elective.)
Constructions of patterns and machine work for special apparatus, or machinery, designed by the student.

Course VIII. Shop economics. Senior II. 36 hours. (Elective.)
Shop and factory organization and management; cost systems.

MACHINE DESIGN.

Course IX. Principles of mechanism. Sophomore II. 54 hours.
The transmission of motion without consideration of the strength of parts. Gear wheels, cams, belts, screws, epicyclic trains, parallel motions, quick-return movements. Lectures and recitations. Preparation: course III in mathematics.

Course X. Kinematics. Sophomore II. 72 hours.
Graphical diagrams of the paths, speeds and accelerations of important mechanisms; centroids; analysis of mechanisms; construction of cams; kinematic pairs. Preparation: course IX.

Course XI. Machine design. (a) Junior I and II. 216 hours.
Calculation and design of such machine parts as fastenings, bearings, rotating pieces, belt and tooth gearing. Recitations, lectures and drawing-room practice. Preparation: course V, mathematics; and course I, physics.

(b) Machine design. Junior I. 72 hours. (Second half semester.)
A modification of (a), adapted to students in civil engineering.

Course XII. Machine design. Junior II. 72 hours. (Second half semester.)
Application of graphical methods to the design of valve gears and link motions; Zeuner diagrams, indicator cards. Lectures and drawing room practice. Preparation: course I applied mechanics.

Course XIII. Machine design. Senior I. 144 hours.
Calculations and working drawings for a high speed automatic steam engine. Theoretical diagrams and determination of details. Preparation: course XII.

Course XIV. Machine design. Senior II. 144 hours.
Original designing, including machinery for changing size and form. Boiler design, cranes, pumping and transmission machinery and engineering appliances. Lectures, problems and drawing-room practice. Preparation: course XI.

Course XV. Tool design. Senior I or II. 72 or 144 hours.
Design of special tools for manufacturing interchangeable parts; jigs and milling fixtures. Preparation: courses V and XI.

Course XVI. Engineering design. Senior II. 72 or 144 hours.
Problems, designs and estimates for power plants, central stations and factory equipment. Selection of motive powers, pumps, shafting, piping and accessory plant. Preparation: courses XIV and XXI.

STEAM ENGINEERING AND PRIME MOVERS.

Course XVII. Steam engine. Junior II. 36 hours.
Mechanics of the steam engine. Work in the cylinder; effect of reciprocating parts; steam distribution. Mechanism of the steam engine. A study of the details of modern engines. Valves and valve gears. A study of the slide valve, link motions and other reversing gear; automatic cut-off gears and the Zeuner diagram. The steam engine indicator. Principles and operation of the instrument, indicator

- rigging; indicator cards; compounding. Preparation: course I in applied mechanics.
- Course XVIII. Thermodynamics.* Senior I. 54 hours
The mechanical theory of heat as applied to the steam engine and other motors. Preparation: courses I and II in applied mechanics.
- Course XIX. Thermodynamics.* Senior II. 54 hours.
First half semester: Gas and oil engines, including devices for starting, igniting, and governing; gas producers; the adaptation of oils for generating power.
Second half semester: Refrigerating machinery and ice manufacture; air compressors and motors, and the transmission of power by compressed air. Preparation: course XVII.
- Course XX. Prime movers.* Senior II. 36 hours
Theory of turbines, hydraulic motors and wind mills. Preparation: course III in applied mechanics.
- Course XXI. Mechanical engineering.* Senior I. 45 hours.
First half semester: Measurement of power. A study of the methods employed in measuring power. Dynamometers, Prony brakes; measurement of water power: water meters, weir measurements, flow of water in pipes; measurement of electric power, efficiency of motors; power required to drive machine tools and shafting. Recitations. Preparation: course II in applied mechanics.
Second half semester: Steam boilers. Application of theory of practice in the design and construction of steam boilers, chimneys, boiler settings and accessories, smoke prevention, incrustation; methods of operating boilers with safety and economy. Preparation: course I in applied mechanics.
- Journal Club*—Open to the seniors and juniors. Once a week.
- ENGINEERING LABORATORY.
- Course XXII. Mechanical engineering.* Senior II. 36 hours.
Heating and ventilation. Principles of heating and ventilation. Construction and operation of heating apparatus. Steam, hot water, exhaust, vacuum and fan systems. Lectures, recitations and problems.
- Course XXIII. Strength of materials.* Junior I. 72 hours.
Laboratory work investigating the strength and physical qualities of iron, steel, brass, copper, belting, chains, beams, brick and stone. Preparation: course I applied mechanics.
- Course XXIV. Mechanical laboratory.* Junior II. 72 hours.
Continuation of course XXIII; also exercises in valve setting, indicator practice, calibration of steam gauges, efficiency of screws and hoists. Preparation: course XVII.
- Course XXV. Mechanical laboratory.* Senior I. 108 hours
Hydraulic measurements. Calibration of weirs, nozzles, orifices and meters. Tests of water motors, rams and pulsometers. Calibration of dynamometers and other apparatus. Testing lubricating value of oils; calorimetry, tests of injectors, steam engines and boilers. Preparation: course XXIV.
- Course XXVI. Mechanical laboratory.* Senior II. 144 hours.
Tests of gas and hot air engines, locomotive testing, and special work. Preparation: course XXV.

Course XXVII. Mechanical laboratory. Senior II. 72 or 144 hours.
Continuation of course XXVI; flue gas analysis and coal calorimetry;
special research work, commercial tests.

Course XXVIII. Mechanical laboratory. Senior II. 72 hours.
Special modification of courses XXV and XXVI, covering work in hydraulic measurements, steam engine and boiler testing for students in mining and metallurgy.

RAILWAY MECHANICAL ENGINEERING.

Course XXIX. Railway technology. Senior II. 72 hours.
The following courses are available to seniors desiring to prepare themselves for special work in railway engineering.
The object of this course is to familiarize the student with the principal details of construction of locomotives, and consists of a systematic course of shop visits carried on in the various railroad shops in the vicinity.

Course XXX. Railway design. Senior II. 144 hours.
(a) Of link and valve motions. Continuation of course XII with special applications of the Stephenson link.
(b) Of locomotive and car details.
(c) Of the locomotive boiler.
(d) Of assembled parts. Preparation: course XXIX.

Course XXXI. Locomotive construction. Senior II. 36 hours.
Lectures, reading and recitations on design and construction of locomotives, supplementing course XXX. This treats—
(a) Of parts not involving the boiler and use of steam: but including the carriage, as frames, springs and equalizing arrangements, running gear, brakes, trucks, lubrication.
(b) Of locomotive boilers and connected parts. Types, proportions, grates, flues, smoke-box arrangements and stacks. Riveted joints, bracing and staying. Lagging, smoke prevention.
(c) Of the locomotive engine. Details, heat insulation, cylinder proportions for various types, weight on drivers, special service: crank effort diagrams with inertia of reciprocating parts, cylinder and receiver ratios for compound engines, starting valves for compounds.

Course XXXII. Locomotive road testing. Senior II.

FOR GRADUATES.

Courses are offered in:

Engineering design.

Experimental investigation.

Railway engineering.

ELECTRICAL ENGINEERING.

Course I. Industrial electricity. Junior I. 25 hours first half of semester.
Outline of industrial uses of electricity: application of Ohm's law: methods and calculation of wiring. Textbook: Shepardson, *Electrical Catechism*. Preparation required: physics, course I.

Course II. (a) *Dynamos and motors.*

Junior I. 25 hours second half first semester; 1: d 11 51 hours.
Theory of electro-magnet and direct current dynamo and motor; methods of regulation, construction and operation of dynamos and motors; methods of testing. Text-book: Thompson, *Dynamo Electric Machinery*. Preparation required: electrical engineering course I; physics, courses I and II (a); differential and integral calculus.

Course III. *Electric laboratory.*

Junior II. 102 hours.

Tracing circuits and locating faults; measurements of conductivity and insulation; construction and use of instruments; calibration of instruments; tests of batteries; operation and characteristic curves of dynamos and motors. Preparation required: physics, courses I and II, electrical engineering courses I and II.

Course IV. *Electrical design.*

Junior II. 68 hours.

Problems in designing circuits, electro-magnets and dynamos; complete working drawings and specifications to accompany each design. Text-book: Wiener, *Dynamo Electric Machines*. Preparation required: physics, courses I and II; electrical engineering, courses I and II; machine design, course XI.

Course V. *Electric power.*

Senior I. 52 hours.

Elements of theory and practice of electrical measurements, wiring, dynamos, motors and electric lighting. 36 lectures and recitations and 48 hours laboratory. Text-book: Shepardson, *Electrical Catechism*. Preparation required: physics, course I.

Course VI. *Alternating currents.*

Senior II. 51 hours.

Phenomena, measurement and use of alternating currents; elementary theory of transformer and alternator; methods of regulation; various types of commercial apparatus. Text-book: Franklin and Williamson, *Alternating Currents*. Preparation required: electrical engineering, courses I and II.

Course VII. *Electrical engineering. Electric lighting.*

Senior I. 17 hours.

Comparison of different sources of light; photometry, physics of the arc; history, design and regulation of arc lamps; adaptation to constant currents, constant potential and A. C. circuits; carbons; history, manufacture and economy of incandescent lamps; distribution of light. Text-book: Stine, *Photometrical Measurements*. Preparation required: electrical engineering, course II.

Course VIII. *Electrical engineering. Batteries.*

Senior I. 11 or 17 hours.

General theory of primary and secondary cells; types and methods of construction; commercial applications; operation of battery plants; construction and test of cells by students; test of a commercial plant. Text-book: Treadwell, *Storage Batteries*. Preparation required: electrical engineering, course II.

Course IX. *Electrical engineering. Electric railways.*

Senior I. 17 hours.

History and development; different systems of distribution, location and calculation of feeders; line and track construction; choice of motors, trucks, generators and engines; operation and repairs. Text-book: Dawson, *Electric Traction*. Preparation required: electrical engineering, course II.

- Course X. Electrical engineering. Electrical transmission.* Senior II. 17 hours.
Utilization of natural forces; various methods of transmission; theory of electric motor; power distribution with constant current, constant potential and alternating systems; application to railways; study of particular plants. Twenty-four lectures. Preparation required: electrical engineering, courses I, II and VI.
- Course XI. Electrical engineering. Central stations.* Senior II. 34 hours.
Preliminary surveys: choice of electrical systems; load diagrams; best units of power: comparison of steam, gas and water power; location, design and erection of station building; boilers, engines, dynamos, storage batteries, switch board and lines; operation and regulation; maintenance of plant; emergencies; examination of stations in Minneapolis and St. Paul. 24 lectures. Preparation required: electrical engineering, courses II and VI; mechanical engineering, courses in thermodynamics and prime movers.
- Course XII. Electrical engineering. Telegraph and telephone.* Senior II. 34 hours.
Various systems and instruments used in local and long distance telegraphy and telephony, design and construction of switchboards and lines; protection from inductive and other disturbances; police, fire alarm and district messenger systems. 24 lectures with problems. Preparation required: electrical engineering, courses I and VI.
- Course XIII. Electrical laboratory.* Senior I, II. 68 or 136 hours.
Photometric and electrical tests of incandescent and arc lamps and regulating devices. Experimental study of alternating currents; calibration of A. C. instruments; measurement of resistance, power and power factors; regulation and efficiency tests of alternators, transformers, rotaries and motors.
- Course XIV. Electrical design.* Senior I. 68 hours.
Design of a dynamo or other problem as assigned. Preparation required: electrical engineering, courses II and IV.
- Course XV. Electrical design.* Senior II. 102 hours.
Designs, specifications and estimates for an electric light or power plant, or other approved problem. Preparation required: electrical engineering, courses IV and VI.
- Course XVI. Theory of alternating currents.* Senior II. 51 hours.
Mathematical discussion of the properties and applications of alternating currents. Phenomena of transmission lines, transformers, generators, synchronous and induction motors and polyphase systems treated graphically and by complex quantities. Text-book: Steinmetz, Alternating Current Phenomena.
- Course XVII. Plant operation.* Senior I, II.
Practice in operation and care of boiler, engines, motors, dynamos and circuits of the University lighting plant. One evening a week through one or two half semesters.
- Course XVIII. Electrochemistry.* Senior II. 34 or 68 hours.
Theoretical and experimental study of electrolysis, electrodeposition and electric furnaces.
- Course XIX. Journal reading.* Senior I. 34 hours; II. 34 hours.
Discussion of current electrical periodicals.

Course XX. Electrical laboratory.
Efficiency tests and special problems.

Course XXI. Dental electricity. Senior [Dentists]. 25 hours.
Electrical and magnetic units; electrical instruments and measurements; electro-dental apparatus. Recitations and experimental lectures. Text-books: Shepardson, *Electrical Catechism*, and Custer, *Dental Electricity*. For seniors in dentistry.

EQUIPMENT.

As an organization of the University of Minnesota, the college of engineering and of the mechanic arts has the general advantage of the University. Students find available all the resources of the institution so far as their technical lines will permit their use. For the information concerning methods of work and equipment, the following condensed statements are offered:

CIVIL ENGINEERING.

Geodesy. For this work the department has a secondary base-line apparatus, a three hundred foot standard steel tape, astronomical transits and repeating theodolites, heliotropes, a telemeter, deflection magnetometer, precise levels, two marine chronometers, one on sidereal and the other on mean solar time.

Highway engineering. The department has suitable apparatus for conducting the usual tests applied to road materials.

Railroad work. The usual equipment of transits, levels, planimeters, gradientors, level-rods, range-poles, chains and tapes, is provided.

Surveying. The department has for this work the necessary outfit consisting of compasses—plane, railroad and pocket, transits, tapes, hand levels, aneroid and mercurial barometers, solar compasses and solar attachments, pantometers and anemometers.

Structural engineering. The department has a collection of drawings of prominent structures throughout the country; photographs of bridges, buildings and roofs, in this country and abroad.

The cement and concrete laboratory is being rapidly developed and offers excellent facilities for experimental work with cement and its products. In connection with the experimental laboratory work of this department there is a large Olsen testing machine of two hundred thousand pounds capacity, with complete attachments, including automatic and autographic recording apparatus, extension head for full sized columns ten feet long, and transverse beam for bending tests upon twenty foot beams.

Topography. For this work the department has plane-tables, telemeter rods, stradia-transits, reduction charts and slide rules, clinometers, pedometers, current-meters, compasses, a relief map, a complete topographic map of the District of Columbia, besides a large collection of topographic sheets presented by the United States coast and geodetic, and geological surveys.

Library. The civil engineering library is located on the main floor of engineering building where are to be found all the more important books relating to this line of work. There are complete sets of the leading technical journals and proceedings, and reports of a large number of state and university engineering societies.

Reading Room. Here are to be found all the leading American periodicals, and some foreign, relating to civil engineering. The files of the most important are bound and are easy of access to the student.

Methods of instruction. It is the aim of the department to secure for its students special training in the preparatory studies which form the basis of all engineering work—such as mathematics, physics, mechanics and drawing—these being the tools for the special engineering which follows.

A thorough course is then given in the theory and practice of the more important professional lines such as railroad and structural engineering and topography. Considerable time is devoted to hydraulics, municipal engineering, higher surveying and geodesy.

While theory is at all times made prominent it is always accompanied by practice according to the methods followed in actual professional work.

Inspection tours. The professional work of the department is illustrated in a practical manner by frequent visits to the engineering works and plants in the vicinity of Minneapolis and St. Paul.

MECHANICAL ENGINEERING.

The plan of instruction in this course is intended to give the student a thorough training in mathematics and the physical sciences; and in the fundamental principles of engineering.

The work is planned to make him familiar with the various applications of these principles, and with the practical details of machine construction and design.

A new building especially designed to meet the requirements of instruction in the various lines of shop work, has recently been erected and the increased facilities thus afforded for the prosecution of this work are unexcelled.

This building consists of a two-story portion, containing the machine shop on the first floor and the wood shop on the second; beyond the machine shop and at a different level is the forge shop and foundry, both one story in height.

Slow burning mill construction is used throughout. This consists of brick walls and heavy timbers which, in case of fire, burns slowly and are safer than the ordinary iron and timber combination for this class of buildings.

During the past year a two-story extension has been added in which are located the mechanical engineering lecture and recitation rooms, drawing rooms, library and offices.

In the machine room a 3-ton crane will cover a clear span of 12 feet the entire length of the shop, thus giving ample space for erecting. This crane will also serve some of the larger machine tools.

The foundry has been the subject of especial study and possesses many features of interest and value. In accordance with the best modern practice for light work the floor is of concrete, and the gangways, leading from the cupola and extending lengthwise of the room, are of heavy iron plates set in cement.

A light traveling crane is also provided for the foundry. This has a span of 18 feet, and runs the entire length of the room.

The lighting, heating and ventilation of the building has received careful consideration. In the machine and pattern shops 60 per cent of the wall space above the benches is in glass. In the foundry and forge shop less light is allowed, since an abundant supply of overhead light is obtained from windows placed in the lantern or ventilator which extends over the roof. Pipe coils are employed in heating the building, and these are placed partly on the side walls under the windows and partly overhead. Electric power is used for driving the machinery. The group system has been selected as best adapted to the conditions, and a number of small motors are placed in the several departments: 220-volt continuous current motors are employed in connection with a three-wire system of distribution, which is also used in the lighting circuit.

The machine shop contains representatives of the ordinary machine tools, gauges, and small tools usually found in a well-equipped modern plant.

The shop for pattern making and general wood work contains benches with vises and tools, lathes and lathe tools, an improved universal sawing machine, band saw, planer, and other power tools, and all hand tools used in carpentry and pattern making.

The forge shop is equipped with stationary and portable forges, a blower and exhaust fan, a one hundred pound drop hammer, and the necessary small tools used in blacksmithing.

The foundry contains a thirty-inch Whiting cupola, and two brass furnaces, which embody some novel features. There are two core ovens; one for ordinary work $3\frac{1}{2} \times 3\frac{1}{2} \times 5$ feet, and one $3\frac{1}{2} \times 7 \times 6$ feet for special cores which may be required. The feature of these core ovens is that the gases and products of combustion are caused to traverse suitable conduits under a plate floor and do not come into direct contact with the cores. The usual moulding tools, ladles, crucibles, and all of the tools and material needed in moulding and casting iron, brass or white metal, are provided.

The shop work is intended, not so much to give the student skill in the manual operations of the respective crafts, as a knowledge of the methods and processes of practical construction.

The *mechanical laboratory*, in which the experimental research of the department is conducted, has been considerably enlarged and its equip-

ment greatly increased. Two testing machines of 50,000 pounds and 100,000 pounds capacity, and three transverse testing machines are provided for determining the strength, ductility, resilience and other characteristics of the various materials used in engineering work under tensile, compressive, transverse and torsional stress. Several forms of absorption and transmission dynamometers are available for determining the power generated by engines or other motors, or absorbed by shafting or machinery; a Carpenter coal calorimeter for determining the heat value of coal, and apparatus for the analysis of flue gases.

The laboratory is also provided with two machines for determining the lubricating qualities of oils and the relative values of metals used for journals and bearings; a mercury column and a Crosby direct pressure-gauge tester, for use in calibrating gauges and other pressure indicators. Besides the boilers in the university heating plant, there are in the laboratory, a 35 horse-power boiler and a high pressure boiler capable of carrying a working pressure of 300 pounds, with the necessary gauges, calorimeters, tanks and pyrometer, for making complete duty trials; several automatic steam engines equipped with condensers, indicators, brakes, scales and thermometers, which are employed to determine the efficiency in the use of steam under various conditions assumed or found in actual practice, and for valve setting and indicator work.

The operation and economy of other heat engines are illustrated by an Otto gas engine of five horse-power, a White gasoline engine of eight horse-power, a Rider two-cylinder and an Ericsson single cylinder hot air engine, a pulsometer, and several steam pumps. The equipment also contains a Pelton and a Tuerk water motor, a water ram, injectors, weirs, nozzies, meters and other pieces of apparatus and instruments which an engineer is called upon to use in the course of his professional work.

The new engineering power plant is admirably equipped with other steam apparatus which constitutes a valuable part of the laboratory equipment.

The boiler plant contains a 130-h.p. Cahall (B. & W. type) water tube boiler designed to carry a working pressure of 250 pounds; a 60x16 foot multitubular boiler which carries 175 pounds pressure; a Sorge-Cochrane purifier of 300-l. p. capacity; and a 72-inch Sturtevant fan and direct-connected engine, to be used for experiments with mechanical draft.

In the engine room there is an Allfree automatic expansion, 75-h.p. engine, connected by belting to a jack shaft equipped with roller bearings. A 150-h.p. cross-compound Corliss engine especially designed for the mechanical engineering department is now being constructed and will be installed at an early date.

This engine will be provided with a condenser and is arranged so that it may be run simple or compound, condensing or non-condensing, as desired. It will constitute a valuable part of the equipment of the experimental laboratory.

A constantly increasing quantity of commercial testing is being done in

connection with the regular work of the course which brings the student into actual contact with the engineering world and affords him valuable experience and data for his future work.

The library of the department contains a collection of historic and recent works, the best standard books being purchased as soon as issued. There are a number of complete files of the transactions of engineering societies and of the leading technical publications. The reading room is amply supplied with both the general mechanical and railway press.

Railway mechanical engineering. Courses have been arranged for students wishing to specialize in this subject. The various courses may be elected separately, subject to the requirements for previous preparation, to fill out the electives, or options in the regular senior year of any department.

Students planning to elect these courses are encouraged to work, under special arrangements, in railway shops during the summer vacations. This has proved its value as preparatory to the special work of the senior year. In every possible way the methods of the department are intended to place the students in touch with the best railway work; keeping always in sight the limitations which railway experience has found financially and practically to exist.

The location of the University is particularly favorable, being between the cities of St. Paul and Minneapolis in proximity to the shops, yards and headquarters of the extensive railway systems of the Northwest, which offer exceptional facilities for the prosecution of this work. The Northwest Railway Club, meeting monthly for papers and discussions, is open for the attendance of students, while several are enrolled as members.

Visits of inspection. During the year numerous visits are made to the manufacturing plants of Saint Paul and Minneapolis, which have proven to be of great value in supplementing the class room work.

ELECTRICAL ENGINEERING.

The new electrical building provides permanent quarters for the electrical departments. One portion of the building, 92 feet long and 50 feet wide, contains the University electric light and power plant. The main portion of the building, which is 80 feet long and 60 feet wide with two stories and basement, is devoted to the work of the electrical engineering department of instruction. In the basement are the electro-chemical laboratory, battery room, toilet and locker rooms. On the first floor are the dynamo laboratory, high tension laboratory, office, instrument room and shop. On the second floor are laboratories for photometry, photography, meter and lamp testing and rooms for recitations, draughting, library and office.

The laboratory equipment includes about forty dynamo electric machines of various types and sizes for direct and alternating currents, such as constant current and constant potential direct current generators and motors, single phase and polyphase alternators, commutating, induction and synchronous motors and rotary converters, each furnished with suitable regulating

devices. A number of these machines have been equipped with special devices for experimental purposes. Lamps, rheostats, batteries, fans and brakes afford convenient and ample means for taking up the energy of dynamos and motors. To facilitate testing, there are a number of pairs of similar machines. A three-ton traveling crane facilitates handling the machines. Power is obtainable from a main shaft driven by the engines of the lighting plant, or by motors connected with the University power circuits, with a storage battery or with the circuits of The Minneapolis General Electric Company, which supplies direct current at 500 volts and alternating current at 1,250 volts. An excellent assortment of instruments of well-known American and foreign makers is available for laboratory use. A well equipped standardizing laboratory furnished with certified standards of current, electromotive force and resistance, allows the frequent checking of instruments, so that students may work to any desired degree of refinement. The meter and lamp testing laboratories are furnished with a wide variety of arc and incandescent lamps and meters with all necessary standards and other accessories. The electro-chemical laboratory provides facilities for the construction and testing of various cells, for electroplating and other electrolytic processes and for the formation and study of electric furnace products. Alternators, rotary converters, transformers, lamps, motors, condensers, special apparatus and suitable instruments afford facilities for the experimental study of alternating currents.

The department library contains an excellent collection of electrical and allied works, including a full set of United States Patent Office Gazettes. New books and trade publications are being added continually. Files of twenty-two journals are nearly complete and others are being collected and bound. These, with the files in the general and other departmental libraries of the University, offer excellent facilities for research work.

The reading room receives regularly the leading American and foreign periodicals devoted to electrical engineering and allied interests. A journal club meets weekly for the discussion of current literature in mechanical and electrical engineering, keeping the students in touch with current progress and best modern practice and teaching them the value of the technical press.

There is a growing collection of samples furnished by various manufacturers and dealers, a great help in exhibiting best modern practice and in teaching young engineers to appreciate the merits of different products. A collection of samples from repair shops and elsewhere is of special value in illustrating the treatment received by apparatus in commercial use and the necessity of careful design and construction. Free access is given to the private libraries and collections of the professors.

Instruction. The course aims to give the students a knowledge of phenomena and principles and the various applications of electricity, the methods and instruments used in measuring and transforming it, and practice in the design and operation of electrical apparatus. Practice and theory are taken together as far as possible. During the junior and senior years

students have daily work with electrical instruments and apparatus and with commercial problems. Occasional inspection tours among the extensive and varied electrical interests in Minneapolis and St. Paul furnish excellent illustration. The University electric light and power plant, which is in the same building, affords opportunity to observe commercial conditions at close range.

All engineering students are strongly advised to spend their vacations in factories, repair shops, electric light and railway stations, etc., in order to obtain commercial experience, and that they may better appreciate the relations of their technical training and actual work.

It is the aim to train the students to be independent and efficient workers, and to adopt the methods of professional engineers. Students are required to verify the formulas used in various calculations, and are encouraged to derive their own formulas for simplifying work in special cases. At the same time they are expected to use logarithms, slide rule, tables, curves, charts and all legitimate means for obtaining accurate results with least amount of drudgery.

The regular instructing force is supplemented by competent non-resident lecturers. The regular monthly meetings of the Minnesota members of the American Institute of Electrical Engineers are held in the Electrical Building at the University, and are open to the advanced students in electrical engineering.

Laboratory work. In the more advanced work students are encouraged to determine for themselves as independent workers the best methods and conditions for accurate results. While the laboratory work is classified, the students are treated individually and are advanced as rapidly as their attainments warrant.

In fitting up the laboratory, care is taken to secure representative types of apparatus of commercial style and size, in order to acquaint the students with actual practice. In putting up new lines and in setting up apparatus, the students are required to work in accordance with standard practice. Each student is given a certain amount of practice in the construction of electrical apparatus.

Design. The electrical engineers have drawing and design in common with the mechanical engineers in the first three years. A large number of numerical problems are given during the course. During the junior and senior years, electro-magnets and mechanisms, dynamos and motors, lines, switches, switchboards and plants are designed. Complete working drawings and specifications for some special problems are elaborated. A file of nearly 600 blueprints and drawings in the department library in addition to those in other departments is available to the students.

DRAWING AND INDUSTRIAL ART.

This department occupies rooms in the mechanic arts building and Pillsbury Hall. The equipment of models and illustrative material is quite

extensive and embraces among its many collections the following: A complete set of Schroeder models for descriptive geometry; a collection of casts of architectural details and historic ornament; full length figures and busts of historic and classic sculpture and collections of charts, prints and drawings. There is also a small library of standard works.

The course in industrial art is carefully outlined with a view to the gradual and progressive development of art training. The work in design is not entered upon until the beginning of the second year. It is essential that a thorough knowledge of drawing in all its varied aspects and mediums should form the foundation of all decorative and industrial art. After such knowledge is acquired, every facility will be afforded students for pursuing the line for which their work shows especial aptitude. The course of study is arranged to enable the student to pursue one of three lines of work: regular art, design, and normal art.

COURSE OF STUDY.

FRESHMAN YEAR.

Through the year.
 Language or science [4]
 English (or rhetoric) [4]
 Drawing [4]
 Drawing [4]
 Lectures and reading [1]

JUNIOR YEAR.

 Painting or modeling [4]
 Thesis

LIBRARIES AND READING ROOMS.

The reference libraries of the several departments are well supplied with technical literature. In the engineering building is a library consisting chiefly of books devoted to civil and mechanical engineering, comprising over one thousand volumes; the library of the department of engineering and mechanics numbers eighteen hundred volumes of choice mathematical and scientific works; the departments of electrical engineering and physics together have an excellent collection of standard works which numbers over fourteen hundred volumes; the chemistry library contains over five hundred technical works; the department of drawing and industrial art possesses a choice collection of between one and two hundred volumes relating to drawing, art and design. The above number upwards of four thousand volumes, comprising many works which are the private property of professors, yet accessible to the students.

In addition to the above are the libraries of the University, the City of

Minneapolis, the City of St. Paul and others, containing many works of value to the engineering and art student. Standard works bearing on special subjects are secured as they appear. The more important scientific and technical periodicals are secured and placed in the reading rooms maintained in connection with the several departments of the college.

Journal clubs are organized, in most of the departments, for the discussion of current technical literature, relating to the best modern practice. Thus students are kept in touch with the developments along engineering lines and are taught how to use the technical press.

In addition to the foregoing the college has many periodicals donated by the societies publishing them, and others loaned by members of the faculty, who at all times place their periodical list and entire professional libraries at the disposition of the students.

THE SOCIETY OF ENGINEERS.

This society is an organization holding regular meetings for the purpose of discussing topics of current interest, hearing reports and lectures from members of the faculty and others. During the past year the special lecturers of the college have delivered their lectures under the auspices of this society. A Yearbook of the society is published, which presents the progress of the original work done both by instructors and students.

THE BRIGGS PRIZE.

For the encouragement of studies in foundry practice, Mr. O. P. Briggs, President of the Twin City Iron Works, offers \$75 annually in two prizes which are to be accompanied by gold medals.

The competition is open to sophomores in the college of engineering, and the prize will be awarded for the best essay relative to the above subject. Essays should contain about 3,000 words, and must be submitted to the professor of rhetoric on or before May first.

THE MINNEAPOLIS TIMES "GOOD ROADS" PRIZES.

The Times Newspaper Company, offers, for competition to the sophomores of the department of civil engineering, three gold medals for the best "essays" or "studies" in good roads.

First prize—A fifteen dollar gold medal.

Second prize—A ten dollar gold medal.

Third prize—A five dollar gold medal.

The essays are to be on some phase of the "good roads" question, to be approved by the department. Papers to contain about two thousand words. The good roads "studies" must be of some actual condition of roads in the State of Minnesota.

All papers submitted for competition must be in the hands of the department one month before commencement. Prizes will be awarded by a com-

mittee of three, consisting of a representative of the Times, the department of civil engineering, and a third to be named by these two. Announcement of winners of prizes will be made at commencement.

THE CHALMERS ELECTRIC MACHINERY PRIZE.

Mr. Charles H. Chalmers, E. E., of the Class of 1894, offers this year a prize of thirty-five dollars for the best thesis on dynamo electric machinery: its history, theory, design, construction or operation.

THESES.

Theses. Each member of the senior class in this college is required to prepare a thesis on some subject particularly relating to his course. The thesis must contain the results of original research made by the student himself. It must be creditable from a literary as well as from a technical point of view.

Theses shall be written in a clear hand, or typewritten; the paper used shall be of the standard size and quality adopted by the University; all charts, maps, drawings or other illustrative matter shall be presented on tracing cloth or bond paper; the whole shall be suitably bound and a copy deposited in the library of the University. The subject of the thesis is required to be submitted to the head of the department in which the student is a candidate for a degree, and the work of preparation must be formally begun early in the senior year. During the second semester the student is expected to devote at least ten hours a week to the preparation of his thesis.

The subject of the thesis and character of the work to be done upon it will be suggested in a large measure by the course of study pursued by the student. Great emphasis is laid upon the careful and accurate preparation of the thesis: because, more than any other work the undergraduate does, this certifies to his ability to undertake the difficult and responsible duties involved in the direction of engineering and industrial interests. The thesis must be completed and put in the hands of the faculty as early as the senior examination week of the second semester.

COURSE IN SCIENCE AND TECHNOLOGY.

It is very desirable that engineering students taking one of the courses leading to the professional degree, civil engineer, mechanical engineer, or electrical engineer, should have a more liberal education than can now be obtained in the regular four years' course. This has led to the establishment of a five years' course in science and technology in which a student in the college of engineering may obtain more English and general culture studies, as well as more extended work in the technical sciences, than has been offered heretofore. This course does not diminish in any way the

regular courses in engineering—the work is merely distributed over a more extended period. Every subject now included in any one of the regular engineering courses is also included in the corresponding five years' course, and in addition to these there is the equivalent of one year's work in more general subjects.

At the end of the fourth year the degree, bachelor of science in engineering, is conferred. The professional degree, civil engineer, mechanical engineer, or electrical engineer, is granted upon the completion of the fifth year, provided the choice of electives throughout the course has satisfied the requirements of the proposed engineering degree.

POST SENIOR YEAR.

The work of the post senior year is entirely elective and consists of twenty exercises or recitations per week, selected from the following list. The only limitation imposed is that subjects cannot be chosen unless the work leading up to and preparing for such subjects has been completed.

The following electives are offered:

In science:—Chemistry, physics, geology, mineralogy, astronomy and mathematics.

In technology :—Shop practice, engineering laboratory, drawing, design, specifications, measurement and transmission of power, steam boilers, railway engineering, shop economics, water supply engineering, sanitary and municipal engineering, bridge engineering, surveying, alternating currents, telephony and telegraphy, electric light, plant operation, central stations.

In literature and the arts :—English, French, German, history, political science and logic.

SCHOOL OF MINES

The School of Mines

OFFICERS

CYRUS NORTHROP, LL. D., *President*

OFFICERS OF THE DEPARTMENTS OF MINING AND METALLURGY

WILLIAM R. APPLEBY, M. A., *Dean and Professor of Metallurgy*
CHARLES E. VAN BARNEVELD, B. A., Sc., E. M., *Professor of Mining Engineering*
PETER CHRISTIANSON, B. S., E. M., *Instructor in Metallurgy*
BENJAMIN F. GROAT, B. S., *Assistant Professor of Mathematics and Mechanics*
EDWARD P. MCCARTY, E. M., *Instructor in Mining*
LEVI B. PEASE, M. S., *Instructor in Assaying*

OFFICERS OF THE DEPARTMENT OF GEOLOGY AND MINERALOGY

CHRISTOPHER W. HALL, M. A., *Professor of Mineralogy and Geology*
CHARLES P. BERKEY, Ph. D., *Instructor in Mineralogy*

OFFICERS OF THE DEPARTMENT OF CHEMISTRY

GEORGE B. FRANKFORTER, Ph. D., *Professor of Chemistry*
CHARLES F. SIDENER, B. S., *Assistant Professor of Chemistry*
EDWARD E. NICHOLSON, M. A., *Assistant Professor of Chemistry*

OFFICERS OF THE DEPARTMENT OF ELECTRICAL ENGINEERING

GEORGE D. SHEPARDSON, M. A., M. E., *Professor of Electrical Engineering*
FRANK W. SPRINGER, E. E., *Assistant Professor of Electrical Engineering*

OFFICERS OF THE DEPARTMENT OF MECHANICAL ENGINEERING

JOHN J. FLATHER, Ph. B., M. E., *Professor of Mechanical Engineering*
WILLIAM H. KAVANAUGH, M. E., *Instructor in Mechanical Engineering*

OFFICERS OF OTHER DEPARTMENTS GIVING INSTRUCTION

FREDERICK S. JONES, M. A., *Professor of Physics*
WILLIAM H. KIRCHNER, B. S., *Assistant Professor of Drawing*
JOHN ZELENY, B. S., B. A. Res., *Associate Professor of Physics*

ADMISSION

Examinations for admission will be held at the beginning of the year. See calendar and program of examinations.

No student will be registered for first semester's work after September 19th, 1902, and second semester's work after February 6th, 1903.

All applicants should present themselves to the registrar, who will furnish them with application blanks and directions covering examinations and registration.

GENERAL REGULATIONS.

- I. Students will be admitted to the freshman class on **passing the regular entrance examinations.**
- II. No student will be admitted **if conditioned in more than three half-year subjects**, or their equivalent.
- III. Graduates of any Minnesota State high school will be admitted **without examination, provided—**
 - (1) That the school maintain a **full four-year course** of high school work.
 - (2) That the applicant present to the registrar the principal's certificate showing the satisfactory completion of **all the studies required for admission** to the desired University course.
- IV. Graduates of Minnesota State high schools who are deficient in **not more than three half-year subjects** or their equivalent, **may be excused** from entrance examinations **in such subjects as the enrollment committee may decide**; such candidates should present themselves to that committee **not later than Tuesday of examination week.**
- V. Graduates of Minnesota State high schools whose principal's certificate shows them to be deficient in **more than three half-year subjects** or their equivalent, even though they have made such additional preparation as they deem necessary, must take, nevertheless, the regular entrance examination in all subjects, as provided in sections I and II unless excused by vote of the faculty; and persons wishing to present reasons for such excuse **should report to the enrollment committee not later than Tuesday of examination week.**
- VI. Any Minnesota high school or academy **not under supervision of the State High School Board**, but requiring for graduation a **four-year's course**, exclusive of the common school branches, conforming **essentially in distribution of time** to the entrance requirements of at least one of the University courses, will, upon application, be inspected by a committee, and, after favorable recommendation, **may be accredited by the faculty** in all respects as are the state high schools, **provided—**
 - (1) That the school be **open to inspection** at any time by the University;
 - (2) That it take such **supplementary examinations as may be prescribed** from time to time.
- VII. **Graduates from schools in other states**, whose diplomas admit to **reputable colleges** in the state in which the school is located, will be received subject to the regulations that apply to graduates of Minnesota State high schools.

VIII. Applicants from schools not coming within any of the above classes **must take the regular entrance examinations** or present State High School Board certificates.

Students bringing records from accredited schools are required to present them on the blank form provided for the purpose by the University. Blank forms may be obtained from the Registrar. No other form of certificate will be accepted. Students who do not bring their certificates on the proper form of blank will not be allowed to register until they have secured the certificate on the required form.

High School Board certificates will be accepted in lieu of an examination in the subjects which they represent.

In all cases the faculty reserves the right to require a student to take supplementary examinations if he does not sustain himself creditably in his course.

REQUIREMENTS FOR ADMISSION TO THE FRESHMAN CLASS

N. B.—Time element, as indicated with each subject, is essential.

A three years' course of reading in English classics.

English Composition, one year.

Algebra, elementary, one year.

Algebra, higher, one-half year.

Geometry, plane, one year.

Geometry, solid, one-half year.

In addition to the above named required subjects, for which no substitutes will be accepted, the student shall present evidence of having completed work in any of the following subjects, entitling him to eight year-credits.

Astronomy

Botany

SYLLABUS.

For general outline of work expected to be covered in the study of the foregoing subjects, see pages 49 to 54, of this catalogue.

ADVANCED STANDING.

Advanced Standing—The University accepts records from all reputable colleges for credit to advanced standing. Such records are accepted as far as they are equivalent to the work done in the University.

Records from institutions whose entrance requirements are not essentially equivalent to the requirement of the University will not be accepted unquestioned. The credit allowed will be decided in individual cases by the enrollment committee.

DAILY ROUTINE

The morning session begins at 8:30 o'clock; a general assembly of the faculty and students is held each day at 10:25 o'clock, at which there are brief and simple religious exercises.

EXAMINATIONS

Students failing to receive a yearly average of 75 per cent on any subject shall have the privilege of a supplementary examination before the opening of the following year provided their general average for the year is 60 per cent.

The faculty will exclude students from attending classes in any subject upon recommendation of the department concerned.

Students failing to pass supplementary examinations must register the next year for those subjects in which they have failed. They may take in addition certain electives in other colleges, provided suitable arrangements can be made. No advanced work in the school of mines will be allowed such students.

Students failing to present themselves for final examination at the end of first or second semester will be given zero on the examinations.

Students whose absences in either semester exceed four weeks in the aggregate, are not permitted to take the examinations without special permission of the faculty.

UNCLASSED STUDENTS

No unclassified students will be admitted to the School of Mines.

Special Statements

In the School of Mines there are two regular courses of study, viz : Mining Engineering and Metallurgy; leading to the degree of Engineer of Mines (E. M.) and Metallurgical Engineer (Met. E.) respectively.

The degree of Met. E. may be conferred upon a candidate holding the degree of E. M., and vice versa, provided such a candidate complete an additional year's work at the school and present a suitable thesis.

Candidates for advanced standing must pass a satisfactory examination for admission and also upon those studies which have been pursued by the class they propose to enter.

Students from other institutions will be admitted to the standing to which their credentials or the examinations taken under the direction of the faculty of this school may entitle them.

Students in the college of science, literature and the arts, in the college of engineering and mechanic arts, and school of technical and applied chemistry, who contemplate taking a degree in this school after completing their course, are recommended to select their electives with reference to as full a preparation as possible for the technical work of the course they purpose to enter.

FEES

A registration fee of seven and one-half dollars is required at the beginning of each semester.

The various laboratory fees are as follows :

Chemical laboratory	per semester	\$5.00
Mineralogical laboratory	"	3.00
Assaying laboratory	"	10.00
Physical laboratory	"	3.00
Mechanical laboratory	"	3.00
Electrical laboratory	"	5.00
Ore testing laboratory	"	5.00

The visit to the mines made by the junior class costs the student from one hundred to one hundred and twenty-five dollars.

Books cost about as follows :

Freshman year	\$12.00 to	\$15.00
Sophomore year	5.00 to	8.00
Junior year	18.00 to	25.00
Senior year	10.00 to	30.00

A number of books are recommended to the student, but the purchase of them is optional. The lower estimates given will cover the cost of books that must be purchased.

A set of draughting instruments must be purchased by the freshman class. The necessary instruments will cost about eight dollars.

SUMMARY OF EXPENSES

FRESHMAN YEAR

Incidental fee	\$30.00
Chemical laboratory fee	10.00
Mineralogical laboratory fee	6.00
Assaying laboratory fee	10.00
Books	13.00
Draughting instruments	15.00
Note books and supplies	6.00
	<hr/>
	\$90.00

SOPHOMORE YEAR

Incidental fee	\$30.00
Chemical laboratory fee	10.00
Physical laboratory fee	6.00
Books	7.00
Note books and supplies	2.00
	<hr/>
	\$55.00

JUNIOR YEAR

Incidental fee	\$30.00
Visit to the mines	\$100.00 to 125.00
Books	20.00
Note books and supplies	2.00
	<hr/>
	\$177.00

SENIOR YEAR

Incidental fee	\$30.00
Chemical laboratory fee	10.00
Electrical laboratory fee	5.00
Ore testing laboratory fee	10.00
Mechanical laboratory fee	3.00
Books	20.00
Note books and supplies	2.00
	<hr/>
	\$80.00

For non-residents the incidental fee is \$60 per year.

Good board can be obtained at a cost varying from \$2.50 to \$4.00 per week. Room rent varies from \$5.00 to \$10.00 per month. With two occupying one room, the rent per student would be considerably lower.

ORGANIZATION

The organization of the School of Mines dates back to 1889, when the general faculty of the University recommended to the Board of Regents its

establishment. In 1891 the Legislature of the State of Minnesota voted an appropriation for establishing and equipping the school. Two annual appropriations have since been made for its support. The legislature of 1901 appropriated \$47,500 for a new School of Mines Building. This building is now under construction and will be ready for occupancy about January, 1903.

LOCATION

The University of Minnesota is located in the city of Minneapolis, on the east bank of the Mississippi river. The School of Mines has its buildings and laboratories on the same ground. Students of the School of Mines have, therefore, all the opportunities afforded by a large university.

Minneapolis is surrounded by and is in direct communication with several important mining and smelting districts. As the city is a railroad center, transportation at special rates is readily obtained.

FIELD WORK

Field work is conducted at the iron mines in the northern part of this state, in the copper and iron regions of Michigan, in the mines and smelters of Montana, Colorado, Utah and California, and in the coal mines of Pennsylvania.

At least one of these districts will be visited by each class, affording splendid opportunities for study and observation.

The field-work in Mining and Metallurgy consists of one trip at the close of Junior year. Not less than three weeks and not more than four weeks shall be devoted to actual work, exclusive of traveling.

Students must deposit with *Accountant*, at least *two weeks* before time set for the departure of class, a sum sufficient to cover following expense items:

- 1st. All transportation
- 2nd. Sleeping car fare
- 3rd. Board and lodging
- 4th. Necessary mine supplies

Incidental expenses are not included in the above items and must be met individually.

A statement of expenditures will be rendered at the close of the work and any balance existing will be refunded.

The amount of deposit required will vary, according to the locality visited, from \$75.00 to \$125.00, and will be announced each year when arrangements for trip are completed.

THE ELLIOT SCHOLARSHIP LOAN FUND

To fulfil the wish of the late Dr. A. F. Elliot to aid young men who find their efforts to obtain a practical education embarrassed through lack of means, the income of \$5,000, amounting to \$250 per year, is placed in the

hands of the Board of Regents to be used as a scholarship loan fund for assisting young men in the school of mines.

The conditions of granting the scholarship loans are: The financial needs of the applicant, his scholarship, moral character, enthusiasm shown in his work and promise of usefulness in his profession. When money is available it may be loaned to pay expenses of worthy students during sickness. The loans are to be repaid, without interest, at the earliest convenience of the recipients.

LIBRARY

The library consists of about eight hundred volumes. This number represents only those works that treat directly of mining and metallurgical subjects.

The school has a complete set of the leading mining and metallurgical journals, and other similar books of reference. The leading periodicals are accessible to all. Constant references in lectures compel the student to keep himself well informed as to the latest methods, machinery and changes in practice going on in his special line of work.

In addition to the above, many thousand volumes on chemistry, mineralogy and geology complete a most valuable working and reference library. A card index is kept of all articles of value and interest appearing in the leading periodicals.

PHOTOGRAPHY

Photographs of surface and underground appliances, metallurgical plants, copies of drawings and other photographs are indispensable to the study of mining and metallurgy. With the report of his field work every student is expected to present photographs, as well as sketches, of various objects under consideration. There is also a very complete set of lantern slides illustrating the principal methods of underground workings and metallurgical plants, at home and abroad. Several hundred slides have been made in the department's laboratory which bear directly on the work done in Minnesota and the neighboring northwest. Many valuable photographs are constantly being made. Blue prints of these are given students as illustrations. Much time is thus saved usually spent in making sketches and diagrams.

CLASSIFICATION OF SUBJECTS

The work falls under the following subdivisions, supplemented by thorough courses in mathematics, physics, chemistry, mineralogy and geology:

(a) *Assaying*—to determine if ore has value for treatment. (b) *Mining engineering*—to furnish material for treatment. (c) *Ore testing*—to determine best method of treatment. (d) *Ore dressing*—furnishing products for metallurgical treatment. (e) *Metallurgy*—smelting and refining of ores and ore dressing products; reduction to metals.

DEPARTMENT OF MINING ENGINEERING

Mining engineering extends through sophomore, junior and senior years. The subjects given, together with the sequence necessary, are stated in the accompanying outline of the course.

Until the second term of the junior year, the course consists of lectures and recitations only. In the subsequent work, text-books are used in connection with the lectures.

In the senior year, problems in hoisting, hauling, pumping, ventilation and similar subjects become an important part of the work.

Field work in Mining. At the close of the junior year the students are required to spend four weeks in some mining district studying underground work. A part of the time is devoted to the making of mine and geological surveys.

A complete type-written report must be submitted before the student may register for the following year's work.

This report must cover the work done on the trip and must be fully illustrated with sketches drawn to scale. Reports will not be accepted after September 9th.

All field work must be taken at times specified.

Designs and specifications. The student makes working drawings of mine cars, skips and other parts of mine equipment that are usually designed and made on the ground.

Mine Surveying. The work in surveying is designed solely for mining engineers. In the sophomore year, second semester, the work consists of the elements of plane surveying with special reference to the computations necessary.

Field work in surveying—Course IX. The month of August, preceding the opening of the junior year, is spent in practicing plane surveying. About an hour per day is given to lectures or recitations and the remainder of the day to field work.

The students are divided into squads of two or four, and each is required to complete the following exercises and surveys:

1. Ranging
2. Chaining
3. Compass reading
4. Determination of length of pace
5. Survey of a large area by pacing and hand compass
6. Adjustment of hand levels and practice in leveling
7. Adjustment and use of wye levels
8. Adjustment of mining transit
9. Reading angles
10. Traverse with steel tape
11. Azimuth traverse with stadia

12. Survey of mining claim according to the regulations of the U. S. Government

13. Measurement of earthwork

14. Laying out railroad tangents, curves and crossings

Each squad must provide itself with a 12-foot steel tape, graduated to tenths.

This course is open only to those who have taken Course VII, or its equivalent, and is part of the work of junior year.

During the second semester of the junior year the higher theoretical work in plane and mine surveying and mine mapping is studied. While visiting the mines in junior year a survey of a mine, or some part of a mine is actually made and the survey platted.

Surveying instruments of the latest and best makes are furnished students for this work.

Ore dressing. The lectures and recitations in ore dressing extend through the first semester of junior year, and comprise the detailed study of ore dressing and concentrating machinery, together with the study of typical combinations of dressing machines as found in the several mining districts of the United States.

In connection with the theoretical work, the ore dressing and testing plant of the school is utilized for practical illustrations.

During the coming year, experimental work in ore concentration will be conducted.

DEPARTMENT OF METALLURGY

ASSAYING

The lectures treat of and describe apparatus, reagents, assay furnaces, fuels, etc., in connection with this subject. The principles of assaying and sampling are fully explained. A collection of representative ores of various metals with a collection of corresponding slags are shown, and instruction is given as to nature and quantity of fluxes. Special and rapid methods of testing slags and metallurgical products as employed in western smelting works are emphasized.

The laboratory course include preparing and testing reagents, making cupels, etc., and assaying samples of ore, furnace and mill products; different charges are tried and practical conclusions drawn. Assays of bullion for fineness.

Great importance is attached to the work in the laboratory. A large well ventilated furnace room in which are located muffle and crucible furnaces, and another room of similar dimension equipped with desks, pulp and bead balances, afford accommodations to a large number of students. Ores of various metals of known value are given the students, who are required to make up the necessary charges and submit their reports in detail. This work is offered to students completing the necessary courses in mineralogy and chemistry.

The assay laboratories are located in Pillsbury Hall, and consist of—

1. *Preparation room.* Where the samples and reagents are weighed. This operation is conducted in a room entirely apart from the furnace room. The separation of the laboratory from the furnace room is of the greatest importance to the student. The preparation of ore is effected by a Forster crusher, Fraser & Chalmers sample pulverizer and Bridgman ore sampler. The machines are run by an electric motor. Much time is thereby saved to the student for extended or advanced work in special lines.

2. *Furnace room.* After the sample has been placed in suitable vessels for fusion, it is taken to the furnace room which communicates directly with the preparation room. This room is well equipped with crucible and muffle furnaces and all the appurtenances necessary for carrying on the reduction of the metals from their ores by fire methods.

3. *Balance room.* In this room are various balances for accurately weighing the gold and silver beads, and bullion.

ORE TESTING

The lectures treat of the use and purposes of all the machinery connected with the subject, supplemented with detail drawings.

There are complete testing works connected with the department where the student may see the working of, and handle for himself, crushers, rolls, Huntington mill, concentrating machinery, such as vanners, buddles, jigs, pan for amalgamation, settlers, reverberatory furnaces for oxidizing and oxidizing-chloridizing roasts, leaching and chlorination plants, as well as sizing apparatus and hydraulic separators. Sufficiently large amounts of ore are given to make the necessary tests upon the different machines, and the students report the best method of treatment. The first semester of senior year is devoted to instruction and laboratory work, and is required of students both in mining and metallurgy.

The ore testing works meet educational as well as commercial needs.

Educational. The ore testing plant acquaints the student with the construction and manipulation of the principal typical machines used in the leading ore dressing establishments of the country. It is here that students in mining and metallurgical engineering get the requisite practical experience. They handle all machines and operate on sufficiently large amounts of material to determine the methods best suited to a given ore to extract the largest amount of metal with the least possible loss.

Commercial. Ore testing works are an important factor in mining and metallurgical projects. The commercial object is to determine the best method of treating a given ore so as to yield the largest percentage of the metal it contains at the least possible cost. Samples varying from 500 pounds to car load lots can be treated by various methods.

The ore testing works are located on the east bank of the Mississippi, between the Great Northern and Northern Pacific railroads. Located at this point on the University campus, it offers the very best facilities for both educational and commercial purposes.

As the funds appropriated for the erection of such plant were sufficient to purchase only the necessary machinery, the business men of Minneapolis generously provided a suitable building. This building, 94x66 feet, is built of brick and stone.

Machinery. The plant contains all the machinery necessary to illustrate the various processes of ore testing, viz: a Bridgman mechanical sampler, size B; a link belt bucket elevator; a pulley feeder complete; a pair of 12½x12 geared rolls complete; a four compartment spitzkasten; a three compartment Hartz jig; a Collum jig complete with cone for driving; a three and a-half foot Huntington mill complete; a three stamp mill, 275-pound stamps; a five stamp mill, 850 pound stamps; a Challenge automatic

feeder for five-stamp battery; a suspended Challenge feeder for three-stamp battery; a Tulloch feeder for Huntington mill; a single deck buddle, twelve feet in diameter; a four-foot plain belt Frue vanner; a Cammett concentrator; a Hooper pneumatic concentrator; a Century drop motion jig; a three-foot amalgamating pan; a five-foot settler; a Bruckner roasting furnace, with fire box on wheels; a chlorination barrel; a battery tightener; a two-horse power vertical boiler; a steam drying pan; three trommels, with driving arrangement and gears; a one thousand pound Reedy elevator, complete with worm gear; two overhead crawls, each with eighty foot track; one-ton pulley block; a quarter-ton pulley block; a scoop car, with flat wheels; two twenty horse power electric motors; three MacDermott automatic samplers, etc.

METALLURGY

This subject is well illustrated with representative ores of all the most important metals, drawings of furnaces, models and samples of all the different furnace products. The lectures treat all the principal methods now in use.

The practical work consists in visits to smelting and refining works which are accessible. The work in metallurgy extends through three years.

Mathematics (Mechanics I)—5 hours, Professor Groat
Mechanical Laboratory (Mechanical Engineering XXI)—22 hours, Prof. Kavanaugh
Metallurgy (Metallurgy V)—4 hours, Professor Appleby
Mining (Mining II)—4 hours, Professor van Barneveld
Petrography (Geology and Mineralogy, Geology III)—22 hours, Dr. Berkey
Ore dressing—Mining VI)—4 hours, Professor van Barneveld

SECOND SEMESTER

Mathematics (Mechanics II)—5 hours, Professor Groat
Mechanical Laboratory (Mechanical Engineering XXI)—22 hours, Prof. Kavanaugh
Metallurgy (Metallurgy VI)—4 hours, Professor Appleby
Mine Mapping (Mining XI)—32 hours, Mr. McCarty
Mine Surveying (Mining X)—3 hours, Professor van Barneveld
Mining (Mining II)—4 hours, Professor van Barneveld
Petrography (Geology and Mineralogy, Geology VI)—2 hours, Dr. Berkey
Steam Engines (Mechanical Engineering XVI)—2 hours, Professor Flather

FIELD WORK—MONTH OF MAY

<i>Metallurgy</i> (Metallurgy VIII)	} 4 weeks	} Professor van Barneveld Professor Appleby, Mr. Christianson and Mr. McCarty
<i>Mining</i> (Mining III)		

SENIOR YEAR

FIRST SEMESTER

Chemistry (Chemistry XVI)—42 hours, Dr. Frankforter
Electric Power (Electrical Engineering V)—32 hours, Professor Springer.
Geology (Ore Deposits—Geology and Mineralogy, Geology IX)—4 hours, Professor Hall
Mathematics (Mechanics III)—4 hours, Professor Groat
Mining (Mining IV)—3 hours, Professor van Barneveld
Mining Engineering (Mining V)—3 hours, Professor van Barneveld
Ore Testing (Metallurgy II)—2 hours, Professor Appleby
Ore Testing Laboratory (Metallurgy II)—42 hours, Professor Appleby

SECOND SEMESTER

Chemistry (Chemistry XX)—42 hours, Professor Nicholson
Designs and Specifications (Mining VI)—42 hours, Professor van Barneveld

Electro-Chemistry (Chemistry XVII)—32 hours, Dr. Frankforter
Electro-Metallurgy (Metallurgy VII)—3 hours, Mr. Christianson
Mechanical Laboratory (Mechanical Engineering XXV)—22 hours, Professor
 Kavanaugh
Mining (Mining IV)—3 hours, Professor van Barneveld
Mining Engineering (Mining V)—3 hours, Professor van Barneveld
Thesis—4 hours

COURSES OF INSTRUCTION

COURSES IN CHEMISTRY

- Course I. Qualitative analysis* *Freshman i.*
 Lectures and laboratory work. The course includes the reactions of the metals as applied to their separation and identification, 3 hours lectures, 5 hours laboratory.
- Course II. Qualitative analysis* *Freshman ii.*
 Lectures and laboratory work. The work in this course will include an examination of alloys, minerals, slags and other compounds. Open to those who have completed course I.
- Course III. Quantitative analysis* *Sophomore i. 96 hours*
 Lectures and laboratory work. The course includes an introduction to quantitative and a beginning of gravimetric analysis. Open to those who have completed course II.
- Course V. Volumetric analysis* *Sophomore ii, 96 hours*
 Lectures and laboratory work. The course includes an introduction to volumetric determinations with a discussion of standard solutions and the necessary stoichiometric calculations. Open to those who have completed course III.
- Course XVI. Special problems* *Senior i, 48 hours or more*
 Laboratory work. The course includes the working out of various mineralogical, technological and metallurgical problems. Open to those who have completed course V.
- Course XVII. Electro-chemical analysis* *Senior ii, 48 hours or more*
 Lectures and laboratory work. The course includes the qualitative and quantitative separation of metals by electrolysis. Open to those who have completed course XVI.
- Course XX. Iron and steel analysis* *Senior ii, 48 hours or more*
 Lectures and laboratory work. The course includes the rapid determination of iron by the various methods, as well as the determination of associated elements, sulphur, phosphorous, silicon, manganese, carbon and others. Open to those who have completed course V.
- Course XXV. Special problems* *Senior ii, 48 hours or more*
 Laboratory work. This course includes work on ores of base metals, limestone, slags, etc.

COURSES IN DRAWING

- Course I* *Freshman i, ii, [4] 238 hours*
 (a) *Freehand* *i, [2] 68 hours*
 Lettering, geometric forms and engineering details in outline, including working sketches, translations and the elements of perspective.

(b) *Mechanical* Freshman i, ii, [2] 136 hours
 Conventional methods, lettering, machine and structural details and standard sizes and shapes.

(c) *Descriptive geometry* ii, [2] 34 hours
 Problems relating to points, lines, planes, solids, interpenetrations, surface of revolution, tangents and developments, including the constructive geometry involved. Recitations and lectures.

Course II. Sophomore i, [4], ii, [2], 204 hours

(a) *Descriptive geometry*
 Orthographic, isometric, horizontal, topographic, oblique, and perspective projections, shades and shadows, line shading and brush tinting. Open to students who have completed course I.

(b) *Working drawings*
 Engineering details, assembly drawings, mechanical movements, tracing and blue printing. Study of shop methods and drafting room systems. Details are obtained from actual machines and structures as far as possible.

COURSE IN ELECTRICAL ENGINEERING.

Course V. Electric power Senior i, 3 and 6 hours per week, first semester
 Elements of theory and practice of electrical measurements, wiring, dynamo, motors and electric lighting. 36 lectures and 48 hours laboratory. Preparation required: physics, course I.

COURSES IN GEOLOGY AND MINERALOGY

MINERALOGY

Course I. General mineralogy Freshman i, ii.
 The physical and chemical characters of minerals; a study of the native elements and the ores of the common metals; the occurrence and association of economic minerals.
 Descriptive mineralogy and classification; rock-forming minerals; genetic relationships and distribution.
 Laboratory work consists of tests illustrating the range of minerals and the application of chemical and blowpipe analyses to the determination of species: an introduction to the methods of quantitative blowpipe analyses; special topics; reference reading and discussions. Eight hours a week.

Course II. Physical mineralogy Freshman ii.
 An introduction to crystallography; physical characters of greatest service in rapid determination. Hand specimen practice preparatory to rock study. Lectures and field work. Two hours a week.

Course III. Optical mineralogy Junior ii.
 A study of the structure of crystals and crystal grains. An application of the methods of determination by optical properties; the use of the petrographers' microscope, embracing the elements of lithology. Lectures and laboratory work. Four hours a week.

GEOLOGY

Course I. Physical geology Junior i.
 1. Geodynamics, discussing the atmosphere, water, terrestrial heat, plants

and animals, as geological agents, 2, structural geology explaining stratification, displacements, dislocations, fractures, induced rock-structures and mineral veins in their relation to the arrangement of materials in the earth, 3, physiographic geology, pointing out the more prominent earth features and discussing their origin, significance and the agencies affecting them. Field excursions are required. Scott's Introduction. Two hours a week.

Course III. Petrographical geology *Junior i.*

General consideration of the origin and occurrence of rocks, i. e., Petrogenesis. The structure and texture of rocks. Preliminary studies of the mineral, physical and chemical constitution of the crystalline rocks with a view to their general description. Kemp's Handbook of Rocks. Reference reading and demonstrations. Four hours a week.

Course VI. Petrography *Junior ii.*

An investigation of the megascopic and microscopic characters of crystalline rocks; a discussion of their crystalline habit, mineral composition and genetic relations. The course extends into an examination of some Minnesota groups of crystalline rocks. Practically a continuance of course III of mineralogy. Laboratory, with lectures and reference reading. Four hours a week.

Course IX. Ore deposits *Senior i.*

History of mineral discovery and development in the Americas; a discussion of the origin and distribution of ore deposits, embracing the chemical processes involved in their formation and subsequent alterations. A description of the geology and mineralogy of ore bodies, particularly those yielding gold, silver, copper, iron, lead and zinc. Kemp's Ore Deposits. Four times a week.

Course X. Special problems *Senior ii.*

The investigation by individual students of particular problems, involving the field work of an investigation of some particular formation and the laboratory investigation and reading incident to the study of the material collected. The methods of systematically recording and interpreting geological and mineralogical data, as observed in the field; keeping of notebook, preparation of geological maps, profiles and sections will be taught. Four times a week.

COURSES IN MATHEMATICS

Course I. Algebra and plane trigonometry *Freshman i.*

Rational integral functions, factors and roots of general quadratic, factor and remainder theorems, factors and values of $f(x)$, graphs, cube roots of unity and factors of $(a^3+b^3+c^3-3abc)$, progressions and notation, development of $f(x)$ and undetermined coefficients, convergence, divergence, equivalence, exponential theorem, logarithmic series and logarithms, summation of series, derived functions, theory of equations, trigonometric ratios, right triangles, general definitions of functions, analytic relations, trigonometric equations, oblique triangles. Five hours per week.

Course II. Algebra, analytic geometry and spherical trigonometry *Freshman ii.*

Permutations and combinations, determinants, systems of coordinates, loci, straight line, transformation, equations of the conics, limits, areas and limits of sums, differentiation and integration of elementary forms,

spherical formulæ and solution of spherical triangles. Four hours per week. Preparation, course I.

Course III. Analytic geometry and infinitesimal analysis *Sophomore i.*

Properties of the conics, equation of 2nd degree, higher plane curves, coordinates in space, point, plane, straight line, quadric surfaces, review of nature of differentiation and integration, elementary forms, geometric applications, successive derivatives, expansion of functions, indeterminate forms, rates, partial derivatives, maxima and minima, change of variable, applications to analytic geometry. Five hours per week. Preparation course II.

Course IV. Differential and integral calculus *Sophomore ii.*

Applications continued, rational fractions, rationalization, formulæ of reduction, multiple integration, various systems of coordinates, approximate integration, some differential equations of mechanics. Five hours per week. Preparation course III.

COURSES IN MECHANICS

Course I. Statics and mechanics of materials *Junior i.*

Mathematical conditions of equilibrium, frames, theory of elasticity, design for beams shafts, boiler plates, etc. Five hours per week. Preparation, mathematics IV and physics.

Course II. Kinetics and hydraulics *Junior ii.*

Motion of rigid bodies; numerous problems in work, power, energy, friction, and hydraulics. Five hours per week. Preparation, course I.

Course III. Thermodynamics and prime movers *Senior i.*

Properties of steam, perfect gases, heat engines, water power, theory of turbines. Four hours. Preparation, course II.

COURSES IN MECHANICAL ENGINEERING

Course XVI. Steam engine *Junior ii, 36 hours*

Mechanics of the steam engine. Work in the cylinder; effect of reciprocating parts; steam distribution. Mechanism of steam engines. Study of the details of modern steam engines. Valves and valve gears. A study of the slide valve, link motions and other reversing gear; automatic cut-off gears and the Zeuner diagram. The steam engine indicator. Principles and operation of the instruments, indicator rigging; indicator cards; compounding. Preparation, course I in applied mechanics. Two hours a week.

Course XXI. Strength of materials *Junior i, 72 hours*

Laboratory work investigating the strength and physical qualities of iron, steel, brass, copper, belting, chains, beams, brick and stone. Preparation, course I applied mechanics. Four hours a week.

Course XXII. Mechanical laboratory *Junior ii, 72 hours*

Continuation of course XXI; also exercises in valve setting, indicator practice, calibration of steam gauges, efficiency of screws and hoists. Preparation, course XVI. Four hours a week.

Course XXV. Mechanical laboratory *Senior ii, 72 hours*

Calibration of wires, meters and other hydraulic apparatus; calorimetry;

tests of pumps, engines and boilers. Open to students who are taking or have completed course XXII. Eight hours a week.

COURSES IN METALLURGY

- Course I. Assaying* *Freshman ii.*
 Determination of values of the ores. Lectures, recitations and laboratory work. Open to those who take courses I, II, III, chemistry, and have completed courses i, ii, mineralogy.
- Course II. Ore testing* *Senior i.*
 Determination of methods of ore treatment. Lectures and practical work. Open to those who have completed course I.
- Course III. General metallurgy and metallurgy of iron* *Sophomore i.*
 Including the subjects of combustion, fuels, refractory material and furnaces. Lectures and recitations on metallurgy of iron. Open to those who have completed course I.
- Course IV. Metallurgy of wrought iron and steel* *Sophomore ii.*
 Lectures and recitations. Open to those who have completed course III.
- Course V. Metallurgy of the precious metals* *Junior i.*
 Gold, silver and platinum. Lectures and recitations. Open to those who have completed course IV.
- Course VI. Metallurgy of the base metals* *Junior ii.*
 Associated with precious metals, including lead, copper, etc. Lectures and recitations. Open to those who have completed course V.
- Course VII. Electro-metallurgy* *Senior ii.*
 Lectures and recitations. Open to those who have completed course VI.
- Course VIII. Field work in metallurgy* *Junior ii*
 Conference and reports. Last four weeks of semester. Open to those who have completed course VI.
- Course IX. Designs and specifications* *Senior ii.*
 Supplementing theses.

COURSES IN MINING

- Course I. Explosives, blasting, air compressors, etc.* *Sophomore ii.*
 Four hours a week.
- Course II. Mining* *Junior i, ii.*
 Mode of occurrence of ore bodies; prospecting shaft-sinking, tunneling, drifting, stoping, timbering. Methods of metal mining. Methods of coal mining. Hydraulic mining. Four hours a week.
- Course III. Field work* *Junior ii.*
 Practice in mine surveying and field geology, studying in mines. Open to those who have completed courses I, II. Last four weeks of the semester.
- Course IV. Mining* *Senior i, ii.*
 Mine management. The examination of a mining property. Sampling ore reserves, etc. Mine accounts. Mine accidents. Mining law. Open to those who have completed course III. Three hours a week.

Course V. Mining engineering *Senior i, ii.*

Mining machinery, underground transportation, hoisting, pumping and ventilation. Electricity applied to mining. Open to those who have completed course III.

Course VI. Ore dressing *Junior i.*

Mechanical preparation of ore for the market, for metallurgical treatment, etc. Four hours a week.

Course VII. Designs and specifications *Senior ii.*

Designs of mine cars, skips, head frames, etc., in connection with thesis work. Open to those who have completed senior I. Eight hours a week.

Course VIII. Plane surveying *Sophomore i.*

Computation, platting, with special reference to mine surveying. Twice a week.

Course IX. Field work *Junior*

Practice in plane surveying during the month of August, with special reference to mine surveying. Open to those who have completed course VII.

Course X. Mine surveying *Junior ii.*

Computations, methods, etc. Open to those who have completed courses VII and IX. Three times a week.

Course XI. Mine mapping *Junior ii.*

Six hours a week.

COURSE IN PHYSICS

Course I. General physics *Sophomore i, ii.*

Experimental lectures and laboratory work.

THE
COLLEGE OF AGRICULTURE

THE
SCHOOL OF AGRICULTURE

THE
DAIRY SCHOOL

AND THE
EXPERIMENT STATION

The Department of Agriculture

The Department of Agriculture is located on the University farm, three miles from the main campus of the University, and midway between St. Paul and Minneapolis. The campus is on a beautiful elevation overlooking the twin-cities and adjoining the State Fair grounds. The artistic buildings, and native trees, supplemented by new plantations and attractive drives, add greatly to the interest of the department.

This department consists of several sub-organizations: The College of Agriculture, the School of Agriculture, the Dairy School, the Short Course for Farmers, and the State Experiment Station.

The technical agricultural work of the college of agriculture, the experiment station, and of the shorter courses is combined under professors who are heads of divisions. These professors are responsible for both the experiment work and the instruction in their respective lines.

The dean and director is in immediate charge of the experiment station, the college of agriculture, and the short course for farmers. Under the dean, the principal is in charge of the school of agriculture, and the professor of dairy husbandry, of the dairy school.

The students in the college of agriculture and those pursuing graduate work pursue their technical agricultural studies with the professors in the college of agriculture, and have open to them a wide range of subjects in the college of science, literature and the arts.

Students in the school of agriculture pursue their studies at University farm. Special instructors are employed to teach the academic studies, of the high school grade, which are necessary to supplement the agricultural work given by the various technical divisions of the department of agriculture.

Students in the intermediate course pursue all their studies at University farm, or in high schools or academies nearer their homes.

Students in the short course for farmers receive their instruction in the various technical divisions.

The college of agriculture year is from Sept. 1st to June 2nd; the school of agriculture year is from Oct. 5th to March 23rd; the dairy school is in session from Nov. 23rd to Dec. 19th; and the short course for farmers is in session from Jan. 12 to March 13th.

A more detailed account of the work of each division will be found under the respective headings.

EQUIPMENT.

The equipment of the Department of Agriculture of the University of Minnesota has been materially increased in recent years. The university farm contains two hundred and fifty acres of land. About forty acres are devoted to the campus, fifty acres to permanent pastures, and the remainder (mainly set aside for the experiment station), is used for instruction and experiments in field, garden, orchard and forest crops. The permanent pasture lands are rough and, in places, low and difficult to drain, but serve a very useful purpose. The one hundred and forty acres used for experiments and in giving instruction, have a good soil of mixed clay and sand, which is well adapted to its various uses.

The department of agriculture has also a farm of four hundred and eighty acres at Crookston, in the northwest portion of the state, another farm of three hundred fifty-two acres at Grand Rapids, in the pine region of northeastern Minnesota, and rents land in southwestern Minnesota at Lynd, and also has five acres devoted to raising seedling apples at Owatonna. All this land is used for the experiments and educational work by experiment station officers. These farms were selected by the University as especially representative in locality, soil, and general conditions of the whole state.

A number of useful text-books and class bulletins have been prepared and others are being written for the work in the college and school of agriculture. Special laboratories have been equipped; much of the apparatus and many of the methods of instruction have been devised by the teachers, and a considerable amount of museum material for demonstration work, for laboratory practice and for research work has been collected. The fields, gardens, orchards, barns and laboratories afford much opportunity for observation in practical work, while the experiments in progress under the experiment station afford many advanced students opportunities to pursue research work.

The buildings at University farm have all been erected since 1884 and are modern in their arrangement and equipment. The agricultural department of the University has now an investment in buildings of about \$340,000.

The agricultural library now contains 7,500 books and about six thousand pamphlets, including reports and bulletins. Aside from the large number of pamphlets and other publications of the different agricultural institutions and societies, a large number of the most important technical and agricultural magazines are kept on file, bringing together the agricultural literature of any importance.

The College of Agriculture

THE FACULTY.

- CYRUS NORTHROP, LL. D., *President.*
WILLIAM M. LIGGETT, *Dean.*
SAMUEL B. GREEN, B. S., *Professor of Horticulture and Forestry.*
HARRY SNYDER, B. S., *Professor of Agricultural Chemistry.*
T. L. HAECKER, *Professor of Dairy Husbandry.*
M. H. REYNOLDS, M. D., V. M., *Professor of Veterinary Medicine and Surgery.*
WILLETT M. HAYS, M. Agr., *Professor of Agriculture.*
ANDREW BOSS, *Associate Professor of Agriculture, in charge of live stock.*
VIRGINIA C. MEREDITH, *Professor of Home Economics.*
FREDERICK L. WASHBURN, M. A., *Professor of Entomology.*
FREDERICK B. TUCKER, B. A., *Principal School of Agriculture, Economics.*

INSTRUCTORS.

- WILLIAM ROBERTSON, B. S., *Agricultural Physics.*
J. A. VYE, *Penmanship, Accounts.*
J. M. DREW, *Blacksmithing, Poultry.*
JUNIATA L. SHEPPERD, M. A., *Cooking, Laundering.*
MARGARET BLAIR, *Sewing.*
WILLIAM A. WHEELER, M. S., *Wood Technology and Diseases of Woods.*
H. H. CHAPMAN, *Forest Exploitation.*

ASSISTANT INSTRUCTORS.

- JOHN A. HUMMEL, B. Agr., *Agricultural Chemistry.*
C. P. BULL, B. Agr., *Agriculture.*
JOHN THOMPSON B. Agr., *Agriculture.*
A. J. RUGGLES, B. S. A., *Entomology.*
M. L. ERICKSON, B. S., *Forestry.*

In the College of Agriculture three regular courses of study are offered: A course in agriculture, see page 185, a course in forestry, see page 196, and a course in home economics, see page 198.

REQUIREMENTS FOR ADMISSION TO ALL COURSES IN THE COLLEGE OF AGRICULTURE.

For Students Entering the Courses in Agriculture or Forestry.

Graduates of the school of agriculture, who have completed the studies prescribed in the intermediate course, or fourth year, and graduates of approved high and normal schools, as approved by the committee on entrance requirements and course of study, are admitted to the freshman class in the courses in agriculture or forestry; the former to Division "A", and the latter to Division "B".

For students entering the course in home economics: Graduates from the school of agriculture who have completed the studies prescribed in the intermediate or fourth year are admitted to the freshman class in the course in home economics. Graduates from the school of agriculture who are also graduates from state high schools, normal schools or other schools of equal standing, are admitted to the sophomore class in the course of home economics.

Students from other colleges and universities: Graduates from other colleges and universities may be admitted upon presentation of certificates, and will receive credit from the several professors for all work satisfactorily completed of similar character and grade to that given in this course.

Special students: Graduates of the school of agriculture may be admitted as special students and be allowed to pursue such studies in the course offered in the college of agriculture as are approved by the faculty.

All students in the college of agriculture must advise with the dean or the committee on college and graduate work concerning all electives. No student is allowed to enter any course until such course is properly entered upon the student's registration card by the registrar of the University, and no credit shall be given for subjects in which the student has not been previously registered.

GRADUATE WORK.

Special facilities are offered to graduate students from this and other agricultural colleges who wish to become familiar with methods employed in experiment station work, and to pursue their collegiate studies further. Courses for major and minor subjects may be arranged by consulting the professors in the different divisions. Students who enter for advanced degrees register with the committee on registration of the college of agriculture and must take their major subjects in the college of agriculture, but they may take one or both of their two minor subjects in the college of science, literature and the arts. Graduate students registered with the committee on graduate studies in the college of science, literature and the arts may take one or both of their minor subjects in the college of agriculture.

I. The degree of Master of Agriculture will be conferred on a bachelor of this or any other agricultural college of equal grade who, not sooner than one year after graduation, if a resident graduate student at this agricultural college, shall pass an examination in certain prescribed lines of study and present a satisfactory thesis.

II. All general regulations of the college of science, literature and the arts, governing candidates for the master's degree, method of selecting work, amount of work required, degree of proficiency expected,

and the time and manner of conducting the examinations, apply to candidates for master's degrees in the college of agriculture.

III. The degree of Doctor of Philosophy will be conferred by the college of agriculture on bachelors of this or any other agricultural college of equal grade within not less than three years after graduation therefrom under conditions similar to those prescribed by the faculty of the college of science, literature and the arts.

FEEES.

All students in the college, who are residents of the state, are charged an incidental fee of ten dollars a semester. Non-residents are charged double the fee required of residents of the state, or twenty dollars a semester. No reduction is made for late entrance or for leaving before the end of the semester. In addition to this fee, students who take work in laboratories are charged a sum sufficient to cover the cost of material and breakage.

REQUIREMENTS FOR GRADUATION.

After the completion of the prescribed course of study, including all of the required work and the requisite amount of elective work, students in the courses in agriculture and in forestry will be recommended for graduation with the degree of bachelor of agriculture, and students in the course in home economics with the degree of bachelor of science in home economics.

The elective studies designated as academic are to be chosen from the printed semester programs of work offered in the colleges of science, literature and the arts, law, medicine and engineering, no student to take more than two semesters in either of the three last named colleges. The elective studies designated as agricultural are to be chosen from the printed program of work offered in the college of agriculture.

THE COURSE IN AGRICULTURE.

The course in agriculture is designed to give the student a broad education in the science and arts relating to agriculture and to fit him for the work of the agriculture specialist. The physical and biological sciences are made prominent. The work in these subjects is begun in the first or second year and may be continued throughout the course. For the first two years, the lines of study are prescribed, the subjects being chosen with a view of giving a good foundation for the work which follows. For the last two years, the work is mostly elective and gives the student an opportunity to take work along certain lines for which he has a special aptitude and liking.

In the college of agriculture a portion of the work is taken in the college of science, literature and the arts. All academic electives and the prescribed work in higher algebra, drawing, geology, German, French, rhetoric, trigonometry, botany, zoology, psychology, English literature, logic, philosophy, pedagogy and history are taken in the college of science, literature and the arts. The agricultural electives and the prescribed subjects not mentioned above are taken at University Farm.

OUTLINE OF COURSE IN AGRICULTURE.

FRESHMAN YEAR.

DIVISION "A."

For graduates of the School of Agriculture only.

FIRST SEMESTER.	SECOND SEMESTER.
Higher Algebra [4]	Trigonometry [2]
Drawing [4]	Chemistry [2]
Geology [4]	German [4]
German [4]	Rural engineering or drawing [4]
Military Drill [2]	Rhetoric [4]
Gymnasium [2]	Military drill [2]
	Gymnasium [2]

FRESHMAN YEAR.

DIVISION "B."

For graduates of approved high schools or others of equal standing. Students in this division take part of their work in classes of the school of agriculture. For descriptions of courses see statement under School of Agriculture.

SEPTEMBER.

Agriculture [4]	Handling grain and farm machinery [4]
Forestry [4]	Fruit growing [4]
Dairy chemistry [4]	Breed type of horses [4]
Blacksmithing [4]	

AGRICULTURAL SCHOOL YEAR.

FIRST TERM.	SECOND TERM.
Dairying [2]	Dairy stock and feeding [2]
Breeding [2]	Feeding [2]
Agricultural chemistry [5]	Soils and fertilizers [5]
Fruit growing [2]	Vegetable gardening [2]
Veterinary [2]	Veterinary [2]
Entomology [5]	Field crops [2]
Physics [2]	Study of breeds [2]
Forestry [2]	Plant propagation [3]
Military drill [2]	Military drill [2]
Gymnasium [2]	Gymnasium [2]

LAST HALF OF SECOND SEMESTER.

Chemistry [2]	Dairy stock and judging [2]
Poultry [3]	Rural engineering [4]
Blacksmithing [4]	Economics [4]
Bookkeeping [3]	

SOPHOMORE YEAR.

Botany or zoology, long, a. m. [4]	
Botany or zoology, short, a. m. [4]	
Chemistry, p. m. [4]	(T. & W. Laby.) (Lect. M. 11 a. m.)
German or French, p. m. [4]	
Agricultural physics, p. m. [2]	(Thurs. and F. at 3:45 p. m.)
Rhetoric, p. m. [1]	
Military drill [2]	

JUNIOR YEAR.

SENIOR YEAR.

Botany or zoology, long, a. m. [4]	Elective, academic, a. m. [4]
Elective, academic, a. m. [4]	Elective, academic, a. m. [4]
Elective, agricultural, minor, p. m. [4]	Elective, agricultural, minor, p. m. [4]
Elective, agricultural, major, p. m. [4]	Elective, agricultural, major, p. m. [4]

Note.—No more than two semesters' work to be taken in any one subject for the minors in the junior and senior year.

The subject selected as the major elective is to be carried through both junior and senior years, and is to be concluded by a thesis to cover at least one year of practical work.

AGRICULTURE.

Equipment: The general equipment of University farm is available for class and special instruction and for practice work. A seed breeding laboratory furnishes facilities for special instruction in field seeds and in laboratory work in plant breeding. The plant breeding nurseries, the variety testing and the seed distribution, afford facilities for instruction and practice to students especially interested in these lines of work. The experiments and records in field management, in crop rotation and in cultivation experiments provide material and opportunities for study and for gaining experience. Instruments of precision make practical the instruction in planning farms, land drainage, road making, and fence building. The farms of the vicinity serve as a basis for designing farm plans and farm business, and rural engineering problems can be worked out in nearby rural communities. Many useful samples, drawings, photographs, and references are being collected. The exhibits of machinery at the state fair grounds adjoining University farm, and those on exhibition in the warehouses of Minneapolis and St. Paul, supplement the collection in use at University farm. Students can study the merchandising of grain, the inspection and the grading of the various grain products in the twin cities. Statistics relating to the cost and profit of each staple farm crop are being gathered by special agents in three representative counties of the state.

A portion of the instruction in agriculture is in the form of lectures. The writing of papers on special subjects is made a prominent feature.

Research work is arranged for in many cases, and practice work on the farm and in the laboratory is provided. The aim is to have students get experience in field agriculture, both practical and experimental, and in demonstration instruction.

Course I. Field crops and seeds.

[One semester.]

In this course are considered the botany, cultivation, irrigation, use and place in the rotation of the various cereal, forage, root, fiber, sugar and miscellaneous crops. Special attention is given to the subjects of permanent, rotation, annual and shift pastures, and to soilage crops, to permanent and rotation meadows, and to the production and preservation of all kinds of dry-cured and ensilaged fodders. A thesis on one or more field crops is required of each student.

Course II. Thremmatology.

Heredity, variation, laws of breeding, the art of breeding, improvement by nature and under scientific experimentation, securing foundation stocks, value of using very large numbers, immense value of the occasional individual which can transmit qualities of peculiar value, use of an ideal, use and misuse of the score card, both numerical and graphic, intrinsic qualities, fancy points and distinguishing marks, statistical methods in breeding, pedigree records of efficiency, fundamental principles underlying the arrangement of the record books, bibliography and terminology, study of the literature of breeding.

Botany of the reproductive organs of field crops, field crop nursery management, producing new qualities by hybridizing and by change of environment, hybridizing versus cross-breeding, in-breeding and self fertilization, originating varieties and improving standard varieties, by selection and by hybridizing followed by selection, methods of disseminating new varieties, seed and plant introduction. Experimentation in the theories relating to heredity, variation and practical breeding, seed growing as a farm business, seed merchandising. The breeding of each of the various field crops grown in Minnesota.

Course III. Rural engineering.

[One semester.]

Subduing new prairie and timber soils, farm drainage, irrigation and irrigation works, tillage of crops, roads, their financial support, their location, construction and maintenance, farm buildings, farm fences, farm implements and machinery.

Course IV. Agricultural economics.

[One semester.] '03-'04

Farm management, systems of farming, planning farms, fields, crops, stock, labor, farm finances, sales, prices, agricultural statistics, production, exports, wages, land laws, ownership, taxes, organizations. Agricultural practicums. Opportunities to gain practical experience, to acquire greater manual dexterity in doing farm work to secure practice in conducting experiments and to get experience in teaching agricultural subjects, are offered to college and graduate students, when practicable. Students should arrange early in their course for this work, as the opportunities in plant breeding, in rural engineering, in field crops, in agricultural statistics and in assisting instructors in the various courses are available only at irregular intervals and must be arranged for in advance.

AGRICULTURAL CHEMISTRY.

Equipment. A special laboratory with modern apparatus for the analyses of soils, foods and agricultural products is provided. The equip-

ment contains a Berthelot-Atwater calorimeter for the determination of the caloric value of foods, apparatus for the chemical and physical analysis of soils, an electrical apparatus for determining the resistance of soils to soluble salts, and the necessary facilities for food investigations. Special facilities are offered in soil investigations, and in the analysis and testing of wheat, flour and cereal products for commercial purposes. Standard reference books and journals, including *Jahresbericht der Agrikultur Chemie*, *Coptes Rendus*, *Biedermann's Centralblatt*, *Annals de la Science Agronomique* and *Versuchs-Stationen*, are provided for the advanced work in agricultural chemistry.

Fees. In all of the laboratory courses in agricultural chemistry, a fee is charged to cover the cost of material used, and breakage. The student is assigned a certain amount of apparatus and material for which he gives a receipt, and deposits \$3 with the accountant before beginning work. All apparatus returned in good condition at the close of the term is credited to the student's account upon settlement.

Two and one-half semesters of chemistry are required in the freshman and sophomore years. All other courses are elective.

Course I. (a) General agricultural chemistry. [One-half semester.]

Freshman II.

Recitations, lectures and laboratory practice. Particular attention is given to the study of the elements and compounds which are of the most importance in agriculture. The laws governing the combination of the elements by weight and volume are illustrated by numerous problems. The writing of equations, chemical nomenclature, and the periodic system of classifying the elements are prominent features of the work. In the laboratory, experiments are performed illustrating the general laws of chemistry which have a bearing upon animal and plant life.

(b) A continuation of I (a).

Sophomore I. semester.

Course II. Agricultural qualitative analysis.

Sophomore II.

This course is arranged to meet the wants of agricultural students. Six hours per week are given to the laboratory work and one period to a lecture and recitation. The writing of equations and the study of principles involved in the separation of the various groups and individual compounds of elements are characteristic features of this work. It is the object of this course to familiarize the student with the processes employed in qualitative analysis so that he may be able to determine the composition of all ordinary substances, particularly of those that are of the most importance in agriculture.

Course III. Agricultural quantitative analysis.

Junior or senior I.

An elementary course in qualitative analysis. The principles involved in gravimetric and volumetric analysis are studied. Three periods per week are given to laboratory work and one period to a recitation and lecture. The work includes the gravimetric and volumetric determinations of iron, acidimetry and alkalimetry, the gravimetric determination of phosphorous pentoxide, the volumetric determination of calcium oxide and determination of nitrogen and potassium oxide. The object of this course is to prepare the student for special

work in agricultural chemistry, and is required of all students who elect either courses VI or VII.

Course IV. The chemistry of foods.

[One-half semester.]

Lectures. This course treats of the chemistry of human and animal foods, the chemistry of plant growth, the composition and food value of the various organic compounds contained in plants, the influences which soil and climate exert upon plant growth and the various factors which influence the value and composition of farm crops. The chemistry of human and animal nutrition is also considered. It is the object of this course to familiarize the student with the more recent investigations which have a bearing upon the chemistry of human and animal foods and to enable him to utilize these results to the best advantage in the production and use of foods. Ample facilities are offered in both laboratory and library for the study of this subject. (Given only in alternate years. Given in 1905-06.)

Course V. The chemistry of soils and fertilizers.

[One-half semester.] II.

Lectures. The chemical changes that take place in the soil; the various sources of plant food; the power which crops possess of obtaining food from the soil; nitrification; the laws governing the increase and decrease of the soil nitrogen and the organic compounds of the soil and the part which they take in fertility—are some of the more important topics considered. The influence which various methods of farming have upon fertility of the soil and the best methods for conserving fertility are studied. The subject of judging, rating and scaling soils forms a part of the work. (Given only in alternate years. Given in 1904-05.)

Course VI. Laboratory practice. (a) The analysis of dairy products.

I.

This course including the proximate analysis of milk, butter and cheese, the determination of volatile fatty acids, iodine absorption number, the chemical and physical properties of fatty bodies and the determination of adulterated dairy products. This work is planned to meet the wants of those who wish to become familiar with the methods employed in investigations in dairy-chemistry.

(b) *The analysis of foods.*

II.

This work includes the determinations of starch, sugar, cellulose, and the more common and important compounds found in food materials. Particular attention is given to the analysis of wheat and flour for commercial and technical purposes. Ample facilities are offered in the laboratory for this work. The object of this course is to familiarize the student with the methods which are employed in investigations relating to the chemistry and economy of human and animal foods.

Special attention is given to the study of methods of analysis and to the determination of compounds as pentosans, and the more important proteids in cereal products.

Course VII. The analysis of soils and fertilizers. (a) The chemical analysis of soils.

I.

Laboratory practice. This course includes practice in the chemical analysis of soils and the study of the chemical methods employed in soil investigations. The course includes the analysis of soils by the use of strong and weak acid solvents. Particular attention is given to the study of the organic compounds, and experimental work is applied to field investigations.

(b) *The physical analysis of soils.*

II.

Laboratory practice in the physical analysis of soils by means of Hil-

gard's eleutator, and the sedimentation methods as modified by the use of centrifugal apparatus.

Courses VII (a) and VII (b) are intended for students who desire to make a specialty of the subject of soils.

AGRICULTURAL ECONOMICS.

This course is planned to acquaint the student with the present economic conditions of agriculture and its relation to other industries; also with the terms capital, interest, rent, profits, wages, etc., together with farm labor, origin of property in land and systems of land tenure.

It will be a preparation for further study, from an economic standpoint, of problems of agriculture and forestry.

Text book, lectures and discussions, four hours second half second semester, first year, Division "B", **required**.

ANIMAL HUSBANDRY.

Equipment. Representatives of some of the leading breeds of cattle, sheep and swine are kept at University farm. Each year a number of experiments are under way in the feeding of these classes of animals, and breeding experiments are also undertaken with sheep and swine, and theoretical experiments with the smaller animals. Experiments in summer feeding cattle, sheep and swine wholly or in part on pasture are carried on each year. The new veterinary building provides a temporary live stock judging room. Herds of blooded stock near the institution, and the annual show of live stock at the state fair serve for extended observation of breeds and methods of management.

Course I. Stock breeding.

[One-half semester.]

Discussion of the principles of stock breeding as affecting breed maintenance and breed formation; standards of excellence and comparison of standards of breeds; heredity and the influences affecting it; prepotency, fecundity and their relation to successful breeding; the influence of nutrition on animal growth and form and the effect of artificial conditions, early maturity, selection and pedigree.

Course II. Feeding animals.

[One-half semester.]

The principles of nutrition and digestion as applied to economical production; feeding rations and nutritive ratios, feed stuffs and methods of feeding, feeding of breeding stock and show stock, management of animals during pasture, yard and stall feeding for the block, feeding for specific production of wool or flesh, selection of animals for the feed lot, stabling suitable for the various classes of live stock.

Course III. Stock judging.

[One-half semester.]

This course is calculated to meet the needs of students desiring to become expert stock judges and of those who wish to study animal form with a view to becoming breeders of superior animals. Score card work in combination with the presence of living specimens is a feature of this course. Students are drilled in judging from the stand-points of breed, type, form, stamina, quality, breeding capacity, suitability for feeding and for general and specific production. Special

opportunities are given for judging live animals fitted for the block and in judging the dressed carcasses after slaughter, thus determining by observation the quality of animals judged.

Live stock practicums: Feeding and stable management of cattle, horses, sheep and swine, recording and calculating amounts of pasturage obtained from different forage crops, keeping herd records, writing pedigrees and recording animals, calculating feeding records and cost of production, mechanical analysis of carcasses of animals to determine total amount of meat, and proportionate amounts of fat and lean, determinations of fat and lean meat with especially designed apparatus; calculating percentages of different parts of the carcasses.

DAIRY HUSBANDRY.

Equipment. Students in the college course have the advantages of the equipment of the dairy school. The feeding and breeding experiments in the dairy division of the experiment station serve a most useful purpose in the collegiate instruction. The cordial relations existing between the department of agriculture and the other state institutions are often advantageous to college students well advanced in dairy work.

Representatives of several breeds of cattle are kept for class use. Herds in the vicinity and those shown at the state fair are useful to students in this course.

Course I. Dairy stock and dairy farm management. [One semester '02-'03.]

Lectures, first semester, three hours per week. Practice work one hour per week. This course is given during the first semester of the junior year. The lectures cover the breeding, rearing and management of dairy stock, the points and characteristics essential in animals intended for the dairy, practice work in judging dairy stock, and the management of the dairy herd.

Course II. Feeds and feeding. [One semester.]

This course consists of lectures covering scientific and practical questions underlying the principles of feeding. Practice work is given in formulating rations, in estimating the comparative value of food stuffs and in other problems connected with the subject. (Given in years beginning with even numbers.)

Course III. Course in factory dairying. [One-half semester.]

This is offered during the session of the dairy school, beginning November 23. Lectures in the forenoon on dairy bacteriology, dairy chemistry, the care of milk and cream, lactic cultures, flavors, creamery milk, cream ripening and churning, working and packing butter. In the afternoon students are given two and a half periods' practice in the factory training rooms and in the dairy laboratory.

Dairy practicums: Students are offered training two semesters in compounding rations, feeding cows, rearing calves, milking and many other details in the management of the dairy herd; operating hand separators, and other modern farm dairy appliances, the manufacture of butter and cheese and work in the dairy laboratories.

ENTOMOLOGY.

Students who have completed the entomology offered in the school of agriculture, or its equivalent, may elect course I or course II.

Course I. General entomology. [One semester.]

Structure and classification of insects. The dissection of type, life history and habits of leading forms. Each student is required to make a collection of at least fifty insects.

Not given in 1903-04.

Course II. Economic entomology. [One semester.]

Lecture upon injurious insects of Minnesota and best methods of combating same. The use of insecticides and spraying machinery. Beneficial insects.

Not given in 1903-04.

Course III. Forest entomology. [One semester.]

The students in this course must have a thorough, practical training in elementary entomology and economic entomology in order to put into practical use in field work the principles to be learned in both of these courses. He must take course I at some time during his course in forestry, which is to be followed by course II; the two, however, can be taken together if the student's time permits. The student will be directed in the special study of insects affecting the forest and will be encouraged in doing field work, in collecting, identifying, and in the life history of forest insects.

Open only to students in the forestry course.

Not given in 1903-04.

Course IV. Comparative anatomy and histology of insects. [One semester.]

A detailed study of structure of representatives of different orders of insects.

Six periods of laboratory work and one lecture. Must be preceded by course I or its equivalent.

HORTICULTURE.

Equipment. In the college course in horticulture students are expected to avail themselves of the excellent facilities afforded by the nurseries, orchards, gardens and forest garden of University farm and the collections in the museums of the University. They will also find that the vicinity offers many especially good lessons in nursery work, landscape gardening, fruit growing, vegetable gardening and greenhouse management.

Course I. Fruit growing. [One-half semester.] '04-'05.

Lectures. The study of the geography of fruit growing; outlook for fruit growing, planting, tilling and fertilizing of fruit lands; diseases and insects injurious to fruits, spraying, harvesting, and marketing varieties of vegetables.

Course II. Vegetable growing. [One-fourth semester.] '04-'05.

Lectures. Geography of vegetable growing, tilling and fertilizing vegetable lands, irrigation and rotation of crops, seed growing and seed testing, vegetables under glass, pollination, diseases and insects injurious to vegetables and their prevention, harvesting and marketing varieties of vegetables.

Course III. Green houses and their management.

[One-fourth semester.] '04-'05.

Lectures and laboratory work. Green house construction and management, temperature, soil, watering, benches, propagation by seeds, cuttings, layers and graftage, prevention of diseases and extermina-

tion of insects injurious to vegetables, rest and growth periods of plants, plants for greenhouse cultivation.

Course IV. Nursery work. [One-fourth semester.] '05-'06.

Lectures and laboratory work. Seedage, layerage, cuttage, graftage, planting, pruning, thinning, storage of nursery stock, tillage of nursery lands, insects, diseases injurious to the nurseries and their prevention.

Course V. Plant breeding. [One-fourth semester.] '05-'06.

Lectures and laboratory work. The fact and philosophy of variation; crossing of plants, origination of domestic varieties.

Course VI. Floriculture. [One-half semester.] '03-'04.

This course will include the work outlined in course III, but in addition instruction will be given in the growing of flowers in the open borders in summer, and practical work in this line will be required.

Course VII. Pomology. [One semester.] '03-'04.

Courses I, II and III together and courses IV, V and VI together each make one full semester.

VETERINARY MEDICINE AND SURGERY.

The new veterinary building gives ample facilities for laboratory and clinical work. The hospital furnishes a wide variety of cases for study and demonstration. The dissecting room affords material and opportunity for studying the digestive organs and locomotor apparatus, and museum materials are being collected.

Instruction is given by text-book, lectures, collateral reading and by practice work in the hospital. The lectures are illustrated by means of skeletons, manikins, charts and by the living animal. Anatomy of the digestive organs and the higher physiology of digestion are given prominence in this work. Theory and practice of medicine are carried further than in the school of agriculture course. Infectious diseases of domestic animals are studied with references to causes, recognition, prevention and methods of control. Certain medicines which the intelligent stockman should understand are studied with reference to uses, doses and methods of administration. The work in this department continues through two semesters.

Course I. The muscular system. [One semester.] '02-'03.

Including muscle currents results of contraction, muscle fatigue and laws of muscular work; the nervous system, including irritability of nerves, electric phenomena of nerves, reflex action, and sympathetic nervous system; physiology of the skin and nitrogen excreting apparatus; and advanced study of the veterinary physiology of digestion, taking up the digestive fluids, nervous mechanism of digestion, absorption and digestion of grains and fodders. It also includes a study of body nutrition, body income and expenditures, sources of heat supply and heat loss, and metabolism. *Veterinary Physiology*, by F. Smith, is used as a text and guide for this work in course I, but students are required to do collateral reading.

Course II. Locomotor apparatus. [One semester] '03-'04.

This course includes a study of the locomotor apparatus, including shoeing, diagnosis and treatment of common forms of lameness; diag-

nosis and treatment of common diseases ; common medicines in their doses, uses, dangers and methods of administration.

THE COURSE IN FORESTRY.

The course in forestry in the college of agriculture has been established in response to urgent calls for instruction in this subject. Forestry is really a branch of general agriculture and means the cultivation of forest crops, the same as agriculture means the cultivation of food and other crops. Its object is to produce the greatest amount of serviceable material on the soil in the shortest time. It is also a business and contemplates business methods.

EDUCATIONAL OPPORTUNITIES.

There are many and obvious reasons why instruction of this kind is especially adapted to fit in with the courses offered in a large University. It will be noted that this course offers to students not only studies which will fit them especially for forestry, but will fit them for general service. At present there is little forestry work undertaken by the state of Minnesota except that of fire protection, but the outlook seems to warrant the statement that the next few years will see much undertaken that will need the assistance and direction of properly trained foresters. Perhaps there is no situation where a forestry school has more natural advantages than here, as this state is still one of the largest lumber producing states, and the opportunities of seeing lumbering carried on in the best manner are most excellent. The establishment of the Chippewa Forest Reserve and its management by the Bureau of Forestry give opportunities which few other sections possess to study the best methods of forest management. The Minnesota Forest Reserve Board contemplates the acquisition of considerable land for forestry purposes, and its management for the production of timber crops. Opportunities are here offered to see, and in many cases to take part in the scaling and estimating of timber, and to work in lumber camps for good pay at practical lumbering operations.

In addition to these general facilities and all the opportunities offered by the University, students in the forestry course have all the privileges of the collections in the arboretum and forest garden of University farm. The state fish hatchery is nearby and furnishes students excellent opportunities to become acquainted with this important subject, on which a short course of lectures will be given.

General C. C. Andrews, the Chief Fire Warden of Minnesota, will give a course of lectures on the prevention and suppression of forest fires—in which work he has been eminently successful.

PLAN OF INSTRUCTION.

The regular course in forestry is a four years course intended to prepare men to take charge of independent forest properties, or for the government forestry service, or for positions of teachers.

The first year in this course, for those who enter other than from the Minnesota School of Agriculture, deals with the elementary agricultural subjects that it is important for every manager of rural properties to be familiar with. The forester from the very nature of his surroundings will be largely thrown on his own resources and should be capable of advising as to the best way of managing the farms or grazing lands that are almost always included in large forest properties. The sophomore year and one-half of each of the junior and senior years are devoted to the study of the basal natural sciences underlying the practice of forestry, and to such academic and engineering studies as seem especially desirable here. While French is made optional with German, it is expected that German will be taken in most cases, as it is the most helpful language for those who are to study forestry literature. An opportunity will be afforded to take Spanish, as it may be especially desirable to those who contemplate entering the Philippine forestry service. One-half of each of the senior and junior years are devoted to the study of technical forestry, an important part of which consists of field work and excursions. Every student is required before graduation to take four weeks work in some approved lumber camp, so as to become familiar with common lumbering operations.

Especial emphasis is laid on the value of field work and excursions. This consists in excursions to nearby forests; to lumber camps, saw mills, wood manufacturing and paper mills; to the Boom Company's works on the Mississippi river; to nearby nurseries, and it is expected that arrangements will be made which will afford an opportunity for students to visit some of the forests of Montana, Idaho and Washington at a very low rate. Excursions are also frequently made in connection with the study of botany, geology, zoology (and nursery practice).

OUTLINE OF COURSE IN FORESTRY.

Freshman Year.

Students entering the forestry course will be required to take the freshman year the same as other students of the college of agriculture.

SOPHOMORE YEAR.

FIRST SEMESTER.

Botany, short [4]
 Chemistry [4]
 German or French [4]

SECOND SEMESTER.

Botany, short [4]
 Surveying [4]
 German or French [4]

Agricultural physics [2]
Rhetoric [1]
Military drill [2]

Agricultural physics [2]
Rhetoric [1]
Military drill [2]

JUNIOR YEAR.

FIRST SEMESTER.

Botany, course v [4]
Forest entomology [4]
Forest influence and utility [2]
Forest by-products [2]
Forest mensuration [2]
Forest exploitation [2]

SECOND SEMESTER.

Botany, course v [4]
Law, elements of contracts [1]
Zoology [4]
Wood technology [4]
Forest valuation [2]
Forest exploitation and administration [2]

SENIOR YEAR.

FIRST SEMESTER.

Geology, I [4]
Sylviculture [4]
Forest economics [4]
Diseases of wood [4]

SECOND SEMESTER.

Geology, III and IV [4]
Political science [4]
European forestry [1]
Sylviculture [2]
Forest protection [2]
Fish culture, game protection (Lecture), [1]
Thesis, seminary in reading forestry literature [2]

Practicums in forestry. Four practicums are required in the course in forestry, viz: In forest exploitation, forest working plans, forest mensuration, nursery practice. A thesis must be presented in each of the four subjects, giving the results of personal observation.

Forest influence and utility: Influence of forests on precipitation, surface and sub-surface run-off and on springs, on frost, on winds and wind storms.

Forest mensuration and valuation: Methods of determining the volume of felled and standing trees, of whole forest growths, of timber estimating. Determining the rate of increase in single trees and forest areas, determining present and future money value of forests.

Forest exploitation. The harvesting of forest products, logging—including transportation, milling and preparation of the wood for market.

Sylviculture. (a) Sylvicultural characteristics of trees, methods of regeneration, improvement cuttings, nursery practice. (b) Characteristics of the great typical forest areas of the world.

Forest economics. History of development of modern forestry, forest conditions here and abroad, relation of the state to forests, forest policies of foreign nations.

Wood technology, and diseases of wood. Study of the characteristics

of commercial woods and their uses. Impregnation of woods, fuel value of woods.

Forest by-products. Study of the products of the forests other than for timber and fuel, including such products as tan-bark, resin, charcoal, medicinal products.

Forest entomology. (This course will be found outlined on page 193.)

European forests. Lectures on the condition in European forests.

Forest protection. Protection of the forest against trespass, fire, insects and diseases; method of preventing washing of soils.

COURSE IN HOME ECONOMICS.

Purpose and scope. The course in home economics offered in the college of agriculture is open to graduates from the school of agriculture. Preparatory technical work in household science, household arts and home administration is given in the school of agriculture, while advanced work in special subjects closely related to the home, as well as the usual culture studies, is given in the college course.

Under the stimulus of the scientific spirit of the age great advancement has been made in standards of living; the correlation and application of the sciences, the arts and the philosophy that center in the home is the end sought in a course in home economics. The family is called the great school of the race and those who keep this school—who control the conditions in the home—are confronted with problems of health, problems of physical and mental efficiency, problems of reasonable human happiness, which demand definite technical knowledge united to broad culture.

The course in home economics is intended to bring to the vocation of home making the same kind of help which the course in agriculture brings to the business of farming. Aside from the universal need of education of this character there is a marked and increasing demand for trained women to fill institutional positions, not only as special teachers in the several divisions of home economics, but also in administrative positions as competent supervisors of supplies and of hygiene where large numbers are cared for under the management of boards and trustees.

COURSE OF STUDY IN HOME ECONOMICS.

FRESHMAN YEAR.

FIRST SEMESTER.

Higher algebra [4]
 German or French [4]
 Drawing [4]
 Geology, historical [2]
 Rhetorical work [2]
 Physical training [2]

SECOND SEMESTER.

Trigonometry [2]
 German or French [4]
 Drawing [4]
 Chemistry [2]
 Rhetoric [4]
 Physical training [2]

SOPHOMORE YEAR.

FIRST SEMESTER.

Chemistry [4]
German or French [4]
Psychology, descriptive [4]
English literature, the scientific movement [4] or
Botany or zoology [4]

SECOND SEMESTER.

Chemistry [4]
German or French [4]
Logic [4]
English literature [4] or
Botany or zoology [4]

JUNIOR YEAR.

FIRST SEMESTER.

Home economics (course I) [2]
(1) Household science (course III) [4]
(1) Household arts (course I) [4]
History, English constitutional [4]
English literature, literary criticism [2]

SECOND SEMESTER.

Home economics—thesis with bibliography [2]
Household science (course I) [4]
Philosophy—æsthetics [2]
Philosophy—History—English constitutional [4]
English literature, modern English prose [4]

SENIOR YEAR.

FIRST SEMESTER.

Home economics (course II) [2]
Household science (course II) [4]
Philosophy—principles of ethics [2]
English—Shakespeare [4]
History—American biography [4]
or
English literature [4]

SECOND SEMESTER.

Home economics, thesis with bibliography [2]
Household arts (course II) [4]
Pedagogy, philosophy of education [4]
Floriculture or horticulture [2]
History—American biography [4]
or
English literature [4]

(1) In household science and household art only courses in cooking, sewing and laundering are offered at present.

When approved by the dean and college committee, other subjects given in the college of science, literature and the arts, or in the college of agriculture, may be substituted for the prescribed subjects in the course in home economics.

Women who are sufficiently advanced may study music or art during the junior or senior years, provided that no student may receive more than two semesters' credits in music and art together.

EQUIPMENT.

The Woman's Building contains convenient rooms for the students, with heat, light and water supplied under the best hygienic conditions, while attractive reception rooms give opportunity for a refined social life. The dining room is in a separate building and under competent supervision.

The class rooms and laboratories of the school of agriculture, also the equipment of the state experiment station, are available for purposes of instruction and research.

The courses in physical and biological sciences, in English language and literature and in philosophy and history, which are given in the college of literature, science and the arts, are open to students taking this course, as are also the college laboratories and the courses given in agriculture.

The class room devoted to instruction in sewing, garment drafting and the judging of textile fabrics is commodious, well lighted and furnished with the usual accessories, including collection of vegetable and animal fibres showing the successive stages in manufacture from the raw material to the finished fabric. The school museum of birds of Minnesota is utilized in the study of color and its combinations.

The rooms for instruction in cooking, dining room service and laundering, contain the necessary appliances for manual practice and for demonstration lectures. Specimens of manufactured foods, samples of cooking, and laundering utensils and materials and of dining-room and kitchen furniture, are provided. The facilities of the city markets give practice in marketing. The proximity of Minneapolis and St. Paul, in which are found large flour mills, manufactories of cereal foods, canning and pickling factories, and other establishments which prepare food stuffs, make it possible for the classes to visit many places where facts of value are learned. The large public dining-rooms with their kitchens, and the commercial laundries also offer opportunities for gaining valuable practical knowledge in these branches of household science.

The library of the college of agriculture contains a carefully selected collection of books relating to the subject of home economics.

COURSES OF INSTRUCTION.

CHEMISTRY.

Two and one-half semesters of chemistry are required in the freshman and sophomore years. This work is taken along with the classes in the course in agriculture, and includes courses I and II, outlined on page . Should the student desire, special facilities are offered for advanced elective work in the Chemistry of Foods, course IV, and the analysis of foods, course VI. Nutrition investigations, including the digestibility of foods, the chemical changes which take place in cooking, and the losses in the preparation of foods form a part of the Experiment Station work; this offers an opportunity for students to study methods of investigation relating to human food problems. Laboratory practice is also offered to advanced students in the study of household problems in which chemistry is involved.

ENGLISH LANGUAGE AND LITERATURE.

The courses in English language and literature are taken in the college of science, literature and the arts.

The scientific movement. (a) This course will take up the study of Darwin, Tyndall, Huxley, Spencer and other well known scientists, from a literary point of view. (b). Influence in the English literature of the nineteenth century.

Literary criticism. A study of development of method and view in the critical appreciation of literature.

Modern English prose. A study of the present literary vernacular in its best examples.

HOME ECONOMICS.

The lectures are intended to give breadth, strength and thoroughness to the concept of home.

Course I. The evolution of the family. Lectures twice a week during the first semester of the junior year. The evolution of the family from primitive conditions, the family as a social and economic institution, the relation of the home to civic life.

Course II. Home administration. Lectures twice a week during the first semester of the senior year. The organization of a home, generic lines of expenditure; domestic service, disposal of waste, the home as a place and an opportunity for the right development of the physical and spiritual natures.

Theses. The theses required in the junior and senior years are upon some one special branch of home economics—distribution of income, home sanitation, hygienic furnishing, household fabrics, food, et cetera, and are intended to familiarize the student with the best sources of information upon the subject; a bibliography of the subject treated is required.

HOUSEHOLD ARTS.

The instruction offered embraces courses in sewing, judging of textiles and harmony of color as related to dress, and is a continuation of the work given in the school of agriculture.

Course I. A study of textiles, animal and vegetable fibres, weaves and dyes, testing fabrics for household use and personal wear, the hygienic values of various fabrics, harmony of color, and the drafting of garments.

Course II. Designed especially to assist the teaching of sewing in graded schools. The preparation, explanation and making of models suited to grade work in the public schools.

HOUSEHOLD SCIENCE.

The work for collegiate classes is a continuation of the instruction given in the school of agriculture, but goes more into detail than in the school course. While the home needs are first considered, attention is given to the supply and preparation of food in public institutions, boarding houses, restaurants and hotels; and the laundry.

Course I. Food economics. [One semester.]

(1). Selection of food materials, marketing, buying by sample, cost and value, quality as to freshness, flavor. (2) Storage and care of foods, care of cupboards, cellars, refrigerators. (3) Selection and preparation of foods for large numbers: equipment of large kitchens, serving rooms and dining rooms. (4) Kitchen laboratories, arrangements, equipment and methods of directing practice work in cooking.

Preparation of foods: (1) Meat products, as beef tea, beef powder and beef extracts; (2) cereal products and materials made from flours and meals, methods of aerating dough, leavening agents; (3) beverages, as cocoa and koumiss; (4) condiments and spices; (5) confections, as candies and sweetmeats; (6) sweets, as sugars and syrups; (7) commercial bakery products, as breads, biscuits, crackers and pies; (8) preserving by drying, canning, refrigerating: and with preservatives, salts, sugars, sprits, fats and acids.

Course II. Management of kitchen and dining room. [One semester.]

(1). The kitchen of equipment; (2) kitchen marketing; (3) foods from the kitchen garden; (4) care of the kitchen; (5) disposition and utilization of kitchen wastes. The dining room: (1) equipment, furniture, decorations, china, silver, glassware, linens; (2) management, setting the table, garnishing and table decorations; (3) table service, duties of the host and hostess, carving and serving, reception, refreshments.

Household inventories, bills of fare and dietaries, in rural homes, in urban homes, in public institutions, in boarding houses, in restaurants and hotels.

Fancy cookery, meat dishes, vegetable dishes, fruit dishes, pastries, ices, candies, sweetmeats, chafing dish cookery.

Course III. Laundering. [One-half semester.]

Removing stains, dyeing, setting colors, cleaning delicate fabrics, as silks, laces and fine wools, the use of cleaning agents, soaps, volatile oils and other chemicals, starches and blueing.

Commercial laundering and cleaning, power washing and ironing machinery, drying apparatus, gathering, distributing, accounts.

Practicums. Students in the college course are given opportunities to gain practical experience in cooking, laundering, and instruction. This division has charge of the large dining hall, where students may gain experience in supplying food to large numbers, to invalids, and in preparing meals for large delegations, putting up lunches, etc. Practice work is provided in preparing refreshments and dinners, also normal practice, for collegiate students who may sometimes help give instruction to the large classes of girls in the school of agriculture.

HISTORY.

The courses in history are taken at the University in the college of science, literature and the arts.

English constitutional history. The course begins with about six weeks of introductory work on the history of western Europe from the barbarian invasions to the treaty of Verdun. The remainder of the year is devoted to a study of English constitutional history from the Anglo-Saxon conquest to the accession of the House of Hanover. Continental history will be touched upon at various points where its connection with English history makes it necessary.

Studies in American biography. In this course the work will each year center about the political activity of a single important character. In the choice of a subject two points will be especially borne in mind.

1. To select a character not only important per se but representative of some great historical movement or idea.

2. To select one who has left an abundance of material, valuable not only for his own part but throwing light upon the action of others.

PHILOSOPHY.

The courses in Philosophy are taken in the college of science, literature and the arts.

Descriptive psychology. This course is intended to serve as a general course in psychology. The work consists of the study of a text supplemented by lectures and demonstrations and by the preparation of papers on some psychological topic.

Logic. A study of the nature of knowledge and the principles of formal logic. Jevons' lessons in Logic will be used supplemented by lectures and exercises.

Principles of ethics. An introductory course, comprising a study of the distinction between moral and non-moral phenomena, an analysis of voluntary conduct, and a discussion of the nature of conscience, the meaning of right and wrong, the purpose of life, human responsibility, and the authority of moral law.

Aesthetics. A study of the nature and principles of beauty, and a discussion of the place and function of art in life.

The philosophy of education. The purpose of this course will be to define the purpose of education and the principles which govern in preparing the mind and character of youth for the duties of life. It will include topics, as the following: The influence of physical development upon the mental and the recognition of these facts in education. The order of mind development, and the bearing this has upon matter and method in teaching. The recitation, its purpose and the principles that govern in conducting it.

COMMITTEES, SCHOOL OF AGRICULTURE

Library: Tucker, Reynolds, Snyder, Hays, Vye, McIntyre.

School of Agriculture:

Examinations and Registrations: Robertson, Drew, Wheeler, Meredith, Mahood, Keyes.

Catalogue: Vye, Robertson, Snyder.

Absence and Tardiness: Tucker, Mahood, Wheeler.

Military Drill: Cole, Green, Haecker.

Entertainment: Robertson, Meredith, Comfort.

Program: Andrew Boss, Wheeler, Drew.

Health: Reynolds, Tucker, Meredith, Washburn.

Dairy School: Haecker, Wm. Boss, Hays.

Short Course for Farmers: Drew, Shaw, Green.

Outside Dormitories: Tucker, Robertson, Snyder.

Culinary Department: Shepperd, Vye.

CLASSIFICATION OF STUDENTS.

No student with incomplete C or preparatory work will be classified as an A.

No student with incomplete preparatory work will be classified as a B.

No student with incomplete C or preparatory work will be made a commissioned military officer.

STUDENTS IN DORMITORIES.

The Principal of the School of Agriculture has charge of the boys in their dormitory and social life, and the Preceptress has charge of the girls in their dormitory and social life.

The School of Agriculture

FACULTY.

- CYRUS NORTHROP, LL. D., *President.*
WILLIAM M. LIGGETT, *Dean.*
FREDERICK D. TUCKER, B. A., *Principal, Mathematics, General History, Economics.*

LEROY R. CADY, *Horticulture.*
MARY S. MCINTYRE, B. S., *Librarian.*

When applying for admission or information address Frederick D. Tucker, Principal, St. Anthony Park, Minn.

OPENING.

The school year opens October 5, 1903, and closes March 23, 1904. The fall term closes Thursday, December 24th, and the winter term begins Saturday, Jan. 2, giving a vacation of eight days. Owing to the shortness of the school year students are expected to be on hand the first day of the term, that registration may be completed and work begun promptly. Students registered in the fall term will not be received after the first two days of the winter term, unless they present a reasonable excuse for such delay.

THE SCHOOL OF AGRICULTURE—ITS PURPOSE.

It is the aim of the school of agriculture to train its students to become useful citizens as well as good farmers and housewives.

The home life of the students at University farm is supervised by members of the faculty, and it is the aim to provide such interests outside the regular school work, as will assist in rounding out the characters of the young men and women. Literary societies afford opportunities for experience in writing, public speaking and debate. The faculty assist at the receptions and social gatherings which provide social pleasures and experience. In the work of the Young Men's Christian Association and the Young Women's Christian Association there are opportunities for training in co-operative religious activity. Student and alumni clubs and organizations, and a progressive periodical, "The Farm Students' Review," published by the alumni, aid in teaching the students how to work for the betterment of agricultural conditions.

The school of agriculture offers a practical course of study designed to fit young men and young women for successful farm life, and it serves as a preparatory school for the college of agriculture.

For the young people who cannot pursue the full college course the school supplies a training in the general branches, supplementary to the grammar school work, and a thorough course in the leading branches of agricultural knowledge, put in practical form, by means of the constant application of lessons in the field, laboratory, or workshop. The methods employed are always practical. The teaching is so conducted as to educate the students toward the farm, and to develop in them a love for farm life, by showing them the possibilities of such a life. The school has been successful in this respect, and over eighty per cent of its graduates take up agricultural occupations upon leaving the school.

The details of this work, the division of the time for the various subjects, and the range of work required of the students, will be found outlined in the following pages.

Through the endowments and appropriations, of state and national government, the school is maintained without tuition charge, and the coopera-

tive arrangements are so conducted that the students are able to secure excellent board at low rates.

The young men and women of the state, who desire to become farm home-makers, are cordially invited to enter the course at the school of agriculture. They are urged to come with suitable preparation—that is, the complete mastery of the common school branches; previous farm experience; and to come with the intention to do earnest and conscientious work.

HOW TO GET TO THE SCHOOL.

Check all baggage to Minneapolis.

Monday and Tuesday, October 5th and 6th, members of the Y. M. C. A., wearing lettered badges, will be at the Union Station in St. Paul, and at the Union, Milwaukee, Soo and St. Louis Stations in Minneapolis, to meet and direct new students. Take the Como Harriet car from either St. Paul or Minneapolis and get off at Commonwealth avenue. A nominal charge is made for transporting trunks at the opening of the school. No charge is made for the return of the baggage, at the close of school, provided it is ready to go on the days assigned.

ADMISSION FROM COUNTRY SCHOOLS.

Applicants for admission will be examined in English grammar, arithmetic, history of the United States, and geography, unless they present state certificates showing that they have completed the eighth grade work in these subjects. Students from city or village schools will not be admitted unless, in addition to the above requirements, they present certificates from the principals of such schools showing completion of eighth-grade work and honorable standing in deportment. Applicants, whose home schools do not afford complete instruction in these common branches, may be admitted with not more than two conditions, which must be removed, according to instructions given the student upon admission. State High School Board certificates are accepted for work in English, physiology, algebra, geometry and civics.

Students applying for admission, after the opening of the term, will, in addition to the regular entrance examinations, be required to show proficiency in the work done by the class up to the time of their application. Those who cannot enter by the first of November should wait until the beginning of the winter term.

EXPENSES.

The school expense for the year does not exceed \$90. This amount does not include the cost of the required military suit for boys, traveling or personal expenses.

The cost to the student for board, heat, light and washing is the actual cost of maintaining the table and caring for the house. This does not exceed \$3.15 per week. An assessment of \$12 is made in advance. At the end

of each month the exact cost of board is calculated and an assessment made. At the final settlement, the \$12 deposited by the student when he first entered the school, is credited on his board account. The culinary department is managed by an experienced matron, and all the buildings are under the supervision of the dean. The buildings are all lighted with electric lights and warmed by steam. The sleeping rooms are each furnished with a bedstead, mattress, dressing bureau, chair and table.

No deductions in charges are made for absence of less than four days. If students are compelled to be absent for that length of time they will be allowed half rates if they arrange with the matron before leaving.

Text-books are furnished, at a term rental of \$1, to students who do not desire to purchase.

FEES.

Each student is required to pay an incidental fee of \$1.50 per term, and also to pay for breakage of apparatus used in practical work.

A competent nurse is kept on the ground to care for the sick. To meet this expense each student is charged a fee of 50 cents per term.

In addition to the assessment of \$12 for board, a deposit of \$5 is required of each student, as a guaranty for the return of all books and other articles borrowed.

On entering school the student must make a payment of \$20; \$12 on board, \$5 on deposit, \$1 on book rent, \$1.50 fee and hospital fee 50 cents. If books are purchased, no rental is charged.

All male students are required to provide themselves with the prescribed uniform, which consists of navy blue blouse, trousers and cap, and is as neat and economical a dress as the student can obtain. The suit complete, to measure, will be furnished under special contract for \$10.60.

Each student is to provide four sheets, one pair of blankets, one quilt, one bed spread, one pillow, three pillow cases, towels, napkins, comb and brush.

An assignment of rooms will be made at 9 a. m., March 22, which will hold good until 8 p. m. the first day of the following year. Students wishing to retain their rooms, after vacation, must be on hand when the second term opens, or pay one-half the price of board and room for the time they are late. Students arriving after the dormitories are filled will be compelled to find rooms elsewhere, but will be allowed a rebate of \$3 per month.

REQUIREMENTS FOR GRADUATION.

First—The completion of the prescribed course of study with an honorable standing in deportment.

Second—An essay of not less than one thousand words upon a topic connected with agriculture or home economics.

Third—For young men, a practical experience in field work at the

University farm or elsewhere, as shall appear in reports received from responsible sources.

Three dollars are charged for the diploma.

STUDENTS' DEBATING SOCIETIES.

Societies for the purpose of improvement in elocution and debate, and for obtaining instruction in the form of lectures, give excellent opportunities for entertainment and culture.

LECTURE COURSE.

During the school year, a lecture and entertainment course, consisting of six lectures and concerts, is given in the chapel at a cost of seventy-five cents for the series. These entertainments are strictly high grade, and furnish a pleasant relaxation from school work, as well as mental stimulus.

The following program, which was provided during the past year, shows the general character of the entertainments: Lou J. Beauchamp, "Take the Sunny Side;" Gavin Spence and Flora MacDonald, "Twa Hours at Hame;" Parker Concert Company, instrumental and vocal concert; Frank G. Smith, "The Man for Our Times;" Sterling Opera and Concert Company, opera and concert; Alexander McGregor, "Mishaps of a Scotchman;" G. Paul Smith and Willard Gorton, "Protean Entertainment." Captain Richmond Pearson Hobson, the hero of the Merrimac, lectured on "The Navy and the Nation;" for this lecture an extra charge was made.

STUDENTS' CHRISTIAN ASSOCIATIONS.

The Young Men's and Young Women's Christian Associations have for their objects, social fellowship and moral and spiritual development. To this end two receptions are held each year, and each week Bible classes, a general religious service and mid-week prayer meetings are carried on. The associations are non-sectarian, so that all students may find in them an opportunity for Christian activity and mutual helpfulness.

ATHLETIC ASSOCIATION.

The students have a well-organized athletic association and a well-equipped gymnasium. A competent instructor is in charge each evening. An opportunity is thus given for a healthful amusement and for needed physical exercise.

Figures in brackets indicate the number of hours per week in which the subject is pursued. All work in subjects marked thus extend through double time in the daily program.

†Three periods.

**Work outside of class not required.

ASSEMBLY.

On each school day at 11:40 a. m. the students assemble in the chapel. After the opening exercises brief talks are given by the principal, members of the faculty, or invited guests.

Members of the graduating class will, at this period, discuss the best books in literature, and articles on public questions, which appear in the leading magazines.

This plan gives to the students, in the course of the year, many things which will fit them to meet the demands of citizenship in the rural communities.

The School of Agriculture.

COURSES OF INSTRUCTION.

AGRICULTURAL BOTANY.

This subject is taught with special reference to its bearing upon the every day problems that present themselves to the farmer and gardener. It is profusely illustrated with flowers and plants from the greenhouse and nursery. Some instruction is given in the use of the compound microscope. Students are thus enabled to study intelligently, in an elementary way, the tissues of plants. By this means they get a clear idea of the general principles of plant structure and vegetable physiology.

AGRICULTURAL CHEMISTRY.

In agricultural chemistry one term is given to the study of the elements and compounds which are of most importance in agriculture. This work is planned to prepare the student for intelligent study of the subject of the chemistry of foods, soils and fertilizers, and at the same time to familiarize him with the more important chemical changes which take place in every day life. Laboratory practice forms a prominent feature of the work in agricultural chemistry. In the chemistry of foods, the composition of plant and animal bodies, the chemistry of the plant and of its food and growth, the chemistry of animal nutrition, digestibility and value of foods, and the laws governing the economic uses of foods, are some of the subjects considered. The composition and the utilization of farm crops for food purposes, and the application of the principles of chemistry to plant and animal life form the basis of this work.

AGRICULTURAL PHYSICS.

The general principles of the science are taught, special stress being laid upon those which to the greatest extent enter into the business of the farmer. About half the time is devoted to experimental work, which includes capillarity of soil; diffusion and osmosis of gases and liquids; heating, lighting, and ventilation; farm machinery in particular, pumps, eveners—especially three and four horse, pulleys, milk-testers, centrifugals, incubators, wind-mills, steam and gasoline engines; friction and lubricants; tensile strength of wire and binding twine of different grades; lightning and lightning protection. The foregoing indicates the character of the work, the attempt being to give the student an acquaintance with the laws of nature that he may act with reason and work to advantage.

AGRICULTURE.

Soils; selecting and planning farms; subduing the fields; drainage; irrigation; fences; roads; buildings; water supply; groves; farm life and the relations of general science in agriculture.

Farm management: Remodeling farm plans; rotation of crops; manuring; production and management of farm manures, green manure crops, and the place of commercial fertilizers in field management in various parts of the state; farm administration, management of fields in relation to fertility, to weeds, to yields, to live stock and to profits. Keeping weeds down by helpful crop rotations, careful field work, and good methods of farming generally; study of botany and habits of the various species of harmful weeds; methods of destroying each class of weeds.

ALGEBRA.

Algebra is required during the first term of the second year. This work covers Wells' New Higher Algebra to highest common factor. Special attention is given to literal notation, negative numbers, the equation and factoring.

BLACKSMITHING.

The students are instructed in the management of the forge and fire, and in bending, shaping and welding iron and steel. They are required to make links, rings, hooks, bolts, clevises, whiffletree-irons, tongs, cold-chisels, punches; in short, to become familiar with all the operations necessary to enable them to do their own repair work when they return to the farm. Particular attention is given to rapid and accurate welding and to the shaping and tempering of steel tools. The forges used are such as any farmer can make for himself, and each student is taught to make his own tools, so that he will be able to furnish his shop with very little outlay.

BREEDS OF HORSES.

The aim in teaching this subject is to familiarize the students with the types of horses best representing the breeds adapted to the conditions that obtain in the state. Score cards are used, and standards of excellence made for comparative work.

BREEDING.

Students receive instruction in the principles that govern breeding; on the influences that affect heredity and in the care and management of breeding stock. Pedigree receives careful consideration, and each student is required to make out pedigrees of two or more pure bred animals. They are also required to become familiar with methods of keeping live stock records of all kinds.

CIVICS.

During the last term of the course students receive instruction in this science, and graduate with a good understanding of the origin, necessity, nature and various forms of government, and the machinery employed to carry on public works, establish justice and provide for the common defense; of the organization and management of local institutions, the town, the village, the city, and the county; the manner in which states are created and the affairs administered; the three departments—legislative, judicial and executive—and the functions of each; the interdependence of the state and its citizens, as well as the powers and obligations of each, by due attention to which the state may be strengthened and the condition of its citizens ameliorated.

The relation of the state to the general government; the constitution, and the powers it confers; and the provisions for amendments, are taught. The more important principles of commercial law, including contracts, agency, partnership, corporations, and commercial paper, receive attention. Instruction is also given in the United States method of surveying public lands.

COMPARATIVE PHYSIOLOGY.

During the first year students take one term of applied physiology. This is an effort to connect technical physiology with the necessities of every day life. The work includes a study of the general plan and structure of the body and the various individual tissues of which it is composed; also sources of heat and energy, digestion, and the relation of food materials to the various tissues of the body. Considerable attention is given to diseased and innutritious foods, food adulterations and narcotics. The circulation is studied with especial reference to the relation of the blood and lymph to tissue nutrition and tissue waste.

Accidents, including poisoning, are studied for the purpose of giving a practical knowledge of what to do in emergencies. Considerable attention is given to the subject of clothing, the various materials in use being considered with refer-

ence to fitness for special purposes. Some time is also given to the study of common physiology, of the organs of circulation, digestion, respiration, nervous system, and the relations of bacteria to the common diseases, especially such diseases as consumption, typhoid fever, etc. A brief study is also given to the subject of digestion in the lower animals.

The class work is illustrated by means of large charts, skeletons, manikins, and dissections. Important points of difference between human and animal physiology are pointed out in preparation for the third year's work in the veterinary class. Matters of home and personal hygiene are interwoven with the physiology work.

COOKING.

The course in cooking extends through five terms of the curriculum as given below, with the subjects covered in each term:

(C) Second term—Kitchen management; care of cooking utensils and silver-ware; measuring and invoicing; cooking vegetables, cereals and breads.

(B) First term—Cooking meats, preserving fruits and vegetables.

(B) Second term—Eggs, beverages, soups, salads and table service.

(A) First term—Marketing and care of foods: dairy dishes, made over dishes, invalid cooking.

(A) Second term—Desserts, food rations, dietaries, confections, bills of fare and dining room.

DAIRY CHEMISTRY.

The chemical and allied changes which take place in the handling of milk and its manufacture into butter and cheese, and the application of these principles to the production of milk and its products form the basis of this work.

DAIRY HUSBANDRY.

Farm dairy lectures.—A course of lectures is given in farm dairying, giving instruction in the care of milk and utensils, explaining the principles involved in creaming milk by the gravity and centrifugal processes and giving full instruction in regard to running farm separators and the manufacture of butter and cheese in the farm dairy.

Dairy practice.—Students receive practical training in the most advanced methods of creaming milk, ripening cream, churning, working and packing butter, the manufacture of sweet curd cheese, and measuring the value of milk by the Babcock test and lactometer. This practice work begins the third week of the first term and continues through the school year.

Dairy stock.—During the last half of the first term students receive instruction in regard to characteristics of the various breeds of dairy cattle, their origin and comparative adaptability for the dairy. Lectures are given upon the points desirable in animals intended for the dairy. The students have practice work in judging dairy stock.

Feeding.—During the second term lectures are given covering both the scientific and practical phases underlying the principles of feeding. Practice work is given in compounding rations and estimating the comparative value of food stuffs.

DOMESTIC CHEMISTRY.

The combination of human foods to form balanced rations, dietary studies of families, cost and value of foods, losses in the cooking and preparation of foods,

cereal food products, animal food products, adulteration of foods and their detection, fuels, soaps, dye stuffs and colors, composition of common household utensils, the household water supply, preparation of home made baking powders, bakers' chemicals, composition, food value and characteristics of tea, coffee, chocolate, cocoa, molasses, honey, vinegar and spices, the grading and testing of wheat flour and the chemistry of bread making, form the essential parts of this work.

DOMESTIC HYGIENE.

Several lectures by a physician will be given upon maidenhood, maternity and infancy. These special lectures will be supplemented by the regular lectures which consider the health of the family as dependent upon pure food, pure water, personal cleanliness and proper habits as well as upon heredity. The aim is to impress the truth that a knowledge of and obedience to the laws of hygiene are essential to the preservation as well as the restoration of health.

DRAWING.

The student is taught the practical value of drawing for the purpose of designing and arranging buildings, machinery, etc. He makes drawings of the shop exercises, then works from his own drawings, thereby learning the application.

Designs are made for dwellings, barns, outbuildings, and machinery. As practical subjects for their designs students are requested to bring from home data for plans of buildings needed on their farms. Estimates are made of the amount of material required and cost of construction.

DRESSING AND CURING MEATS.

The instruction given the boys consists of demonstration lectures on the preparation of meat for farm use. They are required in addition to take two weeks' practice in dressing, cutting and curing such meat as is likely to be used on the farm. Work is also given them in selecting and judging fat stock, and in judging dressed meats.

ENGLISH.

(C) The first year's work in English consists of almost daily practice in the simpler forms of composition and the study of the more important grammatical relations. Applicants for admission to the C class should be familiar with the inflections of nouns, pronouns and verbs, the definitions and classifications of phrases and clauses and the common case constructions.

(B) Once a month throughout the school year the members of the B class will prepare essays of about a thousand words, and submit them for criticism.

(A) A series of literary programs will be presented in chapel by the members of the graduating class. The numbers will include abstracts of leading magazine articles, biographical sketches, book reviews and selections from fiction; special prominence will be given to authors depicting American life.

ENTOMOLOGY AND ZOOLOGY.

The class in entomology receives instruction of a practical nature. The course is divided as follows:

Classification of insects; habits and life histories of injurious forms with special attention to insect pests found in Minnesota. The nature of different in-

secticides and methods of application are discussed. The student spends some time in becoming acquainted with the appearance and habits of beneficial insects.

FARM ACCOUNTS.

The work in accounts is applied to the transactions which the student meets in the various duties on the farm. He is taught to keep his accounts, that he may know at any time the profit or loss of any department of his business, and is thus enabled to plan intelligently.

FARM ARITHMETIC.

Instruction in this subject consists of the application of its principles to all kinds of farm problems, where measurements of material, extension, capacity, etc., are required. The student is prepared also to handle with ease the mathematics of the technical courses in the school.

FEEDING.

The principles of feeding as applied to the production of horses, beef cattle, sheep and swine are taught. Special attention is given to the choice and preparation of food for animals during different periods of growth and during the time they are used for breeding purposes and to summer feeding and pasturage. Practice is given in compounding rations that will include in the best manner the food stuffs commonly produced on the farm. Practical lessons in feeding are given at the barns under the supervision of an experienced feeder. Each student thus learns the requirements of each class of stock.

FIELD AGRICULTURE.

Selected portions of agriculture and field crops for girls.

FIELD CROPS.

Place in the rotation; preparation of the land; planting; cultivating; harvesting; storing and marketing of grains, field roots, fiber crops, sugar crops, grasses, clovers and other forage crops; planting, care and use of pastures and meadows.

Laws of heredity and variation; possibility of increasing values; improvement and formation of varieties; general facts as to methods of breeding; specific plans of breeding leading field crops.

FORESTRY.

Includes the consideration of the formation and care of wind breaks and shelter belts; the laying out and planting of home grounds; discussion of the hardiness, habits and value of our native and introduced trees; and the methods of propagating them.

FRUIT GROWING.

Fruit growing is taught with reference to raising fruit for market and in the home garden.

GEOMETRY.

Geometry is offered in the second term of the third year, as an elective in place of civics to those who wish to prepare for a college course. This work covers the first two books of Wells' *Essentials of Plane Geometry*.

GYMNASIUM WORK.

The gymnasium is a large, well lighted, two story brick building. It is well supplied with light and heavy apparatus for general gymnastic and athletic exercises, together with such appliances as are necessary for the development of a symmetrical body. Besides being fitted up with the finest apparatus, it possesses space and equipment for sprinting, pole-vaulting, hurdling, high and broad jumping, shot putting, etc.

Class work in physical training is required of all undergraduate young men, not excused on account of physical disability. Courses are offered on the heavy apparatus, in corrective work, class drills, and athletic training. In addition to the regular class drill, a certain part of which consists of training in athletic sports, the school is represented by a strong basket ball team, a track athletic team, hand ball team, and an indoor tennis team.

HANDLING GRAINS AND MACHINERY.

Practical suggestions for the best methods of harvesting, shocking, stacking and storing of cereal grains. Machinery, adaptation of the various kinds, with reference to the soil, weeds, season, etc.; adjustment with especial reference to durability, convenience in manipulation, etc.

HOME ECONOMY.

The lectures are a study not only of the just proportion between expenditure and income, but of definite proportion in the expenditures made for existence, comfort, culture and philanthropy. A study is made of the sources of income, especially of the income from the farm in the form of house, food and luxuries; the purchase of clothing, household stores and furnishings is considered from the standpoint of the suitable. The relation of cash and credit to cost is also considered. Attention is given to savings and form of investment, a bank account and the use of a check book. Students are required to submit an account setting forth in detail the use of a certain named income expended in the support of a family for one year, embracing not only every item of necessary home expense, but also an outlay made for travel, luxuries, accident, sickness, or other emergencies. The habit of keeping a household account is calculated to strengthen the judgment in the wise use of money.

HOME MANAGEMENT.

The subject includes both housekeeping and home-making, and the instruction is based on the belief that housekeeping is a business as important as it is difficult, and that home-making is the noblest form of human endeavor. The care of the house and household belongings, of the food and the clothing, as well as the ordering of family life are considered in their relation to an adequate plan for home management. To start the student in the right way of becoming mistress of the business of housekeeping and home-making is the end sought. The practical benefit to be derived from the knowledge students gain in the cookery, sewing, dairy, laundry and other classes, is emphasized and shown in its relation to an adequate plan for the daily program for the home.

HOUSEHOLD ART.

Lectures upon house and grounds, noting the distinctive character of the country home; the sanitary conditions involved in the selection of the site of the house; also the influence of the outlook; an elementary study of architecture in connection with planning a house which will provide "a place for everything" required in housekeeping operations and family life; instruction in the fundamental value of color, form and design in embodying beauty; training

the taste and emphasizing the laws of hygiene that should influence the selection of materials and styles in the finishings and the furnishings of the house.

MEATS.

The instruction given to the girls in the subject of meats pertains to the selection and value of different classes of meat, and to the best methods of curing and preserving.

LAUNDERING.

In the first term of C year several lectures are given and practice work is provided in washing, ironing, starching, polishing, cleaning and pressing clothing.

LIBRARY.

The agricultural library now contains six thousand books and about six thousand pamphlets, including reports and bulletins. Aside from the large number of pamphlets and other publications of the different agricultural institutions and societies, a large number of the most important technical and agricultural magazines are kept on file, bringing together all the agricultural literature of any importance.

The librarian of the United States Department of Agriculture having inaugurated a system of co-operation with agricultural college and experiment station libraries, sent an assistant librarian who spent two months reorganizing the agricultural library. Students and teachers can now readily find literature desired, in so far as it is collected in the library, and the thanks of the department are due to the Secretary of Agriculture for the valuable aid given. Further co-operation with the Department of Agriculture and the Congressional Library is being arranged.

MILITARY DRILL.

All male students of B and C classes, not physically unfit, are required to attend military drill. The students form an infantry battalion of three companies and band. Students are instructed practically in the schools of the soldier and company, extended order and military calisthenics, and theoretically in the schools of the soldier and company. Officers are selected from class A, non-commissioned officers from class B.

MUSIC.

Instruction is given in this subject, not with the purpose of making trained musicians, but to introduce the students to the elementary principles of this art, and to develop in them a love for this most valuable factor in home and social life.

Illustrated lectures, in which music by the masters is used, are given at stated intervals.

PENMANSHIP.

In penmanship the student is taught to write a plain hand with rapidity and ease. Daily drills are given using a free forearm movement.

PHYSICAL TRAINING.

The work done in this department aims at symmetry, co-ordination and control rather than mere physical strength. It is planned to improve the func-

tional activity of the body and to counteract and correct tendencies to incorrect development, especially those resulting from the artificial life civilization. The work of the beginning class is free hand, based upon Swedish principles, and directed especially to deep breathing, correct carriage and posture. The work of the advanced class includes light apparatus and aesthetic movements for suppleness in action and grace. Vigorous games are given to both classes.

PLANT PROPAGATION.

In this subject the principles underlying the development of cultivated varieties of plants and seed testing are taught; also the propagation of plants by seed, cuttings, grafting, and budding. The work of the class room is illustrated by the orchards, nurseries, forest plantations, gardens and greenhouses on the grounds of the experiment station and by visits to commercial nurseries and greenhouses near by.

POULTRY.

The instruction in this subject will include the following topics: History and characteristics of the leading breeds of poultry; breeding, feeding and management of fowls for eggs and for the market; planning, building and arrangement of poultry houses; managing incubators and brooders. A model poultry house, containing pens of the most improved breeds, incubator cellar, work-room, etc., has been provided, where experimental work and practical instruction are carried on.

SEWING.

The course in sewing consists of five terms' work. During the first term the student receives instruction in the elements of sewing, including different stitches, seams, hems, darning, etc., also practical talks on the use and care of all the implements belonging to the sewing basket. The second year's work consists of cutting and making plain garments, drafting of underwear, children's clothing, shirt waists and cotton dresses, taught by a very simple method, using only the tape line and square.

The third year the more difficult work of dressmaking is taken up: drafting patterns, cutting and fitting of dresses. Lectures are given on textiles, wearing and selection of materials. The study of harmony of color is given special attention. The course is designed to make each graduate capable of doing all kinds of sewing required in the home.

SOCIAL CULTURE.

A course of lectures is given on the usages of society, including manners, behavior, the voice, conversation, forms of address, invitations, etc. Suggestions are made in reference to reading, literary taste and the choice of books. Especial stress is given to the thought that the family life ought to be the highest expression of good society, and that next to the power of thinking correctly is the power of approaching others with ease and speaking with tactful directness.

SOILS AND FERTILIZERS.

The composition of soils, and their properties, the sources of plant food, the kinds and amounts of food required by crops and the best ways of supplying these demands, the various forms in which plant food exists in the soil, farm manures, their uses and action upon the soil, the income and outgo of fertility from the farm, soil exhaustion and soil improvement, the rotation of crops, as

based upon the chemistry of soils and the principles governing the conservation of the fertility of the soil form the more important features of this subject.

STOCK JUDGING.

Score cards are used to an extent sufficient to familiarize students with that method of judging, and special efforts are made to do systematic and closely critical work in the selection of animals representative of the breeds and for breeding purposes. Living specimens are used and rings will be made up for the student contests in stock judging. In connection with the work in dressing and curing meats, the judgment passed on live animals for the block is verified by score cards, judgment of the dressed carcasses and by actual block tests. These tests are made by the students and bring out the percentage of meat in each commercial cut of the carcass. The quality of meat is passed upon in this connection by experts, and a careful report made to ascertain the type of animals best calculated for the production of the most meat of the best quality.

STUDY OF BREEDS.

This work covers a discussion of characteristics of the leading pedigreed breeds of beef cattle, sheep and swine adapted to northwestern conditions; the environments to which each breed is especially suited; and practice in the selection of animals that are representative of the various breeds.

VEGETABLE GARDENING.

Vegetable gardening embraces the study of garden tillage, irrigation, and rotation of crops; transplanting; formation and care of hotbeds; study of garden insects; and the growth of various vegetable crops.

VETERINARY SCIENCE.

During the A year the student takes up a course of study in veterinary medicine, the purpose of which is to fit him for intelligent care of his farm stock. In this course the teaching is done by means of lectures, distribution of mimeographed lecture notes after each lecture, reviews and clinical work at the hospital maintained for this purpose. Lectures are illustrated by means of charts, manikin of horse, skeleton of horse, and various other appliances.

The lectures consist of a series on each of the following subjects: Elementary anatomy; elementary pathology; cause and prevention of diseases; diagnosis and treatment of common diseases, examination for soundness; and a final short course on common medicines, studying their effects, uses and doses. At the hospital clinics students are enabled to examine and care for a variety of cases and to learn the elements of diagnosis for the more common diseases and forms of lameness.

STUDENTS' TRUST FUND.

The class of 1902 left with the school a fund of \$100 "to assist by temporary loans at a reasonable rate of interest, deserving students needing such help, who are not below the B class in the school of agriculture." This fund is in charge of a committee, consisting of the secretary, the principal, the preceptress of the ladies of the school, and the president of the A class.

THE LUDDEN TRUST.

The Honorable John D. Ludden, of St. Paul, gave the University of Minnesota \$5,000 to be held, invested and re-invested by the University,

through its Board of Regents, and the income thereof to be collected, received and applied by said Board of Regents to the financial assistance of students of either sex in the school of agriculture. Mr. Ludden delivered into the hands of the regents for the principal sum one Northern Pacific registered prior lien railway land grant gold bond of the denomination of \$5,000, payable to the University of Minnesota and its assigns in gold coin, on the first day of January, 1997, with interest at 4 per cent per annum, payable quarter-yearly in like gold coin, the fund to remain so invested until the bond matures, unless by reason of changed conditions a re-investment shall be sooner deemed judicious by the Board of Regents for the safety, conservation or continued productiveness of the fund. The premium on the purchase of this first grade security was \$212.50, and was paid by Mr. Ludden, thus enlarging his donation by that amount.

Mr. Ludden imposes the following conditions: "The beneficiaries must be youths who are residents of the state of Minnesota; they must be and continue of unblemished moral character, and of temperate and industrious habits, and they must be such as by examination and trial shall evince and maintain a taste, habit and aptitude for study and improvement; and any student who shall fail to come, or shall cease to be, within the above conditions shall forfeit all claims to the benefit of such fund. Subject to these conditions the administration of such income is entrusted to the said board of regents, which may make such rules therefor as they may deem judicious."

This fund produces \$200.00 a year. Those wishing to avail themselves of its benefits should apply to the executive committee of the Board of Regents of the University of Minnesota.

Intermediate Year

FOR GRADUATES OF THE SCHOOL OF AGRICULTURE WHO WISH TO ENTER THE
COLLEGE COURSE.

The larger part of the studies in the school of agriculture are technical subjects in agriculture and home making, and in related sciences. Graduates of the school who continue with the college course take a part of their work in the college of science, literature and the arts, where they are in classes with students who have graduated in city high schools.

They find it necessary, therefore, to spend a year in the further study of general academic branches, that they may advantageously enter such classes. To meet the needs of those graduates who cannot better secure such instruction, in high schools near their homes, an intermediate year has been provided.

The following prescribed course, or its equivalent, taken in some other school, is required of graduates of the school of agriculture who desire to gain admission to the college of agriculture:

FIRST TERM.

Algebra [5]
Geometry [5]
English [5]
General history [4]

SECOND TERM.

Algebra [5]
Geometry [5]
English [5]
Economics [4]

The courses in mathematics for the intermediate year cover Wells' New Higher Algebra from the highest common divisor to logarithms, and Wells' Essentials of Plane and Solid Geometry, beginning with Book III. The work preliminary to these courses is done by the student in the B and A years in the school of agriculture.

The course in English extends through both terms. Two periods a week are devoted to composition, with Scott & Denny's Composition-Rhetoric as a text-book, and three to the study of literature, which will also be made the basis of considerable written work. The characteristic works of the following authors will be studied: Shakespeare, Bacon, Milton, Addison, Gray, Goldsmith, Burns, Wordsworth, Lamb, Macaulay, Ruskin, Browning and Tennyson. Individual members will be assigned readings from various other authors.

Short Course for Farmers

FACULTY.

WILLIAM M. LIGGETT, *Dean.*

F. L. WASHBURN, M. A., *Insect Enemies.*
COATES P. BULL, B. Agr., *Farm Implements.*

JANUARY 12 TO MARCH 12, 1904.

To meet the needs of men of mature years, who are busy on the farm the greater portion of the year, a special course of lectures has been prepared. Investigations and experiments by scientific men are uniting to produce great changes in the practice of agriculture and the management of live stock. In order to keep up with the times, the farmer must bring himself into close relations with recent investigations, discoveries and methods relating to his business. This course is organized to meet just this need, and to bring within reach of the busy farmer the results of the latest methods and experiments.

This course will open January 12th, 1904, and continue for eight weeks. Work in lecture room, class room and laboratories extends from 9 o'clock a. m. to 2:30 o'clock p. m. A part of the afternoon will be devoted to study and investigation. The University farm, live-stock, barns, green-houses, grounds and laboratories of the college and school of agriculture afford ample opportunity for interesting study.

There will be no lecture course on Monday, but this day will be spent in visiting places of interest, such as the stock yards, flour and flax mills, green houses, stock farms, etc.

For this course a fee of \$10 will be charged. Board may be secured in either of the Twin Cities at \$3.50 to \$4.50 per week.

The school is situated at St. Anthony Park, on the Como-Harriet car line, between St. Paul and Minneapolis. Get off at Commonwealth avenue.

Farmers wishing to register for course, or desiring further information, should address Jas. M. Drew, St. Anthony Park, Minn.

The course of lectures and study is outlined as follows:

Agriculture: Judging the qualities of soils, the selection of farms, planning farms; developing the fields, drainage, roads, fences; developing the farmstead and its buildings; managing fields and growing, cultivating, harvesting and preserving forage and grain crops. The rotation of grain cultivated and grass crops, the use of live stock, and general farm management.

Dairy husbandry: In this division there is a course of sixteen lectures giving an outline of the origin and history of the various breeds of dairy cattle, the characteristics of each and conditions to which each breed is especially adapted; the conformation and type of cow specially adapted to economical dairy work; an outline of the fundamental principles of feeding, the composition and character of the various feed stuffs with plain and practical instruction in rearing young stock and feeding dairy cows. Practice work will be given in judging dairy stock.

Animal husbandry: The course will embrace forty-eight lectures to be given in three series. The first will include twenty lectures, the second eight and third twenty.

The first series will treat of such breeds of cattle, sheep and swine as are now popular in the Northwest, or are likely to become more so. They will dwell upon such features as approved form, the uses for which they ought to be kept, the soil and climate best suited to growing them in the best manner, and differences that obtain between them in form, function and adaptation.

The second series will discuss certain of the more practical phases of animal breeding. They will consider the chief laws that govern breeding and how to turn them to practical account on the farm or on the range, and also the selection of prepotent sires and dams. The place for cross breeding and grading up and the best methods of doing the work will be discussed, and also the nature and value of pedigrees. The value of in-an-in breeding will be dwelt upon and also its danger.

The third series will discuss the feeding and management of beef cattle, sheep and swine on the farm. Foods suitable to each of these classes of animals will be discussed, and the methods of preparing and feeding them to the best advantage. Pastures will also be discussed, and outbuildings, and indeed all the more important features of managing animals from birth to maturity.

A portion of the period allotted to each lecture will be spent in judging animals brought into the class room. Hence forty-eight exercises will be given in the work of judging live stock.

Agricultural chemistry: Soils and foods are made prominent features of the work in agricultural chemistry. Four lectures are given on the chemistry of fertilizers, including the conservation of the fertility of the soil, the composition and use of farm manures, the draft of different farm crops upon the soil and the methods of making the fertility of the soil available as food by the rotation of crops and by other means so as to secure the necessary chemical changes in the soil to produce the highest degree of fertility. Four lectures are also given on the chemistry of foods.

Farm mechanics: The instruction given in this subject will consist of lectures on farm mechanics, taking up such subjects as pumps, farm water systems, windmills, the general principles of steam and gasoline engines, placing shafting, pulleys and belts; pipe fitting, soldering, etc. Some instruction will also be given on sharpening and using hand tools, such as saws, planes, chisels, and other tools necessary in farm practice.

Farm implements: The lectures on farm implements will be illustrated, as far as possible, by samples. Stereopticon views will be made use of in illustrating machines that cannot well be taken to the class room. It is the aim in

these lectures to bring out the lines covering the draft of implements and the objects attained by their use. Suggestions will be made on selection of implements adapted to various kinds of work. The care of implements when not in use will also be discussed, and an attempt made to give as fully as possible all information that will be beneficial in the care and handling of farm machinery.

Dressing and curing meats: The work in dressing and curing meats will be given in a course of demonstration lectures. In demonstrating these lectures the animals will be dressed before the class and the reason for each operation fully explained. The method of cutting up the dressed carcass for different purposes will also be shown before the class and the use and value of each cut explained. Sausage making, lard rendering, and the "working up" of all parts of the animals will be taught in a simple and direct way.

Farm accounts: A series of lectures will be given on business forms, business arithmetic and the keeping of simple farm accounts and records.

Farm horticulture: Lectures will be given on the care and management of the apple and plum in this climate, including such subjects as location of the orchard, selection of the trees, planting, cultivation, green manuring; preparation for winter; advantages and disadvantages of root grafting, budding, and top working; insects and diseases injurious to orchards.

Lectures on the care and management of small fruits will consider the subjects of selection of varieties, planting and cultivation, origin of new varieties, propagation, marketing, winter protection, also the insects and diseases injurious to raspberries, blackberries, currants, gooseberries, strawberries and grapes.

Under vegetable gardening will be considered the growing of potatoes, tomatoes, celery, onions, squash and cucumbers.

Veterinary science: This work includes a series of lectures on elementary anatomy, animal foods and digestion; and causes, prevention and treatment of common diseases of farm stock. An especial effort is made to have this work practical and helpful to men who are actually handling farm stock.

Fungous diseases of plants: This will be a study of the character, development and methods of treatment of fungous diseases upon cultivated crops.

Poultry: Twenty lectures will be given on this subject with special reference to the needs of the Minnesota farmer. The following subjects will be considered: Location and construction of poultry buildings and yards; a study of the breeds best adapted to the farmer's use; the hatching, rearing and management of the farmer's flock; feeding for eggs and for fattening; killing and dressing fowls, and packing for market; marketing eggs.

In addition to the above, four lecture periods will be devoted to farm work-shop hints, such as splicing rope, making rope halters and rope belting, and tempering simple tools.

Economic Entomology: The entomologist will give a course of lectures on injurious and beneficial insects and will discuss the various insecticides and methods of application.

If there be sufficient demand to warrant, and time permits, a few lectures will be given on birds and their relation to agriculture.

Dairy School

THE FACULTY.

- CYRUS NORTHROP, LL. D., *President.*
WILLIAM M. LIGGETT, *Dean.*
T. L. HAECKER, *Professor of Dairy Husbandry.*
WM. ROBERTSON, B. S., *Care of Boiler and Engine.*
J. A. VYE, *Creamery Records and Accounts.*
HARRY SNYDER, B. S., *Dairy Chemistry.*
M. H. REYNOLDS, M. D., V. M., *Diseases of the Dairy Cow.*
W. M. HAYS, M. Agr., *Forage and Pastures.*
J. M. DREW, *Silo and Stable Conveniences.*
WM. BOSS, *Instructor in Practical Engineering.*
B. D. WHITE, *Instructor in Creamery Management.*
SAMUEL HAUGDAHL, *Instructor in Cultures and Starters.*
H. L. SONDERGAARD, *Assistant Instructor in Butter Making.*
H. L. RUSSELL, Ph. D., *Bacteria in Dairy Products.*
A. W. PARKIN, *Instructor in Cheese Making.*
MISS JULIA BRUDE, *Instructor in Sweet Curd Cheese Work.*
C. B. MOAK, *Instructor in Dairy Laboratory.*

The next session of the Dairy School will open Monday, November 23, 1903, and continue four weeks.

This course is designed to furnish persons, who are actually engaged in the manufacture of butter and cheese, in creameries and cheese factories, an opportunity to become more skilled in their work, and also to study the many problems which have a direct bearing upon the dairy industry. Recognizing the fact that such persons cannot be away from business for a long period, the term has been so arranged that the time of each student is fully occupied by lectures and actual work in the creamery training room every hour of every working day of the term.

The rapid growth of the dairy industry in the Northwest has called for an enlargement of the work in dairy instruction. To meet this need the dairy hall has been equipped with the latest and most improved machinery and all apparatus necessary to give instruction in the various lines of dairy work.

No pains will be spared to maintain the high standard which the school has attained. Each member of the faculty has special qualifications for the duties to which he has been assigned. The lecture course and practical instruction are arranged with special reference to giving the greatest amount of training and practice possible in a four weeks' session. Large additions have been made to the equipment of the dairy hall in

both butter and cheese departments; in fact, it has everything needed for conducting the work by the most approved methods.

Instruction is divided into six courses:

- 1st. Lectures covering the entire field of dairy husbandry.
- 2d. Practical work daily in the butter room.
- 3d. Practical work daily in the cheese room, where the manufacture of flats, cheddars, Swiss, brick, Edam and Gouda cheese will be carried on.
- 4th. Practice work in the laboratory, examining milk, making daily composite tests, and the pasteurization of milk and cream.
- 5th. Practical engineering, steam fitting and plumbing.
- 6th. Practical work in factory bookkeeping.
- 7th. Practice work with cultures and starters.

I.—LECTURES.

The course of sixty lectures furnishes in a plain and concise form the most valuable information for those who are interested in any branch of agriculture, covering, as it does, the most important points in the breeding, rearing, feeding and general management of dairy stock, the economical production of milk, growing and preserving of forage and grain crops, the management of meadows and pastures, management of barns, stables and yards, construction of silos, co-operative dairying, creamery and cheese factory management, judging and marketing dairy products, the chemistry of milk, dairy bacteriology, engineering, animal hygiene and treatment of the common diseases of the dairy cow.

II.—BUTTER MAKING.

The running of separators; ripening and churning of cream; the proper acidity of cream to secure best flavor; how to churn, wash and salt butter so as to avoid specks and mottles; to secure good grain and best methods of preparing for market—are some of the points which receive special attention. As all creamery men should be able to judge butter from a commercial standpoint, students are trained daily in the art of scoring butter by the score card.

III.—CHEESE MAKING.

The work in the cheese room is conducted on a large scale, including the manufacture of several brands of fancy cheese. The fact that there is a demand for these at highly remunerative prices has induced the Regents to provide the necessary means for carrying on this work.

A complete record of every step taken is required of each student. Here is a good opportunity for cheese makers to meet, investigate new methods, make experiments on doubtful points, compare notes, and thus gather in a few weeks knowledge that otherwise would take years to acquire.

IV.—MILK TESTING.

It has been found that the value of milk for both butter and cheese is measured by the per cent of fat content, and nearly all our factories and creameries now base the payment for milk on the fat content. It is therefore necessary for every factoryman to familiarize himself with the best methods of milk testing. The chemist gives a general outline of the work, but in order that each student may have thorough training in milk testing daily exercise is given. Steam,

turbine and hand power machines and other apparatus are provided and operated in the laboratory.

The pure and wholesome milk and cream supply for our cities is a matter of vital importance, and there is great need for improved methods of handling milk intended for this purpose. To meet this, milk and cream pasteurizing apparatus of the latest and most improved makes have been provided for the dairy school, and a few advanced students will be given instruction in this work.

V.—MOTIVE POWER.

The work in engineering consists of practical talks on the construction, care and management of creamery engines and boilers, pumps, injectors, heaters, etc., and work in the practice room.

In the practice room is provided an eight horse power simple, slide-valve engine, three types of boiler feed pumps, two types of deep well pumps, one injector, two milk pumps and a steam gauge, which the students have the privilege of examining and operating. Instruction is also given in pipe fitting, placing shafting, babbitting bearings, soldering, etc.

It is the aim to make this work as practical as possible. Questions of interest on the subject are freely discussed.

VI.—FACTORY BOOKKEEPING.

All the essential features of factory accounting from the receipt of the milk to the returns in net proceeds are thoroughly considered. Paying for the milk according to the fat content, or otherwise, is fully explained. The students do, in books provided, the actual one month's accounting of a creamery.

REQUIREMENTS FOR ADMISSION.

Experience has shown that students who have had some practical training in the creamery or cheese factory before coming to the dairy school are, as a rule, the ones who are able to make the most of the course; it is therefore required that persons who intend to take this course shall have had at least one season's experience before coming to the school. No entrance examination is required.

EXPENSE.

A registration fee of \$15 is required of each student. Students can board in either city and reach the school by street car, or board can be secured near the school for from \$3.50 to \$4.00 per week. Each student is required to supply himself with two white suits, including caps, to be worn during working hours in the creamery and cheese rooms. The suits may be procured for about \$1 each.

DAIRY CERTIFICATES.

The Regents will grant dairy certificates to students who have taken the course and passed a satisfactory examination and in addition have demonstrated by at least one year's work in a factory that they have acquired special skill in the art of butter and cheese making, and are thoroughly qualified to take charge of a creamery or cheese factory.

To reach the school from either St. Paul or Minneapolis, take the Como-Harriet street car and get off at Commonwealth avenue.

Address applications for admission to T. L. Haecker, St. Anthony Park, Minn.

Rural School Agriculture

Wm. M. Liggett, Dean of Department.
Willet M. Hays, M. Agr., In Charge.

Under an act of the legislature the Department of Agriculture of the University of Minnesota is charged with the preparation of leaflets and other material which will aid in introducing into rural schools studies calculated to build up country life and the business of farming. This work is done in co-operation with the State Department of Public Instruction. The Department of Agriculture is (1) undertaking the preparation of leaflets, charts and other school room helps; (2) the promulgation of plans, for the use of teachers, in leading the pupils to observe and experiment on the farm and in the home, requiring from them written or oral reports; (3) assisting in the utilization of the natural objects of the country for illustration in the rural school; (4) the decoration and use of the rural school grounds; (5) and correspondence with teachers and county superintendents to aid and encourage them in carrying out plans for bringing the country school more into unison with country life and rural affairs.

The Department of Agriculture also co-operates with the State Department of Public Instruction in introducing the study of agriculture into the teachers' summer institutes and into other schools where teachers are being educated for service in rural schools.

The newness of this work makes it necessary that much experimenting be done; that personal work with teachers be regularly followed up; that every agency be enlisted to help, and that the best be chosen for future work. Co-operation with those interested in similar work in other states is contemplated. The Department of Agriculture earnestly solicits the co-operation of teachers, county superintendents, farmers, and all others who are in touch with the rural schools, and suggestions are invited from those who have had experience in rural school work.

The instructors in the Department of Agriculture of the University will provide much of the material for leaflets, charts, plans for school grounds, gardens, etc., while others in this and other states, who are especially adapted to prepare such material, will be employed as occasion demands. Efforts are being made to arouse the young to the advantages of country life; to show them better ways of home making; to lead them to observe more closely the things they see daily; to arouse them to clearer methods of thought; and, in some measure, to teach them facts and principles of nature,

and lead them to have faith in, and knowledge of, improved methods of farming and home making. There is no intention of diminishing the energies applied to teaching the elements of academic learning, but it is intended to so enrich the course with interesting things of nature, of country life and of farming and home making, that the rural school will have a larger influence in general education.

It is believed that the work of the rural schools can be brought into line with country affairs, and be brought into closer relation to farm life and interests, without loss of efficiency in general training, and with a distinct gain in knowledge of affairs of vital importance to the life of the community.

The Agricultural Experiment Station

J. A. VYE, *Secretary.*

The Agricultural Experiment Station of the University of Minnesota is devoted to the discovery of facts and processes useful to the farmers of the state, and to disseminate knowledge of improvements in agriculture and home making. This station was established in 1887, under laws enacted by the state and national governments. It is supported in part by funds supplied through the University by the national congress, and in part by funds appropriated by the state legislature. It has also a small income from sales of products. It has published annual reports since 1892, seventy-six general bulletins, fifteen press bulletins, twelve class bulletins; and twenty-four press bulletins have been published by its sub-station at Grand Rapids.

The work of experiment stations embraces a wide range of agricultural subjects included under the headings of agriculture, horticulture, forestry, animal husbandry, dairying, agricultural chemistry, entomology and veterinary science.

Bulletins giving the results of experiments are published in editions of 15,000 copies. These are sent free to all farmers in the state who ask to have their names placed on the station mailing list, and the postoffice department carries them free under the director's franking privilege.

The experiment station is located at University farm, St. Anthony Park, where most of its officers also teach in the college and school of agriculture. It uses the larger part of the University farm, containing 250 acres.

The officers of the experiment station are ever ready to advise by letter

or by personal interview, and the correspondence of the station increases annually.

The experiment station is in co-operation with the U. S. Department of Agriculture and with several experiment stations in other states. Besides the sub-stations mentioned above it is assisted by nearly a score of trial stations, associated with the State Horticultural Society. It has also enlisted several hundred farmers and seed growers as seed co-operators who are aiding the station in disseminating its newly originated and tested varieties of field seeds. Nearly fifty farmers are serving as statistical co-operators and are assisting joint agents of the station and of the U. S. Department of Agriculture in securing data as to the cost of growing crops, and of producing livestock products.

PUBLICATIONS OF THE DEPARTMENT OF AGRICULTURE.

BULLETINS OF THE EXPERIMENT STATION FOR 1902.

Annual Report for 1902.

General Bulletins:

No. 73. Growing swine of various breeds and crosses.

No. 74. Human food investigations.

No. 75. Fattening lambs.

No. 76. Fattening steers.

Press Bulletin:

No. 15. A remedy for the mosquito evil.

THE FARM STUDENTS' REVIEW.

The Alumni Association of the School of Agriculture, with some aid by officers of the department, publishes a monthly agricultural paper. This paper aims to keep the graduates in touch with each other, and with the department, and provides a medium through which they may relate their experiences in various lines of farming and home making. It publishes articles by graduates, students, members of the faculty and by others especially qualified to discuss agriculture, live stock, dairying, horticulture, agricultural chemistry, home economics, the rural school and other subjects relating to country life. It serves also as a semi-official organ of the Alumni Association and of the Farmers' Club of Minnesota (an organization made up of students and ex-students of all the courses of the department of agriculture).

(Ex-Judge of District Court.)

OBJECT.

It is the object of the College of Law of the University of Minnesota to educate its students by means of the study of jurisprudence, and at the same time so familiarize them with the fundamental principles of positive law that they will be able, at the end of their course, to safely enter upon the duties of the legal profession. Education, and not simply information, is the prime object. The power to think clearly, to reason cogently, to perceive distinctions quickly, to investigate thoroughly, to generalize carefully and to express his thoughts accurately are the basal qualifications of the safe counsellor. To secure for the students these habits of thought and expression should be the aim of both the student himself and his instructor.

The method of work generally pursued in the college is three-fold. **First.** The reported cases, being the original repositories of the principles of law and equity, are read by the student and considered in the class-room. To facilitate the work and save expense for the student, volumes of these cases are reprinted and put, free of charge, into the hands of the student during the continuance of the subject, and each subject is pursued daily until its completion. **Second.** Besides reading the cases, the student in most subjects is required to prepare a written analysis of each case, stating, in his own words, the issue upon which the case turns, the law which governs it, a brief statement of the facts, and the conclusion which the law and facts logically necessitate. This practice has proved helpful in securing a greater thoroughness in reading, greater carefulness in reasoning and greater accuracy on the part of the student in the art of expression. **Third.** In addition to the student's investigation of the cases, and his presentation of them to his instructor, a systematic and orderly arrangement of each subject in the form of a summary, and much additional information regarding the details of the law's applications, in particular instances, and a consideration of exceptions, limitations and statutory modifications of general principles, and especially information regarding the art of practice, are indispensable, and are in most instances supplied by printed lectures prepared for that purpose, or by well written text-books upon the subject under consideration. **Information**, as well as **education**, is necessary to prepare a student to begin the practice of law. So far as possible he should, at the end of his course, grasp the various subjects of law in the unity of a system, and to do this he must, in many instances, take the generalizations of his instructor, or take them from some text-book, until he shall find time to investigate the subject for himself.

REQUIREMENTS FOR ADMISSION.

Graduates of universities or colleges, and students who have graduated from any normal school or State high school of Minnesota, or from similar institutions of equal grade in other states, are admitted without examination upon presentation of their diplomas.

All other applicants must pass an examination in the studies required for admission to the freshman class of the college of science, literature and the arts, which are as follows:

N. B.—Time element, as indicated with each subject, is essential.

A three years' course of reading in the English classics.

English Composition, one year.

Algebra, elementary, one year.

Algebra, higher, one-half year.

Geometry, plane, one year.

Geometry, solid, one-half year.

In addition to the above named subjects, which are required and for which substitutes cannot be accepted, applicants shall present evidence of preparation in **eight** year-credits, or their equivalent, to be chosen from the following list:

Latin,

Grammar (one year-credit).

Caesar, four books (one year-credit).

Cicero, six orations (one year-credit).

Vergil, six books (one year-credit).)

Greek,

Grammar (one year-credit).

Anabasis, four books (one year-credit).

German,

Grammar (one year-credit).

Literature (one year-credit).

French,

Grammar (one year-credit).

Literature (one year-credit).

English,

Latin element (one year-credit).

Literature (one year-credit).

History, Greece and Rome (one-half year-credit).

England (one-half year-credit).

Modern (one-half year-credit).

Medieval (one-half year-credit).

Senior American (one-half year-credit).

Civics (one-half year credit).

Political economy (one-half year-credit).

Physics (one year-credit).

Chemistry (one year-credit).

Botany (one-half or one year-credit).

Zoology (one-half or one year-credit).

Astronomy (one-half year-credit).

Geology (one-half year-credit).

Physiography (one-half year-credit).

N. B.—By a **year-credit** is meant, a full year's work upon one subject, five recitations per week, as given in an ordinary high school course.

Substantial equivalents may be substituted, and a business education, as well as experience in teaching may be accepted in lieu of some of the less important subjects.

Applicants who have diplomas entitling them to admission without examination, should present them to the dean of the college and those who are to take examinations or enter as special students, should present themselves to the dean, who will, upon proof of their qualification for admission, refer them to the registrar and accountant where they pay their matriculation fee and the first term's tuition.

SPECIAL STUDENTS.

Persons who are not candidates for a degree may enter the college at any time as special students, without examination, and may pursue whatever subjects they desire, provided they possess such knowledge and ability as will, in the opinion of the faculty, enable them to pursue the subjects of law with profit to themselves. And all such students will be entitled to a certificate upon satisfactory examination in the subjects pursued by them, stating the time they have been members of the college and the subjects in which they have passed a creditable examination.

Such students, however, if they elect studies in both the day and evening courses, pursuing both at the same time, will be charged ten dollars per term additional tuition.

Students in the day or evening classes, will not be permitted to attend more than two courses of lectures daily, unless in exceptional cases, and then a card of admission must be procured from the faculty and ten dollars per term additional tuition must be paid.

Students who are regular members of one class, either day or even-

ing, will not be permitted to pursue studies in any class in advance of that to which they belong, unless there are special circumstances requiring it, and only upon special permission granted by the faculty.

SENIOR ELECTIVES.

Students in the senior class of the college of science, literature and the arts, are permitted to elect as one subject throughout the senior year, work in the college of law, including the elements of contracts, domestic relations, torts and criminal law. The satisfactory completion of the above named subjects will give the student a senior credit, and will entitle him to admission to the middle class of the college of law. No such student will be permitted to take more than one lecture each day in the college of law, without special permission of the faculty of the college of science, literature and the arts.

ADVANCED STANDING.

Should any person desire to enter the middle or senior class for a degree he must be at least nineteen years of age, must pass the required preliminary examination upon the subjects of the preceding year or years, or their equivalents, but no person will be allowed to receive his degree who has not spent one full year in this department. Attorneys at law, however, who have been admitted to practice in the state of Minnesota, may enter the senior class without examination upon presentation of their certificates of admission, and shall be entitled to their degree upon a satisfactory showing at the final examination of the year.

FOUR COURSES OF STUDY.

First.

THREE YEARS' DAY COURSE.

FIRST YEAR—JUNIOR.

First Term.

Contracts (including Statute of Frauds). Twelve weeks, six lectures a week.

Second Term.

Domestic Relations. Four weeks, six lectures a week.

Common Law Pleading. Three weeks, six lectures a week.

Torts. Eight weeks, six lectures a week.

Third Term.

Blackstone (Second Book). Four weeks, six lectures a week.
 Criminal Law. Five weeks, six lectures a week.
 Agency. Three weeks, six lectures a week.
 Commercial Paper. Four weeks, six lectures a week.

SECOND YEAR MIDDLE.**First Term.**

Wills and Administration. Four weeks, six lectures a week.
 Partnership. Four weeks, six lectures a week.
 Code Pleading. Eight weeks, six lectures a week.

Second Term.

Carriers. Two weeks, six lectures a week.
 Insurance. Three weeks, six lectures a week.
 Private Corporations. Five weeks, six lectures a week.
 Public Corporations. Three weeks, six lectures a week.
 Bailments. Three weeks, six lectures a week.
 Liens. Two weeks, six lectures a week.
 Bankruptcy. Two weeks, six lectures a week.
 Equity. (Jurisdiction and Maxims.) Four weeks, six lectures a week.

Third Term.

Real property. Twelve weeks, six lectures a week.
 Easements. Two weeks, six lectures a week.
 Covenants. Two weeks, six lectures a week.
 Taxation. Two weeks, six lectures a week.
 Landlord and Tenant. Two weeks, six lectures a week.

THIRD YEAR—SENIOR.**First Term.**

Evidence. Six weeks, five lectures a week.
 Personal Property and Sales. Six weeks, five lectures a week.
 Minnesota Real Property. Four weeks, five lectures a week. Col-
 lege Court. Eight Weeks.

Second Term.

Equity. (Doctrines.) Seven weeks, five lectures a week.
 Constitutional Law. Five weeks, five lectures a week.
 College Court. Twelve weeks.

Third Term.

Mortgages and Mortgage Foreclosure. Four weeks, five lectures a week.

Criminal Procedure. Two weeks, five lectures a week.

Conflict of Laws. Six lectures.

International Law. Three weeks, five lectures a week.

College Court. Twelve weeks.

Second.

THREE YEARS' EVENING COURSE.

To accommodate those who cannot attend the lectures during the day, there is offered an evening course comprising the same subjects as those above enumerated, extending over a period of three years, of nine months each. The students in this course, pursue the same subjects as those in the day courses and in the same order, except that the senior and middle classes are united, and the work of the two years is arranged to meet the demands of such a union.

FIRST YEAR—JUNIOR.

First Term.

Contracts (including Statute of Frauds). Twelve weeks, five lectures a week.

Second Term.

Domestic Relations. Four weeks, five lectures a week.

Criminal Law. Five weeks, five lectures a week.

Agency. Three weeks, five lectures a week.

Third Term.

Torts. Eight weeks, five lectures a week.

Commercial Paper. Four weeks, five lectures a week.

SECOND AND THIRD YEARS—SENIOR AND MIDDLE.

1902-1903.

First Term.

Evidence. Five weeks, five lectures a week.

Blackstone (Second Book). Four weeks, five lectures a week.

Code Pleading. Three weeks, five lectures a week.

College Court, seniors. Eight weeks.

Second Term.

Code Pleading. Four weeks, five lectures a week.
 Real Property. Eight weeks, five lectures a week.
 College Court, seniors. Twelve weeks.

Third Term.

Real Property. One week, five lectures a week.
 Equity Jurisprudence. Eight weeks, five lectures a week.
 Insurance. Three weeks, five lectures a week.
 College Court, seniors. Twelve weeks.

Third.**SPECIAL COURSE.**

For the benefit of those who do not care to pursue an extended course of legal instruction leading to the degree of bachelor of laws (LL. B.), but desire such a knowledge of law as is of inestimable value to them in a business career, there is offered a special course.

This course extends over one year, and for the accommodation of business men the lectures are delivered in the evening.

The course embraces the following subjects: contracts, including statute of frauds; agency; commercial paper; partnership; Minnesota insolvency law; liens; bailments; master and servant; insurance; sales.

The subjects in this course may be varied upon consultation with the faculty, and other subjects in place may be substituted by those whose business life or whose preference render it desirable.

Those who complete the course and pass a satisfactory examination receive a certificate of proficiency.

Fourth.**GRADUATE COURSE.****First.**

For the benefit of those students who wish to pursue their legal studies further than they are able to do in the undergraduate years, two graduate courses are offered, the first leading to the degree of master of laws (LL. M.), the second to the degree of doctor of civil law (D. C. L.).

The courses of lectures offered in the first year of graduate work are as follows:

Philosophic basis of jurisprudence.
 Roman law.
 Political science.

Constitutional jurisprudence and history.

Theories of taxation.

Those who enter this course as candidates for the degree must have already received the degree of bachelor of laws, from this or some other law college having a three years' course of study. Those who spend the entire year in the work prescribed for this course, and pass a satisfactory examination upon the subjects taken, will be entitled to the degree of master of laws. Any person who possesses the requisite legal learning may, however, enter this course as a special student and pursue any or all of the studies offered.

Second.

Students who have received the degree of LL. B. from this or some other law school requiring three years' of study of law for said degree, and who have also received the degree of LL. M. from this or some other school after not less than one year of graduate study, and who have taken high rank in all the studies leading to these degrees, may apply to the faculty for the degree of Doctor of Civil Law. A knowledge of French or German, as well as of Latin is required, and special proficiency in Roman history is necessary to entitle a student to entrance for such degree.

There is no prescribed time within which students are required to do their work in this course, but they must make themselves proficient in the subjects of Roman law, political science, comparative constitutional law, and the philosophy of jurisprudence before any thesis will be accepted from them.

None of the aforementioned degrees will be conferred until a satisfactory thesis is presented to the faculty by the student and the thesis for the doctor's degree must be one evincing original investigation and special excellence.

TUITION.

UNDERGRADUATE STUDENTS.

A matriculation fee of ten dollars must be paid by every student entering the college. The tuition fee is sixty dollars a year, or twenty dollars per term payable in advance at the beginning of each term.

GRADUATE STUDENTS.

The tuition fee for graduate students is thirty dollars, payable in advance as follows: Ten dollars each term. In addition a matriculation fee of ten dollars is due from each student entering upon the course who has not previously matriculated in this college. A diploma fee of ten dollars is due from each student upon receiving his diploma.

FREE CASE BOOKS.

In order to protect the College, Bar Associations and State Library from the special injury incident to continual use and to facilitate the class work of the college, the Board of Regents has decided to furnish for the use of the students free case books.

LIBRARIES.

The college has a good library containing those English and American reports most frequently cited, digests, dictionaries, and a full and excellent selection of standard text-books. To this collection additions are being constantly made.

Further facilities are afforded the college by the generous action of the Bar Association of Minneapolis in granting to the students the free use of its extensive and ample library located in Temple Court. It contains all the American reports, state and national, and also the English text-books and reports, so necessary for the student in his study of fundamental jurisprudence.

Besides the University and Bar Association libraries, the State library containing all books which a student would have occasion to consult, is located at the capitol, in St. Paul, and is thus within easy reach of the students.

The general library at the University contains about seventy-five thousand bound volumes, besides many thousand volumes of pamphlets, magazines, reports, etc. About one hundred and twenty periodicals are received regularly by the library, not inclusive of technical magazines and newspapers in English and other languages.

Besides the general library of the University, there are several special libraries, consisting mainly of books of reference and current periodicals relating to technical subjects in connection with the several departments of engineering, biology and botany. These libraries are open during the entire day, and the University library is open also in the evening.

METHODS OF INSTRUCTION.

The sessions of the junior, middle and senior day classes will begin respectively at 9:00 and 10:00 o'clock a. m., and 2:00 p. m.; and those of the evening classes will begin at 7:20 o'clock p. m.

Each subject is continued daily until its completion; and when a class carries two subjects daily one recitation or lecture follows the other immediately in order to save the student the expense and time required in going to and returning from the University.

EXAMINATIONS FOR PROMOTION.

Examinations will be held at the close of each subject during the middle and junior years, and no student who fails to pass a satisfactory examination in any of his studies will be advanced to the next higher class.

A student thus failing, however, may have another examination during the first week of the next year upon those subjects wherein he failed, and if it proves satisfactory he will be advanced accordingly. Such student may, however, enter the advanced class if he has not been conditioned in more than two subjects, and provided he make up those subjects by taking them in the regular classes where they are taught.

STATE AND UNITED STATES COURTS.

The department is located within easy reach of both the federal and state courts. The United States courts are in session in St. Paul and Minneapolis during the greater part of the school year. The supreme court of Minnesota, the district courts of Ramsey and Hennepin counties, and the municipal courts of St. Paul and Minneapolis are open and in session almost constantly, and afford all the opportunity for witnessing the trial of actual cases which the student will have either time or desire to improve.

COLLEGE COURTS.

As fast as the student becomes acquainted with the primary rights of persons, cases are prepared for his consideration, whereby he may apply the principles of law with which he has become familiar.

There is also established in the senior year a system of college courts corresponding to the justice, the district and the supreme courts of Minnesota, wherein the student may become familiar with the practice and the rules of the courts respectively.

It is the aim of the department to acquaint the student with the practice as well as the theory of law, and to this end the subjects of pleading, evidence, rules of practice adopted by our state courts, methods of securing provisional remedies, appeals from one court to another, the writs of habeas corpus, certiorari, and others of frequent use, conveyancing, drawing contracts and other like practices which comprise the daily work of the general practitioner, will, during the senior year, receive special and careful attention.

Some member of the faculty will preside over each of these courts, and the student is required to prepare appeal papers, bonds, paper books, and to furnish the courts with his points and authorities according to requirements of law applicable to the various courts of the state.

THE LECTURERS.

All the lecturers in the college are lawyers actively engaged in the practice of their profession. They come to the classroom direct from the bar, bringing with them fresh experiences and the spirit of actual contest. They all possess a high ideal of what a lawyer should be and do, and the student who enters here is expected to come with the fixed purpose of attaining a high degree of excellence in legal acquirements, and to respond in earnestness and with fidelity to the faithful efforts of his instructors in his behalf.

THE LITERARY SOCIETIES.

The students of the college have joined in organizing three literary societies for the purpose of general improvement and for cultivation in the practice of extemporaneous speaking. They hold weekly meetings and derive great benefit from their exercises.

PRIZES.

THE PILLSBURY PRIZE.

Three prizes of \$100, \$50 and \$25, offered by the heirs of the Hon. John S. Pillsbury, are awarded for the best work in the rhetorical department, as evidenced finally by an oration in public.

THE DUNWOODY PRIZE.

Mr. Wm. H. Dunwoody, president of the St. Anthony and Dakota Elevator Co., offers \$100 to that student who shall earn the right to represent Minnesota in the Northern Oratorical League. This league is composed of the seven largest universities of the central states, viz.: Minnesota, Iowa, Wisconsin and Michigan State Universities, and Oberlin, Chicago and Northwestern.

THE LOWDEN PRIZE.

Mr. Frank O. Lowden, of Chicago, offers as a prize to be competed for by the Northern Oratorical League, an endowment of \$3,000 which will yield an annual income of about \$175. A prize of \$100 will be given to the winner of the first place, \$50 to the orator who gets second place, and the remainder will be set aside each year for an interest fund to accumulate, and, in time, produce another endowment.

ELECTIVES FROM OTHER DEPARTMENTS.

Students of this college will be admitted, under proper regulations, to work in other departments or colleges of this University, without extra charge and, so far as it does not interfere with their law studies,

they are urged to avail themselves of this opportunity to attend lectures and recitations in the other departments. Such elections should be made only after consultation with the faculty. The following subjects are suggested as being particularly suitable: international law, constitutional history and political science. Students who elect such work must complete it in a satisfactory manner before they shall be entitled to receive their law degree.

DEGREE OF BACHELOR OF LAWS.

The degree of bachelor of laws will be conferred upon students of good moral character who pursue the full course in this college and pass an approved examination, and the degree will also be conferred upon those who, having attended another law school for the period of two years, shall also attend one year in this college and pass a like examination.

EXPENSES.

These depend largely upon the tastes and habits of the individual. Students find no difficulty in obtaining board among the people of the city. Good board can be obtained for \$4.00 per week. Students board in clubs at less expense.

For further particulars write to the Dean, W. S. Pattee, and all information necessary for the student will be furnished promptly. The Dean will be pleased to correspond with any one who is thinking of pursuing a course of legal study, and he will gladly aid any student in selecting the proper books. Letters addressed to him at Minneapolis, Minnesota, will receive prompt attention.

ADMISSION TO THE BAR.

A diploma from the college of law entitles the student residing in this state to admission to the bar of Minnesota without examination by the state board of examiners.

CALENDAR.

- September 1 to 7—Entrance examinations and registration
- 8—Classes called for regular work
- November 25—End of first term
- December 1—Second term opens, classes called for regular work
- 19—Holiday recess begins—no classes
- January 5—Work resumed
- March 5—End of second term
- 8—Third term opens, classes called for regular work
- May 29 to June 2—Commencement week
- June 2—Commencement day, graduating exercises.

THE
DEPARTMENT OF MEDICINE

The Department of Medicine

THE DEPARTMENT OF MEDICINE INCLUDES THE FOLLOWING NAMED COLLEGES:

The College of Medicine and Surgery.

The College of Homeopathic Medicine and Surgery.

The College of Dentistry.

The College of Pharmacy.

Each college is distinct in the government of its internal affairs, has its own faculty and an independent curriculum, excepting in the studies of anatomy, physiology, chemistry, histology and embryology. These studies, so far as they are required in each course, are pursued by all the students of the department in common.

BUILDINGS AND EQUIPMENT.

The department is resident in four buildings situated upon the University campus, viz: Medical hall, the laboratory of medical science, the laboratory of chemistry and the laboratory of anatomy.

Medical hall contains the offices of the deans of the college of medicine and surgery, of the college of homeopathic medicine and surgery and of the college of dentistry; the large amphitheatre and lecture rooms of the several colleges, the library and reading room of the department, the laboratory of materia medica, the operating rooms and laboratories of dentistry and the dental infirmary.

The laboratory of medical sciences is a building especially designed for laboratory uses. One wing of the building is occupied by the college of pharmacy and the department of physiology. It contains the office and private laboratory of the dean of the college of pharmacy, the pharmaceutical and botanical laboratories, the laboratory of organic chemistry, with preparation and stock rooms. The office of the secretary of the college of medicine and surgery, a large lecture amphitheatre, especially arranged for demonstrative work, the laboratories of physiology, physiologic chemistry and practical dietetics, and operative surgery are also situated in this wing.

The center and opposite wing are occupied by the departments of histology and embryology, pathology and bacteriology. Each of these branches has its well-lighted laboratories, preparation rooms and private study rooms.

Upon the basement floor are laboratory stock rooms and the animal rooms devoted to physiologic and bacteriologic purposes.

A large laboratory upon the first floor is assigned to the bacteriological work of the State Board of Health.

The laboratory of chemistry is a one-story brick building devoted entirely to the use of this department. It is equipped with amphitheatre, laboratories, preparation rooms, store rooms, and private offices of the professor and assistant professor of chemistry.

The laboratory of anatomy is a new two-story and basement building, 35x60 feet. In the basement are the morgue, injecting room, cold storage vaults, and engine and apparatus for the carbon dioxide freezing plant. On the first floor are an amphitheatre seating one hundred and seventy-five students, the private offices of the professors and instructors, a private dissecting room and a small laboratory for research work. The entire second floor is devoted to laboratories for practical work in anatomy.

The legislature has provided for the erection of a new building for the laboratories of bacteriology and pathology, which will be built within the next two years. The retirement of these laboratories from the present medical science building will leave enlarged room for the accommodation of the remaining chairs.

The University Clinical Building is situated in a part of the city most favorable to the development of an out-door service and, at the same time, accessible to the students. It is of two stories and covers 40x150 feet. It affords ample floor space for amphitheatres, waiting rooms, dispensary and class rooms for each of the clinical branches. Wards and laboratories, in which section work in medical and surgical diagnosis can be conducted, have been equipped.

The department of medicine is in intimate relationship, through its several faculties, with the hospitals, infirmaries and dispensaries of the cities of Minneapolis and St. Paul. Through these agencies it utilizes, for the benefit of its students, the clinical material of these two large centers of population. The location of the University near the interurban car line enhances the value and convenience of these clinical opportunities.

A medical library, containing some three thousand volumes and supplied with current periodicals, is open to all the students of the department. The collection has been chosen with special regard to the need for reference work and collateral reading. The general library of the University and the public and medical libraries of Minneapolis and St. Paul are also open to the students of this department.

RULES AND REGULATIONS OF THE DEPARTMENT.

These rules and regulations apply alike to the colleges of medicine and surgery and homeopathic medicine and surgery.

COLLEGE YEAR.

The sixteenth annual course of study in this department will begin on

September 1st, 1903, and will continue nine months, closing upon the first Thursday in June, 1904.

The college year is divided into semesters; the first semester ending January 13th, 1904. The succeeding week will be devoted to mid-year examinations which will be conducted in many of the departments. The second semester will begin January 21st, 1904, and will close May 14th, 1904, when the final examinations of the year will begin. Commencement exercises will occur in common with the other departments of the University, during the week ending June 3rd, 1904.

ENROLLMENT.

It is desirable that students matriculate on or before September 1st.

Students will be assigned seats in order of and at the time of their matriculation. Such matriculation and assignment of seats will be had in the office of the registrar of the University. Students will then present themselves for entrance examination, or for the approval of their evidences of preliminary qualifications, to a committee of the college of science, literature and the arts appointed for this purpose. Having received an entrance certificate from this committee they will report to the dean and secretary of the college for admission and classification. They will then be furnished with a record of their standing and of the studies to be taken and they will be required to present this record to the professors in charge of such studies within the first week of the term.

REQUIREMENTS FOR ADMISSION.

HIGH SCHOOL REQUIREMENTS.

Applicants for admission to the College of Medicine and Surgery of the University of Minnesota must present, to the dean and secretary of this college, credentials, properly signed, showing that the applicant has satisfactorily completed the branches of study, covered in a full four years' high school course and, in addition, the branches covered in the freshman year of some approved college or university, according to the conditions herein stated.

The applicant who cannot present credentials must submit to an examination on the subjects, given in the schedule, herewith submitted, for which he has no credentials.

English Language. (a). English Composition and Rhetoric.

Candidates are expected to show a familiarity with the principles and technical terms in ordinary high school texts upon the subject, whether acquired by the direct study of such texts or mainly by the study of selected English masterpieces. It should not be forgotten that the main purpose of this subject is to teach the student to use language correctly and forcibly. To this end students should be given constant exercise in composition writing. A knowledge of the subject matter of the texts used will be considered of less importance than the demonstration of ability to write good English.

A full year of work in the high school, five hours per week, should be devoted to this subject.

Mathematics (a). Algebra, elementary (one year).

Addition, subtraction, multiplication, division, factoring, highest common divisor, lowest common multiple, fractions, simple equations (with one, two, and several unknown quantities) followed by problems, theory of exponents, involution (including the binomial theorem for positive integral exponents), evolution, radical inequalities, ratio, proportion, progression, and quadratic equations with problems.

Geometry (b). Plane (one year).

Any of the standard texts on this subject will furnish the necessary preparation. Isoperimetry, symmetry, and maxima and minima of figures are not required. The exercises requiring solutions and demonstrations should not be omitted.

Latin (a). Grammar (one year).

Will include the subjects of orthography, etymology and syntax. Proficiency is particularly desired in the following subjects: the analysis of the verb forms, the rules of syntax, and the principal parts of the irregular verbs.

(b) Cæsar, 4 books (one year).

First four books, or selections from the seven books equivalent to four; or three books, with thirty pages of Cornelius Nepos, or two books with sixty pages of Cornelius Nepos. Special attention should be paid to the translation of passages of the text into correct and idiomatic English; grammatical questions connected with the text; more especially on the subjunctive mood, indirect discourse and the sequence of tenses. The pupil should be able to rewrite in oratio recta all the passages of oratio obliqua that occur in the text. The student is expected to be familiar with the life of Cæsar and an account of his wars.

In addition to the above named subjects, which are required, and for which substitutes can not be accepted, applicants shall present evidence of preparation in *seven year-credits*, or their equivalent, to be chosen from the following list:

Latin—Cicero, four orations, one year; Vergil, six books, one year.

Greek, two years—Grammar, one year; Anabasis, four books, one year.

German, two years—Grammar, one year; Literature, one year.

French, two years—Grammar, one year; Literature, one year.

Spanish, two years—Grammar, one year; Literature one year.

English—Latin element, one year; Literature, one year.

History—Greece and Rome, one-half year; England, one-half year; Modern, one-half year; Medieval, one-half year; Senior American, one-half year.

Civics—One-half year.

Political Economy—One-half year.

Physics—One year.

Chemistry—One year or one-half year.

Botany—One-half year or one year.

Zoology—One-half year or one year.

Astronomy—One-half year.

Geology—One-half year.

- Physiography*—One-half year.
Solid Geometry—One-half year.
Higher Algebra—One-half year.

ADDITIONAL COLLEGE WORK REQUIRED.

In addition to the foregoing high school requirements for admission to the University of Minnesota, applicants for entrance to the College of Homoeopathic Medicine and Surgery shall present evidence of having completed one year's work in a recognized college or university course. The following schedule presents the work of the first year in the college of science, literature and the arts. Applicants who have credit for one year of college work but whose credits do not evidence such a course or its fair equivalent, will be permitted to enter but must make up such deficiencies during the first year in the college of science, literature and the arts.

1. *Mathematics*—A full year of college work, four recitation periods per week, including the subjects of higher algebra or plane trigonometry.

Higher algebra, including simple equations, inequalities, proportion, variation, progression, quadratic equations, simultaneous equations of the second degree, maxima and minima of functions, differentiation of algebraic functions, development of functions, logarithms, theory of equations and solution of numerical higher equations.

Plane trigonometry, with numerous applications.

2. *Language*—One full year of college work, four recitation periods per week, in *one* of the following:—English, early English, including Chaucer and Spenser, Rhetoric, including some Shakespere and practice in writing; Latin, one year of college work, in advance of four years' work required for admission.

ENGLISH LANGUAGE AND LITERATURE.

Course I. (a) Chaucer, (b) Spenser.

Course II. Rhetoric.

This course includes two hours a week of rhetoric, the writing of compositions, and the study of prose masterpieces, and two hours a week of the study of Shakespere's plays.

LATIN.

Course I. Cicero de Amicitia and de Senectute.

Exercises in Latin composition and a review of the syntax.

Course II. Livy.

Selections from Livy and one play of Plautus or Terence; rise and development of Roman institutions.

3. *Language*—One full year of college work, four recitation periods per week, in *one* of the following:—

German, 1st or 3rd year's work in the subject.

French, 1st or 3rd year's work in the subject.

Greek, 1st or 3rd year's work in the subject.

GERMAN.

Course I. German begun.

- (a) Whitney's Brief German Grammar, Bernhardt's German composition and Buchhelm's German Poetry.
- (b) German prose selections. Leander's Traumereln, Heyse's L'Arrabiata, von Hillern's Hober als die Kirche; grammar and composition completed.
- (c) Scientific prose. Hodge's German Science Reader; grammar and composition completed.

Or Course III. Advanced classic prose and poetry.

- (a) Goethe's Prosa and Gedichte, author's life and works, Spanhoofd's Deutsche Grammatik. Oral and written exercises based on text.
- (b) Schiller's Belagarung von Antwerpen, Heine's Prosa and Buch der Lieder, life and works of the author.
- (c) Brandt & Day's German Scientific Reading, Spanhoofd's Deutsche Grammatik completed, original letters and essays.

FRENCH.

Course I. French begun.

De Borde's Elements of French; Kuhn's French Reader; modern plays.

Or Course II. Advanced grammar and composition.

Fasnacht's Progressive French Course.

Paul Bercy's Selections for Translating English into French. The classical authors of the XVII and XVIII centuries will be read. Fortier's Histoire de la Litterature Francaise.

GREEK.

Course I. Greek begun.

Brook's Introduction to Attic Greek.

Course II. Anabasis.

Prose composition based on the text.

Course III. Xenophon's Memorabilia.

Prose composition based on the text; collateral readings in history.

Course IV. Lysias and Demosthenes.

Prose composition based on the text; collateral readings in history antiquities.

4. *Science*—One full year of college work, four recitation periods per week, and four hours of laboratory work, in *one* of the following:

- Botany.
- Chemistry.
- Zoology.

BOTANY.

Course I. General botany.

This course comprises a general survey of the plant kingdom with laboratory work on the cell, on the algae, lichens, fungi, mosses and ferns, gymnosperms and flowering plants. Lectures and laboratory work.

Or Course II. General plant morphology. First year.

This course comprises a thorough laboratory discipline in algae, fungi and lichens, and is the introductory course for students specializing in botany. Lectures, laboratory work and collateral reading throughout the year.

CHEMISTRY.

Course I. (a) General chemistry.

Lectures and laboratory work. The course includes a detailed study of the

chemical and physical properties of the non-metals and their more important compounds.

(b)

Lectures and laboratory work. A continuation of course (a) with an introduction to organic chemistry.

ANIMAL BIOLOGY.

Course I. General zoology. "Short course" or first year of the "long course."

Text-book, lectures, quizzes and laboratory work.

The course includes the elements of entomology, a general survey of the phyla of the animal kingdom and the elements of embryology. A collection of identified insects is required of each student.

A student may enter with two conditions in the foregoing entrance requirements, but must remove these conditions by the close of the first year. Blanks for certificates of credentials may be had upon application at the Dean's office.

N. B.—In September, 1905, the sophomore course in an accredited college or university, or its equivalent in satisfactory examinations upon the subjects of the course, will be added to the foregoing requirements for entrance to this college.

CONDITIONS.

Examinations of conditioned students and of applicants for advanced standing, in the studies of the first, second and third years, will be held during the first week of the semester. In the primary branches they occur upon the following dates:

September 3, 9 a. m. Anatomy, first year; Physiology, second year.

September 3, 2 p. m. Histology, first year; Chemistry, second year.

September 4, 9 a. m. Physiology, first year; Anatomy, second year.

September 4, 2 p. m. Chemistry, first year; Histology, second year.

Conditions may also be removed at the close of each semester.

No student will be eligible to final examinations in any branch who carries conditions of a previous year of that branch unremoved.

No student will be admitted to the fourth year who is conditioned in any of the studies of the first and second years.

Students who carry conditions into a succeeding year may find a resultant conflict of study hours. In that event they will give preference to the unfinished studies of the lower conflicting course.

CLASSIFICATION.

September 7th and 8th will be devoted to the classification of students. The opening lecture of the course will be delivered at 8 p. m., September 8th.

STANDING.

The standing of students is determined by the results of recitations, written examinations and laboratory work. It is indicated by the terms "passed" or "conditioned." Conditions may be removed as indicated above. Incomplete work must be made up before the final examinations of the following year.

Students must pass a majority of the studies of their year in order to classify in the next succeeding year.

Habitual absence without a satisfactory excuse, continued indifference to study, or persistently poor scholarship may subject the student to temporary or permanent suspension.

ADVANCED STANDING.

Applicants for advanced standing must pass the entrance examinations or present the usual equivalents. They must furnish satisfactory evidence of time spent and subjects covered in previous professional studies and must present themselves at the above dates and pass the examinations in all branches in which they wish to be exempt.

No conditions of advanced standing will entitle the student to take the two years of any graded study coincidentally.

Students will not be permitted to substitute private work in any branch for the regular college course work, excepting in the case of actual laboratory exercises done under the direct supervision of an instructor appointed by the chair and approved by the faculty. Examinations in such private laboratory work will be conducted by the chair. This rule does not apply to conditioned students.

Seniors in the college of science, literature and the arts, who contemplate entering the department of medicine, are permitted to elect courses in anatomy, histology and embryology, physiology and chemistry in this department in lieu of similar science courses in the college of science, literature and the arts. Since the medical practice act of this State requires four full years of medical study, these students must elect this work in the department of medicine, in order that it may be contributive toward the degrees given in both colleges.

ATTENDANCE.

Students are required to attend four-fifths of the lectures in each course. This rule is not intended for the benefit of those who seek admission after the opening of the college year, but is designed to cover cases of sickness or unavoidable absence. It does not apply to laboratory courses which must be taken in full and must be entered, invariably, during the first week in which they begin.

TERMS OF TUITION.

The college of medicine and surgery has adopted a system of annual fees, in which are included all charges for matriculation, lecture courses, laboratory courses, dissections and graduation, except a rental fee for microscopes.* These fees are \$100 per annum for the full course.

For the college of homeopathic medicine and surgery the level fees are as follows:

For the first year	\$100.00
For the second year	100.00
For the third year	80.00
For the fourth year	80.00

One-half of the annual fee will be payable when the student matriculates. The accountant's receipt for this portion of the fee will entitle the holder to take the entrance examinations and to classify. The second half will be payable at the opening of the second semester, January 21, 1904. If the applicant fails to pass the entrance examination, his fees will be returned by the accountant. Absence or failure to continue study will not entitle the student to return of fees, excepting in cases of special hardship, when application may be made to the executive committee of the Board of Regents.

A student who takes advanced standing will receive only a credit of five dollars upon his annual fee per semester of each laboratory course from which he may be exempt.

Students who are conditioned and fail to remove their conditions within one year shall be charged an extra examination fee.

Senior conditioned students who re-enter for work in any succeeding year will be charged a matriculation fee of ten dollars.

BREAKAGE AND LOSS.

In each laboratory course the student will be assigned a certain amount of apparatus and material, for which he will give a receipt.

For apparatus and material attaching to his laboratory desk he will also be held responsible. At the end of each course, if such apparatus and material are restored in good condition, this receipt will be returned to him.

A deposit of five dollars will be made with the accountant each year, by every student, at the time of enrollment as a *caution fee*. This fee is intended to cover the cost of unnecessary damage in the college buildings and of breakage and loss of laboratory apparatus and materials. It will be returned to the student at the close of each year, minus the cost of articles assigned to him, which are not returned in good condition, or of damage to college property for which he is individually responsible. If responsibility for such damage cannot be individually fixed, a pro rata charge upon all students will be made.

*In each semester a fee of \$2.00 to \$4.00 will be charged for the rental of a

microscope in each course in which its use is required, provided the student is not supplied with a satisfactory instrument of his own. It is an advantage for the student to possess a microscope.

SPECIAL STUDENTS.

Special students will pay to the accountant a fee of twenty dollars per year for each study they elect to pursue. They will be charged fees, varying from five to twenty dollars, for each laboratory course they may enter.

Graduate students will pay an admission fee of ten dollars which will entitle them to attend any lectures they may desire in regular courses.

CURRICULUM.

The course in the college of medicine and surgery leads to the degree of doctor of medicine. It covers a period of four years of collegiate study, each year representing nine months in actual residence.

The studies are graded, so far as practicable, throughout the four years and this grading is arranged with careful reference to the relation which the subjects naturally bear to each other.

The work of the first two years deals with the so-called scientific or laboratory branches; while that of the last two years includes the principles and practice of medicine and surgery, their associated specialties and the application of scientific or laboratory methods to clinical experience.

COURSES OF INSTRUCTION.

Instruction in the following named departments is received in common by the students of the colleges of medicine and surgery and homeopathic medicine and surgery.

COURSES OF INSTRUCTION.

HISTOLOGY AND EMBRYOLOGY.

The laboratory of histology and embryology occupies most of the first floor and portions of the third floor and basement of the laboratory of medical sciences.

The general laboratory, 44x72 feet, extends across the north wing and is abundantly lighted by large windows on three sides and part of the fourth. Study tables accommodating seventy students are placed directly under the windows. A second tier of desks provides for twenty other students. Each student is provided with a separate locker for the storage of apparatus and material. The special laboratory, 24x35 feet, for research work by advanced students, adjoins the general laboratory. The next apartment, the library of the laboratory, contains a reference library consisting of a small but carefully selected collection of related literature, both standard and periodical. In addition to the laboratory library, the other libraries of the University, together with the public libraries of Minneapolis and St. Paul, afford the student access to the best publications among current periodicals and monographs. The rooms across the hall are devoted to the office and private laboratories of the professor and his assistant. On the third floor are located a preparation room, a small laboratory for special students, a dark room, a room for copying and en-

larging, and a laboratory for photomicrography and projection. In the museum on this floor, are several cases containing series of embryos and histologic specimens. In the well-lighted basement are found a preparation room, 20x35 feet, for the hardening of tissues, &c., and an experimental laboratory and store room, 26x36 feet.

These laboratories are equipped with ninety Leitz' microscopes, each fitted with nose-piece and Abbe condenser; various forms of microtomes, such as freezing, Thoma, Minot, Schanze, &c., injection apparatus, aquaria thermostats, incubators, water baths, chemical hoods, a great variety of technical glassware, Grubler's strains, a set of His' wax models, photomicrographic and reconstruction apparatus, charts, reference cabinets containing carefully selected slides, a large collection of hardened histological and embryological material with an abundant supply of fresh tissues.

The courses are made as practical as possible, beginning with the techn'que of the microscope, followed by the preparation of permanent specimens. Collections of typical specimens, also, will be loaned to the students for study. During the two years' course the student will acquire a valuable collection of slides of his own preparation illustrating the structure and development of the human body.

The course is illustrated by charts and lantern-slides of histological and embryological specimens. Demonstrations are given under the microscope of typical sections of tissues and organs, accompanied by camera lucida drawings, or photomicrographs, with explanatory text.

All students are recommended to purchase a microscope at the beginning of their medical course. This instrument is an indispensable part of the outfit of a well-trained physician. Suitable microscopes can be purchased at from \$50 to \$60, which may be fitted at any time with such other parts as may be desired.

Students not owning microscopes will be furnished with instruments at a rental of \$4 for first year courses, and \$2 for second year courses.

Course I. General morphology and histology.

Lectures, demonstrations and laboratory work. The course includes the structure and manipulation of the microscope; the structure and properties of protoplasm; the cell, its structure; cell division and reproduction, leading to the consideration of the elements of structure in the vertebrata. A comparative study of the histology of the blood, of the epithelial, connective, muscular and nervous tissues and of the vascular and lymphatic systems of man and the vertebrata. Lectures, etc., 6 hours a week. Laboratory work, 18 hours a week, first half, first semester, first year.

PROFESSORS LEE AND NICKERSON AND M. L. NICKERSON.

Course II. Elements of vertebrate embryology and histogenesis.

Lectures, demonstrations and laboratory work. A comparative study of reproduction; the ovum, the spermatozoon, fertilization, cleavage, formation of blastodermic layers, the formation of the embryo, foetal envelopes, etc., with practical work on chick and frog embryos. The differentiation and histogenesis of the tissues, etc. Lectures, etc., 6 hours a week; laboratory work, 18 hours a week, first semester, first year. Open to those who have completed course I.

PROFESSORS LEE AND NICKERSON AND M. L. NICKERSON

Course III. Microscopic anatomy of man and vertebrates.

Lectures, demonstrations and laboratory work. Advanced methods of histological technique, with practical laboratory work. The comparative study of the morphology, microscopic anatomy, origin and devel-

opment of the various organs of the integumentary, alimentary, respiratory and uro-genital systems, etc. Lectures, etc., 6 hours a week; laboratory work, 18 hours a week. First semester, first year. Open to those who have completed course 1 in histology and embryology.

PROFESSORS LEE AND NICKERSON AND M. L. NICKERSON.

Course IV. Vertebrate neurology and neurogenesis.

Lectures, demonstrations and laboratory work. The comparative study of the morphology, microscopic anatomy, origin and development of the central, peripheral and sympathetic nervous systems and the organs of special sense. Lectures, etc., 4 hours a week; laboratory, 18 hours a week. First half, second semester, second year.

PROFESSORS LEE AND NICKERSON AND M. L. NICKERSON.

Course V. Human embryology and organogenesis.

A comparative study of human and mammalian embryos, including impregnation, segmentation, and implantation of the ovum; the formation, structure and relationships of the placenta and foetal envelopes; the details of organogenesis, etc., studied in a practical manner upon a very large collection of serial sections of human and mammalian embryos, cut in various planes and representing all phases of development. First half, second semester, second year.

PROFESSORS LEE AND NICKERSON AND M. L. NICKERSON.

The following elective courses are open to properly qualified senior students and will consist of practical work in the laboratory upon special problems, a prescribed course of reading, with reports of work, and of lectures and demonstrations to be given from time to time.

Course VI. Methods of microscopical technique.

The preparation and use of the various solutions employed in fixing, hardening and staining, methods of embedding, sectioning, reconstruction, etc.

Course VII. (a) Comparative histology and histogenesis of tissues.

The animal cell, the epithelial, connective, muscular, and nervous tissues, blood, etc.

(b) *Comparative histology and histogenesis of the tissues.* The epidermal, digestive, respiratory and uro-genital systems of organs.

(c) *Comparative histology and histogenesis of the nervous system and sense organs.* Central nervous system, etc., after the methods of Weigert, Golgi, etc.

Course VIII. The animal parasites of man.

The means of recognition, morphology, structure and life history of the animal parasites of man.

ASSISTANT PROFESSOR NICKERSON.

Course IX. Comparative embryology of man and vertebrates.

A detailed study of the various stages in the development of vertebrate types.

Course X. Research work in histology and embryology.

Opportunity will be offered for those desiring to pursue original research and investigation.

The following text and reference books should be consulted:

Histology. Wilson's, The Cell; Bohm-Davidoff-Huber's Histology; Piersol's Histology; Szymonowicz-MacCullum's Histology; Stohr's Histol-

ogy; Hertwig's The Cell; Kolliker's Gewebelehre; Oppel's Mikroskopische Anatomie; Duval's Histologie; Ranvier's Histologie; Klein's Histology; Weyesses' Histology; Sobotta-Huber's Atlas; Lee's Vade Mecum; Mann's Histology.

Embryology. Minot's Human Embryology; Minot's Laboratory text book; Hertwig's *Handbuch*; Hertwig-Mark's Embryology; McMurrich's Embryology; Kolliker's Embryologie; Kollman's Embryologie; Marshall's Embryology; Heisler's Embryology; Schenks' Embryologie; Schultze's Embryologie.

Neurology. Barker's Nervous System; Gordinier's Nervous System; Van Gehuchten's System Nerveux; Kolliker's Gewebelehre II; Obersteiner; Edinger's Vorlesungen; Sabin's Atlas.

ANATOMY.

The department of anatomy occupies a separate building, adapted to its work and equipped with the best modern appliances. It includes two large students' dissecting rooms, the general laboratories of anatomy, a bone laboratory for bone research work, the offices of the professor and demonstrator of anatomy, preparation rooms and morgue. An ample supply of dissecting material is provided.

In the first year the subjects of osteology, syndesmology and myology are pursued by means of lectures, laboratory demonstrations and recitations from the specimen.

The bones of a human skeleton are loaned to the student for purposes of study and recitation.

Angiology and splanchnology are studied in connection with the dissection and laboratory demonstrations of the thoracic, abdominal and pelvic viscera upon the lower animal. This is followed by the dissection of one-half of the human body.

In the second year the alimentary canal, respiratory tract, genito-urinary system, organs of special sense and the cerebro-spinal nervous system are pursued by means of lectures, recitations and laboratory demonstrations. The dissection of the human body is completed and followed by a series of lectures and demonstrations on descriptive and surgical anatomy.

The student dissects throughout the second semester of the second year, recites upon the subject and observes demonstrations made by a corps of assistants under the direction of the demonstrator of anatomy.

Dissection is supplemented by drawings from dissections, made upon outlines of the human skeleton, which are furnished to the student.

In the third year the student takes up the study of the human body from a topographical and surgical standpoint and is given a thorough review of the surgical regions, emphasizing the practical points in the relations, structure and distribution of the nervous system.

Course I. Osteology.

Lectures and recitations upon the human skeleton and supplementary work on the osteology of domestic mammals: 4 hours each week, for 5 weeks of first semester. Practical study of the skeleton, followed by recitations from the specimen, taken by the class, in sections; first semester. Required of all first year students.

Course II. Syndesmology.

Lectures, recitations and laboratory demonstrations, 4 hours each week, for 3 weeks first semester, first year. Open to those who have taken course I.

Course III. Myology.

Lectures and recitations, covering the entire muscular and arterial systems of the human body, with a supplementary study of comparative myology; 4 hours each week for four weeks. Laboratory work consists in identifying the muscles of the human body on dissected preparations and showing their actions. Class, in sections, 4 hours each week, first semester, first year. Open to those who have taken course II.

Course IV. Splanchnology and angiology.

Lectures on the thoracic, abdominal and pelvic viscera, 4 hours each week, for 3 weeks. Open to those who have taken course III. Laboratory work in demonstrating and dissecting the thoracic, abdominal and pelvic organs of the human subject or of the dog or sheep. First semester, first year.

PROFESSOR ERDMANN.

Recitations upon the subjects of the first year's work, conducted in sections by

DRS. H. K. READ AND E. R. HARE.

Course V. The nervous system.

Cerebro-spinal axis and its membranes; the cranial and spinal nerves; the sympathetic nervous system, and the special-sense organs. Lectures, recitations and dissections of the brain, 5 hours each week, for 4 weeks, first half, second semester, second year.

PROFESSOR ERDMANN.

Course VI. Dissections.

This work extends over a period of 8½ weeks, occupying with the lecture course the half days of this period each week. The method of work follows that laid down in Holden's Manual of Dissections.

DRS. H. K. READ AND E. R. HARE.

The second year lecture and dissecting courses are open to those having completed the first year's work in anatomy and histology.

Daily recitations, upon the subjects of the second year's course, conducted in sections.

PROFESSOR ERDMANN, DRs. H. K. READ AND E. R. HARE.

Course VII. Surgical anatomy.

The instruction consists of dissections, demonstrating the relations of structures composing the surgical regions of the body; demonstrations, upon the living subject, showing the anatomical and surgical landmarks and their applications; also the location, by surface tracings, of the viscera contained in the various cavities and of the important arteries, veins and nerves; 4 hours a week, second half, second semester. Required of third year students.

PROFESSOR ERDMANN

Course VIII. Applied anatomy of the nervous system.

Elective.

Opportunity is afforded for advanced work in practical anatomy at any time during the college year.

The following text-books should be consulted:

Anatomy.

First year—

Gray's Descriptive and Surgical Anatomy, revised American edition.

Morris' Text-book of Human Anatomy.

Quain's Anatomy, 10th edition, Vol. II, Pts. I and II.

Gerrish's Anatomy.

Cunningham's Anatomy.

Second and third years—

- Gray's Anatomy, revised American edition.
- Quain's Anatomy, 10th edition.
- Morris' Text-Book of Anatomy.
- Gerrish's Anatomy.
- Cunningham's Anatomy.
- Spalteholtz' Atlas of Human Anatomy.
- Holden's Practical Anatomy.
- Erdmann's Manual of Dissections of the Human Body.
- Owen's Manual of Anatomy.
- Treves Applied Anatomy.

Collateral reading—Flower's Osteology of Mammals; Gegenbauer's Elements of Comparative Anatomy; Chauveau's Comparative Anatomy; Wjeder-sheim's Elements of Comparative Anatomy; McClellan's Regional Anatomy; Meynert's Psychiatry, Part I: anatomy, physiology and chemistry of the brain; Deaver's Surgical Anatomy; Edinger's Anatomy of the Nervous System; Hildebrand's Chirurgisch Topographise Anatomie.

PHYSIOLOGY.

The department of physiology occupies a suite of rooms in the laboratory of the medical sciences, including the laboratory of experimental physiology, the laboratory of physiologic chemistry and practical dietetics, a demonstration and recitation room, the laboratory library and the office of the professor in this branch. A large amphitheatre, adapted to the demonstration of major experiments, immediately adjoins the physiologic laboratories and is used, also, for lecture purposes by this and other chairs.

In the basement of the laboratory of medical sciences, the chair maintains large and well-equipped animal-rooms, which are furnished with a large aquarium, frog tanks, animal enclosures and breeding cages. From this animal room are furnished supplies of material and animals for the work in experimental physiology, physiologic chemistry, histology, embryology, pathology and bacteriology. The hygienic conditions of the room are studied carefully, with a view to maintaining the physiologic and structural integrity of its animal occupants as perfectly as possible.

The physiologic laboratories are equipped with a full supply of apparatus, instruments, etc., for experimental purposes, and with materials, glassware, digesters, water baths, ventilating hoods, etc., for the work in physiologic chemistry. Their outfit includes sets of vivisection instruments, an artificial respiratory machine, batteries, Du Bois-Reymond coils, galvanometers, rheostats, moist muscle chambers, recording drums, Ludwig's kymograph, spring myograph, Burdon-Sanderson's stethometer, stethoscopes, phonendoscopes, Dudgeon's and muscle chambers, recording drums, Ludwig's kymograph, spring myograph, Bur-Marey's sphygmographs, cardiographs, Runne's chronograph, Roy's tonometer, Gaskell's clamp, oncometers, haemometers, haemoglobinometers, haematocrits, plethysmograph, etc., etc. They are furnished with motor power for the operation of recording apparatus and for the manufacture of apparatus in the laboratory workshop.

The course in physiology is graded in the first and second years. In the first year, the student hears lectures, recites and attends demonstrations and practical exercises in general physiology. These embrace the discussion, and, so far as possible, the observation of the physiologic ingredients of the animal body: the study of the physiology of cell-life, of the fundamental properties of the cell, of the nutritive media, blood, lymph and chyle; of the elementary functions of the nervous system: of the muscular tissues, the connective tissues and the epithelial

tissues; of the vascular mechanism; of the alimentary canal; of the organs of secretion, respiration, excretion, and metabolism.

In the second year, the work is made as practical as possible and includes the study of such advanced topics as reproduction, the physiology of foetal life, of infancy, of maturity and of old age; and the functions of the brain, spinal cord, ganglionic and peripheral nerve systems. Twelve hours each week, during the first half of the first semester, are occupied in laboratory work in physiologic chemistry. This course affords the student a practical knowledge of the tissues and fluids of the body from a chemical standpoint. It embraces studies in the several classes of proteids, in fats, carbohydrates, bone, muscle, blood, milk, the digestive fluids, glycogen, etc.

A similar number of hours during the second half of the first semester are devoted to experimental physiology. For this work the class is divided into sections and the instruction is individualized so far as possible. The student is familiarized with physiologic apparatus and its uses, with forms of electrical stimulation and with methods of experimentation, while his knowledge of physiologic principles is strengthened by the observation of functional facts. Demonstrative work is combined with the individual experiments performed by the pupil.

In the fourth year, an elective course in practical dietetics is conducted during the second half of the first semester. It deals with the analysis of foods, with the general principles of food preparation and with selections of a suitable dietary for the several periods of life.

Practical talks upon the principles and means of food preparation, the serving of food, food selection, invalid and infant dietary, etc., are associated with this course. A trained instructor conducts the exercises in hygienic cooking.

A laboratory reference library is accessible to the students for collateral reading.

Course I. General physiology.

Lectures, recitations and demonstrations, dealing with the physiologic chemistry of the human body; the physiologic properties of the cell; the nutritive media; the nervous mechanisms in general; the muscular tissues, the connective tissues and the epithelial tissues, as the structural bases of the animal body. Eight hours a week, second semester, first year.

PROFESSOR BEARD.

Course II. Systemic physiology.

Lectures, recitations, demonstrations and practical exercises. This course includes the physiology of the vascular system; the digestive system; the respiratory system; the secretory and excretory systems; and metabolism. Eight hours a week, second semester, first year. Open to those who have completed course I.

PROFESSOR BEARD.

Recitations upon the subjects of the first year are conducted in sections of the class.

PROFESSOR BEARD, DRs. M. R. WILCOX, AND G. D. HAGGARD AND MISS WILKINSON.

Course III. Advanced physiology.

Lectures, recitations and demonstrations. The course includes the discussion of the statistics of nutrition; of reproduction; of the physiologic changes incident to successive periods of life, and of the functions of the nervous system. Six hours a week, first semester, second year. Open to those who have completed the courses in physiology of the first year.

PROFESSOR BEARD.

Recitations upon the subjects of this course are conducted in sections of the class.
PROFESSOR BEARD AND DR. WILCOX.

Course IV. Physiologic chemistry and microscopy.

Laboratory work and demonstrations. A practical study of the several classes of proteids; of carbohydrates, fats, muscle and bone; of gastric juice, saliva, pancreatic juice and bile in their respective digestions; of glycogen, and of blood, lymph, chyle and milk. Microscopic study of the carbohydrates in vegetables and animal forms; of the physiologic emulsions of fat; of the crystalline waste products, and of the physiologic conditions of the blood cells and the processes of fibrin formation. Practical instruction is given during this course in the enumeration of the blood cells, in the estimation of hæmoglobin and of the corpuscles in mass, in the spectroscopic examination of the blood and in the use of the polariscope. Nine hours a week, first half of first semester, second year. Open to those who have completed courses I and II.

PROFESSOR BEARD, DRs. M. R. WILCOX, AND G. D. HAGGARD AND MISS WILKINSON.

Course V. Experimental physiology.

Laboratory work and demonstrations. A study of physiologic apparatus, electrical stimuli and methods of experimentation; the demonstration of experiments which illustrate physiologic function in the muscular, nervous, vascular, respiratory and glandular systems. Six hours a week, second half of first semester, second year. Open to those who have completed course IV.

PROFESSOR BEARD, DRs. M. R. WILCOX, AND G. D. HAGGARD AND MISS WILKINSON.

Text-Books:

First and second years—

Foster's Physiology, sixth edition.

Howell's American Text-Book of Physiology.

Stirling's Practical Physiology.

Waller's Human Physiology.

Collateral reading—Landolt and Stirling's Handbook of Physiology; Chapman's Physiology; Stewart's Practical Physiology; Blyth's Foods; Raymond's Physiology; Kirk's Physiology; Hutchinson's Dietetics.

Course VI. Practical dietetics. (Elective.)

Lectures and laboratory exercises. A study of food analysis, food preparation and of the general principles of food selection, including a discussion of invalid and infant dietary. Six hours a week, second half of first semester, fourth year.

PROFESSOR BEARD AND MISS WILKINSON.

CHEMISTRY.

The work in medical chemistry is carried on in a building especially arranged for it. The qualitative laboratory has a floor space of about 2,300 square feet and accommodates 100 students at a time. It is used for instruction in general chemistry and qualitative analysis. The quantitative laboratory has a floor space of about 1,500 square feet and accommodates 68 students at a time. It is used for instruction in urinalysis, toxicology, quantitative analysis, organic chemistry and chemical hygiene. The water analysis laboratory has a floor space of 300 feet and is used exclusively for the sanitary examination of water.

Course I. The chemistry of the elements, with especial reference to inorganic materia medica.

Lectures and recitations; second semester, first year. Laboratory work in the chemistry of metallic and non-metallic elements. Second semester, first year.

PROFESSOR CAREL.

Course II. Qualitative analysis.

Lectures and recitations; second semester, first year. Laboratory work, corresponding to the above and including the qualitative determination of metals and of acids. Second semester, first year.

PROFESSOR CAREL.

Course III. The qualitative and quantitative analysis of the urine.

Lectures and recitations; first semester, second year. Laboratory work, including the qualitative analysis of twenty specimens of normal and abnormal urine, the quantitative determination of sugar, albumen, chlorides, phosphates and urea, and the standardization of reagents. First semester, second year.

PROFESSOR CAREL.

Course IV. Toxicology. The chemistry of the poisons and of their antidotes and the study of symptoms, treatment and post-mortem appearances following the introduction into the animal body of each and every poison.

Lectures and recitations; first semester, second year. Laboratory course in toxicology, including the chemical reactions of poisons and their antidotes; the physiological action of important poisons; the effects of antidotes; and post-mortems, followed by a toxicological examination of the blood, urine and various organs. (Optional.) First semester, second year.

PROFESSOR CAREL.

Course V. Chemistry of Hygiene. The chemistry of air, soil and water.

Lecture and recitations; first semester, second year. Laboratory course in the sanitary examination of air and water. (Optional.) First semester, second year.

PROFESSOR CAREL.

Course VI. Chemistry of the Compounds of Carbon. A condensed course upon those features of organic chemistry which are of special interest and value to the physician.

Lectures and recitations; first semester, second year. Laboratory work in the preparation of important organic bodies used in medicine. (Optional.) First semester, second year.

PROFESSOR CAREL.

The following text-books will be recommended in the above courses:

Carel's Inorganic Chemistry Syllabus.

Bell's Notes on General Chemistry and Qualitative Analysis.

Carel's Chemical Urinalysis.

Reese's Toxicology.

Bell's Outlines of Organic Chemistry.

Collateral reading: Remsen's College Chemistry; Witthaus' Manual of Chemistry; Richter's Inorganic Chemistry; Roscoe and Schorlemmer's Treatise on Chemistry, Vols. I and II; Dammer, Anorganische Chemie; Graham-Otto, Anorganische Chemie; Purdy's Urinalysis; Tyson's Urinalysis; Neubauer and Vogel, Analyse des Harns; Woodman and Tidy's Forensic Medicine and Toxicology; Taylor's Treatise on Poisons; Dragendorff, Die Ermittlung von Giften; Witthaus and Becker's Medical Jurisprudence and Toxicology; Husemann and Hilger, Die Pflanzenstoffe; Parks' Hygiene; Rideal's Sewage; Leffman or Simon's Water Analysis; LeConte's

Geology; Hill or Turneure and Russell on Public Water Supplies; Bernthsen, Organische Chemie; Remsen's Organic Chemistry; Perkin and Kipping's Organic Chemistry; Levy or Fisher, Organischer Preparate.

PATHOLOGY AND BACTERIOLOGY.

The laboratories of pathology and bacteriology occupy spacious quarters in the laboratory of medical sciences. A general laboratory, 44x70 feet, is well lighted by windows on three sides and a part of the fourth. Electric light for microscopic and general illuminating purposes is also provided. The arrangement is such that four students are grouped so as to have a sink, with gas and electric light, distilled and city water and waste connection, and ample desk space next the windows. Eight lockers, arranged beneath the table and on the walls, provide for apparatus, microscopes, etc., and are given at the beginning of the course to each quartette. Immediately behind and accessible to each student, are sterilizers, incubators, blow-pipes, etc. Cupboards, drawers, a large incubator, sinks, fume chambers, demonstration and distribution tables, complete the arrangement of the room.

Two private rooms of the demonstrators flank on either side. Adjoining one of these are the department library and the office and private laboratory of the professor of pathology and bacteriology. Adjoining this is the private laboratory of the professor of surgical and clinical pathology. Specimens illustrative of surgical pathology are here prepared and diagnostic work done.

In the basement of the building the department has store rooms and a room where pathological animals are housed. Here too are equipped laboratories for research in bacteriology and experimental pathology, as well as a room in which all the culture media are made.

In the third story, immediately above and of the same size as the large laboratory, is a museum for the storage and exhibition of pathological specimens. A preparation room for their reception and assorting adjoins it.

The hospitals of Minneapolis and St. Paul afford a large supply of material and frequent opportunities for post-mortem examinations.

From many institutions and physicians throughout the state, valuable and interesting gross and microscopic materials are frequently received.

MICROSCOPES.

An adequate equipment of microscopes with attachments, immersion lenses, etc., permits of the rental of an instrument to each student, at a cost of \$2.00 per course, whenever he is unprovided with one suitable for his purposes.

BACTERIOLOGY.

Course I. General bacteriology.

Lectures and demonstrations. The general scope of bacteriology, the history of its development and the biological and chemical problems involved in the life history of bacteria will be dealt with. The classification of the various bacterial forms, the methods of isolation and culture and the composition and manufacture of culture media will be studied until a thorough knowledge of technique is acquired. General and special study of the various antiseptics, disinfectants and bactericidal substances and conditions will be undertaken.

Laboratory work involving the making of their own culture media by the students, the study of bacteria in cultures and under the microscope, technique of staining and other methods, including observa-

tions of chemical and biological peculiarities, will be thoroughly carried out. Testing of various germicides—chemical and physical—and the use of bacteriological methods in the examination of drinking water will form an important part of the work. Eighteen hours per week during the last eight weeks of the second semester, second year.

PROFESSOR WESBROOK, DR. CHOWNING.

Course II. General pathology.

Lectures, demonstrations and laboratory work on the general processes involved in disease, to include the study of inflammation, the degenerations and tumors. Eighteen hours per week during the last eight weeks of the second semester, second year.

PROFESSOR WESBROOK, DR. WILSON.

Course III. Pathology of special diseases (includes bacteriology).

Disease processes will be grouped, so far as practicable, according to their etiology. Instruction will be afforded by means of lectures, demonstrations on museum specimens and preparations, and laboratory work on materials secured from clinical cases and at autopsy.

The course will consist of instruction in

1. Pathology of infectious diseases.

(a) Special bacteriology of the infectious diseases with the cultivation on the various media of all the important pathogenic bacteria, sown and kept under observation by each student. Fluids and tissues from clinical cases (human and animal) will be supplied for microscopic and cultural examination and an intimate relationship with clinical and pathological work maintained.

(b) Special pathology of the infectious diseases. Concurrently with the bacteriology and parasitology of each of the diseases, the pathology of each infection will be studied.

The important gross and microscopic lesions in all the organs will be illustrated from clinical and autopsy material fresh and preserved and supplemented by experiment work. Each student will be required to prepare and examine under the microscope selected fresh and stained specimens of morbid tissues, fluids, etc.

PROFESSOR WESBROOK, ASST.-PROFESSOR WHITE, DR. CHOWNING.

2. Pathological diseases of toxic and obscure origin. Under this are included the special degenerations, inflammations and other pathological conditions not already included under infectious diseases.

ASST.-PROFESSOR WHITE, DR. CHOWNING.

Course III. Pathological and special diseases.

Fifteen hours per week throughout the first semester of the third year.

Course IV.

Autopsies and post-mortem technique. Students will have an opportunity of personally taking part in this work, under the direction of the pathologists in charge, in the hospitals of Minneapolis and St. Paul. A knowledge of the technique of post-mortem work and of morbid anatomy will be thus afforded. Throughout the third and fourth years.

ASST.-PROFESSOR WHITE AND DR. ROTHROCK.

Course V. Special pathology of the nervous system.

An elective course limited to twenty-five students.

So far as possible, the clinical history, autopsy notes, gross specimens and sections stained by various special methods will be presented of

individual cases representing the principal organic diseases of the nervous system. Twelve hours per week, first four weeks, second semester, fourth year.

DR. WILSON.

Course VI.

Laboratory course on the microscopic study and diagnosis of tumors. (Elective for a limited number of students in fourth year.) This course includes the comprehensive study of tumors, with the view of giving the student a knowledge of the methods employed in the laboratory diagnosis of this class of pathological conditions and familiarizing him with the characters of the commoner as well as the rarer types, special attention, however, being given to the latter. It is intended to supplement the course on the surgical pathology of tumors by Professor Stewart. Twelve hours per week, four weeks, second semester, fourth year.

ASST.-PROFESSOR WHITE.

Course VII. Research work in one of the following lines:

(a) General pathology.

PROFESSOR WESBROOK.

(b) Special pathology and bacteriology and technique.

ASST.-PROFESSOR WHITE.

Second semester of third and throughout the fourth year, hours assigned.

Course VIII. Surgical pathology.

(See principles of surgery). This course will consist of lectures and laboratory demonstrations and will cover the general subject of the pathological and bacteriological basis of surgery. The lectures will be illustrated by charts and diagrams, by fresh and preserved specimens and, so far as practicable, demonstrations will be given of the various processes of the bacteria concerned. Especial attention will be given to inflammation and its complications, to the infectious diseases of surgical importance and to tumors. Two hours a week, first semester, third year, and 2 hours a week, second semester, fourth year.

PROFESSOR STEWART.

CALENDAR

FIRST SEMESTER.

- SEPTEMBER 1. Registration and assignment of seats.
 2-4. Entrance examinations, 9 a. m. and 2 p. m.
 Examinations for conditions and advanced standing, 9 a. m.
 and 2 p. m.
 7-8. Classification of students.
 8. Opening lecture.
 9. Lecture and laboratory courses begin.
- NOVEMBER 26. THANKSGIVING DAY.
- DECEMBER 19. Holiday vacation begins.
 25. CHRISTMAS DAY.
- JANUARY 1. NEW YEAR'S DAY.
 5. Work resumed.
 13. First semester ends.
 14-20. Mid-year examinations.

SECOND SEMESTER.

- JANUARY 21. Second semester begins.
- FEBRUARY 12. LINCOLN'S BIRTHDAY—Holiday.
 22. WASHINGTON'S BIRTHDAY—Holiday.
- MAY 14. Second semester ends.
 16. Final examinations begin.
 27. Annual meeting of the faculty.

College of Medicine and Surgery

THE FACULTY.

CYRUS NORTROP, LL. D., *President.*

PARKS RITCHIE, M. D., *Dean and Professor of Obstetrics.*

CHARLES A. WHEATON, M. D., *Emeritus Professor of Surgery.*

THOMAS G. LEE, B. S., M. D., *Professor of Histology and Embryology and Librarian.*

CHARLES A. ERDMANN, M. D., *Professor of Anatomy.*

RICHARD OLDING BEARD, M. D., *Secretary and Professor of Physiology.*

HENRY MARTYN BRACKEN, M. D., L. R. C. S., Edin., *Professor of Materia Medica and Therapeutics.*

FRANK FAIRCHILD WESBROOK, M. A., M. D., C. M., *Professor of Pathology and Bacteriology.*

J. W. BELL, M. D., *Professor of Physical Diagnosis and Clinical Medicine.*

CHARLES LYMAN GREENE, M. D., *Professor of Theory and Practice of Medicine.*

CHARLES H. HUNTER, A. M., M. D., *Clinical Professor of Medicine and Chief of Medical Clinic.*

EVERTON J. ABBOTT, A. B., M. D., *Clinical Professor of Medicine and Chief of Medical Clinic.*

HENRY L. STAPLES, A. M., M. D., *Clinical Professor of Medicine.*

JAMES H. DUNN, M. D., *Professor of Surgery.*

FREDERICK A. DUNSMOOR, M. D., *Professor of Operative and Clinical Surgery.*

JAMES E. MOORE, M. D., *Professor of Clinical Surgery.*

J. CLARK STEWART, B. S., M. D., *Professor of Principles of Surgery.*

JUSTUS OHAGE, M. D., *Professor of Clinical Surgery.*

JOHN T. ROGERS, M. D., *Professor of Clinical Surgery.*

ARTHUR J. GILLETTE, M. D., *Professor of Orthopedic Surgery.*

A. B. CATES, A. M., M. D., *Professor of Obstetrics.*

ALEX J. STONE, M. D., LL. D., *Professor of Diseases of Women.*

AMOS W. ABBOTT, M. D., *Clinical Professor of Diseases of Women.*

A. MCLAREN, A. B., M. D., *Clinical Professor of Diseases of Women.*

JOHN F. FULTON, Ph. D., M. D., *Professor of Ophthalmology and Otology.*

FRANK C. TODD, M. D., *Clinical Professor of Ophthalmology and Otology.*

C. EUGENE RIGGS, A. M., M. D., *Professor of Nervous and Mental Diseases.*

W. A. JONES, M. D., *Clinical Professor of Nervous and Mental Diseases.*

THOS. S. ROBERTS, M. D., *Professor of Diseases of Children.*

MAX P. VANDER HORCK, M. D., *Professor of Diseases of the Skin and of the Genito-Urinary System.*

W. S. LATON, M. D., *Professor of Diseases of the Nose and Throat.*

ARTHUR SWEENEY, M. D., *Professor of Medical Jurisprudence.*

J. E. SCHADLE, M. D., *Clinical Professor of Diseases of the Nose and Throat.*

CORPS OF CLINICAL PROFESSORS AND INSTRUCTORS.

BURNSIDE FOSTER, M. A., M. D., *Clinical Professor of Diseases of the Skin and Lecturer upon History of Medicine.*

JAMES T. CHRISTISON, M. D., *Clinical Professor of Diseases of Children.*

C. NOOTNAGEL, M. D., *Clinical Professor of Medicine.*

L. A. NIPPERT, M. D., *Clinical Professor of Medicine.*

H. J. O'BRIEN, M. D., *Clinical Professor of Surgery.*

J. WARREN LITTLE, M. D., *Clinical Professor of Surgery.*

GEORGE D. HEAD, B. S., M. D., *Professor of Clinical Microscopy and Medicine.*

HERBERT W. DAVIS, M. D., *Clinical Instructor in Obstetrics.*

GEORGE M. COON, M. D., *Clinical Instructor in Genito-Urinary Diseases.*

ANDREW M. HENDERSON, M. D., *Clinical Instructor in Medicine.*

- J. L. ROTHROCK, M. D., *Clinical Instructor in Pathology and Gynecology.*
 L. B. WILSON, M. D., *Senior Demonstrator in Pathology.*
 S. M. WHITE, B. S., M. D., *Assistant Professor of Pathology and Bacteriology.*
 WM. M. CHOWNING, B. A., M. D., *Junior Demonstrator of Pathology and Bacteriology.*
 H. C. CAREL, B. S., *Assistant Professor of Chemistry.*
 WINFIELD S. NICKERSON, Sc. D., *Assistant Professor of Histology.*
 MARGARET L. NICKERSON, M. A., *Instructor in Histology.*
 M. RUSSELL WILCOX, M. D., *Demonstrator in Physiology.*
 ELEANOR M. WILKINSON, *Instructor in Physiology and Dietetics.*
 H. K. READ, M. D., *Demonstrator of Anatomy.*
 GEO. E. SENKLER, M. D., *Clinical Instructor in Physical Diagnosis.*
 A. W. DUNNING, M. D., *Clinical Instructor in Nervous and Mental Diseases.*
 FREDERICK LEAVITT, M. D., *Clinical Instructor in Obstetrics.*
 J. C. LITZENBERG, B. S., M. D., *Clinical Instructor in Obstetrics.*
 F. R. WRIGHT, M. D., *Clinical Instructor in Dermatology and Genito-Urinary Diseases.*
 A. E. BENJAMIN, M. D., *Clinical Instructor in Gynecology.*
 H. P. RITCHIE, Ph. B., M. D., *Clinical Instructor in Gynecology.*
 H. L. WILLIAMS, M. D., *Clinical Instructor in Gynecology.*
 S. P. REES, B. S., M. D., *Instructor in Physical Diagnosis and Clinical Medicine.*
 A. T. MANN, B. S., M. D., *Clinical Instructor in Surgery.*
 JUDD GOODRICH, M. D., *Clinical Instructor in Surgery.*
 WARREN A. DENNIS, M. D., *Clinical Instructor in Surgery.*
 A. R. COLVIN, M. D., *Clinical Instructor in Surgery.*
 E. V. APPEBY, M. D., *Clinical Instructor in Ophthalmology.*
 WM. R. MURRAY, B. A., M. D., *Clinical Instructor in Ophthalmology and Otolology.*
 JOHN B. BRIMHALL, M. D., *Clinical Instructor in Orthopedic Surgery.*
 ALFRED LIND, B. S., M. D., *Lecturer in Mechano-therapy.*

CLINICAL AND LABORATORY ASSISTANTS.

- B. S. NICKERSON, B. S., *Instructor in Chemistry.*
 A. A. LAW, M. D., *Assistant in Operative Surgery.*
 R. A. CAMPBELL, M. D., *Assistant in Diseases of the Nose and Throat.*
 CHARLES R. BALL, M. D., *Assistant in Nervous and Mental Diseases.*
 WALTER RAMSEY, M. D., *Assistant in Pediatrics.*
 DAVID LANDO, M. D., *Assistant in Medicine.*
 E. R. HARE, M. D., *Prosector in Anatomy.*
 W. H. CONDIT, B. S., M. D., *Assistant in Materia Medica and Surgery.*
 GEO. D. HAGGARD, M. D., *Assistant in Physiology.*
 P. A. HOFF, M. D., *Assistant in Clinical Medicine.*
 LESTER W. DAY, M. D., *Assistant in Clinical Medicine.*
 JAS. T. GILFILLAN, M. D., *Assistant in Clinical Medicine.*
 MARION A. MEAD, M. D., *Assistant in Laryngology.*
 L. O. DART, M. D., *Assistant in Pediatrics.*
 H. L. ULRICH, M. D., *Assistant in Clinical Microscopy.*
 R. E. FARR, M. D., *Assistant in Surgery.*
 A. M. WEBSTER, B. A., *Instructor in Latin.*

UNIVERSITY SCHOLARS.

GIVING INSTRUCTION AND ASSISTING IN LABORATORIES.

- In Anatomy*—Karl Klemer.
In Histology and Embryology—Herbert Coulter, E. E. Olander, C. W. Wilkowski,
 J. E. Hynes, C. C. Tyrrell.
In Bacteriology and Pathology—Chelsea Pratt, H. W. Old, D. L. Tilderquist, F.
 C. Schuldt, W. F. Braasch, F. W. Davis.
In Surgical Pathology—O. W. Rowe.
In Chemistry—A. E. Carr, M. Lando.

GRADED SYSTEM OF STUDY.

FIRST YEAR.

Histology and embryology, anatomy, physiology, chemistry, materia medica.

SECOND YEAR.

Histology and embryology, anatomy, physiology, chemistry, general bacteriology and pathology.

THIRD YEAR.

Surgical anatomy, special pathology, and bacteriology, surgical pathology, operative surgery, practice of surgery, practice of medicine, diseases of children, obstetrics, physical diagnosis, therapeutics.

FOURTH YEAR.

Practice of surgery, practice of medicine, clinical obstetrics, surgical pathology, practical physical diagnosis, nervous and mental diseases, gynecology, ophthalmology and otology, genito-urinary diseases, orthopaedia, diseases of the skin, diseases of the nose and throat, hygiene.

ELECTIVE COURSES.

The following subjects, arranged in the fourth year, are electives: Operative surgery, therapeutics, practical dietetics, examination for life insurance, history of medicine, mechano-therapy, medical jurisprudence, pathology of the nervous system, radio-diagnosis and therapy, ophthalmoscopy, methods of microscopical technique, comparative histology and histogenesis of tissues, the animal parasites of man, comparative embryology of vertebrates, electro-therapeutics, microscopic study and diagnosis of tumors, clinical microscopy, special course in practical pathology, applied anatomy of the nervous system.

Senior students are required to elect four of these courses. They will be required to complete and to pass satisfactory examinations upon the subjects elected. The remaining subjects they may follow at their pleasure, without required examination.

SIX YEARS' COURSE.

With the season of 1903-04, the University will offer a six years' course of study in the colleges of science, literature and the arts and of medicine and surgery which will lead to the degree of bachelor of arts, at the end of a four years' course, and to that of doctor of medicine at the end of the six years' course. Students who intend to pursue the study of medicine are especially urged to enter this course, the subjects of which have been planned for their best equipment.

An outline of this course follows:

FIRST YEAR.

1. *Rhetoric*, two hours each week throughout the year.
2. **German*, four hours each week throughout the year, grammar and literature.
3. *Botany*, four hours each week throughout the year.
4. *Chemistry*, four hours each week throughout the year.

5. *Zoology*, four hours each week throughout the year.
6. *Plane Trigonometry*, four hours each week for twelve weeks of second semester.

**Note*.—Students who enter with two years of German may elect French in its stead in the first and second years.

SECOND YEAR.

1. *Rhetoric*, two hours each week throughout the year.
2. *German*, classical and scientific, four hours each week throughout the year.
3. *Chemistry*, four hours each week throughout the year.
4. *Comparative Anatomy of Vertebrates*, four hours each week throughout the year.
5. *Physics*, four hours each week throughout the year.

THIRD YEAR.

1. *Human Anatomy*, as outlined in courses I, II, III, and IV, department of anatomy, college of medicine and surgery.
2. *Histology and Embryology*, as outlined in courses I, II, and III, department of histology and embryology, college of medicine and surgery.
3. *Medical Chemistry*, including organic chemistry, toxicology, urinalysis and sanitary chemistry, etc.
4. *Physiology*, as outlined in courses I and II, department of physiology, college of medicine and surgery.
5. *Materia Medica*, as outlined in present courses in the college of medicine and surgery.

FOURTH YEAR.

1. *Human Anatomy*, as outlined in courses V and VI, department of anatomy.
2. *Histology and Embryology*, as outlined in courses IV and V, department of college of medicine and surgery.
3. *Medical Chemistry*, courses continued as outlined in third year.
4. *Physiology*, as outlined in courses III, IV and V, department of physiology, college of medicine and surgery.
5. *Therapeutics*, as outlined in present courses in the college of medicine and surgery.
6. *Bacteriology, and General Pathology*, as outlined in courses I and II, department of pathology and bacteriology, college of medicine and surgery.

FIFTH AND SIXTH YEARS.

The work of the fifth and sixth years will be essentially the same as is given in the third and fourth years in the college of medicine and surgery.

COURSES OF INSTRUCTION

MATERIA MEDICA AND THERAPEUTICS.

The work in materia medica and therapeutics is graded to cover a period of three years. It consists of lectures, recitations and demonstrations, conducted in the laboratory of materia medica. This laboratory is in Medical Hall. It is supplied with crude drugs and botanical specimens. Samples of these the student is allowed to retain for private study. Pharmaceutical preparations are also placed before him and he is taught the method of their manufacture and their most eligible forms.

Course I. Pharmacology.

This course includes the study of the general characteristics of drugs and of their physiologic actions. Lectures, recitations and laboratory work. Five hours a week, second semester, first year.

PROFESSOR BRACKEN.

Course II. Therapeutics.

In this course drugs are studied in groups, as governed by their physiologic action, and the therapeutic features of such groups are described. Other remedial measures than those depending upon drugs, such as hydro-therapy, serum-therapy, dietetics, etc., are fully considered. Lectures and recitations. Four hours a week, first semester, third year.

PROFESSOR BRACKEN.

Course III. Therapeutics.

In this course the treatment of individual diseases is studied and the application of therapeutic agents to them is discussed. Lectures. Two hours a week, first semester, fourth year.

PROFESSOR BRACKEN.

Text-Books :

Bracken's Outlines of Materia Medica and Pharmacology.

Collateral reading—The Pharmacopœia of the U. S.; The National Dispensary; Sayre's Organic Materia Medica and Pharmacognosy; Culbreth's Materia Medica and Pharmacology; Foster's Practical Therapeutics; Hare's System of Practical Therapeutics; Allen's Handbook of Local Therapeutics.

PRACTICE OF MEDICINE.

The course in the principles and practice of medicine is graded in the third and fourth years. It consists of lectures and recitations and of dispensary and bedside clinics in which the service of the chair is shared by a large corps of clinical professors and instructors. Examinations are held at the close of each year.

*Course I. Case-taking and general symptomatology.**Course II. The thoracic viscera. Heart, lungs and blood vessels.**Course III. The infectious diseases.*

Lectures and recitations, three hours each week, third year.

PROFESSOR GREENE.

*Course IV. The abdominal viscera. Kidneys, stomach, intestines, liver.**Course V. Diseases of nutrition. Hæmatology, diabetes, gout, scurvy, etc.**Course VI. Tropical diseases.**Course VII. Examination for life insurance (elective).*

Lectures and recitations, three hours each week, fourth year.

PROFESSOR GREENE.

Course VIII. Clinical exercises in general medicine, consisting of clinical instruction to sections of the third and fourth year classes. In the dispensaries, by the bedside and in the amphitheatres of the several hospitals in St. Paul and Minneapolis, as follows:

- (a) City Hospital, Minneapolis, two hours a week, both years. Professors J. W. Bell, H. L. Staples and C. Nootnagel, Dr. L. A. Nippert and Dr. S. P. Rees.
- (b) St. Barnabas' Hospital, Minneapolis, two hours a week, both years. Professor C. H. Hunter and Dr. Geo. D. Head.
- (c) City and County Hospital, St. Paul, and St. Joseph's Hospital, St.

Paul, three hours a week, both years. Professor E. J. Abbott and Dr. Henderson.

(d) City and County Hospital, St. Paul, two hours a week, both years. Professor C. L. Greene and Drs. Senkler and Henderson.

(e) Free Dispensary, St. Paul, two hours a week, both years. Professor C. L. Greene and Drs. Senkler, Lando and Ramsey.

(f) University Free Dispensary, Minneapolis, four hours a week, both years. Dr. L. A. Nippert.

Text-Books :

Practice of medicine.

Osler's Practice of Medicine.

Collateral reading—Allbutt's System of Medicine; Eichhorst's Internal Medicine; The College Library; Thompson's Practice of Medicine; Tyson's Practice of Medicine.

Case-taking and life insurance.

Greene: The Examination for Life Insurance and Its Associated Clinical Methods.

PHYSICAL DIAGNOSIS.

Course I. The thorax: its topography, methods of examination, applied to the normal and abnormal chest; disease of the respiratory organs: their physical signs and differential diagnosis.

PROFESSOR J. W. BELL.

Course II. The precordial region: its topography, methods of examination, applied to the normal and abnormal heart; diseases of circulatory organs: their physical signs and differential diagnosis.

PROFESSOR J. W. BELL.

Course III. The abdomen: its topography, methods of examination under normal and abnormal conditions; diseases of this region: their physical signs and differential diagnosis. Lectures and recitations. Three hours a week, first semester, third year.

PROFESSOR J. W. BELL.

Course IV. Clinical physical diagnosis.

Practical clinical instruction given to small sections of the class. For this purpose the clinical material of the several hospitals and dispensaries in Minneapolis is utilized. Four hours a week, first semester, third year.

PROFESSORS NOOTNAGEL AND NIPPERT AND DR. REES.

Course V. Clinical physical diagnosis.

Practical clinical instruction given to small sections of the classes. For this purpose the clinical material of the several hospitals and dispensaries in Minneapolis is utilized. Two hours a week, fourth year.

PROFESSORS NOOTNAGEL AND NIPPERT.

Course VI. Clinical physical diagnosis, continued.

The clinical material of the hospitals and dispensaries of the city of St. Paul is utilized in the form of clinics. Two hours a week, fourth year.

DR. G. E. SENKLER.

Text-Books :

Le Ferres' Physical Diagnosis.

Butler's Medical Diagnosis.

Collateral reading—Bramwell's Heart and Thoracic Aorta; Fox on the Lungs; Sansom's Heart and Aorta; Roger's Introduction to study of Medicine; Musser's Medical Diagnosis.

SURGERY.

The course in surgery is graded in the third and fourth years. Examinations are held at the close of each of these years. Lectures and recitations are given

by the teaching staff in surgery and clinics at the dispensaries and hospitals of Minneapolis and St. Paul by a large corps of instructors.

Course I. The principles of surgery.

Inflammation; traumatic fevers; suppurations; acute inflammations of joints; ulceration; gangrene; thrombosis and embolism; septicæmia; pyæmia; erysipelas; tetanus; surgical tuberculosis; actinomycesis, anthrax and glanders. Lectures and recitations, two hours a week, first semester, third year.

PROFESSOR STEWART.

Course II. Operative surgery.

Lectures upon the principles of operative procedure; the preparation of patient, operator and operating rooms; the principles of asepsis, antiseptics and sterilization; anæsthesia and anæsthetics; hæmostasis, ligatures and sutures; dressings, bandages and the treatment of wounds. Two hours a week, first half, second semester, third year.

PROFESSOR DUNSMOOR.

Course III. The practice of surgery.

Fractures and dislocations, injuries of joints; injuries and surgical diseases of the skin; of the lymphatics, blood vessels and nerves; of the tendons, fasciæ and bursæ; of the face, mouth, tongue, jaws (excepting the study of tumors). Lectures and recitations. Four hours a week, first half, second semester, third year.

PROFESSOR DUNN.

Course IV. The practice of surgery.

Surgery of the head, neck, chest, back, breast, abdomen, including hernia, anus, rectum and urinary tract. Lectures and recitations. Four hours a week, second half, first semester, fourth year.

PROFESSOR DUNN.

Course V. Operative surgery.

An elective laboratory work, consisting of operations, performed by sections of the class, under the supervision of the instructors, upon the cadaver and upon animals. Nine hours a week, first half of first semester, fourth year.

PROFESSOR DUNSMOOR AND DR. LAW.

Course VI. Orthopedic surgery: including diseases of bones, joints, synoviae and bursæ, congenital and acquired deformities; dystrophies, with the principles of treatment. Lectures and recitations. Three hours a week, second half, second semester, fourth year.

PROFESSOR GILLETTE.

Course VII. Surgical pathology: Tumors.

A special course upon tumors, taking up the general pathology and the general principles of the treatment of tumors. Each variety of tumor is then discussed, together with its histology, life-history, diagnosis and treatment. The course is illustrated by charts and museum specimens. Lectures and recitations, two hours a week, second semester, fourth year.

PROFESSOR STEWART.

Course VIII. Bandaging and dressings.

A practical course of instruction, by means of demonstrations and drill, under the supervision of the chair of operative surgery. Eight hours, first half, first semester, fourth year.

PROFESSOR DUNSMOOR AND DR. LAW.

Course IX. Clinical surgery.

Courses of clinics at which operations, in the whole domain of surgery, are witnessed by the students of the third and fourth years. These clinics are held in the dispensaries and hospitals of the cities of Minneapolis and St. Paul, upon Thursdays and Saturdays throughout the year. The classes alternate at the two cities in their attendance

- upon these clinics. They are conducted as follows :
- At the City and County Hospital, St. Joseph's Hospital or St. Luke's Hospital in St. Paul, weekly, by Professor John T. Rogers.
- At the City and County Hospital, St. Joseph's Hospital, St. Luke's Hospital, or Free Dispensary, at St. Paul, with sections of class weekly, by Professor John T. Rogers, Dr. G. M. Coon, Professor A. J. Gillette, Dr. W. A. Dennis, Dr. Judd Goodrich and Dr. A. Colvin.
- At the City and County Hospital, or at St. Joseph's Hospital, or at St. Luke's Hospital, St. Paul, weekly, by Professor Justus Ohage.
- At the Asbury Hospital or the City Hospital, Minneapolis, weekly, by Professor F. A. Dunsmoor and Dr. J. Warren Little.
- At St. Mary's Hospital, or the City Hospital, Minneapolis, weekly, by Professor J. H. Dunn.
- At the City Hospital, Minneapolis, weekly, by Dr. A. T. Mann. At the University Free Dispensary, by Drs. Law, Mann and Condit. At the Northwestern Hospital, weekly, by Professors J. E. Moore and J. Clark Stewart.

Text-Books :

- Ross and Carliss' Manual of Surgery.
 Park's Surgery.
 Tillman's Principles of Surgery and Surgical Pathology.
 Kocher's Operative Surgery.
 Warren's Surgical Pathology and Therapeutics.
 Senn's Principles of Surgery.
 American Text-Book of Surgery.
 Wharton and Curtis' Practice of Surgery.
 Nancrede's Principles of Surgery.
 Jacobson's or Zuckerkandl's Operative Surgery.
 Moore's Orthopædic Surgery.
 Bradford's and Lovett's Orthopædic Surgery.
 Whitman's Orthopædic Surgery.

Collateral reading—International Text-Book of Surgery; Agnew's Practice of Surgery; Dennis' Practice of Surgery; Stimson's Fractures and Dislocations; Hamilton's Fractures and Dislocations; McGrath's Surgical Anatomy and Operative Surgery.

OBSTETRICS.

The subject of obstetrics is taught by lectures, recitations and demonstrations upon the manikin: by illustrative drawings and by attendance upon cases of labor. The didactic work is done in the third year; the clinical study is had in the fourth year. A large part of the obstetric service of the City Hospital in St. Paul and of the Minneapolis City Hospital is at the disposal of the chair of obstetrics. Clinics are also held at other hospitals in St. Paul and Minneapolis.

Course I. *The anatomy and physiology of the pelvic organs:* the development of the embryo and appendages; pregnancy; symptoms and diseases; operative obstetrics; the complications of labor and its sequelæ. Lectures and recitations two hours a week in October and January, and three hours a week, second semester, third year.

PROFESSOR CATES.

Course II. *The theory and practice of obstetrics.*

The mechanism and conduct of normal labor, with its complications; abortions. Lectures and recitations. Two hours a week, November and December, third year.

PROFESSOR RITCHIE.

Course III. *Hospital ward work.*

Twice a week, from January 1st to May 1st, Dr. Frederic Leavitt will conduct sections of students through the maternity wards of the St. Paul City and County Hospital. A similar service will be conducted in the wards of the Minneapolis City Hospital, from October 10th, to February 10th, by Dr. Jennings C. Litzenberg. This course will be in the nature of an ante-partum clinic, in which will be studied the signs of pregnancy, pelvimetry, palpation, obstetric diagnosis, etc. This work is in the nature of a conference, each student viewing the subject from the standpoint of a practitioner.

DRS. LEAVITT AND LITZENBERG.

Course IV. Clinical obstetrics.

The study of and the participation in the conduct of two or more hospital deliveries in the fourth year, under the direction of Professors Ritchie and Cates and personally conducted by Drs. H. W. Davis, Frederic Leavitt, Harry P. Ritchie, and J. C. Litzenberg. A limited number of out-patients is assigned to members of the senior class who are authorized to attend these cases, under the supervision of the instructors, before, during and after labor.

Text-Books.

Williams, Jewett, Lusk, Hirst and the American Text-Book of Obstetrics.

GYNECOLOGY.

The course in the diseases of women consists of lectures, recitations, clinical instruction and the witness of operations, upon the human subject, as they may offer.

Course I. Lectures and recitations.

Two hours a week, first semester, fourth year. PROFESSOR STONE.

Course II. Clinical courses at the City and other hospitals in Minneapolis and St. Paul. Observations and examinations of patients, methods of examination, diagnosis and treatment.

Weekly Clinics in Minneapolis Hospitals, by Prof. A. W. Abbott and Dr. A. E. Benjamin.

Weekly clinics held in St. Joseph's Hospital, St. Paul, by Prof. Stone.

Weekly clinics at St. Luke's Hospital, St. Paul, by Professor McLaren.

Weekly clinics held at the City and County Hospital, St. Paul, during January, February, and March, by Dr. J. L. Rothrock.

The above announcements represent the surgical work given in gynecology throughout the entire year. Every operation in this branch of surgery is presented in these clinics. Owing to the limited field within which this work must be done, the attempt is always made to divide the class into small sections. Daily clinics for small sections are held at the University and St. Paul Free Dispensaries by Drs. A. W. Abbott, A. E. Benjamin, J. L. Rothrock, and H. P. Ritchie. This course is especially valuable since it brings the student into direct acquaintance with the patient. Individual instruction is given in history-taking, diagnosis, methods of examination, treatment and minor gynecology.

Text-Books.

Dudley's Diseases of Women.

Reed's Text-Book of Gynecology.

Kelly's Operative Gynecology.

Collateral reading—Emmett's Diseases of Women; Thomas and Munde's

Gynecology; Pozzi's Diseases of Women.

OPHTHALMOLOGY AND OTOLOGY.

Course I. Diseases of the eye and its appendages; refraction and its errors.

Lectures and recitations. Two hours a week, first half, second semester.

fourth year.

PROFESSOR FULTON OR TODD.

Course II. Diseases of the ear.

Lectures and recitations. Two hours a week, first half, second semester, fourth year. PROFESSOR TODD OR FULTON.

Course III. Clinical lectures will be given and operations performed at St. Joseph's Hospital, St. Paul, every Saturday, fourth year.

Clinical lectures will be given every Thursday at the St. Paul City Hospital, during the months of January, February and March, and occasionally clinics will be given at St. Luke's Hospital. Fourth year.

PROFESSOR FULTON.

Course IV. Clinical lectures will be given and operations performed at St. Barnabas or Asbury Hospital, Minneapolis, every Thursday. Fourth year.

Clinics will be given at the Minneapolis City Hospital occasionally during October, February, March and April. Fourth year.

PROFESSOR TODD.

Course V. Clinical instruction will be given at the University and St. Paul Free Dispensaries in the diagnosis of diseases of the eye and ear; in the methods of examination; in the use of instruments, including the ophthalmoscope, and in the application of remedies, etc. Fourth year.

DRS. MURRAY AND APPELBY.

Course VI. Ophthalmoscopy; a practical course of instruction elective in the senior year.

DR. WM. R. MURRAY.

Text-Books.

Posey Wright's Diseases of the Eye, Ear, Nose and Throat.

May's Diseases of the Eye.

Facon's Diseases of the Ear.

Collateral reading—De Schweinitz' Diseases of the Eye; American Text Book; Dench's Diseases of the Ear; Norris and Oliver's Ophthalmology; Savage's Ophthalmic Myology; Noyes and Politzer's Diseases of the Ear.

NERVOUS AND MENTAL DISEASES.

The required courses of lectures and recitations in this department will be given in the fourth year. Instructions will be by recitations and the "case method." Elective courses in clinical neurology, psychiatry, medical electricity and neuropathology will be offered in the fourth year.

Course I. Neurology.

Lectures, recitations and demonstrations. Two hours a week, twelve weeks, first semester, fourth year.

PROFESSORS RIGGS AND JONES (Alternating).

Course II. Psychiatry.

Lectures, recitations and demonstrations. Two hours a week, five weeks, first and second semesters, fourth year.

PROFESSORS RIGGS AND JONES (Alternating).

Course III. Electro-therapeutics (elective).

Fourth year.

DR. A. W. DUNNING.

Course IV. Clinical neurology and psychiatry.

PROFESSORS RIGGS AND JONES.

Practical instruction will be given upon Thursdays and Saturdays, fourth year. Clinics will be conducted in St. Paul, by Professor Riggs, at the City and County Hospital, St. Luke's Hospital, St. Joseph's Hospital, and the Free Dispensary; and at Minneapolis by Professor Jones, at the City Hospital, Asbury Hospital, St. Mary's Hospital and the University Free Dispensary.

Course V. *Laboratory Course* (elective).

Fourth year.

DR. L. B. WILSON.

Text-Books :

Dana's Nervous Diseases.

Church and Peterson's Nervous and Mental Diseases.

Berkeley's Mental Diseases.

Collateral reading—Clouston's Lectures on Mental Diseases; Collin's Treatment of Nervous Diseases; Edinger's Anatomy of the Central Nervous System; Gordinier's Anatomy of the Central Nervous System; Collin's Aphasia; Mills' Nervous Diseases.

DISEASES OF THE SKIN.

This subject is taught by lectures, recitations and clinical demonstrations.

Course I. The anatomy and physiology of the skin; diseases of the skin and its appendages; venereal and genito-urinary diseases. Two hours a week, second semester, fourth year. PROFESSOR VANDER HORCK.

Course II. Clinical lectures, in connection with the dispensaries and hospitals of Minneapolis and St. Paul. Weekly in the fourth year.

PROFESSORS VANDER HORCK AND BURNSIDE FOSTER AND DR. F. R. WRIGHT.

Text-Books.

White and Martin's Diseases of Urinary Organs.

Collateral reading—Taylor's Genito-Urinary and Venereal Diseases.

Hyde's Diseases of the Skin.

Jackson's Diseases of the Skin.

Hyde and Montgomery's Venereal Diseases.

Collateral reading—Crocker's Diseases of Skin; Morris' Diseases of the Skin; Hayden's Diseases of the Skin; Lydston's Genito-Urinary, Venereal and Sexual Diseases; Stelwagon's Diseases of the Skin.

DISEASES OF THE NOSE AND THROAT.

Course I. Anatomy and physiology of the nose and throat; pathology, diagnosis and treatment.

Lectures and recitations. Two hours a week, eight weeks, fourth year.

PROFESSOR LATON.

Course II. Clinical instruction, given at the University Free Dispensary, in the diagnosis of diseases of the nose and throat; in the methods of examination; in the use of instruments, and in the application of remedies, etc. Five hours a week, both semesters, fourth year.

PROFESSOR LATON.

Course III. Clinical instruction, given at the St. Paul Free Dispensary, in the diagnosis of diseases of the nose and throat; in the methods of examination; in the practical use of instruments and application of remedies; and in the *applied anatomy* of the nose and throat, illustrated by *dry* and *wet* preparations. Two hours a week, fourth year.

PROFESSOR SCHADLE.

Text-Books.

Shurley's Diseases of the Nose and Throat.

Ingall's Diseases of the Nose, Throat and Lungs.

Kyle's Diseases of the Nose and Throat.

Coakley's Diseases of the Nose and Throat.

DISEASES OF CHILDREN.

Course I. Didactic lectures, arranged to cover, so far as possible, the general subject of pediatrics. A course, consisting of two lectures a

week, in the second semester of the third year; beginning with a consideration of the special characteristics of the normal infant and child as distinguished from the adult and passing on to a detailed description of the features and management of the diseases peculiar to infancy and childhood and of the more or less specialized forms in which certain diseases common to all ages exist during the early years of life. These lectures will be suitably illustrated by charts, colored plates, specimens, and the occasional use of the stereopticon.

PROFESSOR T. S. ROBERTS.

Course II. Clinical instruction will be given at the St. Paul Free Dispensary and the St. Paul City Hospital four hours weekly throughout the fourth year.

PROFESSOR J. T. CHRISTISON AND DR. RAMSEY.

Course III. Clinical instruction will be given in Minneapolis at the contagious wards of the City Hospital, St. Barnabas Hospital, the Children's Home, the University Free Dispensary and other specially designated places at such times as opportunity presents. Fourth year.

PROFESSOR T. S. ROBERTS.

Text-Books.

Holt's Diseases of Children.

Rotch's Pediatrics.

American Text-Book of Diseases of Children.

Collateral reading—Osler's Practice of Medicine; Keating's Cyclopedia of Diseases of Children. Corlett's Acute Infections Exanthemata. Chapin's Theory of Practice of Infant Feeding; Stengel's Nootnagel's Encyclopedia.

HYGIENE.

A course of lectures in hygiene is conducted by a corps of the faculty. The general subject is thus divided into several branches, namely: chemistry of air, water and soil (included in the course in chemistry); the physiology of foods, beverages, clothing, bathing and exercise; public sanitation (including sewage and garbage disposal, applied and school disinfection, regulations of quarantine, the disposal of the dead, the development of vital statistics, the care of slaughter houses, etc.); the bacterial diagnosis of infectious diseases, and some practical phases of sanitary engineering. The examinations in this branch are conducted by the lecturers jointly. The course includes thirty lectures and recitations, which are given during the second half of the second semester of the fourth year.

PROFESSORS BEARD, WESBROOK, BRACKEN AND BASS.

Text-Books.

Coplin's and Bevan's Practical Hygiene.

Park's Hygiene.

Bergey's Principles of Hygiene.

Collateral reading—Richardson's Preventive Medicine; Buck's Hygiene and Public Health; Winter Blyth's Foods and their Composition.

MEDICAL JURISPRUDENCE.

An elective course of lectures and recitations, in the legal relations of medicine. Two hours a week, second half, second semester, fourth year.

PROFESSOR SWEENEY.

Text-Books.

Taylor's Medical Jurisprudence.

Collateral reading—Hamilton's American System of Legal Medicine;

Withaus' Principles of Forensic Medicine and Toxicology; Wharton and Stille's Medical Jurisprudence; Reese's Medical Jurisprudence and Toxicology.

THE HISTORY OF MEDICINE.

An elective course of lectures is given in the history of medicine and of the medical profession from the earliest times, including accounts of the epoch-making discoveries in medicine, brief sketches of the lives of eminent physicians and an account of the great plagues of history. Three hours a week, second half, second semester, fourth year.

PROFESSOR BURNSIDE FOSTER.

MECHANO-THERAPY.

Courses of illustrated lectures and clinical demonstrations in gymnastics, massage and hydrotherapy. The principles of the physiology, technique and therapeutics are discussed. Two hours a week, first half, second semester, fourth year.

DR. ALFRED LIND.

Text-Books.

Wide's Handbook of Medical Gymnastics.
Baruch's Principles and Practice of Hydro-therapy.

CLINICAL MICROSCOPY.

An elective course given in the senior year. The course will include:

(a) The urine: a microscopical study of its colors and sediments and the microscopical study of blood, pus, epithelial casts, spermatozoa, etc., in the urine of disease; (b) The blood: the enumeration of red and white cells in the blood of pernicious anæmia, leukæmia, secondary anæmias, leucocytosis, leucopæmias, etc.: the estimation of hæmoglobin in chlorosis, secondary anæmias, pernicious anæmia, etc.; the making of blood smears and the fixing, staining, mounting and study of all forms of normal and pathological blood cells: (c) Stomach contents: the macroscopical, chemical and microscopical study of stomach contents from cases of cancer, ulcer, hyperacidity and anacidity, with especial reference to differential diagnosis; (d) Exudates and transudates: their study by lectures and demonstrations; (e) Parasites: their study by lectures and demonstrations. Nine hours a week during part of second semester, fourth year.

PROFESSOR GEO. DOUGLAS HEAD.

Text-Books.

Von Jaksch's Clinical Diagnosis.
Simon's Clinical Diagnosis.
Cabot's Clinical Examination of the Blood.
Ewing, Clinical Pathology of Blood.
Rieder's Atlas of Urinary Sediments.
Sahl's Lehrbuch der Klinischen Untersuchungs Methoden.

DEGREES.

The degree of doctor of medicine is conferred by the Board of Regents upon the students who are recommended, by vote of the faculty, for graduation. Candidates for the degree must possess the following essential qualifications:

- (1) Twenty-one years of age and upwards.

- (2) Good moral character.
- (3) A degree of preliminary education equivalent to that demanded by the examination for entrance to this college.
- (4) Four full college years spent in the study of medicine; the fourth year, at least, in this University, and the remainder in this or other recognized colleges of medicine.
- (5) Satisfactory examinations passed in all branches in accordance with the foregoing rules.

THE ROLLIN E. CUTTS PRIZE.

Dr. Mary E. Cutts has created in the hands of the Board of Regents, in memory of her late husband, Dr. Rollin E. Cutts, with herself, an alumnus of the University of Minnesota, a fund from the income of which is to be awarded each year a gold medal to that member of the senior class to whom the faculty of the college of medicine and surgery shall award the highest scholarship in surgery.

DISPENSARY AND HOSPITAL CLINICS.

DISPENSARIES.

The University free dispensary is located in the new clinical building. Several rooms are devoted to the reception of patients and to their examination and treatment. Its service is a growing one and is utilized for the teaching of the classes of the third and fourth years. The faculty and a corps of assistants manage the dispensary. Dispensaries at Asbury Hospital and the City Hospital are also open to the students of the University. They are largely attended by members of the faculty.

The St. Paul Free Dispensary is centrally situated and offers its clinics to the students of this college. It owns the building formerly used by the St. Paul Medical College—a twenty-room building, which has been equipped for its occupancy. It centralizes the clinical opportunities of St. Paul and its staff is, similarly, made up largely of faculty members.

HOSPITALS.

The hospitals of the city of Minneapolis and St. Paul have very generously opened their doors to the students of this department. Saturday and Thursday mornings and afternoons, throughout the year, are devoted to the use of these clinical opportunities by the junior and senior classes. These classes alternate in periods of six weeks between the two cities upon the days mentioned.

The hospital facilities of the University are thus exceptionally good, since they are not limited to one large amphitheatre, where but a few students can closely observe diagnostic and surgical methods, but are divided among

a number of hospitals where the various professors care for their private and clinical cases. This makes it possible to divide the classes into sections, so that each student has equal opportunities of observation and is in close touch with his teacher.

THE CITY HOSPITAL, of Minneapolis, occupies spacious buildings and affords a large mass of clinical material which members of the faculty upon its staff are permitted to utilize during their terms of service.

ST. MARY'S HOSPITAL has a staff upon which this faculty is represented by four members. Its management has seconded the efforts of the staff to make the hospital useful to medical students by providing an amphitheatre of modern construction, in which seventy-five spectators can be accommodated. The hospital also opens its wards for the bedside study of disease. Surgical and medical clinics are held here upon the weekly clinic days.

ST. BARNABAS' HOSPITAL has also generously equipped an amphitheatre, within which a class of fifty students can be gathered. Bedside instruction is given freely in its wards to the students of this college. Clinics are usually conducted in this amphitheatre on Saturdays. Its staff, also, numbers upon it several members of this faculty.

ASBURY METHODIST HOSPITAL offers its clinical opportunities to the college. Thursday and Saturday clinics are held in its wards and amphitheatre. Its service is, in part, manned by faculty members.

THE NORTHWESTERN HOSPITAL has recently built a commodious amphitheatre, for the especial benefit of the University students and has added one more to the list of Minneapolis hospitals whose doors are open for clinical instruction. Its medical and surgical chiefs and several members of its staff are in the service of this college.

THE CITY AND COUNTY HOSPITAL, of St. Paul, occupies a large building, of modern construction and generously equipped with clinical conveniences. Its management has spared neither effort nor means to make it a model of its class. It contains a large amphitheatre for teaching purposes. It enters some two thousand patients annually, a large proportion of whom are of the emergency order or suffer from acute forms of disease. This college is represented upon its staff by a majority of the members.

ST. JOSEPH'S HOSPITAL has always contributed generously to the clinical advantages of the University. It contains a spacious amphitheatre, built and equipped for the students of this college. It has faculty members upon its staff who conduct weekly clinics in the hospital. Its service is large, its capacity being upwards of one hundred beds.

ST. LUKE'S HOSPITAL possesses all the most desirable features of modern hospital architecture and has a large clinical service. It is furnished with an amphitheatre for the benefit of students and has a thoroughly equipped operating room, in which clinics are frequently conducted.

*Deceased.

CURRICULUM.

The course in the college of homeopathic medicine and surgery leads to the degree of doctor of medicine. It covers a period of four years of collegiate study, each year representing nine months in actual residence.

The studies are graded, so far as practicable, throughout the four years and this grading is arranged with careful reference to the relation which the subjects naturally bear to each other.

The work of the first two years deals with the so-called scientific or laboratory branches; while that of the last two years includes the principles and practice of medicine and surgery, their associated specialties and the application of scientific or laboratory methods to clinical experience.

DEGREES.

The degree of doctor of medicine is conferred by the Board of Regents upon students who are recommended, by vote of the faculty, for graduation.

Candidates for the degree must possess the following essential qualifications:

- (1) Twenty-one years of age and upwards.
- (2) Good moral character.
- (3) A degree of preliminary education equivalent to that demanded by the examination for entrance to this college.
- (4) Four full college years spent in the study of medicine; the fourth year, at least, in this university, and the remainder in this or some other recognized college of medicine.
- (5) Satisfactory examination passed in all branches in accordance with the foregoing rules.

ANNOUNCEMENT.

The College of Homeopathic Medicine and Surgery offers special advantages to students seeking a medical education. Through the generosity of the state, an equipment of buildings, laboratories and apparatus is provided, equal to that of the best medical schools in this country or in Europe. With this equipment it is possible to lay that broad foundation for a medical education without which no physician can hope for the highest success. An institution deficient in the requirements for teaching the fundamental branches of medical practice cannot long maintain the confidence of the medical profession. Homeopathy, as an expanding science, draws toward itself as a part of its rightful possession, every addition to medical knowledge that can be of any service in the cure of the sick. The homeopathic physician should feel that he is "heir of all ages" in medical learning, having that catholicity of training which places at his command every known resource, including as his especial advantage, the added power of coping with disease, that comes from his knowledge of the science of homeopathy.

The breadth of view this result is provided in the college of homeopathic medicine and surgery in a real university course, botany, chemistry (organic or inorganic), histology, embryology, bacteriology, pathology, anatomy, physiology, hygiene and sanitary science, with all the accessories of laboratory work; second, in building upon this foundation a comprehensive knowledge of therapeutics, practice and surgery. The student has daily training in both the practical and theoretical aspects of medicine. In the first two years the practical training is provided in constant individual work in the laboratories of dissecting rooms; in the last two is a broad field of clinical study and observation, in both medical and surgical cases, which the nearly one-half million population of the Twin Cities abundantly supplies. The theoretical work is carried on in daily didactic lectures and textbook study throughout the entire course.

Special emphasis is placed upon clinical instruction in both dispensary and hospital practice. Senior students have the opportunity to attend out-door patients, assist in special and general operations, and to attend obstetrical cases during the last course of lectures.

The college alumni now in practice are evidence of the character of its work. The loyal support of the profession throughout the northwest has encouraged and upheld the faculty in giving form to this new phase of the work.

The college proposes to stand for a broad catholic, scientific, and therefore, homeopathic, education in medicine and surgery.

EXAMINATIONS.

Examinations will be conducted at the end of each year, upon subjects taught during the year, according to the schedule printed elsewhere. Attendance upon at least four-fifths of the lectures under each department is required in order that a student may be allowed to enter for final examination, or to receive a certificate of attendance. Ten per cent of the graduating class will be recommended to receive the degree of doctor of medicine, "cum laude." The selection will be based upon the efficiency of the work of the student during the period of the entire course.

CLINICS.

Every member of the faculty (with two exceptions) is a clinical teacher. Thus each professor demonstrates the application of his didactic work.

DISPENSARY CLINICS.

The dispensary, located at 1808 Washington avenue south, offers unusual facilities to the student for individual examination of patients. The location is within easy access of those whose means compel them to ask dispensary assistance, and presents ample opportunity for the study of all forms of disease usually met with in practice. Patients present themselves in large numbers daily (more than six thousand prescriptions having been made during the past year), and are assigned to particular departments according to the nature of their diseases. The classes are so divided and arranged as to afford every student abundant opportunity to familiarize himself with the best methods of diagnosis and treatment of the various maladies, medical and surgical, with which the clinic abounds. Each student is assigned for a definite period as clinical assistant in each department of the clinic. The college clinics are conducted throughout the entire year. Students and practitioners are invited to attend them at all times.

DISPENSARY CLINICS.

HOSPITAL CLINICS.

The college has unusual advantages in hospital clinics. In addition to calling upon students to assist the various professors in private cases regular clinics are provided in the city hospitals of both St. Paul and Minneapolis, and in St. Luke's and St. Joseph's Hospitals in St. Paul. Each Monday is devoted to clinics held in one of these hospitals by members of the faculty.

CITY HOSPITAL, MINNEAPOLIS.

The faculty of the college of homeopathic medicine and surgery is largely represented on the staff of this institution, where one-fifth of all the patients admitted are placed under care.

CITY HOSPITAL, ST. PAUL.

This hospital likewise has a full staff of homeopathic physicians and surgeons which includes all the St. Paul members of the college faculty. Each member of the staff has full charge of all cases coming into his department during his term of service and uses suitable ones for clinical purposes.

ST. LUKE'S HOSPITAL, ST. PAUL.

This hospital has recently erected a new building thoroughly equipped with all modern facilities for caring for medical and surgical cases. It contains an amphitheater in which clinical lectures are delivered. A number of the faculty are members of the visiting staff.

ST. JOSEPH'S HOSPITAL, ST. PAUL.

Through the addition to its staff of members of the college faculty, students have access to both surgical and medical cases upon exactly the same footing as the other hospitals.

HOSPITAL APPOINTMENTS.

Graduates of this college are eligible for appointment to the position of interne in the Minneapolis City, St. Paul City and County Hospitals and St. Joseph's Hospital, St. Paul. Also to the staff of the State Hospital for Insane at Fergus Falls.

GENERAL REMARKS.

In all hospital work students are given special bedside instruction in diagnosis, in "taking the case," in prescribing, in surgical dressing, in the after care of patients and all forms of accessory treatment.

COURSE OF STUDY

The extension of the course of instruction to four years enables the faculty to present to the students a more thorough and practical training in the practice of medicine than has heretofore been possible. The schedule of study is so arranged that the student reaches the practical work of his profession by gradual steps through theoretical and laboratory course. There are also offered lectures upon subjects which have been omitted in previous years, because of lack of time.

FIRST YEAR.

History and methodology of medicine.
 Medical terminology.
 Medical botany.
 Inorganic chemistry—laboratory.
 Anatomy—bones, muscles and joints.
 Physiology.
 Homeopathic pharmacy.

SECOND YEAR.

Materia medica—experimental.
 Organic chemistry—toxicology and urinalysis.
 Histology and embryology—laboratory.
 Anatomy, dissection.
 Physiology—chemical and experimental.
 Surgical emergencies and bandaging.
 Bacteriology.
 General pathology.

THIRD YEAR.

Surgical anatomy.
 Materia medica and therapeutics.
 Practice of medicine, organon and institutes of medicine.

Clinical medicine and physical diagnosis.
Obstetrics.
Principles and practice of surgery.
Diseases of women.
Ophthalmology.
Nose, throat and ear.
Medical jurisprudence.
Clinics, medical and surgical.
Special pathology.

FOURTH YEAR.

Surgical pathology.
Materia medica and therapeutics.
Practice of medicine.
Clinical medicine.
Mental and nervous diseases.
Dermatology and genito-urinary diseases.
Obstetrics.
Clinical obstetrics.
Principles and practice of surgery.
Ophthalmology.
Diseases of women—didactic and practical.
Orthopædic clinical surgery.
Pædology.
Electro therapeutics.
Life insurance examination.
Clinics, medical and surgical.

SIX YEARS' COURSE.

With the season of 1903-04, the University will offer a six years course of study in the colleges of science, literature and the arts and of homeopathic medicine and surgery which will lead to the degree of bachelor of arts at the end of four years' course, and doctor of medicine at the end of six years' course. Students who intend to pursue the study of medicine are especially urged to enter this course, the subjects of which have been planned for their best equipment.

An outline of this course follows:

FIRST YEAR.

1. *Rhetoric*, two hours each week throughout the year.
2. **German*, four hours each week throughout the year, grammar and literature.
3. *Botany*, four hours each week throughout the year.
4. *Chemistry*, four hours each week throughout the year.
5. *Zoology*, four hours each week throughout the year.
6. *Plane Trigonometry*, four hours each week for twelve weeks of second semester.

**Note.*—Students who enter with two years of German may elect French in its stead in the first and second years.

SECOND YEAR.

1. *Rhetoric*, two hours each week throughout the year.
2. *German*, classical and scientific, four hours each week throughout the year.

3. *Chemistry*, four hours each week throughout the year.
4. *Comparative Anatomy of Vertebrates*, four hours each week throughout the year.
5. *Physics*, four hours each week throughout the year.

THIRD YEAR.

1. *Human Anatomy*, as outlined in Courses I, II, III and IV, department of anatomy, college of homeopathic medicine and surgery.
2. *Histology and Embryology*, as outlined in Courses IV and V, department of histology and embryology, college of homeopathic medicine and surgery.
3. *Medical Chemistry*, including organic chemistry, toxicology, urinalysis and sanitary chemistry, etc.
4. *Physiology*, as outlined in Courses I and II, department of physiology, college of homeopathic medicine and surgery.
5. *Materia Medica*, as outlined in present courses in the college of homeopathic medicine and surgery.
6. *Pharmacy*.
7. *History and Methodology of Medicine*.

FOURTH YEAR.

1. *Human Anatomy*, as outlined in Courses V and VI, department of anatomy, college of homeopathic medicine and surgery.
2. *Histology and Embryology*, as outlined in Courses III and IV, department of histology and embryology, college of homeopathic medicine and surgery.
3. *Medical Chemistry*, courses continued as outlined in third year.
4. *Physiology*, as outlined in Courses III, IV and V, department of physiology, college of homeopathic medicine and surgery.
5. *Therapeutics*, as outlined in present courses in the college of homeopathic medicine and surgery.
6. *Bacteriology, and General Pathology* as outlined in Courses I and II, department of pathology and bacteriology, college of homeopathic medicine and surgery.
7. *Materia Medica*.
8. *Surgery and Bandaging*.

FIFTH AND SIXTH YEARS.

The work of the fifth and sixth years will be essentially the same as is given in the third and fourth years in the college of homeopathic medicine and surgery.

COURSES OF INSTRUCTION.

MATERIA MEDICA AND THERAPEUTICS.

This course upon this subject is graded to cover four years' study. Lectures, daily quizzes and daily demonstrations of materials and methods are held regularly throughout the year.

FIRST YEAR.

Ten lectures in the first half of the year are given upon the methods of homeopathic pharmacy, each student being trained in writing and filling prescriptions and the technique of the more common preparations. Apparatus and material for these purposes are taken from Professor Leonard's laboratory, which is

abundantly supplied with the crude and perfected drugs for demonstration throughout the course. Mr. G. A. Babendrier, who has kindly given this instruction so satisfactorily for several years, will continue the same the coming year.

SECOND YEAR.

The toxicological and physiological action of a few typical drugs will be studied in lectures and quizzes twice each week; including the action of both large and small doses as well as the official doses (U. S. P.) of the leading drugs and their alkaloids. Here, in the more detailed study of a few drugs, the groundwork will be laid for the comprehension of the symptomatology of the later years.

When practicable, actual experiments on the effects of the drugs upon individual persons in the class will be made, the blanks used and methods being under Professor Leonard's personal supervision and in accordance with the rules of the Provers' Union of the American Institute of Homeopathy.

THIRD YEAR.

Three lectures a week with quizzes, upon the vegetable remedies, about thirty major and seventy-five minor drugs, arranged according to their natural groups and their clinical relationship in diseases, and studied in their origin, history, preparation, physiology and symptomatology, full practical comparison being made with other allied remedies. The endeavor on these studies and those of the following year will be to present only such usage of drugs as is practical and fully corroborated.

FOURTH YEAR.

Three lectures and quizzes each week upon the mineral, animal and nosological remedies of *materia medica*—about forty major and twenty minor drugs grouped and studied in detail as those of the second year, attention being given to their toxicological and physiological action, where this has a direct bearing upon their homeopathic application to chronic diseases, inasmuch as the drugs of this course are more often applied thereto.

Examinations in the form of written review quizzes from time to time or at the end of the term, will be held, the student's final standing being made up of this and his daily quiz markings.

TEXT-BOOKS AND COLLATERAL READINGS.

Materia Medica and Therapeutics.

First year—

Pharmacopea of the American Institute of Homeopathy.

Second year—

Hugh's Pharmaco-Dynamics.

Third and fourth years—

Materia Medica Manual—Fahnestock.

Farrington's or Cowperwaite's *Materia Medica*, Hahnemann's *Organon*.

Reference Books—third and fourth years—Allen's *Hand-Book*, Hering's

Condensed Materia Medica, Dunham's *Lectures*.

THEORY AND PRACTICE.

Lectures on the theory and practice of medicine will be delivered to students of the third and fourth year. It will be the purpose to thoroughly acquaint the

student with the description, course and diagnosis of disease, and the method of treating such disease in accordance with the homeopathic law of cure.

The cardinal principles of the philosophy of homeopathy will be clearly presented in didactic and clinical lectures. Students are familiarized with accurate methods of investigation, records of symptoms and history of cases, with the use of the repertory to assist in accurately affiliating the indicated remedy.

THIRD YEAR.

The course for the student of the third year consists of twenty-six didactic lectures, mainly on the diseases of the mouth, stomach and bowels. Eight lectures will be given in the philosophy of homeopathy. Frequent selections of cases from private practices will be given to better set forth the various lectures, as well as methods employed in the record of cases and selections of the remedy. One-half of the time allowed will be employed in frequent quizzes and review of the work gone over.

FOURTH YEAR.

The course for students for the fourth year consists of twenty-one lectures on pulmonary and hepatic affections, with such of the important continued fevers as fall to this chair. The organon work will take the form of frequent "class-room talks," chiefly on the subjects of the following selections, viz: 272-274; 247; 245-251; 252-255; 167-168; 204-205.

In addition students will be required to present written reports of the history and symptoms of cases treated, the repertory work in selecting the remedy and dose, repetition and results. Much time and attention will be given to this feature, and the course as tending in the highest manner to perfect the pupil in the art of accurate prescribing.

TEXT-BOOKS AND COLLATERAL READING.

Practice of Medicine.

- Goodno's Practice.
- Raue's Therapeutics.
- Lippe's Repertory.
- Knerr's Repertory.
- Pepper's System of Medicine.
- DaCosta's Diagnosis.
- Ander's Practice of Medicine.

PHYSICAL DIAGNOSIS.

The course on physical diagnosis consists of a series of twenty-four didactic lectures to the third year class, illustrated upon the healthy human subject, thus familiarizing the student with the normal appearances, feelings and sounds. These lectures are classified as follows: Introduction, general examination, respiratory system, circulatory system, digestive system, urinary system.

CLINICAL MEDICINE.

FOURTH YEAR CLASS.

For this course abundant material is found in the University homeopathic free dispensary, where clinics are held every day, and in the City hospitals of Minneapolis and St. Paul, where clinics are held each Monday morning.

In these clinics particular effort is made to supplement the course in physical diagnosis and to fully illustrate the application of the homeopathic law of therapeutics.

In order that the student may obtain as wide a view as possible in this all important branch, they receive instruction not only from Professor Ricker at the bedside in the City Hospital wards, but from the various members of the homeopathic staffs in the Twin Cities, attending the hospitals but not otherwise connected with the University.

In addition the dispensary furnishes many outside cases, which are treated in their own homes, by the members of the fourth year class, under the supervision of Professor Ricker, thus enabling the student to acquire the self-reliance and confidence so necessary to the beginning practitioner.

Physical Diagnosis, Clinical Medicine.

Lillenthal's Therapeutics.

Lippe's Repertory.

Farrington's Clinical Materia Medica.

Vierodt's Medical Diagnosis.

Abram's Manual of Clinical Diagnosis.

DaCosta's Diagnosis.

SURGERY.

The course in surgery is so graded to extend through Sophomore, Junior and Senior years. It consists of didactic lectures, clinical demonstration and actual work by the students of Senior and Junior classes, as they are given one month's work each or more in dispensary clinics every day under charge of attending professor, and are held responsible by him for all emergencies and dressings. They also give all anæsthetics and attend to the post operative treatment. These advantages given our students cannot be excelled, and gives each member that opportunity of gaining for himself that valued knowledge and confidence which only comes by actual experience.

Two years ago the work in surgery enlarged. It now occupies two full years, the third and fourth, including the labors of four members of the college faculty. The work is divided into clinical and didactic surgery.

EMERGENCIES AND BANDAGING.

(1) A course of lectures on surgical emergencies and bandaging is given the students of the Sophomore year in consideration of the means in administering first aid to the injured, also laboratory instructions of how to apply dressings, bandages, splints and the materials used.

GENERAL AND SPECIAL SURGERY.

(2) The Juniors and Seniors are given two lectures each week each on general and special surgery, during the entire two years, covering all the surgical diseases, and special technique in operative surgery, special attention being paid to pathology, diagnosis and treatment of each disease from a surgical standpoint in conjunction with the valued homeopathic application of remedies. Besides this the Juniors are given a special course on surgical anatomy and the Seniors one on surgical pathology.

OPERATIVE SURGERY.

(3) During the Senior year the class will be instructed in the surgical laboratory in operations on the cadaver, in which the student is called upon to do the work under the special criticism of the professor in charge, thus perfecting themselves by actual practice with operations they will be called upon to perform in later years.

ORTHOPAEDIA SURGERY.

(4) The course on this subject is both didactic and clinical. It consists of one lecture a week during the fourth year.

The whole subject of deformities, their causes, care and removal, is carefully considered in detail. The mechanical apparatus used in the treatment of such cases is exhibited and rules are laid down for the improvising and applying temporary means and instruments. Recent progress in the knowledge of the underlying causes of bony, muscular and habit deformities, and their serious reflex effects, has led to great changes in the methods pursued to overcome them.

The early recognition and treatment of such cases are of the utmost importance, and hence, as they are usually first presented to the general practitioner, a full knowledge of this branch of surgery becomes exceedingly valuable.

The subjects discussed include functional and organic diseases of the bony spine, the several forms of club-foot, joint inflammations, both simple and tuberculous, and their sequela, cleft palate, hair-lip, etc.

CLINICAL SURGERY.

(5) The work in clinical surgery consists in operations before the class in connection with clinical lectures given upon the cases presented. These occupy each Monday of the fourth year, which is set apart as the day for clinics. The third year class is required to attend the clinics, unless their regular class work interferes.

At the clinics which are held at the City and County Hospital, St. Luke's and St. Joseph's Hospitals, of St. Paul, and the City Hospital and Free Dispensary, Minneapolis, are demonstrated the value of antiseptic treatment of wounds, the minute details of the application of surgical appliances and dressings, and operative technique. Post-operative care for reaction, shock, etc., are considered.

Senior students are instructed in the practical use of anaesthetics and are required to attend a number of surgical patients at their homes, carrying out post-operative detail under the direction of the professor.

The surgical department aims to give a complete and thorough course on the subject and its collateral branches.

It should be distinctly understood that examinations on the clinical and laboratory work, both sectional and at the end of the term, no matter by whom the teaching is done, are counted with the didactic course, the average of all combined constituting the student's standing in surgery for each year. The marks for the four years go to make up his graduation average.

TEXT-BOOKS.

Park's Surgery.

Treue's Operative Surgery.

Wyeth's General and Operative Surgery.

Surgical Technique, by Von Esmerich and Kowalzig.

DIDACTIC COURSE.

The didactic course covers the entire field of the principles and practice of surgery. The lectures will occupy the third year class two hours and the fourth year class three hours each week. Demonstrations will be made upon the cadaver, aided by models and charts.

The lectures to the third class will include surgical pathology, inflammation, hemorrhage, surgical appliances, surgical emergencies, minor surgical operations, ligation of arteries, burns and scalds, surgical treatment of the anus and rectum,

antiseptics, anæsthetics, abscesses, ulcers, gangrene, hernia and the elements of the treatment of wounds, fractures, dislocations and amputation.

The lectures of the fourth year class will include the surgery of the bones, joints, genito-urinary organs, tumors, cysts, fractures, dislocations, amputations, syphilis, together with the operative surgery of the head, face, chest, abdomen, pelvis, skin, nerves and extremities.

All the lectures will aim to be comprehensive, practical, and in keeping with the best standards of advanced surgery.

TEXT-BOOKS, DIDACTIC COURSE.

Park's Surgery.

Homeopathic Text-Book of Surgery.

Mamline's American Text-Book of Surgery.

Bradford & Lovett's Orthopædic Surgery.

Iye's Surgical Handicraft.

OBSTETRICS.

This subject is taught by lectures and recitations, thoroughly illustrated with charts, manikins and specimens. The course will be graded and divided between the third and fourth years.

During the third year subjects covered will embrace the anatomy and physiology of the female generative organs and the pelvis, the development of the embryo, the maternal changes of pregnancy, the diagnosis of pregnancy, the physiology, pathology and hygiene of pregnancy, the physiology and the course of normal labor, the conduct of normal labor and the management of the puerperium.

During the fourth year the following subjects are taught: the mechanism of labor, diagnosis and management of the various presentations, dystocia, complications of labor, physiology, pathology and management of the puerperium, and obstetric surgery.

CLINICAL OBSTETRICS.

This department instructs the fourth year students and applies practically the teachings of the department of obstetrics. An abundance of material is supplied by the dispensary and city hospitals of St. Paul and Minneapolis. The student will be thoroughly educated to locate accurately the position and condition of the internal parts both in health and disease, the obstetric points of the pelvis, as well as the diameters, planes and curves, the presentation and position of the child and methods of diagnosis, the stages and mechanism of labor, the management of normal and abnormal labors, the application of the forceps and the necessary steps in performing version.

Each member of the class will be assigned at least three cases of pregnancy, which he will be required to attend under the immediate direction of the professor of the chair.

During the last month of pregnancy of a case as assigned, the student in charge will report to the professor the patient's name, address, age, number of previous labors, date of first birth and last labors, date of quickening, condition of uterus, heart, lungs, bowels, kidneys, etc., and a detailed statement regarding the appearance of the patient, location of the foetal heart, position of the child, character and size of the pelvis.

At the time of labor the student will be required to keep a record of the following facts:

Number of the case, date, name, address, condition of the osuteris, height of

presenting part, pulse rate and quality (ante and post partum), rapidity of foetal heart beats and where heard most clearly, presentations, position and duration of the first, second and third stage.

Also the sex of the child, the diameters of its head, weight, and length. The post partum condition of the uterus, servix and perineum.

An operative course on the female cadaver will also be given, demonstrating the operative technique in symphysiotomy and Cæsarean section.

TEXT-BOOKS AND COLLATERAL READINGS.

Leavitt.

Lusk's Midwifery.

American Text-Book of Obstetrics.

Hirst's Text-Book of Obstetrics.

Grandin & Jarman's Midwifery.

Playfair's Midwifery.

Boisliniere, Obstetric Accidents.

Davis' Obstetrics.

DISEASES OF WOMEN.

This course will consist of one didactic lecture during the third and fourth years and two clinics a week during the fourth year.

In the third year, both semesters, the anatomy, physiology and pathology of the pelvic contents and perineum are carefully described. The preparation of the patient for surgical operation together with the necessary steps taken, the various surgical procedures as well as the medical treatment of all pelvic diseases, will receive minute attention both semesters of the fourth year.

The medical and surgical diseases of women will be treated in didactic lectures and recitations. The entire field of gynecology will be covered in the lecture room. As cases present themselves in the city hospitals of St. Paul and Minneapolis, the subject thus described will be demonstrated on the living subjects.

Gynecology.

Wood, Text-Book of Gynecology.

DISEASES OF CHILDREN.

The course on this subject will consist of one lecture each week and three clinics to the fourth year students, and extending over two semesters. The clinics are full and afford an exceptional opportunity to study the common diseases of childhood. In the out-door department many cases of exanthematous cases are treated by the members of the class.

The didactic course embraces a description of the normal development of infancy and childhood, natural and artificial infant breeding, signs and symptoms of hereditary syphilis, contagious and infectious diseases, tuberculosis, erysipelas, and the diseases of the respiratory and urinary organs; those of the circulatory, nervous and digestive systems, rhachitis and diseases of the skin.

TEXT-BOOKS AND COLLATERAL READING.

Tooker's Diseases of Children.

Holt's Diseases of Children.

Fisher's American Text-Book of Diseases of Children.

Collateral reading—Cyclopedia of Diseases of Children.

MENTAL AND NERVOUS DISEASES.

This course consists of twenty-eight didactic lectures, in the fourth year, and as many clinical demonstrations as material is presented at the dispensary and

the City Hospital, Minneapolis. It is the aim of the chair to qualify the student to detect the earliest symptoms of insanity and diseases of the nervous system.

The anatomy and physiology of the brain and spinal cord are reviewed and particular attention is paid to the causes, development, characteristic symptoms and the pathological conditions of the diseases of the nervous system. The therapeutics, dietetics and direction of the personal care in each disease is especially elaborated.

Talcott's Mental Diseases.

Clouston's Mental Diseases.

Edinger's Anatomy of Central Nervous System.

Martin's Nervous Diseases.

Dana Text-Book Nervous Diseases.

Bigelow's System of Electro-Therapeutics.

Oppenheim's Diseases of the Nervous System.

Collateral reading—Hack Tuke's Dictionary of Psychological Medicine; Bevan Lewis' Mental Diseases; Kirchoff's Handbook of Insanity; Ferrier's Localizations of Cerebral Diseases; Strumpell's Text-Book of Medicine; Hirt's Diseases of the Nervous System; Horsley's Brain and Spinal Cord.

Hygiene.

Coplin and Bevan's Practical Hygiene.

Park's Hygiene.

Collateral reading—Richardson's Preventive Medicine; Buck's Hygiene and Public Health.

ELECTRO-THERAPEUTICS.

This subject will be carefully taught. The physics of electricity will be sufficiently considered to enable the student to understand the construction and manipulation of galvanic aradic, sinusoidal and static batteries. The application of every form of electricity will be practically demonstrated.

MEDICAL JURISPRUDENCE.

The object of this chair is to familiarize the student with his duties, rights and responsibilities from a legal standpoint. The law on each subject discussed is carefully explained and illustrated, as far as possible, with adjudicated cases. *Medical Jurisprudenc.*

Taylor's Medical Jurisprudence.

Herold's Manual of Legal Medicine.

Collateral reading—Hamilton's American System of Legal Medicine; Withaus' and Becker's Medical Jurisprudence and Toxicology; Wharton and Stille's Jurisprudence.

OPHTHALMOLOGY.

In the department of ophthalmology the endeavor is to give thorough instruction in those parts of the work which will ordinarily come into the hands of the general practitioner.

The course is supplemented by as much practical work as time allows, in the use of the ophthalmoscope for the study of intraocular troubles, whose recognition would aid in the diagnosis of various conditional affections; and following a short didactic course given early in the year on the subject, practical work in the correction of the refraction is carried on at the dispensary during both semesters.

The clinical material provided in the department is very abundant, interesting and instructive cases, embracing all varieties of eye troubles calling for medical

and surgical aid being presented to the students bi-weekly throughout the entire year.

The following schedule shows the subjects considered in the present course of lectures :

Anatomy and physiology of the eye ; refractions and use of the lenses for the correction of its errors ; diseases of the lids ; conjunctiva ; cornea ; sclera ; lachrymal apparatus ; iris and ciliary body ; lens choroid ; retina and optic nerve ; affections of the muscular apparatus of the eye and the general relationship between eye-strain and reflex and nervous disorders.

The didactic course consists of thirty-two lectures during the fourth year and ten during the third year.

Ophthalmology.

Norton, Buffum, Swanzy, Noyes.

Collateral reading—Fuch's Diseases of the Eye.

DISEASES OF THE NOSE, THROAT AND EAR.

The course will consist of didactic lectures and clinical demonstrations.

One didactic lecture a week will be given to students of the third year. An understanding of the anatomy and physiology of the organs is presupposed, and but little time will be devoted to the review of the more important points in their bearing upon diseases of these organs. The lectures will enter upon the diseased processes in the nose—the various forms of acute and chronic catarrhal inflammation, their courses, developments, symptoms, consequences and treatment, both general and local, abnormal growths, affections of the septum and diseases of the accessory sinues, finishing the course on the nasal cavities with the neuroses, functional and organic.

The diseases of the naso-pharynx are treated with special reference to their dependence upon nasal conditions and their influence upon the organ of hearing. The course includes acute and chronic catarrhal processes, adenoid vegetations and morbid growth.

Diseases of the pharynx are considered in their dependence upon alimentary disorders, acute and chronic inflammatory conditions ; morbid growths and neurosis, together with the pharangeal and tonsillar conditions incident to the exanthemata, diphtheria, typhoid fever, etc

In the laryngeal disorders we become more closely associated with respiratory diseases ; the various forms of laryngeal inflammation, morbid growths and nervous affections will be discussed—especial stress being put upon the early laryngeal manifestations of tuberculosis and the laryngeal disorders of voice users with the importance of proper vocalization and respiration upon all diseases of this organ.

Ear diseases resolve themselves into : Diseases of external canal and pinna, dermoid inflammation ; diseases of the middle ear ; mucous inflammation ; diseases of the internal ear ; serous and nerve inflammation.

The course to the fourth year students will be entirely clinical, the class being divided into sections for dispensary work ; the aim will be to familiarize the students with the use of the various diagnostic means at their disposal, and the appearance of the various abnormal conditions, together with the technique of the numerous operative procedures. The material for clinical demonstrations is abundant.

Ear : Barr.

Nose and Throat : Kyle, Bosworth, Ivins, McDonald.

Nose, Throat and Ear : Veshlaget & Hallett ; McBride, Burnett.

SKIN AND GENITO-URINARY DISEASES.

This course will consist of one didactic lecture and one clinic each week for students of the fourth year. It will include the diseases of the skin, syphilis and all genito-urinary affections.

The first semester will be devoted to a study of the diseases of the skin, the second to syphilis and venereal surgery. The dispensary clinics will be especially valuable in supplementing the work of the professor in the lecture room by familiarizing students with the appearance of the various forms of skin and venereal diseases. Each student is required to diagnose cases and treat patients under the supervision of the professor, thus giving him actual experience in administering remedies and using instruments. During the course of the year each student has personal charge of about fifty patients in this department.

TEXT AND REFERENCE BOOKS.

Dermatology: Kippax, Stelwagon, Durhring, Dearborn.

Genito-Urinary: Carlton, Hoyne, Franklin, American Text-Book, Bumstead and Taylor.

HISTORY AND METHODOLOGY OF MEDICINE.

The lectures given in this chair are an exposition of the philosophy and art of medicine by the historical method. The student is taught to see how in each age practice of medicine has been the outgrowth of the beliefs current regarding the nature of man. Give to a student the theories held by a people regarding the constitution of matter, the nature of mind and force, and he can accurately foresee the medical science such as people will accept. The unfolding of the world's thought in medicine sets homeopathy in its high place and gives the student an outlook much needed in the profession. The tendency of medicine has always been to over-estimate the material side of a man's nature and to make innumerable hypotheses to explain disease. The conflicts in medicine have been the clashing, not of opposite sects, but of antagonistic systems of thought, and reconciliation is possible only on the grounds of higher science than that of mere sense knowledge. This ground is revealed in the history of the philosophy of medicine.

The course includes the medicine of the Egyptians, Persians, Indochinese, Hebrews, Greeks, Arabians and of Europe down to the present.

One lesson each week during the freshman year.

The College of Dentistry

FACULTY.

- CYRUS NORTHROP, LL. D., *President.*
WILLIAM P. DICKINSON, D. D. S., Andrus Building. *Dean and Professor of Materia Medica.*
THOMAS B. HARTZELL, M. D., D. M. D., Andrus Building. *Professor of Pathology, Therapeutics and Oral Surgery.*
OSCAR A. WEISS, D. M. D., 506 Masonic Temple. *Professor of Prosthetic Dentistry and Orthodontia.*
ALFRED OWRE, D. M. D., M. D., C. M. *Professor of Operative Dentistry and Metallurgy.*
E. FRANKLYN HERTZ, D. M. D., Andrus Building. *Professor of Dental Anatomy and Prosthetic Technics.*
JAMES O. WELLS, A. M., D. M. D., Masonic Temple. *Professor of Crown and Bridge-Work and Porcelain Art.*
CHARLES A. ERDMANN, M. D., *Professor of Anatomy.*
RICHARD O. BEARD, M. D., *Professor of Physiology.*
H. C. CAREL, B. S., *Assistant Professor of Chemistry.*
THOMAS G. LEE, A. M., M. D., *Professor of Histology and Embryology.*
WINFIELD S. NICKERSON, Sc. D., *Assistant Professor of Histology.*
FRANK F. WESBROOK, M. A., M. D., C. M., *Professor of Bacteriology and Pathology.*
S. M. WHITE, B. S., M. D., *Assistant Professor of Bacteriology and Pathology.*
FRANK R. WRIGHT, D. D. S., M. D., 403 Pillsbury Building. *Lecturer on Anaesthesia and Chief of Anaesthesia Clinic.*
MARY V. HARTZELL, D. M. D., Andrus Building. *Instructor in Comparative Dental Anatomy.*
H. M. REID, D. D. S., 423 Medical Block. *Instructor in Prosthetic Dentistry.*
MARGARET L. NICKERSON, M. A. *Instructor in Histology.*
H. K. READ, M. D. *Demonstrator of Anatomy.*
M. RUSSELL WILCOX, M. D. *Demonstrator in Physiology.*
E. R. HARE, M. D., *Prosecutor of Anatomy.*
JAMES M. WALLS, D. M. D., St. Paul. *Instructor in Operative Technics, and Demonstrator of Operative Dentistry.*
FRANK W. SPRINGER, E. E. *Lecturer on Electricity and Its Uses in Dentistry.*
H. V. MERCER, LL.M., *Lecturer on Jurisprudence.*

Announcement

The College of Dentistry of the University of Minnesota offers a progressive course of study which covers four terms in four separate calendar years, beginning early in September and closing the last week in May following. Students who successfully pursue this course are given the degree D. D. S. (Doctor of Dental Surgery), which entitles them to come before any state board of dental examiners for a license to practice dentistry in that state.

The central idea upon which this institution was founded is that dentistry is a branch of the healing art, and that the practitioner should possess a medical education, hence the curriculum is arranged to include the fundamental principles that underlie the practice of medicine. In this connection special attention is called to the fact that while a thorough course is required, practical work is not neglected. The technical courses are very complete and the clinical facilities are unsurpassed.

Another special feature of this institution is that in laboratory work and infirmary practice, students at all times operate under competent instructors, the professors themselves serving as demonstrators, and every stage of each operation receives due criticism and marking.

The College of Dentistry of the University of Minnesota is a member of the National Association of Dental Faculties, and its diplomas are recognized by the Dental Examining Boards of every state.

Course of Instruction

*FIRST YEAR.

ANATOMY.

Osteology.

Lectures and recitations upon the human skeleton and supplementary work on the osteology of domestic mammals: three hours each week, for 10 weeks of first semester. Practical study of the skeleton, followed by recitations from the specimen, taken by the class, in sections: 2 hours each section, for 10 weeks, first semester. Required of all first year students.

Syndesmology.

Lectures, recitations and laboratory demonstrations. Three hours each week, for 4 weeks, first semester.

Myology and angiology.

Lectures and recitations covering the entire muscular and arterial systems of the human body, with a supplementary study of comparative myology: 3 hours each week, 16 weeks. Laboratory work consists in identifying the muscles of the human body on dissected preparations and showing their actions. Class, in sections, 4 hours each week for 5 weeks.

Text-books required. Quain's Anatomy, tenth addition, Vol. 11, parts I and II. or Morris' Anatomy.

PHYSIOLOGY.

The subject is taught by recitations and lectures illustrated by practical demonstrations. These embrace the discussion, and as far as possible, the observation of physiological ingredients of the animal body: of the physiology of cell life or the fundamental properties of the cell: the nutritive media, blood, lymph and chyle: of the elementary functions of the nervous system: of the muscular tissues: and the epithelial tissues: of the vascular mechanism: of the alimentary canal: of the organs of secretion, excretion and respiration.

Text-book required. Foster's Physiology.

COMPARATIVE DENTAL ANATOMY.

The instruction in this subject embraces a comparative study of animal life, giving special attention to number, form and arrangement of teeth, and their adaptation to food habits, ranging from the horny teeth of invertebrates, to the complex tooth-forms of the most highly specialized animals of the present time. The lectures will be illustrated with the stereopticon, casts, models and skulls.

Text-book. Thompson. Collateral reading, Tomes.

*See first paragraph on page 324.

HISTOLOGY AND EMBRYOLOGY.

This course will consist of lectures, recitations, laboratory work and demonstrations and will include a study of the structure and properties of protoplasm; the cell, its structure and properties, cell division, reproduction, ovum, spermatozoon, and formation of blastoderm. A study of the structure and life history of certain type forms of unicellular animals and plants, as amœba, paramœcium yeast, spirogyra, etc., simple metazoa, as hydra, etc.; consideration of the structure of vertebrates; the tissues, as epithelium, connective tissue, cartilage, bone, etc., muscle, nerve, blood and lymph; vascular and lymphatic system. The teeth, enamel, dentine, cementum, pulp, etc. A general outline of the development of the embryo: the formation of the head; development of the jaws, teeth, oral cavity, glands, etc.

First semester, recitations, four hours per week; laboratory, six hours per week.

Text-book required. Stöhrs' Histology.

CHEMISTRY.

(a) Lectures on the chemistry of the elements.

(b) Laboratory work in general inorganic chemistry of non-metallic and metallic elements.

(c) Lectures on qualitative analysis with special attention to the examination of alloys.

(d) Laboratory work corresponding to course (c) and including the qualitative determination of bases and acids. In this course several alloys are analyzed by each student.

(e) Recitations are carried on throughout the year to test the individual knowledge of each student.

Text-book required. Inorganic Chemistry Syllabus and Laboratory Notes on Qualitative Analysis, prepared by the department.

DENTAL ANATOMY.

The subject is taught by a thorough laboratory course, in which the student studies the teeth by dissection, modeling, carvings and drawings. In the study of dental anatomy, human and comparative, the definition, terminology, notation, form and arrangement of the teeth will be fully considered: also macroscopic and microscopic characteristics of sections, including the study of the relation of enamel to dentine and of the pulp canal.

In the study of structural anatomy, teeth will be selected and mounted upon wooden blocks. They will be filed down until the pulp chamber and canals are exposed, and drawings from actual measurements of the different aspects will then be made and carefully studied. Opportunity for the study of microscopic sections and lantern slides will also be afforded. The didactic instruction will be illustrated by "chalk talks," lantern slides, lectures, heroic models and skulls.

The standing of the student will be determined by marks given on the cutting of sections, models, drawings and recitations. Lectures and recitations, covering the influence of form and arrangement of the teeth upon caries will also be given.

Text-book required. Blacks' Dental Anatomy.

Collateral reading—American Text-Book. Comparative Dental Anatomy, (Thompson). Dental Anatomy, Human and Comparative (Tomes').

PROSTHETIC DENTISTRY.

The work in this year is almost entirely technical; only such lectures and demonstrations being given as to enable the student to carry on his work in the laboratory intelligently. The work comprises a consideration of impression materials, taking impressions, and making casts and models, making upper and lower retaining plates for a fellow student's mouth; and after which the upper is broken and repaired; making partial upper plate with rubber base, comprising the making of trial plate, taking bite, mounting case in articulator, grinding and arranging teeth for proper articulation, flasking, packing, vulcanizing and finishing. Making full upper and lower sets of teeth upon rubber base, using plain teeth and arranging same in accordance with the Bonwill-law of articulation; making full upper and lower swaged metal plates, comprising the making of models, molding in sand, casting dies and counter-dies; swaging plate to fit model, soldering rim and grinding and polishing metal. Making lower cast-metal plate, comprising the making of models and moulds, casting and polishing.

SECOND YEAR.

ANATOMY.

Splanchnology.

Descriptive and topographical anatomy of the thoracic viscera, the alimentary and urino-genital organs. Lectures and recitations, 3 hours each week, for 10 weeks.

Descriptive and surgical anatomy.

Head, neck, trunk and extremities. Lectures and recitations, 3 hours each week for 12 weeks.

The nervous system.

Cerebro spinal axis and its membranes; the cranial and spinal nerves; the sympathetic nervous system, and the special-sense organs. Lectures and recitations, 3 hours each week for 8 weeks.

Text-books required. Morris' Anatomy. Edinger's Anatomy of Brain and Cord.

Dissecting. The work extends over a period of eight weeks, requiring 15 hours each week. The dissection of the entire human body is required. The method of work follows that laid down in Holden's Manual of Dissections.

CHEMISTRY.

(Second year of four-year course.)

- (a) Lectures on the analysis of urine.
- (b) Laboratory work in qualitative and quantitative examination of normal and abnormal urine.
- (c) Recitations are carried on throughout the year to test the individual knowledge of each student.
- (d) Optional courses are offered in quantitative analysis, water analysis, saliva, etc.

Text-books required. Inorganic Chemistry Syllabus, and Chemical Urinalysis, prepared by the department.

MATERIA MEDICA.

This course includes the study of the general characteristics of drugs and their physiological action, with a comprehensive classification and description of remedies employed in dentistry. Lectures, recitations and laboratory work.

PATHOLOGY AND THERAPEUTICS.

The instruction in this branch will begin with a consideration of the terminology belonging to the subject, followed by the presentation of the lesions of inflammation, local and general, and the degenerate change in the tissues.

The general character of tumors, practical consideration of pathological dentition, pyorrhœa alveolaris, pulpitis, pulp nodules, secondary dentine, pericementitis, alveolar abscess, caries of jaw, and necrosis, dependent on a diseased condition of the teeth, the various inflammations of the oral cavity, including syphilis and tuberculosis, will all receive due attention.

Text-book required. Burchard.

Therapeutics. This course is given by lectures and recitations, and clinically. The student being instructed in the special therapeutics of dental and oral diseases; systemic treatment in cases requiring it, receives due consideration. New remedies that give promise of value are fully studied and put to practical test in the infirmary, under direct supervision. Antiseptic and disinfectant methods, as well as dental hygiene, also receive due attention.

OPERATIVE DENTISTRY.

Didactic. Lectures and recitations illustrated by lantern slides, charts, heroic models and physical apparatus will be given on cavity classification and nomenclature, instrument nomenclature and instrumentation, removal of deposits, rubber-dam and exclusion of moisture; cavity preparation, the enamel in its relation to cavity margins; hypersensitive dentine and pulp treatment, conservative and radical; including discoloration, its cause and treatment; canals, their cleansing and filling; matrices; separating teeth and correcting interproximate space; preparation and insertion of filling materials, including inlays; finishing fillings; clinical operations in their relation to vital tissue, including a review of the technic of conservative operations; the conduct of a practice.

Both junior and senior classes attend these lectures and stand quiz. The questions to each class vary according to their work. An examination will be held at the close of each subject.

Technical. The course of technics which is given at the beginning of this year includes the formation of typical cavities in plaster models, vulcanite and ivory teeth; protecting nearly exposed pulps, and capping exposed pulps; gaining access to canals; cleansing and filling canals with various materials, subsequently examining them to note results; application and retention of the rubber-dam; preparing and inserting the various filling materials, gutta percha, cements, amalgams, tin and gold.

Clinical. Students enter the infirmary at the beginning of the second semester if their technic work is complete.

Before beginning work upon patients, students are given an "infirmary drill," in which they are taught to meet patients, adjust the chair, make examinations, remove deposits and cleanse the teeth, and apply the rubber-dam. In the infirmary, students are under the immediate supervision of the instructors of this branch, who teach them how to diagnose, treat, and prognose cases, beginning with those requiring the simplest service and progressing as their skill increases. This intimate association of the technical and clinical enhances the value of the former and facilitates progress in the latter. Each operation is first presented to the student by a demonstration given by the instructor.

Text-books required. American Text-Book Operative Dentistry. Reference, Johnson's Principles and Practice of Filling Teeth.

PROSTHETIC DENTISTRY.

Didactic. Lectures and recitations will cover the preparation of the mouth for artificial dentures, choice of impression materials, the various base-plates, their composition and preparation. Porcelain teeth, their composition, form and color as related to temperamental types, and their forms as adapted to the various base-plates.

The various methods of retention, and the indications and uses of the different forms of partial plates is fully considered.

Technical. Making upper swaged plate of german silver, mounting plain teeth thereon to articulate with model of lower natural teeth. Making upper combination swaged metal and rubber plate, mounting gum-section teeth thereon to articulate with lower cast metal plate. Making partial lower swaged metal plate with reinforcement and clasps. Making partial upper swaged metal plate with teeth attached by soldering. Making lower cast metal plate, casting metal around lingual side of teeth and forming gum upon labial and buccal sides with pink rubber. Making lower swaged aluminum plate with turned rim.

Clinical. The student enters the infirmary this year upon completion of the technic course, and puts into practice the principles there acquired.

Text-book required. Essig's American Text-Book of Prosthetic Dentistry.

ORTHODONTIA.

The work in this year is technical, with such lectures and demonstrations as will enable the student to perform the laboratory work. In addition to this, the student will be required to attend the lectures given the third year class, so that upon entering the senior year to carry on a clinical case, he will have a general idea of the practice of orthodontia.

The technic course is thorough and complete in its scope, it being deemed necessary that the student should have the requisite skill to make regulating appliances, in order to properly place them in the mouth; in other words, it requires no more skill to make appliances than should be possessed to correctly place and operate them.

Furthermore, no system of "ready-made" appliances is considered wholly adequate or best adapted for the correction of all irregularities, thus the necessity for making them.

The technic work in this year includes a consideration of material for regulating appliances. German silver, its properties, annealing and tempering; drawing wire, making tubing and band material; constructing band with screw; jack-screws of different forms, rotation and expansion appliances, retractors and retainers.

The properties of steels, forging, hardening, tempering and polishing, the making of excavators and chisels, band drivers, band removers and wrenches or keys. Making taps for threading nuts, etc. Each operation is performed by the student after a demonstration by the teacher.

Text-Book required. Guilford's Orthodontia.

CROWN AND BRIDGE WORK.

Didactic. Lectures and recitations will cover the subject of crown and bridge-work.

All forms of crowns and bridges will be taken up in order, and considered from theoretical and practical view-points.

Technical. The technics are arranged so that each student is required to construct in the laboratory, one of the more important forms of crowns and dum-

mies, with root preparation for the former, and to assemble the same in bridges.

The completed technics illustrate the following types of crowns and dummies: the shell crown, the shell crown with porcelain face; the Richmond crown; the same with removable porcelain face; the Logan crown, with and without band; partial crowns for lingual attachment; porcelain crowns for incisors and cuspids, and the same for bicuspid and molars. Porcelain-faced dummies for bicuspid and molars, and the same with removable facings. Solid metal dummies for bicuspid and molars, and porcelain faced saddle dummies for incisors and cuspids, and the same with removable facings.

STUDENTS' DENTAL SOCIETY.

The second year students will be required to attend the meetings of the students' dental society, to familiarize themselves with the proceedings of such bodies.

THIRD YEAR.

BACTERIOLOGY AND PATHOLOGY.

Bacteriology. Lectures, recitations and laboratory work, a short general survey of the problems brought to light by bacteriology, and general methods and technique involved, will be followed by special study of certain microorganisms, such as pyogenic cocci, *B. tuberculosis*, *B. diphtheriæ*, etc. These studies will be pursued by means of actual cultivation on the various media, the making and examination of microscopic preparations of pure culture, and both cultivation from and microscopic examinations of infected tissues and fluids of the body, by the students themselves.

Text-Book. Muir & Ritchie.

Pathology. Lectures, recitations and laboratory work. Special study of inflammations and histological changes occurring in the tissues and fluids, constitute the major portion of this course. Some attention is given to the degenerations and the subject of tumors with special reference to the face and oral cavity. Students prepare and examine many of the specimens and receive loan slides of the rarer types, or those difficult of preparation.

ORAL SURGERY.

The subject of oral surgery will be taught clinically and didactically. The large amount of clinical material presented at the infirmary, furnishes ample opportunity for practical demonstration. Students are required to take charge of cases and carry them through under the advice of the instructor in charge. The didactic lectures will include a full consideration of all the surgical lesions of the oral cavity and associate parts, including oral tumors and the reflex neuroses connected with the fifth pair of nerves; fractures of the maxillæ; cleft palate and hare-lip; caries and necrosis of the jaws from constitutional causes; adenoid growths and nasal polypi in their relation to oral surgery; suppuration of the antrum; ulitis; epulis; fungoid pulp; ranula; exostosed teeth; ankylosis and dislocation, implantations, obturators, interdental and other forms of dental splints.

Arrangements have been made with several clinics connected with the different hospitals of the city to give several clinics. An abundance of material representing all the different forms of diseased conditions of the mouth and associate parts is to be found in the infirmary service, which will be assigned to students for treatment under direction of the professor of oral surgery.

Clinical lectures on the cases presented will be given from time to time. These

cases include alveolo-dental abscesses; caries and necrosis of the maxillary bones; diseased conditions of the antrum; pyorrhœa-alveolaris; dislocations and ankylosis; facial neuralgias; tumors of the mouth and associate parts, hare-lip; cleft-palate; implantation cases and fractures.

Text-book required. Marshall's Oral Surgery.

PHYSICAL DIAGNOSIS AND ANÆSTHESIA.

The subject of physical diagnosis will be taught didactically and practically, and will have direct bearing upon the subject of anæsthesia and will be as complete as its importance demands.

A course in urinalysis will be given in connection with this course.

The technics of anæsthetics, both general and local, receive full consideration. All anæsthetics are administered in the clinic, and full instruction concerning their use is given. The members of the senior class are required, under direction, to administer them and extract teeth under these agents.

Text-books required. Tyson, Physical Diagnosis, and Turnbull's Manual of Anæsthetics.

OPERATIVE DENTISTRY.

Didactic. The lectures on operative dentistry are delivered to both second and third year classes. All will be required to attend and stand "quiz." The questions to the senior class will bear more upon the application of principles in practice. An examination will be held at the conclusion of each subject.

Clinical. Many clinics demonstrating advanced operations and peculiar methods are given in this year. The student has ample opportunity to put these methods into practice; he will also give special attention to the different forms of pathological lesions that pertain to daily office practice, and will carry cases to completion, including the restoration of the teeth to usefulness by filling, crowning or bridging, as the case may require. All operations will be marked and record so made, together with a written examination on the didactic work, will form the final test in this branch.

Text-book required. Kirk's American Text-Book of Operative Dentistry.

Reference. Johnson's Principles and Practice of Filling Teeth.

PROSTHETIC DENTISTRY.

Didactic. Lectures and recitations upon the use, construction and adjustment of obturators and artificial vela in the treatment of cleft-palate cases. Continuous gum-work, construction and uses, will be fully illustrated and demonstrated.

Clinical. An excellent clinic is provided, enabling each student to make not less than twelve dentures, covering the various conditions usually met with in general practice. Cases of unusual occurrence appearing in the clinic will be utilized as special clinics for the advantage of the entire class.

Text-Book. Essig's American Text-Book of Prosthetic Dentistry.

ORTHODONTIA.

Didactic. Lectures and recitations upon the classification of irregularities of the teeth; etiology, local and constitutional; evils arising therefrom; advisability of correction; methods of treatment, including a consideration of the positive or intermittent and constant forces.

The principles of application of force and anchorage are given special consideration, rather than appliances.

Retention and methods of accomplishing the same are fully considered.

Clinical. In this year an ample clinic affords opportunity for each student to treat cases of irregularity.

The correction of at least one case by each student is required. The student is also required to observe and inspect the cases of his classmates, thus enabling him to see a large variety of cases with their treatment.

The student will use such of the technic appliances as are adapted to the case in hand and make such new ones from the material left over from the previous year as the case may require.

Text-Book. Guilford's Orthodontia.

METALLURGY.

Didactic. This subject will be treated in the following order: Metallurgical terms, processes and the principles upon which they are based; the various metals and their ores; process of extraction and refining; their properties and application in the arts, especially in dentistry; alloys, general, and those used in dental amalgams. Lectures and recitations once a week throughout the year, written quizzes monthly.

Technical. Refining of gold and silver, producing pure metals from scraps and filings. Making alloys for plate, crown and bridge-work, solders and alloys for dental amalgams.

Special attention is given to the melting, casting, cutting, annealing and testing of dental amalgam alloys. Each student will be required to provide metal scraps for refining and metals for amalgam alloys with which to produce by the processes named, metals and alloys, which will be retained by him for future use.

Text-book required. Hodgen's Practical Dental Metallurgy.

CROWN AND BRIDGE-WORK.

Technical. The construction of porcelain crowns and bridges, and crowns with attachments for the rigid retention of the same.

Clinical. The student in this year will perform practical operation in the mouth, covering all forms of crown and bridge-work.

Text-book required. Essig's American Text-Book of Prosthetic Dentistry.

PORCELAIN INLAYS.

Didactic. Lectures and recitations will be given on the indication for inlays, the character and manipulation of the porcelain bodies, cavity preparation, forming the matrix, baking and setting the inlay.

Technical. Each student will be required to make at least one inlay in an extracted tooth.

DENTAL JURISPRUDENCE.

A course of lectures will be given upon the special duties, obligations and privileges of professional men, with respect to their patients, fellow practitioners and the general public. Laws relating to expert witnesses, cases of alleged malpractice, liabilities incurred from septic infection, etc., will have due consideration.

The enactments regarding the attainment of legal standing as practitioners in Minnesota and other states will also be fully explained.

USES OF ELECTRICITY IN DENTISTRY.

A course of laboratory instruction will be given upon the different forms of batteries, dynamos and motors in use in dental practice. Their construction, use, care and operation. Electricity as used in surgery and for therapeutic purposes, including application of the x rays, will be made clear by laboratory demonstrations and practical application.

STUDENTS DENTAL SOCIETY.

In this year a society is organized, which is under the direct supervision of the faculty, and is made a part of the course of instruction. Every third year student is required to prepare an original paper upon some dental or allied topic, to be read before and discussed in open meeting. The meetings will commence the first week in November.

RECAPITULATION.

FIRST YEAR.

- Anatomy—Lectures and recitations.
- Physiology—Lectures and recitations.
- Histology and embryology—Lectures and laboratory.
- Chemistry—Lectures and laboratory.
- Dental anatomy—Lectures and laboratory.
- Comparative dental anatomy—Lectures and recitations.
- Prosthetic technics—Laboratory.

SECOND YEAR.

- Anatomy—Lectures and laboratory.
- Pathology—Lectures and recitations.
- Materia medica—Lectures and laboratory.
- Therapeutics—Lectures, recitations and clinical.
- Operative dentistry—Lectures, technical and clinical.
- Orthodontia—Technical.
- Crown and bridge-work—Lectures, recitations and technical.
- Students' Dental Society.

THIRD YEAR.

- Bacteriology—Lectures, recitations and laboratory.
- Oral surgery.
- Physical diagnosis. } Lectures and clinical.
- Anæsthesia, }
- Urinalysis—Lectures and laboratory.
- Orthodontia—Lectures, technical and clinical.
- Operative dentistry—Lectures and clinical.
- Prosthetic dentistry—Lectures, technical and clinical.
- Crown and bridge-work—Technical and clinical.
- Metallurgy—Lectures and technical.
- Dental jurisprudence. Lectures.
- Electricity—Uses in dentistry. Lectures.
- Students' Dental Society.

Beginning with the session of 1904-5 there will be a rearrangement of the curriculum for the four-year course. The freshman work for the session of 1903-4 will be essentially the same as that outlined on page 3, for the same year, of the three-year course. By the addition of the fourth year, time will be gained for clinical practice in all branches, and for the pursuit of special work in what is usually considered as post-graduate studies, such as ethics and jurisprudence, history and literature of dentistry, electro-therapeutics, business forms and laboratory research, etc.

GENERAL INFORMATION.

THE COLLEGE YEAR.

The sixteenth annual session of this college opens Tuesday, September 1, 1903, and closes on Saturday, May 14, 1904.

The college year will be divided into semesters, the first ending January 13, 1904. The succeeding week will be devoted to the mid-winter examinations. The second semester begins Monday, January 21. The lecture courses will close May 14, and the final examinations of the year begin on Monday, May 16.

Practical work for both the senior and junior classes will continue until May 21.

The technic and laboratory courses begin Tuesday, September 8.

Commencement exercises will occur in common with the other departments of the University on Thursday, June 2, 1904.

All statements in this announcement as to courses of study, conditions, requirements or fees, have reference to or binding force only upon the session of 1903-1904, unless otherwise definitely stated.

QUALIFICATIONS FOR MATRICULATION.

The requirements for admission to the College of Dentistry, for the session of 1903-4, are credit certificates showing the satisfactory completion of two years' high school work, or its equivalent, and a credit in manual training. Failing to have the latter, the prospective student will be required to demonstrate the possession of mechanical capability.

For the session of 1904-5 and thereafter, graduation from a recognized four-year high-school course, or its equivalent, with the mechanical capability credit, or test, as indicated above, will be required.

Students wishing to matriculate in this school, must present credentials signed by a city, county or state superintendent of schools, a principal of an accredited high school or academy, or the state high school board.

A regulation blank, upon which to make out these certificates, will be found inside back cover of this Bulletin.

Students not having the above credentials, or an insufficient number of them, may take examinations before a committee appointed by the president, from the college of science, literature and the arts, of the University.

Examinations are held only in the English language.

ENROLLMENT.

Students will be assigned seats in order of, and at the time of their matriculation. Such matriculation and assignment of seats will be had in the office of the registrar of the University, in the library building.

Seats in the amphitheatre, laboratory benches and lockers, as well as chairs and lockers in the infirmary, are assigned to students in the order of their matriculation.

ADVANCED STANDING.

Applicants for advanced standing must pass the entrance examinations or present the usual equivalents.

They must furnish satisfactory evidence of time spent and subjects covered in previous professional studies and must present themselves upon the dates following, and pass the examinations of all departments in which they wish to be exempt, if such examinations are deemed necessary by the professors in charge of the various departments.

All certificates pertaining to advanced standing must be presented to the dean who will send them to the respective professors for acceptance, or report of further requirements for acceptance.

No conditions of advanced standing will entitle the student to take the two years of any graded study coincidentally.

Students will not be permitted to substitute private work in any branch for the regular college course work, excepting in the case of actual laboratory exercises done under the direct supervision of an instructor in the department, appointed by the chair and approved by the faculty. Examinations in such private laboratory work will be conducted by the chair.

Examinations of conditioned students, and of applicants for advanced standing, in the common studies of the first and second years, will be held in these branches, upon the following dates:

September 3, 9 a. m.—Anatomy, first year.

September 3, 2 p. m.—Histology, first year.

September 4, 9 a. m.—Physiology, first year.

September 4, 9 a. m.—Anatomy, second year.

September 4, 2 p. m.—Chemistry, first year.

Conditions may also be removed at the close of each semester.

ATTENDANCE AND DISCIPLINE.

The college hours are from 8:30 a. m. to 12:30 p. m., and from 1:30 to 5:30 p. m.

Attendance upon all lectures, and infirmary and laboratory hours as scheduled, is obligatory. A complete record of each student's attendance is kept, and all absences and tardinesses are noted.

All laboratory courses must be taken in full and must invariably be entered during the first week in which they begin.

Habitual absence, continued indifference to study, or persistently poor scholarship may subject the student to temporary or permanent suspension.

The practice of dentistry by students, except under the direct superintendence of a preceptor, is prohibited by law in the state of Minnesota, and a rule of the National Association of Dental Faculties to which this college belongs, reads as follows: "Students in attendance in colleges of this association are required to obey the laws regulating the practice of dentistry in the various states, and, failing to do this, shall not be again received into any college of this association." Any student detected in violating this rule will be suspended or expelled.

The connection of any student with this college may be terminated at any time, without a return of fees, whenever such action may be advisable on the ground of immorality, or disorderly conduct, or a failure to conform to the established rules.

BREAKAGE AND LOSS.

A deposit of five dollars (\$5.00) will be required in addition to the first semester fee, to cover loss of and breakage or damage to college property. This will be returned at the end of the year, providing there is no charge against the student. This fee is to be deposited with the University accountant each year when the student matriculates.

INSTRUMENTS, BOOKS, TOOLS AND MATERIALS.

All students are required to provide themselves with instruments, books, tools and materials as prescribed by the college. These can be obtained in the city, with the usual discount to students. The first installment must be procured and approved by the instructor before seats can be assigned in the technic laboratories.

COLLEGE MUSEUM.

Members of the dental profession, and others interested, are invited to contribute pathological specimens, casts of malformations, irregularities of the teeth, models, charts, drawings, etc., which may be useful as illustrative matter in the lecture rooms.

ALUMNI ASSOCIATION.

An association of the graduates of the college has its annual meeting during commencement week.

CLINICAL FACILITIES.

The opportunities for acquiring a practical knowledge of both operative and prosthetic procedure is unsurpassed, the material presented in the infirmary clinic being more than ample for all purposes of instruction.

GRADUATION.

At the close of the fourth year, a student who has passed all examinations satisfactorily, receives the degree of Doctor of Dental Surgery (D. D. S.), upon the following conditions:

He must be twenty-one years of age.

He must have attended four full courses of instruction, the last of which must have been in this college.

He must have passed the full requirement in dissections and must have performed satisfactorily in the college all the required operations in operative and prosthetic dentistry.

Immorality, disorderly conduct, or a failure to conform to the rules of the college, will be deemed a sufficient bar to any student receiving his degree.

Under no circumstances are degrees *in absentia* conferred by this college.

Students failing to graduate will be required to pay a fee for completing each branch of unfinished work.

FEES AND EXPENSES.

The annual fee, which includes all charges for matriculation, lecture and laboratory courses, and dissections is, one hundred dollars (\$100.00).

One-half of this fee will be payable when the student matriculates. The accountant's receipt for the portion will entitle the holder to take entrance examinations and to classify. The second half will be payable at the opening of the second semester. These receipts must be presented to, and countersigned by the Dean before entering upon the work of each semester.

There is no fee for diploma upon graduation.

If the applicant fails to pass the entrance examinations, his fee will be returned by the accountant.

In addition to the college fee there is a rental fee of \$2.00 for a microscope, in each semester, when its use is required, provided the student is not supplied with a satisfactory instrument.

There is also a rental fee of \$1.00 for microscope in the course of bacteriology in the third year. It is an advantage for the student to possess his own microscope, and assistance in the selection of one will be given when desired.

There are no free scholarships, and no students are received for less than the regular fee.

No student will be permitted to take final examinations until after all fees and charges have been paid.

After having entered upon the course of study, fees are not returnable, and no rebate will be recommended should a student discontinue work, but the faculty may recommend the application of a part to the succeeding year.

Senior students failing to graduate, will be required to pay a fee of ten dollars (\$10.00) for each branch examined in or taken subsequent to the close of the session in which the failure occurred. A fee of \$10.00 will also be charged for the completion of each branch of unfinished laboratory or practical work.

Rooms and board convenient to the college can be obtained at prices ranging from \$3.00 to \$5.00 per week according to accommodations.

Furnished rooms without board, from \$5.00 to \$10.00, and unfurnished rooms from \$4.00 to \$7.00 per month.

A list of rooms and boarding places is kept by the secretary of the University Y. M. C. A., to whom inquiries or applications may be addressed.

From one hundred and fifty to one hundred and seventy-five dollars are necessary to defray the expenses of the first month. These include tuition, for first semester, board and room for the month, and books, instruments, tools, and materials for the year, which must be purchased before commencing work. In order to avoid embarrassment, the student should bring sufficient funds to cover these first expenses.

For further information, address Dr. W. P. Dickinson, Dean, College of Dentistry, University of Minnesota, Minneapolis.

The College of Pharmacy

THE FACULTY.

- CYRUS NORTHROP, LL. D., *President.*
FREDERICK JOHN WULLING, Phm. D., LL.M., *Dean; Professor of Pharmacology, Pharmaceutical Chemistry and Pharmaceutical Jurisprudence.*
HENRY MARTYN BRACKEN, M. D., *Professor of Materia Medica.*
..... *Professor of Pharmacognosy.*
..... *Professor of Chemistry; General, Medical, Analytical and Organic.*
CONWAY MACMILLAN, M. A., *Professor of Botany.*
FREDERIC K. BUTTRES, M. S., *Instructor in Botany and Practical Pharmacognosy.*
FRANK FAIRCHILD WESBROOK, M. A., M. D., C. M., *Professor of Bacteriology.*
GEORGE B. FRANKFORTER, M. A., Ph. D., *Professor of Organic Chemistry (Post-Graduate).*
GEORGE DOUGLAS HEAD, B. S., M. D., *Instructor in Clinical Microscopy.*
RICHARD OLDING BEARD, M. D., *Professor of Physiology.*
M. RUSSELL WILCOX, M. D., *Instructor in Physiology.*
JOHN F. FULTON, Ph. D., M. D., *Professor of Hygiene.*
ALBERT M. WEBSTER, A. B., *Instructor in Medical and Pharmaceutical Latin.*
..... *Instructor in Mineralogy.*
..... *Instructor in Pharmacy and Laboratory Assistant.*
H. C. CAREL, B. S., *Assistant Professor of Chemistry.*
W. H. CONDIT, M. D., *Instructor in Materia Medica.*
C. N. MCCLOUD, Phm. D., M. D., *Lecturer on First Aids to the Injured.*

ANNOUNCEMENT.

In the organization of this college the Board of Regents has aimed to secure the co-operation of the pharmacists of the state. The character of instruction is of high order and every effort is made to comply with the demands of the profession in the Northwest, or elsewhere, in the maintenance of a course of instruction of the highest grade. The college is located on the University campus, in the new building, and is one of the colleges of the department of medicine, but is distinct in the government of its affairs. The building and laboratories are on a par with the best, and their equipment is complete.

The work of the college, as outlined in the following pages, is conducted by means of lectures, quizzes and laboratory exercises. Students will find their time fully occupied. The work is of such a nature that no student can accomplish it in the short term of five or six months. Students who may feel unable to complete the work in two

years may divide it in a manner to complete it in three years. Practicing pharmacists who desire to take certain branches of study, may avail themselves of any of the college facilities, but their studies and time will be subject to regulation as special students.

COURSES OF INSTRUCTION.

PHARMACY—*General*—Metrology; nomenclature; pharmaco-technology; dispensing.

Inorganic—Non-metals; metals; gravimetric analysis; alkalimetry; acidimetry; pharmaceutics.

Organic—Organic drugs; assays; pharmaceutics.

CHEMISTRY—*Inorganic*—General, complete through non-metals and metals; chemical philosophy; pharmaceutical; analytical; qualitative; quantitative (volumetric and gravimetric); toxicological; inorganic poisons.

Organic—General, elementary, descriptive and experimental; pharmaceutical; qualitative; quantitative (volumetric, gravimetric); toxicological, organic poisons.

MATERIA MEDICA—*Inorganic*—Non-metals; salts of metals; new remedies.

Organic—Vegetable drugs; new remedies.

PHARMACOGNOSY—*Organic*—Descriptive; microscopical.

PHYSIOLOGY—*Human*—Elementary; descriptive.

BACTERIOLOGY—*Elementary*—Descriptive; practical—optional.

MATHEMATICS—*Pharmaceutical*—*Chemical*.

URINALYSIS—*Complete*—*Chemical*; microscopical.

LATIN—*Elementary*—*Medical*; pharmaceutical.

HYGIENE—*Lectures*.

PHARMACAL JURISPRUDENCE—*Lectures*.

MINERALOGY—*Elementary*—*Pharmaceutical*.

PHYSICS—*Pharmaceutical*—*Chemical*.

TOXICOLOGY—*Lectures*.

DISPENSING—*Practical*.

THERAPEUTICS—*Lectures*.

HOMEOPATHIC PHARMACY—*Lectures*.

MICRO-CHEMISTRY—*Lectures and laboratory*.

The courses are comprehensive and thorough, especially adapted to the higher education of pharmacists. In most cases the instruction enters into minute details, and the most effective modern methods of teaching are employed, including laboratory work. The studies are graded and progressive throughout.

FIRST YEAR.

General pharmacy, metrology, nomenclature, pharmaco-technology, inorganic pharmaceutical chemistry, inorganic elementary chemistry, qualitative chemistry, pharmaceutical mathematics, physiology, botany, materia medica, physics, pharmacognosy, microscopy, pharmacopœia, Latin.

SECOND YEAR.

Advanced pharmacology, advanced pharmaco-technology, advanced inorganic pharmaceutical chemistry, advanced organic pharmaceutical chemistry, advanced inorganic general chemistry, advanced qualitative chemistry, advanced pharmacognosy, advanced microscopy, advanced materia medica, volumetric analysis, gravimetric analysis, pharmaceutical jurisprudence, bacteriology, toxicology, urinalysis, mineralogy, hygiene, pharmacopœia, unofficial pharmacy.

THIRD YEAR.

Students who divide their work among three years will take the following studies in the first year and divide the remaining subjects equitably among the remaining two years: Inorganic general chemistry, inorganic pharmaceutical chemistry, qualitative chemistry, physiology, botany, Latin.

PHARMACY, THEORETICAL AND PRACTICAL.

The *junior course* begins with preliminary lectures considering the history and development of pharmacy, the rank which pharmacy occupies among other professions, text-books and works of reference. The pharmacopœia and dispensaries receive attention. Measures and weight: the balance—its construction and varieties, and methods of weighing, specific gravity, in detail, follow.

The pharmaceutical laboratory is under the direct charge of the Dean. The time of instruction is so arranged that the student becomes familiar with the subjects of the lectures from practical work immediately following and relating to them, thereby fixing facts and scientific principles in the student's mind in a manner that does not depend upon his capacity for remembering merely stated facts.

Among the practical subjects that receive attention are the following: Drug grinding and powdering, comminution, contusion, trituration, elutriation, levigation, sifting fineness of powders according to the United States Pharmacopœia, etc.

Collection of drugs, drying, curing, cutting, garbling, etc.

Heat, its sources and uses in pharmacy, its determination, latent and sensible heat: thermometers—the various scales, testing and comparing thermometers; combustion of solids, liquids and gases in various kinds of furnaces, stoves and burners; application of heat in drying ovens, steam, hot-air and water ovens; drying closets, desiccators, blow-pipes, crucibles: baths for controlling and equalizing heat: water-salt-oil-glycerine-paraffine-hot-air-baths: evaporation—spontaneous, rapid, slow, in vacuo; ebullition—boiling points, fusion: sublimation, calcination, granulation, dehydration, torrefaction, roasting, reduction, oxidation, carbonization, deflagration, ignition, etc.

Solutions—chemical, pharmaceutical, simple, complex, saturated: circulatory, displacement.

Dialysis—construction of dialyser, osmosis, endosmosis, exosmosis, crystalloids and colloids.

Maceration—expression, infusion, decoction.

Percolation—history, theories, various methods and forms of percolators, exhaustion, repercolation, continuous percolation, etc.

Filtration—filtering, media, filtration of chemical solutions, oils, syrups, rapid filtration, filtration in vacuo, hot filtration, colation.

Decantation—the syphon and its uses: guiding rods.

Distillation—simple, fractional, destructive, kinds and varieties of stills.

Crystallization—water of crystallization, deliquescence, efflorescence.

Granulation—methods of affecting, etc.

Precipitation—separation, weighing, drying.

Practical pharmacy—The preparation of pills, solutions, mixtures, cachets, ointments, plasters, suppositories, powders, emulsions, lozenges, etc. Arrangement and appliances of dispensing department.

Inorganic U. S. P.

Senior course—This course begins with the consideration in detail of the pharmacy of organic and inorganic drugs. It embraces a careful study of every important galenic preparation with the method of preparation, physical characteristics, reactions, impurities, adulterations and sophistications, etc.

A study of incompatibility is one of the special features of this course; it is viewed from a pharmaceutical and chemical standpoint.

Among the important subjects that are treated, are the following:

Plant exudations, gums, resins, balsams, gum-resins, oleo-resins, etc.

Cellulin and its various products.

Destructive distillation of wood, acetic series, etc.

Carbohydrates: their relationship and characteristics.

Fermentation products, alcohols, ethers, chloroform, nitrous ether, chloral, spirituous liquors, etc.

Organic acids—The official salts and preparations, of tartaric, salicylic, benzoic, citric acid and others.

Fixed oils and fats—Their preparation, composition and purification; various methods of examination; chemical properties and relations; liquid and solid fats.

Waxes and animal fats.

Volatile oils—Their preparation, physical and chemical properties, composition; adulterations and their detection; botanical and chemical classification.

Alkaloids—Physical and chemical properties; the various methods of extraction and identification; classification, alkaloidal reagents, etc.

Glucosides—Difference from alkaloids; full consideration of properties.

Animal drugs and products: all the animal drugs are taken up in detail.

The prescription: the study of the prescription, of incompatibilities, reactions, solubility, etc. New remedies are studied, and an exposition of their chemistry and pharmacy is presented.

The laboratory work in pharmacy follows each lecture, and has direct reference to the subjects treated at the lecture. The preparation of the official standard solutions is fully illustrated. The course includes a thorough study of the pharmacy of the following metals and their salts and preparations: Sodium, potassium, ammonium, lithium, barium, calcium, zinc, magnesium, lead, copper, aluminum, mercury, silver, arsenic, antimony, bismuth, iron, manganese, gold, platinum, etc. The course includes a thorough application of the U. S. P. tests of identity, impurities, and strength of official preparations. Considerable time is given to quantitative work, volumetric and gravimetric.

Text-books—U. S. P., U. S. D., Remington's Pharmacy, National Dispensary, Caspari's Pharmacy.

PHARMACEUTICAL BOTANY AND MICROSCOPY.

The course in botany receives careful attention. It is a junior study and occupies four hours weekly of the student's time throughout the college year. The course is a thorough one, including microscopy and a large amount of laboratory work.

The course is chiefly devoted to a study of the morphology and anatomy of the higher seed plants with special attention to the microscopic characters of roots, rhizomes, barks, fruits and seeds. The formation and occurrence of carbohydrates, glucosides, alkaloids, organic acids, resins and gums are carefully studied. Students receive practical training in the preparation and staining of microscopic sections and in the use of micro-chemical reagents. Laboratory work precedes, whenever possible, the lectures on each branch of the subject. Frequent quizzes, both oral and written, serve to fix the salient points in the students' minds.

Text-books—Strassburger, Noll, Schenck, and Schimper, Porter's Translation.

Reference books—Pastin, Bessey, Vines, Bergen.

MATERIA MEDICA AND THERAPEUTICS.

The work in organic and inorganic materia medica, which includes some ther-

apeutics and toxicology, extends throughout the two years, and occupies from two to four hours weekly. It is taught by lectures, frequently illustrated with specimens belonging to the collection of the college. Pharmacodynamics, including the study of the identity, quality and characteristics of drugs, which is usually included in materia medica, shares attention in the courses of pharmacognosy.

Text-books—U. S. Pharmacopœia, Bracken's Materia Medica, Maisch's Materia Medica, U. S. Dispensatory and National Dispensatory.

PHARMACOGNOSY.

This important subject is taught principally in the senior year.

The vegetable drugs of the United States Pharmacopœia are taken up in the following order: Roots, rhizomes, tubers and bulbs, woods, barks, leaves, herbs and flowers, fruits, seeds, plant exudations, resins, gum-resins, waxes and starches. Each drug is carefully examined, both macroscopically and microscopically. Students are also provided with specimens for home study. The lectures give, in compact forms, the history and important features of each drug, with consideration of its importance to the pharmacist. About a month's time is devoted to the examination of powdered drugs, especially those most liable to sophistication. The quizzes include careful drill on the constituents, action and dose and official preparations of each drug considered. Identification receives careful attention, and there are weekly tests of the student's ability. A short course is given in the microscopic examination of some of the more important alkaloids and glucosides, and of certain emulsions and inorganic salts, if time permits.

Text-book—Sayre's Organic Materia Medica and Pharmacognosy.

Reference books—U. S. P., U. S. D., Flückiger and Handbury's Pharmacographia, Tschirch's Atlas der Pharmacognosie, etc.

The drugs are considered in the following order:

Roots—Sarsaparilla (Mexican, Para and Honduras), senega, gentiana, taraxacum, pyrethrum, inulu, lappa, apocynum, stillingia, sumbul, asclepias, phytolacca, altheæ, belladonna bryonia, calumba, rheum, glycyrrhiza (Spanish and Russian), ipecacuanha, gelsemium, pareira, krameria, rumex.

Rhizomes—Aspidium, zingiber (Jamaican, East Indian and African), calamus, veratum viride, iris, cypripedium, convallaria, sanguinaria, geranium, podophyllum, valeriana, arnica, serpentaria, spigelia, hydrastis, caulophyllum, cimicifuga, leptandra, menispermum, triticum.

Tubers and Bulbs—Jalapa, aconitum, colchicum, scilla, allium.

Twigs and Woods—Quassia, hæmatoxylin, santalum rubrum, gualacum, dulcamara.

Barks—Cinchona (Rubra and Flava), prunus virginiana, viburnum prunifolium, viburnum opulus, rubus, quercus, granatum, aspidosperma, frangula, cascara sagrada (false and true), rhamnus purshiano, juglans, xanthoxylum, mezereum, gossypii radix, euonymus (of root and stem), quallaia, ulmus, sassafras, cascarilla, cinnamomum (Ceylon, Saigon and cassia).

Leaves and Leaflets—Pilocarpus, eucalyptus, uva ursi, senna (Alexandria and India), erythroxylin (Bolivian and Truxilla), belladonna, stramonium, hyoscyamus, tabacum, digitalis, matico, salvia hamamelis, castanea, eriodictyon, chima-phila, buchu (long and short), rhustoxicodendron.

Herbs and Flowers—Santonica, carrophyllus, sambucus, calendula, cusso, arnica, matricaria, anthemis, rosa gallica, rosa centifolia, crocus, zea, chondrus, cetraria, cannabis indica, pulsatilla, scoparius, eupatorium, grindelia, tanacetum, artemisia, absinthium, lobelia, mentha, piperita, mentha viridis, melissa, thymus, hedeoma, marrubium, chirata sabina, chelidonium.

Fruits—Juniperus, humulus, piper (longum, nigrum et album), cubeba, pimenta, rhus glabra, capsicum, colocynth, cassia fistula, chenopodium, xanthoxylum, illicium, cardamomum, coriandrum, contum, anisum, carum, fœniculum (Roman and German), macis, aurantii amari cortex, aurantii dulcis cortex, limonis cortex, prunum, tamarindus (East and West Indian), phytolacca, ficus, rubus idæus.

Seeds—Physostigma, amygdalus (dulcis et amara), pepo, myristica, theobroma, sinapis (alba et nigra), nux vomica, delphinium, staphisagria, ricinus, tiglium, stramonium, colchicum, cardamomum, strophanthus, linum.

Miscellaneous—Guarana, lactucarium, alœ (Socotrina, Barbadosensis, et Capensis), catechu, gambir, kino (Malabar et Pallas), opium, elastica, manna, saccharum, saccharum lactis, acacia, tragacantha, mastiche, sandaraca, colophonium, mel, gnaiaicum, benzoinum, cambogia, galbanum, asafoetida, copaiba, terebinthina, resina, pix (Burgundica et liquida), styrax, balsamum peruvianum, balsamum tolitantum, comphora, thymol, menthol, ammoniacum scammonium, myrrha, ergota (Spanish and German), sassafras medulla, galla (Aleppo et Chinensis), gossypium purificatum, kamala, lupulinum, lycopodium, amyllum, cetaceum, cera, cantharis, coccus, ichthyocolla, moschus, carbo animalis et ligna.

Besides the foregoing a number of the more important unofficial drugs will also be discussed.

GENERAL CHEMISTRY.

This is a course in general chemistry given in the department of medicine. In the presentation of the subject, practical work in the chemical laboratory follows the lectures. The system is one which gives the student confidence in his work from the beginning and the better enables him to keep step with the rapid progress of the instruction.

The course is graded through the junior and senior years, with three lectures and two afternoons' laboratory work weekly during the entire first year, and during half of the second year. The second half of the senior year is devoted to lecture work only, the laboratory work concluding in the first half.

Text-books—Ramsen's Inorganic Chemistry—Wulling's Chemistry.

QUANTITATIVE CHEMISTRY.

The course in quantitative analysis is given during the senior year. It is graded and begins with simple gravimetric determination of certain acids and metals, followed by determination of several ingredients of the same compound, and by complex analysis. Volumetric methods are next learned and applied, then gravimetric and volumetric are employed together. The course is didactic and practical.

Text-books—Schimpf's Volumetric Analysis.

PHARMACEUTICAL ORGANIC CHEMISTRY.

The course is given in the senior year. It includes both descriptive and experimental lecture and laboratory work. The organic chemistry of pharmacy is taught in connection with the course in pharmacy and pharmaceutical chemistry.

PHARMACEUTICAL INORGANIC CHEMISTRY.

Inorganic and organic pharmaceutical chemistry are taught in both the first and second years. As it is so important a part in the curriculum it receives attention both in special lectures and in the laboratory. The principles of chemistry acquired in the other courses in chemistry are here applied directly to pharmacy. The chemistry necessary to the thorough comprehension of the Pharmacopœia is expounded and applied in this course.

Text-books—Wulling's Pharmaceutical Chemistry: U. S. P.; Sadtler & Trimble's Pharm. and Med. Chemistry.

TOXICOLOGICAL CHEMISTRY.

The study of this subject follows the course of general chemistry in the senior year. The course includes the chemistry of organic and inorganic poisons. Toxicology proper is included in the course in materia medica.

Text-books—Reese's Toxicology; Taylor on Poisons.

ELEMENTARY PHYSIOLOGY AND ANATOMY.

This subject is taught to the juniors in the latter part of the junior year in a special course of eighteen lectures. The study of the action of drugs and their effects upon the system cannot be intelligently carried on without some knowledge of the structure and functions of the various organs.

Text-book—Martin's Human Body.

BACTERIOLOGY.

The course in bacteriology is given to the seniors, and consists of lectures and recitations illustrated by microscopic preparations and culture of various bacteria. Opportunity is afforded in the laboratory for special research work. This course is optional with students in pharmacy.

MATHEMATICS.

Students in this college receive careful drill in the application of mathematics to pharmacy and chemistry.

URINALYSIS.

This course comprehends both qualitative and quantitative determination of the constituents of normal and pathological urine, and a microscopical examination of deposits. Seniors attend in the latter half of the year. The instruction is given partly in the chemical and partly in the pharmaceutical laboratory.

Text-book—Tyson's Examination of the Urine; Hoffmann and Uitzmann.

HYGIENE AND SANITARY SCIENCE.

A course of from six to ten lectures is provided in this subject, if time permits. For seniors.

Text-books—Parks.

HOMEOPATHIC PHARMACY.

A course in homeopathic pharmacy has been added to the curriculum. It comprises both lectures and laboratory work and is given in the senior year.

Text-book—Homeopathic Pharmacopœia.

MICRO-CHEMISTRY.

A brief course is provided for seniors, if time permits.

MEDICAL AND PHARMACEUTICAL JURISPRUDENCE.

A course of lectures in this subject is provided and seniors are required to attend. The lectures are delivered by the dean of the college.

LATIN.

A special course is provided in medical and pharmaceutical Latin, which all students are earnestly advised to attend. Latin is one of the entrance requirements, and this course has been introduced especially for students who are pro-

ficient in the other entrance requirements, but not in Latin. The attendance upon the lectures is obligatory for such, and optional for those who have fulfilled the entrance requirement in Latin. The latter will profit by taking this course as it is especially adapted to pharmacists. Two hours weekly are given to the study during the school year.

MINERALOGY.

A short course of lectures embracing the minerals and ores which are the sources of the metals and salts used in pharmacy is provided.

PHYSICS.

Students are required to be familiar with elementary physics, before entering this college. The physics involved in the various chemical and pharmaceutical processes, is, however, fully elucidated as occasion suggests or requires, and considerable attention is given the subject incidentally, principally in the pharmaceutical laboratory.

PHARMACY LAW.

Several lectures will be given to the seniors on the pharmacy laws of the state.

FIRST AIDS TO THE INJURED.

A series of six to eight lectures on this subject is delivered to the seniors the latter part of the second semester.

TEXT AND REFERENCE BOOKS.

Pharmacy: U. S. Pharmacopœia, Remington's, Caspari's and Coblenz's, Practice of Pharmacy, U. S. Dispensatory, National Dispensatory, Lyon's Pharmaceutical Assaying, Storer's Dictionary of Solubilities, Hager's Handbook of Pharmacy, Fluckiger and Hanbury's Pharmacographia, Era Formulary, American Pharm. Assoc. Proceedings, Berichte der Pharm. Gesellschaft, Peter's Ancient Pharmacy, National Formulary, Homeopathic Pharmacopœia, German Pharmacopœia, British Pharmacopœia, Volatile Oils, Kremer's Gilde-meister & Hoffman.

Pharmaceutical Chemistry: Wulling, Sadtler and Trimble Attfield, Simon, Hoffman and Power's Examination of Medical Chemicals, Schmidt, Elsner.

General Chemistry: Rensen's Inorganic, Prescott and Johnson's, Watts' Fownes, Gmelin's Handbook, Roscoe and Schorlemmer, Watts' Dictionary, Fresenius, Sadtler's Industrial Organic Chemistry.

Prescriptions: Ruddiman on Incompatibility. Gerrish's Prescription Writing. Rice's Posological Tablets.

Mathematics: Oldberg's Pharm. Problems, Weights and Measures, Mathematical Chemistry, Helm and Morgan's, Metric System by Hamblin Smith.

Materia Medica: U. S. Pharmacopœia, Sayre, Bracken, Maisch, U. S. Dispensatory, National Dispensatory, Culbreth, Bently and Trimen's Medicinal Plants.

Pharmacognosy: Sayre, Maisch, Rusby and Jelffe, Fluckiger, Huseman and Hilger's Pflanzenstoffe, Base on Vegetable Microscopy, Hanbury's Pharmacographic and Science Papers, Tschirch and Oesterle's Anatomischer Atlas der Pharmacognosie, Herlant's Micrographies des Poudres Officinales.

Botany: Strassburger Noll and Shimper's, Bergen, Bastin, Vines, Bessey, Bentley, Gray, Cross and Bevan on Cellulose, Weisner's Rohrstoffe, Strassburger and Hillhouse, Geddes, Zimmerman on Botanical Microtechnique, Warming and Posser.

Urinalysis: Tyson, Flint, Von Jaksch on Clinical Diagnosis, Simon's Clinical Diagnosis Beale's Chart, Hoffman and Ultzmann, Peyer's Atlas.

Mineralogy: Dana.

Physiology: Martin's Human Body, Foster, Howell's American Text-book of Physiology.

Bacteriology: Schenck, Sternberg, Fraenkel, Abbott.

Toxicology: Reese, Taylor on Poisons.

Latin: Robinson's Latin Grammar of Pharmacy, Jones, Harkness.

Miscellaneous: Gill's Oil Analysis, Mandel's Bio-Chemistry, Leffmann and Beam's Analysis of Milk, Wing's Milk and its Products, Lassar and Cohn's Chemistry in Daily Life, Park's Hygiene and Sanitary Science, Stewart's Pocket Dose-Book.

LIBRARY.

The students of this college have free access to all the library facilities of the University and of the city. The medical library contains, in addition to about twenty-four hundred volumes of a technical nature, the more important American and European medical and pharmaceutical periodicals.

LENGTH OF COURSE.

The complete course extends over two years, eight and one-half months each. Students may arrange their work so as to take the course in three years, without additional expense to them. It is quite possible that a three years' course may be required of students in this college in the near future.

The eleventh annual course begins Monday, September 14, 1903, at 9:00 a. m., at which time all applicants for admission should present themselves with their credentials.

The college year is divided into two semesters; the first ending January 22d, 1904. The week following is devoted to mid-year examinations. The second semester begins February 1st and closes May 17th, when the final examinations in all subjects begin.

REQUIREMENTS FOR ADMISSION.

I. Candidates who present a diploma of a reputable college, or of a high school of the first grade, or of the advanced course of a Minnesota State normal school, or of the preparatory department of either Hamline University or Carlton College, or of Pillsbury Academy, or of the Minneapolis Academy, or of any institution of similar standing or grade, will be admitted without examination. If the diploma does not cover physics, that branch will need to be taken up by the student during the first year of attendance.

Those bringing certificates of good standing in institutions of the collegiate grade are also admitted without examination.

II. Applicants who bring evidence of having been engaged in the

practice of pharmacy for one or more years, who cannot meet the above requirements, are examined in the following branches:

1. English—An original composition of not less than 300 words upon some topic to be announced at the time of examination. Orthography, punctuation, use of capitals, grammatical construction and rhetorical fitness will be considered.

2. Algebra—elementary.

3. Physics—elementary.

III. Other applicants will be examined in the following branches:

1. English.

2. Algebra or geometry—elementary.

3. Physics—elementary.

4. Physiology or botany.

5. Latin—Jones' First Latin Book or an equivalent.

A foreign language, preferably German or French, may be offered in place of Latin, but Latin must then be pursued subsequent to entrance. Applicants whose preparatory course of study has not conformed precisely to the requirements above enumerated will be allowed to offer, in lieu of a portion of these requirements, equivalent preparation in similar branches of study; and if they show, by examination, or by other evidence, that their preparation has been substantially equivalent, such branches will be accepted as a substitute for those omitted.

The examinations for entrance are conducted by the faculty of the college of pharmacy, in the pharmacognosy room, beginning at 9:00 a. m., on Monday, September 14, 1903. Lecture work begins as soon as possible after the examinations, usually the following day.

PROFESSIONAL EXAMINATIONS.

Examinations are held during the last two or three weeks of the regular session and during the last week of the first semester, and are supplementary to the written recitations and quizzes that are held at frequent intervals during the term, and with them form the basis of final determination of fitness for promotion or graduation. Students are rated throughout the year, and all students who have a standing of ninety per cent, or more, in certain of the branches, may not be required to take the final examination in those branches.

Students are not required to write graduating theses, but, instead, they keep complete records of all their laboratory work. The records are to be kept in substantially bound books, to be approved by the faculty. The respective professors call for the records for inspection and rating once a month or oftener. Duplicates of records are to be furnished the college by the students. The college provides the paper.

CONDITIONS.

Students having conditions in more than one major or in more than two minor subjects of the first year, cannot enter upon the second year's work. All entrance conditions must be removed before the spring examination. Candidates for graduation must have removed all conditions before entering upon the second semester of the graduating year.

Condition examinations are held during the week preceding the beginning of the course in September. The dates are posted in June. Conditioned students are required to inform themselves as to these dates as soon as they learn that they are conditioned, as no other notice is given.

ADVANCED STANDING.

Applicants for advanced standing must pass the entrance examinations, or present the usual equivalents. They must furnish satisfactory evidence of time spent and subjects covered in previous professional studies and must present themselves at the above dates and pass the examinations of all departments in which they wish to be exempt, if such examinations are deemed necessary by the professors in charge of the various departments.

DEGREE.

This college confers the degree of pharmaceutical chemist (Ph. C.) upon the graduates.

REQUIREMENTS FOR GRADUATION.

Regular attendance at lectures, quizzes and laboratory exercises. Students will not be permitted to present themselves for final examination unless they have been in attendance upon at least seven-eighths of the required number of exercises.

Every person upon whom the degree is conferred must be of good moral character, and must be at least twenty-one years old; must have attended two full lecture and laboratory courses, the last at this college, and must have passed a successful examination in the subjects required for graduation.

Drug store experience is not a requirement for graduation.

Those who fail to appear for examination after having paid their diploma fee, or those who do not pass satisfactorily, will be permitted to present themselves at any subsequent examination, upon payment of an additional fee of five dollars, and complying with all other requirements.

GRADUATE COURSE.

In addition to the course outlined, and which leads to the degree pharmaceutical chemist (Ph. C.), this college offers two graduate courses, the first continuing through one college year and leading to the degree of master of pharmacy, and the second continuing through an additional year or longer, and leading to the degree of doctor of pharmacy. The first graduate course, the one leading to the master's degree, is now in operation. It is intended that the curriculum shall include higher pharmaceutical chemistry, pharmaceutical assaying, higher organic chemistry, proximate and ultimate analysis, chemistry of food, spectroscopic work, therapeutics, and bacteriology, and a thesis of at least 3,000 words, embodying the results of original work, but this curriculum may be changed by the faculty if occasion or experience so require.

The requirements for admission are a diploma from a Minnesota high school for the first grade, or an equivalent; a diploma from a college of pharmacy whose curriculum, extent and kind of work and length of under-graduate course are equal to those of the under-graduate work of this college; an acquaintance with either German or French sufficient to enable the students to read and understand the scientific literature in those languages, and a certificate of registration as pharmacist from any state board of pharmacy. The fees for this course will be seventy-five dollars, and, in case of graduation, an additional fee of ten dollars for diploma. The rules relating to damage, waste or breakage in laboratories are the same as those applying to the undergraduate course.

The course leading to the doctor's degree will begin as soon as there are sufficient applicants.

BREAKAGE AND LOSS.

In each laboratory course the student will be assigned a certain amount of apparatus and material, for which he will give receipt. At the end of each course, if such apparatus and material are restored in good condition this receipt will be returned to him.

All apparatus lost or damaged will be charged to him and must be paid for before he can receive credits for his course or take his annual examinations. A breakage deposit fee is required to insure this payment.

GENERAL STATEMENT.

Those who do not pass the entrance examinations, may enter this college and complete their course in three years, provided they pursue the subjects required for admission, in addition to the professional work that may be assigned to them, and pass their entrance examina-

tions, before the end of the first year. There are a number of preparatory schools in the neighborhood of the University, where the subjects required for admission may be pursued.

Students are permitted to use their own crude drugs for the making of preparations, provided such material is approved by the dean of the college as suitable to demonstrate the lesson in hand. Finished products from such material, if of satisfactory quality, are at the disposal of the student, unless made with the tax-free alcohol belonging to the college.

Absence will not be excused, unless satisfactory reasons are given to the professor in charge. Habitual absence without a satisfactory excuse, continued indifference to study, or persistently poor scholarship may subject the student to temporary or permanent suspension. Students are earnestly requested to be present at the beginning of the school year. Special students, however, may enter at any time; they will not be rated in their work, nor will they be examined unless they make special request therefor. All the facilities for work in the University are open to the students of this college, subject to the approval of the dean. Opportunity is afforded to do advanced work in all branches. Text-books may be obtained after coming to the University.

FEES.

TWO YEAR COURSE.

First year	\$75.00
Second year	80.00
Diploma	10.00
	————— \$165.00

Students who divide their work into three years pay their fees as follows:

THREE YEAR COURSE.

First year	\$45.00
Second year	55.00
Third year	55.00
Diploma	10.00
	————— \$165.00

There are no other fees in the regular course. Half the annual fees are payable before entrance, the remaining half before February 1st. Those desiring to take special work will be required to pay fifteen dollars a subject in the didactic courses and twenty-five dollars in the laboratory courses.

Students will be charged for laboratory material if used unreasonably. At the end of laboratory courses students will be required to pay for breakage and damage to utensils in their care. If a student is careful this charge need not amount to more than two or three dollars. Students are to provide themselves with a set of metric weights, a set

of apothecary's weights and steel spatulas. The expense of these is within two dollars. Students using platinum crucibles are charged for same. Upon the return of the crucible in the original condition the charge is cancelled; if the crucible is in any wise damaged, the full value is collected from the student. A rental of two dollars per college year is charged for the use of a microscope. All money is payable to the accountant of the University, who will give receipts which must be deposited in the dean's office.

Students will be required, when entering upon laboratory work, to deposit five dollars with the accountant to cover breakage, damage and waste. At the end of the laboratory course any part of the sum unused will be returned to the student.

The diploma fee is to be paid by candidates for graduation before the beginning of the final examinations. Those whose term rating exempt them from the final examinations pay the diploma fee at least one week before commencement.

If a student is forced to discontinue work before the Christmas vacation for sufficient reasons, his lecture fee will be returned pro rata; if he discontinues work for insufficient reason, the fee will be retained and credited pro rata, on any succeeding course of lectures.

Laboratory fees will not be returned, except in case of discontinuance for sufficient reason, before the student has been assigned to a place in the laboratory. It is desirable that the students enter at the opening of the session in order to be admitted to the laboratories.

STATE BOARD OF PHARMACY.

The Board meets at the college in January, April, July and October of each year. For information concerning the Board, address the Secretary, Mr. H. G. Webster, 517 Bank of Commerce Building, Minneapolis, Minn.

COLLEGE OF PHARMACY ALUMNI ASSOCIATION.

The Alumni Association meets annually in the college building the day before commencement, at 3 p. m. Every member of the Association is urgently requested to report change of address to the secretary.

COMMUNICATIONS.

Address all communications to the Dean, Frederick J. Wulling, University of Minnesota, Minneapolis, Minn.

 Williams, Mrs. H. L. Minneapolis.
 Williams, May Damaris, Minneapolis.
 Williamson, Syvert, Dwight, N. D.
 Wilson, Mary Russell, Minneapolis.
 Wood, Nancy Howe, St. Paul.
 Wood, A. Gordon, Duluth.

SCHOOL OF CHEMISTRY.

SENIOR CLASS.

Bakke, Ole Mathias, St. James.

JUNIOR CLASS.

Benner, Winthrop Webster, Sauk Center.
 Grout, Frank Fitch, Rockford, Ill.
 Gutsche, Edward Jacob, Glencoe.

Hopkins, Joseph Irwin, Bloomington.
 Rose, Anton Richard, Marine.
 Whiteside, R. Howard, Duluth.

SOPHOMORE CLASS.

Burnham, Chilo W., Carrington, N. D.
 Dahlberg, Arnold Victor, Fergus Falls.
 Frary, Francis Cowles, Minneapolis.
 Humphrey, John Register, Granite Falls.
 Jackson, Myron Baugs, St. Paul.

Le Beau, H. C., Little Falls.
 Longworth, Fred James, Ortonville.
 Pennock, E. M., Minneapolis.
 Poore, Charles D., Bird Island.

FRESHMAN CLASS.

Bernhagen, Otto Lewis, Minneapolis.
 Goble, Arthur Steen, Earlville, Ill.
 Nye, George Mortou, Minneapolis.

Poore, Orson Birney, Bird Island.
 Williams, Lillian Mae, Minneapolis.

THE COLLEGE OF ENGINEERING AND THE MECHANIC
ARTS, 394.

SENIOR CLASS, 30.

CIVIL ENGINEERS, 13.

Barlow, Harry E., St. Paul.	Oltman, Charles Albert, Red Wing.
Bennett, Walter James, Minneapolis.	Prendergast, Arthur, St. Paul.
Beyer, Theodore Alexander, St. Paul.	Robbins, Orison B., St. Paul.
Davison, Joseph Henry, St. Paul.	Smith, Leighton, Minneapolis.
Grow, Harry Allen, Dawson.	Smith, Paul S., Minneapolis.
Madden, Francis Michael, Eyota.	Stewart, Clarence H., St. Paul.
Novig, Ole L., Norway.	

MECHANICAL ENGINEERS, 3

Hughes, Frank C., Minneapolis.	Williams, Edward Hale, West Cedar Lake.
Kjosness, Ingram Gerhard, Madison.	

ELECTRICAL ENGINEERS, 12.

Benedict, George Frederick, St. Paul.	Page, Mark L., Minneapolis.
Dibble, Barry, St. Paul.	Rask, Louis G., Caledonia.
Eberhard, Otto Immanuel, Milaca.	Rosok, Ingwald A., Minneapolis.
Erickson, Carl G., Minneapolis.	Rosok, Marius, Minneapolis.
Laird, Lee R., Wilmot, S. D.	Schumacher, John H., Minneapolis.
Miller, Lucius W., Red Wing.	Vincent, Jay C., Minneapolis.

SCIENCE AND TECHNOLOGY, 2.

Crouse, Avery F., Minneapolis.	Whitney, Alfred C., St. Paul.
--------------------------------	-------------------------------

JUNIOR CLASS, 51.

CIVIL ENGINEERS, 19.

Raihly, Moses Daniel, Rochester.	McMillan, Franklin R., Luverne.
Bogue, Nathan Herschel, Castle Rock.	Moyer, Sumner L., Montevideo.
Bowen, Fred Pabst, St. Paul.	Nelson, Nels Benoni, Preston.
Doherty, Walter Anthony, St. Paul.	Rasmussen, Alfred Johannes, Houston.
Fernald, Frank Osborne, St. Paul.	Root, Alexander B., Emerson, Manitoba.
Foss, Lota Alice, Minneapolis.	Rothi, Paul, Moland.
Gillette, George Lewis, Minneapolis.	Tanner, Walter Krabiell, Cannon Falls.
Holland, Jay Clark, Minneapolis.	West, Robert William, Rochester.
Hovde, Edward E., Wabasha.	Wood, Sheldon, Minneapolis.
Johnson, Nels, Preston.	

MECHANICAL ENGINEERS, 14.

Andrews, George Luther, Green Valley.	Johnson, Austin G., Minneapolis.
Bohn, Carl Frederic, St. Paul.	Peterson, John N., Litchfield.
Bradford, Henry B., Minneapolis.	Rydeen, Francis G. A., Gibbon.
Cutter, Francis Charles, St. Paul.	Stageberg, Martin George, Dawson.
Davis, Gilbert N., Minneapolis.	Stanton, Raymond Edward, St. Paul.
Fager, Simon Rudolph, Minneapolis.	Lewis, Edward Bunker, Willmar.
Howatt, James William, Wabasha.	Otto, Robert Walter, St. Paul.

ELECTRICAL ENGINEERS, 17.

Bosworth, Vern Howard, Utica.	Huff, Benjamin Long, Tonawanda, N. Y.
Bouman, Bernhard Martin, Murdock.	Manthey, George H., Winona.
Brooke, Charles Walter, Marshalltown, Iowa.	Morton, Harry Garfield, Merriam Park.
Cheney, Edward Joseph, Keosauqua, Ia.	Otto, Fred Arthur, St. Paul.
Crabbe, George, Minneapolis.	Saunders, Arthur William, St. Paul.
Dustin, Frank G., Minneapolis.	Taplin, Robert Baird,
Goodwin, Victor Earl, Minneapolis.	Brockville Province, Ontario, Canada.
Helms, Frank Charles, Cumberland, Wis.	Tomplinson, L. C., Glencoe.
Howatt, John, Lake City.	Wicks, John, Tyler.

SCIENCE AND TECHNOLOGY, 1.

Collins, Stewart Garfield, Minneapolis.

SOPHOMORE CLASS, 122.

CIVIL ENGINEERS, 39.

Acton, Robert William, Madison.	King, W. Eugene, Anoka.
Baldwin, Ralph Harvey, Mankato.	Malloy, Charles James, Red Wing.
Bisbee, Elmer, Madelia.	Mattison, Oliver, Minneapolis.
Brockway, Rayden Ray, Luverne.	Mueller, Henry John, Hamburg.
Burke, Roy Latourette, Minneapolis.	Murphy, John, Litchfield.
Cary, Alan Gibbs, St. Paul.	Ostvig, Richter Norman, Benson.
Childs, Donald, Minneapolis.	Pagenhart, Edwin Herbert, Rochester.
Childs, John Chauncey, Carroll, Neb.	Penfield, Herbert J., Hudson, Wis.
Cram, Clyde Maxwell, Zumbrota.	Peterson, Arthur L., Olivia.
Daley, Gustave Johann, Fertile, Ia.	Riste, J. Norman, Decorah, Ia.
Few, Thomas Harry, Flandreau, S. D.	Scandrett, B. W., Faribault.
Feyder, William Henry, St. Paul.	Smith, Donald Tidd, Chicago, Ill.
Finley, Joseph Edward, Janesville.	Steinberg, Lewis Robert, Mason City, Ia.
Frahm, Herbert Conrad, Rochester.	Streissguth, William Christ, Arlington.
Gregg, Treshman D., Minneapolis.	Taylor, Carl van F., St. Paul.
Groth, William Charles, Preston.	Thomas, Evan, Mankato.
Hayward, George L., Pine Island.	Tondel, Mandel George, Minneapolis.
Hopeman, Albert M., Preston.	Woolery, Mark Davis, Elmore.
Jardine, John Alexander, Fargo, N. D.	Yerxa, Dwight Keyes, Minneapolis.
Jensen, John Arthur, Fergus Falls.	

MECHANICAL ENGINEERS, 37.

Alden, Lyman Shedd, Minneapolis.	Harris, Sigmund, Minneapolis.
Baker, Glenn Julian, Mason City, Ia.	Hartzell, James Hugh, Minneapolis.
Boardman, George Albert, Minneapolis.	Jackson, Earle Daniel, Minneapolis.
Brown, James Everett, St. Paul.	Jackson, Marshall Shawe, St. Paul.
Campbell, Lewis Park, Duluth.	Johnson, Ernest P., Albert Lea.
Carrigau, Charles, Lake Side.	Kinnard, Chester H., Minneapolis.
Cliffell, Carrol D., Minneapolis.	Lowry, Samuel Doak, Austin.
Disney, Leonard William, Zumbro Falls.	Loye, Benjamin W., Red Wing.
Downs, Gerald Huntley, St. Paul.	Matteson, Frank Elmer, Eyota.
Drum, Andrew Boggs, Waseca.	Morse, Gordon V., Sauk Center.
Frahm, Lucius Henry, Rochester.	Ormond, Alexander Meredith, Rochester.
Fuller, Harry Victor, Mankato.	Pancratz, Alexander, Perham.
Gunther, Albert Nelson, St. Paul.	Robinson, Charles Dudley, St. Paul.
Hall, Elmer Franklin, Anoka.	Sheldon, W. B., Red Wing.
Harrington, Glenn M., Minneapolis.	

Sperry, Leonard B., Wasioja.
 Stout, William Bushnell, Winona.
 Sutton, Frank Edgar, Hillsboro, N. D.
 Thompson, Arthur Harris, Minneapolis.

Tuck, George Albert, Minneapolis.
 Walker, Archie Dean, Minneapolis.
 White, Grant Augustus, Luverne.
 Wood, John William, Stewartville.

ELECTRICAL ENGINEERS, 45.

Abel, Charles A., Shakopee.
 Anderson, Emil, Farwell.
 Avedovech, Myer, Minneapolis.
 Bergseng, Oscar, River Falls, Wis.
 Billau, Lewis Scoville, St. Paul.
 Boman, Carl Emmanuel, Stockholm.
 Coleman, Frank D., Ellendale, N. D.
 Downing, Lloyd, St. Charles.
 Ely, Irving Robinson, Milbank, S. D.
 Fairchild, Albert Royal, Buxton, N. D.
 Ford, Arthur Francis,
 White Sulphur Springs, Mont.
 Frankovitz, John Joseph, Fergus Falls.
 Garber, Gabriel Everett, Minneapolis.
 Gerrish, Harry E., Minneapolis.
 Gibson, Charles Bradley, Cedar Rapids, Ia.
 Harris, Clayton John, Park River, N. D.
 Houghtaling, Jay, Fairmont.
 Hovelson, Henry, Minneapolis.
 Hubbard, Robert Thorold, St. Paul.
 Jones, Raymond Lasley, Minneapolis.
 Kochendorfer, Milton, South Park.
 LeBlond, Edmond Jean, Minneapolis.

LeFever, Orland Lester, Hampton, Ia.
 LeTourneau, Edward H., Duluth.
 Lum, Fred Carleton, Minneapolis.
 Lundquist, Ruben Alvin, Red Wing.
 Maley, Levi William, Zumbrota.
 Milbam, Roy Edward, St. Paul.
 Morris, Robert, Greenleafton.
 Nelson, Norman Clarence, Plainview.
 Okes, Day Ira, Minneapolis.
 Rice, Alonzo Clinton, Wahpeton, N. D.
 Ryan, Will, Joice, Ia.
 Sainsbury, Charles E., Lamaille.
 Shuck, Gordon Russell, Rushmore.
 Simmon, Karl Albert, Jr., Helena, Mont.
 Smith, Clinton B., Minneapolis.
 Sorenson, Oscar, Renville.
 Stanton, Charles J., Sauk Rapids.
 Stone, Harris Garfield, Waseca.
 Torrance, James Benjamin, Minneapolis.
 Tradewell, Owen George, Delhi.
 Walshe, James, Northfield.
 Wilcox, Edgar Dunning, Minneapolis.
 Williamson, Edward Frank, Minneapolis.

SCIENCE AND TECHNOLOGY, 1.

Vau Cleve, Horatio P., Minneapolis.

FRESHMAN CLASS, 126.**CIVIL ENGINEERS, 33.**

Adams, Elmer Ellsworth, Willmar.
 Alrick, Bannona Gerhardt, Zumbrota.
 Alsop, Ernest B., Moorhead.
 Batson, Charles Drewry, St. Paul.
 Broderick, George Harry, Minneapolis.
 Buckley, John, Farmington.
 Childs, Hervey Butler, Ortonville.
 Doeltz, William Fred, Jr., Minneapolis.
 Dougan, Henry Knox, Minneapolis.
 Dunham, John A., Mason City, Ia.
 Elston, Fred Carroll, Duluth.
 Enger, Norval, Decorah, Ia.
 Glasgow, John Francis, Worthington.

 Hall, Orrin Ives, Jr., Zumbrota.
 Hanauer, Monroe, St. Paul.
 Hanson, Martin Adolph, Eau Claire, Wis.

Hawley, Harry Garfield, Worthington.
 Herrmann, Alvin, St. Paul.
 Hustad, Andrew P., Granite Falls.
 Huston, David B., Minneapolis.
 Hyatt, Frank L., Minneapolis.
 Kelley, Frank Arthur, Minneapolis.
 Kells, Laurel Lucas, Sauk Center.
 Lawrence, Charles McLaren, Minneapolis.
 Leland, Oscar Brace, New Ulm.
 McCall, Harry John, Minneapolis.
 Menne, William Frederick, Albert Lea.
 Peterson, Arthur Andrew, St. Paul.
 Reed, Arthur Lathrop, Anoka.
 Walker, Herbert Edwin, St. Paul.
 Widell, Gust Fred, Mankato.
 Wiesner, Frederick Edward, Tracy.

MECHANICAL ENGINEERS, 29.

Angler, Carroll Waite, Litchfield.
 Baer, Louis Edward, Kenyon.

Bazille, Chester Arthur, St. Paul.
 Chrysler, Louis Gage, Lake Park, Ia.

Craig, Gordon Matthew, Portland, Ore.
 Crawford, Wallace T., Faribault.
 Dean, John Cotton, Minneapolis.
 DeLong, Scott H., Nickerson.
 Dorsett, Karl, Minneapolis.
 Hasbrook, Phillips, Minneapolis.
 Holcomb, Myron Dustan, St. Paul.
 Hull, George Keats, St. Paul.
 Johnson, Frank, Willmar.
 Lawton, Harry Conegys, St. Paul.
 McDougall, Ralph Fritz, St. Paul.
 Miller, Leslie Freeland, Minneapolis.
 Molander, Arthur Hilding, St. Paul.

Rahr, Niels, Manitowoc, Wis.
 Rawson, Ralph Harvey, Faribault.
 Ringsred, Arthur Christian, Duluth.
 Robinson, George Washington, Preston.
 Roundy, Pearl Judson, Wabasha.
 Shepard, David Chauncey, St. Paul.
 Shepard, Samuel McMillan, St. Paul.
 Staples, Elmer, St. Paul.
 Stephens, Ralph B., Minneapolis.
 Teasdale, Frank Wallis, St. Paul.
 Utton, John Claremont, Minneapolis.
 Wellford, Arthur Robert, Minneapolis.

ELECTRICAL ENGINEERS, 58.

Albrecht, George Moritz, St. Paul.
 Allen, Elmer A., Lanesboro.
 Anderson, Godfrey, Lake City.
 Andrus, Raymond Joel, Mason City, Ia.
 Benson, Leslie Elbert, Wadena.
 Bergendahl, Harold Martin Leonard,
 Ellendale, N. D.
 Blitz, Ralph Silvester, Minneapolis.
 Brown, Oliver Lindley, Minneapolis.
 Bullard, Oliver, Minneapolis.
 Burwell, Fred Wendell, Minneapolis.
 Burwell, Loring Dunham, Minnetonka.
 Calmeyer, John Peter, Glenwood.
 Christie, Morris Wood, Ottumwa, Ia.
 Cohen, Nathan, Minneapolis.
 Converse, Clovis Miller, St. Paul.
 Cooper, Leo Henry, Emerado, N. D.
 Cornelius, Martin, Roberts, Wis.
 Dunn, Andrew Paul, Winnebago.
 Easton, Ned, Stillwater.
 Eddy, Lynne Walter, St. Paul.
 Englin, Charles Frederic, Stillwater.
 Evans, Leon Rozelle, Hutchinson.
 Finchy, Jacob Oscar, Wabasha.
 Griffith, Charles Arthur, Hector.
 Haerberle, Elmer Harvey, New Ulm.
 Hansen, Oscar Sverdrup, St. Paul.
 Hoff, Christopher, St. Paul.
 Hokanson, Clarence E., Hector.
 Huff, Paul, Minneapolis.

Krag, Clarence Walter, Hampton, Ia.
 Kremer, George Everett, Minneapolis.
 Lang, Charles Arthur, Minneapolis.
 Lee, James Rutherford, Stewart.
 Lovgren, Harvey M., Red Wing.
 Luppen, Luppe Barnes, Pekin, Ill.
 Nelson, Irwin Chester, Atwater.
 Nordine, Louis Ferdinand, Lake City.
 Noyes, Harold Arthur, St. Vincent.
 Payne, Harold Gould, Minneapolis.
 Pearce, John Henry, St. Paul.
 Platt, Julius, Springfield.
 Ramstead, George Henry, Eau Claire, Wis.
 Roberts, Robert, Lake Crystal.
 Robison, Archer Roy, Windom.
 Roepke, Otto Bismarck, Minneapolis.
 Saunders, Court Edward, Faribault.
 Schwedes, Walter Fred, Wabasha.
 Shepherd, Alfred Bowen, Mitchell, S. D.
 Sternberg, Carl, St. Paul.
 Taylor, Clarence B., St. Thomas, N. D.
 Thornton, Edwin Burdette, Benson.
 Tomm, Luther Eugene, Pekin, Ill.
 Tone, Thomas, Gilman, Ia.
 Ungerman, Carl Mugg, Minneapolis.
 Weber, Erwin Leo Franz, Helena, Mont.
 Wiggins, Gerald Graham, Minneapolis.
 Woehler, William Louis, New Rome.
 Zimmer, William Arthur,
 Big Stone City, S. D.

SCIENCE AND TECHNOLOGY, 6.

Bond, Harold Harvey, St. Paul.
 Carter, Robert John S., Austin.
 Clarke, Charles P., Elysian.

Councilman, Halsted Powell, Maukato.
 Swensen, Karl P., Minneapolis.
 Thompson, Herbert Leslie, Minneapolis.

UNCLASSED STUDENTS, 42.

Adams, William Charles, Minneapolis.
 Baker, Ray Jerome, St. Paul.
 Bidlake, Jack, Minneapolis.
 Brownrigg, Abel Leo, Slayton.

Brunsell, Albert, Minneapolis.
 Casseday, Edgar Darius, Rochester.
 Davis, Charles Asa, Minneapolis.
 Dunn, John William, Minneapolis.

Fagan, Lewis E., Onslow, Ia.	Phipps, Letta Elizabeth, St. Paul.
Fisher, James V. S., Minneapolis.	Ranney, Willis, St. Paul.
Gibbons, Benjamin Truman, Rodney, O.	Rose, Norman Webb, Duluth.
Gluscock, Henry Hopson, Hannibal, Mo.	Schow, Harry Albert, Minneapolis.
Grant, Philip Sidney, St. Paul.	Schow, William Peter, Minneapolis.
Halleck, Joseph Dwight, Akron, O.	Seefeld, Frank Elsworth, Minneapolis.
Hills, Fred Robert, Menomonie, Wis.	Sharood, C. Roy, St. Paul.
Hobart, Walter B., Minneapolis.	Steenerson, Steener, Climax.
Hull, George K., St. Paul.	Stenger, Lawrence Arthur, Parker, S. D.
Ireland, Roy Rowell, Minneapolis.	Stephenson, Oliver H., St. Anthony Park.
Kreger, Alanson James, Le Sueur.	Stevens, Jessie E., St. Paul.
McCartney, Elmer Barber, Oakes, N. D.	Vorum, Andrew, Farmington.
Malmberg, Clarence Oscar, Austin.	Walts, John Paul, Pawnee, Okla.
Moore, Oscar Frank, Phillippi, W. Va.	Watts, Clair M., St. Thomas, N. D.
Nelson, Oscar Benjamin, Minneapolis.	Williams, Edith, Minneapolis.
Nye, Charles W., St. Paul.	Woodward, Ernest A., Minneapolis.
Olson, Harry, St. Peter.	Yeager, Floyd Francis, Webster, S. D.

STUDENTS IN DRAWING AND DESIGN—23.

Bousteel, Belle Vexdah, Morris.	Matthews, Grace Jenness, St. Paul.
Brown, Cyrus Snell, Minneapolis.	Muns, Gertrude Madge, Minneapolis.
Burgan, Essie M., Minneapolis.	Newell, Marie Dorothea, Minneapolis.
Burnham, May Dora, Minneapolis.	Prouty, Mabel Alice, Minneapolis.
Ekers, Lena Zenobia, West Superior, Wis.	Sowden, Bessie Pearl, Minneapolis.
Fisher, Aimee Winifred, Minneapolis.	Steward, Maude H., Minneapolis.
Gardner, Sadie Electa, Minneapolis.	Thomas, Elsie M., Minneapolis.
Gary, Mrs. Anna Fans, Storm Lake, Ia.	U'tley, Lillie E., Preston.
Lenz, Edith Amelia, Minneapolis.	Verharen, Lulu Maude, Spencer, Ia.
Lorenz, Lulu Clarice, Dubuque, Ia.	Weatherbe, Nan, St. Paul.
McElroy, Neva Merylle, Minneapolis.	Young, Hattie Mary, Appleton.
Matson, Jessie Alice, St. Paul.	

THE SCHOOL OF MINES, III.

SENIORS—11.

Cohen, Samuel William, St. Paul.	Smith, Franklin Wheaton, St. Paul.
Field, Edward Morse, Jr., New York City.	Sowle, Lawrence Kimble, Minneapolis.
Flynn, John Gerald, Lake City.	Truesdell, William Howard, St. Paul.
Hoard, Harold Joseph, Red Wing.	Whiteley, Eugene Edgerton, Brainerd.
Johuson, Ralph I., Minneapolis.	Winther, Arno, Fergus Falls.
Rait, Donald McKinnon, Minneapolis.	

JUNIORS—18.

Bass, Samuel Thayer, St. Paul.	Kingston, Merton Stephen, Eveleth.
Bowman, Frank Atherton, Minneapolis.	Kuehn, Amor Fredrick, Minneapolis.
Brosious, Harold I., Stillwater.	McCarty, Andrew Leonard, Good Thunder.
Calhoun, Allan B., Minneapolis.	Merritt, Lucien, Duluth.
Devereaux, Francis Cyril, Minneapolis.	Rohr, Carl von, Winona.
Donaldson, A. Hazeltine, Minneapolis.	Schrader, Erich Julius, St. Paul.
Edmonds, Frank Norman, Minneapolis.	Shouts, Sydney Latham, Fergus Falls.
Hale, Will Hammond, Minneapolis.	Squyer, Dewey Charles, Minneapolis.
Houlton, Lewis K., Elk River.	VanBergen, Robert E., Minneapolis.

SOPHOMORES—31.

Angst, Henry H., Minneapolis.	McKay, Henry Sinclair, Brainerd.
Barnes, Charles Warrington, Leavenworth, Kan.	Melle, Ralph, St. Paul.
Boardman, Donald, Minneapolis.	Merriam, Robert Stanley, Minneapolis.
Chamberlain, Will Owens, Denver, Colo.	Merrick, Gale Clifford, St. Paul.
Crandall, Roy Lewis, Duluth.	Minder, Emil George, St. James.
Crocker, Donald Martin, Mt. Clemens, Mich.	Neustadt, Berthold Robert, LaSalle, Ill.
Curry, Duncan Ellsworth II., Spring Valley, Wis.	Penhoel, Louis, St. Paul.
Field, Thorold Farrar, New York City.	Rawson, Horace Cole, Fergus Falls.
Gullick, J. Hervey, Oronoco.	Robertson, John James, Fergus Falls.
Howes, Frank Twombly, St. Paul.	Sherman, Ira Washington, Fergus Falls.
Hurd, Edward French, Minneapolis.	Wallace, George Watson, Jr., Duluth.
Kell, Otto Gustave, St. Paul.	Weeks, Allan Lydiard, Minneapolis.
Keller, Orrin Edwin Martin, Minneapolis.	Wheeler, Walter Hall, Minneapolis.
Lippitt, Chester Burdette, Duluth.	Wilkinson, Paul Harris, Crookston.
Lytzen, Walter William, St. Paul.	Yates, Ralph Pierce, Jr., Tracy.
	Ziesmer, Ralph A., Fergus Falls.

FRESHMAN CLASS—51.

Bogart, John Henry, Minneapolis.	Lowry, Milton Henry, Minneapolis.
Bottenfield, Drake, Minneapolis.	McCollom, Charles Rolfe, Minneapolis.
Bradley, Ralph Dawson, Duluth.	McOuat, Raymond Arthur, St. Peter.
Brandt, John, St. Paul.	Maynard, Major John Humphrey, Minneapolis.
Carleton, Edward Jones, Minneapolis.	Millspaugh, Mark Gillespie, Little Falls.
Clark, William Morrow, Minneapolis.	Moenke, William Fred, Joel.
Cullyford, James Alexander, Duluth.	Morgan, Charles, Zumbrota.
Davies, Robert William, Minneapolis.	Murphy, Charles J., Northfield.
Davy, Jesse John, Stewart.	Noel, Bertley F., Kasson.
Decker, Max Howell, Menomonie, Wis.	Noerenberg, August C., Minneapolis.
Dorr, William Grey, Minneapolis.	Nye, Charles W., Minneapolis.
Edgerton, Erastus Ralph, Minneapolis.	O'Connor, Edward Silvester, Highwood.
Fisher, Frank L., Duluth.	Olund, Henning Ekstrom, St. Paul.
Harrington, Guy Pembroke, Hutchinson.	Parks, Edward Kay, Brainerd.
Haynes, Francis Rea, Minneapolis.	Rood, Olaf, Minneapolis.
Houck, Clarence Albert, Preston.	Rose, William Anderson, Duluth.
Houston, George Russell, Grand Rapids, Mich.	Schmidt, Carl Edgar, St. Paul.
Howland, Joseph T., Zumbrota.	Smith, Edward Wilson, Minneapolis.
Hyde, Lawrence Percy, Minneapolis.	Snyder, Sidney Olmstead, Minneapolis.
Irsfeld, James B., Minneapolis.	Steele, Charles Whyte, Minneapolis.
Ives, Lee Emmett, Minneapolis.	Street, Claude Winship, Northfield.
James, James Spier, LaCrosse, Wis.	Weisel, George Ferdinand, Minneapolis.
Johnson, Karl Oscar, Minneapolis.	West, Michael Andrew, New Rome.
Kinney, Robert Couch, Astoria, Ore.	Willis, Arthur, Jamesville.
Kurtzman, Paul Starr, Rochester.	Yerxa, Ernest Lee, Minneapolis.
Lowe, John Marco, St. Paul.	

THE COLLEGE OF AGRICULTURE, 17.

SENIORS—3

Guthrie, Francis B., St. Anthony Park.	Tasa, Helge Ludwig, Nerstrand.
Riley, Edward Henry, St. Anthony Park.	

JUNIORS-6.

Beeksted, Jesse Franklin, St. Anthony Park. McGuire, Arthur James, Hegbert.
 Cuzner, Harold, Minneapolis. Matthews, Mary Lockwood,
 Gaumnitz, Daniel A., St. Anthony Park. Cambridge City, Ind.
 Hoagland, Ralph, St. Anthony Park.

SOPHOMORES-4.

Boerner, Emil Godlieb, Buffalo. Parker, Edward C., St. Anthony Park.
 Jehle, Robert Andrew, St. Paul. Widmoyer, Leslie R., Dresbach.

FRESHMEN-4.

Giesman, Elma Alice, Merriam Park Station. Wilson, Archie Dell, St. Anthony Park.
 Thompson, A. Adel, Cottage Grove. Wood, Casper Alfred, Waseca.

THE SCHOOL OF AGRICULTURE.

INTERMEDIATE YEAR-10.

Blair, Donald, St. Anthony Park. Miller, Ralph Chafee, Bloomington.
 Brude, Julia, Hanska. Roberts, Harry Leslie, Langdon.
 Erickson, Agnes, Hector. Washburn, Lura Mabel, Monticello.
 Hall, Mary Julia, Fairmont. Wickstrom, Adolph Frederick, Anoka.
 Herbrandson, Herman O., Brooten. Woodward, George Eugene, St. Paul Park.

"A" CLASS-83.

Aldrich, Stanley Martin, Minneapolis. Holt, Edward August, Delhi.
 Alexander, Fannie Percival, Browton. Ingalls, Ruth Evaline, Blooming Prairie.
 Anderson, Julius, Bird Island. Johnson, Bert, Osseo.
 Anderson, Chace, Hutchinson. Johnston, Christine Margaret, Robbinsdale.
 Blackburn, James Raymond, Royal, Neb. Johnston, Wallace George, Robbinsdale.
 Brekke, Inger Jensina, Kenyon. Jounson, Alex Ernest, Rockford, Ill.
 Campion, Jesse William, Angus. Kassube, Frederick Wm., Wayzata.
 Carlton, Jay Strong, Medford. Kidder, Royal Aaron, Marshall.
 Clapp, William Angus, Roberts, Wis. King, Charlotte Barbara, St. Paul.
 Coffin, Ella Cornelia, Minneapolis. Larson, Henry William, Swea City, Iowa.
 Dalley, Robert, Flandreau, S. Dak. Lingen, Carl Johan, Starbuck.
 Dalbotten, Anna Melvina, Nansen. McConnell, Roy Elmer, St. Cloud.
 Dalbotten, Ida, Nansen. MacKean, Augustus Smith,
 Dalbotten, Oliver, Nansen. Fishing Creek, N. J.
 Dean, Melburn S., St. Anthony Park. Maring, Albert, Nansen.
 Dieter, George Miller, St. Paul. Martens, Jens, Christianssand, S., Norway.
 Dinsmoor, Fay, Austin. Meilicke, Otto Frederick, Dundurn, Assa.
 Dixon, Cyril Eckles, Northfield. Mills, Garfield Russell, Buffalo.
 Downie, Dana Thomas, Faribault. Mitchell, Bessie, New York Mills.
 Dunavan, Walter Loyley, Hellsenburg. Olsen, Ella Nathalia, Belview.
 Eggena, Mary Helena, Maple Lake. Olson, Oscar Milton, Montevideo.
 Ellison, Frank Harold, Minneapolis. Peck, William Argalus, Acton, Ind.
 Emerson, Isaac, West Concord. Peters, Cora Frances, St. Paul.
 Ferch, Paul Henry, Odessa. Peterson, Arthur Willard, Litchfield.
 Foster, Jeannette Ora, Minneapolis. Peterson, Eric Ludwig, Dawson.
 Frost, Walter Leon, Windom. Peterson, Minnie Cordelia, New Ulm.
 Gaumnitz Amos John, St. Cloud. Peterson, Regina, Hector.
 Grant, John Geddes, Windom. Peterson, Sigwald Sophus, Minneapolis.
 Gregor, John, Hutchinson. Pierce, Jennie, Lewiston.
 Halvorson, Ida Gurine H., Grove City. Pratt, Earl Wells, Alexandria.
 Holmquist, Clementine Aurora, Providence. Randall, Karl, Minneapolis.

Reinart, Charles, Odin.
 Rietz, Oliver Augustus, Chaska.
 Roach, Samuel Zimmerman, Paynesville.
 Rnss, Ethel Olive, Robbinsdale.
 Ruud, Carl Oscar, Dawson.
 Schmitz, Prosper Lorenz, Stewart.
 Schrepel, George William, Le Sueur.
 Sheldon, Lester Hart, Paynesville.
 Smith, Langford Wheaton, St. Paul.
 Smith, Phoebe Carrington, St. Paul.
 Spencer, Nellie Sophia, St. Paul.
 Stoa, Mary, Ashby.
 Storle, Peter Oscar, Lanesboro.
 Strand, Alfred, Kensington.
 Sullivan, Albert Henry, Adrian.
 Swenson, Gilbert, Hoyt.
 White, Hall Brewer, Winnebago City.
 Whitney, June Dexter, Minneapolis.
 Wilkins, Annie Loretta, Minneapolis.
 Wollan, Anton Marcus, Starbuck.
 Wood, Casper Alfred, Waseca.
 Wulf, Emma Augusta, Wheaton.

"B" CLASS—120.

Anderson, Andrew Daniel, Wadena.
 Andrews, John Kimball, Faribault.
 Atkins, Fred Wesley, Columbia, S. Dak.
 Barton, Ralph Wallace, Koochiching.
 Benchley, Mary Louise, Minneapolis.
 Bingham, Charles Lord, St. Anthony Park.
 Bisbee, Everett Hall, Madelia.
 Blair, Ruby Isabella, Lewiston.
 Rleecker, William Leslie, Mantorville.
 Bond, Le Roy Moulton, St. Paul.
 Bradford, Albert N., Minneapolis.
 Brakke, Albert C., Wild Rice, N. Dak.
 Brneck, Charles Frederick, Battle Creek, Ia.
 Bunker, Bessie Irene, Washburn.
 Burggren, David Carl, Cannon Falls.
 Calderwood, Charles Granville, Newport.
 Campbell, Helen Mar, St. Paul.
 Chermak, Emma, Chatfield.
 Chesley, Fred, Anoka.
 Comings, Benjamin Richard,
 Eau Claire, Wis.
 Cooper, Lee Edward, Adrian.
 Crandall, Chas. Norman, Rockford.
 Dean, William Leroy, St. Anthony Park.
 Dick, Ethel May, Afton.
 Dickinson, Wesley Amos, Buffalo.
 Dodds, Mabel, Wheaton.
 Eggen, Ole, Brandt, S. Dak.
 Ericson, Alfred Lewis, Hector.
 Ferch, Sarah Emma, Odessa.
 Frear, Dana Walter, Minnetonka.
 Garen, John Earl, Stillwater.
 Gleason, Minnie E., Northfield.
 Gould, James Artemas, Buxton, N. Dak.
 Graham, Ralph Marten, Rochester.
 Grannis, Charles Edward, Vernon Center.
 Grant, George Howison, Faribault.
 Gregg, Victor Hugo, Austin.
 Hacking, Earl Lester, Forest Lake.
 Hagorman, William Farnsworth, Morris.
 Hall, Frank Wright, Fairmont.
 Hassig, Willie Day, Plainview.
 Hazen, John Loveland, Norwich, Vt.
 Headley, Frank Burdette, Hutchinson.
 Henderson, George, Halstad.
 Hendrickson, Katherine, Forest Lake.
 Hoagland, Jessie Marion, Excelsior.
 Hohle, Ola Arnold, Hector.
 Holland, Rasmus, Hanley Falls.
 Holmberg, Ruth Hildegard, Sacred Heart.
 Horton, Thomas James, North Branch.
 Houde, Minnie Louise, Godahl.
 Hoverstad, Emeline, Dennison.
 Jenson, Andrew, Kanaranzi.
 Jepson, Frank Harding, Richfield.
 Kanten, Iver C., Haagan.
 King, Curtin Andrew, Chatfield.
 Kinyon, Wallace W., Norcross.
 Kjos, Elvin Alfred, Rushford.
 Knorr, Fritz, St. Anthony Park.
 Kurz, Harry, Annandale.
 Lampson, Stella May, Lampson, Wis.
 Leinen, Frances Clementine, Merriam Park.
 Ley, Peter James, Kellogg.
 Lovell, Margaret Emma, Vernon Center.
 McCabe, Lulu Marion, Richfield.
 McEwen, Dwight Morris, Buffalo Lake.
 McEwen, Wright Alson, Hutchinson.
 McNelly, Mabelle Emily, Caledonia.
 Mallett, Angie Augusta, Minneapolis.
 Marple, Ernest Everett, Wendall.
 Mason, Maud Goadby, St. Paul.
 Mather, Sophy May, Faribault.
 Maxey, Nannie, Pasfield, Ill.
 Mayland, Edwin, Rushford.
 Miller, Edwin Bensley, Bloomington.
 Moak, Clarence Brett, Minneapolis.
 Moore, Catherine Bradbury, Minneapolis.
 Muir, Harry Scott, Winnebago City.
 Nelson, Lars, Winthrop.
 Ness, Harold Trygve, Hector.
 Nygren, Herman John, Lake City.
 Orton, George Edward, Marietta.
 Ostergren, Reuben Gustaf, St. Paul.

Ouren, Alfred, Hanska.
 Pearson, Matilda, Louisburg.
 Peterson, Carl Hjalmer, Lynd.
 Pond, Harold Hollister, Bloomington.
 Richardson, Horace Elmer, Faribault.
 Riley, Ellen Hanora, Hammond.
 Ritzinger, Frederick, St. Paul.
 Roebers, William, Ceylon.
 Rollefson, Carl Jacob, Clarkfield.
 Roth, Gilbert Eugene, Dannas.
 Schrepel, Minnie Anne, Le Sueur.
 Sheldon, Louis James, Paynesville.
 Smith, Bessie, Farmington.
 Squire, Ernest Porter, Hanley Falls.
 Steenerson, Arne Orlando, Climax.
 Stewart, Charles Deloss, Alpha.
 Stimpson, Herbert Evelyn, Minneapolis.
 Streetly, Charles, St. Francis.
 Streetly, Robert G., St. Francis.

"C" CLASS—213.

Abbott, Irwin Leon, Excelsior.
 Abrams, Beatrix, Minneapolis.
 Algren, Alfred, Hutchinson.
 Anderson, Lewis, Kenyon.
 Angell, James Bradley, White Bear.
 Apitz, Robert Herman, Amboy.
 Atkins, Arthur Burgess, Columbia, S. D.
 Ayer, Harry Darius, St. Anthony Park.
 Baillif, Victor Charlie, Bloomington.
 Barker, Emil, Atwater.
 Bennett, Frank, Argyle.
 Bergh, Harold, Sacred Heart.
 Biermann, Carl Frederick, Rochester.
 Bingham, William Daniel, St. Paul.
 Bost, Maurice Albert, Excelsior.
 Bredvold, August Julius, Belview.
 Brush, Elbert Phillips, Augus.
 Burtness, Carl, Caledonia.
 Burton, Mrs. Catherine A.,
 International Falls.
 Burton, Hazel, Deephaven.
 Carlton, Mabel Mitnie, Merton.
 Carr, Linnie May, Long Lake.
 Carroll, Harry Benson, St. Paul.
 Carson, Emmett Leroy, Edgerton.
 Carver, Archie Leonard, Faribault.
 Chapman, Lula Ethel, Osseo.
 Chase, Clement George, Farmington.
 Cin, Clara, Donnelly.
 Cody, Ella Florence, Minneapolis.
 Cole, Marcus Charles, Davies.
 Comfort, H. Eugene, Minneapolis.
 Cowell, George Arthur, Northfield.
 Cram, Myrtle Ivy, Afton.
 Svarstad, Anne, Bath.
 Swenson, Edward, Willmar.
 Tanner, Alice Viola, Brownsdale.
 Tierney, Charles Nicholas, Farmington.
 Tierney, Dillon Parnell, Farmington.
 Turnham, Vivian, Wayzata.
 Walls, Everett Earl, Velva, N. Dak.
 Washburn, Edson Dean, Jr., Monticello.
 Wasson, Harris Berton, Belview.
 Watson, Edwin Jay, Morris.
 Wedge, Robert Clark, Albert Lea.
 Wells, Zoe Alice, Hensler, N. Dak.
 Wilder, Davis Ezbon, Austin.
 Wilhelm, John Peter, Wheaton.
 Winslow, Sears Hosmer, Chatfield.
 Wood, August Adelaide, Waseca.
 Wood, Frank George, Waseca.
 Wood, Roy, Faribault.
 Crozier, John Bennett, Minneapolis.
 Curtis, Jay Lloyd, Alexandria.
 Cutlar, Lester Bird, Sumter.
 Dailey, Edward William, Flandreau, S. D.
 Dalquist, Frank Ludwig, Warren.
 Dalquist, Gust, Warren.
 Davenport, Emeline Louise, Western.
 Dike, George Edward, Northfield.
 Dixon, Helen C., Mora.
 Dodds, Harvey, Wheaton.
 Doehne, Lulu Eleanora, New Ulm.
 Downing, Laura Myrtle, St. Charles.
 Downie, Hector, Wawauesau, Man.
 Drysdale, Clarence, St. Charles.
 Dunn, Catherine Ann, Lakeville.
 Dunn, William Joss, Lakeville.
 Eby, Leo E., St. Anthony Park.
 Ellsworth, Horace Wells, Cannon Falls.
 Elston, Harry Raymond, Rich Valley.
 Ely, Herbert Ingersoll, Taylors Falls.
 Emerson, Rudolph, West Concord.
 Erickson, Eric Edward, Flandreau, S. D.
 Evenson, Nels Oscar, Strout.
 Finseth, Arthur Kornelius, Kenyon.
 Fish, Gertrude Blanche, Utica.
 Flom, Joseph, Denison.
 Frem, Albert Ernest, Red Wing.
 Fruechte, Franklin Henry, Eitzen.
 Fulton, Earl Duain, Dodge Center.
 Funck, Richard Maurice, Minneapolis.
 Gammon, Inez Edith, Excelsior.
 Garrett, Harry Denman, New Brighton.
 Gaumnitz, Florence, St. Cloud.
 Gibson, Blossom Earlean, St. Anthony Park.

- Gilbert, Fenton, Beaver Creek.
 Gillis, James Rozel, Bethel.
 Goodall, Archibald James, Bathgate, N. D.
 Goodrich, Herbert G., Ponema.
 Greaves, Harold Addison, Northfield.
 Greaves, Walter Earle, Northfield.
 Greely, James Cecil, Rices.
 Grey, Arthur B., Sunrise.
 Gudal, Jorgen Ole, Bricelyn.
 Hall, Charles Eugene, Fairmount.
 Hammer, Ira John, Utica.
 Hanson, Almon Jeuness, Big Lake.
 Hanson, Fred Whitman, West Superior, Wis.
 Harper, Sidney Raymond, St. Paul.
 Hathaway, Floyd Cecil, Winnebago City.
 Herbrandson, Gustave O., Brooten.
 Hilgeson, Halge, Minneapolis.
 Hodgson, Victor Aaron, Luverne.
 Holt, Richard James, Utica.
 Holtmeier, John Theodore, Victoria.
 Houser, Clarkson Wilberforce, St. Paul.
 Houser, Nobles Lumlin, St. Paul.
 Howe, Lizzie Rebecca, Kellogg.
 Hulst, George William, Fair Haven.
 Hunt, Robert James, River Falls, Wis.
 Hurley, Leo Ralph, Louisburg.
 Jenkins, William George, Minneapolis.
 Jensen, Jens Peter, Albert Lea.
 Jernell, Jennie Sophia Eleanor, Minneapolis.
 Johnson, Alben Maurice, St. Paul.
 Johnson, Emil Ambrose, Willmar.
 Johnson, Ida Matilda, Louisburg.
 Johnson, John Schubert, St. Paul Park.
 Johnson, Mary Matilda, Sherburn.
 Johnson, Sidney Herman, Winthrop.
 Kassube, Frank John Henry, Wayzata.
 Keller, Peter Joseph, Merriam Park.
 King, Ethlyn M., West Union.
 King, Elwin Harold, West Union.
 Kingsbury, Victor Hugo, Monticello.
 Kinney, Oren, Benson.
 Kirkwood, Mabel Louise, Robbinsdale.
 Koerner, Olga O., St. Paul.
 Kreiser, Alexander Henry, Minneapolis.
 Krough, Fred George, St. Anthony Park.
 Kuhn, Harland McKean, Moline, Ill.
 Lagerstrom, Cornell A., Minneapolis.
 Langseth, Oscar Herbert, Worthington.
 Larson, John S., Lake Park.
 Lathrop, Elbe Allen, Forest Lake.
 Lathrop, Mabel Antoinette, Forest Lake.
 Leavitt, George Dyer, Red Wing.
 Ley, Bertha Henrietta, Excelsior.
 Ley, Lizzie Lucy, Smithfield.
 Loudon, Chester Biron, Maine Prairie.
 Laury, Gertrude Beulah, Minneapolis.
 Ludwig, Florence Anna, Minneapolis.
 Lydon, Edward, Kellogg.
 D. McClure, Irvin David, Manhattan, Ill.
 McClure, Wayne Cornelius, Manhattan, Ill.
 McMillan, William Allan, Minneapolis.
 McNelly, Chester Leroy, Caledonia.
 McKusick, Van Arthur, Minneapolis.
 Maass, Willie Henry, St. Bonifacius.
 Mallett, Gertrude Mina, Minneapolis.
 Maring, Oscar, Nansen.
 Martin, Nathaniel, Clear Lake.
 Martinson, Henry Rudolph, Sacred Heart.
 Mast, James Garfield, Monticello.
 Matthews, Meredith, Cambridge City, Ind.
 Mattice, Norman Leslie, Bloomington.
 Mattimore, John William, Newport.
 Maxwell, Mary Ruth, Minneapolis.
 Merrill, Alfred Stiles, Minnehaha Park.
 Mielke, George Herman, Dundas.
 Miller, Louis Ariel, Excelsior.
 Mitchell, Bessie May, Osseo.
 Moore, Harry Clyde, Hutchinson.
 Moores, David Seymour, Big Lake.
 Mowry, Herbert Hagen, Minneapolis.
 Murphy, Hazel Irene, St. Paul.
 Nelson, Josie Eugenia, Minneapolis.
 Nestor, Anna Victoria, Minneapolis.
 Newcomb, Vern Elmer, Camden Place.
 Norman, Lydia Carolhne, Kandiyohi.
 Norskog, Caroline, Eddsville.
 Ott, Robert Lincoln, Albert Lea.
 Palmer, Leet R., Seattle, Wash.
 Palmer, Vincent John, Richfield.
 Parker, Everett Benson, Milwaukee, Wis.
 Parten, Lillie Theresa, Minneapolis.
 Pederson, Jens Christian, Hankinson, N. D.
 Pepin, Roy Erving, Elk River.
 Pepin, Joseph Paul, Minneapolis.
 Perkins, Bert Brayton, Monticello.
 Peterson, Carl Anton, Alexandria.
 Peterson, Laura Christine, Minneapolis.
 Peterson, Wm. Arnold, Olivia.
 Poore, Emerson Almon, Bird Island.
 Powell, Leonard Hunter, Marshall.
 Pullen, Blanche Frances, Kandiyohi.
 Putnam, Fayette Henry, Big Lake.
 Ramsland, Rudolph Julius, Sacred Heart.
 Randall, Rufus Russell, Warsaw.
 Reding, Helen Gertrude, St. Paul.
 Remington, Earl Clair, Minneapolis.
 Retzlaff, Minnie Bertha, New Ulm.
 Rich, Ralph William, New Brighton.
 Richards, Harry Frank, Buffalo Lake.
 Robertson, Lynn Shelby, London.
 Roed, Olaf John, Fertile.
 Rollefson, Martin Olaus, Clarkfield.

Rothi, Albert, Moland.
 Sadler, Elizabeth Catherine, St. Paul.
 Sanborn, Hubert Hooper, Minneapolis.
 Sauby, Julia Tonettia, Elbow Lake.
 Sather, Iuga Randina, Minneapolis.
 Shotwell, Daniel Bronson, Minneapolis.
 Smith, Vernon D., St. Anthony Park.
 Sorenson, Arthur Martin, Albert Lea.
 Stadon, John Henry, Plainview.
 Stangeland, Arthur William, Marathon, Ia.
 Stangeland, Irvin Thomas, Marathon, Iowa.
 Strand, Lars Kittel, Ada.
 Sumner, Samuel, Louisberg.
 Swenson, David, Willmar.
 Swenson, Edgar Benjamin, Bellingham.
 Talle, Marie Bergitte, Kenyon.
 Talle, Peder Olous, Kenyon.
 Taufield, Leonard Webster, Minneapolis.
 Tanner, Eliza M., Brownsdale.
 Taplin, Vernon Lou, Bethel.
 Thompson, Harrison Elverton, New Brighton.
 Thompson, Mrs. Mary Evaline, Hinckley.
 Turnham, Gaylie Gifford, Wayzata.
 Tuttle, Paul Lucius, St. Charles.
 Webster, Alfred Alexis, Bernadotte.
 Welch, Horace Lewis, Corvuso.
 West, Ralph Leland, Minneapolis.
 Wildner, Clarence Lorenzo,
 West Superior, Wis.
 Wilhelmson, Wilhelm, Spring Grove.
 Willd, Arthur, Hoffman.
 Willd, Laura, Hoffman.
 Willson, George Atwood, Minneapolis.
 Wilson, Henry Herbert, Anoka.
 Wiltzbacher, William Michael, Merriam Pk.

PREPARATORY CLASS—55.

Anderson, Eleanor, Deep Haven.
 Anderson, Floyd Raymond, Red Wing.
 Benson, John Edward, Houston.
 Biller, Anna Maria, St. Anthony Park.
 Broin, Oscar Martinus, Nerstrand.
 Brude, Emma, Hanska.
 Costello, Thomas Leo, Kellogg.
 Day, Harry Alvin, Bethel.
 Eliason, John, Sacred Heart.
 Engelbert, Anna Rosalia, Kennedy.
 Fischer, Joseph, Lynd.
 Fisher, Guy D., Wendell.
 Gardner, Harriet Rutherford, Big Stone.
 Gilson, Wesley Allen, Minneapolis.
 Gove, Albert Sumner, Bingham Lake.
 Gudal, Nellie, Homedahl.
 Gunhus, Ella Albertine, Kenyon.
 Haugen, Olaf O., Zumbrota.
 Hanson, Harry, Norseland.
 Hallan, Joseph Arthur, New House.
 Johnson, Charles Nickoly, Northfield.
 Johnson, Clara, Baldwin, Wis.
 Johnson, Julius, Lakefield.
 Kloos, John Daniel, Chaska.
 Kordell, Frank Harry, Merriam Park.
 Langer, Joseph, Plainview.
 Leathers, Bert Parker, St. Francis.
 Lloyd, Elias, Lake Crystal.
 Lundy, Minnie Marie, London.
 McCall, John William, Hector.
 McNallan, Michael, Kellogg.
 Mayer, Della Anna, St. Paul.
 Meisch, Henry Anton, Rollingstone.
 Monson, Eva Dolores, Elbow Lake.
 Nelson, Fritz Albert, Rosendale.
 Nodell, Benjamin Andrew, Richfield.
 Palmer, Ernest, Richfield.
 Parsons, Sadie A., Willmar.
 Pederson, Richard, Farmington.
 Peterson, Chas. Edward, Winthrop.
 Rentz, Theodore Frederick, Morris.
 Rose, Myrtle, Merriam Park.
 Ryden, Augustinus, Bernadotte.
 Schroeder, Henry Fred, Rushmore.
 Scaright, Frank Jacoby, St. Anthony Park.
 Sederstrom, Alfred, Montevideo.
 Skalbeck, Oscar, Sacred Heart.
 Tanquist, Carl Henry, Bernadotte.
 Tasa, Iver Alfred, Nerstrand.
 Tante, George, Sacred Heart.
 Trittlewitz, Charles, Wayzata.
 Trondson, Albert, Lakefield.
 Ville, Henrietta Marie, Echo.
 Wiedemann, Henry E., Sabin.
 Wilkus, August Jacob, St. Paul.

SHORT COURSE—57.

Anderson, A. P., Lamson.
 Anderson, A. V., Goodhue.
 Atkinson, Jesse, Minneapolis.
 Bryan, E. C., Red Wing.
 Carlson, J. O., Erskine.
 Carlson, Olaf, Erskine.
 Dahl, Peter G., Linden.
 Dewings, Walter, Hutchinson.
 Deters, A. B., Eitzen.
 Enerson, Carl, Glencoe.

Evjen, H. O., Madelia.
 Foss, O., Wendell.
 Fink, J., Northfield.
 Fridley, F. L., Becker.
 Gran, P. J., Spring Grove.
 Halfpenny, W., Minneapolis.
 Halvorsen, O., Spring Grove.
 Harrison, H., Doran.
 Holmen, M., Frost.
 Holstrom, A. G., St. Paul.
 Hoye, M., East Grand Forks.
 Husby, O. E., Boyd.
 Johnson, E. J., New London.
 Johnson, Herbert, Willmar.
 Kinneberg, O., Spring Grove.
 Kelley, E. L., Independence, Wis.
 Krueger, A., Lakefield.
 Lewis, J. M., Ottawa, Ill.
 Lindquist, R., Bernadotte.
 McCormack, W. C., Wabasso.
 Meier, F. L., Sleepy Eye.
 Mather, Geo., Madelia.
 Monson, H., Goodhue.
 Monson, N. N., Cannon Falls.
 Malmberg, Anton, Bernadotte.
 Mosford, W. R., Clear Lake.
 Northam, C. H., Minneapolis.
 Nelson, Henry, Cannon Falls.
 Oehler, Geo., Millbank, S. Dak.
 Ostad, J. J., Norseland.
 Page, C. E., Point Douglass.
 Papez, B. T., Brookfield.
 Prink, Victor, Cannon Falls.
 Quinnell, M., Spring Grove.
 Reineke, L., Deerfield.
 Rollefson, Andrew, Granite Falls.
 Ronnengen, Ole, Spring Grove.
 Sauby, E., Elbow Lake.
 Silrum, C. J., Homedahl.
 Silrum, Ole T., Bricelyn.
 Shelley, Edward, Madelia.
 Shelley, Emil, Hanska.
 Shelley, Ole, Hanska.
 Stewart, James, Montevideo.
 Stubson, J. E., Colfax.
 Viger, Albert, Elbow Lake.
 Wilkowske, W. B., Morristown.

DAIRY SCHOOL—82.

Anderson, A. E., Grandy, Minn.
 Arneson, A. J., East Union, Minn.
 Backmark, F. V., Atlas, Wis.
 Bondeson, S. A., Shafer, Minn.
 Borden, Wm., St. Paul, Crescent Cry.
 Bursch, Albert, Rogers, Minn., R. R. 1.
 Burkstrand, E. P., Stockholm, Minn.
 Byers, Adam, Hebron, N. D.
 Byers, Geo., Easton, Minn.
 Cahil, John, Janesville, Minn.

 Hammond, Orville A., Spenser, Ia.
 Hanson, George Elmer, Sleepy Eye.
 Hauson, Nels Benjamin,
 New Centerville, Wis.
 Hegland, Martin Johan, Roland, Ia.
 Huns, Joseph Benedict, St. Cloud.
 Hopkins, Frank H., Fairfax.
 Hougan, Alinda May, Northwood, N. D.
 Hudson, Guy H., Thorp, Wis.
 Huntington, Arthur E., Luverne.
 Jamieson, Scott John Baird, Minneapolis.
 Johnson, Henry E., Tintah.
 Johnson, John M., Godahl.
 Johnson, Thore Rudolph, Cannon Falls.
 Kennicott, Jay A., Luverne.
 Lamoreau, Addison E., Minneapolis.
 Lende, Olaf A., Cottonwood.
 Lyche, Charles Albert, Hatton, N. D.

McClearn, Hugh J., Minneapolis.
 McGinley, Hugh S., Minneapolis.
 McManamy, James J., Cashton, Wis.
 Marshall, Allen K., Westfield, Mass.
 Mastenbrook, Adrian D., Kasson.
 Maurin, Francis Joseph, Elizabeth.
 Michelet, Wilhelm L. C., Minneapolis.
 Morrow, Thomas D., Minneapolis.
 Murphy, Joseph L., Alma City.
 Nietert, Sun America, Minneapolis.
 O'Donnell, Michael Charles, Avoca.
 O'Marr, Louis J., White Sulphur Spr., Mont.
 Quinn, Andrew William, Fairmont.
 Schacht, Theo. A., Elgin.
 Scholle, Gustave, St. Paul.
 Schroeder, Peter F., Perham.
 Schulz, Otto William, Montevideo.
 Scribner, James Clinton, Eldorado, Wis.
 Shea, Francis George, Perham.
 Smith, John Philip, Cottonwood.
 Smith, Justin M., Brainerd.
 Smythe, Dan P., Arlington, Ore.
 Sterling, Charles P., Elysian.
 Wederath, Frank C., Morton.
 Williams, Edwin Adam, Rochester.

SENIOR NIGHT CLASS—53.

Albec, William E., Minneapolis.
 Benton, Harry G., Minneapolis.
 Bernhagen, John F., Minneapolis.
 Buell, Charles Joseph, North Hudson, Wis.
 Chapman, Frank Johnson,
 New Richmond, Wis.
 Cook, Leslie Loyd, Appleton, Wis.
 Currie, John D., Minneapolis.
 Davis, Louis David, Elgin.
 Dodge, Vernon, St. Paul.
 Dowdall, Augustine Sylvester, Minneapolis.
 Erickson, Theodore O., Flandreau, S. D.
 Ferry, Thomas P., DeGraff.
 Furber, Fred N., Detroit.
 Gardner, Augustus V., Hastings.
 Gleason, Joseph W., Minneapolis.
 Gleason, Martin H., Minneapolis.
 Goldsburly, Maud, Cherokee, Ia.
 Gorman, Francis T., White Rock.
 Harkness, Edgar G., Minneapolis.
 Haug, Lars O., Minneapolis.
 Headley, Lucius Ambrose, Luverne.
 Huebener, George C., Eau Claire, Wis.
 Keobane, John J., Minneapolis.
 Knauf, Arthur Lawrence, Jamestown, N. D.
 Lundborg, Hugo, St. Paul.
 Lundquist, Charles Oscar, Minneapolis.
 McKusick, Roy W., Minneapolis.
 McKenna, George M., St. Paul.
 Margeson, Wybie C., Hantsport, N. S.
 Maron, Frank A., St. Paul.
 Marshall, W. Frank., Pipestone.
 Moore, Milton Walter, Minneapolis.
 Nash, Edward M., Minneapolis.
 Nash, John P., Minneapolis.
 Nash, William M., Minneapolis.
 Paddock, George A., Minneapolis.
 Paulson, Clarence A., Minneapolis.
 Peter, Henry, Minneapolis.
 Pitkin, Charles A., Euclid.
 Porter, Gardner H., Minneapolis.
 Robertson, Raymond, Minneapolis.
 Rostad, John Edward, Hader.
 Rogers, Edward L., Aitkin.
 Skewis, Edward, Minneapolis.
 Smith, Mary Donovan, St. Paul.
 Solem, Ludwig Oliver, Minneapolis.
 Stephanus, Charles Joseph, St. Paul.
 Soule, V. Ormsby, Minneapolis.
 Taylor, Arthur Robert, St. Paul.
 Upton, John E., Minneapolis.
 Verge, Walter L., Minneapolis.
 Wayne, James A., Minneapolis.
 Wennerdahl, John A., Chisago City.

MIDDLE DAY CLASS—100.

Abrahamson, George L., Cartwright, Wis.
 Alexander, Fred A., Kasson.
 Barnard, Robert T., Minneapolis.
 Barney, Harry C., Mankato.
 Baudler, Carl, Austin.
 Beagle, Charles, Arcade, N. Y.
 Boo, Benjamin Carlton, Stillwater.
 Bridgman, W. B., Hamline.
 Brown, Warrington, Pipestone.
 Burdick, W. Loyd, Minnewaukon, N. D.
 Bushfield, Harley J., Miller.
 Caldwell, Frank A., Moorhead.
 Calloway, C. H., Minneapolis.
 Campbell, H. Don, St. Paul.
 Carman, William B., Detroit.
 Chilson, Almon E., Webster, S. D.
 Clapp, Harvey S., St. Paul.
 Clark, Samuel H., Stephen.
 Clock, Ralph H., Hampton, Ia.
 Closser, Edward G., Pine Island.
 Clough, Eugene D., Bagley.
 Collins, David T., Gladstone, Mich.

- Diepenbrock, Clarence P., Red Wing.
 Dieson, Elmer O., Heron Lake.
 Dormoy, David T., Minneapolis.
 Dousman, Charles J., Northfield.
 Dredge, George, Lake Crystal.

 Goff, Hiram S., Mapleton.
 Grannis, Day L., Fayette, Ia.
 Greene, Raymond W., Oshkosh, Wis.
 Greer, Dorance D., Lake City.
 Griggs, Orrin H., Virginia.
 Gugisberg, Edward, Gibbon.
 Guthrie, Munson M. Z., Pierre, S. D.
 Haagenson, John N., Carlisle.
 Hanson, Walter H., New Lisbon, Wis.
 Haroldson, Hans B., Duluth.
 Harrington, Michael J., Avoca.
 Healey, Elmer E., Fergus Falls.
 Johnson, Charles A., Minneapolis.
 Johnson, Henry A., Sioux Rapids, Ia.
 Johnson, Sidney R., Cannon Falls.
 Jones, George P., Luverne.
 Jones, Harry K., Minneapolis.
 Kelly, Thomas R., Owatonna.
 Kercher, Alice L., St. Cloud.
 Kuehne, August E., Rock Valley, Ia.
 Ladd, J. B., Sanborn.
 Laycock, Ernest, New Bedford, Mass.
 Leuthold, Ralph N., Kasson.
 McGarry, John H., Glenwood, Wis.
 McLennan, Duncan J., Cottonwood.
 Maloney, Albinus S., Waseca.
 Mark, John H., Osage, Ia.
 Martin, Charles, Spring Valley, S. D.
 Matoushek, Frank J., Minneapolis.
 Moe, Waldemar J., Duluth.
 Myers, Arthur L., Lake City.
 Myers, Raymond H., Minneapolis.
 Nelson, John J., El Paso, Wis.
 Nichols, John F., Rice Lake, Wis.
 Oppenheimer, William H., St. Paul.
 Ostrom, Oscar W., Minneapolis.
 Payne, Byron S., Vermillion, S. D.
 Praxel, Anthony J., Lambertton.
 Redding, John G., Windom.
 Reed, Frank E., Glencoe.
 Ruble, Edwin C., Willmar.
 Ryan, Patrick J., St. Paul.
 Sasse, Carl A., Vienna, S. D.
 Sayre, Abraham M., Ben Clare, S. D.
 Scoble, Frank M., Olvia.
 Scott, Solem F., Hallock.
 Shea, William H., Jr., Sparta.
 Shillock, John C., Minneapolis.
 Smith, John W., Chippewa Falls, Wis.
 Spaulding, Fred F., Renville.
 Sullivan, Dennis P., Mapleton.
 Taylor, James D., Red Lake Falls.
 Thelen, John N., Stillwater.
 Thompson, John B., Fergus Falls.
 Thompson, Porteous I., Houston.
 Thorp, Walton W., Britton, S. D.
 Turner, Alexander, Hudson, Wis.
 Volk, Henry W., Lake Washington.
 Weld, Lyman P., River Falls, Wis.
 Wildes, Frank A., Jr., Mankato.
 Wildey, Herbert L., Anamosa, Ia.
 Williams, Charles S., Fairmont, N. D.
 Williams, Warren O., West Concord.
 Wood, Benjamin W., New Richland.

MIDDLE NIGHT CLASS—49.

- Akers, Walter L., Minneapolis.
 Anderson, Sidney L., Little Falls.
 Back, Carl B., Vernon, S. D.
 Bartlet, Joseph B., Minneapolis.
 Bartlet, Lester, Minneapolis.
 Bollom, Carl O., Red Wing.
 Bridgman, Raymond, Vermillion, S. D.
 Bruse, Olof L., Minneapolis.
 Burns, Peter M., Minneapolis.
 Cotton, J. Frank, Minneapolis.
 Crouley, William D., Minneapolis.
 Curtis, Elias B., Minneapolis.
 Davies, Otto N., Winona.
 Duncan, Urni S., Minneapolis.
 Evans, Arja D., Mankato.
 Felberbaum, Harry, Northfield.
 Frankel, Hiram D., St. Paul.
 Gilbert, Trygve O., Willmar.
 Grady, T. E., Minneapolis.
 Hanson, H. S., Minneapolis.
 Harrington, Curtis L., Hayward, Wis.
 Hayden, John P., Peterson, Ia.
 Kerr, Harold C., St. Paul.
 LaDue, Charles W., Waseca.
 Landon, Clio G., Minneapolis.
 LeBell, Austin O., Minneapolis.
 Lundeen, Ernest C. A., Northfield.
 MacVicar, Earl A., Eau Claire, Wis.

Mehan, James E., Minneapolis.
 Murfin, Arthur M., Sleepy Eye.
 O'Donnell, John T., Minneapolis.
 Ogden, Leslie S., Minneapolis.
 O'Hare, Herbert F., Hammond, Wis.
 Olson, Hans M., Norway.
 Phillips, Luther M., Minneapolis.
 Plummer, Frank L., Anoka.
 Rice, William A., Lake City.
 Riebeth, George H., Minneapolis.
 Ripley, Edwin A., Oakfield, Wis.

Rossman, Willard A., Chatfield.
 Rundell, Edwin A., Minneapolis.
 Schall, Thomas D., St. Paul.
 Schucknecht, Edward F., Anamosa, Ia.
 Steenson, Jesse G., Eden Prairie.
 Thomas, Harry H., Minneapolis.
 Van Fredenburg, H. J., Alexandria.
 Ware, J. Roland, Minneapolis.
 Wearne, Roger Grose, Minneapolis.
 Wyatt, George O., Clinton, Ia.

JUNIOR DAY CLASS—III.

Aaker, Casper, Ridgway, Ia.
 Adams, Leon Ray, Luverne.
 Anderson, Albert S., Stewartville.
 Anderson, Don C., Minneapolis.
 Anderson, Fanny C., Wheaton.
 ApRoberts, Gwelyn, River Falls, Wis.
 Austin, Harry Hart, Minneapolis.
 Bailey, Seavey Moor, Minneapolis.
 Baird, Roy, River Falls, Wis.
 Bakken, Albert T., Winsor.
 Banfield, Nathan F., Austin.
 Barnard, Geo. W., Spencer, Ia.
 Barrows, Earle Marsh, Minneapolis.
 Beal, Willis Norton, Guilford, Me.

 Wright, Daisy Mabel, St. Paul.
 Wright, Minnie, Grand Forks, N. D.
 Young, Jos. W., Silver Lake.
 Young, Maude M., Clear Lake, Ia.

Summary of Students

THE GRADUATE DEPARTMENT.

	Men.	Women.	Total.	
Candidates for the degree of doctor of philosophy.	31	6	37	
doctor of civil law...	6		6	
master of laws.....	16		16	
master of arts.....	41	23	64	
master of agriculture	1		1	
Others doing graduate work	22	13	35	
Total	117	42	159	159

THE COLLEGE OF SCIENCE, LITERATURE AND THE ARTS.

	Men.	Women.	Total.	
<i>Senior class</i>	67	94	161	
<i>Junior class</i>	87	135	222	
<i>Sophomore class</i>	110	157	267	
<i>Freshman class</i>	183	231	414	
Unclassed students	36	94	130	
Total	483	711	1194	1194

SCHOOL OF CHEMISTRY.

	Men.	Women.	Total.	
Senior class	1		1	
Junior class	6		6	
Sophomore class	9		9	
Freshman class	4	1	5	
Total	20	1	21	21

THE COLLEGE OF ENGINEERING AND THE MECHANIC ARTS.

	Men.	Women.	Total.	
<i>Senior class—</i>				
Civil engineering section	13		13	
Mechanical engineering section.....	3		3	
Electrical engineering section.....	12		12	
Science and technology.....	2		2	30
<i>Junior class—</i>				
Civil engineering section	18	1	19	
Mechanical engineering section	14		14	
Electrical engineering section	17		17	
Science and technology	1		1	51

<i>Sophomore class—</i>			
Civil engineering section	39		39
Mechanical engineering section	37		37
Electrical engineering section	45		45
Science and technology	1		1
			122
<i>Freshman class—</i>			
Civil engineering section	33		33
Mechanical engineering section	29		29

Appendix A

THE DEGREE OF DOCTOR OF PHILOSOPHY.

The degree of doctor of philosophy—names of persons upon whom the degree has been granted and the subjects of the theses:

- ABBETMEYER, CHARLES D. A. F., '00, "Moral evil in Old English literature."
- AVERY, ELIZABETH HUNTINGTON, '95, "Influence on American history of French immigration."
- BERKEY, CHARLES PETER, '97, "Geology of the St. Croix Dalles."
- BREWSTER, HENRY WEBB, '92, "Sensation and intellectual^{activity}: their character and their function in the cognition of the real and the Ideal."
- CHITTENDEN, E. PORTER, '97, "The labial series in English sounds."
- CROMBIE, JOHN S., '93, The degree was granted "post obitum" and the thesis was never completed.
- DANNER, HARRY ROSS, '99, "Legal status of the Indian tribes."
- ELFTMAN, ARTHUR HUGO, '98, "Some points on the structure and composition of igneous rocks of northeastern Minnesota."
- ELIASON, ADOLPH OSCAR, '01, "The rise of commercial banking institutions in the United States."
- ELLIOTT, CHARLES BURKE, '88, "The United States and the northeastern fisheries: a history of the fishery question."
- ELMQUIST, ANTHONY F., '00, "Studies in Ezra and Nehemiah with special reference to the return under Cyrus and the building of the second temple."
- FINK, BRUCE, '00, "Contributions to a knowledge of the lichens of Minnesota."
- FLATEN, NILS, '00, "El poema del Cid."
- GEISNESS, THOMAS, '02, "A comparative study of moods denoting joy and grief in the Gothic, Old English, and Old Anglo Saxon, with reference to the corresponding moods and expressions in Greek and Latin."
- GLASOE, PAUL M., '02, "Camphoroxine."
- MAGNUSSON, PETER M., '93, "Some applications of logical and psychological principles to grammar."
- MERRILL, JOHN E., '94, "Ideals and institutions: their parallel development."
- MOTT, ALICE J., '99, "The ninth year of a deaf child's life."
- NILSSON, VICTOR A., '97, "Loddfafnismal: an Eddic study."
- PEITHMAN, ERNEST C. H., '98, "Investigations on Kant's conception of experience."
- RACHIE, ELIAS, '01, "Taxation in Minnesota."
- RAMALEY, FRANCIS, '98, "Contributions to a knowledge of seedlings."
- SANFORD, JOHN A., '94, "The stage in the Attic theatre of the fifth century B. C."
- SEWELL, HANNAH ROBIE, '99, "Theory of value before Adam Smith."
- WILKIN, GEORGE F., '02, "Control in evolution."

Appendix B

ACCREDITED SCHOOLS.

The following is a list of high schools, in the State of Minnesota, accredited to the University of Minnesota:

Ada.	Fertile.	Mapleton.	St. James.
Adrian.	Fosston.	Marshall.	St. Paul—
Aitkin.	Fulda.	Minneapolis—	Central.
Albert Lea.	Glencoe.	Central.	Cleveland.
Alexandria.	Glenwood.	East Side.	Humboldt.
Anoka.	Graceville.	North Side.	Mechanic Arts.
Appleton.	Grand Rapids.	South Side.	St. Peter.
Arlington.	Granite Falls.	Montevideo.	Sauk Center.
Austin.	Hallock.	Monticello.	Shakopee.
Barnesville.	Hastings.	Moorhead.	Sherburne.
Bemidji.	Hector.	Morris.	Slayton.
Benson.	Henderson.	New Paynesville.	Sleepy Eye.
Blooming Prairie.	Herman.	New Richland.	Springfield.
Blue Earth City.	Heron Lake.	New Ulm.	Spring Valley.
Brainerd.	Hopkins.	Northfield.	Stewartville.
Browns Valley.	Howard Lake.	Olivia.	Stillwater.
Caledonia.	Hutchinson.	Ortonville.	Tracy.
Canby.	Jackson.	Owatonna.	Two Harbors.
Cannon Falls.	Janesville.	Park Rapids.	Virginia.
Chatfield.	Kasson.	Pelican Rapids.	Wabasha.
Cloquet.	Kenyon.	Perham.	Wadena.
Crookston.	Lake City.	Pine City.	Warren.
Dawson.	Lake Crystal.	Pine Island.	Waseca.
Delano.	Lakefield.	Pipestone.	Waterville.
Detroit.	Lamberton.	Plainview.	Wells.
Dodge Center.	Lanesboro.	Preston.	Wheaton.
Duluth.	Le Roy.	Princeton.	White Bear.
East Grand Forks.	Le Sueur.	Red Lake Falls.	Willmar.
Elbow Lake.	Litchfield.	Red Wing.	Windom.
Elgin.	Little Falls.	Redwood Falls.	Winnebago.
Elk River.	Long Prairie.	Renville.	Winona.
Excelsior.	Luverne.	Rochester.	Winthrop.
Fairmont.	Madelia.	Rush City.	Worthington.
Faribault.	Madison.	Rushford.	Zumbrota.
Farmington.	Mankato.	St. Charles.	
Fergus Falls.	Mantorville.	St. Cloud.	

The following private schools are also accredited to the University:

Saint Mary's Hall, Faribault.	Concordia College, Moorhead.
Shattuck Military Academy, Faribault.	Pillsbury Academy, Owatonna.
Stanley Hall, Minneapolis.	St. Joseph's Academy, St. Paul.
Windom Institute, Montevideo.	St. Paul's College, St. Paul Park.

Appendix C

UNIVERSITY SUMMER SCHOOL.

This school will open late in June and continue in session six weeks, closing early in August. This school is organized under the authority of the Department of Public Instruction, in the interest of the teachers of the State. Instruction is given in two sections.

I. THE UNIVERSITY SECTION.

This section provides for special and graduate work in University subjects, especially for high school teachers. Instruction is given by members of the University faculty or under their supervision, and as the work is completed credit is allowed upon the books of the University. All the advantages of the laboratories, museums and library of the University are open to the classes of this section.

II. THE ELEMENTARY SECTION.

This section provides for the needs of the teachers of the primary and elementary grades. The subjects taught include arithmetic, grammar, history of the United States, physiology, botany, physics, music, penmanship; and special method courses with illustrative lessons.

Circulars of information will be sent free upon application to the registrar of the University.

Appendix D

Graduates of the "advanced graduate course" of a Minnesota state normal school will be admitted with advanced standing equivalent to one year's credit, and will receive the degree of bachelor of arts upon completing in the University the following courses: freshman mathematics, two years of science from the subjects prescribed for the freshman and sophomore years, two years of language (not including English) from those years, sophomore rhetorical work, and seven full electives from the junior and senior years.

Provided that such students shall not be permitted to elect courses I and II in pedagogy, and that before registering for the freshman mathematics they shall be required to make good any deficiencies in their preparatory mathematics, under the regulations that apply to all other candidates for the bachelor's degree.

Individual graduates of the "advanced Latin course" (five-year) or of the "advanced English course" (five-year) of a Minnesota state normal school, who, on the basis of maturity and ability, present certificates of special fitness from the president of the normal school, will be admitted with advanced standing under the same regulation and proviso.

Appendix E

THE GILFILLAN TRUST FUND.

The Honorable John B. Gilfillan has given to the University the sum of fifty thousand dollars, yielding an annual income of twenty-five hundred dollars, to be used by the Board of Regents to assist worthy students, needing such aid, to secure an education. The Regents are empowered to give this aid in the way of loans or gifts, according to the circumstances of the case. As a rule the fund is used as a loan fund, and a small rate of interest is charged. The details of the regulations which have been adopted by the Regents for the administration of the fund may be learned by addressing the President of the University.

Appendix F

SPECIAL PRIZES IN ORATORY AND DEBATE.

The Department of Rhetoric has been enabled to offer, through the generosity of friends of the University, numerous cash prizes amounting in all to four hundred thirty dollars. This in addition to the regular annual prizes offered for special excellence of work in that department. The names of the donors, and the amounts contributed by each, follow: Edward Backus, \$50; C. A. Smith, \$25; William C. Edgar, \$10; Frank S. Abernethy, \$5; Charles S. Pillsbury, \$50; John S. Pillsbury, \$50; Halsey W. Wilson, \$25; C. S. Buck, \$25; Thomas H. Shevlin, \$150; Slattery, Norton & Co., \$25; Rudolph E. Lee, \$5; Christopher Graham, \$10.

The \$150 contributed by Mr. Shevlin constituted a special prize for the winners of the Wisconsin debate, fifty dollars each to the following men: Benjamin Drake, Jr., Raymond P. Chase and Hugh J. MacClearn.
