SELECTED REFERENCES	4

The University of Minnesota is committed to the policy that all persons shall have equal access to its programs, facilities, and employment without regard to race, creed, color, sex, or national origin.

INTRODUCTION

This work is an extension of a bibliography prepared by the author as part of a final report submitted to the U.S. Bureau of Mines for grant # G0264002 entitled "Manganese-bearing ores of the Cuyuna iron range, east-central Minnesota, Phase I". This bibliography, though directed primarily towards the geologic and mining literature of the Cuyuna range, does include the major works on the metallurgical aspects of the Cuyuna ores. For historical interest the very earliest publications are included. This list of abbreviations given on pages 2-4 are consistent with those from the "Bibliography and Index of Geology".

The writer is indebted to Timothy Wahl, Alicia Hedren, and Thomas Geskermann for the many hours they spent in the library. A special thanks to Jo Behm and Edie Sugimoto for typing several versions of the manuscript.

LIST OF ABBREVIATIONS

Am. Assoc. Adv. Sci., Proc.	American Association for the Advancement of Science, Proceedings
Am. Inst. Min. Eng., Bull.	The American Institute of Mining Engineers, Bulletin
Am. Inst. Min. Eng., Trans.	The American Institute of Mining Engineers, Transactions
Am. Mineral.	The American Mineralogist
