Health Sciences Continuing Education

HEALTH SCIENCES CONTINUING EDUCATION

Health Sciences Continuing Education was established as a function of the Vice President for Health Sciences' Office in January of 1972. A Coordinator was named and assigned the responsibility of carrying out, at the continuing education level, the mission of the health sciences. Each unit of the health sciences is encouraged to develop "inventive and imaginative" programs, based on the actual needs of their discipline. All units are encouraged to experiment with interdisciplinary programs and to actively assist health professionals in developing a "team" approach to patient care.

A philosophy of life-long learning and responsiveness to professional needs is now a characteristic of both "professional-in-training" and "professional-in-practice" education in the health sciences. The faculty of the health sciences is ready to assist you in meeting your educational needs as a practicing professional. If you have questions or suggestions concerning interdisciplinary continuing education in the health sciences, or if you wish to discuss any aspect of this booklet, please contact:

William J. Hodapp
Coordinator
Health Sciences Continuing Education
7208 Powell Hall
University of Minnesota
Minneapolis, Minnesota 55455
612-373-8973

ABOUT THIS BOOKLET

This is the fourth publication which lists all of the continuing education offerings of the University of Minnesota Health Sciences. It is presented in a new, more concise format and it will be published twice each year. The new format and publishing schedule will provide you with a more current source of program announcements which will be of assistance in making your plans for continuing education attendance. You are encouraged to consider the potential which programs provided by disciplines other than your own may have for your continuing education.

HOW TO USE THE BOOKLET

The format of the booklet features a chronological listing for each discipline of all health sciences offerings in continuing education for the period of September 1, 1976 through January 31, 1977. Additional programs which are planned by any unit will be announced through special mailings. This booklet will provide advance notification of titles and dates for:

- Continuing education programs in your discipline
- Continuing education programs in other disciplines which may be of interest to you
- Interdisciplinary continuing education programs

The names and addresses of those individuals who are listed with each program as the contact person are found on page 3. If you are interested in receiving detailed information on programs in disciplines which do not mail to you on a routine basis, please write directly to the contact person who is listed for those programs. You will be sent detailed information from those sources as soon as program brochures are printed.

ADDITIONAL SOURCES OF INFORMATION ON
COURSES AND PROGRAMS
OF THE UNIVERSITY OF MINNESOTA

Community Services
University Hospitals

The Community Services Program is designed to bring the University Health Sciences staff and other resources to health care agencies throughout the state. The service is usually provided in the community, and the goal is to establish ongoing relationships between health care agencies and the University. Although service is brought to the community, staff from the community may spend time at University Hospitals to gain experience in specialty areas such as rehabilitation, coronary care, intensive care, housekeeping and maintenance, and with various methods of health care delivery.

The most important component of the Community Services Program is flexibility. The program is designed to provide any type of assistance within the capabilities of the Health Sciences Center. Some examples of the types of service available are:

Inservice programs for health agency staff

Seminars for medical staff

Organizational review and staff development

Specialty area work experience

Inservice resources pool --

Administration; Central Supply; Housekeeping and Maintenance; Medical Records; Medical Staff; Nursing; Nutrition (dietary); Occupational, Physical, and Speech Therapy; Operational Analysis; Pharmacy; Rehabilitation; Social Service; X-ray; and other Health Sciences resources.

The program is funded through the state legislature, and normally there is no charge for the service.

If you are interested in this service or would like to know more about it, please contact:

Cleo E. Issendorf, R.N. Coordinator Community Services Program University of Minnesota Box 457 Mayo Building Minneapolis, Minnesota 55455 (612) 373-7623	-or-	Russell A. Farrell Outreach Coordinator Health Sciences University of Minnesota Box 32 Mayo Building Minneapolis, Mn. 55455 (612) 376-4427
