How to Use This Catalog

This is the University of Minnesota, Twin Cities *Undergraduate Catalog* for the academic years 2006-08. This catalog is an academic planning tool for undergraduates. To learn how to use it, read this page.

Directory of Undergraduate Programs/Majors and Directory of Undergraduate Minors

The directories on the following pages list majors and minors and their corresponding colleges, as well as the type of degree offered and the page where the program or minor can be found.

General Information

All undergraduates should read the General Information section, beginning on page 9. It includes information about academic support services, such as advising, that are crucial to success at the University. The section also includes basic information about admissions, financial aid, and student services.

Tuition and fees and registration information vary from semester to semester. Check www.onestop.umn.edu for the most up-to-date information.

Policies

All undergraduates should read the Policies section, beginning on page 25. It lists requirements and standards that are common across all undergraduate colleges and programs on the Twin Cities campus. Topics include credit load, declaring a major, four-year graduation plan, grading and transcript policy, graduation requirements, liberal education requirements, and graduation with distinction or with honors.

Colleges and Programs

The college and program sections of this catalog provide detailed information about undergraduate degree programs and services offered by colleges on the Twin Cities campus. Most of the colleges are subdivided into departments. Certain departments offer cross-curriculum programs that incorporate the resources of two or more departments. Interdepartmental groups, special studies, special projects, and other nondepartmental units are listed alphabetically within the degree listings for each college program.

To find an academic area of interest and its corresponding college, use the **Directory of Undergraduate Programs/Majors** on pages 4 through 6 or the index at the back of this catalog.

General Information About Each College

The general information section at the beginning of each college section contains information about admission, orientation, honors, policies, and graduation requirements. This information expands upon the general information at the beginning of the catalog and gives college-specific detail in these areas. Contact information for each college can be found in the directory listings after each college's general information section.

Degree Program Information

The degree program descriptions contain curriculum overviews, degree requirements, and other relevant academic information. Students can choose from 162 majors, 35 stand-alone minors, and a wide variety of concentrations or tracks within many of the majors and minors.

To receive a bachelor's degree, students must satisfy specific degree program requirements, college requirements, and University requirements. Each college or program lists general information and college requirements and services at the beginning of its section. Degree requirements are listed at the end of each section. For information about University graduation requirements, see Graduation Requirements in the Policies section.

Course Descriptions

All undergraduate courses on the Twin Cities campus are listed in this section. See page 355 for a directory to find courses by academic categories, called "course designators." Course descriptions are listed alphabetically by course designator. Each course description includes the designator (abbreviation), number, title, prerequisites, and course content.

The courses listed in the catalog are available during the day and during fall and/or spring semester. Evening, May session, and summer courses can be found in the *Summer Session Catalog* or at www.cce.umn.edu/summer.

Some courses in this catalog are not offered every semester. To find out whether a course is offered in a particular semester, consult the online *Class Schedule* at www.onestop.umn.edu. It lists courses, class hours, locations, and instructors; it also provides registration instructions, fees, final exam schedules, and courses that satisfy liberal education requirements. For detailed information about particular courses, consult the online Course Guide at <http://www.onestop.umn.edu>.

To find a major or minor and its corresponding college, use the Directory of Undergraduate Programs/Majors and the Directory of Undergraduate Minors on the following pages.

Administration and Faculty

University administrators and college administrators and faculty are listed in this section. In addition to name and title, the information about faculty includes their teaching awards, universities that awarded their degrees, and current research/teaching interests.

UNIVERSITY
OF MINNESOTA

Overview

The University of Minnesota—with campuses in the Twin Cities, Duluth, Morris, and Crookston—is one of the most comprehensive universities in the country and ranks among the most prestigious universities in the United States. It is both the state land-grant university, with a strong tradition of education and public service, and a major research institution, with scholars of national and international reputation.

The University of Minnesota, Twin Cities is a classic Big Ten campus in the heart of the Minneapolis-St. Paul metropolitan area. The largest of the four campuses, it is made up of 17 colleges and offers undergraduate and graduate degrees in more than 370 fields of study, including about 160 bachelor's degree programs. With a host of nationally recognized, highly ranked programs, the University's Twin Cities campus provides a world-class setting for lifelong learning.

Other important parts of the University are the Supercomputer Institute in Minneapolis, Hormel Institute in Austin, Itasca Biological Station and Laboratories in Itasca State Park, Cloquet Forestry Center, Cedar Creek Natural History Area near Bethel, Rosemount Research Center, Horticultural Research Center at Excelsior, Minnesota Landscape Arboretum near Chanhassen, Sand Plain Research Farm at Becker, University of Minnesota Rochester, Soudan Underground Research Site, and research and outreach centers at Rosemount, Crookston, Grand Rapids, Morris, Lamberton, and Waseca. Through the University of Minnesota Extension Service, the University has a statewide presence.

History

The University of Minnesota was founded as a preparatory school in 1851, seven years before the territory of Minnesota became a state. Forced to close during the Civil War, the school reopened in 1867 and persevered with the help of Minneapolis entrepreneur John Sargent Pillsbury, a University regent, state senator, and governor, who is known today as the "Father of the University." Another factor in the school's survival in those tenuous early years was the enactment of the Morrill Act, or Land-Grant Act. Signed into law by President Lincoln in 1862, the act gave each state a grant of land within its borders stipulating that the income from the land was to be used to provide education for people of the state.

In 1869, the school reorganized as an institution of higher education. William Watts Folwell was inaugurated as the first president of the University on December 22, 1869. There were only nine faculty members and 18 students that year. Four years later at the first commencement, 2 students received bachelor of arts degrees. The first doctor of philosophy degree was awarded in 1888. In that same year, the Department of Agriculture opened on the University Farm in St. Paul. The Duluth campus joined the University in 1947; the Morris campus opened in 1960, the Crookston campus in 1966. A campus in Waseca opened in 1971 and closed in 1992.

Mission Statement

The University of Minnesota, founded in the belief that all people are enriched by understanding, is dedicated to the advancement of learning and the search for truth; to the sharing of this knowledge through education for a diverse community; and to the application of this knowledge to benefit the people of the state, the nation, and the world.

The University's mission, carried out on multiple campuses and throughout the state, is threefold:

Research and Discovery

Generate and preserve knowledge, understanding, and creativity by conducting high-quality research, scholarship, and artistic activity that benefit students, scholars, and communities across the state, the nation, and the world.

Teaching and Learning

Share that knowledge, understanding, and creativity by providing a broad range of educational programs in a strong and diverse community of learners and teachers, and prepare graduate, professional, and undergraduate students, as well as non-degree-seeking students interested in continuing education and lifelong learning, for active roles in a multiracial and multicultural world.

Outreach and Public Service

Extend, apply, and exchange knowledge between the University and society by applying scholarly expertise to community problems, by helping organizations and individuals respond to their changing environments, and by making the knowledge and resources created and preserved at the University accessible to the citizens of the state, the nation, and the world.

In all of its activities, the University strives to sustain an open exchange of ideas in an environment that embodies the values of academic freedom, responsibility, integrity, and cooperation; that provides an atmosphere of mutual respect, free from racism, sexism, and other forms of prejudice and intolerance; that assists individuals, institutions, and communities in responding to a continuously changing world; that is conscious of and responsive to the needs of the many communities it is committed to serving; that creates and supports partnerships within the University, with other educational systems and institutions, and with communities to achieve common goals; and that inspires, sets high expectations for, and empowers the individuals within its community.

The University of Minnesota is one of the nation's top research universities according to the most recent study by the University of Florida.

Accreditation

The University of Minnesota, Twin Cities is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools (NCA). The University has been accredited continuously since 1913, when the NCA's first list of accredited institutions was published. Its institutional accreditation was continued most recently in 2006. The scheduled year of the next comprehensive evaluation is 2016. Background information about the most recent review and the current "Record of Status and Scope" of the University's accreditation is available online at <http://academic.umn.edu/img/assets/12720/newrecord.pdf>. For more information, contact the NCA's Higher Learning Commission at 1-800-621-7440 or visit their Web site at www.higherlearningcommission.org. The Twin Cities campus also includes more than 100 academic programs that are accredited separately by various professional and disciplinary associations. An inventory of these programs is available at http://academic.umn.edu/planning/accred/tc_specialized.html.

Academic Support Services

Advising

When students arrive on campus for orientation, a primary concern is selecting a schedule of classes for the first term. Students should also begin planning their academic future. Academic advising, available to all undergraduates, is an important part of that process.

A University of Minnesota degree can (and should) represent an integrated experience that has broadened and deepened students' interests and refined their intellectual skills—skills used throughout life. Students should construct a program in which each course relates to the next and contributes to their personal development. Academic advisers—faculty, professional advisers, graduate students, and peers—are prepared to help students define and achieve their educational goals at every stage of their college career.

Colleges and programs have different advising systems, which are tailored to meet the specific advising needs of their students. Advising offices also have different preferences and procedures for communicating and setting up appointments. To begin planning, check with the following offices or visit <http://onestop.umn.edu> for links to college advising Web sites:

College of Biological Sciences

Getting the Most From an Adviser

Advisers help students develop a perception of themselves and their future. Advisers introduce students to the University—teaching them to value the learning process, put the college experience into perspective, become more responsible, set priorities, and be honest with themselves. Although advisers have many different academic backgrounds, they share a broad vision of the University and help students navigate their academic progress in the most efficient and successful ways.

Students are encouraged to see their adviser before registration each term. This is especially important for first-year students, who may need help developing sound academic and career goals. Establishing regular communication with an adviser also allows the adviser to gain insights into a student's academic needs.

Students should schedule their appointments well before registration begins. They also should be prepared by studying this catalog, the online *Class Schedule*, and the online *Course Guide* before each registration period. Students should mark classes they are considering, have a tentative schedule in mind, and write down questions before talking to their adviser. To get the most from an adviser, students should also:

- ask questions and ask again if an answer is not clear.
- note the cancel/add deadlines for the registration period.
- become familiar with the Academic Progress Audit System (APAS) to understand what is required for a degree and to chart progress toward it. (See the Policies section of this catalog.)
- keep copies of their registration printouts, fee statements, and transcripts.
- ask advisers to share information about their academic areas of interest and how they chose their majors.
- make thoughtful decisions. Advisers can help define options, but students must make their own choices.

Achieving Academic Success

For many students, the first year of study is a time to explore academic interests and abilities. With careful planning, students can explore their interests and satisfy degree requirements at the same time. Nearly any academic interest can be satisfied by some program at the University. Advisers can help students discover the opportunities.

Undergraduates are admitted to the University on the basis of their accomplishments in high school and their achievements on college entrance examinations. Once on campus, their success depends on the quality and quantity of work applied to their studies. Many beginning students find themselves surprised by the amount of work they are expected to do outside of class and the speed at which they are expected to master subjects that they studied at a slower pace in high school. Satisfactory adjustment to the more demanding pace of the University is a key to academic success.

Academic workload is based on the number of credits a student takes. The University Senate has established the policy, consistent with policies at other universities, that students are expected to average three hours of work per week for each credit taken. Therefore, a student taking 15 credits should expect 45 hours of work per week. The most successful students learn to plan and manage their workload, and they:

- attend all their classes,
- study every day,
- use instructors' office hours and tutorial services,
- take part in extracurricular campus activities.

Balance is a key to success, and successful students find that much valuable learning occurs outside the classroom in employment, student organizations, teams, clubs, and volunteer opportunities. For more information, see the *Gopher Guide*, available in University Bookstores.

Undergraduates must complete at least 15 credits per semester to graduate within four years. The number of courses a student will need to take each semester will vary. Most semester courses will be either 3 or 4 credits, so students need to take four or five courses per semester.

Many students must work to pay for college. Family and other obligations may also be significant for some students. Students need to consider all of their obligations as they plan their schedules each term. Advisers can help students make realistic choices and maintain steady progress toward a degree.

13-Credit Requirement—Degree-seeking students are required to register for at least 13 credits each semester. To apply for part-time status, or to take fewer credits temporarily, students must petition their college. More information can be found at <http://onestop.umn.edu>.

The course registration queue gives priority to students whose immediately previous registration was “full-time” (i.e., for at least 13 credits). Under the queue, full-time seniors register first, followed by part-time seniors, full-time juniors, part-time juniors, full-time sophomores, etc. More information can be found at <http://onestop.umn.edu>.

Four-year Graduation Plan

The Four-year Graduation Plan is an agreement between a student and the University that guarantees institutional support for completing degrees within four years. Under the plan, the student agrees to meet certain expectations for academic planning and performance. In turn, the University agrees to ensure that classes the student needs will be available. If the University cannot provide a required course, offer a substitution, or waive the requirement, it will pay the student’s tuition to stay an extra semester to complete the course.

A few degree programs are designed to take longer than four years, and students in those programs are not eligible for the four-year guarantee. Whether students in qualifying programs elect the four-year plan or not, they can graduate in four years simply by taking 15 or more credits each semester and working with an academic adviser to make sure their graduation requirements are being fulfilled. Throughout the academic experience, certain steps will help students stay on track. Most are common sense and apply for any student.

Freshmen: During their first year, students should complete the freshman writing requirement and at least 30 credits—more if they are in a major that requires more than 120 credits. Credits earned while in high school (AP, IB, or PSEO) can give students a head start on their college degree.

Sophomores: Students should make sure that they are taking classes to satisfy the liberal education requirements. They should also be exploring majors if they haven’t yet selected one. Students must declare a major by the end of sophomore year.

Juniors: Students should confirm that their liberal education and core requirements are being completed. They should meet with their adviser to determine that they understand and are working toward completion of their major requirements.

Seniors: Students must file for graduation by the beginning of the final semester. They must complete their senior project if their program requires one.

All students: Students should meet with their academic adviser once each semester during their freshman year and at the beginning of every subsequent year. All students are advised to take an average of 15 credits per semester and maintain good academic standing based on the requirements of their department or college.

Students should develop a study plan and review it with their adviser. They also should work with their adviser regularly to be certain that all checkpoint requirements are being met.

For more information, see Four-year Graduation Plan in the Policies section of this catalog, visit www.academic.umn.edu/fouryear, or call 612-625-2525.

Using Online Resources

The computer is an essential tool for University students. Access to personal computing resources and the Internet is becoming increasingly important for students in and out of the classroom. (See Computing in this section of the catalog.) Helpful Web sites have been created to assist students and advisers. A good starting point is the Student Services site at <http://onestop.umn.edu>.

Registered students receive a University Internet account to access e-mail and other Internet services. See Computing in this section of the catalog.

Career Planning

Exploring a future career path is an important task for University students. The Twin Cities campus has many resources to assist them in career planning.

Each undergraduate college provides career planning and academic advising assistance. In addition, several specialized University-wide student services offices are available. By visiting the offices listed below, students will find advisers and resources to help explore career or major interests, gain relevant career related experience, develop job search skills, and connect with future employers.

Career planning takes time. Students should plan to begin this process early in their University experience. Many of the following college career centers can be found online at <http://onestop.umn.edu/onestop/Services/Employment.html>.

College of Biological Sciences

Career Center for Science and Engineering, 50 Lind Hall, 612-624-4090

Academic Resources

Bookstores

The University Bookstore is located on the ground level of Coffman Memorial Union. The Coffman Union location carries course materials for all undergraduate, graduate, continuing education, IDL and most professional school courses. The Coffman Store carries new and used textbooks, course packets, reference and research materials, school supplies, and University of Minnesota clothing and gifts. In addition, the University Bookstores offer other services, including a textbook buy-back program, photo processing, visiting author discussions, and graduation needs including caps and gowns, announcements, and college rings.

Complete textbook information is available from the University Bookstore Web site at www.bookstore.umn.edu. This site generates your personalized book list from your registration records and includes estimated prices and availability. Textbooks may be ordered online or you may shop for your books in the store.

The University Bookstore also has locations on the St. Paul campus in the St. Paul Student Center, which carries textbooks and materials for courses offered on the St. Paul campus, and in the U of M Law Center, which carries textbooks and materials for the Law School.

Coffman Store

Coffman Memorial Union, 612-625-6000

Law School Store

St. Paul Store

St. Paul Student Center, 612-624-9200

Libraries

Housed in six major facilities and nine branch sites, the University Libraries includes 6.3 million print volumes, 47,000 serial subscriptions, 5.7 million microforms, 2.6 million government documents, and 400,000 maps, making it the 15th largest research library in North America.

To support the many disciplines at an institution as comprehensive as the University of Minnesota, the University Libraries acquire, catalog, and maintain information in practically every field of knowledge, in every language, from every time period, and in every format. Within the system are outstanding special collections including the history of medicine, social welfare, computing, architecture, American poetry, Afro-American literature, children's literature, history of European expansionism, cartography, British colonialism in India, Scandinavian studies, forestry, engineering and technical standards, and federal and international government documents.

Libraries' Web site, provides online access to the collections and serves as a gateway to local, national, and global information sources. MNCAT®, the online catalog, is accessible through LUMINA® and provides a nearly complete listing of book and journal holdings. Since 1992, the University Libraries have added access to thousands of full-text periodicals, academic journal articles, and newspapers. Students can access the University Libraries' Web site at www.lib.umn.edu.

Each major branch of the University Libraries houses different subjects.

- Andersen Library (West Bank)—computer history; children's literature; immigration history; manuscripts; social welfare history; special collections/rare books; University Archives; YMCA Archives; MINITEX

- Bio-Medical Library (Diehl Hall, East Bank)—health sciences
- Law Library (Law Building, West Bank)—legal materials
- Magrath Library (St. Paul)—agriculture; biological sciences; human ecology; design, housing, and apparel; vocational education; applied statistics; food science and nutrition; family social science; rural sociology; social work; applied economics
- Science and Engineering Library (Walter Library, East Bank)
- Wilson Library (West Bank)—social sciences, literature, art, education, psychology

For locations of other special collections or subject areas, and for information on library hours, visit www.lib.umn.edu or call 612-624-4552.

Computing

Academic and Distributed Computing Services (ADCS) is the first point of contact for information about computer purchasing, troubleshooting, training, and Web design and development. Computer and Internet support is provided to students, faculty, staff, and University departments.

The Technology Helpline provides assistance with e-mail, passwords, hardware, software, ResNet, telephones, voice mail, WebCT, Statistical software, UNIX, mainframe, and PeopleSoft. Call 612-301-4357 (1-HELP) or visit www.umn.edu/adcs/help for hours.

Walk-in Locations

East Bank

- 152 Shepherd Labs
- B60 Coffman Memorial Union

West Bank

- 93 Blegen Hall

St. Paul

- 50 Coffey Hall

Computer Facilities

Qualified University of Minnesota students can access student computer labs. See <http://publabs.umn.edu> for locations, hours of operation, and equipment available.

Computer Software

Student Computer and Software Discounts are available at <http://umart.umn.edu>. Free Microsoft operating system upgrade and Microsoft Office are available to download at www.umn.edu/ucs.

Computer Training

Hands-on instruction is available for a variety of computer and Internet applications. CLA students can participate in “Get Wired!” short-courses at no cost. See <http://uttc.umn.edu> for more information.

Undergraduate Research

The Undergraduate Research Opportunities Program (UROP) offers financial awards twice yearly to full-time undergraduates for research, scholarly, or creative projects undertaken in partnership with a faculty member. UROP offers a maximum award of \$1,700 (\$1,400 in a stipend for the hours worked on the project and \$300 for supplies and expenses required by the project). Undergraduate students in all colleges are welcome to participate in the program and are able to work with any

University faculty member. Applications are judged on the quality of the proposed project and the educational benefit to the student. Although the program is competitive, funding rates are often over 80 percent.

Application deadlines are in early March for a July 1 start date and in early October for a January 1 start date. Information and applications are available from the UROP office in 325 Johnston Hall (612-625-3853) or www.urop.umn.edu.

In addition, several summer research opportunities are available in a variety of areas at the University. These programs often involve full-time summer projects and can include a stipend, expense money, and room and board. For more information, contact the UROP office.

Study Abroad

Study abroad is the single most effective experience students can have to broaden their international awareness and sharpen their skills for today’s global job market. More than 220 study abroad options in 60 countries are available to University undergraduates through the Learning Abroad Center in the Office of International Programs. Undergraduates in every major are encouraged to earn credit toward their degree through study abroad.

Opening Doors of the World—The Learning Abroad Center offers world-class programs, including short-term faculty-led opportunities, intensive language study, internships, study at a foreign university, service learning, and special theme programs. Programs are offered in collaboration with academic departments and on-site foreign institutions, and many courses have been evaluated to meet the University’s liberal education and major requirements. Students may choose from academic year, semester, May session, and summer terms. Many programs in English are available. A number of programs offer credit-bearing internship and research opportunities in addition to classroom coursework.

The vast majority of students on study abroad earn University of Minnesota resident credit. Some students earn transfer credit, which is facilitated by the Learning Abroad Center.

Studying Abroad in a Major—Virtually every academic discipline is represented in study abroad. Students in any field—from accounting to engineering, sociology to zoology—can make progress toward their degree while overseas. The Learning Abroad Center works with University colleges and departments to develop a list of options for each major. Students should consult with the Learning Abroad Center and major advisers to discuss how study abroad can fit smoothly with their degree program; see www.UMabroad.umn.edu/academic/advisingsheets for details.

Learning Abroad Minor—The learning abroad minor is an individualized, interdisciplinary College of Liberal Arts minor open to all University of Minnesota undergraduates. This minor integrates a study abroad experience with intercultural communication, language study, and related coursework focusing on a country or region of study. See the College of Liberal Arts section of this catalog or contact the Learning Abroad Center for more information.

Scholarships and Other Financial Resources—Most financial aid can be used for study abroad, and financial aid awards can often be revised to include study abroad costs. Over \$400,000 in scholarships and grants are available annually to University students for study abroad. Also, the Learning Abroad Center has secured reduced program fees for University students participating in a variety of programs.

Work, Intern, Volunteer, and Travel—The Learning Abroad Center also has information on international work, intern, and volunteer opportunities; and sells a variety of travel products, such as guides, railpasses, and affordable passport photos.

For More Information—Advisers, program information, and computers are available in 230 Heller Hall. Or call 612-626-9000, e-mail UMabroad@umn.edu, or visit the Learning Abroad Center Web site at www.UMabroad.umn.edu.

Admissions and Prospective Student Services

Admission Information

For information about University of Minnesota, Twin Cities admission, academic programs, and other student services and educational resources, write or call:

Office of Admissions

University of Minnesota
240 Williamson Hall
231 Pillsbury Drive S.E.
Minneapolis, MN 55455 USA
Telephone (Twin Cities) 612-625-2008
Toll free (continental US) 1-800-752-1000
TTY (for deaf/hard-of-hearing callers) 612-625-9051
or visit the Web site at <http://admissions.tc.umn.edu>

Campus Visits and Tours

To make visit reservations, register online at <http://admissions.tc.umn.edu> or call the Office of Admissions VISITLINE at 612-625-0000 or 1-800-752-1000 (TTY 612-625-9051).

Admissions Office Hours

The Office of Admissions is open year-round, from 8:00 a.m. to 4:30 p.m., Tuesday through Friday, and Monday until 6:00 p.m. It is also open on Saturday mornings between early September and mid-May, except around University holidays. During term breaks and around University holidays, some campus services may be limited. Students planning to schedule a visit to campus should call ahead to confirm that the services they need will be available.

Admission Information

For official and up-to-date information about the University's admissions policies, procedures, and deadlines, contact the Office of Admissions or visit <http://admissions.tc.umn.edu>.

How to Apply—Prospective freshmen and transfer students may apply at <http://admissions.tc.umn.edu> or by contacting the Office of Admissions (see addresses and phone numbers above). There are separate applications for:

- freshmen,
- transfer students from colleges outside the University of Minnesota system,
- transfer students from other campuses inside the University system,
- international students, and
- adult special (non degree-seeking) students.

Freshmen must submit a completed application, official high school transcripts, official college transcripts (if applicable), ACT or SAT test scores (including writing exams), the application fee, counselor form, and any other information requested by the University.

Transfer students must submit a completed application, official transcripts from high school (if the student has fewer than 26 semester credits or is applying to the College of Food, Agricultural and Natural Resource Sciences or College of Design) and all postsecondary institutions attended, ACT or SAT scores (if the student has fewer than 26 semester credits), the application fee, and any other information requested by the University.

International students must submit a completed application, official transcripts, official English translations for secondary school and all postsecondary institutions attended, the application fee, English proficiency test scores (see TOEFL or MELAB under English Proficiency below) for nonnative English speakers, the financial certification statement (for students requiring the I-20 form for a student visa), and any other information requested by the University.

All transcripts and English test scores must be received by the application deadlines. International students applying as freshmen are not required to submit ACT or SAT scores, although they are welcome to do so as additional support for their application. International students applying for non-degree seeking admission should use the international student application.

When to Apply—Prospective students should apply as early as possible for the term they wish to start. For information on specific application deadlines for upcoming semesters, contact the Office of Admissions. Applications completed after the deadline are reviewed on a space-available basis, and admission is often more competitive.

English Proficiency—Students whose native language is not English may be required to take the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Michigan English Language Assessment Battery (MELAB) in place of the ACT or SAT.

For more information about the English proficiency tests, please contact the testing agencies:

English Language Institute
MELAB Office, TCF Building
University of Michigan
401 E. Liberty, Suite 350
Ann Arbor, MI 48104-2298
1-866-696-3522

Readmission—Students who were previously enrolled in an undergraduate degree program on the University of Minnesota, Twin Cities campus but have not registered for two consecutive semesters will be placed on inactive status. Students should contact their former college of enrollment for more information. See also the Policies section of this catalog.

Orientation—Newly admitted students receive information from their college of admission, including an invitation to New Student Orientation. Attendance at orientation is required. Invitations will specify the exact dates of each student's orientation. For most new students, orientation lasts two days, although some transfer students attend only one day. The dates of orientation vary by college and date of admission. (Students who cannot attend their assigned date may request an alternate date.)

Twin Cities Campus Colleges

See below for Twin Cities campus colleges that admit freshmen, those colleges and programs that require a year or more of undergraduate work for admission, and those colleges and programs that require a bachelor's degree or the equivalent.

Freshman- and transfer-admitting colleges

Carlson School of Management
 College of Biological Sciences
 College of Design
 College of Education and Human Development
 College of Food, Agricultural and Natural Resource Sciences
 College of Liberal Arts
 Institute of Technology

Transfer colleges and programs requiring one or more years of previous college work before entry

College of Continuing Education
 College of Pharmacy*
 College of Veterinary Medicine*
 Program in Dental Hygiene
 Program in Medical Technology
 Program of Mortuary Science
 School of Dentistry*
 School of Nursing

Colleges and programs requiring a bachelor's degree before entry

Graduate School*
 Law School*
 Medical School*
 Program in Occupational Therapy*
 Program in Physical Therapy*
 School of Public Health*

*See other University catalogs for details about these schools, colleges, and programs. Most College of Education and Human Development teaching licensure programs are postbachelor's programs. Professional architecture and landscape architecture programs are master's level. Physical therapy and occupational therapy are master's programs.

Freshman Admission

Definition

You are considered a freshman if you have not enrolled in any college courses after graduating from high school.

Application Review Process

Admission to the University of Minnesota is competitive. Each year we have more applicants than we can accommodate in the freshman class. We consider applicants for admission to their first-choice college. If we are not able to offer admission to the first choice, we consider applicants for admission to their second choice, and/or to the college that best matches their interests and academic records.

Enrolling an academically qualified, diverse student body is essential to the University's mission. The academic and social environment of the campus is greatly enhanced by a diverse student body, and students are better prepared to thrive in a multicultural world. Admission decisions are based on an overall assessment of each application.

Primary consideration is given to the following factors:

- Successful completion of a college preparatory curriculum. (See list below.)
- High school rank percentile. (Students from non-ranking schools and those with GED or other high school equivalency scores are given full consideration.)
- Grade point average.
- ACT or SAT scores.
- Strength of the curriculum through high school graduation, including courses that exceed the core subject requirements and any advanced courses (i.e., honors, AP, IB, college level).

Core Subject Requirements

Freshmen are expected, at a minimum, to have successfully completed the University's core subject requirements listed below.

A strong college preparatory curriculum enhances your chances for success in college. Because admission is competitive and students admitted to the University typically exceed the minimum requirements, we strongly encourage you to choose courses above and beyond those listed below.

If you are planning to apply to the University of Minnesota, you should pursue a rigorous curriculum throughout your high school years. In particular, you should continue taking core academic courses such as English, math, science and a second language through your senior year.

(Applicants who are not on track to complete all of the core subject requirements may sometimes be admitted if they have promising academic records and meet other admission requirements. Students admitted with any course deficiencies must make them up before graduating from the University.)

- Four years of English¹, with an emphasis on writing, including instruction in reading and speaking skills and in literary understanding and appreciation
- Three years of mathematics, including one year each of elementary algebra, geometry, and intermediate algebra (integrated math 1, 2 & 3)

Please note: The Carlson School of Management, College of Biological Sciences, and Institute of Technology require a fourth year of mathematics, such as pre-calculus, analysis, calculus, integrated math 4, or advanced math.

- Three years of science, including one year each of biological and physical science, and including laboratory experience

Please note: The Carlson School of Management, College of Biological Sciences and the Institute of Technology require three years of science to include one year each of biological science, chemistry, and physics.

- Three years of social studies², including one year each of U.S. history and geography (or a course that includes a geography component such as world history, western civilization, or global studies)
- Two years of single second language
- One year of visual and/or performing arts³, including instruction in the history and interpretation of the art form (e.g., theatre arts, music, band, chorus, orchestra, drawing, painting, photography, graphic design, media production, theatre production)

¹ If you are a non-native speaker of English, and if you have ACT English and/or reading scores of 17 or lower (or SAT critical reading [verbal] score of 420 or lower), you may be asked to submit scores from the Michigan English Language Assessment Battery (MELAB) or Test of English as a Foreign Language (TOEFL). Call the Office of Admissions for details.

² Applicants who are missing one year of geography will not be denied admission if they are otherwise admissible.

³ Applicants who are missing this requirement will not be denied admission if they are otherwise admissible.

Admission to Honors Programs

Students who have an outstanding record of academic achievement and seek the challenge and special rewards of honors study may be eligible for admission to an honors program.

Honors opportunities and benefits include:

- special enrichment programs,
- personalized instruction,
- research partnerships with professors,
- participation in honor societies, and
- graduation with honors.

Admission of Post-Secondary Enrollment Options (PSEO) Students

Credits earned by students in the Minnesota PSEO program will count as part of their regular University record should they be admitted to a Twin Cities campus degree program after graduating from high school (see transfer credit guidelines below).

PSEO students must follow all freshman application procedures and deadlines.

Transfer Admission

Applicants who have enrolled at a post-secondary institution or internationally recognized foreign college or university after high school are designated as transfer students. Most colleges and programs require a cumulative grade point average of at least 2.50 or higher (on a 4.00 scale) for applicants to be competitive. Applicants should also have completed designated prerequisite courses.

Admission decisions are based on applicants' demonstrated potential for successfully completing the program to which they apply. In programs with restricted class size, applications are individually reviewed by a committee.

Applicants who have completed less than a full year of college coursework at the time of application will be considered for admission using a combination of transfer and freshman admission criteria. High school and college transcripts and ACT or SAT (where required) will be reviewed.

Transfer students who graduated from high school in 1987 or later and have not earned a bachelor's degree or its foreign equivalent will be expected to complete any missing high school preparation requirements within one year of enrollment and before graduation. See High School Course Preparation on page 17.

Transfer Application Procedures

Applications—Complete the University of Minnesota, Twin Cities Campus Application for Admission (available online or from the Office of Admissions). Special additional applications required by professional schools will be sent to applicants, either on request or following receipt of the regular application.

Transcripts—Applicants must arrange for official transcripts to be sent from every postsecondary institution they have attended, whether or not they successfully completed coursework at those institutions. To be regarded as official, transcripts must bear the original signature of the registrar or the seal of the institution or must be college-certified or printed on security paper. The transcripts must have been issued within the last year.

Timing—Applicants should be sure that transcripts are sent at the time they apply, even if they have coursework in progress.

Transfer Credit Evaluation—When students are admitted, their previous college record will be evaluated to determine which courses they have taken at other institutions will transfer to the University of Minnesota.

Special Types of Transfer Admission

Summer-only Registration—Students who have previous college work and are in good standing at their own college may enroll in summer session courses without being formally admitted to the University. Registration for summer session courses does not constitute admission to the University. Students who plan to continue in the regular academic year must apply for admission by the published application deadline.

Non-degree Admission—Students who wish to enroll in day school courses for personal reasons and who do not wish to be formally admitted to an undergraduate degree program may apply for admission as a non-degree student by filling out a special application. Subsequent admission to a degree program may be possible on recommendation of the college.

To qualify for admission as a non-degree student, a student generally must meet the same requirements as a student applying for admission to a degree program. Most non-degree students already have earned bachelor's degrees. Some colleges—including the College of Liberal Arts—will consider requests for non-degree status from students who do not have degrees.

Note: Formal application is necessary for non-degree status.

For more information, contact the Office of Admissions.

Change of College or Status From Within the University

The Office of the Registrar processes admission applications from current and former University students who wish to transfer into another University undergraduate program. To transfer to another undergraduate program, a student must submit a completed Application for Undergraduate Change of College to the One Stop Student Services Center (200 Fraser Hall, 130 West Bank Skyway, or 130 Coffey Hall) by the application deadline.

For deadlines or to download an application, see the Office of the Registrar Web site at www.onestop.umn.edu/Forms.

National Student Exchange Program—The University is a member of the National Student Exchange (NSE) program, which sponsors student exchanges between participating institutions of higher learning in the U.S. and Canada. Exchange students usually have highly specific educational goals. For information on the program, contact the NSE Coordinator, Career and Community Learning Center, 345 Fraser Hall, 106 Pleasant Street S.E., Minneapolis, MN 55455, (612-626-2044).

Transfer of Credit Policies

Credit for coursework taken at other institutions will be transferred subject to the following considerations: the mission of the institution from which credits would be transferred; the comparability of the coursework with University of Minnesota coursework; and the appropriateness of the coursework for meeting baccalaureate degree requirements at the University of Minnesota.

Regional accreditation usually serves as the primary criterion for determining the transferability of coursework from other institutions. Coursework from institutions lacking such accreditation may be individually reviewed. Appropriate coursework from internationally recognized foreign colleges and universities will transfer for credit. Credit is not normally transferred from specialized or proprietary institutions, military schools, or industry-based education programs.

All attempted credits, whatever the outcome, must be reported on a student's application and will be considered in the review process. Students may not, in the interest of "making a fresh start," fail to report courses taken at other institutions for which they received less-than-satisfactory grades.

Residence Requirement for Graduation—To complete a degree at the University, a student must complete at least 30 semester credits offered through the University, including 24 credits taken after admission to the major or program and taken from the college offering the major or program.

For more information, see Graduation Requirements in the Policies section of this catalog.

Grade Records—Individual transfer courses, credits, and grades will not appear on a student's University transcript. The transfer GPA is not computed into the University of Minnesota GPA.

General Transfer Guidelines

- Credits earned in courses comparable to those offered by the University of Minnesota, Twin Cities will usually transfer routinely. General education courses are routinely accepted in transfer (although they will not necessarily fulfill the University's liberal education requirements).
- Credit is usually not allowed for courses that are not designed for transfer to baccalaureate degree programs on the Twin Cities campus. Such courses are usually highly specialized or are vocational.
- There is no absolute limit on the number of credits that may be transferred from another college.
- Religious studies credits transfer if they are not doctrinal, confessional, or sectarian in nature. Religious studies courses from public institutions transfer without special review; religious studies courses from all other institutions will be evaluated by appropriate college or department faculty.
- No more than 6 semester credits from physical education, study skills, or applied music (in any combination) will count toward a student's degree, unless the credits are a required part of the student's program requirements. This provision establishes a total of 6 credits from all three areas combined (not 6 from each) as the number that will count toward a degree.

- Upper division credit (junior or senior level) is allowed when the course was upper division at the previous school, regardless of the level of an equivalent course at the University.
- Repeated courses: When a student has repeated a course, only the last enrollment for the course shall transfer.
- The minimum grade required for transfer is D. The college or program determines how the course may be used to meet degree requirements.
- Independent study, field experience, and internships may or may not transfer, depending on the level and appropriateness of the learning experience.
- Remedial or developmental courses are not considered college-level and do not transfer.
- Study abroad courses may or may not transfer, depending on the international institution offering the courses and other variables.

Each year, the University offers more than 150 freshman seminars—courses designed specifically for first-year students.

- Credit for nontraditional learning (AP, IB, CLEP, military schools, DANTES) will be evaluated by the Office of Admissions for appropriateness and comparability to University of Minnesota bachelor's degree programs. Credit granted by another institution for these nontraditional experiences will be re-evaluated for content and comparability.
- Twin Cities campus colleges do not automatically grant junior standing to students with associate in arts degrees. Credit is granted for coursework, not for degrees.

Advanced Placement (AP)—High school students may earn college credit in some subject areas by receiving satisfactory scores on the College Entrance and Examination Board Advanced Placement Program examinations. For a list of AP credit awards, contact the Office of Admissions or see the admissions Web site at <http://admissions.tc.umn.edu>.

International Baccalaureate (IB)—High school students may earn college credit in some subject areas by receiving acceptable scores on higher-level International Baccalaureate examinations. For a list of IB credit awards, contact the Office of Admissions or see the admissions Web site at <http://admissions.tc.umn.edu>.

College Level Examination Program (CLEP)—Students may earn college credit for successful completion of some CLEP examinations. For a list of the CLEP exam awards and curriculum scores for college credit, contact the Office of Admissions or visit <http://admissions.tc.umn.edu/academics/clep.html>.

Minnesota Transfer Curriculum

To simplify the transfer process, the University of Minnesota and the Minnesota State Colleges and Universities have developed a Minnesota Transfer Curriculum (MnTC). Students who complete the MnTC at a participating college and then transfer to the University of Minnesota, Twin Cities have completed the lower division portion of the University's liberal education (LE) requirements. MnTC completion must be noted on the official transcript.

Note: Applied science degrees through the College of Continuing Education (CCE) do not follow the Minnesota Transfer Curriculum. For more information, call CCE Student Support Services at 612-624-4000.

Planning to Transfer?

Minnesota's public colleges and universities are working to make transfer easier. Students can help if they plan ahead, ask questions, and use pathways created by transfer agreements. The following transfer information is included in catalogs from all Minnesota public colleges and universities.

Preparing for Transfer

If students are currently enrolled in a college or university, they should

- discuss their plans with the campus transfer specialist in the Office of Admissions.
- call or visit their intended transfer college. They should obtain the following materials and information:
 1. college catalog
 2. transfer brochure
 3. information on admissions criteria and on materials required for admission (e.g., portfolio, transcripts, test scores). Note that some majors have limited enrollments or their own special requirements such as a higher grade point average
 4. information on financial aid (how to apply and by what date)

After they have reviewed these materials, they should make an appointment to talk with an adviser/counselor in the college or program they want to enter. Be sure to ask about course transfer and admission criteria.

If they are not currently enrolled in a college or university, they might begin by meeting with a transfer specialist or an admission officer at their intended transfer college to plan the steps they need to take.

Understanding How Transfer of Credit Works

The receiving college or university decides what credits transfer and whether those credits meet its degree requirements. The accreditation of both a sending and a receiving institution can affect the transfer of the credits a student earns.

Institutions accept credits from courses and programs like those they offer. They look for similarity in course goals, content, and level. "Like" transfers to "like."

Not everything that transfers will help a student graduate. Baccalaureate degree programs usually count credits in three categories: general education, major/minor courses and prerequisites, and electives. The key question is, "Will a student's credits fulfill requirements of the degree or program chosen?"

Students who change career goals or majors might not be able to complete all degree requirements within the usual number of graduation credits.

Applying for Transfer Admission

Application for admission is always the first step in transferring. The transfer application and guidelines are available at <http://admissions.tc.umn.edu>.

After the college notifies students that they have been accepted for admission, their transcribed credits will be evaluated for transfer. A written evaluation should tell students which courses transfer and which do not. How students' courses specifically meet degree requirements may not be decided until they arrive for orientation or have chosen a major.

If students have questions about their evaluation, they should call the Office of Admissions and ask to speak with a credit evaluator. Ask why judgments were made about specific courses. Many concerns can be cleared up with an understanding of why decisions were made. Students can appeal if they are not satisfied. See the following "Rights as a Transfer Student."

Rights as a Transfer Student

- A clear, understandable statement of an institution's transfer policy.
- A fair credit review and an explanation of why credits were or were not accepted.
- A copy of the formal appeals process.

Usual appeals steps are:

- Student fills out an appeals form. Supplemental information you provide to reviewers—a syllabus, course description, or reading list—can help.
- Department or committee will review.
- Student receives, in writing, the outcome of the appeal.
- Student can appeal decision to Office of Admissions.
- At a student's request, a review of her or his eligibility for financial aid or scholarships.

For help with transfer questions or problems, students should see their campus transfer specialist.

Residency and Tuition Discounts

Residency—To be eligible to pay Minnesota resident tuition, you must have resided in Minnesota continuously for at least one calendar year before the first day of your first semester of enrollment, and be able to demonstrate that during that year your primary purpose for being in Minnesota was something other than school attendance. You can download a booklet called "Residency, Reciprocity, and Tuition Exemption" at <http://admissions.tc.umn.edu/PDFs/index.html>. This booklet contains our official policy, and no other information replaces that policy.

Reciprocity—If you are a resident of Wisconsin, North Dakota, South Dakota, or Manitoba, you may be eligible for reciprocity, which entitles you to pay a tuition rate equal or comparable to the resident rate.

Midwest Student Exchange Program (MSEP)—If you are a resident of Kansas, Michigan, Missouri, or Nebraska, and you are enrolling in an approved academic program, you may qualify for a tuition discount through the Midwest Student Exchange Program (MSEP). Tuition for eligible students from these states is 150 percent of the Minnesota resident rate. The applications for residency, reciprocity, or MSEP are separate from the application for admission.

For more information about residency and tuition discounts, visit <http://admissions.tc.umn.edu/CostsAid/index.html>.

Registration

Students are responsible for registering for classes before each term. One Stop (<http://onestop.umn.edu>) is the essential resource for registration. It includes complete registration instructions and time limits for making registration changes.

New students receive detailed registration instructions during orientation. Registration opens about five weeks before the start of each term, except fall semester, for which continuing students register during spring semester. Students register according to an alphabetical rotation, which is available online at onestop.umn.edu/registrar/registration/index.html.

Students register via the Web at <http://onestop.umn.edu>; or credit enrollment request form and take it to One Stop Student Services Centers in 200 Fraser Hall, 130 West Bank Skyway, or 130 Coffey Hall.

Students should follow these basic steps before registration:

- Make an appointment with an adviser at least two weeks before registration begins.
- Check for registration holds or the need for adviser approval.
- Check the online Class Schedule at <http://onestop.umn.edu>.
- Consult other resources, including college handbooks, the online course guide, and this catalog.

Tuition and Fees

For current information about tuition and fees, see the tuition and fees Web site at <http://onestop.umn.edu>.

Financial Aid

A good place for students to start planning their college finances is the University's One Stop Student Services Web site at <http://onestop.umn.edu>. It includes links to information about University student accounts, tuition and fees, financial aid eligibility, and the types of aid available—grants, scholarships, work-study employment, student loans—that might be available to help students meet their educational costs.

Cost estimates are based on anticipated state funding for the University and cost of living averages for the Twin Cities metropolitan area. Actual costs will depend on where students live, their transportation, and other lifestyle choices. Estimated cost of attendance charts for each college are available at the Tuition & Billing link.

To apply for financial aid, students are required to complete the Free Application for Federal Student Aid (FAFSA) available at fafsa.ed.gov. A new application cycle begins each year on January 1.

New students who apply before the March 1 priority date may have a better opportunity for funds (including the most desirable type—gift aid) that are often depleted later in the financial aid cycle. Additional scholarship funds from University departments may be available to students, depending on their major and their academic record.

Students must reapply for financial aid each year after January 1. Continuing students are encouraged to apply for financial aid by the priority date of April 1 to have their aid ready by fall term and to improve the possibility that they will receive a higher proportion of gift assistance. They may contact their individual department or college to find out what scholarships are available in particular areas of study.

Post-Secondary Enrollment Options Program (PSEO) participants must declare those transfer credits to ensure that they receive their maximum Minnesota State Grant award.

They should complete the Minnesota State Grant Additional Information Request form available at <http://onestop.umn.edu/onestop/forms.html> or for pickup in a One Stop Student Services center. The form asks students to identify all postsecondary or college credit earned as a high school student and to provide a copy of academic transcripts with the terms highlighted in which they were a PSEO student. The Office of Student Finance will deduct these high school quarters or semesters of attendance from students' accumulated state grant eligibility to ensure students get the maximum award amounts.

Visit, Call, or Write

Financial aid assistance is provided year-round at three campus One Stop Student Services Centers to help students through the financial aid application process. All of the centers provide a range of publications and forms for pickup. Full services are provided at the One Stop Student Services Center located in 200 Fraser Hall, Minneapolis East Bank campus. General office hours are 8:00 a.m. to 5:30 p.m., Monday through Thursday, and 8:00 a.m. to 4:00 p.m., Friday. Financial aid counseling is available by phone at 612-624-1111 (8:00 a.m. to 4:00 p.m., Monday through Friday), 1-800-400-8636 toll-free outside the Twin Cities metropolitan area, or TTY (text telephone for hearing impaired only) 612-626-0701. Students may also see counselors in person on a walk-in basis or by appointment to discuss their concerns, have their questions answered, to review their applications or other forms for completeness, and to obtain any additional forms or application materials that may be needed. In addition, a self-service computer area allows students to conduct online scholarship searches, complete an online FAFSA application, or review their student accounts. Students may also go to the One Stop Student Services Center in 130 Coffey Hall, 1420 Eckles Avenue, St. Paul campus, 8 a.m. to 4 p.m., Monday–Friday; or in 130 West Bank Skyway, West Bank campus, 8 a.m. to 5 p.m., Monday–Tuesday (on days when classes are in session); 8 a.m. to 4 p.m., Monday–Tuesday (on days when classes are not in session and May/summer term); 8 a.m. to 4 p.m., Wednesday–Friday.

The University Job Center posts many jobs on and off campus (between 6,000 and 7,000 on campus), and offers a job guarantee program for 500 first-year students.

Fax: 612-624-9584
E-mail: helpingu@umn.edu
Web site: <http://onestop.umn.edu>
Student Accounts Receivable: 612-624-1111

For FAFSA questions, students may call 1-800-433-3243 or 1-800-801-0576 (TTY for hearing impaired only) or connect to FAFSA on the Web at www.fafsa.ed.gov and select the “Check My Submitted FAFSA” tab. Customer service is also available live, online, by selecting the “Live Help” link at the top of the Web page. The center can help students through the application process by:

- explaining comments on the Student Aid Report (SAR) and how to make corrections to erroneous or inconsistent information.
- answering technical questions regarding the PIN (personal identification number).
- assisting a student in navigating through the FAFSA Web site.
- confirming application or correction processing and issuing a duplicate SAR.
- identifying the holder of any currently held student loans.

Student Services and Activities

For the most complete listing of resources and student services on the Twin Cities campus, students should refer to the *Gopher Guide*. A good Web site for exploring Twin Cities campus life is <http://onestop.umn.edu/Events>. Highlights of some services and activities are presented below, followed by a directory of resources and services. Check the college and program sections of this catalog for college-specific services.

Boynton Health Service—All University students, staff, faculty, alumni, retirees, and their dependents are eligible to use Boynton Health Service on a fee-for-service basis. Students who pay the student services fee or the extended coverage fee and have any form of hospitalization insurance are eligible to receive most services at Boynton at no additional charge and others at reduced cost. Boynton can address most non-hospital medical needs, including physician, dentist, or mental health counselor visits; eye examinations; lab tests and x-rays; and prescriptions. For more information, call 612-625-8400 or visit www.bhs.umn.edu. Boynton clinics are located at 410 Church Street S.E. on the Minneapolis campus and at 109 Coffey Hall on the St. Paul campus.

Housing & Residential Life—The University has 11 housing facilities on campus serving about 6,300 individual students: eight residence halls (six on the East Bank, one on the West Bank, and one on the St. Paul campus) and three apartment-style complexes (all three on the East Bank). The Housing & Residential Life office (in Comstock Hall-East, 612-624-2994 or housing@umn.edu) also has information about family/partnered housing and off-campus housing. For housing information on the Web, go to www.housing.umn.edu.

Intercollegiate Athletics—Several men’s and women’s sports are offered. For more information, visit www.gophersports.com or call 612-625-4838 for men’s programs or 612-624-8000 for women’s programs.

Job Center—A variety of on-campus job opportunities are available to students through the Job Center (612-625-2000). Some jobs require little or no experience or training; others require considerable expertise and training. Typical pay for students in these positions ranges between \$6.50 and \$10.00 per hour. Students can view job opportunities on the Web www.umn.edu/ohr/employment/student/index.html and contact employers directly. Work-Study positions are available. Job Center staff are available to advise students as they search for jobs.

Recreational Sports—The University offers recreational sports programs and facilities to improve the quality of life for students, staff, and faculty. The Sport Clubs Program offers 26 clubs in a

wide variety of competitive and instructional sport activities. The Intramural Program offers nearly 500 leagues and tournaments in 15 sports. The University Recreation Center and the St. Paul Gym offer fitness centers, swimming pools, gyms for basketball and volleyball, running tracks, and courts for racquetball, handball, and squash. For information, visit the Web site at www.recsports.umn.edu or call 612-626-9222 (Minneapolis campus) or 612-625-8283 (St. Paul campus).

Student Activities Office—The Student Activities Office, Coffman Memorial Union, Room 126, (612-626-6919), offers various programming initiatives and learning opportunities, including the events calendar Web site <http://events.tc.umn.edu>, leadership development programs, and support for student groups. For a complete listing of registered student groups, see the *Gopher Guide* or visit the Web site at www.sao.umn.edu.

Student Unions—The student unions—St. Paul Student Center and Coffman Memorial Union and its West Bank services—offer lounge and study spaces, dining services, convenience stores, meeting/conference space, game rooms, non-credit art courses, copy centers, postal stations, ATMs, e-mail kiosks, and bookstores. The student unions also sponsor numerous events and activities for the campus community, including films, lectures, concerts, art exhibits, outdoor adventures, and Spring Jam.

Coffman Memorial Union houses the University’s new, central 40,000 square-foot bookstore, 24-hour computer lab, 400-seat multi-purpose theater, food court, campus security escort station, study lounges, student organization office space, convenience store, post office, a bank, and other services and facilities for students on the Minneapolis campus.

For student union information, call the St. Paul Student Center at 612-625-9794 or visit www.spsc.umn.edu; call 612-624-INFO or visit www.coffman.umn.edu for more information about Coffman Memorial Union and its West Bank services.

Policies

The University of Minnesota has many policies pertaining to academic work and student life on campus. Students are responsible for complying with these policies. The following is a guide to policies that are relevant to undergraduates; it is not a compilation of all policies or their word-for-word presentation.

Many University policies can be found online at www.fpd.finop.umn.edu. If students have questions about these and other requirements, they should check with their advisers or college or department offices.

Absences

Students are expected to attend all meetings of their courses. They may be excused from class, however, to participate in religious observances. Students are responsible for notifying instructors at the beginning of the term about such planned absences.

Students must attend the first class meeting of every course in which they are registered, unless they obtain approval before the first meeting. Otherwise, they may lose their place in class to another student. For more information, see <http://onestop.umn.edu>.

See also **Leave of Absence**.

Academic Integrity

Students, faculty, and staff are expected to uphold the highest standards of academic integrity. The Office for Student Academic Integrity (OSAI) is a central resource that promotes scholastic responsibility and skill on the part of individual students; aids faculty and instructional staff in providing a positive learning environment through the prevention and detection of cheating; and serves as a centralized forum for the fair and even-handed resolution of reported cases of student scholastic dishonesty. For more information, see the OSAI Web site www.osai.umn.edu or call 612-624-6073.

See also **Conduct Code** and **Grievance**.

Academic Progress

All colleges and programs require students to make satisfactory academic progress toward their degree. The U.S. Department of Education and the state of Minnesota also require the University to verify that students receiving federal or state financial aid maintain satisfactory progress.

Students' progress is monitored each term and annually by the college of enrollment. Term monitoring is based solely on GPA. The annual review may also include *coefficient of completion* in conjunction with GPA. The coefficient of completion is defined as credits graded A, B, C, or S divided by credits graded A, B, C, S, D, F, N, or I. Plus or minus modifiers are not included in determining coefficient of completion.

See also **Probation**.

Academic Progress Audit System (APAS)

Each student has an individualized APAS that compares past and current coursework with the requirements for the student's academic program. Advisers can help students understand the various sections of the report and plan a course of study to satisfy degree requirements. Copies are available in One Stop Student Services Centers located in 200 Fraser Hall, 130 West Bank Skyway, or 130 Coffey Hall or online at <http://onestop.umn.edu>.

Access to Educational Records

In accordance with regents' policy on access to student records, information about a student generally may not be released to a third party without the student's permission. (Exceptions under the law include state and federal educational and financial aid institutions.)

Some student information—name, address, electronic (e-mail) address, telephone number, dates of enrollment and enrollment status (full time, part time, not enrolled, withdrawn and date of withdrawal), college and class, major, adviser, academic awards and honors received, and degrees earned—is considered public or directory information. Students may prevent the release of public information. To do so, they must notify the records office on their campus.

Students have the right to review their educational records and to challenge the contents of those records. The regents policy is available for review online at <http://onestop.umn.edu>, at 200 Fraser Hall, Minneapolis, and at records offices on other campuses of the University. Questions may be directed to the One Stop Student Services Center, 200 Fraser Hall (612-624-1111).

Students are responsible for updating their personal information, which can be done online at <http://onestop.umn.edu>.

Advising

Academic advising is a crucial component of the University's educational mission. Although the approach to advising varies among colleges and departments, these general principles apply:

- Academic advising is available to all students.
- Students are encouraged to see their adviser before registration each term.
- Academic advising addresses students' needs in coursework, program planning, career options, and development issues.
- Faculty, professional advisers, graduate students, and peers are involved in academic advising.

Students should expect academic advisers to assist them in designing and implementing a program of study and related activities that will allow them to achieve their educational goals. Advisers expect students to prepare for program planning sessions by giving careful thought to possible course selections, program schedules, and short- and long-term education and career goals, and to come to appointments with pertinent academic records and materials. (See Advising in the General Information section of this catalog.)

Auditing

Students auditing a course pay full tuition, but do not take exams, do homework, or receive credit. A student may take a previously audited course for credit.

Change of College

Students who wish to transfer from one college of the University to another must submit a completed *Application for Undergraduate Change of College* to the One Stop Student Services Center (200 Fraser Hall, 130 West Bank Skyway, or 130 Coffey Hall). Deadlines are available at <http://onestop.umn.edu>. College offices can provide information on admission requirements.

Change of Registration

Details about adding and canceling courses, changing grading options, or making other post-registration changes are available at <http://onestop.umn.edu>.

Class Standing

A student's class standing is determined by the number of semester credits completed: freshman, 1-30 credits; sophomore, 31-60 credits; junior, 61-90 credits; senior, 91 or more credits.

Conduct Code

Students are responsible for complying with the University's Student Conduct Code, which is available in college student affairs offices and Student Judicial Affairs, 612-624-6073. The code is published regularly and also available on the Web at www.sja.umn.edu. See also **Academic Integrity** and **Grievance**.

Course Numbering

Courses have four-digit numbers. The first number designates the course level.

0xxx	Courses that do not carry credit toward any University degree.
1xxx	Courses primarily for undergraduate students in their first year of study.
2xxx	Courses primarily for undergraduate students in their second year of study.
3xxx	Courses primarily for undergraduate students in their third year of study.
4xxx	Courses primarily for undergraduate students in their fourth year of study; graduate students may enroll in such courses for degree credit. 4xxx courses can be counted for a Graduate School degree if the course is taught by a member of the graduate faculty or an individual appointed to Limited Teaching Status (LTS).
5xxx	Courses primarily for graduate students; undergraduate students in their third or fourth year may enroll in such courses.
6xxx	Courses for postbaccalaureate students in professional degree programs.
7xxx	Courses for postbaccalaureate students in professional degree programs. 6xxx and 7xxx courses are to be used primarily for postbaccalaureate professional programs that are not offered through the Graduate School.
8xxx	Courses for graduate students.
9xxx	Courses for graduate students.

Credit by Examination

The University offers proficiency examinations and special examinations for credit at the discretion of academic departments. Likewise, the University recognizes and awards credits based on examinations that are taken as part of the Advanced Placement Program, the International Baccalaureate Program, and the College Level Examination Program. (See Transfer Admission in the General Information section of this catalog.)

Credit Limits

No student may enroll for more than 20 credits per semester without college approval. Some colleges or programs may set a minimum credit limit. For more information, students should check with their adviser.

Credit Load

Undergraduates must complete at least 15 credits per semester to graduate within four years.

13-Credit Requirement—All degree-seeking students are required to register for at least 13 credits each semester. To apply for part-time status, or to take fewer credits temporarily, students must petition their college. More information can be found at <http://onestop.umn.edu>.

The course registration queue gives priority to students whose immediately previous registration was “full-time” (i.e., for at least 13 credits). Under the queue, full-time seniors register first, followed by part-time seniors, full-time juniors, part-time juniors, full-time sophomores, etc. More information about the queue can be found at <http://onestop.umn.edu>.

Dean's List

Each semester, all colleges and programs publish a dean's list, which includes students who achieve a 3.666 GPA or higher and who complete at least 12 credits on the A-F grading system. This achievement is noted on students' transcripts.

Declaring a Major

Students in freshman-admitting colleges may have an *undeclared* major for a limited time. Colleges and programs have different procedures for students to declare a major, but all students must declare a major or be accepted into a program before or upon completing 60 semester credits. Undeclared students with 60 or more credits will have a registration hold and will not be allowed to register without first meeting with their adviser and gaining college approval.

Diplomas

Diplomas are issued at the end of each term to students graduating with a bachelor's degree. Diplomas are mailed approximately two to three months after graduation. Duplicate diplomas may be ordered for \$15 per copy. For more information, see <http://onestop.umn.edu> or call One Stop Student Services at 612-624-1111.

Discretionary Course Cancellation or Withdrawal

Students are allowed to withdraw from a course after the eighth week of class and at any time up to and including the last day of class for that course, without college approval, **once** during their undergraduate enrollment. A “W” is recorded on the student's transcript. Check with your college office for withdrawal procedures. Complete grading policies are online at www.umn.edu/usenate/usen/policies.html.

E-Mail

E-mail is the University's official means of communication with students. Students are responsible for all information sent via their University e-mail account. Students who forward their University e-mail account are still responsible for all the information, including attachments, sent to the account.

Equal Opportunity

The University of Minnesota is committed to the policy that all persons shall have equal access to its programs, facilities, and employment without regard to race, color, creed, religion, national origin, sex, age, marital status, disability, public assistance status, veteran status, or sexual orientation.

Inquiries regarding compliance may be directed to the Director, Office of Equal Opportunity and Affirmative Action, University of Minnesota, 419 Morrill Hall, 100 Church Street S.E., Minneapolis, MN 55455, 612-624-9547, eoaa@umn.edu. Web site: www.eoaffact.umn.edu.

This publication/material is available in alternative formats upon request. Please contact (name, department, address, phone number).

Extracurricular Events

No extracurricular events requiring student participation may be scheduled from the beginning of study day to the end of finals week. Exceptions to this policy may be granted by the Senate Committee on Educational Policy. The Senate advises all faculty that students who are unable to complete course requirements because of approved events during finals week will be provided an alternative and timely opportunity to do so.

Final Exams

Detailed information each term about final exam schedules and policies can be found at <http://onestop.umn.edu>.

Four-year Graduation Plan

The Four-year Graduation Plan offers a structured program for incoming freshmen to graduate in four years. A complete set of eligibility rules and eligible majors is listed in the information packet sent to all new freshmen and is online at <http://academic.umn.edu/fouryear>.

Students on the plan must meet the eligibility requirements when they enter the University and must plan their program with the assistance of their adviser. Checkpoint course guides have been set up for degree programs on the Four-year Graduation Plan to help students stay on track. The checkpoint course guides are available online at <http://academic.umn.edu/fouryear> to help students plan their degree program.

If a student cannot get into a required course, he or she must notify an adviser within two days of the assigned registration date by filing a *Notification of Unavailable Course*. If a required course is unavailable, the University will arrange for additional course seats, substitute another course, give priority registration during the next registration period, or waive the requirement, at the University's option. If the University's inability to provide a required course causes a student to graduate beyond four years, the University will cover the tuition cost of the additional required courses. For more information, see page 13 in the General Information section or call 612-625-2525.

Full-time Student Status

To graduate in four years, students must complete at least 15 credits each semester. State financial aid also defines full-time status as 15 credits. Maximum need-based federal financial aid is available to students who enroll for 12 credits, but note that students cannot graduate in four years by taking only 12 credits a semester.

See also **Credit Load**.

Grading and Transcripts

The complete University Senate grading policy can be found online at www.umn.edu/usenate/usen/policies.html. More information about transcripts can be found online at <http://onestop.umn.edu>.

1. The policy has been in effect since fall 1997 for the Crookston, Morris, and Twin Cities campuses, replacing all previous grading policies. It may not be applied retroactively to any grades or symbols awarded before that time.
2. The University has two grading systems, A-B-C-D-F (with pluses and minuses) and S-N. Students may receive grades only from the grading system under which they have registered for a course.

Each campus, college, and department determines to what extent and under what conditions each grading system is used, may specify what courses or proportion of courses must be on one system or the other, and may limit a course to either system.

Grading Policy

- A 4.000 ...Represents achievement that is outstanding relative to the level necessary to meet course requirements.
- A- 3.667
- B+ 3.333
- B 3.000 ...Represents achievement that is significantly above the level necessary to meet course requirements.
- B- 2.667
- C+ 2.333
- C 2.000 ...Represents achievement that meets the course requirements in every respect.
- C- 1.667
- D+ 1.333
- D 1.000 ...Represents achievement that is worthy of credit even though it fails fully to meet the course requirements.
- S.....Represents achievement that is satisfactory (equivalent to a C- or higher and meets or exceeds course requirements in every respect). The S does not carry grade points and is not included in GPA calculations, but the credits count toward the student's degree program if allowed by the department.
- F or N.....Represents failure or no credit and indicates that coursework was completed but at an achievement level unworthy of credit, or was not completed and there was no agreement between the instructor and student that the student would be awarded an I. Academic dishonesty is grounds for an F or N for the course. The F carries 0.00 grade points and is included in GPA calculations; the N does not carry grade points and is not included in GPA calculations.
- I.....Incomplete, a temporary grade that indicates coursework has not been completed.
- The instructor assigns an I when, due to *extraordinary* circumstances, a student is prevented from completing coursework on time. An I requires a written agreement between the instructor and student specifying the time and manner in which the student will complete the course requirements during the student's next term of enrollment.
- For undergraduates and non-degree seeking students, work to make up an I must be submitted within one year of the final examination; if not submitted by that time, the I will automatically change to an F (if A-F registration) or N (if S-N registration).
- The instructor is expected to turn in the new grade within four weeks of the date work is submitted.
- When an I is changed to another symbol, the I is removed from the record. Once an I has become an F or N, it may be converted to any other grade by petition of the instructor (or department if the instructor is unavailable).
- K.....Indicates the course is still in progress and a grade cannot be assigned at the present time.
- NG.....No grade required.
- T.....Transfer credit or test credit.
- V.....Visitor, indicates registration as an auditor or visitor; does not carry credit or grade points.
- W.....Withdrawal, indicates a student has officially withdrawn from a course. If a student withdraws from a course during the first two weeks of classes, that course registration is not recorded on the student's transcript. The W is recorded if the student withdraws from the course during the third through sixth week of class (second or third weeks of summer terms). Withdrawal in the seventh or later week of classes (fourth or later in summer terms) requires college approval.
- Each student may, once during his or her under-graduate enrollment, withdraw from a course without college approval, and receive a W, at any time up to and including the last day of class for that course.
- X.....Indicates a student may continue in a sequence course in which a grade cannot be determined until the full sequence of courses is completed. The instructor submits a grade for each X when the student completes the sequence.

3. When both grading systems are available, students must choose one when registering for a course. For more information, go to <http://onestop.umn.edu>.
4. Instructors must clearly define for a class, at one of its earliest meetings, the performance necessary to earn each grade or symbol.
5. No student may receive a bachelor's degree unless at least 75 percent of the degree-qualifying residence credits carry grades of A, B, C, or D (with or without pluses or minuses). Each campus, college, and department may choose not to accept academic work receiving a D (with or without a plus or minus).
6. The University's official transcript, the chronological record of the student's enrollment and academic performance, is released by the University only at the student's request or in accord with state or federal statutes; mailed copies have the University's official seal printed on them. Students may obtain an unofficial transcript at <http://onestop.umn.edu>.
7. The University calculates a grade point average (GPA) for each student, both at the end of each grading period and cumulatively. GPA is calculated as the ratio of grade points earned divided by the number of credits earned with grades of A-F (including pluses and minuses). Transcripts report the periodic and cumulative GPA for each term.
8. A student may repeat a course once. Both grades for the course appear on the transcript, but the course credits may not be counted more than once toward degree and program requirements. Only the last enrollment for the course counts in the student's grade point average.
9. Students may petition the college scholastic committee or other appropriate body about this policy up to one calendar year after the grade was assigned.
10. The grades on page 29 (with grade points as indicated) and symbols are used on transcripts.

Graduation, Applying for

In general, Twin Cities campus undergraduate degree applications are due by the end of the second week of the semester of graduation. For more information, go to <http://onestop.umn.edu>.

Graduation Requirements

Colleges and programs specify degree requirements, but the following graduation requirements apply to all undergraduates:

- Students must earn at least 120 credits to graduate.
- Students who are admitted to a degree program and who complete all campus, college, and program requirements with a minimum GPA of 2.00 in the major and a cumulative GPA of 2.00 or higher in all University coursework will be cleared to graduate.
- All degree programs require a C- or better in each course in the major.
- At least 30 semester credits must be awarded by the campus from which a student seeks to graduate. At least 15 of the last 30 credits must be awarded by the campus from which a student seeks to graduate. Half of a student's upper division work must be completed on the campus from which the student seeks to graduate.
- No more than 6 semester credits from physical education, study skills, or applied music (in any combination) will count toward a student's degree, unless additional credits are a required part of a student's program requirements; i.e., no more than 6 credits total from these areas will count toward the degree.

Any course that carries University credit in one department or college will carry University credit in all other University departments or colleges, at least as an elective, including all transfer coursework that is accepted when a student is admitted. Some courses that carry University credit may not count toward college or department/program degree requirements, or may, if a student changes programs, exceed the limit of 6 credits from the areas identified in the preceding paragraph and thus not count toward the degree.

Graduation With Distinction or With Honors

Some colleges offer degrees with distinction and with honors. Students should check with an adviser to determine if their college offers either or both of these degree awards. To qualify for either, a student must have completed 60 or more semester credits at the University. Only University coursework is considered in determining GPA for distinction or honors. For details on honors programs, check the college and program sections of this catalog.

To graduate *with distinction*, a student must have a cumulative GPA of 3.750 or higher at graduation. To graduate *with high distinction*, a student must have a cumulative GPA of 3.900 or higher.

To graduate *with honors*, students must participate in a fully developed honors program in their college or program, complete a designated amount of coursework, achieve a stipulated GPA, and achieve a definite standard of excellence in scholarship with specific evidence of ability to accomplish independent or original work. Further, the minimum GPA in upper division (i.e., the last 60 graded semester credits) required for achievement of a degree *cum laude* is 3.500; *magna cum laude* is 3.666; *summa cum laude* is 3.750. Details on graduating with honors are available from college honors programs.

Grievance

Academic grievances are complaints brought by students regarding the University's provision of education and academic services affecting their role as students. A step-by-step process, moving from informal to formal resolution is described in the Student Academic Grievance Policy www.umn.edu/usenate/policies/stugrieve.html. Students should also check with the Student Conflict Resolution Center Web site at www.umn.edu/sos or call 612-625-5900 for assistance.

Grievances by student employees or other employees of the University are handled through the Office for Conflict Resolution, 662 Heller Hall (612-624-1030).

Matters arising from student misconduct or actions taken under the Student Conduct Code are the responsibility of Student Judicial Affairs (612-624-6073). Student Judicial Affairs provides a forum for resolution of such issues within the services of its own office and through consultation and advisement of colleges, individuals, and administrative units within the University. Whenever possible, conduct complaints are handled on an informal, person-to-person basis with emphasis on educational development.

Complaints alleging discrimination in the University/student relationship, including student complaints alleging sexual harassment by University staff or faculty, are handled by the Office of Equal Opportunity and Affirmative Action, 419 Morrill Hall (612-624-9547).

Holds

A hold may be imposed for financial indebtedness to the University (e.g., for unpaid tuition or library fines, or delinquent health service payments) or for disciplinary or scholastic reasons. Students who have holds on their records may not register or, in many cases, obtain transcripts until the holds are cleared with the office imposing the holds.

Students are usually notified of an existing or impending hold by the department or office authorizing the hold. Notice of any hold, including the name of the department or office where it may be cleared, is available online at <http://onestop.umn.edu> or from One Stop Student Services at 612-624-1111.

Honors

Many undergraduate colleges offer honors programs. See Admissions in the General Information section and the college sections of this catalog for more information.

See also **Graduation With Distinction or With Honors**.

Hospitalization Insurance

Students taking 6 or more credits, or those who purchase an extended coverage benefits plan through Boynton Health Service, are required to carry hospitalization insurance. Students who enroll for 6 or more credits and do not have hospitalization insurance will automatically be enrolled in a University-sponsored plan when they register. Students who already have insurance through their parents, employer, or spouse will need to provide documentation of coverage during registration to avoid being charged for the University-sponsored plan. For more information, see the Boynton Health Service Web site at www.bhs.umn.edu or call 612-624-0627.

Immunization

Students born after 1956 who take more than one University class are required under Minnesota law to submit an *Immunization Record*.

The form, which is sent along with the official University admission letter, must be filled out and returned to Boynton Health Service within 45 days of the first term of enrollment in order for students to continue registering for classes.

Incompletes

See **Grading and Transcripts**.

Leave of Absence

Students who plan to leave school for one or more semesters must request a leave of absence from their college office. The form is available online at <http://onestop.umn.edu>. Students who follow the policy and whose leave is approved need not apply for readmission when they return. Colleges may condition readmission on availability of space in a program provided that they caution students that readmission will be so conditioned. Colleges must inform students who request a leave whether they will be held to old or new program requirements upon their return. If a leave is for more than two academic years, the student must follow new program requirements.

See also **Readmission**.

Liberal Education Requirements

Each semester, the online *Class Schedule* publishes the requirements and lists courses that count toward the liberal education requirements at <http://onestop.umn.edu>. The *Class Schedule* also lists which courses are offered for a particular semester and which are tentatively scheduled for subsequent terms during the academic year. A link to the online *Class Schedule* is available at <http://onestop.umn.edu>.

A liberal education introduces students to the modes of inquiry and subject matter of the major branches of knowledge, including the factual information and theoretical or artistic constructs that form their foundations; the “ways of knowing” (i.e., the kinds of questions asked and ways in which insight, knowledge, and data are acquired and used); the changes over time of their central ideas or expressive forms; and the interrelationships among them and human society in general.

To these ends, study by all undergraduate students on the Twin Cities campus is guided by a common framework.

The Diversified Core Requirements

Physical and Biological Sciences—a minimum of two courses totaling at least 8 credits, including one course in physical science with a laboratory or field experience, and one course in biological science with a laboratory or field experience.

Social Science and Humanities—a minimum of 15 credits distributed as follows:

Social Science—at least 6 credits.

Humanities—at least 6 credits, including one course in literature and one course in “other humanities.” (The “other humanities” category includes courses in philosophy, visual or performing arts, and other humanities or arts.)

Historical Perspective—at least 3 credits.

Mathematical Thinking—one course of at least 3 credits.

The Designated Themes of Liberal Education

The designated themes of liberal education offer a dimension to liberal learning that complements the diversified core curriculum. Each of the themes focuses on an issue of compelling importance to the nation and the world, the understanding of which is informed by many disciplines and interdisciplinary fields of knowledge.

The list of courses that can be used to satisfy liberal education requirements changes often. For the most up-to-date information, check One Stop at <http://onestop.umn.edu>.

Requirement: A minimum of one course of at least 3 credits in each of the following:

- Environment
- Cultural diversity
- International perspectives
- Citizenship and public ethics

Some diversified core courses also meet one theme requirement. Other courses may satisfy two theme requirements. Students who have completed the required coursework in the diversified core or designated theme areas but are missing one credit in either may apply for a one-credit waiver. More information is available at <http://onestop.umn.edu>.

Writing Requirement

One or two first-year writing courses are required, depending on the student’s college of enrollment. Four writing intensive courses are required. Two of the courses must be upper division courses, one of which should be taken in the student’s major.

Minnesota Transfer Curriculum

If students complete the Minnesota Transfer Curriculum (MTC) at any participating Minnesota college or university, they fulfill the University’s Twin Cities campus liberal education requirements. Students completing the MTC will have completed the first-year writing requirement. The writing intensive requirement is separate from the MTC; however, transfer courses might count as writing intensive.

For more information on using transfer credits for the liberal education requirements, contact the Office of Admissions (612-625-2008). College advising offices also have information about these requirements.

Prerequisites

Students should take only those courses for which they have satisfied all prerequisites. Instructors may require students to withdraw from a course if they have not met prerequisites. Instructors may, however, grant permission for a student to take a course without having satisfied prerequisites.

Probation

All colleges and programs shall use the following probationary system. A student will be placed on probation (and will remain on probation) if either the term or the cumulative GPA is below 2.00. A student on probation will have a hold placed on his or her record and must see an adviser in order to register. A student is suspended if a) at the end of the probation term (semester), both the term and the cumulative GPA are below 2.00, or b) the conditions of an academic contract are not fulfilled. A suspension is effective on the first day of the next fall or spring term.

Colleges may also require students on probation to complete a contract for academic performance developed by the college of enrollment. Students will be given an override for the probation hold to enable them to register when they have met with an adviser and, if a contract is required, when the student's academic adviser and college office are satisfied that the conditions of the contract have been met. The academic contract may include GPA expectations more rigorous than the 2.00 term and cumulative GPA minimum standard, where programmatically warranted and where clearly communicated to the student. If the student meets the conditions of the contract, and the term and cumulative GPA are at least 2.00, the student will be removed from probation. If the contract conditions are met but the cumulative GPA is still less than 2.00, the student will remain on probation. If the conditions are not met, the student will be suspended.

When suspended, a student is no longer in the program and cannot register for University courses for at least one full academic year. All colleges at the University recognize the probationary holds and do not allow students, including non-degree seeking, with these holds to register without the approval of the college placing the hold. Students may appeal suspension decisions or petition for re-admission in writing to the college's Student Scholastic Standing Committee (SSSC) according to a defined collegiate petition process. Re-admission after a period of suspension is not automatic. To be re-admitted, a student must show evidence of changes in circumstances that demonstrate that the student will succeed in an academic program.

Upon return to the college after petitioning to reenter, students will be placed on probation, and all colleges shall use a probation hold and contract for the purpose of monitoring the student's performance. If the student does not successfully complete the contract, he or she shall be suspended again, but then shall be required to reapply for admission, rather than petition to reenter.

Readmission

Undergraduates who have not been granted a leave of absence and who do not register for one semester, excluding summer, will be placed on *inactive* status. To regain *active* status, students must contact their college office for approval. Students in good academic standing at the time they became inactive are routinely allowed to return to active status if there is space in the program.

Students who have left the University without a leave of absence for more than one semester (not including summer session) will be held to new program requirements upon their return. Students returning after only one year out or less will be allowed to follow the program requirements in effect when they were last enrolled. Exceptions may be made only for students who are returning after a formal leave of absence.

Repetition of Courses

See **Grading and Transcripts**.

Residence Requirements for Graduation

See **Graduation Requirements**.

Retention of Student Records

College-specific student records are kept for seven years following a student's last registration. For more information, see <http://recmgmt.finop.umn.edu/retention.htm>.

Smoke-free Campus

Smoking is prohibited in all facilities of the University of Minnesota, Twin Cities campus except for designated private residence hall rooms.

Student Responsibilities

Students are responsible for complying with policies in this catalog and other policies of the University. Advisers and staff are available to provide guidance, but students are responsible for their choices, including selecting courses that fulfill requirements for their academic programs.

Student Right-to-know Act

Under federal law, students may receive information about campus security and about graduation and retention rates at the Twin Cities campus at www.irr.umn.edu/SRTK.

Suspension

See **Probation**.

Transcripts

See **Grading and Transcripts**.

Transfer of Credit/Credit Evaluation

See Admissions in the General Information section of this catalog.

Undeclared Major

See **Declaring a Major**.

Withdrawal From a Course

See **Discretionary Course Cancellation** and <http://onestop.umn.edu>.

Withdrawal From the University

See **Leave of Absence**.

This is the College of Biological Sciences General Information and Degree Programs section of the 2006-2008 Undergraduate Catalog for the University of Minnesota, Twin Cities campus.

General Information

The mission of the College of Biological Sciences (CBS) is to advance knowledge of the mechanisms of life through breakthrough discoveries and prepare today's students to create the biology of tomorrow. To accomplish this mission, the college integrates a strong basic research program with both traditional and innovative classroom teaching and with intensive mentoring of students at all levels.

Admission

Admission to the College of Biological Sciences is competitive. Decisions are based on an overall assessment of each applicant's accomplishments and potential as presented in the application materials. New freshmen are admitted once a year in the fall. Transfer students are admitted at any point in their course of study and can enter either fall or spring semesters. Admission of transfer students is also based on overall assessment of their application and usually requires satisfactory completion of prerequisite coursework and/or a record of past academic success in the sciences. All prospective students are encouraged to visit campus and meet with admissions. For more information, see the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Requirements

Freshman Admission Requirements

For official and up-to-date information about the University's admissions policies, procedures, and deadlines, please see the latest edition of the Undergraduate Application Booklet available from the Office of Admissions or online at <http://admissions.tc.umn.edu>.

Admission requirements for students transferring from within the University of Minnesota:

1. 2.00 or higher grade point average (GPA) and grades of at least C- in the following courses is usually required:
 - a. BIOL 1009 or 1001 or equivalent
 - b. CHEM 1021 or equivalent
 - c. MATH 1271 or 1281 or equivalent
2. Prerequisite courses must usually be completed at the time of application, with the following exception: students with a 3.00 or higher GPA may be admitted with two of the three prerequisite courses completed and the last prerequisite course in progress (courses in progress during summer session are not included). For specific transfer information visit the CBS Web site at www.cbs.umn.edu or call 612-624-9717.

Admission requirements for transfer students from higher education institutions other than the University of Minnesota:

The College of Biological Sciences (CBS) admits qualified transfer students to all of its majors. Admission is competitive and based on an overall assessment of the applicant's academic record and potential for success as presented in the application materials. Completion of science-related courses will be viewed as important evidence of preparation and interest in studying biology.

Primary review factors include cumulative GPA and course grades in science-related courses, such as calculus, chemistry, and biology. Secondary review factors include grade trends,

completion patterns, and biology-related lab or field research experience. High school grades, class rank and ACT or SAT scores may also be factored into the admission decision for students who have completed fewer than 26 transferable credits.

Most successful CBS applicants have completed one semester each of calculus, chemistry, and biology.

Priority consideration is given to students who intend to complete a degree program in CBS. Students who have previously completed bachelors degrees and wish to complete prerequisites for professional or graduate schools should strongly consider completing coursework as non-degree-seeking students through the College of Continuing Education.

Visit the CBS Web site at www.cbs.umn.edu/student-services/transfercredits.html to find specific transfer information and course equivalencies for chemistry, math, and physics, or call 612-624-9717.

Applications to the University of Minnesota, Twin Cities may be requested from the Office of Admissions (612-625-2008) or toll free in the United States (1-800-752-1000).

For more information, contact the Office of Student Services (612-624-9717).

Beginning College in Biological Sciences

If you're about to begin college and think biology may be your area of interest, there are some important questions you need to consider. (If you've already completed one or two years of college work and are thinking of transferring to the University of Minnesota, see Transfer Admission in the General Information section of this catalog.)

How do I know if biology is a good choice for me?

Some students have always had an interest in biology. Others were inspired to learn more about biology by a special teacher or course in high school. Some see biology as a step toward a career in medicine or preserving the environment; others think they may have a strong interest, but want to learn more. If you fall into one of these categories and have a strong high school background in science and math, consider the following questions.

Is biology a good choice right now? Do biology careers look promising for the future?

Thanks to advances such as the sequencing of the human genome and the development of new biotechnologies, biology is playing an increasingly important role in health, agriculture, the environment, the economy, and society in general. New career opportunities are emerging in the biotechnology industry, government, and education. As a result, there has never been a better time to earn a degree in biology.

The University of Minnesota is a research university. What does this mean for undergraduates?

It means that faculty are engaged in federally sponsored research, which gives undergraduates many opportunities to gain research experience working with faculty in laboratories. It also means that many of your classes will be taught by leading researchers in their fields.

Do all students have the opportunity to be involved in research?

Most CBS students participate in research, choosing from opportunities in basic sciences, medicine, dentistry, pharmacy, veterinary medicine, agriculture, and natural resources. Hands-on experience in a laboratory or in the field is an essential part of the educational experience in CBS. Research experiences help students gain admission to competitive graduate programs, and many employers require candidates to have research or internship experience.

The University has a College of Biological Sciences rather than just a department. What does this mean for students?

As a college, CBS has a much larger faculty, more varied course offerings, and more services for biology students. Services for students include an honors program, research, internships, study abroad opportunities, and career services offered jointly with the Institute of Technology.

What if I'm not sure I want to major in biology? If I choose CBS now, will I have problems if I change my major later?

All undergraduates take general education courses, including biology. It is always possible to change your mind and transfer to another college, but this decision may affect your ability to graduate in four years. If you are undecided and considering several options, liberal education courses can help you explore a variety of interests.

Orientation

Before classes begin, all freshmen and transfer students are required to attend orientation. Orientation acquaints students with the campus and provides information about CBS and the University. Students spend part of the session with an adviser who helps them plan their undergraduate program.

Freshmen attend a two-day program that provides information for a successful beginning at the University. During the first day, students meet other incoming students while attending small group sessions about University of Minnesota programs. Advisers in CBS familiarize students with CBS programs, courses, and opportunities. CBS advisers also help students start planning their class schedule. During the second day, students register for fall semester classes.

Transfer Orientation is a one-day program designed to help students make a smooth transition to the University. During orientation new transfer students meet other CBS students, get acquainted with the Twin Cities campus, plan a schedule of classes, and register online. CBS offers a Web-enhanced orientation with a required online component before students attend the on-campus program.

Undergraduate Programs

Students choose CBS because it has high quality programs offered by professors who are nationally recognized researchers and educators. As students begin planning for a specific career, they should supplement their coursework with research experiences and internships to further develop their skills and prepare for their chosen professions. Students may also explore biology career interests through the biology colloquium, freshman seminars, and the Career Center for Science and Engineering.

The CBS bachelor of science degree program is composed of four essential elements. Each helps prepare students to be leaders in their chosen professions in an increasingly complex and interdisciplinary world.

I. Liberal Education—A liberal education gives students a broad perspective that strengthens judgment and critical thinking skills. Students develop communication skills, an understanding of the ways scientists and others contribute to knowledge, historical and philosophical perspectives on the world, and insights into life and nature provided by literature and the arts.

To help achieve these goals, the University requires all students to distribute a portion of their coursework in areas of study outside of those linked to their specialized interests in their major.

II. Physical Sciences and Mathematics—The biological sciences rely heavily on the tools of mathematics and physical science. Organisms consist of molecules that obey the rules of physics and chemistry; these rules are often described using mathematics. Modern biologists in the field and in the laboratory must be able to use principles of mathematics, chemistry, and physics to understand living organisms at all levels from molecules to ecosystems.

III. Biology Core Curriculum—Specialists will always be important in biology, but today there is a growing need for people whose understanding spans the disciplines of biology. CBS students are introduced to diverse aspects of biology by completing a set of core courses. Some courses introduce students to various kinds of organisms—animals, plants, and microorganisms. Biochemistry introduces students to organic compounds of importance to organisms, enzyme-catalyzed reactions, and metabolic pathways involved in the synthesis or catabolism of macromolecules. Cell biology provides an in-depth analysis of cellular structure and function. Genetics examines mechanisms of heredity, including molecular genetics and population genetics. Ecology, evolution, and behavior introduce students to populations, evolution, and the behavior of animals.

IV. Specialization in the Major—All seven major programs in CBS lead to the bachelor of science degree. Students may major in

- biology
- biochemistry
- ecology, evolution, and behavior
- genetics, cell biology, and development
- microbiology
- neuroscience
- plant biology

All CBS freshmen start as lower division students and choose one of the majors listed above at the end of their first year. During the first year, students take foundation courses in mathematics, chemistry, and general biology essential for success in any of the biological sciences majors. Transfer students declare a specific major when they begin their studies in CBS. During their junior and/or senior years, most students complete a research project in their area of interest by taking Directed Research (4994 and 4794W).

Graduate Programs

Graduate study at the University is coordinated and administered by the Graduate School. For information about general policies regarding admission requirements, registration procedures, financial aid, and requirements for graduate degrees, see the *Graduate School Catalog*. Application materials may be obtained from CBS department offices.

Questions regarding specific bioscience programs should be addressed to the director of graduate studies in the appropriate program area.

Biochemistry, Molecular Biology, and Biophysics—David LaPorte, 612-625-4983, and Claudia Schmidt-Dannert, 612-625-5782

Conservation Biology—Susan M. Galatowitsch, 612-624-3242

Ecology, Evolution, and Behavior—Andrew Simons, 612-624-6292

Genetic Counseling—Bonnie LeRoy, 612-624-7193

Joint Program in Law, Health, and Life Sciences—Susan Wolf, 612-625-3356

Microbial Engineering—Robert J. Brooker, 612-624-3053

Microbiology, Immunology, and Cancer Biology—Yoji Shimizu, 612-626-6849

Molecular, Cellular, Developmental Biology, and Genetics—Margaret Titus, 612-625-8498

Neuroscience—Paul Letourneau, 612-624-5999

Plant Biological Sciences—Carolyn Silflow, 612-624-0729

Water Resources Science—Ray Newman, 612-624-9282

Honors Program

The CBS honors program is designed for highly motivated students who want more challenging courses, closer contact with faculty, an extensive research experience, and a supportive academic community. Students in honors choose from dozens of honors courses and benefit from special co-curricular events and extended library privileges.

Freshman-Sophomore Program—During the first two years, students are strongly encouraged to explore research opportunities and to complete at least two honors courses per year. First-year students participate in early orientation sessions and a Nature of Life honors focus session during the summer. Honors students may choose to live in the CBS Honors Living and Learning Community in Middlebrook Hall.

Students apply to the honors program when they apply to the University by completing the *Application for Scholarships and Honors Programs*. Admission is based on high school grades, coursework, standardized test scores, an essay, extracurricular involvement, evidence of leadership, and a letter of recommendation. Application forms are available in the Office of Admissions and online at <http://admissions.tc.umn.edu/apply/>.

Students who complete the honors program course requirements and achieve a minimum cumulative GPA of 3.50 receive a certificate and a notation on their transcript after the second year. The requirements to complete the freshman-sophomore program include:

1. a freshman seminar during the first year,
2. two honors courses in any subject, and
3. BIOL 2960H, the CBS honors colloquium, during fall semester of the second year.

Junior-Senior Program—The junior-senior honors program focuses on a directed research project, which is presented in a written thesis and at the Undergraduate Research Symposium. Seniors participate in a two-semester sequence of capstone seminars, in which they explore the breadth of biological inquiry and have opportunities to refine their communication skills. Admission to the upper division honors program is based on grades earned during the first two years of college and does not require participation in the freshman-sophomore program. Students with a 3.50 GPA are eligible to apply to upper division honors upon completion of 60 college credits. Participants are encouraged to select a research adviser from University faculty and start on a research project early in their junior year.

Graduation With Honors—To qualify for a degree “with honors” (e.g., *cum laude*), a student must have completed 60 or more semester credits at the University of Minnesota and be enrolled in the upper division honors program for at least two semesters. In addition to the requirements for graduation, candidates for graduation with honors must complete the following:

1. two semesters (6 credits) of directed research, the results of which are reported in an honors thesis, written in the style of a publishable manuscript. The thesis must be approved by the faculty research adviser and by two other faculty (at least one of whom must be from CBS).
2. two semesters of CBS honors seminars (BIOL 3960H), one of which must be completed during the fall semester and the other during the last spring semester in residence.
3. one additional honors research opportunity, which may be selected from
 - a. an additional semester (or 2 credits) of participation in directed research
 - b. an upper division honors course or seminar (3xxx-4xxx)
 - c. a graduate-level course (seniors only; requires permission)
4. achieve a GPA for the last 60 credits of A-F registration of 3.750 for *summa cum laude*, 3.666 for *magna cum laude*, and 3.500 for *cum laude*.
 - a. The last 60 credits include all courses taken in the earliest term included in this calculation.
 - b. If a portion of the last 60 credits has been transferred from another institution, the proportion of residence credits with grades of A must at least equal the proportion of transfer credits with grades of A.

Graduation With Distinction—A student may obtain a degree with both honors and distinction. To qualify for a degree “with distinction,” a student must have completed 60 or more semester credits at the University and have a cumulative GPA of 3.75 or higher. To graduate “with high distinction,” a student must have a cumulative GPA of 3.90 or higher.

For More Information—For information and application materials, please refer to the honors program Web site at <http://www.cbs.umn.edu/student-services/honors>. Students may also inquire about the honors program with a CBS adviser or honors staff member (612-624-9717).

Advising

To help students navigate the University and take advantage of these opportunities, current and prospective students are served by the advising services, resources, and programs provided by CBS Office of Student Services. CBS academic advising helps students develop meaningful educational plans that are compatible with their long-term goals.

First-year students and transfer students are assigned to a professional adviser in CBS Student Services. Students meet with their adviser during fall semester of their first year and spring of their sophomore year to review academic progress, plan course schedules, and learn about additional college and University resources. During their second year of study, CBS students are also assigned to a faculty mentor in their particular area of interest. Professional advisers continue to assist all CBS students with setting goals, selecting courses, developing skills, and interpreting and navigating University rules and policies throughout their academic careers.

In addition to academic advising, the Office of Student Services coordinates undergraduate admission, provides student orientation and registration programs, offers academic progress

review, updates APAS reports, and evaluates student records for degree certification.

Program Planning—Students should meet with their faculty mentor each year to evaluate and plan their academic program. Students consult their faculty mentors regarding courses specific to their major, graduate study, planning internships, or arranging directed research in laboratory and field settings.

Special Learning Opportunities and Resources

Students are encouraged to explore the full scope of learning experiences available at the University, including those beyond the required curriculum. Many students plan projects they carry out under faculty supervision in research laboratories and at environmental field stations. Some students participate in off-campus internships in private industry, government agencies, and nonprofit organizations. Other students seek employment as undergraduate teaching and research assistants or museum tour guides.

Nature of Life—Incoming freshmen are required to take a class at the Itasca Biological Station and Laboratories. At Itasca, students explore some of the major issues in biology, learn about ways of discovery in various fields of biology, and begin to see the interdisciplinary nature of the field. In addition, they get to know each other and many CBS faculty and staff, leaving Itasca with new friends and a better understanding of how to make the most of their CBS experience. Follow-up activities during fall semester continue to build a sense of community and connection among students and faculty.

Biology House—Biology House, located in Frontier Hall, combines residence hall life with social and academic opportunities for students interested in the biological sciences. Activities include social events, lab tours and field trips, study groups, on-site advising, faculty and student research presentations, and career exploration. Space in Biology House is limited to incoming freshmen and PSEO students, and applicants are encouraged to apply early for admission to this community. For more information, visit the Housing and Residential Life Web site at www.housing.umn.edu.

New Student Reception—This annual welcome event helps new students connect with CBS departments, majors, clubs, and research opportunities.

Biology Colloquium (BIOL 1020)—This unique course, organized and run by students, provides an opportunity to explore a variety of fields and careers in the biological sciences. The course offers large group seminars, featuring prominent scientists discussing their research programs, and small group tours to research facilities on and off campus, such as the Raptor Center, the International Wolf Center in Ely, or behind-the-scenes at the Minnesota Zoo.

Freshman Seminars—These discussion-focused small classes are taught by the University's finest faculty. Students explore exciting topics and also learn more about the wide range of services and opportunities available at the University.

The College of Biological Sciences Alumni/Student Mentor Program—This program provides an opportunity for CBS students to connect one-to-one with an alumnus or friend of the college for career exploration, planning, and networking. Mentors advise about career-related issues such as career options, the value of networking and gaining work experience, resume writing, and interviewing skills. Mentors also provide feedback and support to help students succeed in their chosen fields.

Multicultural Affairs—CBS and its constituent programs are committed to providing equal access to educational opportunities while promoting diversity and fostering successful academic experiences. Diversity encompasses many characteristics that are inclusive of economic or educational disadvantage, special talents, leadership qualities, race or ethnicity, disability, sexual orientation, and gender identification.

Achieving College Excellence in the Sciences (ACES)—This structured multicultural honors tutorial program for high-achieving students in mathematics or science whose long-term plans include attending professional or graduate programs in the life sciences. Freshmen in ACES have the opportunity to receive individualized attention from distinguished faculty through a SEAM (Student Excellence in Academics and Multiculturalism) freshman seminar: Success on the Road to Medical School or Graduate Programs in the Science Community. Additionally, graduate student mentors help students earn A's and B's in University mathematics and science courses.

Internships for credit—Students can earn internship credit by registering for BIOL 3610 - Internship: Professional Experience in Biological Science.

Recent internships involved:

- developing plastics from renewable resources at a new biotech company
- assisting with dolphin care and training at a local aquarium
- researching new forensic science techniques in a criminal identification lab
- organizing volunteers for tissue donor programs
- assisting high school biology teachers
- helping develop a groundwater monitoring program
- researching the needs of people with neurological injuries

Undergraduate Research—As part of a large public research university, CBS offers a wealth of opportunities for hands-on research experience. Most students complete an independent research project under the supervision of a faculty member. All students are invited to present their research at the Undergraduate Research Symposium, which is held annually in the spring. Opportunities to get involved in research include volunteer experiences, directed research for academic credit, part-time jobs, and special grants through the Undergraduate Research Opportunities Program. Information about research opportunities and resources for finding a faculty mentor are available at www.cbs.umn.edu/student-services/research.html.

Scholarships—CBS offers a variety of scholarships to new and continuing students based on academic achievement, leadership, research experience, and humanitarian service. Scholarship information, deadlines, and application materials are available at www.cbs.umn.edu/student-services/scholarships.html.

Career Information

Biology encompasses many fields and appeals to students with diverse interests. Career avenues are equally broad, including employment by scientific research and testing laboratories, pharmaceutical and medicine development industries, health-care related organizations, and federal, state, or local government agencies.

According to the Bureau of Labor Statistics, employment of biological scientists is projected to grow over the next ten years and beyond, as biotechnological research and development continue to drive job growth. The outlook for science-related jobs in sales, marketing, and research is also very good.

CBS majors prepare students for careers in many different fields of research. For example, CBS students can participate in research related to health issues such as AIDS, cancer, Alzheimer's disease, obesity, and heart disease. Students assist in the development of bio-based products and methods that help protect and improve the environment. Students learn about new industrial applications of biotechnology and how to improve agricultural products.

Many students study biology to prepare for professional training in the health sciences. Because entry requirements for the health sciences generally include courses similar to those required in CBS (mathematics, chemistry, physics, and biology), a CBS major provides a good foundation in pre-medicine, pre-pharmacy, pre-dentistry, and other health fields. In fact, nearly a third of CBS graduates each year continue their education in health fields including medicine, dentistry, pharmacy, veterinary medicine, and public health.

Some students combine their training in the biological sciences with other fields, such as engineering, graphic arts, law, business, or computer technology. Those graduates who choose to continue their study are regularly admitted to high-quality or highly ranked graduate schools and professional programs.

The Career Center for Science and Engineering provides resources and services for students at all levels to explore career options and prepare for professional success in the multitude of bioscience-related careers available to CBS and IT graduates. The Career Center provides assistance to undergraduates and alumni.

These resources include career advising, job search assistance, workshops on resume writing, professional networking, and interview preparation. The Career Center also provides employer and company information, publicizes current job openings, arranges on-campus interviews, and keeps updated information on salaries, employment outlook, and hiring trends.

More information is available at www.ccse.umn.edu or by calling the Career Center for Science and Engineering at 612-624-4090.

Student Organizations

CBS student groups provide opportunities to learn more about research, careers, and leadership in the sciences. Participation is open to all University students. For more information, visit the Student Activities Office Web site at www.sao.umn.edu or call CBS Student Services at 612-624-9717.

AED—Alpha Epsilon Delta (AED), the pre-med honor society, is for anyone who is considering becoming a physician in the future. Members meet other pre-med students and learn about how to prepare for a career in medicine.

American Medical Student Association (AMSA) Pre-med Chapter—AMSA is a national pre-med student group that helps students connect with others who share their interests in the health sciences and helps prepare them for medical school and the MCAT.

Ambassador Program—Selected students have the opportunity to promote the opportunities available within the college and the University to other students and the community by participating in college-sponsored outreach activities and working with prospective students. This program provides leadership and skills development training.

Biochemistry Club—This club strengthens ties between biochemistry students and faculty, provides personalized career guidance, helps undergraduates identify biochemistry labs for directed research, and keep abreast of advances in biochemistry.

Biology Club—This organization promotes interest in undergraduate study in biology at the University. This club helps biology majors explore their options, the major, and learn about other CBS majors early in their academic careers. Fields of research, career possibilities, and unique educational experiences are also showcased at club meetings.

Biological Sciences Alumni Society (BSAS)—BSAS is a professional association for CBS graduates that fosters relationships among alumni, students, faculty, and the community. Enhancing student opportunities is a top priority of BSAS. Toward that end, BSAS sponsors scholarships, research and internship grants, and a mentor program. Additionally, alumni work with the CBS Career Center to develop the Career Network, an innovative program that enables students and graduates to explore career options. For more information, contact Kristen Denzer, alumni relations coordinator at 612-624-4770 or stop by 123 Snyder Hall.

Headwaters Ecology Club—The Headwaters Ecology Club promotes interest in undergraduate study in ecology, evolution, and animal behavior through social, educational, and volunteer events. An important focus of the Headwaters Ecology Club is to promote the unique educational opportunities available through the Itasca Biological Station and Laboratories, and other national and international field biology programs.

Forensic Science Club—This club organizes events, field trips, information, and guest speakers for members of the University community interested in forensic science.

Genetics, Cell Biology, and Development Club—Students formed this club to bring together students, faculty, and staff interested in these disciplines. Members enjoy speakers, educational experiences, and social activities.

Microbiology Club—This club provides a forum in which students and faculty can meet informally to share common interests in microbiology. Members are officially part of the Student Chapter of the American Society for Microbiology (ASM), which provides information on microbiology lectures, meetings, seminars, and local job listings. Activities include discussions of microbiological issues, social events, and visits to local employers.

Neuroscience Club—The Neuroscience Club promotes interest in undergraduate neuroscience study and research at the University of Minnesota. Club activities include lab tours, study groups, participation in Department of Neuroscience outreach projects—such as Brain Awareness Week—and faculty-student meetings. Club members meet informally every other week; undergraduates interested in neuroscience are encouraged to participate.

Pre-Dental Club—Students learn about preparing to become a dentist, the practice of dentistry, opportunities at the University and the American Student Dental Association, and meet other students with common interests.

Pre-Pharmacy Club—Students learn more about becoming a pharmacist and the practice of pharmacy. They are introduced to opportunities at the University and meet other students who share an interest in pharmacy.

Student Board—The CBS Student Board works collaboratively with the CBS administration, departments, and student organizations, builds community and connections among CBS students, and serves as the official student representation to the CBS Administration.

International Programs

CBS encourages all students to consider an international experience as part of their undergraduate program. Many unique opportunities exist for students to study abroad in the biological sciences. Study abroad can help students gain field experience in different ecosystems, learn international perspectives in biology, develop laboratory research skills in an academic setting, enhance communication and problem-solving skills, and prepare for a career in the ever expanding global market.

Internships, volunteer experiences, and academic programs are available to help students prepare for careers in health care, academic, industry, or the public sector. Students are also encouraged to consider how an experience abroad might enhance language learning or help them make progress toward liberal education or major requirements.

For more information, contact the Learning Abroad Center at 612-626-9000 or visit the Web site at www.UMabroad.umn.edu.

Graduation Requirements

To earn a B.S. degree from CBS, students must meet the following requirements:

- Be admitted to a CBS degree program or major and complete all campus, college and program requirements with a minimum GPA of 2.00 in the major and a cumulative GPA of 2.00 or higher in all University coursework.
- Complete at least 120 credits; grades of C- or better are required in the math, chemistry, physics, or biological sciences courses used to meet requirements for the major.
- S grades are not allowed in major courses unless the course is only offered S-N.
- Have at least 30 semester credits from the University.
- Earn at least 15 of their last 30 credits from courses offered by the University.

Students must apply for graduation by submitting an Application for Degree online. CBS students may apply to clear for graduation after fall, spring, May, or summer session. There is no fee to apply for the degree, and students need to apply for graduation only once and update their application online if graduation is delayed for any reason. Students are strongly encouraged to apply a few semesters in advance of the desired semester of graduation. Procedures and forms for submitting applications for degree can be found at www.onestop.umn.edu/onestop/graduating.html.

Research and Teaching Facilities

CBS has research and teaching facilities on the Minneapolis and St. Paul campuses, and operates two field stations.

Biodale, CBS's one-stop shopping center for research support services, houses \$40 million in bioscience research equipment that is available to faculty, students, and industry scientists. Facilities include the Imaging Center, which provides low-cost printing for research posters. Biodale is located in Snyder Hall on the St. Paul campus.

The Biological Sciences Greenhouse is part of a new complex of plant growth facilities on the St. Paul campus that were completed in 2005. The CBS greenhouse is a teaching and research facility with four landscaped rooms that exhibit the flora of the tropics, subtropics, desert, and aquatic regions.

The Biotechnology Institute (BTI) in Gortner Laboratories on the St. Paul campus brings together faculty and students from CBS, Institute of Technology, and Medical School for interdisciplinary research and training in emerging areas of biotechnology such as biocatalysis, renewable energy and materials, bioremediation of toxic waste, and creation of new biological agents for use in medicine and industry. BTI promotes collaboration between University researchers and industry and trains students for Minnesota's growing biotechnology industry. Visit www.bti.umn.edu.

The Cargill Building for Microbial and Plant Genomics opened in 2003 and provides a hub for researchers from several schools. Faculty conduct basic research in functional genomics of microbes and crop plants to identify innovative ways to make crops more resistant to disease and drought, clean up the environment, and improve human health.

Cedar Creek Natural History Area is a 5,400-acre ecological research site located 30 miles north of the Twin Cities, at the convergence of three large North American biomes: grass prairies, evergreen forests, and deciduous forests. Discovered in 1930, it has been nationally known as an important site for ecology research since the early 1940s. Today, Cedar Creek is a living laboratory for David Tilman, Regents Professor of Ecology, who studies human impact on biodiversity in global ecosystems.

Long-term experiments at Cedar Creek examine three of the most significant human alterations to the biosphere: increased carbon dioxide in the air, increased nitrogen in land and water from fertilizers, and reduced biodiversity. All three factors affect the performance of global ecosystems.

The number of faculty and students who work at Cedar Creek has increased tenfold over the past 20 years. To accommodate this growth, a new 12,000-square-foot Science and Outreach Center is planned. The center will include new labs, classrooms, meeting space and an exhibit area. New housing for students and visiting faculty is also planned.

More information is available at www.lter.umn.edu.

Itasca Biological Station and Laboratories is a CBS field station within Itasca State Park, which is located at the headwaters of the Mississippi. The most visited park in the state, Itasca offers 50 square miles of pristine ecosystems populated with Minnesota's native flora and fauna and a spectacular collection of clear lakes, peat bogs, and old-growth forests.

The complex of 70 rustic buildings at the field station includes cabins, laboratories, a library, dining hall, and offices. In 2005, CBS launched "Habitat for Biologists" a fundraising campaign to restore historic cabins and build new laboratories and other facilities.

Nature of Life, CBS' annual class for incoming freshmen, is held at Itasca every year in July and August. Several graduate programs also offer orientation sessions at Itasca. Field biology classes are offered to students from the University of Minnesota and other schools. See <http://biosci.cbs.umn.edu/itasca> for a description of courses and facilities.

In addition, Itasca is training headquarters for the Science Education Program for Greater Minnesota, which provides programs to recruit and retain science teachers for secondary schools in greater Minnesota. Visit www.cbs.umn.edu/main/resources/ScienceEducation.htm.

Jane Goodall Institute's Center for Primate Studies is the University of Minnesota branch of Jane Goodall's worldwide organization, which is devoted to studying and protecting chimpanzees. Anne Pusey, a former student of Goodall's, is director of the center and of the JGI international research program. The center houses all of Goodall's notebooks and photos from her 38 years of research in Tanzania's Gombe National Park. Visit www.discoverchimpanzees.org.

The Molecular and Cellular Biology Building is a state-of-the-art facility for life sciences research and education shared by the College of Biological Sciences and the Medical School. This building opened in 2002 and has four floors of faculty research laboratories and two floors of biology classrooms and instructional laboratories.

University Enterprise Laboratories (UEL) is a nonprofit entity that provides lab space for biotech start-up companies. Located in the heart of the St. Paul Bioscience Zone, UEL celebrated its grand opening in October 2005. Sponsors include Xcel Energy, 3M, Allina, Medtronic, Boston Scientific, Dorsey & Whitney, Ecolab, Guidant Corporation, and Surmodics. Visit www.uelmn.org.

Degree Programs and Minors

Biochemistry B.S.

Biochemistry, Molecular Biology, and Biophysics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120

Required credits within the major: 70

This program requires summer terms

Degree: Bachelor of Science

Biochemists study molecules found in living organisms, particularly proteins, nucleic acids, lipids, and carbohydrates. Biochemistry majors focus their studies on the biosynthesis, metabolism, function, and regulation of these molecules of life. This information is essential to gain an understanding of many biological processes, including how diseases like cancer and diabetes develop, and to learn how genetic engineering and biotechnology can be used in ways that benefit society.

Earning a B.S. in biochemistry prepares majors for graduate study in biochemistry or other biological sciences; professional training programs in the health sciences; careers in teaching; and entry-level positions in industry, agencies, and universities.

Biochemistry is an experimental science, and majors, especially those planning to pursue graduate studies in the field, should become acquainted with laboratory research approaches beyond those in the formal lab courses. Research options are available through BIOC 4994 or BIOC 4794W. Students should consult early with their faculty mentor to begin planning the research component of their major.

Program Requirements

Introductory Biology

Choose either Sequence A or Sequence B to fulfill the General and Organismal Biology requirement. Sequence A is preferred. If Sequence A is chosen, take one organismal course or course pair. Sequence B has two options for completing the requirements.

Students are required to complete one of the following course groups.

Sequence A (Preferred)

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)

-OR-

Sequence B

Take *BIOL 1009* and choose from animal biology, plant biology, or microbiology course groups.

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Animal Biology

BIOL 2012 - General Zoology (4.0 cr)

or

take the following course pair

BIOL 3211 - Animal Physiology (3.0 cr)

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

or

Botany or Plant Biology

BIOL 2022 - General Botany (3.0 cr)

or BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

or

Take all of the following in the same term:

BIOL 3002 - Plant Biology: Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

or

Microbiology

BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or MICB 3301 - Biology of Microorganisms (5.0 cr)

or VBS 2032 - General Microbiology with Laboratory (4.0 cr)

Required Courses

Physical Science and Mathematics

Chemistry

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

CHEM 2302 - Organic Chemistry II (3.0 cr)

CHEM 2311 - Organic Lab (4.0 cr)

BIOC 4521 - Introduction to Physical Biochemistry (3.0 cr)

or

take the following course pair

CHEM 3501 - Physical Chemistry I (3.0 cr)

CHEM 3502 - Physical Chemistry II (3.0 cr)

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)

Physics

PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)

or PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

Major Courses

Take *BIOL 4003* and *4004*, and choose one course or course pair from the remaining courses. *MICB 3301* is preferred. Selected course(s) may not count towards the organismal requirement in Sequence B.

Biochemistry

BIOC 3960 - Research Topics in Biochemistry (1.0 cr)

BIOC 4025 - Laboratory in Biochemistry (2.0 cr)

BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)

BIOC 4332 - Biochemistry II: Molecular Mechanisms of Signal Transduction and Gene Expression (4.0 cr)

BIOL 4003 - Genetics (3.0 cr)

BIOL 4004 - Cell Biology (3.0 cr)

MICB 3301 - Biology of Microorganisms (5.0 cr)

or BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

or BIOL 3407 - Ecology, ENVT (3.0 cr)

or BIOL 3409 - Evolution (3.0 cr)

or BIOL 3411 - Introduction to Animal Behavior (3.0 cr)

or BIOL 3807 - Ecology, ENVT (4.0 cr)
 or BIOL 3811 - Introduction to Animal Behavior (3.0 cr)
 or

Animal Physiology

BIOL 3211 - Animal Physiology (3.0 cr)
 BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

or
 PHSL 3051 - Human Physiology (4.0 cr)
 BIOL 2005 - Animal Diversity Laboratory (1.0 cr)
 or
 BIOL 2005 - Animal Diversity Laboratory (1.0 cr)
 PHSL 3061 - Principles of Physiology (4.0 cr)

or

Plant Biology

BIOL 3002 - Plant Biology: Function (2.0 cr)
 BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)
 or BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

Electives

Electives may not be used to fulfill other major requirements. One course must include an upper division CBS laboratory experience.

Take 6 or more credit(s) from the following:

BIOC 4125 - Laboratory in Molecular Biology and Biotechnology (3.0 cr)
 BIOC 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)
 BIOC 4994 - Directed Research (1.0-7.0 cr)
 BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)
 EEB 4014W - Ecology of Vegetation, WI (3.0 cr)
 EEB 4016W - Ecological Biogeography, WI (3.0 cr)
 EEB 4129 - Mammalogy (4.0 cr)
 EEB 4134 - Introduction to Ornithology (4.0 cr)
 EEB 4605 - Limnology Laboratory (1.0 cr)
 EEB 4607 - Plankton Ecology (4.0 cr)
 EEB 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)
 EEB 4994 - Directed Research (1.0-7.0 cr)
 FW 3136 - Ecology of Fishes (4.0 cr)
 GCD 4015 - Genetics Laboratory (2.0 cr)
 GCD 4025 - Cell Biology Laboratory (2.0 cr)
 GCD 4111 - Histology: Cell and Tissue Organization (4.0 cr)
 GCD 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)
 GCD 4994 - Directed Research (1.0-7.0 cr)
 MICB 3301 - Biology of Microorganisms (5.0 cr)
 MICB 4215 - Advanced Laboratory: Microbial Physiology and Diversity (3.0 cr)
 MICB 4235 - Advanced Laboratory: Virology, Immunology, and Microbial Genetics (3.0 cr)
 MICB 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)
 MICB 4994 - Directed Research (1.0-7.0 cr)
 NSCI 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)
 NSCI 4994 - Directed Research (1.0-7.0 cr)
 PBIO 4321 - Taxonomy of Minnesota Flora (3.0 cr)
 PBIO 4404 - Developmental Plant Anatomy (3.0 cr)
 PBIO 4511 - Flowering Plant Diversity (3.0 cr)
 PBIO 5416 - Plant Morphology, Development, and Evolution (4.0 cr)
 PBIO 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)
 PBIO 4994 - Directed Research (1.0-7.0 cr)

Animal Physiology

Take all of the following in the same term:
 BIOL 2005 - Animal Diversity Laboratory (1.0 cr)
 BIOL 3211 - Animal Physiology (3.0 cr)

Plant Biology

Take all of the following in the same term:
 BIOL 3002 - Plant Biology: Function (2.0 cr)
 BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

Take all of the following in the same term:

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)
 PHSL 3051 - Human Physiology (4.0 cr)

Take all of the following in the same term:

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)
 PHSL 3061 - Principles of Physiology (4.0 cr)

Biology or Biochemistry Elective

Take 0 - 6 credit(s) from the following:

BIOC 3xxx
 BIOC 4xxx
 BIOC 5xxx
 BIOL 3xxx
 BIOL 4xxx
 BIOL 5xxx
 EEB 4xxx
 EEB 5xxx
 GCD 3xxx
 GCD 4xxx
 GCD 5xxx
 MICB 3xxx
 MICB 4xxx
 MICB 5xxx
 NSCI 3xxx
 NSCI 4xxx
 NSCI 5xxx
 PBIO 3xxx
 PBIO 4xxx
 PBIO 5xxx

Biochemistry Minor

Required credits in this minor: 10

Biochemists study molecules found in living organisms, particularly proteins, nucleic acids, lipids, and carbohydrates. Biochemistry minors focus their studies on the biosynthesis, metabolism, function, and regulation of these molecules of life. This information is essential to gain an understanding of many biological processes, including how diseases like cancer and diabetes develop, and how genetic engineering and biotechnology can be used in ways that benefit society.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students who wish to declare a minor in biochemistry should call 612-624-9717 to schedule an appointment with an adviser.

Required Courses

Minor Courses

BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)
 BIOC 4332 - Biochemistry II: Molecular Mechanisms of Signal Transduction and Gene Expression (4.0 cr)
 BIOC 4025 - Laboratory in Biochemistry (2.0 cr)

Biology B.S.

Biology

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 69.

This program requires summer terms.

Degree: Bachelor of Science

Students majoring in biology gain a broad understanding of the fundamental nature and characteristics of living things and the ways in which they interact. Their studies cover the full range of life sciences, from cancer genes to acid rain, from lichens to marine mammals.

The biology B.S. program prepares students for study in a broad spectrum of biological sciences; for professional training programs in the health sciences; careers in teaching; and entry-level scientist positions in industry, government agencies, and universities.

Program Requirements

Introductory Biology

Choose either Sequence A or Sequence B to fulfill the general and organismal biology requirement. Sequence A is preferred. If Sequence A is chosen, take one organismal course or course pair. If Sequence B is chosen, take two organismal courses or course pairs.

Students are required to complete one of the following course groups.

Sequence A (Preferred)

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)

Animal Biology

BIOL 2012 - General Zoology (4.0 cr)

or

take the following course pair

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

BIOL 3211 - Animal Physiology (3.0 cr)

or

take the following course pair

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

or

Plant Biology

BIOL 2022 - General Botany (3.0 cr)

or BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

or

take the following course pair

BIOL 3002 - Plant Biology: Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

or

Microbiology

BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or MICB 3301 - Biology of Microorganisms (5.0 cr)

or VBS 2032 - General Microbiology With Laboratory (4.0 cr)

-OR-

Sequence B

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Organismal Biology

Take 2 or more sub-requirement(s) from the following:

Animal Biology

BIOL 2012 - General Zoology (4.0 cr)

or

take the following course pair

BIOL 3211 - Animal Physiology (3.0 cr)

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

or

take the following course pair

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

or

Plant Biology

BIOL 2022 - General Botany (3.0 cr)

or BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

or

take the following course pair

BIOL 3002 - Plant Biology: Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

or

Microbiology

BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or MICB 3301 - Biology of Microorganisms (5.0 cr)

or VBS 2032 - General Microbiology With Laboratory (4.0 cr)

Required Courses

Math and Physical Sciences

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

CHEM 2302 - Organic Chemistry II (3.0 cr)

CHEM 2311 - Organic Lab (4.0 cr)

MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)

PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)

or PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

Biology Core

BIOC 3021 - Biochemistry (3.0 cr)

or BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)

BIOL 3407 - Ecology, ENVT (3.0 cr)

or BIOL 3409 - Evolution (3.0 cr)

or BIOL 3411 - Introduction to Animal Behavior (3.0 cr)

BIOL 4003 - Genetics (3.0 cr)

BIOL 4004 - Cell Biology (3.0 cr)

Electives

Electives may not be used to fulfill other requirements. Complete 11 additional upper division credits in elective courses. Two courses must be lab/field courses. Any 38xx or higher field course taken at the Lake Itasca Biological Station may be used toward the lab/field requirement. Remaining classes to meet the elective credit total may be: 3xxx or higher additional lab/field courses, non lab/field electives, or directed research. See your adviser for a list of possible courses.

Take at least one additional course in any of the biological sciences.

Take 2 or more course(s) from the following:

BIOC 4025 - Laboratory in Biochemistry (2.0 cr)
 BIOC 4125 - Laboratory in Molecular Biology and Biotechnology (3.0 cr)
 BIOC 4794W - Directed Research: Writing Intensive, WI (1.0-6.0 cr)
 BIOC 4994 - Directed Research (1.0-6.0 cr)
 BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)
 EEB 4014 - Ecology of Vegetation (3.0 cr)
 EEB 4016W - Ecological Biogeography, WI (3.0 cr)
 EEB 4129 - Mammalogy (4.0 cr)
 EEB 4134 - Introduction to Ornithology (4.0 cr)
 EEB 4605 - Limnology Laboratory (1.0 cr)
 EEB 4607 - Plankton Ecology (4.0 cr)
 EEB 4794W - Directed Research: Writing Intensive, WI (1.0-6.0 cr)
 EEB 4842 - Arctic Field Ecology (4.0 cr)
 EEB 4994 - Directed Research (1.0-6.0 cr)
 EEB 5013 - Quaternary Plant Macrofossils (2.0 cr)
 GCD 4015 - Genetics Laboratory (2.0 cr)
 GCD 4025 - Cell Biology Laboratory (2.0 cr)
 GCD 4111 - Histology: Cell and Tissue Organization (4.0 cr)
 GCD 4794W - Directed Research: Writing Intensive, WI (1.0-6.0 cr)
 GCD 4994 - Directed Research (1.0-6.0 cr)
 MICB 3301 - Biology of Microorganisms (5.0 cr)
 MICB 4215 - Advanced Laboratory: Microbial Physiology and Diversity (3.0 cr)
 MICB 4235 - Advanced Laboratory: Virology, Immunology, and Microbial Genetics (3.0 cr)
 MICB 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)
 MICB 4994 - Directed Research (1.0-7.0 cr)
 NSCI 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)
 NSCI 4994 - Directed Research (1.0-7.0 cr)
 PBIO 4321 - Minnesota Flora (3.0 cr)
 PBIO 4404 - Developmental Plant Anatomy (3.0 cr)
 PBIO 4511 - Flowering Plant Diversity (3.0 cr)
 PBIO 4794W - Directed Research: Writing Intensive, WI (1.0-6.0 cr)
 PBIO 4994 - Directed Research (1.0-6.0 cr)
 PBIO 5416 - Plant Morphology, Development, and Evolution (4.0 cr)

Take one of the following course pairs

BIOL 2005 – Animal Diversity Laboratory (1.0 cr)
 BIOL 3211 – Animal Physiology (3.0 cr)

or
 BIOL 2005 – Animal Diversity Laboratory (1.0 cr)
 PHSL 3051 – Human Physiology (4.0 cr)

or
 BIOL 2005 – Animal Diversity Laboratory (1.0 cr)
 PHSL 3061 – Principles of Physiology (4.0 cr)

or
 BIOL 3002 – Plant Biology: Function (2.0 cr)
 BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

Biology Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 20.

Biology minors gain a broad understanding of the fundamental nature and characteristics of living things and the ways in which they interact. Their studies cover the full range of life sciences, from cancer genes to acid rain, from lichens to marine mammals.

Admission Requirements

To declare a biology minor, students must make an appointment (and bring a transcript). Call 612-624-9717.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

All courses must be taken A-F with a grade of C- or better.

Required Courses**Minor Courses**

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

Electives

All courses for the minor must have a CBS designator (BIOL, BIOC, GCD, EEB, MICB, NSCI, PBIO) or be cross listed with CBS designators.

Take 12 or more credit(s) from the following:

Take 0 - 9 credit(s) from the following:

BIOC 2xxx
 BIOL 2xxx
 EEB 2xxx
 GCD 2xxx
 MICB 2xxx
 NSCI 2xxx
 PBIO 2xxx

Take 3 or more credit(s) from the following:

BIOC 3xxx
 BIOC 4xxx
 BIOL 3xxx
 BIOL 4xxx
 EEB 3xxx
 EEB 4xxx
 GCD 3xxx
 GCD 4xxx
 MICB 3xxx
 MICB 4xxx
 NSCI 3xxx
 NSCI 4xxx
 PBIO 3xxx
 PBIO 4xxx

Ecology, Evolution, and Behavior B.S.

Ecology, Evolution & Behavior

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 73.

This program requires summer terms.

Degree: Bachelor of Science

Students majoring in ecology, evolution, and behavior (EEB) focus on three related areas of biology. Ecology examines the growth and maintenance of populations and their interactions in communities, and relationships among organisms and physical events in terrestrial and aquatic ecosystems. Evolution investigates the origin and change of biological diversity by studying evolutionary patterns and processes at various temporal and spatial scales. Behavioral biology explores behavioral adaptations to the environment, mechanisms of behavior, and the evolution of social systems.

A B.S. in EEB prepares students for graduate study in integrative biology and related biological sciences; careers in teaching; and entry-level scientist positions in industry, government agencies, nonprofit agencies, and universities.

Program Requirements

Introductory Biology

Students are required to complete one of the following course groups.

Sequence A

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)

Take 2 or more sub-requirement(s) from the following:

Animal Biology

BIOL 2012 - General Zoology (4.0 cr)

or

take the following course pair

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

BIOL 3211 - Animal Physiology (3.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3061 - Principles of Physiology (4.0 cr)

Plant Biology

BIOL 2022 - General Botany (3.0 cr)

or

take the following course pair

BIOL 3002 - Plant Biology : Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

or BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

Microbiology

BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or VBS 2032 - General Microbiology with Laboratory (4.0 cr)

or MICB 3301 - Biology of Microorganisms (5.0 cr)

Sequence B

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Take 3 or more sub-requirement(s) from the following:

Animal Biology

BIOL 2012 - General Zoology (4.0 cr)

or

take the following course pair

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

BIOL 3211 - Animal Physiology (3.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3061 - Principles of Physiology (4.0 cr)

Plant Biology

BIOL 2022 - General Botany (3.0 cr)

or

take the following course pair

BIOL 3002 - Plant Biology : Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

or BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

Microbiology

BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or VBS 2032 - General Microbiology with Laboratory (4.0 cr)

or MICB 3301 - Biology of Microorganisms (5.0 cr)

Required Courses

Math and Physical Sciences

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

CHEM 2302 - Organic Chemistry II (3.0 cr)

or EEB 4611 - Biogeochemical Processes (3.0 cr)

MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)

STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

or STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)

or PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

Biology Core

Students may take any 38xx course offered at the Lake Itasca Biological Station to count toward the ecology/animal behavior/evolution portion of the major core curriculum.

BIOC 3021 - Biochemistry (3.0 cr)

BIOL 4003 - Genetics (3.0 cr)

Take 2 or more course(s) from the following:

BIOL 3409 - Evolution (3.0 cr)

BIOL 3407 - Ecology, ENVT (3.0 cr)

or BIOL 3807 - Ecology, ENVT (4.0 cr)

BIOL 3411 - Introduction to Animal Behavior (3.0 cr)

or BIOL 3811 - Introduction to Animal Behavior (4.0 cr)

Major Electives

Take 13 additional 3xxx-5xxx upper division credits in the biological and physical sciences, including an ecology, evolution, or animal behavior field or lab experience. At least 4 credits of EEB directed research or coursework involving extensive field experience at the Itasca Biological Station and Laboratories. See your adviser for a list of possible courses. BIOL 3407, 3409, 3411, and EEB 4611 may be used as electives only if not used to fulfill other major requirements.

A lab/field course (38xx-58xx) may be used to fulfill the lab requirement

or EEB 4794W - Directed Research: Writing Intensive, WI (1.0-6.0 cr)
or EEB 4994 - Directed Research (1.0-6.0 cr)

Take 7 or more credit(s) from the following:

BIOL 3407 - Ecology, ENVT (3.0 cr)
BIOL 3409 - Evolution (3.0 cr)
BIOL 3411 - Introduction to Animal Behavior (3.0 cr)
EEB 4014 - Ecology of Vegetation (3.0 cr)
EEB 4016W - Ecological Biogeography, WI (3.0 cr)
EEB 4129 - Mammalogy (4.0 cr)
EEB 4134 - Introduction to Ornithology (4.0 cr)
EEB 4601 - Limnology (3.0 cr)
EEB 4605 - Limnology Laboratory (1.0 cr)
EEB 4607 - Plankton Ecology (4.0 cr)
EEB 4609W - Ecosystem Ecology, WI (3.0 cr)
EEB 4611 - Biogeochemical Processes (3.0 cr)
EEB 4814 - Plant Community Ecology (4.0 cr)
EEB 4817 - Vertebrate Ecology (4.0 cr)
EEB 4839 - Field Studies in Mammalogy (4.0 cr)
EEB 5009 - Quaternary Vegetation History and Climate (3.0 cr)
EEB 5011 - Pollen Morphology (2.0 cr)
EEB 5013 - Quaternary Plant Macrofossils (2.0 cr)
EEB 5033 - Quantitative Genetics (3.0 cr)
EEB 5053 - Ecology: Theory and Concepts (4.0 cr)
EEB 5122W - Plant Interactions with Animals and Microbes, WI (3.0 cr)
EEB 5146 - Science and Policy of Global Environmental Change (3.0 cr)
EEB 5221 - Molecular and Genomic Evolution (3.0 cr)
EEB 5321 - Evolution of Social Behavior (3.0 cr)
EEB 5327 - Behavioral Ecology (3.0 cr)
EEB 5371 - Principles of Systematics (3.0 cr)
EEB 5609 - Ecosystem Ecology (3.0 cr)
EEB 5961 - Decision Analysis and Modeling in Conservation Biology (3.0 cr)
EEB 5963 - Modeling Nature and the Nature of Modeling (3.0 cr)

Genetics, Cell Biology, and Development B.S.

Genetics, Cell Biology, and Development TCBS

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 77.

Degree: Bachelor of Science.

Genetics, cell biology, and development (GCD) students focus their studies on the mechanisms by which genetic information is used to specify cell structure and function, and how that information drives cellular interactions that convert a single cell to develop into a complete organism. GCD students learn about advances in the field by studying model organisms like plants, fruit flies, zebrafish, and mice.

A B.S. in GCD prepares students for graduate study in molecular biology or related biological sciences; for professional training programs in health sciences; careers in teaching; and entry-level positions in industry, government agencies, or universities.

Admission Requirements

A GPA above 2.00 is preferred for the following:

- 2.50 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements**Introductory Biology**

Students are required to complete one of the following course groups.

Sequence A

Take BIOL 1001 and 1002W and choose from animal biology, plant biology, or microbiology course groups.

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)

or BIOL 1002V - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI, H (5.0 cr)

Animal Biology

BIOL 2012 - General Zoology (4.0 cr)

or

take the following course pair

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

BIOL 3211 - Animal Physiology (3.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3061 - Principles of Physiology (4.0 cr)

Plant Biology

BIOL 2022 - General Botany (3.0 cr)

or

take the following course pair

BIOL 3002 - Plant Biology: Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

or BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

Microbiology

BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or VBS 2032 - General Microbiology with Laboratory (4.0 cr)

or MICB 3301 - Biology of Microorganisms (5.0 cr)

-OR-

Sequence B

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Take 2 or more sub-requirement(s) from the following:

Animal Biology

BIOL 2012 - General Zoology (4.0 cr)

or

take the following course pair

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

BIOL 3211 - Animal Physiology (3.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3061 - Principles of Physiology (4.0 cr)

Plant Biology

BIOL 2022 - General Botany (3.0 cr)

or

take the following course pair

BIOL 3002 – Plant Biology : Function (2.0 cr)
 BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)
 or BIOL 3007W – Plant Biology: Diversity and Adaptation, WI (4.0 cr)

Microbiology

BIOL 2032 – General Microbiology with Laboratory (4.0 cr)
 or VBS 2032 - General Microbiology with Laboratory (4.0 cr)
 or MICB 3301 – Biology of Microorganisms (5.0 cr)

Required Courses

Physical Science and Mathematics

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 2301 - Organic Chemistry I (3.0 cr)
 CHEM 2302 - Organic Chemistry II (3.0 cr)
 CHEM 2311 - Organic Lab (4.0 cr)
 MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)
 PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)
 or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)
 or PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

Major Courses

BIOL 4003 - Genetics (3.0 cr)
 BIOL 4004 - Cell Biology (3.0 cr)
 BIOC 3021 - Biochemistry (3.0 cr)
 or BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)
 BIOL 3407 - Ecology, ENVT (3.0 cr)
 or BIOL 3409 - Evolution (3.0 cr)
 or BIOL 3411 - Introduction to Animal Behavior (3.0 cr)

Electives

Electives must include three courses from at least two of the following three course groups, as well as two courses from the elective labs course group. Consult your adviser on additional courses to total 18 credits. GCD 4151, 4161, and PBIO 5514 may be used in only one elective area.

Take 18 or more credit(s) including 3 or more sub-requirement(s) from the following:

Genetics

Take 0 - 3 course(s) from the following:
 EEB 5033 - Population and Quantitative Genetics (4.0 cr)
 GCD 4034 - Molecular Genetics (3.0 cr)
 GCD 4143 - Human Genetics (3.0 cr)
 GCD 4151 - Molecular Biology of Cancer (3.0 cr)

Cell Biology

Take 0 - 3 course(s) from the following:
 GCD 4111 - Histology: Cell and Tissue Organization (4.0 cr)
 GCD 4134 - Endocrinology (3.0 cr)
 GCD 5036 - Molecular Cell Biology (3.0 cr)
 MICB 4131 - Immunology (3.0 cr)
 NSCI 3101 - Introduction to Neuroscience I: From Molecules to Madness (3.0 cr)
 PBIO 4516W - Plant Cell Biology: Writing Intensive, WI (3.0 cr)

Developmental Biology

Take 0 - 3 course(s) from the following:
 GCD 4151 - Molecular Biology of Cancer (3.0 cr)
 GCD 4161 - Developmental Biology (3.0 cr)
 PBIO 5514 - Plant Molecular Biology (3.0 cr)
 PBIO 5416 - Plant Morphology, Development, and Evolution (4.0 cr)

Elective Labs

Take 3 - 7 credit(s) from the following:

GCD 4994 - Directed Research (1.0-7.0 cr)
 GCD 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)
 Take 1 or more course(s) from the following:
 BIOC 4025 - Laboratory in Biochemistry (2.0 cr)
 BIOC 4125 - Laboratory in Molecular Biology and Biotechnology (3.0 cr)
 GCD 4015 - Genetics Laboratory (2.0 cr)
 GCD 4025 - Cell Biology Laboratory (2.0 cr)
 MICB 4235 - Advanced Laboratory: Virology, Immunology, and Microbial Genetics (3.0 cr)

Microbiology B.S.

Microbiology

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 71 to 76.

Degree: Bachelor of Science

Microbiologists study the structure, function, and interaction of microbes, which make up 60 percent of the earth's biomass. Regarded by many as the foundation of the biosphere, microbes were likely the first form of life on earth, predating plants and animals by more than three billion years. Microbiologists study the role of microbes, such as bacteria, fungi, and viruses, in our world. A key goal of microbiologists today is to find new ways to use microbes to our advantage, such as engineering bacteria to synthesize cancer drugs or clean up toxic waste sites.

The microbiology major prepares students for advanced work in graduate programs in microbiology and related fields, and serves as preparation for careers in the health sciences. Microbiologists find employment in a variety of governmental, industrial, and pharmaceutical fields.

Program Requirements

Introductory Biology

Students are required to complete one of the following course groups.

Sequence A (preferred)

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
 BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)
 or BIOL 1002V - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI, H (5.0 cr)

-OR-

Sequence B

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Take 1 or more sub-requirement(s) from the following:

BIOL 2012 - General Zoology (4.0 cr)

or

Animal Physiology

BIOL 3211 - Animal Physiology (3.0 cr)
 BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

Plant Biology

BIOL 2022 - General Botany (3.0 cr)
 or BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

or

Take the following course pair

BIOL 3002 - Plant Biology: Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

Required Courses

Physical Science and Mathematics

Chemistry

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

CHEM 2302 - Organic Chemistry II (3.0 cr)

CHEM 2311 - Organic Lab (4.0 cr)

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)

Physics

PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)

or PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

Major Courses

BIOL 4003 - Genetics (3.0 cr)

MICB 3301 - Biology of Microorganisms (5.0 cr)

BIOC 3021 - Biochemistry (3.0 cr)

or BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)

Electives

These courses fulfill the microbiology elective requirement.

Take 4 or more course(s) from the following:

BIOC 5352 - Microbial Biochemistry and Biotechnology: Proteins (3.0 cr)
BIOC 5353 - Microbial Biochemistry and Biotechnology: Small Molecules (3.0 cr)

BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)

MICB 4111 - Microbial Physiology and Diversity (3.0 cr)

MICB 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)

MICB 4131 - Immunology (3.0 cr)

MICB 4151 - Molecular and Genetic Bases for Microbial Diseases (3.0 cr)

MICB 4141W - Biology, Genetics, and Pathogenesis of Viruses: Writing Intensive, WI (4.0 cr)

or MICB 4171 - Biology, Genetics, and Pathogenesis of Viruses (3.0 cr)

Elective Labs

Choose Option A or B to fulfill the advanced laboratory requirement. If Option B is chosen, MICB 4794W/4994 must be taken for 6 credits.

Option A

MICB 4215 - Advanced Laboratory: Microbial Physiology and Diversity (3.0 cr)

MICB 4235 - Advanced Laboratory: Virology, Immunology, and Microbial Genetics (3.0 cr)

or

Option B

MICB 4215 - Advanced Laboratory: Microbial Physiology and Diversity (3.0 cr)

or MICB 4235 - Advanced Laboratory: Virology, Immunology, and Microbial Genetics (3.0 cr)

Take 6 or more credit(s) from the following:

MICB 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)

MICB 4994 - Directed Research (1.0-7.0 cr)

Neuroscience B.S.

Neuroscience

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 78 to 81.

Degree: Bachelor of Science

Neuroscience majors study the molecular and cellular building blocks that make up the brain and control its function. The study of neuroscience aims to understand how complex animals, including humans, see, hear, move, think, and feel. Neuroscientists also study abnormalities that cause diseases and mechanisms that underlie pain and addiction.

A B.S. in neuroscience prepares undergraduates to pursue advanced studies in neuroscience or related health careers; professional degrees in medicine or psychology; or careers in the pharmaceutical, medical, or biotechnology industries.

Program Requirements

Introductory Biology

Students are required to complete one of the following course groups.

Sequence A (preferred)

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)

Animal Biology

BIOL 2012 - General Zoology (4.0 cr)

or

BIOL 3211 - Animal Physiology (3.0 cr)

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3061 - Principles of Physiology (4.0 cr)

-OR-

Sequence B

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

BIOL 2012 - General Zoology (4.0 cr)

or

Animal Biology

BIOL 3211 - Animal Physiology (3.0 cr)

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3061 - Principles of Physiology (4.0 cr)

BIOL 2022 - General Botany (3.0 cr)

or BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or VBS 2032 - General Microbiology with Laboratory (4.0 cr)

or BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

or MICB 3301 - Biology of Microorganisms (5.0 cr)

or

take the following course pair

BIOL 3002 - Plant Biology: Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

Required Courses**Physical Science and Mathematics****Chemistry**

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 2301 - Organic Chemistry I (3.0 cr)
 CHEM 2302 - Organic Chemistry II (3.0 cr)
 CHEM 2311 - Organic Lab (4.0 cr)

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)

Physics

PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)
 or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)
 or PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

Major Courses

Students must complete a minimum of 2 credits of directed research.

BIOL 4003 - Genetics (3.0 cr)
 BIOL 4004 - Cell Biology (3.0 cr)
 NSCI 3101 - Introduction to Neuroscience I: From Molecules to Madness (3.0 cr)
 NSCI 3102W - Introduction to Neuroscience II: Biological Basis of Behavior, WI (3.0 cr)
 NSCI 4105 - Neurobiology Laboratory I (2.0 cr)
 BIOC 3021 - Biochemistry (3.0 cr)
 or BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)
 BIOL 3407 - Ecology, ENVT (3.0 cr)
 or BIOL 3409 - Evolution (3.0 cr)
 or BIOL 3411 - Introduction to Animal Behavior (3.0 cr)

Directed Research

NSCI 4167 - Neuroscience in the Community (1.0-3.0 cr)
 or NSCI 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)
 or NSCI 4994 - Directed Research (1.0-7.0 cr)

Electives

Take at least one course from each course group.

Take 9 or more credit(s) including 3 or more sub-requirement(s) from the following:

Group A: Cell and Molecular Biology

EEB 5221 - Molecular and Genomic Evolution (3.0 cr)
 or GCD 4034 - Molecular Genetics (3.0 cr)
 or GCD 5036 - Molecular Cell Biology (3.0 cr)
 or NSC 5201 - Computational Neuroscience I: Membranes and Channels (3.0 cr)
 or NSC 5461 - Cellular and Molecular Neuroscience (4.0 cr)

Group B: Neural Systems and Behavior

EEB 5321 - Evolution of Social Behavior (3.0 cr)
 or EEB 5327 - Behavioral Ecology (3.0 cr)
 or NSC 5202 - Theoretical Neuroscience: Systems and Information Processing (3.0 cr)
 or NSC 5462 - Neuroscience Principles of Drug Abuse (2.0 cr)
 or NSC 5561 - Systems Neuroscience (4.0 cr)
 or NSC 5661 - Behavioral Neuroscience (3.0 cr)
 or PSY 5036W - Computational Vision, WI (3.0 cr)
 or PSY 5038W - Introduction to Neural Networks, WI (3.0 cr)

Group C: History and Philosophy of Science

HSCI 3211 - Biology and Culture in the 19th and 20th Centuries, HP (3.0 cr)
 or HSCI 3242 - The Darwinian Revolution (3.0 cr)
 or PHIL 3601W - Scientific Thought, OH, WI (4.0 cr)
 or PHIL 4607 - Philosophy of the Biological Sciences, WI (3.0 cr)

Plant Biology B.S.**Plant Biology**

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 68 to 77.

Degree: Bachelor of Science

Plant biologists study all aspects of biology as they pertain to plants or fungi and make important contributions to analyzing and preserving biodiversity worldwide. They work to enhance the nutritional value of crops as well as their resistance to disease, pests, and drought while working to reduce the need for pesticides, fertilizer, and irrigation.

Current faculty research interests include genomics, gene expression, chromosome structure, plant growth substances, signal transduction, plant responses to stress, the plant cytoskeleton and cell morphogenesis, metabolic activities during development, cellular structure and ultrastructure of vascular and nonvascular plants, aquatic biology, lichenology, molecular evolution and systematics, fungal/plant interactions, biological rhythms, and fungal diversity.

Plant biology majors follow one of two tracks. One track fits the need of students who are primarily interested in environmental biology, evolution, or other aspects of whole organisms; the other track is appropriate for students interested in molecular, cellular, and development biology. All plant biology majors are guaranteed experience in a research laboratory as long as they show satisfactory progress toward their degree and make arrangements by the middle of their junior year.

Program Requirements**Introductory Biology**

Choose either Sequence A or Sequence B to fulfill the general and organismal biology requirement. Sequence A is preferred. If Sequence A is chosen, take one additional organismal course or course pair. Sequence B has two options for completing the requirements.

Students are required to complete one of the following course groups.

Sequence A (Preferred)

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
 BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)

Plant Biology

BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

Take all of the following in the same term:

BIOL 3002 - Plant Biology: Function (2.0 cr)
 BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

-OR-

Sequence B Option 1

If Sequence A is not pursued, the following is the preferred path for Sequence B.

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
 BIOL 3002 - Plant Biology: Function (2.0 cr)
 BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)
 BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

-OR-

Sequence B Option 2

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Plant Biology

BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

or

Take all of the following in the same term:

BIOL 3002 - Plant Biology: Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

Other Organismal Biology

BIOL 2012 - General Zoology (4.0 cr)

or BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or VBS 2032 - General Microbiology with Laboratory (4.0 cr)

or MICB 3301 - Biology of Microorganisms (5.0 cr)

or

take one of the following course pairs

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

BIOL 3211 - Animal Physiology (3.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

or

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

PHSL 3061 - Principles of Physiology (4.0 cr)

Required Courses**Physical Science and Mathematics**

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

CHEM 2302 - Organic Chemistry II (3.0 cr)

BIOC 4025 - Laboratory in Biochemistry (2.0 cr)

or CHEM 2311 - Organic Lab (4.0 cr)

MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)

PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)

or PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

Biology Core

BIOC 3021 - Biochemistry (3.0 cr)

or BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)

BIOL 3407 - Ecology, ENVT (3.0 cr)

or BIOL 3409 - Evolution (3.0 cr)

BIOL 4003 - Genetics (3.0 cr)

or BIOL 4004 - Cell Biology (3.0 cr)

Major Electives

Take at least one course from Group A and one course from Group B. Other appropriate courses may be substituted by petition.

Take 11 or more credit(s).

Take 1 or more course(s) from the following:

EEB 4014 - Ecology of Vegetation (3.0 cr)

EEB 4814 - Plant Community Ecology (4.0 cr)

EEB 4842 - Arctic Field Ecology (4.0 cr)

EEB 5122W - Plant Interactions with Animals and Microbes, WI (3.0 cr)

PBIO 4321 - Minnesota Flora (3.0 cr)

PBIO 4404 - Developmental Plant Anatomy (3.0 cr)

PBIO 4511 - Flowering Plant Diversity (3.0 cr)

PBIO 5416 - Plant Morphology, Development, and Evolution (4.0 cr)

Take 1 or more course(s) from the following:

BIOC 5401W - Advanced Metabolism and Its Regulation, WI (3.0 cr)

PBIO 4516W - Plant Cell Biology: Writing Intensive, WI (3.0 cr)

PBIO 5301 - Plant Genomics (3.0 cr)

PBIO 5412 - Plant Physiology (3.0 cr)

PBIO 5514 - Plant Molecular Biology (3.0 cr)

PBIO 5516 - Plant Cell Biology (3.0 cr)

Other statistics or mathematics electives must be approved by an adviser.

Take 1 or more course(s) from the following:

STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

Elective Labs

Any 38xx or 48xx CBS plant or algal biology course offered at the Lake Itasca Forestry and Biological station may be used to fulfill the lab/field requirement. BIOL 3002 and 3005W or BIOL 3007W may be used to meet a laboratory/field requirement if not used for Sequence A or B. Lab courses taken for Sequence A or B may be used toward the lab/field requirement.

Take 2 or more course(s) from the following:

BIOC 4025 - Laboratory in Biochemistry (2.0 cr)

BIOC 4125 - Laboratory in Molecular Biology and Biotechnology (3.0 cr)

BIOC 4794W - Directed Research: Writing Intensive, WI (1.0-6.0 cr)

BIOC 4994 - Directed Research (1.0-6.0 cr)

EEB 4014 - Ecology of Vegetation (3.0 cr)

EEB 4016W - Ecological Biogeography, WI (3.0 cr)

EEB 4605 - Limnology Laboratory (1.0 cr)

EEB 4607 - Plankton Ecology (4.0 cr)

EEB 4794W - Directed Research: Writing Intensive, WI (1.0-6.0 cr)

EEB 4842 - Arctic Field Ecology (4.0 cr)

EEB 4994 - Directed Research (1.0-6.0 cr)

EEB 5013 - Quaternary Plant Macrofossils (2.0 cr)

GCD 4015 - Genetics Laboratory (2.0 cr)

GCD 4025 - Cell Biology Laboratory (2.0 cr)

GCD 4794W - Directed Research: Writing Intensive, WI (1.0-6.0 cr)

GCD 4994 - Directed Research (1.0-6.0 cr)

MICB 3301 - Biology of Microorganisms (5.0 cr)

MICB 4215 - Advanced Laboratory: Microbial Physiology and Diversity (3.0 cr)

MICB 4235 - Advanced Laboratory: Virology, Immunology, and Microbial Genetics (3.0 cr)

MICB 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)

MICB 4994 - Directed Research (1.0-7.0 cr)

NSCI 4794W - Directed Research: Writing Intensive, WI (1.0-7.0 cr)

NSCI 4994 - Directed Research (1.0-7.0 cr)

PBIO 4321 - Minnesota Flora (3.0 cr)

PBIO 4404 - Developmental Plant Anatomy (3.0 cr)

PBIO 4511 - Flowering Plant Diversity (3.0 cr)

PBIO 4794W - Directed Research: Writing Intensive, WI (1.0-6.0 cr)

PBIO 4994 - Directed Research (1.0-6.0 cr)

PBIO 5416 - Plant Morphology, Development, and Evolution (4.0 cr)

Plant Biology Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 10.

Plant biologists study all aspects of biology as they pertain to plants or fungi and make important contributions to analyzing and preserving biodiversity worldwide. They work to enhance the nutritional value of crops as well as their resistance to disease, pests, and drought while working to reduce the need for pesticides, fertilizer, and irrigation.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

The plant biology minor is available to CBS students pursuing one of the other college majors. It is also available to non-CBS students. Students must take all courses A-F and earn at least a C- in all courses used for the minor.

Students who wish to declare a minor in plant biology should call the director of undergraduate studies for plant biology at 612-624-3499.

Required Courses

Minor Courses

Take 10 or more credit(s) from the following:

- BIOL 3002 - Plant Biology: Function (2.0 cr)
- BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)
- BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)
- PBIO 4321 - Taxonomy of Minnesota Flora (3.0 cr)
- PBIO 4404 - Developmental Plant Anatomy (3.0 cr)
- PBIO 4511 - Flowering Plant Diversity (3.0 cr)
- PBIO 4516W - Plant Cell Biology: Writing Intensive, WI (3.0 cr)
- PBIO 4801 - Plains and Boreal Flora (4.0 cr)
- PBIO 4811 - Flowering Plant Systematics (3.0 cr)
- PBIO 5301 - Plant Genomics (3.0 cr)
- PBIO 5412 - Plant Physiology (3.0 cr)
- PBIO 5416 - Plant Morphology, Development, and Evolution (4.0 cr)
- PBIO 5514 - Plant Molecular Biology (3.0 cr)
- PBIO 5516 - Plant Cell Biology (3.0 cr)

College of Continuing Education

General Information

The College of Continuing Education (CCE) provides high-quality continuing education and lifelong learning opportunities for professional development, personal enrichment, career transition, and academic growth. Established in 1913, CCE has one of the most comprehensive continuing education units in the country and serves as the University's main access point for nontraditional students, particularly adult and part-time learners.

CCE offers a variety of degrees, certificates, and continuing professional education opportunities. With programs and services that cross the usual boundaries of time, place, mode of delivery, and academic discipline, CCE provides the knowledge and skills required in an information-based world and workplace. And, through CCE, non-admitted students can access University courses.

Advising

CCE Information Center—The CCE Information Center offers academic advising and financial aid advising to all students interested in CCE degrees and certificates. Advisers can help students select programs of study, determine prerequisites, interpret degree requirements, discuss transcripts of previous college work, and choose courses.

Students seeking a college degree through registration in CCE classes should consult an adviser early in their planning. For more information, contact CCE Information Center at info@cce.umn.edu or 612-624-4000.

Admission

Admission to CCE Degree and Certificate Programs—All CCE degree programs have their own admission policies and procedures and admit at the upper division only. For general questions about admission to CCE degree or certificate programs, contact CCE Information Center at 612-624-4000. For more information, go to the CCE Web site at www.cce.umn.edu and select the program of interest.

Liberal Education Requirements—Within CCE, the Inter-College Program (ICP) and the Program for Individualized Learning (PIL) follow the University's standardized set of liberal education requirements. The Bachelor of Applied Science has liberal education requirements unique to each major. See the BAS Web site at www.cce.umn.edu/bas or contact an Information Center adviser for requirement information.

Scholastic Committee, CCE

The CCE Scholastic Committee is charged with interpreting and enforcing College and University regulations relating to academic affairs for students admitted to CCE credit certificate and degree programs and non-admitted students assigned to CCE. The Committee handles registration exception request policies and procedures, certificate program admission standards, and certificate program credit transfer policies for these students.

The Committee seeks to maintain the spirit of the University's regulations and is empowered to make exceptions in extenuating circumstances. CCE nonadmitted and admitted degree and credit certificate students should contact a CCE adviser at 612-624-4000.

Degrees

Students have two broad options for earning baccalaureate degrees through CCE—an individualized degree or applied degree. For more information about these options, call 612-624-4000, or visit the CCE Web site at www.cce.umn.edu.

Individualized Degree Programs

Individualized degree programs open up educational opportunities for highly motivated students who need flexibility to earn their B.A. or B.S. degrees. Students develop degree programs tailored to their interests and talents.

CCE links the rich resources of the University's faculty and staff with the individual undergraduate. Students, faculty, and staff work together to take responsibility for the integrity of each degree program and the maintenance of high academic standards. As a result, our graduates gain a strong sense of ownership of their education and confidence in how that education is related to their lives.

CCE's individualized programs serve students by offering educational alternatives; the programs serve faculty by allowing them to develop and test innovative approaches to undergraduate education. Working together, the two groups help diversify learning experiences at the University.

Inter-College Program (ICP), founded in 1930, offers students a credit-based, individualized baccalaureate degree program drawing on the curricular offerings and other educational resources of the entire University community. This program provides an alternative to an already established major by giving students the flexibility to incorporate both day school and evening coursework from more than one college to achieve their educational goals. Call 612-624-4000 for more information or see www.cce.umn.edu/icp on the Web.

Program for Individualized Learning (PIL), founded in 1971, serves independent learners who wish to design and complete individualized study that incorporates a variety of learning resources and strategies, such as independent learning projects. PIL students work collaboratively with academic advisers and faculty throughout the University.

The program primarily serves students who live in the Twin Cities area, but also considers qualified students who can commute to campus for some learning activities. For more information, call 612-624-4000, or see www.cce.umn.edu/pil on the Web.

Bachelor of Applied Science (BAS) Degree Program

The Bachelor of Applied Science (BAS) program offers the opportunity for niche-focused professional growth in specializations tied to key economic drivers. Working adults and full-time students may augment credentials or begin career study. Courses combine theory and application, and are taught by industry professionals. Students may select an entire BAS major and receive a B.A.Sc. degree, incorporate BAS classes or a BAS minor into an existing degree program, elect a certificate in certain BAS areas or enroll in individual classes. For more information about any of these opportunities, visit the BAS Web site at www.cce.umn.edu/bas.

The B.A.Sc. with a major in clinical laboratory science is a course of study that provides the education clinical laboratory technicians/medical laboratory technicians (CLT/MLT) need for career advancement. Students receive a strong foundation in the sciences together with rich experiences in the clinical laboratory and are prepared to work as clinical laboratory scientists, technical specialists, laboratory managers, lab coordinators, and quality control technologists. Graduates may take the national certification examinations to practice as a clinical laboratory scientist/medical technologist (CLS/MT). Offered in partnership with MnSCU, students can complete a two-year CLT/MLT associate's degree before enrolling.

The B.A.Sc. with a major in construction management is offered in close collaboration with the construction industry. Construction management combines building design and engineering with management and business studies to equip students with the skills needed to deliver projects on time and within budget. The major offers experience and education leading directly to a professional management career in high demand areas in the construction industry.

A minor in construction management is also available to students who are either currently enrolled in or are graduates of an undergraduate degree program at the University of Minnesota.

The B.A.Sc. with a major in emergency health services is offered cooperatively with Regions Hospital in St. Paul. The program is designed to provide personnel working in pre-hospital medical care with the education and skills necessary to coordinate and direct the delivery of emergency health services in a variety of settings, ranging from out-of-hospital, first-responder situations to occupational health and safety programs in large organizations.

The B.A.Sc. with a major in information technology infrastructure is a course of study combining information technology infrastructure, math, science, and business curricula. Students may choose a network and systems administration or database administration concentration area. Graduates are able to design, construct, and manage technology operations. This major replaces the majors in information networking and network administration.

The B.A.Sc. with a major in manufacturing technology prepares students for career growth in the manufacturing industry. Students learn new skills in the areas of manufacturing systems and processes, computer technology, quality, operations, project management, business and finance, and interpersonal communication. Graduates are prepared to work as project managers, process engineers, materials managers, lead technicians, order process analysts, facilities engineers, and business analysts.

The B.A.Sc. with a major in radiation therapy provides leading-edge medical and technical courses and clinical experience in top-ranking radiation oncology departments. Radiation therapy graduates are prepared to meet the changing demands of new technologies and advancements in treatment techniques. Didactic and clinical experiences will sharpen critical thinking and problem solving skills, and provide the knowledge base in management and education that is crucial to future advancement. Graduates are ready to meet national certification requirements.

The major is offered in two locations: Rochester and the Twin Cities. In Rochester, the University of Minnesota partners with the Mayo School of Health Sciences. Classes and clinical experiences are offered at the Mayo Clinic and other facilities within the Mayo Health System. In the Twin Cities, this program is offered in partnership with University of Minnesota Medical Center, Fairview School of Radiation Therapy.

The B.A.Sc. with a major in respiratory care prepares students to become respiratory care practitioners with advanced-level clinical and professional skills. This program, offered in partnership with Mayo School of Health Sciences in Rochester, combines professional, medical, and technical courses. Courses and clinical experiences, with options for specialized clinical study, are offered at Mayo Clinic and other facilities within the Mayo Health System. Graduates will be ready to meet national certification requirements. Advanced practitioner respiratory therapists are prepared to serve as consultants to physicians and other medical staff.

Honors

All CCE degree programs recognize outstanding academic achievement by offering an honors and/or distinction option for graduating students.

Certificates

In addition to baccalaureate degrees, certificate programs offered through CCE provide an educational option for working adults. Certificates are short-term, focused college credentials that can supplement a student's experience and previously earned degree, or serve as a stepping stone to a degree. Certificates provide concentrated coursework related to occupational areas or general background to prepare students for further college work.

Coursework may be completed with evening classes, Independent and Distance Learning, day classes, summer session classes, or any combination of these. For more information, call the CCE Information Center at 612-624-4000 or e-mail info@cce.umn.edu.

College of Continuing Education Certificates

For information regarding the following certificates see www.cce.umn.edu/certificates.

- Accounting
- Accounting II
- Addiction studies
- Applied business
- Computer science
- Construction management
- Direct marketing
- Industrial relations
- Information technology infrastructure
- Interpreting
- Ophthalmology technician
- Organizational and professional communication
- Paper science and engineering

Special Learning Opportunities and Resources

Independent and Distance Learning (IDL) courses use electronic technologies and mail to meet the needs of students who cannot or choose not to take courses on campus. Most courses are self-paced and give students up to nine months to complete the coursework. Other courses fit into the regular semester schedule. Credits are recorded on students' transcripts and can be used toward fulfilling distribution requirements in

most undergraduate programs. IDL courses can also satisfy residency requirements, with approval from the student's college. Check with an adviser about using these course credits toward a specific program.

Students register for IDL courses the same way as regular day and evening courses. Courses are either extended-term (to be completed in up to nine months) or term-based (to be completed within one semester term). For students receiving financial aid administered by the Office of Student Finance (OSF), term-based online courses are automatically counted. Extended-term courses (both online and correspondence) are not eligible for OSF-administered aid, with one exception. If students are eligible for a Minnesota State Grant, OSF counts all IDL courses enrolled in by the end of the second week of the semester. This includes both extended-term and term-based courses.

For information on courses, policies, and registration, visit www.cce.umn.edu/idl or request an *Independent and Distance Learning Catalog*. Contact CCE at 612-624-4000 or 800-234-6564, or e-mail info@cce.umn.edu.

Independent Study (ICP 3075)—CCE allows undergraduates, regardless of college affiliation, to pursue projects beyond the scope of a single department or college. Projects are interdisciplinary or are completed in departments that do not offer an appropriate independent study course. Students may take 3–5 credits of ICP 3075 - Independent Study. For more information, contact ICP at 612-624-4000.

Scholarships and Grants

The College of Continuing Education Information Center provides information about CCE scholarships and other financial aid options.

Students admitted to degree and eligible certificate programs who complete the Free Application for Federal Student Aid (FAFSA) will be considered for aid administered by the Office of Student Finance. CCE scholarships and grants are available for noncredit, non-admitted (Non Degree), and degree and certificate admits. Most scholarships and grants require Minnesota residence, financial need, and a delay or interruption in education of two years or more. Additional scholarships are available for students admitted to the Inter-College Program (ICP), Program for Individualized Learning (PIL), and Bachelor of Applied Science (BAS) Program; requirements vary by scholarship fund. Scholarships are awarded on the basis of academic ability and a statement of personal, educational, and career goals. They are supported by donations from CCE alumni and friends. CCE awards 150–200 scholarships per year; individual awards generally range from \$2,200 to \$5,000.

College of Continuing Education

Degree Programs

Clinical Laboratory Science B.A.Sc.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 36.

This program requires summer terms.

Degree: Bachelor of Applied Science.

The B.A.Sc. with a major in clinical laboratory science (CLS) provides the education that clinical laboratory technicians/medical laboratory technicians (CLT/MLT) need for career advancement. Students obtain a strong foundation in the sciences and rich clinical laboratory experiences, and are prepared to work as clinical laboratory scientists, technical specialists, laboratory managers, lab coordinators, and quality control technologists. Graduates may take the national certification examinations to practice as a clinical laboratory scientist/medical technologist (CLS/MT). In partnership with MnSCU, students must complete a two-year CLT/MLT associate's degree before enrolling. This work cannot be completed at the University of Minnesota.

Students admitted to the CLS major follow the upper division curriculum for the medical technology program along with the medical technology cohort. Most students are likely to need at total of more than four years (including associate degree work) or significant summer work to complete the program.

Admission Requirements

Students must complete 45 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

A transfer student must have completed the Medical Laboratory Technician (MLT) two-year degree program or be near completion before applying for official admission to the BAS-CLS degree program. The cumulative GPA for science courses will also be reviewed as part of the admission decision.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

There is no distinct and independent CLS upper division curriculum. CLS students join the medical technology cohort and follow their exact curriculum.

Required Courses

General Education and Prerequisite Courses

Students should also take one upper division writing intensive course, and one humanities/fine arts course.

PHSL 3051 - Human Physiology (4.0 cr)

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

BIOC 3021 - Biochemistry (3.0 cr)

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

CHEM 2302 - Organic Chemistry II (3.0 cr)

GCD 3022 - Genetics (3.0 cr)

or BIOL 4003 - Genetics (3.0 cr)

Take 2 or more course(s) from the following:

PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)

GC 1281 - General Psychology, SSCI (4.0 cr)

GC 1211 - People and Problems, CD, SSCI (4.0 cr)

Prerequisite Mathematics Courses

Take 2 or more course(s) from the following:

MATH 1051 - Precalculus I (3.0 cr)

MATH 1142 - Short Calculus, MATH (4.0 cr)

MATH 1155 - Intensive Precalculus, MATH (5.0 cr)

MATH 1271 - Calculus I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Clinical Courses

These courses should be completed during the 22 weeks of clinical rotations in the summer and fall terms following the senior year, including six weeks of clinical chemistry, five weeks in hematology and coagulation, five weeks in immunohematology, five weeks in microbiology, and one week in a specialty laboratory area.

MEDT 4082 - Applied Clinical Chemistry (3.0 cr)

MEDT 4085 - Applied Clinical Hematology (2.0 cr)

MEDT 4086 - Applied Clinical Immunohematology (2.0 cr)

MEDT 4088 - Applied Diagnostic Microbiology (2.0 cr)

MEDT 4089 - Specialty Rotation (1.0 cr)

Senior Year Courses

MEDT 4064 - Introduction to Clinical Immunohematology (2.0 cr)

MEDT 4065 - Introduction to Clinical Immunohematology: Laboratory (2.0 cr)

MEDT 4100 - Virology, Mycology, and Parasitology for Medical Technologists (2.0 cr)

MEDT 4104 - Principles of Diagnostic Microbiology: Lecture (2.0 cr)

MEDT 4105 - Principles of Diagnostic Microbiology: Laboratory (2.0 cr)

MEDT 4127W - Introduction to Management and Education I, WI (1.0 cr)

MEDT 4253 - Hemostasis (1.0 cr)

MEDT 4310 - Clinical Chemistry I: Lecture (2.0 cr)

MEDT 4311 - Clinical Chemistry I: Laboratory Applications (2.0 cr)

MEDT 4320 - Clinical Chemistry II: Lecture (2.0 cr)

MEDT 4321 - Clinical Chemistry II: Laboratory Applications (2.0 cr)

MEDT 4400 - Immunological and Molecular Basis of Laboratory Testing (1.0 cr)

MEDT 4251 - Hematology I: Basic Techniques (3.0 cr)

MEDT 4252 - Hematology II: Morphology and Correlation (2.0 cr)

Construction Management B.A.Sc.

Requirements for this program are current for Summer 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 51.

This program requires summer terms.

Degree: Bachelor of Applied Science.

The B.A.Sc. with a major in construction management is offered in close collaboration with the construction industry. Construction management combines building design and engineering with management and business studies to equip students with the skills needed to deliver projects on time and within budget. The major offers experience and education leading directly to a professional management career in high demand areas in the construction industry. The construction management major was designed around the needs of working adults who are part-time students.

Admission Requirements

Students must complete 45 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Students complete either 45 credits (including construction plan reading, physics, and calculus) or the A.S. in construction management before admission to the major.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Preparatory Coursework

Students may complete the preparatory coursework either through Option 1 (U of M coursework) or Option 2 (A.S. in construction management).

Students are required to complete one of the following course groups.

Option 1 (U of M Preparatory Courses)

Students complete construction plan reading, physics, and calculus before admission.

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
 CMGT 2019 - AutoCAD for Construction Managers (2.0 cr)
 CMGT 3001 - Introduction to Construction (3.0 cr)
 CMGT 3011 - Construction Plan Reading (2.0 cr)
 COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or COMM 3402 - Introduction to Interpersonal Communication, SSCI (3.0 cr)
 or COMM 3605W - Persuasive Speaking and Speech Writing, WI (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
 or GC 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
 GC 1211 - People and Problems, CD, SSCI (4.0 cr)
 or GC 1281 - General Psychology, SSCI (4.0 cr)
 or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
 or SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
 MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)

PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1107 - Introductory Physics Online, PHYS SCI/L (4.0 cr)
 or PHYS 1111 - Basic Physics I (3.0 cr)
 or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 BP 3101 - Introductory Statics and Structures for Construction Management (3.0 cr)
 or AEM 2011 - Statics (3.0 cr)
 or BP 3001 - Statics, Mechanics, and Structural Design (4.0 cr)
 ABUS 4023W - Communicating for Results, WI (3.0 cr)
 or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
 ABUS 4022 - Management in Organizations (3.0 cr)
 or MGMT 3001 - Fundamentals of Management (3.0 cr)

-OR-

Option 2 (A.S. in Construction Management)

Students may satisfy the prerequisites for the major by earning an A.S. in construction management at North Hennepin Community College or Inver Hills Community College.

Required Courses

Major Courses

ABUS 4101 - Accounting for Managers (3.0 cr)
 ARCH 4542 - Building Energy Systems (3.0 cr)
 ARCH 4552 - Integrated Design Processes (3.0 cr)
 CE 3202 - Surveying and Mapping (2.0 cr)
 CE 4101W - Project Management, WI (3.0 cr)
 CMGT 4011 - Construction Documents and Contracts (3.0 cr)
 CMGT 4012 - Risk Management, Bonds, and Insurance (2.0 cr)
 CMGT 4013 - Legal and Ethical Issues in Construction (3.0 cr)
 CMGT 4021 - Construction Planning and Scheduling (3.0 cr)
 CMGT 4022 - Construction Estimating (3.0 cr)
 CMGT 4031 - Construction Safety and Loss Control (3.0 cr)
 CMGT 4041 - Specifications and Technical Writing for Construction Professionals (3.0 cr)
 CMGT 4051 - Construction Materials for Managers (3.0 cr)
 CMGT 4111 - Construction Productivity Management (2.0 cr)
 CMGT 4196 - Construction Management Internship (1.0-4.0 cr)
 CMGT 4201 - Construction Accounting (3.0 cr)
 CMGT 4572 - Structural Frames and Building Design/Construction (3.0 cr)
 ABUS 4103 - Marketing and Sales (3.0 cr)
 or ABUS 4701 - Introduction to Marketing (3.0 cr)

Construction Management Minor

Required credits in this minor: 19.

A minor in construction management is available to students who are either currently enrolled in or are graduates of an undergraduate degree program at the University of Minnesota.

Admission Requirements

Students must complete 45 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Sixty percent of credits in the minor must be completed at the University of Minnesota-Twin Cities. CMGT 3011 or equivalent experience is prerequisite for certain courses in the minor.

Required Courses

Construction Management Minor Requirements

CE 4101W - Project Management, WI (3.0 cr)
 CMGT 3001 - Introduction to Construction (3.0 cr)
 CMGT 4011 - Construction Documents and Contracts (3.0 cr)
 CMGT 4021 - Construction Planning and Scheduling (3.0 cr)
 CMGT 4022 - Construction Estimating (3.0 cr)
 CMGT 4031 - Construction Safety and Loss Control (3.0 cr)
 CMGT 3011 - Construction Plan Reading (2.0 cr)
 or Upper-division elective approved by the Department

Emergency Health Services B.A.Sc.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 52.

This program requires summer terms.

Degree: Bachelor of Applied Science.

The B.A.Sc. with a major in emergency health services is offered in partnership with Inver Hills Community College. The program is designed to provide personnel working in pre-hospital medical care with the education and skills necessary to coordinate and direct the delivery of emergency health services in a variety of settings, ranging from out-of-hospital, first-responder situations to occupational health and safety programs in large organizations. The emergency health services major was designed to meet the needs of working adults who are attending college part-time.

Admission Requirements

Students must complete 45 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Students must have current EMT paramedic state certification or be registered nurses currently employed in an emergency medical setting. Before admission, students must complete a minimum of 45 semester credits transferable to the BAS major program, including the required prerequisite courses. Students must have these prerequisite courses completed or in progress before applying for official admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

GC 1131 - Principles of Biological Science, BIOL SCI/L (4.0 cr)
 GC 1166 - Principles of Chemistry (3.0 cr)
 INMD 3001 - Human Anatomy (3.0 cr)
 PHSL 3051 - Human Physiology (4.0 cr)
 COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or COMM 3605W - Persuasive Speaking and Speech Writing, WI (3.0 cr)
 or GC 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

General Requirements

Recommended freshman writing course(s) for this program:
 RHET 1101

Program Requirements

Students must complete 25 credits in either the management or education track. Both tracks include a practicum and elective courses.

Required Courses

Major Courses

ABUS 4023W - Communicating for Results, WI (3.0 cr)
 ABUS 4031 - Accessing and Using Information Effectively (3.0 cr)
 EDPA 5052 - Ethnic Groups and Communities: Families, Children, and Youth (3.0 cr)
 EHS 4011 - Concepts of Emergency Health Service (3.0 cr)
 EHS 4021 - EMS Planning and Fiscal Management (3.0 cr)
 PHIL 3305 - Medical Ethics (4.0 cr)
 PUBH 3102 - Issues in Environmental and Occupational Health, ENVT (3.0 cr)
 EHS 5031 - Basic principles of research in emergency health services. (3.0 cr)
 or HSM 3501 - Clinical Research Concepts and Practice (3.0 cr)
 ABUS 4021 - Small Group Behavior and Teamwork (3.0 cr)
 or EPSY 5152 - Psychology of Conflict Resolution (3.0 cr)
 or HRD 5302 - Managing Work Teams in Business and Industry (3.0 cr)
 or PA 5131 - Conflict Management: Readings in Theory and Practice (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Education Track

Complete 25 credits related to the track.

Required Courses for the Education Track sub-plan

ADED 5101 - Strategies for Teaching Adults (3.0 cr)
 EDPA 5036 - Ethics, Morality, and Values in Education (3.0 cr)
 EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
 EHS 4999 - Practicum (1.0-3.0 cr)

Individual electives to total 25 credits in the track.

EDPA 5021 - Historical Foundations of Modern Education (3.0 cr)
 or EDPA 5032 - Comparative Philosophies of Education (3.0 cr)
 or WHRE 5301 - Philosophy and Practice of Career and Technical Education (2.0 cr)
 ADED 5103 - Designing the Adult Education Program (3.0 cr)

Management Track

Complete 25 credits related to this track.

Required Courses

ABUS 4101 - Accounting for Managers (3.0 cr)
 ABUS 4104 - Management and Human Resource Practices (3.0 cr)
 EHS 4999 - Practicum (1.0-3.0 cr)
 HSM 4541 - Health Care Finance (3.0 cr)
 OMS 3001 - Introduction to Operations Management (3.0 cr)
 Individual electives to total 25 credits in the track.
 ABUS 4022 - Management in Organizations (3.0 cr)
 or MGMT 3001 - Fundamentals of Management (3.0 cr)
 ABUS 4012 - Problem Solving in Complex Organizations (3.0 cr)
 or OMS 3059 - Quality Management and Six Sigma (4.0 cr)

Information Technology Infrastructure B.A.Sc.

Requirements for this program are current for Summer 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 59.

This program requires summer terms.

Degree: Bachelor of Applied Science.

The B.A.Sc. with a major in information technology infrastructure is a course of study combining information technology infrastructure, math, science, and business curricula. Graduates are able to design, construct, and manage technology operations. Students choose a network and system administration, or database concentration area. They also choose one of four tracks: applied business, construction management, health systems management, or manufacturing technology.

Admission Requirements

Students must complete 45 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.5 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Physics I & II, calculus, and computer science lower division coursework must be completed or in progress—see program foundation courses.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements**Required Courses****Lower Division Curriculum**

Students who complete a physics sequence that is not designated as writing-intensive must also complete a research/technical writing course. Completing CSCI foundation courses at the U of M requires Calculus I & II.

Foundation Courses

Complete the following courses before admission to the major.

CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)
 CSCI 1901 - Structure of Computer Programming I (4.0 cr)
 CSCI 1902 - Structure of Computer Programming II (4.0 cr)

CSCI 2011 - Discrete Structures of Computer Science (4.0 cr)
 CSCI 2021 - Machine Architecture and Organization (4.0 cr)
 PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)
 PHYS 1102W - Introductory College Physics II, PHYS SCI/L, WI (4.0 cr)
 MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)

Other Required Courses

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
 One course that meets the LE requirements for social sciences or historical perspectives.
 One course that meets LE requirements in humanities or arts.
 COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or COMM 1102 - Introduction to Communication (3.0 cr)
 or COMM 3402 - Introduction to Interpersonal Communication, SSCI (3.0 cr)
 or GC 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
 or GC 1464 - Group Process and Discussion in a Multicultural Society, CD (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
 or ABUS 4021 - Small Group Behavior and Teamwork (3.0 cr)
 GC 1454 - Statistics, MATH (4.0 cr)
 or OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
 or STAT 1001 - Introduction to the Ideas of Statistics, MATH (4.0 cr)
 or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
 ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 or APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)

Core Courses

ABUS 4022 - Management in Organizations (3.0 cr)
 ABUS 4023W - Communicating for Results, WI (3.0 cr)
 CSCI 4061 - Introduction to Operating Systems (4.0 cr)
 CSCI 4211 - Introduction to Computer Networks (3.0 cr)
 INET 4051 - IT Infrastructure Operations (Capstone) (3.0 cr)
 INET 4081 - Introduction to Software Engineering (4.0 cr)
 INET 4153 - Telecommunications: Domestic and International Policy and Regulation (3.0 cr)

Required Tracks

Students are required to complete one of the following course groups.

Applied Business

ABUS 4043 - Project Management in Practice (3.0 cr)
 ABUS 4101 - Accounting for Managers (3.0 cr)
 ABUS 4102 - Operations in Manufacturing and Service Businesses (3.0 cr)
 Cognate electives - CSCI, IDSC, ABUS or INET (9 cr)
 MT 4201 - Statistical Process Control (3.0 cr)
 or ABUS 4032 - Quantitative Skills for Decision Making (3.0 cr)

-OR-

Construction Management

ABUS 4101 - Accounting for Managers (3.0 cr)
 CE 4101W - Project Management, WI (3.0 cr)
 CMGT 3001 - Introduction to Construction (3.0 cr)
 CMGT 4011 - Construction Documents and Contracts (3.0 cr)
 CMGT 4021 - Construction Planning and Scheduling (3.0 cr)
 CMGT 4022 - Construction Estimating (3.0 cr)
 MT 4201 - Statistical Process Control (3.0 cr)
 or ABUS 4032 - Quantitative Skills for Decision Making (3.0 cr)

-OR-

Health Systems Management

ABUS 4043 - Project Management in Practice (3.0 cr)
 ABUS 4102 - Operations in Manufacturing and Service Businesses (3.0 cr)
 HSM 3501 - Clinical Research Concepts and Practice (3.0 cr)

HSM 3521 - Health Care Delivery Systems (3.0 cr)
 HSM 4541 - Health Care Finance (3.0 cr)
 HSM 4561 - Health Care Administration and Management (3.0 cr)
 PHAR 3800 - Pharmacotherapy for the Health Professions (3.0 cr)

-OR-

Manufacturing Technology

ABUS 4043 - Project Management in Practice (3.0 cr)
 ABUS 4102 - Operations in Manufacturing and Service Businesses (3.0 cr)
 MT 4001 - Manufacturing Cost Accounting, Analysis, and Control (3.0 cr)
 MT 4011 - Design of Manufacturing Systems and Simulation (3.0 cr)
 MT 4012 - Manufacturing Processes (3.0 cr)
 MT 4201 - Statistical Process Control (3.0 cr)
 MT 4015 - Quality Engineering (3.0 cr)
 or MT 4025 - Computer Integrated Manufacturing (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Database Administration Concentration

Required Courses

INET 4031 - Systems Administration (4.0 cr)
 INET 4061 - Introduction to Data Warehousing (3.0 cr)
 INET 4131 - Advanced Database Design (3.0 cr)
 INET 4193 - Directed Study (1.0-4.0 cr)
 CSCI 4707 - Practice of Database Systems (3.0 cr)
 or INET 4707 - Practice of Database Systems (3.0 cr)

Network and Systems Administration Concentration

Required Courses

INET 4011 - Network Administration (4.0 cr)
 INET 4021 - Network Programming (4.0 cr)
 INET 4031 - Systems Administration (4.0 cr)
 INET 4041 - Emerging Network Technologies and Applications (3.0 cr)

Inter-College Program B.A.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 40 to 44.

Degree: Bachelor of Arts.

Founded in 1930, the Inter-College Program (ICP) embodies the University's commitment to individualized undergraduate education by providing cross-college, course/credit-based degree options. Drawing upon the curricular offerings of most of the University's colleges and departments, students design either a bachelor of arts (B.A.) or a bachelor of science (B.S.) degree incorporating a significant amount of coursework from at least two different colleges within the University system.

ICP is most appropriate for self-directed students whose educational backgrounds and career and intellectual interests require both a clear personal focus and a flexible interdisciplinary approach.

Interested students should attend a First Step meeting, small-group informational sessions held several times each week. Academic advisers provide a detailed introduction to the program and help students begin the planning process.

Admission Requirements

Students are considered for admission based on an individual review of their application, including key factors such as grade point average, grade trends, prerequisite course grades, and program match, as determined after consultation with an academic adviser. Preferred academic factors include an overall GPA that is 2.50 or higher, as well as the completions of 50 semester credits.

Students must develop a degree plan that includes:

- A description of academic and career goals
- An outline of courses proposed for the degree program
- Approval of the proposed degree plan from at least two designated faculty or departmental advisers

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language or 2 semesters of a single second language and 8 credits of related culture coursework.

ICP Program Options

Students must complete one of the following course groups.

Two Area Cross-College Program

This plan combines courses from two area cross-college programs, such as business and history, or educational psychology and French.

- Complete 20 approved credits of upper division coursework in one area of concentration.
- Complete 20 approved credits of upper division coursework in a second area of concentration.
- Complete 10 credits of elective coursework at the upper division.

-OR-

Three Area Cross-College Program

This plan combines courses from three area cross-college program, such as applied business, speech communication, and psychology; or housing, child psychology, and public health.

In addition to completing 20 approved upper division credits in one area and 12 in each of the other two areas, students also take 6 upper division elective credits.

- Complete 20 approved credits of upper division coursework in one area of concentration.
- Complete 12 approved credits of upper division coursework in a second area of concentration.
- Complete 12 approved credits of upper division coursework in a third area of concentration.
- Complete a total of 50 upper division credits.

-OR-

Thematic Cross-College Program

A thematic cross-college program, such as aging studies, integrates coursework from several departments: sociology, public health, family education, and social work. Thematic programs are appropriate only when students' objectives are clearly focused on one topic that cannot be pursued in a two- or three-area program.

- Complete 40 upper division credits on a theme.

Inter-College Program B.S.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 50.

Degree: Bachelor of Science.

Founded in 1930, the Inter-College Program (ICP) embodies the University of Minnesota's commitment to individualized undergraduate education by providing cross-college, course/credit-based degree options. Drawing upon the curricular offerings of most of the University's colleges and departments, students design either a bachelor of arts (B.A.) or a bachelor of science (B.S.) degree incorporating a significant amount of coursework from at least two different colleges within the University system.

ICP is most appropriate for self-directed students whose educational backgrounds and career and intellectual interests require both a clear personal focus and a flexible interdisciplinary approach.

Admission Requirements

Students are considered for admission based on an individual review of their application, including key factors such as grade point average, grade trends, prerequisite course grades, and program match, as determined after consultation with an academic adviser. Preferred academic factors include an overall GPA that is 2.50 or higher, as well as the completions of 50 semester credits.

Students must develop a degree plan that includes:

- A description of academic and career goals
- An outline of courses proposed for the degree program
- Approval of the proposed degree plan from at least two designated faculty or departmental advisers

Several times each week, ICP holds small-group informational sessions called First Step meetings. Academic advisers provide a detailed introduction to the program and help students begin the planning process.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

ICP Program Options

Students are required to complete one of the following course groups.

Two Area Cross-College Program

This plan combines courses from two area cross-college programs, such as business and history, or educational psychology and French.

- Complete 21 approved credits of upper division coursework in one area of concentration.
- Complete 21 approved credits of upper division coursework in a second area of concentration.
- Complete 8 supporting upper division credits.

-OR-

Three Area Cross-College Program

This plan combines courses from three area cross-college programs, such as applied business, speech communication, and psychology; or housing, child psychology, and public health.

- Complete 20 credits of upper division coursework in one area of concentration.
- Complete 15 credits of upper division coursework in a second area of concentration.
- Complete 15 credits of upper division coursework in a third area of concentration.

-OR-

Thematic Cross-College Program

A thematic cross-college program integrates coursework from several departments. Thematic programs are appropriate only when students' objectives are clearly focused on one topic that cannot be pursued in a two- or three-area program.

Complete 50 upper division credits with no more than 15 credits in any one department.

Joint Military Science Leadership Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18 to 20.

This minor provides students with basic concepts and principles of military science and the art of leadership. Areas of study include citizenship, military history, values, ethics, integrity, honor, responsibility, management, and leadership skills. Students gain practical leadership experience, develop self-discipline, and gain confidence—all of which are valuable qualities when applied to service in a military or civilian career. In consultation with the ROTC programs, this minor is now distinct from participation in ROTC, is open to all qualified students, and does not require physical training.

Admission Requirements

Significant practical leadership experience.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students choose one of four program tracks: Aerospace Science, Military Science, Naval Science-Navy, or Naval Science-Marines.

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Aerospace Science

Required Courses

The history requirement can be satisfied by the completion of AIR 1204 and AIR 1205 or by the completion of Air Force ROTC Field Training.

AIR 1204 - History of Airpower and Communication Skills (1.0 cr)

AIR 1205 - Quality Air Force, Group Leadership Problems, and Presentation Techniques (1.0 cr)

AIR 3301 - Air Force Leadership, Quality, and Communication (3.0 cr)

AIR 3302 - Air Force Officership, Quality, and Communication (3.0 cr)

AIR 3401 - National Security Policy (3.0 cr)

AIR 3402 - Preparation for Active Duty (3.0 cr)

Complete a 4-credit philosophy, rhetoric, or leadership course approved by the Professor of Aerospace/Chair of the Department of Aerospace Science.

Military Science

Required Courses

HIST 3891 - American Military History (4.0 cr)

MIL 3130 - Leading Small Organizations I (3.0 cr)

MIL 3131 - Leading Small Organizations II (3.0 cr)

MIL 3140 - Leadership Challenges and Goal Setting (3.0 cr)

MIL 3141 - Transition to Lieutenant (3.0 cr)

Complete a 4-credit philosophy, rhetoric, or leadership course approved by the Professor of Military Science/Chair of the Department of Military Science.

Naval Science—Marines

Required Courses

NAV 1102 - Seapower and Maritime Affairs (3.0 cr)

NAV 3310 - Evolution of Warfare (3.0 cr)

NAV 4401W - Leadership and Management I, WI (3.0 cr)

NAV 4402W - Leadership and Ethics, C/PE, WI (3.0 cr)

NAV 4410 - Amphibious Warfare (3.0 cr)

Complete a 4-credit philosophy, rhetoric, or leadership course approved by the Professor of Military Science/Chair of the Department of Naval Science.

Naval Science—Navy

Required Courses

NAV 1102 - Seapower and Maritime Affairs (3.0 cr)

NAV 2201 - Ship Systems I: Naval Engineering (3.0 cr)

NAV 3301 - Navigation I: Piloting and Celestial Navigation (3.0 cr)

NAV 4401W - Leadership and Management I, WI (3.0 cr)

NAV 4402W - Leadership and Ethics, C/PE, WI (3.0 cr)

Complete a 4-credit philosophy, rhetoric, or leadership course approved by the Professor of Military Science/Chair of the Department of Naval Science.

Manufacturing Technology B.A.Sc.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 51.

This program is 10 terms (5 years) long.

Degree: Bachelor of Applied Science.

The B.A.Sc. with a major in manufacturing technology prepares students for career growth in the manufacturing industry. Students learn new skills in the areas of manufacturing systems and processes, computer technology, quality, operations, project management, business and finance, and interpersonal communication. Graduates are prepared to work as project managers, process engineers, materials managers, lead technicians, order process analysts, facilities engineers, and business analysts. The manufacturing technology major was designed around the needs of working adults who are part-time students.

Admission Requirements

Students must complete 45 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)

or GC 1166 - Principles of Chemistry (3.0 cr)

ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)

or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

MATH 1031 - College Algebra and Probability, MATH (3.0 cr)

or MATH 1051 - Precalculus I (3.0 cr)

MATH 1142 - Short Calculus, MATH (4.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

PHYS 1102W - Introductory College Physics II, PHYS SCI/L, WI (4.0 cr)

or PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

GC 1454 - Statistics, MATH (4.0 cr)

or OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)

or STAT 1001 - Introduction to the Ideas of Statistics, MATH (4.0 cr)

or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Program Requirements

Students are encouraged to complete an internship or directed study during their final year in the program.

Required Courses

Major Courses (Lower Division)

In addition to the courses listed below, manufacturing technology students must complete the University's freshman writing requirement.

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)

COMM 1101 - Introduction to Public Speaking (3.0 cr)

or COMM 3402 - Introduction to Interpersonal Communication, SSCI (3.0 cr)

or COMM 3605W - Persuasive Speaking and Speech Writing, WI (3.0 cr)

or GC 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)

AEM 2011 - Statics (3.0 cr)

or BP 3001 - Statics, Mechanics, and Structural Design (4.0 cr)

or BP 3101 - Introductory Statics and Structures for Construction Management (3.0 cr)

Major Courses (Upper Division)

ABUS 4022 - Management in Organizations (3.0 cr)

ABUS 4023W - Communicating for Results, WI (3.0 cr)

ABUS 4043 - Project Management in Practice (3.0 cr)

ABUS 4102 - Operations in Manufacturing and Service Businesses (3.0 cr)

MT 4001 - Manufacturing Cost Accounting, Analysis, and Control (3.0 cr)

MT 4011 - Design of Manufacturing Systems and Simulation (3.0 cr)

MT 4012 - Manufacturing Processes (3.0 cr)

MT 4015 - Quality Engineering (3.0 cr)

MT 4025 - Computer Integrated Manufacturing (3.0 cr)
 MT 4201 - Statistical Process Control (3.0 cr)
 MT 4501 - Manufacturing Product/System Design I (3.0 cr)

Electives

Take 18 or more credit(s) from the following:

BUS 3xxx
 BUS 4xxx
 MT 3xxx
 MT 4xxx

Program for Individualized Learning B.A.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 50 to 70.

Degree: Bachelor of Arts.

This program challenges students to think alternatively and holistically about learning. A set of standards, called graduation criteria, describes the basic academic structure of the bachelor's degree. These criteria, rather than number of credits, provide the framework for structuring the degree program and assessing its success.

Students use the graduation criteria to build their own degree programs. Students are encouraged to be creative and to use a variety of learning activities (courses and projects) to satisfy each criterion. Courses that have already been completed may be used to fulfill the graduation criteria; students can also demonstrate college-level learning achieved through work, experience, and independent study. New learning activities may explore untapped interests or build on prior learning. These activities may include independent projects, internships, work-based projects, and classroom and correspondence coursework.

A PIL degree requires achievement and excellence equal to other baccalaureate programs at the University of Minnesota. The graduation criteria require in-depth knowledge in an area of concentration (depth criteria) and broad learning in the liberal arts (breadth criteria). Regardless of the area of concentration, the B.S. emphasizes the student's field of study, while the B.A. emphasizes broader learning in the breadth criteria.

Admission Requirements

To be considered for admission, students must submit an application that documents their ability to undertake a self-directed, individualized degree program. The program seeks students who: know why they are seeking a bachelor's degree and why PIL is a sound choice for them; can describe their proposed academic area of study; and write well in English.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

The program serves students who want to develop an area of concentration with some or all of the following attributes:

- Focused on interdisciplinary or multidisciplinary studies, or a specialized study within a broader academic context
- Built on the academic strengths of the University
- Designed as a foundation for graduate or professional education

- Not readily available as a structured undergraduate degree program

The area of concentration, traditionally called a major, should reflect balance, depth, and quality in a field of study. The student's area of concentration must fulfill the following criteria:

- **Primary Area Studies:** Through learning activities in their primary area of study, students acquire familiarity with the basic literature and vocabulary of their field, knowledge of its main theories and methods of investigation, ability to use the skills of the field, and an awareness of its relationship to contemporary and future society.
- **Major Project:** As a culmination of study in their area of concentration, students complete a major project that reflects substantive understanding of their field of study.
- **Extended Studies in the Liberal Arts:** Studies involve acquiring in-depth and advanced understanding of a focused liberal arts area; an interdisciplinary approach may also be proposed. Learning should include critical and theoretical understanding and upper division knowledge. This work goes beyond the basic requirements reflected in the LE requirements, as interpreted in the Breadth and Learning Matrix requirements in PIL.

Required Courses

Major Registrations

The PIL program is not credit-based, but it uses credits to ensure that registrations are recognized within the University system and that students qualify for residency and financial aid requirements. Tuition credits attached to registrations are not the same as conventional coursework credits and are not used to measure progress in the program or readiness to graduate, nor are they necessarily transferable to other programs or colleges. Additional registrations in PIL 3251 may be required.

PIL 3211 - Degree Planning (5.0 cr)
 PIL 3251 - Project Registration (5.0 cr)
 PIL 3281 - Major Project (5.0 cr)
 PIL 3291 - Graduation Preparation (5.0 cr)

Most students will also need to register multiple times in one or both of the following:

PIL 3200 - Continuing Studies (1.0-2.0 cr)
 PIL 3252 - Program Active (1.0-5.0 cr)

Program for Individualized Learning B.S.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 50 to 70.

Degree: Bachelor of Science.

This program challenges students to think alternatively and holistically about learning. A set of standards, called graduation criteria, describes the basic academic structure of the bachelor's degree. These criteria, rather than number of credits, provide the framework for structuring the degree program and assessing its success.

Students use the graduation criteria to build their own degree programs. The area of concentration, traditionally called a major, should reflect balance, depth, and quality in a field of study. The student's area of concentration must fulfill the following criteria:

Primary Area Studies: Through learning activities in their primary area of study, students acquire familiarity with the basic literature and vocabulary of their field, knowledge of its main theories and methods of investigation, ability to use the skills of the field, and an awareness of its relationship to contemporary and future society.

Major Project: As a culmination of study in their area of concentration, students complete a major project that reflects substantive understanding of their field of study.

Extended Studies in the Area of Concentration: Students complete learning activities that bring a broader perspective to their area of concentration. These studies add knowledge that complements and expands on the primary area studies.

Students also complete the University's liberal education requirements as reflected in the PIL Breadth and Learning Matrix requirements.

Required Courses

The PIL program is not credit-based, but it uses credits to ensure that registrations are recognized within the University system and that students qualify for residency and financial aid requirements. Tuition credits attached to registrations are not the same as conventional coursework credits and are not used to measure progress in the program or readiness to graduate, nor are they necessarily transferable to other programs or colleges. Additional registrations in PIL 3251 may be required.

PIL 3211 - Degree Planning (5.0 cr)

PIL 3251 - Project Registration (5.0 cr)

PIL 3281 - Major Project (5.0 cr)

PIL 3291 - Graduation Preparation (8.0 cr)

Students may be required to register one or more times for the following.

PIL 3200 - Continuing Studies (1.0-2.0 cr)

Radiation Therapy B.A.Sc.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 69.

This program requires summer terms.

Degree: Bachelor of Applied Science

The B.A.Sc. with a major in radiation therapy provides leading-edge medical and technical courses and clinical experience in top-ranking radiation oncology departments. Radiation therapy graduates are prepared to meet the changing demands of new technologies and advancements in treatment techniques and meet national certification requirements. Didactic and clinical experiences will sharpen critical thinking and problem solving skills, and provide the knowledge base in management and education that is crucial to future advancement.

The major is offered in two locations: Rochester and the Twin Cities. In Rochester, the University of Minnesota partners with the Mayo School of Health Sciences (MSHS). Classes and clinical experiences are offered at the Mayo Clinic and other facilities within the Mayo Health System. In the Twin Cities, this program is offered in partnership with University of Minnesota Medical Center Fairview (UMMC) School of Radiation Therapy. Classes are conducted at UMMC with clinicals at UMMC and other health care sites in the Twin Cities.

Admission Requirements

Students must complete 45 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Each partner program has additional specific requirements. All general education and prerequisite coursework must be completed or in progress at time of admission, including general education and preparatory courses (both locations) and partner-specific courses.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at admissions.tc.umn.edu.

Required Courses for Admission

Preparatory Courses (both locations)

These courses are part of the general education and prerequisite courses. They must be completed or in progress at the time of application for admission. Biology is only required if it is a prerequisite for other science courses; biology is not a prerequisite for the major. On the Twin Cities campus, COMM 3402 satisfies the Oral Communication requirement. Additional program-specific general education and prerequisite courses are listed under each sub-plan.

COMM 1101 - Introduction to Public Speaking (3.0 cr)

or COMM 3605W - Persuasive Speaking and Speech Writing, WI (3.0 cr)
 or GC 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
 MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
 or MATH 1051 - Precalculus I (3.0 cr)
 MATH 1151 - Precalculus II, MATH (3.0 cr)
 GC 1281 - General Psychology, SSCI (4.0 cr)
 or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
 BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
 INMD 3001 - Human Anatomy (3.0 cr)
 INMD 3002 - Human Anatomy Laboratory (1.0 cr)
 PHSL 1001 - Human Physiology (3.0 cr)
 PHSL 3051 - Human Physiology (4.0 cr)

Program Requirements

Major Courses

ABUS 4041 - Dynamics of Leadership (3.0 cr)
 HSM 3501 - Clinical Research Concepts and Practice (3.0 cr)
 HSM 3521 - Health Care Delivery Systems (3.0 cr)
 HSM 4501 - Writing for the Health Professions (3.0 cr)
 HSM 4541 - Health Care Finance (3.0 cr)
 HSM 4561 - Health Care Administration and Management (3.0 cr)
 HSM 4581 - Teaching in the Health Care Setting (3.0 cr)
 PHAR 3800 - Pharmacotherapy for the Health Professions (3.0 cr)
 RTT 3501 - Introduction to Radiation Therapy (2.0 cr)
 RTT 3521 - Patient Care in Radiation Oncology (2.0 cr)
 RTT 3541 - Pathology (1.0 cr)
 RTT 3561 - Cross-Sectional Anatomy (2.0 cr)
 RTT 3581 - Principles and Practices of Radiation Therapy I (4.0 cr)
 RTT 3596 - Clinical Practicum I (3.0 cr)
 RTT 3696 - Clinical Practicum II (3.0 cr)
 RTT 4511 - Dosimetry and Treatment Planning (4.0 cr)
 RTT 4581 - Principles and Practices of Radiation Therapy II (4.0 cr)
 RTT 4596 - Clinical Practicum III (6.0 cr)
 RTT 4601 - Project (1.0 cr)
 RTT 4696 - Clinical Practicum IV (3.0 cr)
 RTT 4796 - Clinical Practicum V (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

University of Minnesota Medical Center Fairview

The following are required for admission to this program:

- Proof of immunization (records reviewed by UMMC Employee Health)
- CPR certification
- Medical physical
- Proof of health insurance
- FUMC School of Radiation Therapy application
- A minimum of 20 hours of documented shadowing/observation in an approved radiation therapy department
- Interview with Admission Committee
- Vulnerable Adults Act Background Check
- A signed Essential Functions form indicating student understanding of the essential functions for successful completion of the Radiation Therapy program
- Computer proficiency

Required Courses

UMMC Courses

Students who have earned a radiographer certificate may not need to complete these courses, as determined by the UMMC program. Students should consult their University of Minnesota adviser. RTT 2001 and 2002 may be completed after admission to the major.

PHIL 1003W - Introduction to Ethics, OH, WI (4.0 cr)
 or PHIL 3305 - Medical Ethics (4.0 cr)
 CNES 1046 - Technical Terminology for the Health Professions (3.0 cr)
 or PHAR 1002 - Health Sciences Terminology (2.0 cr)
 or PHAR 5201 - Health Sciences Applied Terminology (2.0 cr)
 PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)
 or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 RTT 2001 - Radiation Therapy: Radiation Exposure, Imaging, Safety, and Basic Care (1.0 cr)
 RTT 2002 - Radiation Therapy: Radiation Exposure, Imaging, Safety, and Basic Care Lab (1.0 cr)

Major Courses

RTT 3120 - Radiation Physics I (3.0 cr)
 RTT 3121 - Radiation Physics II (3.0 cr)
 RTT 3140 - Radiation Therapy: Radiobiology (2.0 cr)

Mayo School of Health Sciences

The following are required for admission:

- Completion of an accredited program in radiography with a GPA of 3.00 or higher
- MSHS School of Radiation Therapy application
- Vulnerable Adults Act Background Check
- Documentation of radiation oncology observation experience
- Fluency in written and spoken English; if English is a second language, fluency must be demonstrated objectively through satisfactory performance (within the last two years) on the TOEFL examination or the Michigan Test of English Language Proficiency
- Documentation of current health status and immunizations according to Mayo Clinic student policy
- Minnesota state law mandatory background checks

Required Courses

MSHS Courses

The general education requirement may be met by an ethics course approved by an adviser.

Major Courses

RTT 3601 - Clinical Quality Assurance and Computer Applications (1.0 cr)
 RTT 3551 - Radiation Oncology Physics (3.0 cr)
 RTT 3701 - Advanced Radiobiology and Radiation Protection (3.0 cr)

Respiratory Care B.A.Sc.

Requirements for this program are current for Summer 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 64.

This program requires summer terms.

Degree: Bachelor of Applied Science.

The B.A.Sc. with a major in respiratory care prepares students to become respiratory care practitioners with advanced clinical and professional skills. This program, offered in partnership with Mayo School of Health Sciences in Rochester, combines professional, medical, and technical courses. Courses and clinical experiences, with options for specialized clinical study, are offered at Mayo Clinic and other facilities within the Mayo Health System. Graduates will be ready to meet national certification requirements. Advanced practitioner respiratory therapists are prepared to serve as consultants to physicians, and other medical staff.

Admission Requirements

Students must complete 9 courses before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Students apply for admission to both the University of Minnesota and Mayo School of Health Sciences. The following items are required for admission to Mayo School of Health Sciences:

- No grade lower than C- in each preparatory course
- Overall GPA or 2.20 in all preparatory courses
- Proof of immunization (records reviewed by MSHS Employee Health)
- CPR certification
- Documentation of current health status and immunizations according to Mayo Clinic student policy
- Personal medical plan coverage
- Vulnerable Adults Act background check
- Complete the MSHS Respiratory Care application
- Interview with Admissions Committee
- Computer skills

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Foundation Courses I

See program requirements for additional foundation courses to be completed before admission.

BIOC 1001 - Elementary Biochemistry (3.0 cr)

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)

BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or VBS 2032 - General Microbiology With Laboratory (4.0 cr)

PHSL 1001 - Human Physiology (3.0 cr)

or PHSL 3051 - Human Physiology (4.0 cr)

PHYS 1012 - Elementary Physics (4.0 cr)

or PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1111 - Basic Physics I (3.0 cr)

Take one of the following pairs of courses

INMD 3001 - Human Anatomy (3.0 cr)

INMD 3002 - Human Anatomy Laboratory (1.0 cr)

or

INMD 3301 - Human Anatomy (3.0 cr)

INMD 3302 - Human Anatomy Laboratory (1.0 cr)

Program Requirements

Required Courses

Foundation Courses II

These courses must also be completed before admission.

MATH 1031 - College Algebra and Probability, MATH (3.0 cr)

GC 1281 - General Psychology, SSCI (4.0 cr)

or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

PHIL 1003W - Introduction to Ethics, OH, WI (4.0 cr)

or PHIL 1003V - Honors: Introduction to Ethics, OH, WI, H (4.0 cr)

or PHIL 3305 - Medical Ethics (4.0 cr)

COMM 1101 - Introduction to Public Speaking (3.0 cr)

or COMM 1101H - Honors: Introduction to Public Speaking, H (3.0 cr)

or GC 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)

or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

CNES 1046 - Technical Terminology for the Health Professions (3.0 cr)

or PHAR 1002 - Health Sciences Terminology (2.0 cr)

or PHAR 5201 - Health Sciences Applied Terminology (2.0 cr)

Major Courses

ABUS 4041 - Dynamics of Leadership (3.0 cr)

HSM 3501 - Clinical Research Concepts and Practice (3.0 cr)

HSM 3521 - Health Care Delivery Systems (3.0 cr)

HSM 4501 - Writing for the Health Professions (3.0 cr)

HSM 4541 - Health Care Finance (3.0 cr)

HSM 4561 - Health Care Administration and Management (3.0 cr)

HSM 4581 - Teaching in the Health Care Setting (3.0 cr)

HSM 4611 - Allied Health Grand Rounds (1.0 cr)

PHAR 3800 - Pharmacotherapy for the Health Professions (3.0 cr)

RC 2011 - Foundations for Clinical Practice of Respiratory Care (4.0 cr)

RC 2021 - Patient Care Techniques (2.0 cr)

RC 3101 - Respiratory Care Modalities and Equipment I (4.0 cr)

RC 3102 - Respiratory Care Modalities and Equipment II (4.0 cr)

RC 3201 - Cardiopulmonary Patient Assessment (4.0 cr)

RC 3301 - Clinical Practice I (4.0 cr)

RC 3302 - Clinical Practice II (4.0 cr)

RC 3401 - Seminar in Respiratory Care I: Case Reports and Fundamentals of Research (1.0 cr)

RC 3402 - Seminar in Respiratory Care II: Case Reports and Fundamentals of Research (1.0 cr)

RC 3501 - Advanced Cardiopulmonary Respiratory Physiology and Pathophysiology (3.0 cr)

RC 4111 - Advanced Adult Respiratory Critical Care Techniques (3.0 cr)

RC 4301 - Seminar: Research Project and Publication (1.0 cr)

RC 4496 - Subspecialty Clinical Practicum in Advanced Respiratory Care I (3.0 cr)

RC 4596 - Subspecialty Clinical Practicum in Advanced Respiratory Care II (3.0 cr)

Take exactly 2 course(s) from the following:

RC 4201 - Subspecialization in Respiratory Care: Advanced Perinatal and Pediatric Respiratory Care (2.0 cr)

RC 4202 - Subspecialization in Respiratory Care: Advanced Cardiopulmonary Diagnostics (2.0 cr)

RC 4203 - Subspecialization in Respiratory Care: Cardiopulmonary Rehabilitation, Disease Prevention, Case Mgmt (2.0 cr)

This is the Dental Hygiene section of the 2006-2008 Undergraduate Catalog for the University of Minnesota, Twin Cities campus.

Dental Hygiene

General Information

The University of Minnesota School of Dentistry improves oral and craniofacial health by educating clinicians and scientists who translate knowledge and experience into clinical practice. The school is committed to

- graduating professionals who provide the highest quality care and service to the people of the state of Minnesota and the world
- discovering new knowledge through research, which will inspire innovation in the biomedical, behavioral, and clinical sciences
- providing oral health care to a diverse patient population in a variety of settings.

The School of Dentistry celebrated its centennial in 1988. In its long history, the school has developed an international reputation for education, research, and service. The School of Dentistry's professional program in dental hygiene, established in 1919, has an illustrious record of accomplishment and innovation and is one of the country's premiere programs. It is fully accredited by the Commission on Dental Accreditation and is the only dental hygiene program in Minnesota that grants a baccalaureate degree and is affiliated with a school of dentistry.

Dental hygienists are preventive oral health professionals who have graduated from an accredited dental hygiene program in an institution of higher education and are licensed by states to practice dental hygiene. They provide educational, clinical, research, administrative, consumer advocacy, change agent, and therapeutic services supporting total health through the promotion of optimal oral health.

Dental hygienists practice in settings such as private dental offices and clinics; federal, state, and local health departments or associated institutions; hospitals and long-term care facilities; school districts or departments of education; educational programs for dental, dental hygiene, and dental assisting students; private business or industry; correctional facilities; private and public centers for pediatric, geriatric, and other groups or individuals with special needs; and health maintenance organizations.

The dental hygiene curriculum seeks to train students in a variety of dental hygiene roles and health care settings.

The program has developed a new year-round calendar schedule, which will allow students to earn a bachelor of science degree in three years instead of four. It emphasizes a strong commitment to community outreach and service, and to intellectual development and critical thinking. Graduates complete a baccalaureate degree that blends a solid dental hygiene education with the biological, behavioral, and social sciences, and the liberal arts.

The Division of Dental Hygiene also offers a baccalaureate degree completion program for graduates of accredited associate degree programs in dental hygiene who wish to earn a baccalaureate degree.

Admission

The Division of Dental Hygiene sets its standards and requirements for admission. A strong interest in the natural sciences, and the social and behavioral sciences is required. The division recommends that applicants have a genuine interest in human services and promoting public health and welfare.

The dental hygiene curriculum consists of the preprofessional program in CLA or its equivalent at another regionally accredited institution and the professional program in the School of Dentistry, Division of Dental Hygiene.

Admission to the preprofessional program requires the student to meet the admissions criteria of individual colleges within the University and is subject to CLA's academic regulations or their equivalent at another institution. Admission to the preprofessional program does not guarantee admission to the professional program.

Admission to the professional program is competitive and occurs once a year for fall semester entry. Applications are accepted from September 15 until December 15. Applications received after the deadline are not considered.

Requirements for application include: high school graduate; ACT, PSAT, or SAT scores; transcripts of all high school and college courses; minimum 2.00 GPA (cumulative, preprofessional, and science coursework); and evidence of plans for completion of specified preprofessional coursework before proposed entry. Documentation indicating completion of all required preprofessional courses must be submitted to the Division of Dental Hygiene by August 15 of year of proposed entry.

Applicants must complete the University of Minnesota's high school preparation requirements prior to entry into the professional program. See Freshman Admission in the General Information section of this catalog.

The University's liberal education requirements must be completed prior to graduation from the program. If not completed prior to entry into the program, these requirements must be completed in conjunction with the curriculum while enrolled in the program.

Students enrolled at the University, Twin Cities campus or students transferring from the University of Minnesota coordinate campuses of Crookston, Duluth, or Morris, must complete an *Application for Undergraduate Change of College* form. This form is available from the Office of the Registrar, either on the Twin Cities campus or at the home campus. The form with instructions is also available as a PDF on the Web at <http://onestop.umn.edu/onestop/forms.html>. This form, along with any transcripts from schools outside the University system, must be turned in to the Office of the Registrar at the address given on the Change of College instruction sheet.

Students attending other regionally accredited colleges and universities apply by completing the Application for Undergraduate Admission at <http://admissions.tc.umn.edu> on the Web or from the Office of Admissions. Application forms are available from the Office of Admissions, University of Minnesota, 240 Williamson Hall, 231 Pillsbury Drive S.E., Minneapolis, MN 55455, or call 612-625-2008.

The Division of Dental Hygiene requires all applicants who are not native speakers of English to submit written evidence of a Test of English as a Foreign Language (TOEFL) score. A TOEFL score of at least 79 on the Internet-based version (550 on the written version or 213 on the computer-based exam) is required. The TOEFL must be administered within two years before the date of application to the Division of Dental Hygiene.

To register for the TOEFL, contact the agency that handles TOEFL registration in your country or write to the Educational Testing Service (Box 899, Princeton, NJ 08541) at least 10 weeks before any scheduled test date.

Students admitted to the Division of Dental Hygiene and who require accommodation for a disability should contact the Office of Disability Services at 612-626-7379 before the beginning of the semester of entry into the program.

Degrees

The School of Dentistry Division of Dental Hygiene offers two program tracks leading to a bachelor of science degree in dental hygiene.

The B.S. degree program track is designed for entry-level students; the B.S. degree-completion program track is tailored to students who have completed an associate degree program in dental hygiene at a regionally accredited institution and who want to earn a baccalaureate degree.

Policies

Students who have been admitted to the program must submit documentation of immunizations required by the University and are strongly encouraged to have completed a physical assessment examination. Students must provide evidence of completion of a Hepatitis B vaccination during the first semester in the program.

The American Dental Association Commission on Dental Accreditation requires that all students be able to perform basic life support procedures, including cardiopulmonary resuscitation, and manage other medical emergencies. In compliance with this standard, students are required to take an American Heart Association Basic Life Support Training Course provided by the University of Minnesota Life Support Program and scheduled during the sophomore and senior year orientation sessions.

Applicants to the program need to be aware of the Minnesota Dental Practice Act HIV and HbV Prevention Policy that affects applicants/students who are HIV and/or HbV positive. The Practice Act stipulates that:

- A licensed dental hygienist who is diagnosed as infected with HIV and/or HbV must report that information to the Commissioner of Health promptly and as soon as medically necessary for disease control purposes, but no later than 30 days after learning of the diagnosis or 30 days after becoming licensed in the state.
- The Minnesota Board of Dentistry may refuse to grant a license or may impose disciplinary or restrictive action against an HIV/HbV infected dental hygienist who fails to comply with any of the requirements of the Board or with any monitoring or reporting requirement.

- After receiving a report that a regulated person is infected with HIV and/or HbV, the Board of Dentistry or the Commissioner of health shall establish a monitoring plan for the infected dental hygienist. This plan may address the scope of practice of the individual, required submission of reports and other provisions that the Board deems reasonable.

Students in the professional program are subject to the regulations established by the Division of Dental Hygiene and must maintain satisfactory academic process.

Satisfactory performance is considered to be not only a passing level in scientific and clinical skills together with theoretical knowledge, but also ethical integrity and honesty.

Students not achieving satisfactory progress may be placed on scholastic probation upon recommendation of the Student Scholastic Standing Committee. Students' work is considered unsatisfactory when they earn less than a C- grade average (1.67 grade points for each credit) for any course in a given year or semester. If students achieve an unsatisfactory grade in a course, remedial work in the course may be provided, if possible; if not, students must repeat the course the next time it is offered. Unsatisfactory grades in two or more courses are sufficient basis for dismissal.

Dental hygiene students may be required to undergo a criminal background study (Criminal Background Study Under State Law, Minnesota Vulnerable Adult Act, as amended 1995 and 1996), in order to have direct contact with patients and residents in hospitals, extended care facilities, and other health care facilities licensed by the Minnesota Department of Health. Failure to pass this background study is grounds for dismissal from the program.

Graduation Requirements

The bachelor's degree will be recommended for students who have been formally admitted to the entry-level or the degree-completion program, who earn a minimum GPA of 2.00, and have completed all of the required work and the total number of credits specified for the curriculum.

Students with a minimum GPA of 3.75 in upper division courses are granted their degree "with distinction." Students with a minimum GPA of 3.90 in upper division courses are granted their degree "with high distinction."

Licensure and Placement

Graduates are eligible for licensure after successfully completing a written National Board Dental Hygiene Examination and a clinical examination, both of which are given on the University's Minneapolis campus. The licensed dental hygienist practices in accordance with the requirements of individual state dental practice acts. In many states, a dental hygienist must participate in continuing education courses for license renewal.

The School of Dentistry provides placement assistance to dental hygiene graduates through the Minnesota Dental Placement Service at 612-626-0171.

Advising

The Division of Dental Hygiene offers advising services to students currently enrolled or interested in dental hygiene. Group advising sessions are held the first Tuesday of each month, on an appointment basis. To schedule an appointment with a dental hygiene academic adviser, call 612-625-9121 or write 9-372 Malcolm Moos Health Sciences Tower, 515 Delaware Street S.E., Minneapolis, MN 55455; fax 612-625-1605, or e-mail krue0191@umn.edu.

The Division of Dental Hygiene provides a student support program to enhance the success of its students. Student performance is monitored and academic assistance is provided through tutoring and consultation. Counseling and advising are available through the division, University Counseling and Consulting Services, and faculty of the student's choosing.

Special Learning Opportunities and Resources

Community Outreach Clinics—Dental hygiene students participate in a number of off-campus Twin Cities and out-state Minnesota week-long community clinics providing dental hygiene care to populations who typically do not have sufficient access to dental care.

Summer Research Fellowships—The School of Dentistry Summer Research Fellowship Program provides research experiences for exceptional dental hygiene and dental students with an interest in research careers and postgraduate research training.

Sophomore and junior dental hygiene students are invited to apply for research fellowship positions in the spring of each year. If selected, they are assigned to work with a faculty mentor for the summer. During a ten-week period, students collect and analyze data, undertake a structured research project, and prepare a formal report. Research fellows attend a weekly research training seminar where they learn research methods. They also evaluate selected journal articles and review abstracts and oral presentations of former trainees. About 20 students receive stipends each summer.

Continuing Dental Hygiene Education—Students are encouraged to participate in selected continuing education courses during their senior year on a space-available basis. These courses expose seniors to a broad scope of information and technology from a variety of local and national speakers. Students gain by selecting their own educational experiences and interacting with practicing dental hygienists and dentists.

International Programs

Dental hygiene encourages students to participate in an international study experience as part of their degree program. See Learning Abroad in the General Information section of this catalog.

Scholarships and Awards

Several scholarships and awards are presented annually by division faculty to selected dental hygiene students. For more information, call 612-625-9121.

Student Organizations

School of Dentistry Student Council—Each year dental hygiene and dental students elect the School of Dentistry Council of Students, which discusses matters of mutual interest with faculty advisers and promotes many projects and activities.

Student Affairs Committee—This committee is composed of dental hygiene and dental students and faculty members and is responsible for students' concerns such as membership in local and national organizations, ethics, counseling, tutorial assistance, questions on educational programs, financial aid, publications, housing, and alumni relations.

Student American Dental Hygienists' Association—Dental hygiene students participate in the student chapter of the national association, which represents concerns and issues related to the dental hygiene profession. Membership fees entitle students to various journals and special services.

Council for Health Interdisciplinary Participation (CHIP)—Dental hygiene students are encouraged to participate in the activities of the Academic Health Center CHIP.

Dental Hygiene

Degree Program

Dental Hygiene B.S.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 95.

This program requires summer terms.

The program blends a solid dental hygiene education with study of the biological, behavioral, and social sciences, and liberal arts. Two program tracks are available, both leading to a B.S. degree in dental hygiene: B.S. degree program, for entry-level students; and B.S. degree completion program, for students who have completed an associate degree program in dental hygiene at a regionally accredited institution and who want to earn a baccalaureate degree.

Admission Requirements

Students must complete 32 credits before admission to the program.

Freshmen students are usually admitted to pre-major status before admission to this major.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Pre-Dental Hygiene Program

Students in the B.S. degree completion program who have not completed these requirements as part of their associate degree should contact a dental hygiene adviser.

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
COMM 1101 - Introduction to Public Speaking (3.0 cr)
FSCN 1112 - Principles of Nutrition, ENVT (3.0 cr)
INMD 3001 - Human Anatomy (3.0 cr)
PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
STAT 1001 - Introduction to the Ideas of Statistics, MATH (4.0 cr)

Program Requirements

Required Courses

Sophomore Year Courses

DH 2235 and 3134 should be taken during May Term of the second year.

BIOC 1001 - Elementary Biochemistry (3.0 cr)
DH 2111 - Dental Anatomy (2.0 cr)
DH 2121 - The Dental Hygiene Care Process Clinical Application I (5.0 cr)
DH 2132 - Head and Neck Anatomy (1.0 cr)
DH 2210 - General and Oral Pathology (2.0 cr)
DH 2211 - Oral Histology and Embryology (2.0 cr)
DH 2212 - Dental Hygienist-Patient Relationship (2.0 cr)
DH 2221 - Periodontology (3.0 cr)
DH 2222 - Dental Hygiene Care Process Clinical Application II (1.0-4.0 cr)
DH 2231 - Cariology (2.0 cr)
DH 2235 - Oral and Maxillofacial Radiology (2.0 cr)
DH 3134 - Dental Hygiene Care for Pediatric Patients (1.0 cr)

MICB 4001 - Microorganisms and Disease (2.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

Junior Year Courses

DH 3111 - Biomaterials and the Principles of Restorative Techniques I (5.0 cr)
DH 3123 - The Dental Hygiene Care Process Clinical Application III (4.0 cr)
DH 3126 - Oral and Maxillofacial Radiology Clinic I (0.0 cr)
DH 3131 - Periodontology I Lecture (1.0 cr)
DH 3132 - Applied Nutrition in Dental Hygiene Care (1.0 cr)
DH 3133 - Pharmacology (2.0 cr)
DH 3135 - Oral and Maxillofacial Radiology: Theory, Principles, and Radiographic Analysis (2.0 cr)
DH 3221 - Local Anesthesia and Pain Management (2.0 cr)
DH 3224W - The Dental Hygiene Care Process Clinical Application IV, WI (1.0-4.0 cr)
DH 3227 - Oral and Maxillofacial Radiology Clinic II (0.0 cr)
DH 3231W - Research Methods in Dental Hygiene, WI (3.0 cr)
DH 3235 - Dental Hygiene Care for the Geriatric Patient and the Patient With Special Needs (2.0 cr)
PUBH 3001 - Personal and Community Health (2.0 cr)
RHET 3562W - Technical and Professional Writing, WI (4.0 cr)

Senior Year Courses

DH 4125W - The Dental Hygiene Care Process Clinical Application V, WI (1.0-7.0 cr)
DH 4128 - Oral and Maxillofacial Radiology Clinic III (0.0 cr)
DH 4131 - Epidemiology, Prevention, Dental Public Health, and Community Outreach (3.0 cr)
DH 4132W - Ethics, Jurisprudence, and Principles of Practice, WI (2.0 cr)
DH 4137 - Patient Care Group III (PCGs) (1.0 cr)
DH 4226 - Dental Hygiene Care Process Clinical Application VI (1.0-5.0 cr)
DH 4229 - Oral and Maxillofacial Radiology Clinic IV (3.0 cr)
DH 4231 - Periodontology III Lecture (1.0 cr)
DH 4232 - Community Outreach (1.0 cr)
DH 4233 - Legislative, Social, Economic, and Practice Factors in Oral Health (2.0 cr)
DH 4238 - Patient Care Group IV (1.0 cr)

Electives

Students must take from 8 to 16 credits in electives to complete the 85 credits required for the major.

Take 8 or more credit(s) from the following:

DH 4211 - Principles of Restorative Techniques II (3.0 cr)
DH 4250 - Dental Hygiene Community Outreach Elective (0.0-8.0 cr)
DH 2191 - Independent Study (0.0-6.0 cr)
or DH 3191 - Independent Study (0.0-4.0 cr)
or DH 4191 - Independent Study (0.0-6.0 cr)
DH 4227 - Advanced Dental Hygiene Clinical Experience I (0.0-6.0 cr)
or DH 4228 - Advanced Dental Hygiene Clinical Experience II (0.0-6.0 cr)

Program Sub-plans

A sub-plan is not required for this program.

Degree Completion Program

This program is for students who have completed an associate degree program in dental hygiene at a regionally accredited institution and who want to earn a baccalaureate degree.

Students in the B.S. degree-completion program must fulfill the following requirements:

- Associate degree program in dental hygiene at an accredited institution (about 60-74 semester credits)
- University liberal education requirements for a B.S. degree (20-30 cr)
- Electives as needed to fulfill the 120-credit requirement
- Core dental hygiene courses:
 - DH 3231W- Research Methods in Dental Hygiene
 - DH 4292 - Curriculum Development in Dental Hygiene
 - DH 4293 - Course Development in Dental Hygiene
 - DH 4294W - Directed Research
 - DH 4295 - Instructional Methods in Dental Hygiene Education
 - DH 4296 - Issues in Dental Hygiene
 - DH 4297 - Dental Hygiene Education: Supervised Teaching
 - DH 4298W - Dental Hygiene Process of Care: Clinical Application

This is the College of Design General Information and Degree Programs section of the 2006-2008 Undergraduate Catalog for the University of Minnesota, Twin Cities campus.

General Information

The College of Design encompasses the full range of design disciplines from graphic design, apparel design, and interior design to architecture, landscape architecture, and urban design. The college also includes programs in housing studies and retail merchandising. The faculty and students in the college seek to advance the quality and value of the natural, designed, and social environments, with a focus on the interaction of people and their world.

Through their design education, students develop creative powers of generalization and abstraction using analysis and synthesis. It also gives them a broad understanding of the arts, humanities, and sciences; a knowledge of technology, history, theory, and professional practice; the skills necessary to develop, explore, and describe design ideas; and a belief in the aesthetic, ethical, and environmental responsibilities of designers.

The college offers the only accredited degrees in architecture, landscape architecture, and interior design in Minnesota, as well as top-rated programs in the other design fields. The undergraduate programs offer both professional and pre-professional degrees, as well as degrees that have a liberal arts and general design focus. The graduate programs range from first-professional degrees to degrees with a creative-practice or research emphasis. Faculty members have close working relationships with industry professionals, who collaborate on discovery and outreach, participate in special programming, and serve as a network for students seeking internships and post-graduation opportunities.

Facilities—The college occupies primarily Rapson Hall on the Minneapolis campus and McNeal Hall on the St. Paul campus. These two buildings offer some of the best facilities in the country in which to study design, featuring dramatic interior spaces, new equipment and furnishings, and outdoor teaching areas. In addition to ample classroom, studio, and office space, the college has specialized facilities, including woodshops, computer labs, and photographic studios. The visual resources collection comprises approximately 100,000 slides to support student and faculty research and educational activities, and the library in Rapson Hall has a collection of more than 34,675 volumes.

The Goldstein Museum of Design, located in McNeal Hall, is an internationally recognized teaching museum and research center for interpreting the vital role of art in everyday life. The museum collects, preserves, documents, and exhibits clothing, textiles, and decorative and graphic arts, with an emphasis on objects of the late 19th and 20th centuries. It promotes the study and enjoyment of these objects within their social, cultural, aesthetic, and historic contexts.

The new Human Dimensioning Laboratory (HDL) provides an innovative research and learning facility for designing new methods of incorporating human dimensions in the development of wearable products. The National Science Foundation provided initial funding to establish the laboratory. HDL researchers use high-tech tools to measure the static and dynamic human form, map the body/product interface, and produce and test prototypes.

For more information on the college's resources, see the College of Design's Web site at www.cdes.umn.edu.

Admission

Application policies and deadlines vary by program. Policies are subject to change. For current information, contact the following offices:

Freshmen and transfer students from schools outside the University of Minnesota (or with work only completed through the College of Continuing Education at the University of Minnesota):

University of Minnesota Admissions Office
612-625-2008
www.admissions.tc.umn.edu

Transfer students from other University of Minnesota colleges (e.g., CLA, IT) or coordinate campuses:

College of Design
612-624-1717

Visiting the College of Design

The college strongly encourages prospective students to meet with an adviser for more information about the college's programs, tour the facilities, and discuss internship and career opportunities. To arrange a visit, students should call 612-624-1717.

Degrees/Majors

The College of Design offers the following degrees and majors.

- Bachelor of science (B.S.) degree with majors in clothing design, graphic design, housing studies, interior design, retail merchandising (through the Department of Design, Housing, and Apparel)
- Bachelor of science in architecture (B.S.Arch) through the Department of Architecture
- Bachelor of design in architecture (B.D.A.) through the Department of Architecture
- Bachelor of environmental design (B.E.D.) through the Department of Landscape Architecture
- In cooperation with the College of Liberal Arts (CLA), a bachelor of arts (B.A.) degree with a major in architecture

Majors in clothing design, graphic design, housing studies, interior design, and retail merchandising prepare students to understand human behavior and design to enhance the well-being of individuals and communities, as well as to prepare for advanced academic and professional work.

Majors in architecture or environmental design prepare students for advanced academic and professional degree work in design, but also establish a strong foundation for other careers that create and sustain the ecological, technological, cultural, and aesthetic well-being of built and conserved environments. These are nonprofessional degrees, and students who want to become licensed architects and landscape architects need to take a professional graduate degree in the College of Design—the M.Arch and the M.L.A. The B.S. program includes an accelerated status option to allow qualified undergraduates to complete the undergraduate and master of architecture (M.Arch.)

degrees in six years rather than seven. Qualified undergraduates may also complete the nonprofessional B.E.D. and the master of landscape architecture (M.L.A.) degrees in six years rather than seven.

Through the Graduate School, the College of Design offers both professional and post-professional, fully accredited graduate degree programs in architecture and landscape architecture. Students interested in the master of arts, master of fine arts, and doctor of philosophy degrees offered in the Department of Design, Housing, and Apparel will find information about these degrees through the Graduate School. Graduate-level certificates are also available in housing studies or metropolitan design.

Minors

The College of Design offers the following minors:

- Architecture
- Design
- Environmental design
- Housing studies
- Retail merchandising

See the Degree Programs section for details on these minors.

Commencement

The College of Design holds official commencement exercises once a year in the spring. Students who have applied to graduate are provided information about commencement.

Honors

Students who have an outstanding record of academic achievement and seek the challenge and special rewards of honors study may be eligible for admission to an honors program.

Honors opportunities and benefits include:

- special enrichment programs,
- personalized instruction,
- research partnerships with professors,
- participation in honor societies, and
- graduating with honors.

For more information, students should contact the honors adviser (612-624-1717) or check the Web site.

Professional Registration

The College of Design provides Minnesota's only accredited professional degree programs in interior design (a B.S.), architecture (the M.Arch.), and landscape architecture (the M.L.A.).

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, reaccruited The College of Design's M.Arch program for another four years without qualifications, and the Landscape Architectural Accreditation Board (LAAB) fully reaccruited the M.L.A. degree. The Council for Interior Design Accreditation (CIDA) has accredited the College of Design's interior design program—the only four year program in the state.

For more information concerning professional registration, contact the Minnesota Board of Architecture, Engineering, Land Surveying and Landscape Architecture, and Interior Design (651-296-2388).

Policies

College of Design students are responsible for complying with University policies. See the Policies section of this catalog.

Academic Integrity—College of Design students are expected to behave responsibly and ethically. College of Design students, faculty, and staff work together to create and sustain a climate of open and scholarly debate. College of Design faculty act on cases involving alleged academic dishonesty (cheating), which may result in modification of a course grade. Instructors must report any action to the college office, and the student is informed of the right to ask for a committee hearing.

Student Scholastic Standing Committee—The College of Design's Student Scholastic Standing Committee, composed of administrators and college office staff, interprets and enforces college and University regulations relating to academic affairs. It handles requests for exceptions to registration policies and procedures, transfer of credit policies, and some degree requirements. The committee administers the college probation system; monitors students' performance; and deals with questions of probation, suspension, and readmission.

The committee seeks to maintain the spirit of the College of Design's regulations as flexibly as possible and is empowered to make exceptions in cases in which regulations work to students' educational disadvantage.

Students are urged to consult a committee representative in the college office concerning almost any kind of problem, but especially those they think interfere with their ability to attain their academic objectives. Well-established petition and appeal procedures assure full review of student requests.

Computer Requirement—Architecture students in studio classes are required to have a laptop computer, and interior design students are required to have a laptop computer after portfolio review. For the most current information about computer requirements (and suggestions for students who, although are not required to purchase a computer, choose to), visit the College of Design's Web site.

Advising

Office of Student Services—This office serves students from their prospective visit through to graduation. It assists students with registration, course access, degree programs, declaring a major, petitions, graduation clearance, commencement, and other student issues for all majors. Student services also assists with access to the mentor program, internship information, and career opportunities.

Prospective student advising provides general information about degree programs; related professional fields in interior design, architecture, and landscape architecture; admission and program requirements; and college services, and refers prospective graduate students to the appropriate department director of graduate studies. Prospective students should call 612-624-1717.

Advisers are available by appointment or during drop-in hours for students admitted to the college. To make an appointment with an adviser, call 612-626-3690 (for architecture or landscape architecture majors) or 612-624-1717 (for Department of Design, Housing, and Apparel majors).

Special Learning Opportunities and Resources

Continuing Education—The College of Design offers continuing education courses for architecture, landscape architecture, and interior design professionals. Courses are designed to meet the content interests of the practitioner and are offered in short, convenient, seminar formats.

International Programs

The College of Design encourages students to participate in an international study experience as part of their degree program. Students may spend a semester, academic year, May session, or summer session enhancing their cross-cultural skills or acquiring professional experience. With careful planning, students can generally apply credits earned abroad toward their degree program. The college has a list of recommended locations for study abroad.

For more information about international programs, visit the Learning Abroad Center in 230 Heller Hall. Advisers there can assist with study and credit options, financial aid, and orientations. For a full listing of study abroad opportunities, see www.UMabroad.umn.edu.

Scholarships

Students are encouraged to apply for scholarships to further their studies; most awards are made on an annual basis. In addition to financial aid offered by the University, the college administers several scholarship programs of its own. Find out more about available scholarships, application materials, and instructions on the College of Design's Web site.

Career Information

Career services are available for all majors through campus career centers. Specialized services are also available for professional and preprofessional students in the college.

All programs in the Department of Design, Housing, and Apparel require students to participate in a preplanned internship experience and other programs strongly encourage it. Internship credits vary, depending on program area. The St. Paul Campus Career Center acts as a clearinghouse for internship information.

For questions concerning career planning, internships, and job opportunities, call the center at 612-624-2710.

Degree Programs and Minors

Architecture B.S. Arch.

Architecture

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 47.

Degree: Bachelor of Science in Architecture.

The bachelor of science (B.S. Arch.) degree with a major in architecture provides instruction in history, representation, design, theory, and technology, emphasizing the development of architecture as a language of form, space, and order. The program requires an understanding of social, cultural, and physical contexts as a foundation for the examination of the methods, values, precedents, and material reality characteristic of the process of shaping natural and built environments. The major combines core prerequisites with a focused introduction to the discipline of architecture, including required courses in representation, history, theory, technology, and design processes.

Admission Requirements

Students must complete 10 courses (including freshman composition) before admission to the program. Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.80 for students already admitted to the degree-granting college.
- 2.80 for students transferring from another University of Minnesota college.
- 2.80 for students transferring from outside the University.

Prior to an application deadline, students must meet with an undergraduate adviser in 107 Rapson Hall (612-626-3690). For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

Required Courses

Math and Physics

MATH 1142 - Short Calculus, MATH (4.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)

or MATH 1371 - IT Calculus I, MATH (4.0 cr)

PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

Preparatory Courses

ARCH 3301 - Drawing for Design in Architecture, OH (3.0 cr)

ARCH 3401W - Environmental Design and the Sociocultural Context, C/PE, WI (3.0 cr)

ARCH 3411 - Architectural History to 1750, HP, IP (3.0 cr)

LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)

ARCH 1301 - Introduction to Drawing in Architecture and Landscape Architecture, OH (4.0 cr)

or LA 1301 - Introduction to Drawing in Architecture and Landscape Architecture, OH (3.0 cr)

ARCH 1401 - The Designed Environment (3.0 cr)

or LA 1401 - The Designed Environment (3.0 cr)

ARCH 3412 - Architectural History since 1750, HP, IP (3.0 cr)

or ARCH 3422H - Honors: Architectural History Since 1750, HP, IP, H (3.0 cr)

General Requirements

Recommended freshman writing course(s) for this program:
ENG 1011

Program Requirements

Students should maintain a portfolio of originals or duplicates of all freehand drawings, projects, and architecture studio designs. A portfolio is required for application to the accelerated program and the graduate professional degree program.

All prerequisite courses including courses in math, physics, and English composition must be taken A-F with grades of C- or better to satisfy degree requirements and to progress in sequence courses.

Accelerated status in architecture is a competitive opportunity for qualified undergraduates to complete the B.A. or B.S. degree with a major in architecture and the M.Arch. degree in six years rather than seven. Talk to an adviser for more information.

Required Courses

Major Courses

In addition to the requirements below, students must complete 9 upper division credits outside the major.

ARCH 4281 - Undergraduate Architecture Studio I (6.0 cr)

ARCH 4282 - Undergraduate Architecture Studio II (6.0 cr)

ARCH 4283 - Undergraduate Architecture Studio III (6.0 cr)

ARCH 4284 - Undergraduate Architecture Studio IV (4.0 cr)

ARCH 4501 - Architecture and Ecology (4.0 cr)

ARCH 4511 - Building Systems I (3.0 cr)

ARCH 4571 - Introduction to Structures (3.0 cr)

Any ARCH 44xx course

Take 3 or more course(s) from the following:

ARCH 3xxx

ARCH 4xxx

ARCH 5xxx

Program Sub-plans

A sub-plan is not required for this program.

Accelerated Program

Accelerated status in architecture is a competitive opportunity for qualified undergraduates to complete the B.S. degree with a major in architecture and the M.Arch. degree in six years rather than seven. Accelerated status applicants must complete all but 14 credits of upper division architecture courses before their senior year.

Students complete the first year of the graduate professional degree program in their senior year; courses carry upper division credit and complete the B.S. degree.

To be considered for accelerated status, students must be enrolled at the University as a B.S. or B.A. major in architecture, have completed one year of architecture design studio (ARCH 5281, ARCH 5282), have completed 90 credits, and have earned an overall GPA of 3.50. Admission to accelerated status does not guarantee admission to the graduate professional program; separate requirements, such as the Graduate Record Examination (GRE) and other application documents, must be submitted in January of the year admission to the graduate program is sought. See an adviser in 107 Rapson Hall for additional criteria. Deadline for consideration is June 15.

Architecture Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

An undergraduate minor in architecture introduces the foundational ideas of the discipline as a social, cultural, historic, and environmental constructs.

Admission Requirements

For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

Program Requirements

A maximum of 9 transfer credits may be used toward the minor. A maximum of three courses taken for a major may also be used toward the minor. Students must earn a C- or better in all minor coursework.

Required Courses

Minor Courses

ARCH 1401 - The Designed Environment (3.0 cr)

LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)

ARCH 3401W - Environmental Design and the Sociocultural Context, C/PE, WI (3.0 cr)

or

ARCH 3401V - Honors: Environmental Design and the Sociocultural Context, WI, H (3.0 cr)

Take 9 or more credit(s) from the following:

ARCH 3xxx

ARCH 4xxx

ARCH 5xxx

Clothing Design B.S.

Design, Housing & Apparel

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 77 to 81.

Degree: Bachelor of Science

In the clothing design program students develop an understanding of the textile and clothing product development process, including design, production, and marketing. Students are challenged to integrate knowledge of the product with consumer needs and business constraints.

The program emphasizes and integrates creative thinking and technical skill. Students become proficient in manual and computer methods of pattern development and implement apparel structuring methods appropriate for custom design or industry production. Courses cover costume history, social and

cultural meanings of apparel, the textile and apparel consumer, and aesthetics. Students take six sequential clothing design studio courses. A required internship ensures that students gain professional experience.

Students entering the program should have clothing construction/assembly competence and a working knowledge of microcomputers and software. Students are encouraged to use the liberal education categories to explore multicultural themes and to strengthen knowledge that supports their major coursework.

Graduates of the program work in various settings, including product development and quality assurance for large retail companies, product design for small and large manufacturers, theatre and film design, wearable art, and custom design.

Admission Requirements

Students must complete 6 courses before admission to the program. Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Admission to the pre-major status is done by a competitive holistic review. Students must maintain a GPA of 2.50 during pre-major coursework. In addition, students must receive a minimum grade of C- or better in the required pre-major classes before going through portfolio review (not just a 2.50 GPA). Once students have achieved major status, they must maintain a GPA of 2.00.

Students must pass a portfolio review to be admitted into the degree program. For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

Required Courses for Admission

Pre-Clothing Design Courses

Students must demonstrate competence in basic clothing construction skills by either passing the DHA sewing proficiency examination or by successfully completing DHA 1221.

Note: Students must be admitted to a pre-major status to take most of these classes.

DHA 1101W - Introduction to Design Thinking, OH, WI (4.0 cr)

DHA 1201 - Clothing Design, Merchandising, and the Consumer, C/PE (3.0 cr)

DHA 1311 - Foundations: Drawing and Design in Two and Three Dimensions (4.0 cr)

DHA 1312 - Foundations: Color and Design in Two and Three Dimensions (4.0 cr)

DHA 2221 - Clothing Design Studio I (4.0 cr)

DHA 1221 - Clothing Assembly Fundamentals (3.0 cr)

or pass sewing proficiency exam

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

Required Courses

Communication Courses

COMM 1101 - Introduction to Public Speaking (3.0 cr)

or PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)

or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

ENGC 3027W - Advanced Expository Writing, WI (4.0 cr)
or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)

Major Courses

DHA 2211 - Illustration for Clothing Design (2.0 cr)
DHA 2213 - Textile Analysis (4.0 cr)
DHA 2222 - Clothing Design Studio II (4.0 cr)
DHA 3217 - Fashion Trends and Visual Analysis (3.0 cr)
DHA 3223 - Clothing Design Studio III (4.0 cr)
DHA 3224 - Clothing Design Studio IV (4.0 cr)
DHA 3312 - Color and Form in Surface Design (3.0 cr)
DHA 4121 - History of Costume (4.0 cr)
DHA 4196 - Internship in DHA (1.0-4.0 cr)
DHA 4212W - Dress, Society, and Culture, CD, WI (3.0 cr)
DHA 4225 - Clothing Design Studio V (4.0 cr)
DHA 4226 - Clothing Design Studio VI (4.0 cr)
DHA 5215 - Product Development: Softlines (4.0 cr)
DHA 4330 - Surface Fabric Design Workshop (4.0 cr)
or DHA 4340 - Woven, Knit, and Non-Woven Fiber Design Workshop (4.0 cr)
DHA 3245 - Multichannel Retailing (3.0 cr)
or DHA 4217 - International Developments in Textiles and Apparel, IP (3.0 cr)

Design Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

The interdisciplinary design minor is appropriate for students who would like a taste of design or those who want a renewed perspective on design. Traditional design courses and nontraditional views of design provide an integrated perspective. The minor includes core courses that provide a basis for design thinking as well as electives to allow students to explore their area of interest in design. As an interdisciplinary minor, 9 credits must be taken outside the student's major.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu/>.

Program Requirements

Required Courses

Students majoring in architecture, clothing design, environmental design, graphic design, housing studies, interior design, or retail merchandising follow different requirements. See the design major adviser.

Foundation Courses

DHA 1101W - Introduction to Design Thinking, OH, WI (4.0 cr)
DESI 4001 - Design Minor Seminar (3.0 cr)

Minor Courses

Take 2 or more course(s) from the following:

ARCH 3311 - Design in the Digital Age (3.0 cr)
HUMF 3505 - Intro to Human-Centered Design (3.0 cr)
JOUR 4551 - New Media Culture (3.0 cr)
ME 2011 - Introduction to Engineering (4.0 cr)

Electives

Choose two additional approved electives for 6 to 8 credits. Approved elective course lists are available from the Design Institute or online at <http://design.umn.edu>.

Design in Architecture B.D.A.

Architecture

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 74.

Degree: Bachelor of Design in Architecture.

The bachelor of design in architecture (B.D.A.) is a flexible degree in design thinking through architecture. The program requires an understanding of social, cultural, and physical contexts as a foundation for the examination of the methods, values, precedents, and material reality characteristic of the process of shaping natural and built environments. It includes many architectural electives and priority access to design workshops. The B.D.A. is the best option for those interested in exploring the breadth of the architectural discipline.

Admission Requirements

Students must complete 30 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.80 for students already admitted to the degree-granting college.
- 2.80 for students transferring from another University of Minnesota college.
- 2.80 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

Required Courses for Admission

Prerequisite Courses

ARCH 1281 - Design Fundamentals I (4.0 cr)
ARCH 1701 - The Designed Environment (3.0 cr)
or LA 1401 - The Designed Environment (3.0 cr)

General Requirements

Recommended freshman writing course(s) for this program:
ENGC 1011

Program Requirements

Required Courses

Architecture Major Core

ARCH 1301 - Introduction to Drawing in Architecture, OH (4.0 cr)
ARCH 3401W - Environmental Design and the Sociocultural Context, C/PE, WI (3.0 cr)
ARCH 3411 - Architectural History to 1750, HP, IP (3.0 cr)
ARCH 3412 - Architectural History since 1750, HP, IP (3.0 cr)
ARCH 3611 - Design in the Digital Age (3.0 cr)
ARCH 4561 - Architecture and Ecology (4.0 cr)
ARCH 4701 - Introduction to Urban Form and Issues (3.0 cr)
LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)
MATH 1142 - Short Calculus, MATH (4.0 cr)
PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)
ARCH 2281 - Design Fundamentals II (4.0 cr)

 Aesthetics and Politics of Architecture (3.0 cr)

Architecture Electives

Take 15 or more credit(s) from the following:

ARCH 3xxx
 ARCH 4xxx

Design Workshops

Take 12 or more credit(s) from the following:

ARCH 4xxx

Environmental Design B.E.D.

Landscape Architecture

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 73.

Degree: Bachelor of Environmental Design

Landscape architecture focuses on issues of land use and creating a future that provides a quality lifestyle in a quality environment for an ever-increasing human population. In dealing with these issues, landscape architects integrate the design, planning, and management of the landscape to create outdoor environments that sustain ecological function, fulfill human aspirations for community development, public health, and safety, and are artistically evocative and meaningful.

Admission Requirements

Students must complete 30 credits (including freshman composition) before admission to the program. Transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Students must have all high school preparation requirements completed before admission to the program is granted.

For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Major Courses

ARCH 3301 - Drawing for Design in Architecture, OH (3.0 cr)
 ARCH 3401W - Environmental Design and the Sociocultural Context, C/PE, WI (3.0 cr)
 LA 1201 - Learning from the Landscape, CD (3.0 cr)
 LA 1301 - Introduction to Drawing in Architecture and Landscape Architecture, OH (3.0 cr)
 LA 1401 - The Designed Environment (3.0 cr)
 LA 3001 - Understanding and Creating Landscape Space (3.0 cr)
 LA 3002 - Informants of Creating Landscape Space (3.0 cr)
 LA 3204 - Landscape Ecology (3.0 cr)
 LA 3413 - Introduction to Landscape Architectural History, IP (3.0 cr)
 LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)

LA 3571 - Landscape Construction: Site Systems and Engineering (3.0 cr)
 ARCH 3411 - Architectural History to 1750, HP, IP (3.0 cr)
 or ARCH 3412 - Architectural History since 1750, HP, IP (3.0 cr)
 or ARCH 3422H - Honors: Architectural History Since 1750, HP, IP, H (3.0 cr)
 RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
 COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Accelerated Program

This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

The accelerated status option admits a limited number of students annually and allows qualified undergraduates to complete the B.E.D. and M.L.A. in six years rather than seven years.

Applicants for the accelerated status must complete the first three years of the B.E.D. degree requirements before their senior year. Students must complete the first year of the professional degree program in their undergraduate senior year. These courses carry upper division credit and satisfy senior year B.E.D. requirements.

Accelerated status is granted on a competitive basis and does not admit any student to the graduate professional program. Separate requirements, such as letters of recommendation, a letter of interest, and other application documents, must be submitted in January of the year that students are seeking admission to the graduate program. B.E.D. graduates who have completed the accelerated status option and applied to the M.L.A. professional degree program will receive advanced standing in the M.L.A. program upon acceptance by the Department of Landscape Architecture and the Graduate School.

Landscape Design

The design track prepares students for a career in landscape design at the residential and small-scale commercial level.

The landscape design track also requires students to take courses in biological science, plant materials, landscape management, and small business management.

Required Courses

Math and Science Courses

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
 or BIOL 1009H - Honors: General Biology, BIOL SCI/L, H (4.0 cr)
 CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)
 or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
 MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
 or MATH 1142 - Short Calculus, MATH (4.0 cr)

Landscape Design Core

APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 BIOL 3002 - Plant Biology: Function (2.0 cr)
 HORT 1001 - Plant Propagation, BIOL SCI/L (4.0 cr)
 HORT 1015 - Woody and Herbaceous Plants (4.0 cr)
 HORT 3005 - Environmental Effects on Horticultural Crops (2.0 cr)
 HORT 4021 - Landscape Design and Implementation I (4.0 cr)
 HORT 4061W - Turfgrass Management, WI (3.0 cr)
 HORT 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 HORT 5021 - Landscape Design and Implementation II (4.0 cr)
 SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Take 2 or more course(s) from the following:

- ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
- APEC 1251 - Principles of Accounting (3.0 cr)
- GC 1513 - Small Business Fundamentals With E-Business Applications (3.0 cr)
- OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)

Landscape Planning

The landscape planning track prepares students for work in the field of urban and regional planning.

The landscape planning track requires additional courses in urban geography, urban and regional planning, natural resource planning and management, as well as biological and physical sciences. Students in this track should select GEOG 1502 to complete the mathematical thinking requirement.

Required Courses

Landscape Planning Core

- ARCH 4701 - Introduction to Urban Form and Issues (3.0 cr)
- FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
- GEOG 3371W - Cities, Citizens, and Communities, CD, SSCI, WI (4.0 cr)
- GEOG 3605W - Geographical Perspectives on Planning, C/PE, IP, WI (4.0 cr)
- LA 1202 - Making the Mississippi, C/PE (3.0 cr)
- PA 4200 - Urban and Regional Planning (3.0 cr)
- ENR 3101 - Conservation of Plant Biodiversity, ENVT (3.0 cr)
- or ENR 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)
- or FR 4501 - Urban Forest Management: Managing Greenspaces for People, C/PE (3.0 cr)
- or GEOG 3355 - Environmental Quality, C/PE, ENVT (3.0 cr)
- or GEOG 3361W - Land Use, Landscapes, and the Law, C/PE, ENVT, WI (3.0 cr)
- or GEOG 3373 - Changing Form of the City, HP, IP (3.0 cr)
- or GEOG 4393 - The Rural Landscape (4.0 cr)
- or PA 5013 - Law and Urban Land Use (1.5 cr)
- or PA 5251 - Strategic Planning and Management (3.0 cr)

Additional Science Courses

- EEB 3001 - Ecology and Society, ENVT (3.0 cr)
- Take 2 or more course(s) from the following:
- EEB 4014W - Ecology of Vegetation, WI (3.0 cr)
 - EEB 4016W - Ecological Biogeography, WI (3.0 cr)
 - EEB 4601 - Limnology (3.0 cr)
 - EEB 4609W - Ecosystem Ecology, WI (3.0 cr)
 - ENR 3021 - Restoration and Reclamation Ecology, ENVT (3.0 cr)
 - ENR 3575 - Wetlands Conservation (3.0 cr)
 - ES 3221 - Soil Conservation and Land-Use Management (3.0 cr)
 - FR 3104 - Forest Ecology (4.0 cr)
 - FR 3114 - Hydrology and Watershed Management (3.0 cr)
 - FR 5153 - Forest and Wetland Hydrology (3.0 cr)
 - GEO 3003 - Geohazards, C/PE, ENVT (3.0 cr)
 - GEO 4701 - Geomorphology (3.0-4.0 cr)
 - GEO 4703 - Glacial Geology (4.0 cr)
 - GEO 5108 - Principles of Environmental Geology (3.0 cr)
 - GEOG 5441 - Quaternary Landscape Evolution (3.0 cr)
 - HORT 5071 - Restoration and Reclamation Ecology, ENVT (3.0 cr)
 - PBIO 4321 - Taxonomy of Minnesota Flora (3.0 cr)

Environmental Design Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 21.

See the major description.

Admission Requirements

For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

Program Requirements

A maximum of 9 transfer credits may be used for the minor and a maximum of three courses taken for a major degree may also be used toward the minor. A minimum grade of C- is required in all minor coursework.

Required Courses

Minor Courses

- LA 3001 - Understanding and Creating Landscape Space (3.0 cr)
- LA 3413 - Introduction to Landscape Architectural History, IP (3.0 cr)
- ARCH 1401 - The Designed Environment (3.0 cr)
- or LA 1401 - The Designed Environment (3.0 cr)

Electives

Take 12 or more credit(s) from the following:

- ARCH 3301 - Drawing for Design in Architecture, OH (3.0 cr)
- ARCH 3401W - Environmental Design and the Sociocultural Context, C/PE, WI (3.0 cr)
- EEB 3001 - Ecology and Society, ENVT (3.0 cr)
- LA 1101W - Introduction to Design Thinking, OH, WI (4.0 cr)
- LA 1201 - Learning from the Landscape, CD (3.0 cr)
- LA 1202 - Making the Mississippi, C/PE (3.0 cr)
- LA 1301 - Introduction to Drawing in Architecture and Landscape Architecture, OH (3.0 cr)
- LA 3002 - Informants of Creating Landscape Space (3.0 cr)
- LA 3204 - Landscape Ecology (3.0 cr)
- LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)
- LA 3571 - Landscape Construction: Site Systems and Engineering (3.0 cr)
- LA 5712 - Infrastructure, Natural Systems and the Space of Inhabited Landscapes (3.0 cr)
- LA 8302 - Professional Practice (3.0 cr)

Graphic Design B.S.

Design, Housing & Apparel

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 86 to 91.

Degree: Bachelor of Science.

The graphic design program educates students in design methods, design theory, creative problem solving, and visual and verbal literacy. An emphasis is placed on visual components: how humans communicate, perceive, interpret, and understand visual information. The program fosters flexibility, which enables graduates to adapt to social, cultural, and technological change in graphic design. The program's foundation is broadly based. Students begin with courses in fundamental aspects of visual studies. Upper division courses prepare them for graphic design positions in print and electronic media. An internship of 1-4 credits is required.

Admission Requirements

Students must complete 4 courses before admission to the program. Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Admission to the pre-major status is decided by a competitive holistic review. Students must maintain a GPA of 2.50 during pre-major coursework. In addition, students must receive a minimum grade of C- or better in the required pre-major courses before going through portfolio review (not just a 2.50 GPA). Once students have achieved major status, they must maintain a GPA of 2.00.

Students must be admitted to the pre-major status program to take most of the pre-graphic design coursework.

For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

Required Courses for Admission

Pre-Graphic Design Courses

- DHA 1101W - Introduction to Design Thinking, OH, WI (4.0 cr)
 DHA 1311 - Foundations: Drawing and Design in Two and Three Dimensions (4.0 cr)
 DHA 1312 - Foundations: Color and Design in Two and Three Dimensions (4.0 cr)
 DHA 1315 - Foundations: The Graphic Studio (4.0 cr)

General Requirements

Recommended freshman writing course(s) for this program:
 RHET 1101

Program Requirements

Required Courses

Communication Courses

- COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
 ENGC 3027W - Advanced Expository Writing, WI (4.0 cr)
 or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)

Art History Courses

- ARCH 3411 - Architectural History to 1750, HP, IP (3.0 cr)
 or ARCH 3412 - Architectural History since 1750, HP, IP (3.0 cr)
 or ARTH 1xxx
 or ARTH 2xxx
 or ARTH 3xxx
 or ARTH 4xxx
 or ARTH 5xxx
 or DHA 4121 - History of Costume (4.0 cr)
 or DHA 4161 - History of Interiors and Furnishings: Ancient to 1750, IP (4.0 cr)

Business, Economics, or Marketing Courses

Students must select one course in either business, economics, or marketing.

- ACCT 1xxx
 or ACCT 2xxx
 or ACCT 3xxx
 or ACCT 4xxx
 or ACCT 5xxx

- or APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 or APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
 or APEC 1251 - Principles of Accounting (3.0 cr)
 or ECON 1xxx
 or ECON 2xxx
 or ECON 3xxx
 or ECON 4xxx
 or ECON 5xxx
 or PSTL 1511 - Introduction to Business and Society, SSCI (4.0 cr)
 or PSTL 1513 - Small Business Fundamentals With E-Business Applications (3.0 cr)
 or MGMT 3xxx
 or MKTG 3xxx

History Courses

- AFRO 3204 - History of South Africa to 1910, HP, IP (3.0 cr)
 or AFRO 3205 - History of South Africa from 1910, HP (3.0 cr)
 or AFRO 3431 - Early Africa and Its Global Connections, HP, IP (4.0 cr)
 or AFRO 3432 - Modern Africa in a Changing World, HP, IP (4.0 cr)
 or AFRO 3864 - African American History: 1619 to 1865, CD, HP (4.0 cr)
 or AFRO 3865 - African American History: 1865 to the Present, CD, HP (4.0 cr)
 or AMIN 3871 - American Indian History: Pre-Contact to 1830, CD, HP (4.0 cr)
 or AMIN 3872 - American Indian History: 1830 to the Present, CD, HP (4.0 cr)
 or CNES 1043 - Introduction to Greek and Roman Archaeology, HP (4.0 cr)
 or PSTL 1231 - Perspectives in American History, HP (4.0 cr)
 or PSTL 1251 - World History: Since 1500, HP, IP (4.0 cr)
 or HIST 1011V - Honors: World History, HP, IP, WI, H (4.0 cr)
 or HIST 1011W - World History, HP, IP, WI (4.0 cr)
 or HIST 1012V - Honors: World History, HP, IP, WI, H (4.0 cr)
 or HIST 1012W - World History: The Age of Global Contact, HP, IP, WI (4.0 cr)
 or HIST 1015W - Introduction to Global History Since 1950, HP, IP, WI (4.0 cr)
 or HIST 1017 - World History, HP, IP (3.0 cr)
 or HIST 1018 - World History: The Age of Global Contact, HP, IP (3.0 cr)
 or HIST 1019 - Introduction to Global History Since 1950, HP, IP (3.0 cr)
 or HIST 1026 - Western Civilization from its Origins to ca 1500, HP, IP (3.0 cr) or HIST 1027 - Western Civ From 1500 to Present, HP, IP (3.0 cr)
 or HIST 1031V - Honors: Survey of Western Civilization From its Origins to ca 1500, HP, IP, WI, H (4.0 cr)
 or HIST 1031W - Western Civilization, From Its Origins to ca 1500, HP, IP, WI (4.0 cr)
 or HIST 1032V - Honors: Western Civilization, From 1500 to Present, HP, IP, WI, H (4.0 cr)
 or HIST 1032W - Western Civilization, From 1500 to Present, HP, IP, WI (4.0 cr)
 or HIST 1301V - Honors: U.S. History to 1877, CD, HP, WI, H (4.0 cr)
 or HIST 1301W - U.S. History to 1877, CD, HP, WI (4.0 cr)
 or HIST 1302V - Honors: U.S. History, From 1865 to Present, CD, HP, WI, H (4.0 cr)
 or HIST 1302W - U.S. History, From 1865 to Present, CD, HP, WI (4.0 cr)
 or HIST 1307 - American History to 1877, CD, HP (3.0 cr)
 or HIST 1308 - U.S. History: From 1865 to Present, CD, HP (3.0 cr)
 or HIST 3151W - British History to the 17th Century, C/PE, HP, WI (4.0 cr)
 or HIST 3152 - British History From the Seventeenth Century, C/PE, HP (4.0 cr)
 or HIST 3211 - History of Sexuality in Europe (3.0 cr)
 or HIST 3347 - Women in Early and Victorian America: 1600-1890, CD, HP (3.0 cr)
 or HIST 3348 - Women in Modern America, CD, HP (3.0-4.0 cr)
 or HIST 3401W - Early Latin America to 1825, HP, IP, WI (4.0 cr)
 or HIST 3402W - Modern Latin America 1825 to Present, HP, IP, WI (4.0 cr)
 or HIST 3421 - The World and the West 1400-1900, HP, IP (3.0 cr)
 or HIST 3431 - Early Africa and Its Global Connections, HP (4.0 cr)
 or HIST 3432 - Modern Africa in a Changing World, HP, IP (4.0 cr)
 or HIST 3461 - Introduction to East Asia I: The Imperial Age, HP, IP (3.0-4.0 cr)
 or HIST 3462 - Introduction to East Asia II: 1600-2000, HP, IP (3.0-4.0 cr)
 or HIST 3467W - State and Revolution in Modern China, HP, WI (3.0 cr)
 or HIST 3468 - Social Change in Modern China, HP (3.0 cr)
 or HIST 3471 - Modern Japan, Meiji to the Present (1868-2000), HP, IP (3.0 cr)
 or HIST 3472 - Early Modern Japan (3.0 cr)
 or HIST 3474 - The Rise of Modern Japan: 1850s to 1900s, HP, IP (3.0 cr)

- or HIST 3608W - History of the Catholic Church in the Middle Ages, HP, WI (3.0 cr)
- or HIST 3611 - Medieval Cities of Europe: 500-1500, HP, IP (3.0 cr)
- or HIST 3615W - Women in European History: 1500 to the Present, HP, WI (3.0 cr)
- or HIST 3616 - France in the Middle Ages, HP (3.0 cr)
- or HIST 3621 - Renaissance Italy: 1200-1550, C/PE, HP (3.0 cr)
- or HIST 3626 - France From the Late 16th Century Through Napoleon: 1594-1815 (3.0 cr)
- or HIST 3703W - European Cities: 1300-1800, HP, IP, WI (3.0 cr)
- or HIST 3704W - Daily Life in Europe: 1300-1800, HP, IP, WI (3.0 cr)
- or HIST 3721 - 20th-Century Europe From the Turn of the Century to the End of World War II: 1900-1945, HP, IP (3.0 cr)
- or HIST 3722 - 20th-Century Europe From the End of World War II to the End of the Cold War: 1945-1991, HP, IP (3.0 cr)
- or HIST 3801 - The People of Early America: 16th to 18th Centuries, CD, HP (3.0 cr)
- or HIST 3871 - American Indian History: Pre-Contact to 1830, CD, HP (4.0 cr)
- or HIST 3872 - American Indian History: 1830 to the Present, CD, HP (4.0 cr)
- or HSCI 1714 - Technology and Civilization: Stone Tools to Steam Engines, HP, IP (4.0 cr)
- or HSCI 1715 - Technology and Civilization: Waterwheels to the Web, HP, IP (4.0 cr)
- or HSCI 1814 - Revolutions in Science: The Babylonians to Newton, HP, IP (4.0 cr)
- or HSCI 1815 - Revolutions in Science: Lavoisier, Darwin, and Einstein, HP, IP (4.0 cr)
- or HSCI 3331 - Technology and American Culture, HP (3.0 cr)
- or HSCI 3332 - Science and American Culture, CD, HP (3.0 cr)
- or HSCI 3714 - Technology and Civilization: Stone Tools to Steam Engines, HP, IP (4.0 cr)
- or HSCI 3715 - Technology and Civilization: Waterwheels to the Web, HP, IP (4.0 cr)
- or HSCI 3814 - Revolutions in Science: The Babylonians to Newton, HP, IP (4.0 cr)
- or HSCI 3815 - Revolutions in Science: Lavoisier, Darwin, and Einstein, HP, IP (4.0 cr)

Photography Courses

- ARTS 1701 - Photography, OH (4.0 cr)
- or DHA 4351 - Design Process: Photography (3.0 cr)
- or PSTL 1485 - Creativity: Photography (4.0 cr)
- or RHET 3101 - Functional Photography (3.0 cr)
- or RHET 3102 - Digital Photography (2.0-3.0 cr)

Major Courses

- DHA 2311 - Drawing and Illustration (3.0 cr)
- DHA 2334 - Computer Applications I: Digital Composition for Design (3.0 cr)
- DHA 2345 - Typographic Design (3.0 cr)
- DHA 2351 - Graphic Design I: Text and Image (3.0 cr)
- DHA 2385W - Design and Factors of Human Perception, WI (4.0 cr)
- DHA 3312 - Color and Form in Surface Design (3.0 cr)
- DHA 3352 - Graphic Design II: Identity and Symbols (3.0 cr)
- DHA 3353 - Graphic Design III: Packaging and Display (3.0 cr)
- DHA 4131W - History of Visual Communication, HP, WI (4.0 cr)
- DHA 4196 - Internship in DHA (1.0-4.0 cr)
- DHA 4334 - Computer Applications II: Design for the Digital Environment (3.0 cr)
- DHA 4345 - Advanced Typographic Design (4.0 cr)
- DHA 4355 - Graphic Design Portfolio (2.0 cr)
- DHA 4354 - Graphic Design IV: Integrative Campaign (4.0 cr)
- DHA 4365W - Graphic Design Senior Seminar, C/PE, WI (4.0 cr)

Emphasizing Materials Courses

Students must take one course emphasizing materials (DHA 4351 may be used if not taken for photography requirement). See an adviser for course options other than those in the list below.

- DHA 4330 - Surface Fabric Design Workshop (4.0 cr)
- or DHA 4340 - Woven, Knit, and Non-Woven Fiber Design Workshop (4.0 cr)
- or DHA 4351 - Design Process: Photography (3.0 cr)
- or DHA 4352 - Design Process: Bookmaking (3.0 cr)

Electives

See an adviser for course options other than those listed below.

Take 2 or more course(s) from the following:

- DHA 5341 - Interactive Design I (3.0 cr)
- DHA 5342 - Interactive Design 2: Interface Design (3.0 cr)
- DHA 5382 - Digital Sound and Video (3.0 cr)
- DHA 5383 - Digital Illustration and Animation (4.0 cr)
- DHA 5386 - Fundamentals of Game Design (3.0 cr)

Housing Studies B.S.

Design, Housing & Apparel

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 71 to 74.

Degree: Bachelor of Science

The housing studies program allows students to study shelter in its multiple dimensions. Coursework in the program includes social and behavioral sciences, economics, public policy, planning, design, and technology.

After first acquiring a broad background of housing courses, students select one of four areas of concentration: community development and policy, housing technology, management and finance, or selected populations.

The housing studies program provides the academic background and professional preparation needed for graduate studies leading to college teaching, research, or planning/administrative positions.

Depending upon prior coursework, the housing studies major requirements can often be completed in two years. Students are encouraged to meet with an adviser to discuss their specific situations.

Admission Requirements

For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

Required Courses

Communication Courses

- COMM 1101 - Introduction to Public Speaking (3.0 cr)
- or PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
- or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
- ENGC 3027W - Advanced Expository Writing, WI (4.0 cr)
- or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)

Required Major Coursework

An internship of at least 300 hours in a situation related to the student's area of specialization is required. Students must complete at least half of the required core program courses before enrolling in the internship (DHA 4196).

BP 3411 - Introduction to Residential Construction (2.0 cr)
 DHA 1101W - Introduction to Design Thinking, OH, WI (4.0 cr)
 DHA 2401 - Introduction to Housing (3.0 cr)
 DHA 2402 - Residential Technology (3.0 cr)
 DHA 2463 - Housing and Community Development, C/PE (3.0 cr)
 DHA 4196 - Internship in DHA (1.0-4.0 cr)
 DHA 4461 - Housing Development and Management (3.0 cr)
 DHA 5463 - Housing Policy (3.0 cr)
 DHA 5467W - Housing and the Social Environment, WI (4.0 cr)
 DHA 4465 - Housing in a Global Perspective, IP (3.0 cr)
 or DHA 5484 - Rural Housing Issues (3.0 cr)
 DHA 5481 - Housing for the Elderly and Special Populations (3.0 cr)
 DHA 3482 - Our Home, Our Environment (3.0 cr)
 or ESPM 3601 - Our Home, Our Environment (3.0 cr)
 APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 or APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
 or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 or ECON 3701 - Money and Banking (3.0 cr)
 or ECON 3801 - Elements of Public Economics (3.0 cr)
 FSOS 3101 - Personal and Family Finances (3.0 cr)
 or FSOS 3102 - Family Systems and Diversity, CD, SSCI (3.0 cr)
 or FSOS 4106 - Family Resource Management (3.0 cr)
 GEOG 3371W - Cities, Citizens, and Communities, CD, SSCI, WI (4.0 cr)
 or GEOG 3605W - Geographical Perspectives on Planning, C/PE, IP, WI (4.0 cr)
 or GEOG 5372W - American Cities II: Land Use, Transportation, and the Urban Economy, WI (4.0 cr)
 or PA 4200 - Urban and Regional Planning (3.0 cr)
 EPSY 3264 - Basic and Applied Statistics, MATH (3.0 cr)
 or PSTL 1004 - Statistics, MATH (4.0 cr)
 or OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
 or PSY 4801 - Introduction to Statistics (4.0 cr)
 or STAT 1001 - Introduction to the Ideas of Statistics, MATH (4.0 cr)
 or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Community Development and Policy

Courses in planning, geography, political science, and urban studies prepare students to work with housing and redevelopment authorities, city or regional planning departments, and nonprofit organizations in policy making, planning, and housing development.

DHA 5469 and 17 credits from a variety of courses are required.

Required Courses

Community Development and Policy Concentration

Courses listed below are suggested, but not inclusive. Students should consult with an adviser for other appropriate courses. Concentration courses must be primarily upper division and must be taken A-F. A minimum grade of C- is required. Note: a course may be used only once to satisfy program requirements.

DHA 5469 - Understanding Housing: Assessment and Analysis (3.0 cr)

Take 17 or more credit(s) from the following:

APEC 5581 - Human Capital and Household Economics (3.0 cr)
 ARCH 5645 - Real Estate Development in Architecture (3.0 cr)
 DHA 4465 - Housing in a Global Perspective, IP (3.0 cr)
 DHA 3482 - Our Home, Our Environment (3.0 cr)
 DHA 5471 - Housing Studies Certificate Seminar (2.0 cr)
 DHA 5481 - Housing for the Elderly and Special Populations (3.0 cr)
 DHA 5484 - Rural Housing Issues (3.0 cr)
 FSOS 3102 - Family Systems and Diversity, CD, SSCI (3.0 cr)
 GEOG 3361W - Land Use, Landscapes, and the Law, C/PE, ENVT, WI (3.0 cr)
 GEOG 3371W - Cities, Citizens, and Communities, CD, SSCI, WI (4.0 cr)
 GEOG 3373 - Changing Form of the City, HP, IP (3.0 cr)
 GEOG 3605W - Geographical Perspectives on Planning, C/PE, IP, WI (4.0 cr)
 GEOG 5361 - Geography and Real Estate (4.0 cr)
 PA 5002 - Introduction to Policy Analysis (1.5 cr)
 PA 5004 - Introduction to Planning (3.0 cr)
 PA 5013 - Law and Urban Land Use (1.5 cr)
 PA 5212 - Managing Urban Growth and Change (3.0 cr)
 POL 1001 - American Democracy in a Changing World, C/PE, SSCI (4.0 cr)
 RHET 4573W - Writing Proposals and Grant Management, WI (3.0 cr)
 RHET 4258 - Information-Gathering Techniques in Scientific and Technical Communication (3.0 cr)
 SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
 SOC 3201 - Inequality: Introduction to Stratification (3.0 cr)
 SOC 3211W - American Race Relations, CD, SSCI, WI (3.0 cr)
 SOC 3451W - Cities and Social Change, SSCI, WI (3.0 cr)
 PA 4200 - Urban and Regional Planning (3.0 cr)
 URBS 1001W - Introduction to Urban Studies: The Complexity of Metropolitan Life, C/PE, WI (3.0 cr)
 URBS 3301W - American Cities As Settings for Cultural Diversity, CD, WI (3.0 cr)
 URBS 3751 - Understanding the Urban Environment, ENVT (3.0 cr)
 URBS 5101 - The City and the Metropolis: An Exploration (3.0 cr)
 GEOG 5371W - American Cities I: Population and Housing, WI (4.0 cr)
 or PA 5201W - American Cities I: Population and Housing, WI (4.0 cr)
 GEOG 5372W - American Cities II: Land Use, Transportation, and the Urban Economy, WI (4.0 cr)
 or PA 5202W - American Cities II: Land Use, Transportation, and the Urban Economy (4.0 cr)

Housing Technology

Courses in design, technology, architecture, and environmental studies prepare students to work in housing construction, renovation, and development firms; energy and housing inspection programs; and historic preservation organizations.

Students must complete at least 20 credits for the concentration.

Required Courses

Housing Technology Concentration

Courses listed below are suggested, but not inclusive. Students should consult with an adviser for other appropriate courses. Concentration courses must be primarily upper division and must be taken A-F. A minimum grade of C- is required. Note: a course may be used only once to satisfy program requirements.

Take 20 or more credit(s) from the following:

ARCH 3412 - Architectural History since 1750, HP, IP (3.0 cr)
 ARCH 5671 - Historic Preservation (3.0 cr)
 ARCH 5672 - Historic Building Conservation (3.0 cr)
 ARCH 5673 - Historic Building Research and Documentation (3.0 cr)
 ARTH 5546 - American Architecture: 1840 to 1914 (3.0 cr)
 BP 4416 - Building Testing and Diagnostics (2.0 cr)
 CE 4101W - Project Management, WI (3.0 cr)
 DHA 1601 - Interior Design Studio I (4.0 cr)
 DHA 1602 - Interior Design Studio II (4.0 cr)
 DHA 2612 - Interior Materials and Specifications (4.0 cr)
 DHA 2613 - Lighting Design and Life Safety Issues (4.0 cr)
 DHA 2621 - Computer Aided Design: Interior Design (4.0 cr)
 DHA 4465 - Housing in a Global Perspective, IP (3.0 cr)

DHA 3482 - Our Home, Our Environment (3.0 cr)
 DHA 5469 - Understanding Housing: Assessment and Analysis (3.0 cr)
 DHA 5481 - Housing for the Elderly and Special Populations (3.0 cr)
 DHA 5484 - Rural Housing Issues (3.0 cr)
 PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
 PUBH 6171 - Exposure Assessment for Air Contaminants (3.0 cr)
 PUBH 6173 - Exposure to Physical Agents (2.0 cr)
 PUBH 6101 - Environmental Health (2.0 cr)
 RHET 4573W - Writing Proposals and Grant Management, WI (3.0 cr)
 BP 4413 - Systems Approach to Residential Construction (3.0 cr)
 BP 4414 - Advanced Residential Building Science, WI (3.0 cr)
 BP 4415 - Advanced Residential Building Science Lab (1.0 cr)

Management/Finance

Courses in economics and business prepare students to work in public and private housing management, state finance agencies, commercial banks, and mortgage and title companies.

Students must complete at least 20 credits for the concentration.

Required Courses

Management and Finance Concentration

Courses listed below are suggested, but not inclusive. Students should consult with an adviser for other appropriate courses. Concentration courses must be primarily upper division and must be taken A-F. A minimum grade of C- is required. Note: a course may be used only once to satisfy program requirements.

Take 20 or more credit(s) from the following:

APEC 3001 - Applied Microeconomics: Consumers, Producers, and Markets, SSCI (4.0 cr)
 APEC 3002 - Applied Microeconomics: Managerial Economics (4.0 cr)
 APEC 3006 - Applied Macroeconomics: Government and the Economy (3.0 cr)
 APEC 5341 - Public Finance (3.0 cr)
 APEC 5581 - Human Capital and Household Economics (3.0 cr)
 ARCH 5645 - Real Estate Development in Architecture (3.0 cr)
 BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
 DHA 4465 - Housing in a Global Perspective, IP (3.0 cr)
 DHA 3482 - Our Home, Our Environment (3.0 cr)
 DHA 5469 - Understanding Housing: Assessment and Analysis (3.0 cr)
 DHA 5481 - Housing for the Elderly and Special Populations (3.0 cr)
 DHA 5484 - Rural Housing Issues (3.0 cr)
 ECON 3701 - Money and Banking (3.0 cr)
 ECON 3801 - Elements of Public Economics (3.0 cr)
 FINA 3001 - Finance Fundamentals (3.0 cr)
 FINA 4241 - Corporate Financing Decisions (4.0 cr)
 GEOG 5361 - Geography and Real Estate (4.0 cr)
 MGMT 3001 - Fundamentals of Management (3.0 cr)
 MGMT 4002 - Managerial Psychology (4.0 cr)
 MKTG 3001 - Principles of Marketing (3.0 cr)
 MKTG 3010 - Marketing Research (4.0 cr)
 MKTG 4040 - Buyer Behavior (4.0 cr)
 RHET 3266 - Group Process, Team Building, and Leadership, C/PE (3.0 cr)
 RHET 4165 - Managerial and Organizational Communication, Planning, and Change (3.0 cr)
 RHET 4573W - Writing Proposals and Grant Management, WI (3.0 cr)
 APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr) or
 ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr) or
 ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 APEC 1251 - Principles of Accounting (3.0 cr) or
 ACCT 2050 - Introduction to Financial Reporting (4.0 cr)

Selected Populations

Courses (or a minor) in areas such as sociology, social work, gerontology, women's studies, African-American and African studies, American Indian studies, or Chicano studies prepare

students to work in housing-related programs involving human relations, advocacy, and affirmative action or to work in housing programs for low-income families and for the elderly or disabled.

An area of concentration in selected populations may be fulfilled in two ways. Students are required to complete one of the following course groups.

Option One

Complete an appropriate minor along with additional credits in supporting courses. Under option one, a concentration can be done in such minors as African-American and African studies, American Indian studies, Chicano studies, global studies, Latin American studies, women's studies, or youth studies. For admission procedures and minor requirements, contact the department offering the minor. Minor and coursework to total 20 credits

Option Two

Concentrate on one or more special populations for which no specific undergraduate minor is offered. Choose courses from selected populations: the elderly; or selected populations: low income, minority, and households with children.

Selected Populations: the elderly

Take 20 or more credit(s) from the following:

DHA 5481 - Housing for the Elderly and Special Populations (3.0 cr)
 DHA 5484 - Rural Housing Issues (3.0 cr)
 FSOS 4154W - Families and Aging, WI (3.0 cr)
 GERO 5105 - Multidisciplinary Perspectives on Aging (3.0 cr)
 KIN 5385 - Exercise for Disease Prevention and Management (3.0 cr)
 PA 5412 - Aging and Disability Policy (3.0 cr)
 PSY 5138 - Psychology of Aging (3.0 cr)
 PUBH 3001 - Personal and Community Health (2.0 cr)
 PUBH 6904 - Nutrition: Adults and the Elderly (2.0 cr)
 REC 5241 - Functional Intervention: Recreation Therapy in Geriatric Care (3.0 cr)
 RHET 4573W - Writing Proposals and Grant Management, WI (3.0 cr)
 RHET 4258 - Information-Gathering Techniques in Scientific and Technical Communication (3.0 cr)
 SW 2001 - Introduction to Social Welfare and Community Services, C/PE (4.0 cr)
 SW 5313 - Social Work with Older Adults (2.0 cr)
 WOST 4201 - The Older Woman: A Feminist Perspective (3.0 cr)

Selected Populations: low income, minority, and households with children

Take 20 or more credit(s) from the following:

CPSY 2301 - Introductory Child Psychology, SSCI (4.0 cr)
 DHA 5469 - Understanding Housing: Assessment and Analysis (3.0 cr)
 DHA 5484 - Rural Housing Issues (3.0 cr)
 FSOS 3101 - Personal and Family Finances (3.0 cr)
 FSOS 3102 - Family Systems and Diversity, CD, SSCI (3.0 cr)
 FSOS 3426 - Alcohol and Drugs: Families and Culture, CD, SSCI (3.0 cr)
 FSOS 4106 - Family Resource Management (3.0 cr)
 FSOS 4153 - Family Financial Counseling (3.0 cr)
 FSOS 4156 - Legal-Economic Controversies in Families (3.0 cr)
 GEOG 3375 - Minority Settlement in America, CD (3.0 cr)
 GEOG 5371W - American Cities I: Population and Housing, WI (4.0 cr)
 PA 5401 - Poverty, Inequality, and Public Policy (3.0 cr)
 PA 5411 - Child Welfare Policy (3.0 cr)
 PA 5421 - Racial Inequality and Public Policy (3.0 cr)
 POL 1001 - American Democracy in a Changing World, C/PE, SSCI (4.0 cr)
 POL 3051 - Power and Choice: Who Gets What, When, and Why, C/PE, SSCI (3.0 cr)
 PUBH 3001 - Personal and Community Health (2.0 cr)
 PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)
 RHET 4573W - Writing Proposals and Grant Management, WI (3.0 cr)
 RHET 4258 - Information-Gathering Techniques in Scientific and Technical Communication (3.0 cr)
 SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)

SOC 3201 - Inequality: Introduction to Stratification (3.0 cr)

 SW 3051 - Cultural Diversity and the Helping Process, CD (3.0 cr)
 SW 3101 - Interventions in Community and Social Policy, C/PE (3.0 cr)
 SW 3203 - Interventions with Individuals and Groups (3.0 cr)
 SW 5101 - Historical Origins and Contemporary Policies and Programs in Social Welfare (3.0-4.0 cr)

Housing Studies Minor

Required credits in this minor: 15.

See major description for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

General Requirements

Required Courses

Minor Courses

DHA 2401 - Introduction to Housing (3.0 cr)
 DHA 2463 - Housing and Community Development, C/PE (3.0 cr)
Take 3 or more course(s) from the following:
 DHA 4461 - Housing Development and Management (3.0 cr)
 DHA 4465 - Housing in a Global Perspective, IP (3.0 cr)
 DHA 3482 - Our Home, Our Environment (3.0 cr)
 DHA 5463 - Housing Policy (3.0 cr)
 DHA 5467W - Housing and the Social Environment, WI (4.0 cr)
 DHA 5469 - Understanding Housing: Assessment and Analysis (3.0 cr)
 DHA 5481 - Housing for the Elderly and Special Populations (3.0 cr)
 DHA 5484 - Rural Housing Issues (3.0 cr)

Interior Design B.S.

Design, Housing & Apparel

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 125.

Required credits within the major: 95.

This program requires summer terms.

Degree: Bachelor of Science.

Interior design is a professional program accredited by the Council for Interior Design Accreditation (CIDA). Its focus is on providing for human welfare by improving the quality of life and protecting human health and safety through design of the interior environment. Students study fundamentals, theory, process, communication, research, and technology to identify and solve problems related to people and their use of interior space. They analyze human behavior to determine clients' functional, aesthetic, social, and psychological needs, which prepares them to solve interior design problems. They design various types of interiors such as hospitals, offices, schools, residences, restaurants, hotels, and entertainment facilities. To do this, students acquire

- a foundation in basic design;

- understanding of the relationship between individuals and their environments;
- understanding of the contextual relationship of the site, the building, and its systems to the interior;
- knowledge of regulations that govern their practice of interior design;
- the ability to research users' needs and apply their findings to problem identification and solution;
- understanding of historical precedent and contemporary design theories;
- technical knowledge and communication skills;
- understanding of business issues and professional ethics; and
- a sense of responsibility to society, especially in the use of resources.

Admission Requirements

Students must complete seven courses before admission to the program. Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Admission to the pre-major status is done by a competitive holistic review. Students must maintain a GPA of 2.50 during pre-major coursework. In addition, students must receive a minimum grade of C- or better in the required pre-major courses before going through portfolio review (not just a 2.50 GPA). Once students have achieved major status, they must maintain a GPA of 2.00.

For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

Required Courses for Admission

Pre-Interior Design Courses

Students must complete freshman composition and at least one additional liberal education course in addition to the required coursework below to be admitted to major status in the interior design program.

Note: Students must be admitted to a pre-major status to take most of these courses.

DHA 1101W - Introduction to Design Thinking, OH, WI (4.0 cr)
 DHA 1311 - Foundations: Drawing and Design in Two and Three Dimensions (4.0 cr)
 DHA 1312 - Foundations: Color and Design in Two and Three Dimensions (4.0 cr)
 DHA 1601 - Interior Design Studio I (4.0 cr)
 DHA 1602 - Interior Design Studio II (4.0 cr) General Requirements
 Recommended freshman writing course(s) for this program:
 RHET 1101.

Program Requirements

Students must complete a 400-hour internship (DHA 4196) after completing DHA 3606 and DHA 3614.

Required Courses

Architectural History Courses

ARCH 3411 - Architectural History to 1750, HP, IP (3.0 cr) or
 ARCH 3412 - Architectural History since 1750, HP, IP (3.0 cr)

Business Courses

MGMT 1350 - Introduction to Business and Business Careers (3.0 cr)or
MGMT 3001 - Fundamentals of Management (3.0 cr)

Communication Courses

COMM 1101 - Introduction to Public Speaking (3.0 cr)or
PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)or
RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
ENGC 3027W - Advanced Expository Writing, WI (4.0 cr)or
RHET 3562W - Technical and Professional Writing, WI (4.0 cr)

Psychology Courses

PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)or
PSTL 1281 - General Psychology, SSCI (4.0 cr)

Major Courses

Recommended courses to take if elective credits are needed:

DHA 4131, DHA 4330, DHA 4340, DHA 4165, DHA 5111, and DHA 5481.
DHA 2213 - Textile Analysis (4.0 cr)
DHA 2402 - Residential Technology (3.0 cr)
DHA 2603 - Interior Design Studio III (4.0 cr)
DHA 2604 - Interior Design Studio IV (4.0 cr)
DHA 2612 - Interior Materials and Specifications (4.0 cr)
DHA 2613 - Lighting Design and Life Safety Issues (4.0 cr)
DHA 2621 - Computer Aided Design: Interior Design (4.0 cr)
DHA 3605 - Interior Design Studio V (4.0 cr)
DHA 3606 - Interior Design Studio VI (4.0 cr)
DHA 3614 - Interior Design Ethics and Professional Practice, C/PE (4.0 cr)
DHA 4161 - History of Interiors and Furnishings: Ancient to 1750, IP (4.0 cr)
DHA 4162 - History of Interiors and Furnishings: 1750 to Present, IP (4.0 cr)
DHA 4196 - Internship in DHA (1.0-4.0 cr)
DHA 4607 - Interior Design Studio VII (4.0 cr)
DHA 4608 - Interior Design Thesis, WI (4.0 cr)
DHA 4615W - Interior Design Research, WI (2.0 cr)

Retail Merchandising B.S.***Design, Housing & Apparel***

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 89 to 94.

Degree: Bachelor of Science.

The retail merchandising program offers a wide range of educational and career opportunities, including visits to international retailers, travel to foreign and domestic retail centers, and professional experiences such as study abroad and internships with national and international retailers. Program graduates begin their careers in store or corporate environments. Entry-level positions include merchandising, marketing, product development, distribution, store management, buying, advertising, sales promotion, and human resources.

Admission Requirements

For information about University of Minnesota admission requirements, visit <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program:
RHET 1101.

Program Requirements**Required Courses****Preparatory Courses**

COMM 1101 - Introduction to Public Speaking (3.0 cr)or
PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)

College of **Education and Human Development**

General Information

This information is subject to change. For the most current information, contact the college's office of Student & Professional Services (SPS), 612-625-3339, or visit the CEHD Web site at www.education.umn.edu.

In July 2006, the College of Education and Human Development (CEHD) begins a second century of teaching, research, and service for students and the citizens of Minnesota. It marks this milestone with dramatic changes as the Department of Family Social Science, the School of Social Work, and General College (now the Department of Postsecondary Teaching and Learning) come together with programs in the College of Education and Human Development to create a dynamic new college.

The new CEHD offers a unique blend of academic excellence and applied knowledge, allowing students to learn from faculty members conducting research on a wide spectrum of topics from early childhood development, to fitness and wellness, to family structures to human resource development to learning across the life span. Most programs require students to apply classroom and textbook knowledge to "real-world" situations of student teaching or internships.

CEHD's mission is to generate and apply knowledge about teaching, learning, and human development and to improve education for all individuals. The college prepares students to meet the challenges of teaching and leading in increasingly culturally diverse classrooms, schools, and society. Strongly committed to diversity, the college offers several financial and mentoring programs to support students of underrepresented populations. Because community outreach also plays an important role in its mission, the college has developed an extensive network of community ties allowing transfer of classroom and research knowledge to practice in schools and the workplace, and the incorporation of community viewpoints into the college's teaching and research missions.

The college includes the following:

- Institute of Child Development (ICD)
- Curriculum & Instruction (CI)
- Educational Policy and Administration (EdPA)
- Educational Psychology (EdPsych)
- Family Social Science (FSoS)
- Postsecondary Teaching and Learning (PSTL)
- School of Kinesiology (Kin)
- School of Social Work (SSW)
- Work and Human Resource Education (WHRE)

Admission

Application policies and deadlines vary by program. Policies are subject to change. For current information, contact the following offices:

Freshman students

University of Minnesota Admissions Office
612-625-2008
www.admissions.tc.umn.edu

Transfer students

Students transferring to CEHD from schools outside the University of Minnesota:

University of Minnesota Admissions Office
612-625-2008
www.admissions.tc.umn.edu

Students transferring to CEHD from other University of Minnesota colleges (e.g., CLA, IT):

CEHD Student & Professional Services (SPS)
612-625-3339
spsinfo@umn.edu
www.education.umn.edu

For information about individual academic programs, contact the department offering the program.

Orientation

The Office of Orientation and First-Year Programs is responsible for new student orientation programs for freshman and transfer students. The campus-wide program serves as the official welcome to the University of Minnesota. The program, planned with the college, introduces students to the opportunities and resources at the University. Information is sent to all students after admission to the University. Orientation programs are held throughout the summer and just prior to the beginning of each semester.

For more information, contact:

CEHD office of Student & Professional Services (SPS)

612-625-3339
spsinfo@umn.edu
www.education.umn.edu/sps

University of Minnesota Orientation and First-Year Programs

612-624-1979, 1-800-234-1979
ofyp@umn.edu
www.ofyp.umn.edu

Programs of Study

CEHD offers undergraduate and advanced study in a wide range of teaching and human development fields. Some programs prepare graduates for careers in business, government, and community settings, while others prepare students for preK-12 teaching licensure by the state of Minnesota.

In fall 2006, the college will admit freshman students to two areas, family social science and general studies.

- Family social science, formerly offered in the College of Human Ecology (CHE), is a multidisciplinary major for careers related to helping people, counseling, and understanding human relationships. Graduates are prepared to work with individuals, families, or in human service systems.

- General studies, formerly offered in General College, is designed for students who have strong academic potential but whose high-school records suggest they may benefit from additional tutoring, advising, and mentoring support during their first year of college. The curriculum is focused on providing each student with intensive learning experiences with faculty members in small-enrollment courses, freshman seminars, and interdisciplinary learning communities that promote academic and social integration.

With the exception of general studies, students can enter the college as transfer students. Most programs require students to be juniors (with at least 60 semester credits), but some will admit students beginning their sophomore year (with at least 30 semester credits).

In fall 2007, it is expected that the other majors in the college will begin admitting freshmen. Check the CEHD Web site for complete and current information.

Bachelor of Science (B.S.)

The college's undergraduate majors prepare students for careers as educators and human development professionals in varied settings. All University of Minnesota students, whatever their declared major, may complement their degree programs by taking a variety of elective courses available in CEHD.

The two main categories of CEHD undergraduate programs are described below.

- Human development programs—These programs can lead to careers in business and marketing education, human resource development, family science, social work, or sport and fitness industries.
- Teaching and teaching preparation programs—These programs prepare students to meet requirements for preK-12 teaching licensure in the state of Minnesota, in areas of early childhood education, elementary education, or business and technology education.

Some undergraduate programs appear in both categories because they offer teaching preparation and human development programs (e.g., agricultural education).

Human Development Programs

These programs prepare students for leadership, supervisory, or administrative positions by developing the leadership and communication skills needed for a career in business or fitness and recreation settings. Graduates work in areas ranging from sales and marketing, human resource development, coaching, health and fitness clubs, state parks, and youth and community recreation agencies.

- agricultural education
- business and marketing education
- child psychology—See College of Liberal Arts (CLA) section
- family social science
- general studies
- human resource development
- kinesiology
- recreation, park, and leisure studies
- sport studies

Teaching and Teaching Preparation Programs

These programs prepare students for preK-12 teaching licensure by the state of Minnesota. Other states may have different requirements. Contact state teaching licensure agencies for more information.

Some undergraduate programs in the following list offer a direct path to licensure (e.g., technology education). Others require further study in related master of education (M.Ed.)/initial licensure programs.

- agricultural education
- business and marketing education
- career and technical education
- foundations of education: early childhood education
- foundations of education: elementary
- kinesiology (pre-physical education)
- music education—See College of Liberal Arts (CLA) section
- technology education

For more information, contact a program adviser at Student and Professional Services, 612-625-6501, or spsinfo@umn.edu.

Minors

Several undergraduate minors are available. Minors offer shorter, concentrated areas of study, usually totaling 15-20 credits.

- coaching
- family violence prevention
- family social science
- leadership
- social justice
- youth studies

Honors

The college currently offers honors programs for students in family social science and kinesiology programs.

The family social science lower division honors program offers freshmen and sophomores an opportunity to form close relationships; to explore new ideas; and to share their ideas, interests, and academic lives on a daily basis. Students develop these relationships by participating in honors classes and by living in honors housing in residence halls on campus. Lower division honors students complete three honors learning experiences.

The upper division honors program offers juniors and seniors additional opportunities to achieve their academic and professional goals. Upper division students complete two honors learning experiences and carry out a capstone project, an in-depth exploration of a topic specifically related to their major. Students successfully completing the upper division honors program are eligible to graduate with Latin honors (cum laude, magna cum laude, or summa cum laude).

For more information, students should contact the family social sciences adviser, 290 McNeal Hall, St. Paul, or SPS, 110 Wulling Hall, Minneapolis.

The undergraduate kinesiology honors program offers rigorous academics and unique research opportunities. Participants graduate with one of the traditional honors designations: cum laude, magna cum laude, or summa cum laude. The honors program emphasizes directed research in the physical activities sciences, with students completing research that warrants publication in a professional journal. Program requirements include a kinesiology honors seminar (two semesters) and an undergraduate research symposium.

Students may apply to the honors program at the same time they apply for admission to the undergraduate kinesiology program. For more information, contact the School of Kinesiology, 612-625-5300, or visit the School of Kinesiology Web site at www.education.umn.edu/Kin.

Policies and Procedures

Students are responsible for complying with all University of Minnesota policies and CEHD and academic program requirements. See the “Policies” section of this catalog.

Graduation Requirements

Students are responsible for complying with all University of Minnesota policies and CEHD and academic program requirements. See the “Policies” section of this catalog and “Degree Program” section in the following text.

Teaching Licensure

To teach in a public school classroom, students must be licensed by the state. Several CEHD teacher licensure programs are offered at the undergraduate level: agricultural education; career and technical education; music education; and technology education. Other CEHD initial licensure programs are offered at the master’s level; students must first complete an undergraduate degree with appropriate prerequisites.

The college offers initial licensure programs in adult basic education, agricultural education, art education, business and marketing education, early childhood education and early childhood special education, elementary education, English education, family education, industrial education (technology education), mathematics education, physical education, science education, second languages and cultures education (including English as a second language), social studies education, and special education. These licensure programs reflect the most current thinking and research in the field, with strong clinical experiences and special attention to multicultural education. CEHD licensure programs are approved by the Minnesota Board of Teaching and accredited by the National Council for the Accreditation of Teacher Education (NCATE).

Teaching licenses are awarded by the Minnesota Board of Teaching; CEHD is responsible for recommending eligible candidates to the state. The CEHD recommendation for licensure is based on successful completion of coursework that includes a standards-based curriculum, favorable faculty judgment regarding teaching competence, and meeting minimum standards on state-required examinations.

Minnesota state law and a Minnesota Board of Teaching regulation require teacher licensure candidates to meet specific competencies. This requirement is met through a combination of required and elective coursework at the graduate level. Candidates also must pass the Praxis Series tests, which assess basic skills of reading, writing, and mathematics; content knowledge; and pedagogy and teaching methods. Minnesota state law also requires all initial licensure applicants to be fingerprinted and pass criminal background checks.

Scholarships

Students are encouraged to apply for scholarships to further their studies; most awards are made on an annual basis. In addition to financial aid offered by the University, the college administers several scholarship programs of its own. Find out more about available scholarships, application materials and instructions at SPS, 110 Wulling Hall (612-625-6501; e-mail: spsinfo@umn.edu) or online at www.education.umn.edu or www.onestop.umn.edu.

Student Organizations

The college offers several undergraduate student groups, including:

The Association of Students in Education and Human Development (ASEHD) is open to all CEHD undergraduates as well as students in other University colleges who aspire to be educators or human development professionals. ASEHD has three subcommittees: intramurals, professional development, and community service. The intramural group participates in intramural sports organized by the University’s Department of Recreational Sports. Students interested in learning more about their chosen careers participate in the professional development group. The community service group serves the college, University, and Twin Cities metropolitan area. For more information, contact SPS, 110 Wulling Hall (612-625-6501).

Family Social Science Roundtable was established to create a sense of identity within the Department of Family Social Science, provide networking opportunities, promote healthy relationships, provide hands-on experience in community service and involvement, and encourage socialization with peers and faculty. For more information, contact William Goodman, 612-625-1282, e-mail: wgoodman@umn.edu.

The Agricultural Education Club offers civic and social leadership activities and is open to all students interested in the field. The group promotes professional roles in agricultural education, and strengthens relationships with state and national FFA organizations (Future Farmers of America).

Degree Programs and Minors

Agricultural Education B.S.

Work and Human Resource Education

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120 to 128.

Required credits within the major: 88.

This program requires summer terms.

Degree: Bachelor of Science

The undergraduate agricultural education program is a collaborative partnership between the College of Education and Human Development and College of Food, Agricultural and Natural Resource Sciences (CFANS). Three specializations are available. The agricultural science and technology education specialization and natural and managed environmental education specialization prepare students for Minnesota state teaching licensure. The agricultural leadership, training, and development specialization prepares students for agricultural industry and leadership careers, focusing on development of interpersonal skills. It does not lead to teaching licensure.

Admission Requirements

Students must complete 60 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Minimum GPAs are preferred for the following specializations:

- 2.50 for agricultural science and technology education or natural and managed environmental education
- 2.00 for agricultural leadership training and development

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

Required Courses

Communications

RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

Social Sciences

PSTL 1281 - General Psychology, SSCI (4.0 cr)
or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

Physical Sciences and Mathematics

BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)
CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)
MATH 1031 - College Algebra and Probability, MATH (3.0 cr)

Major Courses

AFEE 1001 - Introduction to Agricultural Education and Extension (1.0 cr)
AFEE 1002 - Principles of Career Planning for Agricultural Professionals (1.0 cr)
AFEE 2051 - Current Technical Competencies (3.0 cr)
AFEE 5111W - Agricultural Education: Methods of Teaching, WI (4.0 cr)
AGRI 3001 - Pests and Crop Protection (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans.

Agricultural Leadership, Training, and Development

This specialization provides a unique, futuristic educational opportunity combining agricultural science, management, communication, leadership, education, business and industry, training, and development. It provides a general background in agriculture, with agribusiness and industry associations. Graduates have opportunities and flexibility in employment ranging from human resource development, sales and marketing, extension, and communications in statewide, national, and international situations. This specialization does not lead to teaching licensure.

Business experience is required along with completion of courses. Students must maintain an overall GPA of 2.00.

Required Courses

Physical and Biological Sciences

AGRI 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)
AGRO 1101 - Biology of Plant Food Systems, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Plant Science

Take 6 or more credit(s) from the following:

AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)
AGRO 2501 - Plant Identification for Urban and Rural Landscapes (2.0 cr)
AGRO 4005 - Applied Crop Physiology and Development (4.0 cr)
ANSC 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
HORT 1001 - Plant Propagation, BIOL SCI/L (4.0 cr)
HORT 3005 - Environmental Effects on Horticultural Crops (2.0 cr)

Animal Science

ANSC 1101 - Introductory Animal Science (4.0 cr)
ANSC 1403 - Companion Animal Nutrition and Care (3.0 cr)
or ANSC 2401 - Animal Nutrition (3.0 cr)

Take 3 or more credit(s) from the following:

ANSC 1511 - Food Animal Products for Consumers (3.0 cr)
ANSC 2012 - Livestock and Carcass Evaluation (3.0 cr)
ANSC 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)

Soils

SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)
or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Applied Economics and Agribusiness

APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
APEC 1251 - Principles of Accounting (3.0 cr)
APEC 3451 - Food and Agricultural Sales (3.0 cr)
or BIE 3061 - Professional Sales Management (3.0 cr)

Agricultural Leadership and Development

AFEE 2221 - People Skills for Leadership (3.0 cr)
AFEE 3221 - Presentations and Meeting Management for Agricultural Industry (3.0 cr)
AFEE 4221 - Rural Leadership Development, C/PE (3.0 cr)
AFEE 5361 - World Development Problems (3.0 cr)

Experiential Education

AFEE 2096 - Professional Practicum in Agricultural Education: Early Experience (1.0-3.0 cr)
AFEE 3096 - Experiential Learning: Production and Business (1.0-8.0 cr)

Human Resource Development

HRD 3001 - Introduction to Human Resource Development (3.0 cr)
HRD 3201 - Introduction to Training and Development (3.0 cr)

Human Resource Development/AFEE Electives

Students who complete the HRD focus (described below) must fulfill this 6 credit HRD/AFEE requirement by choosing courses from the AFEE, BIE, and WHRE designators.

Take 6 or more credit(s) from the following:

AFEE 5331 - History, Philosophy, and Systems of Extension (3.0 cr)
BIE 3061 - Professional Sales Management (3.0 cr)
WHRE 3105 - Introduction to Strategic Planning Through Human Resources (3.0 cr)
HRD 3301 - Introduction to Organization Development (3.0 cr)
HRD 5106 - Evaluation in Human Resource Development (3.0 cr)
HRD 5202 - Training on the Internet (3.0 cr)
HRD 5302 - Managing Work Teams in Business and Industry (3.0 cr)
HRD 5624 - Sales Training (3.0 cr)
WHRE 5121 - Principles of Supervisory Management (3.0 cr)

Agricultural Leadership, Training, and Development Focus

Students are required to complete one of the following course groups.

Agricultural Science

Take 10 or more credit(s) from the following:

AGRO 2501 - Plant Identification for Urban and Rural Landscapes (2.0 cr)
AGRO 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
AGRO 4005 - Applied Crop Physiology and Development (4.0 cr)
ANSC 1511 - Food Animal Products for Consumers (3.0 cr)
ANSC 2012 - Livestock and Carcass Evaluation (3.0 cr)
ANSC 2211 - Biometrics for Livestock, MATH (3.0 cr)
ANSC 3301 - Systemic Physiology (4.0 cr)
FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)
PLPA 3002 - Air Pollution, People, and Plants: The Science and the Ethics, C/PE, ENVT (3.0 cr)

-OR-

Agricultural Business and Management

Take 10 or more credit(s) from the following:

APEC 3041W - Economic Development of U.S. Agriculture, HP, WI (3.0 cr)
APEC 3411 - Commodity Marketing (3.0 cr)
APEC 3811 - Principles of Farm Management (3.0 cr)

APEC 3xxx

-OR-

Communication

Take 10 or more credit(s) from the following:

RHET 1152W - Writing on Issues of Science and Technology, C/PE, WI (4.0 cr)
RHET 3221W - Theories of Human Communication, C/PE, SSCI, WI (4.0 cr)
RHET 3257 - Scientific and Technical Presentations (3.0 cr)
RHET 3266 - Group Process, Team Building, and Leadership, C/PE (3.0 cr)
RHET 3401 - Internet Communication: Tools and Issues (3.0 cr)

-OR-

Human Resource Development

Take 10 or more credit(s) from the following:

WHRE 3105 - Introduction to Strategic Planning Through Human Resources (3.0 cr)
HRD 3301 - Introduction to Organization Development (3.0 cr)
HRD 5106 - Evaluation in Human Resource Development (3.0 cr)
HRD 5202 - Training on the Internet (3.0 cr)
HRD 5302 - Managing Work Teams in Business and Industry (3.0 cr)
HRD 5624 - Sales Training (3.0 cr)

Agricultural Science and Technology Education

This specialization serves students preparing to teach agriscience, agribusiness, agriculture, horticulture, food systems, agrimechanics, and natural resource management under the licensure field of agricultural education in public schools at the 5-12 level. Its broad agricultural science and technology curriculum also prepares graduates for a wide range of agriculturally related positions in sales, management, finance, and production aspects of agriculture.

Students may graduate from this program with a minimum 2.00 overall GPA, but a minimum 2.50 overall GPA is required for recommendation for Minnesota teaching licensure. Major coursework (courses with AFEE, BIE, EDHD, HRD, and WHRE designators) must be completed with a minimum 2.00 GPA with no grade lower than C-. A minimum grade of C- is also required for general psychology.

The specialization requires a broad study of agriculture, including plant science (horticulture, agronomy, plant pathology, and entomology), animal science, natural resources, soils, economics and agribusiness, agricultural mechanization, food science, foundations of education, foundations of agricultural education, and a full-year student teaching experience.

Required Courses**Physical and Biological Sciences**

AGRI 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)
or PSTL 1163 - Physical Systems: Principles and Practices, PHYS SCI/L (4.0 cr)
AGRO 1101 - Biology of Plant Food Systems, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
or PSTL 1131 - Principles of Biological Science, BIOL SCI/L (4.0 cr)
FSCN 1021 - Introductory Microbiology, BIOL SCI/L (4.0 cr)
or VBS 2032 - General Microbiology With Laboratory (4.0 cr)
PHYS 1001W - Energy and the Environment, ENVT, PHYS SCI/L, WI (4.0 cr)
or PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)

Social Sciences

HSCI 1814 - Introduction to History of Science: Ancient Science to the Scientific Revolution, HP, IP (4.0 cr)
or HSCI 1815 - Introduction to History of Science: Modern Science, HP, IP (4.0 cr)
or any history course that meets HP or IP liberal education requirements

Plant Science

Take 3 or more credit(s) from the following:

- AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)
- HORT 1001 - Plant Propagation, BIOL SCI/L (4.0 cr)
- HORT 1013 - Floral Design (2.0 cr)
- HORT 3002W - Greenhouse Management, WI (3.0 cr)
- AGRO 4401 - Plant Genetics and Breeding (4.0 cr)
- or HORT 4401 - Plant Genetics and Breeding (4.0 cr)

Animal Science

- ANSC 1403 - Companion Animal Nutrition and Care (3.0 cr)
- or ANSC 2401 - Animal Nutrition (3.0 cr)

Take 1 or more course(s) from the following:

- ANSC 1101 - Introductory Animal Science (4.0 cr)
- ANSC 1511 - Food Animal Products for Consumers (3.0 cr)
- ANSC 2012 - Livestock and Carcass Evaluation (3.0 cr)
- ANSC 3221 - Animal Breeding (4.0 cr)

Natural Resources

Take 6 or more credit(s) from the following:

- EEB 3001 - Ecology and Society, ENVT (3.0 cr)
- ENR 1201 - Conservation and Management of Natural Resources, ENVT (3.0 cr)
- ES 1011 - Issues in the Environment, C/PE, ENVT (3.0 cr)
- ES 1051 - Introduction to Environmental Science, ENVT (3.0 cr)
- FW 1002 - Wildlife: Ecology, Values, and Human Impact, ENVT, C/PE (3.0 cr)

Soils

- SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)
- or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Applied Economics and Agribusiness

- APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
- APEC 3451 - Food and Agricultural Sales (3.0 cr)
- APEC 1251 - Principles of Accounting (3.0 cr)
- or APEC 3811 - Principles of Farm Management (3.0 cr)
- or APEC 3821 - Retail Center Management (3.0 cr)

Additional Required Courses

- FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)
- AFEE 3112 - Technical Drawing and Production Technologies (3.0 cr)
- or WHRE 3121 - Communication, Energy and Power, Transportation and Machinery Technologies (3.0 cr)

Foundations

- CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 cr)
- EDHD 5001 - Learning, Cognition, and Assessment (3.0 cr)
- EDHD 5003 - Developmental and Individual Differences in Educational Contexts (3.0 cr)
- EDHD 5005 - School and Society (2.0 cr)
- EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
- EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- EDPA 5341 - The American Middle School (3.0 cr)
- PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)
- or PUBH 3005 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)

Agricultural Education

- AFEE 2096 - Professional Practicum in Agricultural Education: Early Experience (1.0-3.0 cr)
- AFEE 5112 - Agricultural Education Program Organization and Curriculum for Youth (3.0 cr)
- AFEE 5114 - Agricultural Education Teaching Seminar (1.0 cr)
- AFEE 5116 - Coordination of SAE Programs: Work-based Learning (2.0 cr)
- AFEE 5118 - Strategies for Managing and Advising the FFA Organization (2.0 cr)

Work and Human Resource Education

Take 8 credits from the following. Standard first aid and cardiopulmonary resuscitation (CPR) training are required for licensure.

- WHRE 5697 - Teaching Internship: School and Classroom Settings (2.0 cr)
- WHRE 5698 - Teaching Internship (3.0-8.0 cr)

Natural and Managed Environmental Education

This specialization serves students preparing to teach agriscience, agribusiness, agriculture, horticulture, food systems, agrimechanics, and natural resource management, all under the licensure field of agricultural education in public schools at the 5-12 level. In addition, graduates have an emphasis in natural resource management and education and are prepared for work in environmental learning centers.

Students may graduate from this program with a minimum 2.00 GPA, but a minimum 2.50 GPA is required for recommendation for a Minnesota teaching license.

The specialization requires a broad study in agriculture focused on the natural and managed environmental education areas. Areas of study include the environment, land, water, climate, economics, soil, plant science, animal science, and agricultural mechanization. It also includes foundations in education, foundations in agricultural education, and a full-year student teaching experience.

Required Courses**Physical and Biological Sciences**

- AGRI 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)
- or PSTL 1163 - Physical Systems: Principles and Practices, PHYS SCI/L (4.0 cr)
- AGRO 1101 - Biology of Plant Food Systems, BIOL SCI/L, ENVT (4.0 cr)
- or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
- or PSTL 1131 - Principles of Biological Science, BIOL SCI/L (4.0 cr)
- FSCN 1021 - Introductory Microbiology, BIOL SCI/L (4.0 cr)
- or VBS 2032 - General Microbiology With Laboratory (4.0 cr)
- PHYS 1001W - Energy and the Environment, ENVT, PHYS SCI/L, WI (4.0 cr)
- or PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)

Social Sciences

- HSCI 1814 - Introduction to History of Science: Ancient Science to the Scientific Revolution, HP, IP (4.0 cr)
- or HSCI 1815 - Introduction to History of Science: Modern Science, HP, IP (4.0 cr)
- or Any history course that meets HP or IP liberal education requirements

Natural Resources

- ES 1011 - Issues in the Environment, C/PE, ENVT (3.0 cr)
- Take 6 or more credit(s) from the following:
- EEB 3001 - Ecology and Society, ENVT (3.0 cr)
- ES 1051 - Introduction to Environmental Science, ENVT (3.0 cr)
- FR 2104 - Measuring Forest Resources (1.0 cr)
- FR 3104 - Forest Ecology (4.0 cr)
- FW 1002 - Wildlife: Ecology, Values, and Human Impact, ENVT, C/PE (3.0 cr)
- FW 2001 - Introduction to Fisheries, Wildlife, and Conservation Biology, ENVT (3.0 cr)

Land, Water, Atmosphere

- SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)
- ENR 1201 - Conservation and Management of Natural Resources, ENVT (3.0 cr)
- or ES 1425 - The Atmosphere, ENVT, PHYS SCI/L (4.0 cr)
- or ES 3221 - Soil Conservation and Land-Use Management (3.0 cr)
- or SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)

Applied Economics and Agribusiness

- APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
- or APEC 3451 - Food and Agricultural Sales (3.0 cr)

Animal Science

ANSC 2401 - Animal Nutrition (3.0 cr)
 ANSC 1101 - Introductory Animal Science (4.0 cr)
 or ANSC 1403 - Companion Animal Nutrition and Care (3.0 cr)
 or ANSC 1511 - Food Animal Products for Consumers (3.0 cr)
 or ANSC 2012 - Livestock and Carcass Evaluation (3.0 cr)
 or ANSC 3203W - Environment, Global Food Production, and the Citizen, C/PE,
 ENVT, WI (3.0 cr)

Agricultural Mechanization

Take 1 or more course(s) from the following:
 AFEE 3112 - Technical Drawing and Production Technologies (3.0 cr)
 WHRE 3121 - Communication, Energy and Power, Transportation and
 Machinery Technologies (3.0 cr)

Plant Science

Take 3 or more credit(s) from the following:
 AGRO 4401 - Plant Genetics and Breeding (4.0 cr)
 HORT 4401 - Plant Genetics and Breeding (4.0 cr)
 AGRO 4xxx
 HORT 4xxx

Food Science

FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)

Foundations

CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 cr)
 EDHD 5001 - Learning, Cognition, and Assessment (3.0 cr)
 EDHD 5003 - Developmental and Individual Differences in Educational Contexts
 (3.0 cr)
 EDHD 5005 - School and Society (2.0 cr)
 EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
 EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
 EDPA 5341 - The American Middle School (3.0 cr)
 PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)
 or PUBH 3005 - Fundamentals of Alcohol and Drug Abuse for Teacher Education
 (1.0 cr)

Agricultural Education

AFEE 2096 - Professional Practicum in Agricultural Education: Early Experience
 (1.0-3.0 cr)
 AFEE 5112 - Agricultural Education Program Organization and Curriculum for
 Youth (3.0 cr)
 AFEE 5114 - Agricultural Education Teaching Seminar (1.0 cr)
 AFEE 5116 - Coordination of SAE Programs: Work-based Learning (2.0 cr)
 AFEE 5118 - Strategies for Managing and Advising the FFA Organization
 (2.0 cr)

Work and Human Resource Education

Take 8 credits from the following. Standard first aid and cardiopulmonary resuscitation (CPR) training are required for licensure.

WHRE 5697 - Teaching Internship: School and Classroom Settings (2.0 cr)
 WHRE 5698 - Teaching Internship (3.0-8.0 cr)

Business and Marketing Education B.S.

Work and Human Resource Education

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 52 to 55.

Degree: Bachelor of Science

This undergraduate program focuses on business and marketing education, with a choice of computer or sales and marketing emphasis areas.

Coursework includes computer training, business communication, management, and marketing. The program prepares students to work as educators in business settings or to work in technical support and administration positions. This area of study can also prepare students for careers in office systems, accounting, marketing, sales, entrepreneurship, and international business.

Admission Requirements

Students must complete 30 credits before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program:
 ENGC 1011

Program Requirements

A minimum grade of C- for is required in major courses with BIE, EDHD, HRD, and WHRE designators. A minimum grade of C- is also required for general psychology. Students must complete at least 30 credits in the college, with at least 20 credits completed in the senior year. A minimum 2.80 GPA in undergraduate coursework and additional requirements are required for admission to the M.Ed./initial licensure program in business and marketing education and Minnesota state teaching licensure in 5-12 business education.

Required Courses**Major Courses**

ECON 1101, ECON 1102, and BA 3033W are required for students seeking Minnesota teaching licensure.

ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 or APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 or APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
 BA 3033W - Business Communication, WI (3.0 cr)
 or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
 COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
 PSTL 1281 - General Psychology, SSCI (4.0 cr)
 or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
 PSTL 1454 - Statistics, MATH (4.0 cr)
 or MATH 1001 - Excursions in Mathematics, MATH (3.0 cr)
 or MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
 or STAT 1001 - Introduction to the Ideas of Statistics, MATH (4.0 cr)
 or A higher level math course may be taken to fulfill this requirement. Consult an adviser for course options.
 WHRE 3011W - Introduction to Technology and Public Ethics, C/PE, WI (3.0 cr)

Supporting Program

Students must create a supporting program of at least 13 credits with a business content. Students may choose from one of the three following three options, but students seeking Minnesota teaching licensure for grades 5-12 business education must select from the licensure course group.

Programmatic

Students select at least 13 business-related credits, all of which have a common course designator.

or Thematic

Students select 13 credits that support a general business theme, regardless of course designer.

or Licensure

Courses should be selected with faculty adviser approval.

Take 13 or more credit(s) from the following:

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
 BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
 HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
 IDSC 3001 - Information Systems for Business Processes and Management (3.0 cr)
 MGMT 3001 - Fundamentals of Management (3.0 cr)
 MGMT 3014 - Topics in International Business, Government, and Society (4.0 cr)
 MGMT 4008 - Entrepreneurial Management (4.0 cr)
 MKTG 3001 - Principles of Marketing (3.0 cr)
 MKTG 4xxx
 FSOS 3101 - Personal and Family Finances (3.0 cr)
 INS 4201 - Personal Financial Management (2.0 cr)

Program Focus Areas

Students seeking Minnesota teaching licensure for grades 5-12 business education must select the computer focus area.

Students are required to complete one of the following course groups.

Computer Focus

BIE 5011 - Introduction to Computer Applications (3.0 cr)
 BIE 5012 - Advanced Word Processing (3.0 cr)
 BIE 5013 - Spreadsheet Analysis Using Computers (3.0 cr)
 BIE 5014 - Database Computer Applications (3.0 cr)
 BIE 5015 - Integrated Computer Applications in Business and Marketing Education (3.0 cr)
 WHRE 5628 - Multimedia Presentations in Business (3.0 cr)
 Take 3 or more credit(s) from the following:
 BIE 5597 - Internship: Business and Industry Education (1.0-8.0 cr)
 HRD 3201 - Introduction to Training and Development (3.0 cr)
 HRD 3301 - Introduction to Organization Development (3.0 cr)
 HRD 5302 - Managing Work Teams in Business and Industry (3.0 cr)
 WHRE 5121 - Principles of Supervisory Management (3.0 cr)
 WHRE 5301 - Philosophy and Practice of Career and Technical Education (2.0 cr)
 HRD 5627 - Management and Supervisory Development (3.0 cr)
 BIE 5662 - Computer Training in School and Industry Settings (3.0 cr)
 WHRE 5601 - Student and Trainee Assessment (2.0 cr)
 WHRE 5629 - Course Development for Business and Industry (2.0 cr)
 WHRE 5661 - Instructional Methods for Business and Industry (2.0 cr)

-OR-

Sales and Marketing Focus

BIE 3061 - Professional Sales Management (3.0 cr)
 BIE 5001 - Teaching Marketing Promotion (3.0 cr)
 BIE 5011 - Introduction to Computer Applications (3.0 cr)
 HRD 5624 - Sales Training (3.0 cr)
 HRD 5626 - Customer Service Training (3.0 cr)
 Take 6 or more credit(s) from the following:
 BIE 5597 - Internship: Business and Industry Education (1.0-8.0 cr)
 HRD 3201 - Introduction to Training and Development (3.0 cr)
 HRD 3301 - Introduction to Organization Development (3.0 cr)
 HRD 5302 - Managing Work Teams in Business and Industry (3.0 cr)
 WHRE 5121 - Principles of Supervisory Management (3.0 cr)
 WHRE 5301 - Philosophy and Practice of Career and Technical Education (2.0 cr)
 HRD 5627 - Management and Supervisory Development (3.0 cr)
 BIE 5662 - Computer Training in School and Industry Settings (3.0 cr)
 WHRE 5601 - Student and Trainee Assessment (2.0 cr)

WHRE 5629 - Course Development for Business and Industry (2.0 cr)
 WHRE 5661 - Instructional Methods for Business and Industry (2.0 cr)

Career and Technical Education B.S.

Work and Human Resource Education

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 90.

Degree: Bachelor of Science

The major in career and technical education (CTE) is a professional development degree program offering professional preparation in the field. Students may select one of several program options.

The licensure program option prepares students for Minnesota teaching licensure for grades 9-12 in one of eight career and technical education fields:

- communication technology careers
- construction careers
- creative design careers
- early childhood careers
- hospitality service careers
- manufacturing careers
- medical careers
- transportation careers.

The general career and technical education option prepares students to teach in technical and community college CTE programs.

For more information on program and licensure requirements, contact the program adviser at 612-625-7250.

Admission Requirements

Students must complete 30 credits before admission to the program.

Students must have completed at least 30 semester credits or sufficient verified and approved technical work experience to be awarded 30 credits toward the degree. A minimum 2.50 overall GPA is recommended for applicants to the licensure program options. Applicants to the postsecondary general career and technical education option must have a minimum 2.00 GPA.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program:
 ENGC 1011

Program Requirements

A minimum 2.00 overall GPA with no grade lower than C- is required for major courses with the following designers: BIE, EDHD, HRD, and WHRE. A minimum grade of C- is also required for general psychology. A minimum 2.50 overall GPA is required for recommendation for Minnesota teaching licensure.

Electives to complete the 120 credits must be selected in consultation with an adviser.

Required Courses**Foundation Courses**

BA 3033W - Business Communication, WI (3.0 cr)
 or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
 CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 cr)
 COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
 PSTL 1281 - General Psychology, SSCI (4.0 cr)
 or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
 MATH 1001 - Excursions in Mathematics, MATH (3.0 cr)
 or MATH 1031 - College Algebra and Probability, MATH (3.0 cr)

Pedagogical Studies

BIE 1396 - Supervised Career and Technical Education Teaching (4.0 cr)
 EDHD 5001 - Learning, Cognition, and Assessment (3.0 cr)
 WHRE 1301 - Introduction to Career and Technical Education Teaching (2.0 cr)
 WHRE 3601 - Foundations of Student and Trainee Assessment (2.0 cr)
 or WHRE 5601 - Student and Trainee Assessment (2.0 cr)
 WHRE 3629 - Foundations of Course Development for Business and Industry (2.0 cr)
 or WHRE 5629 - Course Development for Business and Industry (2.0 cr)
 WHRE 3661 - Foundations of Instructional Methods for Business and Industry (2.0 cr)
 or WHRE 5661 - Instructional Methods for Business and Industry (2.0 cr)
 WHRE 3301 - Foundations of Philosophy and Practice of Career and Technical Education (2.0 cr)
 or WHRE 5301 - Philosophy and Practice of Career and Technical Education (2.0 cr)

Career Content Proficiency

Up to 32 credits may be completed before enrollment in the CTE program. Credits may include occupational experience, formal technical college coursework, military or industry experience, or workshops related to the field. Credits will be evaluated for transfer to BIE 3151. The remainder of the credits in this requirement must be completed after enrollment.

Take 44 or more credit(s) from the following:

BIE 3151 - Technical Development: Advanced (1.0-32.0 cr)
 BIE 5151 - Technical Development: Specialized (1.0-12.0 cr)
 BIE 5596 - Occupational Experience in Business and Industry (1.0-10.0 cr)
 BIE 5993 - Directed Study in Business and Industry (1.0-4.0 cr)
 EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
 PUBH 3005 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)
 or PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)
 WHRE 3011W - Introduction to Technology and Public Ethics, C/PE, WI (3.0 cr)
 or WHRE 5011W - Technology and Public Ethics, C/PE, WI (3.0 cr)

Coaching Minor

Kinesiology, School of

Requirements for this program are current for Fall 2006.

Required credits in this minor: 21 to 42.

The coaching minor offers an in-depth study of the theoretical and practical nature of coaching through a planned and integrated series of courses. Completion of the coaching minor also will qualify the student for the University of Minnesota Coaching Certificate.

Additional program offerings also include a certificate in coaching.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Admission is open to all University students. A Coaching Program Application Form must be submitted. Students must also maintain a 2.50 GPA in courses submitted for the completion of the coaching minor.

Required Courses**Minor Courses**

KIN 3113 - First Responder for Coaches and Athletic Trainers (3.0 cr)
 or current American Red Cross Standard First Aid and CPR Certification
 KIN 3114 - Prevention and Care of Athletic Injuries (3.0 cr)
 KIN 3133 - Motor Control, Learning, and Development (3.0 cr)
 KIN 3143 - Organization and Management of Sport (3.0 cr)
 or KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)

Take one KIN or two INMD courses in human anatomy.

KIN 3027 - Human Anatomy for Kinesiology Students (3.0 cr)
 or KIN 3111 - Human Anatomy (2.0 cr)

or

take the following course pair

INMD 3001 - Human Anatomy (3.0 cr)
 INMD 3002 - Human Anatomy Laboratory (1.0 cr)

Electives

In addition to the courses below, any program-related course approved by an adviser can be applied toward this minor.

Psychology and Physiology

Take 2 or more course(s) from the following:

KIN 3112 - Introduction to Biomechanics (3.0 cr)
 KIN 4385 - Exercise Physiology (4.0 cr)
 KIN 5126 - Sport Psychology (3.0 cr)
 KIN 5136 - Psychology of Coaching (3.0 cr)
 SPST 3621 - Applied Sport Psychology (2.0 cr)
 SPST 3641 - Training and Conditioning for Sport (2.0 cr)

Coaching

Take 2 or more course(s) from the following:

KIN 3168 - Soccer Coaching (1.0 cr)
 KIN 3169 - Volleyball Coaching (1.0 cr)
 KIN 3171 - Baseball Coaching (1.0 cr)
 KIN 3172 - Basketball Coaching (1.0 cr)
 KIN 3173 - Football Coaching (1.0 cr)
 KIN 3174 - Golf Coaching (1.0 cr)
 KIN 3175 - Gymnastics Coaching (1.0 cr)
 KIN 3176 - Ice Hockey Coaching (1.0 cr)
 KIN 3177 - Swimming and Diving Coaching (1.0 cr)
 KIN 3178 - Tennis Coaching (1.0 cr)
 KIN 3179 - Track and Field Coaching (1.0 cr)
 KIN 3181 - Wrestling Coaching (1.0 cr)
 KIN 5720 - Special Topics in Kinesiology (1.0-8.0 cr)

Senior Project

KIN 5697 includes a coaching experience under the supervision of a head coach or athletic director generally in a 7-12 grade setting. Coinciding with the practicum is a class requiring three integrated papers incorporating a personal coaching philosophy, the role of sport in society, and the identification of challenges in coaching in today's society.

KIN 5697 - Student Teaching: Coaching (1.0-10.0 cr)

Family Social Science B.S.

School of Social Work

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 55 to 58.

Degree: Bachelor of Science.

Family social science is a multidisciplinary major for those who are interested in helping people, counseling, and understanding human relationships. This major prepares graduates for careers in working with individuals, families, or systems in human services. The major is enhanced by a required internship related to the student's specific program and career goals. Qualified graduates may continue their education through graduate study in family social science, child and human development, social work, or allied health disciplines.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

Required Courses

Preparatory Courses

APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 or APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
 or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 or ECON 1104 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 STAT 1001 - Introduction to the Ideas of Statistics, MATH (4.0 cr)
 or PSTL 1004 - Statistics, MATH (4.0 cr)
 or EPSY 3264 - Basic and Applied Statistics, MATH (3.0 cr)
 or OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
 or PSY 4801 - Introduction to Statistics (4.0 cr)
 or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
 FSOS 1101 - Intimate Relationships, CD, SSCI (4.0 cr)
 or FSOS 1201 - Human Development in Families: Lifespan, SSCI, CD (4.0 cr)
 or PSTL 1285W - Introduction to Cultural Anthropology, IP, SSCI, WI (4.0 cr)
 or SW 2001 - Introduction to Social Welfare and Community Services, C/PE (4.0 cr)
 or choose a course from one of the following areas: anthropology, child psychology, human development, political science, psychology, social work, or sociology

Communication Courses

COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
 ENGC 3027W - Advanced Expository Writing, WI (4.0 cr)
 or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)

Major Courses

FSOS 2101 - Preparation for Working With Families (2.0 cr)
 FSOS 2103 - Family Policy (3.0 cr)
 FSOS 2105 - Methods in Family Research (3.0 cr)
 FSOS 3101 - Personal and Family Finances (3.0 cr)
 FSOS 3102 - Family Systems and Diversity, CD, SSCI (3.0 cr)
 FSOS 3104 - Global and Diverse Families (3.0 cr)

Professional Core Courses

Take 18 or more credit(s) from the following:

FSOS 3426 - Alcohol and Drugs: Families and Culture, CD, SSCI (3.0 cr)
 FSOS 3429 - Counseling Skills Practicum I (3.0 cr)
 FSOS 4101 - Sexuality and Gender in Families and Close Relationships (3.0 cr)
 FSOS 4104W - Family Psychology, WI (3.0 cr)
 FSOS 4106 - Family Resource Management (3.0 cr)
 FSOS 4150 - Special Topics in Family Social Science (1.0-4.0 cr)
 FSOS 4152 - Gay, Lesbian, and Bisexual People in Families (3.0 cr)
 FSOS 4153 - Family Financial Counseling (3.0 cr)
 FSOS 4154W - Families and Aging, WI (3.0 cr)
 FSOS 4155 - Parent-Child Relationships (3.0 cr)
 FSOS 4156 - Legal-Economic Controversies in Families (3.0 cr)
 FSOS 5150 - Special Topics in Family Social Science (1.0-4.0 cr)
 FSOS 5426 - Alcohol and Drugs: Families and Culture (3.0 cr)

Advanced/Applied Skill Course

Students must take FSOS 4294 or FSOS 4296 for 4 credits.

Take 4 or more credit(s) from the following:

FSOS 4294 - Research Internship (1.0-4.0 cr)
 FSOS 4296 - Field Study: Working With Families (1.0-12.0 cr)

Family Social Science Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

See major description for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

FSOS 1101 - Intimate Relationships, CD, SSCI (4.0 cr)
 FSOS 3102 - Family Systems and Diversity, CD, SSCI (3.0 cr)

Take 3 or more course(s) from the following:

FSOS 2103 - Family Policy (3.0 cr)
 FSOS 3101 - Personal and Family Finances (3.0 cr)
 FSOS 3104 - Global and Diverse Families (3.0 cr)
 FSOS 3426 - Alcohol and Drugs: Families and Culture, CD, SSCI (3.0 cr)
 FSOS 4101 - Sexuality and Gender in Families and Close Relationships (3.0 cr)
 FSOS 4104W - Family Psychology, WI (3.0 cr)
 FSOS 4106 - Family Resource Management (3.0 cr)
 FSOS 4152 - Gay, Lesbian, and Bisexual People in Families (3.0 cr)
 FSOS 4154W - Families and Aging, WI (3.0 cr)
 FSOS 4155 - Parent-Child Relationships (3.0 cr)

Family Violence Prevention Minor

Family Social Science

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

The family violence prevention minor is a 15-credit undergraduate program for students interested in strengthening their educational experience with a research base and a set of practical skills in family violence prevention. It is an intensive, interdisciplinary learning experience for students in all fields of study.

Courses are in fields related to social services, education, health care, and other direct services addressing issues related to child abuse and neglect, adult domestic violence, elder abuse, and intergenerational abuse. Students learn theories and research related to violent behavior, examine relationships between violence in society and violence within families, and explore different professional responses to violence. Elective courses provide the opportunity to integrate these concepts into further study within a major or in other fields of interest.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

- SW 3701 - Introduction to Child Maltreatment and Family Violence, CD, WI (3.0 cr)
 SW 3702 - Child Maltreatment and Family Violence: Intervention and Prevention, SSCI (3.0 cr)
 SW 3705 - Gender Violence in Global Perspective, IP (3.0 cr)
Take 6 or more credit(s) from the following:
 CAPY 5623 - Assessment and Treatment Interventions: Anxiety and Depression in Children and Adolescents (1.0 cr)
 CAPY 5644 - Workshop: Child Abuse/Neglect and Childhood Psychopathology: Implications for Assessment/Treatment (1.0 cr)
 CSPH 5211 - Peacemaking and Spirituality: A Journey Toward Healing and Strength (2.0-3.0 cr)
 EPSY 5152 - Psychology of Conflict Resolution (3.0 cr)
 FSOS 1101 - Intimate Relationships, CD, SSCI (4.0 cr)
 FSOS 3104 - Global and Diverse Families (3.0 cr)
 FSOS 3426 - Alcohol and Drugs: Families and Culture, CD, SSCI (3.0 cr)
 JWST 3521W - History of the Holocaust, WI (3.0 cr)
 SOC 3101 - Introduction to the American Criminal Justice System, C/PE, SSCI (3.0 cr)
 SOC 3102 - Introduction to Criminal Behavior and Social Control (3.0 cr)
 SOC 3501 - Sociology of Families, CD, SSCI (3.0 cr)
 SOC 4461 - Sociology of Ethnic and Racial Conflict, CD, IP (3.0 cr)
 SW 5519 - Mediation and Conflict Resolution (3.0 cr)
 SW 5525 - Global Perspectives on Social Welfare, Peace, and Justice (3.0 cr)
 SW 5706 - Issues and Interventions in Child Sexual Abuse (2.0 cr)
 SW 5707 - Interventions with Battered Women and Their Families (2.0 cr)
 SW 5708 - Substance Abuse and Social Work (3.0 cr)
 YOST 5322 - Work with Youth--Families (2.0 cr)
 AFRO 3072 - Racism: Social and Psychological Consequences for Black Americans, CD (3.0 cr)
 or AFRO 5072 - Racism: Social and Psychological Consequences for Black Americans (3.0 cr)

Foundations of Education: Early Childhood B.S.

Institute of Child Development

Requirements for this program are current for Summer 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 60.

Degree: Bachelor of Science.

The undergraduate program in foundations of education: early childhood (FOE: EC) prepares upper division students to work with young children and their families and to work with both typically or atypically developing children. The curriculum includes an extensive core of liberal education courses that are central to early childhood teaching and child development.

The program prepares graduates to work in non-licensure educational settings (including daycare centers or youth community programs), pursue advanced degrees, or work in other settings where a strong liberal education base is useful.

In addition, the undergraduate degree program prepares students for entry into the master of education (M.Ed.)/initial licensure program in early childhood education and early childhood special education. M.Ed. admission requirements include successful completion of all requirements for the B.S. degree, and successful school practicum experiences. Preferred admission to the M.Ed. program requires a minimum 2.80 GPA.

Admission Requirements

Students must complete 60 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Program admission is based on the following criteria:

- Minimum 2.50 overall GPA
- Completion of at least 60 credits, including credits in progress at the time of application. This includes completion of the two-course psychology requirement and at least half of the courses in content areas 2–6. After program admission, students must complete remaining courses in content areas 2–6 and all courses in content areas 7–8.
- Reflective essay. See the CEHD Undergraduate Application for Foundations of Education (FOE): Early Childhood for more information.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Basic Requirements (Content Area 1)

One year college-level spoken second language or American Sign Language (ASL) is highly recommended.

- PSTL 1281 - General Psychology, SSCI (4.0 cr)
 or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
 CPSY 2301 - Introductory Child Psychology, SSCI (4.0 cr)
 or CPSY 3301 - Introductory Child Psychology for Social Sciences (4.0 cr)
 or PSTL 2283W - Psychology of Human Development, SSCI, WI (4.0 cr)

Language and Communication (Content Area 2)

COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or COMM 3402 - Introduction to Interpersonal Communication, SSCI (3.0 cr)
 or PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
 CPSY 4345 - Language Development and Communication (4.0 cr)
 or LING 5501 - Introduction to Language Acquisition (3.0 cr)
 ENGL 3601 - Analysis of the English Language (4.0 cr)
 or LING 1701 - Language and Society, CD (4.0 cr)
 or LING 3001 - Introduction to Linguistics, SSCI (4.0 cr)

Mathematics (Content Area 3)

EPSY 3264 - Basic and Applied Statistics, MATH (3.0 cr)
 or PSTL 1454 - Statistics, MATH (4.0 cr)
 or PSY 4801 - Introduction to Statistics (4.0 cr)
 or STAT 1001 - Introduction to the Ideas of Statistics, MATH (4.0 cr)
 MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
 or MATH 1051 - Precalculus I (3.0 cr)
 or MATH 1151 - Precalculus II, MATH (3.0 cr)
 Logic/computer skills course approved by an adviser.

Science (Content Area 4)

Students must complete a biological science course with a lab, a physical science course with a lab, and one science course with or without a lab.

Select any course in the diversified core BIOL/L.

Select any course in the diversified core PHYS/L.

Select any course in the diversified cores BIOL, PHYS, or ENVT.

Social Studies (Content Area 5)

CACL 3979 - Issues in Cultural Pluralism, C/PE, CD (3.0 cr)
 or PSTL 1851 - Multicultural Relations, CD (3.0 cr)
 or SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
 or SOC 3211W - American Race Relations, CD, SSCI, WI (3.0 cr)
 PSTL 1231 - Perspectives in American History, HP (4.0 cr)
 or HIST 1301W - U.S. History to 1877, CD, HP, WI (4.0 cr)
 or HIST 1302W - U.S. History, From 1865 to Present, CD, HP, WI (4.0 cr)
 or HIST 1307 - American History to 1877, CD, HP (3.0 cr)
 or HIST 1308 - U.S. History: From 1865 to Present, CD, HP (3.0 cr)
 GEOG 1301W - Introduction to Human Geography, IP, SSCI, WI (4.0 cr)
 or GEOG 3381W - Population in an Interacting World, IP, SSCI, WI (4.0 cr)

Communication Arts and Literature (Content Area 6)

AMIN 3201W - American Indian Literature, CD, LIT, WI (3.0 cr)
 or ENGL 1201W - Introduction to American Literature, CD, LIT, WI (4.0 cr)
 or ENGL 1301W - Introduction to Multicultural American Literature, CD, LIT, WI (4.0 cr)
 or ENGL 3005W - Survey of American Literatures and Cultures I, CD, LIT, WI (4.0 cr)
 or ENGL 3006W - Survey of American Literatures and Cultures II, CD, LIT, WI (4.0 cr)
 or ENGL 3591W - Introduction to African American Literature, CD, LIT, WI (4.0 cr)
 or PSTL 1364 - Literature of the American Immigrant Experience, CD, LIT (3.0 cr)
 or PSTL 1365W - Literatures of the United States, CD, LIT, WI (3.0 cr)
 or PSTL 1816 - African-American Literature, CD, LIT (3.0 cr)
 or PSTL 1836 - Asian-American Literature, CD, LIT (3.0 cr)
 CI 3401 - Children's Literature: Pre-K Through Grade 5 (3.0 cr)
 One elective from the following areas: music, art, dance, theater, philosophy, or an elective approved by an adviser.

General Requirements

Recommended freshman writing course(s) for this program:
 ENGC 1011

Program Requirements

Requirements include a minimum 2.00 GPA and no grade lower than C- for major courses with the following designators and numbers: CI, CPSY, EDHD, EPSY, and KIN 4132. Students seeking to pursue the M.Ed./initial licensure program in early childhood education and early childhood special education and Minnesota state teaching licensure must have a 2.80 GPA in the undergraduate program and meet other requirements. The Praxis I test must be completed before graduation and before entry into the M.Ed./initial licensure program.

Required Courses**Foundation Courses (Content Area 7)**

CPSY 4331 - Social and Personality Development (4.0 cr)
 CPSY 4343 - Cognitive Development (4.0 cr)
 CPSY 4993 - Directed Instruction in Child Psychology (1.0-4.0 cr)
 EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
 EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
 PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)
 or PUBH 3005 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)
 KIN 4132 - Motor Development (3.0 cr)

Major Courses (Content Area 8)

Students must be admitted to the program before taking these classes. Many of the major courses have an experiential component.

CI 5111 - Introduction to Elementary School Teaching (3.0 cr)
 CPSY 5251 - Social and Philosophical Foundations of Early Childhood Education (3.0 cr)
 CPSY 5252 - Facilitating Social and Physical Learning in Early Childhood Education (3.0 cr)
 CPSY 5253 - Facilitating Cognitive and Creative Learning in Early Childhood Education (3.0 cr)
 CPSY 5281 - Student Teaching in Early Childhood Education (3.0-6.0 cr)
 EPSY 5625 - Education of Infants, Toddlers, and Preschool Children with Disabilities: Introduction (2.0 cr)
 EPSY 5681 - Education of Infants, Toddlers, and Preschool Children with Disabilities: Methods and Materials (3.0 cr)

Pre-Licensure or Non-Licensure Options

Students are required to complete one of the following course groups.

Preparation for M.Ed. Initial Licensure

Students planning to pursue the M.Ed./initial licensure program in early childhood education and early childhood special education must complete courses in Sections A and B. Coursework in Section A may be completed during the senior year of the undergraduate FOE: EC program or as part of the M.Ed./initial licensure program. Coursework in Section B must be taken after admission to the M.Ed. program.

Section A

CPSY 4334W - Children, Youth in Society, C/PE, WI (4.0 cr)
 CPSY 4336W - Development and Interpersonal Relations, WI (4.0 cr)
 EPSY 5609 - Family-Centered Services (2.0 cr)
 EPSY 5616 - Behavior Analysis and Classroom Management (3.0 cr)

Section B

EPSY 5753 requires two, three-credit teaching experiences.

CI 5181 - Clinical Experience in Elementary School Teaching (3.0-8.0 cr)

CI 5415 - Literacy Development in the Primary Grades (3.0 cr)

CI 5504 - Elementary School Science: Materials and Resources (3.0 cr)

CI 5701 - Teaching Social Studies in the Elementary School (2.0 cr)

CI 5821 - Teaching Mathematics in the Elementary School (2.0 cr)

EPSY 5753 - Student Teaching: Early Childhood Special Education (1.0-6.0 cr)

EPSY 5849 - Observation and Assessment of the Preschool Child (3.0 cr)

-OR-

Non-Licensure Option

Students complete appropriate electives of interest for their program, in consultation with their adviser.

Foundations of Education: Elementary B.S.

Curriculum & Instruction

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 60.

Degree: Bachelor of Science

The B.S. degree program in foundations of education (FOE): elementary education prepares students to work with children, including those with special needs and in urban school settings.

The program does not lead directly to teaching licensure, but prepares students to enter the master of education (M.Ed.)/initial licensure program in elementary education, which leads to state of Minnesota teaching licensure. It also prepares graduates to work in non-licensure educational settings (daycare centers or youth community programs) or other settings where a strong liberal education base is useful. The curriculum includes an extensive core of liberal education coursework that is central to elementary school teaching.

Admission Requirements

Students must complete 60 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Admission is based on the following criteria:

- Minimum 2.50 overall GPA; higher GPA is recommended.
- Completion of at least 60 credits, including credits in progress at the time of application. This includes general psychology coursework and at least half of the courses in each of the five content areas.
- At least 35 hours in a K-6 public classroom setting.
- Experience with diverse populations.

Completion of two semesters of language is recommended before admission.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Basic Requirements (Content Area 1)**

MUS 1001 may be waived for students who have musical aptitude equivalent to five to six years study of an instrument, through high school. Contact a program adviser for more information.

CI 1001 - Introduction to the Elementary School (3.0 cr)

MUS 1001 - Fundamentals of Music, OH (3.0 cr)

ENGL 3601 - Analysis of the English Language (4.0 cr)

or LING 1701 - Language and Society, CD (4.0 cr)

or LING 3001 - Introduction to Linguistics, SSCI (4.0 cr)

or LING 5001 - Introduction to Linguistics (4.0 cr)

PSTL 1281 - General Psychology, SSCI (4.0 cr)

or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

Mathematics (Content Area 2)

Students pursuing a middle school specialty in mathematics must complete one course in statistics and one course in calculus.

EPSY 3264 - Basic and Applied Statistics, MATH (3.0 cr)

or PSTL 1454 - Statistics, MATH (4.0 cr)

or PSTL 1456 - Functions and Problems of Logic, MATH (3.0 cr)

or MATH 1142 - Short Calculus, MATH (4.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1272 - Calculus II (4.0 cr)

or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)

or MATH 1371 - IT Calculus I, MATH (4.0 cr)

or PHIL 1001 - Introduction to Logic, MATH (4.0 cr)

or STAT 1001 - Introduction to the Ideas of Statistics, MATH (4.0 cr)

or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

MATH 1031 - College Algebra and Probability, MATH (3.0 cr)

or MATH 1051 - Precalculus I (3.0 cr)

or MATH 1151 - Precalculus II, MATH (3.0 cr)

Complete one of the following course pairs.

MATH 3113 - Topics in Elementary Mathematics I (4.0 cr)

MATH 3118 - Topics in Elementary Mathematics II (4.0 cr)

or

MTHE 3101 - Mathematics and Pedagogy for Elementary Teachers I (4.0 cr)

MTHE 3102 - Mathematics and Pedagogy for Elementary Teachers II (4.0 cr)

Science (Content Area 3)

AGRO 2101 - Biology of Food, Land, People, and the Environment, BIOL SCI/L, ENVT (4.0 cr)

or BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

or PSTL 1131 - Principles of Biological Science, BIOL SCI/L (4.0 cr)

or GEOG 1403 - Biogeography of the Global Garden, BIOL SCI/L, ENVT (4.0 cr)

AST 1001 - Exploring the Universe, ENVT, PHYS SCI/L (4.0 cr)

or PSTL 1171 - Physical Geology, ENVT, PHYS SCI/L (4.0 cr)

or PSTL 1172 - Historical Geology, PHYS SCI/L (4.0 cr)

or PSTL 1173 - Geology of the National Parks, ENVT, PHYS SCI/L (4.0 cr)

or GEO 1001 - Earth and Its Environments, ENVT, PHYS SCI/L (4.0 cr)

or GEO 1002 - Earth History, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)

or CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

or CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

or PSTL 1163 - Physical Systems: Principles and Practices, PHYS SCI/L (4.0 cr)

or PHYS 3071W - Laboratory-Based Physics for Teachers, PHYS SCI/L, WI (4.0 cr)

or PHYS 1001W - Energy and the Environment, ENVT, PHYS SCI/L, WI (4.0 cr)

or PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)
 FSCN 1112 - Principles of Nutrition, ENVT (3.0 cr)
 or any science course elective with or without lab.

Social Studies (Content Area 4)

AMST 3113W - America's Diverse Cultures, CD, OH, WI (3.0 cr)
 or CSCL 3979 - Issues in Cultural Pluralism, C/PE, CD (3.0 cr)
 or ENGL 3741 - Literacy and American Cultural Diversity, C/PE, CD (4.0 cr)
 or PSTL 1211 - People and Problems, CD, SSCI (4.0 cr)
 or PSTL 1851 - Multicultural Relations, CD (3.0 cr)
 or SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
 or SOC 3211W - American Race Relations, CD, SSCI, WI (3.0 cr)
 PSTL 1231 - Perspectives in American History, HP (4.0 cr)
 or HIST 1302W - U.S. History, From 1865 to Present, CD, HP, WI (4.0 cr)
 or HIST 1308 - U.S. History: From 1865 to Present, CD, HP (3.0 cr)
 GEOG 1301W - Introduction to Human Geography, IP, SSCI, WI (4.0 cr)
 or GEOG 3381W - Population in an Interacting World, IP, SSCI, WI (4.0 cr)
 Select any course that meets the Council on Liberal Education (CLE) requirements in both Historical Perspectives (HI) and International Perspectives (IP).

Communication and Literature (Content Area 5)

Students pursuing the middle school specialty in communication arts and literature are required to take one of the ENGW courses in creative writing listed below. Completion of a course with the designator ARTH, ARTS, COMM, DNCE, ENGL, HUM, PHIL, or TH will not fulfill the requirement for those with a middle school specialty.

AFRO 3594W - Introduction to Contemporary Black Fiction, WI (3.0 cr)
 or AMIN 3201W - American Indian Literature, CD, LIT, WI (3.0 cr)
 or CHIC 3507W - Introduction to Chicana/o Literature, LIT, CD, WI (3.0 cr)
 or ENGL 1301W - Introduction to Multicultural American Literature, CD, LIT, WI (4.0 cr)
 or ENGL 3300 - Multicultural American Literatures and Cultures (3.0 cr)
 or PSTL 1364 - Literature of the American Immigrant Experience, CD, LIT (3.0 cr)
 or PSTL 1816 - African-American Literature, CD, LIT (3.0 cr)
 or PSTL 1836 - Asian-American Literature, CD, LIT (3.0 cr)
 AFRO 3591W - Introduction to African American Literature, CD, LIT, WI (4.0 cr)
 or ENGL 3591W - Introduction to African American Literature, CD, LIT, WI (4.0 cr)
 or AFRO 3592W - Introduction to Black Women Writers in the United States, CD, LIT, WI (3.0 cr)
 or ENGL 3592W - Introduction to Black Women Writers in the United States, CD, LIT, WI (3.0 cr)
 AFRO 3601 - Introduction to African Literature, LIT, IP (3.0 cr)
 or ENGL 1401W - Introduction to "Third World" Literatures in English, IP, LIT, WI (4.0 cr)
 or ENGL 3004W - Historical Survey of British Literatures II, HP, WI (4.0 cr)
 or ENGL 3171 - Modern British Literatures and Cultures (3.0 cr)
 or ENGL 3180 - Contemporary Literatures and Cultures (3.0 cr)
 or PSTL 1367W - Contemporary Literature: International Perspectives, IP, LIT, WI (4.0 cr)
 ENGW 1101W - Introduction to Creative Writing, LIT, WI (4.0 cr)
 or ENGW 1102 - Introduction to Fiction Writing (3.0 cr)
 or ENGW 1103 - Introduction to Poetry Writing (3.0 cr)
 or ENGW 1104 - Introduction to Literary Nonfiction Writing (3.0 cr)
 or ENGW 3102 - Intermediate Fiction Writing (3.0 cr)
 or ENGW 3104 - Intermediate Poetry Writing (3.0 cr)
 or ENGW 3106 - Intermediate Literary Nonfiction Writing (3.0 cr)
 or ENGW 3110 - Topics in Creative Writing (3.0 cr)
 or PSTL 1311 - Art: General Art, IP, OH (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
 or Any course from the following designators: ARTH, ARTS, COMM, DNCE, ENGL, HUM, PHIL, TH.

General Requirements

Recommended freshman writing course(s) for this program:
 ENGC 1011

Program Requirements

Students are required to take 2 semester(s) of any second language.

Required Courses

Introduction to Elementary Education

Take all of the following in the first semester of the program:
 CI 5111 - Introduction to Elementary School Teaching (3.0 cr)
 CI 5183 - Applying Instructional Methods in the Elementary Classroom (1.0-2.0 cr)
 EDHD 5001 - Learning, Cognition, and Assessment (3.0 cr)

Special Education

These courses must be taken one year after the Introduction to Elementary Education courses.

Take all of the following in the same term:

CI 5183 - Applying Instructional Methods in the Elementary Classroom (1.0-2.0 cr)
 Epsy 5613 - Foundations of Special Education I (3.0 cr)
 Epsy 5616 - Behavior Analysis and Classroom Management (3.0 cr)

Foundation Courses

EDHD 5003 - Developmental and Individual Differences in Educational Contexts (3.0 cr)
 EDHD 5005 - School and Society (2.0 cr)
 EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
 EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
 PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)
 or PUBH 3005 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)

Specialty Areas

Students are required to complete one of the following course groups.

Middle School Specialty (Grades 5-8)

Students selecting a middle school specialty may be required to complete additional coursework in mathematics, science, social studies, or communication arts and literature. These additional requirements are noted in content areas above. Consult an adviser for more information.

CPSY 4303 - Adolescent Psychology (4.0 cr)

-OR-

Preprimary Specialty (Ages 3-4)

CPSY 4331 - Social and Personality Development (4.0 cr)
 CPSY 4343 - Cognitive Development (4.0 cr)
 CPSY 4993 - Directed Instruction in Child Psychology (1.0-4.0 cr)
 CPSY 2301 - Introductory Child Psychology, SSCI (4.0 cr)
 or CPSY 3301 - Introductory Child Psychology for Social Sciences (4.0 cr)
 or PSTL 2283W - Psychology of Human Development, SSCI, WI (4.0 cr)

Human Resource Development B.S.

Work and Human Resource Education

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 40.

Degree: Bachelor of Science

The B.S. in human resource development prepares students for positions in training, career development, organization development, employee assistance, and workplace learning and development.

Undergraduate students prepare for entry-level employment in human resource development. Typical careers in the field include instructional designer, technical trainer, training coordinator, organization development specialist, performance consultant, training facilitator, or learning and development specialist.

Undergraduates can also develop a foundation for advanced study and the degrees (M.Ed., M.A., Ph.D., or Ed.D.) that are typically required for advancement in the field.

All students select a programmatic or thematic supporting program. Although there are few restrictions on the choice of supporting program, students usually choose to focus on fields of human resources and industrial relations, psychology, adult education, management, communication studies, or rhetoric.

The program core requires students to develop a baseline understanding of training and development, organization development, and adult education. Students who complete the B.S. degree in human resource development also earn a certificate in human resource development. For more information on the certificate, see the certificates section.

Admission Requirements

Students must complete 60 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Admission requirements include 60 credits, completed or in progress.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: ENGC 1011

Program Requirements

A minimum 2.00 GPA with no grade lower than C- is required for major courses with the following designators: ADED, BIE, FE, HRD, and WHRE. A minimum grade of C- is also required for general psychology.

Required Courses

Foundation Courses

All students must have basic competence in computer applications. Students lacking such competence at the time of admission must take BIE 5011. Students with basic competence must take one advanced course, chosen in consultation with an adviser.

WHRE 3011W - Introduction to Technology and Public Ethics, C/PE, WI (3.0 cr)

BIE 5011 - Introduction to Computer Applications (3.0 cr)

or an advanced computer course, chosen in consultation with an adviser

COMM 1101 - Introduction to Public Speaking (3.0 cr)

or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)

or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

PSTL 1281 - General Psychology, SSCI (4.0 cr)

or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

MATH 1001 - Excursions in Mathematics, MATH (3.0 cr)

or MATH 1031 - College Algebra and Probability, MATH (3.0 cr)

or STAT 1001 - Introduction to the Ideas of Statistics, MATH (4.0 cr)

or one higher level math course

RHET 3562W - Technical and Professional Writing, WI (4.0 cr)

or one advanced composition course approved by an adviser.

Major Courses

HRD 3001 - Introduction to Human Resource Development (3.0 cr)

HRD 3196 - Profession and Practice of Human Resource Development (2.0 cr)

HRD 3201 - Introduction to Training and Development (3.0 cr)

HRD 3301 - Introduction to Organization Development (3.0 cr)

HRD 5196 - Internship: Human Resource Development (1.0-10.0 cr)

ADED 3101 - Introduction to Strategies for Teaching Adults (3.0 cr)

Take 5 or more credit(s) from the following:

WHRE 5121 - Principles of Supervisory Management (3.0 cr)

WHRE 5201 - Family and Work Relationships (3.0 cr)

HRD 3xxx

HRD 4xxx

HRD 5xxx

HRD Options

Students are required to complete one of the following course groups.

Programmatic

Students select 13 credits, all of which have a common course designator. Frequently selected programs include human resources/industrial relations (HRIR), speech communication (COMM), management (MGMT), adult education (ADED), and business and industry education (BIE). Choices are not limited to these designators.

-OR-

Thematic

Students select 13 credits that support a common theme, regardless of course designator. Sample themes include ethical perspectives, international education, work and family, and conflict management. Courses must be selected in consultation with the department adviser.

Kinesiology B.S.

Kinesiology, School of

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120 to 125.

Required credits within the major: 54 to 59.

Degree: Bachelor of Science

The bachelor of science (B.S.) program in kinesiology prepares individuals for roles in sports/health clubs or corporate fitness/exercise centers, or serves as background for exercise rehabilitation, exercise physiology, biomechanics, social psychology of sport, motor behavior, ergonomics, human factors, and other human performance contexts. Kinesiology is an appropriate major for students seeking careers in the fitness/wellness industries or the allied health sciences, such as physical and occupational therapy, medicine, and nursing. It can be used as preparation for the M.Ed./initial licensure program in physical education, which prepares students for Minnesota teaching licensure in K-12 physical education.

Admission Requirements

Students must complete 60 credits before admission to the program. Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Take one course from each of the following course groups. At least five of the six required prerequisite courses must be completed and/or in progress at the time of application.

Biology Course with Lab

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

or BIOL 1009H - Honors: General Biology, BIOL SCI/L, H (4.0 cr)

or FSCN 1021 - Introductory Microbiology, BIOL SCI/L (4.0 cr)

or PSTL 1131 - Principles of Biological Science, BIOL SCI/L (4.0 cr)

or PSTL 1135 - Human Anatomy and Physiology, BIOL SCI/L (4.0 cr)

Chemistry Course with Lab

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)

or CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

or CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)

or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)

Physics Course with Lab

PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)

Psychology

PSTL 1281 - General Psychology, SSCI (4.0 cr)

or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

Speech Performance

COMM 1101 - Introduction to Public Speaking (3.0 cr)

or COMM 1101H - Honors: Introduction to Public Speaking, H (3.0 cr)

or COMM 1313W - Analysis of Argument, WI (3.0 cr)

or PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)

or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

Statistics

EPSY 3264 - Basic and Applied Statistics, MATH (3.0 cr)

or PSTL 1454 - Statistics, MATH (4.0 cr)

or STAT 1001 - Introduction to the Ideas of Statistics, MATH (4.0 cr)

or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

General Requirements

Recommended freshman writing course(s) for this program:
ENG C 1011

Program Requirements

The following courses are strongly recommended, but not required, before admission to the program: KIN 3027 or INMD 3001, KIN 1871, and five physical activity courses (1 credit each) chosen from at least four of the following categories: aquatics, conditioning, weight training, dance, individual and dual sports/activities, team sports/activities. Students pursuing K-12 physical education licensure must complete additional requirements; consult with a faculty adviser.

Required Courses

Major Courses

KIN 1871 - Introduction to Kinesiology (2.0 cr)

KIN 3112 - Introduction to Biomechanics (3.0 cr)

KIN 3131W - History and Philosophy of Sport, WI (3.0 cr)

KIN 3133 - Motor Control, Learning, and Development (3.0 cr)

KIN 3151 - Measurement, Evaluation, and Research in Kinesiology (3.0 cr)

KIN 4385 - Exercise Physiology (4.0 cr)

INMD 3001 - Human Anatomy (3.0 cr)

or INMD 3301 - Human Anatomy (3.0 cr)

or KIN 3027 - Human Anatomy for Kinesiology Students (3.0 cr)

or KIN 3111 - Human Anatomy (2.0 cr)

KIN 3126W - Psychology and Sociology of Sport, WI (3.0 cr)

or KIN 5126 - Sport Psychology (3.0 cr)

KIN 3385 - Human Physiology for Kinesiology Students (3.0 cr)

or PHSL 3051 - Human Physiology (4.0 cr)

Electives

Students must complete 6 credits in one of the sub-requirements.

Take 15 or more credit(s) including 4 or more sub-requirement(s) from the following:

Human Performance

Take 0 - 2 course(s) from the following:

HUMF 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)

HUMF 5722 - Human Factors Psychology (3.0 cr)

KIN 4132 - Motor Development (3.0 cr)

KIN 4135 - Motor Control and Learning (3.0 cr)

Sports Management

Take 0 - 2 course(s) from the following:

KIN 5111 - Sports Facilities (3.0 cr)

KIN 5115 - Event Management in Sport (3.0 cr)

KIN 5421 - Sport Finance (3.0 cr)

- KIN 5461 - Foundations of Sport Management (3.0 cr)
- KIN 5601 - Sport Management Ethics and Policy (3.0 cr)
- KIN 5631 - Programming and Promotion in Sport (3.0 cr)
- KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)
- KIN 5801 - Legal Aspects of Sport and Recreation (4.0 cr)

Exercise Science

Take 0 - 2 course(s) from the following:

- KIN 5122 - Applied Exercise Physiology (3.0 cr)
- KIN 5141 - Nutrition for Health and Physical Performance (3.0 cr)
- KIN 5385 - Exercise for Disease Prevention and Management (3.0 cr)
- KIN 5435 - Advanced Theory and Techniques of Exercise Science (3.0 cr)
- KIN 5485 - Advanced Electrocardiogram, Graded Exercise Testing, and Prescription (3.0 cr)

Sports Sociology/Psychology

Take 0 - 2 course(s) from the following:

- KIN 5126 - Sport Psychology (3.0 cr)
- KIN 5136 - Psychology of Coaching (3.0 cr)
- KIN 5371 - Sport and Society (3.0 cr)
- KIN 5375 - Competitive Sport for Children and Youth (3.0 cr)
- KIN 5511 - Women in Sport and Leisure (3.0 cr)
- KIN 5723 - Psychology of Sport Injury (3.0 cr)

Motor Control

Take 0 - 2 course(s) from the following:

- KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
- KIN 5941 - Neural Basis of Movement (3.0 cr)
- RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- RSC 5841 - Rehabilitation Science Instrumentation and Methodology (4.0 cr)

CPR Certification

Students must complete CPR certification within one year before their program graduation date.

- KIN 3113 - First Responder for Coaches and Athletic Trainers (3.0 cr) or first aid and CPR certification.

Field Experience / Directed Study / Coaching

All upper division students are required to complete practical experiences, coaching, or directed study in the selected focus.

Take 10 or more credit(s) from the following:

- KIN 3696 - Supervised Practical Experience (1.0-10.0 cr)
- KIN 3993 - Directed Study in Kinesiology (1.0-10.0 cr)
- KIN 3993H - Directed Study in Kinesiology, H (1.0-10.0 cr)
- KIN 5196 - Practicum: Developmental/Adapted Physical Education (1.0-4.0 cr)
- KIN 5697 - Student Teaching: Coaching (1.0-10.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Exercise Science

Complete 10-17 credits of KIN 1xxx-5xxx courses, approved by a faculty adviser.

Required Courses

Exercise Science

Students in non-teaching emphasis areas must complete 10-17 credits of KIN 1xxx-5xxx courses, approved by a faculty adviser.

Take 10 or more credit(s) from the following:

- KIN 1xxx
- KIN 2xxx
- KIN 3xxx
- KIN 4xxx
- KIN 5xxx

Physical Education Activity Courses

Take 5 or more course(s) including 4 or more sub-requirement(s) from the following:

Dance

Take 0 - 2 course(s) from the following:

- DNCE 1001 - Modern Dance Technique 1 (1.0 cr)
- DNCE 1002 - Modern Dance Technique 2 (1.0 cr)
- DNCE 1010 - Modern Dance Technique 3 (2.0 cr)
- DNCE 1020 - Modern Dance Technique 4 (2.0 cr)
- DNCE 1101 - Ballet Technique 1 (1.0 cr)
- DNCE 1102 - Ballet Technique 2 (1.0 cr)
- DNCE 1110 - Ballet Technique 3 (2.0 cr)
- DNCE 1201 - Jazz Technique 1 (1.0 cr)
- DNCE 1202 - Jazz Technique 2 (1.0 cr)
- DNCE 1210 - Jazz Technique 3 (1.0 cr)
- DNCE 1220 - Jazz Technique 4 (1.0 cr)
- DNCE 1301 - Tap Technique 1 (1.0 cr)
- DNCE 1302 - Tap Technique 2 (1.0 cr)
- DNCE 1311 - International Folk Dance 1 (1.0 cr)
- DNCE 1312 - International Folk Dance 2 (1.0 cr)
- DNCE 1321 - Ballroom 1 (1.0 cr)
- DNCE 1322 - Ballroom 2 (1.0 cr)
- DNCE 1331 - Yoga (1.0 cr)
- DNCE 1332 - Yoga for Dancers (1.0 cr)
- DNCE 3110 - Ballet Technique 5 (2.0 cr)
- DNCE 3120 - Ballet Technique 6 (2.0 cr)
- DNCE 3210 - Jazz Technique 5 (1.0 cr)
- DNCE 3220 - Jazz Technique 6 (1.0 cr)
- DNCE 3301 - Tap Technique 3 (1.0 cr)
- DNCE 3302 - Tap Technique 4 (1.0 cr)
- DNCE 3337 - Body Mind Centering (2.0 cr)

Aquatics

Take 0 - 2 course(s) from the following:

- PE 1004 - Diving: Springboard (1.0 cr)
- PE 1007 - Beginning Swimming (1.0 cr)
- PE 1107 - Intermediate Swimming (1.0 cr)
- PE 1205 - Scuba and Skin Diving (1.0 cr)
- PE 1305 - Scuba Stress Rescue and Accident Management (1.0 cr)
- PE 1306 - Lifeguard Training (1.0 cr)
- PE 1411 - Water Safety Instructor (2.0 cr)

Conditioning/Weight Training

Take 0 - 2 course(s) from the following:

- PE 1014 - Conditioning (1.0 cr)
- PE 1015 - Weight Training (1.0 cr)
- PE 1415 - Advanced Weight Training and Conditioning (1.0 cr)

Individual Sports

Take 0 - 2 course(s) from the following:

- PE 1016 - Posture and Individual Exercise (1.0 cr)
- PE 1022 - Whitewater Kayaking (2.0 cr)
- PE 1029 - Handball (1.0 cr)
- PE 1031 - Sabre Fencing (1.0 cr)
- PE 1032 - Badminton (1.0 cr)
- PE 1033 - Foil Fencing (1.0 cr)
- PE 1034 - Judo (1.0 cr)
- PE 1035 - Karate (1.0 cr)
- PE 1036 - Racquetball (1.0 cr)

PE 1037 - Squash Racquets (1.0 cr)
 PE 1038 - Beginning Tennis (1.0 cr)
 PE 1041 - Cycling (1.0 cr)
 PE 1042 - Orienteering (1.0 cr)
 PE 1043 - Beginning Horse Riding (1.0 cr)
 PE 1044 - Self-Defense (1.0 cr)
 PE 1045 - Rock Climbing (1.0 cr)
 PE 1046 - Tae Kwon Do (1.0 cr)
 PE 1047 - Backpacking (2.0 cr)
 PE 1048 - Bowling (1.0 cr)
 PE 1053 - Ice Skating (1.0 cr)
 PE 1055 - Golf (1.0 cr)
 PE 1056 - Nordic (Cross-Country) Skiing (1.0 cr)
 PE 1057 - Beginning Skiing (1.0 cr)
 PE 1058 - Snowboarding (1.0 cr)
 PE 1059 - Track and Field (1.0 cr)
 PE 1065 - Beginning Tumbling and Gymnastics (1.0 cr)
 PE 1133 - Intermediate Foil Fencing (1.0 cr)
 PE 1135 - Intermediate Karate (1.0 cr)
 PE 1136 - Intermediate Racquetball (1.0 cr)
 PE 1138 - Intermediate Tennis (1.0 cr)
 PE 1154 - Figure Skating (1.0 cr)
 PE 1157 - Intermediate Skiing (1.0 cr)
 PE 1165 - Intermediate Tumbling and Gymnastics (1.0 cr)

Team Sports

Take 0 - 2 course(s) from the following:

PE 1067 - Basketball (1.0 cr)
 PE 1071 - Beginning Cricket (1.0 cr)
 PE 1072 - Soccer (1.0 cr)
 PE 1073 - Softball (1.0 cr)
 PE 1074 - Beginning Volleyball (1.0 cr)
 PE 1075 - Ice Hockey (1.0 cr)
 PE 1174 - Intermediate Volleyball (1.0 cr)

Pre-Licensure

This track is for students planning to pursue the pre-physical education teaching emphasis.

Required Courses

Education Courses

CPSY 4303 - Adolescent Psychology (4.0 cr)
 EDHD 5001 - Learning, Cognition, and Assessment (3.0 cr)
 EDHD 5005 - School and Society (2.0 cr)
 EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
 KIN 3143 - Organization and Management of Sport (3.0 cr)
 CPSY 2301 - Introductory Child Psychology, SSCI (4.0 cr)
 or CPSY 3301 - Introductory Child Psychology for Social Sciences (4.0 cr)
 KIN 5103 - Developmental/Adapted Physical Education (3.0 cr)
 or KIN 5104 - Physical Activities for Persons with Disabilities (3.0 cr)
 PUBH 3004 - Basic Concepts in Personal and Community Health (4.0 cr)
 or take the following course pair:
 PUBH 3001 - Personal and Community Health (2.0 cr)
 PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)

Physical Education Activity Courses

Take a minimum of 10 courses from the following:

Dance

DNCE 1xxx
 or DNCE 2xxx
 or DNCE 3xxx
 or DNCE 4xxx
 or DNCE 5xxx

Tumbling/Floor Exercise

KIN 3175 - Gymnastics Coaching (1.0 cr)
 or PE 1065 - Beginning Tumbling and Gymnastics (1.0 cr)
 or PE 1165 - Intermediate Tumbling and Gymnastics (1.0 cr)

Individual Sports

Take 2 or more course(s) from the following:

KIN 3177 - Swimming and Diving Coaching (1.0 cr)
 PE 1029 - Handball (1.0 cr)
 PE 1031 - Sabre Fencing (1.0 cr)
 PE 1032 - Badminton (1.0 cr)
 PE 1033 - Foil Fencing (1.0 cr)
 PE 1034 - Judo (1.0 cr)
 PE 1035 - Karate (1.0 cr)
 PE 1036 - Racquetball (1.0 cr)
 PE 1037 - Squash Racquets (1.0 cr)
 PE 1044 - Self-Defense (1.0 cr)
 PE 1048 - Bowling (1.0 cr)
 PE 1058 - Snowboarding (1.0 cr)
 KIN 3174 - Golf Coaching (1.0 cr)
 or PE 1055 - Golf (1.0 cr)
 KIN 3178 - Tennis Coaching (1.0 cr)
 or PE 1038 - Beginning Tennis (1.0 cr)

Track and Field

KIN 3179 - Track and Field Coaching (1.0 cr)
 or PE 1059 - Track and Field (1.0 cr)

Lifetime Activity

KIN 5726 - Physical Education--Teaming and Trekking (2.0 cr)
 or KIN 5727 - Physical Education--An Adventure Experience (1.0 cr)
 or PE 1007 - Beginning Swimming (1.0 cr)
 or PE 1022 - Whitewater Kayaking (2.0 cr)
 or PE 1041 - Cycling (1.0 cr)
 or PE 1042 - Orienteering (1.0 cr)
 or PE 1043 - Beginning Horse Riding (1.0 cr)
 or PE 1045 - Rock Climbing (1.0 cr)
 or PE 1047 - Backpacking (2.0 cr)
 or PE 1053 - Ice Skating (1.0 cr)
 or PE 1056 - Nordic (Cross-Country) Skiing (1.0 cr)
 or PE 1057 - Beginning Skiing (1.0 cr)
 or PE 1058 - Snowboarding (1.0 cr)
 or PE 1107 - Intermediate Swimming (1.0 cr)
 or PE 1154 - Figure Skating (1.0 cr)
 or PE 1205 - Scuba and Skin Diving (1.0 cr)
 or REC 2151 - Outdoor and Camp Leadership (3.0 cr)

Conditioning/Weight Training

PE 1014 - Conditioning (1.0 cr)
 or PE 1015 - Weight Training (1.0 cr)

Team Sports

Take 3 or more course(s) from the following:

PE 1075 - Ice Hockey (1.0 cr)
 KIN 3168 - Soccer Coaching (1.0 cr)
 or PE 1072 - Soccer (1.0 cr)
 KIN 3169 - Volleyball Coaching (1.0 cr)
 or PE 1074 - Beginning Volleyball (1.0 cr)
 or PE 1174 - Intermediate Volleyball (1.0 cr)
 KIN 3171 - Baseball Coaching (1.0 cr)
 or PE 1073 - Softball (1.0 cr)
 KIN 3172 - Basketball Coaching (1.0 cr)
 or PE 1067 - Basketball (1.0 cr)

Pre-Physical Therapy

Pre-physical therapy students must consult their adviser for appropriate coursework.

Students in all non-teaching emphasis areas must complete 10-17 credits of KIN 1xxx-5xxx courses, approved by a faculty adviser.

Required Courses

Electives

Consult a faculty adviser for appropriate coursework.

Take 10 or more credit(s) from the following:

KIN 1xxx
KIN 2xxx
KIN 3xxx
KIN 4xxx
KIN 5xxx

Physical Education Activity Courses

Take 5 or more course(s) including 4 or more sub-requirement(s) from the following:

Dance

Take 0 - 2 course(s) from the following:

DNCE 1001 - Modern Dance Technique 1 (1.0 cr)
DNCE 1002 - Modern Dance Technique 2 (1.0 cr)
DNCE 1010 - Modern Dance Technique 3 (2.0 cr)
DNCE 1020 - Modern Dance Technique 4 (2.0 cr)
DNCE 1101 - Ballet Technique 1 (1.0 cr)
DNCE 1102 - Ballet Technique 2 (1.0 cr)
DNCE 1110 - Ballet Technique 3 (2.0 cr)
DNCE 1201 - Jazz Technique 1 (1.0 cr)
DNCE 1202 - Jazz Technique 2 (1.0 cr)
DNCE 1210 - Jazz Technique 3 (1.0 cr)
DNCE 1220 - Jazz Technique 4 (1.0 cr)
DNCE 1301 - Tap Technique 1 (1.0 cr)
DNCE 1302 - Tap Technique 2 (1.0 cr)
DNCE 1311 - International Folk Dance 1 (1.0 cr)
DNCE 1312 - International Folk Dance 2 (1.0 cr)
DNCE 1321 - Ballroom 1 (1.0 cr)
DNCE 1322 - Ballroom 2 (1.0 cr)
DNCE 1331 - Yoga (1.0 cr)
DNCE 1332 - Yoga for Dancers (1.0 cr)
DNCE 3110 - Ballet Technique 5 (2.0 cr)
DNCE 3120 - Ballet Technique 6 (2.0 cr)
DNCE 3210 - Jazz Technique 5 (1.0 cr)
DNCE 3220 - Jazz Technique 6 (1.0 cr)
DNCE 3301 - Tap Technique 3 (1.0 cr)
DNCE 3302 - Tap Technique 4 (1.0 cr)
DNCE 3337 - Body Mind Centering (2.0 cr)

Aquatics

Take 0 - 2 course(s) from the following:

PE 1004 - Diving: Springboard (1.0 cr)
PE 1007 - Beginning Swimming (1.0 cr)
PE 1107 - Intermediate Swimming (1.0 cr)
PE 1205 - Scuba and Skin Diving (1.0 cr)
PE 1305 - Scuba Stress Rescue and Accident Management (1.0 cr)
PE 1306 - Lifeguard Training (1.0 cr)
PE 1411 - Water Safety Instructor (2.0 cr)

Conditioning/Weight Training

Take 0 - 2 course(s) from the following:

PE 1014 - Conditioning (1.0 cr)
PE 1015 - Weight Training (1.0 cr)
PE 1415 - Advanced Weight Training and Conditioning (1.0 cr)

Individual Sports

Take 0 - 2 course(s) from the following:

PE 1016 - Posture and Individual Exercise (1.0 cr)
PE 1022 - Whitewater Kayaking (2.0 cr)
PE 1029 - Handball (1.0 cr)
PE 1031 - Sabre Fencing (1.0 cr)
PE 1032 - Badminton (1.0 cr)
PE 1033 - Foil Fencing (1.0 cr)
PE 1034 - Judo (1.0 cr)
PE 1035 - Karate (1.0 cr)
PE 1036 - Racquetball (1.0 cr)
PE 1037 - Squash Racquets (1.0 cr)
PE 1038 - Beginning Tennis (1.0 cr)
PE 1041 - Cycling (1.0 cr)
PE 1042 - Orienteering (1.0 cr)
PE 1043 - Beginning Horse Riding (1.0 cr)
PE 1044 - Self-Defense (1.0 cr)
PE 1045 - Rock Climbing (1.0 cr)
PE 1046 - Tae Kwon Do (1.0 cr)
PE 1047 - Backpacking (2.0 cr)
PE 1048 - Bowling (1.0 cr)
PE 1053 - Ice Skating (1.0 cr)
PE 1055 - Golf (1.0 cr)
PE 1056 - Nordic (Cross-Country) Skiing (1.0 cr)
PE 1057 - Beginning Skiing (1.0 cr)
PE 1058 - Snowboarding (1.0 cr)
PE 1059 - Track and Field (1.0 cr)
PE 1065 - Beginning Tumbling and Gymnastics (1.0 cr)
PE 1133 - Intermediate Foil Fencing (1.0 cr)
PE 1135 - Intermediate Karate (1.0 cr)
PE 1136 - Intermediate Racquetball (1.0 cr)
PE 1138 - Intermediate Tennis (1.0 cr)
PE 1154 - Figure Skating (1.0 cr)
PE 1157 - Intermediate Skiing (1.0 cr)
PE 1165 - Intermediate Tumbling and Gymnastics (1.0 cr)

Team Sports

Take 0 - 2 course(s) from the following:

PE 1067 - Basketball (1.0 cr)
PE 1071 - Beginning Cricket (1.0 cr)
PE 1072 - Soccer (1.0 cr)
PE 1073 - Softball (1.0 cr)
PE 1074 - Beginning Volleyball (1.0 cr)
PE 1075 - Ice Hockey (1.0 cr)
PE 1174 - Intermediate Volleyball (1.0 cr)

Leadership Minor

Educational Policy & Administration

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

The undergraduate leadership minor is a 16-credit interdisciplinary program that helps students gain understanding and experience in multiple frameworks of leadership. The program develops the leadership and social change skills of undergraduates for their roles as citizens on the University campus and in the larger global community. This minor is a collaborative effort of the college's department of Educational Policy and Administration (EDPA), the University's Hubert H. Humphrey Institute, and the Office for Student Affairs.

Admission Requirements

Students must complete 1 course before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

EDPA 1301W - Personal Leadership in the University, WI (3.0 cr)
or PA 1961W - Personal Leadership in the University, WI (3.0 cr)

Program Requirements

Required Courses

Minor Courses

EDPA 3302W - Leadership, You, and Your Community, WI (3.0 cr)
or PA 3961W - Leadership, You, and Your Community, WI (3.0 cr)
EDPA 4303W - Leadership in the World, WI (3.0 cr)
or PA 4961W - Self-developed Leadership in the World, WI (3.0 cr)

Field Experience

EDPA 3402 - Leadership Minor: Field Experience (2.0 cr)
or PA 3971 - Leadership Minor Field Experience (2.0 cr)

Electives

In consultation with the minor office, take at least 5 additional credits to complete the 16-credit requirement for the minor.

Recreation, Park and Leisure Studies B.S.

Kinesiology, School of

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 124 to 128.

Required credits within the major: 90.

Degree: Bachelor of Science.

The undergraduate program in recreation, park, and leisure studies prepares students to assume leadership, supervisory, or beginning administrative responsibilities in various park, recreation, leisure service, and sport management agencies, and for therapeutic recreation certification and practice. The program also prepares students for graduate study in outdoor recreation/education, park and recreation administration, sport management, and therapeutic recreation. Many students combine recreation, park, and leisure studies with coursework in other disciplines, such as management, social work, physical and occupational therapy, creative arts, human growth and development, special education, and psychology. Students pursuing a B.S. degree may choose one of two options: leisure services management emphasis areas (includes commercial parks and recreation, outdoor education and recreation, and public parks and recreation sub-plans) or therapeutic recreation emphasis areas.

Admission Requirements

Students must complete 30 credits before admission to the program.

Students must complete at least 30 credits of the University's liberal education requirements, including the freshman writing requirement; have earned a minimum overall GPA of 2.00, with preference given to applicants with a higher average; and have relevant education- or career-related experience, paid or volunteer. Appropriate related and major courses may be applied toward these requirements.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: ENGC 1011

Program Requirements

Requirements include a minimum 2.00 GPA and no grade lower than C- for major courses with the REC designator. A minimum grade of C- is also required for general psychology.

Required Courses

Foundation Courses

For additional college requirements, consult with an SPS program adviser.

Take 3 or more course(s) from the following:

PE 1xxx
COMM 1101 - Introduction to Public Speaking (3.0 cr)
or COMM 1313W - Analysis of Argument, WI (3.0 cr)
or PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
PSTL 1211 - People and Problems, CD, SSCI (4.0 cr)
or SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
PSTL 1281 - General Psychology, SSCI (4.0 cr)
or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
PUBH 3004 - Basic Concepts in Personal and Community Health (4.0 cr)
or take the following course pair:
PUBH 3001 - Personal and Community Health (2.0 cr)
PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)

Major Courses

REC 1501 - Orientation to Leisure and Recreation (3.0 cr)
REC 3281 - Research and Evaluation in Recreation, Park, and Leisure Studies (4.0 cr)
REC 3541W - Recreation Programming, WI (3.0 cr)
REC 3551 - Administration and Finance of Leisure Services (4.0 cr)
REC 3601W - Leisure and Human Development, WI (3.0 cr)
REC 3796 - Senior Internship in Recreation, Park, and Leisure Studies (1.0-12.0 cr)
REC 5271 - Community Leisure Services for Persons with Disabilities (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans.

Commercial Parks and Recreation

Required Courses

Additional Foundation Courses

For additional college requirements, consult with an SPS program adviser.

PSTL 1233 - U.S. Government and Politics, C/PE, SSCI (4.0 cr)
or POL 1001 - American Democracy in a Changing World, C/PE, SSCI (4.0 cr)
Complete 3 credits from ADED, ASL, BIE, CI, CPSY, EDHD, EDPA, EPSY, HRD, WHRE, YOST
ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
or APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)

Commercial Parks and Recreation Focus

Take 16 credits in recreation courses related to an emphasis area, selected in consultation with a major adviser.

- REC 5191 - Commercial Recreation and Tourism (3.0 cr)
- REC 5801 - Legal Aspects of Sport and Recreation (4.0 cr)

Take 9 or more credit(s) from the following:

- REC 3xxx
- REC 4xxx
- REC 5xxx

Supporting Program

No more than three 1xxx courses, selected in consultation with an adviser, may count toward completing the sub-plan.

Take 24 or more credit(s) including 3 or more sub-requirement(s) from the following:

Marketing and Management

- ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
- BIE 5011 - Introduction to Computer Applications (3.0 cr)
- BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
- MGMT 3001 - Fundamentals of Management (3.0 cr)
- MKTG 3001 - Principles of Marketing (3.0 cr)

Economics

- APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
- or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

Electives

Take 3 or more credit(s) from the following:

- BLAW 3xxx
- MGMT 3xxx
- MKTG 3xxx

Outdoor Education and Recreation

Required Courses

Additional Foundation Courses

For additional college requirements, consult with an SPS program adviser.

- APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
- or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
- PSTL 1233 - U.S. Government and Politics, C/PE, SSCI (4.0 cr)
- or POL 1001 - American Democracy in a Changing World, C/PE, SSCI (4.0 cr)
- Complete 3 credits from ADED, ASL, BIE, CI, CPSY, EDHD, EDPA, EPSY, HRD, WHRE, YOST

Outdoor Education and Recreation Focus

- REC 2151 - Outdoor and Camp Leadership (3.0 cr)
- REC 5301 - Wilderness and Adventure Education (4.0 cr)
- REC 5311 - Programming Outdoor and Environmental Education (3.0 cr)
- REC 5161 - Recreation Land Policy (3.0 cr)
- REC 5801 - Legal Aspects of Sport and Recreation (4.0 cr)

Supporting Program

Take 24 or more credit(s) including 2 or more sub-requirement(s) from the following:

Marketing and Management

- BIE 5011 - Introduction to Computer Applications (3.0 cr)
- BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
- MGMT 3001 - Fundamentals of Management (3.0 cr)
- MKTG 3001 - Principles of Marketing (3.0 cr)

Electives

Take 11 or more credit(s) from the following:

- ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
- APEC 4311 - Tourism Development: Principles, Processes, Policies (3.0 cr)
- POL 3321 - Issues in American Public Policy, C/PE (3.0 cr)
- RRM 4232W - Managing Recreational Lands, ENVT, WI (4.0 cr)

Public Parks and Recreation

Required Courses

Additional Foundation Courses

For additional college requirements, consult with an SPS program adviser.

- PSTL 1233 - U.S. Government and Politics, C/PE, SSCI (4.0 cr)
- or POL 1001 - American Democracy in a Changing World, C/PE, SSCI (4.0 cr)
- Complete 3 credits from ADED, ASL, BIE, CI, CPSY, EDHD, EDPA, EPSY, HRD, WHRE, YOST
- APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
- or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)

Public Parks and Recreation Focus

The electives listed below are only suggestions. Consult with an adviser for more course options to reach the 16 credit total.

- REC 5161 - Recreation Land Policy (3.0 cr)
- REC 5801 - Legal Aspects of Sport and Recreation (4.0 cr)

Take 9 or more credit(s) from the following:

- REC 3993 - Directed Study in Recreation, Park, and Leisure Studies (1.0-9.0 cr)
- REC 5191 - Commercial Recreation and Tourism (3.0 cr)
- REC 5241 - Functional Intervention: Recreation Therapy in Geriatric Care (3.0 cr)
- REC 5461 - Foundations of Sport Management (3.0 cr)
- REC 5111 - Sports Facilities (3.0 cr)
- REC 5511 - Women in Sport and Leisure (3.0 cr)

Supporting Program

Take 24 or more credit(s) including 3 or more sub-requirement(s) from the following:

Marketing and Management

- BIE 5011 - Introduction to Computer Applications (3.0 cr)
- BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
- HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
- MGMT 3001 - Fundamentals of Management (3.0 cr)
- MKTG 3001 - Principles of Marketing (3.0 cr)

Economics

- APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
- or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

Electives

Take 4 or more credit(s) from the following:

- ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
- APEC 4311 - Tourism Development: Principles, Processes, Policies (3.0 cr)
- POL 3321 - Issues in American Public Policy, C/PE (3.0 cr)
- RRM 4232W - Managing Recreational Lands, ENVT, WI (4.0 cr)

Therapeutic Recreation

Therapeutic recreation emphasis areas include community-based or clinical-based recreation. (Completion of this program meets the requirements for certification by the National Council on Therapeutic Recreation Certification.)

Additional offerings include a coaching certificate and a coaching minor.

To become professionally certified as a therapeutic recreation specialist, specific courses also are required in the therapeutic recreation option, including abnormal psychology, anatomy, and physiology.

Required Courses

Additional Foundation Courses

EPSY 5401 - Counseling Procedures (3.0 cr)
or CPSY 2301 - Introductory Child Psychology, SSCI (4.0 cr)
KIN 3027 - Human Anatomy for Kinesiology Students (3.0 cr)
PSY 3604 - Introduction to Abnormal Psychology (3.0 cr)
COMM 3411 - Introduction to Small Group Communication (3.0 cr)
or EPSY 5151 - Cooperative Learning (3.0 cr)
or EPSY 5434 - Counseling Adults in Transition (3.0 cr)
PHSL 1001 - Human Physiology (3.0 cr)
or PHSL 3051 - Human Physiology (4.0 cr)

Therapeutic Recreation Focus

Take 16 credits in recreation courses related to an emphasis area, selected in consultation with a major adviser.

REC 5211 - Introduction to Therapeutic Recreation (3.0 cr)
REC 5215 - Assess and Monitor Patient/Client Functioning in Recreation Therapy (3.0 cr)
REC 5221W - Comprehensive Therapeutic Recreation Services Development and Management, WI (4.0 cr)
REC 5231 - Therapeutic Recreation and Diagnostic Groups (3.0 cr)

Take 3 or more credit(s) from the following:

REC 3993 - Directed Study in Recreation, Park, and Leisure Studies (1.0-9.0 cr)
REC 5241 - Functional Intervention: Recreation Therapy in Geriatric Care (3.0 cr)
REC 5900 - Special Topics: Contemporary Issues in Leisure Services (1.0-12.0 cr)

Supporting Program

No more than three 1xxx courses, selected in consultation with an adviser, may count toward completing the sub-plan.

Take 24 or more credit(s) including 5 or more sub-requirement(s) from the following:

Facilitation and Communication

Take 1 or more course(s) from the following:

ASL 1701 - American Sign Language I (4.0 cr)
EPSY 5609 - Family-Centered Services (2.0 cr)
SOC 4102 - Criminology (3.0 cr)
SOC 4105 - Sociology of Punishment and Corrections (3.0 cr)

Development and Behavior

Take 1 or more course(s) from the following:

CPSY 4303 - Adolescent Psychology (4.0 cr)
CPSY 4343 - Cognitive Development (4.0 cr)
KIN 3133 - Motor Control, Learning, and Development (3.0 cr)
PSY 4501 - Psychology of Women (3.0 cr)
PSY 5206 - Social Psychology and Health Behavior (3.0 cr)

Child Development

Take 1 or more course(s) from the following:

CPSY 4311 - Behavioral and Emotional Problems of Children (4.0 cr)
CPSY 4313 - Disabilities and Development (4.0 cr)

Human Growth and Development

Take 1 or more course(s) from the following:

CPSY 4331 - Social and Personality Development (4.0 cr)
EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
NURS 3690 - Life Span, Growth, and Development I (2.0 cr)
PUBH 6040 - Dying and Death in Contemporary Society: Implications for Intervention (2.0 cr)

Related Program Areas

Take 1 or more course(s) from the following:

EPSY 5674 - Techniques of Orientation, Mobility, and Independence for Students with Visual Disabilities (3.0 cr)
KIN 3113 - First Responder for Coaches and Athletic Trainers (3.0 cr)
KIN 3114 - Prevention and Care of Athletic Injuries (3.0 cr)
MUED 1801 - Introduction to Music Therapy (2.0 cr)
PHAR 5201 - Health Sciences Applied Terminology (2.0 cr)
OT 5313 - Therapeutic Occupation (4.0 cr)
REC 2151 - Outdoor and Camp Leadership (3.0 cr)
REC 5311 - Programming Outdoor and Environmental Education (3.0 cr)
RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)

Social Justice Minor

School of Social Work

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

The social justice minor offers undergraduate students the opportunity to theorize about the meanings of social justice and practice “doing” social justice advocacy in community organizations. The minor is an interdisciplinary, cross-collegiate undergraduate program. Students create socially just communities and a respectful space for all opinions in the dialogue-based classrooms. Teaching faculty, students, and community groups become partners in creating and sharing in an authentic collective learning experience. The program is based on the belief in equity and fairness in every aspect of human experience and the importance of recognizing the struggles for liberation and the social movements of many peoples globally.

Admission Requirements

Minor Requirements

The social justice minor requires three core courses (12 credits), all of which include 30 hours of service learning in social justice organizations, and 6 credits of elective courses.

Required Courses

Core Courses

These courses include 30 hours of service learning in social justice organizations.
SW 2501W - Introduction to Social Justice, C/PE, WI (4.0 cr)
SW 3501 - Theories and Practices of Social Change Organizing, SSCI, C/PE (4.0 cr)
SW 4501 - Senior Seminar in Social Justice (4.0 cr)

Electives

Take 6 or more credit(s) from the following:

AFRO 3120 - Social and Intellectual Movements in the African Diaspora (3.0 cr)
AFRO 3251W - Sociological Perspectives on Race, Class, and Gender, CD, SSCI, WI (3.0 cr)
AFRO 3426 - African Americans, Social Policy, and the Welfare State, CD (3.0 cr)
AFRO 3866 - The Civil Rights and Black Power Movement, 1954-1984, C/PE, CD (3.0 cr)
AMIN 4501 - Law, Sovereignty, and Treaty Rights, C/PE (3.0 cr)
AMIN 4515 - Contemporary American Indian Movements (3.0 cr)
AMST 3001 - Contemporary Perspectives on Asian America, CD (3.0 cr)
AAS 1101 - Imagining Asian America, C/PE, CD (3.0 cr)
AAS 3501 - Asian America Through Arts and Culture, OH, CD (4.0 cr)
CHIC 1112 - Introduction to Chicana/o Studies: Critical Paradigms, CD, HP (3.0 cr)
CHIC 3212 - La Chicana, CD (3.0 cr)

 SOC 3251W - Sociological Perspectives on Race, Class, and Gender, CD, SSCI, WI (3.0 cr)
 SOC 3322W - Social Movements, Protests, and Change, C/PE, WI (3.0 cr)
 SOC 4461 - Sociology of Ethnic and Racial Conflict, CD, IP (3.0 cr)
 SPAN 3401 - Service Learning in the Chicano/Latino Community, C/PE, CD (3.0 cr)
 SW 3301 - GLBT Social Movements (3.0 cr)
 SW 3705 - Gender Violence in Global Perspective, IP (3.0 cr)
 TH 5117 - Performance and Social Change (3.0 cr)
 WOST 1002 - Politics of Sex, CD, SSCI (3.0-4.0 cr)
 WOST 3003 - Gender and Global Politics, IP, SSCI (3.0-4.0 cr)
 WHRE 3011W - Introduction to Technology and Public Ethics, C/PE, WI (3.0 cr)
 YOST 2001 - The Everyday Lives of Youth, SSCI (4.0 cr)
 YOST 3101 - Introduction to Youthwork (4.0 cr)
 AAS 3409W - Asian American Women's Cultural Production, CD, WI (3.0 cr)
 or WOST 3409W - Asian American Women's Cultural Production, CD, WI (3.0 cr)

Sport Studies B.S.

Kinesiology, School of

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 71.

This program requires summer terms.

Degree: Bachelor of Science.

The sport studies major focuses on contemporary sport as a product of social, psychological, and economic phenomena. Because of its prominent role in our culture, economy, and societal behavior, sport is a popular subject for academic inquiry. Graduates may find employment in sport marketing and management, coaching, sport administration, and sport or other fitness-related occupations. The program also prepares students for graduate study in sport management.

Coursework in sport studies addresses such topics as ethics and sport, psychology of sport performance, sport as a sociocultural phenomenon, sport management, sport marketing and promotion, and event management.

Features of the program include a 10-credit experiential course, a senior seminar, and a set of focused electives. Each student selects electives from one of the following three emphasis areas: coaching, sport management, or youth services/development.

Additional offerings include a coaching certificate and a coaching minor.

Admission Requirements

Students must complete 60 credits before admission to the program.

Admission preference is given to students who have completed liberal education requirements and have an overall GPA of 2.00 before the admission deadline. Because of a large number of applicants, a 2.50 GPA is recommended.

Completion of SPST 1701 is recommended before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Foundation Courses

Take a minimum of 24 credits from this group, including 6 credits of education and human development electives (excluding courses with KIN, REC, or SPST designators). With the guidance of an SPS advisor, choose from courses listed on the Web page <http://www.education.umn.edu/catalogs/course-desc/default.html>.

PE 1xxx

COMM 1101 - Introduction to Public Speaking (3.0 cr)

or COMM 1313W - Analysis of Argument, WI (3.0 cr)

or PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)

or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

PSTL 1211 - People and Problems, CD, SSCI (4.0 cr)

or SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)

PSTL 1281 - General Psychology, SSCI (4.0 cr)

or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

PUBH 3004 - Basic Concepts in Personal and Community Health (4.0 cr)

or take the following course pair:

PUBH 3001 - Personal and Community Health (2.0 cr)

PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)

Take at least 6 credits from ADED, AFEE, AGED, ASL, BIE, CI, CPSY, EDHD, EDPA, EPSY, HRD, WHRE, YOST.

Major Courses

Completion of SPST 1701 is recommended before admission to the program. All other major core courses must be completed after program admission.

SPST 1701 - Introduction to Sport Studies (2.0 cr)

SPST 3143 - Organization and Management of Sport (3.0 cr)

SPST 3501 - Sport in a Diverse Society (3.0 cr)

SPST 3601 - Ethics and Values in Sport (2.0 cr)

SPST 3611 - Sport Psychology (2.0 cr)

SPST 3861 - Legal Aspects of Sport (2.0 cr)

SPST 3881W - Senior Seminar in Sport Studies, WI (3.0 cr)

SPST 3996 - Practicum: The Sport Experience (1.0-10.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans.

Coaching

The coaching certification can be completed within this track.

Required Courses

Coaching

Take 20 or more credit(s) from the following:

- FSCN 1112 - Principles of Nutrition, ENVT (3.0 cr)
- SPST 3111 - Sports Facilities (2.0 cr)
- SPST 3112 - Applied Sport Science (2.0 cr)
- SPST 3621 - Applied Sport Psychology (2.0 cr)
- SPST 3641 - Training and Conditioning for Sport (2.0 cr)
- BIE 5011 - Introduction to Computer Applications (3.0 cr)
- or PSTL 1571 - Introduction to Microcomputer Applications (4.0 cr)

Coaching Certification

Completion of the following courses meets requirements for coaching certification or coaching focus.

- KIN 3113 - First Responder for Coaches and Athletic Trainers (3.0 cr)
- KIN 3133 - Motor Control, Learning, and Development (3.0 cr)
- KIN 5697 - Student Teaching: Coaching (1.0-10.0 cr)

Human Anatomy

- INMD 3001 - Human Anatomy (3.0 cr)
- or KIN 3027 - Human Anatomy for Kinesiology Students (3.0 cr)
- or KIN 3111 - Human Anatomy (2.0 cr)

Coaching Certification 1

Take 2 or more course(s) from the following:

- KIN 3112 - Introduction to Biomechanics (3.0 cr)
- KIN 4385 - Exercise Physiology (4.0 cr)
- KIN 5126 - Sport Psychology (3.0 cr)
- KIN 5136 - Psychology of Coaching (3.0 cr)
- SPST 3621 - Applied Sport Psychology (2.0 cr)
- SPST 3641 - Training and Conditioning for Sport (2.0 cr)

Coaching Certification 2

Take 2 or more course(s) from the following:

- KIN 3168 - Soccer Coaching (1.0 cr)
- KIN 3169 - Volleyball Coaching (1.0 cr)
- KIN 3171 - Baseball Coaching (1.0 cr)
- KIN 3172 - Basketball Coaching (1.0 cr)
- KIN 3173 - Football Coaching (1.0 cr)
- KIN 3174 - Golf Coaching (1.0 cr)
- KIN 3175 - Gymnastics Coaching (1.0 cr)
- KIN 3176 - Ice Hockey Coaching (1.0 cr)
- KIN 3177 - Swimming and Diving Coaching (1.0 cr)
- KIN 3178 - Tennis Coaching (1.0 cr)
- KIN 3179 - Track and Field Coaching (1.0 cr)
- KIN 3181 - Wrestling Coaching (1.0 cr)
- KIN 5720 - Special Topics in Kinesiology (1.0-8.0 cr)

Sport Management

Required Courses

Take 20 or more credit(s) from the following:

- BIE 3061 - Professional Sales Management (3.0 cr)
- BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
- BLAW 5078 - Partnerships and Corporations (2.0 cr)
- COMM 3201 - Introduction to Electronic Media Production (4.0 cr)
- COMM 3441 - Introduction to Organizational Communication (3.0 cr)
- ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
- PSTL 1511 - Introduction to Business and Society, SSCI (4.0 cr)

- PSTL 1513 - Small Business Fundamentals With E-Business Applications (3.0 cr)
- HRD 5201 - Training and Development of Human Resources (3.0 cr)
- HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
- KIN 5115 - Event Management in Sport (3.0 cr)
- MGMT 3001 - Fundamentals of Management (3.0 cr)
- MKTG 3001 - Principles of Marketing (3.0 cr)
- SPST 3111 - Sports Facilities (2.0 cr)
- SPST 3421 - Business of Sport (2.0 cr)
- SPST 3631 - Sport Promotion and Programming (3.0 cr)
- ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
- or PSTL 1540 - Accounting Fundamentals I (3.0 cr)
- BIE 5011 - Introduction to Computer Applications (3.0 cr)
- or PSTL 1571 - Introduction to Microcomputer Applications (4.0 cr)

Youth Services/Development

Required Courses

Youth Services/Development List

Take 20 or more credit(s) from the following:

- CPSY 4303 - Adolescent Psychology (4.0 cr)
- CPSY 4331 - Social and Personality Development (4.0 cr)
- CPSY 4334W - Children, Youth in Society, C/PE, WI (4.0 cr)
- EDPA 5372 - Youth in Modern Society (3.0 cr)
- FSOS 1101 - Intimate Relationships, CD, SSCI (4.0 cr)
- KIN 1989 - Health and Society (3.0 cr)
- KIN 5115 - Event Management in Sport (3.0 cr)
- KIN 5375 - Competitive Sport for Children and Youth (3.0 cr)
- REC 1501 - Orientation to Leisure and Recreation (3.0 cr)
- REC 2151 - Outdoor and Camp Leadership (3.0 cr)
- REC 3541W - Recreation Programming, WI (3.0 cr)
- SPST 3112 - Applied Sport Science (2.0 cr)
- SPST 3631 - Sport Promotion and Programming (3.0 cr)
- SW 2001 - Introduction to Social Welfare and Community Services, C/PE (4.0 cr)
- YOST 2001 - The Everyday Lives of Youth, SSCI (4.0 cr)
- YOST 5031 - Youth in the World (3.0 cr)
- YOST 5402 - Youth Policy: Enhancing Healthy Development in Everyday Life (4.0 cr)
- BIE 5011 - Introduction to Computer Applications (3.0 cr)
- or PSTL 1571 - Introduction to Microcomputer Applications (4.0 cr)
- CPSY 2301 - Introductory Child Psychology, SSCI (4.0 cr)
- or CPSY 3301 - Introductory Child Psychology for Social Sciences (4.0 cr)
- or PSTL 2283W - Psychology of Human Development, SSCI, WI (4.0 cr)

Technology Education B.S.

Work and Human Resource Education

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 71.

This program requires summer terms.

Degree: Bachelor of Science.

This program prepares students to meet Minnesota state licensure requirements for teaching technology education to grades 5-12.

The curriculum surveys the broad range of technology use and application in the areas of manufacturing, construction, transportation, communication, energy, and power. Coursework includes liberal education, technology education, and professional/clinical experiences and student teaching.

Graduate study in this field is available. A career and technical education certificate is also available.

Admission Requirements

Students must complete 60 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

A minimum 2.00 GPA with no grade lower than C- is required for major courses with the following designators: BIE, EDHD, HRD, and WHRE. A minimum grade of C- is also required for general psychology. Students must have a minimum 2.50 GPA to meet state licensure requirements.

Required Courses

Major Courses

BA 3033W is a required course for students who are also completing a business minor through the University's Carlson School of Management.

BA 3033W - Business Communication, WI (3.0 cr)
or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
COMM 1101 - Introduction to Public Speaking (3.0 cr)
or PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)
or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
PSTL 1281 - General Psychology, SSCI (4.0 cr)
or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
MATH 1001 - Excursions in Mathematics, MATH (3.0 cr)
or MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
WHRE 3011W - Introduction to Technology and Public Ethics, C/PE, WI (3.0 cr)
or WHRE 5011W - Technology and Public Ethics, C/PE, WI (3.0 cr)

Technical Skills

A limited number of technical college credits can be applied to BIE 3151 or BIE 5151.

BIE 3111 - Exploring Technology Systems (3.0 cr)
BIE 3113 - Manufacturing Technology (3.0 cr)
BIE 3114 - Construction Technology (3.0 cr)
BIE 3122 - Communication and Information Technology (3.0 cr)
BIE 3123 - Energy, Power, and Transportation Technology (3.0 cr)
BIE 5101 - Technological Problem Solving (3.0 cr)
BIE 5344 - Facilities Management in Business and Industry (3.0 cr)
BIE 3112 - Technical Drawing and Production Technologies (3.0 cr)
or AFEE 3112 - Technical Drawing and Production Technologies (3.0 cr)
WHRE 3121 - Communication, Energy and Power, Transportation and Machinery Technologies (3.0 cr)

Take 1 or more course(s) totaling 9 or more credit(s) from the following:

BIE 3151 - Technical Development: Advanced (1.0-32.0 cr)
BIE 5151 - Technical Development: Specialized (1.0-12.0 cr)
BIE 5596 - Occupational Experience in Business and Industry (1.0-10.0 cr)

Technological Knowledge

An adviser-approved substitution may be taken in place of BIE 5011.

BIE 5011 - Introduction to Computer Applications (3.0 cr)
BIE 5365 - Curriculum Development in Technology Education (3.0 cr)
WHRE 5661 - Instructional Methods for Business and Industry (2.0 cr)

Professional/Clinical Studies

CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 cr)
EDHD 5001 - Learning, Cognition, and Assessment (3.0 cr)
EDHD 5003 - Developmental and Individual Differences in Educational Contexts (3.0 cr)
EDHD 5005 - School and Society (2.0 cr)
EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)
or PUBH 3005 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)
WHRE 5696 - Teaching Internship: Introduction (1.0 cr)
WHRE 5697 - Teaching Internship: School and Classroom Settings (2.0 cr)
WHRE 5698 - Teaching Internship (3.0-8.0 cr)

Youth Studies Minor

School of Social Work

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

The youth studies minor is a 16-credit undergraduate minor that addresses youth as an idea, youth as young people, youthhood as the everyday lives of young people, and the responses of communities to this population.

Participants in the youth studies minor learn about and critically analyze at a beginning level the families of ideas, models, concepts, discourses, and ways of understanding, responding to, and working with young people. Participants craft their unique program from among the required designated courses to prepare for graduate training/education in the many scholarly and youth work professional fields. Participants do not become trained workers with youth nor receive any certification to do youth work in any participating field.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

YOST 2002W - Introduction to Youth Studies: Understanding Youth, Young People, Youthhood, and Youth Work, WI (4.0 cr)
YOST 4002W - Constructing Personal Models of Youth Scholarship and Youth Work (4.0 cr)

Take 8 or more credit(s) from the following:

CPSY 4303 - Adolescent Psychology (4.0 cr)
CPSY 4329 - Biological Foundations of Development (4.0 cr)
CPSY 4331 - Social and Personality Development (4.0 cr)
CPSY 4334W - Children, Youth in Society, C/PE, WI (4.0 cr)
CPSY 4336W - Development and Interpersonal Relations, WI (4.0 cr)
FSOS 4155 - Parent-Child Relationships (3.0 cr)
REC 2151 - Outdoor and Camp Leadership (3.0 cr)
YOST 2001 - The Everyday Lives of Youth, SSCI (4.0 cr)
YOST 3001 - Introduction to History & Philosophy of Youthwork (4.0 cr)
YOST 3003 - Bridging Theories, Research, Practices, and Observations about Youth Development and Youth Work (1.0 cr)
YOST 3101 - Introduction to Youthwork (4.0 cr)

College of Food, Agricultural and Natural Resource Sciences

General Information

Effective July 1, 2006, the College of Agricultural, Food and Environmental Sciences, the College of Natural Resources, and the Department of Food Science and Nutrition joined to create the College of Food, Agricultural and Natural Resource Sciences (CFANS). The mission of CFANS is to integrate these units to enhance the University's potential to become one of the premier research institutions in the world dedicated to food systems, environmental science, renewable resources, and policy, consistent with the University's goal to become one of the top three public research universities in the world. The focus of CFANS is to enhance the University's natural biological and social science contributions to the environment, production agriculture, human health, food systems, and natural resources. The college offers outstanding programs, provides exemplary teaching and student services, and constantly strives for continuous improvements in all aspects of the university educational experience.

The college is housed in many buildings on the St Paul Campus of the University of Minnesota's Twin Cities campus. The Dean's Office and Student Services Office are housed in Coffey Hall, 1420 Eckles Avenue. The Student Services Office provides admission, registration, academic advising, and other assistance to all undergraduates. Call 612-624-6768, or visit the CFANS Web site at www.cfans.umn.edu.

The college's 16 undergraduate majors and 4 premajors will be organized within 13 academic departments.

Admission

Guidelines for admission to the College of Food, Agricultural and Natural Resource Sciences for high school graduates, transfer students, transfers within the university system, and non-degree-seeking students are explained below. For more information, call CFANS admissions, 612-625-3284 (for new freshmen) or 612-624-3220 (for transfer students).

Students seeking admission as new freshmen or as transfers from outside the University of Minnesota system apply through the Office of Admissions, 240 Williamson Hall, 231 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-625-2008).

For official and up-to-date information about the University's admissions policies, procedures, and deadlines, please see the latest edition of the Undergraduate Application Booklet available from the Office of Admissions or online at <http://admissions.tc.umn.edu>.

Deadlines—The Office of Admissions typically accepts applications for fall semester beginning October 1 of the preceding year and admits students as long as space is available. Freshman applicants who meet the admission guidelines and apply by December 15 are guaranteed space in the following fall semester's incoming class. Final deadlines are June 1 for fall semester and October 15 for spring semester.

High School Graduates—High school graduates need to complete the University's high school course preparation requirements. (See Freshman Admission in the General Information section of this catalog).

Transfer Students—Students may apply for admission to the College of Food, Agricultural and Natural Resource Sciences from other colleges or universities. Applicants may be accepted if they meet the entrance requirements of CFANS and of the

major they wish to pursue. To be competitive for admission, transfer applicants who graduated from high school during 1987 or later should have completed the following:

- algebra with a grade of at least C (except for the Scientific and Technical Communications major);
- at least a C average in transfer coursework;
- a solid foundation in math and science;
- other high school preparation requirements, including foreign language. (See High School Course Preparation in the General Information section of this catalog.)

Applicants who did not complete this coursework during high school may substitute equivalent college coursework. CFANS may admit some students who have not met these guidelines. Students who are admitted but lack preparation requirements must complete all deficiencies before graduating.

After a transfer applicant is admitted, the Office of Admissions and CFANS evaluate all previous college coursework according to the standards of the University and CFANS. The student then receives a Transfer Credit Evaluation showing how previous coursework has been evaluated. Appropriate credits earned at other accredited colleges and universities or within other units of the University may be applied toward CFANS programs. Most students find they must transfer by their junior year to meet residence and upper division course requirements of CFANS.

Applicants who graduated from high school before 1987 must meet current entrance standards except for the high school preparation and second language requirements.

Transfer students must complete all specific course and area distribution requirements of CFANS regardless of the number of credits accepted for transfer. Therefore, students who begin degree work elsewhere and intend to transfer later should carefully plan pre-transfer courses to meet as many CFANS requirements as possible.

Note: A maximum of 3 internship or practical experience credits may be transferred into CFANS.

Change of College Within the University—To transfer to the College of Food, Agricultural and Natural Resource Sciences from another college within the University, students must meet CFANS entrance guidelines. Students must complete an Application for Undergraduate Change of College and apply for transfer at one of the One Stop Student Services Centers on campus. Application deadlines are consistent with posted University admission deadlines.

Non-degree-seeking—Non-degree-seeking admission is primarily for students pursuing coursework in CFANS departments but not seeking a degree, or for students preparing to apply to a graduate program offered by CFANS departments but have prerequisites to satisfy. Admission may be processed at any time before the first day of class. The non-degree-seeking category is also open to staff members in CFANS departments taking courses through the Regents Scholarship Program and CFANS graduates returning for coursework.

Students who enter CFANS as non-degree-seeking students with the intention of transferring later to the Graduate School should be aware of restrictions on the number of non-degree-seeking credits that may be transferred to a graduate program. See the *Graduate School Catalog*.

Degrees/Majors

The College of Food, Agricultural and Natural Resource Sciences offers 16 majors, and the major curricula all lead to the B.S. degree.

Agricultural and Food Business Management

- Business management
- Financial management
- Marketing, sales and food industry management

Agricultural Industries and Marketing

- Crops and soils industries
- Food industries

Animal Science

- Industry
- Production
- Science/Biotechnology/Pre-Veterinary Medicine

Applied Economics

- Management and finance
- Food retailing
- Marketing
- Regional and public economics
- Resources and environment
- Trade and development

Applied Plant Science

- Agroecology
- Plant Improvement
- Plant Utilization

Bio-Based Products

- Bio-based products marketing and management
- Residential building science and technology

Environmental Horticulture

- Floriculture/nursery productions and retail management
- Landscape design
- Landscape implementation and management
- Turfgrass science

Environmental Sciences, Policy and Management

- Conservation and resource management
- Corporate environmental management
- Environmental education and communication
- Environmental science
- Policy, planning, law and society

Fisheries and Wildlife

- Fisheries
- Wildlife
- Conservation biology

Food Science

Forest Resources

- Forest management and planning
- Forest conservation and ecosystem management

Nutrition

- Nutrition and Dietetics
- Nutrition Science

Recreation Resource Management

- Recreation resource management
- Resource based tourism

Scientific and Technical Communication

Beginning fall semester 2007, the Department of Rhetoric and the scientific and technical communication major will be housed in the College of Liberal Arts.

Urban and Community Forestry

Because the first year of coursework is somewhat similar among many of these programs, students may transfer between majors at the end of their freshman or sophomore year with little or no credit loss.

Each CFANS major requires an orientation class for all incoming students that provides interaction with faculty and alumni in their chosen professional field, and exposure to career, learning abroad, and student life opportunities.

Pre-professional Opportunities

Students may prepare in CFANS for the following upper division/professional programs:

Pre-Agricultural Education

- Agricultural science and technology education
- Agricultural leadership, training, and development
- Natural and managed environmental education

Pre-biosystems and agricultural engineering

(B.S. granted by the Institute of Technology)

Pre-Bio-based products engineering

(B.S. granted by the Institute of Technology)

Pre-landscape architecture

(B.E.D. granted by the College of Design)

Pre-medicine and pre-dentistry

Pre-veterinary medicine

Minors

The College of Food, Agricultural and Natural Resource Sciences offers the following minors:

- Agronomy
- Animal science
- Applied economics
- Bio-based products engineering
- Climatology
- Corporate environmental management
- Designing documents with new and emerging technologies
- Entomology
- Environment and natural resources
- Environmental horticulture
- Fisheries and wildlife
- Food science
- Food systems and the environment
- Forest resources
- Integrated pest management in cropping systems
- International agriculture
- Internet, science, and society
- Land, nature, and environmental values
- Nutrition
- Recreation resource management
- Soil science
- Sustainable agriculture
- Technical communication
- Urban and community forestry
- Water science

CFANS students may also apply for a minor in any University department or program. Upon graduation, the minor is listed on the transcript with degree and major. For assistance in planning a minor, contact the Student Services Office. Detailed minor requirements are described in the CFANS Degree Programs and Minors section of this catalog.

Graduate Degrees—The master of science (M.S.) and the doctor of philosophy (Ph.D.) in sixteen areas of study are offered through the Graduate School in cooperation with The College of Food, Agricultural and Natural Resource Sciences. For more information, consult the Graduate School Catalog or CFANS Web site.

Honors

CFANS students may participate in honors at both the freshman/sophomore level and the junior/senior level.

At the freshman/sophomore level, students participate in specially designed honors courses and honors colloquia focusing on current issues in their chosen field. Students complete three honors courses in their first two years; one must be an honors colloquium (CFAN 1000H). Completion of the freshman/sophomore honors program is recognized by a certificate and by designation on a student's transcript.

The heart of the junior/senior level honors program is a research project supervised by a faculty mentor. Students also participate in other honors options designed to enhance their experiences. The last 60 credits of A-F registration (including transfer coursework) with the minimum GPAs specified below.

Transcripts of students graduating with honors show one of the following:

Cum laude (minimum GPA: 3.50)

Magna cum laude (minimum GPA: 3.66)

Summa cum laude (minimum GPA: 3.75)

Students also receive recognition during commencement.

To achieve the honors notation on their transcripts, students must meet the GPAs stated above and complete all honors program requirements, which for most students comprises one semester of the honors colloquium, an honors option, and honors research. The honors option provides an opportunity to explore honors classes from other programs, and is very flexible and can be adapted to many situations and contexts. Registration in honors courses requires admission to the Honors Program and college office approval.

Graduation With Distinction—See the Policies section of the catalog.

Dean's List—To be eligible for the Dean's List, a student must be a current CFANS student and have completed 12 credits (A-F registration) with a GPA of at least 3.667. Students on the Dean's List receive a letter from the dean and are publicly listed in the Honors and Recognition Web page of the college. There is a transcript notation for each term a student is on the Dean's List.

Policies

Grading—All required courses in the major must be taken A-F with grades of C- or better; students who receive a grade below C- in a major course must repeat the course.

Honor System—under an honor system adopted on the St. Paul campus, students accept responsibility for the supervision of student behavior during examinations and pledge not to give or receive aid. A student or faculty member who observes an act of dishonesty must report the incident to the college Student

Scholastic Standing Committee. For more information about the honor system, contact the Student Services Office.

Directed Study—With instructor approval, students may take custom-designed courses through independent study. Contact the Student Services Office for more information.

Policy Waivers—Occasionally it may be to the educational advantage of both the student and the department to consider an alternative or substitution in an academic policy or curricular requirement, provided the basic spirit of the policy or requirement is maintained. A student may petition for a departure from normal procedure. Students must receive major adviser/departmental recommendation before the petition is routed to the Student Scholastic Standing Committee.

Repeating Courses—An undergraduate student may repeat a course once. When a student repeats a course, (a) both grades for the course shall appear on the official transcript, (b) the course credits may not be counted more than once toward degree and program requirements, and (c) only the last enrollment for the course shall count in the student's GPA. The preceding sentence of this policy shall not apply to courses using the same number but where students study different content each term of enrollment. If an undergraduate student repeats a course after his/her degree has been awarded, the original course grade will not be excluded from the degree GPA nor will the new grade be included in the degree GPA.

Special Examinations for Credit—Students who believe their knowledge of a subject is equal to that required to complete a particular course may request to take an examination for credit. If the Student Scholastic Standing Committee and the department approve, arrangements can be made with an appropriate instructor to take an examination. Usually no grade is assigned. A fee is assessed for each examination. Credit by special examination is not granted for language or mathematics courses taken in high school.

Suspension—to appeal a suspension (see Probation in the Policies section of this catalog), a student must obtain a Petition for Reinstatement from the Student Services Office. The petition must be completed and turned in to the Student Scholastic Standing Committee, along with any supporting documents. The final decision rests with the Student Scholastic Standing Committee, which informs the student of its decision in writing.

Graduation Requirements

To receive the B.S. degree, CFANS students must meet the following requirements.

- Complete the prescribed curriculum as listed in the student's degree program.
- Achieve a cumulative GPA of at least 2.00, with grades of C- or better in each course in the major. Major course work is defined as all required courses listed in each major program including specialization courses, track courses, concentration courses, professional courses, and writing courses. The only courses not included in this policy are free electives and courses taken beyond those in the major coursework to satisfy liberal education requirements.
- Satisfy liberal education requirements.
- Satisfy residence and other general University requirements.
- Officially apply for graduation.
- Meet all financial obligations to the University.

Liberal Education—Students must meet the University's liberal education requirements, including the diversified core and designated theme requirements. The diversified core requirements can be met by completing the core curriculum

listed in each degree program. To satisfy the designated theme requirements, at least 3 credits are required in each of the following areas: cultural diversity; international perspectives; environment; and citizenship and public ethics. The environment theme may be satisfied by completing the required courses in each degree program. The remaining themes may be satisfied by careful selection among core professional and elective courses. See individual degree programs for specific courses.

Field Session Requirements—Forest resources, urban and community forestry, and fisheries and wildlife majors are required to complete a three-week summer field session at the Cloquet Forestry Center in their sophomore or junior years. To attend, students must have completed 30 semester credits and attained a cumulative GPA of at least 2.00. Students enrolling in the forest resources session must complete the following courses with a grade of at least C-: BIOL 1009 or 1001, CHEN 1011 or 1021, FR 1101, and precalculus or college algebra. Students enrolling in the fisheries and wildlife session must have completed the following courses with a grade of at least C-: one year of introductory biology and BIOL 3407. Environmental sciences, policy and management majors are required to complete either a field session or complete ESPM 4096 - Professional Experience Program: Internship (1-3 cr).

Students in the forest resources major are required to complete an advanced field session at the Cloquet Forestry Center in their senior year. To attend, students must attain a cumulative GPA of at least 2.00, complete the introductory field session, FR 3218, 3262, 3411, and 3431. This four-week session is held during the May session and the first part of the summer session.

Advising

Advising services for both current and prospective students are provided by professional academic advisers and by departmental faculty.

Each CFANS student, with adviser assistance, is responsible for learning curricular and graduation requirements and developing a course program and timetable to meet them. All freshmen students are assigned a professional academic adviser for their first year and then assigned a faculty adviser within their major area of study at the beginning of their sophomore year. All transfer students are assigned immediately to a faculty adviser in their major area of study.

Special Learning Opportunities

Many majors in CFANS offer field trips, hands-on experiential learning, and other opportunities. Please speak with your adviser or major coordinator for more information.

Undergraduate Research Opportunities Program (UROP)—The University of Minnesota's UROP offers financial awards to undergraduates for research, scholarly, or creative projects undertaken in partnership with a faculty member. Applications are accepted in the fall and early spring each year.

For more information or an application packet, students should contact the CFANS Student Services Office, 190 Coffey Hall (612-624-6768).

Internships—CFANS juniors and seniors may participate in internships designed for students who wish to reinforce their academic experience by working in an area related to their course of study. Students work full time either fall or spring semester or during the summer. Students earn 1-3 credits for satisfactory completion of an internship. Students may enroll in two different internships, for a total of 6 credits. Salaries are paid by the cooperating businesses, industries, producers, and

agencies participating in the program. For more information, students should consult their adviser or the St. Paul Campus Career Center in 198 McNeal Hall (612-624-2710).

Scholarships

CFANS has an extensive scholarship program for freshmen, transfer students, and continuing students. Scholarship information, applications, and deadlines are available online at www.cfans.umn.edu/scholarships.

International Programs

The College of Food, Agricultural and Natural Resource Sciences offers several types of study abroad that can especially enhance degree work, including field study, enrollment in international institutions, and integrated classroom study. International Programs coordinates international opportunities in CFANS (135 Skok Hall; 612-624-3221; www.cfans.umn.edu/international.html).

Some scholarships are available through CFANS to help defray costs of overseas study and travel. A written report is required. Preference is given to proposals from non-English speaking countries. Students must initiate and plan the project with the aid of a faculty adviser. For more information, contact the CFANS Student Services Office, 190 Coffey Hall (612-624-6768).

Students fluent in their host country's language can participate in integrated classroom study programs that permit students to take regular university courses alongside students from the host country. The University's student exchanges and consortium memberships provide access to universities in many countries. Conservation and resource management, agricultural, business and policy, plant, and animal science curricula are available throughout the world.

CFANS students need not always seek credit in their major. Study abroad is encouraged for language acquisition or cultural learning. The resulting credits can often be used as electives or to fulfill second language or liberal education requirements. The University and other institutions sponsor a broad range of intensive language and area studies programs.

MAST Experience Abroad—The MAST Experience Abroad program provides qualified individuals the opportunity to broaden their agricultural/horticultural skills and knowledge as well as develop or improve international language skills. Practical training programs of 3 to 12 months are available to individuals between the ages of 18 and 30. Participants gain a cross-cultural experience by living and working with a host family in Australia, Austria, Brazil, Denmark, Finland, France, Germany, Italy, the Netherlands, New Zealand, Sweden, Switzerland, or the United Kingdom. Departure dates are in January, April, June, and September. For more information, students should contact the MAST International office, 135 Skok Hall (612-624-3740).

Student Project for Amity among Nations (SPAN)—SPAN consists of summer overseas research on a topic of the student's choosing, preceded by a year's on-campus preparation and followed by project write-up in the fall. The SPAN destinations change from year to year.

More information for all of these opportunities is available from your adviser, International Programs in CFANS staff, or by going to the U of M's Learning Abroad Center's Web site at www.umabroad.umn.edu, 612-626-9000. If you are just beginning your exploration of international opportunities, there is an academic adviser in the Student Services Office in 190 Coffey Hall who can help identify your next steps.

Career Information

The St. Paul Campus Career Center, 198 McNeal Hall, offers assistance and advice to students seeking summer jobs and internships, as well as permanent employment after graduation. Job search assistance for all students is provided by career services staff and by department faculty. A series of workshops are provided by the center on topics such as résumé writing, interviewing, initiating internship and job searches, and summer/seasonal intern hiring updates. See www.stpaulcareers.umn.edu for more information.

Student Organizations

CFANS Student Board—The Student Board promotes student involvement in issues related to the quality and content of education both in and out of the classroom. The board creates channels of communication between the students, faculty, and administration of CFANS. Students may file for election to the board or may serve as a representative of one of the clubs or organizations affiliated with the college. More information is available in the Student Services Office in 190 Coffey Hall.

Ambassadors—The Ambassadors is a voluntary, honorary organization consisting of 30 CFANS undergraduates who assist in promoting the college to prospective students and their parents, alumni, potential donors, and the community. Ambassadors gain experience in public relations and recruitment, and develop communications skills through public speaking engagements and small group discussions with prospective students. More information is available in the Student Services Office in 190 Coffey Hall.

St. Paul Campus Board of Colleges—The St. Paul Campus Board of Colleges directs and coordinates student activities and encourages student leadership throughout the St. Paul campus. Its membership is drawn from the following colleges: Biological Sciences, The College of Food, Agricultural and Natural Resource Sciences, and Veterinary Medicine. The board cooperates with the Minnesota Student Association and the Assembly Committee on Student Affairs (ACSA). For more information, inquire at the Office for Student Affairs in 130 Coffey Hall.

The Twin Cities Student Unions Board of Governors—The Twin Cities Student Unions Board of Governors is an advisory board for the St. Paul Student Center and Coffman Memorial Union. Composed of students elected to represent various academic and student organizations on the Minneapolis and St. Paul campuses, the board formulates policies for operation of the student unions and establishes its budget. For more information, call 612-624-4738.

Student Representation on College and University

Committees—All CFANS committees and most all-University committees have student representatives. For college committees, selection is made by the CFANS Student Board.

Governance—Students are encouraged to participate in governance activities at the department, college, or campus level. Within each department, several committees (including curriculum committees) have student representatives. Students serve on CFANS committees and on the Student Board, which advises the dean on student issues and concerns. Students may also participate in the St. Paul Campus Board of Colleges, which directs student activities and acts as a liaison between the student body and administration, and on the Twin Cities Unions Board of Governors, which establishes programs, operation policies, and budgets for the St. Paul Student Center and Coffman Union. Finally, CFANS student senators are elected to serve on the executive committee of the Minnesota Student Association and the University Senate.

Clubs—Student clubs in The College of Food, Agricultural and Natural Resource Sciences include:

- Agricultural Education Club
- Alpha Epsilon Delta (pre-med and pre-vet)
- Alpha Tau Alpha
- Alpha Zeta Fraternity (an honor and service fraternity)
- American Association of Bovine and Swine
- American Society of Agricultural Engineers, Student Branch
- Applied Economics Student Association
- Block and Bridle
- Collegiate Agri-Women
- Cornucopia Student Organic Farm
- Fisheries, Wildlife and Conservation Biology Club (with an affiliated student chapter of The Wildlife Society)
- Frenatar: Entomology Student Association
- Food Science Club
- Forestry Club
- Forest Products Society/Student Chapter
- Gopher Crops and Soils
- Gopher Dairy Club
- Horticulture Club
- Leaders of Environmental Science Students (LOESS)
- National Agri-Marketing Association (NAMA)
- National Society for Minorities in Agriculture, Natural Resources and Related Sciences (MANRRS)
- Natural and Environmental Defense Squad
- Pre-Vet Med Club
- Recreation Resource Management Club
- Residential Building Science and Technology Club
- Rhetoric's Association of Student Technical Communicators (R.A.S.T.E.C.)
- Sigma Pi Honor Society
- Student Chapter of the Institute of Packaging Professionals (IOPP)
- Student Chapter of the Paper Industry Management Association (PIMA)
- Student Chapter of the Society of American Foresters
- Student Chapter of the Technical Association of the Pulp and Paper Industry (TAPPI)
- Student Organization of Nutrition and Dietetics (SOND)
- Students in Honors
- The Sheep and Goat Club
- Turf Club (Golf Course Superintendent Association, U of M Student Chapter)
- Urban Forestry Club
- Water Resources Students in Action

Directory

CFANS Administration

Dean's Office

At the time this catalog went to print, the University was conducting a national search for a new dean. See the CFANS Web site for updated information.

Associate Dean for Faculty & Academic Affairs

Ann Hill Duin
277 Coffey Hall, 612-624-4212

Associate Dean for Undergraduate Programs

Mel Baughman

Degree Programs and Minors

Agricultural Industries and Marketing B.S.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 108.

Degree: Bachelor of Science.

This major prepares students for careers in agricultural industries. Industries related to modern agriculture include manufacturers and distributors of farm production inputs (such as equipment, structures, health products, seeds, fertilizers, and crop protection products); assemblers, processors, manufacturers, and distributors of products originating from farms (products such as meat, milk, eggs, wool, grains, fruits, vegetables, nursery crops, flowers, and turf); and finance and insurance industries providing agricultural credit. Agribusinesses such as these, as well as state, federal, and marketing agencies, need individuals who have a broad education in the scientific (and technical) aspects of agriculture, effective work and communication skills, and quantitative and qualitative skills to solve business problems.

The scientific knowledge and technical skills necessary to become an effective agribusiness professional are provided through requirements in the basic and agricultural sciences and are strengthened by selection of one of three areas of emphasis: crops and soils industries, food industries, or an individualized emphasis.

With 21 free standing elective credits, all AIM majors are encouraged to pursue a CFANS or other minor. Only 6 credits in the AIM major may also be counted towards a minor. For students interested in preparing for the Certified Crop Advisor (CCA) exam or the certified professional agronomist (CPAg) programs, a minor in agronomy is highly recommended.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

Students must complete at least 14 credits in their sub-plan emphasis plus an internship or a student project. All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses

Quantitative Foundations

MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
or MATH 1131 - Finite Mathematics, MATH (3.0 cr)
or MATH 1142 - Short Calculus, MATH (4.0 cr)
AGRO 4101 - Agricultural Decision Making and Experimentation (3.0 cr)
or ANSC 2211 - Biometrics for Livestock, MATH (3.0 cr)
or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Communication

RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
RHET 3257 - Scientific and Technical Presentations (3.0 cr)
RHET 3266 - Group Process, Team Building, and Leadership, C/PE (3.0 cr)
RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
RHET 4165 - Managerial and Organizational Communication, Planning, and Change (3.0 cr)
or RHET 4258 - Information-Gathering Techniques in Scientific and Technical Communication (3.0 cr)

Business Management

APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
APEC 1251 - Principles of Accounting (3.0 cr)
MKTG 3001 - Principles of Marketing (3.0 cr)
APEC 3411 - Commodity Marketing (3.0 cr)
or APEC 4451W - Food Marketing Economics, C/PE, WI (3.0 cr)
APEC 3451 - Food and Agricultural Sales (3.0 cr)
or MKTG 4030 - Selling and Sales Management (4.0 cr)
APEC 3811 - Principles of Farm Management (3.0 cr)
or APEC 3821 - Retail Center Management (3.0 cr)
or PSTL 1513 - Small Business Fundamentals With E-Business Applications (3.0 cr)
or MGMT 3001 - Fundamentals of Management (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Crops and Soils Industries

Students must complete at least 14 credits in their area of emphasis and an internship or a student project.

Required Courses

Science Foundations

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)
SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)
AGRO 1101 - Biology of Plant Food Systems, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
BIOC 1001 - Elementary Biochemistry (3.0 cr)
or BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)

Agriculture

AGRO 1093 - Directed Studies (1.0-4.0 cr)
AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)
AGRO 1660 - First-Year Colloquium/Experience in Agroecosystems Analysis (2.0 cr)
AGRO 4660 - Senior Capstone: Leadership, Decision Making, and Problem Solving (2.0 cr)
AGRO 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
or AIM 4011 - Student Project/Field Investigation (3.0 cr)

Crops and Soils Industries

CFAN 3001 - Pests and Crop Protection (3.0 cr)
SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)
AGRO 4005 - Applied Crop Physiology and Development (4.0 cr)
or
BIOL 3002 - Plant Biology: Function (2.0 cr)
BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)
and one course from the following:
AGRO 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
or AGRO 4401 - Plant Genetics and Breeding (4.0 cr)
or AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)
or AGRO 4603 - Field Crop Scouting and Problem Diagnosis (3.0 cr)
or AGRO 4605 - Management Strategies for Crop Production (4.0 cr)
or ESPM 3221 - Soil Conservation and Land-Use Management (3.0 cr)

Food Industries

Students must complete at least 14 credits in the area of emphasis and an internship or a student project.

Required Courses

Science Foundations

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
AGRO 1101 - Biology of Plant Food Systems, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Agriculture

FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)
FSCN 1112 - Principles of Nutrition, ENVT (3.0 cr)
FSCN 1021 - Introductory Microbiology, BIOL SCI/L (4.0 cr)
or VBS 2032 - General Microbiology With Laboratory (4.0 cr)
AIM 4011 - Student Project/Field Investigation (3.0 cr)
or FSCN 4096 - Professional Experience Program: Internship (1.0-3.0 cr)

Food Industries

FSCN 3102 - Introduction to Food Science (3.0 cr)
FSCN 3731 - Food Service Operations Management Laboratory (2.0 cr)
FSCN 3732 - Food Service Operations Management (3.0 cr)
FSCN 4131 - Food Quality (3.0 cr)
ANSC 1511 - Food Animal Products for Consumers (3.0 cr)
or FSCN 3612 - Life Cycle Nutrition (3.0 cr)
or FSCN 3615 - Sociocultural Aspects of Food, Nutrition, and Health, CD, SSCI (3.0 cr)
or FSCN 4614 - Community Nutrition, CD (3.0 cr)
or MKTG 3010 - Marketing Research (4.0 cr)

Individualized

At least 14 credits must be selected in consultation with an adviser and with approval of the AIM major committee. The courses comprising the individualized emphasis must have a definite theme. A collection of unrelated courses is unacceptable.

Required Courses

Science Foundations

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)
SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)
AGRO 1101 - Biology of Plant Food Systems, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
BIOC 1001 - Elementary Biochemistry (3.0 cr)
or BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)

Agriculture

AGRO 1093 - Directed Studies (1.0-4.0 cr)
AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)
AGRO 1660 - First-Year Colloquium/Experience in Agroecosystems Analysis (2.0 cr)
AGRO 4660 - Senior Capstone: Leadership, Decision Making, and Problem Solving (2.0 cr)
AGRO 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
or AIM 4011 - Student Project/Field Investigation (3.0 cr)

Individualized Emphasis Electives

14 credits from individual electives

Agricultural and Food Business Management B.S.

Applied Economics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 64.

Degree: Bachelor of Science.

The agricultural and food business management major is offered jointly by CFANS and the Carlson School of Management. The curriculum emphasizes concepts and methods from economics and business management and their use in identifying, analyzing, and solving management problems related to food, agriculture, natural resources, and economic development. The program provides a balance between applied economics and business management studies, with a limited amount of applied science. Students may elect a variety of courses in their junior and senior years to accommodate special interests and career goals.

Graduates of the curriculum are prepared for a wide range of employment opportunities in the food system and other agribusinesses. Examples of employment areas include finance and banking, management, input, commodity and food marketing, sales, administration, public and industrial relations, production management, economic and statistical analysis, managerial accounting, management information systems, and transportation.

Students completing the program may also pursue graduate studies in preparation for research, teaching, or continuing education positions in academic institutions, government agencies, or industry.

Admission Requirements

Students must complete 60 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.80 for students already admitted to the degree-granting college.
- 2.80 for students transferring from another University of Minnesota college.
- 2.80 for students transferring from outside the University.

Students are admitted to the major after satisfactory completion of a pre-agricultural and food business management program. Admission standards are developed in conjunction with the Carlson School of Management. Application deadlines are April 15 for fall semester and October 15 for spring semester.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Management

Complete the following management “tool” courses on an A-F grading basis before entering the program. Students must earn a GPA of at least 2.50 in the “tool” courses.

Students contemplating graduate work in applied economics are encouraged to take both MATH 1271 and MATH 1272.

APEC 1101 and APEC 1102 are recommended courses.

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
 APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
 or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
 or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
 MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)

General Requirements

Recommended freshman writing course(s) for this program:
 RHET 1101

Program Requirements

All required courses must be taken A-F, and students must earn a grade of at least a C-. Students may not major in both agricultural and food business management and applied economics.

Required Courses

Communication

RHET 1152W - Writing on Issues of Science and Technology, C/PE, WI (4.0 cr)
 or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
 COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
 BA 3033W - Business Communication, WI (3.0 cr)
 or COMM 3441 - Introduction to Organizational Communication (3.0 cr)
 or RHET 3257 - Scientific and Technical Presentations (3.0 cr)

Professional Courses

APEC 1001 - Orientation to Applied Economics (1.0 cr)
 APEC 3001 - Applied Microeconomics: Consumers, Producers, and Markets, SSCI (4.0 cr)
 APEC 3002 - Applied Microeconomics: Managerial Economics (4.0 cr)
 APEC 3006 - Applied Macroeconomics: Government and the Economy (3.0 cr)
 APEC 3007 - Applied Macroeconomics: Policy, Trade, and Development, IP (3.0 cr)
 APEC 3501 - Agribusiness Finance (3.0 cr)
 APEC 4821W - Agribusiness Management, WI (3.0 cr)
 ACCT 3001 - Introduction to Management Accounting (3.0 cr)
 MGMT 3001 - Fundamentals of Management (3.0 cr)
 MKTG 3001 - Principles of Marketing (3.0 cr)
 OMS 3001 - Operations Management (3.0 cr)

Ethics and Responsible Management

Student must take one course (3 credits) that fosters one or more of the following objectives: responsible judgment about the management of natural resources and the environment; responsible judgment regarding ethical and policy issues related to agriculture; application of global perspectives to agricultural, food, and environmental issues and decisions; application of a historical perspective to the role of science and technology.

CFAN 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)
 or AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)
 or AGRO 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
 or ANSC 1011 - Domestic Animals and Society, C/PE, ENVT (3.0 cr)
 or BAE 5212 - Safety and Environmental Health Issues in Plant and Animal Production and Processing, C/PE, ENVT, H (3.0 cr)
 or BIOL 4501 - Social Uses of Biology, C/PE (3.0 cr)
 or EE 1701W - Energy, Environment, and Society, C/PE, ENVT, WI (3.0 cr)
 or EEB 3001 - Ecology and Society, ENVT (3.0 cr)
 or ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)
 or ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)
 or ESPM 1011 - Issues in the Environment, C/PE, ENVT (3.0 cr)
 or ESPM 1051 - Introduction to Environmental Science, ENVT (3.0 cr)
 or FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)
 or GEO 3005 - Earth Resources, C/PE, IP (3.0 cr)
 or GEOG 3401 - Geography of Environmental Systems and Global Change, WI (4.0 cr)
 or HSCI 3211 - Biology and Culture in the 19th and 20th Centuries, HP (3.0 cr)
 or HSCI 3331 - Technology and American Culture, HP (3.0 cr)
 or PBIO 1212 - Plants and Society, ENVT (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Business Management

Students must take a minimum of two courses (6-8 credits) in APEC or ECON and a minimum of two courses (6-8 credits) from CSOM or DHA 3242 or 3245 only.

Required Courses

Business Management

Take 2 or more course(s) from the following:

APEC 3451 - Food and Agricultural Sales (3.0 cr)
 APEC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 APEC 4481 - Futures and Options Markets (3.0 cr)
 APEC 5711 - U.S. Agricultural and Environmental Policy (3.0 cr)
 APEC 5811 - Cooperative Organization (3.0 cr)

Take 2 or more course(s) from the following:

ACCT 3201 - Intermediate Management Accounting (2.0 cr)
 ACCT 5100 - Corporate Financial Reporting (4.0 cr)
 BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
 DHA 3245 - Multichannel Retailing (3.0 cr)
 DHA 3242 - Retail Buying (3.0 cr)
 FINA 4241 - Corporate Financing Decisions (4.0 cr)
 FINA 4242 - Corporate Investment Decisions (4.0 cr)
 HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
 HRIR 3032 - Training and Development (2.0 cr)
 HRIR 3042 - The Individual and Organizational Performance (2.0 cr)
 MGMT 3010 - Introduction to Entrepreneurship (4.0 cr)
 MGMT 4002 - Managerial Psychology (4.0 cr)
 MGMT 4008 - Entrepreneurial Management (4.0 cr)

Financial Management

Students must take a minimum of two courses (6-8 credits) in APEC or ECON and a minimum of two courses (6-8 credits) from CSOM or DHA 3242, 3245 only.

Required Courses

Financial Management

Take 2 or more course(s) from the following:

APEC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 APEC 4481 - Futures and Options Markets (3.0 cr)
 APEC 4501 - Financial Applications (3.0 cr)
 APEC 5341 - Public Finance (3.0 cr)
 APEC 5751 - Global Trade and Policy, IP (3.0 cr)
 ECON 3701 - Money and Banking (3.0 cr)
 ECON 4432W - International Finance, IP, WI (3.0 cr)
 ECON 4721H - Honors Course: Money and Banking, H (4.0 cr)
 ECON 4751 - Financial Economics (3.0 cr)

Take 2 or more course(s) from the following:

ACCT 5101 - Intermediate Accounting I (4.0 cr)
 ACCT 5125 - Auditing Principles and Procedures (4.0 cr)
 ACCT 5160 - Financial Statement Analysis (2.0 cr)
 BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
 DHA 3242 - Retail Buying (3.0 cr)
 DHA 3245 - Multichannel Retailing (3.0 cr)
 FINA 4121 - Financial Markets and Interest Rates (2.0 cr)
 FINA 4122 - Banking Institutions (2.0 cr)
 FINA 4241 - Corporate Financing Decisions (4.0 cr)
 FINA 4242 - Corporate Investment Decisions (4.0 cr)
 FINA 4321 - Portfolio Management and Performance Evaluation (2.0 cr)
 FINA 4322 - Security Analysis (2.0 cr)
 FINA 4641 - International Finance and Risk Management (4.0 cr)
 INS 4100 - Corporate Risk Management (2.0 cr)

Individualized

Students preparing for career opportunities that emphasize skills such as accounting, communications, law, or information systems may use this alternative to design an area of emphasis. A program of study under the emphasis must be approved by the adviser and the major coordinator. At least 6 of the 12 credits must be completed after receiving approval.

Required Courses

Individualized Area

Select 12 credits from individual electives.

Marketing, Sales, & Food Industry Management

Students must take a minimum of two courses (6-8 cr) in APEC or ECON and a minimum of two courses (6-8 cr) from CSOM or DHA 3242, 3245 only.

Required Courses

Marketing, Sales and Food Industry Management

Take 2 or more course(s) from the following:

APEC 3411 - Commodity Marketing (3.0 cr)
 APEC 3451 - Food and Agricultural Sales (3.0 cr)
 APEC 3821 - Retail Center Management (3.0 cr)
 APEC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 APEC 4103 - World Food Problems, C/PE, IP (3.0 cr)
 APEC 4451W - Food Marketing Economics, C/PE, WI (3.0 cr)
 APEC 4481 - Futures and Options Markets (3.0 cr)
 APEC 5711 - U.S. Agricultural and Environmental Policy (3.0 cr)
 APEC 5751 - Global Trade and Policy, IP (3.0 cr)

Take 2 or more course(s) from the following:

DHA 3242 - Retail Buying (3.0 cr)
 DHA 3245 - Multichannel Retailing (3.0 cr)
 MKTG 3010 - Marketing Research (4.0 cr)
 MKTG 4020 - Advanced Logistics and Supply Chain Management (2.0 cr)
 MKTG 4030 - Selling and Sales Management (4.0 cr)
 MKTG 4040 - Buyer Behavior (4.0 cr)
 MKTG 4050 - Integrated Marketing Communications (4.0 cr)
 MKTG 4060 - Marketing and Distribution Channels (4.0 cr)
 MKTG 4070 - International Marketing (2.0 cr)
 MKTG 4080 - Marketing Strategy (4.0 cr)
 OMS 3056 - Operations Planning and Control (4.0 cr)

Agronomy Minor

Agronomy and Plant Genetics

Requirements for this program are current for Fall 2006.

Required credits in this minor: 17.

This minor provides strong science-based courses emphasizing crop management in the context of sustainable ecosystems. It is well suited for students majoring in agriculture, food and environmental education; animal science; business and economics; environmental science, or for students seeking knowledge and principles of crop production. The minor allows students to complete coursework providing the minimal background needed to prepare for the Certified Crop Advisor (CCA) exams. Students must complete a minimum of 17 credits.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

CFAN 3001 - Pests and Crop Protection (3.0 cr)
 AGRO 4005 - Applied Crop Physiology and Development (4.0 cr)
 AGRO 4660 - Senior Capstone: Leadership, Decision Making, and Problem Solving (2.0 cr)
 SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)

Electives

Take 5 or more credit(s) from the following:

AGRO 2104 - Grain and Seed Technology (2.0 cr)
 AGRO 2501 - Plant Identification for Urban and Rural Landscapes (2.0 cr)
 AGRO 4093 - Directed Studies for Advanced Students (1.0-4.0 cr)
 AGRO 4401 - Plant Genetics and Breeding (4.0 cr)
 AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)
 AGRO 4603 - Field Crop Scouting and Problem Diagnosis (3.0 cr)
 AGRO 4605 - Management Strategies for Crop Production (4.0 cr)

Animal Science B.S.

Animal Science

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 93 to 103.

This program requires summer terms.

Degree: Bachelor of Science.

The animal science major prepares students for veterinary school, work as managers and technical advisers for animal production systems, various careers in animal industries or biotechnology, or graduate study in animal related specializations. Areas of emphasis include industry, production, or science/pre-vet. In addition, depending on the area of emphasis, students may select from the following areas of study: biotechnology, dairy, beef, sheep, swine, equine, companion animal, or poultry.

Animal Science/Doctor of Veterinary Medicine Joint Degree:

The animal science/doctor of veterinary medicine joint degree is a cooperative program between CFANS and the College of Veterinary Medicine (CVM). Students who are accepted into CVM and successfully complete one year (two semesters) of the veterinary medicine curriculum can earn the B.S. degree from CFANS. This program is available to students who satisfy the CFANS residency requirements and complete the CFANS portion in three academic years.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program:
RHET 1101

Program Requirements

All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses

Foundation Courses

One semester of calculus is required for Biotechnology Option in the Science/Pre-Veterinary sub-plan.

APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
or MATH 1142 - Short Calculus, MATH (4.0 cr)
or MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)

Professional Courses

ANSC 1001 - Orientation to Animal Science (1.0 cr)
ANSC 1101 - Introductory Animal Science (4.0 cr)
ANSC 2211 - Biometrics for Livestock, MATH (3.0 cr)
ANSC 2401 - Animal Nutrition (3.0 cr)
ANSC 3221 - Animal Breeding (4.0 cr)
ANSC 3301 - Systemic Physiology (4.0 cr)

Take 6 or more credit(s) from the following:

CFAN 4009W - Undergraduate Senior Thesis: Science in Agriculture, WI (1.0-6.0 cr)

Take 3 or more credit(s) from the following:

ANSC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Animal Industry

Required Courses

Animal Industry Courses

APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
APEC 1251 - Principles of Accounting (3.0 cr)
BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)
CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)
RHET 3266 - Group Process, Team Building, and Leadership, C/PE (3.0 cr)
RHET 1152W - Writing on Issues of Science and Technology, C/PE, WI (4.0 cr)
or RHET 3257 - Scientific and Technical Presentations (3.0 cr)

Take 3 or more course(s) from the following:

APEC 3001 - Applied Microeconomics: Consumers, Producers, and Markets, SSCI (4.0 cr)
APEC 3002 - Applied Microeconomics: Managerial Economics (4.0 cr)
APEC 3411 - Commodity Marketing (3.0 cr)
APEC 3811 - Principles of Farm Management (3.0 cr)
APEC 3821 - Retail Center Management (3.0 cr)
APEC 4451W - Food Marketing Economics, C/PE, WI (3.0 cr)
APEC 4821W - Agribusiness Management, WI (5.0 cr)

Take one course from the following:

APEC 3451 - Food and Agricultural Sales (3.0 cr)
APEC 3501 - Agribusiness Finance (3.0 cr)
BIE 3061 - Professional Sales Management (3.0 cr)
JOUR 3201 - Principles of Strategic Communication: Advertising (3.0 cr)

Animal Science Electives

Courses in this list cannot be used to fulfill requirements in other areas.

Take 12 or more credit(s) from the following:

CFAN 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)
AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)
ANSC 1007 - Horse in Your Backyard (2.0 cr)
ANSC 1011 - Domestic Animals and Society, C/PE, ENVT (3.0 cr)
ANSC 1021 - Avian Sampler (1.0 cr)
ANSC 1403 - Companion Animal Nutrition and Care (3.0 cr)
ANSC 1511 - Food Animal Products for Consumers (3.0 cr)
ANSC 2012 - Livestock and Carcass Evaluation (3.0 cr)
ANSC 2013 - Beginning Livestock Judging (2.0 cr)
ANSC 3007 - Equine Nutrition (3.0 cr)
ANSC 3052 - Equine Anatomy and Exercise Physiology (4.0 cr)
ANSC 3142 - Advanced Livestock Judging (2.0 cr)
ANSC 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
ANSC 3305 - Reproductive Biology in Health and Disease (4.0 cr)
ANSC 3501 - Farm Animal Environment (3.0 cr)
ANSC 3509 - Animal Biotechnology (3.0 cr)
ANSC 3511 - Animal Growth and Development (3.0 cr)
ANSC 3609 - Animal Production Systems (2.0 cr)
ANSC 4011 - Dairy Cattle Breeding (3.0 cr)
ANSC 4401 - Swine Nutrition (3.0 cr)
ANSC 4403 - Ruminant Nutrition (3.0 cr)
ANSC 4404 - Applied Dairy Nutrition (2.0 cr)
ANSC 4611 - Advanced Pork Production Systems Management (2.0 cr)
ANSC 4613 - Advanced Beef Production Systems Management (2.0 cr)
ANSC 4614 - Advanced Dairy Production Systems Management (2.0 cr)
ENT 4281 - Veterinary Entomology (3.0 cr)
FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)
SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)
VCS 4600 - Small Animal and Equine Behavior (3.0 cr)

VPM 3502 - Animal Health & Disease (3.0 cr)
VPM 3700 - Equine Reproduction and Breeding Management (2.0 cr)

Animal Management

Take one course from the following:

ANSC 4102 - Equine Management (3.0 cr)
ANSC 4601 - Pork Production Systems Management (4.0 cr)
ANSC 4602 - Sheep Production Systems Management (4.0 cr)
ANSC 4603 - Beef Production Systems Management (4.0 cr)
ANSC 4604 - Dairy Production Systems Management (4.0 cr)
ANSC 4605 - Poultry Production Systems Management (4.0 cr)
VCS 4606 - Small Animal Management (3.0 cr)

Animal Production

Students take courses in their selected emphasis area: industry, production, or science/pre-veterinary medicine. In addition, students may select from the following areas of study: dairy, beef, sheep, swine, equine, companion animal, or poultry.

Required Courses

Production

ANSC 1511 - Food Animal Products for Consumers (3.0 cr)
ANSC 4609 - Animal Production Systems (2.0 cr)
BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)
CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)

Animal Science Electives

AGRO 1103 is required for dairy, beef, swine, sheep, and poultry options. Courses in this list cannot be used to fulfill requirements in other areas.

Take 22 or more credit(s) from the following:

AFEE 2051 - Current Technical Competencies (3.0 cr)
CFAN 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)
AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)
ANSC 1007 - Horse in Your Backyard (2.0 cr)
ANSC 1011 - Domestic Animals and Society, C/PE, ENVT (3.0 cr)
ANSC 1021 - Avian Sampler (1.0 cr)
ANSC 1403 - Companion Animal Nutrition and Care (3.0 cr)
ANSC 1511 - Food Animal Products for Consumers (3.0 cr)
ANSC 2012 - Livestock and Carcass Evaluation (3.0 cr)
ANSC 2013 - Beginning Livestock Judging (2.0 cr)
APEC 1251 - Principles of Accounting (3.0 cr)
SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)
VBS 2032 - General Microbiology With Laboratory (4.0 cr)
ANSC 3007 - Equine Nutrition (3.0 cr)
ANSC 3052 - Equine Anatomy and Exercise Physiology (4.0 cr)
ANSC 3142 - Advanced Livestock Judging (2.0 cr)
ANSC 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
ANSC 3305 - Reproductive Biology in Health and Disease (4.0 cr)
ANSC 3501 - Farm Animal Environment (3.0 cr)
ANSC 3509 - Animal Biotechnology (3.0 cr)
ANSC 3511 - Animal Growth and Development (3.0 cr)
ANSC 3609 - Animal Production Systems (2.0 cr)
ANSC 4011 - Dairy Cattle Breeding (3.0 cr)
ANSC 4102 - Equine Management (3.0 cr)
ANSC 4401 - Swine Nutrition (3.0 cr)
ANSC 4403 - Ruminant Nutrition (3.0 cr)
ANSC 4404 - Applied Dairy Nutrition (2.0 cr)
ANSC 4601 - Pork Production Systems Management (4.0 cr)
ANSC 4602 - Sheep Production Systems Management (4.0 cr)
ANSC 4603 - Beef Production Systems Management (4.0 cr)
ANSC 4604 - Dairy Production Systems Management (4.0 cr)
ANSC 4605 - Poultry Production Systems Management (4.0 cr)
ANSC 4611 - Advanced Pork Production Systems Management (2.0 cr)
ANSC 4613 - Advanced Beef Production Systems Management (2.0 cr)

ANSC 4614 - Advanced Dairy Production Systems Management (2.0 cr)
APEC 3411 - Commodity Marketing (3.0 cr)
APEC 3451 - Food and Agricultural Sales (3.0 cr)
APEC 3811 - Principles of Farm Management (3.0 cr)
ENT 4281 - Veterinary Entomology (3.0 cr)
VCS 4600 - Small Animal and Equine Behavior (3.0 cr)
VCS 4606 - Small Animal Management (3.0 cr)
VPM 3502 - Animal Health & Disease (3.0 cr)
VPM 3700 - Equine Reproduction and Breeding Management (2.0 cr)

Animal Production Focus

Students are required to complete one of the following course groups.

Dairy

ANSC 4011 - Dairy Cattle Breeding (3.0 cr)
ANSC 4403 - Ruminant Nutrition (3.0 cr)
ANSC 4604 - Dairy Production Systems Management (4.0 cr)
ANSC 4614 - Advanced Dairy Production Systems Management (2.0 cr)

-OR-

Beef

ANSC 2012 - Livestock and Carcass Evaluation (3.0 cr)
ANSC 4403 - Ruminant Nutrition (3.0 cr)
ANSC 4603 - Beef Production Systems Management (4.0 cr)
ANSC 4613 - Advanced Beef Production Systems Management (2.0 cr)

-OR-

Sheep

ANSC 2012 - Livestock and Carcass Evaluation (3.0 cr)
ANSC 4403 - Ruminant Nutrition (3.0 cr)
ANSC 4602 - Sheep Production Systems Management (4.0 cr)

-OR-

Swine

ANSC 2012 - Livestock and Carcass Evaluation (3.0 cr)
ANSC 4401 - Swine Nutrition (3.0 cr)
ANSC 4601 - Pork Production Systems Management (4.0 cr)
ANSC 4611 - Advanced Pork Production Systems Management (2.0 cr)

-OR-

Equine

Take 11 or more credit(s) from the following:

ANSC 2055 - Horse Health Management (2.0 cr)
ANSC 3007 - Equine Nutrition (3.0 cr)
ANSC 3052 - Equine Anatomy and Exercise Physiology (4.0 cr)
ANSC 4102 - Equine Management (3.0 cr)
VPM 3700 - Equine Reproduction and Breeding Management (2.0 cr)

-OR-

Companion Animal

ANSC 1403 - Companion Animal Nutrition and Care (3.0 cr)
VCS 4600 - Small Animal and Equine Behavior (3.0 cr)
VCS 4606 - Small Animal Management (3.0 cr)
3 credits to be determined in consultation with an adviser

-OR-

Poultry

The three poultry courses must be taken from the Midwest Poultry Consortium (MPC) Summer Program at Madison, Wisconsin. Courses cannot count for requirements in this section and professional courses.

ANSC 4605 - Poultry Production Systems Management (4.0 cr)
Three MPC summer courses

-OR-

Individualized Option

Students select 12 credits in consultation with an adviser and with the approval of the Animal Production Systems Committee.

Science/Pre-Vet

Students in the Science/Pre-Veterinary emphasis must select either the Basic Science or Biotechnology Option.

Required Courses

Core Courses

BIOL 4003 is required for the Biotechnology Option.

BIOC 3021 - Biochemistry (3.0 cr)
CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
CHEM 2301 - Organic Chemistry I (3.0 cr)
CHEM 2311 - Organic Lab (4.0 cr)
VBS 2032 - General Microbiology With Laboratory (4.0 cr)
BIOL 4003 - Genetics (3.0 cr)
or GCD 3022 - Genetics (3.0 cr)

Take one of the follow pairs of courses:

PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)
PHYS 1102W - Introductory College Physics II, PHYS SCI/L, WI (4.0 cr)
or
PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)
PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)

Science/Pre-Veterinary Options

Students are required to complete one of the following course groups.

Basic Science Option

Any animal science course not used to fulfill another requirement may also be used as a basic science elective.

Take 12 or more credit(s) from the following:

CFAN 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)
ANSC 1011 - Domestic Animals and Society, C/PE, ENVT (3.0 cr)
ANSC 1403 - Companion Animal Nutrition and Care (3.0 cr)
ANSC 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
ANSC 3305 - Reproductive Biology in Health and Disease (4.0 cr)
ANSC 3509 - Animal Biotechnology (3.0 cr)
ANSC 3511 - Animal Growth and Development (3.0 cr)
ANSC 4011 - Dairy Cattle Breeding (3.0 cr)
ANSC 4401 - Swine Nutrition (3.0 cr)
ANSC 4403 - Ruminant Nutrition (3.0 cr)
ENT 4281 - Veterinary Entomology (3.0 cr)
VPM 3502 - Animal Health & Disease (3.0 cr)

Take one course from the following:

ANSC 4102 - Equine Management (3.0 cr)
ANSC 4601 - Pork Production Systems Management (4.0 cr)
ANSC 4602 - Sheep Production Systems Management (4.0 cr)
ANSC 4603 - Beef Production Systems Management (4.0 cr)
ANSC 4604 - Dairy Production Systems Management (4.0 cr)
ANSC 4605 - Poultry Production Systems Management (4.0 cr)
VCS 4606 - Small Animal Management (3.0 cr)

-OR-

Biotechnology Option

CFAN 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)
ANSC 3509 - Animal Biotechnology (3.0 cr)
BIOL 4003 - Genetics (3.0 cr)

Select at least 2 credits of a laboratory.

Take 11 or more credit(s) from the following:

ANSC 3511 - Animal Growth and Development (3.0 cr)
ANSC 3305 - Reproductive Biology in Health and Disease (4.0 cr)
BIOC 4025 - Laboratory in Biochemistry (2.0 cr)
BIOC 4125 - Laboratory in Molecular Biology and Biotechnology (3.0 cr)
BIOC 5001 - Biochemistry, Molecular and Cellular Biology (5.0 cr)
BIOL 4004 - Cell Biology (3.0 cr)
GCD 4015 - Genetics Laboratory (2.0 cr)
GCD 4025 - Cell Biology Laboratory (2.0 cr)
GCD 4034 - Molecular Genetics (3.0 cr)
GCD 4143 - Human Genetics (3.0 cr)
GCD 4151 - Molecular Biology of Cancer (3.0 cr)
GCD 4161 - Developmental Biology (3.0 cr)
GCD 5036 - Molecular Cell Biology (3.0 cr)
MICB 3301 - Biology of Microorganisms (5.0 cr)
MICB 4131 - Immunology (3.0 cr)
MICB 4141W - Biology, Genetics, and Pathogenesis of Viruses: Writing Intensive, WI (4.0 cr)
MICB 4151 - Molecular and Genetic Bases for Microbial Diseases (3.0 cr)
MICB 4235 - Advanced Laboratory: Virology, Immunology, and Microbial Genetics (3.0 cr)

Animal Science Minor

Animal Science

Requirements for this program are current for Fall 2006.

Required credits in this minor: 20.

The minor is for students who want to include animal science coursework to enhance or supplement their major program. Students have flexibility in choosing courses to meet the requirements. To complete the minor, students must complete at least 20 credits with an ANSC designator.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

To complete the minor, students must complete at least 20 credits with an ANSC designator.

Required Courses

Minor Courses

At least 10 credits must be 3xxx or higher.

Take no more than 10 credit(s) from the following:

ANSC 1xxx
ANSC 2xxx

Take 10 or more credit(s) from the following:

ANSC 3xxx
ANSC 4xxx
ANSC 5xxx

Applied Economics B.S.

Applied Economics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 52.

Degree: Bachelor of Science.

The applied economics major prepares students for careers in private industry, government agencies, agribusiness, or graduate work. Students may choose one of six professional application clusters: management and finance; marketing; food retailing; trade and development; resources and environment; or regional and public economics. Students may also, in consultation with their adviser, develop an individualized application cluster.

The curriculum emphasizes fundamental written and oral communication skills and a strong foundation in mathematics, economic principles and their applications. Areas of employment for graduates include management, finance, marketing and international trade, domestic and international development, environmental impact assessment, resource management and use, and government-related work in planning, taxation, and development. Entry-level jobs are often in merchandising and sales, credit analysis, management, and other customer contact areas.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

Every student's program is capped off with 12 credits of advanced-level coursework, called a professional application cluster. All required courses must be taken A-F, and students must earn a grade of at least a C-. Students may not major in both applied economics and agricultural and food business management.

Required Courses

Foundation Courses

Students considering graduate study in applied economics are encouraged to take MATH 1271 and MATH 1272

MATH 1142 - Short Calculus, MATH (4.0 cr)
or MATH 1271 - Calculus I, MATH (4.0 cr)

Writing Performance

RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
COMM 1313W - Analysis of Argument, WI (3.0 cr)
or ENPSTL 1021W - Intermediate Expository Writing, WI (4.0 cr)
or RHET 1152W - Writing on Issues of Science and Technology, C/PE, WI (4.0 cr)
or RHET 3221W - Theories of Human Communication, C/PE, SSCI, WI (4.0 cr)

Speech Performance

COMM 1101 - Introduction to Public Speaking (3.0 cr)
or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
COMM 3441 - Introduction to Organizational Communication (3.0 cr)

or RHET 3257 - Scientific and Technical Presentations (3.0 cr)
COMM 3411 - Introduction to Small Group Communication (3.0 cr)
or RHET 3266 - Group Process, Team Building, and Leadership, C/PE (3.0 cr)

Additional Social Science

Students majoring in applied economics must complete 3 credits in social sciences beyond the 6 credits required for liberal education. The 3 credits may not be in courses with the APEC or ECON designator.

Professional Courses

APEC 1001 - Orientation to Applied Economics (1.0 cr)
APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
APEC 3001 - Applied Microeconomics: Consumers, Producers, and Markets, SSCI (4.0 cr)
APEC 3002 - Applied Microeconomics: Managerial Economics (4.0 cr)
APEC 3006 - Applied Macroeconomics: Government and the Economy (3.0 cr)
APEC 3007 - Applied Macroeconomics: Policy, Trade, and Development, IP (3.0 cr)
ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
or APEC 1251 - Principles of Accounting (3.0 cr)
OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Ethics and Responsible Management

Student must take one course (3 credits) from the list below that fosters one or more of the following objectives: responsible judgment about the management of natural resources and the environment; responsible judgment regarding ethical and policy issues related to agriculture; application of global perspectives to agricultural, food, and environmental issues and decisions; application of a historical perspective to the role of science and technology.

Take 1 or more course(s) from the following:

CFAN 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)
AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)
AGRO 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
ANSC 1011 - Domestic Animals and Society, C/PE, ENVT (3.0 cr)
BAE 5212 - Safety and Environmental Health Issues in Plant and Animal Production and Processing, C/PE, ENVT, H (3.0 cr)
BIOL 4501 - Social Uses of Biology, C/PE (3.0 cr)
EE 1701W - Energy, Environment, and Society, C/PE, ENVT, WI (3.0 cr)
EEB 3001 - Ecology and Society, ENVT (3.0 cr)
ESPM 1011 - Issues in the Environment, C/PE, ENVT (3.0 cr)
ESPM 1051 - Introduction to Environmental Science, ENVT (3.0 cr)
ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)
ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)
FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)
GEO 3005 - Earth Resources, C/PE, IP (3.0 cr)
GEOG 3401 - Geography of Environmental Systems and Global Change, WI (4.0 cr)
HSCI 3211 - Biology and Culture in the 19th and 20th Centuries, HP (3.0 cr)
HSCI 3331 - Technology and American Culture, HP (3.0 cr)
PBIO 1212 - Plants and Society, ENVT (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Food Retailing

Students take at least two upper division APEC courses (excluding 3991, 4096, 5891, 5991), plus two additional courses from APEC, ECON, Carlson School of Management, or other courses listed below for a total of 12 credits minimum. While students are encouraged to complete credits in one of the following areas, students may select courses across the categories in consultation with their adviser.

Required Courses

Food Retailing Core Courses

Take 12 or more credit(s) from the following:

Take 2 or more course(s) from the following:

APEC 3451 - Food and Agricultural Sales (3.0 cr)
 APEC 3821 - Retail Center Management (3.0 cr)
 APEC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 APEC 4451W - Food Marketing Economics, C/PE, WI (3.0 cr)
 APEC 4481 - Futures and Options Markets (3.0 cr)

Take 2 or more course(s) from the following:

AIM 4011 - Student Project/Field Investigation (3.0 cr)
 DHA 3242 - Retail Buying (3.0 cr)
 DHA 3245 - Multichannel Retailing (3.0 cr)
 HRIR 3032 - Training and Development (2.0 cr)
 HRIR 3042 - The Individual and Organizational Performance (2.0 cr)
 MKTG 4020 - Advanced Logistics and Supply Chain Management (2.0 cr)
 MKTG 4040 - Buyer Behavior (4.0 cr)
 MKTG 4060 - Marketing and Distribution Channels (4.0 cr)
 MKTG 4080 - Marketing Strategy (4.0 cr)
 OMS 3001 - Introduction to Operations Management (3.0 cr)
 OMS 3056 - Operations Planning and Control (4.0 cr)

Individualized Professional

Students develop a program in consultation with an adviser. Students must take at least 12 credits.

Required Courses

Individualized Professional Application Courses

Courses listed here are suggestions. All courses must be chosen in consultation with an adviser.

Take 12 or more credit(s) from the following:

APEC 1xxx
 APEC 2xxx
 APEC 3xxx
 APEC 4xxx
 HRIR 1xxx
 HRIR 2xxx
 HRIR 3xxx
 HRIR 4xxx
 MGMT 1xxx
 MGMT 2xxx
 MGMT 3xxx
 MGMT 4xxx
 MKTG 1xxx
 MKTG 2xxx
 MKTG 3xxx
 MKTG 4xxx

Management and Finance

Students must take at least two upper division APEC courses (excluding 3991, 4096, 5891, 5991) plus two additional courses from APEC, ECON, Carlson School of Management, or other courses listed below, for a total of at least 12 credits. While students are encouraged to complete credits in one of the following areas, students may select courses across the categories in consultation with their adviser.

Required Courses

Management and Finance Core Courses

Take 12 or more credit(s) from the following:

Take 2 or more course(s) from the following:

APEC 3501 - Agribusiness Finance (3.0 cr)
 APEC 3811 - Principles of Farm Management (3.0 cr)
 APEC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 APEC 4481 - Futures and Options Markets (3.0 cr)
 APEC 4501 - Financial Applications (3.0 cr)
 APEC 4821W - Agribusiness Management, WI (3.0 cr)
 APEC 5811 - Cooperative Organization (3.0 cr)

Take 2 or more course(s) from the following:

ACCT 3001 - Introduction to Management Accounting (3.0 cr)
 ACCT 5100 - Corporate Financial Reporting (4.0 cr)
 ACCT 5160 - Financial Statement Analysis (2.0 cr)
 ECON 3701 - Money and Banking (3.0 cr)
 or ECON 4721 - Money and Banking (3.0 cr)
 ECON 4751 - Financial Economics (3.0 cr)
 FINA 4241 - Corporate Financing Decisions (4.0 cr)
 FINA 4242 - Corporate Investment Decisions (4.0 cr)
 HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
 MGMT 3001 - Fundamentals of Management (3.0 cr)

Marketing

Students must take at least two upper division APEC courses (excluding 3991, 4096, 5891, 5991) plus two additional courses from APEC, ECON, Carlson School of Management, or other courses listed below, for a total of at least 12 credits. While students are encouraged to complete credits in one of the following areas, students may select courses across the categories in consultation with their adviser.

Required Courses

Marketing Core Courses

Take 12 or more credit(s) from the following:

Take 2 or more course(s) from the following:

APEC 3411 - Commodity Marketing (3.0 cr)
 APEC 3451 - Food and Agricultural Sales (3.0 cr)
 APEC 3821 - Retail Center Management (3.0 cr)
 APEC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 APEC 4481 - Futures and Options Markets (3.0 cr)

Take 2 or more course(s) from the following:

AIM 4011 - Student Project/Field Investigation (3.0 cr)
 DHA 3245 - Multichannel Retailing (3.0 cr)
 MKTG 3001 - Principles of Marketing (3.0 cr)
 MKTG 3010 - Marketing Research (4.0 cr)
 MKTG 4030 - Selling and Sales Management (4.0 cr)
 MKTG 4040 - Buyer Behavior (4.0 cr)
 MKTG 4050 - Integrated Marketing Communications (4.0 cr)
 MKTG 4060 - Marketing and Distribution Channels (4.0 cr)
 MKTG 4080 - Marketing Strategy (4.0 cr)

Regional and Public Economics

Students must take at least two upper division APEC courses (excluding 3991, 4096, 5891, 5991) plus two additional courses from APEC, ECON, Carlson School of Management, or other courses listed below, for a total of at least 12 credits. While students are encouraged to complete credits in one of the following areas, students may select courses across the categories in consultation with their adviser.

Required Courses

Regional and Public Economics Electives

Take 12 or more credit(s).

Take 2 or more course(s) from the following:

APEC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 APEC 4311 - Tourism Development: Principles, Processes, Policies (3.0 cr)
 APEC 5321 - Regional Economic Analysis (3.0 cr)
 APEC 5341 - Public Finance (3.0 cr)

Take 2 or more course(s) from the following:

ECON 3041 - Prospective World Economy (3.0 cr)
 ECON 3501 - Labor Economics (3.0 cr)
 ECON 3601 - Industrial Organization and Antitrust Policy (3.0 cr)
 ECON 3801 - Elements of Public Economics (3.0 cr)
 ECON 4307 - Comparative Economic Systems, IP (3.0 cr)
 ECON 4337 - Comparative Economic Systems, IP (3.0 cr)
 ECON 4531 - Labor Economics (3.0 cr)
 ECON 4623 - Housing Markets and Public Policy (3.0 cr)
 ECON 4631 - Industrial Organization and Antitrust Policy (3.0 cr)
 ECON 4831 - Cost-Benefit Analysis, WI (3.0 cr)
 URBS 1001W - Introduction to Urban Studies: The Complexity of Metropolitan Life, C/PE, WI (3.0 cr)

Resources and the Environment

Students must take at least two upper division APEC courses (excluding 3991, 4096, 5891, 5991) plus two additional courses from APEC, ECON, Carlson School of Management, or other courses listed below, for a total of at least 12 credits. While students are encouraged to complete credits in one of the following areas, students may select courses across the categories in consultation with their adviser.

Required Courses

Resources and Environment Electives

Take 12 or more credit(s) from the following:

Take 2 or more course(s) from the following:

APEC 3611 - Environmental and Natural Resource Economics, ENVT (3.0 cr)
 APEC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 APEC 5651 - Economics of Natural Resource and Environmental Policy, ENVT (3.0 cr)
 APEC 5711 - U.S. Agricultural and Environmental Policy (3.0 cr)

Take 2 or more course(s) from the following:

ECON 3611 - Environmental Economics, ENVT (3.0 cr)
 ECON 4611H - Honors Course: Environmental Valuation, H (4.0 cr)
 ECON 4831 - Cost-Benefit Analysis, WI (3.0 cr)
 ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
 ESPM 3211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)
 ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)
 ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)
 GEOG 3331 - Geography of the World Economy, IP, SSCI (3.0 cr)
 URBS 3751 - Understanding the Urban Environment, ENVT (3.0 cr)

Trade and Development

Students must take at least two upper division APEC courses (excluding 3991, 4096, 5891, 5991) plus two additional courses from APEC, ECON, Carlson School of Management, or other courses listed below, for a total of at least 12 credits. While students are encouraged to complete credits in one of the following areas, students may select courses across the categories in consultation with their adviser.

Required Courses

Trade and Development Electives

Take 12 or more credit(s) from the following:

Take 2 or more course(s) from the following:

APEC 3041W - Economic Development of U.S. Agriculture, HP, WI (3.0 cr)
 APEC 3071 - Agriculture and Economic Growth in Developing Countries (3.0 cr)
 APEC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 APEC 4103 - World Food Problems, C/PE, IP (3.0 cr)
 APEC 5711 - U.S. Agricultural and Environmental Policy (3.0 cr)
 APEC 5751 - Global Trade and Policy, IP (3.0 cr)

Take 2 or more course(s) from the following:

ECON 4041 - The Prospective World Economy (3.0 cr)
 ECON 4301 - Economic Development, WI (3.0 cr)
 ECON 4307 - Comparative Economic Systems, IP (3.0 cr)
 ECON 4311 - Economy of Latin America (3.0 cr)
 ECON 4313 - The Russian Economy (3.0 cr)
 ECON 4315 - The Japanese Economy (3.0 cr)
 ECON 4331W - Economic Development, WI (3.0 cr)
 ECON 4337 - Comparative Economic Systems, IP (3.0 cr)
 ECON 4421W - Economic Integration of the Americas, IP, WI (3.0 cr)
 ECON 4432W - International Finance, IP, WI (3.0 cr)

Applied Economics Minor

Applied Economics

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

This minor is for students who want to include a basic core of applied economics coursework to enhance or supplement their major program. Students have flexibility in choosing courses to meet the minor requirements. Students who wish to minor in applied economics should consult with the major coordinator for applied economics to obtain approval before completion of 9 credits in the minor. No more than 6 credits may be counted for both the major and the applied economics minor. Students must complete at least 16 credits for the minor.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
 or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

Take 8 - 10 credit(s) from the following:

APEC 3xxx
 APEC 4xxx
 APEC 5xxx

Applied Plant Science B.S.

Agronomy and Plant Genetics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 73 to 82.

This program requires summer terms.

Degree: Bachelor of Science.

The applied plant science major provides options for a broad course of study in plant sciences, as well as options to concentrate more specifically within an area of individual interest, such as genetics, biotechnology, sustainable agriculture, renewable energy, or healthy foods. It provides a solid science background and integrates knowledge of science, environment, production and industry in preparation for continuing study in graduate school or careers in improvement of the quality and benefits of plants and plant products; industry, government, and universities as research scientists; agencies and organizations concerned with natural resource management; advisory, inspection and certification services; bio-safety and food security; related fields of biology and agricultural education.

Students choose from three areas of emphasis: agroecology, plant improvement, and plant utilization.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

All required courses must be taken A-F, and students must earn a grade of at least a C-.

Students develop a plan of study that fulfills the required science core (43-49 credits) and area electives (12-17 credits). Students enroll in a set of three common courses in their freshman year and a series of three integrative courses in each of the following three years. The last course in the series is the senior capstone course. After fulfilling CLE and major requirements, students should have between 15 and 22 credits available for electives.

Required Courses

Science Foundation Courses

BIOL 1009 is recommended.

BIOL 2022 - General Botany (3.0 cr)

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

AGRO 4005 - Applied Crop Physiology and Development (4.0 cr)

or

BIOL 3002 - Plant Biology: Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

or HORT 3005 - Environmental Effects on Horticultural Crops (2.0 cr)

Major Courses

AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)

AGRO 1660 - First-Year Colloquium/Experience in Agroecosystems Analysis (2.0 cr)

AGRO 4660 - Senior Capstone: Leadership, Decision Making, and Problem Solving (2.0 cr)

AGRO 4093 - Directed Studies for Advanced Students (1.0-4.0 cr)

or AGRO 4096 - Professional Experience Program: Internship (1.0-3.0 cr)

Take 2 or more course(s) from the following:

CFAN 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)

CFAN 3001 - Pests and Crop Protection (3.0 cr)

AGRO 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)

AGRO 4103 - World Food Problems, C/PE, IP (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.)

Honors students are required to complete one sub-plan plus the honors sub-plan.

Agroecology

Required Courses

Agroecology

SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)

or BIOC 3021 - Biochemistry (3.0 cr)

BIOL 3407 - Ecology, ENVT (3.0 cr)

or ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr)

BIOL 4003 - Genetics (3.0 cr)

or GCD 3022 - Genetics (3.0 cr)

MATH 1031 - College Algebra and Probability, MATH (3.0 cr)

or MATH 1142 - Short Calculus, MATH (4.0 cr)

or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Electives

Take 17 or more credit(s) including 4 or more sub-requirement(s) from the following:

Take 1 or more course(s) from the following:

AGRO 2501 - Plant Identification for Urban and Rural Landscapes (2.0 cr)

ENT 5021 - Insect Taxonomy and Phylogeny (4.0 cr)

ENT 5371 - Principles of Systematics (3.0 cr)

PBIO 4321 - Taxonomy of Minnesota Flora (3.0 cr)

Take 1 or more course(s) from the following:

AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)

EEB 5122W - Plant Interactions with Animals and Microbes, WI (3.0 cr)

ENT 3005 - Insect Biology (3.0 cr)

ENT 5211 - Insect Pest Management (3.0 cr)

ENT 5341 - Biological Control of Insects and Weeds (3.0-4.0 cr)

PLPA 5201 - Biology of Plant Diseases (4.0 cr)

PLPA 5204 - Plant Disease Management (3.0 cr)

Take 1 or more course(s) from the following:

AGRO 4605 - Management Strategies for Crop Production (4.0 cr)

ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr)

HORT 4072 - Growing Plants Organically: What It Means To Be Green (3.0 cr)

HORT 5052 - Specialty Greenhouse Crop Production (3.0 cr)

SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)

Take 1 or more course(s) from the following:

AGRO 5321 - Ecology of Agricultural Systems, ENVT (3.0 cr)

ESPM 3221 - Soil Conservation and Land-Use Management (3.0 cr)

ESPM 3612W - Soil and Environmental Biology, WI (3.0 cr)

HORT 5031 - Sustainable Fruit Production Systems (2.0 cr)

HORT 5032 - Sustainable Commercial Vegetable Production Systems (3.0 cr)

HORT 5071 - Restoration and Reclamation Ecology, ENVT (3.0 cr)

PLPA 2001 - Introductory Plant Pathology (3.0 cr)

Plant Improvement

Required Courses

Plant Improvement

MATH 1142 is recommended.

BIOC 3021 - Biochemistry (3.0 cr)
 BIOL 4003 - Genetics (3.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 2301 - Organic Chemistry I (3.0 cr)
 HORT 4401 - Plant Genetics and Breeding (4.0 cr)
 STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
 MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
 or MATH 1142 - Short Calculus, MATH (4.0 cr)

Electives

Take 12 or more credit(s) from the following:

BAE 3013 - Engineering Principles of Molecular and Cellular Processes (3.0 cr)
 BIOC 4025 - Laboratory in Biochemistry (2.0 cr)
 BIOC 4125 - Laboratory in Molecular Biology and Biotechnology (3.0 cr)
 BIOL 2032 - General Microbiology with Laboratory (4.0 cr)
 EEB 3001 - Ecology and Society, ENVT (3.0 cr)
 EEB 5122W - Plant Interactions with Animals and Microbes, WI (3.0 cr)
 HORT 4071W - Applications of Biotechnology to Plant Improvement, C/PE, WI (4.0 cr)
 HORT 5031 - Sustainable Fruit Production Systems (2.0 cr)
 HORT 5032 - Sustainable Commercial Vegetable Production Systems (3.0 cr)
 HORT 5052 - Specialty Greenhouse Crop Production (3.0 cr)
 PBIO 5301 - Plant Genomics (3.0 cr)
 PBIO 5412 - Plant Physiology (3.0 cr)
 PBIO 5514 - Plant Molecular Biology (3.0 cr)
 PLPA 5103 - Plant-Microbe Interactions (3.0 cr)
 PLPA 5300 - Current Topics in Molecular Plant Pathology (1.0 cr)
 SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)
 PBIO 4516W - Plant Cell Biology: Writing Intensive, WI (3.0 cr)
 or PBIO 5516 - Plant Cell Biology (3.0 cr)

Plant Utilization

Required Courses

Plant Utilization

BIOC 3021 - Biochemistry (3.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 2301 - Organic Chemistry I (3.0 cr)
 FSCN 3102 - Introduction to Food Science (3.0 cr)
 FSCN 4111 - Food Chemistry (3.0 cr)
 STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
 MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)

Electives

Take 12 or more credit(s) from the following:

BAE 4744 - Engineering Principles for Biological Scientists (4.0 cr)
 BIOL 3407 - Ecology, ENVT (3.0 cr)
 EEB 3001 - Ecology and Society, ENVT (3.0 cr)
 FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)
 FSCN 1112 - Principles of Nutrition, ENVT (3.0 cr)
 FSCN 3102 - Introduction to Food Science (3.0 cr)
 FSCN 4121 - Food Microbiology and Fermentations (3.0 cr)
 FSCN 4332 - Food Processing Operations (3.0 cr)
 FSCN 4612 - Human Nutrition (3.0 cr)
 FSCN 5411 - Food Biotechnology (2.0 cr)
 FSCN 5441 - Introduction to New Product Development (2.0 cr)
 FSCN 5531 - Grains: Introduction to Cereal Chemistry and Technology (2.0 cr)
 HORT 4401 - Plant Genetics and Breeding (4.0 cr)
 HORT 5031 - Sustainable Fruit Production Systems (2.0 cr)
 HORT 5032 - Sustainable Commercial Vegetable Production Systems (3.0 cr)

HORT 5052 - Specialty Greenhouse Crop Production (3.0 cr)
 PLPA 5201 - Biology of Plant Diseases (4.0 cr)
 PBIO 4516W - Plant Cell Biology: Writing Intensive, WI (3.0 cr)
 or PBIO 5516 - Plant Cell Biology (3.0 cr)

Bio-Based Products B.S.

Bio-Based Products

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120 to 128.

Required credits within the major: 120 to 128.

Degree: Bachelor of Science.

Bio-based products are materials, chemicals, and energy derived from renewable, bio-resources including forestry, agriculture and other biomass. Many of the commercial products and forms of energy that we use today and come from depleting fossil fuels can be derived from renewable, bio-resources. The molecular building blocks and components of biomass can be harnessed to heat our homes, run our cars, light our buildings, and provide industrial and consumer products. These products include fibers and fiber-based products, paper, board, engineered wood, structural panels, wood-based composites, renewable plastics, and bio-derived chemicals and fuels.

This major provides students with a strong foundation in the sustainable use of bio-resources while protecting the environment. The interdisciplinary bio-based products major combines coursework in science, engineering, technology, and business—all related to the manufacturing and end-use applications of materials, products, and energy from renewable resources.

Students choose one of the following three areas of specialization: pre-bio-based products engineering (joint program with the Institute of Technology; see major requirements listed in the Institute of Technology section of this catalog); bio-based products marketing and management; or residential building science and technology. In addition, the department also offers a minor in bio-based products engineering that enables students in any of the basic sciences and engineering majors to gain a better understanding of and appreciation for sustainable use of the renewable resources.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses

Communication Skills

COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

Physical and Biological Sciences

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
 or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)
or PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

Social Sciences

PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
or ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)

Major Courses

BP 1001 - Bio-based Products Orientation (1.0 cr)
BP 1002 - Wood and Fiber Science (3.0 cr)
BP 3001 - Statics, Mechanics, and Structural Design (4.0 cr)
BP 3411 - Introduction to Residential Construction (2.0 cr)
BP 3412 - Introduction to Residential Building Materials Estimating (1.0 cr)
BP 3503 - Marketing of Bio-based Products (4.0 cr)
BP 4302 - Organisms Impacting Bio-based Products (3.0 cr)
BP 4407 - Bio-based Products Manufacturing and Applications I (2.0 cr)
BP 4412W - Bio-based Products Manufacturing and Applications II, WI (3.0 cr)
BP 4504W - Bio-based Products Development and Management, WI (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Bio-Based Products Marketing and Management

The bio-based products marketing and management specialization combines coursework in liberal arts, basic sciences, communications, and business. Students learn about the physical and social aspects of renewable bio-based products and resources, and the combination of marketing and sales courses with technical bio-based products engineering coursework, which prepares them for the growing bio-based products industries.

Required Courses

Mathematical Thinking

MATH 1142 - Short Calculus, MATH (4.0 cr)
STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Physical and Biological Sciences

Take one of the following pairs of courses.
BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)
CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)
or
CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

Macroeconomics

APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

Bio-Based Products

BP 1003 - Wood and Fiber Science Lab (1.0 cr)
BP 4413 - Systems Approach to Residential Construction (3.0 cr)

Bio-Based Marketing and Management

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
ESPM 2041 - Natural Resources Consumption and Sustainability, ENVT, IP (3.0 cr)
FINA 3001 - Finance Fundamentals (3.0 cr)
MGMT 3001 - Fundamentals of Management (3.0 cr)
MKTG 3001 - Principles of Marketing (3.0 cr)

Marketing and Management Focus

Students are required to complete one of the following course groups.

Marketing and Sales

Take 9 or more credit(s) from the following:

ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
JOUR 4261 - Advertising: Media Strategy (3.0 cr)
JOUR 4272 - Interactive Advertising (3.0 cr)
MKTG 3010 - Marketing Research (4.0 cr)
MKTG 4030 - Selling and Sales Management (4.0 cr)

-OR-

Management

Take 9 or more credit(s) from the following:

ACCT 3001 - Introduction to Management Accounting (3.0 cr)
HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
IDSC 3001 - Information Systems for Business Processes and Management (3.0 cr)
IE 4521 - Statistics, Quality, and Reliability (4.0 cr)
IE 5522 - Quality Engineering and Reliability (4.0 cr)
OMS 3001 - Introduction to Operations Management (3.0 cr)
OMS 3056 - Operations Planning and Control (4.0 cr)

Residential Building Science and Technology

The residential building science and technology program is designed to investigate the important relationships between people, their homes, and the environment. From a solid scientific and engineering base, this interdisciplinary program builds critical thinking skills and helps students explore the opportunities that can enhance the performance of houses. The curriculum draws upon a wide range of resources across the University and includes physical science, social science, management, marketing, communications, material sciences, and engineering coursework.

The environment and international perspectives themes are satisfied automatically by completing required courses in the residential building science and technology specialization.

Required Courses

Mathematical Thinking

MATH 1271 - Calculus I, MATH (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)
STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
or STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

Chemistry and Physics

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
PHYS 1102W - Introductory College Physics II, PHYS SCI/L, WI (4.0 cr)
or PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

Residential Building Science and Technology

BP 4413 - Systems Approach to Residential Construction (3.0 cr)
BP 4414 - Advanced Residential Building Science, WI (3.0 cr)
BP 4415 - Advanced Residential Building Science Lab (1.0 cr)
BP 4416 - Building Testing and Diagnostics (2.0 cr)
CE 3402 - Construction Materials (3.0 cr)
CE 4101W - Project Management, WI (3.0 cr)
DHA 2463 - Housing and Community Development, C/PE (3.0 cr)
ESPM 2041 - Natural Resources Consumption and Sustainability, ENVT, IP (3.0 cr)
HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
OMS 3001 - Introduction to Operations Management (3.0 cr)
ARCH 1701 - The Designed Environment (3.0 cr)

or DHA 1101W - Introduction to Design Thinking, OH, WI (4.0 cr)
or LA 1101W - Introduction to Design Thinking, OH, WI (4.0 cr)

Electives

Course selections must be approved by RBST faculty adviser.

Take 12 or more credit(s) from the following:

BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
CMGT 4011 - Construction Documents and Contracts (3.0 cr)
CMGT 4021 - Construction Planning and Scheduling (3.0 cr)
CMGT 4022 - Construction Estimating (3.0 cr)
CMGT 4031 - Construction Safety and Loss Control (3.0 cr)
DHA 2402 - Residential Technology (3.0 cr)
IE 5531 - Engineering Optimization I, H (4.0 cr)
OMS 3059 - Quality Management and Six Sigma (4.0 cr)
APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
ARCH 5351 - AutoCAD I (3.0 cr)

Bio-Based Products Engineering Minor

Bio-Based Products

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

This program provides students with a strong background in the basic sciences and engineering and their application to manufacturing and end-use applications of materials, chemicals, and energy from renewable resources.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

Take 14 or more credit(s) from the following:

BP 4001 - Chemistry of Plant Materials (4.0 cr)
BP 4301 - Surface and Colloid Science in Bio-based Products Manufacturing (3.0 cr)
BP 4302 - Organisms Impacting Bio-based Products (3.0 cr)
BP 4303 - Bio-Based Materials Science (3.0 cr)
BP 4305 - Pulp and Paper Technology (3.0 cr)
BP 4401 - Bio-based Products Engineering (4.0 cr)
BP 4404 - Bio-based Composites Engineering (3.0 cr)
BP 4501 - Process and Product Design I (2.0 cr)
BP 4502W - Process and Product Design II, WI (3.0 cr)

Climatology Minor

Agronomy and Plant Genetics

Requirements for this program are current for Fall 2006.

Required credits in this minor: 20.

The minor lets students broaden their expertise in weather and climate studies. Students who will be working for any industry or agency that depends on understanding weather and climate

change will find the minor useful. Students take courses in meteorology, atmosphere, and biometeorology. Electives are in climate models, climate variations, climate change, and atmospheric boundary layer.

To complete the minor, students must complete at least 20 credits.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses for the Program

Minor Courses

ESPM 1425 - The Atmosphere, ENVT, PHYS SCI/L (4.0 cr)
ESPM 5211 - Environmental Biophysics and Ecology (3.0 cr)

Electives

Take 13 or more credit(s) from the following:

EEB 5008 - Forest Response to Quaternary Climate Change (2.0 cr)
EEB 5009 - Quaternary Vegetation History and Climate (3.0 cr)
GEOG 3401 - Geography of Environmental Systems and Global Change, WI (4.0 cr)
GEOG 5423 - Climate Models and Modeling (3.0 cr)
GEOG 5426 - Climatic Variations (3.0 cr)

Corporate Environmental Management Minor

Bio-Based Products

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

The corporate environmental management (CEM) minor is designed to provide students with an excellent opportunity to gain a broad exposure to the strategic, analytical, and managerial processes associated with the environmental impact of companies' and other organizations' products and processes. Completion of the CEM minor enhances students' preparation for graduate school and for entering a career in the growing corporate functions of environmental management and regulatory compliance.

The CEM minor is available to students in good standing in all majors at the University of Minnesota, Twin Cities.

Admission Requirements

Students must complete 4 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
or ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)
BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

MATH 1142 - Short Calculus, MATH (4.0 cr)
or
Any first semester calculus
OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Program Requirements

Required Courses

Minor Courses

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
ESPM 3603 - Environmental Life Cycle Analysis (3.0 cr)
ESPM 3604 - Environmental Management Systems and Strategy (3.0 cr)
ESPM 5019 - Business, Natural Environment, and Global Economy (2.0 cr)
Take 6 or more credit(s) from the following:
ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)
ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)
ESPM 3602 - Regulatory and Ethical Frameworks for CEM (3.0 cr)
ESPM 3605 - Recycling: Extending Raw Materials (3.0 cr)
ESPM 3606 - Minimizing Industrial Emissions (3.0 cr)
ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)
ESPM 4607 - Industrial Biotechnology and the Environment (2.0 cr)
ESPM 4608 - Bioremediation (2.0 cr)
PLPA 3002 - Air Pollution, People, and Plants: The Science and the Ethics, C/PE, ENVT (3.0 cr)

Designing Documents with New and Emerging Technologies Minor

Rhetoric

Requirements for this program are current for Fall 2006.
Required credits in this minor: 16.

The minor focuses on designing effective communication products using both traditional and emerging technologies. Students learn to design written messages using computer technologies; visual messages using photography, digital imaging, and video; and online and Web messages using multimedia, World Wide Web technologies, and streaming audio and video. Message design components include audience analysis and rigorous evaluation of document usability. This minor differs from the technical communication minor by its focus on emerging technologies.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

RHET 3671 - Visual Rhetoric (3.0 cr)
RHET 3672 - Project Design and Development (3.0 cr)
RHET 4501 - Usability and Human Factors in Technical Communication (3.0 cr)
RHET 4662W - Emerging Technologies in Scientific and Technical Communication, WI (4.0 cr)
RHET 3101 - Functional Photography (3.0 cr)
or RHET 3257 - Scientific and Technical Presentations (3.0 cr)

or RHET 3401 - Internet Communication: Tools and Issues (3.0 cr)
or RHET 4105W - Corporate Video for Technical Communicators, WI (4.0 cr)

Entomology Minor

Entomology

Requirements for this program are current for Fall 2006.

Required credits in this minor: 12.

This minor provides a strong background in entomological principles and theory suitable for students interested in a variety of professions or advanced degree programs. Examples include programs in entomology, veterinary science, or public health; teaching biology in secondary educational institutions; or enhancing marketable skills for a variety of professional careers, such as forest health specialist, crop consultant, grounds manager, pest management specialist, agronomist, greenhouse or nursery technician, natural resource manager, or water quality specialist. Specific courses are selected based on students' educational objectives, in consultation with a minor adviser.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu/>.

Program Requirements

Required Courses

Minor Courses

CFAN 3001 - Pests and Crop Protection (3.0 cr)
or ENT 3005 - Insect Biology (3.0 cr)
or ENT 4015 - Ornamentals and Turf Entomology (3.0 cr)
or ENT 4251 - Forest and Shade Tree Entomology (3.0 cr)
or ENT 4281 - Veterinary Entomology (3.0 cr)

Electives

Take 9 or more credit(s). Courses must be completed for 3 credits each

Take 6 or more credit(s) from the following:
ENT 5910 - Special Problems in Entomology (1.0-6.0 cr)
ENT 5920 - Special Lectures in Entomology (1.0-3.0 cr)
Take 3 or more credit(s) from the following:
ENT 3xxx
ENT 4xxx
ENT 5xxx

Environment and Natural Resources Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

The environment and natural resources minor provides students in programs such as biology, education, journalism, political science, and others with the basic understanding to recognize, evaluate, and develop solutions to a range of environmental problems. Students interested in the minor should contact CFANS Student Services Office at 612-624-6768.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Core

Take 2 or more course(s) from the following:

ESPM 1011 - Issues in the Environment, ENVT (3.0 cr)

ESPM 2041 - Natural Resources Consumption and Sustainability, ENVT, IP (3.0 cr)

FW 2001 - Introduction to Fisheries, Wildlife, and Conservation Biology, ENVT (3.0 cr)

SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

BIOL 3407 - Ecology, ENVT (3.0 cr)

or EEB 3001 - Ecology and Society, ENVT (3.0 cr)

or FR 3104 - Forest Ecology (4.0 cr)

Focus for ENR Minor

Students are required to complete one of the following course groups.

Environmental Management and Policy

Take 10 or more credit(s) from the following:

ESPM 3002 - Colloquium: Exotic Plants and Animals (1.0 cr)

ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)

ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr)

ESPM 3101 - Conservation of Plant Biodiversity, ENVT (3.0 cr)

ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)

ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)

ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)

ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)

ESPM 3601 - Our Home, Our Environment (3.0 cr)

ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)

ESPM 4195W - Problem Solving and Planning in Natural Resources, WI (4.0 cr)

ESPM 4295W - GIS in Environmental Science and Management, WI (4.0 cr)

ESPM 4811 - Environmental Interpretation (3.0 cr)

ESPM 5601 - Principles of Waste Management (3.0 cr)

FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)

-OR-

Environmental Science

Take 10 or more credit(s) from the following:

ESPM 3221 - Soil Conservation and Land-Use Management (3.0 cr)

ESPM 3612W - Soil and Environmental Biology, WI (3.0 cr)

ESPM 4216 - Contaminant Hydrology (2.0 cr)

ESPM 4601 - Soils and Pollution (3.0 cr)

ESPM 5555 - Wetland Soils (3.0 cr)

EEB 4611 - Biogeochemical Processes (3.0 cr)

ENT 3925 - Insects, Aquatic Habitats, and Pollution (3.0 cr)

ENT 5241 - Ecological Risk Assessment (3.0 cr)

FR 3114 - Hydrology and Watershed Management (3.0 cr)

FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)

PLPA 3002 - Air Pollution, People, and Plants: The Science and the Ethics, C/PE, ENVT (3.0 cr)

SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)

Environmental Horticulture B.S.

Horticultural Science

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 49.

Degree: Bachelor of Science.

The environmental horticulture major educates and prepares students in all phases of horticulture: crop and plant production; education (botanic gardens and arboreta); service oriented activities (landscaping and landscape maintenance); plant use and function (design, reclamation, and restoration); and recreation (golf courses and parks). Students gain experience in the use of plants to alter environments, restore damaged landscapes, improve the health and well-being of individuals, educate people about science and agriculture, improve community environments, and provide recreational and practical benefits to the public.

Students choose either a business or science option. Landscape design, a joint offering with the College of Design, combines architecture and landscape architecture courses available in College of Design with the plant-based design courses available in CFANS.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

Applied courses in horticultural science, soil science, entomology, plant pathology, and applied economics vary depending on program. All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses

Foundation Courses

APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)

or CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

MATH 1031 - College Algebra and Probability, MATH (3.0 cr)

or MATH 1142 - Short Calculus, MATH (4.0 cr)

Professional Courses

BIOL 3002 - Plant Biology: Function (2.0 cr)

HORT 1001 - Plant Propagation, BIOL SCI/L (4.0 cr)

HORT 1015 - Woody and Herbaceous Plants (4.0 cr)

HORT 3002W - Greenhouse Management, WI (3.0 cr)

HORT 3005 - Environmental Effects on Horticultural Crops (2.0 cr)

HORT 4096 - Professional Experience Program: Internship (1.0-3.0 cr)

PLPA 2001 - Introductory Plant Pathology (3.0 cr)

SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

ENT 3005 - Insect Biology (3.0 cr)

or ENT 4015 - Ornamentals and Turf Entomology (3.0 cr)

or ENT 4251 - Forest and Shade Tree Entomology (3.0 cr)

Environmental Horticulture Options

Students are required to complete one of the following course groups.

Business Option

Take 2 or more course(s) from the following:

- ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
- APEC 1251 - Principles of Accounting (3.0 cr)
- PSTL 1513 - Small Business Fundamentals With E-Business Applications (3.0 cr)
- OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)

-OR-

Science Option

- BIOC 3021 - Biochemistry (3.0 cr)
- CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
- CHEM 2301 - Organic Chemistry I (3.0 cr)
- PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr) or PHYS 1111 - Basic Physics I (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Floriculture/Nursery Production and Retail Management

22 credits are required.

Required Courses**Floriculture/Nursery Production and Retail Mgmt**

- APEC 3821 - Retail Center Management (3.0 cr)
- HORT 4015 - Advanced Woody and Herbaceous Plant Topic (1.0 cr)
- HORT 5041W - Nursery Management, WI (4.0 cr)
- HORT 5051 - Floriculture Crop Production (4.0 cr)
- PLPA 4000 - Plant Pathology Practicum (1.0 cr)
- HORT 4401 - Plant Genetics and Breeding (4.0 cr)
- or HORT 4071W - Applications of Biotechnology to Plant Improvement, C/PE, WI (4.0 cr)

Take 6 or more credit(s) from the following:

- HORT 1xxx
- HORT 2xxx
- HORT 3xxx
- HORT 4xxx

Individualized

Students must submit a course of study to the Department of Horticultural Science Undergraduate Studies Committee at least three semesters before graduation.

Students choose two required courses plus 16 additional credits in consultation with an adviser to total at least 21 credits.

Required Courses

- HORT 4401 - Plant Genetics and Breeding (4.0 cr)
- or HORT 4071W - Applications of Plant Biotechnology to Plant Improvement (4.0 cr)
- PLPA 4000 - Plant Pathology Practicum (1.0 cr)

Landscape Design

21 credits are required.

Required Courses**Landscape Design**

Take 21 or more credit(s) from the following:

- ARCH 3301 - Drawing for Design in Architecture, OH (3.0 cr)
- ARCH 3711 - Environmental Design and the Sociocultural Context, C/PE, WI (3.0 cr)
- HORT 4021 - Landscape Design and Implementation I (4.0 cr)
- HORT 4022 - Applications in Computer-Aided Design for Landscapes (3.0 cr)
- HORT 4061W - Turfgrass Management, WI (3.0 cr)
- HORT 5018 - Landscape Operations and Management (3.0 cr)
- HORT 5021 - Landscape Design and Implementation II (4.0 cr)
- LA 1301 - Introduction to Drawing in Architecture and Landscape Architecture, OH (3.0 cr)
- LA 3001 - Understanding and Creating Landscape Space (3.0 cr)
- LA 3204 - Landscape Ecology (3.0 cr)
- LA 3413 - Introduction to Landscape Architectural History, IP (3.0 cr)
- LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)
- LA 3571 - Landscape Construction: Site Systems and Engineering (3.0 cr)
- ARCH 3411 - Architectural History to 1750, HP, IP (3.0 cr)
- or ARCH 3412 - Architectural History since 1750, HP, IP (3.0 cr)

Landscape Implementation and Management

21 credits are required.

Required Courses**Landscape Implementation and Management**

- HORT 4021 - Landscape Design and Implementation I (4.0 cr)
- HORT 4061W - Turfgrass Management, WI (3.0 cr)
- HORT 5009 - Pesticides in Horticulture: Their Use and Abuse (3.0 cr)
- HORT 5018 - Landscape Operations and Management (3.0 cr)
- PLPA 4000 - Plant Pathology Practicum (1.0 cr)
- HORT 4401 - Plant Genetics and Breeding (4.0 cr)
- or HORT 4071W - Applications of Biotechnology to Plant Improvement, C/PE, WI (4.0 cr)
- FR 3501 - Arboriculture: Selection and Maintenance of Trees (3.0 cr)
- or HORT 1xxx
- or HORT 2xxx
- or HORT 3xxx
- or HORT 4xxx

Turfgrass Science

21 credits are required.

Required Courses**Turfgrass Science**

- HORT 4021 - Landscape Design and Implementation I (4.0 cr)
- HORT 4061W - Turfgrass Management, WI (3.0 cr)
- HORT 4062 - Turfgrass Weed and Disease Science (3.0 cr)
- HORT 5061 - Turfgrass Science (3.0 cr)
- PLPA 4000 - Plant Pathology Practicum (1.0 cr)
- SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)
- HORT 4401 - Plant Genetics and Breeding (4.0 cr)
- or HORT 4071W - Applications of Biotechnology to Plant Improvement, C/PE, WI (4.0 cr)

Take 3 or more credit(s) from the following:

- HORT 1xxx
- HORT 2xxx
- HORT 3xxx
- HORT 4xxx

Environmental Horticulture Minor

Horticultural Science

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

Plants provide many practical and recreational benefits to society--whether it is the food we eat, the parks we play in, or the gardens we enjoy admiring. The horticultural science minor is geared toward students who want to learn more about plants and their many, diverse uses in the landscape. Coursework is flexible and can easily be tailored to specific horticultural interests, including floriculture and nursery production, turfgrass science, landscape design and maintenance, fruit and vegetable production, sustainable and organic production practices, therapeutic horticulture, plant physiology, and genetics. Students wishing to complete a minor in horticultural science should contact the Department of Horticultural Science, 305 Alderman Hall for assistance.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

HORT 1001 - Plant Propagation, BIOL SCI/L (4.0 cr)

Electives

At least 14 credits from courses with a HORT designator, of which one horticulture related course (SOILS, ENT, PLPA, or BIOL 3002) may be substituted. At least two HORT courses must be at 4xxx or 5xxx. A maximum of 3 credits of HORT 5090 - Directed Studies may be applied.

- facilitate science/social science/policy linkages within and beyond the University.

Students complete a set of common "integrated core" courses that focus on integrated problem solving using environmental sciences, policy, ethics, management models, and communication theory. Students also incorporate classroom and fieldwork.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site.

General Requirements

All students are required to complete general University and college requirements including writing and liberal education courses. For more information about University-wide requirements, see the liberal education requirements.

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

All students complete Required Courses below and choose one of the following ESPM tracks: conservation and resource management (CRM); corporate environmental management (CEM); environmental education and communication (EEC); policy, planning, law and society (PPLS); and environmental science (ES).

Students are strongly encouraged to have an international experience before graduation. Courses completed during an international experience (study, work, volunteer, research) can meet program requirements, liberal education requirements, and/or electives. Discussion with an adviser prior to commencing an international experience is required to plan how courses meet requirements in the ESPM major.

All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses

Communication Skills

RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
or COMM 1101 - Introduction to Public Speaking (3.0 cr)

Mathematical Thinking

Students in policy, planning, law and society track or environmental education and communication track may select SOC 3811. Students in conservation and resource management must take ESPM 3012.

STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
or SOC 3811 - Basic Social Statistics, MATH (4.0 cr)

Physical and Biological Sciences

CHEM 1021 is required for the environmental science track.

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)
or CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Integrated ESPM Core

ESPM 1001 - Orientation to Environmental Sciences, Policy, and Management (1.0 cr)
ESPM 1011 - Issues in the Environment, C/PE, ENVT (3.0 cr)
ESPM 2021 - Environmental Sciences: Integrated Problem Solving (3.0 cr)
ESPM 3000 - Seminar on Current Issues for ESPM (1.0 cr)
ESPM 4041 - Problem Solving for Environmental Change (4.0 cr)

Environmental Sciences, Policy and Management B.S.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 46.

This program requires summer terms.

Degree: Bachelor of Science

The environmental sciences, policy and management (ESPM) major is designed to address the needs posed by the complexity of environmental and renewable resource issues that are faced on a state, national and global level. This interdisciplinary, environmental major prepares graduates to solve environmental problems from an integrated knowledge base.

The mission of the ESPM major is to:

- improve the basis for environmental decision-making by integrating physical, biological, and social sciences with policy analysis and management;
- educate the next generation of environmental professionals and leaders;
- foster innovative approaches for the education of environmental professionals;

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Conservation and Resource Management

Students in the CRM track are involved in what Thoreau suggested was “environmental wisdom” or the ability to make effective decisions about the environment by synthesizing natural and human created facts and information. Students integrate this understanding with diverse economic and social insight to make effective decisions for the environment and society.

This track prepares students for technical support, operational, and managerial positions in diverse aspects of resource conservation and management with local, state, and federal agencies and the private sector. This track also prepares students for graduate study in a wide range of areas.

Students solve problems in field settings and communicate their understanding, synthesis, and decision-making to diverse audiences. They gain experience in the actual implementation of decisions. Students may also develop special skills through electives (e.g., geographic information systems, geospatial analysis).

Required Courses

Social Sciences

ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)

or APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)

or ECON 1101 - Principles of Microeconomics (4.0 cr)

ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)

or ESPM 3271 - Human Environmental Behavior and Policy (3.0 cr)

CRM Core Courses

ESPM 1145 - Quantitative Methods for Environmental Scientists and Managers I (4.0 cr)

or MATH 1142 - Short Calculus, MATH (4.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

ESPM 3012 - Quantitative Methods for Environmental Scientists II (4.0 cr)

BIOL 2012 - General Zoology (4.0 cr)

or BIOL 2022 - General Botany (3.0 cr)

or ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr)

or ESPM 3101 - Conservation of Plant Biodiversity, ENVT (3.0 cr)

or ESPM 3108 - Ecology of Managed Systems (4.0 cr)

or ESPM 3612W - Soil and Environmental Biology, WI (3.0 cr)

or FR 1101 - Dendrology: Identifying Forest Trees and Shrubs (3.0 cr)

or FR 3104 - Forest Ecology (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

or BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)

or ESPM 4601 - Soils and Pollution (3.0 cr)

SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)

or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Requires approval by and supervision of faculty adviser from track.

ESPM 4096 - Professional Experience Program: Internship (1.0-3.0 cr)

CRM Contract Courses

Take 36 or more credit(s) including 4 or more sub-requirement(s) from the following:

Courses taken to meet other requirements cannot be double counted here, nor can courses count for multiple groups. Course selections from contract area must be made through a faculty adviser. A contract is required.

Take 10 or more credit(s) from the following:

EEB 4601 - Limnology (3.0 cr)

ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr)

ESPM 3101 - Conservation of Plant Biodiversity, ENVT (3.0 cr)

ESPM 3575 - Wetlands Conservation (3.0 cr)

ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)

ENT 3925 - Insects, Aquatic Habitats, and Pollution (3.0 cr)

ESPM 3108 - Ecology of Managed Systems (4.0 cr)

ESPM 3221 - Soil Conservation and Land-Use Management (3.0 cr)

ESPM 3612W - Soil and Environmental Biology, WI (3.0 cr)

ESPM 4216 - Contaminant Hydrology (2.0 cr)

ESPM 4601 - Soils and Pollution (3.0 cr)

FR 3104 - Forest Ecology (4.0 cr)

FR 3114 - Hydrology and Watershed Management (3.0 cr)

FR 3411 - Managing Forest Ecosystems: Silviculture (3.0 cr)

FR 5153 - Forest and Wetland Hydrology (3.0 cr)

FW 4102 - Principles of Conservation Biology (3.0 cr)

FW 4103 - Principles of Wildlife Management (3.0 cr)

FW 5411 - Aquatic Toxicology, ENVT (3.0 cr)

FW 5604W - Fisheries Ecology and Management, ENVT, WI (3.0 cr)

HORT 5071 - Restoration and Reclamation Ecology, ENVT (3.0 cr)

SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)

SOIL 5555 - Wetland Soils (3.0 cr)

SOIL 5711 - Forest Soils (2.0 cr)

Take 7 or more credit(s) from the following:

ESPM 3211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)

ESPM 4021W - Environmental Impact Statements, WI (3.0 cr)

FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)

FR 3218 - Measuring & Modeling Forests (3.0 cr)

FR 3262 - Remote Sensing of Natural Resources and Environment (4.0 cr)

FR 5412 - Digital Remote Sensing (3.0 cr)

FW 5051 - Analysis of Populations (3.0 cr)

GEOG 3561 - Principles of Geographic Information Science (4.0 cr)

GIS 5571 - Introduction to Arc/Info (3.0 cr)

Take 1 or more course(s) totaling 2 - 3 credit(s) from the following:

ESPM 3031 - Applied Global Positioning Systems for Geographic Information Systems (3.0 cr)

ESPM 3111 - Hydrology and Water Quality Field Methods (3.0 cr)

PBIO 4321 - Minnesota Flora (3.0 cr)

SOIL 4093 - Directed Study (1.0-7.0 cr)

SOIL 4511 - Field Study of Soils (2.0 cr)

FR 2101 - Identifying Forest Plants (1.0 cr)

FR 2102 - Northern Forests: Field Ecology (2.0 cr)

FR 2104 - Measuring Forest Resources (1.0 cr)

Take 3 or more credit(s) from the following:

ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)

ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)

ESPM 3271 - Human Environmental Behavior and Policy (3.0 cr)

ESPM 3602 - Regulatory and Ethical Frameworks for CEM (3.0 cr)

ESPM 3604 - Environmental Management Systems and Strategy (3.0 cr)

ESPM 4021W - Environmental Impact Statements, WI (3.0 cr)

ESPM 4242 - Methods for Environmental and Natural Resource Policy Analysis (3.0 cr)

Corporate Environmental Management

The CEM track provides graduates with the fundamental skills to systematically determine the environmental burdens associated with a firm's products or manufacturing processes and to identify opportunities that generate value from environmental risk reduction, regulatory compliance programs, and other alternatives for improving environmental performance. The CEM track prepares students for positions in growing environmental,

health, and safety organizations housed within private enterprises, consultancies, and governmental institutions, as well as for graduate study in business, public policy, environmental sciences, and industrial ecology.

Student experiences within this track focus on analytical tools; the business, legal, regulatory, and ethical framework in which industrial firms operate; physical, chemical, and biological mechanisms associated with industrial emissions; techniques used to reduce the environmental impacts of industrial activity; and effective communication.

Required Courses

Social Sciences

ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)

or APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)

or ECON 1101 - Principles of Microeconomics (4.0 cr)

ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)

or ESPM 3271 - Human Environmental Behavior and Policy (3.0 cr)

Prerequisite CEM Courses

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)

MATH 1271 - Calculus I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

MGMT 3001 - Fundamentals of Management (3.0 cr)

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

or BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)

CEM Track Required Courses

CE 3501 - Environmental Engineering, C/PE, ENVT (3.0 cr)

ESPM 3602 - Regulatory and Ethical Frameworks for CEM (3.0 cr)

ESPM 3603 - Environmental Life Cycle Analysis (3.0 cr)

ESPM 3604 - Environmental Management Systems and Strategy (3.0 cr)

ESPM 3606 - Minimizing Industrial Emissions (3.0 cr)

ESPM 5019 - Business, Natural Environment, and Global Economy (2.0 cr)

ESPM 4096 - Professional Experience Program: Internship (1.0-3.0 cr)

or ESPM 3111 - Hydrology and Water Quality Field Methods (3.0 cr)

or appropriate study abroad

or FR 2101 - Identifying Forest Plants (1.0 cr)

and FR 2102 - Northern Forests: Field Ecology (2.0 cr)

and FR 2104 - Measuring Forest Resources (1.0 cr)

Track Contract Courses

Take 13 or more credit(s) from the following:

ESPM 2041 - Natural Resources Consumption and Sustainability, ENVT, IP (3.0 cr)

ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)

ESPM 3605 - Recycling: Extending Raw Materials (3.0 cr)

ESPM 4607 - Industrial Biotechnology and the Environment (2.0 cr)

ESPM 4608 - Bioremediation (2.0 cr)

ESPM 4216 - Contaminant Hydrology (2.0 cr)

Environmental Education and Communication

Students in the EEC track gain a solid base of knowledge in the environmental sciences, environmental ethics, and the social context of environmental issues, and they develop a practical set of skills for teaching effectively in informal settings and for communicating clearly in written, oral, and electronic forms. This track prepares students to work at government agencies, nature centers, parks, non-governmental organizations, and similar institutions, and is appropriate for students who wish

to gain a broad understanding of environmental issues and the choices humans can make to mitigate unwanted impacts of human behavior on the environment.

Students may specialize in a content area through a minor, study abroad experience in ESPM topics, and/or a student designed content area. Students are encouraged to make choices that strengthen their expertise in an area and/or provide comparative understanding from another culture or discipline.

Courses listed in the track but not taken are good possibilities for use in a content area, as are courses listed below. ESPM students should see their adviser for a list of minors.

Required Courses

Social Sciences

ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)

or APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)

or ECON 1101 - Principles of Microeconomics (4.0 cr)

ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)

or ESPM 3271 - Human Environmental Behavior and Policy (3.0 cr)

Education and Communication

ESPM 2401 - Environmental Education/Naturalist (3.0 cr)

RHET 3404 - Environmental Communication (3.0 cr)

CI 5534 - Studies in Science Education (3.0 cr)

or CI 5537 - Principles of Environmental Education (3.0 cr)

or CI 5747 - Global and Environmental Education: Content and Practice (3.0 cr)

or EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)

or REC 5301 - Wilderness and Adventure Education (4.0 cr)

or REC 5311 - Programming Outdoor and Environmental Education (3.0 cr)

or RRM 5259 - Visitor Behavior Analysis (3.0 cr)

COMM 3441 - Introduction to Organizational Communication (3.0 cr)

or COMM 3451W - Intercultural Communication: Theory and Practice, IP, WI (3.0 cr)

or ESPM 4811 - Environmental Interpretation (3.0 cr)

or RHET 1152W - Writing on Issues of Science and Technology, C/PE, WI (4.0 cr)

or RHET 3221W - Theories of Human Communication, C/PE, SSCI, WI (4.0 cr)

or RHET 3401 - Internet Communication: Tools and Issues (3.0 cr)

or RHET 5664 - Science Writing for Popular Audiences (3.0 cr)

Human Dimensions

ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)

or PHIL 3301 - Environmental Ethics, C/PE, ENVT (4.0 cr)

or RHET 3362 - Applied Environmental Ethics (3.0 cr)

Take 2 or more course(s) from the following:

CACL 3366W - Landscape, Nature, Society, ENVT, WI (3.0 cr)

ESPM 2041 - Natural Resources Consumption and Sustainability, ENVT, IP (3.0 cr)

ESPM 3001 - Treaty Rights and Natural Resources, CD, HP (3.0 cr)

ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)

ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)

GEOG 3376 - Political Ecology of North America, C/PE, ENVT (3.0 cr)

HIST 3452 - African Conservation Histories, HP, ENVT (3.0 cr)

HSCI 3244 - History of Ecology and Environmentalism (3.0 cr)

POL 4210 - Topics in Political Theory (3.0 cr)

RHET 1315 - The Land in American Experience, CD, OH (3.0 cr)

RHET 3302 - Science, Religion, and the Search for Human Nature, OH (3.0 cr)

RHET 3383 - In Search of Nature, ENVT, OH (3.0 cr)

CACL 3361 - Visions of Nature: The Natural World and Political Thought, C/PE, ENVT (4.0 cr)

or EEB 3361 - Visions of Nature: The Natural World and Political Thought, C/PE, ENVT (4.0 cr)

Natural Sciences

BIOL 3407 - Ecology, ENVT (3.0 cr)
 or EEB 3001 - Ecology and Society, ENVT (3.0 cr)
 or FR 3104 - Forest Ecology (4.0 cr)
 EEB 4601 - Limnology (3.0 cr)
 or ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)
 or FR 3114 - Hydrology and Watershed Management (3.0 cr)
 or GEO 1001 - Earth and Its Environments, ENVT, PHYS SCI/L (4.0 cr)
 or PHYS 1001W - Energy and the Environment, ENVT, PHYS SCI/L, WI (4.0 cr)
 or PLPA 3002 - Air Pollution, People, and Plants: The Science and the Ethics, C/PE, ENVT (3.0 cr)
 or SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)

Take 3 or more course(s) including 2 or more sub-requirement(s) from the following:

Take 1 or more course(s) from the following:

BIOL 2022 - General Botany (3.0 cr)
 FR 1101 - Dendrology: Identifying Forest Trees and Shrubs (3.0 cr)
 PBIO 4321 - Minnesota Flora (3.0 cr)
 PBIO 4511 - Flowering Plant Diversity (3.0 cr)

Take 1 or more course(s) from the following:

BIOL 2012 - General Zoology (4.0 cr)
 EEB 4134 - Introduction to Ornithology (4.0 cr)
 EEB 4129 - Mammalogy (4.0 cr)
 ENT 3005 - Insect Biology, BIOL SCI/L (3.0 cr)
 FW 3136 - Biology of Fishes (4.0 cr)

Complex Human and Natural Systems

ESPM 3108 - Ecology of Managed Systems (4.0 cr)
 or EEB 5146 - Science and Policy of Global Environmental Change (3.0 cr)
 or FR 5146 - Science and Policy of Global Environmental Change, ENVT (3.0 cr)
 or FW 4102 - Principles of Conservation Biology (3.0 cr)
 or HORT 5071 - Restoration and Reclamation Ecology, ENVT (3.0 cr)

Field Experience

ESPM 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 or FR 2101 - Identifying Forest Plants (1.0 cr)
 and FR 2102 - Northern Forests: Field Ecology (2.0 cr)
 and FR 2104 - Measuring Forest Resources (1.0 cr)

Environmental Science

The ES track focuses on the application and integration of basic and applied sciences to solve complex environmental problems. Students can earn professional licenses and certification in several areas and will be qualified to work as soil scientists, hydrologists, water quality and wetland ecology scientists, environmental remediation scientists, climatologists, and atmospheric scientist. Graduates find jobs with environmental regulatory agencies, private consulting firms, and nonprofit organizations. This track provides a diverse basic and applied science background that also prepares students for scientific research through advanced graduate studies.

Students in this track use an understanding of biology, chemistry, physics, and mathematics to develop a broad knowledge base in soil, hydrologic, atmospheric, and biological sciences. Students study the interaction between science and the functioning of urban, forested, and agricultural lands as well as hydrologic, atmospheric, soil, and wetland resources.

Required Courses**Social Sciences**

ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)
 or APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 or ECON 1101 - Principles of Microeconomics (4.0 cr)

ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)
 or ESPM 3271 - Human Environmental Behavior and Policy (3.0 cr)

Additional Basic Science and Math Courses

ESPM 3131 - Environmental Physics (3.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)
 MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)
 BIOG 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)
 or BIOL 2012 - General Zoology (4.0 cr)
 or BIOL 2022 - General Botany (3.0 cr)
 or BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

Applied Sciences and Technology Courses

ESPM 1425 - The Atmosphere, ENVT, PHYS SCI/L (4.0 cr)
 ESPM 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 FR 3114 - Hydrology and Watershed Management (3.0 cr)
 GEO 1001 - Earth and Its Environments, ENVT, PHYS SCI/L (4.0 cr)
 SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)
 FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
 or GEOG 3561 - Principles of Geographic Information Science (4.0 cr)
 BIOL 3407 - Ecology, ENVT (3.0 cr)
 or ESPM 3108 - Ecology of Managed Systems (4.0 cr)
 or FR 3104 - Forest Ecology (4.0 cr)

Take 2 or more credit(s) from the following:

ESPM 3031 - Applied Global Positioning Systems for Geographic Information Systems (3.0 cr)
 ESPM 3111 - Hydrology and Water Quality Field Methods (3.0 cr)
 PBIO 4321 - Minnesota Flora (3.0 cr)
 SOIL 3521 - Soil Judging (1.0 cr)
 SOIL 4093 - Directed Study (1.0-7.0 cr)
 SOIL 4511 - Field Study of Soils (2.0 cr)
 FR 2101 - Identifying Forest Plants (1.0 cr)
 FR 2102 - Northern Forests: Field Ecology (2.0 cr)
 FR 2104 - Measuring Forest Resources (1.0 cr)

ES Contract Courses

Take 15 - 21 credit(s) from the following:

Students must develop a contract with their faculty adviser to develop an area of specialization. All track electives must be upper division. Depending on the selected group of courses, students have the opportunity to become certified or licensed as a professional soil scientist, hydrologist, wetland delineator, erosion control specialist, or site evaluator for individual sewage treatment system.

Take 0 - 21 credit(s) from the following:

ESPM 3221 - Soil Conservation and Land-Use Management (3.0 cr)
 GEO 4703 - Glacial Geology (4.0 cr)
 GEO 5108 - Principles of Environmental Geology (3.0 cr)
 GEOG 3441 - Quaternary Landscape Evolution (3.0 cr)
 SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)
 SOIL 3521 - Soil Judging (1.0 cr)
 SOIL 4511 - Field Study of Soils (2.0 cr)
 SOIL 5515 - Soil Genesis and Landscape Relations (3.0 cr)
 SOIL 5555 - Wetland Soils (3.0 cr)
 SOIL 5711 - Forest Soils (2.0 cr)

Take 0 - 21 credit(s) from the following:

EEB 4601 - Limnology (3.0 cr)
 EEB 4605 - Limnology Laboratory (1.0 cr)
 ESPM 4216 - Contaminant Hydrology (2.0 cr)
 FR 5153 - Forest and Wetland Hydrology (3.0 cr)
 FW 5604W - Fisheries Ecology and Management, ENVT, WI (3.0 cr)
 GEO 5701 - General Hydrogeology (3.0 cr)
 WRS 5101 - Water Resources: Individuals and Institutions (3.0 cr)

Take 0 - 21 credit(s) from the following:

BIOL 3002 - Plant Biology: Function (2.0 cr)
 BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)
 BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)
 EEB 4611 - Biogeochemical Processes (3.0 cr)
 EEB 5009 - Quaternary Vegetation History and Climate (3.0 cr)
 EEB 5122W - Plant Interactions with Animals and Microbes, WI (3.0 cr)
 ENT 5361 - Aquatic Insects (4.0 cr)
 ESPM 5131 - Environmental Biophysics and Ecology (3.0 cr)
 FR 5146 - Science and Policy of Global Environmental Change, ENVT (3.0 cr)
 HORT 5071 - Restoration and Reclamation Ecology, ENVT (3.0 cr)
 LA 3204 - Landscape Ecology (3.0 cr)
 MICB 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)

Take 0 - 21 credit(s) from the following:

AGRO 4605 - Management Strategies for Crop Production (4.0 cr)
 AGRO 5321 - Ecology of Agricultural Systems, ENVT (3.0 cr)
 BIOL 3407 - Ecology, ENVT (3.0 cr)
 EEB 3963 - Modeling Nature and the Nature of Modeling (3.0 cr)
 EEB 4611 - Biogeochemical Processes (3.0 cr)
 EEB 4631 - Global Ecology (4.0 cr)
 FR 3104 - Forest Ecology (4.0 cr)
 FR 3203 - Forest Fire and Disturbance Ecology (3.0 cr)
 FR 3204 - Landscape Ecology and Management (3.0 cr)
 FR 3411 - Managing Forest Ecosystems: Silviculture (3.0 cr)
 FR 4118 - Trees: Structure and Function (3.0 cr)
 FR 5146 - Science and Policy of Global Environmental Change, ENVT (3.0 cr)
 FW 4565 - Fisheries and Wildlife Ecology and Management: Field Trip (1.0 cr)

Take 0 - 21 credit(s) from the following:

ESPM 5131 - Environmental Biophysics and Ecology (3.0 cr)
 ESPM 5402 - Biometeorology (3.0 cr)
 GEO 3002 - Climate Change and Human History, ENVT (3.0 cr)
 GEOG 5423 - Climate Models and Modeling (3.0 cr)
 GEOG 5426 - Climatic Variations (3.0 cr)
 GEOG 5565 - Geographical Analysis of Human-Environment Systems (3.0 cr)
 ME 5115 - Air Quality and Air Pollution Control (4.0 cr)
 PLPA 3002 - Air Pollution, People, and Plants: The Science and the Ethics, C/PE, ENVT (3.0 cr)

Take 0 - 21 credit(s) from the following:

CE 3501 - Environmental Engineering, C/PE, ENVT (3.0 cr)
 CHEM 2301 - Organic Chemistry I (3.0 cr)
 ESPM 3603 - Environmental Life Cycle Analysis (3.0 cr)
 ENT 5241 - Ecological Risk Assessment (3.0 cr)
 ESPM 4216 - Contaminant Hydrology (2.0 cr)
 ESPM 4601 - Soils and Pollution (3.0 cr)
 ESPM 5601 - Principles of Waste Management (3.0 cr)
 FR 3262 - Remote Sensing of Natural Resources and Environment (4.0 cr)
 FR 5412 - Digital Remote Sensing (3.0 cr)
 GEOG 3401 - Geography of Environmental Systems and Global Change, WI (4.0 cr)
 GEOG 3531 - Numerical Spatial Analysis (4.0 cr)
 GEOG 5563 - Advanced Geographic Information Science (3.0 cr)

Policy, Planning, Law and Society

The PPLS track focuses on developing understanding and problem-solving skills germane to the interaction between human and natural systems. Students will be well prepared for policy development and analysis, strategy development, and decision-making in a range of positions and institutional settings. Example positions include those as a policy analyst, community planner, social researcher, or lawyer in public agencies, with legislative bodies, consulting firms, and conservation organizations. This track also prepares students for graduate study in policy, planning, and law programs.

Students study concepts, issues, and problem solving approaches that address the policy, legal, economic, political, planning and sociological aspects of environment and natural

resource management. This study includes ethics and conflict management. The track further emphasizes an interdisciplinary approach for examining problems such as sustainable land use planning, resource conservation and management, law, and environmental protection at a range of political levels and spatial scales and developing effective and innovative solutions. Students develop skill in integrating knowledge from the physical, biological, and social sciences to develop policy and planning alternatives and appropriate strategies to provide real solutions to complex problems.

Required Courses

PPLS Core Courses

ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)
 ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)
 ESPM 3271 - Human Environmental Behavior and Policy (3.0 cr)
 ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
 ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)
 ESPM 3251 - Natural Resources in Sustainable International Development, ENVT, IP (3.0 cr)
 ESPM 4242 - Methods for Environmental and Natural Resource Policy Analysis (3.0 cr)
 ESPM 4256 - Natural Resource Law and the Management of Public Lands and Waters (3.0 cr)
 ESPM 4096 - Professional Experience Program: Internship (1.0-3.0 cr) or FR 2101 - Identifying Forest Plants (1.0 cr) and FR 2102 - Northern Forests: Field Ecology (2.0 cr) and FR 2104 - Measuring Forest Resources (1.0 cr)
 ESPM 3108 - Ecology of Managed Systems (4.0 cr)
 ESPM 3211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)
 FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
 RRM 4232W - Managing Recreational Lands, ENVT, WI (4.0 cr)
 ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr) or ESPM 3604 - Environmental Management Systems and Strategy (3.0 cr) or ESPM 4021W - Environmental Impact Statements, WI (3.0 cr) or ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr) or FR 3104 - Forest Ecology (4.0 cr) or FR 3114 - Hydrology and Watershed Management (3.0 cr) or FR 3411 - Managing Forest Ecosystems: Silviculture (3.0 cr) or FR 5146 - Science and Policy of Global Environmental Change, ENVT (3.0 cr) or SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr) or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

PPLS Contract Courses

Take 12 or more credit(s) from the following:

Students may specialize in a content area through a minor, study abroad experience in ESPM topics, and/or a student designed content area. Students are encouraged to make choices that strengthen their expertise in an area and/or provide comparative understanding from another culture or discipline.

Courses listed in the track but not taken are good possibilities for use in a content area, as are courses listed below. PPLS students should see their adviser for a list of minors.

APEC 3xxx
 BP 3xxx
 COMM 3xxx
 ECON 3xxx
 FW 3xxx
 FR 3xxx
 GLOS 3xxx

Fisheries and Wildlife B.S.

Fisheries, Wildlife, and Conservation Biology

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 85 to 92.

This program requires one summer term.

Degree: Bachelor of Science.

The fisheries and wildlife curriculum gives students a broad science background emphasizing biological and environmental sciences and other coursework needed for careers in fisheries, wildlife, conservation biology, and other natural resource and environmental fields. Graduates are prepared to research, plan, and implement the management, protection, and enhancement of fisheries and aquatic resources, wildlife resources, and biological diversity. Graduates find employment as fisheries and wildlife scientists and managers, naturalists, zoo biologists, environmental biologists, environmental educators, and other natural resource professionals. The program also provides students with the fundamental science background needed to enter a wide variety of graduate programs in biological and natural resource sciences as well as professional programs in veterinary medicine, environmental law, and environmental education.

Students select an area of specialization, usually by the end of the sophomore year. Areas of specialization include conservation biology, fisheries, and wildlife. Although no computer course is required, students are expected to be computer literate and competent using word processing, spreadsheet, and e-mail software.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

After completing a core curriculum that includes liberal education, communications, basic science, mathematics, and an orientation to the fields of fisheries, wildlife, and conservation biology, students complete additional credits in one of three areas of specialization: fisheries, wildlife, or conservation biology. Some of the core curriculum courses also fulfill diversified core and designated theme requirements. Electives to complete the required 120 credits are chosen in consultation with a program adviser.

Students may also fulfill the minimum requirements for admission to the University's College of Veterinary Medicine and other colleges of veterinary medicine by completing a bachelor's degree in fisheries and wildlife within any of the three areas of specialization.

All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses

Communication Skills

COMM 1101 - Introduction to Public Speaking (3.0 cr)
or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

Mathematical Thinking

FW 4001 - Biometry, WI (4.0 cr)
MATH 1142 - Short Calculus, MATH (4.0 cr)
or MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)

Physical, Chemical, and Biological Sciences

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
BIOL 2012 - General Zoology (4.0 cr)
BIOL 3407 - Ecology, ENVT (3.0 cr)
CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
GCD 3022 - Genetics (3.0 cr)
FR 3114 - Hydrology and Watershed Management (3.0 cr)
or GEO 1001 - Earth and Its Environments, ENVT, PHYS SCI/L (4.0 cr)
or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)
or PHYS 1102W - Introductory College Physics II, PHYS SCI/L, WI (4.0 cr)
or PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)
PHYS 1001W - Energy and the Environment, ENVT, PHYS SCI/L, WI (4.0 cr)
or PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)
or PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

Major Courses

FW 1001 - Orientation in Fisheries, Wildlife, and Conservation Biology (1.0 cr)

Problem Solving

FW 4701 - Fisheries and Wildlife Problem Solving (2.0 cr)
or CFAN 3100H - Honors Experience (2.0 - 3.0 cr)
and CFAN 3101H - Honors Seminar (1.0 - 3.0 cr)
and one additional honors seminar or honors course at 3xxx or 4xxx

Field Experience

Complete one of the following approved field experiences.

Cloquet Program

Take all of the following in the same summer term:

FW 4106 - Important Plants in Fisheries and Wildlife Habitats (1.0 cr)
FW 4108 - Field Methods in Research and Conservation of Vertebrate Populations (3.0 cr)

or

Alternative Field Course

Students not taking FW 4106/4108 (in Cloquet) must receive advance approval before enrolling in an alternate field course.

Economics

APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
or APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
or ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Conservation Biology

The conservation biology specialization is for students interested in careers dealing with a broad range of conservation issues in aquatic or terrestrial habitats. Positions typically focus on protection of endangered species and management for biodiversity. Careers as environmental educators or naturalists are also options.

All required courses in the specialization must be taken A-F and completed with a grade of at least C-.

Required Courses

Human Dimensions

Take 3 or more course(s) from the following:

- ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)
- ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
- ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)
- ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)
- FW 5003 - Human Dimensions of Biological Conservation, C/PE, ENVT (3.0 cr)

Animals and Plants

BIOL 2022 - General Botany (3.0 cr)

Take 1 or more course(s) from the following:

- EEB 4129 - Mammalogy (4.0 cr)
- EEB 4134 - Introduction to Ornithology (4.0 cr)
- ENT 5021 - Insect Taxonomy and Phylogeny (4.0 cr)
- ENT 5361 - Aquatic Insects (4.0 cr)
- FW 3136 - Biology of Fishes (4.0 cr)

Take 1 or more course(s) from the following:

- BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)
- FR 1101 - Dendrology: Identifying Forest Trees and Shrubs (3.0 cr)
- PBIO 4321 - Minnesota Flora (3.0 cr)
- PBIO 4511 - Flowering Plant Diversity (3.0 cr)

Community and Ecosystem Ecology

FR 3204 - Landscape Ecology and Management (3.0 cr)

Take 1 or more course(s) from the following:

- EEB 4014 - Ecology of Vegetation (3.0 cr)
- EEB 4016W - Ecological Biogeography, WI (3.0 cr)
- EEB 4601 - Limnology (3.0 cr)
- EEB 4609W - Ecosystem Ecology, WI (3.0 cr)
- ESPM 3575 - Wetlands Conservation (3.0 cr)
- FR 3104 - Forest Ecology (4.0 cr)

Conservation Biology

FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)

FW 4102 - Principles of Conservation Biology (3.0 cr)

FW 4103 - Principles of Wildlife Management (3.0 cr)

or FW 5051 - Analysis of Populations (3.0 cr)

or FW 5601 - Fisheries Population Analysis (3.0 cr)

or FW 5603W - Habitats and Regulation of Wildlife, ENVT, WI (3.0 cr)

or FW 5604W - Fisheries Ecology and Management, ENVT, WI (3.0 cr)

Fisheries

The fisheries area of specialization is for students who wish to pursue careers in fisheries and aquatic resource science, management, and administration; fish hatchery management; and aquaculture, aquatic education, and aquatic environmental assessment. The curriculum meets the education criteria for the Certified Fisheries Professional designation established by the American Fisheries Society, the major professional organization for fisheries scientists and managers in North America.

Required Courses

Human Dimensions

Take 2 or more course(s) from the following:

- ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)
- ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
- ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)
- ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)
- FW 5003 - Human Dimensions of Biological Conservation, C/PE, ENVT (3.0 cr)

Animals and Plants

FW 3136 - Biology of Fishes (4.0 cr)

FW 4401 - Fish Physiology and Behavior (2.0 cr)

Take 1 or more course(s) from the following:

- EEB 4129 - Mammalogy (4.0 cr)
- EEB 4134 - Introduction to Ornithology (4.0 cr)
- ENT 5021 - Insect Taxonomy and Phylogeny (4.0 cr)
- ENT 5361 - Aquatic Insects (4.0 cr)
- PBIO 4321 - Minnesota Flora (3.0 cr)
- PBIO 4511 - Flowering Plant Diversity (3.0 cr)

Community and Ecosystem Ecology

EEB 4601 - Limnology (3.0 cr)

Take 1 or more course(s) from the following:

- EEB 4609W - Ecosystem Ecology, WI (3.0 cr)
- ESPM 3575 - Wetlands Conservation (3.0 cr)
- ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)
- FR 3204 - Landscape Ecology and Management (3.0 cr)

Fisheries

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

FW 5601 - Fisheries Population Analysis (3.0 cr)

FW 5604W - Fisheries Ecology and Management, ENVT, WI (3.0 cr)

Take one of the following course pairs:

- BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)
- CHEM 2301 - Organic Chemistry I (3.0 cr)

or

CHEM 2101 - Introductory Analytical Chemistry Lecture (3.0 cr)

CHEM 2111 - Introductory Analytical Chemistry Lab (2.0 cr)

or

CHEM 2301 - Organic Chemistry I (3.0 cr)

CHEM 2302 - Organic Chemistry II (3.0 cr)

Wildlife

The wildlife specialization is for students who wish to pursue careers in wildlife science, management, and administration; zoo biology; terrestrial ecology; environmental assessment; and education. With proper selection of electives, students can meet the education criteria for the Certified Wildlife Biologist designation established by the Wildlife Society, the major professional organization for wildlife scientists and managers in North America.

Required Courses

Human Dimensions

Take 2 or more course(s) from the following:

- ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)
- ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
- ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)
- ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)
- FW 5003 - Human Dimensions of Biological Conservation, C/PE, ENVT (3.0 cr)

Animal and Plants

BIOL 2022 - General Botany (3.0 cr)

EEB 4129 - Mammalogy (4.0 cr)

EEB 4134 - Introduction to Ornithology (4.0 cr)

Take 2 or more course(s) from the following:

BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

FR 1101 - Dendrology: Identifying Forest Trees and Shrubs (3.0 cr)

PBIO 4321 - Minnesota Flora (3.0 cr)

PBIO 4511 - Flowering Plant Diversity (3.0 cr)

Community and Ecosystem Ecology

EEB 4014 - Ecology of Vegetation (3.0 cr)

or EEB 4609W - Ecosystem Ecology, WI (3.0 cr)

or ESPM 3575 - Wetlands Conservation (3.0 cr)

or FR 3104 - Forest Ecology (4.0 cr)

or FR 3204 - Landscape Ecology and Management (3.0 cr)

Wildlife

ESPM 3211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)

FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)

FW 4103 - Principles of Wildlife Management (3.0 cr)

FW 5051 - Analysis of Populations (3.0 cr)

FW 5603W - Habitats and Regulation of Wildlife, ENVT, WI (3.0 cr)

Fisheries and Wildlife Minor***Fisheries, Wildlife, and Conservation Biology***

Required credits in this minor: 23 to 25.

The fisheries and wildlife minor enables students in programs such as biology, communications, education, forestry, natural resources, environmental studies, and others to develop an understanding of the principles and practices of fisheries, wildlife, and conservation biology. An overview is provided of fish and wildlife biology and natural history and of the general principles applied to managing their populations and habitats. Students interested in the minor should contact the CFANS Student Services Office.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements**Required Courses****Preparatory Courses**

BIOL 2012 - General Zoology (4.0 cr)

BIOL 3407 - Ecology, ENVT (3.0 cr)

or any ecology course

Minor Courses

FW 2001 - Introduction to Fisheries, Wildlife, and Conservation Biology, ENVT (3.0 cr)

FW 5603W - Habitats and Regulation of Wildlife, ENVT, WI (3.0 cr)

FW 5604W - Fisheries Ecology and Management, ENVT, WI (3.0 cr)

FW 1001 - Orientation in Fisheries, Wildlife, and Conservation Biology (1.0 cr)

or any natural resources orientation course

EEB 4129 - Mammalogy (4.0 cr)

or EEB 4134 - Introduction to Ornithology (4.0 cr)

or FW 3136 - Biology of Fishes (4.0 cr)

FW 5051 - Analysis of Populations (3.0 cr)

or FW 5455 - Sustainable Aquaculture, ENVT, IP (3.0 cr)

or FW 5571 - Avian Conservation and Management (3.0 cr)

or FW 5601 - Fisheries Population Analysis (3.0 cr)

Food Science B.S.***Food Science and Nutrition***

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 93 to 98.

Degree: Bachelor of Science.

Food science applies chemistry, microbiology, and engineering to the science and technology of making foods. Chemistry—because foods undergo chemical reactions when they are heated, frozen, mixed with each other, and stored. Microbiology—because many foods are made by microorganisms (e.g., bread, cheese, yogurt, sauerkraut, tempeh) and because microorganisms cause extensive, rapid, and often dangerous spoilage. Physics and engineering—because foods must be constructed, moved through the factory, made safe, and distributed intact to the consumer.

Food science involves creating new food products and making current products more stable, nutritious, convenient, reliable, and safe.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses**Calculus***Take one of the following course pairs:*

MATH 1271 - Calculus I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

or

MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)

MATH 1572H - Honors Calculus II, H (4.0 cr)

Biology and Chemistry

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

CHEM 2302 - Organic Chemistry II (3.0 cr)

MICB 3301 - Biology of Microorganisms (5.0 cr)

STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

or PSTL 1131 - Principles of Biological Science, BIOL SCI/L (4.0 cr)

BIOC 4025 - Laboratory in Biochemistry (2.0 cr)

or CHEM 2111 - Introductory Analytical Chemistry Lab (2.0 cr)

or CHEM 2311 - Organic Lab (4.0 cr)

or FSCN 4613 - Experimental Nutrition (2.0 cr)

BIOC 3021 - Biochemistry (3.0 cr)

or take the following course pair:

BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)

BIOC 4332 - Biochemistry II: Molecular Mechanisms of Signal Transduction and Gene Expression (4.0 cr)

Physics

PHYS 1301W and 1302W are recommended.

Take the following course pair:

PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)

PHYS 1102W - Introductory College Physics II, PHYS SCI/L, WI (4.0 cr)

or take the following course pair:

PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)

or take the following course pair:

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

or take the following course pair:

PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)

PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Communication

COMM 1101 - Introduction to Public Speaking (3.0 cr)

or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

ENG 3027W - Advanced Expository Writing, WI (4.0 cr)

or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)

Professional Courses

BAE 4744 - Engineering Principles for Biological Scientists (4.0 cr)

FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)

FSCN 1112 - Principles of Nutrition, ENVT (3.0 cr)

FSCN 3102 - Introduction to Food Science (3.0 cr)

FSCN 4111 - Food Chemistry (3.0 cr)

FSCN 4121 - Food Microbiology and Fermentations (3.0 cr)

FSCN 4122 - Laboratory Methods in Food Microbiology and Fermentations (2.0 cr)

FSCN 4312W - Food Analysis, WI (4.0 cr)

FSCN 4332 - Food Processing Operations (3.0 cr)

Food Science Capstone

FSCN 4342 - Properties of Water in Foods (4.0 cr)

or FSCN 4343 - Processing of Dairy Products (4.0 cr)

or FSCN 4345 - Flavor Technology (3.0 cr)

or FSCN 4346 - Functional Foods: Regulations and Technology (3.0 cr)

or FSCN 5481 - Sensory Evaluation of Food Quality (2.0 cr)

Food Science Minor

Food Science and Nutrition

Requirements for this program are current for Fall 2006.

Required credits in this minor: 20.

See major description for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

Note: Many of the courses listed in the minor have prerequisites that do not count toward the 20 credits

Take 20 or more credit(s) from the following:

BAE 4744 - Engineering Principles for Biological Scientists (4.0 cr)

FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)

FSCN 3102 - Introduction to Food Science (3.0 cr)

FSCN 4121 - Food Microbiology and Fermentations (3.0 cr)

FSCN 4111 - Food Chemistry (3.0 cr)

FSCN 4122 - Laboratory Methods in Food Microbiology and Fermentations (2.0 cr)

FSCN 4131 - Food Quality (3.0 cr)

FSCN 4312W - Food Analysis, WI (4.0 cr)

FSCN 4332 - Food Processing Operations (3.0 cr)

Food Systems and the Environment Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

This interdisciplinary minor, based in CFANS, serves students from other colleges who have an interest in and a desire to acquire some breadth about food systems and the environment. Students completing this minor will be better prepared to understand the complexity of modern global food systems; understand the interdependence of rural and urban societies; understand the environmental impact of consumer driven food systems choices; manage natural resources used for food and fiber for the benefit of society; make more responsible personal and public decisions impacting food systems and the environment.

Admission Requirements

This minor is limited to non-CFANS majors. Interested students should contact the minor adviser at 612-625-6754 or the CFANS Student Services Office at 612-625-7254.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

Students may only choose one course from each designator, in consultation with the minor adviser.

Take 15 or more credit(s) from the following:

CFAN 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)

CFAN 3001 - Pests and Crop Protection (3.0 cr)

CFAN 3500 - International Field Studies Seminar (3.0 cr)

AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)

ANSC 1011 - Domestic Animals and Society, C/PE, ENVT (3.0 cr)

ANSC 1101 - Introductory Animal Science (4.0 cr)

APEC 3041W - Economic Development of U.S. Agriculture, HP, WI (3.0 cr)

APEC 3611 - Environmental and Natural Resource Economics, ENVT (3.0 cr)

BAE 5203 - Environmental Impacts of Food Production (3.0 cr)

ENT 4015 - Ornamentals and Turf Entomology (3.0 cr)

ESPM 3221 - Soil Conservation and Land-Use Management (3.0 cr)

FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)

FSCN 1112 - Principles of Nutrition, ENVT (3.0 cr)
 RHET 1315 - The Land in American Experience, CD, OH (3.0 cr)
 RHET 3383 - In Search of Nature, ENVT, OH (3.0 cr)
 SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)
 AGRO 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
 or ANSC 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
 AGRO 4103 - World Food Problems, C/PE, IP (3.0 cr)
 or APEC 4103 - World Food Problems, C/PE, IP (3.0 cr)

Forest Resources B.S.

Forest Resources

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 120.

This program requires summer terms.

Degree: Bachelor of Science.

The forest resources curriculum prepares students to plan, implement, and research the management, protection, and sustainable use of forest and related resources, including timber, water, wildlife, recreation, and aesthetic resources. Students select between two tracks: forest management and planning and forest conservation and ecosystem management. Students taking the forest management and planning track receive training in principles and techniques of resource management. Students taking the forest conservation and ecosystem management track focus on conservation issues and strategies and on a broader understanding of ecosystem structure and function. Students should choose one of these tracks as early as possible in their college careers. A minor is also available.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program:
 RHET 1101

Program Requirements

All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses

Communication Skills

COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

Mathematical Thinking

ESPM 3012 - Quantitative Methods for Environmental Scientists and Managers II (4.0 cr)
 or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
 MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)
 or ESPM 1145 - Quantitative Methods for Environmental Scientists and Managers I (4.0 cr)

Physical and Biological Sciences

BIOL 2022 - General Botany (3.0 cr)
 BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
 PHYS 1001W - Energy and the Environment, ENVT, PHYS SCI/L, WI (4.0 cr)
 or "B" or better in high school physics
 SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)
 or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Social Sciences

ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)
 ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)

Professional Courses

FW 2001 is recommended for sophomores and FW 5603W is recommended for juniors or seniors. Field training in assessment and biology of forests courses are taught at the Cloquet Forestry Center during the summer.

FR 1001 - Orientation and Information Systems (1.0 cr)
 FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
 FR 3218 - Measuring & Modeling Forests (3.0 cr)
 FR 3262 - Remote Sensing of Natural Resources and Environment (4.0 cr)
 FR 3471 - Forest Planning and Management (3.0 cr)
 RRM 4232W - Managing Recreational Lands, ENVT, WI (4.0 cr)
 ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)
 ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
 FR 1101 - Dendrology: Identifying Forest Trees and Shrubs (3.0 cr)
 FR 3104 - Forest Ecology (4.0 cr)
 FR 3114 - Hydrology and Watershed Management (3.0 cr)
 FR 3411 - Managing Forest Ecosystems: Silviculture (3.0 cr)
 FR 5413 - Managing Forest Ecosystems: Silviculture Lab (1.0 cr)
 FW 2001 - Introduction to Fisheries, Wildlife, and Conservation Biology, ENVT (3.0 cr)
 or FW 5603W - Habitats and Regulation of Wildlife, ENVT, WI (3.0 cr)
 ENT 4251 - Forest and Shade Tree Entomology (3.0 cr)
 or PLPA 3003 - Diseases of Forest and Shade Trees (3.0 cr)

Cloquet Program

Take all of the following in the same summer term:

FR 2101 - Identifying Forest Plants (1.0 cr)
 FR 2102 - Northern Forests: Field Ecology (2.0 cr)
 FR 2104 - Measuring Forest Resources (1.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Forest Conservation/Ecosystem Management

This track is for students who wish to learn the fundamentals of forest resources management while gaining knowledge of conservation issues and strategies and in the structure and function of ecosystems. Graduates might pursue careers as forest managers and conservationists or seek careers in research, teaching, and technical support for forest and related resource management and conservation.

All required courses in this track must be taken A-F and completed with a grade of at least C-.

Required Courses

Physical and Biological Sciences

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

Forest Conservation and Management

Students select, with faculty adviser approval, a minimum of 12 additional credits in professional courses chosen from the list below. Courses used to satisfy other requirements may not be used to fill this 12-credit requirement.

Take 12 or more credit(s) from the following:

- ESPM 2041 - Natural Resources Consumption and Sustainability, ENVT, IP (3.0 cr)
- ESPM 3002 - Colloquium: Exotic Plants and Animals (1.0 cr)
- ESPM 3101 - Conservation of Plant Biodiversity, ENVT (3.0 cr)
- ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr)
- ESPM 3031 - Applied Global Positioning Systems for Geographic Information Systems (3.0 cr)
- ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)
- ESPM 3251 - Natural Resources in Sustainable International Development, ENVT, IP (3.0 cr)
- ESPM 3703 - Agroforestry in Watershed Management (3.0 cr)
- ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)
- ENT 5241 - Ecological Risk Assessment (3.0 cr)
- ESPM 5555 - Wetland Soils (3.0 cr)
- FR 3203 - Forest Fire and Disturbance Ecology (3.0 cr)
- FR 3204 - Landscape Ecology and Management (3.0 cr)
- FR 3431 - Timber Harvesting and Road Planning (2.0 cr)
- FR 3612 - Silviculture and Timber Harvesting Practices in Minnesota (1.0 cr)
- FR 4118 - Trees: Structure and Function (3.0 cr)
- FR 5142 - Tropical Forest Ecology, ENVT (3.0 cr)
- FR 5153 - Forest and Wetland Hydrology (3.0 cr)
- FR 5228 - Advanced Assessment and Modeling (3.0 cr)
- FR 5264 - Advanced Forest Management Planning (3.0 cr)
- FR 5611 - Field Silviculture (2.0 cr)
- FR 5615 - Field Remote Sensing and Resource Survey (2.0 cr)
- FW 5003 - Human Dimensions of Biological Conservation, C/PE, ENVT (3.0 cr)
- FW 5603W - Habitats and Regulation of Wildlife, ENVT, WI (3.0 cr)
- FW 5604W - Fisheries Ecology and Management, ENVT, WI (3.0 cr)
- GEO 1001 - Earth and Its Environments, ENVT, PHYS SCI/L (4.0 cr)
- HORT 5071 - Restoration and Reclamation Ecology, ENVT (3.0 cr)
- LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)
- SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)
- BIOL 3407 - Ecology, ENVT (3.0 cr)
- or EEB 4014 - Ecology of Vegetation (3.0 cr)
- or EEB 4609W - Ecosystem Ecology, WI (3.0 cr)
- ENT 4251 - Forest and Shade Tree Entomology (3.0 cr)
- or PLPA 3003 - Diseases of Forest and Shade Trees (3.0 cr)
- ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)
- or ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)

Electives

Choose electives from courses listed above, or consult with your adviser about other options to reach the required 120 credits.

Forest Management and Planning

This track is for students who wish to become directly involved in forest land management or find positions in specialized areas such as resource analysis and planning, timber harvesting, forest protection, or policy development. Graduates may also pursue graduate study to become researchers and teachers or seek advanced positions in administering and managing forest and related natural resources.

All required courses in this track must be taken A-F and completed with a grade of at least C-.

Required Courses

Physical and Biological Sciences

Take one of the following pairs of courses:

BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)
 CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)

or

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

Preparatory Courses

BP 1002 - Wood and Fiber Science (3.0 cr)
 FR 3431 - Timber Harvesting and Road Planning (2.0 cr)
 FR 3612 - Silviculture and Timber Harvesting Practices in Minnesota (1.0 cr)

Advanced Training in Assessment and Management of Forests

These courses are taught at the Cloquet Forestry Center during May session.

FR 5611 - Field Silviculture (2.0 cr)
 FR 5615 - Field Remote Sensing and Resource Survey (2.0 cr)
 FR 5621 - Field Timber Harvesting and Road Planning (2.0 cr)

Additional Professional Courses

With faculty adviser approval, students select additional professional courses from the list below. Courses used to satisfy other requirements may not be used to fill the 6-credit professional requirement.

Take 6 or more credit(s) from the following:

- ESPM 3031 - Applied Global Positioning Systems for Geographic Information Systems (3.0 cr)
- ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)
- ESPM 3251 - Natural Resources in Sustainable International Development, ENVT, IP (3.0 cr)
- ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)
- FR 3203 - Forest Fire and Disturbance Ecology (3.0 cr)
- FR 3204 - Landscape Ecology and Management (3.0 cr)
- FR 4118 - Trees: Structure and Function (3.0 cr)
- FR 5142 - Tropical Forest Ecology, ENVT (3.0 cr)
- FR 5153 - Forest and Wetland Hydrology (3.0 cr)
- FR 5228 - Advanced Assessment and Modeling (3.0 cr)
- FR 5264 - Advanced Forest Management Planning (3.0 cr)
- FR 5412 - Digital Remote Sensing (3.0 cr)
- FW 5603W - Habitats and Regulation of Wildlife, ENVT, WI (3.0 cr)
- FW 5604W - Fisheries Ecology and Management, ENVT, WI (3.0 cr)
- GEO 1001 - Earth and Its Environments, ENVT, PHYS SCI/L (4.0 cr)
- ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)
- or ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
- ENT 4251 - Forest and Shade Tree Entomology (3.0 cr)
- or PLPA 3003 - Diseases of Forest and Shade Trees (3.0 cr)

Forest Resources Minor

Forest Resources

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

The forest resources minor helps students in natural resources and other areas gain deeper understanding of the scientific foundations of forestry, the management of forest resources, and the importance of forest resources to society. Students select from an array of courses in forest assessment, forest biology and management, and forest economics and policy. Students

may include a three-week hands-on field session at the Cloquet Forestry Center as part of their minor. Students interested in the minor should contact the CFANS Student Services Office.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

The sequence of courses in the Cloquet Forestry Center may be used to either meet the minor courses requirement or as an elective, but they cannot be used to satisfy both requirements.

Required Courses

Minor Courses

FR 3104 - Forest Ecology (4.0 cr)

FR 3411 - Managing Forest Ecosystems: Silviculture (3.0 cr)

Take one of the following field experiences:

FR 1101 - Dendrology: Identifying Forest Trees and Shrubs (3.0 cr)

or

Cloquet Program

Take all of the following in the same term:

FR 2101 - Identifying Forest Plants (1.0 cr)

FR 2102 - Northern Forests: Field Ecology (2.0 cr)

FR 2104 - Measuring Forest Resources (1.0 cr)

Electives

Take 7 or more credit(s) from the following:

Forest Policy, Management, and Planning

Take 3 or more credit(s) from the following:

ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)

ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)

FR 3471 - Forest Planning and Management (3.0 cr)

FR 4501 - Urban Forest Management: Managing Greenspaces for People, C/PE (3.0 cr)

RRM 4232W - Managing Recreational Lands, ENVT, WI (4.0 cr)

Resource Assessment

Take 0 or more credit(s) from the following:

FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)

FR 3218 - Measuring & Modeling Forests (3.0 cr)

FR 3262 - Remote Sensing of Natural Resources and Environment (4.0 cr)

Management of Vegetation, Wildlife, Water and Soil Resources

Take 0 or more credit(s) from the following:

ESPM 3703 - Agroforestry in Watershed Management (3.0 cr)

ENT 4251 - Forest and Shade Tree Entomology (3.0 cr)

FR 3501 - Arboriculture: Selection and Maintenance of Trees (3.0 cr)

FR 3114 - Hydrology and Watershed Management (3.0 cr)

FR 3431 - Timber Harvesting and Road Planning (2.0 cr)

FR 5142 - Tropical Forest Ecology, ENVT (3.0 cr)

FR 5413 - Managing Forest Ecosystems: Silviculture Lab (1.0 cr)

PLPA 3003 - Diseases of Forest and Shade Trees (3.0 cr)

Cloquet Program

Take all of the following in the same term:

FR 2101 - Identifying Forest Plants (1.0 cr)

FR 2102 - Northern Forests: Field Ecology (2.0 cr)

FR 2104 - Measuring Forest Resources (1.0 cr)

Integrated Pest Management in Cropping Systems Minor

Agronomy and Plant Genetics

Requirements for this program are current for Fall 2006.

Required credits in this minor: 20.

Students selecting this interdisciplinary minor learn how the environment and cropping systems interact with the biology of the major agronomic or horticultural crop pests. Students also learn to select and apply efficient, environmentally sound pest management procedures. Courses come from agronomy and plant genetics; entomology; horticultural science; plant pathology; and soil, water, and climate.

The minor provides sufficient knowledge and skills for employment in agricultural crop protection, product development and sales, crop management consultation, pest regulation, research, or application of agricultural crop protection materials. To complete the minor, students must complete at least 20 credits.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

AGRO 2501 - Plant Identification for Urban and Rural Landscapes (2.0 cr)

AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)

ENT 3005 - Insect Biology (3.0 cr)

PLPA 3002 - Air Pollution, People, and Plants: The Science and the Ethics, C/PE, ENVT (3.0 cr)

AGRO 4005 - Applied Crop Physiology and Development (4.0 cr)

or BIOL 3002 - Plant Biology: Function (2.0 cr)

and HORT 3005 - Environmental Effects on Horticultural Crops (2.0 cr)

Management

AGRO 4605 - Management Strategies for Crop Production (4.0 cr)

or ENT 5211 - Insect Pest Management (3.0 cr)

or HORT 4061W - Turfgrass Management, WI (3.0 cr)

or HORT 5032 - Sustainable Commercial Vegetable Production Systems (3.0 cr)

or HORT 5041W - Nursery Management, WI (4.0 cr)

or PLPA 5204 - Plant Disease Management (3.0 cr)

Applied Courses

AGRO 4603 - Field Crop Scouting and Problem Diagnosis (3.0 cr)

or AGRO 4888 - Issues in Sustainable Agriculture (2.0 cr)

or ES 3612W - Soil and Environmental Biology, WI (3.0 cr)

or PLPA 5202 - Field Plant Pathology (2.0 cr)

International Agriculture Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

Due to the international nature of food and agricultural systems, and the interdependence of environmental systems, CFANS students are strongly encouraged to incorporate an international experience during their academic degree program. Students with a particular interest in international agriculture can minor in international agriculture and choose between a self-contained block of courses or a series of courses integrated into the

degree program. The minor is structured to include a general overview of international agriculture, followed by area, culture, or language studies; expanded coursework in agriculture; and an international experience. Students are required to travel outside the United States for a minimum two-week academic experience.

The program for a minor in international agriculture must be developed in coordination with International Programs in the college. Students must complete 18 credits with a minimum GPA of 2.00.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

International Opportunities

The University of Minnesota is partnering with universities in Austria, Germany, and Italy to provide semester study abroad opportunities comparing U.S. and the European Union's biotechnology, food safety, and regulatory policies. The US-EU FIPSE Program offers courses taught in English, as well as the chosen country's language. Courses include agricultural economics, tropical agriculture, organic food chain management, and environmental and agricultural food production. German or Italian language studies are required for participants. Admitted students will receive financial support for language classes and a semester of study at one of the EU partner universities.

The Minnesota Studies in International Development program to Ecuador, Ghana, India, Kenya or Senegal offers courses in language training, grassroots development, area studies, and an internship.

Additional international practical or internship experiences may qualify for the minor. Arrangements can be made through MAST International or the CFANS Career Services office.

Travel grants for overseas experience are available through the Academic Enrichment Program. Students are also eligible for scholarships through the Learning Abroad Center.

Required Courses for the Program

Minor Courses

CFAN 3500 - International Field Studies Seminar (3.0 cr)

Take 6 credits 3xxx or 4xxx area culture or language studies

Take 2 - 4 credit(s) from the following:

CFAN 3000 - Directed Studies in International Agriculture (2.0-4.0 cr)

Take 7 or more credit(s) from the following:

AFEE 5331 - History, Philosophy, and Systems of Extension (3.0 cr)

AFEE 5361 - World Development Problems (3.0 cr)

AGRO 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)

APEC 3007 - Applied Macroeconomics: Policy, Trade, and Development, IP (3.0 cr)

APEC 3071 - Agriculture and Economic Growth in Developing Countries (3.0 cr)

APEC 5751 - Global Trade and Policy, IP (3.0 cr)

FSCN 3615 - Sociocultural Aspects of Food, Nutrition, and Health, CD, SSCI (3.0 cr)

PLPA 3001 - Plant Disease Biology and Management (1.0 cr)

PLPA 3002 - Air Pollution, People, and Plants: The Science and the Ethics, C/PE, ENVT (3.0 cr)

RHET 3384 - From Soil to Civilization: Agriculture and the Emergence of the Modern World, IP, SSCI (3.0 cr)

RHET 3376W - Terrorism, C/PE, IP, WI (3.0 cr)

AGRO 4103 - World Food Problems, C/PE, IP (3.0 cr)

or APEC 4103 - World Food Problems, C/PE, IP (3.0 cr)

or FSCN 4103 - World Food Problems, C/PE, IP (3.0 cr)

Internet, Science and Society Minor

Rhetoric

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

This minor introduces students to the field of Internet studies and allows them to select from elective courses that focus on an area of interest. Areas of study might include legal or social issues, such as intellectual property on the Internet or ways in which gender stereotypes are both reinforced and modified online; how scientific and technical information is conveyed on the Internet and how the Internet is playing an important role in our ability to share cutting-edge information; or how controversies, such as current debates over genetically modified foods, are played out in cyberspace.

Several courses in the minor include guest speakers from the affiliated faculty of the Internet Studies Center. Students have the opportunity to publish their work on the Internet Studies Center Web site and to attend guest lectures by internationally known Internet studies scholars.

Students should work with the minor adviser in Rhetoric. Students must complete at least 18 credits for the minor.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

RHET 3371 - Technology, Self, and Society, C/PE, HP (3.0 cr)

RHET 3401 - Internet Communication: Tools and Issues (3.0 cr)

RHET 3577W - Rhetoric, Technology, and the Internet, C/PE, WI (3.0 cr)

Electives

Take 3 or more credit(s) from the following:

RHET 3108 - Gender and Ethnicity and the Rhetoric of Science and Technology, CD (3.0 cr)

RHET 3291 - Independent Study (1.0-3.0 cr)

RHET 4105W - Corporate Video for Technical Communicators, WI (4.0 cr)

RHET 4196 - Internship in Scientific and Technical Communication (3.0-6.0 cr)

Outside Electives

Take 6 credits of approved coursework outside the Department of Rhetoric, which complement the minor.

Land, Nature and Environmental Values Minor

Rhetoric

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

This multidisciplinary minor based in the humanities complements professional and scientific degree programs in CFANS and serves students from other colleges who have an interest in cultural issues relating to the environment. Students are introduced to the historical development, philosophical assumptions, and imaginative expression of the human

relationship to nature and are asked to consider implications of issues involving our use of nature. Students write a senior integrative paper relating some aspect of their major field to social, cultural, or historical trends in the larger society.

For assistance in planning a minor in land, nature, and environmental values, see the humanities course coordinator in the Department of Rhetoric.

Students must complete at least 18 credits to complete the minor.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu/>.

Program Requirements

Required Courses for the Program

Minor Courses

Take 3 or more course(s) from the following:

RHET 1152W - Writing on Issues of Science and Technology, C/PE, WI (4.0 cr)

RHET 1315 - The Land in American Experience, CD, OH (3.0 cr)

RHET 3302 - Science, Religion, and the Search for Human Nature, OH (3.0 cr)

RHET 3371 - Technology, Self, and Society, C/PE, HP (3.0 cr)

RHET 3383 - In Search of Nature, ENVT, OH (3.0 cr)

Take 3 or more credit(s) from the following:

RHET 3291 - Independent Study (1.0-3.0 cr)

Outside Electives

Take 5-6 credits of outside electives chosen with an adviser to complement minor requirements.

Nutrition B.S.

Food Science and Nutrition

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 89 to 111.

Degree: Bachelor of Science.

The nutrition major explores how nutrients and the foods from which they are derived aid the body in health, growth, and development. With major national and international concern for how food and nutrition affect health and disease, registered dietitians and nutritionists have many career opportunities. Students choose one of two options: nutrition and dietetics or nutrition science.

Students expecting to apply for an internship or graduate school should maintain a GPA of at least 2.80. A cumulative GPA of at least 3.00 is highly recommended, and is required for admission in the case of some graduate schools.

The Didactic Program in Dietetics (nutrition and dietetics option) is currently granted initial accreditation and the Coordinated Program in Dietetics is currently granted accreditation status by the Commission on Accreditation for Dietetics Education of the American Dietetic Association, 216 W. Jackson Blvd., Chicago, IL 60606-6995 (312-899-5400).

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu/>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses

Foundation Courses

BIOC 3021 - Biochemistry (3.0 cr)

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

COMM 1101 - Introduction to Public Speaking (3.0 cr)

or PSTL 1461 - Oral Communication in the Public Sphere, C/PE (3.0 cr)

or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

ENGC 3027W - Advanced Expository Writing, WI (4.0 cr)

or RHET 3562W - Technical and Professional Writing, WI (4.0 cr)

BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or MICB 3301 - Biology of Microorganisms (5.0 cr)

or VBS 2032 - General Microbiology With Laboratory (4.0 cr)

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

or PSTL 1131 - Principles of Biological Science, BIOL SCI/L (4.0 cr)

ANSC 3301 - Systemic Physiology (4.0 cr)

or PHSL 3051 - Human Physiology (4.0 cr)

or take the following course pair

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

BIOL 3211 - Animal Physiology (3.0 cr)

Major Courses

FSCN 1001 - Orientation to Nutrition (1.0 cr)

FSCN 1102 - Food: Safety, Risks, and Technology, C/PE (3.0 cr)

FSCN 1112 - Principles of Nutrition, ENVT (3.0 cr)

FSCN 3102 - Introduction to Food Science (3.0 cr)

FSCN 3612 - Life Cycle Nutrition (3.0 cr)

FSCN 4612 - Human Nutrition (3.0 cr)

FSCN 4613 - Experimental Nutrition (2.0 cr)

FSCN 4621W - Nutrition and Metabolism, WI (4.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Nutrition and Dietetics

The nutrition and dietetics option (the Didactic Program in Dietetics) offers preparation in the basic sciences and liberal education, food science, and a focus on human needs related to nutrition. Students identify several areas of interest and develop a varied portfolio of competence. Work experience in nutrition, electives, and extracurricular activities develop communication and leadership skills. Graduates take positions in various food-related fields, including nutrition, industry, and community programs. Graduates with a cumulative GPA of 3.00, strong work experience in nutrition, demonstrated leadership skills, and are highly recommended, may apply for a postbaccalaureate dietetic internship.

Students who plan to become registered dietitians must meet the American Dietetic Association requirements.

Required Courses

Nutrition Courses

FSCN 3614 - Nutrition Education and Counseling (3.0 cr)
FSCN 3615 - Sociocultural Aspects of Food, Nutrition, and Health, CD, SSCI (3.0 cr)
FSCN 3731 - Food Service Operations Management Laboratory (2.0 cr)
FSCN 3732 - Food Service Operations Management (3.0 cr)
FSCN 4614 - Community Nutrition, CD (3.0 cr)
FSCN 4665 - Medical Nutrition Therapy I (3.0 cr)
FSCN 4666 - Medical Nutrition Therapy II (3.0 cr)
FSCN 4732 - Food and Nutrition Management, C/PE (3.0 cr)
MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
MGMT 3001 - Fundamentals of Management (3.0 cr)
STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Electives

Select one course from the following:

FSCN 4111 - Food Chemistry (3.0 cr)
or FSCN 4121 - Food Microbiology and Fermentations (3.0 cr)

Nutrition Science

The nutrition science option is for students planning to do graduate work in nutrition, related sciences, or professional programs such as medicine or dentistry.

Required Courses

Nutrition Science Courses

CHEM 2302 - Organic Chemistry II (3.0 cr)
CHEM 2311 - Organic Lab (4.0 cr)
NUTR 5622 - Vitamin and Mineral Biochemistry (3.0 cr)
NUTR 5623W - Regulation of Energy Balance, WI (2.0 cr)
PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)
PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)
FSCN 4111 - Food Chemistry (3.0 cr)
or an advanced chemistry course may be approved to fulfill this requirement
BIOL 4003 - Genetics (3.0 cr)
or GCD 3022 - Genetics (3.0 cr)
MATH 1142 - Short Calculus, MATH (4.0 cr)
or MATH 1271 - Calculus I, MATH (4.0 cr)
and MATH 1272 - Calculus II (4.0 cr)
STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
or STAT 3021 - Introduction to Probability and Statistics (3.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)

Nutrition Minor

Food Science and Nutrition

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14 to 16.

See major description for more information.

Admission Requirements

Students must complete 4 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
PHSL 3051 - Human Physiology (4.0 cr)

Program Requirements

Required Courses

Minor Courses

FSCN 1112 - Principles of Nutrition, ENVT (3.0 cr)
FSCN 3612 - Life Cycle Nutrition (3.0 cr)
FSCN 4612 - Human Nutrition (3.0 cr)

Take 2 or more course(s) from the following:

FSCN 3614 - Nutrition Education and Counseling (3.0 cr)
FSCN 3615 - Sociocultural Aspects of Food, Nutrition, and Health, CD, SSCI (3.0 cr)
FSCN 4613 - Experimental Nutrition (2.0 cr)
FSCN 4614 - Community Nutrition, CD (3.0 cr)

Recreation Resource Management B.S.

Forest Resources

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 120.

This program requires summer terms.

Degree: Bachelor of Science.

The recreation resource management curriculum prepares students to plan and manage natural and non-urban recreational land and water, as well as manage the people and organizations that depend on these important resources. The curriculum emphasizes natural and managed non-urban areas; natural resources-oriented recreation programs in public and private sectors; social science aspects of natural resources use; and skills in communication, planning, and management. Students select between two tracks: recreation resource management and resource based tourism. Students taking the recreation resource management track receive training in principles and techniques of resource management; students taking the resource based tourism track receive training in organizational and visitor management, policy, and administration.

Graduates may become directly involved in recreation resource management and play specialized supporting roles in areas such as planning and public relations. Some find employment in fields such as environmental education and interpretation. Students pursuing graduate study may develop careers in teaching or research or seek advanced positions in recreation resource management and administration.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses

Communication Skills

COMM 1101 - Introduction to Public Speaking (3.0 cr)
or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

Mathematical Thinking

MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
or MATH 1051 - Precalculus I (3.0 cr)
or ESPM 1145 - Quantitative Methods for Environmental Scientists and Managers I (4.0 cr)
SOC 3811 - Basic Social Statistics, MATH (4.0 cr)
or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or ESPM 3012 - Quantitative Methods for Environmental Scientists and Managers II (4.0 cr)

Social Sciences

ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)
PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
or SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
PSY 3201 - Introduction to Social Psychology (4.0 cr)
or SOC 3411W - Organizations and Society, WI (3.0 cr)
or SOC 3711 - Principles of Social Organization (3.0 cr)
or SOC 3721 - Principles of Social Psychology (3.0 cr)

Professional Orientation

RRM 1001 - Orientation and Information Systems (1.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Recreation Resource Management

This track is for students who wish to develop careers in planning or managing the use of recreational land and water, and for students who plan to pursue graduate study. Graduates may become directly involved in recreation resource management and play specialized supporting roles in areas such as planning and public relations. Graduates may also pursue graduate study to facilitate career advancement or develop a foundation for research and teaching in this area.

Required Courses

Physical and Biological Sciences

BIOL 2022 - General Botany (3.0 cr)
GEO 1001 - Earth and Its Environments, ENVT, PHYS SCI/L (4.0 cr)
BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)
or CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)
BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)
or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Professional Courses

ESPM 3211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)

FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)

FR 1101 - Dendrology: Identifying Forest Trees and Shrubs (3.0 cr)

ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr)

or FR 3411 - Managing Forest Ecosystems: Silviculture (3.0 cr)

BIOL 3407 - Ecology, ENVT (3.0 cr)

or EEB 3001 - Ecology and Society, ENVT (3.0 cr)

or FR 3104 - Forest Ecology (4.0 cr)

ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)

or FR 3114 - Hydrology and Watershed Management (3.0 cr)

ESPM 3101 - Conservation of Plant Biodiversity, ENVT (3.0 cr)

or FW 2001 - Introduction to Fisheries, Wildlife, and Conservation Biology, ENVT (3.0 cr)

ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)

ESPM 4195W - Problem Solving and Planning in Natural Resources, WI (4.0 cr)

RRM 4232W - Managing Recreational Lands, ENVT, WI (4.0 cr)

RRM 5259 - Visitor Behavior Analysis (3.0 cr)

ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)

or ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)

APEC 4311 - Tourism Development: Principles, Processes, Policies (3.0 cr)

or RRM 3201 - Introduction to Travel and Tourism (3.0 cr)

Additional Professional Courses

Take 9-10 credits, choosing one course from each of the three groups. RRM 3201 may be used only if it was not used to fulfill another requirement.

Social and Managerial Sciences

ANTH 3041 - Ecological Anthropology, C/PE, ENVT (3.0 cr)

or APEC 5321 - Regional Economic Analysis (3.0 cr)

or ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)

or GEOG 3361W - Land Use, Landscapes, and the Law, C/PE, ENVT, WI (3.0 cr)

or GEOG 4393 - The Rural Landscape (4.0 cr)

or RHET 3266 - Group Process, Team Building, and Leadership, C/PE (3.0 cr)

Recreation Programming and Management Services

ESPM 4811 - Environmental Interpretation (3.0 cr)

or REC 3551 - Administration and Finance of Leisure Services (4.0 cr)

or REC 5191 - Commercial Recreation and Tourism (3.0 cr)

or REC 5301 - Wilderness and Adventure Education (4.0 cr)

or REC 5311 - Programming Outdoor and Environmental Education (3.0 cr)

or REC 5801 - Legal Aspects of Sport and Recreation (4.0 cr)

or RRM 3201 - Introduction to Travel and Tourism (3.0 cr)

Management of Vegetation, Soil, and Water Resources

FR 3204 - Landscape Ecology and Management (3.0 cr)

or FR 3262 - Remote Sensing of Natural Resources and Environment (4.0 cr)

or GEOG 5565 - Geographical Analysis of Human-Environment Systems (3.0 cr)

or HORT 5071 - Restoration and Reclamation Ecology, ENVT (3.0 cr)

or LA 3204 - Landscape Ecology (3.0 cr)

or LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)

or

Cloquet Program

Take all of the following in the same term:

FR 2101 - Identifying Forest Plants (1.0 cr)

FR 2102 - Northern Forests: Field Ecology (2.0 cr)

FR 2104 - Measuring Forest Resources (1.0 cr)

Resource Based Tourism

This track is for students who wish to understand the fundamentals of resource management, but focus on managing the businesses and visitors who depend on these resources for recreation and revenue. Graduates are likely to pursue opportunities developing and managing resource based tourism operations, programs, and visitors in both domestic and international locations. Graduates may also pursue graduate study to facilitate career advancement or develop a foundation for research and teaching in this area.

Required Courses

Physical and Biological Sciences

BIOL 2022 - General Botany (3.0 cr)
 BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)
 or CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)
 BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
 or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
 GEO 1001 - Earth and Its Environments, ENVT, PHYS SCI/L (4.0 cr)
 or SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)
 or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Professional Courses

ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
 ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)
 REC 5191 - Commercial Recreation and Tourism (3.0 cr)
 RRM 3101 - Nature and Heritage Based Tourism (3.0 cr)
 RRM 3201 - Introduction to Travel and Tourism (3.0 cr)
 RRM 4232W - Managing Recreational Lands, ENVT, WI (4.0 cr)
 BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
 or REC 5801 - Legal Aspects of Sport and Recreation (4.0 cr)
 ESPM 4811 - Environmental Interpretation (3.0 cr)
 or REC 5311 - Programming Outdoor and Environmental Education (3.0 cr)
 MKTG 3010 - Marketing Research (4.0 cr)
 or RRM 5259 - Visitor Behavior Analysis (3.0 cr)
 ESPM 3251 - Natural Resources in Sustainable International Development, ENVT, IP (3.0 cr)
 BIOL 3407 - Ecology, ENVT (3.0 cr)
 or EEB 3001 - Ecology and Society, ENVT (3.0 cr)
 or FR 3104 - Forest Ecology (4.0 cr)
 MGMT 3001 - Fundamentals of Management (3.0 cr)
 MKTG 3001 - Principles of Marketing (3.0 cr)

Additional Professional Courses

Area of Concentration Contract required. Course selections must be made in consultation with a faculty adviser and have faculty adviser signature.

Take 15 or more credit(s) from the following:

COMM 5451W - Intercultural Communication Processes, IP, WI (3.0 cr)
 ESPM 3011W - Ethics and Leadership in Resource Management, C/PE, ENVT, WI (3.0 cr)
 ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)
 FINA 3001 - Finance Fundamentals (3.0 cr)
 FR 3204 - Landscape Ecology and Management (3.0 cr)
 FW 2001 - Introduction to Fisheries, Wildlife, and Conservation Biology, ENVT (3.0 cr)
 FW 4104 - Hunting and Fishing Traditions: Field Sports Reflected in Arts, Literature, and Practice (3.0 cr)
 FW 5003 - Human Dimensions of Biological Conservation, C/PE, ENVT (3.0 cr)
 GEOG 3379 - Environment and Development in the Third World, ENVT, IP (3.0 cr)
 GEOG 3361W - Land Use, Landscapes, and the Law, C/PE, ENVT, WI (3.0 cr)
 JOUR 3201 - Principles of Strategic Communication: Advertising (3.0 cr)

LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)
 MGMT 4008 - Entrepreneurial Management (4.0 cr)
 MKTG 4030 - Selling and Sales Management (4.0 cr)
 MKTG 4040 - Buyer Behavior (4.0 cr)
 MKTG 4050 - Integrated Marketing Communications (4.0 cr)
 MKTG 4060 - Marketing and Distribution Channels (4.0 cr)
 MKTG 4070 - International Marketing (2.0 cr)
 MST 5011 - Museum History and Philosophy (3.0 cr)
 MST 5012 - Museum Practices (3.0 cr)
 PA 5531 - Strategies for Sustainable Development: Theory and Practice (2.0 cr)
 REC 5301 - Wilderness and Adventure Education (4.0 cr)
 SOC 4305 - Society and the Environment: A Growing Conflict, C/PE, ENVT (3.0 cr)

Recreation Resource Management Minor

Forest Resources

Requirements for this program are current for Fall 2006.

Required credits in this minor: 19 to 20.

Students may pursue a recreation resource management (RRM) minor in either one of two tracks: the resource based tourism (RBT) track or the standard RRM track. Students must complete the minor core courses and then choose either the RBT track or the RRM track.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

ESPM 3245 - Sustainable Land Use Planning and Policy, ENVT (3.0 cr)
 RRM 4232W - Managing Recreational Lands, ENVT, WI (4.0 cr)
 RRM 5259 - Visitor Behavior Analysis (3.0 cr)

Recreation Resource Management Options

Students are required to complete one of the following course groups.

Recreation Resource Management

Take 3 or more course(s) from the following:

ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr)
 ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
 ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)
 FR 3104 - Forest Ecology (4.0 cr)
 ESPM 4811 - Environmental Interpretation (3.0 cr)
 or REC 5311 - Programming Outdoor and Environmental Education (3.0 cr)

-OR-

Resource Based Tourism

REC 5191 - Commercial Recreation and Tourism (3.0 cr)
 RRM 3101 - Nature and Heritage Based Tourism (3.0 cr)
 APEC 4311 - Tourism Development: Principles, Processes, Policies (3.0 cr)
 or RRM 3201 - Introduction to Travel and Tourism (3.0 cr)

Scientific and Technical Communication B.S.

Rhetoric

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 46.

Degree: Bachelor of Science.

Scientific and technical communicators apply modern techniques and technologies to the distribution of knowledge in industry, business, education, and government. They write and design information for audiences ranging from scientists to management to consumers of technical products and services. To accomplish their objectives, scientific and technical communicators apply principles of audience analysis, writing and editing, oral communication, usability and testing, visual communication, communication technology, and communication and research theory with an emphasis on science and technology. The program offers an interdisciplinary curriculum that combines theory and practice in a program flexible enough to allow students to plan a course of study appropriate to their career goals.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program: RHET 1101

Program Requirements

All required courses must be taken A-F, (except for the internship, which is taken S-N) and students must earn a grade of at least a C-.

Equivalent transfer courses are accepted in all areas (except for required rhetoric courses). Students are strongly encouraged to pursue a minor in a technical or scientific field.

Required Courses

Foundation Courses

The grammar exemption test and RHET 3441 are waived for 2006–07.

RHET 1001 - Introduction to Scientific and Technical Communication (2.0 cr)
Pass grammar exemption test
or RHET 3441 - Essentials of Grammar, Punctuation, and Style (2.0 cr)

Written, Oral, and Visual Communication

RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)
RHET 3257 - Scientific and Technical Presentations (3.0 cr)
RHET 3266 - Group Process, Team Building, and Leadership, C/PE (3.0 cr)
RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
RHET 3671 - Visual Rhetoric (3.0 cr)
RHET 3672 - Project Design and Development (3.0 cr)
RHET 4561 - Editing and Style for Technical Communicators (3.0 cr)

Theory and Research

RHET 3221W - Theories of Human Communication, C/PE, SSCI, WI (4.0 cr)
RHET 3701W - Rhetorical Theory and Scientific and Technical Communication, WI (4.0 cr)
RHET 4501 - Usability and Human Factors in Technical Communication (3.0 cr)
or RHET 4258 - Information-Gathering Techniques in Scientific and Technical Communication (3.0 cr)

Science, Technology, and Society

Take 2 or more course(s) from the following:

RHET 3108 - Gender and Ethnicity and the Rhetoric of Science and Technology, CD (3.0 cr)
RHET 3302 - Science, Religion, and the Search for Human Nature, OH (3.0 cr)
RHET 3371 - Technology, Self, and Society, C/PE, HP (3.0 cr)
RHET 3383 - In Search of Nature, ENVT, OH (3.0 cr)

Internship

RHET 4196 - Internship in Scientific and Technical Communication (3.0 cr)

Electives

In addition to the courses listed below, students may also include courses they did not use to meet the Theory and Research and Science, Technology, and Society requirements.

Take 5 or more credit(s) from the following:

RHET 3270 - Special Topics (1.0-3.0 cr)
RHET 3291 - Independent Study (1.0-3.0 cr)
RHET 3361 - Literature of Social Movements in the United States: 1950 to 2000, C/PE, LIT (3.0 cr)
RHET 3376W - Terrorism, C/PE, IP, WI (3.0 cr)
RHET 3382W - War, C/PE, OH, WI (3.0 cr)
RHET 3401 - Internet Communication: Tools and Issues (3.0 cr)
RHET 3470 - Special Topics in Communication Skills (2.0 cr)
RHET 3577W - Rhetoric, Technology, and the Internet, C/PE, WI (3.0 cr)
RHET 4105W - Corporate Video for Technical Communicators, WI (4.0 cr)
RHET 4165 - Managerial and Organizational Communication, Planning, and Change (3.0 cr)
RHET 4562 - Theory and Practice in International Business Communication, IP (3.0 cr)
RHET 4573W - Writing Proposals and Grant Management (3.0 cr)
RHET 4662W - Emerging Technologies in Scientific and Technical Communication, WI (4.0 cr)

Soil Science Minor

Soil, Water, and Climate

Requirements for this program are current for Fall 2006.

Required credits in this minor: 20.

The minor provides a strong background in basic soil sciences, covering such topics as soil biology, conservation, contaminants, water movement, and land use. Students completing the minor meet the minimum requirements for employment with the Natural Resources Conservation Service as a soil conservationist. They are also prepared to take the Professional Soil Science Examination for geoscientists. Students must complete 20 credits for the minor.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

ESPM 3221 - Soil Conservation and Land-Use Management (3.0 cr)
ESPM 3612W - Soil and Environmental Biology, WI (3.0 cr)
ESPM 4601 - Soils and Pollution (3.0 cr)
SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)
SOIL 4511 - Field Study of Soils (2.0 cr)
SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)
or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Electives

ESPM 4021W - Environmental Impact Statements, WI (3.0 cr)
 or ESPM 4216 - Contaminant Hydrology (2.0 cr)
 or ESPM 5555 - Wetland Soils (3.0 cr)
 or SOIL 5515 - Soil Genesis and Landscape Relations (3.0 cr)

Sustainable Agriculture Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 17.

This minor allows students to study the sustainability of agricultural food systems from an integrated perspective, including coursework, practical experience, and community reflection. Required courses and courses from the foundational clusters—land and public policy; agriculture, environment, and natural resources; and citizens, science, and society—define the students' minor curriculum. In addition, each student works with a minor adviser to design an individualized practical experience in some aspect of sustainable agriculture (i.e., an internship, experiential learning opportunity, etc.). Through the student-led seminar series, What's Up in Sustainable Agriculture (WUSA), and the senior capstone, students synthesize their learning about sustainability for local, national and global agricultural food systems. For this minor, students must complete 8-10 credits of required courses and a minimum of 9 credits of foundational coursework, for a total of at least 17 credits.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

AGRO 4660 should be taken concurrently with or after completion of the internship.
 AGRO 4660 - Senior Capstone: Leadership, Decision Making, and Problem Solving (2.0 cr)
 AGRO 4888 - Issues in Sustainable Agriculture (2.0 cr)
 AGRO 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)
 or ANSC 3203W - Environment, Global Food Production, and the Citizen, C/PE, ENVT, WI (3.0 cr)

Take 1 - 3 credit(s) from the following:

AFEE 3096 - Experiential Learning: Production and Business (1.0-8.0 cr)
 AGRO 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 ANSC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 APEC 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 ESPM 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 HORT 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 FSCN 4096 - Professional Experience Program: Internship (1.0-3.0 cr)
 PLPA 4096 - Professional Experience Program: Internship (1.0-3.0 cr)

Foundation Course Clusters

Select one course from each of the following clusters. Other courses may be substituted with approval of the minor adviser and coordinator.

Take 9 or more credit(s) including 3 or more sub-requirement(s) from the following:

Land and Public Policy

APEC 3041W - Economic Development of U.S. Agriculture, HP, WI (3.0 cr)
 or GEOG 3361W - Land Use, Landscapes, and the Law, C/PE, ENVT, WI (3.0 cr)
 or PA 5002 - Introduction to Policy Analysis (1.5 cr)
 or RHET 1315 - The Land in American Experience, CD, OH (3.0 cr)
 or AGRO 4103 - World Food Problems, C/PE, IP (3.0 cr)
 or APEC 4103 - World Food Problems, C/PE, IP (3.0 cr)
 or FSCN 4103 - World Food Problems, C/PE, IP (3.0 cr)

Agriculture/Environment and Natural Resources

CFAN 3001 - Pests and Crop Protection (3.0 cr)
 or AGRO 1103 - Crops, Environment, and Society, ENVT (4.0 cr)
 or AGRO 5999 - Special Topics: Workshop in Agronomy (1.0-6.0 cr)
 or ANSC 1101 - Introductory Animal Science (4.0 cr)
 or ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr)
 or ESPM 3221 - Soil Conservation and Land-Use Management (3.0 cr)
 or GEOG 3355 - Environmental Quality, C/PE, ENVT (3.0 cr)
 or HORT 4072 - Growing Plants Organically: What It Means To Be Green (3.0 cr)
 or SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)
 or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Citizens/Science and Society

CFAN 1501 - Biotechnology, People, and the Environment, ENVT (3.0 cr)
 or BAE 5212 - Safety and Environmental Health Issues in Plant and Animal Production and Processing, C/PE, ENVT, H (3.0 cr)
 or GEOG 3371W - Cities, Citizens, and Communities, CD, SSCI, WI (4.0 cr)
 or RHET 3371 - Technology, Self, and Society, C/PE, HP (3.0 cr)
 or SOC 3451W - Cities and Social Change, SSCI, WI (3.0 cr)

Technical Communication Minor

Rhetoric

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

The minor provides theoretical and practical information about how to communicate complex technical information to various audiences. Students take required courses in oral and written communication and in communication technologies. Additional courses (e.g., visual communication, project management, international communication) are selected to complement students' career plans. For help in planning the minor, contact the major coordinator of the Scientific and Technical Communication Program in the Department of Rhetoric.

Students must complete at least 16 credits for the minor.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses for the Program

Minor Courses

Independent study and internship courses cannot be used to satisfy the RHET 3xxx-5xxx requirement.

RHET 3257 - Scientific and Technical Presentations (3.0 cr)
 RHET 3562W - Technical and Professional Writing, WI (4.0 cr)
 RHET 4561 - Editing and Style for Technical Communicators (3.0 cr)

Take 2 or more course(s) from the following:

RHET 3xxx

RHET 4xxx

RHET 5xxx

Urban and Community Forestry B.S.

Forest Resources

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 120.

This program requires summer terms.

Degree: Bachelor of Science.

The urban and community forestry curriculum prepares students for careers in planning and managing vegetation and natural resources in or near urban communities, and for direct involvement in resource management or for specialized supporting roles in areas such as urban planning and environmental education.

Urban forests include areas along streets and in parks, private lands, greenbelts, and open spaces. Urban foresters help communities plan, design, or protect urban and peri-urban forests; supervise tree selection and planting; and design insect control/disease protection and plant health care programs.

Principle employers for graduates in urban and community forestry include city governments, private tree care and arboricultural consulting companies, state and federal forestry agencies, nurseries, and utility companies. Graduates may also be qualified for traditional forestry positions, including those in the federal government.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

General Requirements

Recommended freshman writing course(s) for this program:
RHET 1101

Program Requirements

Students going into consulting or private business should choose courses in the forest health and cultural practices of urban forestry. Students interested in managing the urban landscape should concentrate on courses in the management and administration areas.

All required courses must be taken A-F, and students must earn a grade of at least a C-.

Required Courses

Communication Skills

COMM 1101 - Introduction to Public Speaking (3.0 cr)

or RHET 1223 - Oral Presentations in Professional Settings (3.0 cr)

Mathematical Thinking

ESPM 1145 - Quantitation Methods for Environmental Scientists and Managers I (4.0 cr)

or MATH 1142 - Short Calculus, MATH (4.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

or STAT 5021 - Statistical Analysis (4.0 cr)

or ESPM 3012 - Quantitation Methods for Environmental Scientists and Managers II (4.0 cr)

Social Sciences

ESPM 3261W - Economics and Natural Resources Management, ENVT, SSCI, WI (4.0 cr)

POL 1001 - American Democracy in a Changing World, C/PE, SSCI (4.0 cr)

Physical and Biological Sciences

BIOL 2022 - General Botany (3.0 cr)

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

SOIL 1125 - The Soil Resource, ENVT, PHYS SCI/L (4.0 cr)

or SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Take one of the following pairs of courses.

BIOC 2011 - Biochemistry for the Agricultural and Health Sciences (3.0 cr)

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)

or

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

Professional Courses

ESPM 3211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)

FR 1001 - Orientation and Information Systems (1.0 cr)

FR 3131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)

ESPM 3241W - Natural Resource and Environmental Policy: History, Creation, and Implementation, C/PE, SSCI, WI (3.0 cr)

RRM 4232W - Managing Recreational Lands, ENVT, WI (4.0 cr)

URBS 1001W - Introduction to Urban Studies: The Complexity of Metropolitan Life, C/PE, WI (3.0 cr)

ENT 4251 - Forest and Shade Tree Entomology (3.0 cr)

FR 1101 - Dendrology: Identifying Forest Trees and Shrubs (3.0 cr)

FR 3104 - Forest Ecology (4.0 cr)

FR 3411 - Managing Forest Ecosystems: Silviculture (3.0 cr)

FR 3501 - Arboriculture: Selection and Maintenance of Trees (3.0 cr)

FR 4501 - Urban Forest Management: Managing Greenspaces for People, C/PE (3.0 cr)

HORT 1015 - Woody and Herbaceous Plants (4.0 cr)

HORT 5041W - Nursery Management, WI (4.0 cr)

PLPA 3003 - Diseases of Forest and Shade Trees (3.0 cr)

BIOL 3002 - Plant Biology: Function (2.0 cr)

or FR 4118 - Trees: Structure and Function (3.0 cr)

ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)

or FR 3114 - Hydrology and Watershed Management (3.0 cr)

Cloquet Program

Take all of the following in the same summer term:

FR 2101 - Identifying Forest Plants (1.0 cr)

FR 2102 - Northern Forests: Field Ecology (2.0 cr)

FR 2104 - Measuring Forest Resources (1.0 cr)

Additional Professional Courses

Select courses from the list below in consultation with a faculty adviser.

Take 6 or more credit(s) from the following:

ANTH 3041 - Ecological Anthropology, C/PE, ENVT (3.0 cr)

BP 1002 - Wood and Fiber Science (3.0 cr)

ESPM 3021 - Ecological Vegetation Management: a Consulting Approach, ENVT (3.0 cr)

ESPM 3031 - Applied Global Positioning Systems for Geographic Information Systems (3.0 cr)

ESPM 3101 - Conservation of Plant Biodiversity, ENVT (3.0 cr)
ESPM 3202W - Environmental Conflict Management, Leadership, and Planning, C/PE, WI (3.0 cr)
ESPM 3703 - Agroforestry in Watershed Management (3.0 cr)
FR 3204 - Landscape Ecology and Management (3.0 cr)
FR 3262 - Remote Sensing of Natural Resources and Environment (4.0 cr)
FW 2001 - Introduction to Fisheries, Wildlife, and Conservation Biology, ENVT (3.0 cr)
FW 5603W - Habitats and Regulation of Wildlife, ENVT, WI (3.0 cr)
GEOG 3371W - Cities, Citizens, and Communities, CD, SSCI, WI (4.0 cr)
HORT 4021 - Landscape Design and Implementation I (4.0 cr)
LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)
MGMT 3001 - Fundamentals of Management (3.0 cr)
RHET 3266 - Group Process, Team Building, and Leadership, C/PE (3.0 cr)
SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
SOC 3451W - Cities and Social Change, SSCI, WI (3.0 cr)
SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)

Urban and Community Forestry Minor

Forest Resources

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

The urban and community forestry minor (16 credits) enables students in programs such as education, landscape architecture, horticultural sciences, natural resources, and related areas to understand the science and practice underlying the management of urban and community forests. The minor incorporates fundamental science, arboriculture, forest health, and resource management coursework. Students interested in the minor should contact the CFANS Student Services Office.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

ENT 4251 - Forest and Shade Tree Entomology (3.0 cr)
or PLPA 3003 - Diseases of Forest and Shade Trees (3.0 cr)
FR 3501 - Arboriculture: Selection and Maintenance of Trees (3.0 cr)
or FR 4501 - Urban Forest Management: Managing Greenspaces for People, C/PE (3.0 cr)

Electives

Take 10 or more credit(s) from the following:

ESPM 3211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)
FR 3104 - Forest Ecology (4.0 cr)
FR 3218 - Measuring & Modeling Forests (3.0 cr)
FR 4118 - Trees: Structure and Function (3.0 cr)
HORT 1015 - Woody and Herbaceous Plants (4.0 cr)
RRM 4232W - Managing Recreational Lands, ENVT, WI (4.0 cr)

Cloquet Program

Take all of the following in the same term:

FR 2101 - Identifying Forest Plants (1.0 cr)
FR 2102 - Northern Forests: Field Ecology (2.0 cr)
FR 2104 - Measuring Forest Resources (1.0 cr)

Water Science Minor

Soil, Water, and Climate

Requirements for this program are current for Fall 2006.

Required credits in this minor: 20.

The minor provides students the opportunity to broaden their expertise in the area of water science. Students interested in qualifying as a hydrologist should determine the exact requirements for the Minnesota civil service position by checking the Hydrologist I (Hydrogeology) and Hydrologist I (Water Resources) position descriptions.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

FR 3114 - Hydrology and Watershed Management (3.0 cr)
EEB 4601 - Limnology (3.0 cr)
or GEO 5701 - General Hydrogeology (3.0 cr)
ESPM 5555 - Wetland Soils (3.0 cr)
or SOIL 5232 - Vadose Zone Hydrology (3.0 cr)

Electives

Courses used to fulfill requirements above cannot be chosen to fulfill electives.

Take 11 or more credit(s) from the following:

CE 5541 - Environmental Water Chemistry (3.0 cr)
EEB 4605 - Limnology Laboratory (1.0 cr)
ESPM 4061W - Water Quality and Natural Resources, ENVT, WI (3.0 cr)
ESPM 4216 - Contaminant Hydrology (2.0 cr)
ESPM 5211 - Environmental Biophysics and Ecology (3.0 cr)
GEOE 4351 - Groundwater Mechanics (3.0 cr)
WRS 5001 - Introduction to Field Research in Water Resources (2.0 cr)
FR 5153 - Forest and Wetland Hydrology (3.0 cr)
or GEO 5701 - General Hydrogeology (3.0 cr)
ESPM 5555 - Wetland Soils (3.0 cr)
or SOIL 5232 - Vadose Zone Hydrology (3.0 cr)

General Information

At the heart of every great university is a college encompassing the fundamental disciplines of knowledge. That college at the University of Minnesota is the College of Liberal Arts (CLA). The college was formally established in 1868, 17 years after the founding of the University. CLA undergraduates study with faculty scholars and creative artists who are defining the future in their fields of study.

A CLA education provides not only breadth of knowledge, but depth and proficiency in a particular field, or discipline, of knowledge. CLA students develop habits of creative and critical thinking, develop analytical and problem-solving skills, and learn to communicate across cultures and media. Such skills and knowledge are an indispensable foundation for careers in industries and professions across all sectors of society, from banking and commerce to health care, education, law, public service, and the arts.

Study and research opportunities are available to undergraduates in more than 60 major areas in the social sciences, humanities, and fine arts. In addition to strong discipline-based programs, CLA offers interdisciplinary majors—including studies in cinema and media culture, urban studies, and Chicano studies—that draw on the strengths of disciplines and integrate them in new and exciting ways. CLA also offers B.A. degrees in some science programs housed in the Institute of Technology and the College of Biological Sciences. (See the list of majors for details.) The B.A. degree may be particularly appropriate for science students who wish to become high school teachers, who would like to pursue careers in scientific writing, or who wish to preserve more flexibility in their programs than the B.S. degree allows.

Nearly 14,400 undergraduate students and about 2,300 graduate students were enrolled in CLA programs fall 2005. Their professors are dedicated teachers and pathbreaking researchers, scholars, and creative artists who bring to their interactions with students the most current knowledge and ideas in their fields.

Degree requirements established by the college give students an education solidly and broadly based in the liberal arts. Courses that meet the Twin Cities campus-wide liberal education requirements introduce students to the modes of inquiry and subject matter of the major branches of knowledge, as well as four broad themes: international perspectives, cultural diversity, environmental issues, and citizenship and public ethics.

In recognition of the importance of written communication, students take several writing courses, including a formal first-year composition or rhetoric course and upper level intensive writing courses. The CLA language requirement helps students become proficient in a second language.

As the port of entry to the University for many students, CLA prides itself on its Student Communities, which offer academic and career advising and other services. Student Services staff help direct students to the many learning opportunities available within CLA and throughout the University—including internships and service learning.

Admission

Prospective Student Services

Prospective CLA students can find information about student life and academic programs at www.cla.umn.edu.

Preadmission advising and assistance are offered by the University's Office of Admissions. If students would like to visit the campus and talk about plans for study in CLA, they should contact the Office of Admissions, University of Minnesota, 240 Williamson Hall, 231 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-625-2008), <http://admissions.tc.umn.edu>.

Enrollment Limits—The University of Minnesota has approved enrollment limits for the Twin Cities campus. To remain within those limits, CLA must limit the number of new students it admits. If the college exceeds its enrollment limit, there will be inadequate funding to meet the educational needs of its students. The college will admit as many qualified students as possible without exceeding its projected enrollment limit.

Application Procedures

Freshman Admission

Freshman applicants are high school graduates or high school seniors who will graduate before they enroll in CLA. These students are freshmen regardless of any college credits they may have completed while in high school such as postsecondary enrollment options credits. High school graduates who have enrolled in a postsecondary institution after graduation are considered transfer applicants for admission purposes, regardless of the number of credits completed.

For official and up-to-date information about the University's admissions policies, procedures, and deadlines, please see the latest edition of the Undergraduate Application Booklet available from the Office of Admissions or online.

In fall 2002, nearly three-fourths of CLA freshmen ranked in the top quarter of their class, and one fourth ranked in the top 10 percent. The mean ACT composite score was 25.2. The mean SAT verbal score was 599 and mean SAT math score was 600. Applicants are not guaranteed admission even if they match or exceed some or all of these score levels.

Transfer Admission

Students who have completed at least 26 (39 quarter) credits of transferable college coursework will be considered for admission based on college academic record. High school graduates who have completed less than a full year of college coursework at the time of admission will be considered for admission using a combination of transfer and freshman admission criteria. The key factors considered are cumulative grade point average, course completion patterns, grade trends in the most recent 24 credits, and residency status. See Transfer Admission in the General Information section of this catalog.

Students must indicate a CLA major on the admission application to be considered for admission to CLA. Pre-professional plans are not CLA majors. Students with 60 semester (90 quarter) credits or more must declare a major on their admission application. Some majors have additional requirements for admission to the major. See additional admission requirements

under individual majors in this catalog. Students are admitted in spring semester only if space is available.

Honors Program Admission

For admission to the honors program, students must be admitted to CLA through the regular application procedure described for new freshmen or new transfer students. Students applying for freshman admission to honors must also use the University of Minnesota Honors Programs Application for Freshmen. Admitted students typically rank in the top ten percent of their high school class with an ACT composite score of 28 or higher or an SAT combined math and verbal score of 1260 or higher. Transfer students may apply with grade point averages of 3.60 or higher. Students may be admitted to the honors program after they enroll in the college provided they have at least three semesters remaining before graduation (ordinarily before 75 credits are completed.) For information about program eligibility and application procedures, contact Honors College of Liberal Arts (HCLA), 20 Nicholson Hall, 216 Pillsbury Drive SE, University of Minnesota, Minneapolis, MN 55455 (612-624-5522) or see <http://cla.umn.edu/honors>.

Martin Luther King Program Admission

For admission to the Martin Luther King, Jr. (MLK) Program, students must be admitted to CLA through the regular application procedure described for new freshmen or new transfer students. Students should indicate interest in the MLK Program on their application. For currently enrolled or returning students, information regarding the MLK Program may be obtained in 19 Johnston Hall (612-625-2300) and at <http://mlk.class.umn.edu>.

Non-degree-seeking/Postbaccalaureate Admission

Students interested in enrolling in CLA courses but not in earning a CLA degree may wish to consider enrollment opportunities available through the College of Continuing Education, 101 Wesbrook Hall, 77 Pleasant Street S.E., Minneapolis, MN 55455 (612-624-4000).

Advising services for CLA non-degree-seeking students are available from the student communities. Please consult the Student Services Web site or call 612-625-2020 for more information. Advisers aid in planning programs to suit students' outside demands and in selecting coursework to take fullest advantage of the college's resources.

Orientation

New students must participate in a CLA orientation program before their first semester of enrollment. College faculty and staff, together with staff from the University's Orientation and First-Year Programs Office, introduce students to resources and services of the University and college. College advisers meet with students in groups and individually to explain degree requirements, answer questions, and work out initial registration for courses. Students also receive help using online registration. Orientations are scheduled up to three months before the start of the semester for which students are admitted.

New students receive their scheduled orientation date online, along with a variety of planning resources. Before students come to campus, they should use this information to identify various majors of interest, clarify their goals for the first semester, and consider which on-campus activities they may want to be involved in.

New students receive a *CLA New Student Handbook*. Transfer students with a declared major receive a *CLA Graduation Handbook*. Students who have questions about college procedures between the time they are admitted and when they

enroll should contact the CLA Student Information Office, 49 Johnston Hall (612-625-2020) or visit <http://iamnew.class.umn.edu>.

Degrees/Majors

CLA offers five bachelor's degrees—bachelor of arts (B.A.), bachelor of fine arts (B.F.A.), bachelor of science (B.S.), bachelor of individualized studies (B.I.S.), and bachelor of music (B.M.).

If students are making satisfactory academic progress, they generally are free to select the major and minor of their choice. Some programs, however, limit the number of majors admitted. See the program descriptions below for more information.

Bachelor of Arts Degree—This degree can be earned through majors in most CLA departments and programs. Its breadth and diversity in general education make it valuable as a base for many kinds of careers or advanced study. CLA offers several professional majors and specializations as well as interdepartmental programs for the B.A.

Bachelor of Fine Arts Degree—The Department of Art and the Department of Theatre Arts and Dance offer the B.F.A. for students who demonstrate superior professional promise. Information about program admission and degree requirements can be obtained from the appropriate department office.

Bachelor of Science Degree—The B.S. degree is offered in five areas: child psychology, economics, geography, sociology, and urban studies. The B.S. provides a more specialized concentration than the B.A.

Bachelor of Individualized Studies Degree—To earn this degree, students propose an individualized program of study composed of three areas of concentration based on their personal academic objectives. Proposals must be evaluated and approved by three faculty advisers.

Bachelor of Music Degree—The School of Music offers the B.M. degree for students who demonstrate superior professional promise in performance, music education, and music therapy.

CLA Degrees Earned Concurrently With Other University of Minnesota Degrees—Students may complete two undergraduate degrees concurrently by applying for dual degree status. Students should contact their college office for more information.

Second Degrees, Second Majors, Minors—If students have earned a bachelor's degree at another institution, they may earn a CLA bachelor's degree with a different major by completing all degree requirements, including 30 CLA semester credits. If students are CLA graduates or in the process of earning a CLA degree, they may earn a different CLA bachelor's degree by completing 30 additional CLA credits and meeting all requirements for the second degree. If students are CLA graduates and interested in completing requirements for a second major, but not for a second bachelor's degree in the college, they may complete requirements for another major and have that accomplishment recorded on their official transcript. In addition, students in other Twin Cities colleges may earn majors or minors in CLA.

Graduating with Distinction—CLA students may graduate with distinction, a recognition of a cumulative GPA of 3.75 or higher; with high distinction (traditional honors), a recognition of a cumulative GPA of 3.90 or higher; or both. Only University of Minnesota coursework is counted toward a student's GPA and students must have completed 60 or more semester credits at the University of Minnesota, Twin Cities.

CLA offers major and minor programs in the following subjects.
(See Degree Programs for specific information about each program.)

Acting
African American and African studies
American Indian studies
American studies
Ancient Mediterranean studies (major only)
Anthropology
Architecture
Art
Art history
Asian languages and literatures
Astronomy
Biology, society, and environment
Chemistry
Chicano studies
Child psychology
Classical and Near Eastern archaeology
Classical civilization
Communication studies
Computer science
Cultural studies and comparative literature
Dance
Economics
English
French studies
French and Italian studies (major only)
Geography
Geology
German studies
Global studies
Greek
Hebrew

History
Individualized studies (major only)
Interdepartmental major (major only)
Italian studies
Jewish studies
Journalism
Latin
Linguistics
Mathematics
Microbiology (major only)
Music
Music education (major only)
Music performance (major only)
Music therapy (major only)
Philosophy
Physics
Physiology (major only)
Political science
Psychology
Religious studies
Russian
Scandinavian languages and Finnish
Sociology
Sociology of Law, Criminology, and Deviance
Spanish studies
Spanish and Portuguese studies
Speech-language-hearing sciences
Statistics
Studies in cinema and media culture
Theatre arts
Urban studies
Women's studies

CLA offers additional minor programs in the following subjects.

Asian American Studies
Austrian and Central European Studies
Biblical studies
Dutch
East Asian studies
English as a Second Language (ESL)
European area studies
Gay, Lesbian, Bi-sexual, Transgendered
History of medicine
History of science and technology
Humanities in the West
Latin American studies
Learning abroad
Medieval studies
New media studies
Russian area studies
South Asian and Middle Eastern studies

Students may prepare in CLA for the following professional programs (preparation for these involves one to four years of study in CLA).

Architecture
Dental hygiene
Dentistry
Education
Law
Management
Medical technology
Medicine
Mortuary science
Nursing
Occupational therapy
Pharmacy
Physical therapy
Public affairs
Public health
Recreation, park, and leisure studies
Veterinary studies

CLA Majors

Major Sequences—Candidates for all CLA degrees except the B.I.S. must complete a major to gain depth of understanding in an area of study. More than 60 majors are offered in the college. Requirements change from time to time. Check with the undergraduate studies office in the major department for current information.

Major Requirements

Major Status—Majors are programs of concentration. Each represents the judgment of its department about appropriate study of the discipline at the undergraduate level. The department or students' major advisers may modify individual major programs. Admission to major status in some CLA degree programs requires department permission. See Degree Programs for more information on specific degree programs.

Required Preparatory Courses—Most major programs require preparatory or background courses that qualify students to enter advanced major work. Many of these courses satisfy general education requirements. See individual program listings for required preparatory courses.

Major Project—CLA requires that students complete a major project. The project demonstrates analytic and conceptual skills as well as an understanding of the mode of inquiry characteristic of the discipline. For most majors, the format of the project is a paper.

Individually Designed Interdepartmental Major (IDIM)—The IDIM allows students to design a unique program with an interdisciplinary theme or focus tailored to their individual academic interests. It requires approval by the Individualized Programs Office, 345 Fraser Hall, and three faculty advisers. The major combines coursework from three or more CLA departments. A senior project is required to integrate the areas of concentration.

Bachelor of Individualized Studies—If students seek an even broader program of study than the IDIM, they may wish to consider the B.I.S. degree. For this degree, students design an individualized program made up of three concentrations totaling 50 credits. The program must be evaluated and approved by three faculty advisers. The program must have coherence based on stated academic objectives. This program has much in common with the IDIM—student initiative in proposing courses, close contact with faculty advisers, highly individualized programs. It differs from the IDIM in permitting multiple educational objectives rather than a single theme or concentration, and in allowing one concentration outside the college, provided it is relevant to students' objectives and approved by their advisers. The Bachelor of Individualized Studies Office is in 345 Fraser Hall (612-624-8006). For more information, see the Degree Programs section of this catalog.

Double Major—Students may earn a second major in CLA. Students interested in pursuing a double major should consult with a CLA advising office to learn what steps are necessary for their areas of interest. Students may also combine a CLA major with a major or minor from another college in the University.

Minor

A minor is an approved concentration of 14 or more 2xxx, 3xxx, 4xxx, and 5xxx courses. It is not a requirement for graduation, but is an option for all students at the University. CLA students may choose a minor from another college at the University; likewise, all CLA minors are open to students in other colleges.

Honors in CLA

20 Nicholson Hall (612-624-5522)

Honors in CLA (HCLA) offers freshman/sophomore and junior/senior honors programs to intellectually promising and highly motivated students. Its purpose is to broaden the scope of student learning, encourage full use of student potential, and recognize student accomplishments. Among its offerings are honors seminars with faculty for freshmen/sophomores and juniors/seniors, special advisers, departmental honors plans, and opportunities for advanced research and individual study.

Graduation With Honors—Enrollment in the honors program is required for graduation with the traditional honors designations cum laude, magna cum laude, and summa cum laude. Other graduation criteria include University of Minnesota residence, a grade point average (GPA) of at least 3.50, participation in four honors opportunities, in some instances fulfillment of requirements designated for the major field, and an honors thesis or project. <http://cla.umn.edu/honors/grad.htm>

Departmental Honors Courses—Honors courses or special honors sections of regular courses are small in size and taught by selected teachers. Although grading standards are comparable to those of other courses, topics and materials are approached in greater depth. These courses are designated by an "H" or a "V" after the course number.

2xxx Honors Seminars—These seminars are led by faculty and are open to all honors freshmen and sophomores. Topics change each semester and vigorous student participation is the norm. Field trips and other special learning methods often characterize the seminars. They carry credit, but because new topics and hours are selected each semester, they are not listed in this catalog. A list of topics is available in the Honors Program Office.

3xxx Honors Seminars—These seminars are open to honors program students who have completed 60 credits (other applicants are sometimes admitted when class space permits). In contrast to departmental honors course offerings, which emphasize depth of learning within fields, honors seminars serve the interests of students of high ability but with little background in the subject field. The seminars cover a wide range of topics, often of an interdisciplinary character, and deal with problems and ideas not treated in the regular curricular offerings of the college. Topics are specified in the Class Schedule and descriptions are available in the Honors Program Office.

Freshman-Sophomore Honors Program—Honors students who have earned fewer than 60 credits may participate in a program that provides certain educational opportunities: honors seminars taught by faculty, advising for honors students by professional and peer advisers, special faculty advisers, and special library loan privileges. There are honors opportunities both for students who will seek a CLA degree and for preprofessional students who will complete their degrees outside of CLA. Freshmen and sophomores are strongly encouraged to complete at least two honors courses per year. Students who complete three honors opportunities and earn a 3.50 GPA in their freshman and sophomore years receive a certificate and a notation on their transcript.

Junior-Senior Honors Program—If students have completed 60 credits and declared their major, they may apply to the junior-senior program to pursue "Latin honors." They may participate in the honors curriculum in their major field as well as in a variety of academic opportunities, including honors seminars. Students are assisted in scholarship and fellowship matters, especially in preparation for graduate work, and have access to experienced counsel about graduate and professional study. Students are advised by both departmental honors faculty and their honors adviser. When undertaking a research project, they have special library privileges. Grants are available to help them meet project costs.

Continuation in Honors—The academic progress of honors students is reviewed annually. A 3.50 GPA is required to continue after the sophomore year.

Departmental Honors Curricula—Most CLA departments provide special honors opportunities for which students must meet special requirements. Information about these offerings as well as about graduation with honors may be obtained from department or program offices or from the Honors Program Office.

Honors Program Office—College records for honors students are kept in 20 Nicholson Hall. The office also provides academic advising, procedural information, and other college office services to honors students.

Policies

Scholastic Standing—The Student Scholastic Standing Committee, comprised of collegiate administrators and advisers, interprets and enforces college and University regulations relating to academic affairs. It handles requests for exceptions to registration policies and procedures as well as some degree requirements. The committee administers the college's probation system, monitoring students' performance and dealing with questions of probation, suspension, and readmission.

The committee seeks to maintain the spirit of the college's regulations as flexibly as possible and is empowered to make exceptions in cases in which regulations work to students' educational disadvantage.

Students are urged to consult a committee representative in their college office concerning almost any kind of problem, but especially those they think interfere with their ability to attain their academic objectives. Well-established petition and appeal procedures assure full review of student requests.

Late Cancellation—CLA students may receive one discretionary course cancellation after the cancellation deadline but before study day. This discretionary cancellation may be used only once during a student's enrollment at the University. Other late cancellations are approved by the Student Scholastic Standing Committee only when verified extenuating circumstances that prevent a student from completing a course arise after the cancellation deadline. Any cancellation, discretionary or otherwise, after the cancellation deadline must be requested by written petition in the student's college advising office.

Scholastic Conduct—All incidents of scholastic misconduct are reported to the Office for Student Academic Integrity/Student Judicial Affairs. Students will be informed of ways to resolve problems, sanctions that may be imposed, and appeal procedures. CLA students may contact CLA Student Services (612-625-3846) for more information.

Retention of Student Records—Official transcripts are maintained permanently by the Office of the Registrar. The college files of students who left CLA are retained for seven years; college files of students who applied for graduation but did not graduate are kept indefinitely. Student records of graduates are kept for two years following graduation.

In preparation for graduate school, students may store recommendations in permanent credential files, which are kept in the Career and Community Learning Center.

Graduation Requirements

General Credit Requirements

Credit Requirements—A minimum of 120 credits acceptable to the college are required for all CLA bachelor's degrees; 48 of these credits must be in 3xxx, 4xxx, and 5xxx courses.

To earn a University of Minnesota undergraduate degree, students must present at least 30 semester credits awarded by the campus from which they are seeking to graduate and must complete at least half of upper division major work, and at least 15 of the last 30 credits earned before graduation, on that campus. For students seeing an academic minor, students must take at least three upper division credits in the minor field at the campus from which they will receive their degree. All credit awarded by the University, regardless of the type of instruction, shall count toward the credit requirements for the degree.

Students must complete all campus, college, and program requirements with a minimum GPA of 2.00 in the major and a cumulative GPA of 2.00 or higher in all University coursework.

All degree programs require a C- or better in each course in the major or minor.

A total of 6 semester credits in applied music, physical education, and study skills courses may be applied toward the degree. Credits from typing, word processing, shorthand, first aid, and courses clearly remedial or vocational in nature may not be applied toward any credit requirements.

Credit will not be awarded twice for the same course or for two substantially similar courses.

Degree Requirements After an Absence—Students who have not attended CLA for more than two years must fulfill current graduation requirements.

If less than two years have passed since students last attended CLA, they are under the requirements applicable to them before their absence. Students who plan to leave the University for more than one semester must request a leave of absence through their college advising office.

Liberal Education Requirements

The liberal education curriculum that applies to students' degree programs depends on the date they are admitted to CLA.

Twin Cities Campus Liberal Education Curriculum—The University of Minnesota, Twin Cities liberal education requirements apply to all students entering a baccalaureate degree program in fall 1996 and later. If students entered a degree program before fall 1996 and are uncertain whether or not the liberal education requirements apply, they should check with their academic adviser. See the Liberal Education Requirements section in this catalog for more information.

Second Language Requirement

The study of a second language is considered essential for a liberal education. CLA expects students to have begun second language study in high school or earlier.

In many cases, knowledge of a second language gained before entering CLA may be used to meet part or all of the language requirement. If students are unsure about their level of proficiency, they should consult their adviser or the language department for placement assistance. Normally, one to two years of high school language study equals one semester of college study.

Qualified students may meet part or all of the entrance and graduation requirements by passing examinations arranged with appropriate departments. (These proficiency examinations do not yield college credits.)

No credit is granted for first- or second-year courses in a student's primary language of secondary school instruction. Students who earn a C-, S, or better in a Twin Cities campus language sequence course may request to have preceding courses in the sequence (second-semester level or higher) posted retroactively if they have not already received college credit for equivalent courses at another institution. Students should contact their advising office for more information.

Students planning on the B.A. degree should study a language for three years in high school.

CLA Entrance Proficiency Test—All B.A., art B.F.A., and B.I.S. students who wish to register for French, German, or Spanish courses beyond the second semester must pass the appropriate entrance proficiency test. Students who meet the entrance requirement may continue their study at higher levels in the same language or may begin study in another language. Contact the CLA Language Testing Program (612-624-0862) or see the Web site for testing and placement information.

Graduation Requirement—Students have two options for completing the second language requirement for B.A., B.F.A. in art, and B.I.S. degrees:

- 1 A grade of C-, S, or better in a fourth-semester University of Minnesota language course. Transfer courses will fulfill this requirement if they are at least four semester credits.
- 2 A passing score on the Language Proficiency Exam (LPE), formerly the GPT, which tests at the fourth semester level. A transcript line will be added for those who pass the LPE.

Languages for which LPEs are available include Chinese, Danish, Finnish, French, German, Italian, Japanese, modern Hebrew, Norwegian, Portuguese, Russian, Spanish, and Swedish. Languages that do not have an LPE include Arabic, Dakota, Biblical Greek, Classical Greek, Biblical Hebrew, Hmong, Korean, Latin, and Ojibwe.

Advising

College advisers in academic departments and student communities offer students individual help in planning their studies and meeting other concerns they might have about college life. CLA student communities assist with course selection, registration, vocational and personal decisions, financial problems, and involvement in campus activities.

Based on their preferred interest or major, students are assigned to one of seven student communities (organized by groups of majors) or a special program where they remain throughout their CLA career. Students are also assigned to a specific team of advisers, including their academic adviser, peer adviser, major adviser, and a career services liaison. Basic services are designed to meet students' developmental needs, support students' search for fields of study appropriate to their visions and potential, monitor their academic progress, and help them to be more informed about their choices.

Wise use of the advising system can make students' college experience more satisfying and productive. Students should take pertinent records and materials to adviser appointments, and prepare for program planning sessions by giving careful thought to possible course selections, program schedules, and short- and long-term education and career goals, and reviewing their transcript or computerized degree audit. Students should expect both support and challenge from their adviser.

CLA Student Services Offices

Students' college records are kept in their assigned student community; this community provides advising services and procedural information. To contact a student community or to find a major and its communities, see the CLA Advising Web site at or call the assistant dean's office for CLA Student Services (612-625-3846).

Advising for Special Programs

CLA Honors—20 Nicholson Hall

(612-624-5522) <http://cla.umn.edu/honors>

Martin Luther King, Jr. Program—19 Johnston Hall

(612-625-2300) <http://mlk.class.umn.edu>

The Martin Luther King, Jr. Program is designed for students who are interested in a multicultural education. It provides advising, support services, and instruction through tutorials, introductory course sections, support groups, computerized instruction, study skills workshops, and career seminars. Students enrolled in the program are encouraged to maximize their potential through educationally enriching learning experiences.

Special Learning Opportunities and Resources

Career and Community Learning Center (CCLC)

www.cclc.umn.edu

345 Fraser Hall (service-learning and off-campus study for all U students), 612-626-2044

135 Johnston Hall (career services for CLA), 612-624-7577

The Career and Community Learning Center (CCLC) provides many unique services and programs. Its 345 Fraser Hall office serves all students on the U of M Twin Cities campus with its service-learning and community involvement opportunities, along with various off-campus study programs. CCLC's 135 Johnston Hall office provides career and internship services to College of Liberal Arts students, as well as pre-law advising to all U students.

Service-Learning and Community Involvement (345 Fraser Hall)

—Students are encouraged to expand their education and experiences by taking service-learning classes and volunteering in the community. (CCLC oversees these opportunities for UMTC students, and facilitates service-learning classes with faculty.) CCLC's community-service programming goals include deepening the understanding of social barriers and inequalities, teaching reflective leadership, contributing toward educational and personal growth, and enriching multicultural understanding. Community-based learning opportunities can be part of academic service-learning courses or done individually through CCLC to enrich an academic program. In 2005, CCLC launched the "Community Engagement Scholars Program," which allows students to receive official University recognition (transcript notation, special awards upon graduation) for service-learning and community projects. CCLC also provides the annual "Community Involvement Fair," which hosts almost 100 local community groups on campus. Students can choose to volunteer with various nonprofit and government groups working in many different fields, including direct service work, advocacy, education, community-building, health care, public policy, arts and culture, and more. Incoming first-year students interested in community work can choose to live in a service-learning house.

Off-Campus Study (345 Fraser Hall)—CCLC administers domestic off-campus study programs for all students on the Twin Cities campus. It coordinates the National Student Exchange (NSE) program, which allows students to study for a semester or year at a participating school in the United States or Canada. CLCC also administers HECUA programs, which offer off-campus study programs focused on social justice. These semester-long programs take place in the Twin Cities area and include internships, community projects, and individual and group study. HECUA's Twin Cities programs include City Arts, Environmental Sustainability, and Metro Urban Studies Term.

Internships—Internships are an important vehicle for exploring questions and issues raised in the classroom. They allow students to gain experience in a particular field and learn more about possible career alternatives. Internships are available in all fields of study; some are paid, others unpaid. Internships are available in government, business, human services, science and technology, health care, ecology, education, the arts, broadcasting, publishing, and many other fields.

Academic credit for learning acquired through internship experiences is available through several CLA departments, including some of the courses available under the Interdepartmental Study (ID) designator. Some financial support is available in the form of the "CLA Undergraduate Internship Grant," which funds students doing otherwise unpaid internships in the community. See a CCLC adviser for information on both credit and the grant program.

FLAC and FLIP

Foreign Languages Across the Curriculum (FLAC)—FLAC allows students to apply their knowledge of a second language to the study of a particular discipline. FLAC courses attach a one credit language “trailer” to an existing course. In addition to regular English language coursework, students participate in a section meeting conducted in a second language.

Foreign Language Immersion Program (FLIP)—FLIP gives students an opportunity to strengthen their language skills in French, German, or Spanish by offering courses taught entirely in a second language. FLIP students can experience immersion by carrying an entire semester course load (typically 15 credits) in French, German, or Spanish. Alternatively, students may elect to enroll in only a portion of the FLIP.

For further information about FLAC or FLIP, contact the Institute of Global Studies at 612-624-9007 or see <http://igs.cla.umn.edu>.

Special Achievement

Each semester, the college publicly recognizes superior academic performance through transcript memoranda, notices posted on the first floor of Johnston Hall, on the Web, and announcements to academic departments.

To appear on the Dean’s List, students must complete at least 12 credits of A-F registration, with no N’s, and earn a semester GPA of at least 3.67.

If students believe they qualify for the list but are not included, they should contact the CLA Assistant Dean for Student Services office in 106 Johnston Hall (612-625-3846).

International Programs

CLA credit for study abroad may be earned through independent study or a variety of formal programs. See information on international opportunities in the General Information section of this catalog or contact the Learning Abroad Center, 230 Heller Hall (612-626-9000).

Career Information

CLA Career Services

135 Johnston Hall (612-624-7577) www.cclc.umn.edu

Students get a tremendous head start by developing career management skills and experiences while they’re in school. CCLC’s Johnston Hall office helps CLA students relate their academic interests to major and career options as well as to specific career goals. CCLC provides this assistance in the form of individual advising and a resource room full of information for students to explore. These resources focus on majors, graduate school, job-search skills, job and internship opportunities (including on-campus recruiting events), and community involvement. CCLC provides 2-credit career classes as well as individual workshops on résumé writing, interviewing, job-hunting, networking, and law school exploration. CCLC sponsors an annual “Job and Internship Fair,” and provides an online job database that enables students to post résumés and browse a wide variety of job, internship, and volunteer listings. Students are encouraged to use these services and resources throughout their college career.

Graduate and Professional School Assistance

Many CLA graduates choose to attend graduate or professional school. CCLC helps students explore graduate school options, provides workshops on how to apply, and offers the annual “Graduate and Professional School Day” event, in which some 100 graduate programs participate. To facilitate the graduate school application process, CCLC offers a “Recommendation Letter Files” service for students actively applying to schools. CCLC is also the pre-law advising office for all students on the Twin Cities campus, and can help them explore the legal profession and prepare for and apply to law school.

Student Organization

Student Board

12 Johnston Hall (612-626-0348, clasb@umn.edu, www.tc.umn.edu/~clasb/)

The College of Liberal Arts Student Board (CLA-SB) is the college’s student governance body. The board is the official channel through which recommendations from the CLA student body are brought to the college.

CLA-SB also represents students with seats on many committees and deals with nomination or election of students to seats on many others. These governing councils and committees collectively deal with virtually all aspects of CLA policy.

One primary responsibility of CLA-SB is to maintain contact with department student organizations.

All students are encouraged to participate in the operations of the board and to contribute to decisions affecting the college. The board is composed of elected and appointed members. The board recognizes and practices affirmative action.

Degree Programs and Minors

Acting B.F.A.

Theatre Arts and Dance

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 78.

Degree: Bachelor of Fine Arts.

The B.F.A. in acting is an intensive, individualized, actor training program that uses both faculty from theatre and dance as well as the Guthrie Theater's professional artistic staff to provide selected students with the physical, vocal, emotional, and intellectual skills to realize the dynamics of performing text of classic stature. Students are encouraged to design their individual paths toward artistic fulfillment. The goal is to provide the foundation that inspires students to begin life-long journeys of learning and artistic expression.

Admission Requirements

Entry into the B.F.A. acting program is by audition only and students are admitted only in fall semester.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Freshman Courses

TH 1391 - BFA Acting I (3.0 cr)
TH 1392 - BFA Voice and Speech I (2.0 cr)
TH 1393 - BFA Movement I (2.0 cr)
TH 3503 - Design and Technical Production I: BFA (3.0 cr)
or TH 3513 - Design and Technical Production I (4.0 cr)
TH 1395 - BFA Acting II (3.0 cr)
TH 1396 - BFA Voice and Speech II (2.0 cr)
TH 1397 - BFA Movement II (2.0 cr)
ENGL 1181W - Introduction to Shakespeare, LIT, WI (4.0 cr)
TH 3505 - Design and Technical Production II: BFA (3.0 cr)
or TH 3515 - Design and Technical Production II (4.0 cr)

Sophomore Courses

TH 2391 - BFA Acting III (3.0 cr)
TH 2392 - BFA Voice and Speech III (2.0 cr)
TH 2393 - BFA Movement III (2.0 cr)
TH 3171 - History of the Theatre: Ancient Greece Through Neo-Classicism (3.0 cr)
TH 2395 - BFA Acting IV (3.0 cr)
TH 2396 - BFA Voice and Speech IV (2.0 cr)
TH 2397 - BFA Movement IV (2.0 cr)
TH 3172 - History of the Theatre: Age of Enlightenment to Present (3.0 cr)

Junior Courses

Fall semester of the junior year is in the-study abroad program.

TH 3391 - BFA Acting V (3.0 cr)
TH 3392 - BFA Voice and Speech V (2.0 cr)
TH 3393 - BFA Movement V (2.0 cr)
TH 3395 - BFA Intensive I (2.0 cr)

TH 3398 - BFA Rehearsal & Performance I (2.0 cr)
TH 3399 - BFA Rehearsal and Performance II (2.0 cr)
TH 4532 - Makeup for the Actor (2.0 cr)
Movement elective

Senior Courses

TH 4391 - BFA Intensive II (2.0 cr)
TH 4393 - BFA Rehearsal and Performance III (2.0 cr)
TH 4394 - BFA Rehearsal and Performance IV (2.0 cr)
Movement elective
TH 4395 - BFA Intensive III (2.0 cr)
TH 4398 - BFA Rehearsal and Performance V (2.0 cr)
TH 4399 - BFA Rehearsal and Performance VI (2.0 cr)
Movement elective
TH 4177W - Survey of Dramatic Literature I: Strategic Interpretation, WI (3.0 cr)
or TH 4178W - Survey of Dramatic Literature II: Representation and its Effects, WI (3.0 cr)
2 Theatre Department electives should be taken over the course of 4 years

African American and African Studies B.A.

African American/African Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 30 to 36.

Degree: Bachelor of Arts.

The African American & African Studies major integrates the global study of African peoples by teaching students the tools of inquiry from the liberal arts disciplines. Majors can also take courses in the departmental curriculum that fulfill the University-wide Diversified Core Requirements and the Designated Theme Requirements (see One Stop under registration for more information). Honors and Freshman Seminars are also offered. The core requirement for the major is a combination of courses from one of three disciplinary clusters or two regional concentrations. These include (1) the literatures and arts of the African world, (2) the histories and historiography of the African world, and (3) social and behavioral science perspectives on the African world; (4) the African continent and (5) the African Diaspora.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Arabic, French, German, Hausa, Dutch, Portuguese, Spanish or Swahili.

Students complete 9 credits in the following areas; one ways of knowing course, one history of the field course, and one 3xxx, 4xxx, or 5xxx statistics or field method course approved by the undergraduate adviser; 6-9 AFRO upper division credits in each

of the three areas of thematic concentration; literature and the arts, history, social and behavioral science; AFRO 3251W (3 credits); 3 credit capstone seminar AFRO 4573 or other 4xxx level seminar; 3 credit senior project thesis.

Required Courses

AFRO 1012 - Black Worlds in Global Perspective: Challenges and Changes (3.0 cr)

Major Requirements

The following 1xxx level courses are not required for upper division courses, but students are strongly encouraged to complete depending on their declared disciplinary focus: AFRO 1009, 1011, and 1021

AFRO 4105 - Ways of Knowing (3.0 cr)

AFRO 4557 - History of the Field (3.0 cr)

Statistics or Field Methods

AFRO 5551 - Methods: Use of Oral Traditions as Resources for History (3.0 cr)

or PSY 4801 - Introduction to Statistics (4.0 cr)

or SOC 3801W - Sociological Research Methods, WI (4.0 cr)

or SOC 3811 - Basic Social Statistics, MATH (4.0 cr)

or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 CR)

Gender Issues

AFRO 3251W - Sociological Perspectives on Race, Class and Gender, CD, SSCI, WI (3.0 cr)

or AFRO 3592W - Introduction to Black Women Writers in the United States, CD, LIT, WI (3.0 cr)

or AFRO 3625 - Black Women Writers in the Diaspora (3.0 cr)

or AFRO 3626 - Literature of African American Men: Sex, Family, and Relationships (3.0 cr)

Senior Project

Students complete one AFRO 4xxx level capstone seminar and two senior thesis project courses. The senior thesis project courses cannot be taken concurrently.

AFRO 4991W - Thesis Research and Writing, WI (2.0 cr)

AFRO 4992 - Thesis (1.0 cr)

AFRO 4xxx

Disciplinary Clusters or Regional Concentrations

Depending on the specific focus students are encouraged to take the following 1xxx level courses: AFRO 1009, AFRO 1011, AFRO 1021.

History

Take 9 or more credit(s) from the following: AFRO 1009 is not required for upper level courses, but students are strongly encouraged to complete it if they are concentrating in History.

AFRO 1009 - History of Women in Africa: 1500 to the Present, HP (3.0 cr)

AFRO 3001 - West African History: Early Times to 1800, HP< IP (3.0 cr)

AFRO 3002 - West African History: 1800 to Present, HP, IP (3.0 cr)

AFRO 3120 - Social and Intellectual Movements in the African Diaspora (3.0 cr)

AFRO 3204 - History of South African to 1910, HP (3.0 cr)

AFRO 3205 - History of South Africa from 1910, HP (3.0 cr)

AFRO 3431 - Early Africa and Its Global Connections, HP, IP (4.0 cr)

AFRO 3432 - Modern African in a Changing World, HP, IP (4.0 cr)

AFRO 3436 - Historical Background to Contemporary African Conflicts: Case Studies (3.0 cr)

AFRO 3437 - History of East Africa (3.0 cr)

AFRO 3439 - Popular Narratives of the African Past (3.0 cr)

AFRO 3511

AFRO 3756 - Social and Cultural History of Blacks in Sports (3.0 cr)

AFRO 3864 - African American History: 1619 to 1865, CD, HP (4.0 cr)

AFRO 3866 - The Civil Rights and Black Power Movement, 1954-1984, C/PE, CD (3.0 cr)

AFRO 4001 - Seminar: History of Women in South Africa (3.0 cr)

AFRO 5437 - History of East Africa (3.0 cr)

Literature and the Arts

Take 9 or more credit(s) from the following:

AFRO 3108 - Black Music: A History of Jazz, CD, OH (3.0 cr)

AFRO 3112 - In the Heart of the Beat: the Poetry of Rap (3.0 cr)

AFRO 3301 - The Music of Black Americans, CD, OH (3.0 cr)

AFRO 3578 - Arts of Africa (3.0 cr)

AFRO 3585 - African American Art, CD, OH (3.0 cr)

AFRO 3592W - Introduction to Black Women Writers in the United States, CD, LIT, WI (#.0 cr)

AFRO 3625 - Black Women Writers in the Diaspora (3.0 cr)

AFRO 3626 - Literature of African American Men: Sex, Family, and Relationships (3.0 cr)

AFRO 3601 - Introduction to African Literature

AFRO 3628 - Literature of Rebellion: the Amistad and other Revolts (3.0 cr)

AFRO 3634 - Blues & Rhythm and Blues (3.0 cr)

AFRO 3654 - African Cinema, IP, OH (4.0 cr)

AFRO 4302H - Honors: Women's Personal Narratives, H (3.0 cr)

AFRO 5181 - Blacks in American Theatre (3.0 cr)

AFRO 5182 - Contemporary Black Theatre: 1960-Present (3.0 cr)

AFRO 5593 - The African American Novel (3.0 cr)

AFRO 5597 - Seminar: Harlem Renaissance (3.0 cr)

AFRO 5598 - Seminar: Black Arts Renaissance, 1960s and 1970s (3.0 cr)

AFRO 5655 - African American Cinema, CD, OH (3.0 cr)

Social and Behavioral Sciences, Public Policy/Development

Take 9 or more credit(s) from the following: AFRO 1011 and 1021 are not required for upper level courses, but students are strongly encouraged to complete one if they are concentrating in Social and Behavioral Sciences, Public Policy/Development.

AFRO 1011 - Introduction to African American Studies, C/PE, CD (4.0 cr)

AFRO 1021 - Introduction to Africa, IP (4.0 cr)

AFRO 3061 - The Black Family, CD, SSCI, (3.0 cr)

AFRO 3072 - Racism: Social and Psychological Consequences for Black Americans, CD (3.0 cr)

AFRO 3141 - Africa, ENVT, IP (3.0 cr)

AFRO 4351W - Sociological Perspectives on Race, Class, and Gender, CD, SSCI, WI (3.0 cr)

AFRO 3334 - Black Women: Interdisciplinary Perspectives (4.0 cr)

AFRO 3543 - Psychology and the Black American Experience, CD (3.0 cr)

AFRO 3405 - The African American Child, CD (3.0 cr)

AFRO 4231 - The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States (3.0 cr)

AFRO 5072 - Racism: Social and Psychological Consequences for Black Americans (3.0 cr)

AFRO 5405 - The African American Child (3.0 cr)

Africa

Take 9 or more credit(s) from the following: AFRO 1009 and 1021 are not required for 3xxx level courses, but students are strongly encouraged to complete one if they are concentrating in Africa and Development.

AFRO 1009 - History of Women in Africa: 1500 to the Present, HP (3.0 cr)

AFRO 1021 - Introduction to Africa, IP (4.0 cr)

AFRO 3001 - West African History: Early Times to 1800, HP, IP (3.0 cr)

AFRO 3002 - West African History: 1800 to Present, HP, IP (3.0 cr)

AFRO 3006 - Impact of African Migrations in the Atlantic World, IP (3.0 cr)

AFRO 3141 - Africa, ENVT, IP (3.0 cr)

AFRO 3204 - History of South Africa to 1910, HP, IP (3.0 cr)

AFRO 3205 - History of South Africa from 1910, HP (3.0 cr)

AFRO 3431 - Early Africa and Its Global Connections, HP, IP (4.0 cr)

AFRO 3432 - Modern Africa in a Changing World, HP, IP (4.0 cr)

AFRO 3578 - Arts of Africa (3.0 cr)

AFRO 3654 - African Cinema, IP, OH (4.0 cr)

AFRO 4013 - Cities in Africa: African, Islamic, European Traditions, HP, IP (3.0 cr)

- AFRO 5191 - Seminar: The African American Experience in South Africa (3.0 cr)
 AFRO 5437 - History of East Africa (3.0 cr)
 AFRO 5551 - Methods: Use of Oral Traditions as Resources for History (3.0 cr)
 AFRO 5301 - The African Novel (3.0 cr)

African Diaspora

Take 9 or more credit(s) from the following:

- AFRO 3006 - Impact of African Migrations in the Atlantic World, IP (3.0 cr)
 AFRO 3120 - Social and Intellectual Movements in the African Diaspora (3.0 cr)
 AFRO 3251W - Sociological Perspectives on Race, Class, and Gender, CD, SSCI, WI (3.0 cr)
 AFRO 3334 - Black Women: Interdisciplinary Perspectives (4.0 cr)
 AFRO 3431 - Early Africa and Its Global Connections, HP, IP (4.0 cr)
 AFRO 3432 - Modern African in a Changing World, HP, IP (4.0 cr)
 AFRO 3543 - Psychology and the Black American Experience, CD (3.0 cr)
 AFRO 3597W - Introduction to African American Literature and Culture I, LIT, CD, WI (4.0 cr)
 AFRO 3625 - Black Women Writers in the Diaspora: Comparative Perspectives (3.0 cr)
 AFRO 5597 - Seminar: Harlem Renaissance (3.0 cr)
 AFRO 5598 - Seminar: Black Arts Renaissance, 1960s and 1970s (3.0 cr)
 AFRO 5655 - African American Cinema, CD, OH (3.0 cr)
 AFRO 5120 - Social and Intellectual Movements in the African Diaspora (3.0 cr)
 AFRO 5191 - Seminar: The African American Experience in South Africa (3.0 cr)

African American and African Studies Minor

African American/African Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

The African American & African Studies (AA&AS) minor integrates the global study of African peoples by teaching students the tools of inquiry from the liberal arts disciplines. The minor is designed to be flexible and to meet the needs of students preparing for careers in both the public and private spheres.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Students must complete all required courses on an A-F grade basis and at least 15 credits with a cumulative 2.0 GPA in all minor courses. All courses must have the AFRO designator to count toward the minor requirements.

- AFRO 1012 - Black Worlds in Global Perspective: Challenges and Changes (3.0 cr)

Minor Courses

Take 12 or more credit(s) from the following:

All courses must have the AFRO designator to count toward the major.

- AFRO 3xxx
 AFRO 4xxx
 AFRO 5xxx

American Indian Studies B.A.

American Indian Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 33.

Degree: Bachelor of Arts.

American Indian studies is dedicated to advancing awareness and understanding of the histories and contemporary experiences of American Indian people. The program focuses on the native peoples of the United States and Canada, but also draws on the experiences of indigenous peoples from other parts of the world. This multidisciplinary field looks at the histories, cultures, arts, languages, literatures, philosophies, religions, economies, politics, and legal status of indigenous peoples. The program also focuses on the many differences that have separated tribal nations as sovereign bodies and on the many similarities that unite them in common interests and causes. It gives special attention to the sovereignty of American Indian nations as this is expressed in all walks of life - from the preservation and revitalization of native languages to the protection and retention of native lands.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

For the Language Track, the language must be Dakota or Ojibwe.

Required Courses

Preparatory Courses

- AMIN 1001 - American Indian Peoples in the United States, CD, SSCI (3.0 cr)

Senior Project

- AMIN 4990 - Topics in American Indian Studies (1.0-4.0 cr)
 or AMIN 4991 - Independent Study (1.0-12.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

General Track

The general track is intended for majors who do not wish to complete their second language requirement in Dakota or Ojibwe.

Required Courses

Major Courses

Take 33 or more credit(s) including 5 or more sub-requirement(s) from the following:

- AMIN 1002 - Indigenous Peoples in Global Perspective, SSCI, IP (3.0 cr)
 or AMIN 1003 - Indigenous Peoples: a Minnesota Perspective, CD, OH (3.0 cr)

Tribal Arts and Humanities (Group A)

Take 1 or more course(s) from the following:

- AMIN 3201W/3203 - American Indian Literature, CD, LIT, WI (3.0 cr)
 AMIN 3301 - American Indian Philosophies, CD, OH (4.0 cr)
 AMIN 3401 - American Indian Art, CD (4.0 cr)
 AMIN 3601 - American Indian Oral Traditions, CD, LIT (3.0 cr)

AMIN 4201 - Topics in American Indian Literature (3.0 cr)
 AMIN 4301 - American Indian Intellectuals, CD (3.0 cr)
 AMIN 3402 - American Indians and the Cinema, CD, OH (3.0 cr)
 or AMIN 5402 - American Indians and the Cinema, CD (3.0 cr)
 AMIN 5303 - American Indians and Photography (3.0 cr)
 or AMIN 3303 - American Indians and Photography, CD, OH (3.0 cr)

Culture and History (Group B)

Take 1 or more course(s) from the following:

AMIN 3143 - Language in American Indian Culture and Society (3.0 cr)
 AMIN 3701 - Ojibwe Culture and History, CD, HP (3.0 cr)
 AMIN 3711 - Dakota Culture and History, CD, HP (3.0 cr)
 AMIN 3713 - American Indian Communities of the Great Lakes (3.0 cr)
 AMIN 3870 - Topics in American Indian History (3.0 cr)
 AMIN 3871 - American Indian History: Pre-Contact to 1830, CD, HP (4.0 cr)
 AMIN 3872 - American Indian History: 1830 to the Present, CD, HP (4.0 cr)
 AMIN 3876 - American Indian Education (3.0 cr)
 AMIN 3409 - American Indian Women: Ethnographic and Ethnohistorical Perspectives, CD, SSCI (3.0 cr)
 or AMIN 5409 - American Indian Women: Ethnographic and Ethnohistorical Perspectives, CD (3.0 cr)

Political, Social, and Policy Issues (Group C)

Take 1 or more course(s) from the following:

AMIN 3501 - American Indian Tribal Governments and Politics, C/PE, SSCI (3.0 cr)
 AMIN 3876 - American Indian Education (3.0 cr)
 AMIN 4231 - The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States (3.0 cr)
 AMIN 4501 - Law, Sovereignty, and Treaty Rights, C/PE (3.0 cr)
 AMIN 4511 - American Indian Political Economy, CD (3.0 cr)
 AMIN 4515 - Contemporary American Indian Movements (3.0 cr)
 AMIN 4525W - Federal Indian Policy, C/PE, WI (3.0 cr)
 AMIN 3141 - American Indian Language Planning (3.0 cr)
 or AMIN 5141 - American Indian Language Planning (3.0 cr)

The following courses may be taken to satisfy group requirements with the permission of the Director of Undergraduate Programs:

AMIN 4990 - Topics in American Indian Studies (1.0-4.0 cr)
 AMIN 4991 - Independent Study (1.0-12.0 cr)
 AMIN 4994 - Topics, Independent Study
 AMIN 4996 - Directed Research or Field Study

Electives

Take 15 - 18 credit(s) from the following:

AMIN 3xxx
 AMIN 4xxx
 AMIN 5xxx

Students must take at least one credit of a course to fulfill their Senior Project requirement. This can be fulfilled by taking any of the following courses for credit(s) when designated to work on their senior project: 4990, 4991, 4994, 4996 or 5920.

Language Track

The language focus is designed for students who wish to deepen their understanding of the field by completing two years of either Dakota or Ojibwe.

Students must take four semesters of Dakota or Ojibwe. This will satisfy the CLA second language requirement.

Required Courses

Major Courses

Ojibwe Language Sequence

AMIN 1101 - Beginning Ojibwe I (5.0 cr)
 AMIN 1102 - Beginning Ojibwe II (5.0 cr)
 AMIN 3103 - Intermediate Ojibwe I (5.0 cr)
 AMIN 3104 - Intermediate Ojibwe II (5.0 cr)
 or

Dakota Language Sequence

AMIN 1121 - Beginning Dakota I (5.0 cr)
 AMIN 1122 - Beginning Dakota II (5.0 cr)
 AMIN 3123 - Intermediate Dakota I (5.0 cr)
 AMIN 3124 - Intermediate Dakota II (5.0 cr)

Advanced Level Language Course

AMIN 3141 - American Indian Language Planning (3.0 cr)
 or AMIN 3143 - Language in American Indian Culture and Society (3.0 cr)
 AMIN 3107 - Structure of Anishinaabemowin, the Ojibwe Language (3.0 cr)
 or AMIN 5107 - The Structure of Anishinaabemowin, the Ojibwe Language (3.0 cr)
 AMIN 3108 - History of Anishinaabemowin, the Ojibwe Language (3.0 cr)
 or AMIN 5108 - History of Anishinaabemowin, the Ojibwe Language (3.0 cr)
 AMIN 3109 - Anishinaabe Literature (3.0 cr)
 or AMIN 5109 - Anishinaabe Literature (3.0 cr)

Electives

Take 7 or more credit(s) from AMIN 3xxx, 4xxx, or 5xxx. The senior project can be counted as part of those credits.
 AMIN 4991 - Independent Study (1.0-12.0 cr)

Take 1 or more course(s) from the following:

AMIN 3xxx
 AMIN 4xxx
 AMIN 5xxx

American Indian Studies Minor

American Indian Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

American Indian studies is dedicated to advancing awareness and understanding of the histories and contemporary experiences of American Indian people. The program focuses on the native peoples of the United States and Canada, but also draws on the experiences of indigenous peoples from other parts of the world.

AMIN 3xxx
 AMIN 4xxx
 AMIN 5xxx

American Studies B.A.

American Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 33.

Degree: Bachelor of Arts.

American studies is an interdisciplinary and comparative study of the United States as the outcome of migration, labor accumulation, land acquisition, cultural dissemination, the implantation of U.S. laws and policies, and identity formations around gender, sexuality, and race.

As an interdisciplinary field, American studies brings the social sciences and humanities together. Students and faculty interact in a variety of academic areas, including literature, history, sociology, anthropology, geography, cultural studies, art history, urban studies, political science, and women's studies.

In addition, the Department of American Studies includes a minor in Asian American studies and cooperates with the Departments of African-American and African Studies, American Indian Studies, Chicano Studies, and Indian Studies, which makes it possible for students to concentrate their studies in one of those cultural areas.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Preparatory Courses

Take 2 or more course(s) from the following:

AMST 1xxx

Proseminar Sequence

AMST 4961 - Proseminar I (3.0 cr)

AMST 4962W - Second Proseminar in American Studies, WI (3.0 cr)

Major Courses

Complete seven upper division courses (21 credit minimum), including one course in world cultures. Up to three courses outside of AMST may be counted with the approval of the director of undergraduate studies.

World Cultures Courses

Take 6 or more course(s) from the following:

AMST 3xxx

AMST 4xxx

AMST 5xxx

American Studies Minor

American Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

Ancient Mediterranean Studies B.A.

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 37 to 39.

Degree: Bachelor of Arts.

The program allows students to concentrate on literary and material remains from the Near East and the Mediterranean basin dating from ca. 3000 B.C.E. through 650 C.E. This long era of human history witnessed the development of the ancient civilizations of Mesopotamia, Israel, Egypt, Greece, and Rome—cultures, whose contributions remain fundamental to the modern western world. Students study the literature, history, and archaeology of these regions as a broad interconnected whole. They learn to evaluate and interpret a wide range of evidence from antiquity, as well as to appreciate the various methods by which meaning is extracted from the remains of other cultures and times.

Admission Requirements

Students are strongly encouraged to complete the "Preparatory Courses" requirement shown in program requirements prior to admission to the major.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses**Preparatory Courses**

Another course may fulfill this requirement with the approval of the director of undergraduate studies.

CNES 1001 - World of the Bible: Introduction to the Bible and its Ancient Near Eastern Background, HP (3.0 cr)
 or CNES 1002 - World of Greece, HP (3.0 cr)
 or CNES 1003 - World of Rome, HP (3.0 cr)
 or CNES 1042 - Greek and Roman Mythology, OH (4.0 cr)
 or CNES 1042H - Honors Course: Greek and Roman Mythology, OH, H (4.0 cr)
 or CNES 1043 - Introduction to Greek and Roman Archaeology, HP (4.0 cr)
 or CNES 1044 - Introduction to Near Eastern Archaeology, HP (3.0 cr)
 or CNES 1082 - Jesus in History, HP (3.0 cr)
 or CNES 1082H - Honors Course: Jesus in History, HP, H (4.0 cr)
 or CNES 1201 - The Bible: Context and Interpretation, LIT (3.0 cr)

Major Courses

At least 30 credits must be 3xxx courses or higher, with at least 9 credits from each of three groups. No course may be used to fulfill the credit requirement for more than one group.

Take 33 or more credit(s) from the following:

Take 9 or more credit(s) from the following:

CNES 1001 - World of the Bible: Introduction to the Bible and its Ancient Near Eastern Background, HP (3.0 cr)
 CNES 1044 - Introduction to Near Eastern Archaeology, HP (3.0 cr)
 CNES 1202 - Prophecy in Ancient Israel (3.0 cr)
 CNES 3142 - Art of Egypt, HP (4.0 cr)

 or CNES 5073 - Roman Religion and Early Christianity (3.0 cr)
 CNES 3081W - Classical Epic in Translation, LIT, WI (3.0 cr)
 or CNES 5081 - Classical Epic in Translation (3.0 cr)

Senior Project

Students should get a copy of the departmental statement on major projects from the director of undergraduate studies or department office. Students who complete a major project for another CLA major are not required to complete one for ancient Mediterranean studies.

CNES 3951W - Major Project, WI (4.0 cr)

Anthropology B.A.

Anthropology

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 35.

Degree: Bachelor of Arts.

Anthropology is the study of human beings and cultures throughout the world and through history and prehistory. Our majors emerge with a complete liberal arts education, because Anthropology is partly a natural science, partly a social science, and partly a humanistic study. In addition, anthropology is comparative. It has no boundaries! The entire world is our interest. If you major in Anthropology, you will compare and contrast the biological, social, and cultural similarities and differences of humans and their societies and develop a sophisticated understanding of the biological unity of our species. You will take courses that look at people from evolutionary, historical and cultural perspectives. You will develop critical thinking in areas of globalization, politics, race and cultural diversity. At the U of M, Anthropology majors are therefore expected to take courses in cultural, biological, archaeological and linguistic anthropologies, and are encouraged to specialize in one of these subfields by his or her junior year.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses**Preparatory Courses**

ANTH 1001 - Human Evolution, BIOL SCI/L (4.0 cr)
 ANTH 1003W - Understanding Cultures, IP, SSCI, WI (4.0 cr)
 or ANTH 1005W - Introduction to Cultural Diversity and the World System, CD, IP, WI (4.0 cr)

Major Courses

Take 2 or more course(s) from the following:

ANTH 3001 - Introduction to Archaeology (4.0 cr)
 ANTH 3003 - Cultural Anthropology (3.0 cr)
 ANTH 3005 - Language, Culture, and Power (4.0 cr)

Electives

Students must take five electives, at least three of which must be 4xxx or 5xxx. Students who do not pursue senior project research must take six electives. Directed studies, reading, and research courses can be used to satisfy part of the elective course requirement. The combined number of directed studies, reading, and research credits that can satisfy elective requirements is normally limited to six credits. Special topics courses can be used to satisfy part of the electives requirement.

Take 2 or more course(s) from the following:

ANTH 3xxx
 ANTH 4xxx
 ANTH 5xxx

Take 3 or more course(s) from the following:

ANTH 4xxx
 ANTH 5xxx

Senior Project

Choose one of the following three options to complete the senior project requirement.

ANTH 4011 - Senior Seminar (3.0 cr)
 ANTH 3913 - Senior Project Planning (1.0 cr)
 ANTH 4013 - Senior Project (3.0 cr)

Take 3 or more credit(s) from the following:

ANTH 4xxx
 ANTH 5xxx

Anthropology Minor

Anthropology

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

Anthropologists study human communities, near and far, past and present, and explore how seemingly unrelated aspects of a society are connected and how societies are linked to one another.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements**Required Courses****Preparatory Courses**

ANTH 1001 - Human Evolution, BIOL SCI/L (4.0 cr)
 or ANTH 1003W - Understanding Cultures, IP, SSCI, WI (4.0 cr)
 or ANTH 1005W - Introduction to Cultural Diversity and the World System, CD, IP, WI (4.0 cr)

Minor Courses

Four three-credit courses that have a common focus are required. All 3xxx or higher courses, including special topics courses, may be used to meet this requirement.

Take 12 or more credit(s) from the following:

ANTH 3xxx
 ANTH 4xxx
 ANTH 5xxx

Architecture B.A.

Architecture

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 42.

Degree: Bachelor of Arts.

Architecture encompasses the study and creation of the buildings and environment that we inhabit. The concerns of architecture involve a wide variety of areas of study including the art of representing existing environments and proposals through drawings and models; the technology of building structure, building materials, and natural and mechanical systems; the history, theory, and art of making, using, and understanding buildings as cultural artifacts for human use; and the practice of architecture in the context of urban form and society.

Admission Requirements

Students must complete 2 courses before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.80 for students already admitted to the degree-granting college.
- 2.80 for students transferring from another University of Minnesota college.
- 2.80 for students transferring from outside the University.

Students must complete a Pre-Architecture Planning Sheet with a CLA adviser (located in CLA Society & Culture Student Community, 122 Johnston Hall, 612-624-2549; Martin Luther King Program, 19 Johnston Hall, 612-625-2300; CLA Honors Program, 115 Johnston Hall, 612-624-5522). Students must meet with a College of Architecture and Landscape Architecture undergraduate adviser in the CALA Office of Student Services (612-626-1000). Bring a copy of the completed Pre-Architecture Planning Sheet to the appointment. Students should be prepared to state the courses they will take for their concentration or minor.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Preparatory Courses**

ARCH 1281 - Design Fundamentals I (4.0 cr)
 ARCH 1401 - The Designed Environment (3.0 cr)

Program Requirements

Students are required to take 4 semester(s) of any second language.

All courses in math, physics, and English composition must be taken A-F with grades of C- or better to satisfy degree requirements and to progress in sequence courses.

During their program, students should maintain a portfolio of originals or duplicates of all freehand drawings, projects, and architecture studio designs. A portfolio is required for application to the accelerated program and the graduate professional degree program.

The accelerated status option allows students to combine the B.A. with M.Arch. in six years instead of seven. See an adviser for more information.

Required Courses

Math and Physics Courses

MATH 1142 - Short Calculus, MATH (4.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

PHYS 1101W - Introductory College Physics I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

Concentration or Minor

B.A. majors complete a concentration (18-credit minimum) of 3xxx-5xxx courses outside the major, or a minor outside the major, as a means to broaden the social, cultural, and international aspects of their interest area. Any formal University minor will satisfy this requirement. Courses for a concentration are chosen from various disciplines that affect design decisions (for example, economics, geography, housing, natural resources, and urban studies).

Major Courses

In addition to the required courses, students must complete 13 or more elective credits, at least four of which must be ARCH 32xx.

ARCH 1301 - Introduction to Drawing in Architecture and Landscape Architecture, OH (4.0 cr)

ARCH 3281 - Design Fundamentals II (4.0 cr)

ARCH 3401W - Environmental Design and the Sociocultural Context, C/PE, WI (3.0 cr)

ARCH 3411 - Architectural History to 1750, HP, IP (3.0 cr)

ARCH 3412 - Architectural History since 1750, HP, IP (3.0 cr)

ARCH 3611 - Design in the Digital Age (3.0 cr)

ARCH 4501 - Architecture and Ecology (4.0 cr)

ARCH 4701 - Introduction to Urban Form and Issues (3.0 cr)

LA 3501 - Environmental Design and Its Biological and Physical Context, ENV (3.0 cr)

Take 13 or more credit(s) from the following:

ARCH 3xxx

ARCH 4xxx

ARCH 5xxx

Art B.A.

Art

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 38.

Degree: Bachelor of Arts.

The program provides instruction in the visual arts by emphasizing the development of visual awareness and expression through hands-on involvement in the creative process. In the preparatory studio courses, students become familiar with the various materials and concepts used to understand the nature of the visual language. Students then choose additional courses from such areas as drawing, painting, ceramics, printmaking, photography, sculpture, time and interactivity, papermaking, and book arts.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Preparatory Courses

ARTS 1001W - Concepts in Visual Art, OH, WI (4.0 cr)

ARTS 1101 - Drawing, OH (4.0 cr)

ARTS 1301 - Sculpture, OH (4.0 cr)

or ARTS 1801 - Ceramics, OH (4.0 cr)

ARTS 1501 - Printmaking, OH (4.0 cr)

or ARTS 1601 - Electronic Art, OH (4.0 cr)

or ARTS 1701 - Photography, OH (4.0 cr)

Major Courses

Take 15 or more credit(s) from the following:

ARTS 3xxx

ARTS 4xxx

ARTS 5xxx

Take 2 or more course(s) totaling 6 or more credit(s) from the following:

ARTH 2xxx

ARTH 3xxx

ARTH 4xxx

ARTH 5xxx

Take no more than 3 credit(s) from the following:

ARTH 1xxx

Senior Project

ARTS 3444 - Major Project (1.0 cr)

Art B.F.A.

Art

Requirements for this program are current for Summer 2006.

Required credits to graduate with this degree: 126.

Required credits within the major: 68.

Degree: Bachelor of Fine Arts.

The program provides in-depth instruction in the visual arts through a high concentration of coursework in the Department of Art. Admission is based on portfolio evaluation. The program is oriented toward professional practice or admission to a master's degree program.

Admission Requirements

Students must complete 5 courses before applying to the program.

Art majors may apply to the B.F.A. degree program after completing the five preparatory core courses required in the major. Application is made by submitting a portfolio to a faculty committee for review. A faculty adviser is chosen upon admission to the B.F.A. program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

ARTS 1001W - Concepts in Visual Art, OH, WI (4.0 cr)

One course may be an additional 1xxx elective if a second media area is desired.

Take 3 or more course(s) from the following:

ARTS 3xxx
 ARTS 4xxx
 ARTS 5xxx

Art History B.A.

Art History

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 29.

Degree: Bachelor of Arts.

Using a wide variety of methodological approaches, art history faculty help students develop an awareness and knowledge of the visual environments from all periods of history. All 1xxx level courses and most 3xxx courses do not have prerequisites and are intended for general audiences. Students who intend to apply for graduate school are strongly encouraged to take as many 5xxx courses from as many different professors as possible.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

The department urges majors to take courses that cover the history of art from the earliest periods through the current day, and from both western and non-western cultures. Students are also encouraged to take courses from a variety of instructors to ensure exposure to various approaches and methods.

Required Courses**Studio Art Course**

This course must be a hands-on course such as sculpture, drawing, photography, or printmaking, rather than an art history course.

Take 4 or more credit(s) from the following:

ARTS 1xxx

Major Courses

The adviser and director of undergraduate studies work closely with majors to ensure that programs are not narrowly constructed. ARTH 3933/5993, ARTH 5994, ARTH 3975, and S-N credits may not be used to fulfill major requirements. One ARTH 1xxx course may be substituted for a 3xxx or 4xxx course.

Take 5 or more course(s) from the following:

ARTH 3xxx

ARTH 4xxx

Take 2 or more course(s) from the following:

ARTH 5xxx

Senior Project

Before the end of the junior year, students select a “project” course with permission from the course instructor. The student completes a research paper for the course. The next semester, the student registers in ARTH 3971W or ARTH 3971V and under the instructor’s supervision develops the paper into the major project.

ARTH 3971W - Major Project, WI (1.0 cr)

ARTH 3971V-Honors Project, WI (3.0 cr)

Art History Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

Using a wide variety of methodological approaches, art history faculty help students develop an awareness and knowledge of the visual environments from all periods of history.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements**Required Courses****Minor Courses**

Take at least three ARTH 3xxx courses. One ARTH 1xxx course may be substituted for a 3xxx course. ARTH 3933/5993, ARTH 5994, ARTH 3975, and S/N credits may not be used to fulfill minor requirements.

Electives

Take 1 or more course(s) from the following:

ARTH 5xxx

Asian American Studies Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: xx.

The Asian American Studies minor focuses on the history, politics, and culture of Americans of Asian descent. The courses are designed to help students explore the diversity of Asian American communities, and the history and present conditions of racial formation in the United States and other parts of the Americas. The minor draws from courses in a number of disciplines and academic approaches, and encourages social awareness, critical thinking, the development of new perspectives, and artistic appreciation.

Courses included in the minor allow students to develop their knowledge of Asian American issues in many different contexts. Some courses emphasize an in-depth study of Asian American history, literature and culture, social issues, politics, and psychology. Other courses include significant attention to Asian American Studies topics in the course of broader discussions.

Electives

Courses used to fulfill the minor courses requirement cannot also be used to fulfill the elective requirement. In addition to the required core course, four courses from a list of approved courses, which include the following: A maximum of eight credits of elective courses may be earned from a single department. NOTE: These courses will be approved for the minor only if they are taught by AAS faculty.

AAS/AFRO 4231 - The Color of Public Policy

AAS 3270/ALL 3270 - Service Learning in the Asian Community

AAS 3920/ALL 3900 - Topics in Asian Literature and Culture

ALL 3001 - Reading Asian Cultures (3.0 cr)

AMST 3113W: America’s Diverse Cultures

AMST 3114 - America in International Perspective: Post-1965 Immigration (3.0 cr)

ANTH 4047 - Anthropology of American Culture (3.0 cr)

ENGL 4232 - American Drama by Writers of Color (3.0 cr)

HIST 3822 -20th Century U.S. History, 1945-present (3.0 cr)

HIST 3875 - Comparative Race and Ethnicity in U.S. History (3.0 cr)

LING 3707 - Ethnic Bilingualism in the United States, CD (3.0 cr)

SOC 3211W - American Race Relations, CD, SSCI, WI (3.0 cr)

SOC 3251W - Race, Class, and Gender, CD, SSCI, WI (3.0 cr)

WOST 4103 - International Feminist Theories (3.0 cr)

Asian Languages and Literatures B.A.**Asian Languages and Literatures**

Requirements for this program are current for Summer 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 35.

Degree: Bachelor of Arts.

Asia is an increasingly important part of world politics, economics, and culture. The program prepares students to interact with the people and cultures of Asia.

Students in the program study an Asian language—Chinese, Hindi, Hmong, Japanese, Korean—as well as methods of literary and cultural analysis. The language study provides advanced spoken and written skills that allow students direct access to the people and cultures of Asia, where over half the world’s population lives. The analytical courses give a theoretically

sophisticated understanding of the rich literary and cultural texts, from the accepted literary canon to popular culture and film.

The major has six concentrations—Chinese, Hindi, Hmong, Japanese, Korean—each of which introduces a broad range of language, literary, and cultural texts. Along with concentration courses, students may take related electives outside the department and during study abroad. The concentrated study in upper level courses, leads to the senior project. Study abroad is strongly encouraged and can contribute credit to the major.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take a total of 6 semester(s) of Chinese, Hindu/Urdu, Japanese, or Korean. Two semesters must be advanced language courses.

Students choosing a classical track do so in consultation with the director of undergraduate studies. Students with advanced ability in the language may substitute 5xxx ALL courses to meet this requirement.

Chinese

CHN 3031 - Advanced Modern Chinese (4.0 cr)

CHN 3032 - Advanced Modern Chinese (4.0 cr)

or

Hindi/Urdu

HNDI 4161 - Advanced Hindi (4.0 cr)

HNDI 4162 - Advanced Hindi (4.0 cr)

or

Japanese

JPN 3031 - Third-Year Japanese (4.0 cr)

JPN 3032 - Third-Year Japanese (4.0 cr)

or

Korean

KOR 3031 - Third Year Korean (4.0 cr)

KOR 3032 - Third Year Korean (4.0 cr)

Major Courses

One course must be a 5xxx course. Only one course must be modern. One course must be classical. One course must be ALL 3001, one 1xxx ALL course may be applied.

Take 4 or more course(s) from the following:

ALL 1xxx

ALL 2xxx

ALL 3xxx

ALL 4xxx

ALL 5xxx

Electives

Courses in the arts, humanities, or social sciences may include ALL courses, non-ALL courses, study abroad courses, and transfer courses. Courses may not include 2-credit classes, with the exception of 1- or 2-credit study abroad courses approved by the director of undergraduate studies. Consult an adviser for appropriate course options.

Two courses in the arts, humanities or social sciences.

Senior Project

Undertaken with a faculty adviser. Registration must be with instructor permission. May be taken alone or with an upper division ALL course in the senior year. May be a 20-25 page paper, a creative project, or a translation conceived in consultation with a faculty adviser. If taken with an upper

division course, the project is 1 credit. If taken as a stand-alone course, the project is 2 credits.

ALL 4900W - Major Project, WI (1.0-2.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.)

Honors students are required to complete one sub-plan plus the honors sub-plan.

Chinese Literature, Culture, and Media

If a 5xxx ALL course has not otherwise been used to meet major requirements, it must be completed as part of this track.

Classical

Take 1 or more course(s) from the following:

ALL 1335W - Chinese Ways of Living: Philosophical and Literary Approaches, OH, C/PE, WI (3.0 cr)

ALL 3232W - "Short" Poetry in China and Japan, LIT, IP, WI (3.0 cr)

ALL 3265W - The Fantastic in East Asia: Ghosts, Foxes, and the Alien, OH, WI (3.0 cr)

ALL 3333 - Gender and Sexuality in Traditional Chinese Literature (3.0 cr)

ALL 3363 - Imagined Worlds in Ming Qing China (3.0 cr)

ALL 3373 - Religion and Society in Imperial China, HP (3.0 cr)

ALL 5265 - Traditional Poetics and Aesthetics in East Asia (4.0 cr)

ALL 5343 - Lovers, Clowns, and Acrobats: An Introduction to Chinese Drama (4.0 cr)

ALL 5900 - Topics in Asian Literature (1.0-4.0 cr)

Modern

Take 1 or more course(s) from the following:

ALL 3300 - Topics in Chinese Literature (1.0-3.0 cr)

ALL 3337 - Chinese Literature and Popular Culture Today (3.0 cr)

ALL 3356W - Chinese Film, IP, OH, WI (3.0 cr)

ALL 3361W - Maps, Pictures, and Writing in the Representation of Taiwan, OH, IP, WI (3.0 cr)

ALL 3371 - History of Chinese Cities and Urban Life (3.0 cr)

ALL 5357 - Chinese Cinematic Realisms (4.0 cr)

ALL 5366 - The Nation in Modern Chinese Film and Literature (4.0 cr)

Japanese Literature, Culture, and Media

If a 5xxx ALL course has not otherwise been used to meet major requirements, it must be completed as part of this track.

Classical

Take 1 or more course(s) from the following:

ALL 3232W - "Short" Poetry in China and Japan, LIT, IP, WI (3.0 cr)

ALL 3265W - The Fantastic in East Asia: Ghosts, Foxes, and the Alien, OH, WI (3.0 cr)

ALL 3433W - Traditional Japanese Literature in Translation, LIT, WI (3.0 cr)

ALL 3441W - Japanese Theater, OH, WI (3.0 cr)

ALL 5265 - Traditional Poetics and Aesthetics in East Asia (4.0 cr)

ALL 5433 - Women's Writing in Premodern Japan in Translation (4.0 cr)

ALL 3920 - Topics in Asian Culture (1.0-4.0 cr)

or ALL 5920 - Topics in Asian Culture (1.0-4.0 cr)

Modern

Take 1 or more course(s) from the following:

ALL 1441 - Popular Music and Media in Modern Japan, OH, IP (3.0 cr)

ALL 3436 - Postwar Japanese Literature in Translation (3.0 cr)

ALL 3437 - Early 20th Century Japanese Literature in Translation, LIT (3.0 cr)

ALL 3456 - Japanese Film, OH (3.0 cr)

ALL 3457 - War and Peace in Japan Through Popular Culture (4.0 cr)

ALL 5436 - Literature by 20th-Century Japanese Women in Translation (4.0 cr)

ALL 5466 - Japanese Popular Culture in a Global Context (4.0 cr)

ALL 5476 - Japanese Minority Literatures (4.0 cr)

ALL 5477 - Kurosawa, Masculinity, and Cold War (4.0 cr)

ALL 5920 - Topics in Asian Culture (1.0-4.0 cr)
 ALL 3920 - Topics in Asian Culture (1.0-4.0 cr)
 or ALL 5920 - Topics in Asian Culture (1.0-4.0 cr)

South Asian Literature, Culture, and Media

If a 5xxx ALL course has not otherwise been used to meet major requirements, it must be completed as part of this track.

Take 3 or more course(s) from the following:

Classical

Take 1 or more course(s) from the following:
 ALL 3014W - Art of India, IP, OH, WI (4.0 cr)

Modern

Take 1 or more course(s) from the following:
 ALL 3900 - Topics in Asian Literature (1.0-4.0 cr)
 ALL 3920 - Topics in Asian Culture (1.0-4.0 cr)
 ALL 3637W - Modern South Asian Literature, LIT, WI (3.0 cr)
 ALL 3676 - Culture and Society of India, IP, SSCI (3.0 cr)
 ALL 5636 - South Asian Women Writers (4.0 cr)
 ALL 5900 - Topics in Asian Literature (1.0-4.0 cr)
 ALL 5920 - Topics in Asian Culture (1.0-4.0 cr)

Social Formations in Asia

If a 5xxx ALL course has not otherwise been used to meet major requirements, it must be completed as part of this track. ALL 3920 may be classical or modern depending on the topic.

Classical

Take 1 or more course(s) from the following:
 ALL 3265W - The Fantastic in East Asia: Ghosts, Foxes, and the Alien, OH, WI (3.0 cr)
 ALL 3363 - Imagined Worlds in Ming Qing China (3.0 cr)
 ALL 3373 - Religion and Society in Imperial China, HP (3.0 cr)
 ALL 5433 - Women's Writing in Premodern Japan in Translation (4.0 cr)

Modern

Take 1 or more course(s) from the following:
 ALL 1275 - Buddhism in East Asia (3.0 cr)
 ALL 1335W - Chinese Ways of Living: Philosophical and Literary Approaches, OH, C/PE, WI (3.0 cr)
 ALL 3001 - Reading Asian Cultures (3.0 cr)
 ALL 3333 - Gender and Sexuality in Traditional Chinese Literature (3.0 cr)
 ALL 3371 - History of Chinese Cities and Urban Life (3.0 cr)
 ALL 3457 - War and Peace in Japan Through Popular Culture (4.0 cr)
 ALL 5466 - Japanese Popular Culture in a Global Context (4.0 cr)
 ALL 5476 - Japanese Minority Literatures (4.0 cr)
 ALL 5477 - Kurosawa, Masculinity, and Cold War (4.0 cr)
 ALL 5636 - South Asian Women Writers (4.0 cr)
 ALL 3920 - Topics in Asian Culture (1.0-4.0 cr)
 or ALL 5920 - Topics in Asian Culture (1.0-4.0 cr)

Visual and Aural Cultures in Asia

If a 5xxx ALL course has not otherwise been used to meet major requirements, it must be completed as part of this track.

Take 3 or more course(s) from the following:

Classical

Take 1 or more course(s) from the following:
 ALL 3014W - Art of India, IP, OH, WI (4.0 cr)
 ALL 5343 - Lovers, Clowns, and Acrobats: An Introduction to Chinese Drama (4.0 cr)

Modern

Take 1 or more course(s) from the following:
 ALL 1001 - Asian Film and Animation (3.0 cr)
 ALL 1441 - Popular Music and Media in Modern Japan, OH, IP (3.0 cr)
 ALL 3356W - Chinese Film, IP, OH, WI (3.0 cr)
 ALL 3361W - Maps, Pictures, and Writing in the Representation of Taiwan, OH, IP, WI (3.0 cr)

 ALL 5900 - Topics in Asian Literature (1.0-4.0 cr)

Asian Languages and Literatures Minor

Asian Languages and Literatures

Requirements for this program are current for Fall 2006.

Required credits in this minor: 28 to 30.

Asia is an increasingly important part of world politics, economics, and culture. The minor prepares students to interact with the people and cultures of Asia.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Chinese, Hindi, Japanese, or Korean and 2 courses which must be upper division ALL designator, 6 to 8 credits total, related to the area of concentration.

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Chinese Languages and Literatures

Required Courses

Chinese Language

CHN 1011 - Beginning Modern Chinese (6.0 cr)
CHN 1012 - Beginning Modern Chinese (6.0 cr)
CHN 3021 - Intermediate Modern Chinese (5.0 cr)
CHN 3022 - Intermediate Modern Chinese (5.0 cr)

Take 2 or more course(s) from the following:

ALL 3xxx
ALL 4xxx
ALL 5xxx

Japanese Languages and Literatures

Required Courses

Japanese Language

JPN 1011 - Beginning Japanese (6.0 cr)
JPN 1012 - Beginning Japanese (6.0 cr)
JPN 3021 - Intermediate Japanese (5.0 cr)
JPN 3022 - Intermediate Japanese (5.0 cr)

Korean Languages and Literatures

Required Courses

Korean Language

KOR 1011 - Beginning Korean (5.0 cr)
KOR 1012 - Beginning Korean (5.0 cr)
KOR 3021 - Intermediate Korean (5.0 cr)
KOR 3022 - Intermediate Korean (5.0 cr)

Astronomy B.A.

Astronomy

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 41.

Degree: Bachelor of Arts.

The program in astronomy develops the skills necessary to tackle complex and ill-defined problems within the physical sciences and prepares students for careers in several broad areas. The program is aimed primarily at students interested in secondary education in the physical sciences, science policy, and science

and technical writing. The program can also prepare students for graduate study in astronomy.

Admission Requirements

Students must complete 7 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

Complete one of the following course pairs.

Calculus Sequence I

MATH 1271 - Calculus I, MATH (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)

or

Calculus Sequence II

MATH 1371 - IT Calculus I, MATH (4.0 cr)
MATH 1372 - IT Calculus II (4.0 cr)

or

Calculus Honors Sequence

MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
MATH 1572H - Honors Calculus II, H (4.0 cr)

Complete one of the following course pairs.

Option I

MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
MATH 2263 - Multivariable Calculus (4.0 cr)

or

Option II

MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

or

Honors Option

MATH 2573H - Honors Calculus III, H (4.0 cr)
MATH 2574H - Honors Calculus IV, H (4.0 cr)

Preparatory Physics

Complete one of the following sequences.

Physics Sequence

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

PHYS 2503 - Physics III: Foundations of Modern Physics (4.0 cr)

or

Physics Honors Sequence

PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)
PHYS 2403H - Honors Phys III, H (4.0 cr)

Program Requirements

Students are required to take 4 semester(s) of any second language.

AST 1011H is recommended but not required. The number of credits in the major varies by specialization but is at least 15 credits of AST courses.

Required Courses

Major Courses

Each specialization track has the same core math, physics, and astrophysics requirements. Tracks include secondary education, science writing, science policy, and scientist.

AST 2001 - Introduction to Astrophysics (4.0 cr)

PHYS 2601 - Quantum Physics (4.0 cr)
 PHYS 2605 - Quantum Physics Laboratory (3.0 cr)
 PHYS 4001 - Analytical Mechanics (4.0 cr)
 PHYS 4002 - Electricity and Magnetism (4.0 cr)

Electives

AST 4001 - Astrophysics I (4.0 cr)
 AST 4002 - Astrophysics II (4.0 cr)
 MATH 3283W - Sequences, Series, and Foundations: Writing Intensive, WI (4.0 cr)

Take 12 or more credit(s) from the following:

AST 4xxx
 AST 5xxx

Senior Project

This requirement can be met with directed research in astronomy or a project tailored to the specific track.

AST 4994W - Directed Research, WI (3.0-5.0 cr)

Astronomy Minor

Astronomy

Requirements for this program are current for Fall 2006.

Required credits in this minor: 24.

Students in the minor learn the physical principles underlying study of the solar system, stars, galaxy, and universe and the methodology behind observations and conclusions.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>. Program Requirements:

Required Courses

Math

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)
 or MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)
 or MATH 1372 - IT Calculus II (4.0 cr)
 or MATH 1572H - Honors Calculus II, H (4.0 cr)

Physics

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 2303 - Physics III: Physics of Matter (4.0 cr)
 or PHYS 2503 - Physics III: Foundations of Modern Physics (4.0 cr)
 or PHYS 2403H - Honors Phys III, H (4.0 cr)

Minor Courses

AST 1001 or AST 1011H is recommended but not required.
 AST 2001 - Introduction to Astrophysics (4.0 cr)

Austrian and Central European Studies Minor

German, Scandinavian, and Dutch

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

The minor allows students to focus a group of electives on the study of Austrian and Central European culture, history, and society. Courses address specific social and political circumstances, cultural traditions, and shared history of Austria and the other countries of Central Europe. The minor is supported by the Center for Austrian Studies; student exchange programs with universities in Vienna, Salzburg, and Graz; and visiting Austrian scholars sponsored by the Austrian-American Education Commission.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Credits must be completed in 3xxx, 4xxx, and 5xxx courses. No more than one course may be directed or independent study. All courses in the minor must be taken on A-F grading and must be completed with a grade of C- or better. At least one course must be taken in the German program of the University of Minnesota. Students majoring in German studies may elect an ACES minor but no courses may count for both the German studies major and the Austrian studies minor. Therefore, students majoring in German studies must take one additional course to substitute for GER 3011W, which is a core requirement for both the German studies major and Austrian studies minor. The minor program must be approved by the director of undergraduate studies.

Required Courses

Minor Courses

GER 3011W - Conversation and Composition, WI (4.0 cr)
 GER 3520 - Topics in Austrian and Central European Culture (3.0 cr)
 Two courses in the art, culture, or literature of Austria and Central Europe.
 One course in the history, politics, and society of Austria and Central Europe.

Bachelor of Individualized Studies B.I.S.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 50.

Degree: Bachelor of Individualized Studies.

The program provides flexibility not available in B.A. and B.S. programs. Rather than complete a major in a single field, students focus their coursework on three areas, one of which may consist of courses from outside CLA. The areas do not have to be related to each other, but the program proposal must explain the student's overall educational goals.

Working closely with an adviser, students develop program proposals that explain why their academic needs are best met by an individualized program and list the courses to be included. The proposal must be approved by faculty or department advisers with expertise in the areas of concentration.

Some departments and colleges have prerequisite or required courses for students who want to include in their B.I.S. program concentration areas based in those departments and colleges. For specific information on proposal procedures and on department and college guidelines, see the Individualized Degree Programs Web site <http://idp.class.umn.edu>.

Admission Requirements

For certain concentration areas, prerequisite courses must be completed before submitting a program proposal. For certain concentrations, a minimum overall GPA or a minimum tool course GPA is required before a student can submit a program proposal.

Students can declare the degree after attending an information session (held two to three times a week). Students are not approved for the degree until they have submitted a program proposal (the submission deadline is once per semester) and the proposal has been approved by a committee and faculty or department advisers.

See a BIS adviser for more information.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Students must complete at least 50 approved credits at or above 3xxx, distributed among the three concentration areas. The concentration areas may be departmental or thematic in composition, and each must include at least 15 credits. Up to 21 credits in the program may be from outside CLA.

At least 20 credits in the concentration areas must be completed after admission to the program. A maximum of 12 credits of directed studies may be included. The CLA requirement of 18 credits at or above 3xxx outside the major does not apply.

Biblical Studies Minor

Classical & Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

The academic study of the Bible is an extraordinarily broad interdisciplinary field. Research in the field can involve many disciplines including a number of ancient and modern languages, archaeology, history, various social sciences (including comparative religion), and literary studies. Biblical studies focuses on the Hebrew Bible and the New Testament in terms of their formation, cultural settings, and the history of their interpretation. The minor lets students who might not have the linguistic foundation to read the biblical texts in their original languages pursue more advanced biblical studies.

Admission Requirements

Students must complete 2 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

Students must complete the first year Greek or Hebrew to study original texts in one of those languages.

Complete either pair of courses.

GRK 1001 - Beginning Classical Greek I (5.0 cr)

GRK 1002 - Beginning Classical Greek II (5.0 cr)

or

HEBR 1001 - Beginning Hebrew I (5.0 cr)

HEBR 1002 - Beginning Hebrew II (5.0 cr)

Program Requirements

Students are required to take 2 semester(s) of Greek or Hebrew.

Required Courses

Minor Courses

CNES 3072 - The New Testament, HP (3.0 cr)

Take 4 or more course(s) from the following:

CNES 3172 - Archaeology of Israel (3.0 cr)

CNES 3502 - Ancient Israel: From Conquest to Exile, HP (3.0 cr)

RELA 3201 - The Bible: Context and Interpretation, LIT (3.0 cr)

RELA 3202 - Prophecy in Ancient Israel, LIT (3.0 cr)

RELA 3203 - The Bible: Wisdom, Poetry, and Apocalyptic, LIT (3.0 cr)

CNES 5080

RELA 5513

GRK 3120

Biology, Society, and Environment B.A.

Geography

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 68.

Degree: Bachelor of Arts.

Students in the program receive comprehensive training in biology combined with an in-depth examination of the relevance of biology to social and environmental problems. Students complete coursework in the biological sciences, social sciences, and the humanities.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Biology Preparatory Sequences

Choose one sequence of biology courses.

Sequence A

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)

-OR-

Sequence B

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

ANTH 1001 - Human Evolution, BIOL SCI/L (4.0 cr)

or BIOL 2012 - General Zoology (4.0 cr)
 or BIOL 2022 - General Botany (3.0 cr)
 or PHSL 3051 - Human Physiology (4.0 cr)
 or VBS 2032 - General Microbiology With Laboratory (4.0 cr)
 or

take one of the following pairs of courses

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)
 BIOL 3211 - Animal Physiology (3.0 cr)

or

BIOL 3002 - Plant Biology: Function (2.0 cr)
 BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

Required Courses

BIOL 1105 - Introduction to Biology, Society, and the Environment (2.0 cr)

Take 2 or more course(s) from the following:

PHIL 1004W - Introduction to Political Philosophy, C/PE, OH, WI (4.0 cr)
 PHIL 1005 - Scientific Reasoning (4.0 cr)
 PHIL 3301 - Environmental Ethics, C/PE, ENVT (4.0 cr)
 PHIL 3302W - Moral Problems of Contemporary Society, C/PE, OH, WI (4.0 cr)
 PHIL 3304 - Law and Morality, C/PE (4.0 cr)
 PHIL 1003W - Introduction to Ethics, OH, WI (4.0 cr)
 or PHIL 1103 - Introduction to Ethics, OH (4.0 cr)

Chemistry, Math, and Physics

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 2301 - Organic Chemistry I (3.0 cr)
 MATH 1271 - Calculus I, MATH (4.0 cr)
 PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

Major Courses

Take three courses from the upper division biology core list, and take two additional upper level courses in biology, psychology, anthropology, geography, mathematics, statistics, computer science, chemistry, or physics, chosen in consultation with an adviser.

Take 3 or more course(s) from the following:

BIOC 3021 - Biochemistry (3.0 cr)
 BIOL 3407 - Ecology, ENVT (3.0 cr)
 BIOL 4004 - Cell Biology (3.0 cr)
 BIOL 4003 - Genetics (3.0 cr)
 or GCD 3022 - Genetics (3.0 cr)

Take 2 or more course(s) from the following:

ANTH 3310 - Topics in Biological and Physical Anthropology (3.0-6.0 cr)
 BIOC 3021 - Biochemistry (3.0 cr)
 BIOL 3407 - Ecology, ENVT (3.0 cr)
 BIOL 3409 - Evolution (3.0 cr)
 BIOL 4004 - Cell Biology (3.0 cr)
 CHEM 2302 - Organic Chemistry II (3.0 cr)
 CHEM 2311 - Organic Lab (4.0 cr)
 EEB 4609W - Ecosystem Ecology, WI (3.0 cr)
 GCD 3022 - Genetics (3.0 cr)
 GCD 4143 - Human Genetics (3.0 cr)
 GEOG 3401 - Geography of Environmental Systems and Global Change, WI (4.0 cr)
 INMD 3001 - Human Anatomy (3.0 cr)
 MICB 3301 - Biology of Microorganisms (5.0 cr)
 PHSL 3051 - Human Physiology (4.0 cr)

Theme Requirements

Some examples of thematic concentrations might be: ethics, economics and the politics of health care; the global environment; biology and the U.S. government; communicating biology to the public.

Take 5 or more course(s) from the following:

BIOL 4501 - Social Uses of Biology, C/PE (3.0 cr)
 ECON 3611 - Environmental Economics, ENVT (3.0 cr)
 GEOG 3381W - Population in an Interacting World, IP, SSCI, WI (4.0 cr)
 GEOG 3411W - Geography of Health and Health Care, ENVT, IP, WI (4.0 cr)
 HIST 1012W - World History: The Age of Global Contact, HP, IP, WI (4.0 cr)
 HIST 1015W - Introduction to Global History Since 1950, HP, IP, WI (4.0 cr)
 HSCI 3211 - Biology and Culture in the 19th and 20th Centuries, HP (3.0 cr)
 HSCI 3332 - Science and American Culture, CD, HP (3.0 cr)
 JOUR 3745 - Mass Media and Popular Culture, CD, SSCI (3.0 cr)
 PHIL 1004W - Introduction to Political Philosophy, C/PE, OH, WI (4.0 cr)
 PHIL 3234 - Knowledge and Society, CD (4.0 cr)
 PHIL 3301 - Environmental Ethics, C/PE, ENVT (4.0 cr)
 PHIL 3302W - Moral Problems of Contemporary Society, C/PE, OH, WI (4.0 cr)
 PHIL 3304 - Law and Morality, C/PE (4.0 cr)
 PHIL 3305 - Medical Ethics (4.0 cr)
 PHIL 3601W - Scientific Thought, OH, WI (4.0 cr)
 PHIL 3602 - Science, Technology, and Society, C/PE (3.0 cr)
 PHIL 3607 - Philosophy of Psychology (4.0 cr)
 POL 1065 - Government and Medicine, C/PE, SSCI (3.0 cr)
 POL 3441 - Politics of Environmental Protection, ENVT (3.0 cr)
 POL 3872W - Global Environmental Cooperation, ENVT, IP, WI (4.0 cr)
 PSY 5061 - Neurobiology of Behavior (3.0 cr)
 PSY 5135 - Psychology of Individual Differences (3.0 cr)
 PSY 5137 - Introduction to Behavioral Genetics (3.0 cr)
 RHET 1152W - Writing on Issues of Science and Technology, C/PE, WI (4.0 cr)
 SOC 4305 - Society and the Environment: A Growing Conflict, C/PE, ENVT (3.0 cr)
 STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Senior Project

The Senior Project may be fulfilled in one of three ways:

1. Register for 2 additional credits in any upper division course taken,
2. Register for 3 credits of directed research with a faculty member having special expertise in the subject of the proposed project,
3. Register for 3 credits of directed research (GEOG 3994) with the BSE Director of Undergraduate Studies.

Chemistry B.A.

Chemistry

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 51 to 67.

Degree: Bachelor of Arts.

An active, modern program of chemical education at the undergraduate level must do more than simply train professional chemists. Chemistry, the central science, is an important component of many disciplines and should be accessible to all students seeking a liberal education. The chemistry department contributes actively to increasing the level of scientific literacy of all students. The program serves all students by recognizing different needs, interests, and career goals.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)
 or MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1372 - IT Calculus II (4.0 cr)
 or MATH 1572H - Honors Calculus II, H (4.0 cr)
 MATH 2263 - Multivariable Calculus (4.0 cr)
 or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)
 or MATH 2573H - Honors Calculus III, H (4.0 cr)

Physics

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Preparatory Courses

CHEM 2101 - Introductory Analytical Chemistry Lecture (3.0 cr)
 CHEM 2111 - Introductory Analytical Chemistry Lab (2.0 cr)
 CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)

Major Courses

CHEM 2301 - Organic Chemistry I (3.0 cr)
 CHEM 2302 - Organic Chemistry II (3.0 cr)
 CHEM 3501 - Physical Chemistry I (3.0 cr)
 CHEM 3502 - Physical Chemistry II (3.0 cr)
 CHEM 4701 - Inorganic Chemistry (3.0 cr)
 CHEM 2311 - Organic Lab (4.0 cr)
 or CHEM 2312 - Honors Organic Lab, H (5.0 cr)
 CHEM 4094W - Directed Research, WI (1.0-5.0 cr)
 or CHEM 2094 - Directed Research (1.0-3.0 cr)
 CHEM 4111W - Intermediate Analytical Chemistry Lab, WI (2.0 cr)
 or CHEM 4311W - Advanced Organic Chemistry Lab, WI (2.0 cr)
 or CHEM 4511W - Advanced Physical Chemistry Lab, WI (2.0 cr)
 or CHEM 4711W - Advanced Inorganic Chemistry Lab, WI (2.0 cr)
 or CHEM 5223W - Polymer Laboratory, WI (2.0 cr)

Electives

Select at least three credits from 3xxx-5xxx courses in chemistry, biology, biochemistry, genetics, cell biology, chemical engineering, materials science, math, physics, public health, or statistics.

Chemistry Minor

Chemistry

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

Chemistry probes the fundamental concepts of nature and helps us understand the world around us. It deals with all substances at the molecular level: their composition, their properties, and how they are transformed into new substances. Chemistry is a central science of great importance to society. It provides a broad range of opportunities in many specialized fields, including

biotechnology, polymer chemistry, environmental chemistry, materials chemistry, and medicine.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Credits from seminars or special topics courses may not be applied toward the minor. A maximum of two credits of directed study may be applied. All coursework must be taken A-F with grades of at least C-. At least five credits (two courses) must be completed at the University of Minnesota, Twin Cities.

Required Courses

Minor Courses

CHEM 2301 - Organic Chemistry I (3.0 cr)
 CHEM 2302 - Organic Chemistry II (3.0 cr)
 CHEM 2311 - Organic Lab (4.0 cr)

Take 5 or more credit(s) from the following:

CHEM 2xxx
 CHEM 3xxx
 CHEM 4xxx
 CHEM 5xxx

Chicano Studies B.A.

Chicano Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 36.

Degree: Bachelor of Arts.

The program's curriculum explores the dimensions of race, ethnicity, culture and identity, gender, and class in the United States, both historically and in contemporary times. Chicano studies majors take courses offered in two broadly defined fields of study, humanities and social science. Humanities content includes courses designed to increase the student's awareness of Chicana/o culture, as well as intellectual, aesthetic, literary, historical, ethical, and human values. Social science content includes courses that analyze social institutions and how they affect the individual and also emphasize contemporary Chicana/o issues as they relate to the larger society. Areas of study include political science, anthropology, economics, sociology, and history. The bachelor of arts degree in Chicano studies is designed to meet the needs of students preparing for careers serving Chicana/o-Latina/o constituencies and to prepare students for graduate and advanced professional study in programs in which a minority affairs focus would be an asset. The program allows students the flexibility of pursuing work in related fields such as Latin American studies, Spanish studies, women's studies, and American studies. Double majors are encouraged.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Spanish.

Students must complete at least 120 credits to graduate, including 36 credits in the major. The 36 credits required to complete the major include 18 credits of major core requirements. Students must complete at least 15 upper division elective credits in Chicano studies. Students should confer with faculty and their major adviser to select courses intended to meet their professional goals and intellectual interests. With approval of the major adviser, three upper division credits related to the discipline may be taken outside the department and counted towards the major. CHIC 1112 is foundational and should be completed during the first or second year. Courses at 3xxx offer more focused opportunities to examine history, society, culture, literature, and gender. Majors must also complete a senior paper.

Required Courses

Major Courses

- CHIC 1112 - Introduction to Chicano Studies: Critical Paradigms and Methodologies CD, HP(3.0 cr)
 CHIC 3212 - Chicana Studies: La Chicana In Contemporary Society, CD, SSCI (3.0 cr)
 CHIC 3446 - Chicana and Chicano History II: WWII, El Movimiento, and the New MilleniumCD, HP (3.0 cr)
 CHIC 4900W - Proseminar: Senior Project, WI (1.0 cr)
 CHIC 4901W - Senior Project, WI (2.0 cr)
 CHIC XXXX - One Community Studies Theme course (3.0 cr)
 CHIC XXXX - One Literary and Cultural Studies Theme course (3.0 cr)

Community Studies Theme

- CHIC 3275 - Service Learning in the Chicano/Latino Community, CD, C/PE (3.0 cr)
 or CHIC 3374/5574 - Migrant Farmworkers in the U.S.: Families, Work, and Advocacy, SSCI, CD (3.0 cr)
 or CHIC 3672 - Chicana/o Experience in the Midwest, CD (3.0 cr)
 or CHIC 3712 - Chicanas/os): Psychological Perspectives, CD, SSCI (3.0 cr)
 or CHIC 3752 - Chicanas and Chicanos in Contemporary Society, SSCL, CD (3.0)
 or CHIC 4275 - Theory in Action: Community Engagement in a Social Justice Framework, C/PE (3.0 cr)

Gender and Sexuality Theme

- CHIC 4232 - Chicana/o Latina/o Gender and Sexuality Studies, CD (3.0 cr)

History and PoliticsTheme

- CHIC 3444 - Chicana and Chicano History; 1821-1945, CD, HP (3.0 cr)
 or CHIC 3352 - Transnational Chicana/o Theory: Global Views/Borderland Spaces, SCCI, IP (3.0 cr)
 or CHIC 3452 - Xicana/Indigena Studies: History, Culture, and Politics, SSCI, CD (3.0 cr)
 or CHIC 3852 - Chicana/o Politics, SSCI, CD (3.0 cr)
 or CHIC 4231 - The Color of Public Policy, (3.0 cr)
 or CHIC 4310/5310 - Chicanas/os and the Law, (3.0 cr)

Literary and Cultural Studies Theme

- CHIC 3213 - Chicana/o Music and Art, CD, OH (3.0 cr)
 or CHIC 3221 - Chicano Cultural Studies: Barrio Aesthetics and the Aesthetics of Everyday Life, OH, CD (3.0 cr)
 or CHIC 3223 - Chicana/o and Latina/o Representation in Film, OH, CD (3.0 cr)
 or CHIC 3375 - Folklore of Greater Mexico, CD (3.0 cr)
 or CHIC 3507 Introduction to Chicana/o Literature, CD, LIT,WI (3.0 cr)
 or CHIC 4401 - Advanced Seminar in Chicana/Latina Cultural Studies, CD (3.0 cr)

Electives

Take 15 or more credit(s) from the following:

- CHIC 1102 - Latinos In the U.S.: Culture and Citizenship, CD, HP (3.0 cr)
 CHIC 3xxx
 CHIC 4xxx
 CHIC 5xxx

Chicano Studies Minor

Chicano Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

Degree: Bachelor of Arts

The program's curriculum explores the dimensions of race and ethnicity, class, culture and identity, and gender and sexuality both historically and in contemporary times, as they shape and influence the lived experience of people of Mexican descent in the United States. Chicano studies courses are offered in two broadly defined fields of study, Humanities and Social Science. Humanities content includes courses designed to increase the student's awareness of Chicana/o culture, as well as intellectual, aesthetic, literary, historical, ethical, and human values. Social Science content includes courses which analyze social institutions and how they affect the individual and also emphasize contemporary Chicana/o issues as they relate to inter- and intracultural relationships.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

The minor requires 18 credits: 9 credits of core requirements and nine additional elective credits.

Core Requirements

- CHIC 1112 - Introduction to Chicana/o Studies: Critical Paradigms, CD, HP (3.0 cr)
 CHIC 3212 - La Chicana, CD (3.0 cr)
 CHIC 3446 - Chicana/o History II: WWII, El Movimiento, and the New Millenium, CD, HP (3.0 cr)

Additional Requirements: nine credits distributed as follows: three credits from Literary and Cultural Studies Theme, three credits from Community Studies Theme, and three additional credits of your own choosing. Community Studies Theme

- CHIC 3275 - Service Learning in the Chicano/Latino Community CD, C/PE (3.0 cr)
 or CHIC 3374/5574 - Migrant Farmworkers in the U.S.: Families, Work, and Advocacy, SSCI, CD (3.0 cr)
 or CHIC 3672 - Chicana/o Experience in the Midwest, CD, SSCI (3.0 cr)
 or CHIC 3712 - Chicanas(os): Psychological Perspectives, CD, SSCI (3.0 cr)
 or CHIC 4275 - Theory in Action: Community Engagement in Social Justice, C/PE (3.0 cr)

Gender and Sexuality Theme

- CHIC 4232 - Chicana/o Latina/o Gender and Sexuality Studies, CD (3.0 cr)

History and PoliticsTheme

- CHIC 3444 - Chicana and Chicano History; 1821-1945, CD, HP (3.0 cr)
 or CHIC 3352 - Transnational Chicana/o Theory: Global Views/Borderland Spaces, SCCI, IP (3.0 cr)
 or CHIC 3452 - Xicana/Indigena Studies: History, Culture, and Politics, SSCI, CD (3.0 cr)
 or CHIC 3852 - Chicana/o Politics, SSCI, CD (3.0 cr)
 or CHIC 4231 - The Color of Public Policy, (3.0 cr)
 or CHIC 4310/5310 - Chicanas/os and the Law, (3.0 cr)

Literary and Cultural Studies

CHIC 3213 - Chicana/o Music & Art, CD, OH (3.0)
 CHIC 3221 - Chicano Cultural Studies: Barrio Aesthetics and the Aesthetics of
 Everyday Life, CD, OH (3.0 cr)
 or CHIC 3223 - Chicana/o and Latina/o Representation in Film, OH, CD (3.0 cr)
 or CHIC 3375 - Folklore of Greater Mexico, CD (3.0)
 or CHIC 3507 - Introduction to Chicana/o Literature, CD, LIT, WI (3.0 cr)
 or CHIC 4401 - Advanced Seminar in Chicana/Latina Cultural Studies, CD
 (3.0 cr)

Child Psychology B.A.

Institute of Child Development

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 33 to 35.

Degree: Bachelor of Arts.

Child psychology deals with behavioral development from the prenatal period to maturity in the areas of cognition, ethology, genetics, language, learning, perception, and social behavior. The Institute of Child Development, housed in the College of Education and Human Development, offers a bachelor of arts, a bachelor of science, and a minor in child psychology through the College of Liberal Arts. All undergraduate child psychology courses are considered CLA courses and count toward the CLA graduation requirements.

The program prepares students for graduate study in psychology, education, medicine, law, sociology, and other behavioral sciences. Majors may not receive a second major or degree in psychology nor apply psychology, educational psychology, or child and adolescent psychiatry credits to the minimum 18 upper-level credits required outside the major. These credits fall neither inside or outside the major.

Admission Requirements

Students must complete 2 courses before admission to the program.

An introduction to psychology course must be completed before admission into the major. Students may formally declare the major with CPSY 2301 or CPSY 3301 in progress.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Preparatory Courses**

CPSY 2301 - Introductory Child Psychology, SSCI (4.0 cr)
 or CPSY 3301 - Introductory Child Psychology for Social Sciences (4.0 cr)
 GC 1281 - General Psychology, SSCI (4.0 cr)
 or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses**Research and Statistical Methods**

CPSY 3308 - Introduction to Research Methods in Child Psychology (4.0 cr)
 EPSY 3264 - Basic and Applied Statistics, MATH (3.0 cr)
 or SOC 3811 - Basic Social Statistics, MATH (4.0 cr)
 or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

Social/Personality and Cognitive Development

CPSY 4331 - Social and Personality Development (4.0 cr)
 CPSY 4343 - Cognitive Development (4.0 cr)

Electives

CPSY 3301 may not be used to fulfill the elective requirement.

Take 4 or more course(s) totaling 16 or more credit(s) from the following:

CPSY 3xxx
 CPSY 4xxx
 CPSY 5xxx

Final Project

CPSY 4347W - Senior Project, WI (2.0 cr)

Child Psychology B.S.

Institute of Child Development

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 40 to 42.

Degree: Bachelor of Science.

Child Psychology deals with behavioral development from the prenatal period to maturity in the areas of cognition, ethology, genetics, language, learning, perception, and social behavior. The Institute of Child Development, housed in the College of Education and Human Development, offers a bachelor of arts, a bachelor of science, and a minor in child psychology through the College of Liberal Arts.

With a combination of intensive training in developmental psychology and in-depth field experience, the program prepares students for careers and additional training in such areas as early childhood education, counseling, and human service programs. Students completing a degree program in child psychology may not receive a second major or degree in psychology.

Admission Requirements

Students must complete 2 courses before admission to the program.

Students may formally declare the major with CPSY 2301 or CPSY 3301 in progress.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Preparatory Courses**

CPSY 2301 - Introductory Child Psychology, SSCI (4.0 cr)
 or CPSY 3301 - Introductory Child Psychology for Social Sciences (4.0 cr)
 GC 1281 - General Psychology, SSCI (4.0 cr)
 or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

Program Requirements**Required Courses****Research, Statistical, and Evaluation Methods**

CPSY 3308 - Introduction to Research Methods in Child Psychology (4.0 cr)
 EPSY 3264 - Basic and Applied Statistics, MATH (3.0 cr)
 or SOC 3811 - Basic Social Statistics, MATH (4.0 cr)
 or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
or EPSY 5849 - Observation and Assessment of the Preschool Child (3.0 cr)

Major Courses

CPSY 4329 - Biological Foundations of Development (4.0 cr)
CPSY 4331 - Social and Personality Development (4.0 cr)
CPSY 4334W - Children, Youth in Society, C/PE, WI (4.0 cr)
CPSY 4343 - Cognitive Development (4.0 cr)
CPSY 4311 - Behavioral and Emotional Problems of Children (4.0 cr)
or CPSY 4313 - Disabilities and Development (4.0 cr)

Take 4 or more credit(s) from the following:

CPSY 4994 - Directed Research in Child Psychology (1.0-4.0 cr)
CPSY 4996 - Field Study in Child Psychology (1.0-4.0 cr)
CPSY 3301 may not be used for this requirement.

Take 4 or more credit(s) from the following:

CPSY 3xxx
CPSY 4xxx
CPSY 5xxx

Senior Project

CPSY 4347W - Senior Project, WI (2.0 cr)

Child Psychology Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

Child psychology deals with behavioral development from the prenatal period to maturity in the areas of cognition, ethology, genetics, language, learning, perception, and social behavior.

Admission Requirements

Students must complete 1 course before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

GC 1281 - General Psychology, SSCI (4.0 cr)
or PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
CPSY 2301 - Introductory Child Psychology, SSCI (4.0 cr)
or CPSY 3301 - Introductory Child Psychology for Social Sciences (4.0 cr)

Program Requirements

Required Courses

Minor Courses

CPSY 3308 - Introduction to Research Methods in Child Psychology (4.0 cr)

Take 2 or more course(s) from the following:

CPSY 4329 - Biological Foundations of Development (4.0 cr)
CPSY 4331 - Social and Personality Development (4.0 cr)
CPSY 4343 - Cognitive Development (4.0 cr)

Take 4 or more credit(s) from the following:

CPSY 3xxx
CPSY 4xxx
CPSY 5xxx

Classical and Near Eastern Archaeology B.A.

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 36.

This program requires summer terms.

Degree: Bachelor of Arts.

This major allows students to concentrate their studies on the material remains from the ancient civilizations of Greece, Rome, Egypt, and Biblical lands from ca. 3000 B.C.E. through 650 C.E. The program includes courses from classical and near eastern studies, anthropology, art history, geography, geology, and history.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Greek, Hebrew, or Latin.

Required Courses

Preparatory Courses

CNES 3152 - Art and Archaeology of Ancient Greece, OH (4.0 cr)
CNES 3162 - Roman Art and Archaeology, OH (4.0 cr)
CNES 1043 - Introduction to Greek and Roman Archaeology, HP (4.0 cr)
or CNES 3008 - History of Ancient Art, IP, OH (4.0 cr)
CNES 3104 - Ancient Rome: Kings and Consuls, HP (3.0 cr)
or CNES 3105 - Ancient Rome: The Age of Augustus, HP (3.0 cr)
or CNES 3107 - Age of Constantine the Great, HP, IP (3.0 cr)
or CNES 3108 - Age of St. Augustine of Hippo, HP (3.0 cr)
or HIST 3051 - Ancient Civilization: Near East and Egypt (3.0 cr)
or HIST 3052 - Ancient Civilization: Greece (3.0 cr)
or HIST 3053 - Ancient Civilization: Rome (3.0 cr)
or HIST 3061 - "Bread and Circuses": Spectacles and Mass Culture in Antiquity (3.0 cr)
or HIST 3502 - Ancient Israel: From Conquest to Exile, HP (3.0 cr)
or HIST 3930 - Topics in Ancient History (3.0 cr)
or HIST 4051 - Ancient Near East and Egypt: Neolithic to 1500 BCE (3.0 cr)
or HIST 4052 - Ancient Near East and Egypt: 1500 to 323 BCE (3.0 cr)
or HIST 4061 - History of the Greek World from Earliest Times to 400 B.C. (3.0 cr)
or HIST 4062 - History of the Greek World: 400 to 30 B.C. (3.0 cr)
or HIST 4071 - History of Rome to 78 B.C. (3.0 cr)
or HIST 4072 - History of Rome: 78 B.C. to A.D. 117 (3.0 cr)
or HIST 4073 - History of Rome: A.D. 117 to 641 (3.0 cr)
or HIST 5051 - Before Herodotus: History and Historiography of Mesopotamia and the Ancient Near East (3.0 cr)
or HIST 5053 - Doing Roman History: Sources, Methods, and Trends (3.0 cr)
or HIST 5930 - Topics in Ancient History (1.0-4.0 cr)
or HIST 5933 - Seminar in Ancient History (3.0 cr)

Major Courses

Five courses must be taken from Groups 1-3, with at least one course from each group. Remaining courses may be selected from courses in Groups 1-3 not used to fulfill the five-course requirement, from courses in the preparatory course list that are not used to fill that requirement, from selected courses in anthropology, or from any 3xxx-5xxx course in CNES or RELA. Course selections are subject to the approval of the director of undergraduate studies.

Take 8 or more course(s) totaling 24 or more credit(s).

Take 5 or more course(s) including 3 or more sub-requirement(s) from the following:

Group 1 - The Classical World

Take 1 or more course(s) from the following:

- CNES 5111 - Prehistoric Art and Archaeology of Greece (3.0 cr)
- CNES 5112 - Archaic and Classical Greek Art (3.0 cr)
- CNES 5103 - Hellenistic and Early Roman Art and Archaeology (3.0 cr)
- CNES 5108 - Greek Architecture (3.0 cr)
- CNES 5172 - House, Villa, Tomb: Roman Art in the Private Sphere (3.0 cr)
- CNES 5182 - Art and the State: Public Art in the Roman Empire (3.0 cr)

Group 2 - The Near East

Take 1 or more course(s) from the following:

- CNES 3142 - Art of Egypt, HP (4.0 cr)
- CNES 3172 - Archaeology of Israel (3.0 cr)

Group 3 - Field/Lab Work

Take 1 or more course(s) from the following:

- ANTH 4069 - Environmental Archaeology, SSCI, ENVT (3.0 cr)
- CNES 3340 - Practicum in Archaeological Field and Computer Techniques (3.0 cr)
- CNES 5120 - Field Research in Archaeology (3.0-6.0 cr)
- CNES 5340 - Practicum in Archaeological Field and Computer Techniques (3.0 cr)

Electives

Take 0 - 3 course(s) from the following:

- ANTH 3009 - Rise of Civilization, IP, SSCI (3.0 cr)
- ANTH 3027W - Archaeology of Prehistoric Europe, WI (3.0 cr)
- ANTH 3028 - Introduction to Historical Archaeology (3.0 cr)
- ANTH 4043 - Archaeology of Northern Europe (3.0 cr)
- ANTH 4069 - Environmental Archaeology, SSCI, ENVT (3.0 cr)
- ANTH 5027W - Origins of European Civilization, WI (3.0 cr)
- CNES 3xxx
- CNES 4xxx
- CNES 5xxx
- RELA 3xxx
- RELA 4xxx
- RELA 5xxx

Senior Project

Students who complete another CLA major may substitute 4 credits of appropriate coursework at 3xxx or above for the CNES senior project.

CNES 3951W - Major Project, WI (4.0 cr)

Classical and Near Eastern Archaeology Minor

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

The minor allows students to concentrate their studies on the material remains from the ancient civilizations of Greece, Rome, Egypt, and Biblical lands from ca. 3000 B.C.E through 650 C.E. The minor includes courses from the Departments of Classical and Near Eastern Studies, Anthropology, Art History, Geography, Geology, and History.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Preparatory Courses

CNES 1043 - Introduction to Greek and Roman Archaeology, HP (4.0 cr) or CNES 3008 - History of Ancient Art, IP, OH (4.0 cr)

Minor Courses

Take at least four courses, with one course each from groups 1-3. The remaining course may be selected from those in groups 1-3 not used to fulfill the three-course requirement, selected courses in anthropology or history, or any 3xxx-5xxx course in CNES or RELA. Course selections are subject to the approval of the director of undergraduate studies.

Take 4 or more course(s) totaling 12 or more credit(s).

Take 3 or more course(s) including 3 or more sub-requirement(s) from the following:

Group 1 - The Classical World

Take 1 or more course(s) from the following:

- CNES 5103 - Hellenistic and Early Roman Art and Archaeology (3.0 cr)
- CNES 5108 - Greek Architecture (3.0 cr)
- CNES 5111 - Prehistoric Art and Archaeology of Greece (3.0 cr)
- CNES 5112 - Archaic and Classical Greek Art (3.0 cr)
- CNES 5172 - House, Villa, Tomb: Roman Art in the Private Sphere (3.0 cr)
- CNES 5182 - Art and the State: Public Art in the Roman Empire (3.0 cr)

Group 2 - The Near East

Take 1 or more course(s) from the following:

- CNES 3142 - Art of Egypt, HP (4.0 cr)
- CNES 3172 - Archaeology of Israel (3.0 cr)

Group 3 - Field/Lab Work

Take 1 or more course(s) from the following:

- ANTH 4069 - Environmental Archaeology, SSCI, ENVT (3.0 cr)
- CNES 3340 - Practicum in Archaeological Field and Computer Techniques (3.0 cr)
- CNES 5120 - Field Research in Archaeology (3.0-6.0 cr)
- CNES 5340 - Practicum in Archaeological Field and Computer Techniques (3.0 cr)

Electives

Take 0 - 1 course(s) from the following:

- ANTH 3009 - Rise of Civilization, IP, SSCI (3.0 cr)
- ANTH 3027W - Archaeology of Prehistoric Europe, WI (3.0 cr)
- ANTH 3028 - Introduction to Historical Archaeology (3.0 cr)
- ANTH 4043 - Archaeology of Northern Europe (3.0 cr)
- ANTH 4069 - Environmental Archaeology, SSCI, ENVT (3.0 cr)
- ANTH 5027W - Origins of European Civilization, WI (3.0 cr)
- CNES 3xxx
- CNES 4xxx
- CNES 5xxx
- RELA 3xxx
- RELA 4xxx
- RELA 5xxx

Classical Civilization B.A.

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 36.

Degree: Bachelor of Arts.

This interdisciplinary program encompasses the study of Greek and Roman cultures and their influence on Western civilization, and encourages study of related or parallel cultures such as those of Islam and the Indian subcontinent. It provides a comprehensive alternative to more specialized majors that focus primarily on one aspect or subject matter of classical antiquity and the spheres of its influence, such as art, archaeology, history, philosophy, or literature, or a narrower span of historical periods. The program enables students to investigate classical civilization and its heritage from several perspectives and become acquainted with the aims and methods of several disciplines.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Greek or Latin.

Eight of the twelve approved courses (24 of 36 credits in the major) must be 3xxx or higher. Two of the courses must have the CLCV designator. All courses must be chosen in consultation with an adviser and approved by the department.

Required Courses

Language and Literature

Take three courses in the language and literature of the classical world.

Art, Art History, and Archaeology

Take 3 courses focusing on the art, art history, and archaeology of the classical world.

Thought and Religion

Take 3 courses on the thought and religions of the classical world.

Classical Traditions

Take 3 courses on classical traditions.

Electives

Take 2 to 4 related elective courses.

Senior Project

The senior project is defined by the student in consultation with an adviser. Students may register for one to three credits of directed study while working on the project, but they are not required to do so.

Classical Civilization Minor

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

This interdisciplinary program encompasses the study of Greek and Roman cultures and their influence on Western civilization and encourages study of related or parallel cultures such as those of Islam and the Indian subcontinent.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 2 semester(s) of Greek, Latin.

Required Courses

Preparatory Courses

Complete one year of courses (or the equivalent) plus one culture course in either Greek or Latin.

Greek

GRK 1001 - Beginning Classical Greek I (5.0 cr)

GRK 1002 - Beginning Classical Greek II (5.0 cr)

or

Latin

LAT 1001 - Beginning Latin I (5.0 cr)

LAT 1002 - Beginning Latin II (5.0 cr)

Minor Courses

One course in the culture of the country or countries that used the chosen language.

One classical language and literature course, chosen with the guidance of a faculty adviser.

One course in classical art, art history, and archaeology, chosen with the guidance of a faculty adviser.

One course in classical thought and religion, chosen with the guidance of a faculty adviser.

One course in classical traditions, chosen with the guidance of a faculty adviser.

Communication Studies B.A.

Communication Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 34.

Degree: Bachelor of Arts.

This program examines human communication using humanistic and social -scientific methods. Fields of study include speechmaking, rhetorical criticism, ethics, interpersonal, small group, organizational, intercultural, and electronic (broadcasting, cable, satellite, Internet) forms of communication. Students intending to declare a major must meet with a communication studies adviser in 278 Ford Hall. Students are strongly encouraged to declare their major during the first or second year.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semesters of any second language.

Required Courses**Required Introductory Courses**

COMM 1101 - Introduction to Public Speaking (3.0 cr)
 COMM 1313W - Analysis of Argument, WI (3.0 cr)

Required Core Courses

Take 2 or more course(s) from the following:

COMM 3211 - Introduction to U.S. Electronic Media (3.0 cr)
 COMM 3401 - Introduction to Communication Theory (3.0 cr)
 COMM 3601 - Introduction to Rhetorical Theory, C/PE (3.0 cr)

Required Performative Elective

COMM 3201 - Introduction to Electronic Media Production (4.0 cr)
 or COMM 3411 - Introduction to Small Group Communication (3.0 cr)
 or COMM 3422 - Interviewing and Communication (3.0 cr)
 or COMM 3605W - Persuasive Speaking and Speech Writing, WI (3.0 cr)
 or COMM 3990 - Research Practicum (1.0-3.0 cr)
 or COMM 4452W - Intercultural Interaction: Theory and Application, WI (3.0 cr)

Required 4xxx or 5xxx Communication Studies Elective (3.0 cr)

Required Senior Paper

The senior paper can be written in any 4xxx or 5xxx communication studies course. COMM 3995W, an S-N only, senior paper credit must be taken during the same semester in which the senior paper is written.

COMM 3995W - Major Project, WI (1.0 cr)

Communication Studies Electives

In addition to the above requirements, take any other 3xxx, 4xxx, or 5xxx communication studies electives to reach the 34 total credits required to complete the major.

Communication Studies Minor

Communication Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

The minor's courses examine human communication, using humanistic and social -scientific methods. Fields of study include speechmaking, rhetorical criticism, ethics, and interpersonal, small group, organizational, intercultural, and electronic (broadcasting, cable, satellite, Internet) forms of communication. Students intending to declare a minor must meet with a communication studies adviser in 278 Ford Hall.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements**Required Introductory Course**

COMM 1101 - Introduction to Public Speaking (3.0 cr)
 or COMM 1313W - Analysis of Argument, WI (3.0 cr)

Required Core Courses

Take 2 or more course (s) from the following:

COMM 3211 - Introduction to U.S. Electronic Media (3.0 cr)
 COMM 3401 - Introduction to Communication Theory (3.0 cr)
 COMM 3601 - Introduction to Rhetorical Theory, C/PE (3.0 cr)

Required 4xxx or 5xxx Communication Studies Elective (3.0 cr)

Communication Studies Electives (6.0 cr)

In addition to the above requirements, take any other 3xxx, 4xxx, or 5xxx communication studies electives to reach the 18 total credits required to complete the minor.

Computer Science B.A.

Computer Science and Engineering

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 41.

Degree: Bachelor of Arts.

Computer science concerns the study of the hardware, software, and theoretical aspects of high-speed computing devices and the application of these devices to a broad spectrum of scientific, technological, and business problems. The curriculum gives students a basic understanding of computer science. After completing a required set of fundamental courses, students can arrange their subsequent work around one of several emphases within computer science. The program prepares student for a variety of industrial, governmental, and business positions involving the use of computers or for graduate work in the field.

Admission Requirements

Students must complete 6 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.40 for students already admitted to the degree-granting college.
- 2.40 for students transferring from another University of Minnesota college.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Mathematics and Computer Science**

CSCI 1901 - Structure of Computer Programming I (4.0 cr)
 CSCI 1902 - Structure of Computer Programming II (4.0 cr)
 CSCI 2011 - Discrete Structures of Computer Science (4.0 cr)
 MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)
 or MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1372 - IT Calculus II (4.0 cr)
 or MATH 1572H - Honors Calculus II, H (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
 or MATH 2573H - Honors Calculus III, H (4.0 cr)

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses**Major Courses**

The computer science senior project can be fulfilled by completing CSCI 3081W.

CSCI 2021 - Machine Architecture and Organization (4.0 cr)
 CSCI 3081W - Program Design and Development, WI (4.0 cr)
 CSCI 4011 - Formal Languages and Automata Theory (4.0 cr)
 CSCI 4041 - Algorithms and Data Structures (4.0 cr)
 CSCI 4061 - Introduction to Operating Systems (4.0 cr)
 STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

Electives

No more than three credits from CSCI 4970 or 59xx courses can be used to fulfill the elective requirement of nine credits.

Take 9 or more credit(s) from the following:

CSCI 4xxx
 CSCI 5xxx

Computer Science Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15 to 20.

The minor consists of at least five three- or four-credit approved computer science courses, with three taken at the University with the CSCI designator.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

At least one course must be 5xxx. All courses must be taken A-F, and only courses completed with a grade of at least C- count toward the minor. Cumulative GPA for all University CSCI courses must be at least 2.00; this includes CSCI courses not used for the minor. Only computer science courses listed for the major are acceptable.

Cultural Studies and Comparative Literature B.A.

Cultural Studies and Comparative Literature

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 32.

Degree: Bachelor of Arts.

Courses in the Department of Cultural Studies and Comparative Literature (CSCL) pursue questions and ways of knowing that cross traditional disciplinary boundaries. Students study culture as a set of complex connections and interrelations: between texts and everyday life, ideas and the material world, discourse and power. Students may choose between two tracks, cultural studies and comparative literature, each of which explores these overarching concerns with specific emphasis.

Both tracks strive for a broad, international scope, ranging widely across history and geography. The central focus is on the cultural mechanisms through which a society's ways of knowing, value systems, and individual and collective identities are generated, disseminated, challenged, and reinvented. The goal of the program is to produce critical and self-critical readers prepared to actively participate in the intellectual conversations and social struggles that shape global culture in our time.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Students select either the comparative literature or cultural studies track and complete a minimum of ten courses for the major: two introductory (1xxx) courses plus seven at upper division levels. To allow for flexibility, the tenth course may be taken at any level. A senior project requirement may be satisfied by completing any 4xxx or 5xxx course. CSCL, CSDS, CLIT topics courses and independent/directed study courses may be used to meet stated 3xxx-5xxx requirements with adviser approval. Courses from other units may be substituted (on an ad hoc basis) for department major courses if approved by the student's adviser or the director of undergraduate studies. Grades in the major must be C- or better.

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Comparative Literature

The comparative literature track engages primarily verbal texts, "literature" in its broadest sense (novels, plays, poetry, prose, and expository writing of various kinds), and in a historical and global context.

Required Courses

Preparatory Courses

CSCL 1101 - Literature, IP, LIT (4.0 cr)
 or CSCL 1401W - Reading Literature: Theory and Practice, IP, LIT, WI (4.0 cr)
 CSCL 1201 - Introduction to Cinema and Media Culture, OH (4.0 cr)
 or CSCL 1501W - Reading History: Theory and Practice, HP, WI (4.0 cr)
 or CSCL 1921 - Introduction to Film Study, OH (4.0 cr)

Major Courses

Take five 3xxx courses, including at least one from either Subjectivity and History or Ideologies and Disciplines.

CSCL 3179 - Reading Literary Movements, LIT (3.0 cr)
 CSCL 3557 - Close Reading (3.0 cr)
 CSCL 3771 - Basic Concepts of Literary Study, LIT (3.0 cr)
 CSCL 3xxx

Take 1 or more course(s) including 1 or more sub-requirement(s) from the following:

Subjectivity and History

Take 0 or more course(s) from the following:

CSCL 3421 - Culture and the Production of Modern Identity I: 1600-1750, HP (3.0 cr)
 CSCL 3422 - Culture and the Production of Modern Identity II: 1750-1900, HP (3.0 cr)
 CSCL 3456W - Sexuality and Culture, CD, WI (3.0 cr)
 CSCL 3458W - The Body and the Politics of Representation, HP, WI (3.0 cr)
 CSCL 3461 - Monsters, Robots, Cyborgs, LIT (3.0 cr)
 CSCL 3472 - Gay Men and Homophobia in American Culture, CD, HP (3.0 cr)
 GER 3631 - Jewish Writers and Rebels in German, Austrian, and American Culture, IP, LIT (3.0 cr)

Ideologies and Disciplines

Take 0 or more course(s) from the following:

CSCL 3115 - Cinema and Ideology, OH (4.0 cr)

CSCL 3176 - Oppositional Cinemas, IP, OH (4.0 cr)
 CSCL 3361 - Visions of Nature: The Natural World and Political Thought, C/PE, ENVT (4.0 cr)
 CSCL 3366W - Landscape, Nature, Society, ENVT, WI (3.0 cr)
 CSCL 3979 - Issues in Cultural Pluralism, C/PE, CD (3.0 cr)

Electives

Take 1 or more course(s) from the following:

CSCL 1xxx
 CSCL 2xxx
 CSCL 3xxx
 CSCL 4xxx
 CSCL 5xxx

Take 2 or more course(s) from the following:

CSCL 4xxx
 CSCL 5xxx

Cultural Studies

The cultural studies track investigates practices in all available media, including the visual-spatial (painting, sculpture, architecture, landscape, the built environment), the sonic (music, noise, soundscape), and combinations (film, TV, multimedia events, festivals, riots).

Required Courses

Preparatory Courses

CSCL 1201 - Introduction to Cinema and Media Culture, OH (4.0 cr)
 or CSCL 1501W - Reading History: Theory and Practice, HP, WI (4.0 cr)
 or CSCL 1921 - Introduction to Film Study, OH (4.0 cr)
 CSCL 1301W - Reading Culture: Theory and Practice, OH, WI (4.0 cr)
 or CSCL 1001 - Introduction to Cultural Studies: Rhetoric, Power, Desire, CD, OH (4.0 cr)

Major Courses

Take 5 or more course(s) including 3 or more sub-requirement(s) from the following:

Discursive Practices and Genres

Take 0 or more course(s) from the following:

CSCL 3172 - Music as Discourse, OH (3.0 cr)
 CSCL 3173W - The Rhetoric of Everyday Life, C/PE, OH, WI (3.0 cr)
 CSCL 3174 - Poetry as Cultural Critique (3.0 cr)
 CSCL 3175 - Comedy: Text and Theory, OH (3.0 cr)
 CSCL 3177 - On Television (4.0 cr)
 CSCL 3179 - Reading Literary Movements, LIT (3.0 cr)

Subjectivity and History

Take 0 or more course(s) from the following:

CSCL 3421 - Culture and the Production of Modern Identity I: 1600-1750, HP (3.0 cr)
 CSCL 3422 - Culture and the Production of Modern Identity II: 1750-1900, HP (3.0 cr)
 CSCL 3456W - Sexuality and Culture, CD, WI (3.0 cr)
 CSCL 3458W - The Body and the Politics of Representation, HP, WI (3.0 cr)
 CSCL 3461 - Monsters, Robots, Cyborgs, LIT (3.0 cr)
 CSCL 3472 - Gay Men and Homophobia in American Culture, CD, HP (3.0 cr)
 GER 3631 - Jewish Writers and Rebels in German, Austrian, and American Culture, IP, LIT (3.0 cr)

Ideologies and Disciplines

Take 0 or more course(s) from the following:

CSCL 3115 - Cinema and Ideology, OH (4.0 cr)
 CSCL 3176 - Oppositional Cinemas, IP, OH (4.0 cr)
 CSCL 3361 - Visions of Nature: The Natural World and Political Thought, C/PE, ENVT (4.0 cr)

CSCL 3366W - Landscape, Nature, Society, ENVT, WI (3.0 cr)
 CSCL 3979 - Issues in Cultural Pluralism, C/PE, CD (3.0 cr)

Critical Theories and Methods

Take 0 or more course(s) from the following:

CSCL 3321W - Theories of Culture, WI (3.0 cr)
 CSCL 3331 - Science and the Humanities, C/PE, OH (3.0 cr)
 CSCL 3412W - Psychoanalysis and Literature Part I: The Essential Freud, WI (3.0 cr)
 CSCL 3413W - Psychoanalysis and Literature Part II: Post Freudian Criticism, WI (3.0 cr)
 CSCL 3557 - Close Reading (3.0 cr)
 CSCL 3771 - Basic Concepts of Literary Study, LIT (3.0 cr)

Electives

Take 1 or more course(s) from the following:

CSCL 1xxx
 CSCL 2xxx
 CSCL 3xxx
 CSCL 4xxx
 CSCL 5xxx

Take 2 or more course(s) from the following:

CSCL 4xxx
 CSCL 5xxx

Cultural Studies and Comparative Literature Minor

Cultural Studies and Comparative Literature

Requirements for this program are current for Fall 2006.

Required credits in this minor: 17 to 18.

Courses in the Department of Cultural Studies and Comparative Literature (CSCL) pursue questions and ways of knowing that cross traditional disciplinary boundaries. Students study culture as a set of complex connections and interrelations: between texts and everyday life, ideas and the material world, discourse and power.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Preparatory Courses

CSCL 1001 - Introduction to Cultural Studies: Rhetoric, Power, Desire, CD, OH (4.0 cr)
 or CSCL 1101 - Literature, IP, LIT (4.0 cr)
 or CSCL 1201 - Introduction to Cinema and Media Culture, OH (4.0 cr)
 or CSCL 1301W - Reading Culture: Theory and Practice, OH, WI (4.0 cr)
 or CSCL 1401W - Reading Literature: Theory and Practice, IP, LIT, WI (4.0 cr)
 or CSCL 1501W - Reading History: Theory and Practice, HP, WI (4.0 cr)
 or CSCL 1921 - Introduction to Film Study, OH (4.0 cr)

Minor Courses

Take 14 or more credit(s) from the following:

CSCL 3xxx
 CSCL 4xxx
 CSCL 5xxx

Dance B.A.

Theatre Arts and Dance

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 45.

Degree: Bachelor of Arts.

Admission into the B.A. program is by audition only.

The B.A. in dance emphasizes general dance studies. This degree prepares the student for further studies in such areas of dance as performance, choreography, dance history, criticism, ethnology, pedagogy, movement analysis, and kinesiology.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Major Core

Students must take 2 credits (two courses at 1 credit each) of DNCE 3700 or 5700.

DNCE 1601 - Dance Improvisation (1.0 cr)
 DNCE 1626 - Music for Dance (3.0 cr)
 DNCE 3010 - Modern Dance Technique 5 (2.0 cr)
 DNCE 3020 - Modern Dance Technique 6 (2.0 cr)
 DNCE 3401W - Dance History 1, OH, WI (3.0 cr)
 DNCE 3402W - Dance History 2, IP, OH, WI (3.0 cr)
 DNCE 3601 - Dance Composition 1 (3.0 cr)
 DNCE 3602 - Dance Composition 2 (3.0 cr)
 DNCE 3901 - Survival Strategies in Dance (3.0 cr)
 DNCE 4443 - Philosophy and Aesthetics (3.0 cr)
 DNCE 4601 - Dance Composition 3 (3.0 cr)

Take 2 or more course(s) from the following:

DNCE 3700 - Performance (1.0 cr)
 DNCE 5700 - Performance (1.0 cr)

Electives

Electives may be fulfilled by courses in such areas as dance, music, theatre, art history, kinesiology, cultural studies, speech communications, women's studies, as agreed upon between the student and dance adviser. No more than 3 credits in technique may be counted.

Take 12 or more credit(s) from the following:

DNCE 3xxx
 DNCE 4xxx
 DNCE 5xxx

Senior Seminar

DNCE 4901 - Senior Seminar (2.0 cr)

Dance B.F.A.

Theatre Arts and Dance

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 78.

Degree: Bachelor of Fine Arts.

The B.F.A. in dance emphasizes technical, compositional, and performance training in modern dance. The program seeks to prepare the gifted student for a performance or creative career.

Admission Requirements

Admission into the B.F.A. program is by audition only.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Major Core

Students must take 4 credits of DNCE 3700/5700. All students (except those who have completed the CLA second language requirement) must complete the dance ethnology sequence.

DNCE 1601 - Dance Improvisation (1.0 cr)
 DNCE 1626 - Music for Dance (3.0 cr)
 DNCE 3010 - Modern Dance Technique 5 (2.0 cr)
 DNCE 3020 - Modern Dance Technique 6 (2.0 cr)
 DNCE 3110 - Ballet Technique 5 (2.0 cr)
 DNCE 3120 - Ballet Technique 6 (2.0 cr)
 DNCE 3210 - Jazz Technique 5 (1.0 cr)
 DNCE 3220 - Jazz Technique 6 (1.0 cr)
 DNCE 3401W - Dance History 1, OH, WI (3.0 cr)
 DNCE 3402W - Dance History 2, IP, OH, WI (3.0 cr)
 DNCE 3433 - Articulate Body (3.0 cr)
 DNCE 3601 - Dance Composition 1 (3.0 cr)
 DNCE 3602 - Dance Composition 2 (3.0 cr)
 DNCE 3621 - Dance Production I (2.0 cr)
 DNCE 3622 - Dance Production II (2.0 cr)
 DNCE 3901 - Survival Strategies in Dance (3.0 cr)
 DNCE 4443 - Philosophy and Aesthetics (3.0 cr)
 DNCE 4601 - Dance Composition 3 (3.0 cr)
 DNCE 4602 - Dance Composition 4 (3.0 cr)
 DNCE 5010 - Modern Dance Technique 7 (2.0 cr)
 DNCE 5020 - Modern Dance Technique 8 (2.0 cr)
 DNCE 5601 - Dance Composition 5 (1.0 cr)
 DNCE 5858 - Teaching Dance (4.0 cr)

Take 4 or more credit(s) from the following:

DNCE 3700 - Performance (1.0 cr)
 DNCE 5700 - Performance (1.0 cr)

Complete a 2 credit world dance technique elective in consultation with an adviser.

DNCE 3487W - Ethnic Dance Traditions in American Society, CD, WI (3.0 cr)
 or DNCE 3488W - Dance as Cultural Practice, IP, OH, WI (3.0 cr)

Electives

18 credits fulfilled by courses in such areas as music, theatre, art history, kinesiology, cultural studies, speech communications, and women's studies, as agreed upon between students and their dance advisers. No more than 6 credits should be in technique.

Senior Seminar

DNCE 4901 - Senior Seminar (2.0 cr)

Dutch Minor

German, Scandinavian, and Dutch

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

The minor includes study of the spoken language, literature, culture, and civilization.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Take at least 15 credits in 3xxx, 4xxx beyond 4004, and 5xxx courses. Only one course may be directed or independent study. All courses in the minor must be taken A-F and be completed with a grade of at least C-. At least one course must be taken at the University of Minnesota Dutch studies program. The program must be approved by the director of undergraduate studies and may include courses in other departments (e.g., Art History, History).

Required Courses

Minor Courses

DTCH 3011 - Conversation and Composition (3.0 cr)

DTCH 3012 - Conversation and Composition (3.0 cr)

Take 9 or more credit(s) from the following:

DTCH 3xxx

DTCH 4xxx

DTCH 5xxx

East Asian Studies Minor

Institute for Global Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 19 to 23.

Students take four semesters of an East Asian language and four East Asian culture courses. Additional information may be found at <http://igs.cla.umn.edu>.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Chinese, Japanese, or Korean.

Courses must be drawn from at least three different departments. A maximum of 3 credits may be in directed studies or directed research. All courses must be taken A-F, with a grade of at least C. The program must be approved by the global studies adviser.

Required Courses

Preparatory Courses

Chinese

CHN 1011 - Beginning Modern Chinese (6.0 cr)

CHN 1012 - Beginning Modern Chinese (6.0 cr)

CHN 3021 - Intermediate Modern Chinese (5.0 cr)

CHN 3022 - Intermediate Modern Chinese (5.0 cr)

or

Japanese

JPN 1011 - Beginning Japanese (6.0 cr)

JPN 1012 - Beginning Japanese (6.0 cr)

JPN 3021 - Intermediate Japanese (5.0 cr)

JPN 3022 - Intermediate Japanese (5.0 cr)

or

Korean

KOR 1011 - Beginning Korean (5.0 cr)

KOR 1012 - Beginning Korean (5.0 cr)

KOR 3021 - Intermediate Korean (5.0 cr)

KOR 3022 - Intermediate Korean (5.0 cr)

Minor Courses

Students must complete five courses. GEOG/EAS 3211 may be replaced by an approved substitute.

GEOG 3211 - East Asia, IP (3.0 cr)

Take two 3xxx-5xxx courses in the humanities dealing with East Asia or a single East Asian society.

Take one 3xxx-5xxx course in social sciences or history dealing with East Asia or a single East Asian society.

EAS 3461 - Introduction to East Asia I: The Imperial Age, HP, IP (4.0 cr)

or EAS 3462 - Introduction to East Asia II: 1600-2000, HP, IP (3.0-4.0 cr)

Economics - Quantitative Emphasis B.A.

Economics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 26.

Degree: Bachelor of Arts.

Economics emphasizes critical thinking and the understanding of basic economic principles. The B.A. - quantitative emphasis adds basic quantitative training (in calculus, linear algebra, and econometrics) and best suits students considering graduate work in business administration.

Students choose from courses in comparative economic systems; economic theory; econometrics; economic development; game theory; industrial organization; cost-benefit analysis; environmental, financial, international, mathematical, monetary, public, and labor economics. For more information, visit www.econ.umn.edu.

Admission Requirements

Students must complete 4 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Coursework

ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)

ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

MATH 1271 - Calculus I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Major Core

ECON 3101 - Intermediate Microeconomics (4.0 cr)
 ECON 3102 - Intermediate Macroeconomics (4.0 cr)
 ECON 4211 - Principles of Econometrics (4.0 cr)
 STAT 3021 - Introduction to Probability and Statistics (3.0 cr)
 STAT 3022 - Data Analysis (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)

Major Elective Courses

One 3xxx-5xxx course must be writing intensive. ACCT 5100 or APEC 4821 can be applied toward the six total courses with adviser approval. Only one country/area study can count towards the major requirement.

Take 12 or more credit(s) from the following:

ECON 3xxx
 ECON 4xxx
 ECON 5xxx

Final Project

ECON 3951 - Major Project Seminar (2.0 cr)
 or ECON 3991 - Independent Study (1.0-3.0 cr)
 or

The final project requirement may be fulfilled with a term paper from an upper division writing intensive (WI) course with a minimum grade of A-.

or

The final project requirement may be fulfilled with an acceptable honors projects or a thesis (up to 6 cr.).

Economics B.A.

Economics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 28.

Degree: Bachelor of Arts.

Economics emphasizes critical thinking and the understanding of basic economic principles. The B.A. gives students a solid background in economics, is the least quantitative of the three economics majors, and provides excellent preparation for students interested in working immediately after graduation or considering law school.

Students choose from courses in comparative economic systems; economic theory; econometrics; economic development; game theory; industrial organization; cost-benefit analysis; environmental, financial, international, mathematical, monetary, public, and labor economics.

For more information, visit www.econ.umn.edu.

Admission Requirements

Students must complete 3 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Coursework

ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 MATH 1271 - Calculus I, MATH (4.0 cr)

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Major Core

ECON 3101 - Intermediate Microeconomics (4.0 cr)
 ECON 3102 - Intermediate Macroeconomics (4.0 cr)
 STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
 STAT 3022 - Data Analysis (4.0 cr)

Electives

At least one 3xxx-5xxx course must be writing intensive.

Take 6 or more course(s) totaling 18 or more credit(s).

Take 1 or more course(s) from the following:

ECON 3xxx
 ECON 4xxx
 ECON 5xxx

Take 0 - 1 course(s) from the following:

ECON 3960 - Topics in Economics (3.0 cr)
 ECON 4311 - Economy of Latin America (3.0 cr)
 ECON 4313 - The Russian Economy (3.0 cr)
 ECON 4315 - The Japanese Economy (3.0 cr)

One of the courses below may be used with major adviser approval.

Take 0 - 1 course(s) from the following:

ACCT 5100 - Corporate Financial Reporting (4.0 cr)
 APEC 4821W - Agribusiness Management, WI (5.0 cr)

Final Project

ECON 3951 - Major Project Seminar (2.0 cr)
 or ECON 3991 - Independent Study (1.0-3.0 cr)
 or

The final project requirement may be fulfilled with a term paper from an upper division writing intensive (WI) course with a minimum grade of A-.

or

The final project requirement may be fulfilled with an acceptable honors projects or a thesis (up to 6 cr.).

Economics B.S.

Economics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 32.

Degree: Bachelor of Science.

Economics emphasizes critical thinking and the understanding of basic economic principles. The B.S. is for students interested in graduate study in economics or in a career where quantitative economic analysis plays a significant role. The strong quantitative component in this degree emphasizes multivariate calculus, linear algebra, and econometrics.

Students choose from courses in comparative economic systems; economic theory; econometrics; economic development; game theory; industrial organization; cost-benefit analysis; environmental, financial, international, mathematical, monetary, public, and labor economics.

For more information, visit www.econ.umn.edu.

Admission Requirements

Students must complete 4 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Coursework

ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 MATH 1271 - Calculus I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)

Program Requirements

Required Courses

Major Core

ECON 3101 - Intermediate Microeconomics (4.0 cr)
 ECON 3102 - Intermediate Macroeconomics (4.0 cr)
 ECON 4261 - Introduction to Econometrics (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 MATH 2263 - Multivariable Calculus (4.0 cr)

Take one of the following course pairs:

STAT 4101 - Theory of Statistics I (4.0 cr)
 STAT 4102 - Theory of Statistics II (4.0 cr)
 STAT 5101 - Theory of Statistics I (4.0 cr)
 STAT 5102 - Theory of Statistics II (4.0 cr)

Electives

Choose a minimum of four approved economics electives (12 cr.) and two economics honors courses (8 cr.). One 3xxx-5xxx course must be writing intensive. ACCT 5100, APEC 4821 or 5xxx, MATH 4065, MATH 4606, MATH 5615 can be applied toward the six total courses. Only one country/area study can count towards the major requirement.

Two economics honors courses (8 credits).

Take 12 or more credit(s) from the following:

ECON 3xxx
 ECON 4xxx
 ECON 5xxx

Economics Minor

Economics

Requirements for this program are current for Fall 2006.

Required credits in this minor: 13 to 30.

Economics is a useful minor for students majoring in business, engineering, statistics, computer science, mathematics, and all of the social sciences. Minors are available in six subfields designed to complement study in other majors. Minors require 13-30 credits of upper-level work, depending on the subfield. This includes a minimum of three or more upper-level economics courses and supporting work in mathematics and/or statistics, as needed for the subfield. Students must complete at least 9 upper division economics credits at the University of Minnesota, Twin Cities.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

Program Requirements

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Applied Microeconomics

Required Courses

Requirements

ECON 4211 is also recommended.
 ECON 3101 - Intermediate Microeconomics (4.0 cr)
 MATH 1271 - Calculus I, MATH (4.0 cr)

Labor Economics

ECON 3501 - Labor Economics (3.0 cr)
 or ECON 4531 - Labor Economics (3.0 cr)

Industrial Organization and Antitrust Policy

ECON 3601 - Industrial Organization and Antitrust Policy (3.0 cr)
 or ECON 4631 - Industrial Organization and Antitrust Policy (3.0 cr)

Valuation

ECON 4611H - Honors Course: Environmental Valuation, H (4.0 cr)
 or ECON 4623 - Housing Markets and Public Policy (3.0 cr)

Electives

ECON 3801 - Elements of Public Economics (3.0 cr)
 or ECON 4821 - Public Economics (3.0 cr)
 or ECON 4831 - Cost-Benefit Analysis, WI (3.0 cr)

Econometrics

Required Courses

Requirements

ECON 3101 - Intermediate Microeconomics (4.0 cr)
 ECON 3102 - Intermediate Macroeconomics (4.0 cr)
 ECON 4261 - Introduction to Econometrics (4.0 cr)
 MATH 1271 - Calculus I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)

Take one of the following course pairs:

STAT 4101 - Theory of Statistics I (4.0 cr)
 STAT 4102 - Theory of Statistics II (4.0 cr)
 or
 STAT 5101 - Theory of Statistics I (4.0 cr)
 STAT 5102 - Theory of Statistics II (4.0 cr)

Directed Study

Take 3 or more credit(s) from the following:
 ECON 3993 - Directed Studies (1.0-3.0 cr)

Economic Theory

Required Courses

Requirements

ECON 3101 - Intermediate Microeconomics (4.0 cr)
 ECON 3102 - Intermediate Macroeconomics (4.0 cr)
 MATH 1271 - Calculus I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 MATH 2263 - Multivariable Calculus (4.0 cr)
 ECON 4109H - Honors Course: Game Theory and Applications, H (4.0 cr)
 or ECON 4113 - Introduction to Mathematical Economics (4.0 cr)
 or ECON 4731 - Macroeconomic Policy (3.0 cr)
 or ECON 4741 - Quantitative Analysis of the Macroeconomy (3.0 cr)

General

Required Courses

Requirements

ECON 3101 - Intermediate Microeconomics (4.0 cr)
 or ECON 3105 - Managerial Economics (4.0 cr)
 MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)

Electives

Take 3 or more course(s) totaling 9 or more credit(s) from the following:

ECON 3xxx
 ECON 4xxx

International Trade and Development

Required Courses

Requirements

ECON 3101 - Intermediate Microeconomics (4.0 cr)
 ECON 4301 - Economic Development, WI (3.0 cr)
 or ECON 4331W - Economic Development, WI (3.0 cr)
 ECON 4307 - Comparative Economic Systems, IP (3.0 cr)
 or ECON 4337 - Comparative Economic Systems, IP (3.0 cr)
 MATH 1142 - Short Calculus, MATH (4.0 cr)

 MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)

English B.A.

English Language and Literature

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 35.

Degree: Bachelor of Arts.

Students who major in English study literature and other forms of verbal expression, literary history and criticism, critical theory, linguistics, and creative writing. Courses offered by the department explore a wide range of discourses written in English—from around the globe, as well as from Britain and America—including poetry, drama, fiction, film, popular culture, and electronic media. Students examine the cultural, social, political, and economic contexts that condition a variety of texts. Majors write extensively and learn to express themselves effectively, both orally and in writing. They gain practical insight into the words that they speak, read, and write.

Students transferring courses from other colleges and universities must complete five University of Minnesota 3- or 4-credit English courses in residence. These courses must include ENGL or ENGW 3960W, the senior project, and at least three other upper division courses (3xxx or higher).

Students wishing to transfer English courses from outside the University of Minnesota and apply them to the English major requirements should discuss this with the undergraduate adviser. Note: All English courses completed at two-year community colleges are accepted as equivalent to University lower division (1xxx) courses, regardless of content. Advanced Placement (AP) and International Baccalaureate (IB) credits are not included in the major.

Admission Requirements

Prospective majors are encouraged to complete an introductory course in literature, creative writing, and/or English language, chosen from ENGL 1001-1701 and ENGW 1101-1104, before officially declaring the major. To declare a major, a student schedules an appointment with the Undergraduate Studies Office 227 Lind Hall; 612-625-4592; englmaj@umn.edu, and completes a Major Program form which is filed in CLA, the department, and with the student.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

English majors are encouraged to study in other countries before their senior year, to increase understanding of English language and literatures from diverse cultural perspectives. Advanced planning facilitates academic success and progress. See the Learning Abroad Center Web site at www.UMabroad.umn.edu for more information.

The English department supports an engaged, civic-oriented curriculum and teaches the critical skills of reading and writing in the context of community involvement and real public spheres by incorporating community and service-learning components into literature and composition classes.

Students can work as interns at local organizations, neighborhood houses, alternative schools, after-school programs, and in the grassroots/nonprofit sector of the greater Twin Cities area. While underscoring the relevance of literary studies to contemporary life, these hands-on experiences prepare students not only for

careers and professions, but also for an ongoing engagement in the civic life of their communities. Students can learn more from the University of Minnesota Literacy Lab Web site and from their major adviser.

Note: Independent study is limited to a maximum of 12 credits at any number level, directed study, directed instruction, or independent and distance learning (IDL) courses.

Required Courses

Major Courses

The methods course provides majors with skills in close and critical reading, background in history and culture, and multiple approaches to literary works. Shakespeare and the British and American literature surveys situate literary works in historical, cultural, and theoretical perspectives.

ENGL 3001W - Textual Analysis: Methods, WI (4.0 cr)

ENGL 3007 - Shakespeare, LIT (3.0 cr)

or

A department-approved 3xxx Shakespeare in London course.

Take 3 or more course(s) from the following:

British Literature

Take 1 or more course(s) from the following:

ENGL 3003W - Historical Survey of British Literatures I, HP, WI (4.0 cr)

ENGL 3004W - Historical Survey of British Literatures II, HP, WI (4.0 cr)

American Literature

Take 1 or more course(s) from the following:

ENGL 3005W - Survey of American Literatures and Cultures I, CD, LIT, WI (4.0 cr)

ENGL 3006W - Survey of American Literatures and Cultures II, CD, LIT, WI (4.0 cr)

English Language or Literary Theory

This requirement allows students to deepen their understanding of the English language or to concentrate on theoretical questions that shape readers' understanding of texts.

ENGL 3002 - Modern Literary Criticism and Theory (3.0 cr)

or ENGL 3601 - Analysis of the English Language (4.0 cr)

or ENGL 3741 - Literacy and American Cultural Diversity, C/PE, CD (4.0 cr)

or ENGL 4003 - History of Literary Theory (3.0 cr)

or ENGL 4602W - Gender and the English Language, CD, WI (4.0 cr)

or ENGL 4603W - World Englishes, IP, WI (4.0 cr)

or ENGL 4605 - Social Variation in American English, CD (4.0 cr)

or ENGL 4612 - Old English I (3.0 cr)

or ENGL 4613 - Old English II (3.0 cr)

or ENGL 4722 - Alphabet to Internet: History of Writing Technologies (4.0 cr)

or

Take both of the following internship courses.

ENGL 3505 - Community Learning Internships I (3.0 cr)

ENGL 3506 - Learning Internships II (4.0 cr)

Electives

Electives are generally devoted to in-depth studies of particular authors, topics, periods, or genres. Creative writing electives enable students to explore the intricacies and intimacies of the creative process and see for themselves some of the ways in which prose and poetry are created and read.

Take 3 or more course(s) from the following:

Take 2 or more course(s) from the following:

ENGC 3xxx

ENGL 3xxx

ENGL 4xxx

ENGL 5xxx

ENGW 3xxx

ENGW 5xxx

Take no more than 1 course(s) from the following:

ENGL 1xxx

ENGW 1xxx

Senior Project

The program of study culminates in a writing project (4 credits), completed either in a rigorous and intensive seminar in which students produce an extended, scholarly essay (ENGL 3960W), or in an advanced creative writing workshop (ENGW 3960W) in which students produce a substantial manuscript of poetry, literary fiction, or literary nonfiction.

ENGL 3883V - Honors Thesis, WI, H (1.0-4.0 cr)

or ENGL 3960W - Senior Seminar, WI (4.0 cr)

or ENGW 3960W - Writing Workshop for Majors, WI (4.0 cr)

English Minor

English Language and Literature

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

Students who minor in English study literature and other forms of verbal expression, literary history and criticism, critical theory, linguistics, and creative writing. Courses offered by the department explore a wide range of discourses written in English—from around the globe, as well as from Britain and America—including poetry, drama, fiction, film, popular culture, and electronic media.

Students in any degree program complete at least 18 credits in the minor, all in 3xxx or higher courses, as part of the minimum credits for their baccalaureate degree program.

Students begin their studies, ideally in their sophomore year, with the department's methods course (ENGL 3001W), progress to taking Shakespeare (ENGL 3007 or a department-approved Shakespeare in London course), and two surveys in British and American literature (selected from ENGL 3003W, 3004W, 3005W, and 3006W). In addition, students choose at least one English elective course (3 to 4 credits of 3xxx or higher in ENGL, ENGC, or ENGW). The methods course—ENGL 3001W—provides minors with skills in close and critical reading, the background in history and culture, and multiple approaches to literary works that will guide their continued studies. Shakespeare and the British and American literature surveys situate literary works in historical, cultural, and theoretical perspective.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

At least four of the five English minor courses must be taken A-F and completed with grades C- or better. The equivalent of one course in independent study work may be applied to the minor. Coursework completed elsewhere may be counted toward the minor only with department approval. Students must take at least two of the 3xxx minor courses in the University of Minnesota, Twin Cities English department.

Required Courses**Minor Courses**

ENGL 3001W - Textual Analysis: Methods, WI (4.0 cr)

ENGL 3007 - Shakespeare, LIT (3.0 cr)

ENGC 3xxx

or

ENGL 3xxx

or

ENGL 4xxx

or

ENGL 5xxx

or

ENGW 3xxx

Take 2 or more course(s) from the following:

ENGL 3003W - Historical Survey of British Literatures I, HP, WI (4.0 cr)

ENGL 3004W - Historical Survey of British Literatures II, HP, WI (4.0 cr)

ENGL 3005W - Survey of American Literatures and Cultures I, CD, LIT, WI (4.0 cr)

ENGL 3006W - Survey of American Literatures and Cultures II, CD, LIT, WI (4.0 cr)

English as a Second Language Minor

Inst of Ling, Engl as Sec Lang, and Slavic Lang and Lit

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

The minor requires four courses.

Admission RequirementsFor information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.**Program Requirements****Required Courses****Minor Courses**

LING 3001 - Introduction to Linguistics, SSCI (4.0 cr)

TESL 3001 - Basics in Teaching English as a Second Language, C/PE, CD (4.0 cr)

TESL 3501 - Practical Language Learning for International Communication (3.0 cr)

TESL 5401 - Language Analysis for Teachers of English as a Second Language (4.0 cr)

European Area Studies Minor

Institute for Global Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

Students must complete the CLA second language requirement in a European language and take five courses (at least 15 credits) of 3xxx-5xxx coursework focusing on a particular topic in European area studies (excluding language courses).

Admission RequirementsFor information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.**Program Requirements**

Students are required to take 4 semester(s) of Any European language.

A maximum of 3 credits may be in directed studies or directed research and courses must be from a minimum of three different departments. All courses must be taken A-F with a grade of C- or better. The minor program must be approved by the global studies adviser.

Required Courses**Minor Courses**

GEOG 3161 - Europe: A Geographic Perspective, IP, SSCI (3.0 cr)

HIST 3722 - 20th-Century Europe From the End of World War II to the End of the Cold War: 1945-1991, HP, IP (3.0 cr)

At least 6 credits of humanities from any department with approval of a global studies adviser.

After completing GEOG 3161, HIST 3722, and six credits in humanities, take any course in any discipline focusing on some aspect of Europe, with the approval of a global studies adviser.

French Studies B.A.

French and Italian

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 35.

Degree: Bachelor of Arts.

The French studies major includes courses in three areas of concentration: linguistics, literature, and culture. Courses in language and linguistics include history of the French language, structure of the language, sociolinguistics, phonetics, conversation, and business French. Courses in literature and culture focus on topics and problems in three broad historical periods: the Middle Ages and Renaissance, early modern France, and modern and contemporary France. A number of courses focus on Francophone literature from Africa, the Caribbean, and Quebec. Courses in French cinema are also offered.

Many students combine a French studies major with another major. The department offers selected courses in English for students who have mastered French but want to study France and the French-speaking world.

Admission RequirementsFor information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.**Program Requirements**

Students are required to take 4 semester(s) of French.

At least four upper division courses must be completed in the French department at the University of Minnesota, Twin Cities campus.

Required Courses**Major Courses**

FREN 3014 - French Phonetics (2.0 cr)

FREN 3015 - Advanced French Grammar and Communication (4.0 cr)

FREN 3016 - Advanced French Composition and Communication (4.0 cr)

FREN 3101W - Introduction to French Literature, LIT, WI (4.0 cr)

FREN 3111 - Medieval Stories (3.0 cr)

or FREN 3140 - Topics in Medieval and Renaissance Literature (3.0 cr)

or FREN 3170 - The Unruly Subject(s) of Classicism: Writing, History, Power in Ancien Régime France (3.0 cr)

or FREN 3172 - The Court Society: Literature, Culture, Spectacle (3.0 cr)
 or FREN 3181 - Mapping Enlightenment in 17th- and 18th-Century French Prose (3.0 cr)
 or FREN 3240 - Topics in Ancien Regime Literature (3.0 cr)
 or FREN 3250 - French Poetry (3.0 cr)
 or FREN 3260 - Dramas of Culture: 20th-Century French and Francophone Theater (3.0 cr)
 or FREN 3310 - Literature of Revolution and Upheaval (3.0 cr)
 or FREN 3321 - Producing the Bourgeois Subject: The Sense of Self in 18th-Century French Literature (3.0 cr)
 or FREN 3330 - Literature and the Making of Modern France: 20th-Century Perspectives (3.0 cr)
 or FREN 3340 - Topics in Modern French Literature (3.0 cr)
 or FREN 3350 - Topics in Literature (3.0 cr)
 or FREN 3360 - Coming of Age (3.0 cr)
 or FREN 3371 - Writing Crisis in (Post) Modern Times (3.0 cr)
 or FREN 3380 - Modern Times: Literature of the 19th and 20th Centuries (3.0 cr)
 or FREN 3410 - Quebecois Literature (3.0 cr)
 or FREN 3479 - Francophone Writers of the African Diaspora, IP (3.0 cr)
 or FREN 5250 - Promenades Poétiques: The Subject in Motion (3.0 cr)
 or FREN 5260 - The Returns of Tragedy (3.0 cr)
 or FREN 5270 - "To Change or not to Change?": Speculations on (Post) Modern French Texts (3.0 cr)
 or FREN 5350 - Topics in Literature and Culture (3.0 cr)
 or FREN 5470 - Post/Colonial Francophone Literatures (3.0 cr)
 FREN 3601 - French Civilization and Culture I, IP (3.0 cr)
 or FREN 3602 - French Civilization and Culture II, IP (3.0 cr)
 or FREN 3650 - Topics in French/Francophone Cultures (3.0 cr)

Electives

FREN 3010 is repeatable for a total of nine credits. LING 3001 is a prerequisite for most French linguistics courses. Elective credits may not include FREN 3705, 3706, 3710, 3750, or 3019.

Take 12 or more credit(s) from the following:

FREN 3xxx
 FREN 4xxx
 FREN 5xxx

Senior Project

The course focuses on contemporary issues in French studies; students complete a lengthy research paper.

FREN 4101W - Seminar in French Studies, WI (3.0 cr)

French Studies Minor

French and Italian

Requirements for this program are current for Fall 2006.

Required credits in this minor: 17.

The French studies minor includes courses in three areas of concentration: language, literature, and culture.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of French.

At least two upper division courses must be completed in the French department at the University of Minnesota, Twin Cities.

Required Courses

Minor Courses

FREN 3015 - Advanced French Grammar and Communication (4.0 cr)
 FREN 3101W - Introduction to French Literature, LIT, WI (4.0 cr)

Take 3 or more course(s) from the following:

FREN 3xxx
 FREN 4xxx
 FREN 5xxx

French and Italian Studies B.A.

French and Italian

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 36.

Degree: Bachelor of Arts.

The French and Italian studies major allows students interested in both cultures and languages to pursue a combined major. Students study specific works in each national literature while also exploring the interrelations and cross-cultural exchanges that have contributed to Italian and French literature and culture. This comparative perspective introduces students to a broad range of issues and cultural practices.

Admission Requirements

Students must formally declare a major within the department before completing the majority of the major elective requirements.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of French and Italian.

The French and Italian major requires students to take at least five to six semesters of language, including advanced study, which goes above and beyond the length of the CLA second language requirement.

Required Courses

Preparatory Courses

FREN 1001 - Beginning French (5.0 cr)
 FREN 1002 - Beginning French (5.0 cr)
 FREN 1003 - Intermediate French (5.0 cr)
 FREN 1004 - Intermediate French (5.0 cr)
 ITAL 1001 - Beginning Italian (5.0 cr)
 ITAL 1002 - Beginning Italian (5.0 cr)
 ITAL 1003 - Intermediate Italian (5.0 cr)
 ITAL 1004 - Intermediate Italian (5.0 cr)

Upper Division Language Courses

FREN 3015 - Advanced French Grammar and Communication (4.0 cr)
 ITAL 3015 - Reading, Conversation, and Composition (4.0 cr)

Literature and Culture Courses

FRIT 5999 may not be used to satisfy this requirement.

FREN 3101W - Introduction to French Literature, LIT, WI (4.0 cr)

Take 6 or more credit(s) from the following:

FREN 3xxx
 FREN 4xxx
 FREN 5xxx

Take 9 or more credit(s) from the following:

ITAL 3xxx

ITAL 4xxx

ITAL 5xxx

Take 6 or more credit(s) from the following:

FRIT 3xxx

FRIT 4xxx

FRIT 5xxx

Senior Project

The senior project is completed in FREN 4101 or in an appropriate Italian course selected in consultation with an adviser.

FREN 4101W - Seminar in French Studies, WI (3.0 cr)

A senior project that is acceptable for an honors project for cum laude and magna cum laude. For summa cum laude, students must complete a thesis which must be approved unanimously by a committee of three faculty members, two from the major department and one from outside the major.

Gay, Lesbian, Bi-sexual, Transgendered Minor

Women's Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

The minor focuses on the history, politics, and cultures of gay, lesbian, bisexual and transgendered persons. Courses explore the diversity of GLBT communities, the history and present conditions of sexual identity formation, and the functioning and institutionalization of ideologies of sexuality in a democratic society. Core courses focus on issues related to the history, culture, social, and political formations; experiences of GLBT people; and GLBT/queer theory. Elective courses are drawn from lists of GLBT-focused courses (emphasizing GLBT issues/experiences) and of GLBT-component courses (having at least one-quarter of their content related to GLBT/queer theory or the history, culture, social, political formations, and experiences of GLBT people).

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

GLBT 1001 - Introduction to GLBT Studies (3.0 cr)

GLBT 3301 - Gay, Lesbian, Bisexual, and Transgender Social Movements in the United States (3.0 cr)

CSCL 3456W - Sexuality and Culture, CD, WI (3.0 cr)

or CSCL 3472 - Gay Men and Homophobia in American Culture, CD, HP (3.0 cr)

or WOST 3404 - International Lesbian and Queer Studies (3.0 cr)

or WOST 4403 - Queering Theory (3.0 cr)

Electives

Other courses may be used to meet this requirement with permission from the department. SOC 4090 meets the requirement only if the topic is sociology of sexuality.

Take 3 or more course(s) from the following:

AMST 4101 - Gender, Sexuality, and Politics in America, CD, HP (3.0 cr)

ARTH 3411 - Gender and Sexuality in Art since 1863 (3.0 cr)

ENGL 3330 - Gay, Lesbian, Bisexual, and Transgendered Literature (3.0 cr)

ENGL 3880 - Joy Boys and the Invention of Modern Sexuality (3.0 cr)

FSOS 4152 - Gay, Lesbian, and Bisexual People in Families (3.0 cr)

GLBT 3610 - Topics in GLBT Studies (3.0 cr)

HIST 3212 - Dissident Sexualities in U.S. History (3.0 cr)

PUBH 3010 - Public Health Approaches to HIV/AIDS (2.0 cr)

SOC 4090 - Topics in Sociology (3.0 cr)

SOC 4521 - Love, Sex, and Marriage (3.0 cr)

Geography B.A.

Geography

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 32.

Degree: Bachelor of Arts.

Geography is an academic and practical field that studies the manner in which human-made places and natural systems interact and change. Geographers study these interactions at all scales: neighborhoods and cities; regions and nations; single or multiple biophysical systems; and even the world as a whole. Geography attempts to explain not only these interactions and changes, but in many instances how they are perceived and what meanings they hold.

Depending on their specific interests, geographers will employ one or more of a variety of methods and techniques: fieldwork, mapping, conventional narrative, ethnography, spatial statistics and modeling, and textual analysis. Many geographers are also interested in the intersections of science, technology, and information, such as the impact of geographic information science (GIS) on decision making. Geography's integrative perspective on regional and global change provides students with unparalleled understanding of today's complex world.

The B.A. provides students with a broad background in the discipline with emphasis on one of four tracks: city systems; regional analysis and development; environmental systems; and geographic information science.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Major Courses

Take 3 or more course(s) from the following:

GEOG 1301W - Introduction to Human Geography, IP, SSCI, WI (4.0 cr)

GEOG 3371W - Cities, Citizens, and Communities, CD, SSCI, WI (4.0 cr)

GEOG 3401 - Geography of Environmental Systems and Global Change, WI (4.0 cr)

GEOG 3561 - Principles of Geographic Information Science (4.0 cr)

Modes of Geographic Inquiry

GEOG 4001 - Modes of Geographic Inquiry (4.0 cr)

or GEOG 4002W - Social Theory and the Environment, WI (3.0 cr)

Senior Project

GEOG 3985W - Senior Project Seminar, WI (4.0 cr)
 or GEOG 3994 - Directed Research (1.0-8.0 cr)
 or GEOG 4700 - Community Service Learning
 or GEOG 3411 - Geography of Health and Health Care
 or GEOG 4121 - Latin America

or
 The final project requirement may be fulfilled with a course with extra credits from the geography major.

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.)

Honors students are required to complete one sub-plan plus the honors sub-plan.

City Systems

The city systems track examines urban phenomena on two scales. In cities as systems, students learn about the internal structure of cities, including their morphology, land-use patterns, social geography, and meaning. In systems of cities, the interconnections among cities at regional, national, and global scales are emphasized. The track examines cities and city systems in diverse settings - North American cities, European cities, cities in the developing world - and from different perspectives, including historical, social, political, economic, and other approaches.

Students must take five courses, or a minimum of 15 credits, in this track.

Required Courses**Required Courses**

Take 5 or more course(s) from the following:

GEOG 3331 - Geography of the World Economy, IP, SSCI (3.0 cr)
 GEOG 3355 - Environmental Quality, C/PE, ENVT (3.0 cr)
 GEOG 3361W - Land Use, Landscapes, and the Law, C/PE, ENVT, WI (3.0 cr)
 GEOG 3371W - Cities, Citizens, and Communities, CD, SSCI, WI (4.0 cr)
 GEOG 3373 - Changing Form of the City, HP, IP (3.0 cr)
 GEOG 3374W - The City in Film, IP, OH, WI (4.0 cr)
 GEOG 3375 - Minority Settlement in America, CD (3.0 cr)
 GEOG 3605W - Geographical Perspectives on Planning, C/PE, IP, WI (4.0 cr)
 GEOG 3973 - Geography of the Twin Cities, C/PE, CD (3.0 cr)
 GEOG 4382 - Contemporary Immigrant America, C/PE, CD (3.0-5.0 cr)
 GEOG 5361 - Geography and Real Estate (4.0 cr)
 GEOG 5371W - American Cities I: Population and Housing, WI (4.0 cr)
 GEOG 5372W - American Cities II: Land Use, Transportation, and the Urban Economy, WI (4.0 cr)
 GEOG 5374W - The City in Film, IP, WI (4.0 cr)
 GEOG 5385 - Globalization and Development: Political Economy (4.0 cr)
 GEOG 5605W - Geographical Perspectives on Planning, C/PE, IP, WI (4.0 cr)
 GEOG 5775 - Geographic Education (3.0 cr)

Environmental Systems

The environmental systems track examines the natural environments and resources that sustain human life and activity. Students explore the local and global patterns of climate, soils, vegetation, and surface land form; changes over time, both naturally occurring and caused by humans, in the natural environment; and ways of analyzing and predicting both human-caused and naturally occurring environmental change.

Students must take five courses, or a minimum of 15 credits, in this track.

Required Courses**Required Courses**

Take 5 or more course(s) from the following:

GEO 4701 - Geomorphology (3.0-4.0 cr)
 GEOG 3355 - Environmental Quality, C/PE, ENVT (3.0 cr)
 GEOG 3361W - Land Use, Landscapes, and the Law, C/PE, ENVT, WI (3.0 cr)
 GEOG 3379 - Environment and Development in the Third World, ENVT, IP (3.0 cr)
 GEOG 3381W - Population in an Interacting World, IP, SSCI, WI (4.0 cr)
 GEOG 3401 - Geography of Environmental Systems and Global Change, WI (4.0 cr)
 GEOG 3411W - Geography of Health and Health Care, ENVT, IP, WI (4.0 cr)
 GEOG 3431 - Plant and Animal Geography, ENVT (3.0 cr)
 GEOG 4121W - Latin America, ENVT, IP, WI (4.0 cr)
 GEOG 5361 - Geography and Real Estate (4.0 cr)
 GEOG 5411 - Geography of Health and Health Care, ENVT, IP, WI (4.0 cr)
 GEOG 5421 - Introduction to Atmospheric Science (3.0 cr)
 GEOG 5423 - Climate Models and Modeling (3.0 cr)
 GEOG 5426 - Climatic Variations (3.0 cr)
 GEOG 5441 - Quaternary Landscape Evolution (3.0 cr)
 GEOG 5565 - Geographical Analysis of Environmental Systems and Global Change (3.0 cr)
 GEOG 5775 - Geographic Education (3.0 cr)
 SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Geographic Information Science

The geographic information science track is concerned with all aspects of geographical information, including collection, storage, manipulation, analysis, and visualization. This track encompasses geographical information science (GIS), cartography, remote sensing, spatial analysis, and numerical modeling. The track is also concerned with the relationship between geographic information science, systems, and society.

Students must take five courses, or a minimum of 15 credits, in this track.

Required Courses**Required Courses**

Take 5 or more course(s) from the following:

GEOG 3511 - Principles of Cartography (4.0 cr)
 GEOG 3531 - Numerical Spatial Analysis (4.0 cr)
 GEOG 3561 - Principles of Geographic Information Science (4.0 cr)
 GEOG 5511 - Advanced Cartography (3.0 cr)
 GEOG 5512 - Cartography: Topics (3.0 cr)
 GEOG 5530 - Cartography Internship (2.0-7.0 cr)
 GEOG 5561 - Principles of Geographic Information Science (4.0 cr)
 GEOG 5562 - Geographic Information Science and Analytical Cartography (3.0 cr)
 GEOG 5563 - Advanced Geographic Information Science (3.0 cr)
 GEOG 5564 - Urban Geographic Information Science and Analysis (3.0 cr)
 GEOG 5565 - Geographical Analysis of Environmental Systems and Global Change (3.0 cr)
 GEOG 5588 - Multimedia Cartography (3.0 cr)
 GEOG 5775 - Geographic Education (3.0 cr)

Regional Analysis and Development

In the regional analysis and development track, students learn to think critically about different ways of life and livelihood strategies, as well as different conceptions and practices of development in different geographic contexts. They also learn about the connectedness of societal and environmental processes from the local scale to the global.

Students must take five courses, or a minimum of 15 credits, in this track.

Required Courses**Required Courses**

Take 5 or more course(s) from the following:

- GEOG 3101 - Geography of the United States and Canada, CD, SSCI (4.0 cr)
- GEOG 3111 - Geography of Minnesota, C/PE, ENVT (3.0 cr)
- GEOG 3141 - Africa, ENVT, IP (3.0 cr)
- GEOG 3161 - Europe: A Geographic Perspective, IP, SSCI (3.0 cr)
- GEOG 3181 - Russia and Environs, IP, SSCI (3.0 cr)
- GEOG 3211 - East Asia, IP (3.0 cr)
- GEOG 3331 - Geography of the World Economy, IP, SSCI (3.0 cr)
- GEOG 3355 - Environmental Quality, C/PE, ENVT (3.0 cr)
- GEOG 3361W - Land Use, Landscapes, and the Law, C/PE, ENVT, WI (3.0 cr)
- GEOG 3378 - Third World Underdevelopment and Modernization (3.0 cr)
- GEOG 3379 - Environment and Development in the Third World, ENVT, IP (3.0 cr)
- GEOG 3381W - Population in an Interacting World, IP, SSCI, WI (4.0 cr)
- GEOG 3411W - Geography of Health and Health Care, ENVT, IP, WI (4.0 cr)
- GEOG 4121W - Latin America, ENVT, IP, WI (4.0 cr)
- GEOG 4382 - Contemporary Immigrant America, C/PE, CD (3.0-5.0 cr)
- GEOG 4393 - The Rural Landscape (4.0 cr)
- GEOG 5181 - Russia and Environs, IP (3.0 cr)
- GEOG 5361 - Geography and Real Estate (4.0 cr)
- GEOG 5385 - Globalization and Development: Political Economy (4.0 cr)
- GEOG 5775 - Geographic Education (3.0 cr)

Geography B.S.

Geography

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 38.

Degree: Bachelor of Science.

Geography is an academic and practical field that studies the manner in which human-made places and natural systems interact and change. Geographers study these interactions at all scales: neighborhoods and cities; regions and nations; single or multiple biological systems, and even the world as a whole. Geography attempts to explain not only these interactions and changes, but in many instances how they are perceived and what meanings they hold.

Depending on their specific interests, geographers will employ one or more of a variety of methods and techniques: fieldwork, mapping, conventional narrative, ethnography, spatial statistics and modeling, and textual analysis. Many geographers are also interested in the intersections of science, technology, and information, such as the impact of geographic information systems (GIS) on decision making. Geography's integrative perspective on regional and global change provides students with unparalleled understanding of today's complex world.

The B.S. offers a solid foundation in the science of geography in either the environmental systems or geographic information science track.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements**Required Courses****Major Courses**

- GEOG 3401 - Geography of Environmental Systems and Global Change, WI (4.0 cr)
- GEOG 3561 - Principles of Geographic Information Science (4.0 cr)
- GEOG 1301W - Introduction to Human Geography, IP, SSCI, WI (4.0 cr) or GEOG 3371W - Cities, Citizens, and Communities, CD, SSCI, WI (4.0 cr)
- GEOG 4001 - Modes of Geographic Inquiry (4.0 cr) or GEOG 4002W - Social Theory and the Environment, WI (3.0 cr)

Quantitative Courses

Take one of the following course pairs:

- CSCI 1107 - Introduction to FORTRAN Programming for Scientists and Engineers (3.0 cr)
- CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)
- or
- MATH 1271 - Calculus I, MATH (4.0 cr)
- MATH 1272 - Calculus II (4.0 cr)
- or
- MATH 1371 - IT Calculus I, MATH (4.0 cr)
- MATH 1372 - IT Calculus II (4.0 cr)
- or
- STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
- STAT 3022 - Data Analysis (4.0 cr)

Senior Project

- GEOG 3985W - Senior Project Seminar, WI (4.0 cr)
- or GEOG 3994 - Directed Research
- or GEOG 4700 - Community Service Learning and
- GEOG 3411 - Geography of Health and Health Care
- or GEOG 4121 - Latin America

The final project requirement may be fulfilled with a course with extra credits from the geography major.

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Environmental Systems

The environmental systems track examines the natural environments and resources that sustain human life and activity. Students explore the local and global patterns of climate, soils, vegetation, and surface land form; changes over time, both naturally occurring and caused by humans, in the natural environment; and ways of analyzing and predicting both human-caused and naturally occurring environmental change.

Students must complete four to five courses in this track, for a minimum of 15 credits.

Required Courses

Take 5 or more course(s) from the following:

- GEOG 3355 - Environmental Quality, C/PE, ENVT (3.0 cr)
- GEOG 3361W - Land Use, Landscapes, and the Law, C/PE, ENVT, WI (3.0 cr)
- GEOG 3379 - Environment and Development in the Third World, ENVT, IP (3.0 cr)
- GEOG 3381W - Population in an Interacting World, IP, SSCI, WI (4.0 cr)
- GEOG 3411W - Geography of Health and Health Care, ENVT, IP, WI (4.0 cr)
- GEOG 3431 - Plant and Animal Geography, ENVT (3.0 cr)
- GEOG 4121W - Latin America, ENVT, IP, WI (4.0 cr)

GEOG 5361 - Geography and Real Estate (4.0 cr)
 GEOG 5411 - Geography of Health and Health Care, ENVT, IP, WI (4.0 cr)
 GEOG 5421 - Introduction to Atmospheric Science (3.0 cr)
 GEOG 5423 - Climate Models and Modeling (3.0 cr)
 GEOG 5426 - Climatic Variations (3.0 cr)
 GEOG 5441 - Quaternary Landscape Evolution (3.0 cr)
 GEOG 5565 - Geographical Analysis of Environmental Systems and Global Change (3.0 cr)
 GEOG 5775 - Geographic Education (3.0 cr)
 GEO 4701 - Geomorphology (3.0-4.0 cr)
 SOIL 2125 - Basic Soil Science, ENVT (4.0 cr)

Geographic Information Science

The geographic information science track is concerned with all aspects of geographical information, including collection, storage, manipulation, analysis, and visualization. This track encompasses geographical information science (GIS), cartography, remote sensing, spatial analysis, and numerical modeling. The track is also concerned with the relationship between geographic information science, systems, and society.

Students must take four to five courses in this track, for a minimum of 15 credits.

Required Courses

Take 5 or more course(s) from the following:

GEOG 3511 - Principles of Cartography (4.0 cr)
 GEOG 3531 - Numerical Spatial Analysis (4.0 cr)
 GEOG 5511 - Advanced Cartography (3.0 cr)
 GEOG 5512 - Cartography: Topics (3.0 cr)
 GEOG 5530 - Cartography Internship (2.0-7.0 cr)
 GEOG 5561 - Principles of Geographic Information Science (4.0 cr)
 GEOG 5562 - Geographic Information Science and Analytical Cartography (3.0 cr)
 GEOG 5563 - Advanced Geographic Information Science (3.0 cr)
 GEOG 5564 - Urban Geographic Information Science and Analysis (3.0 cr)
 GEOG 5565 - Geographical Analysis of Environmental Systems and Global Change (3.0 cr)
 GEOG 5588 - Multimedia Cartography (3.0 cr)
 GEOG 5775 - Geographic Education (3.0 cr)

Geography Minor

Geography

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

Geography is an academic and practical field that studies the manner in which human-made places and natural systems interact and change. Geographers study these interactions at all scales: neighborhoods and cities; regions and nations; single or multiple biophysical systems, and even the world as a whole.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Minor courses must be completed with a grade of at least C-.

Required Courses

Minor Courses

Take 14 or more credit(s) from the following:

GEOG 3xxx
 GEOG 4xxx
 GEOG 5xxx

Geology B.A.

Geology and Geophysics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 41.

This program requires summer terms.

Degree: Bachelor of Arts.

Geology is the study of the composition, structure, and history of the Earth and of the processes that operate on and within it, with emphasis on the crust, oceans, and atmosphere. The B.A. prepares students for graduate study or professional employment.

Geologists are employed in a wide range of fields, including exploration for and development of natural resources, environmental science, urban planning, education, oceanography, and other areas related to natural science. Potential employers include the oil, gas, and minerals industries, environmental consultants, federal and private research institutions, universities, schools, and government agencies. An advanced degree is usually required for a career in research or teaching.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Mathematics

Take either the calculus sequence (two courses) or the honors sequence (two courses).

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)

Take one of the following course pairs:

MATH 1272 - Calculus II (4.0 cr)
 MATH 1372 - IT Calculus II (4.0 cr)

or

MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
 MATH 1572H - Honors Calculus II, H (4.0 cr)

Physics

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Chemistry

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)

Major Courses

GEO 2201 - Geodynamics I: The Solid Earth (3.0 cr)
GEO 2301 - Mineralogy (3.0 cr)
GEO 2302 - Petrology (3.0 cr)
GEO 2303W - Geochemical Principles, WI (3.0 cr)
GEO 3202 - Geodynamics II: The Fluid Earth (3.0 cr)
GEO 3401 - Geochronology and Earth History (3.0 cr)
GEO 3911 - Introductory Field Geology (4.0 cr)
GEO 4501 - Structural Geology (3.0 cr)
GEO 4602 - Sedimentology and Stratigraphy (3.0 cr)
GEO 4631W - Earth Systems: Geosphere/Biosphere Interactions, WI (3.0 cr)

Workshop Courses

Take 2 or more course(s) from the following:

GEO 3870 - Modeling Workshop (1.0 cr)
GEO 3880 - Laboratory Workshop (1.0 cr)
GEO 3890 - Field Workshop (1.0 cr)

Field Course

GEO 4911 - Advanced Field Geology (4.0 cr)
or GEO 4971 - Field Hydrogeology (4.0 cr)

Electives

Take 4 or more credit(s) from the following:

GEO 1xxx
GEO 2xxx
GEO 3xxx
GEO 4xxx
GEO 5xxx

Geology Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

Geology is the study of the composition, structure, and history of the Earth and of the processes that operate on and within it, with emphasis on the crust, oceans, and atmosphere.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

GEO 1001 - Earth and Its Environments, ENVT, PHYS SCI/L (4.0 cr)

Take 14 or more credit(s) from the following:

GEO 2xxx
GEO 3xxx
GEO 4xxx
GEO 5xxx

German Studies B.A.

German, Scandinavian, and Dutch

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 35.

Degree: Bachelor of Arts.

The German studies program teaches and conducts research in the language, literature, and culture of the German-speaking nations of Europe, primarily Germany, Austria, and Switzerland. The major in German studies and minor in German include the study of the spoken language, as well as of literature, philology, culture, and civilization. The department also offers majors and minors in Scandinavian languages, a minor in Dutch, and a minor in Austrian and Central European studies.

The department recommends study abroad in a German-speaking country for at least six months in order to acquire cultural familiarity and language fluency. Students may apply appropriate coursework to a German studies major or a German minor. The University is affiliated with exchange programs in Berlin and Freiburg for both one and two-semester stays. There are also possibilities for study at many other German, Austrian, and Swiss universities. Visit the Learning Abroad Center Web site at www.umabroad.umn.edu for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

The major in German studies consists of a minimum of 35 credits in 3xxx, 4xxx, and 5xxx courses. All courses in the major must be taken A-F and completed with a C- or better. At least two courses must be taken in the German program at the University of Minnesota. The major program must be approved by the Director of Undergraduate Studies.

Required Courses

Major Core

GER 3011W - Conversation and Composition, WI (4.0 cr)
GER 3104W - Reading and Analysis of German Literature, LIT, WI (4.0 cr)
GER 3511W - German Civilization and Culture: Middle Ages to 1700, WI (4.0 cr)
GER 3512W - German Civilization and Culture: 1700 to the Present, WI (4.0 cr)

Senior Project

The major project is a substantial paper of approximately 20 typed pages. The paper is prepared in the Major Project Seminar with the guidance and supervision of a faculty member.

GSD 3451W - Major Project Seminar, WI (4.0 cr) or
GSD 3451V - Honors Major Project Seminar

Emphasis Areas

Students are required to complete one of the following course groups.

Literature, Culture, and Society Emphasis

Up to two courses in this emphasis may be Ger 36xx, 46xx, or 56xx courses if taken in translation if substantial work in German is done by the student, as directed by the instructors of the courses or by the Director of Undergraduate Studies. One elective can be a course outside the German department, as long as the course includes sufficient coverage of German-speaking areas.

Take 15 or more credit(s) from the following:

GER 3xxx
GER 4xxx
GER 5xxx

Linguistics and Philology Emphasis

Take 5 or more course(s).

Take 1 or more course(s) from the following:

LING 3001 - Introduction to Linguistics, SSCI (4.0 cr)
LING 3001H - Honors: Introduction to Linguistics, SSCI, H (4.0 cr)
LING 3601 - Historical Linguistics (3.0 cr)
LING 5001 - Introduction to Linguistics (4.0 cr)
LING 5601 - Historical Linguistics (3.0 cr)

Take 4 or more course(s) from the following:

GER 3701 - History of the German Language (3.0 cr)
GER 3702 - Beginning Middle High German (3.0 cr)
GER 3704 - German Dialects (3.0 cr)
GER 5101 - Analysis of German (3.0 cr)
GER 5711 - History of the German Language I (3.0 cr)
GER 5712 - History of the German Language II (3.0 cr)
GER 5722 - Middle High German: Advanced Readings (3.0 cr)
GER 5731 - Old High German I (3.0 cr)
GER 5732 - Old High German II (3.0 cr)
GER 5734 - Old Saxon (3.0 cr)
GER 5740 - Readings in Philology (3.0 cr)

German Minor

German, Scandinavian, and Dutch

Requirements for this program are current for Fall 2006.

Required credits in this minor: 17.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

The minor consists of a minimum of 17 credits with no more than one course taken as directed or independent study. All courses must be taken A-F and completed with a grade of C- or better. Ger 36xx, 46xx or 56xx course may be used for the minor if substantial work is done in German, as directed by the instructor of the course or by the director of Undergraduate Studies. At least one course must be taken from the German program at the University of Minnesota, Twin Cities. The minor program must be approved by the director of undergraduate studies

Required Courses

Minor Core

GER 3011W - Conversation and Composition, WI (4.0 cr)
GER 3104W - Reading and Analysis of German Literature, LIT, WI (4.0 cr)

Take 9 or more credit(s) from the following:

GER 3xxx
GER 4xxx
GER 5xxx

Global Studies B.A.

Institute for Global Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 35.

Degree: Bachelor of Arts.

This program offers students the opportunity to study the interrelated processes shaping today's increasingly interdependent world. Students examine political, economic, cultural, and social processes of local communities, nation states, transnational businesses, and social movements around the globe. The program requires students to integrate theoretical knowledge about broad global processes with regionally focused detailed knowledge of social and cultural systems and language. Students complete a common set of core courses providing a broad overview of issues and approaches to global studies. Each student then chooses a thematic and regional concentration. Coursework is completed by selecting from relevant courses offered by a broad range of departments.

Admission Requirements

As preparation for the major, students are encouraged to take 6 credits of related coursework as shown in "Preparatory Courses" listed in the program requirements. Students must formally enroll in the major at the advising office, 232A Social Sciences Tower. Students must meet with an adviser to develop a program that meets major guidelines.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of second language appropriate to regional concentration.

Detailed information about concentrations is available in the Global Studies Handbook or on-line at <http://igs.cla.umn.edu>.

Required Courses

Preparatory Courses

Take 6 or more credit(s) from the following:

CSCL 1001 - Introduction to Cultural Studies: Rhetoric, Power, Desire, CD, OH (4.0 cr)
CSCL 1301W - Reading Culture: Theory and Practice, OH, WI (4.0 cr)
GEOG 1301W - Introduction to Human Geography, IP, SSCI, WI (4.0 cr)
BULLETGLOS 1015W - Introduction to Global History Since 1950, HP, IP, WI (4.0 cr)
HIST 1012W - World History: The Age of Global Contact, HP, IP, WI (4.0 cr)
HIST 1018 - World History: The Age of Global Contact, HP, IP (3.0 cr)
POL 1025 - Global Politics, IP, SSCI (4.0 cr)
GLOS 1112 Globalization and Social Justice

Major Courses

GLOS 3144 - Knowledge, Power, and the Politics of Representation in Global Studies, IP, SSCI (4.0 cr)
GLOS 3145- Theoretical Approaches to Global Studies (4.0 cr)

Thematic Concentration

Choose a thematic concentration from the following options:
Culture, Power, Place; Environment and Sustainable Development; Governance, Peace and Justice in a Global Context; International Political Economy; Population, Migration,

and Identity. Courses must be chosen in consultation with a global studies adviser.

One breadth course, (3 credits).

Ways of knowing course (at least 3 credits) appropriate for theme.

Three elective courses (9 credits).

Regional Concentration

Choose a regional concentration from: Africa, East Asia, Europe, Middle East, Latin America, Russia, or South Asia. Courses must be chosen in consultation with a global studies adviser.

At least one regional breadth course.

At least three additional regional elective courses.

Experiential Learning and Senior Project

Students must participate in a relevant experiential learning opportunity through study abroad, the foreign language immersion program, an internship, or a service learning experience. Work completed in meeting these requirements may count towards the thematic or regional concentrations when approved by an adviser. Students must also complete a major project integrating their regional and thematic concentrations.

GLOS 3981W - Major Project Seminar, WI (3.0 cr)

Global Studies Minor

Institute for Global Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 17.

The minor offers students the opportunity to study the interrelated processes shaping today's increasingly interdependent world. Students examine political, economic, cultural, and social processes of local communities, nation states, transnational businesses, and social movements across the globe.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students declare a thematic and regional concentration and complete an additional 9 credits, including one regional breadth course (3.0 cr), one theme breadth course (3.0 cr), and one elective course (3.0 cr)

Required Courses

Minor Courses

GLOS 3144 - Knowledge, Power, and the Politics of Representation in Global Studies, IP, SSCI (4.0 cr)

GLOS 3145 - Theoretical Approaches to Global Studies (4.0 cr)

In consultation with a Global Studies adviser, students take one thematic and one regional breadth course. Students also choose one elective from either their theme or region (3.0 cr)

Greek B.A.

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 30.

Degree: Bachelor of Arts.

Greek is the Western language with the longest continuous history, from the poetry of Homer in the first millennium B.C. to the present. This program focuses on literature, philosophy, religion, archaeology, and art associated with the Greek language from its earliest appearance through the golden age of the Greek city-state in the 5th century B.C. and the Roman Empire into the medieval Byzantine Empire. Greek majors who intend to continue in classics graduate studies are strongly advised to study Latin as well.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

Students take either beginning, honors, or intensive classical Greek, or they must have four years high school Greek and students must take one course from CNES 1002, 1042, 1043 (or another appropriate course with the approval of director of undergraduate studies).

GRK 1001 - Beginning Classical Greek I (5.0 cr)

GRK 1002 - Beginning Classical Greek II (5.0 cr)

or

GRK 1111H - Honors Course: Beginning Classical Greek, H (3.0 cr)

GRK 1112H - Honors Course: Classical Greek, Recitation, H (3.0 cr)

or

GRK 3111 - Intensive Classical Greek (3.0 cr)

GRK 3112 - Intensive Classical Greek, Recitation (3.0 cr)

and

CNES 1002 - World of Greece, HP (3.0 cr)

or CNES 1042 - Greek and Roman Mythology, OH (4.0 cr)

or CNES 1043 - Introduction to Greek and Roman Archaeology, HP (4.0 cr)

Program Requirements

Students are required to take 4 semester(s) of Greek.

Students take a total of four semesters of language, with two semesters of formal Greek language instruction and two semesters of applied readings in Greek texts.

Required Courses

Major Courses

GRK 3111 and 3112 may not be used to meet this requirement.

Take 14 or more credit(s) from the following:

GRK 3xxx

GRK 5xxx

Electives

At least one course from this group must be in ancient culture at 3xxx or above; other courses may be substituted with approval of the director of undergraduate studies. GRK 3111-3112 and LAT 3111-3112 may not be used to meet this requirement. GRK credits taken for the major cannot be used to meet this requirement.

Take 12 or more credit(s) from the following:

CNES 3xxx

CNES 4xxx

CNES 5xxx

GRK 3xxx

GRK 5xxx

LAT 3xxx

LAT 5xxx

Senior Project

Students can get a copy of the departmental statement on major projects from the director of undergraduate studies or department office. Students who complete a major project for another CLA major must substitute four credits of Greek (3113 or above) or other appropriate coursework at 3xxx-5xxx for the senior project in this major.

LAT 3xxx

LAT 4xxx

LAT 5xxx

Greek Minor**Classical and Near Eastern Studies**

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

The Greek minor allows students who have satisfied the language requirement in Greek to read ancient authors and to expand their knowledge of ancient civilization.

Admission Requirements

Students must complete 2 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Preparatory Courses**

Students take either GRK 1001-1002 or 1111-1112 or 3111-3112 or must have four years high school Greek, and one course from CNES 1002, 1042, 1043 (or other appropriate course with approval of director of undergraduate studies).

GRK 1001 - Beginning Classical Greek I (5.0 cr)

GRK 1002 - Beginning Classical Greek II (5.0 cr)

or

GRK 1111H - Honors Course: Beginning Classical Greek, H (3.0 cr)

GRK 1112H - Honors Course: Classical Greek, Recitation, H (3.0 cr)

or

GRK 3111 - Intensive Classical Greek (3.0 cr)

GRK 3112 - Intensive Classical Greek, Recitation (3.0 cr)

and

CNES 1002 - World of Greece, HP (3.0 cr)

Hebrew B.A.**Classical and Near Eastern Studies**

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 27 to 29.

Degree: Bachelor of Arts.

This program enables students to study the various periods of the Hebrew language covering a span of 3,000 years, from biblical times to the present. The program gives students the tools for work in the fields of literature, social sciences, religious studies, linguistics, and law. Hebrew equips the student for cross-disciplinary learning in several fields - ancient, medieval, and contemporary. Related areas include Jewish studies, religious studies, Arabic, Greek, and the extinct languages of the Near East. Students are encouraged to incorporate study in Israel in one of the many exchange programs involving archaeology, the social sciences, or the humanities (consult the Learning Abroad Center for more information).

Hebrew majors often use their major to complement a second major in another field such as political science, sociology, journalism, history, religious studies, business, speech communications, and linguistics.

Admission Requirements

Students must complete 3 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Preparatory Courses**

Note that each HEBR course below requires completion of a prerequisite HEBR course.

CNES 1001 - World of the Bible: Introduction to the Bible and its Ancient Near Eastern Background, HP (3.0 cr)

or CNES 1044 - Introduction to Near Eastern Archaeology, HP (3.0 cr)

or CNES 1201 - The Bible: Context and Interpretation, LIT (3.0 cr)

CNES 1082 - Jesus in History, HP (3.0 cr)

or CNES 1082H - Honors Course: Jesus in History, HP, H (4.0 cr)

or RELA 1082 - Jesus in History, HP (3.0 cr)

JWST 1034 - Introduction to Jewish History and Civilization, HP (3.0 cr)

or RELA 1034 - Introduction to Jewish History and Civilization, HP (3.0 cr)

HEBR 1002 - Beginning Hebrew II (5.0 cr)

or HEBR 1102 - Beginning Biblical Hebrew II (5.0 cr)

or HEBR 4002 - Beginning Hebrew II (3.0 cr)

or HEBR 4105 - Basics of Biblical Hebrew II (3.0 cr)

Program Requirements

Students are required to take 4 semester(s) of Hebrew.

Required Courses**Major Courses**

Take 6 or more credit(s) from the following:

HEBR 3090 - Advanced Modern Hebrew (3.0 cr)

HEBR 3200 - Advanced Classical Hebrew, H (3.0 cr)

HEBR 3300 - Post-Biblical Hebrew: Second Temple Period (3.0 cr)
 HEBR 3400 - Rabbinic Texts (3.0 cr)
 HEBR 3990 - Topics in Hebrew Studies (1.0-4.0 cr)
 HEBR 3993 - Directed Studies (1.0-4.0 cr)
 HEBR 5090 - Advanced Modern Hebrew (3.0 cr)
 HEBR 5200 - Advanced Classical Hebrew (3.0 cr)
 HEBR 5300 - Post-Biblical Hebrew: Second Temple Period (3.0 cr)
 HEBR 5400 - Rabbinic Texts (3.0 cr)
 HEBR 5992 - Directed Readings (1.0-4.0 cr)
 Take one of the following course pairs:
 HEBR 3011 - Intermediate Hebrew I (5.0 cr)
 HEBR 3012 - Intermediate Hebrew II (5.0 cr)
 or
 HEBR 3101 - Intermediate Biblical Hebrew I (4.0 cr)
 HEBR 3102 - Intermediate Biblical Hebrew II (4.0 cr)

Electives

Student primarily studying Modern Hebrew must take a minimum of two courses in Classical Hebrew (HEBR 4101 and 4105). Students primarily studying Classical Hebrew must take a minimum of two courses in Modern Hebrew (HEBR 4001 and 4002).

Complete 9 credits of relevant coursework with the approval of the director of undergraduate studies.

Senior Project

Students who complete a major project for another CLA major may substitute four credits of HEBR or related coursework with the approval of the director of undergraduate studies. Students who double major in Hebrew and RELST, JWST, or any CNES major, are especially encouraged to integrate their programs by preparing a senior project that includes a significant Hebrew component.

HEBR 3951W - Major Project, WI (4.0 cr)

Hebrew Minor

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

The Hebrew minor permits students who have satisfied the language requirement with Hebrew to use their knowledge to read more widely in sources of antiquity and the middle ages and the modern period and to add to their knowledge of Hebrew civilization and culture.

Admission Requirements

Students must complete 3 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

Complete two semesters of introductory Hebrew (note that each HEBR course below requires completion of a prerequisite HEBR course), and take at least three credits of related non-language work (in CNES, RELA, or JWST).

CNES 1001 - World of the Bible: Introduction to the Bible and its Ancient Near Eastern Background, HP (3.0 cr)

or CNES 1044 - Introduction to Near Eastern Archaeology, HP (3.0 cr)

or CNES 1201 - The Bible: Context and Interpretation, LIT (3.0 cr)

CNES 1082 - Jesus in History, HP (3.0 cr)

or CNES 1082H - Honors Course: Jesus in History, HP, H (4.0 cr)

or RELA 1082 - Jesus in History, HP (3.0 cr)

JWST 1034 - Introduction to Jewish History and Civilization, HP (3.0 cr)

or RELA 1034 - Introduction to Jewish History and Civilization, HP (3.0 cr)

HEBR 1002 - Beginning Hebrew II (5.0 cr)

or HEBR 1102 - Beginning Biblical Hebrew II (5.0 cr)

or HEBR 4002 - Beginning Hebrew II (3.0 cr)

or HEBR 4105 - Basics of Biblical Hebrew II (3.0 cr)

Program Requirements

Required Courses

Minor Courses

Take three credits of related coursework, which may include Hebrew.

Take 11 or more credit(s) from the following:

HEBR 3xxx

History B.A.

History

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 32.

Degree: Bachelor of Arts.

History examines the past, seeking to understand the development and changes in the human experience from its origins to the present. Historians are interested in documenting and interpreting the past from its diverse theoretical, ideological, and methodological approaches and at all levels from local history to comparative and global history.

Courses range from surveys to research and intensive seminars, and focus on a rich array of topics - various regions (Europe, Africa, Asia, Latin America, United States), time periods (ancient, medieval, early modern, and modern), methods (social, cultural, economic, quantitative), and comparative themes (gender and sexuality, imperialism, race and ethnicity). Interdisciplinary programs incorporate history into a variety of other programs (history of medicine, global studies, medieval studies, American studies, women's studies).

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

History majors must fulfill two distribution requirements with 1xxx-5xxx courses:

1. Chronological - At least two courses must be pre-modern (roughly pre-1750) in focus, and two courses must be from the modern era (roughly post-1750).
2. Geographic - At least one course in each of two different geographic areas and one of the following courses in world history: HIST 1011W, 1012W, 1015W, 1017, 1018, 1019, 3421, 3419, 3728, 3797, 5500.

Required Courses

Survey Courses

At least one of the three survey courses must be writing intensive.

Take 3 or more course(s) from the following:

- HIST 1017 - World History, HP, IP (3.0 cr)
 or HIST 1018 - World History: The Age of Global Contact, HP, IP (3.0 cr)
 or HIST 1019 - Introduction to Global History Since 1950, HP, IP (3.0 cr)
 HIST 1011W - World History, HP, IP, WI (4.0 cr)
 or HIST 1011V - Honors: World History, HP, IP, WI, H (4.0 cr)
 HIST 1012W - World History: The Age of Global Contact, HP, IP, WI (4.0 cr)
 or HIST 1012V - Honors: World History, HP, IP, WI, H (4.0 cr)
 HIST 1015W - Introduction to Global History Since 1950, HP, IP, WI (4.0 cr)
 or HIST 1015V - Introduction to Global History Since 1950, HP, IP, WI, H (4.0 cr)
 HIST 1026 - Western Civilization from its Origins to ca 1500, HP, IP (3.0 cr)
 or HIST 1027 - Western Civ From 1500 to Present, HP, IP (3.0 cr)
 HIST 1031W - Western Civilization, From Its Origins to ca 1500, HP, IP, WI (4.0 cr)
 or HIST 1031V - Honors: Survey of Western Civilization From its Origins to ca 1500, HP, IP, WI, H (4.0 cr)
 HIST 1032W - Western Civilization, From 1500 to Present, HP, IP, WI (4.0 cr)
 or HIST 1032V - Honors: Western Civilization, From 1500 to Present, HP, IP, WI, H (4.0 cr)
 HIST 1301W - U.S. History to 1877, CD, HP, WI (4.0 cr)
 or HIST 1301V - Honors: U.S. History to 1877, CD, HP, WI, H (4.0 cr)
 HIST 1302W - U.S. History, From 1865 to Present, CD, HP, WI (4.0 cr)
 or HIST 1302V - Honors: U.S. History, From 1865 to Present, CD, HP, WI, H (4.0 cr)
 HIST 1307 - American History to 1877, CD, HP (3.0 cr)
 or HIST 1308 - U.S. History: From 1865 to Present, CD, HP (3.0 cr)
 HIST 3051 - Ancient Civilization: Near East and Egypt (3.0 cr)
 or HIST 3052 - Ancient Civilization: Greece (3.0 cr)
 or HIST 3053 - Ancient Civilization: Rome (3.0 cr)
 HIST 3101 - Introduction to Medieval History
 HIST 3542 - Medieval Islam, HP (3.0 cr)
 or HIST 3151W - British History to the 17th Century, C/PE, HP, WI (4.0 cr)
 or HIST 3152 - British History From the Seventeenth Century, C/PE, HP (4.0 cr)
 or HIST 3401W - Early Latin America to 1825, HP, IP, WI (4.0 cr)
 or HIST 3402W - Modern Latin America 1825 to Present, HP, IP, WI (4.0 cr)
 or HIST 3431 - Early Africa and Its Global Connections, HP, IP (4.0 cr)
 or HIST 3432 - Modern Africa in a Changing World, HP, IP (4.0 cr)
 or HIST 3461 - Introduction to East Asia I: The Imperial Age, HP, IP (3.0-4.0 cr)
 or HIST 3462 - Introduction to East Asia II: 1600-2000, HP, IP (3.0-4.0 cr)
 or HIST 3485 - History of Southeast Asia (3.0 cr)
 or HIST 3505 - Survey of the Middle East, IP (3.0 cr)
 or HIST 3541 - Islam in the Catholic Age: Arab Phase 600 A.D. to 900 A.D., HP (3.0 cr)
 HIST 3542 - Medieval Islam
 or HIST 3543 - Arabs Under Mamluks and Ottomans: 1300-1920, HP, IP (3.0 cr)

Major Courses

Three courses must be in an area of concentration as approved by the undergraduate studies office.

Take 6 or more course(s) from the following:

- HIST 3xxx
 HIST 4xxx
 HIST 5xxx

Senior Project

Students must pre-register for the senior paper course (HIST 4961W) with the undergraduate studies office at least two semesters in advance.

- HIST 4961W - Major Paper, WI (4.0 cr)
 or HIST 5xxx

History Minor

History

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

History examines the past, seeking to understand the development and changes in the human experience from its origins to the present. Historians are interested in documenting and interpreting the past from diverse theoretical, ideological, and methodological approaches and at all levels from local history to comparative and global history.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students take a minimum of five history courses with at least 14 upper division credits. These courses must be in at least two different cultural/geographic areas and be taken A-F. Students must receive a grade of C- or better.

Required Courses

Minor Courses

Take 5 courses with at least 14 upper division credits, in at least two different cultural/geographic areas.

Take 5 or more course(s) from the following:

- HIST 1xxx
 HIST 3xxx
 HIST 4xxx
 HIST 5xxx

History of Medicine Minor

College of Liberal Arts - Adm

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

History of medicine courses explore the development of medical knowledge, institutions, and practices; the history of diseases; and the place of medicine in Western intellectual and social history.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

Take either pair of courses.

Health Care in History

- HMED 3001W - Health Care in History I, HP, IP, WI (3.0 cr)
 HMED 3002W - Health Care in History II, HP, IP, WI (3.0 cr)
 or

History of Medicine

- HMED 5200 - Early History of Medicine to 1700 (3.0 cr)
 HMED 5201 - History of Medicine from 1700 to 1900 (3.0 cr)

Electives

Take 8 or more credit(s) from the following:

MED 3xxx

MED 4xxx

MED 5xxx

History of Science and Technology Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

Courses for this minor address the history of science and technology, including the cultural and social contexts of their development.

HSCI 3xxx

HSCI 4xxx

HSCI 5xxx

Take 3 or more credit(s) from the following:

HSCI 4xxx

HSCI 5xxx

Humanities in the West Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

Humanities offers integrated study of areas of civilization and major humanistic problems, drawing mainly on primary sources in literature, philosophy, history, and the arts and on relevant aspects of the human and natural sciences. This breadth of perspective provides an understanding of men and women as heirs to and creators of civilization, concerned with values and the development of the whole person.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

The minor program must be approved by the humanities program coordinator. No more than one 3xxx-4xxx course in the program may be taken directed study, directed instruction, or independent study. No more than one course may be taken S-N. All other courses must be completed with a grade of at least C.

Required Courses**Minor Courses**

Take at least 10 credits from the humanities in the west sequence. Only one 1xxx HUM course may be taken.

HUM 1001 - Humanities in the West I, OH (4.0 cr)

or HUM 1002 - Humanities in the West II, IP, OH (4.0 cr)

or HUM 1003 - Humanities in the West III, IP, OH (4.0 cr)

or HUM 1004 - Humanities in the West IV, IP, OH (4.0 cr)

or HUM 1005 - Humanities in the West V, IP, OH (4.0 cr)

or HUM 1006 - Humanities in the West VI, IP, OH (4.0 cr)

or HUM 3001 - Humanities in the West I, OH (4.0 cr)

or HUM 3002 - Humanities in the West II, IP, OH (4.0 cr)

or HUM 3003 - Humanities in the West III, IP, OH (4.0 cr)

or HUM 3004 - Humanities in the West IV, IP, OH (4.0 cr)

Electives

Take 8 or more credit(s) from the following:

HUM 3xxx

HUM 4xxx

Individually Designed Interdepartmental B.A.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 50.

Degree: Bachelor of Arts.

The Individually Designed Interdepartmental Major (IDIM) enables students to fulfill program requirements for the B.A. degree by completing an interdepartmental program of coursework focused on a theme of their own choosing, designed in consultation with faculty and staff advisers.

IDIM programs consist of three or four areas of concentration, integrated in such a way that the major has strong thematic unity and coherence.

Working closely with an IDIM adviser, students develop program proposals that explain their academic goals and list a set of courses appropriate for meeting those goals. IDIM program proposals must be approved by three faculty or department advisers with expertise in the areas of concentration. Some departments have established guidelines for students who wish to include in their majors concentration areas based in those departments.

For specific information on proposal approval procedures and department guidelines, see the individualized degree programs Web site at <http://idp.class.umn.edu>.

Admission Requirements

For certain concentration areas, prerequisite courses must be completed before submitting a program proposal.

For certain concentrations a minimum overall GPA or a minimum tool course GPA is required before a student can submit a program proposal.

Students can declare the major after attending an information session (held two to three times a week). Students are not approved for the degree until they have submitted a program proposal (the submission deadline is once per semester) and the proposal has been approved by a committee and faculty or department advisers.

See the IDIM adviser for more information.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

The 50 major credits must be distributed among three or four concentration areas, with at least 11 credits at 3xxx or above in each area. The concentrations may be departmental or thematic in composition. At least 40 of the 50 credits must be 3xxx or above.

At least 20 credits in the major must be completed after the program has been approved. No more than 12 credits of directed studies may be applied toward the major. The CLA requirement of 18 credits at or above 3xxx outside the major does not apply.

Consult an adviser for the approval of courses in the concentration areas.

Required Courses

Major Courses

Complete the required courses from the approved IDIM courses.

Senior project proposals must be approved by faculty and staff advisers the semester before the project is begun. Projects may vary widely in form, depending on a student's major. The project proposal and the project itself must be reviewed and approved by one faculty adviser and two faculty readers.

Take 50 credits, with at least 40 credits at 3xxx or above in area(s) of concentration, in consultation with an adviser.

Students must complete an integrating senior project, earning at least 2 credits in conjunction with the project.

Italian Studies B.A.

French and Italian

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 34.

Degree: Bachelor of Arts.

The Italian studies undergraduate program examines Italian and Italian-American literature, culture, society, and history. Courses offered provide a historical perspective from the Middle Ages to the present. Students explore a variety of themes ranging from nation-building and national identity to emigration and travel, to gender relations and feminist discourses, to the study of different narrative forms and representations of Italian and Italian-American culture. Students are encouraged to take courses in other departments when these are related to Italian and Italian-American culture. For further information and updates, see the department Web site at www.cla.umn.edu/frit.

Admission Requirements

Complete the introductory Italian courses (ITAL 1001-1004).

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Italian.

The senior project can be based on a paper written in one of the elective courses. A senior project clearance form must be signed.

Required Courses

Major Courses

ITAL 3015 - Reading, Conversation, and Composition (4.0 cr)

Electives

Some courses from other departments can count towards the major with the approval of the undergraduate adviser.

Take 30 or more credit(s) from the following:

ITAL 3xxx

ITAL 4xxx

ITAL 5xxx

Italian Studies Minor

French and Italian

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

The Italian studies undergraduate minor program examines Italian and Italian American literature, culture, society, and history.

Admission Requirements

Students must complete 4 courses before admission to the program.

Students must complete language study equivalent to four semesters (intermediate level) before beginning the minor.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Italian.

Required Courses

Minor Courses

ITAL 3015 - Reading, Conversation, and Composition (4.0 cr)

Take 12 or more credit(s) from the following:

ITAL 3xxx

ITAL 4xxx

ITAL 5xxx

Jewish Studies B.A.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 30.

Degree: Bachelor of Arts.

This broad, interdisciplinary field studies the civilization of the Jewish people from its beginning in biblical antiquity to the present. The diverse quality of Jewish civilization and the unifying forces of its religion and language offer ample material for the study of continuity, adaptation, and change.

The undergraduate program offers courses in the Bible, Jewish history, Jewish literature, midrash, Jewish philosophy, medieval and modern Jewish studies, Talmud, and rabbinics. The program has links with the Departments of American Studies, Sociology, History, English, German, Music, and Political Science. The University's Center for Holocaust and Genocide Studies offers courses related to the Nazi Holocaust and its aftermath.

Study abroad in Israel or Europe is encouraged as a valuable augment to the major; consult the Learning Abroad Center at 612-626-9000 for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Hebrew.

Students complete one of two tracks, focusing on either the diversity of Jewish civilization or the the Bible and foundations of ancient Judaism. Either biblical or modern Hebrew may be required, depending on the track chosen.

Required Courses

Preparatory Courses

Choose one course from either of the two groups of courses.

Jewish History and Civilization

JWST 1034 - Introduction to Jewish History and Civilization, HP (3.0 cr)
or JWST 3034 - Introduction to Jewish History and Civilization, HP (3.0 cr)
or RELA 1034 - Introduction to Jewish History and Civilization, HP (3.0 cr)
or RELA 3034 - Introduction to Jewish History and Civilization, HP (3.0 cr)
or

The Bible

CNES 1201 - The Bible: Context and Interpretation, LIT (3.0 cr)
or CNES 3201 - The Bible: Context and Interpretation, LIT (3.0 cr)
or JWST 1201 - The Bible: Context and Interpretation, LIT (3.0 cr)
or JWST 3201 - The Bible: Context and Interpretation, LIT (3.0 cr)
or RELA 3201 - The Bible: Context and Interpretation, LIT (3.0 cr)

Senior Project

Students prepare a senior project in an appropriate area of interest. Consult a faculty adviser.

JWST 4000W - Final Project, Writing Intensive, WI (4.0 cr)
or JWST 4001W - Final Project, Writing Intensive, WI (1.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

The Bible and the Foundations of Ancient Judaism

Required Courses

Biblical Hebrew

Take one of the following course pairs:

HEBR 1101 - Beginning Biblical Hebrew I (5.0 cr)
HEBR 1102 - Beginning Biblical Hebrew II (5.0 cr)
or
HEBR 4104 - Basics of Biblical Hebrew I (3.0 cr)
HEBR 4105 - Basics of Biblical Hebrew II (3.0 cr)

Biblical and Religious Perspectives

Complete a minimum of 9 credits. Consult an adviser for appropriate coursework.

At least one course in Hebrew Bible/ancient Israel.

At least one course in classical/post-biblical Judaism.

One additional adviser-approved course.

History and Material Culture

The focus of these courses is on the use of history, archaeology, and material culture as ways of contextualizing, challenging, and supplementing the textual record. Appropriate courses include the history and archaeology of the ancient Near East, Israel, or Syro-Palestine.

Complete a minimum of two courses for 6 credits.

Comparative Perspectives

Courses include studies of other cultures and civilizations that are chronologically or geographically contiguous with Israelite/Jewish society through the Rabbinic period.

Complete a minimum of two courses for 6 credits.

Intermediate Biblical Hebrew

Students demonstrating intermediate proficiency (or higher) in biblical Hebrew without formal Hebrew language credits will be asked to complete 8 additional elective credits in lieu of these courses, chosen in consultation with the director of undergraduate studies.

HEBR 3101 - Intermediate Biblical Hebrew I (4.0 cr)

HEBR 3102 - Intermediate Biblical Hebrew II (4.0 cr)

The Diversity of Jewish Civilization-Religion, History, and Culture

Required Courses

Biblical or Modern Hebrew

Take one of the following course pairs:

HEBR 1001 - Beginning Hebrew I (5.0 cr)

HEBR 1002 - Beginning Hebrew II (5.0 cr)

or

HEBR 1101 - Beginning Biblical Hebrew I (5.0 cr)

HEBR 1002 - Beginning Hebrew II (5.0 cr)

or

HEBR 4001 - Beginning Hebrew I (3.0 cr)

HEBR 4002 - Beginning Hebrew II (3.0 cr)

or

HEBR 4104 - Basics of Biblical Hebrew I (3.0 cr)

HEBR 4105 - Basics of Biblical Hebrew II (3.0 cr)

Religious Foundations

The focus of these courses is on biblical and other classical Jewish religious texts, so that students become familiar with the idea of scripture, of authoritative texts and traditions, and of ritual practice. Appropriate topics include Bible, Rabbinics, religious thought and philosophy, ritual studies, history of interpretation, comparative religion, and religion and law. Consult an adviser for specific coursework.

Complete a minimum of two courses for 6 credits.

Historical, Material, and Social Perspectives

Courses may use a range of methodologies to investigate the social construction of Jewish identity in relation to broader categories of gender, ethnicity, race, class, politics, community boundaries, and society. Consult an adviser for appropriate coursework.

Complete a minimum of two courses for 6 credits.

Jewish Creativity and Cultural Production: Commenting on the World

Topics may include: Jewish adaptation of forms and idioms from surrounding cultures; ritual and liturgical expressions of personal and communal religious experience; the image of the Jew in literature, music, or popular culture (whether written by Jews

or not); and the development of a distinctive diaspora poetics in Jewish culture. Consult an adviser for appropriate coursework.

Complete a minimum of two courses for 6 credits.

Intermediate Modern or Biblical Hebrew

Students demonstrating intermediate proficiency (or higher) in modern or biblical Hebrew without formal Hebrew language credits will be asked to complete 8 additional elective credits in lieu of these courses, chosen in consultation with the director of undergraduate studies.

Take one of the following course pairs:

HEBR 3011 - Intermediate Hebrew I (5.0 cr)

HEBR 3012 - Intermediate Hebrew II (5.0 cr)

or

HEBR 3101 - Intermediate Biblical Hebrew I (4.0 cr)

HEBR 3102 - Intermediate Biblical Hebrew II (4.0 cr)

Electives

Complete one additional course chosen in consultation with an adviser.

Jewish Studies Minor

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

The Jewish studies minor allows students to develop an additional concentration in the academic study of Jewish culture and civilization throughout history. The minor, which recognizes the diversity and international aspect of the Jewish experience, reinforces any disciplinary specialization and contributes a comparative focus. Students choose from among the full range of JWST courses in biblical studies, archaeology, ancient Judaism, Hebrew, Jewish history (including Holocaust studies), German-Jewish literature, and the American Jewish experience.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students must take a total of five JWST courses (at least 14 credits of 3xxx or above), including one course in antiquity (ancient /medieval) and one in the modern period. Courses must be taken A-F, with grades of C- or better and a 2.00 GPA.

Up to 10 credits of biblical and/or modern Hebrew courses (3xxx or higher) may count toward the minor.

If students wish to study a second language in addition to completing four semesters of study in one language, introductory courses (1xxx or 2xxx) in an additional language may count towards the minor if relevant to Jewish studies, and with the approval of the director of undergraduate studies. This provision applies to students who have studied modern Hebrew but wish to add biblical Hebrew, or vice versa.

Required Courses

Minor Courses

At least one course at 3xxx or above that covers any aspect of Jewish civilization since 1492.

Ancient and Medieval Foundations of Judaism

JWST 1034 - Introduction to Jewish History and Civilization, HP (3.0 cr)

or JWST 3013W - Biblical Law and Jewish Ethics, WI (3.0 cr)

JWST 3xxx-5xxx

Take 2 or more course(s) from the following:

JWST 3xxx

JWST 4xxx

JWST 5xxx

Journalism B.A.

School of Journalism and Mass Communication

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 36 to 40.

Degree: Bachelor of Arts.

The School of Journalism and Mass Communication offers three tracks focused on distinct areas of study within the discipline.

The professional journalism track prepares students for careers such as news reporting, editing, and producing. The professional strategic communication track prepares students for careers in advertising and public relations. The two professional tracks are based on a liberal arts foundation, knowledge of the social context in which the professions are practiced, and the skills and experiences needed to succeed in the marketplace.

The mass communication track is for students who wish to study the economic, political, legal, and social aspects of mass communication. Students may develop a program emphasis in areas such as history, law, media effects, media industry studies, international communication, or other aspects of mass communication studies represented in the school.

About two-thirds of the coursework for the B.A. degree is outside of journalism in the social sciences, humanities, and other liberal arts. The 120-credit requirement must include at least 80 non-journalism credits, including 65 CLA credits

Admission Requirements

Students must complete 30 credits before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 3.00 for students already admitted to the degree-granting college.
- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

The school admits a limited number of undergraduates annually. Students who are admitted usually have a 3.0 or higher overall grade point average. To apply, students must have completed JOUR 1001 with a C or higher grade and at least 30 graded (A-F) credits, including at least one semester of study (13 credits) in CLA. Students must write a statement of intent for the major application. The statement of intent provides a writing sample for the Admissions Committee and should include information about academic interests, professional goals, and mass communication or related experience.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Course

JOUR 1001 - Introduction to Mass Communication, SSCI, C/PE (3.0 cr)

Program Requirements

Students are required to take 4 semester(s) of any second language.

Majors are expected to have typing skills before enrolling in JOUR 3101. Students also must take 12 credits at 3xxx, 4xxx, or 5xxx from other departments chosen in consultation with a faculty adviser.

Required Courses

Major Courses

JOUR 3004W - Information for Mass Communication, WI (3.0 cr)
or JOUR 3004V - Honors: Information for Mass Communication, WI, H (3.0 cr)

Electives

Take 12 credits of 3xxx, 4xxx, or 5xxx courses from other departments, chosen in consultation with a faculty adviser.

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.)

Honors students are required to complete one sub-plan plus the honors sub-plan.

Mass Communication Track

This track is for students who wish to study the economic, political, legal, and social aspects of mass communication. Students may develop a program emphasis in areas such as history, law, media effects, media industry studies, international communication, or other aspects of mass communication studies represented in the School of Journalism and Mass Communication.

Include one visual communication course in either the professional or context area of the program. Take either JOUR 3006 (context course) or JOUR 3102, JOUR 3321, or JOUR 3451 (professional courses). Include two 4xxx or 5xxx level context courses to complete the CLA major project requirement.

Required Courses

Professional Courses

Take 12 or more credit(s) including 4 or more sub-requirement(s).

History

Take 1 or more course(s) from the following:

JOUR 3007 - The Media in American History and Law: Case Studies, HP (3.0 cr)
JOUR 3614 - History of Media Communication, HP (3.0 cr)
JOUR 5601W - History of Journalism, WI (3.0 cr)
JOUR 5606W - Literary Aspects of Journalism, WI (3.0 cr)
JOUR 5615 - History of the Documentary (3.0 cr)

International/Multicultural

Take 1 or more course(s) from the following:

JOUR 3552 - Internet and Global Society, IP (3.0 cr)
JOUR 3741 - People of Color and the Mass Media, CD (3.0 cr)
JOUR 4801 - Global Communication, IP (3.0 cr)
JOUR 5825 - World Communication Systems (3.0 cr)

Media Effects

Take 1 or more course(s) from the following:

JOUR 3006 - Visual Communication (3.0 cr)
JOUR 3008 - Mass Communication Processes and Structure (3.0 cr)
JOUR 4272 - Interactive Advertising (3.0 cr)
JOUR 5251 - Psychology of Advertising (3.0 cr)
JOUR 5316 - Theories of Visual Communication (3.0 cr)
JOUR 5501 - Communication and Public Opinion (3.0 cr)
JOUR 5541 - Mass Communication and Public Health (3.0 cr)

Media and Society

Take 1 or more course(s) from the following:

JOUR 3551 - Economics of New Media (3.0 cr)
JOUR 3745 - Mass Media and Popular Culture, CD, SSCI (3.0 cr)
JOUR 3771 - Mass Media Ethics: Moral Reasoning and Case Studies, C/PE (3.0 cr)
JOUR 3776 - Mass Communication Law (3.0 cr)
JOUR 3796 - Mass Media and Politics, C/PE (3.0 cr)
JOUR 4274W - Advertising in Society, WI (3.0 cr)
JOUR 4551 - New Media Culture (3.0 cr)
JOUR 4721 - Mass Media and U.S. Society (3.0 cr)
JOUR 5552 - Law of Internet Communications (3.0 cr)
JOUR 5725 - Management of Media Organizations (3.0 cr)
JOUR 5771 - Media Ethics: Principles and Practice, C/PE (3.0 cr)
JOUR 5777 - Contemporary Problems in Freedom of Speech and Press (3.0 cr)

Context Courses

Courses must be chosen in consultation with a faculty adviser. Directed study and specialized topics courses may be used to meet this requirement. With adviser approval, one to three professional (skills) courses are permitted, but not required.

Take 18 or more credit(s) from the following:

JOUR 3xxx
JOUR 4xxx
JOUR 5xxx

Professional Journalism Track

This track prepares students for careers in areas such as news reporting, editing, and producing.

Include one visual communication course in either the professional or context area of the program. Take either JOUR 3006 (context course) or JOUR 3102, JOUR 3321, or JOUR 3451 (professional courses). The capstone course and the required 4xxx or 5xxx professional course fulfill the CLA major project requirement.

Required Courses

Journalism Courses

JOUR 3101 - News Reporting and Writing (3.0 cr)

Capstone Course

JOUR 4171 - Capstone: Covering the Arts (3.0 cr)
or JOUR 4193 - Walter H Brovald and John Cameron Sim Community Newspaper Practicum (3.0 cr)
or JOUR 4451 - Capstone: Advanced Electronic News Writing and Reporting (3.0 cr)
or JOUR 4452 - Capstone: Electronic Newscast Producing (3.0 cr)
or JOUR 4992 - Capstone: Field Based Practicum (3.0 cr)
or JOUR 5131 - Capstone: In-Depth Reporting (3.0 cr)
or JOUR 5155 - Capstone: Advanced Reporting Methods (3.0 cr)
or JOUR 5174 - Capstone: Magazine Editing and Production (4.0 cr)

Professional Courses

Courses must be chosen in consultation with a faculty adviser. Professional courses from the strategic communication track may also be used (prerequisites must be met).

Take 12 or more credit(s) from the following:

JOUR 3102 - Visual Journalism (3.0 cr)
JOUR 3121 - Public Affairs Reporting (3.0 cr)
JOUR 3155 - Publications Editing (3.0 cr)
JOUR 3173W - Magazine Writing, WI (3.0 cr)
JOUR 3321 - Basic Media Graphics (3.0 cr)
JOUR 3451 - Electronic News Writing and Reporting (3.0 cr)
JOUR 3990 - Special Topics in Mass Communication: Professional (3.0 cr)

Take 3 or more credit(s) from the following:

JOUR 4171 - Capstone: Covering the Arts (3.0 cr)
 JOUR 4193 - Walter H Brovald and John Cameron Sim Community Newspaper Practicum (3.0 cr)
 JOUR 4302 - Electronic Photojournalism (3.0 cr)
 JOUR 4451 - Capstone: Advanced Electronic News Writing and Reporting (3.0 cr)
 JOUR 4452 - Capstone: Electronic Newscast Producing (3.0 cr)
 JOUR 4992 - Capstone: Field Based Practicum (3.0 cr)
 JOUR 5131 - Capstone: In-Depth Reporting (3.0 cr)
 JOUR 5155 - Capstone: Advanced Reporting Methods (3.0 cr)
 JOUR 5174 - Capstone: Magazine Editing and Production (4.0 cr)
 JOUR 4990 - Special Topics in Mass Communication: Professional (3.0 cr)
 JOUR 5990 - Special Topics in Mass Communication: Professional (3.0 cr)

Context Courses

Courses must be chosen in consultation with a faculty adviser. Directed study and specialized topics courses may be used to meet this requirement.

Take 9 or more credit(s) from the following:

JOUR 3xxx
 JOUR 4xxx
 JOUR 5xxx

Take 3 or more credit(s) from the following:

JOUR 4xxx
 JOUR 5xxx

Professional Strategic Communication Track

This track prepares students for careers in advertising and public relations.

Include one visual communication course in either the professional or context area of the program. Take either JOUR 3006 (context course) or JOUR 3102, JOUR 3321, or JOUR 3451 (professional courses). JOUR 4259 and 4263 fulfill the CLA major project requirement.

Required Courses

Strategic Communication Courses

JOUR 3201 or JOUR 3202 are prerequisites for JOUR 3251 and JOUR 4259 and JOUR 4263
 JOUR 3251 - Strategic Communication Research (3.0 cr)
 JOUR 4259 - Cases in Strategic Planning and Thinking (3.0 cr)
 JOUR 4263 - Strategic Communication Campaigns (4.0 cr)
 JOUR 3201 - Principles of Strategic Communication: Advertising (3.0 cr)
 or JOUR 3202 - Principles of Strategic Communication: Public Relations (3.0 cr)

Professional Courses

Courses must be chosen in consultation with a faculty adviser. Professional courses from the journalism track may also be used (prerequisites must be met).

Take 6 or more credit(s) from the following:

JOUR 3241 - Creative Strategy and Copywriting (3.0 cr)
 JOUR 3279W - Public Relations Writing and Campaign Tactics, WI (3.0 cr)
 JOUR 3321 - Basic Media Graphics (3.0 cr)
 JOUR 4193 - Walter H Brovald and John Cameron Sim Community Newspaper Practicum (3.0 cr)
 JOUR 4261 - Advertising: Media Strategy (3.0 cr)
 JOUR 3990 - Special Topics in Mass Communication: Professional (3.0 cr)
 JOUR 4990 - Special Topics in Mass Communication: Professional (3.0 cr)
 JOUR 5990 - Special Topics in Mass Communication: Professional (3.0 cr)

Context Courses

Courses must be chosen in consultation with a faculty adviser. Directed study and specialized topics courses may be used to meet this requirement.

Take 9 or more credit(s) from the following:

JOUR 3xxx
 JOUR 4xxx
 JOUR 5xxx

Take 3 or more credit(s) from the following:

JOUR 4xxx
 JOUR 5xxx

Latin B.A.

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 30.

Degree: Bachelor of Arts.

Modern "Romance" languages (French, Italian, Spanish, and Portuguese) are derived from Latin, as is much English vocabulary. The Latin major allows students to enjoy a large range of literature written over more than a millennium and a half. It is concerned with the language and literature of the Roman Republic and Empire and later Latin literature from the Middle Ages to the Renaissance, as well as with Roman religion, history, archaeology, and art. It is in its essence interdisciplinary; it also has connections with the study of Greek and other ancient languages and cultures, as well as with the majors in classical civilization and religious studies, and minors such as medieval studies. Latin majors who intend to continue in classics graduate studies are encouraged to study Greek as well.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

Take one of the following course pairs:

LAT 1001 - Beginning Latin I (5.0 cr)
 LAT 1002 - Beginning Latin II (5.0 cr)
 or
 LAT 1111H - Honors Course: Beginning Latin, H (3.0 cr)
 LAT 1112H - Honors Course: Beginning Latin, Recitation, H (3.0 cr)
 or
 LAT 3111 - Intensive Latin (3.0 cr)
 LAT 3112 - Intensive Latin, Recitation (3.0 cr)

Students with four years high school Latin should choose one of the following:
 CNES 1003 - World of Rome, HP (3.0 cr)
 or CNES 1042 - Greek and Roman Mythology, OH (4.0 cr)

Program Requirements

Students are required to take 4 semester(s) of Latin.

Required Courses

Major Courses

Courses must be at 3113 or above.

Take 14 or more credit(s) from the following:

LAT 3xxx
 LAT 5xxx

Electives

Take at least one course in ancient culture at 3xxx or above. The remaining credits may be from any Latin or Greek courses at 3113 or above (excluding those used to fulfill the major courses requirement); any CNES course at 3xxx or above; or other courses in history, art, medieval studies, or other appropriate area, with the approval of the director of undergraduate studies.

Take 12 or more credit(s) from the following:

CNES 3xxx
CNES 4xxx
CNES 5xxx
GRK 3xxx
GRK 5xxx
LAT 3xxx
LAT 5xxx

Senior Project

Students who complete a major project for another CLA major must substitute 4 credits of Latin (3113 or above) or other appropriate coursework at 3xxx or above for the senior project.

LAT 3951W - Major Project, WI (4.0 cr)

Latin Minor

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

The minor program permits those who have satisfied the language requirement with Latin to more widely read Latin authors of antiquity and the Middle Ages and to add to their knowledge of Roman and medieval civilization.

Admission Requirements

Students must complete 2 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Preparatory Courses**

Take one of the following course pairs:

LAT 1001 - Beginning Latin I (5.0 cr)

LAT 1002 - Beginning Latin II (5.0 cr)

or

LAT 1111H - Honors Course: Beginning Latin, H (3.0 cr)

LAT 1112H - Honors Course: Beginning Latin, Recitation, H (3.0 cr)

or

LAT 3111 - Intensive Latin (3.0 cr)

LAT 3112 - Intensive Latin, Recitation (3.0 cr)

and

CNES 1003 - World of Rome, HP (3.0 cr)

or CNES 1042 - Greek and Roman Mythology, OH (4.0 cr)

or CNES 1043

Program Requirements**Required Courses****Minor Courses**

Students must take 11 credits in Latin courses at 3113 or above and 3 credits of related coursework at 3xxx or above, which may include courses in Latin, Greek, other ancient languages, classics courses, and other courses in ancient culture.

Take 11 or more credit(s) from the following:

LAT 3xxx

LAT 4xxx

LAT 5xxx

One ancient culture course of at least 3 credits, chosen in consultation with an adviser.

Take 3 or more credit(s) from the following:

CNES 3xxx

CNES 4xxx

CNES 5xxx

GRK 3xxx

GRK 4xxx

GRK 5xxx

HEBR 3xxx

HEBR 4xxx

HEBR 5xxx

LAT 3xxx

LAT 4xxx

LAT 5xxx

Latin American Studies Minor

Institute for Global Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

The minor requires successful completion of SPAN 1004 or PORT 1104 (or equivalent), plus five 3xxx-5xxx courses (totaling at least 15 credits) related to Latin America. Additional information may be found at <http://igs.cla.umn.edu>.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Spanish, Portuguese.

Courses must be drawn from a minimum of three different departments. Courses must be taken A-F, with a grade of C- or better. The minor program must be approved by a global studies adviser.

Required Courses**Minor Courses**

GEOG 4121W - Latin America, ENVT, IP, WI (4.0 cr)

HIST 3401W - Early Latin America to 1825, HP, IP, WI (4.0 cr)

or HIST 3402W - Modern Latin America 1825 to Present, HP, IP, WI (4.0 cr)

Two courses (6 cr) in the humanities related to Latin America as a region or a specific Latin American country, chosen in consultation with a global studies adviser.

One course (3 cr) focusing on any aspect of Latin America, chosen in consultation with a global studies adviser.

Learning Abroad Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 12.

The minor helps students integrate their study abroad with supporting University coursework from a variety of disciplines. Since some of the required courses must be taken before departure, careful advance planning is essential. A detailed

explanation of requirements and guidance concerning course selection is available from the academic advisers at the Learning Abroad Center in 230 Heller Hall. For more information call 612-626-9000 or 888-700-UOFM, e-mail UMabroad@umn.edu, or visit www.UMabroad.umn.edu.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) appropriate to country of study.

Required Courses

Minor Courses

COMM 3451 must be taken before departure to study abroad, and COMM 3452 must be taken upon return.

COMM 3451W - Intercultural Communication: Theory and Practice, IP, WI (3.0 cr)

COMM 3452W - Communication and the Intercultural Reentry, WI (3.0 cr)

Students must take at least 6 credits of 3xxx-5xxx courses focusing on the region or country of study.

Linguistics B.A.

Institute of Linguistics, ESL, and Slavic Languages and Literatures

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 35.

Degree: Bachelor of Arts.

Linguistics is the scientific study of human language. Courses explore the principles governing the structure of natural languages, how languages are acquired by children and adults, the role of language in human cognition and social interaction, and how languages change over time.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Major Courses

LING 4002 - Linguistic Analysis (3.0 cr)

LING 5201 - Syntax I (3.0 cr)

LING 5302 - Phonology I (3.0 cr)

LING 3001 - Introduction to Linguistics, SSCI (4.0 cr)

or LING 5001 - Introduction to Linguistics (4.0 cr)

LING 3601 - Historical Linguistics (3.0 cr)

or LING 5601 - Historical Linguistics (3.0 cr)

or complete one course in the history and/or structure of a language.

Electives

Any class with a LING designator that is not in Group A may be used to complete the 9 required credits for Group B, provided no more than 3 such credits are from a 1xxx class.

Up to 6 of the minimum 9 credits in Group B may be taken in an allied discipline, subject to the approval of the director of undergraduate studies.

Group A

Take 9 or more credit(s) from the following:

LING 5105 - Field Methods in Linguistics I (4.0 cr)

LING 5106 - Field Methods in Linguistics II (4.0 cr)

LING 5202 - Syntax II (3.0 cr)

LING 5205 - Semantics (3.0 cr)

LING 5206 - Linguistic Pragmatics (3.0 cr)

LING 5303 - Phonology II (3.0 cr)

Group B

Take 9 or more credit(s) from the following:

LING 1xxx

LING 2xxx

LING 3xxx

LING 4xxx

LING 5xxx

Senior Project

Complete LING 4901 with at least a grade of S. The usual requirement for this course is the revision and expansion of a paper written for another linguistics course, but it may involve an original research paper. Student complete this paper under the supervision of a professor. The paper must be approved by the director of undergraduate studies.

LING 4901W - Senior Project, WI (1.0 cr)

Linguistics Minor

Institute of Linguistics, ESL, and Slavic Languages and Literatures

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

Linguistics is the scientific study of human language. Courses explore the principles governing the structure of natural languages, how languages are acquired by children and adults, the role of language in human cognition and social interaction, and how languages change over time.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

The minor program must be approved by the director of undergraduate studies.

Required Courses

Minor Courses

LING 3001 - Introduction to Linguistics, SSCI (4.0 cr)

LING 4002 - Linguistic Analysis (3.0 cr)

LING 5201 - Syntax I (3.0 cr)

or LING 5302 - Phonology I (3.0 cr)

Take 6 or more credit(s) from the following:

LING 3xxx

LING 4xxx

LING 5xxx

Mathematics B.A.

School of Mathematics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 41.

Degree: Bachelor of Arts.

The School of Mathematics offers a program in the College of Liberal Arts leading to a bachelor of arts degree. The course of study is flexible and may be adapted to satisfy a wide variety of interests and needs. Students may prepare for graduate study in mathematics or may emphasize various fields of interest, such as preparation for secondary school teaching; actuarial science; or programs in applied mathematics including industrial mathematics, biology, mathematics applicable to computer science, and numerical analysis. Programs for the actuarial science, secondary school teaching, and computer science specializations earn a designation that appears on the diploma.

Admission Requirements

Students must complete 1 courses before admission to the program.

One 2xxx mathematics course must be completed before admission to the major.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Major Courses

Students in the honors program should substitute the honors calculus sequence (Math 1571H, 1572H, 2573H and 2574H) for these courses.

Calculus Sequence

MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1371 - IT Calculus I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)
or MATH 1372 - IT Calculus II (4.0 cr)

MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)

MATH 2263 - Multivariable Calculus (4.0 cr)
or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

MATH 2283 - Sequences, Series, and Foundations (3.0 cr)
or MATH 3283W - Sequences, Series, and Foundations: Writing Intensive, WI (4.0 cr)

Senior Project

Students should consult with a mathematics adviser prior to beginning the senior year.

MATH 4997W - Senior project (Writing Intensive), WI (1.0 cr)
or MATH 4995 - Senior Project for CLA (1.0 cr)
or Senior Project

Mathematics Options

Students are required to complete one of the following course groups.

Mathematics (No Specialization)

Students who do not choose one of the other specializations must complete the basic requirements listed here.

Take 6 or more course(s) including 2 or more sub-requirement(s) from the following:

Algebra Sequence

Take 2 or more course(s) from the following:

Take 1 or more course(s) from the following:

MATH 4281 - Introduction to Modern Algebra (4.0 cr)
MATH 5248 - Cryptology and Number Theory (4.0 cr)
MATH 5251 - Error-Correcting Codes, Finite Fields, Algebraic Curves (4.0 cr)
MATH 5285H - Honors: Fundamental Structures of Algebra I, H (4.0 cr)
MATH 5286H - Honors: Fundamental Structures of Algebra II, H (4.0 cr)
MATH 5385 - Introduction to Computational Algebraic Geometry (4.0 cr)

Take 0 or more course(s) from the following:

MATH 4242 - Applied Linear Algebra (4.0 cr)
MATH 5705 - Enumerative Combinatorics (4.0 cr)
MATH 5707 - Graph Theory and Non-enumerative Combinatorics (4.0 cr)
MATH 5711 - Linear Programming and Combinatorial Optimization (4.0 cr)
MATH 5485 - Introduction to Numerical Methods I (4.0 cr)

Analysis Sequence

Take 2 or more course(s) from the following:

MATH 4606 - Advanced Calculus (4.0 cr)
MATH 5486 - Introduction To Numerical Methods II (4.0 cr)
MATH 5525 - Introduction to Ordinary Differential Equations (4.0 cr)
MATH 5535 - Dynamical Systems and Chaos (4.0 cr)
MATH 5583 - Complex Analysis (4.0 cr)
MATH 5587 - Elementary Partial Differential Equations I (4.0 cr)
MATH 5588 - Elementary Partial Differential Equations II (4.0 cr)
MATH 5652 - Introduction to Stochastic Processes (4.0 cr)
MATH 5654 - Prediction and Filtering (4.0 cr)
MATH 5615H - Honors: Introduction to Analysis I, H (4.0 cr)
MATH 5616H - Honors: Introduction to Analysis II, H (4.0 cr)
MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
or STAT 5101 - Theory of Statistics I (4.0 cr)

Additional Electives

Take 0 or more course(s) from the following:

MATH 4xxx
MATH 5xxx

-OR-

Actuarial Science Specialization

Complete the requirements for the Actuarial Science subplan.

-OR-

Mathematics Education Specialization

Complete the requirements for the Education subplan.

-OR-

Computer Applications Specialization

Complete the requirements for the Computer Applications subplan.

Program Sub-plans

A sub-plan is not required for this program.

Actuarial Science

Required Courses

Math and Computer Science

MATH 4065 - Theory of Interest (3.0 cr)
 MATH 5067 - Actuarial Mathematics I (4.0 cr)
 MATH 5068 - Actuarial Mathematics II (4.0 cr)
 CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)
 or CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)
 MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
 or STAT 5101 - Theory of Statistics I (4.0 cr)
 MATH 5652 - Introduction to Stochastic Processes (4.0 cr)
 or STAT 5102 - Theory of Statistics II (4.0 cr)
 MATH 4242 - Applied Linear Algebra (4.0 cr)
Take 1 or more course(s) from the following:
 MATH 4281 - Introduction to Modern Algebra (4.0 cr)
 MATH 5248 - Cryptology and Number Theory (4.0 cr)
 MATH 5251 - Error-Correcting Codes, Finite Fields, Algebraic Curves (4.0 cr)
 MATH 5285H - Honors: Fundamental Structures of Algebra I, H (4.0 cr)
 MATH 5286H - Honors: Fundamental Structures of Algebra II, H (4.0 cr)
 MATH 5385 - Introduction to Computational Algebraic Geometry (4.0 cr)
 MATH 5711 - Linear Programming and Combinatorial Optimization (4.0 cr)

Economics and Business

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
 ECON 3101 - Intermediate Microeconomics (4.0 cr)
 FINA 3001 - Finance Fundamentals (3.0 cr)
 ECON 4751 - Financial Economics (3.0 cr)
 or FINA 4241 - Corporate Financing Decisions (4.0 cr)
Take one of the following pairs of courses.
 ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 or
 ECON 1104 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 ECON 1105 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
Take 2 or more course(s) from the following:
 INS 4100 - Corporate Risk Management (2.0 cr)
 INS 4101 - Employee Benefits (2.0 cr)
 INS 4200 - Insurance Theory and Practice (2.0 cr)

Computer Applications

Required Courses

Computing Applications

MATH 5486 may be used to count towards the analysis distribution requirement and MATH 5485 towards the algebra requirement.
 CSCI 2011 - Discrete Structures of Computer Science (4.0 cr)
 MATH 5165 - Mathematical Logic I (4.0 cr)
 MATH 5485 - Introduction to Numerical Methods I (4.0 cr)
 MATH 5486 - Introduction To Numerical Methods II (4.0 cr)
 CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)
 or CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)
 or CSCI 1901 - Structure of Computer Programming I (4.0 cr)

Additional Mathematics

Take 3 or more course(s) from the following:

Additional Algebra Course

Take 1 or more course(s) from the following:
 MATH 4281 - Introduction to Modern Algebra (4.0 cr)
 MATH 5248 - Cryptology and Number Theory (4.0 cr)

MATH 5251 - Error-Correcting Codes, Finite Fields, Algebraic Curves (4.0 cr)
 MATH 5285H - Honors: Fundamental Structures of Algebra I, H (4.0 cr)
 MATH 5286H - Honors: Fundamental Structures of Algebra II, H (4.0 cr)
 MATH 5385 - Introduction to Computational Algebraic Geometry (4.0 cr)

Additional Analysis Course

Take 1 or more course(s) from the following:
 MATH 4606 - Advanced Calculus (4.0 cr)
 MATH 5525 - Introduction to Ordinary Differential Equations (4.0 cr)
 MATH 5535 - Dynamical Systems and Chaos (4.0 cr)
 MATH 5583 - Complex Analysis (4.0 cr)
 MATH 5587 - Elementary Partial Differential Equations I (4.0 cr)
 MATH 5588 - Elementary Partial Differential Equations II (4.0 cr)
 MATH 5652 - Introduction to Stochastic Processes (4.0 cr)
 MATH 5654 - Prediction and Filtering (4.0 cr)
 MATH 5615H - Honors: Introduction to Analysis I, H (4.0 cr)
 MATH 5616H - Honors: Introduction to Analysis II, H (4.0 cr)
 MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
 or STAT 5101 - Theory of Statistics I (4.0 cr)

Upper Division Computer Science

Take 3 or more course(s) from the following:
 CSCI 4041 - Algorithms and Data Structures (4.0 cr)
 CSCI 5107 - Fundamentals of Computer Graphics I (3.0 cr)
 CSCI 5108 - Fundamentals of Computer Graphics II (3.0 cr)
 CSCI 5403 - Computational Complexity (3.0 cr)
 CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
 CSCI 5511 - Artificial Intelligence I (3.0 cr)
 CSCI 5521 - Pattern Recognition (3.0 cr)
 CSCI 8442 - Computational Geometry and Applications (3.0 cr)
 CSCI 5512W - Artificial Intelligence II, WI (3.0 cr)
 or CSCI 5519 - Artificial Intelligence II (non-WI) (3.0 cr)

Education

Seven math courses are chosen specifically for preparation to teach in secondary education, including two courses from the algebra list and two courses from the analysis list. MATH 4707 will be accepted as an algebra course only for students completing this specialization.

Required Courses

Mathematics

These courses fulfill the both the algebra and analysis requirements.

MATH 5335 - Geometry I (4.0 cr)
 MATH 4242 - Applied Linear Algebra (4.0 cr)
 or MATH 4281 - Introduction to Modern Algebra (4.0 cr)
 or MATH 5285H - Honors: Fundamental Structures of Algebra I, H (4.0 cr)
 MATH 4707 - Introduction to Combinatorics and Graph Theory (4.0 cr)
 or MATH 5705 - Enumerative Combinatorics (4.0 cr)
 or MATH 5707 - Graph Theory and Non-enumerative Combinatorics (4.0 cr)
 MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
 or STAT 5101 - Theory of Statistics I (4.0 cr)

Take 3 or more course(s) from the following:

MATH 4xxx
 MATH 5xxx

Mathematics Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 20 to 26.

Students complete all the lower division requirements in the mathematics major, plus two upper division electives. See the mathematics major description for information on the utility of a mathematics degree.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

MATH 1371 - IT Calculus I, MATH (4.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)

MATH 1372 - IT Calculus II (4.0 cr)

or MATH 1272 - Calculus II (4.0 cr)

or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)

MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)

or MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)

MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

or MATH 2263 - Multivariable Calculus (4.0 cr)

MATH 2283 - Sequences, Series, and Foundations (3.0 cr)

or MATH 3283W - Sequences, Series, and Foundations: Writing Intensive, WI (4.0 cr)

or

Honors Sequence

MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)

MATH 1572H - Honors Calculus II, H (4.0 cr)

MATH 2573H - Honors Calculus III, H (4.0 cr)

MATH 2574H - Honors Calculus IV, H (4.0 cr)

Electives

Complete two MATH courses or STAT 5101 and 5102.

Take 2 or more course(s) from the following:

MATH 3xxx

MATH 4xxx

MATH 5xxx

STAT 5101 - Theory of Statistics I (4.0 cr)

STAT 5102 - Theory of Statistics II (4.0 cr)

Medieval Studies Minor

Center for Medieval Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

The minor covers the period of roughly between 300 and 1500 B.C.E. It includes the history, art history, theater and music history, literature, and languages of the period, including Latin, French, Italian, English, Old English, Scandinavian, and German.

The program allows students with an interest in the medieval period or who are planning to pursue graduate work in one of the related areas to concentrate their studies as a coherent whole.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

Courses must be 3xxx, 4xxx, or 5xxx, chosen from approved course lists in consultation with the director of undergraduate studies of CLA's Center for Medieval Studies. All applicable courses originate in other departments. Many of these are cross-listed as MEST 3610, MEST 4610, and MEST 5610. A list of appropriate courses is available at the Center for Medieval Studies.

Microbiology B.A.

Microbiology

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 66.

Degree: Bachelor of Arts.

Microbiology examines the nature and activities of microorganisms, the distinctive microscopic life forms that recycle the elements in aquatic, atmospheric, and soil environments. The field has applications for fields of industry, agriculture, and medicine. As remarkably useful model systems for research, microorganisms play a key role in the development of modern biology. The program prepares students for graduate study or professional work in microbiology as well as in related biological fields.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

General and Organismal Biology

Choose either sequence A or B or C.

Sequence A

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)

or

Sequence B

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Take the following course or course pair:

BIOL 2012 - General Zoology (4.0 cr)

or

BIOL 3211 - Animal Physiology (3.0 cr)

BIOL 2005 - Animal Diversity Laboratory (1.0 cr)

or

Sequence C

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

Take either *BIOL 2022* or *3007W*, or both *BIOL 3002* and *3005W*.

BIOL 2022 - General Botany (3.0 cr)

or *BIOL 3007W* - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

or

BIOL 3002 - Plant Biology: Function (2.0 cr)

BIOL 3005W - Plant Function Laboratory, WI (2.0 cr)

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)

or *MATH 1281* - Calculus with Biological Emphasis I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

or *MATH 1282* - Calculus With Biological Emphasis II (4.0 cr)

Chemistry

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

CHEM 2302 - Organic Chemistry II (3.0 cr)

CHEM 2311 - Organic Lab (4.0 cr)

Physics

PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)

or *PHYS 1301W* - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)

or *PHYS 1302W* - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

Major Core Curriculum

BIOL 4003 - Genetics (3.0 cr)

MICB 3301 - Biology of Microorganisms (5.0 cr)

BIOC 3021 - Biochemistry (3.0 cr)

or *BIOC 4331* - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)

Electives

Take 4 or more course(s) from the following:

MICB 4111 - Microbial Physiology and Diversity (3.0 cr)

MICB 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)

MICB 4131 - Immunology (3.0 cr)

MICB 4151 - Molecular and Genetic Bases for Microbial Diseases (3.0 cr)

MICB 4141W - Biology, Genetics, and Pathogenesis of Viruses: Writing Intensive, WI (4.0 cr)

or *MICB 4171* - Biology, Genetics, and Pathogenesis of Viruses (3.0 cr)

Lab Electives

Choose Option A or B. If Option B is chosen, *MICB 4794W/4994* must be taken for 6 credits.

Option A

MICB 4215 - Advanced Laboratory: Microbial Physiology and Diversity (3.0 cr)

MICB 4235 - Advanced Laboratory: Virology, Immunology, and Microbial Genetics (3.0 cr)

Take 6 or more credit(s) from the following:

MICB 4993 - Directed Studies (1.0-7.0 cr)

MICB 4994 - Directed Research (1.0-7.0 cr)

or

Option B

MICB 4994 - Directed Research (1.0-7.0 cr)

MICB 4215 - Advanced Laboratory: Microbial Physiology and Diversity (3.0 cr)

or *MICB 4235* - Advanced Laboratory: Virology, Immunology, and Microbial Genetics (3.0 cr)

Final Project

Complete 6 credits in one of the following:

MICB 4993 - Directed Studies (1.0-7.0 cr)

or *MICB 4994* - Directed Research (1.0-7.0 cr)

Music B.Mus.

School of Music

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 78.

Degree: Bachelor of Music.

The B.Mus. in performance is a professional degree in which music courses comprise approximately 75 percent of the program.

Admission Requirements

Admission to a music program is contingent on passing an audition. Auditions are highly competitive with students normally having studied for a number of years: a minimum of three to four years in voice, guitar, or on an orchestral or band instrument, eight to twelve years on piano. Auditions are held throughout the academic year. Incoming freshmen normally take the audition during the winter of their senior year of high school; transfer students, one semester prior to the term in which they plan to enroll.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Music Theory and Ear Training

MUS 1501 - Musical Theory I (3.0 cr)

MUS 1502 - Musical Theory II (3.0 cr)

MUS 1511 - Ear Training I (1.0 cr)

MUS 1512 - Ear Training II (1.0 cr)

MUS 3501 - Theory and Analysis of Tonal Music III (3.0 cr)

MUS 3502 - Theory and Analysis of Tonal Music IV (3.0 cr)

MUS 3511 - Ear Training III (1.0 cr)

MUS 3512 - Ear Training IV (1.0 cr)

MUS 4504 - Intensive Theory and Analysis of 20th-Century Music (4.0 cr)

or *MUS 4502* - 18th-Century Counterpoint (3.0 cr)

or *MUS 4503* - Theory and Analysis of Tonal Music V (3.0 cr)

or *MUS 4505* - Jazz Theory (3.0 cr)

MUS 5541 - 16th Century Counterpoint (3.0 cr)

Musicology/Ethnomusicology

MUS 1801W - Music, Society, and Cultures, IP, WI (3.0 cr)

MUS 3601W - History of Western Music I, WI (3.0 cr)

MUS 3602W - History of Western Music II, WI (3.0 cr)

MUS 3603W - History of Western Music III, WI (3.0 cr)

Conducting

MUS 3401 - Basic Conducting (2.0 cr)

Recital

MUS 901 - Junior Recital (0.0 cr)

MUS 951 - Senior Recital (0.0 cr)

Instrumental/Vocal Specializations

Students are required to complete one of the following course groups.

Classical Guitar

Credit requirements in each course group must be satisfied by taking the courses for multiple semesters.

Keyboard

Take either MUS 1155 or both MUS 1151-1152.

MUS 1155 - Keyboard Skills I (2.0 cr)

MUS 1151 - Piano: Class Lessons I (2.0 cr)

MUS 1152 - Piano: Class Lessons II (2.0 cr)

Applied Music

Take 32 or more credit(s).

Take 8 or more credit(s) from the following:

MUSA 1323 - Guitar—Major (2.0-4.0 cr)

Take 8 or more credit(s) from the following:

MUSA 2323 - Guitar-Performance Major (2.0-4.0 cr)

Take 16 or more credit(s) from the following:

MUSA 3323 - Guitar—Major (2.0-4.0 cr)

Ensemble

Take 2 or more course(s) from the following:

MUS 3410 - University Wind Bands (1.0 cr)

MUS 3420 - Orchestra (1.0 cr)

MUS 3230 - Chorus (1.0 cr)

MUS 5240 - Chamber Singers (1.0 cr)

MUS 5280 - Opera Theatre (2.0 cr)

Take 2 or more course(s) from the following:

MUS 3440 - Chamber Ensemble (1.0 cr)

Electives

Take 1 or more credit(s) from the following:

MUS 1xxx

MUS 2xxx

MUS 3xxx

-OR-

Harp

Credit requirements in each course group must be satisfied by taking the courses for multiple semesters.

Keyboard

Take either MUS 1155 or both MUS 1151-1152.

MUS 1155 - Keyboard Skills I (2.0 cr)

MUS 1151 - Piano: Class Lessons I (2.0 cr)

MUS 1152 - Piano: Class Lessons II (2.0 cr)

Applied Music

Take 32 or more credit(s) from the following:

Take 8 or more credit(s) from the following:

MUSA 1322 - Harp—Major (2.0-4.0 cr)

Take 8 or more credit(s) from the following:

MUSA 2322 - Harp-Performance Major (2.0-4.0 cr)

Take 16 or more credit(s) from the following:

MUSA 3322 - Harp—Major (2.0-4.0 cr)

Ensemble

Take 2 or more course(s) from the following:

MUS 3410 - University Wind Bands (1.0 cr)

MUS 3420 - Orchestra (1.0 cr)

Electives

Take 1 or more credit(s) from the following:

MUS 1xxx

MUS 2xxx

MUS 3xxx

-OR-

Organ

Credit requirements in each course group must be satisfied by taking the courses for multiple semesters.

Keyboard

MUS 1151 - Piano: Class Lessons I (2.0 cr)

MUS 1152 - Piano: Class Lessons II (2.0 cr)

MUS 5151 - Organ Literature I (3.0 cr)

MUS 5152 - Organ Literature II (3.0 cr)

Applied Music

Take 32 or more credit(s) from the following:

Take 8 or more credit(s) from the following:

MUSA 1303 - Organ—Major (2.0-4.0 cr)

Take 8 or more credit(s) from the following:

MUSA 2303 - Organ—Performance Major (2.0-4.0 cr)

Take 16 or more credit(s) from the following:

MUSA 3303 - Organ—Major (2.0-4.0 cr)

Ensemble

Take 6 or more course(s) from the following:

MUS 3230 - Chorus (1.0 cr)

MUS 5240 - Chamber Singers (1.0 cr)

-OR-

Piano

Credit requirements in each course group must be satisfied by taking the courses for multiple semesters.

Keyboard

MUS 1155 - Keyboard Skills I (2.0 cr)

MUS 1156 - Keyboard Skills II (2.0 cr)

MUS 5101 - Piano Pedagogy I (2.0 cr)

MUS 5181 - Advanced Piano Literature I (2.0 cr)

or MUS 5182 - Advanced Piano Literature II (2.0 cr)

Applied Music

Take 32 or more credit(s) from the following:

Take 8 or more credit(s) from the following:

MUSA 1301 - Piano—Major (2.0-4.0 cr)

Take 8 or more credit(s) from the following:

MUSA 2301 - Piano-Performance Major (2.0-4.0 cr)

Take 16 or more credit(s) from the following:

MUSA 3301 - Piano—Major (2.0-4.0 cr)

Ensemble

Take 4 or more course(s) from the following:

MUS 3150 - Accompanying Skills (1.0 cr)

MUS 3440 - Chamber Ensemble (1.0 cr)

Electives

Take 1 or more credit(s) from the following:

MUS 1xxx

MUS 2xxx

MUS 3xxx

-OR-

String, Woodwind, Brass, Percussion

Credit requirements in each course group must be satisfied by taking the courses for multiple semesters.

Keyboard

Take either MUS 1155 or both MUS 1151-1152.

- MUS 1155 - Keyboard Skills I (2.0 cr)
- MUS 1151 - Piano: Class Lessons I (2.0 cr)
- MUS 1152 - Piano: Class Lessons II (2.0 cr)

Applied Music

Take 32 or more credit(s) from the following:

Take 8 or more credit(s) from the following:

- MUSA 1305 - Violin—Major (2.0-4.0 cr)
- MUSA 1306 - Viola—Major (2.0-4.0 cr)
- MUSA 1307 - Cello—Major (2.0-4.0 cr)
- MUSA 1308 - Double Bass—Major (2.0-4.0 cr)
- MUSA 1309 - Flute—Major (2.0-4.0 cr)
- MUSA 1311 - Oboe—Major (2.0-4.0 cr)
- MUSA 1312 - Clarinet—Major (2.0-4.0 cr)
- MUSA 1313 - Saxophone—Major (2.0-4.0 cr)
- MUSA 1314 - Bassoon—Major (2.0-4.0 cr)
- MUSA 1315 - French Horn—Major (2.0-4.0 cr)
- MUSA 1316 - Trumpet—Major (2.0-4.0 cr)
- MUSA 1317 - Trombone—Major (2.0-4.0 cr)
- MUSA 1318 - Euphonium—Major (2.0-4.0 cr)
- MUSA 1319 - Tuba—Major (2.0-4.0 cr)
- MUSA 1321 - Percussion—Major (2.0-4.0 cr)

Take 8 or more credit(s) from the following:

- MUSA 2305 - Violin-Performance Major (2.0-4.0 cr)
- MUSA 2306 - Viola-Performance Major (2.0-4.0 cr)
- MUSA 2307 - Cello-Performance Major (2.0-4.0 cr)
- MUSA 2308 - Double Bass—Performance Major (2.0-4.0 cr)
- MUSA 2309 - Flute-Performance Major (2.0-4.0 cr)
- MUSA 2311 - Oboe—Performance Major (2.0-4.0 cr)
- MUSA 2312 - Clarinet-Performance Major (2.0-4.0 cr)
- MUSA 2313 - Saxophone-Performance Major (2.0-4.0 cr)
- MUSA 2314 - Bassoon-Performance Major (2.0-4.0 cr)
- MUSA 2315 - French Horn-Performance Major (2.0-4.0 cr)
- MUSA 2316 - Trumpet-Performance Major (2.0-4.0 cr)
- MUSA 2317 - Trombone-Performance Major (2.0-4.0 cr)
- MUSA 2318 - Euphonium—Performance Major (2.0-4.0 cr)
- MUSA 2319 - Tuba-Performance Major (2.0-4.0 cr)
- MUSA 2321 - Percussion—Performance Major (2.0-4.0 cr)

Take 16 or more credit(s) from the following:

- MUSA 3305 - Violin—Major (2.0-4.0 cr)
- MUSA 3306 - Viola—Major (2.0-4.0 cr)
- MUSA 3307 - Cello—Major (2.0-4.0 cr)
- MUSA 3308 - Double Bass—Major (2.0-4.0 cr)
- MUSA 3309 - Flute—Major (2.0-4.0 cr)
- MUSA 3311 - Oboe—Major (2.0-4.0 cr)
- MUSA 3312 - Clarinet—Major (2.0-4.0 cr)
- MUSA 3313 - Saxophone—Major (2.0-4.0 cr)
- MUSA 3314 - Bassoon—Major (2.0-4.0 cr)
- MUSA 3315 - French Horn—Major (2.0-4.0 cr)
- MUSA 3316 - Trumpet—Major (2.0-4.0 cr)
- MUSA 3317 - Trombone—Major (2.0-4.0 cr)
- MUSA 3318 - Euphonium—Major (2.0-4.0 cr)
- MUSA 3319 - Tuba—Major (2.0-4.0 cr)
- MUSA 3321 - Percussion—Major (2.0-4.0 cr)

Band or Orchestra

Take 8 or more course(s) from the following:

- MUS 3410 - University Wind Bands (1.0 cr)
- MUS 3420 - Orchestra (1.0 cr)

Chamber Ensemble

Take 4 or more course(s) from the following:

- MUS 3340 - Jazz Ensemble (1.0 cr)
- MUS 3350 - Jazz Combo (1.0 cr)
- MUS 3440 - Chamber Ensemble (1.0 cr)

- MUS 5430 - New Music Ensemble (1.0 cr)
- MUS 5470 - Woodwind Chamber Ensemble (1.0 cr)
- MUS 5480 - University Brass Choir (1.0 cr)
- MUS 5490 - Percussion Ensemble (1.0 cr)

-OR-

Voice

Credit requirements in each course group must be satisfied by taking the courses for multiple semesters.

Keyboard

Take either MUS 1155 or both MUS 1151-1152.

- MUS 1155 - Keyboard Skills I (2.0 cr)
- MUS 1151 - Piano: Class Lessons I (2.0 cr)
- MUS 1152 - Piano: Class Lessons II (2.0 cr)

Ensemble

Take 8 or more course(s) from the following including 4 semesters of 3230 or 5240:

- MUS 3230 - Chorus (1.0 cr)
- MUS 5240 - Chamber Singers (1.0 cr)
- MUS 5250 - Opera Workshop and Ensemble (1.0 cr)
- MUS 5280 - Opera Theatre (2.0 cr)

Applied Music

Take 32 or more credit(s) from the following:

Take 8 or more credit(s) from the following:

- MUSA 1304 - Voice—Major (2.0-4.0 cr)

Take 8 or more credit(s) from the following:

- MUSA 2304 - Voice-Performance Major (2.0-4.0 cr)

Take 16 or more credit(s) from the following:

- MUSA 3304 - Voice—Major (2.0-4.0 cr)

Diction and Vocal Literature

- MUS 3241 - Vocal Literature (German Lieder) and Pedagogy (1.0 cr)
- MUS 3242 - Vocal Literature (French Melodie) and Pedagogy (1.0 cr)
- MUS 3261 - Italian Diction for Singers (1.0 cr)
- MUS 3262 - English Diction for Singers (1.0 cr)
- MUS 3263 - German Diction for Singers (1.0 cr)
- MUS 3264 - French Diction for Singers (1.0 cr)

Language

- FREN 1001 - Beginning French (5.0 cr)
- GER 1001 - Beginning German (5.0 cr)
- ITAL 1001 - Beginning Italian (5.0 cr)

Music B.A.

School of Music

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 53.

Degree: Bachelor of Arts.

The B.A. program is for students who wish to major in music within a broad liberal arts degree program.

Admission Requirements

Admission to a music program is contingent on passing an audition. Auditions are highly competitive with students normally having studied for a number of years: a minimum of

three to four years in voice, guitar, or on an orchestral or band instrument, eight to twelve years on piano. Auditions are held throughout the academic year. Incoming freshmen normally take the audition during the winter of their senior year of high school; transfer students, one semester prior to the term in which they plan to enroll.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Music Theory and Ear Training

MUS 1501 - Musical Theory I (3.0 cr)
 MUS 1502 - Musical Theory II, (3.0 cr)
 MUS 1511 - Ear Training I (1.0 cr)
 MUS 1512 - Ear Training II (1.0 cr)
 MUS 3501 - Theory and Analysis of Tonal Music III (3.0 cr)
 MUS 3502 - Theory and Analysis of Tonal Music IV (3.0 cr)
 MUS 3511 - Ear Training III (1.0 cr)
 MUS 3512 - Ear Training IV (1.0 cr)
 MUS 4504 - Intensive Theory and Analysis of 20th-Century Music (4.0 cr)
 MUS 4501 - 16th-Century Counterpoint (3.0 cr)
 or MUS 4502 - 18th-Century Counterpoint (3.0 cr)
 or MUS 4503 - Theory and Analysis of Tonal Music V (3.0 cr)
 or MUS 4505 - Jazz Theory (3.0 cr)

Musicology/Ethnomusicology

MUS 1801W - Music, Society, and Cultures, IP, WI (3.0 cr)
 MUS 3601W - History of Western Music I, WI (3.0 cr)
 MUS 3602W - History of Western Music II, WI (3.0 cr)
 MUS 3603W - History of Western Music III, WI (3.0 cr)

Keyboard

For non-keyboard majors, MUS 1155 may be substituted for MUS 1151-1152. Keyboard majors take 1155-1156.

MUS 1155 - Keyboard Skills I (2.0 cr)
 MUS 1151 - Piano: Class Lessons I (2.0 cr)
 MUS 1152 - Piano: Class Lessons II (2.0 cr)
 MUS 1155 - Keyboard Skills I (2.0 cr)
 MUS 1156 - Keyboard Skills II (2.0 cr)

Applied Music

MUSA 13xx (major instrument or voice) fulfills this requirement. Students must take four semesters at 2 credits per term (8 credits).

Take 8 or more credit(s) from the following:

MUSA 1301 - Piano—Major (2.0-4.0 cr)
 MUSA 1302 - Harpsichord—Major (2.0-4.0 cr)
 MUSA 1303 - Organ—Major (2.0-4.0 cr)
 MUSA 1304 - Voice—Major (2.0-4.0 cr)
 MUSA 1305 - Violin—Major (2.0-4.0 cr)
 MUSA 1306 - Viola—Major (2.0-4.0 cr)
 MUSA 1307 - Cello—Major (2.0-4.0 cr)
 MUSA 1308 - Double Bass—Major (2.0-4.0 cr)
 MUSA 1309 - Flute—Major (2.0-4.0 cr)
 MUSA 1311 - Oboe—Major (2.0-4.0 cr)
 MUSA 1312 - Clarinet—Major (2.0-4.0 cr)
 MUSA 1313 - Saxophone—Major (2.0-4.0 cr)
 MUSA 1314 - Bassoon—Major (2.0-4.0 cr)
 MUSA 1315 - French Horn—Major (2.0-4.0 cr)
 MUSA 1316 - Trumpet—Major (2.0-4.0 cr)

MUSA 1317 - Trombone—Major (2.0-4.0 cr)
 MUSA 1318 - Euphonium—Major (2.0-4.0 cr)
 MUSA 1319 - Tuba—Major (2.0-4.0 cr)
 MUSA 1321 - Percussion—Major (2.0-4.0 cr)
 MUSA 1322 - Harp—Major (2.0-4.0 cr)

Ensembles

Students must participate in four semesters, two of which must be band, chorus, or orchestra.

Take 4 or more course(s) from the following:

MUS 5240 - Chamber Singers (1.0 cr)
 MUS 5280 - Opera Theatre (2.0 cr)

Take 2 or more course(s) from the following:

MUS 3410 - University Wind Bands (1.0 cr)
 MUS 3230 - Chorus (1.0 cr)
 MUS 3420 - Orchestra (1.0 cr)

Electives

Courses from MUS 55xx, 56xx, or 58xx fulfill this requirement.

Take 2 or more credit(s) from the following:

MUS 5xxx

Research and Senior Project

MUS 3995 - Major Project (1.0 cr)
 MUS 5611 - Resources for Music Research (3.0 cr)

Music Minor

School of Music

Requirements for this program are current for Fall 2006.

Required credits in this minor: 23.

A minor in music is available for students majoring in other fields.

Admission Requirements

An entrance audition identical to that for a music major is required.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Music Theory and Ear Training

MUS 1501 - Musical Theory I (3.0 cr)
 MUS 1502 - Musical Theory II, (3.0 cr)

Musicology/Ethnomusicology

Take 2 or more course(s) from the following:

MUS 1801W - Music, Society, and Cultures, IP, WI (3.0 cr)
 MUS 3601W - History of Western Music I, WI (3.0 cr)
 MUS 3602W - History of Western Music II, WI (3.0 cr)
 MUS 3603W - History of Western Music III, WI (3.0 cr)

Keyboard

For non-keyboard minors, MUS 1155 may be substituted for MUS 1151-1152. Keyboard minors take 1155-1156.

MUS 1155 - Keyboard Skills I (2.0 cr)
 MUS 1151 - Piano: Class Lessons I (2.0 cr)
 MUS 1152 - Piano: Class Lessons II (2.0 cr)

MUS 1155 - Keyboard Skills I (2.0 cr)
 MUS 1156 - Keyboard Skills II (2.0 cr)

Applied Music

Students must take two semesters at 2 credits per term.

Take 4 or more credit(s) from the following:

MUSA 1301 - Piano—Major (2.0-4.0 cr)
 MUSA 1302 - Harpsichord—Major (2.0-4.0 cr)
 MUSA 1303 - Organ—Major (2.0-4.0 cr)
 MUSA 1304 - Voice—Major (2.0-4.0 cr)
 MUSA 1305 - Violin—Major (2.0-4.0 cr)
 MUSA 1306 - Viola—Major (2.0-4.0 cr)
 MUSA 1307 - Cello—Major (2.0-4.0 cr)
 MUSA 1308 - Double Bass—Major (2.0-4.0 cr)
 MUSA 1309 - Flute—Major (2.0-4.0 cr)
 MUSA 1311 - Oboe—Major (2.0-4.0 cr)
 MUSA 1312 - Clarinet—Major (2.0-4.0 cr)
 MUSA 1313 - Saxophone—Major (2.0-4.0 cr)
 MUSA 1314 - Bassoon—Major (2.0-4.0 cr)
 MUSA 1315 - French Horn—Major (2.0-4.0 cr)
 MUSA 1316 - Trumpet—Major (2.0-4.0 cr)
 MUSA 1317 - Trombone—Major (2.0-4.0 cr)
 MUSA 1318 - Euphonium—Major (2.0-4.0 cr)
 MUSA 1319 - Tuba—Major (2.0-4.0 cr)
 MUSA 1321 - Percussion—Major (2.0-4.0 cr)
 MUSA 1322 - Harp—Major (2.0-4.0 cr)

Ensembles

Take 2 or more course(s) from the following:

MUS 3230 - Chorus (1.0 cr)
 MUS 3410 - University Wind Bands (1.0 cr)
 MUS 3420 - Orchestra (1.0 cr)
 MUS 3440 - Chamber Ensemble (1.0 cr)
 MUS 5240 - Chamber Singers (1.0 cr)
 MUS 5280 - Opera Theatre (2.0 cr)

Music Education B.Mus

School of Music

College of Liberal Arts

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 92.

Degree: Bachelor of Music.

The degree in music education is offered with two concentrations: instrumental/general music K-12 and choral/general. The instrumental/general concentration requires that a student be admitted via the audition on an orchestral or band instrument; the choral/general concentration requires that a student be admitted in voice, piano, organ, or classical guitar. Completion of the degree in music education culminates in eligibility for state licensure in the concentration area.

Admission Requirements

Admission to a music program is contingent on passing an audition. Auditions are highly competitive with students normally having studied for a number of years: a minimum of three to four years in voice, guitar, or on an orchestral or band instrument, eight to twelve years on piano. Auditions are held throughout the academic year. Incoming freshmen normally take the audition during the winter of their senior year of high school; transfer students, one semester prior to the term in which they plan to enroll. Students applying for the program in music

education are also required to pass an interview with the music education faculty.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Music Theory and Ear Training

MUS 1501 - Musical Theory I (3.0 cr)
 MUS 1502 - Musical Theory II, (3.0 cr)
 MUS 1511 - Ear Training I (1.0 cr)
 MUS 1512 - Ear Training II (1.0 cr)
 MUS 3501 - Theory and Analysis of Tonal Music III (3.0 cr)
 MUS 3502 - Theory and Analysis of Tonal Music IV (3.0 cr)
 MUS 3511 - Ear Training III (1.0 cr)
 MUS 3512 - Ear Training IV (1.0 cr)
 MUS 4502 - 18th-Century Counterpoint (3.0 cr)
 or MUS 4503 - Tonal Theory IV (3.0 cr)
 or MUS 4504 - Intensive Theory and Analysis of 20th-Century Music (4.0 cr)
 or MUS 4505 - Jazz Theory (3.0 cr)
 MUS 5541 - 16th Century Counterpoint (3.0 cr)

Musicology/Ethnomusicology

MUS 1801W - Music, Society, and Cultures, IP, WI (3.0 cr)
 MUS 3601W - History of Western Music I, WI (3.0 cr)
 MUS 3602W - History of Western Music II, WI (3.0 cr)
 MUS 3603W - History of Western Music III, WI (3.0 cr)

Keyboard

For non-keyboard majors, MUS 1155 may be substituted for MUS 1151-1152. Keyboard majors take 1155-1156.

MUS 1155 - Keyboard Skills I (2.0 cr)
 MUS 1151 - Piano: Class Lessons I (2.0 cr)
 MUS 1152 - Piano: Class Lessons II (2.0 cr)
 MUS 1155 - Keyboard Skills I (2.0 cr)
 MUS 1156 - Keyboard Skills II (2.0 cr)

Professional Education

CI 5452 - Reading in Content Areas for Initial Licensure Candidates (1.0 cr)
 EDHD 5001 - Learning, Cognition, and Assessment (3.0 cr)
 EDHD 5003 - Developmental and Individual Differences in Educational Contexts (3.0 cr)
 EDHD 5005 - School and Society (2.0 cr)
 EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
 PUBH 3003 - Fundamentals of Alcohol and Drug Abuse (2.0 cr)
 or PUBH 3005 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

Choral/General Music Education

This program is for students majoring in voice, piano, organ, or classical guitar who want to teach choral and classroom music in the elementary and secondary schools. Students successfully completing the program will meet licensure requirements to teach choral and general classroom music in grades K-12 in Minnesota.

Required Courses**Major Courses**

MUED 1201 - Introduction to Music Education (1.0 cr)
 MUED 3301 - Teaching Elementary Vocal and General Music (3.0 cr)
 MUED 3350 - Student Teaching in Classroom Music (4.0-8.0 cr)
 MUED 3415 - Choral Conducting and Methods I (4.0 cr)
 MUED 3416 - Choral Conducting and Methods II (4.0 cr)
 MUED 3450 - Student Teaching in Vocal Music (4.0-8.0 cr)
 MUED 3650 - Student Teaching Seminar (2.0 cr)

Ensemble Requirements

MUS 3230 or MUS 5240 is required for a minimum of seven semesters (1 credit each semester), selected in consultation with an adviser.

Take 7 or more credit(s) from the following:

MUS 3230 - Chorus (1.0 cr)
 MUS 5240 - Chamber Singers (1.0 cr)

Instrument Focus

Students are required to complete one of the following course groups.

Voice

Each chosen course should be taken for 2 credits per term, for the number of semesters needed to reach the stated minimum credit requirement. (For example, Voice 1xxx should be taken for four semesters at 2 credits per term to meet the 8 credit requirement.)

MUS 3401 - Basic Conducting (2.0 cr)

Applied Voice

Take 8 or more credit(s) from the following:

MUSA 1304 - Voice—Major (2.0-4.0 cr)
 Voice 3xxx

Take 6 or more credit(s) from the following:

MUSA 3304 - Voice—Major (2.0-4.0 cr)

Applied Piano

Take 4 or more credit(s) from the following:

MUSA 1401 - Piano—Secondary (2.0-4.0 cr)
 MUS 3401 - Basic Conducting (2.0 cr)
 -OR-

Piano

Each chosen course should be taken for 2 credits per term, for the number of semesters needed to reach the stated minimum credit requirement. (For example, Piano 1xxx should be taken for four semesters at 2 credits per term to meet the 8 credit requirement.)

Applied Piano

Take 8 or more credit(s) from the following:

MUSA 1301 - Piano—Major (2.0-4.0 cr)
 Piano 3xxx

Take 6 or more credit(s) from the following:

MUSA 3301 - Piano—Major (2.0-4.0 cr)
 MUS 3401 - Basic Conducting (2.0 cr)

Applied Voice

Take 4 or more credit(s) from the following:

MUSA 1404 - Voice—Secondary (2.0-4.0 cr)

-OR-

Guitar

Each chosen course should be taken for 2 credits per term, for the number of semesters needed to reach the stated minimum credit requirement. (For example, Guitar 1xxx should be taken for four semesters at 2 credits per term to meet the 8 credit requirement.)

MUS 3401 - Basic Conducting (2.0 cr)

Applied Guitar

Take 8 or more credit(s) from the following:

MUSA 1323 - Guitar—Major (2.0-4.0 cr)
 Guitar 3xxx

Take 6 or more credit(s) from the following:

MUSA 3323 - Guitar—Major (2.0-4.0 cr)
 MUS 3401 - Basic Conducting (2.0 cr)

Applied Piano

Take 4 or more credit(s) from the following:

MUSA 1401 - Piano—Secondary (2.0-4.0 cr)

Instrumental/General Music Education

Students successfully completing the program will meet licensure requirements to teach band, orchestra, and general classroom music in grades K-12 in Minnesota.

Required Courses**Major Courses**

MUED 1201 - Introduction to Music Education (1.0 cr)
 MUED 3301 - Teaching Elementary Vocal and General Music (3.0 cr)
 MUED 3350 - Student Teaching in Classroom Music (4.0-8.0 cr)
 MUED 3502 - String Techniques and Teaching (2.0 cr)
 MUED 3503 - Woodwind Techniques and Teaching (2.0 cr)
 MUED 3504 - Brass Techniques and Teaching (2.0 cr)
 MUED 3505 - Percussion Techniques and Teaching (2.0 cr)
 MUED 3516 - Instrumental Methods and Conducting I (3.0 cr)
 MUED 3517 - Beginning Instrumental Methods and Materials (3.0 cr)
 MUED 3518 - Instrumental Methods and Conducting II (3.0 cr)
 MUED 3550 - Student Teaching in Instrumental Music (4.0-8.0 cr)
 MUED 3650 - Student Teaching Seminar (2.0 cr)

Applied Music

Students must complete four semesters at 2 credits per term of 13xx courses, and two semesters at 2 credits per term of 33xx courses.

MUS 1260 - Voice Class (2.0 cr)
 or MUSA 1404 - Voice—Secondary (2.0-4.0 cr)

Take 8 or more credit(s) from the following:

MUSA 1301 - Piano—Major (2.0-4.0 cr)
 MUSA 1302 - Harpsichord—Major (2.0-4.0 cr)
 MUSA 1303 - Organ—Major (2.0-4.0 cr)
 MUSA 1304 - Voice—Major (2.0-4.0 cr)
 MUSA 1305 - Violin—Major (2.0-4.0 cr)
 MUSA 1306 - Viola—Major (2.0-4.0 cr)
 MUSA 1307 - Cello—Major (2.0-4.0 cr)
 MUSA 1308 - Double Bass—Major (2.0-4.0 cr)
 MUSA 1309 - Flute—Major (2.0-4.0 cr)
 MUSA 1311 - Oboe—Major (2.0-4.0 cr)
 MUSA 1312 - Clarinet—Major (2.0-4.0 cr)
 MUSA 1313 - Saxophone—Major (2.0-4.0 cr)
 MUSA 1314 - Bassoon—Major (2.0-4.0 cr)
 MUSA 1315 - French Horn—Major (2.0-4.0 cr)
 MUSA 1316 - Trumpet—Major (2.0-4.0 cr)
 MUSA 1317 - Trombone—Major (2.0-4.0 cr)
 MUSA 1318 - Euphonium—Major (2.0-4.0 cr)
 MUSA 1319 - Tuba—Major (2.0-4.0 cr)

MUSA 1321 - Percussion—Major (2.0-4.0 cr)
 MUSA 1322 - Harp—Major (2.0-4.0 cr)

Take 4 or more credit(s) from the following:

MUSA 3301 - Piano—Major (2.0-4.0 cr)
 MUSA 3302 - Harpsichord—Major (2.0-4.0 cr)
 MUSA 3303 - Organ—Major (2.0-4.0 cr)
 MUSA 3304 - Voice—Major (2.0-4.0 cr)
 MUSA 3305 - Violin—Major (2.0-4.0 cr)
 MUSA 3306 - Viola—Major (2.0-4.0 cr)
 MUSA 3307 - Cello—Major (2.0-4.0 cr)
 MUSA 3308 - Double Bass—Major (2.0-4.0 cr)
 MUSA 3309 - Flute—Major (2.0-4.0 cr)
 MUSA 3311 - Oboe—Major (2.0-4.0 cr)
 MUSA 3312 - Clarinet—Major (2.0-4.0 cr)
 MUSA 3313 - Saxophone—Major (2.0-4.0 cr)
 MUSA 3314 - Bassoon—Major (2.0-4.0 cr)
 MUSA 3315 - French Horn—Major (2.0-4.0 cr)
 MUSA 3316 - Trumpet—Major (2.0-4.0 cr)
 MUSA 3317 - Trombone—Major (2.0-4.0 cr)
 MUSA 3318 - Euphonium—Major (2.0-4.0 cr)
 MUSA 3319 - Tuba—Major (2.0-4.0 cr)
 MUSA 3321 - Percussion—Major (2.0-4.0 cr)
 MUSA 3322 - Harp—Major (2.0-4.0 cr)

Ensemble Requirement

Complete 7 credits total. Band or orchestra is required for a minimum of six semesters, to be selected in consultation with an adviser. An ensemble course is required for a minimum of one semester.

Take 6 or more credit(s) from the following:

MUS 3410 - University Wind Bands (1.0 cr)
 MUS 3420 - Orchestra (1.0 cr)

Ensemble

MUS 3340 - Jazz Ensemble (1.0 cr)
 or MUS 3350 - Jazz Combo (1.0 cr)
 or MUS 3440 - Chamber Ensemble (1.0 cr)
 or MUS 5430 - New Music Ensemble (1.0 cr)
 or MUS 5470 - Woodwind Chamber Ensemble (1.0 cr)
 or MUS 5480 - University Brass Choir (1.0 cr)
 or MUS 5490 - Percussion Ensemble (1.0 cr)

Conducting

MUS 3401 - Basic Conducting (2.0 cr)

Music Therapy B.Mus.

School of Music

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 78.

Degree: Bachelor of Music.

This program prepares students for a profession in music therapy, using music to influence behavioral changes in people, from pre-school through geriatrics, in a variety of educational and health-related environments.

Admission Requirements

Admission to a music program is contingent on passing an audition. Auditions are highly competitive with students normally having studied for a number of years: a minimum of three to four years in voice, guitar, or on an orchestral or band

instrument, eight to twelve years on piano. Auditions are held throughout the academic year. Incoming freshmen normally take the audition during the winter of their senior year of high school; transfer students, one semester prior to the term in which they plan to enroll. Students applying for the program in music therapy are required to pass an interview with music education/therapy faculty.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Music Theory and Ear Training

MUS 1501 - Musical Theory I (3.0 cr)
 MUS 1502 - Musical Theory II, (3.0 cr)
 MUS 1511 - Ear Training I (1.0 cr)
 MUS 1512 - Ear Training II (1.0 cr)
 MUS 3501 - Theory and Analysis of Tonal Music III (3.0 cr)
 MUS 3502 - Theory and Analysis of Tonal Music IV (3.0 cr)
 MUS 3511 - Ear Training III (1.0 cr)
 MUS 3512 - Ear Training IV (1.0 cr)

Musicology/Ethnomusicology

MUS 1801W - Music, Society, and Cultures, IP, WI (3.0 cr)
 MUS 3601W - History of Western Music I, WI (3.0 cr)
 MUS 3602W - History of Western Music II, WI (3.0 cr)
 MUS 3603W - History of Western Music III, WI (3.0 cr)

Keyboard

Take one of the following course pairs:

MUS 1151 - Piano: Class Lessons I (2.0 cr)
 MUS 1152 - Piano: Class Lessons II (2.0 cr)
 or
 MUS 1155 - Keyboard Skills I (2.0 cr)
 MUS 1156 - Keyboard Skills II (2.0 cr)

Conducting

MUS 3401 - Basic Conducting (2.0 cr)

Major Courses

MUED 1801 - Introduction to Music Therapy (2.0 cr)
 MUED 3415 - Choral Conducting and Methods I (4.0 cr)
 MUED 3800 - Introduction to Clinical Music Therapy Practice (4.0 cr)
 MUED 3804 - Applications of Music Therapy I: Music Therapy for Children in Rehabilitative Settings (4.0 cr)
 MUED 3805 - Applications of Music Therapy II: Music Therapy in Long Term Care and Psychiatric Care (4.0 cr)
 MUED 3806 - Preparing for a Music Therapy Career (4.0 cr)
 MUED 5669 - Psychology of Music (3.0 cr)

Electives

Take 2 or more course(s) from the following:

MUED 3502 - String Techniques and Teaching (2.0 cr)
 MUED 3503 - Woodwind Techniques and Teaching (2.0 cr)
 MUED 3504 - Brass Techniques and Teaching (2.0 cr)
 MUED 3505 - Percussion Techniques and Teaching (2.0 cr)

Applied Music

A minimum six semesters is needed to complete the applied music requirement (12 credits). This includes four to six credits of lower division major lessons (13xx) and 4 to 6 credits of secondary lessons (14xx).

Take 12 or more credit(s) from the following:

MUSA 1xxx

Ensembles

A minimum of six semesters (1 credit each) selected in consultation with an adviser. Some options are listed below.

Take 6 or more credit(s) from the following:

- MUS 3410 - University Wind Bands (1.0 cr)
- MUS 3420 - Orchestra (1.0 cr)
- MUS 3430 - Campus Orchestra (1.0 cr)
- MUS 3480 - Marching Band (1.0 cr)
- MUS 5240 - Chamber Singers (1.0 cr)
- MUS 5250 - Opera Workshop and Ensemble (1.0 cr)
- MUS 5280 - Opera Theatre (2.0 cr)

Special Needs Courses

- EDHD 5003 - Developmental and Individual Differences in Educational Contexts (3.0 cr)
- KIN 3027 - Human Anatomy for Kinesiology Students (3.0 cr)
- PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
- PSY 3604 - Introduction to Abnormal Psychology (3.0 cr)

Internship

A six-month internship is required upon completion of all coursework.

- MUED 3855 - Music Therapy Internship (6.0 cr)

New Media Studies Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

This interdisciplinary minor explores from multiple perspectives how information or content is created and shaped in new and emerging media, as well as the role and impact of those media on human communication. New media refers to the emerging digital technologies that enable information to be produced, stored, transmitted, and displayed in various ways. The minor includes courses from the Colleges of Liberal Arts, Human Ecology, and Agricultural, Food and Environmental Sciences.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements**Required Courses****Minor Courses**

At least one course must be 4xxx or above. No more than eight credits of elective courses (courses without the JOUR designator) may be earned from a single department. Other electives may be chosen with adviser permission.

Take 15 or more credit(s).

Take 2 or more course(s) totaling 6 or more credit(s) from the following:

- JOUR 3551 - Economics of New Media (3.0 cr)
- JOUR 3552 - Internet and Global Society, IP (3.0 cr)
- JOUR 4551 - New Media Culture (3.0 cr)
- JOUR 5552 - Law of Internet Communications (3.0 cr)

Take 2 or more course(s) totaling 6 or more credit(s) from the following:

- DHA 5399W - Theory of Electronic Design, WI (3.0 cr)
- GEOG 3561 - Principles of Geographic Information Science (4.0 cr)
- HSCI 3331 - Technology and American Culture, HP (3.0 cr)
- HSCI 4321 - History of Computing (3.0 cr)
- MUS 5591 - Electronic Music: History, Literature, Principles (3.0 cr)

- MUS 5592 - Digital Music Synthesis and Processing Techniques (3.0 cr)
- RHET 3371 - Technology, Self, and Society, C/PE, HP (3.0 cr)
- RHET 3577W - Rhetoric, Technology, and the Internet, C/PE, WI (3.0 cr)
- SCMC 3001 - History of Cinema and Media Culture (4.0 cr)

Philosophy B.A.

Philosophy

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 30.

Degree: Bachelor of Arts.

Philosophy examines and analyzes the presuppositions of our thought in both ordinary life and in the arts and sciences. Fields within philosophy are moral and political philosophy, history of philosophy, logic (including philosophy of mathematics), philosophy of language, philosophy of religion, philosophy of science (including philosophy of physics, of biology, and of the social sciences), metaphysics, epistemology, and aesthetics.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses**Area Requirements****History Area Requirements**

- PHIL 3001W - General History of Western Philosophy: Ancient Period, OH, WI (4.0 cr)
- or PHIL 3005W - General History of Western Philosophy: Modern Period, OH, WI (4.0 cr)

Logic Area Requirements

- PHIL 1001 - Introduction to Logic, MATH (4.0 cr)
- or PHIL 5201 - Symbolic Logic I (4.0 cr)

Epistemology Area Requirements

- PHIL 3601W - Scientific Thought, OH, WI (4.0 cr)
- or PHIL 4105W - Epistemology, WI (3.0 cr)

Theoretical Ethics Area Requirements

- PHIL 3311W - Introduction to Ethical Theory, WI (4.0 cr)
- or PHIL 4310W - History of Moral Theories, WI (3.0 cr)
- or PHIL 4320W - Intensive Study of an Historical Moral Theory, WI (3.0 cr)
- or PHIL 4321W - Theories of Justice, WI (3.0 cr)

High-Level Course Requirement

At least 8 credits of the 30 required for the major must be in 4xxx courses higher

Electives

It is strongly recommended that one of these be a second course in the history of philosophy.

Senior Project

A senior project is required and is typically a paper of about 15 pages in length.

PHIL 3910W - Major Seminar, WI (3.0 cr)
 or PHIL 3993 - Directed Studies (1.0-3.0 cr)
 or PHIL 4993 - Directed Studies (1.0-3.0 cr)

Program Sub-plans

A sub-plan is not required for this program.

Ethics and Civic Life

The Department of Philosophy's optional concentration in ethics and civic life is an opportunity for students who are interested in ethics and community service to relate their experiences in the classroom to their work in the community, and vice versa. Students who complete the concentration will receive acknowledgement on their transcripts.

Required Courses

Core Courses

Take 3 or more course(s) from the following:

PHIL 1004W - Introduction to Political Philosophy, C/PE, OH, WI (4.0 cr)
 PHIL 1006W - Philosophy and Cultural Diversity, CD, OH, WI (4.0 cr)
 PHIL 1303 - Business Ethics, C/PE, IP, (4.0 cr)
 PHIL 3234 - Knowledge and Society, CD (4.0 cr)
 PHIL 3301 - Environmental Ethics, C/PE, ENVT (4.0 cr)
 PHIL 3302W - Moral Problems of Contemporary Society, C/PE, OH, WI (4.0 cr)
 PHIL 3304 - Law and Morality, C/PE (4.0 cr)
 PHIL 3305 - Medical Ethics (4.0 cr)
 PHIL 3307 - Social Justice and Community Service, C/PE, CD (4.0 cr)
 PHIL 3308 - Social Justice and Community Service, C/PE, CD (4.0 cr)
 PHIL 3602 - Science, Technology, and Society, C/PE (3.0 cr)
 PHIL 4324 - Ethics and Education, (3.0 cr)
 PHIL 4325 - Education and Social Change, C/PE, CD (4.0 cr)
 PHIL 4326 - Lives Worth Living: Questions of Self, Vocation, and Community, C/PE, OH (4.0 cr)
 PHIL 4414 - Political Philosophy, (3.0 cr)
 PHIL 4622 - Philosophy and Feminist Theory (3.0 cr)

Community Service

The community service component may be completed by taking a practicum course in philosophy (for example, PHIL 1007 in conjunction with 1004W); a community service component of one of the above courses; or a directed study in philosophy with a community service component.

Philosophy Minor

Philosophy

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

See the major description for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

The minor consists of 14 semester credits of PHIL courses at 3xxx or above. All courses must have grades of at least C-. At least 8 credits must be taken at the University of Minnesota, Twin Cities campus.

Physics B.A.

School of Physics and Astronomy

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 37.

Degree: Bachelor of Arts.

The undergraduate physics program prepares students for employment, often in industrial or governmental laboratories, or for further study at graduate or professional schools in physics, engineering, biophysics, medicine, education, law, or business.

The program integrates a broad foundation in physics that can be flexibly combined with coursework in other technical disciplines or used to specialize in physics. Students should consult a physics adviser to help formulate objectives for undergraduate study.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Mathematics

Complete four courses from either the calculus or honors calculus sequence.

Calculus Sequence

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1372 - IT Calculus II (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
 MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)
 or MATH 2263 - Multivariable Calculus (4.0 cr)
 or

Honors Sequence

MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
 MATH 1572H - Honors Calculus II, H (4.0 cr)
 MATH 2573H - Honors Calculus III, H (4.0 cr)
 MATH 2574H - Honors Calculus IV, H (4.0 cr)

Major Courses

PHYS 2601 - Quantum Physics (4.0 cr)
 PHYS 2605 - Quantum Physics Laboratory (3.0 cr)
 PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 2403H - Honors Phys III, H (4.0 cr)
 or PHYS 2503 - Physics III: Foundations of Modern Physics (4.0 cr)

Electives

Take 18 or more credit(s) from the following:
 PHYS 4xxx

Take 2 or more course(s) from the following:
 PHYS 4001 - Analytical Mechanics (4.0 cr)

PHYS 4002 - Electricity and Magnetism (4.0 cr)
 PHYS 4101 - Quantum Mechanics (4.0 cr)
 PHYS 4201 - Statistical and Thermal Physics (3.0 cr)

Senior Project

The senior project can be satisfied by completion of PHYS 4051 and 4052W; 5 credits may be counted towards the 18-credit elective requirement. Other ways of satisfying the physics project requirement must be approved by the physics department.

PHYS 4051 - Methods of Experimental Physics I (5.0 cr)
 PHYS 4052W - Methods of Experimental Physics II, WI (5.0 cr)

Physics Minor

School of Physics and Astronomy

Requirements for this program are current for Fall 2006.

Required credits in this minor: 34.

See the major description for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

The minor in physics requires 22 credits in physics and 12 credits in math. Physics minors must take all required physics and mathematics courses A-F and must earn a grade of C- or better in all physics, mathematics, and technical elective courses (except those offered S-N only).

Required Courses

Mathematics

MATH 1371 - IT Calculus I, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)
 or MATH 1471H - Honors Calculus I for Secondary Students, MATH, H (5.0 cr)
 MATH 1372 - IT Calculus II (4.0 cr)
 or MATH 1272 - Calculus II (4.0 cr)
 or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)
 or MATH 1472H - Honors Calculus II for Secondary Students, H (5.0 cr)
 MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
 or MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 or

Honors Sequence

MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
 MATH 1572H - Honors Calculus II, H (4.0 cr)
 MATH 2573H - Honors Calculus III, H (4.0 cr)

Physics

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 2503 - Physics III: Foundations of Modern Physics (4.0 cr)
 or PHYS 2403H - Honors Phys III, H (4.0 cr)
 PHYS 2601 - Quantum Physics (4.0 cr)
 PHYS 2605 - Quantum Physics Laboratory (3.0 cr)

Take 3 or more credit(s) from the following:

PHYS 3xxx
 PHYS 4xxx
 PHYS 5xxx

Take 3 or more credit(s) from the following:

AST 3xxx
 AST 4xxx
 AST 5xxx

Physiology B.A.

Physiology

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 27.

Degree: Bachelor of Arts.

The physiology major concentrates on understanding the functions of the human body from individual cells to organ systems. The program is based upon principles from a variety of physical and biological sciences.

This major is particularly appropriate for students who intend to enter medical school or graduate study in any of a variety of biological, health, or biomedical sciences. The required courses form a strong core in biomedical science. Many of the required courses are identical to those required for admission to medical school. Students may tailor the overall degree program to specific needs and may choose additional science courses in preparation for medical school, other health sciences professional schools, or graduate school. Students may also take advantage of the freedom to pursue a more diverse undergraduate experience in CLA. Others may benefit from an opportunity to pursue a double major.

Admission Requirements

Students must complete 6 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Coursework

These courses are prerequisites for future physiology coursework.

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1281 - Calculus with Biological Emphasis I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1282 - Calculus With Biological Emphasis II (4.0 cr)
 CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

Take one of the following course pairs:

PHYS 1201W - Introductory Physics for Biology and Pre-medicine I, PHYS SCI/L, WI (5.0 cr)
 PHYS 1202W - Introductory Physics for Biology and Pre-medicine II, PHYS SCI/L, WI (5.0 cr)

or

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses**Major Core Curriculum**

BIOL 4003 - Genetics (3.0 cr)
 BIOL 4004 - Cell Biology (3.0 cr)
 CHEM 2301 - Organic Chemistry I (3.0 cr)
 CHEM 2302 - Organic Chemistry II (3.0 cr)
 CHEM 2311 - Organic Lab (4.0 cr)
 PHSL 3061 - Principles of Physiology (4.0 cr)
 PHSL 3062W - Research Paper for Physiology Majors, WI (1.0 cr)
 PHSL 3701 - Physiology Laboratory (2.0 cr)
 BIOC 3021 - Biochemistry (3.0 cr)
 or BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)

A MATH 22xx course may satisfy this requirement.

Take 2 or more course(s) from the following:

MICB 3301 - Biology of Microorganisms (5.0 cr)
 CHEM 4311W - Advanced Organic Chemistry Lab, WI (2.0 cr)
 GCD 4111 - Histology: Cell and Tissue Organization (4.0 cr)
 GCD 4161 - Developmental Biology (3.0 cr)
 GCD 4034 - Molecular Genetics (3.0 cr)
 GCD 5036 - Molecular Cell Biology (3.0 cr)
 GCD 4025 - Cell Biology Laboratory (2.0 cr)
 MICB 4131 - Immunology (3.0 cr)
 BIOC 4xxx
 CHEM 4xxx
 CSCI 3xxx
 CSCI 4xxx

Political Science B.A.**Political Science**

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 32.

Degree: Bachelor of Arts.

Political scientists study topics such as the exercise of power and influence; sources and resolution of conflicts; the relation of politics to the economy, culture, and other aspects of society; the adoption and implementation of public policies; and the development of political systems. These topics are studied at all levels, from local communities to the global community.

The scope of the discipline is reflected in the main areas of specialization that make up the undergraduate curriculum: political theory, comparative government and politics, international relations, and American governmental systems and processes. In addition, undergraduates may choose from several optional concentrations: business and politics; campaigns and elections; citizenship and civic action; global politics; law and politics; democratization and development; political psychology, beliefs, and behavior; and public affairs.

Admission Requirements

It is strongly recommended that students complete one 1xxx course prior to admission to the major. See "Preparatory Courses" under program requirements for suggested courses.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Students may choose to do an optional concentration to count toward the 24 upper division credits. If not, remaining courses not taken from the list for major courses below may be used to satisfy the upper division requirement. In addition, POL 3070, POL 3080, POL 3085 and POL 4970, POL 3085H may be used to meet the 24 credit requirement.

Required Courses**Preparatory Courses**

Only 8 credits of 1xxx will apply toward the 32 credits required for the major.

POL 1001 - American Democracy in a Changing World, C/PE, SSCI (4.0 cr)
 or POL 1001H - Honors Course: American Democracy in a Changing World, C/PE, SSCI, H (4.0 cr)

or POL 1015 - Mass Politics in a Media Age, C/PE (3.0 cr)

or POL 1019 - Indigenous Peoples: A Global Perspective, IP, SSCI (3.0 cr)

or POL 1025 - Global Politics, IP, SSCI (4.0 cr)

or POL 1026 - We and They: U.S. Foreign Policy, IP (4.0 cr)

or POL 1054 - Repression and Democracy Around the World, IP, SSCI (4.0 cr)

or POL 1054H - Honors

or POL 1065 - Government and Medicine, C/PE, SSCI (3.0 cr)

or POL 1201 - Political Ideas and Ideologies, C/PE, SSCI (4.0 cr)

or freshman seminar in political science

Major Courses

Take 1 or more course(s) from 3 of the 4 following subfields:

Political Theory

Take 0 or more course(s) from the following:

POL 3210 - Practicum, C/PE (1.0-3.0 cr)

POL 3225 - American Political Thought, C/PE (3.0 cr)

POL 3235W - Democracy and Citizenship, C/PE, WI (3.0-4.0 cr)

POL 3251 - Greeks, Romans, and Christians: Ancient and Medieval Political Thought, C/PE (3.0-4.0 cr)

POL 3252 - Renaissance, Reformation, and Revolution: Early Modern Political Thought, C/PE (3.0-4.0 cr)

POL 4210 - Topics in Political Theory (3.0-4.0 cr)

POL 4225 - Politics & Education, CPE, (3.0, 4.0 cr)

POL 4253 - Modernity and Its Discontents: Late Modern Political Thought, C/PE (3.0-4.0 cr)

POL 4275 - Contemporary Political Thought (3.0 cr)

Comparative Government

Take 0 or more course(s) from the following:

POL 3441 - Politics of Environmental Protection, ENVT (3.0 cr)

POL 3451W - Politics and Society in the New Europe, WI (3.0 cr)

POL 3477 - Political Development, SSCI (3.0-4.0 cr)

POL 3491 - Film and Latin American Politics (3.0 cr)

POL 4410 - Topics in Comparative Politics, IP (3.0 cr)

POL 4461W - European Government and Politics, WI (4.0 cr)

POL 4473 - Chinese Politics, IP (3.0 cr)

POL 4477 - Struggles and Issues in the Middle East, IP (4.0 cr)

POL 4478 - Contemporary Politics in Africa and the Colonial Legacy, IP (4.0 cr)

POL 4479 - Latin American Politics (3.0 cr)

POL 4481 - Governments and Markets (3.0-4.0 cr)

POL 4485 - Human Rights and Democracy in the World (3.0 cr)

POL 4487 - The Struggle for Democratization and Citizenship, C/PE (4.0 cr)

POL 4489W

International Relations

Take 0 or more course(s) from the following:

POL 3835 - International Relations, IP, SSCI (3.0 cr)

POL 3872W - Global Environmental Cooperation, ENVT, IP, WI (4.0 cr)

POL 3873W - Global Citizenship and International Ethics, C/PE, IP, WI (3.0 cr)

POL 4810 - Topics in International Politics and Foreign Policy (3.0-4.0 cr)

POL 4833 - The U.S. in the Global Economy (3.0-4.0 cr)

POL 4881 - International Law, IP (3.0 cr)

POL 4883 - Global Governance, IP (3.0 cr)

POL 4885 - International Conflict and Security, IP (3.0-4.0 cr)

POL 4887 - Thinking Strategically in International Politics, SSCI (3.0 cr)
 POL 4889 - Governments and Global Trade and Money (3.0-4.0 cr)

American Government

Take 0 or more course(s) from the following:

POL 3319 - Education and the American Dream, C/PE, SSCI (3.0 cr)
 POL 3321 - Issues in American Public Policy, C/PE (3.0 cr)
 POL 3323 - Political Tolerance in the United States, C/PE, CD (3.0-4.0 cr)
 POL 3701 - American Indian Tribal Government and Politics (3.0 cr)
 POL 3739 - Politics of Race, Class, and Ethnicity, CD, IP (3.0 cr)
 POL 3766 - Political Psychology of Mass Behavior, C/PE (3.0 cr)
 POL 3767 - Political Psychology of Elite Behavior (3.0 cr)
 POL 3785 - Persuasion and Political Propaganda (3.0 cr)
 POL 4303 - American Democracy in Crisis, C/PE (3.0 cr)
 POL 4306 - Presidential Leadership and American Democracy (3.0-4.0 cr)
 POL 4308 - Congressional Politics and Institutions (3.0-4.0 cr)
 POL 4309 - Justice in America (3.0 cr)
 POL 4310 - Topics in American Politics (3.0 cr)
 POL 4315W - State Governments: Laboratories of Democracy, WI (4.0 cr)
 POL 4322 - Rethinking the Welfare State, C/PE (3.0-4.0 cr)
 POL 4331 - Thinking Strategically in Domestic Politics, C/PE (3.0-4.0 cr)
 POL 4501 - The Supreme Court and Constitutional Interpretation, C/PE (3.0 cr)
 POL 4502 - The Supreme Court, Civil Liberties, and Civil Rights, C/PE (3.0 cr)
 POL 4525W - Federal Indian Policy (3.0 cr)
 POL 4737 - American Political Parties, C/PE (3.0-4.0 cr)
 POL 4766 - American Political Culture and Values, C/PE (3.0-4.0 cr)
 POL 4767 - Public Opinion and Voting Behavior (3.0 cr)
 POL 4771 - Racial Attitudes and Intergroup Conflict (3.0 cr)

Senior Project

POL 4900W - Senior Paper, WI (1.0 cr)
 or POL 4900V - Honors: Senior Paper, H (1.0 cr)
 or POL 3110H - Honors Thesis Credits, H (1.0-4.0 cr)

Program Sub-plans

A sub-plan is not required for this program.

Business and Politics

Required Courses

Take 4 or more course(s) from the following:

POL 3085 - Quantitative Analysis in Political Science, MATH (4.0 cr)
 POL 4308 - Congressional Politics and Institutions (3.0-4.0 cr)
 POL 4315W - State Governments: Laboratories of Democracy, WI (4.0 cr)
 POL 4331 - Thinking Strategically in Domestic Politics, C/PE (3.0-4.0 cr)
 POL 4481 - Governments and Markets (3.0-4.0 cr)
 POL 4889 - Governments and Global Trade and Money (3.0-4.0 cr)

Campaigns and Elections

Required Courses

Take 4 or more course(s) from the following:

POL 3085 - Quantitative Analysis in Political Science, MATH (4.0 cr)
 POL 3225 - American Political Thought, C/PE (3.0 cr)
 POL 3766 - Political Psychology of Mass Behavior, C/PE (3.0 cr)
 POL 4306 - Presidential Leadership and American Democracy (3.0-4.0 cr)
 POL 4308 - Congressional Politics and Institutions (3.0-4.0 cr)
 POL 4331 - Thinking Strategically in Domestic Politics, C/PE (3.0-4.0 cr)
 POL 4461W - European Government and Politics, WI (4.0 cr)
 POL 4737 - American Political Parties, C/PE (3.0-4.0 cr)
 POL 4767 - Public Opinion and Voting Behavior (3.0 cr)

Citizenship and Civic Action

Required Courses

Take 4 or more course(s) from the following:

POL 3210 - Practicum, C/PE (1.0-3.0 cr)
 POL 3225 - American Political Thought, C/PE (3.0 cr)
 POL 3235W - Democracy and Citizenship, C/PE, WI (3.0-4.0 cr)
 POL 3251 - Greeks, Romans, and Christians: Ancient and Medieval Political Thought, C/PE (3.0-4.0 cr)
 POL 3252 - Renaissance, Reformation, and Revolution: Early Modern Political Thought, C/PE (3.0-4.0 cr)
 POL 3319 - Education and the American Dream (3.0 cr)
 POL 3323 - Political Tolerance in the United States, C/PE, CD (3.0-4.0 cr)
 POL 3739 - Politics of Race, Class, and Ethnicity, CD, IP (3.0 cr)
 POL 3873W - Global Citizenship and International Ethics, C/PE, IP, WI (3.0 cr)
 POL 4253 - Modernity and Its Discontents: Late Modern Political Thought, C/PE (3.0-4.0 cr)
 POL 4275 - Contemporary Political Thought (3.0 cr)
 POL 4303 - American Democracy in Crisis, C/PE (3.0 cr)
 POL 4322 - Rethinking the Welfare State, C/PE (3.0-4.0 cr)
 POL 4485 - Human Rights and Democracy in the World (3.0 cr)
 POL 4487 - The Struggle for Democratization and Citizenship, C/PE (4.0 cr)
 POL 4502 - The Supreme Court, Civil Liberties, and Civil Rights, C/PE (3.0 cr)
 POL 4766 - American Political Culture and Values, C/PE (3.0-4.0 cr)

Democratization and Development

Required Courses

Take 4 or more course(s) from the following:

POL 3210 - Practicum, C/PE (1.0-3.0 cr)
 POL 3235W - Democracy and Citizenship, C/PE, WI (3.0-4.0 cr)
 POL 3323 - Political Tolerance in the United States, C/PE, CD (3.0-4.0 cr)
 POL 3441 - Politics of Environmental Protection, ENVT (3.0 cr)
 POL 3477 - Political Development, SSCI (3.0-4.0 cr)
 POL 3739 - Politics of Race, Class, and Ethnicity, CD, IP (3.0 cr)
 POL 4210 - Topics in Political Theory (3.0-4.0 cr)
 POL 4225 - Politics and Education (3.0-4.0 cr)
 POL 4253 - Modernity and Its Discontents: Late Modern Political Thought, C/PE (3.0-4.0 cr)
 POL 4275 - Contemporary Political Thought (3.0 cr)
 POL 4303 - American Democracy in Crisis, C/PE (3.0 cr)
 POL 4322 - Rethinking the Welfare State, C/PE (3.0-4.0 cr)
 POL 4473 - Chinese Politics (3.0 cr)
 POL 4477 - Struggles and Issues in the Middle East, IP (4.0 cr)
 POL 4478 - Contemporary Politics in Africa and the Colonial Legacy, IP (4.0 cr)
 POL 4479 - Latin American Politics (3.0 cr)
 POL 4487 - The Struggle for Democratization and Citizenship, C/PE (4.0 cr)
 POL 4561 - Comparative Legal Systems, IP (3.0 cr)
 POL 4766 - American Political Culture and Values, C/PE (3.0-4.0 cr)
 POL 4885 - International Conflict and Security, IP (3.0-4.0 cr)
 POL 4889 - Governments and Global Trade and Money (3.0-4.0 cr)
 POL 5253 - Modernity and its Discontents: Late Modern Political Thought (4.0 cr)

Global Politics

Required Courses

Take 4 or more course(s) from the following:

POL 3235W - Democracy and Citizenship, C/PE, WI (3.0-4.0 cr)
 POL 3441 - Politics of Environmental Protection, ENVT (3.0 cr)
 POL 3451W - Politics and Society in the New Europe, WI (3.0 cr)
 POL 3477 - Political Development, SSCI (3.0-4.0 cr)
 POL 3835 - International Relations, IP, SSCI (3.0 cr)
 POL 3872W - Global Environmental Cooperation, ENVT, IP, WI (4.0 cr)
 POL 3873W - Global Citizenship and International Ethics, C/PE, IP, WI (3.0 cr)
 POL 4461W - European Government and Politics, WI (4.0 cr)

POL 4473 - Chinese Politics, IP (3.0 cr)
 POL 4477 - Struggles and Issues in the Middle East, IP (4.0 cr)
 POL 4478 - Contemporary Politics in Africa and the Colonial Legacy, IP (4.0 cr)
 POL 4479 - Latin American Politics (3.0 cr)
 POL 4485 - Human Rights and Democracy in the World (3.0 cr)
 POL 4833 - The U.S. in the Global Economy (3.0-4.0 cr)
 POL 4881 - International Law, IP (3.0 cr)
 POL 4883 - Global Governance, IP (3.0 cr)
 POL 4885 - International Conflict and Security, IP (3.0-4.0 cr)
 POL 4889 - Governments and Global Trade and Money (3.0-4.0 cr)

Law and Politics

Required Courses

Take 4 or more course(s) from the following:

POL 3225 - American Political Thought, C/PE (3.0 cr)
 POL 3252 - Renaissance, Reformation, and Revolution: Early Modern Political Thought, C/PE (3.0-4.0 cr)
 POL 3323 - Political Tolerance in the United States, C/PE, CD (3.0-4.0 cr)
 POL 3872W - Global Environmental Cooperation, ENVT, IP, WI (4.0 cr)
 POL 4253 - Modernity and Its Discontents: Late Modern Political Thought, C/PE (3.0-4.0 cr)
 POL 4275 - Contemporary Political Thought (3.0 cr)
 POL 4309 - Justice in America (3.0 cr)
 POL 4501 - The Supreme Court and Constitutional Interpretation, C/PE (3.0 cr)
 POL 4502 - The Supreme Court, Civil Liberties, and Civil Rights, C/PE (3.0 cr)
 POL 4561 - Comparative Legal Systems, IP (3.0 cr)
 POL 4881 - International Law, IP (3.0 cr)
 POL 4883 - Global Governance, IP (3.0 cr)

Political Psychology, Beliefs, and Behavior

Required Courses

Take 4 or more course(s) from the following:

POL 3085 - Quantitative Analysis in Political Science, MATH (4.0 cr)
 POL 3323 - Political Tolerance in the United States, C/PE, CD (3.0-4.0 cr)
 POL 3739 - Politics of Race, Class, and Ethnicity, CD, IP (3.0 cr)
 POL 3766 - Political Psychology of Mass Behavior, C/PE (3.0 cr)
 POL 3767 - Political Psychology of Elite Behavior

 POL 4327 - The Politics of American Cities and Suburbs (3.0 cr)

POL 4481 - Governments and Markets (3.0-4.0 cr)
 POL 4501 - The Supreme Court and Constitutional Interpretation, C/PE (3.0 cr)
 POL 4833 - The U.S. in the Global Economy (3.0-4.0 cr)
 POL 4881 - International Law, IP (3.0 cr)

Political Science Minor

Political Science

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

See the major description for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Complete at least four courses, totaling at least 16 credits. Students must take at least one course in two out of four subfields: political theory, comparative government, American government, and international relations. POL 3070 and 4970 cannot count toward minor requirements.

Political science minors who major in global studies must complete at least two upper division courses outside of the comparative government and global studies subfields. International relations majors must take at least two upper division courses from political theory or American government.

Required Courses

Minor Courses

Take 0 - 8 credit(s) from the following:

POL 1001 - American Democracy in a Changing World, C/PE, SSCI (4.0 cr)
 POL 1015 - Mass Politics in a Media Age, C/PE (3.0 cr)
 POL 1019 Indigenous Peoples: A Global Perspective (3.0 cr)
 POL 1025 - Global Politics, IP, SSCI (4.0 cr)
 POL 1026 - We and They: U.S. Foreign Policy, IP (4.0 cr)
 POL 1054 - Repression and Democracy Around the World, IP, SSCI (4.0 cr)
 POL 1065 - Government and Medicine, C/PE, SSCI (3.0 cr)
 POL 1201 - Political Ideas and Ideologies, C/PE, SSCI (4.0 cr)
 or Freshman Seminar in Political Science

Take 12 - 16 credit(s) from the following:

POL 3xxx
 POL 4xxx

Psychology B.A.

Psychology

Requirements for this program are current for Summer 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 36.

Degree: Bachelor of Arts.

Psychology examines human behavior through environmental, genetic, physiological, and social determinants and correlates. The department strives to train students with a strong general background in psychology and an ability to think clearly and critically in a wide variety of settings. Students must fulfill distribution requirements in a variety of psychological topics.

Faculty and students work with related University units, including the Institute of Child Development, the Department of Computer Science and Engineering, the Carlson School of Management, the Departments of Psychiatry and Educational Psychology, the Department of Neuroscience, and affiliated research units within the department, such as the Center for Cognitive Sciences, the Center for Interest Measurement Research, and the Minnesota Center for Twin and Family Research. While a B.A. in psychology has proved to be a valuable and useful background for a wide variety of careers, a professional career as a psychologist requires further training.

Students completing the degree program in psychology may not receive a second degree or a second major in child psychology.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Transfer students must complete a minimum of 16 upper division credits in the psychology department at the University of Minnesota to be awarded a major in psychology.

Required Courses

Preparatory Courses

- PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
- PSY 2801 - Introduction to Psychological Measurement and Data Analysis (3.0 cr)
- PSY 3001W - Research Methods (3.0 cr)

Major Courses

Cognitive and Biological Psychology

Take 2 or more course(s) from the following:

- PSY 3011 - Introduction to Learning and Behavior (3.0 cr)
- PSY 3031 - Introduction to Sensation and Perception (3.0 cr)
- PSY 3051 - Introduction to Cognitive Psychology, SSCI (3.0 cr)
- PSY 4011 - Applied Behavioral Psychology (3.0 cr)
- PSY 4036 - Perceptual Issues in Visual Impairment (3.0 cr)
- PSY 5012 - Learning and Cognition in Animals (4.0 cr)
- PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
- PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
- PSY 5031W - Perception, WI (3.0 cr)
- PSY 5034 - Psychobiology of Vision (3.0 cr)
- PSY 5036W - Computational Vision, WI (3.0 cr)
- PSY 5037 - Psychology of Hearing (3.0 cr)
- PSY 5038W - Introduction to Neural Networks, WI (3.0 cr)
- PSY 5051W - Psychology of Human-Machine Interaction, WI (3.0 cr)
- PSY 5054 - Psychology of Language (3.0 cr)
- PSY 5062 - Cognitive Neuropsychology (3.0 cr)
- PSY 5064 - Brain and Emotion (3.0 cr)
- PSY 3061 - Introduction to Biological Psychology (3.0 cr)
- or PSY 5061 - Neurobiology of Behavior (3.0 cr)

Clinical, Personality, and Social Psychology

Take 2 or more course(s) from the following:

- PSY 3201 - Introduction to Social Psychology (4.0 cr)
- PSY 3301 - Introduction to Cultural Psychology, SSCI (3.0 cr)
- PSY 3617 - Introduction to Clinical Psychology (3.0 cr)
- PSY 3666 - Human Sexuality (3.0 cr)
- PSY 5202 - Attitudes and Social Behavior (3.0 cr)
- PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
- PSY 5205 - Applied Social Psychology (3.0 cr)

- PSY 5206 - Social Psychology and Health Behavior (3.0 cr)
- PSY 5207 - Personality and Social Behavior (3.0 cr)
- PSY 5606 - Clinical Psychophysiology (3.0 cr)
- CPSY 3301 - Introductory Child Psychology for Social Sciences (4.0 cr)
- CPSY 4303 - Adolescent Psychology (4.0 cr)
- PSY 3101 - Introduction to Personality (3.0 cr)
- or PSY 5101 - Personality Psychology (3.0 cr)
- PSY 3604 - Introduction to Abnormal Psychology (3.0 cr)
- or PSY 5604H - Abnormal Psychology, H (3.0 cr)

Individual Differences, Quantitative, and Applied Psychology

Take 1 or more course(s) from the following:

- PSY 3511 - Introduction to Counseling Psychology (3.0 cr)
- PSY 3711 - Introduction to Industrial and Organizational Psychology (3.0 cr)
- PSY 4133 - Psychological Testing and Assessment (3.0 cr)
- PSY 4501 - Psychology of Women (3.0 cr)
- PSY 4801 - Introduction to Statistics (4.0 cr)
- PSY 5137 - Introduction to Behavioral Genetics (3.0 cr)
- PSY 5138 - Psychology of Aging (3.0 cr)
- PSY 5501 - Vocational and Occupational Health Psychology (3.0 cr)
- PSY 5707 - Personnel Psychology (4.0 cr)
- PSY 5708 - Organizational Psychology (4.0 cr)
- PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
- PSY 5865 - Advanced Psychological and Educational Measurement (4.0 cr)
- PSY 3135 - Introduction to Individual Differences (3.0 cr)
- or PSY 5135 - Psychology of Individual Differences (3.0 cr)

Electives

Electives from 3xxx, 4xxx or 5xxx level psychology course not used to fulfill distribution requirements listed above.

Take 4 - 8 credit(s) from the following:

- PSY 3xxx
- PSY 4xxx
- PSY 5xxx

Take no more than 6 credit(s) from the following:

- PSY 3960 - Undergraduate Seminar (1.0-5.0 cr)
- PSY 3993 - Directed Study (1.0-6.0 cr)
- PSY 3996 - Undergraduate Fieldwork and Internship in Psychology (1.0-6.0 cr)
- PSY 4993 - Directed Research: Special Areas of Psychology and Related Sciences (1.0-6.0 cr)
- PSY 4960 - Seminar in Psychology (1.0-4.0 cr)
- PSY 5960 - Topics in Psychology (1.0-4.0 cr)

Senior Project

- PSY 3902W - Major Project in Psychology, WI (4.0 cr)

Honors Sequence

- PSY 1001 or equivalent
- PSY 2801 - Introduction to Psychological Measurement & Data Analysis (3.0 cr)
- PSY 3001W/PSY 3001V - Research Methods (3.0 cr)
- PSY 4994V - Honors Research Practicum
- PSY 4902V - Honors Thesis Project (3.0-6.0 cr)

Psychology Minor

Psychology

Requirements for this program are current for Summer 2006.

Required credits in this minor: 19.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

No courses without a PSY designator can be used to fulfill minor requirements without departmental approval. Transfer students must complete a minimum of 10 upper division credits in the psychology department at the University of Minnesota in order to be awarded a minor in psychology.

Required Courses

Preparatory Courses

PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
 PSY 2801 - Introduction to Psychological Measurement & Data Analysis (3.0 cr)
 PSY 3001W - Research Methods (3.0 cr)

Required Courses

Preparatory Courses

PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
 PSY 2801 - Introduction to Psychological Measurement & Data Analysis (3.0 cr)
 PSY 3001W - Research Methods (3.0 cr)

Take 9 or more credit(s) from the following:

Cognitive and Biological Curriculum

PSY 3011 - Introduction to Learning and Behavior (3.0 cr)
 PSY 3031 - Introduction to Sensation and Perception (3.0 cr)
 PSY 3051 - Introduction to Cognitive Psychology, SSCI (3.0 cr)
 PSY 5012 - Learning and Cognition in Animals (4.0 cr)
 PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
 PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
 PSY 5031W - Perception, WI (3.0 cr)
 PSY 5034 - Psychobiology of Vision (3.0 cr)
 PSY 5036W - Computational Vision, WI (3.0 cr)
 PSY 5037 - Psychology of Hearing (3.0 cr)
 PSY 5038W - Introduction to Neural Networks, WI (3.0 cr)
 PSY 5051W - Psychology of Human-Machine Interaction, WI (3.0 cr)
 PSY 5054 - Psychology of Language (3.0 cr)
 PSY 5062 - Cognitive Neuropsychology (3.0 cr)
 PSY 5064 - Brain and Emotion (3.0 cr)
 PSY 3061 - Introduction to Biological Psychology (3.0 cr)
 or PSY 5061 - Neurobiology of Behavior (3.0 cr)

Clinical, Personality, and Social Areas

PSY 3201 - Introduction to Social Psychology (4.0 cr)
 PSY 3301 - Introduction to Cultural Psychology, SSCI (3.0 cr)
 PSY 3617 - Introduction to Clinical Psychology (3.0 cr)
 PSY 3666 - Human Sexuality (3.0 cr)
 PSY 5202 - Attitudes and Social Behavior (3.0 cr)

 PSY 5708 - Organizational Psychology (4.0 cr)
 PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)

PSY 5865 - Advanced Psychological and Educational Measurement (4.0 cr)
 PSY 3135 - Introduction to Individual Differences (3.0 cr)
 or PSY 5135 - Psychology of Individual Differences (3.0 cr)

Religious Studies B.A.

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 30.

Degree: Bachelor of Arts.

This program introduces students to the critical study of religions, particularly the religions of antiquity. To ensure direct experience of the central texts of at least one religious tradition there is a strong element of language study. Advanced courses are required in Judaism, classical paganism and Christianity, and ancient philosophy. Concentration on the religious thought and practice of the distant past makes possible a longer perspective on religious issues and a balanced understanding of this important aspect of human behavior.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Language Coursework

Complete one of the five language groups below before enrolling in the major.

Latin

LAT 1001 - Beginning Latin I (5.0 cr)
 LAT 1002 - Beginning Latin II (5.0 cr)
 LAT 3113 - Intermediate Latin Prose (4.0 cr)
 or

Greek

GRK 1001 - Beginning Classical Greek I (5.0 cr)
 GRK 1002 - Beginning Classical Greek II (5.0 cr)
 GRK 3113 - Intermediate Greek Prose (4.0 cr)
 or

Hebrew Option 1

HEBR 1001 - Beginning Hebrew I (5.0 cr)
 HEBR 1002 - Beginning Hebrew II (5.0 cr)
 HEBR 3011 - Intermediate Hebrew I (5.0 cr)
 or

Hebrew Option 2

HEBR 1001 - Beginning Hebrew I (5.0 cr)
 HEBR 1002 - Beginning Hebrew II (5.0 cr)
 or

Sanskrit

SKT 5001 - Beginning Sanskrit (3.0 cr)
 SKT 5002 - Beginning Sanskrit (3.0 cr)
 SKT 5201 - Intermediate Sanskrit (3.0 cr)

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Core Curriculum

CNES 3201 - The Bible: Context and Interpretation, LIT (3.0 cr)
 or CNES 3202 - Prophecy in Ancient Israel, LIT (3.0 cr)

or RELA 3201 - The Bible: Context and Interpretation, LIT (3.0 cr)
 or RELA 3202 - Prophecy in Ancient Israel, LIT (3.0 cr)
 CNES 3072 - The New Testament, HP (3.0 cr)
 or CNES 5072 - The New Testament (3.0 cr)
 or RELA 3072 - The New Testament, HP (3.0 cr)
 or RELA 5072 - The New Testament (3.0 cr)
 CNES 3071 - Greek and Hellenistic Religions, HP (3.0 cr)
 or CNES 3073 - Roman Religion and Early Christianity, HP (3.0 cr)
 or CNES 5071 - Greek and Hellenistic Religions (3.0 cr)
 or CNES 5073 - Roman Religion and Early Christianity (3.0 cr)
 or RELA 3073 - Roman Religion and Early Christianity (3.0 cr)
 or RELA 5071 - Greek and Hellenistic Religions (3.0 cr)
 or RELA 5073 - Roman Religion and Early Christianity (3.0 cr)
Another appropriate philosophy course may be substituted
 PHIL 3001W - General History of Western Philosophy: Ancient Period, OH, WI
 (4.0 cr)

Advanced Language Study

The language requirement for the major is equivalent to two years or four semesters of college study, usually certified by the completion of one of the following courses.

LAT 3300 - Intermediate Latin Poetry (4.0 cr)
 or GRK 3120 - Greek New Testament (3.0 cr)
 or GRK 3300 - Intermediate Greek Poetry (4.0 cr)
 or HEBR 3012 - Intermediate Hebrew II (5.0 cr)
 or HEBR 3102 - Intermediate Biblical Hebrew II (4.0 cr)
 or SKT 5202 - Intermediate Sanskrit (3.0 cr)

Electives

One comparative course on another religious tradition approved by the director of undergraduate studies.

6 credits of electives with the approval of director of undergraduate studies (language courses on religious texts may be included).

Major Project

Students who complete a major project for another CLA major may substitute 4 credits of appropriate coursework at 3xxx or above for the major project in this major.

CNES 3951W - Major Project, WI (4.0 cr)

Religious Studies Minor

Classical and Near Eastern Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

The minor in religious studies allows those in other majors to acquire some of the means needed for the critical study of religion.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Only one directed study course may be used in the minor. Grades of D may not be applied to the minor.

Required Courses

Minor Core

Four or the five required courses must be upper division (3xxx to 5xxx), for a total of at least 14 upper division credits.

Take 5 or more course(s) including 2 or more sub-requirement(s) from the following:

Comparative Study

Take 0 - 3 course(s) from the following:

RELS 1xxx
 RELS 2xxx
 RELS 3xxx
 RELS 4xxx

Methodology and Philosophy

Take 0 - 3 course(s) from the following:

RELS 1xxx
 RELS 2xxx
 RELS 3xxx
 RELS 4xxx

Bible and Religion in Antiquity

Take 0 - 3 course(s) from the following:

RELA 1xxx
 RELA 2xxx
 RELA 3xxx
 RELA 4xxx

Russian B.A.

Institute of Linguistics, ESL, and Slavic Languages and Literatures

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 30.

Degree: Bachelor of Arts.

The Slavic and Central Asian Languages and Literatures unit offers study of the Russian, Polish, and Iranic and Turkic languages of Central Asia as well as literature and culture of the Slavic world and Central Asia.

Admission Requirements

Complete the preparatory Russian courses (RUSS 1101, 1102, 3001, 3002) with a minimum grade of C-, or the equivalent.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of Russian.

Required Courses

Advanced Language Courses

RUSS 3101 - Advanced Russian I (4.0 cr)
 RUSS 3102 - Advanced Russian II (4.0 cr)

Major Courses

RUSS 3421 - Literature: Middle Ages to Dostoevsky in Translation, LIT (3.0 cr)
 RUSS 3422 - Literature: Tolstoy to the Present in Translation, LIT (3.0 cr)
 RUSS 3512 - Russian Art and Culture, OH (3.0 cr)

Electives

Take 12 credits, excluding preparatory courses.

Take 4 or more course(s) from the following:

RUSS 3xxx
 RUSS 4xxx
 RUSS 5xxx

Senior Project

RUSS 3311 - Russian Major Project (3.0 cr)

Russian Minor

Institute of Linguistics, ESL, and Slavic Languages and Literatures

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

See the major description for more information.

Admission Requirements

Students must complete language study equivalent to two semesters (intermediate level) before beginning the minor.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 2 semester(s) of Russian.

Required Courses**Minor Courses**

RUSS 3001 - Intermediate Russian I (5.0 cr)

RUSS 3002 - Intermediate Russian II (5.0 cr)

Take 6 or more credit(s) from the following:

RUSS 3xxx

RUSS 4xxx

RUSS 5xxx

Russian Area Studies Minor

Institute for Global Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

The minor requires one year of Russian language and 15 credits (five courses) related to Russia. Students must complete at least one course in humanities. Additional information may be found at <http://igs.cla.umn.edu>.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 2 semester(s) of Russian.

The minor program must be approved by the global studies adviser.

Required Courses**Minor Courses**

POL 4471 may be substituted for GEOG 3181, HIST 3636 may be substituted for HIST 3637.

GEOG 3181 - Russia and Environs, IP, SSCI (3.0 cr)

HIST 3637 - Modern Russia: From Peter the Great to the Present (3.0 cr)

RUSS 3421 - Literature: Middle Ages to Dostoevsky in Translation, LIT (3.0 cr)

or RUSS 3422 - Literature: Tolstoy to the Present in Translation, LIT (3.0 cr)

Complete one course in the humanities on Russia or Central Asia approved by the global studies adviser.

Complete one course focusing on any aspect of Russia or Central Asia approved by a global studies adviser.

Scandinavian Languages and Finnish B.A.

German, Scandinavian, and Dutch

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 31 to 32.

Degree: Bachelor of Arts.

The program teaches and conducts research in the languages and literature of the Scandinavian countries—Denmark, Finland, Norway, and Sweden—in the context of relevant cultural-historical background. Majors and minors are offered with concentrations in Danish, Finnish, Norwegian, and Swedish.

The department recommends study abroad in one of the countries for at least six months in order to acquire cultural familiarity and language fluency. Students may apply appropriate coursework to the major or minors. The Learning Abroad Center has information on study abroad at www.UMabroad.umn.edu.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

The major consists of a minimum of 31 credits in 3xxx, 4xxx (beyond 4004), and 5xxx courses, with concentration in Danish, Finnish, Norwegian, or Swedish. All courses in the major must be taken A-F and completed with a grade of C- or better. At least two courses must be taken in the Scandinavian program at the University of Minnesota. The major program must be approved by the director of undergraduate studies.

Required Courses**Major Courses**

Required for Danish, Norwegian, or Swedish concentrations

SCAN 3011 - Readings in Scandinavian Languages (4.0 cr)

or

Required for Finnish concentration

FIN 3011 - Advanced Finnish (3.0 cr)

FIN 3012 - Advanced Finnish (3.0 cr)

Required for all

Take 3 or more course(s) from the following:

SCAN 3501W - Scandinavian Culture Past and Present, IP, WI (3.0 cr)

SCAN 3502 - Scandinavian Myths, LIT (3.0 cr)

SCAN 3503 - Scandinavian Folklore, LIT (3.0 cr)

SCAN 3504 - The Immigrant Experience, HP, IP (3.0 cr)

SCAN 3601 - Great Literary Works of Scandinavia, LIT (3.0 cr)

Major Project

The major project is a substantial paper of approximately 20 typed pages. The paper is prepared in the Major Project Seminar with the guidance and supervision of a faculty member.

GSD 3451W - Major Project Seminar, WI (4.0 cr)

or GSD 3451V - Honors major Project Seminar

Danish, Norwegian or Swedish Concentration

Students are required to complete one of the following course groups.

Substantial work in the student's language of concentration must be done in conjunction with two of the Scandinavian literature or culture courses (SCAN designator), as directed by the instructor or by the director of undergraduate studies. One elective may be taken in an appropriate social science course in consultation with the director of undergraduate studies.

Take 5 or more course(s) from the following:

Scan 3xxx
Scan 4xxx
Scan 5xxx

-OR-

Finnish

Substantial work in the student's language of concentration must be done in conjunction with two of the Scandinavian literature or culture courses (SCAN designator), as directed by the instructor or by the director of undergraduate studies. One elective may be taken in an appropriate social science course in consultation with the director of undergraduate studies.

Take 4 or more course(s) from the following:

Fin 3xxx
Fin 5xxx
Scan 3xxx
Scan 4xxx
Scan 5xxx

Danish Minor**German, Scandinavian, and Dutch**

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16

The minor includes study of the spoken language, literature, culture, and civilization.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions web site at <http://admissions.tc.umn.edu>.

Program Requirements

The minor in Danish consists of a minimum of 16 credits in Scan 3xxx-, 4xxx-, and 5xxx-level courses. No more than one course may be directed or independent study. All courses in the minor must be taken on A-F grading and must be completed with a grade of C- or better. At least one course must be taken in the Scandinavian Program of the University of Minnesota. The minor program must be approved by the Director of Undergraduate Studies.

Required Courses**Minor Courses**

Scan 3011, Readings in Scandinavian Languages (4.0. cr)

Take 12 or more credits from the following:

Scan 3xxx
Scan 4xxx
Scan 5xxx

Finnish Minor**German, Scandinavian, and Dutch**

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16

The minor includes study of the spoken language, literature, culture, and civilization.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions web site at <http://admissions.tc.umn.edu>.

Program Requirements

The minor in Finnish consists of a minimum of 15 credits in Scan 3xxx-, 4xxx-, and 5xxx-level courses. No more than one course may be directed or independent study. All courses in the minor must be taken on A-F grading and must be completed with a grade of C- or better. At least one course must be taken in the Scandinavian Program of the University of Minnesota. The minor program must be approved by the Director of Undergraduate Studies.

Required Courses**Minor Courses**

Fin 3011, Advanced Finnish
Fin 3012, Advanced Finnish

Take 9 or more credits from the following:

Fin 3xxx
Fin 5xxx
Scan 3xxx
Scan 4xxx
Scan 5xxx

Norwegian Minor**German, Scandinavian, and Dutch**

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16

The minor includes study of the spoken language, literature, culture, and civilization.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions web site at <http://admissions.tc.umn.edu>.

Program Requirements

The minor in Norwegian consists of a minimum of 16 credits in Scan 3xxx-, 4xxx-, and 5xxx-level courses. No more than one course may be directed or independent study. All courses in the minor must be taken on A-F grading and must be completed with a grade of C- or better. At least one course must be taken in the Scandinavian Program of the University of Minnesota. The minor program must be approved by the Director of Undergraduate Studies.

Required Courses**Minor Courses**

Scan 3011, Readings in Scandinavian Languages

Take 12 or more credits from the following:

Scan 3xxx

Scan 4xxx
Scan 5xxx

Swedish Minor

German, Scandinavian, and Dutch

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16

The minor includes study of the spoken language, literature, culture, and civilization.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions web site at <http://admissions.tc.umn.edu>.

Sociology B.A.

Sociology

Requirements for this program are current for Summer 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 31.

Degree: Bachelor of Arts.

Sociology examines stability and change in social life by addressing the underlying patterns of social relations in formal organizations, in legal institutions, and in the family, economy, and political arena.

Coursework focuses on the criminal justice system and criminal behavior; mental health; families and close relationships; education; urban and rural communities; politics and policy formation; social movements and social change; diverse racial and ethnic groups; and social psychology. Faculty interests in the comparative study of social relations and institutions in various countries add an international emphasis to these areas of study. All sociology courses emphasize the skills of social inquiry necessary for analyzing patterns of social relationships.

For more information, visit the sociology Web site for undergraduates at: www.soc.umn.edu/undergrad/undergrad.htm.

Admission Requirements

Students must complete 1 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Coursework

SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
or SOC 1011V - Honors: Introduction to Sociology, CD, SSCI, WI, H (4.0 cr)

Program Requirements

Students are required to take 4 semester(s) of any second language.

Before beginning the senior project, students must complete all major coursework except one elective course. Students must be on a pre-approved waiting list to register for the senior project and should contact the Department of Sociology at least two semesters in advance of registration.

Required Courses

Required Courses

SOC 3701 - Social Theory (4.0 cr)
SOC 3801W - Sociological Research Methods, WI (4.0 cr)
SOC 3811 - Basic Social Statistics, MATH (4.0 cr)

Take 15 or more credit(s) from the following:

SOC 3xxx
SOC 4xxx
SOC 5xxx

Take 1 or more course(s) from the following:

SOC 4xxx
SOC 5xxx

Final Project

Before beginning the senior project, students must complete all major coursework except one elective course. The elective must be taught by the same faculty member who is guiding the student project. Elective coursework must be chosen from a list available from the department.

SOC 4966W - Major-Project Seminar, WI (4.0 cr)
or SOC 4094W - Directed Research: Senior Project, WI (4.0 cr)
or consult with your faculty adviser.
SOC 4967W - Advanced Senior Project Independent Study, WI (1.0 cr)
SOC 3xxx
or
SOC 4xxx
or
SOC 5xxx

Sociology B.S.

Sociology

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 31.

Degree: Bachelor of Science.

Sociology examines stability and change in social life by addressing the underlying patterns of social relations in formal organizations, in legal institutions, and in the family, economy, and political arena.

Coursework focuses on the criminal justice system and criminal behavior; mental health; families and close relationships; education; urban and rural communities; politics and policy formation; social movements and social change; diverse racial

and ethnic groups; and social psychology. Faculty interests in the comparative study of social relations and institutions in various countries add an international emphasis to these areas of study. All sociology courses emphasize the skills of social inquiry necessary for analyzing patterns of social relationships.

For more information, visit the sociology Web site for undergraduates at: www.soc.umn.edu/undergrad/undergrad.htm.

Admission Requirements

Students must complete 1 courses before admission to the program.

To be considered for the B.S. option, students must submit a written proposal to the undergraduate adviser in the Department of Sociology. Students will be signed up for the B.A. in sociology until the proposal is approved by department faculty.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Coursework

Students are encouraged to complete two semesters of calculus before declaring the major. Calculus is often a prerequisite for some courses in the major.

SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
or SOC 1011V - Honors: Introduction to Sociology, CD, SSCI, WI, H (4.0 cr)

Program Requirements

All major coursework must be completed before beginning the senior project. Students must be on a pre-approved waiting list to register for the senior project and should contact the Department of Sociology at least two semesters in advance of registration.

Required Courses

Required Courses

At least 3 credits of the electives must be at the 4xxx level.

SOC 3701 - Social Theory (4.0 cr)
SOC 3801W - Sociological Research Methods, WI (4.0 cr)
SOC 3811 - Basic Social Statistics, MATH (4.0 cr)

Take 15 or more credit(s) from the following:

SOC 3xxx
SOC 4xxx
SOC 5xxx

Supportive Field

Complete 12-16 credits. Consult with an adviser for other appropriate courses.

Take 2 or more course(s) from the following:

CSCI 4041 - Algorithms and Data Structures (4.0 cr)
ECON 4113 - Introduction to Mathematical Economics (4.0 cr)
ECON 4211 - Principles of Econometrics (4.0 cr)
ECON 4261 - Introduction to Econometrics (4.0 cr)
ECON 4262 - Econometric Analysis (2.0 cr)
MATH 4242 - Applied Linear Algebra (4.0 cr)
MATH 4606 - Advanced Calculus (4.0 cr)
MATH 5248 - Cryptology and Number Theory (4.0 cr)
MATH 5335 - Geometry I (4.0 cr)
MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
MATH 5707 - Graph Theory and Non-enumerative Combinatorics (4.0 cr)
STAT 3021 - Introduction to Probability and Statistics (3.0 cr)
STAT 3022 - Data Analysis (4.0 cr)
STAT 4101 - Theory of Statistics I (4.0 cr)
STAT 4102 - Theory of Statistics II (4.0 cr)
STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)

STAT 5302 - Applied Regression Analysis (4.0 cr)
STAT 5421 - Analysis of Categorical Data (3.0 cr)

Supportive Field

Take no more than two courses from the following.

EPSY 3119 - Learning, Cognition, and Assessment, SSCI (3.0 cr)
or EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
or EPSY 5114 - Psychology of Student Learning (3.0 cr)
or PHIL 3601W - Scientific Thought, OH, WI (4.0 cr)
or PHIL 4611 - Philosophy of the Social Sciences, WI (3.0 cr)
or PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)

Final Project

All major coursework must be completed prior to beginning the senior project. Elective coursework must be taught by the same faculty member who is guiding the students project.

SOC 4966W - Major-Project Seminar, WI (4.0 cr)
or SOC 4094W - Directed Research: Senior Project, WI (4.0 cr)
SOC 4967W - Advanced Senior Project Independent Study, WI (1.0 cr)
SOC 3xxx
or
SOC 4xxx
or
SOC 5xxx

Sociology Minor

Sociology

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18 to 20.

Sociology examines stability and change in social life by addressing the underlying patterns of social relations in formal organizations, in legal institutions, and in the family, economy, and political arena.

Admission Requirements

Students must complete 4 credits before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. (Note: The honors sub-plan does not meet this requirement.) Honors students are required to complete one sub-plan plus the honors sub-plan.

General Sociology

Required Courses

SOC 3701 - Social Theory (4.0 cr)
SOC 3801W - Sociological Research Methods, WI (4.0 cr)
or SOC 3811 - Basic Social Statistics, MATH (4.0 cr)

Take 2 or more course(s) from the following:

SOC 3xxx
SOC 4xxx

Law, Crime, and Deviance

Required Courses

SOC 3101 - Introduction to the American Criminal Justice System, C/PE, SSCI (3.0 cr)

or SOC 3102 - Introduction to Criminal Behavior and Social Control (3.0 cr)

SOC 3701 - Social Theory (4.0 cr)

or SOC 3801W - Sociological Research Methods, WI (4.0 cr)

or SOC 3811 - Basic Social Statistics, MATH (4.0 cr)

Take 3 or more course(s) including 2 or more sub-requirement(s) from the following:

Take 1 or more course(s) from the following:

SOC 3xxx

SOC 41xx

Take 2 or more course(s) from the following:

SOC 4xxx

Sociology of Law, Criminology, and Deviance B.A.

Sociology

Requirements for this program are current for Summer 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 31.

Degree: Bachelor of Arts.

Sociology examines stability and change in social life by addressing the underlying patterns of social relations in formal organizations, in legal institutions, and in the family, economy, and political arena.

Coursework focuses on the criminal justice system and criminal behavior; mental health; families and close relationships; education; urban and rural communities; politics and policy formation; social movements and social change; diverse racial and ethnic groups; and social psychology. Sociology of Law, Criminology, and Deviance Minor

Sociology

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

Sociologists study human social behavior. More specifically, sociology examines how we group ourselves (families, social groups, formal organizations, societies); how we behave in groups (collective action, social change, crime and delinquency); and how characteristics like age, race, social class, and gender affect our relationships with each other and with organizations and institutions.

Admission Requirements

Students must complete 4 credits before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)
or SOC 1011V - Honors: Introduction to Sociology, CD, SSCI, WI, H (4.0 cr)
or equivalent Transfer Course

Program Requirements

One elective may be taken S-N. The remaining credits must earn a grade of at least C- in each course.

Transfer students must meet the requirements either through approved coursework completed at their transfer institution or at the University of Minnesota, with at least 6 credits (at least two courses) from the University of Minnesota, Twin Cities, Department of Sociology.

Required Courses

Minor Courses

SOC 3101 - Introduction to the American Criminal Justice System, C/PE, SSCI (3.0 cr)
or SOC 3102 - Introduction to Criminal Behavior and Social Control (3.0 cr)

SOC 3701 - Social Theory (4.0 cr)
 or SOC 3811 - Basic Social Statistics, MATH (4.0 cr)
 or SOC 3801W - Sociological Research Methods, WI (4.0 cr)

Electives

Take one upper level non-criminology sociology course and two 41xx courses chosen from the LCD area of sociology.

Two 41xx courses (6 credits) from LCD area of sociology.

Take 3 or more credit(s) from the following:

SOC 3xxx

SOC 4xxx

South Asian and Middle Eastern Studies Minor

Institute for Global Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 15.

The minor requires completion of five 3xxx-5xxx courses (totaling at least 15 credits) related to South Asia and the Middle East.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Two years of an adviser-approved Middle Eastern or South Asian language is required. Courses must be drawn from at least three departments. All courses must be taken A-F, with a grade of at least C-. The minor program must be approved by the global studies adviser.

Required Courses

Minor Courses

One course (3 credits) in the humanities of South Asia or the Middle East.

One course (3 credits) in the social sciences or history of South Asia or the Middle East.

9 credits of coursework relating to South Asia or the Middle East, chosen in consultation with a global studies adviser.

Spanish Studies B.A.

Spanish and Portuguese

Requirements for this program are current for Summer 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 34 to 35.

Degree: Bachelor of Arts.

The program develops analytical skills and methodologies needed to explore Hispanic, Hispanic-American, and Luso-Brazilian languages and cultures. The department offers two majors (Spanish studies and combined Spanish-Portuguese studies) and two minors (Spanish studies and Portuguese studies).

It is important to note that department majors and minors are not simply Spanish and Portuguese language majors or minors, rather, they are liberal arts majors and minors concentrating on

Spanish, Latin American and/or Luso-Brazilian literary, cultural, and linguistic studies with language skills at the foundation. All major and minor options in this department begin with prerequisite language courses, followed by advanced language skills courses (special arrangements may be made for native speakers of Spanish or Portuguese). These are followed by critical analysis skills courses in Hispanic literature, culture, and linguistics that prepare students to take advanced coursework in specific areas. The major options culminate in the completion of an individual major research project through the Graduation Seminar.

The department strongly encourages majors and minors to study abroad in a Spanish or Portuguese-speaking area. The department sponsors study abroad programs in Spain, Mexico, Venezuela, and Ecuador. Students who wish to complete department program requirements through study abroad must meet with the department adviser prior to departure. Detailed information regarding Spanish and Portuguese studies undergraduate academic issues is available from the Undergraduate Advising Office in 34 Folwell Hall.

This description should only be used as a general overview of departmental programs. For more detailed information see departmental advising staff in 34 Folwell Hall (Telephone: 612-624-9348, e-mail: spadvise@umn.edu). Students must declare majors within the department before completing the majority of major requirements and are encouraged to declare the major as early as possible (preferably during preparatory pre-requisite stages). For declaration procedures see the department website at www.spanport.umn.edu.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Preparatory work: In order to begin coursework in the major students must have completed the equivalent of four semesters of college level Spanish (at least 16 credits) and have successfully passed all parts of the Language Proficiency Exam (LPE).

Language Proficiency

The department emphasizes student initiative and responsibility in acquiring a high level of language proficiency that is crucial for successful completion of courses beyond SPAN 3021. The department sponsors study abroad programs in Mexico, Ecuador, Venezuela, and Spain; offers a course in incorporating service learning in the local Chicano-Latino community; and provides a language tutoring lab and advanced writing center during the academic year while courses are in session.

Required Courses

Major Courses

Students who do not receive a B- or better in SPAN 3015 must take SPAN 3021.

SPAN 3015 - Spanish Composition and Communication (4.0 cr)

SPAN 3104W - Analysis and Interpretation of Texts, LIT, WI (3.0 cr)

SPAN 3105W - Introduction to the Study of Hispanic Civilizations, WI (3.0 cr)

SPAN 3107W - Introduction to the Study of Hispanic Linguistics, WI (3.0 cr)

Electives

A total of 6 elective courses must be taken to complete the major. Take at least 4 courses that have a SPAN 31xx course as pre-requisite. The following is a list of some of the courses that fulfill this requirement.

SPAN 3211 - Literary Discourses of Imperial Spain, 1492-1800 (3.0 cr)
 SPAN 3212 - Literary Discourses of Modern and Contemporary Spain (1800-Present) (3.0 cr)
 SPAN 3221 - Latin American Colonial Discourses Since 1492 (3.0 cr)
 SPAN 3222 - Discourses of Nation Building and Modernization in Latin America (3.0 cr)
 SPAN 3501 - Spanish Civilization: Roots of Modern Spain and Latin America (3.0 cr)
 SPAN 3502 - Spanish Civilization: Modern Spain (3.0 cr)
 SPAN 3510 - Issues in Hispanic Cultures (3.0 cr)
 SPAN 3512 - Modern Latin American Civilization (3.0 cr)
 SPAN 3701 - The Structure of Spanish: Phonology (3.0 cr)
 SPAN 3702 - Structure of Spanish: Morphology and Syntax (3.0 cr)
 SPAN 3703 - Origins and History of Spanish and Portuguese (3.0 cr)
 SPAN 3704 - Sociolinguistics of the Spanish-Speaking World (3.0 cr)
 SPAN 3730 - Topics in Hispanic Linguistics (3.0 cr)
 SPAN 3800 - Film Studies in Spanish (3.0 cr)
 SPAN 3910 - Topics in Spanish Peninsular Literature (3.0 cr)
 SPAN 3920 - Topics in Spanish-American Literature (3.0 cr)
 SPAN 3940 - Figures in Spanish Peninsular Literature (3.0 cr)
 SPAN 3950 - Figures in Spanish American Literature (3.0 cr)
 SPAN 3970 - Directed Studies (1.0-4.0 cr)
 Topics courses may be repeated up to 3 times. Those courses end in "0."
 Examples are SPAN 3510, 3910, 3920, 3730 etc.

Take no more than 2 courses that do not have a Span 31xx re-requisite.
 Examples are: SPAN 3021*

*Students who do not receive a B- or better in SPAN 3015 are required to take SPAN 3021 as one of their 6 elective courses.

SPAN 3401 - Service Learning in the Chicano/Latino Community (3.0 cr)
 SPAN 3044 - Advanced Medical Spanish (4.0 cr)
 SPAN 3404 - Medical Spanish and Community Health Service (3.0 cr)
 SPAN 3022 Advanced Business Spanish (4.0 cr)
 PORT 3001 - Portuguese for Spanish Speakers (4.0 cr)

To complete the Spanish residency requirement, 9 credits of upper division coursework (6 credits of which must have a Span 31xx pre-requisite) must be completed at the University of Minnesota, Twin Cities. Students pursuing a second CLA major may choose to complete the major project requirement in the other major. These students must substitute 3 credits in advanced electives in the Spanish major for SPAN 3972.

Senior Project

All B.A. candidates must complete a major project in Spanish by registering in and attending SPAN 3972 after all other major credits are completed. Graduation seminar informational/preparatory sessions are available in the department several times a year. Permission for seminar registration must be obtained from the department adviser.

SPAN 3972W - Graduation Seminar, WI (3.0 cr)

Spanish Studies Minor

Spanish and Portuguese

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16-17.

See the major for information on undergraduate programs, department sponsored study abroad programs, and declaration procedures.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

In order to begin coursework in the major students must have completed the equivalent of four semesters of college level Spanish (at least 16 credits) and have successfully passed all parts of the Language Proficiency Exam (LPE).

Students must declare the minor at least one full term before completing minor requirements and are encouraged to declare it as early as possible (preferably during preparatory coursework).

Required Courses

The minor consists of 5 courses

Minor Courses

*Students who do not receive a B- or better in SPAN 3015 must take SPAN 3021.

SPAN 3015 - Spanish Composition and Communication (4.0 cr)
 SPAN 3104W - Analysis and Interpretation of Texts, LIT, WI (3.0 cr)
 or SPAN 3105W - Introduction to the Study of Hispanic Civilizations, WI (3.0 cr)
 or SPAN 3107W - Introduction to the Study of Hispanic Linguistics, WI (3.0 cr)

Take 3 courses from the following:

Students who do not receive a B- or better in SPAN 3015 must take SPAN 3021
 SPAN 3xxx

SPAN 3021 - Advanced Communication Skills (4.0 cr)

Spanish and Portuguese Studies B.A.

Spanish and Portuguese

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 35 - 36.

Degree: Bachelor of Arts.

the Spanish Studies B.A. for information on Undergraduate programs, department sponsored study abroad programs, and declaration procedures.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

In order to begin coursework in the major students must have completed the equivalent of four semesters of college level Spanish (at least 16 credits) and have successfully passed all parts of the Language Proficiency Exam (LPE) AND take PORT 3001 - Portuguese for Spanish Speakers or the equivalent of four semesters of college level Portuguese..

Major Courses

Students that do not receive a B- or better in SPAN 3015 must take SPAN 3021

PORT 3003 - Portuguese Conversation and Composition (4.0 cr)
 SPAN 3015 - Spanish Composition and Communication (4.0 cr)*
 SPAN 3104W - Analysis and Interpretation of Texts, LIT, WI (3.0 cr)
 SPAN 3105W - Introduction to the Study of Hispanic Civilizations, WI (3.0 cr)
 SPAN 3107W - Introduction to the Study of Hispanic Linguistics, WI (3.0 cr)

Electives

Take two SPAN electives that have a SPAN 31xx pre-requisite. Below is a list of some of the courses that fulfill this requirement.

Spanish Electives

SPAN 3212 - Literary Discourses of Modern and Contemporary Spain (1800-Present) (3.0 cr)
 SPAN 3221 - Latin American Colonial Discourses Since 1492 (3.0 cr)
 SPAN 3222 - Discourses of Nation Building and Modernization in Latin America (3.0 cr)
 SPAN 3501 - Spanish Civilization: Roots of Modern Spain and Latin America (3.0 cr)
 SPAN 3502 - Spanish Civilization: Modern Spain (3.0 cr)
 SPAN 3510 - Issues in Hispanic Cultures (3.0 cr)
 SPAN 3512 - Modern Latin American Civilization (3.0 cr)
 SPAN 3701 - The Structure of Spanish: Phonology (3.0 cr)
 SPAN 3702 - Structure of Spanish: Morphology and Syntax (3.0 cr)
 SPAN 3703 - Origins and History of Spanish and Portuguese (3.0 cr)
 SPAN 3704 - Sociolinguistics of the Spanish-Speaking World (3.0 cr)
 SPAN 3730 - Topics in Hispanic Linguistics (3.0 cr)
 SPAN 3800 - Film Studies in Spanish (3.0 cr)
 SPAN 3910 - Topics in Spanish Peninsular Literature (3.0 cr)
 SPAN 3920 - Topics in Spanish-American Literature (3.0 cr)
 SPAN 3940 - Figures in Spanish Peninsular Literature (3.0 cr)
 SPAN 3950 - Figures in Spanish American Literature (3.0 cr)
 Topics courses may be repeated up to 3 times. These courses end in "0."
 Examples are: SPAN 3510, 3910, 3920, 3730 etc.

Portuguese Electives

Take two *PORT* electives. The following are some courses that fulfill this requirement:

PORT 3501W - Foundations of Portuguese Culture, WI (3.0 cr)
 PORT 3502W - Foundations of Brazilian Culture, WI (3.0 cr)
 PORT 3503W - Literatures and Cultures of Lusophone Africa, WI (3.0 cr)
 PORT 3800 - Film Studies in Portuguese (3.0 cr)
 PORT 3970 - Directed Readings (1.0-4.0 cr)

Senior Project

All B.A. candidates must complete a major project in Spanish-Portuguese by registering in and attending SPAN 3972 after all other major credits are completed. Graduation seminar informational/preparatory sessions are available in the department several times a year. Permission for seminar registration must be obtained from the department adviser.

SPAN 3972W - Graduation Seminar, WI (3.0 cr)

Portuguese Studies Minor

Spanish and Portuguese

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16

See Spanish Major B.A. for Information on Undergraduate programs, department sponsored study abroad programs, and declaration procedures.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Preparatory work: In order to begin coursework in the major students must have completed the equivalent of four semesters of college level Portuguese (at least 16 credits) and have successfully passed all parts of the Language Proficiency Exam (LPE)

Required Courses

PORT 3003 - Portuguese Conversation and Composition (4.0 cr)

Electives

Take four *3xxx PORT* classes. The following are of some of the courses that fulfill this requirement.

PORT 3501W - Foundations of Portuguese Culture, WI (3.0 cr)
 PORT 3502W - Foundations of Brazilian Culture, WI (3.0 cr)
 PORT 3503W - Literatures and Cultures of Lusophone Africa, WI (3.0 cr)
 PORT 3800 - Film Studies in Portuguese (3.0 cr)
 PORT 3970 - Directed Readings (1.0-4.0 cr)

Speech-Language-Hearing Sciences B.A.

Speech-Language-Hearing Sciences

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 39 - 41.

Degree: Bachelor of Arts.

The curriculum examines the physical, biological, and behavioral foundations of human communication. Courses focus on the study of normal speech, language, and hearing processes, and seek to apply that knowledge to identifying, preventing, evaluating, and managing disordered speech, language, and hearing.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Majors are advised to select additional courses beyond those needed to satisfy the liberal education requirements in the behavioral, biological, cognitive, physical, and social sciences; mathematics; statistics; and research design and methodology.

Required Courses**Major Courses**

SLHS 1301W - The Physics and Biology of Spoken Language, PHYS SCI/L, WI (4.0 cr)
 or SLHS 1402 - The Talking Brain (3.0 cr)
 SLHS 3301 - Introduction to Acoustics (3.0 cr)
 SLHS 3302 - Anatomy and Physiology of the Speech and Hearing Mechanisms (3.0 cr)
 SLHS 3303 - Language Acquisition and Science, SSCI (3.0 cr)
 SLHS 3304 - Phonetics (3.0 cr)
 SLHS 3305W - Speech Science, WI (3.0 cr)
 SLHS 3306 - Hearing Science (3.0 cr)
 SLHS 4301 - Introduction to the Neuroscience of Human Communication (3.0 cr)
 SLHS 4502 - Atypical Speech and Language (3.0 cr)
 SLHS 4801 - Hearing Measurement and Disorders (3.0 cr)
 SLHS 4802 - Rehabilitative Audiology (3.0 cr)
 SLHS 1401 - Communication Differences and Disorders, CD, SSCI (3.0 cr)
 or SLHS 3401 - Communication Differences and Disorders, CD, SSCI (3.0 cr)

Senior Project

SLHS 3402W - Major Project in Speech and Hearing Science, WI (3.0 cr)

Speech-Language-Hearing Sciences Minor

Speech-Language-Hearing Sciences

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

The minor's curriculum examines the physical, biological, and behavioral foundations of human communication. Courses focus on the study of normal speech, language, and hearing processes, and apply that knowledge to identifying, preventing, evaluating, and managing disordered speech, language, and hearing.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Choose 14 credits of 3xxx, 4xxx, or 5xxx courses in the Department of Speech-Language-Hearing Sciences. No more than 20 percent of the credits may be directed study. All courses must be completed with a grade of at least C.

Required Courses

Minor Courses

Take 14 or more credit(s) from the following:

SLHS 3xxx
SLHS 4xxx
SLHS 5xxx

Statistics B.A.

Statistics, School of-ADM

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 27.

Degree: Bachelor of Arts.

Statistics is concerned with theories and methods of data collection, tabulation, analysis, and interpretation, and their use in learning from data and making decisions.

A bachelor's degree gives students an understanding of the theory of statistics and trains them in basic use of the most important types of statistical methods. The degree prepares students for graduate work or for jobs in such diverse areas as marketing analysis, quality management, and support for scientific research.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students must complete 27 credits in STAT 3xxx or higher (including one year of theory, one year of introductory statistical methods, and three courses in advanced statistical methods) plus two years of math (including multivariable calculus and linear algebra) and one computer programming course, all with grade C- or better.

Required Courses

MATH 5651 can replace STAT 5101.

STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

or STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

STAT 3022 - Data Analysis (4.0 cr)

STAT 4101 - Theory of Statistics I (4.0 cr)

STAT 4102 - Theory of Statistics II (4.0 cr)

or

STAT 5101 - Theory of Statistics I (4.0 cr)

STAT 5102 - Theory of Statistics I (4.0 cr)

STAT 4893 - Senior Paper

At least 10 credits of adviser-approved statistics electives chosen from the following: STAT 5031, 5041, 5201, 5302, 5303, 5401, 5421, 5601, 4931, 5931, 5932

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1371 - IT Calculus I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

or MATH 1372 - IT Calculus II (4.0 cr) MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)

or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)

MATH 2263 - Multivariable Calculus (4.0 cr)

or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

or

Honors Sequence

MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)

MATH 1572H - Honors Calculus II, H (4.0 cr)

MATH 2573H - Honors Calculus III, H (4.0 cr)

MATH 2574H - Honors Calculus IV, H (4.0 cr)

Major Courses

MATH 4242 - Applied Linear Algebra (4.0 cr)

STAT 3011 - Introduction to Statistical Analysis, Math (4.0 cr)

STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

STAT 3022 - Data Analysis (4.0 cr)

STAT 4893W - Senior Paper, WI (1.0 cr)

Programming for Statisticians

CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)

or CSCI 1107 - Introduction to FORTRAN Programming for Scientists and Engineers (3.0 cr)

or CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)

Additional Mathematics courses

MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)

MATH 2263 - Multivariable Calculus (4.0 cr)

MATH 4242 - Applied Linear Algebra (4.0 cr)

Electives

Take 10 or more credit(s) from the following:

STAT 4931 - Topics in Statistics (3.0 cr)

STAT 4932 - Topics in Statistics (3.0 cr)

STAT 5031 - Statistical Methods for Quality Improvement (4.0 cr)

STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)

STAT 5302 - Applied Regression Analysis (4.0 cr)

STAT 5303 - Designing Experiments (4.0 cr)

STAT 5401 - Applied Multivariate Methods (3.0 cr)

STAT 5421 - Analysis of Categorical Data (3.0 cr)

STAT 5601 - Nonparametric Methods (3.0 cr)

STAT 5931 - Topics in Statistics (3.0 cr)

STAT 5932 - Topics in Statistics (3.0 cr)

Statistics Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

Statistics is concerned with theories and methods of data collection, tabulation, analysis, and interpretation, and their use in learning from data and making decisions.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

Take at least 14 credit(s) from the following:

STAT 3xxx

STAT 4xxx

STAT 5xxx

Take at least two courses from:

STAT 4xxx

STAT 5xxx

Studies in Cinema and Media Culture B.A.

Cultural Studies and Comparative Literature

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 32.

Degree: Bachelor of Arts.

Studies in cinema and media culture (SCMC) examines cinema by emphasizing its location within the intricate social, historical, and cultural matrix of audiovisual forms and practices. Core courses and electives are offered not only in the Department of Cultural Studies and Comparative Literature (CSCL) but also in a number of other contributing departments. Through the program's interdisciplinary framework, students explore the sounds and images of cinema as they have changed throughout the 19th and 20th centuries. Print, photography, radio, television, video, and digital media are also considered crucial to understanding the medium. Students develop the ability to 'read' the production and circulation of meaning in cinema, especially within the institutions of mass culture; examine the history of cinema cultures; engage the cross-cultural and global dynamics of cinema production and reception; and explore the theoretical models that have shaped thinking about the cinema and its relations to other media.

Although the major includes a production component, its principal focus is on cultural contexts, history, and theory.

Effective fall 2001 the studies in cinema and media culture major replaced the film studies major. Currently declared film studies majors have the option of either completing their degree in film studies or transferring to the new SCMC major. The director of undergraduate studies can help students transfer programs.

For the latest information on the SCMC major, visit the CSCL Web site.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Major Courses

ARTH 1921W - Introduction to Film Study, IP, OH, WI (4.0 cr)

or CSCL 1201 - Introduction to Cinema and Media Culture, OH (4.0 cr)

or CSCL 1921 - Introduction to Film Study, OH (4.0 cr)

or SCMC 1201 - Introduction to Cinema and Media Culture, OH (4.0 cr)

ARTH 3921W - Art of the Film, IP, OH, WI (4.0 cr)

or SCMC 3001 - History of Cinema and Media Culture (4.0 cr)

SCMC 5001 - Critical Debates in the Study of Cinema and Media Culture (4.0 cr)

Context, Practice, Difference, and Analysis

AMST 3111 - American Cultures and the Arts (3.0 cr)

or AMST 3252W - American Popular Culture and Politics: 1900 to 1940, C/PE, HP, WI (4.0 cr)

or AMST 3253W - American Popular Culture and Politics: 1940 to the Present, C/PE, HP, WI (4.0 cr)

or ARTH 3575 - The Art of Walt Disney in American Culture (4.0 cr)

or COMM 3211 - Introduction to U.S. Electronic Media (3.0 cr)

or COMM 5261 - Political Economy of Media Culture (3.0 cr)

or HIST 3705 - From Printing Press to Internet: Media, Communications, and History (3.0 cr)

or HSCI 4321 - History of Computing (3.0 cr)

or JOUR 3614 - History of Media Communication, HP (3.0 cr)

or JOUR 3745 - Mass Media and Popular Culture, CD, SSCI (3.0 cr)

or JOUR 5615 - History of the Documentary (3.0 cr)

COMM 3201 - Introduction to Electronic Media Production (4.0 cr)

or ENGW 5205 - Screenwriting (4.0 cr)

AFRO 5655 - African American Cinema, CD, OH (3.0 cr)

or ALL 3456 - Japanese Film, OH (3.0 cr)

or COMM 4231 - Comparing Electronic Media Systems, IP (3.0 cr)

or COMM 4235 - Electronic Media and Ethnic Minorities—A World View, IP (3.0 cr)

or COMM 5233W - Electronic Media and National Development, WI (3.0 cr)

or CSCL 3176 - Oppositional Cinemas, IP, OH (4.0 cr)

or FRIT 3802 - Cinema and Realism (3.0 cr)

or FRIT 3803 - New Wave Cinemas: Love, Alienation and Landscape in Post-War Italian and French Film (3.0 cr)

or GER 3604W - Introduction to German Cinema, OH, WI (3.0 cr)

ARTH 3927 - Documentary Cinema (4.0 cr)

or ARTH 5927 - Documentary Cinema (4.0 cr)

AFRO 3741 - People of Color and the Mass Media (3.0 cr)

or JOUR 3741 - People of Color and the Mass Media, CD (3.0 cr)

CSCL 3115 - Cinema and Ideology, OH (4.0 cr)

or WOST 3307 - Feminist Film Studies, CD, OH (3.0 cr)

ARTH 3927 - Documentary Cinema (4.0 cr)

or ARTH 5927 - Documentary Cinema (4.0 cr)

Electives

One elective may be 1xxx, and one 3xxx, 4xxx, 5xxx course may serve as a basis for the senior project. Courses used to fulfill other requirements may not be counted toward the elective course requirement.

Take 3 or more course(s) from the following:

AFRO 3654 - African Cinema, IP, OH (4.0 cr)

AFRO 3741 - People of Color and the Mass Media (3.0 cr)

AFRO 5655 - African American Cinema, CD, OH (3.0 cr)

ALL 1001 - Asian Film and Animation (3.0 cr)

ALL 3356W - Chinese Film, IP, OH, WI (3.0 cr)
 ALL 3456 - Japanese Film, OH (3.0 cr)
 AMIN 3402 - American Indians and the Cinema, CD, OH (3.0 cr)
 AMST 3111 - American Cultures and the Arts (3.0 cr)
 AMST 3252W - American Popular Culture and Politics: 1900 to 1940, C/PE, HP, WI (4.0 cr)
 AMST 3253W - American Popular Culture and Politics: 1940 to the Present, C/PE, HP, WI (4.0 cr)
 ARTH 1921W - Introduction to Film Study, IP, OH, WI (4.0 cr)
 ARTH 3575 - The Art of Walt Disney in American Culture (4.0 cr)
 ARTH 3921W - Art of the Film, IP, OH, WI (4.0 cr)
 ARTH 5655 - African American Cinema, CD, OH (3.0 cr)
 ARTS 3601 - Interactivity: Digital Processes (4.0 cr)
 ARTS 3703 - Photography: Digital Imaging (4.0 cr)
 ARTS 5610 - Interactivity: Advanced Digital Processes (4.0 cr)
 COMM 3201 - Introduction to Electronic Media Production (4.0 cr)
 COMM 3204 - Advanced Electronic Media Production (3.0 cr)
 COMM 3211 - Introduction to U.S. Electronic Media (3.0 cr)
 COMM 4231 - Comparing Electronic Media Systems, IP (3.0 cr)
 COMM 4235 - Electronic Media and Ethnic Minorities—A World View, IP (3.0 cr)
 COMM 5210 - Contemporary Problems in U.S. Electronic Media (3.0 cr)
 COMM 5233W - Electronic Media and National Development, WI (3.0 cr)
 CSCL 1201 - Introduction to Cinema and Media Culture, OH (4.0 cr)
 CSCL 1921 - Introduction to Film Study, OH (4.0 cr)
 CSCL 3115 - Cinema and Ideology, OH (4.0 cr)
 CSCL 3176 - Oppositional Cinemas, IP, OH (4.0 cr)
 CSCL 3177 - On Television (4.0 cr)
 ENGL 3040 - Studies in Film (3.0 cr)
 ENGW 5205 - Screenwriting (4.0 cr)
 FRIT 3802 - Cinema and Realism (3.0 cr)
 FRIT 3803 - New Wave Cinemas: Love, Alienation and Landscape in Post-War Italian and French Film (3.0 cr)
 GER 1601 - Fleeing Hitler: German and Austrian Filmmakers Between Europe and Hollywood, IP, OH (3.0 cr)
 GER 3604W - Introduction to German Cinema, OH, WI (3.0 cr)
 HIST 3705 - From Printing Press to Internet: Media, Communications, and History (3.0 cr)
 HSCI 4321 - History of Computing (3.0 cr)
 ITAL 1837 - Imagining Italy: Italian and Italian-American Culture, History, and Society Through Film, IP, OH (4.0 cr)
 JOUR 1001 - Introduction to Mass Communication, SSCI, C/PE (3.0 cr)
 JOUR 3614 - History of Media Communication, HP (3.0 cr)
 JOUR 3741 - People of Color and the Mass Media, CD (3.0 cr)
 JOUR 3745 - Mass Media and Popular Culture, CD, SSCI (3.0 cr)
 JOUR 3796 - Mass Media and Politics, C/PE (3.0 cr)
 JOUR 5615 - History of the Documentary (3.0 cr)
 POL 1015 - Mass Politics in a Media Age, C/PE (3.0 cr)
 POL 3491 - Film and Latin American Politics (3.0 cr)
 SCMC 1201 - Introduction to Cinema and Media Culture, OH (4.0 cr)
 SCMC 3001 - History of Cinema and Media Culture (4.0 cr)
 SCMC 3177 - On Television (4.0 cr)
 SCMC 5001 - Critical Debates in the Study of Cinema and Media Culture (4.0 cr)
 SPAN 3800 - Film Studies in Spanish (3.0 cr)
 WOST 3409W - Asian American Women's Cultural Production, CD, WI (3.0 cr)
 ARTH 3927 - Documentary Cinema (4.0 cr)
 or ARTH 5927 - Documentary Cinema (4.0 cr)
 GEOG 3374W - The City in Film, IP, OH, WI (4.0 cr)
 or GEOG 5374W - The City in Film, IP, WI (4.0 cr)

Senior Project

The senior project requirement may be satisfied by completing one course (3xxx, 4xxx, or 5xxx). Senior projects that involve production (short films, video installations, computer games, among others) are welcome, but emphasis in SCMC falls on research and critical analysis.

Studies in Cinema and Media Culture Minor

Cultural Studies and Comparative Literature

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

Studies in cinema and media culture (SCMC) examines cinema by emphasizing its location within the intricate social, historical, and cultural matrix of audiovisual forms and practices.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

ARTH 1921W - Introduction to Film Study, IP, OH, WI (4.0 cr)
 or CSCL 1201 - Introduction to Cinema and Media Culture, OH (4.0 cr)
 or CSCL 1921 - Introduction to Film Study, OH (4.0 cr)
 or SCMC 1201 - Introduction to Cinema and Media Culture, OH (4.0 cr)

Electives

Take 14 credits of 3xxx-5xxx courses from the approved list.

Theatre Arts B.A.

Theatre Arts and Dance

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 43.

Degree: Bachelor of Arts.

This degree program offers study of the art form in both theoretical historical context and the practice of live dramatic performance. Course offerings include theatre history and dramatic literature; acting, movement, and voice; directing; design and technology for scenery, costume, lighting, makeup, and sound; and stage and arts management.

Coursework also embraces theatre as a group art, an art in which individual excellence is often fully realized only in collaboration with other artists. The practical application of the art encourages students to test classroom experiences under the pressure of public performance in the laboratory of the University Theatre.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Major Courses

Complete at least 4 credits. At least 2 credits must be taken in some technical capacity.

No more than 2 credits may be taken in acting/performance

TH 1101W - Introduction to the Theatre, IP, LIT, WI (4.0 cr)
 TH 1321 - Beginning Acting: Fundamentals of Performance (3.0 cr)
 TH 1322 - Creating the Performance (3.0 cr)
 TH 3171 - History of the Theatre: Ancient Greece Through Neo-Classicism (3.0 cr)
 TH 3172 - History of the Theatre: Age of Enlightenment to Present (3.0 cr)
 TH 3513 - Design and Technical Production I (4.0 cr)
 TH 3515 - Design and Technical Production II (4.0 cr)
 TH 4177W - Survey of Dramatic Literature I: Strategic Interpretation, WI (3.0 cr)
 or TH 4178W - Survey of Dramatic Literature II: Representation and its Effects, WI (3.0 cr)
 Take no more than 3 credits in acting.
 TH 3100 - Theatre Practicum (1.0 cr)

Electives

Complete 10 credits of electives at any level from either theatre arts or dance courses.
 Complete a 3 credit or more content course.

Senior Seminar

TH 4901 - Senior Seminar (2.0 cr)

Theatre Arts Minor

Theatre Arts and Dance

Requirements for this program are current for Fall 2006.
 Required credits in this minor: 24.

The minor offers study of the art form in both theoretical historical context and the practice of live dramatic performance. Course offerings include theatre history and dramatic literature; acting, movement, and voice; directing; design and technology for scenery, costume, lighting, makeup, and sound; and stage and arts management.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

TH 1101W - Introduction to the Theatre, IP, LIT, WI (4.0 cr)
 TH 1321 - Beginning Acting: Fundamentals of Performance (3.0 cr)
 TH 1322 - Creating the Performance (3.0 cr)
 TH 3513 - Design and Technical Production I (4.0 cr)
 TH 3515 - Design and Technical Production II (4.0 cr)

Take 2 or more course(s) from the following:

TH 3171 - History of the Theatre: Ancient Greece Through Neo-Classicism (3.0 cr)
 TH 3172 - History of the Theatre: Age of Enlightenment to Present (3.0 cr)
 TH 4177W - Survey of Dramatic Literature I: Strategic Interpretation, WI (3.0 cr)
 TH 4178W - Survey of Dramatic Literature II: Representation and its Effects, WI (3.0 cr)

Urban Studies B.A.

Geography

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 36.

Degree: Bachelor of Arts.

This cross-disciplinary major involves urban studies coursework, fieldwork experiences, internships, and coursework in disciplines that offer useful perspectives on contemporary urban and postindustrial society.

The program focuses on the conceptual and analytical frameworks and specialized skills needed for professions focused on urban change or development. Students completing the program work in public agencies or private business or pursue graduate study in urban planning, law, social welfare, public affairs, or the social and environmental sciences.

Students are encouraged to incorporate field study into the major or minor. Options include urban studies programs sponsored by the Higher Education Consortium for Urban Affairs (HECUA) in South America, Norway, and Minneapolis-St. Paul.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Required Courses

Major Courses

Take two half semesters of either URBS 3201 or 3202.
 URBS 1001W or 3001W - Introduction to Urban Studies: The Complexity of Metropolitan Life, C/PE, WI (3.0 cr) Take two semesters of: the following:
 URBS 3500 - Urban Studies Workshop (3.0 cr)

Skills and Methods Courses

Take 2 or more course(s) totaling 6 or more credit(s) from the following:

Take 0-1 course(s) from the following:

EPSY 3264 - Basic and Applied Statistics, MATH (3.0 cr)
 EPSY 5261 - Introductory Statistical Methods (3.0 cr)
 GEOG 3511 - Principles of Cartography (4.0 cr)
 GEOG 3531 - Numerical Spatial Analysis (4.0 cr)
 PA 5031 - Empirical Analysis I (4.0 cr)
 PSY 4801 - Introduction to Statistics (4.0 cr)
 SOC 3801W - Sociological Research Methods, WI (4.0 cr)
 SOC 3811 - Basic Social Statistics, MATH (4.0 cr)
 STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
 STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

Take 1 - 2 course(s) from the following:

GEOG 3561 - Principles of Geographic Information Science (4.0 cr)
 GEOG 5511 - Advanced Cartography (3.0 cr)
 GEOG 5562 - Geographic Information Science and Analytical Cartography (3.0 cr)
 GEOG 5563 - Advanced Geographic Information Science (3.0 cr)
 STAT 3212 - Data Analysis (4.0 cr)
 STAT 4101 - Theory of Statistics I (4.0 cr)
 STAT 4102 - Theory of Statistics II (4.0 cr)
 STAT 5021 - Statistical Analysis (4.0 cr)
 STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
 STAT 5401 - Applied Multivariate Methods (3.0 cr)

STAT 5421 - Analysis of Categorical Data (3.0 cr)
 CE 3101 - Computer Applications in Civil Engineering I (3.0 cr)
 DHA 5469 - Understanding Housing: Assessment and Analysis (3.0 cr)
 GEOG 5564 - Urban Geographic Information Science and Analysis (3.0 cr)
 GEOG 5588 - Multimedia Cartography (3.0 cr)
 HIST 5011 - Quantitative Methods for Historical Research (4.0 cr)
 PA 5022 - Economics For Policy Analysis and Planning II (1.5-3.0 cr)
 PA 5271 - Geographic Information Systems: Applications in Planning and Policy Analysis (3.0 cr)
 POL 3085 - Quantitative Analysis in Political Science, MATH (4.0 cr)
 GEOG 4001 - Modes of Geographic Inquiry (4.0 cr)
 GEOG 5563 - Advanced Geographic Information Science (3.0 cr)
 GEOG 5565 - Geographical Analysis of Environmental Systems and Global Change (3.0 cr)
 GEOG 5701 - Field Research (3.0 cr)
 HIST 4959 - How to Do History (3.0 cr)
 MKTG 3010 - Marketing Research (4.0 cr)
 PA 5035 - Survey Research and Data Collection (1.5 cr)
 PA 5112 - Public Budgeting (3.0 cr)
 PA 5221 - Private Sector Development (3.0 cr)
 PA 5511 - Community Economic Development (3.0 cr)
 PA 5521 - Development Planning and Policy Analysis (4.0 cr)
 WOST 5101 - Feminist Approaches to Ethnography (3.0 cr)
 Take 0 - 1 course(s) from the following:
 COMM 3411 - Introduction to Small Group Communication (3.0 cr)
 COMM 3441 - Introduction to Organizational Communication (3.0 cr)
 COMM 5411 - Small Group Communication Research (3.0 cr)
 COMM 5441 - Communication in Human Organizations (3.0 cr)
 PA 3003 - Non-profit Public Financial Analysis and Budgeting (3.0 cr)
 PA 4101 - Nonprofit Management and Governance (3.0 cr)
 PA 5253 - Designing Planning and Participation Processes (3.0 cr)

Urban Form and Society Courses

Take 2 or more course(s) from the following:

AFRO 4013 - Cities in Africa: African, Islamic, European Traditions, HP, IP (3.0 cr)
 ARCH 3412 - Architectural History since 1750, HP, IP (3.0 cr)
 DESI 4050 - Design Institute Seminar: Mapcity (3.0 cr)
 DHA 2463 - Housing and Community Development, C/PE (3.0 cr)
 GEOG 3371W - Cities, Citizens, and Communities, CD, SSCI, WI (4.0 cr)
 GEOG 3373 - Changing Form of the City, HP, IP (3.0 cr)
 GEOG 3605W - Geographical Perspectives on Planning, C/PE, IP, WI (4.0 cr)
 GEOG 3973 - Geography of the Twin Cities, C/PE, CD (3.0 cr)
 GEOG 5371W - American Cities I: Population and Housing, WI (4.0 cr)
 GEOG 5605W - Geographical Perspectives on Planning, C/PE, IP, WI (4.0 cr)
 HIST 3479 - History of Chinese Cities and Urban Life (3.0-4.0 cr)
 HIST 3703W - European Cities: 1300-1800, HP, IP, WI (3.0 cr)
 PA 5201W - American Cities I: Population and Housing, WI (4.0 cr)
 CSCL 5256W - Suburbia (3.0 cr)

Internship and Senior Paper

URBS 3900 - Urban Studies Internship Seminar (2.0 cr)
 URBS 3955W - Senior Paper Seminar, WI (2.0 cr)

Urban Studies Concentrations

Students are required to complete one of the following course groups.

Social and Cultural Analysis of Urban Life

Take 3 or more course(s) from the following:

AFRO 3072 - Racism: Social and Psychological Consequences for Black Americans, CD (3.0 cr)
 AFRO 4231 - The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States (3.0 cr)
 AFRO 5910 - Topics in African American and African Studies (1.0-3.0 cr)

AMIN 4231 - The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States (3.0 cr)
 AMIN 4511 - American Indian Political Economy, CD (3.0 cr)
 CHIC 4231 - The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States (3.0 cr)
 COMM 3451W - Intercultural Communication: Theory and Practice, IP, WI (3.0 cr)
 COMM 5451W - Intercultural Communication Processes, IP, WI (3.0 cr)
 DHA 5467W - Housing and the Social Environment, WI (4.0 cr)
 GEOG 3374W - The City in Film, IP, OH, WI (4.0 cr)
 GEOG 3375 - Minority Settlement in America, CD (3.0 cr)
 GEOG 5374W - The City in Film, IP, WI (4.0 cr)
 HIST 3442 - Chicana/o History: 1900 to Present, CD (3.0 cr)
 HIST 3821 - United States in the 20th Century to 1945, HP (3.0 cr)
 HIST 3822 - United States in the 20th Century Since 1945, HP (3.0 cr)
 HIST 3851 - Labor in the 19th-Century United States (3.0 cr)
 HIST 3852 - U.S. Labor in the 20th Century (3.0 cr)
 HIST 3865 - African American History, 1865 to Present, CD, HP (4.0 cr)
 HIST 3872 - American Indian History: 1830 to the Present, CD, HP (4.0 cr)
 PA 5401 - Poverty, Inequality, and Public Policy (3.0 cr)
 PA 5601 - Survey of Women, Law, and Public Policy in the United States (3.0 cr)
 POL 3739 - Politics of Race, Class, and Ethnicity, CD, IP (3.0 cr)
 PSY 3201 - Introduction to Social Psychology (4.0 cr)
 SOC 3451W - Cities and Social Change, SSCI, WI (3.0 cr)
 SOC 4108 - Current Issues in Crime Control (3.0 cr)
 SW 3101 - Interventions in Community and Social Policy, C/PE (3.0 cr)
 SW 5101 - Historical Origins and Contemporary Policies and Programs in Social Welfare (3.0-4.0 cr)
 URBS 3301W - American Cities As Settings for Cultural Diversity, CD, WI (3.0 cr)
 WOST 4502 - Women and Public Policy (3.0 cr)
 WOST 5404 - Working Class Women's Cultures (3.0 cr)

-OR-

Urban Infrastructure and Environment

Take 3 or more course(s) from the following:

APEC 3611 - Environmental and Natural Resource Economics, ENVT (3.0 cr)
 ARCH 3401W - Environmental Design and the Sociocultural Context, C/PE, WI (3.0 cr)
 ARCH 4671 - Historic Preservation (3.0 cr)
 ARCH 4701 - Introduction to Urban Form and Issues (3.0 cr)
 ARCH 5672 - Historic Building Conservation (3.0 cr)
 ARCH 5673 - Historic Building Research and Documentation (3.0 cr)
 ARCH 5711 - Design Principles of the Urban Landscape (3.0 cr)
 CE 3201 - Transportation Engineering (3.0 cr)
 CE 5211 - Traffic Engineering (3.0 cr)
 CE 5212 - Transportation Policy, Planning, and Deployment (3.0 cr)
 ECON 3611 - Environmental Economics, ENVT (3.0 cr)
 GEOG 5372W - American Cities II: Land Use, Transportation, and the Urban Economy, WI (4.0 cr)
 LA 3501 - Environmental Design and Its Biological and Physical Context, ENVT (3.0 cr)
 PA 5013 - Law and Urban Land Use (1.5 cr)
 PA 5202W - American Cities II: Land Use, Transportation, and the Urban Economy (4.0 cr)
 PA 5212 - Managing Urban Growth and Change (3.0 cr)
 PA 5231 - Transit Planning and Management (3.0 cr)
 PA 5421 - Racial Inequality and Public Policy (3.0 cr)
 PA 5531 - Strategies for Sustainable Development: Theory and Practice (2.0 cr)
 PA 5722 - Environmental and Resource Economics Policy (3.0 cr)
 URBS 3751 - Understanding the Urban Environment, ENVT (3.0 cr)
 URBS 3771 - Fundamentals of Transit (3.0 cr)
 NRES 3011W - Ethics and Leadership in Resource Management (3.0 cr)
 ESPM 3245 - Sustainable Land Use Planning and Policy (3.0 cr)

-OR-

Urban Political Economy

Take 3 or more course(s) from the following:

APEC 5321 - Regional Economic Analysis (3.0 cr)
 APEC 5341 - Public Finance (3.0 cr)
 APEC 5611 - Economic Aspects of Environmental Management (3.0 cr)
 DHA 5463 - Housing Policy (3.0 cr)
 ECON 3501 - Labor Economics (3.0 cr)
 ECON 4266 - Urban Economics, (4.0 cr)
 ECON 4623 - Housing Markets and Public Policy (3.0 cr)
 ECON 4821 - Public Economics (3.0 cr)
 GEOG 3331 - Geography of the World Economy, IP, SSCI (3.0 cr)
 GEOG 3361W - Land Use, Landscapes and the Law (3.0 cr)
 GEOG 4001 - Modes of Geographic Inquiry (4.0 cr)
 GEOG 5361 - Geography and Real Estate (4.0 cr)
 HIST 3841 - American Business History (3.0 cr)
 PA 4200 - Urban and Regional Planning (3.0 cr)
 PA 5004 - Introduction to Planning (3.0 cr)
 PA 5013 - Law and Urban Land Use (1.5 cr)
 PA 5211 - Land Use Planning (3.0 cr)
 PA 5221 - Private Sector Development (3.0 cr)
 PA 5261 - Housing Policy (3.0 cr)
 PA 5421 - Racial Inequality and Public Policy (3.0 cr)
 PA 5511 - Community Economic Development (3.0 cr)
 PA 5590 - Topics in Economic and Community Development (3.0 cr)
 POL 3477 - Political Development, SSCI (3.0-4.0 cr)
 POL 3739 - Politics of Race, Class, and Ethnicity, CD, IP (3.0 cr)
 URBS 3771 - Fundamentals of Transit (3.0 cr)

Urban Studies B.S.**Geography**

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 41 to 48.

Degree: Bachelor of Science.

This cross-disciplinary major involves urban studies coursework, fieldwork experiences, internships, and coursework in disciplines that offer useful perspectives on contemporary urban and postindustrial society.

The program focuses on the conceptual and analytical frameworks and specialized skills needed for professions focused on urban change or development. Students completing the program work in public agencies or private business or pursue graduate study in urban planning, law, social welfare, public affairs, or the social and environmental sciences.

Students are encouraged to incorporate field study into the major or minor. Options include urban studies programs sponsored by the Higher Education Consortium for Urban Affairs (HECUA) in South America, Norway, and Minneapolis-St. Paul.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements**Required Courses****Major Courses**

URBS 1001W or 3001W - Introduction to Urban Studies: The Complexity of Metropolitan Life, C/PE, WI (3.0 cr)

Take two semesters of either URBS 3201 or 3202.

Take two semesters of the following:

URBS 3500 - Urban Studies Workshop (3.0 cr)

Skills and Methods Courses

Take 4 or more course(s) totaling 12 or more credit(s) from the following: Take 0 - 1 course(s) from the following:

EPSY 3264 - Basic and Applied Statistics, MATH (3.0 cr)
 EPSY 5261 - Introductory Statistical Methods (3.0 cr)
 GEOG 3511 - Principles of Cartography (4.0 cr)
 GEOG 3531 - Numerical Spatial Analysis (4.0 cr)
 PA 5031 - Empirical Analysis I (4.0 cr)
 PSY 4801 - Introduction to Statistics (4.0 cr)
 SOC 3801W - Sociological Research Methods, WI (4.0 cr)
 SOC 3811 - Basic Social Statistics, MATH (4.0 cr)
 STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
 STAT 3021 - Introduction to Probability and Statistics (3.0 cr)
 Take 0 - 2 course(s) from the following:
 GEOG 5511 - Advanced Cartography (3.0 cr)
 GEOG 3561 - Principles of Geographic Information Science (4.0 cr)
 GEOG 5562 - Geographic Information Science and Analytical Cartography (3.0 cr)
 GEOG 5563 - Advanced Geographic Information Science (3.0 cr)
 STAT 3212 - Data Analysis (4.0 cr)
 STAT 4101 - Theory of Statistics I (4.0 cr)
 STAT 4102 - Theory of Statistics II (4.0 cr)
 STAT 5021 - Statistical Analysis (4.0 cr)
 STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
 STAT 5401 - Applied Multivariate Methods (3.0 cr)
 STAT 5421 - Analysis of Categorical Data (3.0 cr)

Take 0 - 2 course(s) from the following:

CE 3101 - Computer Applications in Civil Engineering I (3.0 cr)
 DHA 5469 - Understanding Housing: Assessment and Analysis (3.0 cr)
 GEOG 5588 - Multimedia Cartography (3.0 cr)
 GEOG 5564 - Urban Geographic Information Science and Analysis (3.0 cr)
 HIST 5011 - Quantitative Methods for Historical Research (4.0 cr)
 POL 3085 - Quantitative Analysis in Political Science, MATH (4.0 cr)
 PA 5022 - Economics For Policy Analysis and Planning II (1.5-3.0 cr)
 PA 5271 - Geographic Information Systems: Applications in Planning and Policy Analysis (3.0 cr)

Take 0 - 2 course(s) from the following:

GEOG 4001 - Modes of Geographic Inquiry (4.0 cr)
 GEOG 5563 - Advanced Geographic Information Science (3.0 cr)
 GEOG 5701 - Field Research (3.0 cr)
 GEOG 5565 - Geographical Analysis of Environmental Systems and Global Change (3.0 cr)
 HIST 4959 - How to Do History (3.0 cr)
 MKTG 3010 - Marketing Research (4.0 cr)
 PA 4101 - Nonprofit Management and Governance (3.0 cr)
 PA 5035 - Survey Research and Data Collection (1.5 cr)
 PA 5111 - Financial Management in Public and Nonprofit Organizations (3.0 cr)
 PA 5112 - Public Budgeting (3.0 cr)
 PA 5221 - Private Sector Development (3.0 cr)
 PA 5253 - Designing Planning and Participation Processes (3.0 cr)
 PA 5511 - Community Economic Development (3.0 cr)
 PA 5521 - Development Planning and Policy Analysis (4.0 cr)
 WOST 5101 - Feminist Approaches to Ethnography (3.0 cr)

Urban Form and Society Coursework

Take 2 or more course(s) from the following:

AFRO 4013 - Cities in Africa: African, Islamic, European Traditions, HP, IP (3.0 cr)
 ARCH 3412 - Architectural History since 1750, HP, IP (3.0 cr)
 DESI 4050 - Design Institute Seminar: Mapcity (3.0 cr)
 DHA 2463 - Housing and Community Development, C/PE (3.0 cr)
 GEOG 3371W - Cities, Citizens, and Communities, CD, SSCI, WI (4.0 cr)
 GEOG 3373 - Changing Form of the City, HP, IP (3.0 cr)
 GEOG 3605W - Geographical Perspectives on Planning, C/PE, IP, WI (4.0 cr)
 GEOG 3973 - Geography of the Twin Cities, C/PE, CD (3.0 cr)

GEOG 5371W - American Cities I: Population and Housing, WI (4.0 cr)
 GEOG 5605W - Geographical Perspectives on Planning, C/PE, IP, WI (4.0 cr)
 HIST 3479 - History of Chinese Cities and Urban Life (3.0-4.0 cr)
 HIST 3703W - European Cities: 1300-1800, HP, IP, WI (3.0 cr)
 PA 5201W - American Cities I: Population and Housing, WI (4.0 cr)
 CSCL 5256W - Suburbia (3.0 cr)

Urban Studies Internship and Senior Paper

URBS 3900 - Urban Studies Internship Seminar (2.0 cr)
 URBS 3955W - Senior Paper Seminar, WI (2.0 cr)

Urban Studies Concentrations

Students are required to complete one of the following course groups.

Social and Cultural Analysis of Urban Life

Take 3 or more course(s) from the following:

AFRO 3072 - Racism: Social and Psychological Consequences for Black Americans, CD (3.0 cr)
 AFRO 4231 - The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States (3.0 cr)
 AFRO 5910 - Topics in African American and African Studies (1.0-3.0 cr)
 AMIN 4231 - The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States (3.0 cr)
 AMIN 4511 - American Indian Political Economy, CD (3.0 cr)
 CHIC 4231 - The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States (3.0 cr)
 COMM 3451W - Intercultural Communication: Theory and Practice, IP, WI (3.0 cr)
 COMM 5451W - Intercultural Communication Processes, IP, WI (3.0 cr)
 DHA 5467W - Housing and the Social Environment, WI (4.0 cr)
 GEOG 3374W - The City in Film, IP, OH, WI (4.0 cr)
 GEOG 3375 - Minority Settlement in America, CD (3.0 cr)
 GEOG 5374W - The City in Film, IP, WI (4.0 cr)
 HIST 3442 - Chicana/o History: 1900 to Present, CD (3.0 cr)
 HIST 3821 - United States in the 20th Century to 1945, HP (3.0 cr)
 HIST 3822 - United States in the 20th Century Since 1945, HP (3.0 cr)
 HIST 3851 - Labor in the 19th-Century United States (3.0 cr)
 HIST 3852 - U.S. Labor in the 20th Century (3.0 cr)
 HIST 3865 - African American History, 1865 to Present, CD, HP (4.0 cr)
 HIST 3872 - American Indian History: 1830 to the Present, CD, HP (4.0 cr)
 PA 5401 - Poverty, Inequality, and Public Policy (3.0 cr)
 PA 5601 - Survey of Women, Law, and Public Policy in the United States (3.0 cr)
 POL 3739 - Politics of Race, Class, and Ethnicity, CD, IP (3.0 cr)
 PSY 3201 - Introduction to Social Psychology (4.0 cr)
 SOC 3451W - Cities and Social Change, SSCI, WI (3.0 cr)
 SOC 4108 - Current Issues in Crime Control (3.0 cr)
 SW 3101 - Interventions in Community and Social Policy, C/PE (3.0 cr)

 GEOG 5361 - Geography and Real Estate (4.0 cr)
 HIST 3841 - American Business History (3.0 cr)
 PA 4200 - Urban and Regional Planning (3.0 cr)
 PA 5004 - Introduction to Planning (3.0 cr)
 PA 5013 - Law and Urban Land Use (1.5 cr)
 PA 5211 - Land Use Planning (3.0 cr)
 PA 5221 - Private Sector Development (3.0 cr)
 PA 5421 - Racial Inequality and Public Policy (3.0 cr)
 PA 5511 - Community Economic Development (3.0 cr)
 PA 5590 - Topics in Economic Development (3.0 cr)
 POL 3477 - Political Development, SSCI (3.0-4.0 cr)
 POL 3739 - Politics of Race, Class, and Ethnicity, CD, IP (3.0 cr)
 PA 5261 - Housing Policy (3.0 cr)
 URBS 3771 - Fundamentals of Transit (3.0 cr)

Urban Studies Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 14.

The program focuses on the conceptual and analytical frameworks and specialized skills needed for professions focused on urban change or development.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

Two sessions of URBS 3201 or 3202. Electives from the following tracks: urban form and society, cultural analysis, political economy, and infrastructure and environment.

URBS 1001W - Introduction to Urban Studies: The Complexity of Metropolitan Life, C/PE, WI (3.0 cr)

URBS 3500 - Urban Studies Workshop (3.0 cr)

Two courses (6 credits) from one of the four URBS tracks.

URBS 3201 - Urban Studies Colloquium (1.0 cr)

or URBS 3202 - Urban Studies Colloquium (1.0 cr)

Women's Studies

(Gender, Women, and Sexuality Studies B.A. effective fall 2006)

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 36.

Degree: Bachelor of Arts.

Gender, Women, and Sexuality Studies offers an interdisciplinary curriculum that looks at issues of gender and sexuality in the United States and around the world, taking into account the intersections and interrelations of generation, economic status, race, geographic location, and other social and historical variables. Gender, Women, and Sexuality Studies also seeks to transform traditional fields of study by incorporating new data, methods, theories, and frameworks developed by feminist scholars.

In addition to the faculty in women's studies, several departments and centers lend their interdisciplinary teaching and advisory expertise to women's studies students. Among these are the Departments of African American and African Studies; American Studies; American Indian Studies; Anthropology; Chicano Studies; Communication Studies; Comparative Studies in Discourse and Society; English; French and Italian; German, Scandinavian, and Dutch; History; Philosophy; Sociology; and Spanish and Portuguese. Affiliated programs include the School of Nursing; the Hubert H. Humphrey Institute of Public Affairs; Center on Women and Public Policy; the Institute for Global Studies; the MacArthur Interdisciplinary Program on Global Change, Sustainability, and Justice; Minnesota Institute for Sustainable Agriculture; and the Tucker Center for Research on Girls and Women in Sport.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Students are required to take 4 semester(s) of any second language.

Students must complete 27-30 credits of required courses plus upper level electives as needed to reach 36 credits.

Required Courses

Major Courses

Courses in this list may not be used to fulfill the cultural pluralism, international studies, and advanced theory requirements.

Take four courses from the following list.

WOST 1001 - Introduction to Women's Studies, CD, SSCI (3.0-4.0 cr)

or WOST 1002 - Politics of Sex, CD, SSCI (3.0-4.0 cr)

WOST 3102W - Feminist Thought and Theory, C/PE, OH, WI (3.0-4.0 cr)

WOST 4402 - Rebels, Radicals, and Revolutionaries: History of Western Feminisms (3.0 cr)

WOST 1003W - Women Write the World, IP, LIT, WI (3.0-4.0 cr)

or WOST 3002 - Gender, Race, and Class: Women's Lives in the United States, C/PE, CD (3.0-4.0 cr)

or WOST 3003 - Gender and Global Politics, IP, SSCI (3.0-4.0 cr)

or WOST 3004W - Point/Counterpoint: Contemporary Feminist Debates, C/PE, OH, WI (3.0-4.0 cr)

Cultural Pluralism, International Studies, and Advanced Theory

Take one course from each category. Consult an adviser to use a course from one category to fulfill the requirement for another category. Courses cannot fulfill requirements for more than one category.

Cultural Pluralism

WOST 3203W - Skin, Sex, and Genes, CD, OH, WI (3.0 cr)

or WOST 3303W - Writing Differences: Literature by U.S. Women of Color, CD, LIT, WI (3.0 cr)

or WOST 3403W - Jewish Women in the United States, CD, HP, WI (3.0 cr)

or WOST 3409W - Asian American Women's Cultural Production, CD, WI (3.0 cr)

or WOST 3410 - La Chicana, CD (3.0 cr)

or WOST 3411 - Las Mujeres, CD (3.0 cr)

or WOST 3412 - American Indian Women: Ethnographic and Ethnohistorical Perspectives, CD, SSCI (3.0 cr)

or WOST 4302H - Honors: Women's Personal Narratives, H (3.0 cr)

or WOST 4401 - Chicana/Latina Cultural Studies, CD (3.0 cr)

or WOST 5403 - Chicana/Latina Feminisms (3.0 cr)

or WOST 5405 - Chicanas: Women and Work (3.0 cr)

International Studies

WOST 3003 - Gender and Global Politics, IP, SSCI (3.0-4.0 cr)

or WOST 3404 - International Lesbian and Queer Studies (3.0 cr)

or WOST 3405 - Latin American Women's Lives, IP (3.0 cr)

Advanced Theory

WOST 4103H - Honors: International Feminist Theories, H (3.0 cr)

or WOST 4302H - Honors: Women's Personal Narratives, H (3.0 cr)

or WOST 4401 - Chicana/Latina Cultural Studies, CD (3.0 cr)

or WOST 4403 - Queering Theory (3.0 cr)

or WOST 5101 - Feminist Approaches to Ethnography (3.0 cr)

or WOST 5102 - Feminist Approaches to History (3.0 cr)

or WOST 5103 - Feminist Pedagogies (3.0 cr)

or WOST 5201 - Global Processes and the Politics of Sexuality (3.0 cr)

or WOST 5300 - Communication and Gender (3.0 cr)

or WOST 5403 - Chicana/Latina Feminisms (3.0 cr)

Senior Project

The senior project must be completed in one of two 4xxx-5xxx courses. If the project is not done in one of the courses designed to produce the senior project (e.g. WOST 4108), it may be completed in any 4xxx-5xxx WOST course, by contract and with instructor approval.

WOST 4xxx
WOST 5xxx

Women's Studies Minor

Women's Studies

Requirements for this program are current for Fall 2006.

Required credits in this minor: 18.

The minor offers an interdisciplinary curriculum that looks at issues of women and gender in the United States and around the world, taking into account significant social and historical variables. Women's studies seeks to transform traditional fields of study by incorporating new data, methods, theories, and frameworks developed by feminist scholars.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

Required Courses

Minor Courses

Not more than one of the elective 3xxx-5xxx courses may be used from WOST 3002, 3003, and 3004.

WOST 1001 - Introduction to Women's Studies, CD, SSCI (3.0-4.0 cr)
or WOST 1002 - Politics of Sex, CD, SSCI (3.0-4.0 cr)

Take 15 or more credit(s) from the following:

WOST 3xxx
WOST 4xxx
WOST 5xxx

General Information

History

- University of Minnesota School of Business founded in 1919
- Named the Curtis L. Carlson School of Management in 1986
- Moved into current building in 1998

Faculty and Staff

- 108 faculty, including 22 endowed faculty
- 228 staff members

Alumni

- 43,000 alumni
- Located in 50 states, Washington D.C., and 70 foreign countries
- 85 Outstanding Achievement Awards

Rankings

- Ranked 12th among all business schools and 8th among all public business schools by U.S. News & World Report, 2006
- Part-time M.B.A. program ranked 15th in nation by U.S. News & World Report, 2006
- Executive M.B.A. program ranked 20th in the nation by U.S. News & World Report, 2006
- Full-time M.B.A. program ranked 23rd in the nation by U.S. News & World Report, 2006
- 2nd tier M.B.A. program, Business Week, 2004

Degrees Awarded

- Bachelor of science in business (B.S.B.)
- Master of business administration (M.B.A.)
- Executive M.B.A. (C.E.M.B.A.)
- Master of arts in human resources and industrial relations (M.A.H.R.I.R.)
- Master of business taxation (M.B.T.)
- Master of science in management of technology (M.S.-M.O.T.)
- Doctorate in business administration (Ph.D. Business)
- Doctorate in industrial relations (Ph.D. I.R.)

2005-2006 Enrollments

- 1700 undergraduates
- 202 full time M.B.A. students
- 1650 part time M.B.A. students
- 125 C.E.M.B.A. students
- 117 M.A.H.R.I.R. day students
- 71 M.A.H.R.I.R. evening students
- 124 M.B.T. students
- 60 M.S.-M.O.T. students
- 93 Ph.D.-business administration students
- 16 Ph.D.-industrial relations students

2005 Placement Statistics

Average salaries of new graduates:

- B.S.B.—\$43,659
- M.B.A.—\$82,436
- M.A.H.R.I.R.—\$61,013

Professional Education

- Executive Development Center
- Labor Education Service
- ISP (Healthcare Administration)

Carlson Sponsored International Programs

- Graduate student exchange programs in Australia, Belgium, Brazil, China, Costa Rica, Denmark, England, France, Japan, New Zealand, Spain, Sweden, and Switzerland
- Short-term global enrichment electives for undergraduate and graduate students, including the Vienna Seminar and Vienna Summer Program with Wirtschaftsuniversitat Wien in Austria, the Lyon Summer Program with Universite' Jean Moulin-Lyon III in France, the Copenhagen Summer Program at Copenhagen Business School in Denmark, and the Costa Rica Seminar with the Instituto Centroamericano de Administracion de Empresas
- Joint executive M.B.A. degree program with Warsaw School of Economics, Poland
- Joint executive M.B.A. degree program with Wirtschaftsuniversitat Wein, Austria
- Joint executive M.B.A. degree program with Lingnan College (University) in Guanzhou, China
- Undergraduate semester business exchange programs in Austria, Belgium, China, Denmark, England, France, Italy, Netherlands, Norway, New Zealand, Singapore, and Switzerland. Hundreds of other study abroad opportunities are also available through the University's Learning Abroad Center.)
- Faculty exchange programs in China, France, Japan, Austria, and Poland

Accreditation

The Carlson School of Management is accredited by AACSB International, the Association to Advance Collegiate Schools of Business. AACSB is the premier accrediting agency for undergraduate and graduate business administration and accounting programs.

Research Centers

- Accounting Research Center
- Center for Brand Management
- Center for Entrepreneurial Studies
- Center for the Financial Services Industry
- Medical Industry Leadership Institution
- Human Resources Research Institute
- Industrial Relations Center
- Logistics Management Research Center
- Management Information Systems Research Center
- Juran Center for Leadership in Quality
- Strategic Management Research Center

At the Carlson School of Management our mission is to provide the highest quality education for present and future business and academic leaders, and advance the understanding and practice of management through research and outreach.

Admission

Each year Carlson admits approximately 375 freshmen, 50 sophomores, and 120 juniors.

Freshman Admission

The Carlson School of Management admits students based on an overall assessment of the applicant's background and accomplishments as presented in the application materials. In addition to very strong academic records, applicants should have strong leadership and service experience. Among the factors considered in the application review are academic performance (i.e. completion of the high school preparation requirements, a strong background in math and science, high school class rank, ACT/SAT scores and competitiveness of curriculum), demonstrated leadership skills, and active participation in extra-curricular activities.

The following profile of the class of fall 2005 is intended as a guide to help students assess their qualifications for admission:

- Average high school rank 94th percentile
- Average ACT score 28

Applicants who submit a completed application by the December 15 priority application deadline will receive priority consideration for admission. Applications postmarked or completed after the priority deadline are reviewed on a space-available basis. Applications are available online and from the Office of Admissions, 240 Williamson Hall, 231 Pillsbury Drive S.E. Minneapolis, MN 55455 (612-625-2008 or 800-752-1000).

Admission at the Sophomore Year

A limited number of sophomores from within the University of Minnesota system are admitted each fall. To be considered for admission as a sophomore, the following standards apply:

- Completion of 30–49 credits (at least 50 percent of the total credits must be taken from the University of Minnesota)
- Completion of microeconomics, macroeconomics, and calculus

Students should complete both the *Application for Undergraduate Change of College* form and the *Carlson School Addendum*, available at the Student Service Center, 200 Fraser Hall or 130 West Bank Skyway, or the Carlson School Undergraduate Program Office, 1-105 Carlson School of Management, by the March 1 deadline.

Admission to Upper Division Carlson Major Programs

Students from within the University of Minnesota system and from other institutions may apply directly to the upper division program. Applications are reviewed for fall admission only and should be submitted by the March 1 deadline.

To be considered for admission at the junior level or higher, the following standards apply:

- Completion of 50 or more semester credits
- Completion of calculus, microeconomics, macroeconomics, business statistics, and introduction to financial accounting

Transfer Admission

Transfer admission is competitive and is based on an overall assessment of the applicant's background and accomplishments as presented in the application materials. Applicants who have completed the required tool courses are considered. Academic performance is assessed on factors such as overall grade point average and rigor of curriculum, progress in the tool courses, grade trends and completion patterns. In addition to very strong academic records, applicants should have strong leadership, service, and/or work experience. The application addendum, which must be completed in addition to the application, provides the basis for assessing an applicant's accomplishments outside the classroom.

Students who started their college career as freshmen in the University of Minnesota system may apply for transfer at the sophomore or junior level. Students from outside the University of Minnesota system are accepted only at the junior level or higher.

If transferring from within the University of Minnesota system, students should complete the Application for Undergraduate Change of College form and the Carlson School Addendum, available at the Student Service Center, 200 Fraser Hall or 130 West Bank Skyway, or the Carlson School Undergraduate Program Office, 1-105 Carlson School of Management.

If transferring from outside the University, students are encouraged to apply online at <http://admissions.tc.umn.edu>. Students may also obtain an admission application and the Application Addendum at the Office of Admissions, 240 Williamson Hall, 231 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-625-2008). Students must request that an official transcript from each college attended be sent directly from the college to the Office of Admissions. In addition, a nonrefundable application fee must accompany the application.

How Credits Transfer to Carlson

Transferable credits completed at another institution may be used to meet admission requirements. Junior- and senior-level business courses from other institutions are usually accepted for general elective credit but must be evaluated by an appropriate faculty member before they can be used in lieu of Carlson upper division course requirements. To have courses evaluated, students should bring their syllabi to the Undergraduate Program Office in 1-105 Carlson School of Management after admission to the program. The Carlson School does not normally accept lower division business coursework in lieu of upper division course requirements.

Note: If students have earned a bachelor's degree in business from another four-year institution, they may not earn a second bachelor's degree from the Carlson School.

Foreign Credits

If students earned credit at a recognized educational institution abroad, the credits may transfer to the Carlson School if the coursework meets specific lower division distribution requirements or upper division elective requirements, as determined by the admissions coordinator. If students completed credits at a foreign institution before admission to the University of Minnesota, the credits are generally accepted on the S-N grading system only.

Non-degree-seeking Students

If students are interested in taking courses but not in earning a degree and have a bachelor's degree or business experience and a strong undergraduate record, they may enroll as a non-degree-seeking student.

Students admitted as non-degree-seeking students who later decide to become degree candidates must satisfy Carlson's admission requirements and apply to transfer into a degree program.

Applications for admission with non-degree-seeking status are available in the Office of Admissions, 240 Williamson Hall.

Degrees

Baccalaureate Programs

A Carlson degree combines management and liberal arts coursework to provide students with strong communication, analytical, and creative problem-solving skills. The Carlson School offers programs leading to the bachelor of science in business (B.S.B.) with majors in accounting, actuarial science, entrepreneurial management, finance, human resources and industrial relations, risk management and insurance, management information systems, marketing, operations, supply chain management, and a self-designed general management major. International business may also be completed as a co-major with one of the majors listed above.

Because of the globalization of the U.S. economy, the school encourages all students to spend at least one semester in a study abroad program during their undergraduate program.

Minors

The Carlson School offers a management minor to students in other degree programs at the University of Minnesota, Twin Cities. Please see the Degree Programs section for details on the minor.

Certified Public Accountant (C.P.A.)

The Uniform CPA Examination is one of the "Three Es" (education, examination, and experience) that are required for licensure as a CPA. Individuals must pass the examination to qualify for licensure as certified public accountants in any of the 55 U.S. jurisdictions (the 50 states, the District of Columbia, Puerto Rico, U.S. Virgin Islands, Guam, and the Commonwealth of Northern Mariana Islands), but passing the examination is not, in itself, sufficient to meet requirements for licensure. Licensure requirements vary by jurisdiction, and are described on Boards of Accountancy Web sites. Links to these Web sites are available at www.nasba.org/nasbaweb.nsf/exam.

Graduate Programs

The Carlson School, in conjunction with the Graduate School, offers programs leading to the degrees of master of business administration (M.B.A.), master of business taxation (M.B.T.), and doctor of philosophy (Ph.D.). The Department of Industrial Relations, in conjunction with the Graduate School, offers programs in industrial relations leading to the degrees of master of arts (M.A.H.R.I.R.) and doctor of philosophy (Ph.D.). Complete descriptions of these programs and graduate-level courses in these areas are in the Graduate School Catalog as well as in the publications of each program.

Scholastic Standards and Policies

Academic Progress Standards for Carlson Students

Students in the Carlson School of Management are expected to make continued progress toward completion of their degree. Students entering as freshmen have specific progress standards to meet in order to matriculate to the sophomore year. The progress standards include completing a minimum of 30 semester credits including microeconomics, macroeconomics, calculus, and freshmen composition with a grade of C- or higher; maintaining a 3.00 GPA; and meeting with their academic adviser each term of their freshmen year.

Students not making satisfactory academic progress are contacted by their adviser to develop a plan of action. A copy of the plan is placed in the student's file.

Declaring a Major

All freshmen enter the program with premajor status. They may declare their major once they have earned at least 50 semester credits and have completed the required tool courses. Transfer students enter the program with a declared major. All students should have a declared major by the time they have earned 60 credits. There are no restrictions for entrance into any of the majors once students are admitted into the Carlson School.

To declare a major, students should complete the Major/Minor Declaration form available in the Undergraduate Program Office, 1-105 Carlson School of Management.

Grading Options

Carlson students must earn a minimum of 90 A-F credits. All coursework applied toward the major must be taken on the A-F grading basis.

Incompletes

Students may request a grade of incomplete when they have an emergency or extenuating circumstance that prevents them from completing one or two assignments or a final examination within the normal time frame. Students should work out the details of completing the coursework with the instructor prior to the end of the term, and must complete the work within a year. Incompletes are not awarded to students who are seeking more time to master course material in order to improve their grade. Students are not permitted to sit through a later section of a Carlson School course, or any portion of it, as a means of completing an incomplete. An incomplete changes to an F on the student's transcript 365 days after the end of the term in which the incomplete was given.

Petitions

The Student Scholastic Standing Committee, comprised of professional staff, meets on a weekly basis to review requests for exceptions to policies and program requirements. Students who submit a petition for an exception are generally required to include written documentation in support of their request.

The Scholastic Committee strives to uphold the integrity of University of Minnesota policies throughout the process, and treats each request in an unbiased and objective manner.

Leave of Absence

Students planning to leave school for a semester or more should contact an adviser in the Undergraduate Program Office and request to be placed on a temporary leave of absence. Undergraduates who have not been granted a leave of absence

and who do not register for two consecutive semesters (excluding summer session) are placed on “discontinued” status and need to contact the Undergraduate Program Office for approval to return.

Graduation Requirements

To graduate from the Carlson School students must

- complete a minimum of 120 credits. These credits include the required tool courses, liberal education requirements, and major requirements.
- complete a minimum of 60 credits in nonbusiness coursework. This includes liberal education coursework, statistics, and up to 8 credits of economics.
- complete the University of Minnesota liberal education requirements.
- complete at least half (24) of the upper division credits in the major at the Carlson School.
- complete a minimum of 30 credits at the University of Minnesota. Of the last 30 credits earned prior to the awarding of the degree, at least 15 of these must be earned at the University of Minnesota. (With prior approval, students may apply credits earned at an institution participating in the National Student Exchange Program and through foreign studies programs toward these 30 credits.)
- earn a C- or higher in all major coursework. Major coursework includes the tool courses and all upper division business coursework applied toward the major or minor.
- be in good academic standing with a minimum GPA of 2.00 in all work taken at the University of Minnesota.

Advising

The Carlson School offers centralized advising services to undergraduates currently enrolled or interested in its programs. Professional advisers work with students from the point of entry through graduation to provide individualized guidance to the student. Advisers use a holistic approach to insure a comprehensive and successful experience for each student. Students should prepare for appointments with their adviser by giving careful thought to possible course selections, program schedules, and short- and long-term educational and career goals.

Students enrolled in the Carlson School may schedule an appointment with a professional academic adviser by calling 612-624-3313 or coming in to 1-105 Carlson School of Management. Walk-in advising is also available on a daily basis for general questions or urgent matters.

Prospective transfer students may meet with an adviser on a walk-in basis during office hours, Monday through Friday, to discuss admission requirements.

All students are required to attend an orientation program prior to their first term in the school.

Honors

The Carlson School honors program is available to high achieving students. While the program requires hard work and a strong commitment to learning, it offers students access to a richer undergraduate experience by combining academic coursework and extracurricular activities.

Admission—The honors program is extremely competitive and all applicants must have excellent academic records and a history of high achievement. Freshmen who rank at the top of their high school class and have extensive leadership experience will be

invited to apply. Sophomores and juniors should apply online after establishing a strong college record.

Freshmen and Sophomores—This program provides an introductory honors experience by allowing high achieving freshmen and sophomores to study in smaller classes and interact more closely with faculty. Participants also receive extended library privileges and can live in honors housing. Although students do not receive an award designation at commencement, they are recognized for having completed the program on their official transcript.

Requirements:

- Complete the Emerging Leadership Program
- Complete four honors courses, selecting from the list below:
ECON 1101H - Microeconomics (4 cr) or ECON 1104
ECON 1102H - Macroeconomics (4 cr) or ECON 1105
OMS 2550H - Honors: Business Statistics: Data Sources, Presentation, and Analysis (4 cr)
ENG 1011H - Honors: University Writing and Critical Reading (4 cr)
MATH 1571H - Honors Calculus I (4 cr)
ACCT 2050H - Financial Accounting (4 cr)
College of Liberal Arts honors colloquia or liberal arts honors course
- Maintain an overall GPA of 3.50 during the freshman and sophomore years.

Juniors and Seniors—This program gives high achieving juniors and seniors the opportunity to study in smaller classes, interact more closely with faculty, and work with other high achieving students. Students do not need to complete the freshman/sophomore program to be admitted to the junior/senior program. Students who complete the program will receive an honors designation on their diploma.

Requirements:

- Complete the following three courses:
BA 3200H—Leadership Colloquium (2 cr)
BA 4000H—Honors Seminar (3 cr)
MGMT 4004V—Honors: Business Policy: Strategy Formulation and Implementation (3 cr)
- Complete two courses from the following:
BA 3033V—Honors: Business Communications (3 cr)
MGMT 3040H—Honors: Understanding the International Environment of Firms, International Business (3 cr)
BA 3990H—Honors topics (2-4 cr) (topics vary from semester to semester)
3xxx or 5xxx College of Liberal Arts honors seminar
- Complete at least 60 credits at the University of Minnesota.
- Achieve a GPA in the final 60 credits to qualify for graduation with Latin honors (as established by the University).
3.50 GPA—cum laude
3.66 GPA—magna cum laude
3.75 GPA—summa cum laude

Emerging Leadership Program—This program encourages high achieving students to engage in extracurricular activities that foster intellectual and personal growth. Activities promote the development of the characteristics associated with productive, ethical, and successful leaders. The program is open to students with an overall GPA of 3.50. To earn the Emerging Leadership designation, students must complete and document a minimum of 15 hours of activity in each of the following categories, plus an additional 10 hours of activity in one of them: leadership, community service, diversity, career development. After the activities are completed, students present their program to a panel of alumni, staff, and an honors board member.

Graduating with Honors—Students may be awarded Latin honors by completing the honors program above. Students may also qualify to graduate with high distinction or distinction without completing the honors requirements. They must complete at least 60 credits at the University of Minnesota to qualify. High distinction—3.900 GPA, distinction—3.750 GPA.

Special Learning Opportunities and Resources

The Carlson School provides programs and services that promote a positive learning experience to help foster student success. The comprehensive programs offered by the undergraduate program range from workshops, student organizations, retreats, case competitions, and national leadership conferences. Activities vary in length and intensity and are designed to provide students at all levels with leadership development opportunities.

Mentorship Program—This program provides valuable career exploration and professional development opportunities by matching students with successful professionals from the Twin Cities business community. Open to sophomores, juniors, and seniors, volunteer mentors guide students to become more focused in their professional goals. The program begins each fall, with activities continuing throughout the fall and spring semesters, and concludes in mid-April.

Technology Support—The Carlson School's Office of Information Technology provides a variety of services and programs to Carlson students, faculty, and staff. Workshops on basic computing skills, including the use of word processing, spreadsheet, e-mail, and database systems, are offered on a regular basis. Equipment is available for students to check out. In addition, computer labs specifically designated for Carlson undergraduate students' use are available in the school.

Ambassador Program—Carlson's Undergraduate Ambassador Program is a service organization focused on leadership and service. The program serves on the college, University, and community. Student ambassadors are afforded a unique opportunity to interact with legislators, deans, corporate and community members, and prospective and fellow students on a frequent basis. Student volunteers are selected in September to serve one academic year, renewable once. Time commitment for the ambassador program varies depending on the time of year; however, students on average commit to 5 to 8 hours per week. The program begins in September and ends at May commencement. Summer commitments are not part of the ambassador program.

Carlson's ambassadors enthusiastically and professionally represent the college at a variety of activities throughout the academic year. They serve as student representatives at committee meetings, greet special guests of the school, build strong relationships with the University community, meet with corporate recruiters, and help plan and organize special events at the Carlson School.

Business Week—As one of the most highly profiled annual events at the Carlson School of Management, Business Week provides a great opportunity for companies who recruit at the Carlson School and students to create or further establish a relationship with one another. Each year's celebration includes a variety of events, both social and professional, organized to recognize the many achievements throughout the academic and business community.

Case Competitions—Each academic year seniors are provided the opportunity to compete in internal case competitions with other Carlson undergraduate students. From this pool of students a select few are chosen to compete in national case competitions. The national case competition locations vary by year. Typically, internal case competitions are held during September.

Leadership Conferences—The undergraduate program selects a few students each year to participate in national leadership conferences. Students who are chosen for this opportunity are typically juniors who have demonstrated exceptional leadership abilities. Conferences vary on location and time of year.

Scholarships

A variety of scholarships—both need- and merit-based—are available for current and prospective Carlson students. The priority deadline for most freshman scholarships is January 15. Applications are available from the Office of Admissions, 240 Williamson Hall (612-625-2008). Information and scholarship applications for continuing students are available online beginning in March of each year.

International Programs

Carlson School students in all majors are encouraged to study abroad. The undergraduate program is committed to having 50 percent or more of its students participate in a study abroad program as part of their undergraduate experience. In addition to providing a firsthand experience of today's complex global economy, international study programs allow students to fulfill liberal education and major-related requirements, as well as elective credits. Semester-length programs, exchange programs, and several short-term global enrichment electives are available to students. All students with an international business major participate in a study abroad experience.

Career Information

Carlson School students gain knowledge, practical skills, and real-life business experiences that today's recruiters are looking for. In addition to developing strong communication and teamwork skills, students can participate in leadership and mentorship programs, connect with alumni, and use the Business Career Center. The Business Career Center (1-110 Carlson School of Management, 612-624-0011) offers a wide range of services, including career workshops, mock interviews, a career skills course (BA 3000), national site and industry visits, networking events, internship and full-time job postings through the Carlson Automated Recruiting System (CARS), and individual career coaching. Last year, more than 70 percent of Carlson students had jobs at graduation, far surpassing the national average of 45 percent.

Student Organizations

With more than 500 organizations at the University of Minnesota—dozens of which are affiliated with the Carlson School—students can get involved and connect with others who share their interests. Student organizations associated with the Carlson School include:

Actuarial Club consists of actuary, math, and business students from freshman to graduate status. The club holds monthly meetings and features speakers from many different consulting and insurance companies. There are also study groups, social events, and volunteer opportunities. The main event is the Actuarial Science Career Fair held every November.

Alpha Kappa Psi, a coeducational, national business fraternity, brings together students with a common interest in business for scholastic and social activities. Prominent men and women in business are featured at meetings throughout the year. Members participate in tours, seminars, and community service projects. Meetings are held Sunday evenings at the chapter house, 1116 Fifth Street S.E., Minneapolis. Visitors are welcome.

American Marketing Association (AMA) is a student-run organization whose main goal is to promote a better understanding of marketing and its role in the business world. AMA provides opportunities to hear area business leaders speak on current marketing issues, tour area firms, and make valuable business contacts. AMA is a great way to meet fellow marketing students, learn interviewing tips, and gain knowledge of careers in marketing.

Beta Alpha Psi (BAP) is a national, professional honorary organization made up of accounting majors. BAP introduces the aspiring accountant to the business world by encouraging interaction among students, faculty, alumni, and area business people. This is a great way to make new friends, get acquainted with professionals in the field, and learn about careers in accounting.

Beta Gamma Sigma encourages and rewards scholarship, promotes advancement of education in business, and fosters integrity in the conduct of business operations. Membership in Beta Gamma Sigma is the highest national recognition a student can receive in an undergraduate or master's program in business or management. To be eligible for membership students must rank in the upper 7 percent of their junior class, upper 10 percent of their graduating senior class, or upper 20 percent of their graduating master's class. Members are elected to membership and publicly recognized during spring semester.

Business Association for Multicultural Students (BAM) is a non-major specific organization. It exposes members to local companies who discuss their line of work, what employment opportunities they have, and what they look for in potential employees. Although most members are students of color,

anyone is welcome to join. BAM sponsors tours of local corporations, guest speakers, and social events during the academic year.

Business Board (B-Board) is the student government of the Carlson School undergraduate program that sets policies that govern student organizations. Members serve on various school committees and plan activities to foster interaction among students and faculty. All students registered in the Carlson School are urged to inquire about nomination and election to the Board. Non-board members are welcome to participate in all B-Board meetings and events. Meetings are held on Wednesdays at 5:30 p.m. in the Undergraduate Student Lounge, Suite 1-112, at the Carlson School.

Club MIS is a student organization that offers opportunities to learn about the MIS industry. It's a fun, relaxing environment to meet other students interested in MIS. At most meetings, there is a company presentation in addition to regular meeting activities. This provides students with a great opportunity to network and learn about companies they may be interested in for future internships or jobs. Club MIS also sponsors a variety of social activities, such as intramural teams, barbecues, dinners, and an annual ski-trip.

Consulting Club is for highly driven students interested in a consulting career. To create a dynamic and diverse club, students from all majors across the University are welcome. The club acts as a liaison between students and consulting firms by hosting various opportunities and events for students to acquire and refine their skills to be a competitive individual in the consulting field.

Delta Sigma Pi is an international professional business fraternity for men and women that offers everything from community service opportunities to intramural athletics. Meetings are held on Monday evenings.

Entrepreneurship Club is dedicated to teaching students how to become financially independent, successful entrepreneurs. The Entre Club is a group of student entrepreneurs who have come together to bring the spirit of entrepreneurship to the University by putting students and successful business owners together. Every week, members network with small business owners, presidents/CEOs, venture capitalists, restaurant/café owners, home business owners, bankers, investors, real estate investors, tax accountants, finance specialists, authors, and local leaders. All University students are welcome.

GLOBE provides opportunities for Carlson students, faculty, and staff interested in international business to learn about the topic through monthly speakers and various cultural activities. Globe's mission is to promote international activities that integrate Carlson School students, community leaders, faculty, and staff for greater educational and social opportunities.

Honors Association believes that in addition to achieving excellent academic records, honors students in business should provide leadership and support activities outside of the classroom. You must be in the honors program to be a member of the Honors Association. See the Honors section for more information.

Investment and Finance Organization (InFO) is open to all students who wish to meet professionals within various areas of the financial industry. InFO exposes students to speakers from investing and finance companies that give valuable insight into career paths. InFO also sponsors social events to help students acquaint themselves with other students that have similar interests. Weekly meetings involve in-depth discussions about the stock market, investing, bonds, commodities, and financial planning.

Phi Beta Lambda (PBL) is the collegiate version of the Future Business Leaders of America (FBLA). It provides students interested in business-related careers the opportunity to sharpen their communication, leadership, and analytical skills through a series of local and national competitions. This organization is open to all University students and seeks participation particularly from freshmen and sophomores.

Pi Sigma Epsilon (PSE) is the only national, professional, and co-educational fraternity in marketing, sales management, and selling. The University of Minnesota chapter was founded in 2003. This organization provides great leadership, professional and career opportunities, workshops, site visits, and social events. PSE's mission is to develop foundations of leadership and professionalism, while shaping members into able businessmen/women through real-world and educational experience within the fields of marketing and sales.

Real Estate Club is a group of highly motivated undergraduate students who are devoted to learn how to begin investing in real estate and firmly believe that real estate should secure an integral part in any serious investor's portfolio. Join the Real Estate Club at weekly meetings to meet some of Minnesota's most accomplished real estate professionals to. All majors are welcome.

Society for the Advancement of Management (SAM) welcomes management and non-management students interested in becoming involved in the business community. Members learn practical business techniques by interacting with practicing professionals and other students.

Society for Human Resource Management (SHRM) promotes mutually beneficial interaction between HR students and practitioners. Membership offers students the opportunity to supplement their classroom experiences with real-world knowledge and hands-on experiences.

Student Association for Accounting (SAFA) provides opportunities for accounting and finance students to meet members of the Twin Cities business community through a variety of social and professional events in a casual, relaxed environment. Events include a fall golf tournament as well as many smaller events with accounting and finance firms. SAFA has 10 executive committee members, allowing many people to plan events and take on various leadership roles.

Student Association for Nonprofit Enterprise (SANE) is dedicated to increasing nonprofit business awareness through interactions with the community and the University. SANE's mission is to give University students the opportunity to give back to the community through volunteer services and to help the Carlson School integrate a nonprofit focus into the undergraduate program.

Supply Chain and Operations Club is a bridge for students between the academic world and the professional world. All majors are welcomed and encouraged to join. The club has numerous ties with professional organizations in the Twin Cities and regularly attends events with business professionals from the local community. Speaker events and site visits are held during every semester and there are numerous opportunities for networking and leadership. With the growing importance of lean supply chain management and the continual drive for quality and efficient operations, membership in the undergraduate Supply Chain and Operations Club indicates sensitivity to the ever-changing business environment.

Truth in Business (TiB) is a Christian business student organization that focuses on faith in the marketplace. Through weekly meetings, lectures, discussions, social events, and mentoring relationships students will gain the tools they need to be successful living out their faith in a bottom line business world. Open to all University students and welcome people of all denominations and beliefs.

Women in Business (WIB) is dedicated to bringing women together in business-related fields through networking, speakers, volunteering, and events. WIB strives to make opportunities in the business world for women more apparent and help overcome challenges encountered. WIB helps to develop skills to succeed in the business world and facilitates personal and professional growth. All majors and sexes are welcome.

Degree Programs and Minors

Accounting B.S.B.

Accounting

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 24.

Degree: Bachelor of Science in Business.

Accounting is the process of gathering financial information and presenting it in a manner that will help others make better decisions. Accountants also are frequently called upon to analyze financial information and provide important business advice. The terms and definitions that have emerged from the discipline of accounting are used widely within industry. In fact, accounting is commonly described as the “language of business.”

With increased automation over the years, the role of accountants has changed dramatically. Accountants have become recognized as valued business advisers and important members of an organization’s management team.

The major areas of study within the accounting curriculum are financial accounting, management accounting, income taxation, auditing, and business law.

The Carlson School Honors program offers students access to a richer undergraduate experience. Honors students have closer contact with their professors. They work in smaller classes and they put their skills to work for the benefit of the community. The program requires hard work and a strong commitment to learning.

Admission Requirements

Students must complete 50 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

Freshmen are admitted to Carlson School of Management, but do not declare a major until 50 credits have been completed. Part of the 50 credits should include the five tool courses and liberal education requirements. Those transferring in as sophomores must complete microeconomics, macroeconomics, and calculus before admission. Juniors and above must complete microeconomics, macroeconomics, calculus, business statistics, and accounting before admission.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Tool Courses

An adviser-approved statistics course may be taken in place of OMS 2550.

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)

or ECON 1101H - Honors Course: Principles of Microeconomics, IP, SSCI, H (4.0 cr)
or ECON 1104 - Principles of Microeconomics, IP, SSCI (4.0 cr)
APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
or ECON 1102H - Honors: Principles of Macroeconomics, IP, SSCI, H (4.0 cr)
or ECON 1105 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
MATH 1142 - Short Calculus, MATH (4.0 cr)
or MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
or OMS 2550H - Honors: Business Statistics: Data Sources, Presentation, and Analysis, H (4.0 cr)

Technology and Psychology

BA 1001 is required for students admitted as freshmen and recommended for others who need additional background in technology.

BA 1001 - Introduction to Information Technology (1.0 cr)
PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

General Requirements

Recommended freshman writing course(s) for this program:
ENG 1011, 1012, 1013, or 1014

Program Requirements

Effective July 1, 2006: Students who wish to earn the Certified Public Accountant (CPA) certification will need to complete 150 credit hours of coursework.

Required Courses

Functional Core

ACCT 3001 - Introduction to Management Accounting (3.0 cr)
BA 3000 - Career Skills (1.0 cr)
FINA 3001 - Finance Fundamentals (3.0 cr)
HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
IDSC 3001 - Information Systems for Business Processes and Management (3.0 cr)
MGMT 3001 - Fundamentals of Management (3.0 cr)
MKTG 3001 - Principles of Marketing (3.0 cr)
OMS 3001 - Introduction to Operations Management (3.0 cr)

Communication, International, Business Policy Core

BA 3033W - Business Communication, WI (3.0 cr)
or BA 3033V - Honors: Business Communication, WI, H (3.0 cr)
MGMT 3040 - Understanding the International Environment of Firms: International Business, IP (3.0 cr)
or MGMT 3040H - Honors: Understanding the International Environment of Firms, International Business, H (3.0 cr)
MGMT 4004W - Business Policy: Strategy Formulation and Implementation, WI (3.0 cr)
or MGMT 4004V - Honors: Business Policy: Strategy Formulation and Implementation, WI, H (3.0 cr)

Major Courses

ACCT 5101 - Intermediate Accounting I (4.0 cr)
ACCT 5102 - Intermediate Accounting II (4.0 cr)
ACCT 5125 - Auditing Principles and Procedures (4.0 cr)

ACCT 5135 - Fundamentals of Federal Income Tax (4.0 cr)
 ACCT 3201 - Intermediate Management Accounting (2.0 cr)
 BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
 ACCT 5126 - Internal Auditing (2.0 cr)
 or ACCT 5160 - Financial Statement Analysis (2.0 cr)
 or ACCT 5180 - Consolidations and Advanced Reporting (2.0 cr)
 or ACCT 5236 - Introduction to Taxation of Business (2.0 cr)
 or ACCT 5271 - Accounting Information Systems (2.0 cr)
 or ACCT 5310 - International Accounting (2.0 cr)
 or ACCT 5320 - Current Topics in Accounting (2.0 cr)

Accounting Minor

Accounting

Requirements for this program are current for Fall 2006.

Required credits in this minor: 12.

See major description for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

This minor is only available to students admitted to another degree program in the Carlson School of Management.

Required Courses

Minor Courses

ACCT 5101 - Intermediate Accounting I (4.0 cr)
 ACCT 5102 - Intermediate Accounting II (4.0 cr)
Take 4 or more credit(s) from the following:
 ACCT 3201 - Intermediate Management Accounting (2.0 cr)
 ACCT 5135 - Fundamentals of Federal Income Tax (4.0 cr)
 ACCT 5160 - Financial Statement Analysis (2.0 cr)
 ACCT 5180 - Consolidations and Advanced Reporting (2.0 cr)
 ACCT 5310 - International Accounting (2.0 cr)

Actuarial Science B.S.B.

Finance

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 23.

Degree: Bachelor of Science in Business.

Actuarial science applies mathematics to insurance problems. Practicing actuaries calculate insurance premiums, policy and loss reserves (liabilities), and estimate costs of future losses.

Students are introduced to professional organizations, including The Society of Actuaries, American Academy of Actuaries, Casualty Actuarial Society, Conference of Consulting Actuaries, and American Society of Pension Actuaries. Students typically take at least two professional actuarial examinations before graduation.

There are multiple career opportunities for students with the mathematics, business, and communication skills developed through the actuarial science major. The insurance and actuarial community strongly supports this program.

The Carlson School Honors program offers students access to a richer undergraduate experience. Honors students have closer contact with their professors. They work in smaller classes and they put their skills to work for the benefit of the community. The program requires hard work and a strong commitment to learning.

Admission Requirements

Students must complete 50 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

Freshmen are admitted to Carlson School of Management, but do not declare a major until 50 credits have been completed. Part of the 50 credits should include the five tool courses and liberal education requirements. Those transferring in as sophomores need to complete microeconomics, macroeconomics, and calculus before admission. Juniors and above need to complete microeconomics, macroeconomics, calculus, business statistics, and accounting before admission.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Tool Courses

An adviser-approved statistics course may be taken in place of OMS 2550. MATH 1271 is recommended instead of MATH 1142 and is a prerequisite for future math courses in the major.

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
 APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 or ECON 1101H - Honors Course: Principles of Microeconomics, IP, SSCI, H (4.0 cr)
 or ECON 1104 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
 or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 or ECON 1102H - Honors: Principles of Macroeconomics, IP, SSCI, H (4.0 cr)
 or ECON 1105 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
 OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
 or OMS 2550H - Honors: Business Statistics: Data Sources, Presentation, and Analysis, H (4.0 cr)

Technology and Psychology

BA 1001 is required for students admitted as freshmen and recommended for others who need additional background with technology.

BA 1001 - Introduction to Information Technology (1.0 cr)
 PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

Preparatory Mathematics

These courses are prerequisites to mathematics courses for the major.

MATH 1272 - Calculus II (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 MATH 2263 - Multivariable Calculus (4.0 cr)

General Requirements

Recommended freshman writing course(s) for this program:
 ENGC 1011, 1012, 1013, or 1014

Program Requirements

Required Courses

Functional Core

ACCT 3001 - Introduction to Management Accounting (3.0 cr)
 BA 3000 - Career Skills (1.0 cr)
 FINA 3001 - Finance Fundamentals (3.0 cr)

 IDSC 3001 - Information Systems for Business Processes and Management (3.0 cr)
 MGMT 3001 - Fundamentals of Management (3.0 cr)
 MKTG 3001 - Principles of Marketing (3.0 cr)
 OMS 3001 - Introduction to Operations Management (3.0 cr)

Communication, International, Business Policy Core

BA 3033W - Business Communication, WI (3.0 cr)
 or BA 3033V - Honors: Business Communication, WI, H (3.0 cr)
 MGMT 3040 - Understanding the International Environment of Firms: International Business, IP (3.0 cr)
 or MGMT 3040H - Honors: Understanding the International Environment of Firms, International Business, H (3.0 cr)
 MGMT 4004W - Business Policy: Strategy Formulation and Implementation, WI (3.0 cr)
 or MGMT 4004V - Honors: Business Policy: Strategy Formulation and Implementation, WI, H (3.0 cr)

Major Courses

MATH 4065 - Theory of Interest (3.0 cr)
 MATH 5067 - Actuarial Mathematics I (4.0 cr)
 MATH 5068 - Actuarial Mathematics II (4.0 cr)
 MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
 MATH 5652 - Introduction to Stochastic Processes (4.0 cr)
 STAT 4101 - Theory of Statistics I (4.0 cr)
 STAT 4102 - Theory of Statistics II (4.0 cr)
 Adviser-approved probability course
 STAT 5101 - Theory of Statistics I (4.0 cr)
 or STAT 5102 - Theory of Statistics II (4.0 cr)

Electives

Take 4 or more credit(s) from the following:
 INS 4100 - Corporate Risk Management (2.0 cr)
 INS 4101 - Employee Benefits (2.0 cr)
 INS 4200 - Insurance Theory and Practice (2.0 cr)
 INS 4201 - Personal Financial Management (2.0 cr)
 INS 4202 - Personal Financial Planning 2: Tax and Estate Planning Techniques (2.0 cr)

Actuarial Science Minor

Finance

Requirements for this program are current for Fall 2006.
 Required credits in this minor: 15.
 See major description for more information.

Entrepreneurial Management B.S.B.

Strategic Management & Organization

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 20.

Degree: Bachelor of Science in Business.

Businesses, large and small, are coming to understand a new environment of rapid change. They are being challenged to take advantage of new markets and greater demands on current products. Their ability to adapt to a rapidly changing environment can yield great rewards, but it requires multifunctional and multitasking individuals able to form and develop new businesses and comfortably exist within a sea of change.

The entrepreneurial management major provides current and future business professionals with the necessary skills and tools to successfully form and develop businesses and function as entrepreneurs or as productive members of entrepreneurial, emerging, or aggressively-positioned companies. These organizations require individuals that have the ability to manage risk, multitask across functional boundaries, and creatively engage and adapt to an environment that is constantly changing.

The Carlson School Honors program offers students access to a richer undergraduate experience. Honors students have closer contact with their professors. They work in smaller classes and they put their skills to work for the benefit of the community. The program requires hard work and a strong commitment to learning.

Admission Requirements

Students must complete 50 credits before admission to the program.

Entrepreneurial Management Minor

Strategic Management & Organization

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

See major description for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

This minor is only available for students admitted to a degree program in the Carlson School of Management.

Required Courses

Minor Courses

Students minoring in entrepreneurial management must take a minimum of 10 credits from the required courses below, and an additional 6 credits from either the required courses or elective courses listed below. Required courses may not be used to fulfill the 6 credits of electives requirement.

Take 10 or more credit(s) from the following:

MGMT 3010 - Introduction to Entrepreneurship (4.0 cr)
 MGMT 4008 - Entrepreneurial Management (4.0 cr)
 MGMT 4050 - Management of Innovation and Change (2.0 cr)
 MGMT 4177 - The Business Plan (2.0 cr)

Electives

Take 6 or more credit(s) from the following:

ACCT 3201 - Intermediate Management Accounting (2.0 cr)
 ACCT 5100 - Corporate Financial Reporting (4.0 cr)
 ACCT 5160 - Financial Statement Analysis (2.0 cr)
 BLAW 3058 - The Law of Contracts and Agency (4.0 cr)
 FINA 4241 - Corporate Financing Decisions (4.0 cr)

FINA 4242 - Corporate Investment Decisions (4.0 cr)
 FINA 4641 - International Finance and Risk Management (4.0 cr)
 HRIR 3031 - Staffing and Selection: Strategic and Operational Concerns (2.0 cr)
 IDSC 3202 - Analysis and Modeling for Business Systems Development (4.0 cr)
 INS 4100 - Corporate Risk Management (2.0 cr)
 INS 4201 - Personal Financial Management (2.0 cr)
 MGMT 3010 - Introduction to Entrepreneurship (4.0 cr)
 MGMT 4002 - Managerial Psychology (4.0 cr)
 MGMT 4008 - Entrepreneurial Management (4.0 cr)
 MGMT 4050 - Management of Innovation and Change (2.0 cr)

 OMS 3041 - Project Management (2.0 cr)
 OMS 3056 - Operations Planning and Control (4.0 cr)

Finance B.S.B.

Finance

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 20.

Degree: Bachelor of Science in Business.

The finance major develops students' understanding of principles and techniques of effective financial decision making. It provides students with the skills and knowledge required to assist businesses, governments, or individuals in answering questions regarding raising funds, making investments, evaluating performance, and distributing profits.

The Carlson School Honors program offers students access to a richer undergraduate experience. Honors students have closer contact with their professors. They work in smaller classes and they put their skills to work for the benefit of the community. The program requires hard work and a strong commitment to learning.

Admission Requirements

Students must complete 50 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

Freshmen are admitted to Carlson School of Management, but do not declare a major until 50 credits have been completed. Part of the 50 credits should include the five tool courses and liberal education requirements. Those transferring in as sophomores need to complete microeconomics, macroeconomics, and calculus before admission. Juniors and above need to complete microeconomics, macroeconomics, calculus, business statistics, and accounting before admission.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Tool Courses

An adviser-approved statistics course may be taken in place of OMS 2550.

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
 APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
 or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)

or ECON 1101H - Honors Course: Principles of Microeconomics, IP, SSCI, H (4.0 cr)

or ECON 1104 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
 or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 or ECON 1102H - Honors: Principles of Macroeconomics, IP, SSCI, H (4.0 cr)
 or ECON 1105 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
 or MATH 1572H - Honors Calculus II, H (4.0 cr)
 OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
 or OMS 2550H - Honors: Business Statistics: Data Sources, Presentation, and Analysis, H (4.0 cr)

Technology and Psychology

BA 1001 is required for students admitted as freshmen and recommended for others who need additional background with technology.

BA 1001 - Introduction to Information Technology (1.0 cr)
 PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

General Requirements

Recommended freshman writing course(s) for this program: ENG C 1011, 1012, 1013, or 1014

Program Requirements

Required Courses

Functional Core

ACCT 3001 - Introduction to Management Accounting (3.0 cr)
 BA 3000 - Career Skills (1.0 cr)
 FINA 3001 - Finance Fundamentals (3.0 cr)
 HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
 IDSC 3001 - Information Systems for Business Processes and Management (3.0 cr)
 MGMT 3001 - Fundamentals of Management (3.0 cr)
 MKTG 3001 - Principles of Marketing (3.0 cr)
 OMS 3001 - Introduction to Operations Management (3.0 cr)

Communication, International, Business Policy Core

BA 3033W - Business Communication, WI (3.0 cr)
 or BA 3033V - Honors: Business Communication, WI, H (3.0 cr)
 MGMT 3040 - Understanding the International Environment of Firms: International Business, IP (3.0 cr)
 or MGMT 3040H - Honors: Understanding the International Environment of Firms, International Business, H (3.0 cr)
 MGMT 4004W - Business Policy: Strategy Formulation and Implementation, WI (3.0 cr)
 or MGMT 4004V - Honors: Business Policy: Strategy Formulation and Implementation, WI, H (3.0 cr)

Major Courses

FINA 4241 - Corporate Financing Decisions (4.0 cr)

Take the following course or course pair:

ACCT 5100 - Corporate Financial Reporting (4.0 cr)
 or
 ACCT 5101 - Intermediate Accounting I (4.0 cr)
 ACCT 5102 - Intermediate Accounting II (4.0 cr)

Electives

Take 12 or more credit(s) from the following:

ACCT 5160 - Financial Statement Analysis (2.0 cr)
 FINA 4121 - Financial Markets and Interest Rates (2.0 cr)
 FINA 4122 - Banking Institutions (2.0 cr)
 FINA 4242 - Corporate Investment Decisions (4.0 cr)
 FINA 4321 - Portfolio Management and Performance Evaluation (2.0 cr)

FINA 4322 - Security Analysis (2.0 cr)
 FINA 4541 - Futures, Options, and Other Derivative Securities (4.0 cr)
 FINA 4641 - International Finance and Risk Management (4.0 cr)

Finance Minor

Finance

Requirements for this program are current for Fall 2006.

Required credits in this minor: 12.

See major description for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

This minor is only available for students admitted to a degree program in the Carlson School of Management.

Required Courses

Minor Courses

FINA 4241 - Corporate Financing Decisions (4.0 cr)
Take 8 or more credit(s) from the following:
 ACCT 5100 - Corporate Financial Reporting (4.0 cr)
 FINA 4121 - Financial Markets and Interest Rates (2.0 cr)
 FINA 4122 - Banking Institutions (2.0 cr)
 FINA 4242 - Corporate Investment Decisions (4.0 cr)
 FINA 4321 - Portfolio Management and Performance Evaluation (2.0 cr)
 FINA 4322 - Security Analysis (2.0 cr)
 FINA 4541 - Futures, Options, and Other Derivative Securities (4.0 cr)
 FINA 4641 - International Finance and Risk Management (4.0 cr)

General Management Self-Designed B.S.B.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 16.

Degree: Bachelor of Science in Business.

The general management self-designed major is intended for students who wish to develop an area of expertise outside of the major programs offered by the Carlson School. Students who pursue this major should have a particular career goal or objective in mind that can best be addressed through a self-designed program of study.

Admission Requirements

Students must complete 50 credits before admission to the program.

Freshmen are admitted to Carlson School of Management, but do not declare a major until 50 credits have been completed. Part of the 50 credits should include the 5 tool courses and liberal education requirements.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Tool Courses

An adviser-approved statistics course may be taken in place of OMS 2550.

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)

 MGMT 4004W - Business Policy: Strategy Formulation and Implementation, WI (3.0 cr)
 or MGMT 4004V - Honors: Business Policy: Strategy Formulation and Implementation, WI, H (3.0 cr)

Major Courses

There are no specific course requirements for the general management self-designed major. Each student designs his or her own course of study in consultation with their adviser.

Human Resources and Industrial Relations B.S.B.

Industrial Relations Center

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 16.

Degree: Bachelor of Science in Business.

The human resources and industrial relations (HRIR) major prepares graduates for positions involving the recruitment and/or selection of new employees, identification of training needs among new and current workers, the functional operation of compensation systems and benefits packages, and the management of employee relations programs where workers are represented by trade unions. Human resource specialists have progressed from record keepers to strategic partners in the areas of finance and marketing as organizations recognize the importance of qualified people to their success. Today businesses compete as much based on human capital as they do on physical capital. The Carlson School Honors program offers students access to a richer undergraduate experience. Honors students have closer contact with their professors. They work in smaller classes and they put their skills to work for the benefit of the community. The program requires hard work and a strong commitment to learning.

Admission Requirements

Students must complete 50 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

International Business B.S.B.

Curtis L. Carlson School of Management - Adm

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 16.

Degree: Bachelor of Science in Business.

Carlson's international mission is "to ensure that its faculty and students obtain the necessary understanding of and appreciation for the impact of a global economy on the teaching and practice of management...." The major in international business follows this mission and allows students to combine study abroad experience(s) with coursework in international business and economics, and language.

The international business program may only be completed as a second major in combination with another Carlson School major.

The Carlson School Honors program offers students access to a richer undergraduate experience. Honors students have closer contact with their professors. They work in smaller classes and they put their skills to work for the benefit of the community. The program requires hard work and a strong commitment to learning.

Admission Requirements

Students must complete 50 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

Freshmen are admitted to Carlson School of Management, but do not declare a major until 50 credits have been completed. Part of the 50 credits should include the five tool courses and liberal education requirements. Those transferring in as sophomores need to complete microeconomics, macroeconomics, and calculus before admission. Juniors and above need to complete microeconomics, macroeconomics, calculus, business statistics, and accounting before admission.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Tool Courses

An adviser-approved statistics course may be taken in place of OMS 2550.

- ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
- APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)
- or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
- or ECON 1101H - Honors Course: Principles of Microeconomics, IP, SSCI, H (4.0 cr)
- or ECON 1104 - Principles of Microeconomics, IP, SSCI (4.0 cr)
- APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
- or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
- or ECON 1102H - Honors: Principles of Macroeconomics, IP, SSCI, H (4.0 cr)
- or ECON 1105 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

- or MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
- or MATH 1572H - Honors Calculus II, H (4.0 cr)
- OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
- or OMS 2550H - Honors: Business Statistics: Data Sources, Presentation, and Analysis, H (4.0 cr)

Technology and Psychology

BA 1001 is required for students admitted as freshmen and recommended for others who need additional background with technology.

- BA 1001 - Introduction to Information Technology (1.0 cr)
- PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

General Requirements

Recommended freshman writing course(s) for this program: ENGC 1011, 1012, 1013, or 1014

Program Requirements

Students are required to take 4 semester(s) of any second language.

The international business major is completed as a co-major within the Carlson School. Students complete coursework abroad or at the University of Minnesota and should satisfy the following requirements:

- At least one course with an international focus supporting or broadening the student's knowledge of their primary major.
- At least one course focusing on the economic environment in which global business operates.

- Two supporting courses (6 credits maximum) focusing on the humanities and sociocultural aspects of the population of the region.
- Students submit a proposal outlining the courses they wish to include along with a rationale of how the courses contribute to an understanding of international business.

Required Courses

Functional Core

ACCT 3001 - Introduction to Management Accounting (3.0 cr)
 BA 3000 - Career Skills (1.0 cr)
 FINA 3001 - Finance Fundamentals (3.0 cr)
 HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
 IDSC 3001 - Information Systems for Business Processes and Management (3.0 cr)
 MGMT 3001 - Fundamentals of Management (3.0 cr)
 MKTG 3001 - Principles of Marketing (3.0 cr)
 OMS 3001 - Introduction to Operations Management (3.0 cr)

Communication, International, Business Policy Core

BA 3033W - Business Communication, WI (3.0 cr)
 or BA 3033V - Honors: Business Communication, WI, H (3.0 cr)
 MGMT 3040 - Understanding the International Environment of Firms: International Business, IP (3.0 cr)
 or MGMT 3040H - Honors: Understanding the International Environment of Firms, International Business, H (3.0 cr)
 MGMT 4004W - Business Policy: Strategy Formulation and Implementation, WI (3.0 cr)
 or MGMT 4004V - Honors: Business Policy: Strategy Formulation and Implementation, WI, H (3.0 cr)

Major Courses

Students must complete 10–12 credits of coursework that supports their primary business major and focuses on the economic environment in which global business operates. In addition, students must complete 4–6 credits focusing on the sociocultural aspects of the population of the region. Courses may be completed in a study abroad program or on campus. However, a study abroad experience of at least a semester in length is required, and it is recommended that at least half of the international business requirements are completed abroad.

Management Minor

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

The Carlson School's management minor provides a broad understanding of business principles through the study of seven functional areas. Available to students in all majors at the University of Minnesota, Twin Cities, this general management background will help students succeed in whatever field they choose.

The Carlson School has partnered with the Hubert H. Humphrey Institute of Public Affairs in offering courses focusing on the nonprofit environment as part of the management minor.

Admission Requirements

Students must complete 30 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 3.00 for students already admitted to the degree-granting college.
- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Economics, Math, and Statistics Courses

ECON 1102 or ECON 1105 are recommended but not required.

ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 or ECON 1104 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 MATH 1031 - College Algebra and Probability, MATH (3.0 cr)
 or
 a higher level math course may be taken in place of MATH 1031.
 OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
 or
 an adviser-approved statistics course may be substituted for OMS 2550.

Program Requirements

Required Courses

Minor Courses

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
Take 12 or more credit(s) from the following:
 ACCT 3001 - Introduction to Management Accounting (3.0 cr)
 FINA 3001 - Finance Fundamentals (3.0 cr)
 HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
 IDSC 3001 - Information Systems for Business Processes and Management (3.0 cr)
 MGMT 3001 - Fundamentals of Management (3.0 cr)
 MKTG 3001 - Principles of Marketing (3.0 cr)
 TOMS 3001 - Introduction to Operations Management (3.0 cr)
 PA 3003 - Nonprofit and Public Financial Analysis and Budgeting (3.0 cr)
 PA 4101 - Nonprofit Management and Governance (3.0 cr)

Management Information Systems B.S.B.

Information & Decision Sciences

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 20.

Degree: Bachelor of Science in Business.

The management information systems (MIS) major prepares students to be leaders in conceptualizing, prescribing, developing, and delivering leading-edge information system applications that support business processes and management decision making. It provides students with an understanding of the functions of information systems in organizations and detailed knowledge of information system analysis, design, and operation.

The Carlson School Honors program offers students access to a richer undergraduate experience. Honors students have closer contact with their professors. They work in smaller classes and they put their skills to work for the benefit of the community. The program requires hard work and a strong commitment to learning.

Admission Requirements

Students must complete 50 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

Freshmen are admitted to Carlson School of Management, but do not declare a major until 50 credits have been completed. Part of the 50 credits should include the five tool courses and liberal education requirements. Those transferring in as sophomores need to complete microeconomics, macroeconomics, and calculus before admission. Juniors and above need to complete microeconomics, macroeconomics, calculus, business statistics, and accounting before admission.

Required Courses

Functional Core

- ACCT 3001 - Introduction to Management Accounting (3.0 cr)
- BA 3000 - Career Skills (1.0 cr)

- FINA 3001 - Finance Fundamentals (3.0 cr)
- HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
- IDSC 3001 - Information Systems for Business Processes and Management (3.0 cr)
- MGMT 3001 - Fundamentals of Management (3.0 cr)
- MKTG 3001 - Principles of Marketing (3.0 cr)
- OMS 3001 - Introduction to Operations Management (3.0 cr)

Communication, International, Business Policy Core

- BA 3033W - Business Communication, WI (3.0 cr)
or BA 3033V - Honors: Business Communication, WI, H (3.0 cr)
- MGMT 3040 - Understanding the International Environment of Firms: International Business, IP (3.0 cr)
or MGMT 3040H - Honors: Understanding the International Environment of Firms, International Business, H (3.0 cr)
- MGMT 4004W - Business Policy: Strategy Formulation and Implementation, WI (3.0 cr)
or MGMT 4004V - Honors: Business Policy: Strategy Formulation and Implementation, WI, H (3.0 cr)

Major Courses

- IDSC 3201 - Introduction to Programming for Systems Development (4.0 cr)
- IDSC 3202 - Analysis and Modeling for Business Systems Development (4.0 cr)
- IDSC 4203 - Information Technology Infrastructure (4.0 cr)
- IDSC 4204 - Managing Information Services (4.0 cr)

Electives

Take 4 or more credit(s) from the following:

- IDSC 4421 - Financial Information Systems and Technologies (2.0 cr)
- IDSC 4431 - Advanced Database Design (2.0 cr)
- IDSC 4432 - Advanced Database Management and Administration (2.0 cr)
- IDSC 4441 - Electronic Commerce (2.0 cr)
- IDSC 4461 - Data Warehousing (2.0 cr)
- IDSC 4490 - Information Systems Special Topics (2.0 cr)
- IDSC 4496 - Information Systems Industry Internship (2.0 cr)

Management Information Systems Minor

Information & Decision Sciences

Requirements for this program are current for Fall 2006.

Required credits in this minor: 12.

The management information systems (MIS) minor prepares students to be leaders in conceptualizing, prescribing, developing, and delivering leading-edge information system applications that support business processes and management decision making. It provides students with an understanding of the functions of information systems in organizations and detailed knowledge of information system analysis, design, and operation.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

This minor is only available for students admitted to a degree program in the Carlson School of Management.

Required Courses

Minor Requirements

- IDSC 3202 - Analysis and Modeling for Business Systems Development (4.0 cr)

Take 8 or more credit(s) from the following:

IDSC 3201 - Introduction to Programming for Systems Development (4.0 cr)
 IDSC 4203 - Information Technology Infrastructure (4.0 cr)
 IDSC 4204 - Managing Information Services (4.0 cr)
 IDSC 4401 - Information Security (2.0 cr)
 IDSC 4421 - Financial Information Systems and Technologies (2.0 cr)
 IDSC 4431 - Advanced Database Design (2.0 cr)
 IDSC 4432 - Advanced Database Management and Administration (2.0 cr)
 IDSC 4441 - Electronic Commerce (2.0 cr)
 IDSC 4461 - Data Warehousing (2.0 cr)
 IDSC 4490 - Information Systems Special Topics (2.0 cr)

Marketing B.S.B.

Marketing & Logistics Management

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 20.

Degree: Bachelor of Science in Business.

Marketing is concerned with the flow of goods and services through the economy and the distribution of both industrial and consumer goods. Because more than one half of the consumer dollar goes to pay for marketing services, marketing is a significant part of the economy, and the efficiency with which marketing activities are carried out has major social and economic implications.

The Carlson School Honors program offers students access to a richer undergraduate experience. Honors students have closer contact with their professors. They work in smaller classes and they put their skills to work for the benefit of the community. The program requires hard work and a strong commitment to learning.

Admission Requirements

Students must complete 50 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

Freshmen are admitted to Carlson School of Management, but do not declare a major until 50 credits have been completed. Part of the 50 credits should include the five tool courses and liberal education requirements. Those transferring in as sophomores need to complete microeconomics, macroeconomics, and calculus before admission. Juniors and above need to complete microeconomics, macroeconomics, calculus, business statistics, and accounting before admission.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Tool Courses

An adviser-approved statistics course may be taken in place of OMS 2550.

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
 APEC 1101 - Principles of Microeconomics, SSCI (3.0 cr)

or ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 or ECON 1101H - Honors Course: Principles of Microeconomics, IP, SSCI, H (4.0 cr)
 or ECON 1104 - Principles of Microeconomics, IP, SSCI (4.0 cr)
 APEC 1102 - Principles of Macroeconomics, IP, SSCI (3.0 cr)
 or ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 or ECON 1102H - Honors: Principles of Macroeconomics, IP, SSCI, H (4.0 cr)
 or ECON 1105 - Principles of Macroeconomics, IP, SSCI (4.0 cr)
 MATH 1142 - Short Calculus, MATH (4.0 cr)
 or MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1571H - Honors Calculus I, MATH, H (4.0 cr)
 or MATH 1572H - Honors Calculus II, H (4.0 cr)
 OMS 2550 - Business Statistics: Data Sources, Presentation, and Analysis (4.0 cr)
 or OMS 2550H - Honors: Business Statistics: Data Sources, Presentation, and Analysis, H (4.0 cr)

Technology and Psychology

BA 1001 is required for students admitted as freshmen and recommended for others who need additional background with technology.

BA 1001 - Introduction to Information Technology (1.0 cr)
 PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

General Requirements

Recommended freshman writing course(s) for this program: ENG C 1011, 1012, 1013, or 1014

Program Requirements

Required Courses

Functional Core

ACCT 3001 - Introduction to Management Accounting (3.0 cr)
 BA 3000 - Career Skills (1.0 cr)
 FINA 3001 - Finance Fundamentals (3.0 cr)
 HRIR 3021 - Human Resource Management and Industrial Relations (3.0 cr)
 IDSC 3001 - Information Systems for Business Processes and Management (3.0 cr)
 MGMT 3001 - Fundamentals of Management (3.0 cr)
 MKTG 3001 - Principles of Marketing (3.0 cr)
 OMS 3001 - Introduction to Operations Management (3.0 cr)

Communication, International, Business Policy Core

BA 3033W - Business Communication, WI (3.0 cr)
 or BA 3033V - Honors: Business Communication, WI, H (3.0 cr)
 MGMT 3040 - Understanding the International Environment of Firms: International Business, IP (3.0 cr)
 or MGMT 3040H - Honors: Understanding the International Environment of Firms, International Business, H (3.0 cr)
 MGMT 4004W - Business Policy: Strategy Formulation and Implementation, WI (3.0 cr)
 or MGMT 4004V - Honors: Business Policy: Strategy Formulation and Implementation, WI, H (3.0 cr)

Major Courses

MKTG 3010 - Marketing Research (4.0 cr)
 Complete at least 16 credits from the following:
 MKTG 4020 - Advanced Logistics and Supply Chain Management (2.0 cr)
 or MKTG 4030 - Selling and Sales Management (4.0 cr)
 or MKTG 4040 - Buyer Behavior (4.0 cr)
 or MKTG 4050 - Integrated Marketing Communications (4.0 cr)
 or MKTG 4060 - Marketing and Distribution Channels (4.0 cr)
 or MKTG 4070 - International Marketing (2.0 cr)
 or MKTG 4080 - Marketing Strategy (4.0 cr)
 or MKTG 4090 - Marketing Topics (2.0 cr)

Marketing Minor

Marketing & Logistics Management

Requirements for this program are current for Fall 2006.

Required credits in this minor: 12.

See major description for more information.

Admission Requirements

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Program Requirements

This minor is only available for students admitted to a degree program in the Carlson School of Management.

Required Courses

Minor Courses

MKTG 3010 - Marketing Research (4.0 cr)

Take 8 or more credit(s) from the following:

MKTG 4020 - Advanced Logistics and Supply Chain Management (2.0 cr)

MKTG 4030 - Selling and Sales Management (4.0 cr)

MKTG 4040 - Buyer Behavior (4.0 cr)

MKTG 4050 - Integrated Marketing Communications (4.0 cr)

MKTG 4060 - Marketing and Distribution Channels (4.0 cr)

MKTG 4070 - International Marketing (2.0 cr)

MKTG 4080 - Marketing Strategy (4.0 cr)

MKTG 4090 - Marketing Topics (2.0 cr)

Operations B.S.B.

Operations & Management Science

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 20.

Degree: Bachelor of Science in Business.

Risk Management and Insurance B.S.B.

Finance

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 11 to 12.

Degree: Bachelor of Science in Business.

Risk management is the practice of identifying the risks that affect a company's business and finding ways to mitigate and offset those risks. Risk management tools and techniques help corporations deal with all types of issues, legal concerns, and human resources changes.

This major introduces students to the risk management discipline and multiple career paths, including corporate risk manager, benefits manager, insurance agent/broker, underwriter, loss adjuster, consultant, and personal financial planner.

The Carlson School Honors program offers students access to a richer undergraduate experience. Honors students have closer contact with their professors. They work in smaller classes and they put their skills to work for the benefit of the community. The program requires hard work and a strong commitment to learning.

Admission Requirements

Students must complete 50 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

Supply Chain Management B.S.B.

Marketing & Logistics Management

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 20.

Degree: Bachelor of Science in Business.

Supply chain management manages the flow of goods, information, and services in order to deliver maximum value to the consumer while minimizing the costs of the flow. It is an integrative process across functions within a firm and between trading partners. It is also considered an essential strategy for product-oriented firms as they seek competitive advantage.

The Carlson School Honors program offers students access to a richer undergraduate experience. Honors students have closer contact with their professors. They work in smaller classes and they put their skills to work for the benefit of the community. The program requires hard work and a strong commitment to learning.

Admission Requirements

Students must complete 50 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

Medical Technology

General Information

The medical technology program (also called clinical laboratory science) was established at the University of Minnesota in 1922 to prepare men and women for professional work in laboratory science and advanced study. This program provides a strong foundation in the sciences together with rich experiences in the clinical laboratory. Approximately 20 percent of medical technology graduates go on to complete an advanced degree.

Clinical laboratory scientists (medical technologists) perform many and varied laboratory analyses and use critical thinking in determining the correctness of test results. They recognize the interdependency of testing information and have knowledge of physiologic and pathologic conditions affecting results in order to validate them. In many health care settings, they provide data used by physicians in determining the presence, extent, and, as far as possible, causes of disease.

Clinical laboratory scientists/medical technologists

- develop and establish procedures for collecting, processing, and analyzing biological specimens and other substances;
- perform analytical tests of body fluids, blood, serum, plasma, cells, and other substances.
- integrate and relate data generated by various clinical laboratories while making decisions regarding possible discrepancies.
- confirm abnormal results, verify and execute quality control procedures, and solve problems concerning the generation of laboratory data to maintain accuracy and precision.
- establish and perform preventive and corrective maintenance of equipment and instruments as well as identify appropriate sources for repairs.
- develop, evaluate, and select new techniques, instruments, and methods in terms of their usefulness and practicality within the context of a given laboratory's personnel, equipment, space, and budgetary resources.
- demonstrate professional conduct through interpersonal skills with patients, laboratory personnel, other health care professionals, and the public.
- participate in continuing education for growth and maintenance of professional competence.
- provide leadership in educating other health personnel and the community.
- exercise principles of management, safety, and supervision.
- apply principles of educational methodologies.

Source: National Accrediting Agency for Clinical Laboratory Sciences, Chicago, Illinois.

Tests and procedures are performed or supervised by laboratory technologists in hematology, coagulation, microbiology, immunohematology, immunology, clinical chemistry, and urinalysis. Subspecialty areas in which laboratory personnel work include such fields as molecular diagnostics, cytogenetics, fertility testing, flow cytometry, tissue typing, bone and skin banks, forensics, and infection control.

As complexities of clinical laboratories increase, many medical technologists specialize in immunohematology, hematology, microbiology, chemistry, immunology, virology, coagulation, administration, computer science, education, quality assurance,

and other areas. There are opportunities for graduates to work in hospital laboratories, clinics, physician offices, public health agencies, research, and industry.

As a general rule, a student who has excelled in scientific subjects in high school will succeed in medical technology.

The program is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 8410 West Bryn Mawr, Suite 670, Chicago, IL 60631 (773-714-8880; e-mail INFO@naacsl.org).

Mission Statement

The mission of the Division of Medical Technology is to be a leader in educating clinical laboratory science professionals. In accordance with the University of Minnesota's mission, the division strives to do this in an environment that embodies the values of academic freedom, responsibility, integrity, and cooperation; that provides an atmosphere of mutual respect, free from racism, sexism, and other forms of prejudice and intolerance; that assists individuals, institutions, and communities in responding to a continuously changing world; that is conscious of and responsive to the needs of the many communities it is committed to serving; that creates and supports partnerships within the University, with other educational programs, and with communities to achieve common goals; and that inspires, sets high expectations for, and empowers the individuals within the community.

The division pursues this mission through teaching, research, and actively working with the health care community to assist in meeting the clinical laboratory needs of the state of Minnesota. Specifically, the division

- educates students to be clinical laboratory professionals who have the knowledge, skills, and values to provide competent and ethical practice in clinical laboratory science;
- develops new knowledge about the practice of clinical laboratory sciences;
- helps communities and other professionals develop an awareness and understanding of the role of the clinical laboratory professional and the work they perform;
- collaborates with other professionals within the health care community to assess the changing needs of the clinical laboratory, design solutions to meet the challenges, and monitor the quality of laboratory practice; and
- provides continuing education opportunities to practicing clinical laboratory professionals.

Facilities

Health sciences facilities are in a complex of buildings on the East Bank of the Minneapolis campus, including the Mayo Memorial Building, Malcolm Moos Health Sciences Tower, Weaver-Densford Hall, and the Phillips-Wangensteen Building. Close to or connected with the complex are University of Minnesota Medical Center, Fairview; Dwan Variety Club Cardiovascular Research Center; Veterans of Foreign Wars Cancer Research Center; and Children's Rehabilitation Center. Extensive resources and services of the Bio-Medical Library, including the Learning Resources Center, are housed in Diehl Hall.

These facilities provide learning, research, and internship sites for many students. They are excellent research centers, not only for studying diseases, healthy physiological processes, and environmental health, but also for developing new procedures and delivering expert health care. The proximity of the Academic Health Center units to each other and to the rest of the campus facilitates interdepartmental communication and underscores the interdisciplinary nature of health care. The Academic Health Center units also maintain affiliations with many hospitals and health care facilities around the Twin Cities and greater Minnesota, which afford students access to a wide spectrum of health care situations.

Clinical experiences for University of Minnesota medical technology students are available at the Veterans Affairs Medical Center, Allina Laboratories, and Fairview Health Services; Mayo Clinic (Rochester); the North Central Blood Services of St. Paul, Regions Hospital (St. Paul), and HealthEast Hospitals (St. Paul and Maplewood), North Memorial Medical Center (Robbinsdale), Park Nicollet Health Services (St. Louis Park), Ridgeview Medical Center (Waconia), St. Cloud Hospital (St. Cloud), Immanuel–St. Joseph’s Hospital (Mankato), Lakeview Hospital (Stillwater), and Rice Memorial Hospital (Willmar).

Admission

Medical Technology sets its own standards and requirements for admission. These include a strong background in the natural sciences (specifically biology, chemistry, and physiology), as well as in the social and behavioral sciences. The Division recommends that applicants be genuinely interested in human services and sincerely committed to promoting the public’s health and general welfare. Students generally enter the program at the beginning of their junior year.

Application Process

The medical technology curriculum consists of the preprofessional program at the University of Minnesota or its equivalent at another regionally accredited institution and the professional program in the Division of Medical Technology, which is part of the Academic Health Center.

Admission to the Preprofessional Program—Students who apply to enroll in a preprofessional program must meet the admission criteria and follow academic regulations of that college. The preprofessional program is pursued during the first two years of college.

The medical technology sequence is based on entrance to the professional program in the fall semester of year three or four, depending on completion of prerequisites. Admission to year three of the curriculum sequence is preferred. Space is very limited for year 4 admission.

Admission to the preprofessional program at the University of Minnesota does not assure admission to the professional program.

Admission to the Professional Program—For admission to the Division of Medical Technology, a student must have completed 60 semester credits, including required courses. The major criterion for admission is satisfactory academic performance as judged by the student’s grade point average (GPA) in prerequisite science courses and cumulative GPA. Students are admitted once each year for the fall semester. Admission to the professional program is competitive because of the limited number of students who can be accommodated in the teaching and clinical facilities.

Students in residence at the University of Minnesota who expect to complete the requirements for admission to the professional program must file an *Application for Undergraduate Change of College* form with the One Stop Student Services Center,

200 Fraser Hall, by March 1. (Priority deadline is March 1. Applications are accepted until the class is full.) Students with sufficient credits but have course deficiencies should consult the Division of Medical Technology adviser regarding their status.

Students from other regionally accredited colleges and universities may transfer to the University of Minnesota to complete the medical technology program. Courses completed that are equivalent to those offered at the University of Minnesota are accepted to satisfy the requirements for admission to Medical Technology. Students who have a baccalaureate degree in a science curriculum and have completed required courses may finish the program in 15 months, as space is available in affiliated laboratories. Students transferring from other colleges may apply online by referring to the admissions Web site at <http://admissions.tc.umn.edu>. The preferred deadline to apply is March 1. It is strongly advised that transfer students ascertain their status by writing to the Adviser, Medical Technology, University of Minnesota, MMC 711, 420 Delaware Street S.E., Minneapolis, MN 55455. Required science courses must be completed by the end of spring semester.

English Proficiency—If students are not native speakers of English, they must take the Test of English as a Foreign Language (TOEFL) or the Michigan English Language Assessment Battery (MELAB). To register for the TOEFL, students should contact the agency that handles TOEFL registration in their country or write to the Educational Testing Service (Box 6151, Princeton, NJ 08541, USA). If students are already in the Twin Cities area, they may register for the MELAB with the Minnesota English Center, University of Minnesota, 315 Nolte Center for Continuing Education, Minneapolis, MN 55455, or call 612-624-4548. To register for the MELAB outside the Twin Cities area, contact the English Language Institute, Testing and Certification Division, University of Michigan, Ann Arbor, MI 48109, USA, or call 734-764-2416. Required is a TOEFL score of at least 570 (paper version), 230 (computer version), or 88 (Internet version), or a MELAB score of at least 84.

Those who have completed one year of instruction and composition at a college or university where English is the language of instruction may have the English requirement waived.

Degrees

Bachelor of Science—Medical Technology offers the bachelor of science (B.S.) degree.

Bachelor of Applied Science—The College of Continuing Education offers the bachelor of applied science (B.A.Sc.) degree in clinical laboratory science through Medical Technology for students with MLT/CLT certification from a MNSCU program.

Master of Science—Graduate work in clinical laboratory science is available for qualified candidates who wish to prepare for a career of research, teaching, or work in industry. The master of science (M.S.) program in clinical laboratory science is offered by the Graduate School. The program is offered only under Plan A (master’s degree with thesis). Each student must complete a thesis involving independent research in one of the subareas of this field under the direction of an adviser.

Admission requirements include a bachelor’s degree from an accredited institution of higher learning with sufficient scholarly attainment in medical technology or chemistry and the biological sciences to justify graduate work in these areas.

For more information, see the *Graduate School Catalog* or contact the Clinical Laboratory Science Graduate Program Coordinator, MMC 609, 420 Delaware Street S.E., Minneapolis, MN 55455 (612-625-8952).

Policies

Immunizations—Upon enrollment into the medical technology program, students are required to submit proof of the following immunizations and vaccinations:

- Measles/mumps/rubella documentation or positive titre
- Two- step tuberculosis skin test (Mantoux)
- Hepatitis B series or documented immunity
- Past DTP or diphtheria/tetanus within the last 10 years
- Varicella Zoster (chicken pox) positive history or two doses of vaccine

For the specific AHC policy and form, see www.bhs.umn.edu/services/ahc.htm on the Web. Start early to complete this requirement.

Health Insurance Coverage—Medical technology students are expected to carry health insurance to cover emergency medical situations. Specifics on the AHC health insurance policy can be located on the Web at www.bhs.umn.edu/insurance/ahc.htm. Students should carry their insurance information at all times.

Background Check—Medical technology students are placed in a variety of clinical settings during their clinical coursework. In accord with Minnesota law, a criminal background check is required of each student before clinical courses. The Division of Medical Technology arranges this check.

Satisfactory Academic Progress—Students in the professional program are subject to the regulations established by the Division of Medical Technology and must maintain satisfactory academic progress.

Satisfactory performance is considered to be not only a passing level in scientific and technical skills together with theoretical knowledge, but also complete personal integrity and honesty.

Students not achieving satisfactory progress may be placed on scholastic probation upon recommendation of the Student Scholastic Standing Committee (SSSC). This committee is composed of Division of Medical Technology faculty and student representatives, as appropriate.

Students' work is considered unsatisfactory when they earn less than a C- grade average (1.67 grade points for each credit) for any course in a given year or semester. In addition, students must earn a minimum grade of C- in selected courses to enroll in related clinical rotations, and maintain an overall GPA of 2.00 in the professional program.

If students receive an unsatisfactory grade in a course, remedial work in the course may be provided, if possible; if not, students must repeat the course the next time it is offered. If students receive an unsatisfactory grade in more than one course, either concurrently or in different semesters, the matter is referred to the SSSC for investigation and action. If the committee decides students should not continue in the curriculum, students are notified. Unsatisfactory grades in two courses are sufficient basis for dismissal.

Medical Technology Essential Functions

To successfully complete a clinical laboratory science program, medical technology students must be able to perform the following functions.

Communication skills—Must be able to communicate effectively in written and spoken English; comprehend and respond to both formal and colloquial English—person-to-person, by telephone, and in writing; appropriately assess nonverbal as well as verbal communication.

Locomotion—Must be able to move freely from one location to another in physical settings, such as the clinical laboratory, patient areas, corridors, and elevators.

Small motor skills—Must have sufficient eye-motor coordination to allow delicate manipulations of specimens, instruments, and tools. Must be able to grasp and release small objects (e.g., test tubes, microscope slides); twist and turn dials/knobs (e.g., for a microscope, balance, or spectrophotometer); and manipulate other laboratory materials (e.g., reagents and pipettes) in order to complete tasks.

Other physical requirements—Must be able to lift and move objects of at least 20 pounds. Must have a sense of touch and temperature discrimination.

Visual acuity—Must be able to identify and distinguish objects macroscopically and microscopically; read charts, graphs, and instrument scales.

Safety—Must be able to work safely with potential chemical, radiologic, and biologic hazards and follow prescribed guidelines for working with all potential hazards, including mechanical and electrical.

Professional skills—Must be able to follow written and verbal directions; work independently and with others and under time constraints; prioritize requests and work concurrently on at least two different tasks; maintain alertness and concentration during a normal work period.

Stability—Must possess the psychological health required for full use of abilities and be able to respond to others in a collegial manner; must be able to recognize emergency situations and take appropriate actions.

Affective (valuing) skills—Must show respect for self and others and project an image of professionalism, including appearance, dress, and confidence; and have complete personal integrity and honesty. Must adhere to appropriate professional manner and conduct.

Application skills—Must be able to apply knowledge, skills, and values learned from previous coursework and life experiences to new situations.

Certification and Placement

Division of Medical Technology graduates are eligible to take national examinations for certification as medical technologists or clinical laboratory scientists. These examinations are conducted by national certifying agencies. Many organizations and institutions require certification for employment.

Program graduates are assisted in finding employment by the Division of Medical Technology adviser. Notices of employment opportunities in the field are received from all parts of the United States and are posted in the medical technology office, 15-170 Phillips-Wangensteen Building.

Licensure

The licensed medical technologist practices in accordance with the requirements of individual state laws. In some states, a medical technologist must participate in continuing education courses for license renewal. Minnesota does not require a license to practice.

Advising

Medical Technology offers centralized advising services to undergraduates currently enrolled or interested in medical technology. In addition, the medical technology adviser works closely with the College of Liberal Arts natural science advisers. For more information, contact the medical technology office, 15-170 Phillips-Wangensteen Building (612-625-9490).

Special Learning Opportunities and Resources

Minority Program—The Academic Health Center is committed to the recruitment and retention of minority persons who come from groups underrepresented in the health professions. Advising and special courses are offered through the Martin Luther King Program and the following learning resource centers: African American Learning Resource Center, American Indian Learning Resource Center, Asian/Pacific American Learning Resource Center, and Chicano-Latino Learning Resource Center.

Scholarships

Medical Technology offers seven scholarship programs for students in the professional program. Scholarships are provided on the basis of scholastic achievement, need, and professional promise. For more information, contact the Medical Technology office, 15-170 Phillips-Wangensteen Building (612-625-9490). The scholarship application deadline is April 1.

Career Paths

The Extended Career Paths in Medical Technology chart represents positions taken by University of Minnesota medical technology graduates. It shows the opportunity and versatility of a medical technology (laboratory science) degree for positions not only in hospital laboratories, but also in industry, research, public health, government, information systems, consulting, reference (private) laboratories, education, and other areas.

Student Organizations

Council for Health Interdisciplinary Participation—The Council for Health Interdisciplinary Participation (CHIP) is an interdisciplinary student service organization dedicated to enhancing the quality of life and education of all Academic Health Center students. Activities include noontime lectures, evening workshops, and weekend symposia in areas such as bioethics, international health, alternative health care, and women's issues. CHIP publishes a newsletter featuring announcements of upcoming health sciences events, volunteer opportunities, and articles about topics of current interest to students. CHIP headquarters are located in an informal, comfortable lounge in 1-425 Malcolm Moos Health Sciences Tower. For more information, call 612-625-7100.

Medical Technology Student Council—Students in the professional program are represented on the Medical Technology Council by elected members from each class. The council promotes student-faculty relationships, sponsors social and educational activities, and considers matters affecting students in the program.

Student Membership in Professional Organizations—Medical technology undergraduates are eligible for student membership in the American Society for Clinical Laboratory Science. Medical technology students are also urged to participate in the activities of the Academic Health Center's Council for Health Interdisciplinary Participation (CHIP) and other University student organizations.

Campus Contacts

Patricia Solberg, Medical Technology, University of Minnesota, MMC 711, 420 Delaware Street S.E., Minneapolis, MN 55455. Offices at 15-170 Phillips-Wangensteen Building (612-625-9490; e-mail medtech@umn.edu). Web site: <http://medtech.umn.edu>.

Medical Technology

Degree Program

Medical Technology B.S.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 60.

This program requires summer terms.

Degree: Bachelor of Science.

The medical technology program prepares students to work as clinical laboratory scientists in hospital, clinical, and medical research laboratories. Students can be accepted in either the junior or senior year. All medical technology courses are taken in the fall and spring semester of the senior year, followed by 22 weeks of clinical coursework.

Admission Requirements

Students must complete 9 courses before admission to the program.

Freshmen students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

Upon admission, students are required to submit proof of certain immunizations and vaccinations.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Pre-Medical Technology Courses

Students must take one math course at the level of college algebra or higher and one course in calculus or statistics. The same course may not be used to satisfy both distribution requirements.

MATH 1031 - College Algebra and Probability, MATH (3.0 cr)

or MATH 1051 - Precalculus I (3.0 cr)

or MATH 1142 - Short Calculus, MATH (4.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

MATH 1142 - Short Calculus, MATH (4.0 cr)

or MATH 1151 - Precalculus II, MATH (3.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1272 - Calculus II (4.0 cr)

or STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

or BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

and BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

CHEM 2302 - Organic Chemistry II (3.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

Program Requirements

INMD 3001, LAMP 4177, MEDT 1010, and MICB 4131 are highly recommended but not required for students pursuing a B.S. degree in medical technology.

Students are placed in a variety of clinical settings during their clinical coursework. In accord with Minnesota law, a criminal background check is required of each student before clinical courses. The Division of Medical Technology arranges this check.

Required Courses

Junior Year Courses

BIOC 3021 - Biochemistry (3.0 cr)

BIOL 4003 - Genetics (3.0 cr)

or GCD 3022 - Genetics (3.0 cr)

BIOL 2032 - General Microbiology with Laboratory (4.0 cr)

or MICB 3301 - Biology of Microorganisms (5.0 cr)

Senior Year Courses

MEDT 4064 - Introduction to Clinical Immunohematology (2.0 cr)

MEDT 4065 - Introduction to Clinical Immunohematology: Laboratory (2.0 cr)

MEDT 4100 - Virology, Mycology, and Parasitology for Medical Technologists (2.0 cr)

MEDT 4104 - Principles of Diagnostic Microbiology: Lecture (2.0 cr)

MEDT 4105 - Principles of Diagnostic Microbiology: Laboratory (2.0 cr)

MEDT 4127W - Introduction to Management and Education I, WI (1.0 cr)

MEDT 4253 - Hemostasis (1.0 cr)

MEDT 4310 - Clinical Chemistry I: Lecture (2.0 cr)

MEDT 4311 - Clinical Chemistry I: Laboratory Applications (2.0 cr)

MEDT 4320 - Clinical Chemistry II: Lecture (2.0 cr)

MEDT 4321 - Clinical Chemistry II: Laboratory Applications (2.0 cr)

MEDT 4400 - Immunological and Molecular Basis of Laboratory Testing (1.0 cr)

MEDT 4251 - Hematology I: Basic Techniques (3.0 cr)

MEDT 4252 - Hematology II: Morphology and Correlation (2.0 cr)

Clinical Courses

These courses should be completed during the 22 weeks of clinical rotations in the summer and fall terms following the senior year, including six weeks of clinical chemistry, five weeks in hematology and coagulation, five weeks in immunohematology, five weeks in microbiology, and one week in a specialty laboratory area.

MEDT 4082 - Applied Clinical Chemistry (3.0 cr)

MEDT 4085 - Applied Clinical Hematology (2.0 cr)

MEDT 4086 - Applied Clinical Immunohematology (2.0 cr)

MEDT 4088 - Applied Diagnostic Microbiology (2.0 cr)

MEDT 4089 - Specialty Rotation (1.0 cr)

Mortuary Science

General Information

The Program of Mortuary Science at the University of Minnesota, established in 1908, was the first program of its kind in this country to be organized at a state university. During the first 50 years of its existence, the program grew from a 6-week session to a 36-week course of study. In 1951, a two-year curriculum leading to the associate in mortuary science degree was approved. The course of study for the associate degree was expanded to three years in 1955. The bachelor of science degree with a major in mortuary science, granted upon satisfactory completion of a four-year curriculum, was approved by the Board of Regents in 1968. Impetus for the changes in program length and academic credentials resulted from changes in the philosophy and needs of the funeral service profession. The Program of Mortuary Science is part of the Medical School. The Program of Mortuary Science at the University of Minnesota is accredited by the American Board of Funeral Service Education (ABFSE), 3432 Ashland Avenue, Suite U, St. Joseph, MO 64506 (816-233-3747), an agency recognized by the United States Office of Education, and the International Conference of Funeral Service Examining Boards, Inc.

Accreditation

The Program of Mortuary Science at the University of Minnesota is accredited by the American Board of Funeral Service Education (ABFSE), 3432 Ashland Avenue, Suite U, St. Joseph, Missouri, 64506, 816-233-3747, www.abfse.org. The annual passage rate of first-time takers on the National Board Examination (NBE) for the most recent three-year period for this institution and all ABFSE accredited funeral service education programs is posted on the ABFSE Web site (www.abfse.org).

Mission

Funeral directors are health care professionals who serve others during a time of loss, pain, and grief. The mission of this program is to skillfully combine the study of behavioral, physical, and applied sciences for the goal of preparing graduates for careers as knowledgeable, skilled, and innovative funeral service professionals. Program graduates will be prepared to serve bereaved members of their communities in a manner that is proficient, dignified, and caring.

Objectives

The program recognizes an obligation to students, the profession, and the community. Its objectives have been adopted by the program's Advisory Board, and conform with the Accreditation Standards set forth by the American Board of Funeral Service Education.

The objectives of the program are to

- enlarge the background and knowledge of students about the funeral service profession.
- educate students in every phase of funeral service, and to help them to develop the proficiency and skills necessary of the profession.
- educate students concerning the responsibilities of the funeral service profession to the community at large.
- emphasize high standards of ethical conduct.

- provide a curriculum at the postsecondary level of instruction.
- encourage research in the field of funeral service.
- encourage faculty and students to be advocates for the funeral service profession.

Goals

The goals of the program include:

- Synthesizing psychosocial aspects of grief and the funeral directing arts.
- Developing technical competence in applying funeral service sciences to the care of the disposition of the dead.
- Developing an understanding of business, legal, and ethical theories and principles related to funeral service practice.

Aims

Upon entrance into the workforce as funeral directors, graduates will be able to

- provide support to the bereaved during the initial stages of their grief.
- prepare a decedent's body for final disposition according to the wishes of the survivors in accordance with the law.
- secure information for legal documents.
- handle business-related tasks required of mortuary operations.
- advise and give counsel to survivors regarding various funeralization options.
- help survivors adapt to changes in their lives following a death, through counseling and support group activities.

Admission

Students usually enter the Program of Mortuary Science at the beginning of their junior year. Freshmen and sophomores interested in a mortuary science major are urged to contact the program office at A275 Mayo, MMC 740, 420 Delaware Street S.E., Minneapolis, MN 55455, for counsel in planning an appropriate preprofessional program. On the Twin Cities campus, freshmen and sophomores usually register in the College of Liberal Arts (CLA) for their premortuary science coursework. Admission criteria and other information related to CLA can be found in the CLA section in this catalog. Applicants transferring from any regionally accredited college or university are given the same consideration as those who transfer from within the University. Applicants seeking admission to the Program of Mortuary Science who will be earning their first baccalaureate degree must have completed:

- the University of Minnesota's high school preparation requirements (see Freshman Admission in the General Information section of this catalog).
- at least 60 semester credits with grades of A, B, C, or S from a regionally accredited college or university.
- prerequisite coursework with a grade point average (GPA) of 2.50 on a 4.00 scale.

- the preprofessional requirements of the Program of Mortuary Science—(a) at least one course in each of the areas of English composition, statistics, general biology with lab, accounting, general psychology, general chemistry with lab, introduction to sociology, speech, human anatomy and physiology, plus (b) sufficient electives to total 60 credits.

A student who has completed all of the admission and liberal education requirements may be able to complete degree requirements in three semesters.

Immunizations

A signed health clearance form with proof of immunizations is a condition for enrollment after admission, unless a student qualifies for exemption. Immunization from, or immunity to, the following is required: Hepatitis B, Measles/Mumps/Rubella, Varicella, Tetanus/Diphtheria, and Mantoux (PPD)—annual and two-step tests. Students may be exempt if a vaccine is contraindicated due to potential allergic reactions or pregnancy. For more information, visit www.bhs.umn.edu/services/immunizationservices.htm.

Liberal Education Requirements

For University of Minnesota, Twin Cities campus liberal education requirements, see the Policies section of this catalog.

Students entering the Program of Mortuary Science who have already completed a bachelor's degree, or have completed the Minnesota Transfer Curriculum, are exempt from the liberal education requirements, but must meet all other admission requirements.

Application Procedure

Transfer Within the University—Students already admitted to one college or campus of the University of Minnesota must submit an *Application for Undergraduate Change of College* form, available from the One Stop Student Services Center on any campus.

Transfer From Outside the University—Students who have completed their preprofessional coursework at another university must apply for admission to the University of Minnesota. Transfer students should obtain the *Application for Transfer Admission* from the Office of Admissions, 240 Williamson Hall, 231 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-625-2008, or 1-800-752-1000); and return it to that office; or they can apply online at http://admissions.tc.umn.edu/admissioninfo/trans_applications.html. An official transcript from each institution outside the University where coursework was attempted or completed must be sent to the Office of Admissions. A nonrefundable application fee is also required.

The priority deadline for application is March 1 for fall semester admission. Applications received after the priority deadline will be reviewed on a space-available basis.

Orientation

Various orientation activities are offered to help students get acquainted with one another, the campus, and the program. These activities include individual and group meetings for program planning, and presentations on University resources and regulations. Students are notified of orientation dates at the time they receive registration information.

Policies

Credit Load

Most students take about 15 credits of coursework each semester. To take fewer than 13 credits per semester requires permission from the Student Scholastic Advisory Committee. Registration for more than 20 credits per semester must also be approved by this committee.

Academic Performance Standards

The Student Scholastic Advisory Committee decides upon appropriate actions when notified that a student is experiencing problems meeting academic standards.

A student's work is considered unsatisfactory when the student earns a GPA in a given semester (including summer session) below 2.00. If a student's GPA drops below 2.00, the student receives a letter from the program director and is required to meet with the director to discuss the student's academic progress within the program. The student is then automatically placed on academic probation for one semester. While on academic probation, the student must complete the probationary term with a GPA of at least 2.50 and earn no grades below C. (A C- is unsatisfactory.) Failure to meet these criteria results in automatic suspension from the program. The period of suspension begins on the first day following the end of the probationary term and terminates no earlier than the last class day of the following 15-week academic semester. Thus, if a student is suspended at the end of spring semester, the earliest term for which the student can register is spring semester of the following year.

Upon return to the program following academic suspension, the student must complete a second probationary term with a GPA of at least 2.75 and earn no grades below C. (A C- is unsatisfactory.) Following a period of suspension, failure to meet these criteria results in automatic dismissal from the program. Once dismissed from the program for failure to meet academic performance standards, a student must apply for readmission. Students may not reapply for readmission until one calendar year after the date of dismissal has passed.

Graduation Requirements

To be recommended for the bachelor of science degree with a major in mortuary science, students must complete the University's graduation requirements (see Policies section). Students complete a minimum of 120 credits outlined in Degree Requirements.

Certification/Licensure

Students planning to practice in a state other than Minnesota should determine the qualifications for licensure by writing to the licensing agency in the state in which they intend to practice. These regulations vary from state to state, may change frequently, and students should make certain they have accurate information.

Advising

Advisers assist students with program and career planning. It is recommended that the student's academic advisers approve student registrations for each academic term.

Financial Aid

For information concerning financial aid, students should contact the Office of Student Finance, 200 Fraser Hall, 106 Pleasant Street S.E., Minneapolis, MN 55455 (612-624-1111), or visit http://onestop.umn.edu/onestop/Financial_Aid/grants.html for grant and scholarship resources.

Student Organization

Student Association of the Program of Mortuary Science—

Each student enrolled in the program automatically becomes a member of this association, which serves as a forum for expressing student opinions about mortuary science education, a liaison between students and faculty, and an organization to foster and support mortuary science education.

Contact Information

Program of Mortuary Science, University of Minnesota,
MMC 740, 420 Delaware Street S.E., Minneapolis, MN 55455
(612-624-6464; fax 612-626-4163; e-mail mortsci@umn.edu).

Mortuary Science

Degree Program

Mortuary Science B.S.

Medical School

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 61.

This program requires summer terms.

Degree: Bachelor of Science.

The Program of Mortuary Science combines coursework in the basic and behavioral sciences with instruction in the liberal arts.

Funeral directors are health care professionals who serve others during a time of loss, pain, and grief. The mortuary science program prepares graduates to serve bereaved members of their communities in a manner that is proficient, dignified, and caring. Program objectives conform with standards of the American Board of Funeral Service Education; International Conference of Funeral Service Examining Boards, Inc.; and Minnesota Department of Health.

The Program of Mortuary Science at the University of Minnesota is accredited by the American Board of Funeral Service Education (ABFSE), 3432 Ashland Avenue, Suite U, St. Joseph, MO 64506, 816-233-3747.

Students usually enter the program at the start of their junior year. An advanced standing plan is open to applicants with outstanding course records and who already hold their first bachelor's degree from an accredited college or university or who have completed the University's liberal education requirements. To decrease the number of credits taken as a part of this curriculum, students may be able to transfer similar courses from other institutions (for example, microbiology, personal/community health, and medical or health sciences terminology). Contact the program office before registering to determine if courses will be approved for transfer credit.

Admission Requirements

Students must complete 60 credits before admission to the program.

Freshmen students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 2.50 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Pre-Mortuary Science Courses

Students usually enter the Program of Mortuary Science at the beginning of their junior year. Freshmen and sophomores are urged to contact the program office for counsel in planning an appropriate preprofessional program. The following courses are required for admission to the B.S. program (except PUBH 3001 and PHAR 1002, which are not required but strongly recommended).

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)

or BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)

or CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)

COMM 1101 - Introduction to Public Speaking (3.0 cr)

EPSY 3264 - Basic and Applied Statistics, MATH (3.0 cr)

PSTL 1135 - Human Anatomy and Physiology, BIOL SCI/L (4.0 cr)

PHAR 1002 - Health Sciences Terminology (2.0 cr)

PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

PUBH 3001 - Personal and Community Health (2.0 cr)

SOC 1001 - Introduction to Sociology, CD, SSCI (4.0 cr)

Program Requirements

Required Courses

Junior Year Courses

Students must take MORT 3379 both semesters of the junior year and during the following summer term.

MORT 3005 - History of Funeral Service (2.0 cr)

MORT 3014 - Funeral Service Rules and Regulations (2.0 cr)

MORT 3018 - Funeral Practice (3.0 cr)

MORT 3019 - Funeral Practice II (3.0 cr)

MORT 3021W - Funeral Service Psychology, WI (3.0 cr)

MORT 3022W - Funeral Service Counseling, WI (3.0 cr)

MORT 3049 - Microbiology (2.0 cr)

MORT 3061 - Embalming Theory (3.0 cr)

MORT 3161 - Embalming Laboratory (1.0 cr)

MORT 3171 - Human Anatomy Laboratory (2.0 cr)

MORT 3370 - Death and Dying Across Cultures and Religions (3.0 cr)

MORT 3379 - Clinical Funeral Service Rotation (3.0 cr)

PHAR 1002 - Health Sciences Terminology (2.0 cr)

PUBH 3001 - Personal and Community Health (2.0 cr)

Senior Year Courses

MORT 3012 - Organization and Management of Funeral Business (3.0 cr)

MORT 3016 - Funeral Service Marketing and Merchandising (3.0 cr)

MORT 3025 - Business Law (3.0 cr)

MORT 3030 - Funeral Service Law (3.0 cr)

MORT 3050 - Forensic Pathology (3.0 cr)

MORT 3051 - Restorative Art (2.0 cr)

MORT 3055W - Complicated Grief, WI (3.0 cr)

MORT 3065 - Embalming Chemistry (3.0 cr)

MORT 3151 - Restorative Art Laboratory (1.0 cr)

University
of Mississippi
School of Nursing

Name: [illegible]
[illegible]
[illegible]

General Information

Established in 1909, the University of Minnesota School of Nursing holds the distinction of being the first continuing nursing program on a university campus in the United States. The School of Nursing assumes responsibility for improving nursing care through its programs in nursing education, research, and community service. The School of Nursing offers three programs and one certificate: the bachelor of science in nursing, the master of science with a major in nursing, the nursing post-baccalaureate certificate and the doctor of philosophy with a major in nursing.

The School of Nursing is part of the University's Academic Health Center, whose mission is to be a leader in the ethical, innovative, and efficient discovery and dissemination of knowledge to enhance the health and well-being of Minnesota, the nation, and the world.

Admission

Admission to the Post-Baccalaureate Certificate Program—

The School of Nursing offers a graduate-level certificate to those with previous BA/BS degrees in non-nursing areas of study who wish to become nurses. Visit the School of Nursing Web site for more information.

Admission to the BSN Program—Students are admitted to the nursing major once a year in the fall, at the sophomore level, after completing prerequisite courses. Prerequisite courses are listed below. Admission to the major is competitive.

The nursing major can be completed at the University of Minnesota Twin Cities campus or the University of Minnesota Rochester campus. Clinical coursework is completed throughout the respective communities.

Prerequisite Courses—The nursing major builds on a foundation of prerequisite courses in the natural and behavioral sciences. The following prerequisites are applicable to students entering the nursing program as sophomores in fall 2007:

Content Areas	Minimum Semester Credits
General principles of chemistry	3
General psychology	3
Freshman composition	3
Nutrition	3
Human anatomy and physiology I (Rochester applicants).....	3
Microbiology.....	4
Human growth and development.....	3

Application Deadline—The application deadline for fall 2007 is February 1, 2007. The School of Nursing admits students to the major for fall semester only.

English Language Requirement—Applicants whose native language is not English, and have lived in the United States for less than eight years as of the first day of fall semester, must submit the following minimum test scores: 1) a Test of Spoken English (TSE) score of 50; 2) Test of English as a Foreign Language (TOEFL) score of at least 240 on the computerized version, 95 on the Web version (IBT) or 586 on the paper version or Michigan English Language Assessment battery (MELAB) score of 85 or higher.

Application Process

Applicants must apply to the University of Minnesota School of Nursing in a competitive two-part process.

1. A *School of Nursing Application* must be completed and submitted to the School of Nursing. It is available online at www.nursing.umn.edu.
2. Applicants who have never been enrolled at any campus or in any college at the University of Minnesota must submit an *Undergraduate Application* in addition to the *School of Nursing Application*. The *Undergraduate Application* is available through the Office of Admissions at <http://admission.tc.umn.edu>.

OR

Current or former University of Minnesota students must submit a *Change of College* form in addition to the *School of Nursing Application*. It is available at <http://onestop.umn.edu/forms>.

Admission Deposit Fee—Applicants admitted to the School of Nursing must pay a nonrefundable deposit fee to hold their admission place. This fee will be applied against the student's first semester tuition and fees.

Orientation

All students enrolled in the School of Nursing must attend the school's orientation-registration program.

CPR—Students who have been admitted to the School of Nursing are required to have current certification in cardiopulmonary resuscitation, at the health professional level.

Health—Students who have been admitted to the School of Nursing are required to provide evidence that they have completed a physical assessment examination with appropriate immunizations.

A condition of admission is documentation for required immunizations according to the AHC Policy of Prevention of and Response to the Educational Exposure to Blood Borne Pathogen and Tuberculosis.

Disability Accommodations—For information on disability accommodations, contact Disability Services at <http://ds.umn.edu> or at 612-626-1333 or 612-624-3316.

Degrees/Majors

The baccalaureate program prepares outstanding graduates who are skilled in delivering nursing care, able to contribute to the evolving science of nursing, and capable of moving into leadership positions where they can positively influence health care for individuals and groups. Graduates of the program are confident of their contributions to the care of clients, identify with nursing as a profession, and are able to articulate the nurse's role to other disciplines in health care and to the public.

The program is for high-ability, achievement-oriented students and provides a challenging learning environment with innovative approaches to faculty-student relationships and scholarly learning experiences.

Nursing courses include lectures, seminars, laboratories, and clinical practice. Students learn client care in hospitals, clinics, homes, long-term care facilities, and other health care settings. Students provide care to clients with diverse health care problems in real life situations.

Graduate study leading to the M.S. or Ph.D. degree with a major in nursing is available for qualified candidates. For more information, contact the student recruiter, School of Nursing, University of Minnesota, 5-160 Weaver-Densford Hall, 308 Harvard Street S.E., Minneapolis, MN 55455 (612-625-7980) or via e-mail at nurseoss@umn.edu.

Continuing education programs in nursing foster intellectual curiosity and growth. The school offers a calendar of contemporary, challenging, and flexible learning experiences that use a variety of academic, professional, and community resources.

Honors

The School of Nursing honors program provides academic opportunities that challenge students to perform at their highest level.

Honors students experience the excitement of discovery and the rigor of problem solving in an intellectually stimulating environment. In honors seminars, students discuss issues and questions important to health care and to the role that nurses play. Through honors courses and self-directed clinical and field experiences, students gain depth and breadth in the theory and practice of nursing.

Students admitted to the School of Nursing with a strong academic record will be invited to apply to the honors program. Further criteria for admission include leadership potential, critical thinking skills, communication skills, creativity, perseverance, and self-direction. After completing the curricular and honors requirements, students graduate with Latin honors.

Graduation Requirements

Prospective graduates must submit an application for degree to the One Stop Student Services Center, 200 Fraser Hall, by the deadline specified by that office for application.

To participate in the spring baccalaureate graduation ceremony, students must have completed all Nurs-designated courses. Students who have been approved to participate in the graduation ceremony are not automatically guaranteed degree clearance.

Professional Licensure

Examinations for state licensure may be taken after all program requirements have been completed and the degree awarded. Applications for examination are available from the Minnesota Board of Nursing, 2829 University Avenue S.E. #500, Minneapolis, MN 55414 (612-617-2270), or from the state in which the examination will be taken.

Advising

Academic advising for students is provided by their college of enrollment. Nursing students receive academic advising by nursing faculty. Advisers help students with academic concerns as well as with decisions concerning nursing careers and graduate study.

The School of Nursing Office of Student Services hosts information sessions. Further information is available online at the School of Nursing Web site, www.nursing.umn.edu.

Student Organizations

Nursing College Board (NCB)—NCB is the official student organization within the School of Nursing. The student body elects board representatives. The board promotes unity among nursing students and provides them with an official mode of communication with faculty, administration, and other members of the University community. Board activities include representing students on School committees and planning School events. NCB is part of the Graduate Professional Student Assembly and has representation in the Minnesota Student Association, Nursing Alumni Society, and Council for Health Interdisciplinary Participation (CHIP).

CHIP—CHIP is dedicated to enhancing the educational experience of University health sciences students, encouraging the exchange of ideas, and opening the lines of communication among students in the Academic Health Center.

The CHIP Student Center is in 1-425 Malcolm Moos Health Sciences Tower (612-625-7100).

Alpha Tau Delta—Alpha Tau Delta, a professional nursing fraternity, was founded in 1921 on the campus of the University of California at Berkeley. The Beta Chapter at the University of Minnesota was chartered in 1927. Alpha Tau Delta is dedicated to developing leadership, maintaining high professional educational standards, providing service to the community, and encouraging mutual helpfulness and understanding among students in the profession. Membership is open to all School of Nursing students.

Sigma Theta Tau International—The international honor society of nursing, Sigma Theta Tau, has a chapter at the University of Minnesota. Installed in 1934, Zeta Chapter is one of the oldest chapters in the country. The honor society recognizes superior achievement and leadership qualities, fosters high professional standards, encourages creative work, and strengthens commitment to the ideals and purposes of the profession. Zeta Chapter sponsors an annual research day, provides grants for research, presents annual awards for nursing excellence and leadership, and organizes programs of interest to its members. The membership selects new members from undergraduate and graduate students nominated by the faculty and from professional nurses in the community nominated by members or faculty.

School of Nursing Alumni Society—All School of Nursing graduates are encouraged to become members of the Alumni Society of the School of Nursing. The Society provides

- a link for alumni to the School of Nursing
- opportunities to enhance students' experiences
- communication among the School's alumni, faculty, and students about educational trends and developments in nursing
- support to the School of Nursing's mission of research, education, and service

Degree Program

Nursing B.S.N.

School of Nursing

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 90.

This program requires summer terms.

Degree: Bachelor of Science in Nursing.

The four-year bachelor of science in nursing (B.S.N.) program consists of one year of prerequisite courses and a three-year nursing sequence. Students are admitted to the three-year nursing sequence after completing the prerequisites. The program has a full-time, day school curriculum.

The program prepares students to be professional nurses who think critically and analytically as they encounter today's complex health care issues and a wide variety of client needs. Graduates are eligible to take the registered nurse (R.N.) licensure examination and be certified as public health nurses. The School of Nursing is accredited by the Commission on Collegiate Nursing Education (CCNE).

Today faculty emphasize clinical competence, leadership skills, critical thinking, and analysis. Located in one of the nation's most extensive interdisciplinary academic health centers, at one of the nation's top three public research universities (University of Florida study), and in the heart of one of the nation's most progressive health care communities—the school is a synergy of research and practice. Students learn from nationally and world-renowned faculty who draw their clinical skills from research and a rich array of clinical learning experiences.

The School of Nursing has two campuses. One is in the Twin Cities and the other is in Rochester, Minnesota. Both campuses are located in Minnesota's "Medical Alley," and provide students clinical experiences at a wide variety of top public and private facilities.

Admission Requirements

Students must complete 16 credits before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.8 for students already admitted to the degree-granting college.
- 2.8 for students transferring from another University of Minnesota college.
- 2.8 for students transferring from outside the University.

Send an application for B.S.N. to School of Nursing.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Prerequisite Courses

Students must maintain at least a 2.80 GPA in the pre-nursing required courses. It is preferred that students take NURS 2001 or NURS 3690-3691.

FSCN 1112 - Principles of Nutrition, ENVT (3.0 cr)

PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)

CHEM 1011 - Introductory Chemistry: Lecture and Laboratory, PHYS SCI/L (4.0 cr)

or CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

FSCN 1021 - Introductory Microbiology, BIOL SCI/L (4.0 cr)

or MICB 4001 - Microorganisms and Disease (2.0 cr)

or VBS 2032 - General Microbiology With Laboratory (4.0 cr)

Human Growth and Development

PSTL 2283W - Psychology of Human Development, SSCI, WI (4.0 cr)

or NURS 2001 - Human Growth and Development: A Life Span Approach, SSCI (3.0 cr)

or

take both of the following:

NURS 3690 - Life Span, Growth, and Development I (2.0 cr)

NURS 3691 - Life Span, Growth, and Development II (1.0 cr)

Program Requirements

Required Courses

Sophomore Year

INMD 3001 - Human Anatomy (3.0 cr)

LAMP 4177 - Pathology for Allied Health Students (3.0 cr)

NURS 3700 - Human Experience of Health and Illness (2.0 cr)

NURS 3702 - Foundations of Professional Nursing (3.0 cr)

NURS 3704 - Nursing Fundamentals I: Assessment and Intervention (4.0 cr)

NURS 3706 - Therapeutic Communication (3.0 cr)

NURS 4104 - Ethical Sensitivity and Reasoning in Health Care, C/PE (2.0 cr)

PHAR 3800 - Pharmacotherapy for the Health Professions (3.0 cr)

PHSL 3051 - Human Physiology (4.0 cr)

Junior Year

NURS 3710 - Statistics for Clinical Practice and Research, MATH (3.0 cr)

NURS 4201 - Nursing Care of Adults (6.0 cr)

NURS 4203 - Nursing Fundamentals II: Assessment and Intervention (4.0 cr)

NURS 4320 - Psychiatric and Mental Health Nursing (5.0 cr)

NURS 4322 - Population-based Public Health Nursing (5.0 cr)

NURS 4326 - Nursing Care of Older Adults (3.0 cr)

NURS 4205W - Nursing Theory and Research, WI (3.0 cr)

or NURS 4205V - Honors: Nursing Theory and Research, WI, H (3.0 cr)

NURS 4324 - Transcultural Nursing and Global Health, CD, IP (3.0 cr)

or NURS 5040H - Seeking Solutions to Global Health Issues, IP, H (3.0 cr)

Senior Year

NURS 4402 - Taking Ethical Action in Health Care, C/PE (1.0 cr)

NURS 4403 - Nursing Care of Childbearing Families (4.0 cr)

NURS 4404 - Applied Nursing Research and Research Utilization (2.0 cr)

NURS 4500W - Nursing Leadership and Health Care Systems, WI (4.0 cr)

NURS 4502 - Clinical Immersion (6.0 cr)

NURS 4504 - Professional Issues (2.0 cr)

Program Sub-plans

A sub-plan is not required for this program.

Honors

This is an honors sub-plan.

Honors students must take NURS 4205V and 5040H as choices within their regular curriculum. In addition, they take NURS 4404H.

Required Courses

Honors Applied Clinical Research

NURS 4404H - Honors: Applied Research and Research Utilization, H (2.0 cr)

Rochester

The nursing major is available at two campus locations, the University of Minnesota, Twin Cities and the University of Minnesota, Rochester. Policies, application materials, and course content are the same at both campuses.

At the University of Minnesota, Rochester, prerequisites differ slightly due to course availability at the Rochester Community and Technical College. Contact the School of Nursing or the University of Minnesota, Rochester for specific information.

Reserve Officers Training Corps

ROTC

General Information

The Reserve Officers Training Corps (ROTC) plays an important role in the national defense framework of our nation. The American tradition of military instruction on civilian college campuses began in 1819 when a former superintendent at West Point established the American Literary, Scientific, and Military Academy, which later became Norwich University. Military instruction soon spread to other institutions—Virginia Military Institute in 1839, the University of Tennessee in 1840, and The Citadel in 1842.

In 1862 the U.S. Congress, foreseeing the dual necessity of creating additional institutions of higher learning as well as providing a means of schooling in the military arts, passed the Morrill Land Grant Act. This act provided money from the sale of government lands to establish colleges and universities and specified that courses in the military arts should be offered at these institutions.

The University of Minnesota opened its doors in 1869 through the benefits made available by the Morrill Act. One of the original nine faculty members was the University's first professor of military science, Major General Richard W. Johnson. For 70 years, on-campus military training and, after 1916, ROTC programs at the University prepared students to enter the Army. In 1939 a Naval ROTC unit was established, and in 1949 an Air Force ROTC program began.

For more than 150 years, on-campus military training and ROTC programs have provided intelligent, well-educated leaders for the nation's defense. In keeping with the typical American concept of the citizen-soldier and civilian control of military forces, the programs produce military officers from all geographic and social strata whose leadership is characterized by initiative, ingenuity, and flexibility. ROTC officers may return to civilian status when they have fulfilled their military obligation or choose to serve as reserve officers. ROTC programs provide leadership resources not only for national defense but also for civilian enterprise.

Programs

At the University of Minnesota, ROTC programs are offered by the U.S. Army, Navy-Marine Corps, and Air Force. ROTC coursework is completed concurrently with degree work so that participants qualify for officer commissions in one of the four military services—Army, Navy, Marine Corps, or Air Force—as they complete requirements for a University degree. ROTC coursework offers students the opportunity to widen their perspective; sharpen their sense of responsibility; develop their ability to organize, motivate, and lead others; and acquire a maturity of judgment that can be a source of strength and self-confidence throughout their careers.

Four- and two-year programs are available, each offering a different approach toward earning a commission for students who meet selection requirements. Four-year programs consist of a basic course and an advanced course. The basic course is taken during the freshman and sophomore years and the advanced course normally comprises the junior and senior years. Two-year programs consist of the advanced course only. Scholarship students entering their sophomore year incur a service commitment; nonscholarship students are obligated to a service commitment once they enter the advanced course. Programs are open for undergraduate and graduate students.

Curricula

ROTC courses prepare students for military service as junior officers. Students learn to exercise self-discipline, organize time and effort efficiently, perform effectively under stress, analyze and react quickly and with good judgment, and consistently exhibit exemplary military bearing and appearance. Juniors and seniors are placed in positions of command and apply the leadership skills they have developed during their preceding years of ROTC training. Following the final year of practical experience, these men and women are well prepared to assume leadership responsibilities as commissioned officers.

ROTC curricula are administered by the University's Offices of the Executive Vice President and Provost and the Departments of Military Science (Army ROTC), Naval Science (Navy-Marine ROTC), and Aerospace Studies (Air Force ROTC).

Benefits

ROTC scholarship programs provide up to four years (five years under specific circumstances) of subsidized education, paying all tuition costs, instructional fees, and providing a \$300 per-semester allotment for textbook expenses. Additionally, scholarship students receive a subsistence allowance on an upward scale between \$250 to \$400 per month. Nonscholarship students in their junior and senior years receive the subsistence allowance for a maximum of 20 months. While attending summer training, all ROTC students receive approximately \$700 plus housing, travel, and allowances. Students attending summer training to qualify for a two-year program receive the same pay and allowances as ROTC students (see Scholarships in this section).

Obligations

Students who complete all requirements are commissioned as Second Lieutenants (Army, Air Force, and Marines) or ensigns (Navy). Upon commissioning, Naval ROTC scholarship students incur a four-year active duty service obligation; nonscholarship students incur a three-year active duty service obligation. Extended commitments to active duty are required for all pilots (eight years after qualification), naval flight officers (six years after qualification), and Nuclear Propulsion Program officers (five years after commissioning). Air Force pilot and navigator program students incur a commitment of 10 and 6 years, respectively, after completing their training; all other Air Force students incur a four-year active duty service commitment (students who receive five years of scholarship incur a five-year commitment). Army students selected for active duty serve for three years; Army scholarship students selected for active duty serve four years. Army students commissioned into the National Guard or Army Reserve serve on active duty for initial schooling and then assume reserve obligations of varying durations.

Admission

The three ROTC programs are open to all students. Young men and women are selected on the basis of their own merits. Certain qualifications and eligibility criteria for enrollment and commissioning must be met, as set forth in the laws and regulations that govern the programs. Students who do not meet these criteria may enroll in a course for its educational value but do not receive financial benefits or an officer's commission.

To be eligible for admission to a University ROTC program, applicants must

- be full-time college students;
- have reached their 17th birthday by June 30 of the year they plan to enroll;
- be of sound physical condition;
- show evidence of moral integrity, satisfactory scholarship and extracurricular activity, and potential officer capabilities; and
- have no moral or personal convictions that will prevent them from conscientiously bearing arms in support and defense of the U.S. Constitution.

Transfer Students—Students who have participated in ROTC training at another college or university may request transfer if they were honorably released by the first institution and are accepted by a University of Minnesota ROTC program.

Advanced Standing—Students who have participated in ROTC training at another institution may be granted advanced standing for military courses successfully completed.

Veterans—Veterans may take advantage of their military service and experience by seeking advanced placement in a ROTC program. G.I. Bill educational benefits and ROTC benefits may be received concurrently. Army students may receive advanced standing for membership in the National Guard or Army Reserve through the Simultaneous Membership Program. After commissioning, veterans can count their prior service for longevity pay and retirement.

Scholarships

Scholarships are available through national or regional selection systems. High school seniors may compete for four-year scholarships. Completed applications must be submitted no later than November 15 (Army), December 1 (Air Force), or January 1 (Navy-Marine) for enrollment the following fall semester. College freshmen and sophomores may compete for three- and two-year scholarships.

Students accepted into one of the ROTC nonscholarship programs are normally eligible to compete for the scholarship program after one or two semesters of enrollment. Aptitude for military service and academic performance are major considerations for acceptance. For more information about particular/special scholarship programs, contact the appropriate department.

Student Activities

Each ROTC department offers a wide range of activities for its students. A variety of local and nationally affiliated organizations offer interested and qualified students the opportunity to participate in activities, both on and off campus, that develop their leadership and managerial skills. Social events and athletic competitions, scheduled throughout the school year, round out the activities available.

Department of Military Science

The Department of Military Science conducts the Army Reserve Officers Training Corps (ROTC) program to prepare men and women to serve as Second Lieutenants in the United States Army. Students serve our nation in one of the three components of the Army—Active, Reserve, National Guard—upon completion of a bachelor or graduate degree and completion of the ROTC program. Students serve in various career fields

including the Nurse Corps, Aviation, Armor, Military Intelligence branches, and Signal branches to name a few. Students enrolled in Army ROTC have a wide variety of majors and attend the University of Minnesota or one of the program's 12 partnership schools in the Twin Cities area.

The Army ROTC program focus is on management and leadership skills. The core coursework includes 16 to 26 credits in topics such as the art and science of leadership, ethics, values, integrity, honor, problem solving skills, responsibility, basic military skills, military history, physical training, and adventure training. Students register and earn academic credit for Army ROTC courses in the same manner as other elective courses in their college curriculum.

An academic minor in military science is available but is not required.

Programs

Three programs are available in the Department of Military Science for students to earn a commission as a Second Lieutenant in the United States Army.

Four-Year Program—The four-year program is divided into two parts—the basic course and the advanced course. The basic course is typically completed in the first two years of college. Unless a cadet has accepted a scholarship, the basic course is voluntary and all students are eligible. After completing the basic course, students that meet the physical and academic standards, and have demonstrated leadership potential, contract into the advanced course. The advanced course includes four concurrent semesters of coursework and the Leader Development and Assessment Course (LDAC). The LDAC is a paid six-week leadership course conducted at Fort Lewis, Washington, during the summer. Typically students attend LDAC during the summer after the first year of the advance course.

Three-Year Program—The three-year program is designed for students who want to start ROTC as sophomores. Students complete the basic course in one year instead of two. This method is referred to as compression. Students completing the basic course as compression students go on to contract in the advanced course as above.

Two-Year Program—The two-year program enables eligible students to contract in the advanced course at the time they are academic juniors or seniors, or graduate students with four semesters remaining before graduation. Eligible students are those with one or more of the following:

- Prior service in the military.
- Member of the National Guard or Reserve with basic training completed.
- Completion of three or more years of Junior ROTC in high school.
- Completion of the Army ROTC Leader's Training Course.

Students that are members of the National Guard or Army Reserve can participate in the Simultaneous Membership Program (SMP), which provides additional income and the opportunity to serve in a leadership position in the student's unit of choice.

Military Science Minor—A military science minor is available through the College of Continuing Education in collaboration with the Department of Military Science. This minor provides students with basic concepts and principles of military science and the art of leadership. Areas of study include citizenship, military history, values, ethics, integrity, honor, responsibility, management, and leadership skills. Students gain practical leadership experience, develop self-discipline, gain confidence, and improve physical stamina—all of which are valuable qualities when applied to service in a military or civilian career.

The military science minor is open only to ROTC cadets pursuing a bachelor's degree from the University and a commission in the United States Army.

To complete the minor, students must complete 20-28 credits of specialized coursework including MIL 3130, 3131, 3140, 3141, four semesters of Military Science Leadership Lab, HIST 3891—American Military History, and an approved philosophy course.

Benefits

The Department of Military Science offers many benefits to students with or without military experience.

Personal Growth—The Department of Military Science gives students the opportunity to gain confidence, improve self-discipline, and improve physical and mental toughness. The leadership experience gained by completion of the program gives students a marketable asset—leadership.

Scholarships—A wide variety of scholarships are available and application can be made at anytime during the year. Scholarships range from two to four years in duration with extensions possible for high demanding majors such as nursing or engineering. Scholarships pay for all tuition and mandatory fees and \$900 per year for textbooks. Two-year scholarships are available for members of the National Guard and Army Reserve. These scholarships feature continued reserve duty after commissioning and guaranteed branching in the student's unit. Scholarships for two to four years are also available and include duty in the Active Army after commissioning.

Guaranteed Job after Graduation—Upon commissioning, students have a full time job in the Active Army or part time job in the National Guard or Army Reserve. The military obligation of service is eight years after commissioning (four years Active Army and four years in the reserve component, or eight years in the National Guard or Army Reserve). The type of obligation is determined at the time of contracting in the advanced course and is tied to the type of scholarship. Cadets are selected for a specific branch depending on factors such as their interest, academic major, LDAC performance rating, and the needs of the Army.

Income—All contracted cadets receive \$300 to \$500 per month, depending upon the class, for up to ten months of the year. Students with prior service, SMP cadets, and members of the National Guard or Army Reserve may be eligible for Montgomery GI Bill (MGIB) benefits, financial assistance or reimbursement for tuition, and an additional \$350 per month.

Department of Naval Science

The Naval Reserve Officers Training Corps (NROTC) offers the opportunity for qualified young men and women to earn commissions as Navy, Marine Corps, or Navy Nurse Corps officers as they complete requirements for a University degree. The NROTC program is the nation's largest producer of naval officers.

During their four years of college, NROTC students (midshipmen) complete 32 credits of instruction in naval orientation, naval ship systems, seapower and maritime affairs, navigation, shipboard operations, organization, management, leadership, and ethics, plus 120 hours of professional training in military ceremonies, customs, and skills, and various hands-on training opportunities.

Upon receiving a commission, a new Navy ensign usually receives advanced specialty training and then is assigned to duty aboard a surface ship, nuclear-powered submarine, or with an aviation squadron. Newly commissioned Marine Corps second lieutenants attend The Basic School in Quantico, Virginia following graduation. They then choose from several

occupational fields, such as infantry, armor, aviation, artillery, intelligence, and engineering. Nurse program graduates are commissioned as Navy Nurse Corps officers and assigned to Navy medical facilities throughout the world.

Student Categories

Students who study and train with NROTC can be classified into three categories.

Scholarship Students—NROTC offers many scholarships. Scholarship students are appointed through an annual national selection process before college admittance or through competition with their peers after entering the NROTC program. Once appointed, students are designated as midshipmen in the Naval Reserve and receive a scholarship that covers all tuition and fees, a per-semester allotment for textbooks, and a subsistence allowance of between \$250 to \$400 per month for up to 40 months. Upon graduation and commission into the Navy-Marine Corps Reserve, they serve a minimum active duty obligation of four years.

College Program Students—These students are enrolled by the professor of naval science and frequently are “walk-ons” who join the NROTC program from the regular University student population. They are provided with uniforms and naval science textbooks, but pay their own tuition and fees. The college program consists of the basic (freshman and sophomore) and advanced (junior and senior) courses. Advanced course students are selected from the ranks of basic course students. Advanced course midshipmen receive a subsistence allowance of between \$350 to \$400 per month for up to 20 months. Upon graduation and commission into the Navy-Marine Corps Reserve, they serve a minimum active duty obligation of three years.

College program students may apply for NROTC scholarships based on the professor of naval science's recommendation. Special scholarship opportunities may be available for college program students at various points in the program.

Naval Science Students—Naval science students are associated with the Department of Naval Science for academic instruction only, e.g., for courses in navigation or organization and management. They register and pay fees in the same manner as for other University courses. These students do not wear uniforms, participate in summer training programs, or receive NROTC benefits. However, those who are eligible may apply for enrollment as NROTC college program or two-year scholarship program students.

Programs

The following NROTC programs and scholarship opportunities lead to rewarding careers as officers in the Navy or Marine Corps.

Four-Year Scholarship Program—This program educates and trains qualified young men and women for active duty as reserve officers in the Navy or Marine Corps.

Scholarship recipients are chosen by a national selection board and must be accepted by the University. The application deadline is January 1 for enrollment the following fall semester.

Navy option scholarship students (with the exception of Navy Nurse Corps option midshipmen) must successfully complete one year of calculus by the end of their sophomore year and one year of calculus-based physics by the end of their junior year. Marine Corps option scholarship students have a slightly different sequence of naval science courses and are not required to fulfill the calculus or physics requirements.

Scholarship students are required to complete three summer training periods, for which they receive training pay. After completing naval science requirements and earning a bachelor's degree, students are commissioned as officers in the Navy-

Marine Corps Reserve and serve on active duty for a minimum of four years.

Students already enrolled in the college program may apply for the scholarship program if nominated by the professor of naval science and selected by the chief of naval education and training.

Navy Nurse Corps Scholarship—Four-year scholarships are available to students planning to pursue the bachelor of science degree in nursing (B.S.N.). Upon graduation, these students are commissioned as reserve officers in the Navy Nurse Corps. Eligibility and selection procedures are the same as for the regular four-year NROTC scholarship program.

Four-Year College Program—This program is for students who wish to serve their country as reserve officers in the Navy or Marine Corps. Participants are University freshmen selected by the professor of naval science.

There are almost no restrictions on undergraduate academic courses students may choose provided they can be applied to a bachelor's degree. Students must complete the basic (freshman and sophomore) and advanced (junior and senior) naval science course sequences and certain University courses before graduation. College program students are not required to fulfill the calculus and physics requirements that apply to the scholarship program. Instead, they may take any math course of college-level algebra or higher and any physical science course that includes a lab. In addition, students attend a summer training cruise between their junior and senior years.

After graduating and completing their naval science requirements, students are commissioned as ensigns in the Naval Reserve or second lieutenants in the Marine Corps Reserve and serve on active duty for a minimum of three years.

Two-Year Scholarship Program—This program provides the same NROTC benefits to college juniors and seniors as the four-year scholarship program. To qualify, applicants must have a 2.50 cumulative GPA. Navy option applicants must have successfully completed one year of calculus and must complete one year of calculus-based physics before the end of their junior year. Interested students should apply before March 1 of their sophomore year. Selected students must complete a six-week course of instruction at the Naval Science Institute (NSI) in Newport, Rhode Island. Following NSI, students enroll in the NROTC advanced course. Commissioning as a Navy ensign or Marine Corps second lieutenant follows successful completion of the program and carries an obligation to serve four years of active duty.

Two-Year College Program—Students attending or transferring to the University should apply to the two-year college program before March 1 of their sophomore year. Students selected must attend a six-week course of instruction at the Naval Science Institute (NSI) in Newport, Rhode Island.

Upon return to the University, they enroll in the college program advanced course. After graduation and commissioning, students incur a three-year active duty obligation. Any student finishing near the top of the NSI class may be offered a two-year NROTC scholarship. This includes full tuition plus the other scholarship program benefits, and also incurs a four-year active duty obligation.

Naval Science Institute (NSI)—Students selected for either of the two-year programs attend the Naval Science Institute (NSI) in Newport, Rhode Island, following their sophomore year. NSI provides a six-week course of instruction in naval science and professional training. While at NSI, students receive pay, uniforms, room and board, and transportation. Successful completion of NSI qualifies students to enroll in the NROTC advanced course.

Summer Training—NROTC offers exciting training opportunities. Each summer, NROTC midshipmen train around the world at Navy and Marine Corps bases and aboard U.S. Navy and allied foreign navy vessels of all types. Scholarship students participate in four to six weeks of training each summer following their freshman year while college program students attend training during the summer between their junior and senior years.

Cross-Town Agreements—Students who attend the University of St. Thomas or Macalester College are eligible to participate in any of the University of Minnesota NROTC programs and earn commissions as Navy or Marine Corps officers.

Curriculum

The naval science curriculum covers basic seamanship to fleet operations and provides intensive education in the art and science of being a naval officer. All midshipmen learn about the background and meaning of our national and naval traditions and the importance of professional and ethical performance. This awareness, combined with the opportunity to develop and practice basic leadership principles, affords them the inner confidence necessary to effectively lead others and assume the responsibilities of a Navy or Marine Corps officer.

Midshipmen take the course sequence described below. During the second and third years, they take either the Navy or Marine Corps sequence. In addition to the specified courses, students attend NROTC professional training for three hours each week. During the junior and senior years, these sessions emphasize command and leadership skills. NROTC students must also take certain University courses specified by the Navy.

Navy Sequence—First Year

NAV 1000 - Professional Training in Naval Science
NAV 1101 - Introduction to Naval Science
NAV 1102 - Seapower and Maritime Affairs

Navy Sequence—Second Year

NAV 2000 - Professional Training in Naval Science
NAV 2201 - Ship Systems I (Naval Engineering)
NAV 4401 - Leadership and Management I

Navy Sequence—Third Year

NAV 3000 - Professional Training in Naval Science
NAV 3301 - Navigation I (Piloting and Celestial Navigation)
NAV 3302 - Navigation II (Seamanship and Ship Operations)

Navy Sequence—Fourth Year

NAV 4000 - Professional Training in Naval Science
NAV 2202 - Ship Systems II (Weapons)
NAV 4402 - Leadership, Management, and Ethics II

Marine Option—Second Year

NAV 2000 - Professional Training in Naval Science
NAV 3310 - Evolution of Warfare (can also be taken in third year)

Marine Option—Third Year

NAV 3000 - Professional Training in Naval Science
NAV 4410 - Amphibious Warfare (can also be taken in fourth year)

Students register for NROTC courses in the same manner as for other courses in their academic programs. These courses carry academic credit and may be used to fulfill University degree requirements. Students who are not in the NROTC program may enroll in a naval science course as an elective with the instructor's consent.

Department of Aerospace Studies

The Air Force ROTC (AFROTC) program enables qualified men and women to work toward commissions as officers in the Air Force while completing requirements for a University degree. Students are commissioned as second lieutenants upon graduation.

The AFROTC curriculum emphasizes development of leadership and communication skills. Students learn ways in which the Air Force supports national policy. Leadership theory and its practical application in directing personnel and programs are emphasized.

AFROTC courses are offered by the Department of Aerospace Studies. Students register for these courses in the same manner as for other University courses.

Programs

AFROTC programs and associated scholarships vary from one to four years in length. The length of the program and scholarship is based on the number of years the student has left until graduation. For example, a high school senior who earns a four-year scholarship joins the four-year program during their freshman year at the University and activates a four-year scholarship. Alternatively, a college senior would join the one-year program and, if qualified, activate a one-year scholarship. Students can join AFROTC at any time throughout the year; typically scholarship activation occurs during the fall term.

Scholarship boards are held several times a year. The application deadlines for scholarships are:

- High school student application deadline for a four-year scholarship—December 1 of senior year
- College student application deadline for one- to three-year scholarships—January 15 for the primary board; June 1 for a supplemental board

Students do not need to be members of AFROTC to compete and apply for an in-college scholarship, however, they must become members to activate any scholarship.

Students must enroll in aerospace studies classes every semester regardless of the length of the program. In addition, all students must successfully complete a summer field-training encampment prior to commissioning. This training typically takes place during the summer between the students' sophomore and junior years. Note: The one-year program is not offered every year and is based on the needs of the Air Force. Contact the University AFROTC to find out more about program availability.

Time requirements for AFROTC students vary by year. Freshmen and sophomores typically spend from three to five hours per week performing ROTC duties, and juniors and seniors typically spend from five to ten hours per week. Duties include attending mandatory classes and maintaining physical fitness.

The vast breadth of the Air Force and its operations is difficult to portray in the classroom; so Air Force cadets have the opportunity to visit bases for firsthand observation of how the Air Force operates. These trips are frequently made on weekends or scheduled to coincide with school vacation periods. Cadets may be flown by military aircraft to an Air Force base to tour facilities, receive mission briefings, and inspect aircraft and other technical equipment. There are many other opportunities available to cadets that range from free fall parachuting, to piloting a glider aircraft, to visiting Air Force installations in other countries.

Curriculum

Aerospace studies classes provide students with the tools required to become effective leaders in the Air Force. Freshmen and sophomores take a 1-credit survey course each semester to learn the basics of the Air Force and AFROTC (AIR 1104 and 1105) and Air Force history (AIR 1204 and 1205). Juniors and seniors take a 3-credit survey course each semester to study the traits and characteristics of effective leaders and managers (AIR 3301 and 3302) and to examine national security policy and professionalism (AIR 3401 and 3402). In addition, all AFROTC students must enroll in the Leadership Laboratory where class lessons are employed by running a cadet organizational structure (AIR 1000).

Students taking aerospace studies courses for academic credit only and not enrolled in AFROTC are exempt from the Leadership Laboratory requirement.

For the joint military science leadership minor, students must complete Air Force history (AIR 1204 and AIR 1205), Air Force leadership and management (AIR 3301 and AIR 3302), national security affairs (AIR 3401), preparation for active duty (AIR 3402), and a philosophy or rhetoric or leadership course approved by the professor of aerospace studies/chair of the Department of Aerospace Studies. Note: AIR 1204 and 1205 can be substituted with AF ROTC Field Training.

Admission

Entry into the last two years of the AFROTC program is competitive. Candidates must

- pass the Air Force Officer Qualifying Test (AFOQT).
- pass an Air Force medical examination.
- have a GPA of 2.00 or higher.
- pass a physical fitness test and meet weight standards.
- complete field training.
- graduate and commission before the age of 35.

Scholarship Age Limit—Students must be under the age of 31 on December 31 of the commissioning year to be eligible for a scholarship. Otherwise, cadets must be commissioned and enter active duty before reaching age 35. Students not eligible for a scholarship due to age restrictions are eligible for a financial incentive.

Benefits

AFROTC offers students a challenging position in the Air Force immediately after graduation in a variety of career fields. All cadets receive uniforms and AFROTC textbooks free throughout the program. All scholarship recipients and all cadets in their last two years of AFROTC receive between \$250 and \$400 per academic month and may travel on any military aircraft (space-available status). All cadets also have the opportunity for orientation flights aboard Air Force aircraft and visits to Air Force bases.

Active Duty Requirements

Students not programmed for pilot and/or navigator training incur a four-year active duty commitment. Those programmed for pilot and navigator programs incur a commitment of ten and six years active duty, respectively, after completing their training.

Scholarship Programs

AFROTC offers many scholarships. These scholarships may cover full tuition, fees, and books plus a nontaxable monthly allowance of \$250 to \$400 paid directly to the student. Some scholarships are awarded on a competitive basis while others are awarded on a fully qualified basis. Most three- and four-year

scholarships are offered on a best-qualified basis. The one- and two-year scholarships are typically offered on a fully qualified basis.

Four-year scholarships are available on a competitive basis to high school seniors. Applications are usually available early each summer, with a deadline of December 1 for enrollment the following fall semester.

Scholarship entitlements and types of scholarships offered vary according to the needs of the Air Force. Students should contact the University AFROTC office to find out if they qualify for a competitive or fully qualified scholarship. More information and scholarship applications are available online at www.afrotc.com and www.afrotc.umn.edu.

General Information

For more than a century, the Institute of Technology (IT) has provided education, research, and technology transfer in science and engineering. With 4,500 students enrolled in its undergraduate programs, 2,600 in graduate programs, and 400 faculty, IT's 12 departments and schools and 15 research centers are committed to excellence in all they undertake.

Computer Facilities—The Institute of Technology, in cooperation with the Department of Computer Science and Engineering and the office of Academic and Distributed Computing Services, has established a number of computer laboratories for students. These laboratories provide interactive computing using either stand-alone computers and workstations or remote access to central computing facilities, including those of the Minnesota Supercomputer Institute. Laboratories are available to IT students any time during the work day and evening and weekend hours.

Students also have access through their departments to many special-purpose machines, ranging from small tabletop units for data reduction in laboratories to larger models reserved for special projects.

The Department of Computer Science offers a series of courses in Java and C++. Discipline-related computing courses are offered in some departments.

Admission

Freshman Admission

See Freshman Admission in the General Information section of this catalog and refer to the University of Minnesota, Twin Cities undergraduate application booklet for freshman admission requirements.

Appeals—Any student who believes that the circumstances concerning their application need further consideration may submit a written appeal to the Office of Admissions.

Upper Division Admission—Students entering as freshmen or sophomores must apply for admission to the upper division (junior and senior years). New freshmen and sophomores are told upon admission and at orientation what GPA might be required for entry into their desired upper division major field. (For procedure, see Upper Division under Scholastic Policies in this college section.)

Admission Without a Designated Major—Students who want to keep their options open and learn about IT fields before selecting a specific major should indicate “Undecided” on the admission application. They receive advising from the Office of Lower Division Programs until they are admitted to upper division. During that period students can use the many resources available to learn about IT fields, including mentors; peer, faculty, industry, and alumni advisers; special courses; and written materials. These resources provide information about career opportunities in IT's various fields and other colleges and help students avoid the mistake of selecting a major for the wrong reasons.

All students are urged to take advantage of the Industry Adviser and Mentor Programs, and visit selected industries to learn about engineering and science fields with an engineer and/or scientist of their choice. Currently, more than 200 engineers and scientists

from Honeywell, 3M, NSP, and many other companies serve as advisers to IT students through this program. Arrangements to participate are made by online application.

IT undecided students follow the same first-year academic program as that followed by IT students with a specified major.

Advanced Standing Admission (Transfer)

Students who have completed any postsecondary classes after high school are considered for admission with advanced standing. Students planning to transfer to IT should be pursuing a lower division engineering, science, or math program. The mathematics, chemistry, physics, and computer science courses required for the preferred major should be mostly completed at the time of application. Admission decisions are based on an overall “technical” GPA using grades in science, calculus, computer science, and engineering. Because demand for some IT programs exceeds available places, applicants are asked to indicate three majors in order of preference. Applications must include recent transcripts from all colleges attended, reflecting all college work attempted (whether satisfactorily completed or not). Applications must also include a high school transcript to show whether the preparation requirements listed have been met. Most courses transfer routinely. Equivalency for technical courses has been established between IT and most colleges and universities (see www.it.umn.edu/prospective/equiv). Technical courses in which a D has been earned do not transfer.

Dual Degree (3/2) Programs—IT has cooperative agreements with a number of public and private colleges. These programs support students who want to combine a strong liberal arts background with study in engineering—and are willing to spend another year or two achieving this goal.

Under one plan a student can complete three years of study at a private college and then transfer to IT for two additional years. Core college requirements and the pre-engineering core courses in math and science are completed at the private college. A bachelor's degree is awarded by both the private college and IT.

The second plan requires completion of a bachelor of arts degree in math or science before coming to the University to work toward a master of science degree in engineering. This typically involves completing some undergraduate engineering coursework. This plan minimizes the amount of undergraduate coursework required. The amount of such coursework will vary by department and area of study. Participating colleges include (in Minnesota) Augsburg College, Bethany Lutheran College, Bethel College, Concordia College (Moorhead), Gustavus Adolphus College, Hamline University, Macalester College, MN State University–Moorhead, Northwestern College, the College of St. Catherine, Saint Mary's College, St. Olaf College, St. John's University–College of St. Benedict, St. Scholastica, University of St. Thomas, University of Minnesota, Morris; (outside Minnesota) Augustana College, SD; Carroll College, MT; Carthage College, WI; Jackson State University, MS; Lawrence University, WI; Luther College, IA; Morningside College, IA; North Central College, IL; North Park College, IL; Simpson College, IA; University of Mary, ND; University of Winnipeg, Manitoba, Canada; University of Wisconsin–Eau Claire, WI; University of Wisconsin–La Crosse, WI; University of Wisconsin–Oshkosh; University of Wisconsin–River Falls, WI; Westmont College, CA; Wheaton College, IL; Whittier College, CA.

Degrees and Programs

Undergraduate Degrees—Each of IT's undergraduate programs provides a rigorous and stimulating education enhanced by close interaction with distinguished research faculty and access to IT's research facilities.

Nineteen degrees are offered:

- bachelor of aerospace engineering and mechanics*
- bachelor of science in astrophysics
- bachelor of bio-based products engineering
- bachelor of biomedical engineering*
- bachelor of biosystems and agricultural engineering*
- bachelor of chemical engineering*
- bachelor of science in chemistry
- bachelor of civil engineering*
- bachelor of computer engineering*
- bachelor of science in computer science
- bachelor of electrical engineering*
- bachelor of geological engineering*
- bachelor of science in geology
- bachelor of science in geophysics
- bachelor of materials science and engineering*
- bachelor of science in mathematics
- bachelor of mechanical engineering*
- bachelor of science in physics
- bachelor of science in statistics

* Program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

Graduate Degrees—The University of Minnesota is the only institution in the state that offers a full range of graduate programs in mathematics and computer science, the physical sciences, and engineering. Each IT department offers M.S. and Ph.D. degree programs in several areas within its discipline. For detailed information about the various graduate programs, consult the Graduate School Catalog.

IT and the Graduate School jointly offer a program leading to the master of engineering (M.E.) degree in any of the engineering disciplines. This program provides advanced preparation in specialized design work for recent graduates in engineering as well as for working engineers who wish to improve their technical capabilities.

The management of technology program is an executive-format graduate program that prepares working engineers and scientists for careers in technology management. It is a part-time, two-year program leading to a master of science degree in the management of technology (M.S.-M.O.T.). Similar professional masters programs are offered in infrastructure systems, and software engineering. For more information, contact the Center for the Development of Technological Leadership, 510 West Bank Office Building, 1300 S. Second Street, Minneapolis, MN 55455 (612-624-5747).

Interdisciplinary Programs—IT students can plan interdisciplinary programs tailored to their specific interests. Although a degree is approved by a single department, students can combine coursework from several departments.

Many interdisciplinary programs are possible. A few examples include acoustics, bioengineering, environmental engineering, nuclear engineering, and transportation. Students should

contact their department office or visit 105 Lind Hall for more information.

Premedical Programs—Because there is no prescribed premedical major, some students plan their IT programs as preparation for medical school. The Minnesota medical schools in Duluth, Minneapolis, and Rochester give strong preference to applicants who are state residents.

The Minneapolis campus Medical School has approved the following courses to fulfill its premedical requirements.

Biology—BIOL 1009 and 3211 and 2005. This sequence is most parallel to MCAT.

Biochemistry—BIOC 3021, BIOC 4025 (optional lab)

Chemistry—CHEM 1021–1022, 2301–2302 and 2311

English and Literature—One English composition course and one literature course

Calculus—MATH 1271 or equivalent

Physics—PHYS 1201 and 1202 or 1301 and 1302

Social and Behavioral Sciences and Humanities—Four courses: one course in psychology with the remaining coursework in at least two of the following areas—history, sociology, anthropology, philosophy, comparative studies, music, or art.

All math/science courses must be taken A-F. A-F grading is preferred for all coursework.

Coursework in genetics and upper level statistics is strongly recommended.

Additional academic courses to complete degree requirements.

Prerequisite courses do change occasionally. The Medical School Web sites have the most up-to-date information and can be found at:

Duluth: <http://penguin.d.umn.edu/Admissions>

Minneapolis: www.meded.umn.edu

Rochester: www.mayo.edu/mms/md-admissions.html

For more information, contact the Health Careers Center in 2-571/585 Moos Tower (612-624-6767) or visit the Web site at www.healthcareers.umn.edu.

Minors

Information Technology Minor Only

This interdisciplinary minor provides opportunities to students in nontechnical disciplines to supplement their major with courses focused on information technology. For more information, see the Degree Programs and Minors section.

Honors Program

The IT honors program provides special educational experiences to those students who have the ability and motivation to accept an extra challenge. Honors opportunities include a specially designed academic curriculum during the freshman and sophomore years, upper division programs leading to the cum laude degrees, close contact with instructors, opportunities for research, and a variety of elective honors courses, seminars, and colloquia offered in IT and the College of Liberal Arts.

During the freshman year, most lower division honors students take enriched mathematics, physics, and chemistry courses that provide excellent preparation for any IT major. Students also participate in the many social and cocurricular activities initiated by the IT Student Honors Group and may live in honors housing.

This special lower division academic program continues into the sophomore year offering enough flexibility so students can take the courses they need to pursue any major. For the junior and senior years, each department offers its own upper division honors program consisting of courses, research projects, and honors opportunities leading to the cum laude degrees.

Admission to Lower Division Honors Program—Lower division honors students begin their participation in the honors program in the fall of the freshman year. These students apply and are admitted in their senior year of high school. Selection is based on academic accomplishments in high school, scores on standardized tests, an application essay, and a recommendation usually from a teacher or counselor. The priority application deadline for freshman admission is January 15. Applications may be obtained by contacting the Office of Admissions, 240 Williamson Hall (612-625-2008).

Admission to Upper Division Honors Programs—Students about to enter their junior year may apply to the upper division honors program administered through their major department. Admission requirements are set by the individual departments and may be obtained from the department or the IT Honors Office. Previous enrollment in the lower division honors program is not required for participation in upper division honors programs.

Graduation With Honors—Enrollment in the upper division honors program is required for graduation with the honors designations cum laude, magna cum laude, and summa cum laude. Other graduation criteria include at least two years of University of Minnesota coursework, quality of the grade record, participation in honors opportunities, fulfillment of requirements designated in the major field, and an honors thesis.

IT Honors Office—This office provides academic advising, procedural information, and other college office services to honors students. The address is IT Honors Office, University of Minnesota, 136 Lind Hall, 207 Church Street S.E., Minneapolis, MN 55455 (612-625-2800).

Scholastic Policies

Continuation in Sequences—IT students taking the following lower division sequence courses must earn at least a C- each semester to continue in the sequence.

CHEM 1021-1022, 2101-2111

CHEM 2301, 2302, 2311

EE 2001, 2011

MATH 1155, 1271-1272*

MATH 1371-1372

MATH 1571-1572

PHYS 1301, 1302

PHYS 2303,** 2601

* To continue in additional mathematics courses (in particular MATH 2243 or MATH 2263) or sequences, IT students must earn at least a C- in MATH 1272, 1372, or 1572.

** To continue in physics sequences, IT students must earn at least a C- in PHYS 2303.

IT students must earn at least a C- in all 1xxx and 3xxx math, physics, and chemistry courses, and all courses required by the major. All courses required by the major must be taken A-F.

Upper Division—The upper division corresponds to the junior and senior years.

Freshmen and sophomores must apply for entry and are told at orientation what minimum GPA might be required. Students should file an application in 105 Lind Hall before completing their sophomore year.

Changing Majors—To change majors within IT, upper division students must petition. Forms are available in 105 Lind Hall. A transcript must accompany the petition.

Students who graduate from IT but continue to register for courses will automatically have their status changed to nondegree unless they had previously been admitted to a second (double) major.

To change from IT to another college unit or campus within the University, students must apply for transfer through the One Stop Student Services Center, 200 Fraser Hall, as far as possible in advance of the projected transfer. Some units have transfer application deadlines. Students must meet admission requirements of the unit they plan to enter.

Conduct and Discipline

IT assumes that all students who enroll in its programs are serious about their education and expects them to be responsible individuals who demand of themselves high standards of honesty and good personal conduct.

IT expects the highest standards of honesty and integrity in the academic performance of its students. Any act of scholastic dishonesty is regarded as a serious offense, which may result in expulsion. IT defines scholastic dishonesty as submission of false records of academic achievement; cheating on assignments or examinations; plagiarizing; altering, forging, or misusing a University academic record; taking, acquiring, or using test materials without faculty permission; acting alone or in cooperation with another to falsify records or to obtain dishonestly grades, honors, awards, or professional endorsement. Aiding and abetting a student in an act of scholastic dishonesty is also considered a serious offense.

All students at the University have the right to a calm, productive, and stimulating learning environment. Students who engage in behavior that disrupts the learning environment for others may be subject to disciplinary action under the Student Conduct Code, which prohibits disruptive conduct. In addition, students responsible for such behavior may be required to cancel their registration (or have their registration canceled).

All disciplinary cases that are academic and nonacademic in nature or that involve two or more colleges are referred to the Office for Student Academic Integrity, 123 University Office Plaza, 2221 University Avenue S.E., Minneapolis, MN 55414 (612-624-6073).

A student has the right to a hearing and to appeal any disciplinary action. Copies of the procedures for cases of scholastic dishonesty are available at the Office for Student Academic Integrity.

Professional Registration

Registration is a legal requirement for certain kinds of practice in engineering and in geoscience. A professional license is required before an individual may use the designation of engineer in any legal connection. Many engineers obtain a license to show their support for legal recognition of the professional standing of the engineer or geologist. Many also obtain a license because professional registration may be useful or required in future employment.

The license is awarded in most states to those graduates of an accredited engineering curriculum who have passed examinations in the fundamentals, principles, and practice of engineering and demonstrated their competence by a specified number of years of appropriate experience. The fundamentals of engineering examination covers materials studied in undergraduate curricula. This examination is given in the spring and fall each year and may be taken by students in their senior year. More information and applications may be obtained from

the Career Center for Science and Engineering in 50 Lind Hall or by writing to the Minnesota State Board of Architecture, Engineering, Land Surveying, Landscape Architecture, Geoscience, and Interior Design, 133 7th Street E., St. Paul, MN 55101-2333 (651-296-2388).

Advising

Advising for freshmen is coordinated by the Office of Lower Division Programs, 128 Lind Hall (612-624-2890). Every IT freshman is assigned to a team of approximately 100 students. During orientation, freshmen meet with their team adviser and plan their fall schedule. Students on each team take one or more courses together; this encourages the formation of study and support groups. Freshmen must meet with their team adviser at least once each term to discuss their progress and plan their schedule for the following semester.

All lower division students obtain advising through the Office of Lower Division Programs until admission to upper division.

Special Learning Opportunities and Resources

Student Affairs Office—Prospective and current students can discuss any questions or problems with an advising staff member in the Student Affairs Office, 105 Lind Hall (612-624-8504) or e-mail studentaff@itdean.umn.edu. This office is responsible for admission, orientation, scholastic conduct, institute-wide scholarships, degree requirements and procedures, and related functions. Appointments are encouraged.

Tutors—IT provides peer tutors for students in chemistry, mathematics, physics, and other IT courses. These teaching assistants, selected from junior and senior IT students, are trained, qualified, and willing to assist students one-on-one with problems in IT lower division courses. Tutoring is provided in various locations—in 150 Lind Hall, by appointment in 128 Lind Hall, and in all residence halls.

Mathematics graduate teaching assistants are available in 150 Lind Hall with the undergraduate teaching assistants. In addition, graduate teaching assistants provide tutoring for computer science courses in 4-205 Electrical Engineering/Computer Science.

For more information about tutors, contact the Office of Lower Division Programs, 128 Lind Hall (612-624-2890).

Paid Learning Opportunities—The Career Center for Science and Engineering (CCSE) provides information about off-campus employment related to major or career interests. Many options are available for part-time, summer internship, and cooperative education employment. Students may be eligible for part-time or summer internship opportunities as early as the end of their freshman year. Students entering upper division may be eligible to participate in cooperative education programs offered through their major department. For more information, visit the CCSE Web site or contact CCSE, 50 Lind Hall (612-624-4090).

IDEAS (Integrated Degrees in Engineering, Arts, and Sciences)—This scholarship program is for undergraduates who integrate degrees from IT and the College of Liberal Arts. IDEAS enriches students' education by exploring how technology and society influence each other and promotes leadership in technology by providing students with educational opportunities for increased breadth and depth in liberal arts, business, and technical management. For more information, contact the IT Student Affairs Office, 105 Lind Hall, (612-624-8504).

Academic Program for Excellence in Engineering and Science (APEXES)—APEXES promotes academic excellence and the increased presence of underrepresented groups (African American, Chicano/Latino, Native American) in engineering and the physical sciences. Through its precollege, undergraduate, and graduate/faculty programs, it promotes diversity in the classroom, laboratory, and workplace to prepare IT students for careers in an ethnically diverse workforce.

Working with other IT and University offices, the program offers a variety of academic enrichment programs such as tutoring, learning assessment, career assessment, and study groups. Through collaboration with IT departments and corporate sponsors, APEXES identifies experiences outside the classroom such as internships, cooperative programs, and work teams to expose students to applications in science and engineering. These collaborations also provide merit scholarships for underrepresented students in engineering and the physical sciences who excel academically.

For more information, contact APEXES, 107 Lind Hall, 207 Church Street S.E., Minneapolis, MN 55455 (612-626-0219; e-mail APEXES@umn.edu).

Program for Women—The mission of this program is to encourage, recruit, and retain women faculty and students in the physical sciences, mathematics, and engineering. Since its establishment in 1990, the program has been responsible for numerous activities and events for undergraduate and graduate women, women faculty, and pre-college outreach programs. The program supports a female graduate student in each academic department to encourage networking within the department and assist in recruiting more women into the program. Retention strategies focus on networking within and across the academic departments in IT both for faculty and students.

For more information visit the IT Program for Women Web site at www.it.umn.edu/students/women/ or contact Associate Dean Roberta M. Humphreys, 105 Walter Library, 612-624-2006.

UNITE Instructional Television—About 50 credit courses each semester are offered through UNITE (UNiversity-Industry Television for Education), an instructional television system for continuing education at the employee's workplace. In addition, 25 of these courses are offered by streaming video—live as they happen on campus—or by video-on-demand. These include both upper division and graduate courses as well as specially developed courses and seminars. Classes are held in TV studio classrooms with on-campus students in attendance. The system is interactive, enabling students at all sites to talk with the instructor and take part in class discussions. Participating companies help support the system by paying a fee based on the number of credits for which its employees are enrolled. This fee is separate from tuition, which is paid either by the student or the company, depending on company policy.

For more information, contact the Director, UNITE Instructional Television, 514 Vincent Hall, 206 Church Street S.E., Minneapolis, MN 55455 (612-624-2332).

On-campus Living Experiences for Freshmen in IT—The Explorations in Engineering and Sciences House (IT Explorations) and the Women in Science and Engineering House (WISE) are the IT residential learning environments. These houses create a smaller living-learning environment in which students can benefit from others who have similar academic and career interests in science and/or engineering. Participating students find support from their peers that can enhance their success in the classroom and on campus. Faculty and staff advisers from IT provide guidance during students' first year on campus, on-site academic advising, access to information on career options, and coordinate various social activities such as dinner with professionals, faculty members, and student organizations.

All participants are strongly encouraged to register for IOFT 1312—Exploring Careers in Science and Engineering (2 cr). This course can be used as a freshman seminar.

IT Explorations is a co-ed community open to 140 students in Frontier Hall. The WISE House is a female first-year freshman community open to 30 students in Comstock Hall. For more information, contact the IT Student Affairs Office at 612-624-8010, e-mail kubit001@umn.edu, or visit the Housing and Residential Life Web site at www.housing.umn.edu.

International Programs

IT students have hundreds of study abroad programs to choose from. Students can study in or outside their major, study a second language, or study the history and culture of a region. Study in English is possible at various sites including Hong Kong, Sweden, Norway, England, Denmark, Australia, New Zealand, and many others. Students may spend a semester, academic year, or May session enhancing their cross-cultural skills, language ability, or professional experience. These opportunities are very affordable and the Learning Abroad Center offers more than \$150,000 in scholarships for study abroad. IT has also been supportive to students with financial need. Each IT department has a list of recommended locations for study abroad. Students can learn more about these options by contacting Susan Kubitschek, 106 Lind Hall, kubit001@umn.edu, 612-624-8010.

Internship Opportunities in Technical Fields—Interested in a summer paid internship abroad? Students interested in doing an international internship in a technical field should contact the International Association for the Exchanges of Students for Technical Experience (IAESTE) in 4 Lind Hall at IAESTE@umn.edu or call 612-624-8010 to find out about this active student chapter on campus.

Other Information—For information about opportunities through the International Student Exchange Program (ISEP), IAESTE, and Institute for Study Abroad (Butler University, IN), visit the Learning Abroad Center in 230 Heller Hall. Advisers there can assist you with study and credit options, financial aid, and orientations. Attend a First Step meeting held daily for a full listing of study abroad opportunities, or visit www.UMabroad.umn.edu for more information

Career Information

The Career Center for Science and Engineering (CCSE), 50 Lind Hall (612-624-4090) provides comprehensive career services to students and alumni from the Institute of Technology and the College of Biological Sciences.

CCSE assists students in the career exploration process as they identify and research majors and careers best suited to their skills, interests, and values. Each semester, the office offers IOFT 1312 - Exploring Careers in Science and Engineering (2 credits). This course exposes students to all aspects of the career development and job search processes.

CCSE also provides resources and programs aimed at assisting students with their search for part-time, internship, and co-op positions, or permanent jobs following graduation. The services provided by CCSE include on-campus interviewing, job postings, workshops on many job search-related topics, and individual assistance with any career issues.

CCSE also provides information regarding the Fundamentals of Engineering (FE) exam.

Student Organizations and Activities

Scientists and engineers find that membership in technical or professional societies usually helps their career development. Many of these societies have student chapters at the University. Through them students have the opportunity to participate in activities of the parent society, gain experience in conducting technical meetings, and meet senior members of the societies. In addition, regular membership in the society is facilitated upon graduation and any entrance fee is reduced or waived for former student members.

Professional Societies

Branches of the following national professional societies are maintained at the University of Minnesota by students and faculty: American Institute of Chemical Engineers, Society of Physics Students, American Society of Civil Engineers, American Society of Mechanical Engineers, Society for Engineering in Agricultural, Food, and Biological Systems, American Institute of Aeronautics and Astronautics, American Institute of Industrial Engineers, and Institute of Electrical and Electronic Engineers. Additional professional societies include the Society of Women Engineers, National Society of Black Engineers, Triangle, Theta Tau, and Alpha Sigma Kappa.

Honorary Scholastic Societies

These IT societies promote the high standards of the engineering profession by conferring memberships, awards, and other honors on undergraduates distinguished for scholastic achievement and for character. The societies normally elect members from the junior and senior classes on the basis of scholarship (as measured by class rank) and character (as judged by peers and faculty). Of these honorary societies, only Tau Beta Pi selects its members from students in all IT undergraduate departments. The others confine their membership to students from a single department: Alpha Epsilon (biosystems and agricultural engineering), Chi Epsilon (civil engineering), Eta Kappa Nu and Kappa Eta Kappa (electrical engineering), Pi Tau Sigma (mechanical engineering), and Sigma Gamma Tau (aerospace engineering and mechanics).

Plumb Bob

A senior honorary leadership and service society, Plumb Bob works to create and maintain a spirit of fellowship and cooperation among IT students and further the interests of IT and the University. Its members are chosen for their character, leadership, and service.

IT Student Board

This board is the executive body of IT students, representing them in matters affecting the general interests of IT and the University.

Student Publications

Two publications are produced by IT students. IT Connection is IT's bi-weekly newsletter for students, staff, and faculty and includes meetings notices and information on scholarships and programs of interest. For more information contact connection@itdean.umn.edu. Minnesota Technologist is IT's official student magazine. Published three times a year, this 83-year-old publication features pieces written by students on science and engineering issues. For more information contact technolog@itdean.umn.edu.

The IT Student Publications selects editors and business managers and directs the overall policy of the publications. Students are encouraged to participate as publication staff members.

Degree Programs and Minors

Aerospace Engineering and Mechanics B.A.E.M.

Aerospace Engineering & Mechanics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 127.

Required credits within the major: 56.

Degree: Bachelor of Aerospace Engineering and Mechanics.

The mission of the bachelor of aerospace engineering and mechanics (B.A.E.M.) program is to produce graduates who are prepared to enter and sustain the practice of aerospace engineering and related fields, or to pursue advanced studies. This mission is consistent with the mission of the University of Minnesota in learning and teaching, and with the mission of the Institute of Technology: to provide a rigorous and stimulating education for its undergraduate majors and to provide programs of instruction in engineering that meet nationally accepted standards for practice of the profession of engineering.

Aerospace engineering is a multidisciplinary field that encompasses many areas of science and engineering and plays a major role in the technological advancement of society. As a constantly changing profession, aerospace engineering is concerned with a wide range of problems and the latest technologies. An aerospace engineer must have a comprehensive fundamental education in mathematics, physical sciences, and engineering sciences. The four-year program leading to the B.A.E.M. provides this broad background. The program is accredited by the Engineering Accreditation Commission of ABET.

Admission Requirements

Students must complete 9 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.80 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics Core

MATH 1371 - IT Calculus I, MATH (4.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

MATH 1372 - IT Calculus II (4.0 cr)

or MATH 1272 - Calculus II (4.0 cr)

MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

or MATH 2263 - Multivariable Calculus (4.0 cr)

MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)

or MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)

Physics Core

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)

PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

PHYS 2503 - Physics III: Foundations of Modern Physics (4.0 cr)

or PHYS 2403H - Honors Phys III, H (4.0 cr)

Statics and Dynamics Core

AEM 2011 - Statics (3.0 cr)

AEM 2012 - Dynamics (3.0 cr)

Program Requirements

Required Courses

AEM Core

AEM 2301 - Mechanics of Flight (3.0 cr)

AEM 3031 - Deformable Body Mechanics (3.0 cr)

AEM 4201 - Fluid Mechanics (4.0 cr)

AEM 4202 - Aerodynamics (4.0 cr)

AEM 4203 - Aerospace Propulsion (4.0 cr)

AEM 4301 - Spaceflight Dynamics (3.0 cr)

AEM 4303 - Flight Dynamics and Control (3.0 cr)

AEM 4331 - Aerospace Vehicle Design I: Aircraft (3.0 cr)

AEM 4332W - Aerospace Vehicle Design II: Space Vehicles, Missions, and Systems, WI (4.0 cr)

AEM 4501 - Aerospace Structures (3.0 cr)

AEM 4601 - Instrumentation Laboratory (3.0 cr)

AEM 4602W - Aeromechanics Laboratory, WI (4.0 cr)

Science and Engineering

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)

CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)

EE 3005 - Fundamentals of Electrical Engineering (4.0 cr)

EE 3006 - Fundamentals of Electrical Engineering Laboratory (1.0 cr)

MATS 2001 - Introduction to the Science of Engineering Materials (3.0 cr)

ME 3324 - Introduction to Thermal Science (3.0 cr)

Solids, Materials or Structures Elective

AEM 4502, 4511, 4581 count as honors experiences.

Solids, materials, or structures elective

or AEM 4502 - Computational Structural Analysis (3.0 cr)

or AEM 4511 - Mechanics of Composite Materials (3.0 cr)

or AEM 4581 - Mechanics of Solids (3.0 cr)

or AEM 5441 - Structural Dynamics (3.0 cr)

or AEM 5651 - Aeroelasticity (3.0 cr)

Technical Electives

Take at least two courses (to total 6 credits), which may include but are not limited to: any math/science course 2xxx or higher (such as AST 2001, which completes a minor in astronomy); any computation course 3xxx or higher (such as CE 3101); any STAT 3xxx or higher course (such as STAT 3021). See an adviser for other options.

Program Sub-plans

A sub-plan is not required for this program.

EIP

Students may obtain professional experience in an industry or government assignment through either an Internship or Co-op program. The internship program usually consists of one term experience often in the summer. The Co-op program consists of multiple terms off campus. The Co-op program almost always prolongs the time required to graduate. The practical engineering experience obtained through the internship or co-op programs not only enhances a student's education but also gives an edge on future employment after graduation.

Students can receive up to 3 academic credits by taking AEM 4796. These credits can be counted as a technical elective toward the BAEM Degree.

Required Courses

Internship

AEM 4796 - Professional Experience (1.0-3.0 cr)

Astrophysics B.S.Astrop.

Astronomy

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 43 to 45.

Degree: Bachelor of Science in Astrophysics.

The astrophysics program enables students to develop the skills necessary to tackle complex and ill-defined problems within the physical sciences. The program prepares students for careers in professional astronomy, computational astrophysics, secondary education in the physical sciences, ROTC programs in the Air Force or Navy, data analysis, or laboratory science.

Admission Requirements

Students must complete 8 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics Core

MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1371 - IT Calculus I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

or MATH 1372 - IT Calculus II (4.0 cr)

MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)

or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)

MATH 2263 - Multivariable Calculus (4.0 cr)

or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Physics Core

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)

PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

PHYS 2303 - Physics III: Physics of Matter (4.0 cr)

or PHYS 2403H - Honors Phys III, H (4.0 cr)

or PHYS 2503 - Physics III: Foundations of Modern Physics (4.0 cr)

PHYS 2601 - Quantum Physics (4.0 cr)

Program Requirements

Students interested in astrophysics are encouraged to take AST 1011H.

Required Courses

Astrophysics Core

AST 2001 - Introduction to Astrophysics (4.0 cr)

AST 4994W - Directed Research, WI (3.0-5.0 cr)

PHYS 2605 - Quantum Physics Laboratory (3.0 cr)

PHYS 4001 - Analytical Mechanics (4.0 cr)

PHYS 4002 - Electricity and Magnetism (4.0 cr)

Take 2 or more course(s) from the following:

AST 4xxx

AST 5xxx

MATH 2283 - Sequences, Series, and Foundations (3.0 cr)

or

MATH 3xxx

or

MATH 4xxx

Astrophysics Focus

Students are required to complete one of the following course groups.

Data Analysis Specialist

This emphasis prepares students for careers in corporate and government labs and research divisions. Examples are programming, image processing, laboratory instrumentation, and general data analysis. Suggested courses are listed below.

Take 16 or more credit(s) from the following:

AST 5201 - Methods of Experimental Astrophysics (4.0 cr)

CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)

CSCI 2031 - Introduction to Numerical Computing (4.0 cr)

EE 3005 - Fundamentals of Electrical Engineering (4.0 cr)

PHYS 4051 - Methods of Experimental Physics I (5.0 cr)

PHYS 4052W - Methods of Experimental Physics II, WI (5.0 cr)

-OR-

Professional Astronomer

This emphasis prepares students for graduate school in astronomy. The program is similar to doing a double major in astrophysics and physics. The program emphasizes observational astronomy.

Take 16 or more credit(s) from the following:

PHYS 4101 - Quantum Mechanics (4.0 cr)

PHYS 4201 - Statistical and Thermal Physics (3.0 cr)

Take 0 or more course(s) from the following:

AST 4xxx

AST 5xxx

CHEM 3xxx
 CHEM 4xxx
 CHEM 5xxx
 CSCI 3xxx
 CSCI 4xxx
 CSCI 5xxx
 EE 3xxx
 EE 4xxx
 EE 5xxx
 GEO 3xxx
 GEO 4xxx
 GEO 5xxx
 MATH 3xxx
 MATH 4xxx
 MATH 5xxx
 PHYS 3xxx
 PHYS 4xxx
 PHYS 5xxx

-OR-

Secondary Education

This emphasis prepares students for entry to a masters program in secondary science education. In addition to the courses listed below, students must complete 100 hours of in-class experience across at least two semesters.

PSY 1001 - Introduction to Psychology, SSCI (4.0 cr)
 HSCI 1814 - Introduction to History of Science: Ancient Science to the Scientific Revolution, HP, IP (4.0 cr)
 or HSCI 4121 - History of 20th-Century Physics (3.0 cr)
 or HSCI 4111 - History of 19th-Century Physics (3.0 cr)
 PHIL 1005 - Scientific Reasoning (4.0 cr)
 or PHIL 3601W - Scientific Thought, OH, WI (4.0 cr)
 AST 5201 - Methods of Experimental Astrophysics (4.0 cr)
 or
 Physics research
 or
 This course pair replaces AST 4994 in the student's program.
 PHYS 4051 - Methods of Experimental Physics I (5.0 cr)
 PHYS 4052W - Methods of Experimental Physics II, WI (5.0 cr)

-OR-

Technical Electives

Select 16 credits in consultation with your adviser.

Bio-Based Products Engineering B.B.P.E.

Bio-Based Products

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 128.

Required credits within the major: 113.

Degree: Bachelor of Bio-Based Products Engineering.

Bio-based products are materials, chemicals, and energy derived from renewable, bio-resources including forestry, agriculture and other biomass. Many commercial products and forms of energy that come from fossil fuels can be derived from renewable, bio-resources. The molecular building blocks and components of biomass can be harnessed to heat homes, run cars, light buildings, and provide industrial and consumer products. These products include biofuels, biofibers and fiber-based products, paper, board, engineered wood, structural panels, bio-based composites, renewable plastics, and bio-derived chemicals and energy.

Admission Requirements

Students must complete 15 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Preparatory Courses

BP 1001 - Bio-based Products Orientation (1.0 cr)
 BP 1002 - Wood and Fiber Science (3.0 cr)
 BP 1003 - Wood and Fiber Science Lab (1.0 cr)
 BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
 or BIOL 1009H - Honors: General Biology, BIOL SCI/L, H (4.0 cr)

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1372 - IT Calculus II (4.0 cr)
 MATH 2263 - Multivariable Calculus (4.0 cr)
 or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)

Physical Sciences

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)
 CHEM 2301 - Organic Chemistry I (3.0 cr)
 CHEM 2302 - Organic Chemistry II (3.0 cr)
 CHEM 3501 - Physical Chemistry I (3.0 cr)
 PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

General Requirements

Recommended freshman writing course(s) for this program:
RHET 1101

Program Requirements

Required Courses

Major Courses

BP 3001 - Statics, Mechanics, and Structural Design (4.0 cr)
BP 4504W - Bio-based Products Development and Management, WI (3.0 cr)

Engineering Courses

BAE 3013 - Engineering Principles of Molecular and Cellular Processes (3.0 cr)
BAE 4013 - Transport in Biological Systems (4.0 cr)
CE 3502 - Fluid Mechanics (4.0 cr)
CHEN 4001 - Material and Energy Balances (4.0 cr)
CHEN 4101 - Chemical Engineering Thermodynamics (4.0 cr)
BAE 4713 - Bioprocess Engineering (3.0 cr)
BP 4001 - Chemistry of Plant Materials (4.0 cr)
BP 4301 - Surface and Colloid Science in Bio-based Products Manufacturing (3.0 cr)
BP 4302 - Organisms Impacting Bio-based Products (3.0 cr)
BP 4303 - Bio-Based Materials Science (3.0 cr)
BP 4401 - Bio-based Products Engineering (4.0 cr)
BP 4402 - Bio-based Products Engineering Lab I (1.0 cr)
BP 4403 - Bio-based Products Engineering Lab II (1.0 cr)
BP 4404 - Bio-based Composites Engineering (3.0 cr)
BP 4405 - Process Control and Simulation (3.0 cr)
BP 4501 - Process and Product Design I (2.0 cr)
BP 4502W - Process and Product Design II, WI (3.0 cr)

Biomedical Engineering B.Bm.E.

Biomedical Engineering Institute

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 125.

Required credits within the major: 30.

Degree: Bachelor of Biomedical Engineering.

Biomedical engineers apply the fundamentals of mathematics, physics, chemistry, and biology to solve medically-relevant problems. Examples of biomedical engineering activities include medical device design, fabrication and testing, prosthesis fabrication, ergonomics and human factors, physiological function monitoring, home health care technology development, biomedical informatics, functional imaging and tomography, biomaterial development and biocompatibility, artificial tissue and organ fabrication, cell- and biomolecule-based sensors and therapeutics, gene therapy development, and biomedical microsystems.

Admission Requirements

Students must complete 14 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.70 for students already admitted to the degree-granting college.
- 2.70 for students transferring from another University of Minnesota college.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1371 - IT Calculus I, MATH (4.0 cr)

PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Preparatory Courses

CSCI 1107 - Introduction to FORTRAN Programming for Scientists and Engineers (3.0 cr)
STAT 3021 - Introduction to Probability and Statistics (3.0 cr)
BIOC 3021 - Biochemistry (3.0 cr)
or CHEM 3501 - Physical Chemistry I (3.0 cr)
BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
or BIOL 1009H - Honors: General Biology, BIOL SCI/L, H (4.0 cr)

Program Requirements

Required Courses

Major Courses

BMEN 2501 - Cellular and Molecular Biology for Biomedical Engineers (4.0 cr)
BMEN 2601 - Biomedical Engineering Undergraduate Seminar I (1.0 cr)
BMEN 2602 - Biomedical Engineering Undergraduate Seminar II (1.0 cr)
BMEN 3001 - Biomechanics (4.0 cr)
BMEN 3101 - Biomedical Transport Processes (4.0 cr)
BMEN 3201 - Bioelectricity and Bioinstrumentation (4.0 cr)
BMEN 3301 - Biomaterials (4.0 cr)
BMEN 3701 - Physiology Lab (2.0 cr)
BMEN 4001W - Biomedical Engineering Design I, WI (3.0 cr)
BMEN 4002W - Biomedical Engineering Design II, WI (3.0 cr)
PHSL 3061 - Principles of Physiology (4.0 cr)

Technical Electives

Take 24 credits of technical electives approved by an adviser. A maximum of 10 credits of science courses and a maximum of 6 credits of research may be counted toward the total.

Biosystems and Agricultural Engineering B.B.A.E.

Dept of Biosystems and Agricultural Engineering

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 128.

Required credits within the major: 30.

Degree: Bachelor of Biosystems and Agricultural Engr.

The mission of the Department of Biosystems and Agricultural Engineering is to conduct research and educate people to solve engineering problems in agricultural and biological environments. Educational objectives for the program are to produce graduates with the following:

- A broad fundamental engineering background including mathematics, physical science, biological science, engineering science, and computational skills needed for their future practice of biosystems and agricultural engineering.
- The skills necessary to carry out an effective design process including the ability to think creatively, work cooperatively, formulate problems, synthesize information, develop and evaluate alternatives, implement solutions, and communicate effectively at all stages of the process.
- The ability to address issues of ethics, safety, professionalism, and social and economic impacts in engineering practice and design.
- Specific abilities to pursue careers that integrate engineering and biology to design efficient, economical systems to produce and deliver high quality, safe food to consumers; to design sustainable systems that protect the environment, humans, plants, and animals; and to design safe and efficient machines, processes, and practices for biological systems.
- Opportunities to develop in-depth background in one of the following areas of emphasis: Bioprocessing and Food, Environment, or Machinery Systems.

Admission Requirements

Students must complete 10 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)

or MATH 1371 - IT Calculus I, MATH (4.0 cr)

MATH 1272 - Calculus II (4.0 cr)

or MATH 1372 - IT Calculus II (4.0 cr)

MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)

or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)

MATH 2263 - Multivariable Calculus (4.0 cr)

or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Biological and Physical Sciences

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

or BIOL 1009H - Honors: General Biology, BIOL SCI/L, H (4.0 cr)

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)

PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Statics and Dynamics

Take 1 or more course(s) from the following:

AEM 2021 - Statics and Dynamics (4.0 cr)

Take the following course pair

AEM 2011 - Statics (3.0 cr)

AEM 2012 - Dynamics (3.0 cr)

Program Requirements

Required Courses

Major Courses

BAE 1011 - Biosystems and Agricultural Engineering Orientation (1.0 cr)

BAE 2113 - Introduction to Design (3.0 cr)

BAE 3013 - Engineering Principles of Molecular and Cellular Processes (3.0 cr)

BAE 3023 - Engineering Principles of Soil-Water-Plant Processes (3.0 cr)

BAE 4013 - Transport in Biological Systems (4.0 cr)

BAE 4023 - Instrumentation and Control for Biological Systems (3.0 cr)

BAE 4114W - Capstone Design Project, WI (4.0 cr)

BAE 5212 - Safety and Environmental Health Issues in Plant and Animal Production and Processing, C/PE, ENVT, H (3.0 cr)

AEM 3031 - Deformable Body Mechanics (3.0 cr)

CE 3502 - Fluid Mechanics (4.0 cr)

EE 3005 - Fundamentals of Electrical Engineering (4.0 cr)

ME 3331 - Thermal Sciences I (3.0 cr)

RHET 3562W - Technical and Professional Writing, WI (4.0 cr)

STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

Electives

Students who wish to have a concentration within their elective coursework must take at least two courses belonging to the same designated emphasis. The designated emphases and the courses which comprise them are as follows: Bioprocessing and Food (BAE 4713, 4723); Environment (BAE 4523, 4533, 5513); and Machinery Systems (BAE 4313, 4323).

Take 3 or more course(s) from the following:

BAE 4313 - Design of Machine Systems (3.0 cr)

BAE 4323 - Machinery Elements (3.0 cr)

BAE 4523 - Water Management Engineering (3.0 cr)

BAE 4533 - Agricultural Waste Management Engineering (3.0 cr)

BAE 4713 - Bioprocess Engineering (3.0 cr)

BAE 4723 - Food Process Engineering (3.0 cr)

BAE 5513 - Watershed Engineering (3.0 cr)

Technical Electives

Complete 8 credits of engineering electives, 6 credits of biology electives, and at least 3 credits of technical electives (computer science or 3 additional credits of engineering or biology electives). Any of the emphases (sub-plans) may be completed as part of the requirement. See an adviser for a list of courses that fulfill electives or visit www.bae.umn.edu/teaching/ugrad/electives.html.

Program Sub-plans

A sub-plan is not required for this program.

Bioprocessing and Food

Processing of agricultural and biological materials yields many important products, from foods to pharmaceuticals. In this emphasis, students are prepared for careers in the design and development of systems for processing, storing, and distributing food and agricultural products; processes to recover and purify products such as proteins produced through biotechnology; processes to make products such as biodegradable plastics from biological materials; new food products as a member of a team of food scientists and marketing specialists; and systems to ensure food safety and quality.

With completion of an additional 3 credits, this subplan fulfills the Technical Electives requirement.

Required Courses

Engineering Electives

Take any non-required BAE course not used as a BAE elective.

Take 8 or more credit(s) from the following:

CHEN 5754 - Food Processing Technology (3.0 cr)

CHEN 5759 - Principles of Mass Transfer in Engineering and Biological Engineering (2.0 cr)

EE 5821 - Biological System Modeling and Analysis (3.0 cr)

IE 5531 - Engineering Optimization I, H (4.0 cr)

IE 5541 - Project Management (4.0 cr)

MATS 3011 - Introduction to Materials Science and Engineering (3.0 cr)

ME 5381 - Biological Transport Processes (4.0 cr)

Biology Electives

See an adviser for other options.

Take 6 or more credit(s) from the following:

BIOC 3021 - Biochemistry (3.0 cr)

CHEM 2301 - Organic Chemistry I (3.0 cr)

FSCN 4111 - Food Chemistry (3.0 cr)

FSCN 4121 - Food Microbiology and Fermentations (3.0 cr)

VBS 2022 - General Microbiology (2.0-3.0 cr)

VBS 2032 - General Microbiology With Laboratory (4.0 cr)

EIP

This option provides students with a hands-on work experience after the freshman year of the degree program. Students can take up to two semesters of intern work with one or more employers. An example may be two summers and one semester. This may be adjusted to suit individual needs. Students have an opportunity to assist in design work and apply their knowledge to practical problem solving. The experience helps students choose a career and select electives for the degree.

During the academic portion of the intern program students are expected to take a normal load of 11-13 credits. Graduation may be delayed because of the intern experience. It is important to plan ahead, since biosystems and agricultural engineering classes are usually offered only once per year, and in some cases in alternating years. Students registering for BAE 4900 must first submit a proposed plan of study with the intern coordinator.

Required Courses

Internship

A total of 4 BAE 4900 intern Experience credits may be taken and applied toward the degree program as general engineering electives, but not as BAE electives.

BAE 4900 - Intern Reports (2.0 cr)

Environment

The world is faced with important environmental and natural resource issues affecting soil, water, and air. In this emphasis, students are prepared for careers in the design or development of systems to control runoff and flooding in agricultural and small urban watersheds; systems to manage water (drainage or irrigation) to enhance crop production; practices to improve water quality and control soil erosion; plans and practices to restore wetlands; systems to store, treat, and use livestock or food processing wastes; and processes for bioremediation of polluted areas.

With completion of an additional 3 credits, this Sub-plan fulfills the Technical Electives requirement.

Required Courses

Engineering Electives

See an adviser for other options.

Take 8 or more credit(s) from the following:

CE 3202 - Surveying and Mapping (2.0 cr)

CE 3301 - Soil Mechanics I (3.0 cr)

CE 3402 - Construction Materials (3.0 cr)

CE 3501 - Environmental Engineering, C/PE, ENVT (3.0 cr)

CE 4301 - Soil Mechanics II (3.0 cr)

CE 4351 - Groundwater Mechanics (3.0 cr)

CE 4501 - Hydrologic Design (4.0 cr)

CE 4502 - Water and Wastewater Treatment (3.0 cr)

CE 4511 - Hydraulic Structures (4.0 cr)

CE 4512 - Open Channel Hydraulics (4.0 cr)

Biology Electives

See an adviser for other options.

Take 6 or more credit(s) from the following:

BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)

BIOL 3407 - Ecology, ENVT (3.0 cr)

EEB 3001 - Ecology and Society, ENVT (3.0 cr)

EEB 4601 - Limnology (3.0 cr)

ES 3612W - Soil and Environmental Biology, WI (3.0 cr)

SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)

Machinery Systems

Machines are important components of systems for production and processing of food and other biological materials. In this emphasis, students are prepared for careers in the design and development of machines for agricultural, horticultural, and landscape industries; machines and systems that incorporate operator safety, health, and comfort; machines for food processing and handling; automated systems for identification, sorting, or grading; agricultural and other off-road vehicles to improve performance and minimize adverse impact to the soil; and systems for precision agriculture that use technologies such as global positioning systems and geographical information systems

With completion of an additional 3 credits, this sub-plan fulfills the Technical Electives requirement.

Required Courses

Engineering Electives

See an adviser for other options.

Take 8 or more credit(s) from the following:

MATS 2001 - Introduction to the Science of Engineering Materials (3.0 cr)

ME 3221 - Design and Manufacturing I: Engineering Materials and Manufacturing Processes (4.0 cr)

ME 3222 - Design and Manufacturing II (4.0 cr)

ME 3281 - System Dynamics and Control (4.0 cr)

ME 5243 - Advanced Mechanism Design (4.0 cr)

ME 5247 - Stress Analysis, Sensing, and Transducers (4.0 cr)
ME 5248 - Vibration Engineering (4.0 cr)

Biology Electives

See an adviser for other options.

Take 6 or more credit(s) from the following:

AGRO 4005 - Applied Crop Physiology and Development (4.0 cr)
AGRO 4605 - Management Strategies for Crop Production (4.0 cr)
BIOL 2022 - General Botany (3.0 cr)
BIOL 3007W - Plant Biology: Diversity and Adaptation, WI (4.0 cr)
BIOL 3407 - Ecology, ENVT (3.0 cr)
EEB 3001 - Ecology and Society, ENVT (3.0 cr)
ES 3612W - Soil and Environmental Biology, WI (3.0 cr)
SOIL 3416 - Plant Nutrients in the Environment (3.0 cr)

Chemical Engineering B.Ch.E.

Chemical Engineering & Materials Science

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 128.

Required credits within the major: 30.

Degree: Bachelor of Chemical Engineering.

Chemical engineering deals with operations such as materials handling, mixing, fluid flow and metering, extrusion, coating, heat exchange, filtration, drying, evaporation, distillation, absorption, extraction, ion exchange, combustion, catalysis, and processing in chemical and biochemical reactors.

Because many industries are based on some chemical or physical transformation of matter, chemical engineers are much in demand. They may work in the manufacture of inorganic products (fertilizers, paints, ceramics, electronic materials); in the manufacture of organic products (polymers, films, papers, petrochemicals); in the manufacture of batteries and fuel cells; in the processing of minerals and materials; in food processing and fermentation; or in the production of antibiotics and biochemical products.

Admission Requirements

Students must complete 11 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.60 for students already admitted to the degree-granting college.
- 2.60 for students transferring from another University of Minnesota college.
- 2.60 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1371 - IT Calculus I, MATH (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)
or MATH 1372 - IT Calculus II (4.0 cr)
MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)

MATH 2263 - Multivariable Calculus (4.0 cr)
or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Physical Sciences

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)
CHEM 2301 - Organic Chemistry I (3.0 cr)
CHEM 2302 - Organic Chemistry II (3.0 cr)
PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Program Requirements

Students interested in chemical engineering are encouraged to take CHEN 1001.

Required Courses

Major Courses

CHEM 3501 - Physical Chemistry I (3.0 cr)
CHEM 3502 - Physical Chemistry II (3.0 cr)
CHEM 4121 - Process Analytical Chemistry (3.0 cr)
CHEM 2311 - Organic Lab (4.0 cr)
or CHEM 2312 - Honors Organic Lab, H (5.0 cr)
CHEN 3701 - Introduction to Biomolecular Engineering (3.0 cr)
CHEN 4001 - Material and Energy Balances (4.0 cr)
CHEN 4005 - Transport Phenomena: Momentum and Heat (4.0 cr)
CHEN 4006 - Mass Transport and Separation Processes (4.0 cr)
CHEN 4101 - Chemical Engineering Thermodynamics (4.0 cr)
CHEN 4102 - Reaction Kinetics and Reactor Engineering (4.0 cr)
CHEN 4201 - Numerical methods in ChEn applications (3.0 cr)
CHEN 4401W - Chemical Engineering Lab I, WI (3.0 cr)
CHEN 4402W - Chemical Engineering Lab II, WI (2.0 cr)
CHEN 4501W - Chemical Engineering Process Design, WI (3.0 cr)
CHEN 4502W - Chemical Engineering Process Design II, WI (2.0 cr)
CHEN 4601 - Process Control (3.0 cr)
MATS 3011 - Introduction to Materials Science and Engineering (3.0 cr)

Technical Electives

Take 17 credits of electives. These normally include CHEN 4214 and 3 other courses selected with the aid of an adviser.

Chemistry B.S.Chem.

Chemistry

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 40.

Degree: Bachelor of Science in Chemistry.

The mission of the Department of Chemistry is to enrich the science of chemistry through the education of students from all disciplines, the training of future professional chemists, and the pursuit of knowledge.

Chemistry probes the fundamental concepts of nature and helps us understand the world around us. It deals with all substances at the molecular level: their composition, their properties, and how they are transformed into new substances.

Chemistry is a central science of great importance to society. It provides a broad range of opportunities in many specialized fields, including biotechnology, polymer chemistry, environmental chemistry, materials chemistry, and medicine.

After graduating with a bachelor's degree, many chemistry majors go on to graduate or professional schools to pursue advanced degrees. Other graduates find employment in industry, education, or government.

Admission Requirements

Students must complete 10 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.80 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1371 - IT Calculus I, MATH (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)
or MATH 1372 - IT Calculus II (4.0 cr)
MATH 2263 - Multivariable Calculus (4.0 cr)
or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Physical Sciences

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)
CHEM 2101 - Introductory Analytical Chemistry Lecture (3.0 cr)
CHEM 2111 - Introductory Analytical Chemistry Lab (2.0 cr)
PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Additional Math, Science, or Statistics

If a student completes the Honors Math sequence this requirement is automatically fulfilled.

MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
or PHYS 2303 - Physics III: Physics of Matter (4.0 cr)
or PHYS 2403H - Honors Phys III, H (4.0 cr)
or STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

Program Requirements

Required Courses

Major Courses

CHEM 2301 - Organic Chemistry I (3.0 cr)
CHEM 3501 - Physical Chemistry I (3.0 cr)
CHEM 3502 - Physical Chemistry II (3.0 cr)
CHEM 4701 - Inorganic Chemistry (3.0 cr)
CHEM 2302 - Organic Chemistry II (3.0 cr)
Lab can be taken concurrent with or after taking CHEM 2302
CHEM 2311 - Organic Lab (4.0 cr)
or CHEM 2312 - Honors Organic Lab, H (5.0 cr)

Electives

Take 3 or more course(s) from the following:

CHEM 4094W - Directed Research, WI (1.0-5.0 cr)
CHEM 4111W - Intermediate Analytical Chemistry Lab, WI (2.0 cr)
CHEM 4311W - Advanced Organic Chemistry Lab, WI (2.0 cr)
CHEM 4511W - Advanced Physical Chemistry Lab, WI (2.0 cr)
CHEM 4711W - Advanced Inorganic Chemistry Lab, WI (2.0 cr)
CHEM 5223W - Polymer Laboratory, WI (2.0 cr)

Select one course (3 credits) from any non-required upper division course in chemistry.

CHEM 4xxx
or
CHEM 5xxx

Technical Electives

Take two 3xxx or higher courses of 3 credits or more in any field of science (at least 6 credits).

Technical Elective 1
Technical Elective 2

Civil Engineering B.C.E.

Civil Engineering

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 128.

Required credits within the major: 64.

This program requires summer terms.

Degree: Bachelor of Civil Engineering.

Civil engineering deals with the science and art of engineering applied to solving problems and designing systems related to infrastructure and the environment. Principal fields within civil engineering are structural engineering, environmental engineering, water resources engineering, transportation engineering, and geotechnical engineering. The upper division civil engineering program requires students to take introductory courses in all of the above areas. In addition, students may emphasize a special interest in one of the areas by selecting appropriate technical electives in consultation with their adviser.

Admission Requirements

Students must complete 10 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.80 for students transferring from outside the University.

It is recommended that students take GEO 1001 and CE 1101, but these courses are not required to be admitted to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1371 - IT Calculus I, MATH (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)
or MATH 1372 - IT Calculus II (4.0 cr)
MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)

MATH 2263 - Multivariable Calculus (4.0 cr)
or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Physical Science and Mechanics

AEM 2011 - Statics (3.0 cr)
AEM 3031 - Deformable Body Mechanics (3.0 cr)
CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)
PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Program Requirements

Required Courses

Major Courses

AEM 2012 - Dynamics (3.0 cr)
CE 3201 - Transportation Engineering (3.0 cr)
CE 3202 - Surveying and Mapping (2.0 cr)
CE 3301 - Soil Mechanics I (3.0 cr)
CE 3401 - Linear Structural Analysis (3.0 cr)
CE 3402 - Construction Materials (3.0 cr)
CE 3501 - Environmental Engineering, C/PE, ENVT (3.0 cr)
CE 3502 - Fluid Mechanics (4.0 cr)
CE 4101W - Project Management, WI (3.0 cr)
CE 4102W - Capstone Design, WI (3.0 cr)
CE 4301 - Soil Mechanics II (3.0 cr)
CE 4401 - Steel and Reinforced Concrete Design (4.0 cr)
CE 4501 - Hydrologic Design (4.0 cr)
CE 4502 - Water and Wastewater Treatment (3.0 cr)

Computer Applications/Programming

A substitution for CE 3101 may be made with approval of the director of undergraduate studies.

CE 3101 - Computer Applications in Civil Engineering I (3.0 cr)
or CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)
or CSCI 1107 - Introduction to FORTRAN Programming for Scientists and Engineers (3.0 cr)
or CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)

Statistics

Stat 3021 may be substituted for CE 3102 with approval of the director of undergraduate studies.

CE 3102 - Uncertainty and Decision Analysis in Civil Engineering (3.0 cr)
or STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

Technical Electives

Students must take 17 credits of Technical Electives, approved by an adviser. Technical Electives may be directed to focus on an area of emphasis in construction, environmental, geomechanics, public works, structural, transportation, or water resources engineering. See the section below for a list of possible courses, but consult your adviser before taking them.

Students are required to complete one of the following course groups.

General

Consult your adviser for additional courses to total 17 credits.

CE 1101 - Civil Engineering Orientation (1.0 cr)
CE 3111 - CADD for Civil Engineers (2.0 cr)
CE 4190 - Engineering Co-op Assignment (2.0-6.0 cr)

-OR-

Environmental Engineering

Consult your adviser about selecting courses to meet this requirement.

Take 1 or more course(s) from the following:

BIOL 3407 - Ecology, ENVT (3.0 cr)
CE 4352 - Groundwater Modeling (3.0 cr)
CE 4561 - Solid Hazardous Wastes (3.0 cr)
CE 4562 - Environmental Remediation Technology (3.0 cr)
CE 5541 - Environmental Water Chemistry (3.0 cr)
CE 5551 - Environmental Microbiology Laboratory (4.0 cr)
CE 4591 - Environmental Law for Engineers (3.0 cr)
CHEM 2301 - Organic Chemistry I (3.0 cr)
CHEN 4005 - Transport Phenomena: Momentum and Heat (4.0 cr)
CHEN 4101 - Chemical Engineering Thermodynamics (4.0 cr)
CHEN 4102 - Reaction Kinetics and Reactor Engineering (4.0 cr)
EEB 4601 - Limnology (3.0 cr)
GEO 5108 - Principles of Environmental Geology (3.0 cr)
GEO 5701 - General Hydrogeology (3.0 cr)
STAT 5021 - Statistical Analysis (4.0 cr)

-OR-

Geomechanics Engineering

Consult your adviser about selecting courses to meet this requirement.

Take 1 or more course(s) from the following:

AEM 4581 - Mechanics of Solids (3.0 cr)
CE 3311 - Rock Mechanics I (3.0 cr)
CE 4121 - Computer Applications in Civil Engineering II (3.0 cr)
CE 4311 - Rock Mechanics II (3.0 cr)
CE 4341 - Engineering Geostatistics (3.0 cr)
CE 4351 - Groundwater Mechanics (3.0 cr)
CE 4352 - Groundwater Modeling (3.0 cr)
CE 5311 - Experimental Geomechanics (3.0 cr)
CE 5321 - Geomechanics (3.0 cr)
CE 5331 - Geomechanics Modeling (3.0 cr)
GEO 4203 - Principles of Geophysical Exploration (3.0 cr)
GEO 4501 - Structural Geology (3.0 cr)
MATH 4457 - Methods of Applied Mathematics I (4.0 cr)
MATH 4458 - Methods of Applied Mathematics II (4.0 cr)
MATH 4567 - Introduction to Fourier Analysis (4.0 cr)
MATH 5583 - Complex Analysis (4.0 cr)

-OR-

Public Works Engineering

Consult your adviser about selecting courses to meet this requirement.

Take 1 or more course(s) from the following:

CE 4111 - Engineering Systems Analysis (3.0 cr)
CE 4201 - Highway Design (3.0 cr)
CE 4232 - Cemented Materials (3.0 cr)
CE 5211 - Traffic Engineering (3.0 cr)
CE 5231 - Pavement Management and Rehabilitation (3.0 cr)

CE 4591 - Environmental Law for Engineers (3.0 cr)
 CE 4231 - Pavement Engineering (3.0 cr)
 CE 4511 - Hydraulic Structures (4.0 cr)
 CE 4561 - Solid Hazardous Wastes (3.0 cr)
 CE 4562 - Environmental Remediation Technology (3.0 cr)
 CE 5212 - Transportation Policy, Planning, and Deployment (3.0 cr)
 BULLETPA 4200 - Urban and Regional Planning (3.0 cr)
 BULLETPA 5013 - Law and Urban Land Use (1.5 cr)
 BULLETPA 5231 - Transit Planning and Management (3.0 cr)

-OR-

Structural Engineering

Consult your adviser about selecting courses to meet this requirement.

Take 1 or more course(s) from the following:

AEM 4501 - Aerospace Structures (3.0 cr)
 AEM 4502 - Computational Structural Analysis (3.0 cr)
 AEM 4511 - Mechanics of Composite Materials (3.0 cr)
 AEM 4581 - Mechanics of Solids (3.0 cr)
 CE 4411 - Matrix Structural Analysis (3.0 cr)
 CE 4412 - Reinforced Concrete Design II (3.0 cr)
 CE 4413 - Steel Design II (3.0 cr)
 CE 5232 - Advanced Portland Cement Concrete (3.0 cr)
 CE 5233 - Advanced Bituminous Materials (3.0 cr)
 CE 5311 - Experimental Geomechanics (3.0 cr)
 CE 5411 - Applied Structural Mechanics (3.0 cr)
 CE 4414 - Prestressed Concrete Design (3.0 cr)
 CE 4415 - Masonry Structures (3.0 cr)
 MATH 4242 - Applied Linear Algebra (4.0 cr)
 MATH 4457 - Methods of Applied Mathematics I (4.0 cr)
 MATH 4512 - Differential Equations with Applications (3.0 cr)
 MATH 5485 - Introduction to Numerical Methods I (4.0 cr)
 MATH 5487 - Computational Methods for Differential and Integral Equations in Engineering and Science I (4.0 cr)
 ME 5247 - Stress Analysis, Sensing, and Transducers (4.0 cr)

-OR-

Transportation Engineering

Consult your adviser about selecting courses to meet this requirement.

Take 1 or more course(s) from the following:

AEM 4201 - Fluid Mechanics (4.0 cr)
 CE 4121 - Computer Applications in Civil Engineering II (3.0 cr)
 CE 4201 - Highway Design (3.0 cr)
 CE 4231 - Pavement Engineering (3.0 cr)
 CE 4232 - Cemented Materials (3.0 cr)
 CE 5211 - Traffic Engineering (3.0 cr)
 CE 5212 - Transportation Policy, Planning, and Deployment (3.0 cr)
 CE 5231 - Pavement Management and Rehabilitation (3.0 cr)
 CE 5232 - Advanced Portland Cement Concrete (3.0 cr)
 CE 5233 - Advanced Bituminous Materials (3.0 cr)
 CSCI 2021 - Machine Architecture and Organization (4.0 cr)
 CSCI 2031 - Introduction to Numerical Computing (4.0 cr)
 MATH 4242 - Applied Linear Algebra (4.0 cr)
 MATH 4512 - Differential Equations with Applications (3.0 cr)
 STAT 5021 - Statistical Analysis (4.0 cr)
 STAT 5302 - Applied Regression Analysis (4.0 cr)

-OR-

Water Resources Engineering

Consult your adviser about selecting courses to meet this requirement.

Take 1 or more course(s) from the following:

BAE 5513 - Watershed Engineering (3.0 cr)
 CE 4121 - Computer Applications in Civil Engineering II (3.0 cr)
 CE 4341 - Engineering Geostatistics (3.0 cr)
 CE 4351 - Groundwater Mechanics (3.0 cr)
 CE 4352 - Groundwater Modeling (3.0 cr)
 CE 4511 - Hydraulic Structures (4.0 cr)
 CE 4512 - Open Channel Hydraulics (4.0 cr)
 CSCI 2031 - Introduction to Numerical Computing (4.0 cr)
 GEO 4701 - Geomorphology (3.0-4.0 cr)

Program Sub-plans

A sub-plan is not required for this program.

EIP

Required Courses

CE 4190 - Engineering Co-op Assignment (2.0-6.0 cr)

Computer Engineering B.Comp.E.

Computer Science and Engineering

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 126.

Required credits within the major: 78.

Degree: Bachelor of Computer Engineering.

The mission of the computer engineering program is to educate students in the core topics as well as in a broad set of specialties of computer engineering, to impart students with professional attributes that characterize a well-schooled engineer and citizen, and to provide students with opportunities for research experience in one of the leading computer engineering centers of scholarship.

The field of computer engineering resulted from the tremendous development of computers and, in particular, the evolution of microprocessors. The design process for almost every electronic system includes the specification and development of the control program for the system's microprocessor. A particular computer engineering job can be more closely related to hardware or software, to functional design or detailed design. The B.Comp. Eng. degree provides the background necessary for persons, with continuing study, to work in any of the many computer engineering subfields. The bachelor's degree itself does not, however, provide highly specialized knowledge in any particular subfield.

Admission Requirements

Students must complete 10 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Mathematics**

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1372 - IT Calculus II (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
 MATH 2263 - Multivariable Calculus (4.0 cr)
 or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Physics

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Preparatory Courses

CSCI 1901 - Structure of Computer Programming I (4.0 cr)
 CSCI 1902 - Structure of Computer Programming II (4.0 cr)
 EE 2001 - Introduction to Electronic and Electrical Circuits (3.0 cr)
 EE 2002 - Introductory Circuits and Electronics Laboratory (1.0 cr)
 EE 2011 - Linear Systems and Circuits (3.0 cr)

Take all of the following in the same term:

EE 2301 - Introduction to Digital System Design (4.0 cr)
 EE 301 - Introduction to Digital System Design: Discussion (0.0 cr)

Take all of the following in the same term:

EE 2361 - Introduction to Microcontrollers (4.0 cr)
 EE 361 - Introduction to Microcontrollers: Discussion (0.0 cr)

Program Requirements

Students interested in pursuing computer engineering or electrical engineering as a major are encouraged to take EE 1001 during their first year.

Required Courses**Major Courses**

CSCI 2011 - Discrete Structures of Computer Science (4.0 cr)
 CSCI 4041 - Algorithms and Data Structures (4.0 cr)
 CSCI 4061 - Introduction to Operating Systems (4.0 cr)
 EE 3015 - Signals and Systems (3.0 cr)
 EE 3025 - Statistical Methods in Electrical and Computer Engineering (3.0 cr)
 EE 3101 - Circuits and Electronics Laboratory I (2.0 cr)
 EE 3102 - Circuits and Electronics Laboratory II (2.0 cr)
 EE 3115 - Analog and Digital Electronics (4.0 cr)
 EE 4363 - Computer Architecture and Machine Organization (4.0 cr)

Electives

With adviser approval, courses from areas outside of EE/CSCI may be substituted to meet up to 12 credits of this requirement (i.e., the technical electives). Courses taken as part of the EIP program may be used to meet the technical elective requirement. Courses may not be used to meet both the core and the elective requirements. Courses used to fulfill other requirements will not count as lab experiences.

Take 26 or more credit(s).

Take 3 or more course(s) from the following:

EE 4951W - Senior Design Project, WI (2.0 cr)
 or

Honors Project

EE 4981H - Senior Honors Project I, H (2.0 cr)
 EE 4982V - Senior Honors Project II, WI, H (2.0 cr)

Take 1 or more course(s) from the following:

EE 4111 - Advanced Analog Electronics Design (4.0 cr)
 EE 4235 - Linear Control Systems Laboratory (1.0 cr)
 EE 4237 - State Space Control Laboratory (1.0 cr)
 EE 4301 - Digital Design With Programmable Logic (4.0 cr)
 EE 4341 - Microprocessor and Microcontroller System Design (4.0 cr)
 EE 4505 - Communications Systems Laboratory (1.0 cr)
 EE 4703 - Electric Drives Laboratory (1.0 cr)
 EE 4721 - Introduction to Power System Analysis (4.0 cr)
 EE 4743 - Switch-Mode Power Electronics Laboratory (2.0 cr)
 EE 5141 - Introduction to Microsystem Technology (4.0 cr)
 EE 5173 - Basic Microelectronics Laboratory (1.0 cr)
 EE 5327 - VLSI Design Laboratory (3.0 cr)
 EE 5545 - Digital Signal Processing Design (3.0 cr)
 EE 5613 - RF/Microwave Circuit Design Laboratory (2.0 cr)
 EE 5622 - Physical Optics Laboratory (1.0 cr)
 EE 5627 - Optical Fiber Communication (3.0 cr)
 EE 5811 - Biomedical Instrumentation (3.0 cr)

Take 0 or more course(s) from the following:

CSCI 4xxx
 CSCI 5xxx
 EE 4xxx
 EE 5xxx

Program Sub-plans

A sub-plan is not required for this program.

EIP**Internship/Cooperative Learning**

Take EE 3961 (1 credit) and then EE 4961 (2 credits), with the possibility of a third course, EE 4962 (2 credits).

EE 3961 and EE 4961 are also listed in Senior Electives and may not be used to satisfy both requirements.

Required Courses**Internship**

EE 3961 - Industrial Assignment I (1.0 cr)
 EE 4961 - Industrial Assignment II (2.0 cr)

Computer Science B.S. Comp.Sc.**Computer Science and Engineering**

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 124.

Required credits within the major: 45.

Degree: Bachelor of Science in Computer Science.

Computer science is concerned with the study of the hardware, software, and theoretical aspects of high-speed computing devices and with the application of these devices to scientific, technological, and business problems.

A bachelor's degree gives students a basic understanding of computer science. After completing a required set of fundamental courses, students arrange their subsequent work around one of several upper division emphases within either computer science or an interdisciplinary area involving computer applications. The degree prepares students for graduate work or for various industrial, governmental, and business positions involving the use of computers.

Admission Requirements

Students must complete 6 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.40 for students already admitted to the degree-granting college.
- 2.40 for students transferring from another University of Minnesota college.
- 2.80 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics Core

MATH 1371 - IT Calculus I, MATH (4.0 cr)

or MATH 1271 - Calculus I, MATH (4.0 cr)

MATH 1372 - IT Calculus II (4.0 cr)

or MATH 1272 - Calculus II (4.0 cr)

MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)

or MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)

Computer Science Introductory Core

CSCI 1901 - Structure of Computer Programming I (4.0 cr)

CSCI 1902 - Structure of Computer Programming II (4.0 cr)

CSCI 2011 - Discrete Structures of Computer Science (4.0 cr)

Program Requirements

Required Courses

Physics Core

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)

PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Computer Science Core

CSCI 2021 - Machine Architecture and Organization (4.0 cr)

CSCI 2031 - Introduction to Numerical Computing (4.0 cr)

CSCI 3081W - Program Design and Development, WI (4.0 cr)

CSCI 4011 - Formal Languages and Automata Theory (4.0 cr)

CSCI 4041 - Algorithms and Data Structures (4.0 cr)

CSCI 4061 - Introduction to Operating Systems (4.0 cr)

MATH 4xxx

STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

Computer Science Emphases (Technical Electives)

17 credits of approved 4xxx and 5xxx electives that form a coherent academic program in an area of computer science or its applications; it must include at least 9 credits of computer science electives and no more than 3 credits from CSCI 59xx or CSCI 4970 or outside independent study. The emphases listed below represent possible options; students should consult with their adviser before choosing their technical electives.

Students are required to complete one of the following course groups.

Computer Architecture

Consult your adviser for additional courses to meet the 17-credit requirement.

CSCI 4203 - Computer Architecture (4.0 cr)

CSCI 5204 - Advanced Computer Architecture (3.0 cr)

CSCI 5283 - Computer-Aided Design I (3.0 cr)

-OR-

Artificial Intelligence

Take 17 or more credit(s) from the following:

CSCI 5511 - Artificial Intelligence I (3.0 cr)

CSCI 5512W - Artificial Intelligence II, WI (3.0 cr)

CSCI 5521 - Pattern Recognition (3.0 cr)

CSCI 5551 - Introduction to Intelligent Robotic Systems (3.0 cr)

CSCI 5561 - Computer Vision (3.0 cr)

PSY 5031W - Perception, WI (3.0 cr)

PSY 5038W - Introduction to Neural Networks, WI (3.0 cr)

-OR-

Hardware

Take 17 or more credit(s) from the following:

CSCI 4203 - Computer Architecture (4.0 cr)

CSCI 4211 - Introduction to Computer Networks (3.0 cr)

CSCI 5204 - Advanced Computer Architecture (3.0 cr)

CSCI 5283 - Computer-Aided Design I (3.0 cr)

EE 4341 - Microprocessor and Microcontroller System Design (4.0 cr)

-OR-

Computational Biology

Consult your adviser for additional courses to meet the 17-credit requirement.

CSCI 5481 - Computational Techniques for Genomics (3.0 cr)

-OR-

Databases

Consult your adviser for additional courses to meet the 17-credit requirement.

CSCI 4707 - Practice of Database Systems (3.0 cr)

CSCI 5708 - Architecture and Implementation of Database Management Systems (3.0 cr)

CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)

-OR-

Graphics

Take 17 or more credit(s) from the following:

CSCI 4707 - Practice of Database Systems (3.0 cr)

CSCI 5707 - Principles of Database Systems (3.0 cr)

CSCI 5108 - Fundamentals of Computer Graphics II (3.0 cr)

CSCI 5109 - Visualization (3.0 cr)

CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)

CSCI 5116 - GUI Toolkits and Their Implementation (3.0 cr)

PSY 5031W - Perception, WI (3.0 cr)

-OR-

Management of Information Systems

Consult your adviser for additional courses to meet the 17-credit requirement.

CSCI 4707 - Practice of Database Systems (3.0 cr)
 CSCI 5708 - Architecture and Implementation of Database Management Systems (3.0 cr)
 IDSC 4441 - Electronic Commerce (2.0 cr)

-OR-

Network Security

Consult your adviser for additional courses to meet the 17-credit requirement.

CSCI 4211 - Introduction to Computer Networks (3.0 cr)
 CSCI 5103 - Operating Systems (3.0 cr)
 CSCI 5471 - Modern Cryptography (3.0 cr)
 MATH 5248 - Cryptology and Number Theory (4.0 cr)

-OR-

Networking

Take 17 or more credit(s) from the following:

CSCI 4211 - Introduction to Computer Networks (3.0 cr)
 EE 5505 - Wireless Communication (3.0 cr)
 INET 4011 - Network Administration (4.0 cr)
 INET 4021 - Network Programming (4.0 cr)
 INET 4041 - Emerging Network Technologies and Applications (3.0 cr)

-OR-

Programming

Consult your adviser for additional courses to meet the 17-credit requirement.

CSCI 4131 - Internet Programming (3.0 cr)
 CSCI 5106 - Programming Languages (3.0 cr)
 CSCI 5801 - Software Engineering I (3.0 cr)

-OR-

Software Engineering

Consult your adviser for additional courses to meet the 17-credit requirement.

CSCI 5801 - Software Engineering I (3.0 cr)
 CSCI 5802 - Software Engineering II (3.0 cr)
 CSCI 5106 - Programming Languages (3.0 cr)

-OR-

Theory

Consult your adviser for additional courses to meet the 17-credit requirement.

Take 4 or more course(s) from the following:

CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
 CSCI 5403 - Computational Complexity (3.0 cr)
 CSCI 5451 - Introduction to Parallel Computing: Architectures, Algorithms and Programming (3.0 cr)
 CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
 MATH 4707 - Introduction to Combinatorics and Graph Theory (4.0 cr)

-OR-

User Interfaces

Consult your adviser for additional courses to meet the 17-credit requirement.

CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
 CSCI 5116 - GUI Toolkits and Their Implementation (3.0 cr)
 PSY 5051W - Psychology of Human-Machine Interaction, WI (3.0 cr)
 KIN 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)

Electrical Engineering B.E.E.

Electrical and Computer Engineering

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 126.

Required credits within the major: 78.

Degree: Bachelor of Electrical Engineering.

The mission of the electrical engineering program is to educate students in the core topics as well as in a broad set of specialties of electrical engineering, to impart students with professional attributes that characterize a well-schooled engineer and citizen, and to provide students with opportunities for research experience in one of the leading electrical engineering centers of scholarship.

Electrical engineers work in highly diverse areas such as computers, telecommunications, semiconductors, electric energy, consumer and entertainment electronics, biomedical technology, defense and aerospace systems, and automotive electronics. They design and develop components, software, and systems; carry out analysis; and work in research, management, and sales. The bachelor of electrical engineering prepares students for immediate entry into professional work, for graduate study and further specialization in engineering, for advanced work in business and management, or for study in a different direction such as medicine.

Admission Requirements

Students must complete 9 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.30 for students already admitted to the degree-granting college.
- 2.30 for students transferring from another University of Minnesota college.
- 2.80 for students transferring from outside the University.

Students interested in pursuing a degree in computer engineering or electrical engineering are encouraged to take EE 1001 in their first year.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Mathematics**

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1372 - IT Calculus II (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)

or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
 MATH 2263 - Multivariable Calculus (4.0 cr)
 or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Physical Sciences

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)
 or PHYS 2303 - Physics III: Physics of Matter (4.0 cr)
 or PHYS 2311 - Modern Physics (4.0 cr)
 or PHYS 2403H - Honors Phys III, H (4.0 cr)
 PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Preparatory Courses

EE 2001 - Introduction to Electronic and Electrical Circuits (3.0 cr)
 EE 2002 - Introductory Circuits and Electronics Laboratory (1.0 cr)
 EE 2011 - Linear Systems and Circuits (3.0 cr)
 CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)
 or EE 1301 - Introduction to Computing Systems (4.0 cr)
Take all of the following in the same term:
 EE 301 - Introduction to Digital System Design: Discussion (0.0 cr)
 EE 2301 - Introduction to Digital System Design (4.0 cr)
Take all of the following in the same term:
 EE 361 - Introduction to Microcontrollers: Discussion (0.0 cr)
 EE 2361 - Introduction to Microcontrollers (4.0 cr)

Program Requirements

Required Courses

Major Courses

EE 3015 - Signals and Systems (3.0 cr)
 EE 3025 - Statistical Methods in Electrical and Computer Engineering (3.0 cr)
 EE 3101 - Circuits and Electronics Laboratory I (2.0 cr)
 EE 3102 - Circuits and Electronics Laboratory II (2.0 cr)
 EE 3115 - Analog and Digital Electronics (4.0 cr)
 EE 3161 - Semiconductor Devices (3.0 cr)
 EE 3601 - Transmission Lines, Fields, and Waves (3.0 cr)

Electives

With adviser approval, courses from areas outside of EE/CSCI may be substituted to meet up to 12 credits of this requirement (i.e., the technical electives). Courses taken as part of the EIP program may be used to meet the technical elective requirement. Courses may not be used to meet both the core and the elective requirements.

Take 26 or more credit(s).

Courses used to fulfill other requirements will not count as lab experiences.

Take 3 or more course(s) from the following:

EE 4951W - Senior Design Project, WI (2.0 cr)

or

Honors Project

EE 4981H - Senior Honors Project I, H (2.0 cr)

EE 4982V - Senior Honors Project II, WI, H (2.0 cr)

Take 1 or more course(s) from the following:

EE 4111 - Advanced Analog Electronics Design (4.0 cr)

EE 4235 - Linear Control Systems Laboratory (1.0 cr)

EE 4237 - State Space Control Laboratory (1.0 cr)
 EE 4301 - Digital Design With Programmable Logic (4.0 cr)
 EE 4341 - Microprocessor and Microcontroller System Design (4.0 cr)
 EE 4505 - Communications Systems Laboratory (1.0 cr)
 EE 4703 - Electric Drives Laboratory (1.0 cr)
 EE 4721 - Introduction to Power System Analysis (4.0 cr)
 EE 4743 - Switch-Mode Power Electronics Laboratory (2.0 cr)
 EE 5141 - Introduction to Microsystem Technology (4.0 cr)
 EE 5173 - Basic Microelectronics Laboratory (1.0 cr)
 EE 5327 - VLSI Design Laboratory (3.0 cr)
 EE 5545 - Digital Signal Processing Design (3.0 cr)
 EE 5613 - RF/Microwave Circuit Design Laboratory (2.0 cr)
 EE 5622 - Physical Optics Laboratory (1.0 cr)
 EE 5627 - Optical Fiber Communication (3.0 cr)
 EE 5811 - Biomedical Instrumentation (3.0 cr)

Take 0 or more course(s) from the following:

CSCI 4xxx

CSCI 5xxx

EE 4xxx

EE 5xxx

Program Sub-plans

A sub-plan is not required for this program.

EIP

Internship/Cooperative learning program.

Take EE 3961 (1 cr) and then EE 4961 (2 cr), with the possibility of a third course, EE 4962 (2 cr).

EE 3961 and EE 4961 are also listed in Sr Electives and may not be used to fulfill both requirements simultaneously.

Required Courses

Internship

EE 3961 - Industrial Assignment I (1.0 cr)

EE 4961 - Industrial Assignment II (2.0 cr)

Geological Engineering B.Geo.E.

Civil Engineering

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 128.

Required credits within the major: 40.

This program requires summer terms.

Degree: Bachelor of Geo-Engineering.

The mission of the geological engineering program comprises three overlapping and mutually supportive components:

- Prepare students to become productive engineers and contributing members of their professional community
- Prepare students for continual learning and professional development
- Prepare students for formal advanced education.

The program has four core objectives:

1. To produce graduates with a strong fundamental scientific and technical knowledge base and critical thinking skills required for engineering problem formulation and problem solving.
2. To produce graduates with the ability to work as a professional team member. This includes the ability to communicate effectively through both oral and written language.

- To produce graduates with an understanding of their obligations as professional geological engineers to protect human health, welfare, and the environment.
- To ensure that graduates have had opportunities to complement their academic studies with scholarly (research) investigations, co-ops, and internships.

Admission Requirements

Students must complete 11 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.80 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses

Mathematics and Statistics

STAT 3021 - Introduction to Probability and Statistics (3.0 cr)
 MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1372 - IT Calculus II (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
 MATH 2263 - Multivariable Calculus (4.0 cr)
 or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Mechanics

AEM 2011 - Statics (3.0 cr)
 AEM 3031 - Deformable Body Mechanics (3.0 cr)

Physical Sciences

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)
 PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Program Requirements

Required Courses

Major Courses

GEO 1001 - Earth and Its Environments, ENVT, PHYS SCI/L (4.0 cr)
 GEO 2301 - Mineralogy (3.0 cr)
 GEO 2302 - Petrology (3.0 cr)
 GEO 4501 - Structural Geology (3.0 cr)
 GEO 3911 - Introductory Field Geology (4.0 cr)
 or GEO 4971 - Field Hydrogeology (4.0 cr)
 GEO 4203 - Principles of Geophysical Exploration (3.0 cr)
 or GEO 4211 - Solid Earth Geophysics I (3.0 cr)
 GEO 4602 - Sedimentology and Stratigraphy (3.0 cr)
 or GEO 4701 - Geomorphology (3.0-4.0 cr)
 or GEO 4703 - Glacial Geology (4.0 cr)

Engineering

CE 3101 - Computer Applications in Civil Engineering I (3.0 cr)
 CE 3502 - Fluid Mechanics (4.0 cr)
 GEOE 4102W - Capstone Design, WI (3.0 cr)
 GEOE 4341 - Engineering Geostatistics (3.0 cr)
 GEOE 4351 - Groundwater Mechanics (3.0 cr)
 CE 3301 - Soil Mechanics I (3.0 cr)
 or GEOE 3301 - Soil Mechanics I (3.0 cr)

Geological Engineering Options

Students are required to complete one of the following course groups.

Geoenvironmental

Focuses on soil and groundwater contamination, modeling, and remediation; solid and hazardous waste characterization, management, and disposal; and groundwater resources management and exploitation.

CE 3501 - Environmental Engineering, C/PE, ENVT (3.0 cr)
 CE 4501 - Hydrologic Design (4.0 cr)
 CE 4531 - Environmental Process Engineering (3.0 cr)
 CE 4561 - Solid Hazardous Wastes (3.0 cr)
 GEOE 4352 - Groundwater Modeling (3.0 cr)

-OR-

Geomechanics

Focuses on foundations for buildings, bridges, roads, and dams; analysis and design of surface and subsurface excavations; and evaluation of natural geologic hazards.

AEM 2012 - Dynamics (3.0 cr)
 CE 4121 - Computer Applications in Civil Engineering II (3.0 cr)
 GEOE 3311 - Rock Mechanics I (3.0 cr)
 GEOE 4301 - Soil Mechanics II (3.0 cr)
 GEOE 4311 - Rock Mechanics II (3.0 cr)

Geology B.S.Geol.

Geology & Geophysics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 52.

This program requires summer terms.

Degree: Bachelor of Science in Geology.

Geology is the study of the composition, structure, and history of the Earth and of the processes that operate on and within it, with emphasis on the crust, oceans, and atmosphere. The department's programs emphasize applications of physics, chemistry, and biology to understanding the Earth.

Geologists and geophysicists are employed in a wide range of fields, including exploration for and development of natural resources (hydrocarbons, minerals, groundwater); environmental science; urban planning; education; and oceanography. Potential employers include the oil, gas, and minerals industries; environmental consultants; federal and private research institutions; universities; schools; and government agencies. An advanced degree is usually required for a career in research or teaching.

Admission Requirements

Students must complete 5 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students transferring from outside the University.

Students interested in geology as a major may want to consider taking geology 1001, which can be counted as an elective.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1371 - IT Calculus I, MATH (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)
or MATH 1372 - IT Calculus II (4.0 cr)
Multivariable Calculus may be substituted.
MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
or MATH 2263 - Multivariable Calculus (4.0 cr)
or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Physical Sciences

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)
One course of Physics I and one course of Physics II must be complete before admission to upper division
PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Program Requirements

Required Courses

Major Courses

GEO 2201 - Geodynamics I: The Solid Earth (3.0 cr)
GEO 2301 - Mineralogy (3.0 cr)
GEO 2302 - Petrology (3.0 cr)
GEO 2303W - Geochemical Principles, WI (3.0 cr)
GEO 3202 - Geodynamics II: The Fluid Earth (3.0 cr)
GEO 3401 - Geochronology and Earth History (3.0 cr)
GEO 3911 - Introductory Field Geology (4.0 cr)
GEO 4501 - Structural Geology (3.0 cr)
GEO 4602 - Sedimentology and Stratigraphy (3.0 cr)
GEO 4631W - Earth Systems: Geosphere/Biosphere Interactions, WI (3.0 cr)

Workshops and Advanced Fieldwork

Take one course in advanced field geology during the summer after the junior year.

Take 2 or more course(s) from the following:

GEO 3870 - Modeling Workshop (1.0 cr)
GEO 3880 - Laboratory Workshop (1.0 cr)
GEO 3890 - Field Workshop (1.0 cr)
GEO 4911 - Advanced Field Geology (4.0 cr)
or GEO 4971 - Field Hydrogeology (4.0 cr)

Electives

Take at least 12 additional credits of geology during the junior and senior years, with no more than 4 credits from 1xxx and 3 credits from 2xxx.

Take 12 or more credit(s) from the following:

GEO 1xxx
GEO 2xxx
GEO 3xxx
GEO 4xxx
GEO 5xxx

Technical Electives

Take 8 credits of additional elective courses in physical and natural sciences or mathematics, chosen in consultation with an adviser.

Geophysics B.S.Geop.

Geology & Geophysics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 52.

This program requires summer terms.

Degree: Bachelor of Science in Geophysics.

Geophysics is the study of the physical structure and properties of the Earth through application of the principles and techniques of classical physics. Major topics include the physical properties of rocks and minerals, the origin and dynamics of the Earth's gravity and magnetic fields, earthquakes and the propagation of waves in the Earth (seismology), and the dynamics of the Earth's crust, mantle, and deep interior.

Geologists and geophysicists are employed in a wide range of fields, including exploration for and development of natural resources (hydrocarbons, minerals, groundwater); environmental science; urban planning; education; and oceanography. Potential employers include the oil, gas, and minerals industries; environmental consultants; federal and private research institutions; universities; schools; and government agencies. An advanced degree is usually required for a career in research or teaching.

Admission Requirements

Students must complete 11 courses before admission to the program.

A GPA above 2.00 is preferred for the following:

- 2.50 for students transferring from outside the University.

Students interested in a geophysics major may want to consider taking GEOG 1001, which can be counted as a geology elective.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1371 - IT Calculus I, MATH (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)
or MATH 1372 - IT Calculus II (4.0 cr)
MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
MATH 2263 - Multivariable Calculus (4.0 cr)
or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Physical Sciences

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)
 PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 2303 - Physics III: Physics of Matter (4.0 cr)

Program Requirements**Required Courses****Major Courses**

GEO 2201 - Geodynamics I: The Solid Earth (3.0 cr)
 GEO 2301 - Mineralogy (3.0 cr)
 GEO 2302 - Petrology (3.0 cr)
 GEO 2303W - Geochemical Principles, WI (3.0 cr)
 GEO 3202 - Geodynamics II: The Fluid Earth (3.0 cr)
 GEO 3401 - Geochronology and Earth History (3.0 cr)
 GEO 3911 - Introductory Field Geology (4.0 cr)
 GEO 4501 - Structural Geology (3.0 cr)
 GEO 4911 - Advanced Field Geology (4.0 cr)
 or GEO 4971 - Field Hydrogeology (4.0 cr)

Take 2 or more course(s) from the following:

GEO 3870 - Modeling Workshop (1.0 cr)
 GEO 3880 - Laboratory Workshop (1.0 cr)
 GEO 3890 - Field Workshop (1.0 cr)

Take 9 or more credit(s) from the following:

GEO 4211 - Solid Earth Geophysics I (3.0 cr)
 GEO 4212 - Solid Earth Geophysics II (3.0 cr)
 GEO 4203 - Principles of Geophysical Exploration (3.0 cr)
 GEO 4204 - Geomagnetism and Paleomagnetism (3.0 cr)
 GEO 5203 - Mineral and Rock Physics (3.0 cr)

Electives

Take 9 additional credits of GEO courses, with no more than 4 credits of 1xxx and 3 credits of 2xxx.

Take 9 or more credit(s) from the following:

GEO 1xxx
 GEO 2xxx
 GEO 3xxx
 GEO 4xxx
 GEO 5xxx

Technical Electives

Take 9 additional credits of math or science approved by adviser.

Information Technology Minor**Computer Science and Engineering**

Requirements for this program are current for Fall 2006.

Required credits in this minor: 16.

This interdisciplinary minor requires at least 16 credits, including two core courses from the Institute of Technology and three breadth courses from the Colleges of Design and Liberal Arts. The minor enables students in nontechnical disciplines to supplement their major with a practical set of courses focused on information technology.

Program Requirements**Required Courses****Core Courses**

Take 2 or more course(s) from the following:

CSCI 1001 - Overview of Computer Science (4.0 cr)
 CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)
 CSCI 1121 - Introduction to the Internet 1 (4.0 cr)

Breadth Courses

Note: DHA 2334 is a prerequisite for more advanced graphic design courses; although these courses are limited to graphic design majors, admission can be obtained through permission of the instructor.

Take 3 or more course(s) from the following:

COMM 3201 - Introduction to Electronic Media Production (4.0 cr)
 COMM 3211 - Introduction to U.S. Electronic Media (3.0 cr)
 COMM 4231 - Comparing Electronic Media Systems, IP (3.0 cr)
 COMM 4235 - Electronic Media and Ethnic Minorities--A World View, IP (3.0 cr)
 COMM 4291 - New Telecommunication Media (3.0 cr)
 COMM 5233 - Electronica Media and National Development (3.0 cr)
 DHA 2334 - Computer Applications I: Digital Composition for Design (3.0 cr)
 DHA 4334 - Computer Applications II: Design for the Digital Environment (3.0 cr)
 DHA 4384 - Interactive Media (3.0 cr)
 DHA 5381 - Digital Illustration (3.0 cr)
 DHA 5382 - Digital Sound and Video (3.0 cr)
 DHA 5383 - Digital Illustration and Animation (4.0 cr)
 DHA 5385 - Internet-Based Media (3.0 cr)
 DHA 5399 - Theory of Electronic Design (3.0 cr)
 ENG 3632 - Electronic Texts (3.0 cr)
 GEOG 3561 - Principles of Geographic Information Science (4.0 cr)
 GEOG 5563 - Advanced Geographic Information Science (3.0 cr)
 GEOG 5564 - Urban Geographic Information Science and Analysis (3.0 cr)
 JOUR 3004 - Information for Mass Communication (3.0 cr)
 JOUR 3614 - History of Media Communication, HP (3.0 cr)
 JOUR 3776 - Mass Communication Law (3.0 cr)

Materials Science and Engineering B.Mat.S.E.

Chemical Engineering & Materials Science

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 128.

Required credits within the major: 38.

Degree: Bachelor of Materials Science and Engineering.

The program in materials science and engineering leads to a bachelor's degree that enables students to immediately enter the profession. The program develops an understanding of the properties and the origin of these properties in a broad range of materials, including metals, ceramics, semiconductors, polymers, and composites. Because the program is broadly based, graduates find employment across a broad range of industries, including the automotive, chemical, electronics, energy, and medical technology industries. Graduates also find positions in consulting, research, technical management, and teaching.

The materials science and engineering (MSE) program provides educational experiences that challenge students to

- learn the scientific and engineering principles underlying the four major elements of materials engineering: structure, properties, processing, and performance of engineering materials (including metals and alloys, ceramics, polymers, and composites).
- apply and integrate knowledge of the above four elements to identify, formulate, and solve materials selection problems and design problems.
- learn experimental, statistical, and computational techniques in the context of MSE.
- design and conduct experiments, as well as analyze and interpret data.
- prepare for an engineering career by developing communication and teamwork skills and an understanding of the importance of lifelong learning, professionalism, and ethical responsibility.

Admission Requirements

Students must complete 11 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.80 for students transferring from outside the University.

Students interested in materials science and engineering are recommended to take MATS 1001/CHEN 1001 in order to learn more about the field.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)

or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)
PHYS 2303 - Physics III: Physics of Matter (4.0 cr)
or PHYS 2403H - Honors Phys III, H (4.0 cr)

Program Requirements

Required Courses

Major Courses

AEM 3031 - Deformable Body Mechanics (3.0 cr)
AEM 4511 - Mechanics of Composite Materials (3.0 cr)
CE 3101 - Computer Applications in Civil Engineering I (3.0 cr)
MATS 3011 - Introduction to Materials Science and Engineering (3.0 cr)
MATS 3012 - Metals and Alloys, WI (3.0 cr)
MATS 3801 - Structural Characterization Lab (2.0 cr)
MATS 3851W - Materials Properties Lab, WI (2.0 cr)
MATS 4001 - Thermodynamics of Materials (4.0 cr)
MATS 4002 - Mass Transport and Kinetics (4.0 cr)
MATS 4013 - Electrical and Magnetic Properties of Materials (3.0 cr)
MATS 4212 - Ceramics (3.0 cr)
MATS 4214 - Polymers (3.0 cr)
MATS 4221 - Materials Design and Performance (4.0 cr)
MATS 4301W - Materials Processing, WI (4.0 cr)
MATS 4400 - Senior Design Project (3.0 cr)

Technical Electives

Students must take 13 credits of technical electives. See an adviser for a list of possible courses.

Mathematics B.S.Math.

School of Mathematics

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 56.

Degree: Bachelor of Science in Mathematics.

The mission of the program is to provide high-quality mathematics instruction in a stimulating intellectual atmosphere. The goal is to educate students at all levels to provide cultural enrichment, to give them the analytic tools they need to become responsible citizens, and to prepare them for careers involving mathematics.

The School of Mathematics offers a program leading to the bachelor of science degree. The course of study is flexible and may be adapted to satisfy a wide variety of interests and needs. Students may prepare for graduate study in mathematics or emphasize various fields of interest, such as preparation for secondary school teaching, actuarial science, or programs in applied mathematics, including industrial mathematics, biology, mathematics applicable to computer science, and numerical analysis. Programs for specializations in actuarial science, preparation for teaching in the secondary school, and

mathematics applicable to computer science earn a designation that appears on the diploma.

Admission Requirements

Students must complete 8 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1371 - IT Calculus I, MATH (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)
or MATH 1372 - IT Calculus II (4.0 cr)
MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
MATH 2263 - Multivariable Calculus (4.0 cr)
or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)
MATH 2283 - Sequences, Series, and Foundations (3.0 cr)
or MATH 3283W - Sequences, Series, and Foundations: Writing Intensive, WI (4.0 cr)

Physics

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Program Requirements

Students must complete eight upper division math courses at 4xxx or above and two technical elective courses, which can be mathematics courses.

The School of Mathematics will accept STAT 5101 and 5102 as part of the eight-course upper division mathematics requirement. The content of STAT 5101 is the same as MATH 5651. No other courses from other departments may be used as part of the eight-course math requirement, though other courses may be used as technical electives.

MATH 4512 may not be used to satisfy part of the eight course upper division math requirement, though it may be used as technical elective. MATH 3113, 3116, 3118, 4113, 4116, 4118, 3283W, and 4005 may not be used to satisfy part of the eight-course upper division math requirement or as technical electives.

In addition to the specializations described below, students who wish to pursue a pure mathematics track or are planning to go to graduate school in mathematics should consult their adviser about appropriate course choices.

Specializations in Mathematics

Students are required to complete one of the following course groups.

Mathematics (No Specialization)

Students who do not choose one of the other specializations complete the basic requirements listed here. For the Technical Electives requirement, students must take at least 6 credits from courses that meet the following criteria: prerequisite of calculus; 3xxx or higher; courses form a coherent part of the student's program.

Take 2 or more course(s).

Take 1 or more course(s) from the following:

MATH 4281 - Introduction to Modern Algebra (4.0 cr)
MATH 5248 - Cryptology and Number Theory (4.0 cr)
MATH 5251 - Error-Correcting Codes, Finite Fields, Algebraic Curves (4.0 cr)
MATH 5285H - Honors: Fundamental Structures of Algebra I, H (4.0 cr)
MATH 5286H - Honors: Fundamental Structures of Algebra II, H (4.0 cr)
MATH 5385 - Introduction to Computational Algebraic Geometry (4.0 cr)

Take 0 or more course(s) from the following:

MATH 4242 - Applied Linear Algebra (4.0 cr)
MATH 5705 - Enumerative Combinatorics (4.0 cr)
MATH 5707 - Graph Theory and Non-enumerative Combinatorics (4.0 cr)
MATH 5711 - Linear Programming and Combinatorial Optimization (4.0 cr)
MATH 5485 - Introduction to Numerical Methods I (4.0 cr)

Take 2 or more course(s) from the following:

MATH 4606 - Advanced Calculus (4.0 cr)
MATH 5486 - Introduction To Numerical Methods II (4.0 cr)
MATH 5525 - Introduction to Ordinary Differential Equations (4.0 cr)
MATH 5535 - Dynamical Systems and Chaos (4.0 cr)
MATH 5583 - Complex Analysis (4.0 cr)
MATH 5587 - Elementary Partial Differential Equations I (4.0 cr)
MATH 5588 - Elementary Partial Differential Equations II (4.0 cr)
MATH 5652 - Introduction to Stochastic Processes (4.0 cr)
MATH 5654 - Prediction and Filtering (4.0 cr)
MATH 5615H - Honors: Introduction to Analysis I, H (4.0 cr)
MATH 5616H - Honors: Introduction to Analysis II, H (4.0 cr)
MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
or STAT 5101 - Theory of Statistics I (4.0 cr)
CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)
or CSCI 1107 - Introduction to FORTRAN Programming for Scientists and Engineers (3.0 cr)
or CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)
or CSCI 1901 - Structure of Computer Programming I (4.0 cr)
or CSCI 1902 - Structure of Computer Programming II (4.0 cr)
PHYS 2303 - Physics III: Physics of Matter (4.0 cr)
or PHYS 2311 - Modern Physics (4.0 cr)
or PHYS 2503 - Physics III: Foundations of Modern Physics (4.0 cr)
Complete 6 credits of technical electives selected in consultation with your adviser.

-OR-

Mathematical Biology Specialization

Students select one of three options: environmental science, genomics, or physiology. Consult an adviser for more information.

MATH 4428 - Mathematical Modeling (4.0 cr)
MATH 4242 - Applied Linear Algebra (4.0 cr)

Take 1 or more course(s) from the following:

MATH 4281 - Introduction to Modern Algebra (4.0 cr)
MATH 5248 - Cryptology and Number Theory (4.0 cr)
MATH 5251 - Error-Correcting Codes, Finite Fields, Algebraic Curves (4.0 cr)
MATH 5285H - Honors: Fundamental Structures of Algebra I, H (4.0 cr)
MATH 5286H - Honors: Fundamental Structures of Algebra II, H (4.0 cr)
MATH 5385 - Introduction to Computational Algebraic Geometry (4.0 cr)
BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

or

take the following course pair

BIOL 1001 - Introductory Biology I: Evolutionary and Ecological Perspectives, BIOL SCI/L, ENVT (4.0 cr)
BIOL 1002W - Introductory Biology II: Molecular, Cellular, and Developmental Perspectives, WI (5.0 cr)
CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)
or CSCI 1107 - Introduction to FORTRAN Programming for Scientists and Engineers (3.0 cr)

or CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)
 or CSCI 1901 - Structure of Computer Programming I (4.0 cr)
 or CSCI 1902 - Structure of Computer Programming II (4.0 cr)
 MATH 5525 - Introduction to Ordinary Differential Equations (4.0 cr)
 MATH 5535 - Dynamical Systems and Chaos (4.0 cr)
 MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)

Senior seminar (1 credit)

Complete an approved research internship for at least 4 credits.

Complete the requirements for the environmental science or genomics or physiology option. See your adviser for specifics.

-OR-

Actuarial Specialization

Complete the requirements for the actuarial sub-plan.

-OR-

Mathematics Education Specialization

Complete the requirements for the mathematics education sub-plan.

-OR-

Computer Applications Specialization

Complete the requirements for the computer applications sub-plan.

Program Sub-plans

A sub-plan is not required for this program.

Actuarial Science

Students should take 6 courses of mathematics or statistics and math electives in economics, accounting, insurance, and finance. For the computer science requirement, only 1103 or 1113 should be chosen.

Required Courses

Math and Computer Science

These courses will fulfill both the analysis course requirement and one of the algebra course requirements.

MATH 4065 - Theory of Interest (3.0 cr)

MATH 5067 - Actuarial Mathematics I (4.0 cr)

MATH 5068 - Actuarial Mathematics II (4.0 cr)

MATH 4242 - Applied Linear Algebra (4.0 cr)

Take 1 or more course(s) from the following:

MATH 4281 - Introduction to Modern Algebra (4.0 cr)

MATH 5248 - Cryptology and Number Theory (4.0 cr)

MATH 5251 - Error-Correcting Codes, Finite Fields, Algebraic Curves (4.0 cr)

MATH 5285H - Honors: Fundamental Structures of Algebra I, H (4.0 cr)

MATH 5286H - Honors: Fundamental Structures of Algebra II, H (4.0 cr)

MATH 5385 - Introduction to Computational Algebraic Geometry (4.0 cr)

CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)

or CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)

MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)

or STAT 5101 - Theory of Statistics I (4.0 cr)

MATH 5652 - Introduction to Stochastic Processes (4.0 cr)

or STAT 5102 - Theory of Statistics II (4.0 cr)

Economics and Business

ECON 1101 - Principles of Microeconomics, IP, SSCI (4.0 cr)

ECON 1102 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

or

ECON 1104 - Principles of Microeconomics, IP, SSCI (4.0 cr)

or ECON 1105 - Principles of Macroeconomics, IP, SSCI (4.0 cr)

ACCT 2050 - Introduction to Financial Reporting (4.0 cr)

ECON 3101 - Intermediate Microeconomics (4.0 cr)

FINA 3001 - Finance Fundamentals (3.0 cr)

ECON 4751 - Financial Economics (3.0 cr)

or FINA 4241 - Corporate Financing Decisions (4.0 cr)

Take 2 or more course(s) from the following:

INS 4100 - Corporate Risk Management (2.0 cr)

INS 4101 - Employee Benefits (2.0 cr)

INS 4200 - Insurance Theory and Practice (2.0 cr)

Computer Applications

Take at least 24 credits of math/computer science courses relating to computer applications. Students who complete the computer application emphasis will also satisfy the requirements for a minor in computer science.

Required Courses

Computer Applications

MATH 5486 may be used toward the analysis distribution requirement and MATH 5485 toward the algebra requirement.

CSCI 2011 - Discrete Structures of Computer Science (4.0 cr)

MATH 5165 - Mathematical Logic I (4.0 cr)

MATH 5485 - Introduction to Numerical Methods I (4.0 cr)

MATH 5486 - Introduction To Numerical Methods II (4.0 cr)

CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)

or CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)

CSCI 1901 - Structure of Computer Programming I (4.0 cr)

or CSCI 1902 - Structure of Computer Programming II (4.0 cr)

Additional Algebra

Take 1 or more course(s) from the following:

MATH 4281 - Introduction to Modern Algebra (4.0 cr)

MATH 5248 - Cryptology and Number Theory (4.0 cr)

MATH 5251 - Error-Correcting Codes, Finite Fields, Algebraic Curves (4.0 cr)

MATH 5285H - Honors: Fundamental Structures of Algebra I, H (4.0 cr)

MATH 5286H - Honors: Fundamental Structures of Algebra II, H (4.0 cr)

MATH 5385 - Introduction to Computational Algebraic Geometry (4.0 cr)

Additional Analysis

Take 1 or more course(s) from the following:

MATH 4606 - Advanced Calculus (4.0 cr)

MATH 5525 - Introduction to Ordinary Differential Equations (4.0 cr)

MATH 5535 - Dynamical Systems and Chaos (4.0 cr)

MATH 5583 - Complex Analysis (4.0 cr)

MATH 5587 - Elementary Partial Differential Equations I (4.0 cr)

MATH 5588 - Elementary Partial Differential Equations II (4.0 cr)

MATH 5652 - Introduction to Stochastic Processes (4.0 cr)

MATH 5654 - Prediction and Filtering (4.0 cr)

MATH 5615H - Honors: Introduction to Analysis I, H (4.0 cr)

MATH 5616H - Honors: Introduction to Analysis II, H (4.0 cr)

MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)

or STAT 5101 - Theory of Statistics I (4.0 cr)

Additional Computing-Related Mathematics

A course chosen from this group that also meets the algebra distribution requirement must be taken in addition to the two courses required for all majors.

MATH 4242 - Applied Linear Algebra (4.0 cr)

or MATH 5166 - Mathematical Logic II (4.0 cr)

or MATH 5248 - Cryptology and Number Theory (4.0 cr)

or MATH 5251 - Error-Correcting Codes, Finite Fields, Algebraic Curves (4.0 cr)

or MATH 5285H - Honors: Fundamental Structures of Algebra I, H (4.0 cr)
 or MATH 5286H - Honors: Fundamental Structures of Algebra II, H (4.0 cr)
 or MATH 5385 - Introduction to Computational Algebraic Geometry (4.0 cr)
 or MATH 5487 - Computational Methods for Differential and Integral Equations in Engineering and Science I (4.0 cr)
 or MATH 5705 - Enumerative Combinatorics (4.0 cr)
 or MATH 5707 - Graph Theory and Non-enumerative Combinatorics (4.0 cr)
 or MATH 5711 - Linear Programming and Combinatorial Optimization (4.0 cr)

Computer Science

Upper level computer science courses may be counted as technical electives.

Take 3 or more course(s) from the following:

CSCI 4041 - Algorithms and Data Structures (4.0 cr)
 CSCI 5107 - Fundamentals of Computer Graphics I (3.0 cr)
 CSCI 5108 - Fundamentals of Computer Graphics II (3.0 cr)
 CSCI 5403 - Computational Complexity (3.0 cr)
 CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
 CSCI 5511 - Artificial Intelligence I (3.0 cr)
 CSCI 5521 - Pattern Recognition (3.0 cr)
 CSCI 8442 - Computational Geometry and Applications (3.0 cr)
 CSCI 5512W - Artificial Intelligence II, WI (3.0 cr)
 or CSCI 5519 - Artificial Intelligence II (non-WI) (3.0 cr)

Physics

A physics course from the following list should be taken in the third semester (fall semester of the second year).

PHYS 2303 - Physics III: Physics of Matter (4.0 cr)
 or PHYS 2311 - Modern Physics (4.0 cr)
 or PHYS 2503 - Physics III: Foundations of Modern Physics (4.0 cr)

Mathematics Education

Preparation for teaching in secondary education

Courses that are recommended but not required for this specialization include MATH 5652 Stochastic Processes or STAT 5102 Theory of Statistics II; and MATH 5336 Geometry II. IT majors can satisfy the technical elective requirement with courses in mathematics education. These may include two of MATHE 5011, MATHE 5021 and MATHE 5031, but the mathematics adviser should be consulted to approve the technical elective.

Required Courses

These course fulfill the both the algebra and analysis requirements.

MATH 5335 - Geometry I (4.0 cr)
 MATH 4242 - Applied Linear Algebra (4.0 cr)
 or MATH 4281 - Introduction to Modern Algebra (4.0 cr)
 or MATH 5285H - Honors: Fundamental Structures of Algebra I, H (4.0 cr)
 MATH 4707 - Introduction to Combinatorics and Graph Theory (4.0 cr)
 or MATH 5705 - Enumerative Combinatorics (4.0 cr)
 or MATH 5707 - Graph Theory and Non-enumerative Combinatorics (4.0 cr)
 MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
 or STAT 5101 - Theory of Statistics I (4.0 cr)

Computer Science

CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)
 or CSCI 1107 - Introduction to FORTRAN Programming for Scientists and Engineers (3.0 cr)
 or CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)
 or CSCI 1901 - Structure of Computer Programming I (4.0 cr)
 or CSCI 1902 - Structure of Computer Programming II (4.0 cr)

Physics

Take one of the following physics courses in the third semester (fall semester of the second year).

PHYS 2303 - Physics III: Physics of Matter (4.0 cr)
 or PHYS 2311 - Modern Physics (4.0 cr)
 or PHYS 2503 - Physics III: Foundations of Modern Physics (4.0 cr)

School Mathematics

Consult an adviser before completing this requirement.

Take 2 or more course(s) from the following:

MTHE 5011 - Arithmetic Structures in School Mathematics (3.0 cr)
 MTHE 5021 - Algebraic Structures in School Mathematics (3.0 cr)
 MTHE 5031 - Geometric Structures in School Mathematics (3.0 cr)

Mechanical Engineering B.M.E.

Mechanical Engineering

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 128.

Required credits within the major: 49.

Degree: Bachelor of Mechanical Engineering.

The Department of Mechanical Engineering is committed to offering undergraduate and graduate education of the highest quality in mechanical and industrial engineering, to conducting significant basic and applied research in selected areas, and to providing professional service to the appropriate constituencies of a major land grant university.

Mechanical engineering is involved in most technological activities of society and dominates many, including automotive, transportation and materials handling, environmental and pollution control systems, refrigeration and cryogenics, power systems design, automation, system dynamics and control, computer-aided design and manufacturing, and machinery/consumer products production. A mechanical engineer may be engaged in design, development, research, testing, manufacturing, administration, marketing, consulting, or education.

Admission Requirements

Students must complete 9 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students already admitted to the degree-granting college.
- 2.50 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1372 - IT Calculus II (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
 MATH 2263 - Multivariable Calculus (4.0 cr)
 or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Physical Sciences

CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)
 CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
 PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Statics and Dynamics

AEM 2021 - Statics and Dynamics (4.0 cr)
 or
take the following course pair
 AEM 2011 - Statics (3.0 cr)
 AEM 2012 - Dynamics (3.0 cr)

Program Requirements

Required Courses

Major Courses

AEM 3031 - Deformable Body Mechanics (3.0 cr)
 EE 3005 - Fundamentals of Electrical Engineering (4.0 cr)
 EE 3006 - Fundamentals of Electrical Engineering Laboratory (1.0 cr)
 IE 4521 - Statistics, Quality, and Reliability (4.0 cr)
 MATS 2001 - Introduction to the Science of Engineering Materials (3.0 cr)
 ME 2011 - Introduction to Engineering (4.0 cr)
 ME 3221 - Design and Manufacturing I: Engineering Materials and Manufacturing Processes (4.0 cr)
 ME 3222 - Design and Manufacturing II (4.0 cr)
 ME 3281 - System Dynamics and Control (4.0 cr)
 ME 3331 - Thermal Sciences I (3.0 cr)
 ME 3332 - Thermal Sciences II (3.0 cr)
 ME 3333 - Thermal Sciences III (3.0 cr)
 ME 4031W - Basic Mechanical Measurements Laboratory, WI (4.0 cr)
 ME 4054W - Design Projects, WI (4.0 cr)

Electives

ME 4131W - Thermal Environmental Engineering Laboratory, WI (4.0 cr)
 or ME 4231 - Motion Control Laboratory (4.0 cr)
 or ME 4232 - Fluid Power Control Lab (4.0 cr)
 or ME 4331 - Thermal Engineering Laboratory (4.0 cr)
 or ME 4431W - Energy Conversion Systems Laboratory, WI (4.0 cr)
 or ME 5133 - Aerosol Measurement Laboratory (4.0 cr)
 or ME 5231 - Digital and Analog Control Laboratory (4.0 cr)

Technical Electives

Complete 16 credits of upper division technical electives, with at least 8 credits in ME/IE. Students may choose options in power and propulsion, design and manufacturing, thermodynamics and heat transfer, or environment or select electives in consultation with their adviser.

Program Sub-plans

A sub-plan is not required for this program.

EIP

ME EIP program (engineering intern program or co-op program) is available during the last two years of study. Upper division status and a satisfactory GPA are required for admission. The co-op program provides applied engineering training in selected established industries during semesters of supervised assignments that alternate with semesters of University studies.

Students in the ME EIP program (engineering intern program or Co-op program) register for three industrial assignment courses. ME 3041 (2 credits), ME 4042 (2 credits), and ME 4043W (4 credits) for a total of 8 credits. These courses are used in place of two technical electives.

Students register for industrial assignments as they would for regular classes. Requirements for the course include writing a summary of an article in a technical journal, attending a workshop (ME 3041, ME 4043), submitting a report draft, and writing a final report. The course grade is based on writing; work performance cannot be considered in assigning a grade. The last industrial assignment, ME 4043, is oriented toward solving a design problem and fulfills a 4-credit intensive writing course requirement. Cooperation from company personnel is required in accomplishing most reports, particularly the ME 4043 reports.

Required Courses

Internship

ME 3041 - Industrial Assignment I (2.0 cr)
 ME 4042 - Industrial Assignment II (2.0 cr)
 ME 4043W - Industrial Assignment III, WI (4.0 cr)

Industrial Engineering

The IE option gives students an understanding of managerial and human factor issues involved in designing products and running manufacturing, logistics, and service operations. Students also learn additional skills for analysis, optimization, and simulation of large-scale systems such as factories, logistical systems, and organizational networks.

Students who select the IE option complete the same set of required courses as other mechanical engineering students, but their technical electives are selected from the industrial engineering course options and in consultation with a faculty adviser.

Required Courses

Technical Electives

Take 4 Courses (16 credits) from the following list. Choose one course from each area.

Tech Elective - Human Factors

or IE 5511 - Human Factors and Work Analysis (4.0 cr)
 or IE 5512 - Applied Ergonomics (4.0 cr)
 or IE 5513 - Engineering Safety (4.0 cr)

Tech Elective - Engineering Management

or IE 5441 - Engineering Cost Accounting and Cost Control (4.0 cr)
 or IE 5522 - Quality Engineering and Reliability (4.0 cr)
 or IE 5541 - Project Management (4.0 cr)
 Tech Elective - Production Systems
 or IE 5551 - Production Planning and Inventory Control (4.0 cr)
 or IE 5552 - Design and Analysis of Manufacturing Systems (4.0 cr)

Tech Elective - Operations Research

or IE 5531 - Engineering Optimization I, H (4.0 cr)
 or IE 5553 - Simulation (4.0 cr)

Industrial Engineering EIP

The Engineering Intern Program (EIP or co-op program) for industrial engineering students is offered through an industrial engineering option. Students complete the same set of required courses as other mechanical engineering students, but their technical electives must be selected from an approved list and in consultation with a faculty adviser. Students selecting the option may also apply to the co-op program.

Technical electives should be taken in the IE department. Students should also take the necessary course in conjunction with their internship/co-op program.

Required Courses**Technical Electives**

Choose 4 courses (16 credits) from the following list. Choose one course from each area.

Tech Elective - Human Factors

or IE 5511 - Human Factors and Work Analysis (4.0 cr)
 or IE 5512 - Applied Ergonomics (4.0 cr)
 or IE 5513 - Engineering Safety (4.0 cr)

Tech Elective - Engineering Management

or IE 5441 - Engineering Cost Accounting and Cost Control (4.0 cr)
 or IE 5522 - Quality Engineering and Reliability (4.0 cr)
 or IE 5541 - Project Management (4.0 cr)

Tech Elective - Production Systems

or IE 5551 - Production Planning and Inventory Control (4.0 cr)
 or IE 5552 - Design and Analysis of Manufacturing Systems (4.0 cr)

Tech Elective - Operations Research

or IE 5531 - Engineering Optimization I, H (4.0 cr)
 or IE 5553 - Simulation (4.0 cr)

Internship

ME 3041 - Industrial Assignment I (2.0 cr)
 ME 4042 - Industrial Assignment II (2.0 cr)
 ME 4043W - Industrial Assignment III, WI (4.0 cr)

Physics B.S. Phys.

School of Physics & Astronomy

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 38 to 41.

Degree: Bachelor of Science in Physics.

The physics program prepares students for employment, often in industrial or governmental laboratories, or for further study at graduate or professional schools in physics, engineering, biophysics, medicine, education, law, or business.

The program integrates a broad foundation in physics that can be flexibly combined with coursework in other technical disciplines or used to specialize in physics. Students should consult a physics adviser to help formulate objectives for study.

Admission Requirements

Students must complete 7 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students transferring from another University of Minnesota college.
- 2.80 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission**Preparatory Mathematics**

Math 1571-1572-2573 (Honors math sequence) may be taken in place of the listed courses.

MATH 1271 - Calculus I, MATH (4.0 cr)
 or MATH 1371 - IT Calculus I, MATH (4.0 cr)
 MATH 1272 - Calculus II (4.0 cr)
 or MATH 1372 - IT Calculus II (4.0 cr)
 MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
 or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
 MATH 2263 - Multivariable Calculus (4.0 cr)
 or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Preparatory Physics

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)
 or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)
 PHYS 2403H - Honors Phys III, H (4.0 cr)
 or PHYS 2503 - Physics III: Foundations of Modern Physics (4.0 cr)

Program Requirements

In addition to the official concentrations in physics (biological physics, engineering physics, physics for teaching), students may also complete a focus in either computational physics or professional physics.

For computational physics, students must take the two remaining courses they did not use to satisfy the major core requirements from the list of PHYS 4001, 4002, 4101, and 4201 noted above. Students must also take 19 credits of technical electives, chosen in consultation with an adviser. Any course in the sciences, math, or engineering may be used to fulfill these requirements. Students intending to pursue graduate study in physics are strongly encouraged to take PHYS 4303.

Required Courses

Major Courses

PHYS 2601 - Quantum Physics (4.0 cr)
 PHYS 2605 - Quantum Physics Laboratory (3.0 cr)
 PHYS 4051 - Methods of Experimental Physics I (5.0 cr)
 PHYS 4052W - Methods of Experimental Physics II, WI (5.0 cr)

Technical Electives or Specializations

Complete 19 credits of technical electives or one of the optional specializations (sub-plans).

Students are required to complete one of the following course groups.

Specialization

Complete the requirements listed in the any of the following physics subplans: computational physics, biological, engineering, or teaching.

-OR-

Technical Electives

Select at least 19 credits of technical electives in consultation with your adviser.

-OR-

Professional Physics

For students who want the strongest possible grounding in physics, are interested in fundamental physics or astrophysics or applying physics to the workplace, or plan to continue physics education in graduate school.

PHYS 4001 - Analytical Mechanics (4.0 cr)
 PHYS 4002 - Electricity and Magnetism (4.0 cr)
 PHYS 4101 - Quantum Mechanics (4.0 cr)
 PHYS 4201 - Statistical and Thermal Physics (3.0 cr)

Take an additional 19 credits of approved technical electives from the sciences, math, or engineering.

Take 3 or more credit(s) from the following:

MATH 3xxx
 MATH 4xxx
 MATH 5xxx

Take 1 or more course(s) totaling 3 or more credit(s) from the following:

PHYS 3xxx
 PHYS 4xxx
 PHYS 5xxx

Program Sub-plans

A sub-plan is not required for this program.

Biological

For students with an interest in the biological applications of physics.

Required Courses

Physics for Biology

BIOC 3021 - Biochemistry (3.0 cr)
 BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)
 CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
 CHEM 2301 - Organic Chemistry I (3.0 cr)
 PHYS 4001 - Analytical Mechanics (4.0 cr)
 PHYS 4002 - Electricity and Magnetism (4.0 cr)

Complete 14 credits of technical electives with a biology emphasis, chosen in consultation with your adviser.

CHEM 3501 - Physical Chemistry I (3.0 cr)
 or PHYS 4201 - Statistical and Thermal Physics (3.0 cr)
 CHEM 3502 - Physical Chemistry II (3.0 cr)
 or PHYS 4101 - Quantum Mechanics (4.0 cr)

Computational Physics

For students who are interested in the practical application of physics and computational methods, but who want a less specialized education than they would find in a computer science department.

Consult with a physics adviser for selection of at least 19 credits of technical electives.

Required Courses

Select 19 credits of technical electives in consultation with your adviser.

Engineering

For students interested in physics as applied in engineering professions.

Take the two remaining courses you did not use to satisfy the major core requirements from the list of PHYS 4001, 4002, 4101, and 4201.

Required Courses

Physics for Engineering

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
 PHYS 4101 - Quantum Mechanics (4.0 cr)

Complete 25 credits of technical electives in various engineering fields, physical sciences, or math, in consultation with your adviser.

AEM 2021 - Statics and Dynamics (4.0 cr)
 or PHYS 4001 - Analytical Mechanics (4.0 cr)
 or

take the following course pair

AEM 2011 - Statics (3.0 cr)
 AEM 2012 - Dynamics (3.0 cr)
 EE 3601 - Transmission Lines, Fields, and Waves (3.0 cr)
 or PHYS 4002 - Electricity and Magnetism (4.0 cr)
 ME 3321 - Thermodynamics (4.0 cr)
 or ME 3324 - Introduction to Thermal Science (3.0 cr)
 or PHYS 4201 - Statistical and Thermal Physics (3.0 cr)

Teaching

For students with an interest in teaching the physical sciences at the primary or secondary levels.

Required Courses

Chemistry and Upper Division Physics

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)
CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)
or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)

Students are encouraged to complete all four courses.

Take 2 or more course(s) from the following:

PHYS 4001 - Analytical Mechanics (4.0 cr)
PHYS 4002 - Electricity and Magnetism (4.0 cr)
PHYS 4101 - Quantum Mechanics (4.0 cr)
PHYS 4201 - Statistical and Thermal Physics (3.0 cr)

Technical Electives

Complete 22 credits, including 8 or 9 credits chosen in consultation with an adviser. To meet licensure requirements, technical electives should include two courses in engineering, one of which has a substantial design component. Students must also demonstrate knowledge of computer programming in at least one language through coursework or completion of a project.

Take 13 or more credit(s). Other courses may be substituted in consultation with your adviser.

Take 1 or more course(s) from the following:

HSCI 4111 - History of 19th-Century Physics (3.0 cr)
HSCI 4121 - History of 20th-Century Physics (3.0 cr)

Other courses may be substituted in consultation with your adviser.

Take 1 or more course(s) from the following:

AST 2001 - Introduction to Astrophysics (4.0 cr)
AST 4001 - Astrophysics I (4.0 cr)
AST 4002 - Astrophysics II (4.0 cr)
PHYS 5022 - Relativity, Cosmology, and the Universe (4.0 cr)

Other courses may be substituted in consultation with your adviser.

Take 1 or more course(s) from the following:

GEO 2201 - Geodynamics I: The Solid Earth (3.0 cr)
GEO 2303W - Geochemical Principles, WI (3.0 cr)
GEO 3202 - Geodynamics II: The Fluid Earth (3.0 cr)
GEO 3401 - Geochronology and Earth History (3.0 cr)

Other courses may be substituted in consultation with your adviser.

Take 1 or more course(s) from the following:

AEM 4201 - Fluid Mechanics (4.0 cr)
EE 5621 - Physical Optics (3.0 cr)
ME 3321 - Thermodynamics (4.0 cr)
PHYS 4711 - Introduction to Optics (3.0 cr)
PHYS 5701 - Solid-State Physics for Engineers and Scientists (4.0 cr)

Complete an additional 8 or 9 credits (three courses), preferably in engineering and computer science. Consult your adviser for appropriate choices.

Statistics B.S. Stat.

Requirements for this program are current for Fall 2006.

Required credits to graduate with this degree: 120.

Required credits within the major: 38.

Degree: Bachelor of Science in Statistics.

The program gives students an understanding of the theory of statistics, trains them in basic use of the most important types of statistical methods, and prepares them for graduate work or for jobs in such diverse areas as marketing analysis, quality management, and support for scientific research.

The program provides a broad foundation in statistics that can be combined with coursework in other technical disciplines or as a basis for further specialization in statistics.

Admission Requirements

Students must complete 4 courses before admission to the program.

Freshmen and transfer students are usually admitted to pre-major status before admission to this major.

A GPA above 2.00 is preferred for the following:

- 2.50 for students transferring from outside the University.

For information about University of Minnesota admission requirements, visit the Office of Admissions Web site at <http://admissions.tc.umn.edu>.

Required Courses for Admission

Mathematics

MATH 1271 - Calculus I, MATH (4.0 cr)
or MATH 1371 - IT Calculus I, MATH (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)
or MATH 1372 - IT Calculus II (4.0 cr)
MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
or MATH 2373 - IT Linear Algebra and Differential Equations (4.0 cr)
MATH 2263 - Multivariable Calculus (4.0 cr)
or MATH 2374 - IT Multivariable Calculus and Vector Analysis (4.0 cr)

Program Requirements

Required Courses

Major Courses

STAT 3011 - Introduction to Statistical Analysis, MATH (4.0 cr)
or STAT 3021 - Introduction to Probability and Statistics (3.0 cr)
MATH 4242 - Applied Linear Algebra (4.0 cr)
STAT 3022 - Data Analysis (4.0 cr)
STAT 4893W - Senior Paper, WI (1.0 cr)

Take one of the following pairs of courses.

STAT 4101 - Theory of Statistics I (4.0 cr)
STAT 4102 - Theory of Statistics II (4.0 cr)

or

STAT 5101 - Theory of Statistics I (4.0 cr)
STAT 5102 - Theory of Statistics II (4.0 cr)

Electives

Take 10 or more credit(s) from the following:

STAT 5031 - Statistical Methods for Quality Improvement (4.0 cr)
STAT 5041 - Bayesian Decision Making (3.0 cr)
STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
STAT 5302 - Applied Regression Analysis (4.0 cr)
STAT 5303 - Designing Experiments (4.0 cr)
STAT 5401 - Applied Multivariate Methods (3.0 cr)
STAT 5421 - Analysis of Categorical Data (3.0 cr)
STAT 5601 - Nonparametric Methods (3.0 cr)

Computer and Physical Sciences

CSCI 1103 - Introduction to Computer Programming in Java (4.0 cr)

or CSCI 1107 - Introduction to FORTRAN Programming for Scientists and Engineers (3.0 cr)

or CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)

Students must complete 3 science courses with a lab component, chosen from at least 2 of the fields of physics, chemistry, biology.

Take 3 or more course(s) including 2 or more sub-requirement(s).

Take 0 - 1 course(s) from the following:

BIOL 1009 - General Biology, BIOL SCI/L (4.0 cr)

BIOL 1009H - Honors: General Biology, BIOL SCI/L, H (4.0 cr)

Take 0 - 2 course(s) from the following:

CHEM 1021 - Chemical Principles I, ENVT, PHYS SCI/L (4.0 cr)

or CHEM 1031H - Honors Chemistry I, ENVT, PHYS SCI/L, H (4.0 cr)

CHEM 1022 - Chemical Principles II, ENVT, PHYS SCI/L (4.0 cr)

or CHEM 1032H - Honors Chemistry II, ENVT, PHYS SCI/L, H (4.0 cr)

Take 0 - 2 course(s) from the following:

PHYS 1301W - Introductory Physics for Science and Engineering I, PHYS SCI/L, WI (4.0 cr)

or PHYS 1401V - Honors Physics I, PHYS SCI/L, WI, H (4.0 cr)

PHYS 1302W - Introductory Physics for Science and Engineering II, PHYS SCI/L, WI (4.0 cr)

or PHYS 1402V - Honors Physics II, PHYS SCI/L, WI, H (4.0 cr)

Technical Electives

Students complete 10 credits of adviser-approved courses in computer science, biostatistics, industrial engineering, mathematics, or other areas.

This is AHS to CMGT of the Course Description section
of the 2006-2008 Undergraduate Catalog for the
University of Minnesota, Twin Cities campus.

Course Descriptions

The courses in this catalog are current as of April 12, 2006. Check the University Catalogs Web site at www.catalogs.umn.edu for the most current course information. The courses in this catalog are not offered every semester. To find out whether a course is offered during a particular semester, consult the online *Class Schedule* at <http://onestop.umn.edu/registrar/registration/courses.html>.

Course Numbers

- 0xxx** Courses that do not carry credit toward any University degree.
- 1xxx** Courses primarily for undergraduate students in their first year of study.
- 2xxx** Courses primarily for undergraduate students in their second year of study.
- 3xxx** Courses primarily for undergraduate students in their third year of study.
- 4xxx** Courses primarily for undergraduate students in their fourth year of study; graduate students may enroll in such courses for degree credit. 4xxx courses can be counted for a Graduate School degree if the course is taught by a member of the graduate faculty or an individual appointed to Limited Teaching Status (LTS).
- 5xxx** Courses primarily for graduate students; undergraduate students in their third or fourth year may enroll in such courses.

Abbreviations

The following abbreviations are used throughout the course prerequisites of most University catalogs to denote common and recurring items of information.

- PrereqCourse prerequisites.
- crCredit.
- divDivision.
- DUS.....Director of undergraduate studies.
- equiv.....Equivalent.
- fr, soph, jr, srFreshman, sophomore, junior, senior.
- H.....Honors. Courses with an H following the course number satisfy honors requirements.
- V.....Honors and Writing Intensive. Courses with a V following the course number satisfy both honors and liberal education writing intensive requirements.
- W.....Writing Intensive. Courses with a W following the course number satisfy the writing intensive requirement for liberal education.
- A-F, S-N, NGA....Grading options. NGA means “no grade associated.” If no grading option is listed, the course may be taken either A-F or S-N. For more information about grading, see page 29.

Course Designators

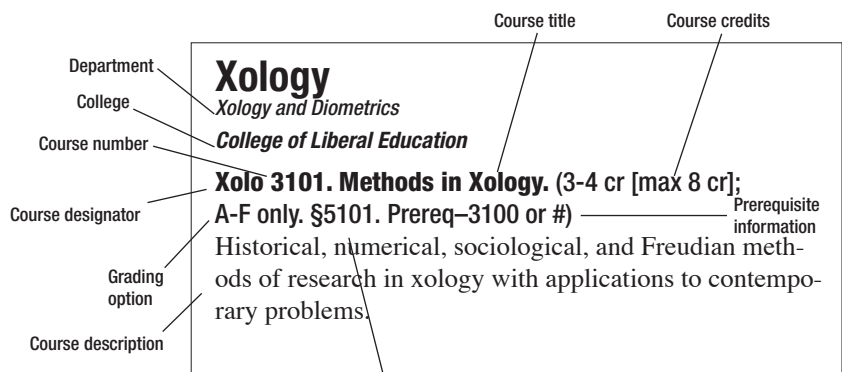

In conjunction with course numbers, departments and programs are identified by a 2-, 3-, or 4-letter designator prefix (e.g., CE for Civil Engineering, Pol for Political Science, WoSt for Women’s Studies). When no designator precedes the number of a course listed as a prerequisite, that prerequisite course is in the same department as the course being described.

Course Symbols

The following symbols are used throughout the course prerequisites of most University catalogs to denote common and recurring items of information.

- §.....Credit will not be granted if credit has been received for the course listed after this symbol.
- ¶.....Concurrent registration is required (or allowed) in the course listed after this symbol.
- #.....Approval of the instructor is required for registration.
- Δ.....Approval of the department offering the course is required for registration.
-Approval of the college offering the course is required for registration.
-In prerequisite listings, comma means “and.”
- 1-4 cr [max 6].....The course can be taken for 1 to 4 credits and may be repeated for up to 6 credits.

Course Listing Sample

Credit will not be granted if credit has been received for the course listed after this symbol.

Academic Health Center Shared (AHS)

AHS 1101. Orientation to the Health Sciences. (1 cr)
Interest/personality assessment, health-related academic majors/professions, professionalism/ethics in health care. Students integrate information about self and career-related information to move towards a major and career choice.

AHS 1102. Orientation to Health Sciences. (1 cr)
Semester-long Web course. Interest/personality assessment, health-related academic majors/professions, professionalism/ethics in health care. Students integrate information about self and career-related information to move towards a major and career choice.

AHS 1601. The Future Physician. (1 cr. Prereq—[ACT 30 or higher or SAT 1340 or higher], #)
A career in medicine. Life/work of physicians, what it takes to be successful. Issues/trends including Institute of Medicine core competencies, medical ethics, concept of health teams, multiculturalism, global issues, disparities in accessing medical care.

AHS 1602. Experiences in Health. (1 cr. Prereq—1601, #)
Students plan for and select a community-based volunteer experience, develop tools/skills to make connections in the community and secure a volunteer opportunity. Four hours per week at program site.

Accounting (ACCT)

Department of Accounting

Curtis L. Carlson School of Management

ACCT 2050. Introduction to Financial Reporting. (4 cr; A-F only. \$APEC 1251. Prereq—Completion of 30 credits)
Introduction to financial accounting for U.S. organizations. Reading financial statements.

ACCT 2050H. Honors: Introduction to Financial Reporting. (4 cr; A-F only)
Introduction to financial accounting for U.S. organizations. Reading financial statements.

ACCT 3001. Introduction to Management Accounting. (3 cr; A-F only. Prereq—2050, at least 30 cr)
Costing techniques, including activity-based costing. Applying costing methods to determine costs of products, services, and production processes. Use of costs in operating/strategic decisions.

ACCT 3199. Internship in Public Accounting. (2 cr; S-N only. Prereq—5125, #)
Full-time work for a public accounting firm plus a written report on the work experience.

ACCT 3201. Intermediate Management Accounting. (2 cr; A-F only. Prereq—3001, ACCT or finance major)
Activity-based costing techniques in specific industries including service firms. Other topics could include costing for Just-in-Time manufacturing, tracking customer profitability, and costing quality.

ACCT 3299. Internship in Management Accounting. (2 cr; S-N only. Prereq—ACCT 3201, #)
Full-time work in general accounting, cost accounting, or internal auditing in an industrial or governmental organization plus a written report analyzing the work experience.

ACCT 5100. Corporate Financial Reporting. (4 cr; A-F only. Prereq—MGMT student, non-accounting major)
Overview of asset/liability valuation and income measurement. Focus on how economic events are reported in the financial statements. Examines accounting theory and the accounting standard-setting process.

ACCT 5101. Intermediate Accounting I. (4 cr; A-F only. Prereq—Grade of at least B- in 2050, [MGMT major or MGMT grad student])
Valuation, measurement, and reporting issues related to selected assets/liabilities of a firm. Theory underlying accounting issues. Applying accounting principles.

ACCT 5102. Intermediate Accounting II. (4 cr; A-F only. Prereq—5101 [MGMT or grad MGMT student])
Basic valuation problems encountered in financial reporting. Focuses on valuation of liabilities. Accounting for leases, pensions, and deferred taxes. Introduces consolidated financial statements.

ACCT 5125. Auditing Principles and Procedures. (4 cr; A-F only. Prereq—[3101 or 5101 or 5100 or 6100], [ACCT major or grad MGMT student])
Concepts of auditing internal control/financial statements in accordance with generally accepted auditing/professional standards established by Public Company Oversight Board (PCAOB) and American Institute of Certified Public Accountants (AICPA).

ACCT 5135. Fundamentals of Federal Income Tax. (4 cr; A-F only. Prereq—[2050 or MBA 6030], [MGMT or grad MGMT student])
U.S. federal system of taxation. Concepts of gross income, deductions, credits. Analysis of structure of Internal Revenue Code, its provisions with respect to specific areas of law. Interrelationships between legislative, judicial, and administrative authority. Methods, tools, and techniques to conduct tax research.

ACCT 5160. Financial Statement Analysis. (2 cr; A-F only. Prereq—[5100/6100 or 3101/5101], [accounting or finance major])
Interpretation/analysis of financial statements. Introduces basic techniques of financial statement analysis and applies them in different settings (e.g., in investment/credit decisions).

ACCT 5180. Consolidations and Advanced Reporting. (2 cr; A-F only. Prereq—[5102, MGMT or grad MGMT student])
Theory underlying the preparation of consolidated financial statements, as well as the mechanical computations needed to prepare the statements themselves.

ACCT 5236. Introduction to Taxation of Business. (2 cr; A-F only. Prereq—5135, ACCT major)
Introduction to the income tax laws governing the taxation of corporations, partnerships, limited liability companies, limited liability partnerships, and S corporations. Students will also increase their knowledge and skills related to tax research by writing research memorandums.

ACCT 5271. Accounting Information Systems. (2 cr. Prereq—3101/5101 or 5100/6100)
Applications of electronic data processing systems in accounting, including modeling, financial planning, auditing, and data security. Analysis/design of accounting information systems.

ACCT 5281. Special Topics in Financial Reporting. (2 cr; A-F only. Prereq—5102, [MGMT or grad MGMT student])
Covers areas of financial reporting frequently covered on the CPA exam, including partnerships, foreign operations, and accounting for government and nonprofit organizations.

ACCT 5310. International Accounting. (2 cr; A-F only. Prereq—2050, MGMT student)
Review of macroeconomic concepts of international economics, including trade, international markets for capital, and the role of accounting. Survey of different accounting policies and approaches among nations. Reading and understanding financial statements produced in countries other than the United States.

ACCT 5320. Current Topics in Accounting. (2 cr; A-F only)
Topics vary.

Adult Education (ADED)

Department of Work and Human Resource Education

College of Education and Human Development

ADED 3001. Adult Education Overview. (1 cr; A-F only)
Theory/practice of adult learning/development.

ADED 3101. Introduction to Strategies for Teaching Adults. (3 cr; A-F only)
Theories of adult learning, learning/teaching styles, methods/perspectives of teaching, applications of teaching in various settings.

ADED 5101. Strategies for Teaching Adults. (3 cr; A-F only)
Psychological theories of adult learning; learning styles and personality types; teaching styles; group and team learning; moderating and study circles; teaching technologies and distance learning; gender, race, and cultural communication. Applications of strategies.

ADED 5102. Perspectives of Adult Learning and Development. (3 cr)
Emphasis on major adult development theorists, theories, and current applications. Transformative learning, self-directed learning, experiential learning, and cooperative learning provide theoretical framework for exploring physiological, psychological, sociological, and cultural aspects of adult development through the life span.

ADED 5103. Designing the Adult Education Program. (3 cr; A-F only)
Designing and implementing educational programs for adults. Application of concepts, theories, and models in different adult learning situations.

ADED 5196. Field Experience in Adult Education. (3-6 cr [max 6 cr]; S-N only)
Supervised fieldwork and practice. Presentations and evaluations of adult education practices.

ADED 5201. Introduction to Adult Literacy. (3 cr)
Definitions of literacy: workplace, community and family. Issues: poverty, welfare, ethnicity, cultural diversity, social class, language and learning, immigrants. Review of literacy programs, funding, and professionalization. Reaching/recruiting undereducated adults. Role of family, schools, community, and state/local government. New social action approaches required for licensure.

ADED 5202. Assessment of Adult Literacy. (3 cr. Prereq—\$: ADED 5224, 5225, 5226)
Assessment of adult literacy problems as they affect work, family, and community. Setting educational goals. Formal versus informal assessment. Case studies. Educational planning.

ADED 5203. Methods of Teaching Adult Literacy. (3 cr)
Approaches to teaching reading, writing, and mathematics to adults. Technology as a teaching tool. Teaching students with disabilities. Cultural/gender differences. English as second language. Evaluation of commercial materials/software.

ADED 5211. Introduction to the Undereducated Adult. (1 cr; A-F only)
Definitions of literacy in workplace, community, and family. Issues: poverty/welfare, ethnicity, cultural diversity, social class, language/learning, immigrants.

ADED 5212. Introduction to Adult Literacy in the Workplace. (1 cr; A-F only. Prereq—5211)
Review workplace literacy programs, funding, program planning, and needs assessment. Reaching/recruiting workers. Role of employers and the unions. Writing for low literacy employees.

ADED 5213. Introduction to Adult Literacy in the Community. (1 cr; A-F only. Prereq–5211)

Reviews role of the community programs in the United States in literacy building, the family in developing literacy skills, correctional education in reintegrating offenders back into community. Integrating people with disabilities through community literacy programs. Literacy/development in developing countries. Reaching/recruiting indigenous, migrant, and immigrant groups. Social action approaches to literacy education.

ADED 5224. Formal Assessment of Adult Literacy. (1 cr; A-F only. Prereq–5211)

Assessment of adult English/literacy skills needed for work, family, community, and continuing education. Formal testing policy, techniques, standardized tests. Underlying assumptions about testing, cultural bias, and interpretation of formal tests. Test preparation programs.

ADED 5225. Informal Assessment of Adult Literacy. (1 cr; A-F only. Prereq–5211)

Informal assessment of adult English/literacy skills for work, family, community, and further education. Informal testing techniques, setting educational goals, formal versus informal assessment.

ADED 5226. Advanced Assessment of Adult Literacy. (1 cr; A-F only. Prereq–5211, 5224, 5225)

Applications and case studies. Educational planning for work, family, and community.

ADED 5233. Methods of Teaching Beginning Adult Literacy. (1 cr; A-F only. Prereq–5211)

Learning English and literacy as an adult: initial approaches to teaching reading, writing, and communications skills. Theories of learning and curriculum design. Technology as a teaching tool: teaching students with disabilities or with cultural/gender differences.

ADED 5234. Methods of Teaching Intermediate Adult Literacy. (1 cr; A-F only. Prereq–5211, 5233)

Learning English/literacy as an adult. Intermediate approaches to teaching reading, writing, and communications skills. Emphasizes communication/comprehension in oral/written English. English reading and oral communication skills for workplace. Evaluating commercial materials/software.

ADED 5235. Methods of Teaching Advanced Adult Literacy. (1 cr; A-F only. Prereq–5211, 5234)

Advanced approaches to teaching reading, writing, and communication skills. Preparing students for college and continuing education. Reading/study skills. English in workplace and on Internet. Problem solving, analytical thinking. Technology as teaching tool. Evaluating commercial material/software.

ADED 5302. Continuing Education for Professionals. (3 cr)

Analysis of philosophies, issues, policies, trends, professional needs and statutory requirements in continuing professional education programs. Role of the program director and organization.

ADED 5303. Working with Volunteers in Community Settings. (3 cr)

Uses collaborative, experiential methods to address fundamental issues and practices in volunteer development. Explore personal philosophies, staffing, and key issues and trends in the administration of volunteer programs.

ADED 5700. Special Topics in Adult Education. (1-8 cr [max 12 cr])

Exploration of issues, methods, and knowledge in areas of adult education. Content varies.

Aerospace Engineering and Mechanics (AEM)

Department of Aerospace Engineering and Mechanics

Institute of Technology

AEM 2011. Statics. (3 cr; A-F only. Prereq–PHYS 1301W, [Math 2374 or equiv], IT)

Force/moment vectors, resultants. Principles of statics and free-body diagrams. Applications to simple trusses, frames, and machines. Distributed loads. Internal forces in beams. Properties of areas, second moments. Laws of friction.

AEM 2012. Dynamics. (3 cr; A-F only. Prereq–2011, [Math 2373 or equiv], IT student)

Kinematics/kinetics of particles. Newton's laws. Energy/momentum methods. Systems of particles. Kinematics/kinetics of planar motions of rigid bodies. Plane motion of rigid bodies. Mechanical vibrations.

AEM 2021. Statics and Dynamics. (4 cr; A-F only. Prereq–PHYS 1301W, [Math 2374 or equiv], IT)

Force/moment vectors, resultants. Principles of statics and free-body diagrams. Applications to simple trusses, frames, and machines. Properties of areas, second moments. Internal forces in beams. Laws of friction. Principles of particle dynamics. Mechanical systems and rigid-body dynamics. Kinematics/dynamics of plane systems. Energy/momentum of 2-D bodies/systems.

AEM 2301. Mechanics of Flight. (3 cr; A-F only. Prereq–PHYS 1301W, [Math 2373 or equiv], IT)

Standard atmospheric properties, basic aerodynamics, generation of lift/drag. Airfoils and finite wings. Elements of aircraft performance, atmospheric flight mechanics, wind tunnel experiments. Experimental determination of lift/drag. Introduction to MatLab.

AEM 3031. Deformable Body Mechanics. (3 cr; A-F only. Prereq–[2011 or 2021 or [BMEN 3001, BMEN major]], [Math 2374 or equiv], [Math 2373 or equiv], IT)

Uniaxial loading/deformation. Stress/strain at a point, Mohr's circle. Internal forces in beams. Material behavior, linear elasticity. Torsion of circular shafts. Bending of beams of symmetrical section. Column buckling. Statically indeterminate structures.

AEM 4201. Fluid Mechanics. (4 cr; A-F only. Prereq–2012, [Math 2373 or equiv], [Math 2374 or equiv], [IT upper div or grad student])

First course in fluid mechanics. Stress/strain rate descriptions, fluid statics. Use of differential and finite control volume analysis with continuity. Momentum/energy equations, Bernoulli/Euler equations, vorticity, potential flow, incompressible viscous flow using Navier-Stokes equations, dimensional analysis, pipe flow, boundary layers, separation, introduction to turbulence.

AEM 4202. Aerodynamics. (4 cr; A-F only. Prereq–Upper div IT or grad, 4201)

Inviscid aerodynamics. Subsonic, transonic, and supersonic airfoil theory; wing theory. Introduction to compressible flow, normal and oblique shock waves, Prandtl-Meyer expansions. Linearized compressible flow. Wing-body combinations. Computational aerodynamics methods.

AEM 4203. Aerospace Propulsion. (4 cr; A-F only. Prereq–4202, [IT upper div or grad student])

Basic one-dimensional flows: isentropic, area change, heat addition. Overall performance characteristics of propellers, ramjets, turbojets, turbofans, rockets. Performance analysis of inlets, exhaust nozzles, compressors, burners, and turbines. Rocket flight performance, single-/multi-stage chemical rockets, liquid/solid propellants. Design problems. Design project with technical report.

AEM 4295. Problems in Fluid Mechanics. (1-3 cr [max 6 cr]. Prereq–A)

Topics of current interest. Individual projects with consent of faculty sponsor.

AEM 4301. Spaceflight Dynamics. (3 cr; A-F only.

Prereq–[2012 or equiv], [Math 2373 or equiv], [IT upper div or grad student])

Two-body problem, Earth-satellite operations, rocket performance, reentry dynamics, space environments, restricted three-body problem, interplanetary trajectories, numerical simulations, elementary spacecraft attitude control. Design project.

AEM 4303. Flight Dynamics and Control. (3 cr; A-F only. Prereq–IT upper div or grad, 2301, or #)

Reference frames, kinematics, equations of motion for a rigid body. Forces and moments, trim, linearization, dynamic response characteristics for aircraft and spacecraft. Aircraft stability derivatives, static longitudinal and lateral stability. Handling qualities. Phugoid, short period, spiral, roll subsidence, dutch roll modes, approximations, transfer functions. Use of MatLab for dynamic analysis. Design project.

AEM 4311. Automatic Control Systems. (4 cr. Prereq–IT upper div or grad, 4303 or equiv)

Analysis and synthesis of automatic control systems. Transfer functions. Root locus, Nyquist and Bode techniques. Introduction to state space formulation. Applications, design project, lab.

AEM 4331. Aerospace Vehicle Design I: Aircraft. (3 cr; A-F only. Prereq–[2301, AEM sr] or #)

Students teams/disciplines design atmospheric flight vehicle with realistic constraints and engineering standards: Design process, project environment, mission requirements, trade studies, vehicle sizing, performance, stability/control, propulsion, trajectory analysis, CAD/vehicle integration, systems/equipment, operating envelopes, baseline specification, certification. Professional ethics/responsibilities. Students keep design log or notebook, present a Conceptual Design Review (oral presentation) with written report.

AEM 4332W. Aerospace Vehicle Design II: Space Vehicles, Missions, and Systems. (4 cr; A-F only. Prereq–[4331 or #], [ENGC 1011 or equiv])

Student teams design space vehicle, system, or mission with realistic design constraints, detailed design proposals, schedules/milestones, CAD/CAM, space environments, atmosphere entry, attitude determination/control, configuration/structure, thermal environment, power propulsion, and telecommunications. Students keep design log/notebook, prepare status reports, written report, and oral presentation.

AEM 4333. Aerospace Design III-Special Projects. (3 cr [max 6 cr]. Prereq–4331 or #)

Student groups design, build, and test major aerospace projects. Projects include designs from 4331/4332 or projects such as microgravity experiments. Students keep a design log/notebook, prepare status reports, and give a final oral presentation.

AEM 4371. Helicopter Aerodynamics. (3 cr. Prereq–2301, 4202, [IT upper div or grad student])

Review of basic aerodynamics, unique features of helicopters, momentum theory in axial flight and in rotor flow states, momentum theory in non-axial flight, blade-element theory, vortex theory, helicopter equations of motion. Design project.

AEM 4495. Problems in Dynamics and Control. (1-3 cr [max 6 cr]. Prereq–A)

Topics of Current interest. Individual projects with consent of faculty sponsor.

AEM 4501. Aerospace Structures. (3 cr; A-F only. Prereq—IT upper div or grad, 3031 or equiv)

Advanced strength of materials analysis of elastic structures with aerospace applications; failure modes and criteria, buckling, matrix methods for analysis, plane truss design; energy and Castigliano methods for statically determinate and indeterminate structures; torsion and bending of asymmetrical thin-walled sections. Design project.

AEM 4502. Computational Structural Analysis. (3 cr. Prereq—[Grade of at least C in 4501, [IT upper div or grad student]] or #)

Application of finite element methods to problems in structural analysis. Emphasizes properly posing problems and interpreting calculation results. Use of commercial FEA packages. Introduction to theory of finite elements.

AEM 4511. Mechanics of Composite Materials. (3 cr. Prereq—3031, [IT upper div or grad student])

Analysis, design, and applications of laminated and chopped fiber reinforced composites. Micro-/macro-mechanical analysis of elastic constants, failure, and environmental degradation. Design project.

AEM 4581. Mechanics of Solids. (3 cr. Prereq—3031, [Math 2373 or equiv], [Math 2374 or equiv], [IT upper div or grad student])

Continuum mechanics in one dimension: kinematics; mass, momentum/energy, constitutive theory. Wave propagation, heat conduction. Strings. Euler-Bernoulli theory. 3-D deformations/stress. Topics from fracture mechanics, structural stability, vibrations, thin films, layered media, smart materials, phase transformations, 3-D elastic wave propagation. Elasticity, viscoelasticity, plasticity.

AEM 4595. Problems in Mechanics and Materials. (1-3 cr [max 6 cr]. Prereq—A)

Topics of current interest. Individual projects with consent of faculty sponsor.

AEM 4601. Instrumentation Laboratory. (3 cr; A-F only. Prereq—CSCI 1113, EE 3005, EE 3006, [upper div IT or grad student])

Introduction to lab instrumentation. Computerized data acquisition. Statistical analysis of data. Time series data, spectral analysis. Transducers for measurement of solid, fluid, and dynamical quantities. Design of experiments.

AEM 4602W. Aeromechanics Laboratory. (4 cr; A-F only. Prereq—IT upper div or grad, 4201, 4501, 4601, ENGC 1011 or equiv)

Experimental methods/design in fluid/solid mechanics. Wind tunnel/water channel experiments with flow visualization, pressure, velocity, force measurements. Measurement of stresses/strains/displacements in solids/ structures: stress concentrations, materials behavior, structural dynamics. Computerized data acquisition/analysis, error analysis, data reduction. Experiment design. Written/oral reports. Lab ethics. Writing intensive.

AEM 4796. Professional Experience. (1-3 cr [max 3 cr]; A-F only. Prereq—IT upper div, AEM major, Δ)

Work experience with substantive engineering component. Written report. Number of credits awarded based on extent of experience.

AEM 5245. Hypersonic Aerodynamics. (3 cr; A-F only. Prereq—4202, [grad student or upper div IT])

Importance/properties of hypersonic flow. Hypersonic shock and expansion-wave relations. Local surface inclination methods. Approximate/exact methods for hypersonic inviscid flow fields. Viscous flow: boundary layers, aerodynamic heating, hypersonic viscous interactions, computational methods. Hypersonic propulsion and vehicle design.

AEM 5251. Computational Fluid Mechanics. (3 cr; A-F only. Prereq—[4201 or equiv], [CSCI 1113 or equiv], [IT upper div or grad student])

Introductory concepts in finite difference and finite volume methods as applied to various ordinary/partial differential model equations in fluid mechanics. Fundamentals of spatial discretization and numerical integration. Numerical linear algebra. Introduction to engineering and scientific computing environment. Advanced topics may include finite element methods, spectral methods, grid generation, turbulence modeling.

AEM 5401. Intermediate Dynamics. (3 cr. Prereq—IT upper div or grad, 2012, Math 2243)

Three-dimensional Newtonian mechanics, kinematics of rigid bodies, dynamics of rigid bodies, generalized coordinates, holonomic constraints, Lagrange equations, applications.

AEM 5431. Trajectory Optimization. (3 cr; A-F only. Prereq—4311 or equiv or #)

Parameter optimization problems. Topics in calculus of variations; necessary conditions of nonlinear optimal control problems; classification of trajectory optimization algorithms; steady-state aircraft flight; minimum-time climb aircraft trajectory; aero-assisted orbital transfer trajectories; optimal space trajectories.

AEM 5441. Structural Dynamics. (3 cr; A-F only. Prereq—2012, 3031, [grad student or IT upper div])

Frequency, time domain analysis of multi-degree of freedom mechanical systems. Natural frequencies, normal modes of vibration. Free/forced vibrations of strings, rods, and shafts beams. Introduction to finite elements in structural dynamics.

AEM 5451. Optimal Estimation. (3 cr; A-F only. Prereq—[[Math 2243, STAT 3021] or equiv, 4311] or #)

Basic probability theory. Batch/recursive least squares estimation. Filtering of linear/non-linear systems using Kalman and extended Kalman filters. Applications to sensor fusion, fault detection, and system identification.

AEM 5495. Topics in Aerospace Systems. (1-4 cr [max 4 cr]; A-F only. Prereq—A)

Topics of current interest. Individual projects with faculty sponsor.

AEM 5501. Continuum Mechanics. (3 cr. Prereq—IT upper div or grad, 3031, Math 2243 or equiv or #)

Concepts common to all continuous media; elements of tensor analysis; motion, deformation, vorticity; material derivatives; mass, continuity equation; balance of linear, angular momentum; geometric characterization of stress; constitutive equations.

AEM 5503. Theory of Elasticity. (3 cr; A-F only. Prereq—4501 or equiv, Math 2263 or equiv or #)

Introduction to the theory of elasticity, with emphasis on linear elasticity. Linear and nonlinear strain measures, boundary-value problem for linear elasticity, plane problems in linear elasticity, three dimensional problems in linear elasticity. Topics from nonlinear elasticity, micromechanics, contact problems, fracture mechanics.

AEM 5651. Aeroelasticity. (3 cr; A-F only. Prereq—4202, 4301, [grad student or IT upper div])

Static aeroelastic phenomena, torsional divergence of a lifting surface, control surface reversal. Aeroelastic flutter, unsteady aerodynamics. Problems of gust response, buffeting. Design project.

Aerospace Studies (AIR)

Department of Aerospace Studies (Airforce ROTC)

Office of the Senior Vice President for Academic Affairs and Provost

AIR 1000. Leadership Laboratory. (1 cr; S-N only)

Air Force customs and courtesies, drill and ceremonies, military commands, the environment of the Air Force officer, and learning about areas of opportunity available to commissioned officers. Interviews, guidance, and information to increase the understanding, motivation, and performance of other cadets.

AIR 1104. Introduction to the Air Force Today I. (1 cr; A-F only)

Mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and introduction to communication skills.

AIR 1105. Introduction to the Air Force Today II. (1 cr; A-F only)

Structure and missions of Air Force organizations. Communicative skills. How cadets are selected for the Professional Officer Course, categorization into specific career areas (pilot and navigator) occurs in the AFROTC junior year, and selection for specific career fields is made in a cadet's senior year.

AIR 1204. History of Airpower and Communication Skills. (1 cr; A-F only)

Air Force heritage and leaders, Quality Air Force, and introduction to ethics and values, introduction to leadership, group leadership problems, and continuing application of communication skills.

AIR 1205. Quality Air Force, Group Leadership Problems, and Presentation Techniques. (1 cr; A-F only)

Leadership and followership. Officership, ethics, and values; Air Force's core values. Air Force heritage and leaders, Quality Air Force, group leadership problems, and continuing application of communicative skills.

AIR 3301. Air Force Leadership, Quality, and Communication. (3 cr; A-F only)

Study of leadership, quality management fundamentals, and communication skills required of an Air Force junior officer. Case studies.

AIR 3302. Air Force Officership, Quality, and Communication. (3 cr; A-F only. Prereq—3301 recommended)

Focus on completing Quality Air Force training, learning the Officer Professional Development system, exploring leadership styles, ethics, core values, character development, and standards of conduct. Improve written and oral communication skills. Case studies.

AIR 3401. National Security Policy. (3 cr; A-F only)

National security process, regional studies, advanced leadership ethics, Air Force doctrine, and military justice. Military as a profession, officership, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Focus on refining communication skills.

AIR 3402. Preparation for Active Duty. (3 cr; A-F only)

National security process, regional studies, advanced leadership ethics, and Air Force doctrine. Military law, current issues affecting military professionalism, and preparation for active duty as a second lieutenant in the U.S. Air Force.

Afro-American Studies (AFRO)

Department of African American and African Studies

College of Liberal Arts

AFRO 1009. History of Women in Africa: 1500 to the Present. (3 cr)

Histories of women on African frontiers. Women in relations with their families, with other African/non-African people. Women of borders of Sahil-Savanna, Savanna-Forest, within country of Morocco, and of Swahili Coast and Atlantic Coast frontiers.

AFRO 1011. Introduction to African American Studies. (4 cr)

The study of peoples of African descent including the evolution of African American culture, comparative race relations, feminism and social policy change.

AFRO 1021. Introduction to Africa. (4 cr)

Diverse themes and disciplines in African Studies from prehistory to post-colonial period. Introduction to methodologies of inquiry.

AFRO 1131. Contemporary Issues in Africa. (3 cr)

Africa from its colonial history to present. Emphasizes growth of African democracies. AIDS epidemic, ethnic/civil conflicts, debt crisis. Strategies of African governments and non-governmental organizations to combat crises. Rise of middle class in sub-Saharan Africa. Postcolonial legacies, population as political/social issue, rural to urban migration.

AFRO 1221. Beginning Swahili, Semester I. (5 cr)

Comprehension, speaking, reading, writing.

AFRO 1222. Beginning Swahili II. (5 cr. Prereq=1221 or equiv)

Continuation of skill development from 1221.

AFRO 1902. Freshman Seminar. (3 cr. Prereq=Fr)

Topics specified in *Class Schedule*.

AFRO 1904. Freshman Seminar. (3 cr; A-F only. Prereq=Fr or less than 30 cr)

Topics specific in *Class Schedule*.

AFRO 1909W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq=Fr with no more than 30 cr)

Topics specified in *Class Schedule*.

AFRO 3001. West African History: Early Times to 1800. (3 cr)

West Africa from late prehistoric times to establishment/histories of states. Relations with North African, Mediterranean, Asian, and American worlds. Examines non-centralized patriarchal authority.

AFRO 3002. West African History: 1800 to Present. (3 cr)

West African history from late-18th century to present. Themes include study of continuities with the past and profound changes including new 19th century state formation, European colonialism, and post-colonial issues.

AFRO 3006. Impact of African Migrations in the Atlantic World. (3 cr; A-F only)

People of African descent through history. Archeology, geography, literature. Migrations/activities in the Atlantic world. African history in the New World. Transfer of African rice growing technology and other skills. Development of African American society in the United States.

AFRO 3061. The Black Family. (3 cr)

A sociological view of African American family life in the United States.

AFRO 3072. Racism: Social and Psychological Consequences for Black Americans. (3 cr)

Racism and its effects on African Americans; definitions, determinants, and dynamics. Examined in an experiential context to reflect individual and institutional racism.

AFRO 3108. Black Music: A History of Jazz. (3 cr)

The development of jazz in America and in the world, with special emphasis given to the roots or jazz in the African American experience.

AFRO 3110. Study of an African Language. (4 cr [max 8 cr]. Prereq=Enrolled in Minnesota Studies in International Development in-country language course in [Swahili or Wolof or Twi])

Introduction to a selected African language. Emphasizes oral communication skills and cultural context.

AFRO 3112. In the Heart of the Beat: the Poetry of Rap. (3 cr; A-F only)

Contemporary African American poetry as expressed by popular culture contributors. Students analyze/evaluate poems used in rap, in context of African American literature, American culture, and aesthetics.

AFRO 3120. Social and Intellectual Movements in the African Diaspora. (3 cr; A-F only. \$AFRO 5120)

Political, cultural, and historical linkages between Africans, African-Americans, and African-Caribbean. Development of black socio-political movements and radical intellectual trends in late 19th/20th centuries within African Diaspora. African independent struggles against colonialism. Black resistance in Suriname, Guyana, and the Caribbean against colonialism/racism. Protest organizations, intellectual discourses, and radical movements in the United States and Europe.

AFRO 3131. Contemporary Issues in Africa: Challenges of Peace in 21st Century Africa. (3 cr)

Why peace has been elusive throughout history of Africa, from period of slave raids through colonialism and until today. Intractable conflicts in Great Lakes Region, Horn of Africa, South Africa, Nigeria, Liberia/Sierra Leone, Mauritania, Sudan. Why no peaceful resolution despite multiple mediation efforts. Case studies.

AFRO 3141. Africa. (3 cr. \$GEOG 3 141)

Regional differentiation of human groups and environments; cultural contact and problems of underdeveloped countries south of the Sahara.

AFRO 3204. History of South Africa to 1910. (3 cr. \$HIST 3434)

Introductory survey of the history of South Africa from early humans to the arrival of the first Dutch settlers at the Cape of Good Hope in 1652 to the formation of the Union of South Africa in 1910.

AFRO 3205. History of South Africa from 1910. (3 cr. \$HIST 3435)

The history of South Africa from the Union to the present. Focus on such issues as African and Afrikaner nationalism, structures of apartheid, forced population removals, divestment and sanctions, and the post-apartheid era.

AFRO 3225. Third Semester Swahili. (4 cr. Prereq=1 yr Swahili or equiv)

Readings of contemporary Swahili texts. Review of grammar and complex verb forms, building vocabulary and communication skills.

AFRO 3226. Fourth Semester Swahili. (4 cr. Prereq=3225 or equiv)

Advanced Swahili readings, speaking, and writing practice.

AFRO 3251W. Sociological Perspectives on Race, Class, and Gender. (3 cr; A-F only. \$SOC 3251W)

Race, class, and gender as aspects of social identity and as features of social organization. Experiences of women of color in the United States. Family life, work, violence, sexuality/reproduction, possibilities for social change.

AFRO 3301. The Music of Black Americans. (3 cr)

Musical contributions of African American artists and innovators from 1619 to the present. Musical genres explored include spirituals, blues, ragtime, gospel, art music, and jazz.

AFRO 3334. Black Women: Interdisciplinary Perspectives. (4 cr)

Interdisciplinary study of the experience of African American women, including economic, political, and social factors, psycho-sexual development, and family roles.

AFRO 3405. The African American Child. (3 cr. \$AFRO 5405)

Research carried out by African American psychologists and behavioral/social scientists, and by experts on African American child/youth development.

AFRO 3426. African Americans, Social Policy, and the Welfare State. (3 cr)

Period between New Deal (1930s) and present. History/impact of federal policy (presidential, congressional, judicial) and race on African Americans. Politics of allocation of insurance versus relief in Social Security Act of 1935. Race and expansion of social benefits after World War II. School desegregation. Kennedy's civil rights policy, LBJ's War on Poverty. Affirmative Action. Warren court. Busing. Conservative retreat from welfare state under Ronald Reagan and George Bush.

AFRO 3429. Slavery in Africa and in the Americas, 1400 to 1880. (3 cr; A-F only. \$AFRO 5429)

History of slavery in Africa and the New World. Indigenous institutions of unfree labor in West Africa. Origins of European slave trade in West Africa and South Africa. Development of plantation societies in South America, the Caribbean, and the United States. Comparative approach to understanding New World slavery and slavery on the African subcontinent. Focuses on religion, creolization, and antislavery resistance.

AFRO 3431. Early Africa and Its Global Connections. (4 cr. \$HIST 3431)

Socioeconomic, political, and cultural development in precolonial Africa, from ancient Egypt through era of trans-Atlantic slave trade.

AFRO 3432. Modern Africa in a Changing World. (4 cr. \$HIST 3432)

Socioeconomic, political, and cultural development in Africa, from abolition of trans-Atlantic slave trade through postcolonial era.

AFRO 3436. Historical Background to Contemporary African Conflicts: Case Studies. (3 cr)

Historical contexts in which specific contemporary political conflicts developed. Slave trade, colonial conquest, indirect rule, forced labor, discretionary justice. Patterns of human rights violations and of socio-political conflict. Cases studies might include Somalia, Democratic Republic of Congo, and Rwanda.

AFRO 3437. History of East Africa. (3 cr; A-F only. \$AFRO 5437, HIST 3437, HIST 5437)

Major themes in history of East Africa, from era of early human cultural development to present. Methods that historians use to reconstruct history. Varying interpretations/constructions of history over time.

AFRO 3439. Popular Narratives of the African Past. (3 cr)

Diverse ways that ordinary Africans have interpreted/portrayed particular events in African history. Popular depictions of African past, their relationships with academic histories.

AFRO 3543. Psychology and the Black American Experience. (3 cr)

Historical and contemporary perspectives of the relationship between the area of psychology and African Africans in research and practice.

AFRO 3578. Arts of Africa. (3 cr. \$ARTH 3578)

Survey of the diverse arts of Africa, from ancient times to present. Visual arts of several civilizations. Relation of visual arts to larger cultural issues (religion, cosmology, gender, identity, political power).

AFRO 3585. African American Art. (3 cr; A-F only. SARTH 3585)

Four hundred year history of African American art. How/why African Americans created artwork at specific times, in specific places. Arts of African Americans within their own communities, National arts movements, and American life during historical junctures.

AFRO 3591W. Introduction to African American Literature. (4 cr. §ENGL 3591W)

African American autobiography, fiction, essay, poetry, drama, and folklore from late-18th century to present.

AFRO 3592W. Introduction to Black Women Writers in the United States. (3 cr)

The literature of African American women writers explored in novels, short stories, essays, poetry, autobiographies, and drama from the 18th to the late-20th century.

AFRO 3594W. Introduction to Contemporary Black Fiction. (3 cr; A-F only)

Major contemporary Black fiction writers, such as Gayle Jones, Ernest Gaines, Charles Johnson, Toni Morrison, Gloria Naylor, and John Edgar Wideman, among others, whose works span the period from 1970s to 1990s.

AFRO 3597W. Introduction to African American Literature and Culture I. (4 cr)

African American oral tradition, slave narrative, autobiography, poetry, essay, fiction, oratory, and drama, from colonial era through Harlem Renaissance.

AFRO 3598. Arts of the African Diaspora. (3 cr)
Survey of African cultural heritage in art/architecture of African Diaspora in USA, Latin America, and Caribbean. Focuses on traditions retained. Addition/reformation of identities through artistic, architectural, religious syncretism.

AFRO 3601. Introduction to African Literature. (3 cr)

Oral and written literature of the 19th and 20th centuries. Emphasis on literature written in English and French. All readings in English.

AFRO 3625. Black Women Writers in the Diaspora. (3 cr)

Works of black women writers from Europe, Africa, South America, and the Caribbean. Novels, drama, films, and essays.

AFRO 3626. Literature of African American Men: Sex, Family, and Relationships. (3 cr; A-F only)

African American male fiction writers' approach to subject of family and relationships. Social, economic, and psychological consequences of racism/oppression, and effect on African American men writing about themselves within context of family/relationships. Manhood/masculinity as interpreted/articulated in fiction.

AFRO 3628. Literature of Rebellion: the Amistad and other Revolts. (3 cr; A-F only)

Amistad affair and other slave revolts in fictional/non-fictional texts. Nature of race/oppression. Historical representation of these specific incidents as settled in American consciousness. Responsibilities/challenges presented to authors in terms of accuracy, commercial viability, and literary quality. Introduction to issues concerning African American slavery.

AFRO 3634. Blues & Rhythm and Blues. (3 cr)

Black American culture as expressed by blues and by rhythm and blues. Evolution of blues from work songs and field hollars of slavery/emancipation through postwar blues sounds of Louis Jordan, through expressions of pre-rock-n-roll rhythm and blues, and to more current expressions of performers like Brian McKnight.

AFRO 3654. African Cinema. (4 cr)

Films by African filmmakers from West, Central, and Southern Africa. Aesthetic, theoretical, and sociocultural issues will be explored through class screenings and critical readings.

AFRO 3741. People of Color and the Mass Media. (3 cr; A-F only)

Past and present depictions of minority individuals and groups in movies, literature, radio/TV, etc., as seen against anthropological, psychological, and sociological knowledge and experience. Emphasis on personal and political effects of media depictions.

AFRO 3756. Social and Cultural History of Blacks in Sports. (3 cr. §AFRO 5756)

Social/cultural contexts surrounding eras of athletes such as Jack Johnson, Jackie Robinson, Joe Louis, Jesse Owens, Althea Gibson, Wilma Rudolph, Muhammad Ali, Michael Jordan, and Tiger Woods. Impact of these athletes on national/international events. Periods when it was not uncommon for black entertainers/athletes to become involved in politics and community activism.

AFRO 3864. African American History: 1619 to 1865. (4 cr. §HIST 3864)

Importance of dynamics of class, gender, region, and political ideology. Changing nature of race/racism.

AFRO 3865. African American History: 1865 to the Present. (4 cr. §HIST 3865)

Internal migrations, industrialization/unionization, the Great Depression, world wars, large scale movements for social/political change.

AFRO 3866. The Civil Rights and Black Power Movement, 1954-1984. (3 cr. §AFRO 5866)

Modern black civil rights struggle in the U.S., i.e., the second reconstruction. Failure of reconstruction, abdication of black civil rights in 19th century. Assault on white supremacy via courts, state, and grass roots southern movement in 1950s and 1960s. Black struggle in north and west. New emphasis on Black Power, by new organizations. Ascendancy of Ronald Reagan, conservative assault on the movement.

AFRO 3868. Race, War, and Race Wars in American History. (3 cr)

Role that race has played in American war history. Impact that wars have had on race and race relations in the U.S. and the world.

AFRO 3910. Topics in African American and African Studies. (1-3 cr [max 9 cr])

Topics specified in *Class Schedule*.

AFRO 3993. Directed Study. (1-3 cr [max 5 cr]. Prereq-#, Δ, □)

Guided individual research and study.

AFRO 4001. Seminar: History of Women in South Africa. (3 cr. §HIST 3438)

The changing role and status of women in South Africa from precolonial era to the present, and relationships to political, social, and economic development.

AFRO 4013. Cities in Africa: African, Islamic, European Traditions. (3 cr)

History of African cities, their common and unique features. Case study of Swahili cities. Roots and issues of 20th century urban growth.

AFRO 4221. Beginning Swahili . (4 cr)

Comprehension, speaking, reading, writing.

AFRO 4231. The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States. (3 cr. §AAS 4231, AMIN 4231, CHIC 4231)

Examination of structural or institutional conditions through which people of color have been marginalized in public policy. Critical evaluation of social theory in addressing the problem of contemporary communities of color in the United States.

AFRO 4301. The African Novel. (3 cr)

African novel and its historical, thematic, aesthetic, and ideological complexity. Origin of African novel, its purported status as an experiment in form, mimesis/realism. Role of the African writer. Writers such as Ngugi wa Thiong'o, Mongo Beti, Ahmadou Kourouma, Ousmane Sembene, Flora Nwapa, Aminata Sow Fall, Mariama Ba, Ama Ata Aidoo, Ken Bugul.

AFRO 4302H. Honors: Women's Personal Narratives. (3 cr)

Focus is on literary autobiography, journals, travel narratives, essays, slave narratives, testimonials, and ethnographies to consider the content and the methodological, theoretical, and aesthetic issues of the construction and production of women's experience.

AFRO 4352. Black Families in the Diaspora: Comparative Perspectives. (3 cr)

Cross-cultural perspectives of family formation, social structure, and gender patterns of families of African descent.

AFRO 4432. Colloquium: Before the Field: Internships, Community Service, and Study Abroad. (3 cr)

Theoretical and practical preparation for internships, community work, and study abroad.

AFRO 4478. Contemporary Politics in Africa and the Colonial Legacy. (3 cr; A-F only. §AFRO 5478, POL 4478, POL 5478)

How current politics in mainly, though not exclusively, sub-Saharan Africa have been shaped by pre-colonial/colonial processes. Reality of independence, recurrent political/economic crises, global context, prospects for effective democracy.

AFRO 4593. The African American Novel. (3 cr. §ENGL 5593)

Contextual readings of 19th- and 20th-century black novelists, including Chesnut, Hurston, Wright, Baldwin, Petry, Morrison, and Reed.

AFRO 4597. Seminar: Harlem Renaissance. (3 cr. §ENGL 5597)

A multidisciplinary review of the Jazz Age's Harlem Renaissance: literature, popular culture, visual arts, political journalism, and major black and white figures.

AFRO 4598. Seminar: Black Arts Renaissance, 1960s and 1970s. (3 cr)

Multidisciplinary perspectives on the 1960s and 1970s Black Power "renaissance" of African American art and politics.

AFRO 4622. Caribbean Writers: Rethinking Caribbean Literature in a World Context. (3 cr)

Literary/historical issues explored by Caribbean writers in English, French, and Spanish-speaking Caribbean through autobiographies, short stories, novels, poetry, and films.

AFRO 4632. Black Francophone Writers in Translation. (3 cr)

Exploration of ideas, particularly negritude and issues of creoleness, central to male and female writers in French from Africa and the Caribbean. Novels, essays, short stories, and plays.

AFRO 4655. African American Cinema. (3 cr. §ARTH 5655)

Exploration of African American cinematic achievements, from the silent films of Oscar Micheaux through contemporary Hollywood and independent films, using class screenings and critical readings.

AFRO 4800. African Studies Seminar. (3 cr)

Topics vary and reflect instructor's research interests. Topics specified in *Class Schedule*.

AFRO 4991W. Thesis Research and Writing. (2 cr; A-F only. Prereq-Δ)

Preparing a research paper that satisfies major project requirement. Defining a research problem. Collecting/analyzing data. Writing the research paper.

AFRO 4992. Thesis. (1 cr; A-F only. Prereq-4991W, Δ)

Work with thesis adviser to complete final copy of senior project.

AFRO 5072. Racism: Social and Psychological Consequences for Black Americans. (3 cr)

Racism and its effects on African Americans; definitions, determinants, and dynamics. Examined in an experiential context to reflect individual and institutional racism.

AFRO 5101. Seminar: Introduction to Africa and the African Diaspora. (3 cr)
Comparative frameworks, related theories, and pivotal texts in study of Africa and African Diaspora.

AFRO 5103. African History from the Perspective of the African Diaspora. (3 cr; A-F only)
Writings and intellectual networks of major Black thinkers whose historical/ethnographic works on Africa span period from 19th to 20th century. Thinkers such as David Walker, Henry Highland Garnet, Martin R. Delany, J.W.C. Pennington, George Washington Williams, Alexander Crummell, W.E. B. Dubois, Carter G. Woodson, William Leo Hansberry.

AFRO 5120. Social and Intellectual Movements in the African Diaspora. (3 cr; A-F only. §AFRO 3120)
Political, cultural, and historical linkages between Africans, African-Americans, and African-Caribbean. Development of black socio-political movements and radical intellectual trends in late 19th/20th centuries within African Diaspora. African independent struggles against colonialism. Black resistance in Suriname, Guyana, and the Caribbean against colonialism/racism. Protest organizations, intellectual discourses, and radical movements in the United States and Europe.

AFRO 5181. Blacks in American Theatre. (3 cr. §TH 5181)
Historical survey of significant events in the development of American black theater traditions. Essays, plays, playwrights, and theaters from early colonial references to the Black Arts Movement.

AFRO 5182. Contemporary Black Theatre: 1960-Present. (3 cr. §TH 5182)
Essays, plays, playwrights, and theaters that have contributed significantly to contemporary black theater. From the beginning of the Black Arts movement to the present.

AFRO 5191. Seminar: The African American Experience in South Africa. (3 cr. §HIST 5438)
Ideological, political, religious, and cultural ties that have informed African American and black South African relations from late 18th century to present.

AFRO 5401. Field Studies in African American and African Studies. (1-6 cr [max 6 cr]. Prereq—[[African American or African Studies] major or minor]. #)
Supervised field study/internship focused on African American or African culture(s), language(s), and development.

AFRO 5405. The African American Child. (3 cr. §AFRO 3405)
Research carried out by African American psychologists and behavioral/social scientists, and by experts on African American child/youth development.

AFRO 5429. Slavery in Africa and in the Americas, 1400 to 1880. (3 cr; A-F only. §AFRO 3429)
History of slavery in Africa and the New World. Indigenous institutions of unfree labor in West Africa. Origins of European slave trade in West Africa and South Africa. Development of plantation societies in South America, the Caribbean, and the United States. Comparative approach to understanding New World slavery and slavery on the African subcontinent. Focuses on religion, creolization, and antislavery resistance.

AFRO 5437. History of East Africa. (3 cr; A-F only. §AFRO 3437, HIST 3437, HIST 5437)
Major themes in history of East Africa, from era of early human cultural development to present. Methods that historians use to reconstruct history. Varying interpretations/constructions of history over time.

AFRO 5478. Contemporary Politics in Africa and the Colonial Legacy. (4 cr; A-F only. §AFRO 4478, POL 4478, POL 5478. Prereq—POL 1054 or POL 3051 or non-pol sci grad student or #)
How current politics in mainly, though not exclusively, sub-Saharan Africa have been shaped by pre-colonial/colonial processes. Reality of independence, recurrent political/economic crises. Global context, prospects for effective democracy.

AFRO 5551. Methods: Use of Oral Traditions as Resources for History. (3 cr)
Use of spoken information through time as a source for writing history. Use of canons of history to analyze and critique oral traditions and integrate them into written history.

AFRO 5701. Proseminar: Classic Works in African American Studies. (3 cr)
Classic works in African American studies. Conceptual frameworks. Multidisciplinary focus.

AFRO 5702. Proseminar: Major Figures in African American Studies. (3 cr)
Major figures from various fields in African American studies. Bio-critical focus.

AFRO 5741. Minorities and Mass Media. (3 cr; A-F only. Prereq—jour major or minor, JOUR 3004, A)
Analysis of relationships between mass media and communities of color in the United States. Focuses on issues of content and control.

AFRO 5756. Social and Cultural History of Blacks in Sports. (3 cr. §AFRO 3756)
Social/cultural contexts surrounding eras of athletes such as Jack Johnson, Jackie Robinson, Joe Louis, Jesse Owens, Althea Gibson, Wilma Rudolph, Muhammad Ali, Michael Jordan, and Tiger Woods. Impact of these athletes on national/international events. Periods when it was not uncommon for black entertainers/athletes to become involved in politics and community activism.

AFRO 5864. Proseminar: African-American History. (3-4 cr [max 4 cr]. Prereq—#)
Examination of issues including slavery, Reconstruction, the Great Depression, and civil rights movement using cultural and intellectual history and autobiography/biography. Focuses on dynamics of race, gender, class, region, sexuality, and religion.

AFRO 5865. Proseminar: African-American History. (3-4 cr [max 4 cr]. Prereq—#)
Construction of a detailed research agenda, locating appropriate depositories of primary materials and secondary sources, and developing appropriate methodologies and frameworks.

AFRO 5866. The Civil Rights and Black Power Movement, 1954-1984. (3 cr; A-F only. §AFRO 3866)
The “second reconstruction.” Failure of Reconstruction, abdication of black civil rights in 19th century. Post-1945 assault on white supremacy via courts/state, grass-roots southern movement in 1950s/1960s. Black struggle in north and west, emphasis on Black Power by new organizations/ideologies/leaders. Ascendancy of Reagan, conservative assault on movement.

AFRO 5876. Proseminar: Approaches to African Development. (3 cr)
Study, critical analysis, and comparison of primary documents relevant to African development.

AFRO 5910. Topics in African American and African Studies. (1-3 cr [max 9 cr])
Topics specified in *Class Schedule*.

AFRO 5993. Directed Study. (1-3 cr [max 3 cr]. Prereq—#)
Guided individual reading/study for qualified seniors and graduate students.

Agricultural Industries and Marketing (AIM)

Soil, Water, and Climate

College of Food, Agricultural and Natural Resource Sciences

AIM 4011. Student Project/Field Investigation. (3 cr)
Application of marketing knowledge that involves building a complete marketing plan for an agricultural product or device. Team projects are used.

Agricultural, Food, and Environmental Education (AFEE)

Department of Human and Resource Education

College of Education and Human Development

AFEE 1001. Introduction to Agricultural Education and Extension. (1 cr)
Historical development of the discipline of agricultural education; orientation to career opportunities; areas and expectations of specialization; issues in the field.

AFEE 1002. Principles of Career Planning for Agricultural Professionals. (1 cr. §AGUM 1111)
Self assessment and analysis of interests, skills, and abilities. Analyses of occupations, employment potential, employee expectations for work. Use informational interviews to examine career options and employment portfolio for career planning.

AFEE 2051. Current Technical Competencies. (3 cr)
Prepares agricultural education teachers and other agricultural professionals to use technology. Develop basic skills and knowledge to plan, implement, operate, and maintain agricultural structural and mechanical systems. Experiential learning principles and applied problem solving.

AFEE 2096. Professional Practicum in Agricultural Education: Early Experience. (1-3 cr [max 3 cr]; A-F only)
Observe schools, extension offices, and agricultural oriented businesses to learn about the work and workplaces in agricultural education.

AFEE 2221. People Skills for Leadership. (3 cr; A-F only)
How to be an effective leader in profit/non-profit agricultural settings. Roles, responsibilities, knowledge, attitudes, and skills to hire staff, set goals, coach, mentor/manage teams, and improve communication.

AFEE 3096. Experiential Learning: Production and Business. (1-8 cr [max 12 cr]. Prereq—AgEd major, #)
Experiential learning in agricultural production and business. Planned, organized, monitored, and evaluated based on a per-experience diagnosis of learning prerequisite to higher level courses in technical agriculture and agricultural business.

AFEE 3112. Technical Drawing and Production Technologies. (3 cr; A-F only. §BIE 3112)
Experiences in technical drawing, design technology, and production technologies related to construction and manufacturing. Develop manipulative skills and techniques; understand principles and processes of technologies through hands-on work in a multiple activity laboratory.

AFEE 3221. Presentations and Meeting Management for Agricultural Industry. (3 cr; A-F only)
Planning/delivering formal/informal presentations in agricultural business/non-profit settings. Skill development in parliamentary procedure. Using appropriate technology for data summary and presentations with individuals and large/small audiences. Instruction is student-centered, relies on the interaction/participation.

AFEE 4096. Practicum: Agricultural Education Technology. (1-3 cr [max 6 cr])
Individualized study packages addressing technology in agriculture production, horticulture, natural resource, biotechnology, farm and agribusiness, management, agricultural science, agriculture mechanics, youth organizations, adult and beginning farm and agribusiness management.

AFEE 4221. Rural Leadership Development. (3 cr)
Understanding the role, function, and features of leadership in rural communities; importance of personal involvement, personal leadership qualities, and vision for individuals and rural community organizations.

AFEE 5111. Agricultural Education: Methods of Teaching. (4 cr)

Use of teaching resources; principles of teaching and learning; problem-solving techniques, lesson plan construction for large group, small group and individual investigations; student management; and assessment.

AFEE 5112. Agricultural Education Program Organization and Curriculum for Youth. (3 cr)

Development of community school program in agriculture, agribusiness, and environmental science. Program to meet graduation outcomes and determine student needs.

AFEE 5113. Adult Agricultural Education Program Development and Technology. (3 cr; A-F only)

Organization and implementation of education programs for farmers, farm managers, and agribusiness personnel using community and environmental resources, agricultural and instructional technology, and management information systems to attain family and business goals.

AFEE 5114. Agricultural Education Teaching Seminar. (1 cr)

Reflective learning on teacher preparation experience; identify issues and problems facing the discipline; needs for continual preparation and program adjustment.

AFEE 5116. Coordination of SAE Programs: Work-based Learning. (2 cr; A-F only. Prereq—Agricultural education major or #)

Principles/techniques for coordinating work-based learning. Supervised agricultural experience in agricultural education. Historical/philosophical roots of experiential learning, integration with classroom instruction, legal aspects, record keeping, coordination techniques, current agreement laws.

AFEE 5118. Strategies for Managing and Advising the FFA Organization. (2 cr; A-F only. Prereq—Agricultural education major or #)

Principles/techniques to advise an FFA chapter. Historical/philosophical basis of FFA, organization/structure. Integration with classroom instruction, public relations, recruitment, and administration of FFA chapters.

AFEE 5220. Special Topics in Agriculture Education and Extension. (1-3 cr [max 12 cr])

Content varies by offering.

AFEE 5231. Agricultural Education Curriculum K-12. (2 cr; A-F only)

Philosophy, organization, and administration of instruction in agricultural education programs at the elementary, middle, and high school levels.

AFEE 5233. Advanced Procedures in Teaching Agricultural Education. (2 cr; A-F only)

New developments in methodology; assessment of innovations and procedures; consideration of various levels of instruction.

AFEE 5235. Advanced Supervised Agricultural Experience Programs. (2 cr)

The organization and administration of agricultural experience programs for middle and secondary level students: career exploration, improvement projects, experiments, placement in production/business/community settings, entrepreneurship. Current state and national programs and resource material.

AFEE 5237. Mentorship for Supervising Agricultural Education Teachers. (2 cr)

Professional development training for experienced teachers to serve as mentors for beginning and student teachers of agricultural education. Emphasis on supervision and assessment of teaching performance. Focus on critical period of induction into the teaching profession.

AFEE 5239. Program Organization and Management in Agricultural Education. (2 cr)

Analysis of organization, management, and assessment of agricultural education programs at the middle, high school, and adult levels.

AFEE 5280. Current Issues for the Beginning Agricultural Education Teacher. (1-3 cr [max 3 cr])

Reflection, analysis on current problems and issues confronting beginning teachers of agricultural education. Issues in teaching methods, classroom and program management, discipline, curriculum, FFA and SAE development, school-to-work relationships.

AFEE 5290. Seminar: Current Issues in Agricultural Education and Extension. (1-3 cr [max 6 cr])

Exploration of current issues in agricultural education and extension, strategies of response, implications of response actions, and related leadership roles.

AFEE 5296. Professional Experience Practicum in Agricultural Education and Extension. (1-4 cr [max 4 cr])

Observation, study, and experience in agricultural business and industry; identification of educational problems observed in the agricultural industry; evaluation of personal experience.

AFEE 5331. History, Philosophy, and Systems of Extension. (3 cr; A-F only)

History and philosophy of extension; modification and adaptation to worldwide methods and approved practices; extension methodologies; innovative approaches; systems appropriate to development environments.

AFEE 5361. World Development Problems. (3 cr; A-F only)

Introduction to development problems throughout the world. Development in Third World countries. Examples of First World development problems. Interdisciplinary focus on population, health and disease, education, agriculture, industry, finance, politics, and human rights.

AFEE 5371. Farming Systems Research and Extension. (3 cr; A-F only)

Introduction to the theory and practice of linking farming systems, research, and extension. An interdisciplinary and holistic approach to rural development for individuals and communities throughout the world.

AFEE 5401. Introduction to Farm Business Management Education Teaching. (3 cr; A-F only)

Farm business management career and technical education teaching. Philosophy, history, mission, purposes. Course development, learning styles, roles of instructor. Rewards of profession. Curriculum. Foundational economics principles. Instructional methods. Recruiting/retaining students.

AFEE 5405. Advanced Farm Financial Analysis Methodology and Concepts. (1 cr)

Farm financial analysis concepts, whole entity financial analysis issues/tools, enterprise analysis options/methodologies. Evaluation of industry standardization efforts. Analysis of where each option fits.

AFEE 5407. Application of Advanced Farm Financial Analysis Tools and Methods. (1 cr)

Use of advanced farm financial analysis tools/methodology to analyze financial performance of actual farm businesses. Case farms are used to apply whole entity financial analysis tools/concepts and enterprise analysis methodologies.

AFEE 5409. Seminar: Teaching Strategic Farm Business Planning. (1 cr [max 4 cr]; A-F only)

Teaching strategic business planning to farm managers and agricultural professionals. Philosophy of strategic management, components of a strategic business plan. Materials/tools to apply strategic farm business planning in educational programs. Students apply strategic planning methods/concepts to case farm businesses.

AFEE 5411. Seminar: Farm Financial Planning Teaching Tools and Methods. (1 cr [max 4 cr]; A-F only)

Preparation to teach farm financial planning to farm managers and agricultural professionals. Principles/concepts of long range financial planning and short range cash flow planning. Farm planning software tools, case farm situations, practical farm planning experience.

AFEE 5413. Seminar: Teaching Effective Use of Commodity Marketing Tools. (1 cr [max 4 cr]; A-F only)

Teaching commodity marketing tools to farm managers and agricultural professionals. Commodity marketing tools, including cash forward contracts, futures, and options, and how to use them to enhance price and protect income. How to choose marketing tools, given financial/market conditions.

AFEE 5415. Seminar: Teaching Commodity Marketing Strategies. (1 cr [max 4 cr]; A-F only)

Teaching commodity market planning to farm managers and agricultural professionals. Development of marketing plans to enhance price and protect income. Introduction to tools to simulate implementation of plans against actual price scenarios.

AFEE 5993. Directed Study in Agricultural Education and Extension. (1-9 cr [max 9 cr])

Topics may be chosen to permit study of areas within education or to supplement areas of inquiry not provided in the regular course structure.

AFEE 5995. Integrating Paper—Master of Education: Agricultural and Extension Education. (1-4 cr [max 4 cr]; A-F only)

Students prepare paper dealing with issues in agricultural education applied to professional responsibilities.

Agronomy and Plant Genetics (AGRO)

Department of Agronomy and Plant Genetics

College of Food, Agricultural and Natural Resource Sciences

AGRO 1007. Horse in Your Backyard. (2 cr; A-F only. \$ANSC 1007)

Role of horses in society. How to keep a horse well fed and healthy. Fundamentals of horse nutrition, feedstuffs, pasture, and horse health. How to seek/interpret information to make decisions on vaccination, worming, nutrition, grazing management, hay selection, manure handling, and use of dietary feed additives/enhancers.

AGRO 1093. Directed Studies. (1-4 cr [max 12 cr]. Prereq—4 cr in AGROnomy, #)

Allows study of agronomy in greater depth or in areas not currently offered in formal courses. Tutorial instruction under staff guidance.

AGRO 1101. Biology of Plant Food Systems. (4 cr)

Fundamental concepts of biology at the molecular, cellular, organismal, and ecosystem levels. Plants and plant use by humans. Lab, greenhouse, field, and classroom discussions.

AGRO 1103. Crops, Environment, and Society. (4 cr. \$AGUM 2222)

Plants that supply food, fiber, beverages, and medicine to humans. Plant identification, plant physiology, plant breeding/biotechnology, plant ecology, crop culture/management.

AGRO 1660. First-Year Colloquium/Experience in AGROecosystems Analysis. (2 cr; A-F only. Prereq—1st yr in major hosted by Department of AGROnomy and Plant Genetics)

Agroecosystems and their impacts on the environment, landscapes, and rural communities. Students develop a course plan within their major, explore career options, and increase their familiarity with the department, its history, and its faculty/staff. Field trips, discussions, readings, reflective writings.

AGRO 2101. Biology of Food, Land, People, and the Environment. (4 cr; A-F only. Prereq—Elementary education major)

Biological basis of food, land, people, and environmental systems. Biology at cellular, organism and ecosystems level in relation to human activity systems. Active learning, project-based approach.

AGRO 2104. Grain and Seed Technology. (2 cr. Prereq—[1103, APEC 3411] recommended)

Practice/principles of grain grading using Federal Grain Inspection Service (FGIS) standards with examples of commodity, classes, subclasses, defects, and special grades. Seed analysis identifying common crops and weed seeds. Seed laws, seed handling, conditioning/viability testing. Primarily laboratory discussion, practicum, and problem solving.

AGRO 2501. Plant Identification for Urban and Rural Landscapes. (2 cr. §AGUM 2240. Prereq—BIOL 1009 or equiv) Plant/weed species important in turf, horticulture, forestry, and crop production systems. Emphasizes identification of native grasses/forbs, field crops, and weed species in Minnesota and Upper Midwest. Plant life cycles, habitats, and relationships to humans.

AGRO 3203W. Environment, Global Food Production, and the Citizen. (3 cr. §AGUM 2224, ANSC 3203W. Prereq—BIOL 1009 or equiv)

Ecological and ethical concerns of food production systems in global agriculture—past, present, future. Examines underlying ethical positions about how agroecosystems should be configured. Decision cases, discussions, videos, other media.

AGRO 4005. Applied Crop Physiology and Development. (4 cr [max 8 cr]. Prereq—[CHEM 1011 or CHEM 1021 or equiv], 8 cr in [BIOL or plant science])

Applications of plant physiology processes of water relations, photosynthesis, mineral uptake/function, transpiration, translocation, and their relationships to plant growth/development from seed germination to maturation and dry down for harvest. Emphasizes inquiry, field problems, and group activity. Lecture, laboratory.

AGRO 4093. Directed Studies for Advanced Students.

(1-4 cr [max 12 cr]. Prereq—15 cr in Agronomy, #) Allows study of agronomy in greater depth or in areas not currently offered in formal courses. Tutorial instruction under staff guidance.

AGRO 4096. Professional Experience Program: Internship.

(1-3 cr [max 6 cr]; S-N only. Prereq—#, COAFES undergrad, complete internship contract available in COAFES Career Services before enrolling; UC only) Supervised professional experience in agribusiness firms or government agencies; evaluative reports and consultations with faculty advisers and employers.

AGRO 4101. Agricultural Decision Making and Experimentation. (3 cr. Prereq—Jr or sr)

Principles of field plot techniques and design applied to field demonstrations/experiments. Inductive/deductive reasoning, analysis of data, tests of significance. Treatment comparisons, decision making. Computers used for data processing and statistical analysis.

AGRO 4103. World Food Problems. (3 cr. §APEAC 4103, CVM 6060, FSCN 4103. Prereq—Jr or sr or grad)

Multi-disciplinary look at problems of and possible solutions for food production, storage, and utilization in developing countries. Presentations and discussions introduce conflicting views on population, use of technology, and ethical and cultural values held in various parts of the world.

AGRO 4401. Plant Genetics and Breeding. (4 cr. §HORT 4401. Prereq—[BIOL 1009 or equiv or grad], #)

Principles of plant genetics and environmental variation. Applications of genetics to crop evolution and breeding of self-pollinated, cross-pollinated, and asexually propagated crops. Lab experiments in hybridization, variation, and selection.

AGRO 4505. Biology, Ecology, and Management of Invasive Plants. (3 cr. Prereq—4005, [Bio 3002 or equiv], SOIL 2125, [AGRO 2501 or HORT 1011])

Ecology/biology of invasive plant species (weeds). Principles of invasive plant management in agricultural/horticultural, urban, wetland, aquatic, and other non-cropland landscape systems, utilizing biological, cultural, and chemical means. Management strategies to design systems that optimize invasive plant management in terms of economic, environmental, and social impacts.

AGRO 4603. Field Crop Scouting and Problem Diagnosis.

(3 cr. Prereq—3005, SOIL 3416, [(2501, Ent 3001, PLPA 2002) or Agri 3001], [Jr or sr], 16-20 cr in major)

Insects, diseases, weeds. Nutrient status. Environmental stresses due to wind, hail, frost, soil conditions, and chemical injury. Calibration of equipment associated with crop protection. Pesticide use, safety procedures. Crop growth staging and growing degree day as components of decision-making and precision agriculture. Intensive summer training sessions at selected Minnesota agricultural research and outreach centers.

AGRO 4605. Management Strategies for Crop Production. (4 cr. Prereq—Jr or sr or grad student with program committee approval)

Crop management situations/needs in various climate zones, soil types, from seed selection to crop storage. Focuses on cropping systems involving corn, soybeans, small grains, and forages. Emphasizes long term productivity, profitability, and sustainability. Lecture, discussion, problem sets, laboratory.

AGRO 4660. Senior Capstone: Leadership, Decision Making, and Problem Solving. (2 cr; A-F only. Prereq—4096 or ScAg 4009 or #)

Professional leadership and decision making from ethical, technical, societal, and personal reflection perspectives. Linked to undergraduate internship and other experiential learning opportunities. Problems, decision-centered cases, interviews.

AGRO 4888. Issues in Sustainable Agriculture. (2 cr. Prereq—1103, SOIL 1125 or 2125 or equiv)

Agroecology, sustainable practices, production economics, environmental quality, holistic resource management, healthy food/water, rural communities. Meet sustainable-agriculture advocates, including farmers, faculty, and representatives of non-profit sustainable-agriculture organizations.

AGRO 5021. Introduction to Plant Breeding. (3 cr.

Prereq—GCB 3022 or equiv, background in plant science) For majors not specializing in plant breeding. How genetics is applied to plant improvement. Emphasizes sustainable-production scenarios.

AGRO 5121. Applied Experimental Design. (4 cr. §ENT 5121. Prereq—STAT 5021 or equiv or #)

Principles of sampling methodologies, experimental design, and statistical analyses. Methods/procedures in generating scientific hypotheses. Organizing, initiating, conducting, and analyzing scientific experiments using experimental designs and statistical procedures.

AGRO 5311. Research Methods in Crop Improvement and Production. (1 cr; S-N only. Prereq—Applied plant sciences grad)

Demonstrations and discussions of techniques in crop improvement and/or production research. Presentations integrate biotechnology with traditional breeding methods; production sessions emphasize ecologically sound cropping systems.

AGRO 5321. Ecology of Agricultural Systems. (3 cr; A-F

only. §ENT 5321. Prereq—[3xxx or above] course in [AGRO or ANSC or Ent or Hort or PLPA or Soil] or #) Ecological approach to problems in agricultural systems. Formal methodologies of systems inquiry are developed/applied.

AGRO 5999. Special Topics: Workshop in AGRonomy.

(1-6 cr [max 6 cr]. Prereq—Jr or sr or grad student) Workshops on various topics in agronomy and plant genetics. Presenters/faculty may include guest lecturers/experts. Topics specified in *Class Schedule*.

Akkadian (AKKA)

Department of Classical and Near Eastern Studies

College of Liberal Arts

AKKA 5011. Elementary Akkadian I. (3 cr. Prereq—Adv undergrads with # or grads)

Introduction to cuneiform script. Basics of Old Babylonian morphology and syntax. Written drills, readings from Hammurabi laws, foundation inscriptions, annals, religious and epic literature.

For definitions of course numbers, symbols, and abbreviations, see page 300.

AKKA 5012. Elementary Akkadian II. (3 cr. Prereq—5011)

Continuation of 5011. Readings include The Gilgamesh Epic, The Descent of Ishtar, Mari Letters, Annals of Sennacherib and Essarhaddon, Sargon II.

AKKA 5300. Readings in Akkadian. (3 cr [max 18 cr]. Prereq—5011, 5022)

Survey of Akkadian literature, including literary, legal, historiographical, and sacred texts. Topics specified in *Class Schedule*.

American Indian Studies (AMIN)

Department of American Indian Studies

College of Liberal Arts

AMIN 1001. American Indian Peoples in the United States. (3 cr)

Introduction to how voices/visions of indigenous peoples have contributed to history of cultural expression in North America. Historic contexts/varieties of this expression by region, tribal cultures. Emphasizes contributions in literature, philosophy, politics, fine arts.

AMIN 1002. Indigenous Peoples in Global Perspective.

(3 cr; A-F only. §POL 1019)

Colonial experiences of selected indigenous peoples in Americas, Euroasia, Pacific Rim.

AMIN 1003. Indigenous Peoples: a Minnesota Perspective. (3 cr; A-F only)

History, culture, and lived experience of American Indian people in Minnesota. Self-representation and histories of Anishinaabe (Ojibwe) and Dakota peoples through film, music, oral traditions, and written texts. Work by non-Indian scholars that focuses on distinctive cultural, philosophical, and linguistic perspectives of Anishinaabe and Dakota peoples.

AMIN 1101. Beginning Ojibwe I. (5 cr)

Acquisition of speaking skills, fundamentals of grammar, writing systems.

AMIN 1102. Beginning Ojibwe II. (5 cr. Prereq—1101)

Acquisition of speaking skills, fundamentals of grammar, and writing systems.

AMIN 1121. Beginning Dakota I. (5 cr)

Development of the four skills of language acquisition: listening, speaking, reading, and writing. Oral drills and in-class participation focused on questions and answers.

AMIN 1122. Beginning Dakota II. (5 cr. Prereq—1121)

Further development of language acquisition skills with oral drills and in-class participation focused on questions and answers.

AMIN 1902. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topic specified in *Course Guide*.

AMIN 1905. Freshman Seminar. (3 cr. Prereq—Fr or at least 30 cr)

Topics specified in *Course Guide*.

AMIN 1908W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

AMIN 3103. Intermediate Ojibwe I. (5 cr. Prereq—1101, 1102)

Improving speaking skills; grammatical structures; storytelling, oral history, and translation projects.

AMIN 3104. Intermediate Ojibwe II. (5 cr. Prereq—1101, 1102, 3103)

Improving speaking skills; grammatical structure; storytelling, oral history, and translation projects.

AMIN 3107. Structure of Anishinaabemowin, the Ojibwe Language. (3 cr; A-F only. §AMIN 5107. Prereq—3103)

Analysis of grammatical structures of Anishinaabemowin.

AMIN 3108. History of Anishinaabemowin, the Ojibwe Language. (3 cr; A-F only. §AMIN 5108. Prereq=3107)
Historical development of Anishinaabemowin.

AMIN 3109. Anishinaabe Literature. (3 cr; A-F only. §AMIN 5109. Prereq=3103)
Readings in Anishinaabe oral literature.

AMIN 3123. Intermediate Dakota I. (5 cr. Prereq=1122)
Development of listening, speaking, reading, and writing skills with oral drills and in class participation focused on questions and answers.

AMIN 3124. Intermediate Dakota II. (5 cr. Prereq=1121, 1122, 3123)
Further development of the listening, speaking, reading, and writing skills with oral drills and in class participation focused on questions and answers.

AMIN 3141. American Indian Language Planning. (3 cr; A-F only. §AMIN 5141. Prereq=3103 or 3123)
Planning for maintenance/revitalization of North American indigenous languages. Condition/status of languages. Documentation, cultivation, literacy, education.

AMIN 3143. Language in American Indian Culture and Society. (3 cr; A-F only. §ANTH 3143)
Survey of North American indigenous languages in social/cultural contexts, from before European contact to present.

AMIN 3201W. American Indian Literature. (3 cr)
Comparative studies of oral traditions, modern literature from various tribal cultures.

AMIN 3203W. American Indian Aesthetics. (3 cr; A-F only)
Ways in which American Indians have distinguished themselves as artistic thinkers. Regional traditions of American Indian art. Ways in which art was connected with everyday life and with religious practices. How American Indians thought about art differently from their Western counterparts. Innovations that contemporary American Indian artists have made in the way art is done and thought about by Indians/non-Indians.

AMIN 3301. American Indian Philosophies. (4 cr)
World views of the indigenous people of the Americas. Topics include native medicines and healing practices, ceremonies and ritual, governance, ecology, humor, tribal histories, and status of contemporary native people.

AMIN 3303. American Indians and Photography. (3 cr. §AMIN 5303)
Historical/comparative overview of photos in which American Indian people are central subjects. Primary features of images in American Indian photos. Relationships among those involved in making/viewing photos. Ways in which photos are interpreted. Relation of photos to social contexts in which they are produced and to agencies of those who stand behind their making.

AMIN 3401. American Indian Art. (4 cr)
Visual arts depicting rituals, traditions, values, and worldviews of major American Indian populations. Creative processes of art from pre-contact times through contemporary art. Emphasis placed on style, technique, materials and imagery, and symbolism.

AMIN 3402. American Indians and the Cinema. (3 cr; A-F only)
Representations of American Indians in film, historically/contemporarily. What such representations assert about Native experience and cultural viability. What they reflect about particular relationships of power.

AMIN 3409. American Indian Women: Ethnographic and Ethnohistorical Perspectives. (3 cr. §AMIN 5409, WOST 3412)
Comparative survey of ethnographic/ethnohistorical writings by/about American Indian women.

AMIN 3501. American Indian Tribal Governments and Politics. (3 cr; A-F only. §POL 3701)
History, development, structure, politics of American Indian Governments. North American indigenous societies from pre-colonial times to present. Evolution of aboriginal governments confronted/affected by colonizing forces of European/Euro-American states. Bearing of dual citizenship on nature/powers of tribal governments in relation to states, federal government.

AMIN 3601. American Indian Oral Traditions. (3 cr; A-F only. Prereq=1001 or 1002 or 1003)
Survey of oral traditions of indigenous peoples of North America.

AMIN 3701. Ojibwe Culture and History. (3 cr)
Ojibwe culture, history, and traditions including philosophy, religion, and lifestyle. Students develop an appreciation for the values and belief systems of traditional Indian people.

AMIN 3711. Dakota Culture and History. (3 cr)
An overview of Dakota culture, language, history, literature, contemporary issues, and the arts.

AMIN 3713. American Indian Communities of the Great Lakes. (3 cr)
American Indian communities of the Great Lakes over time, with particular attention to Ojibwe, Dakota, and HoChunk experiences. How the richness of the world created by Great Lakes tribes was damaged, depressed, and altered but not destroyed by the arrival of Euroamericans.

AMIN 3870. Topics in American Indian History. (3 cr. §HIST 3870)
Topics may include social history, oral history, history of particular regions, political systems, education, and policy. Designed for undergraduates.

AMIN 3871. American Indian History: Pre-Contact to 1830. (4 cr. §HIST 3871)
American Indian history from the era of ancient Native America to the removal era. Social, cultural, political, and economic diversity of Native American peoples and Native American experiences with European colonialism.

AMIN 3872. American Indian History: 1830 to the Present. (4 cr. §HIST 3872)
American Indian history from 1830 to the present. Impact of federal Indian policy on American Indian cultures and societies.

AMIN 3876. American Indian Education. (3 cr)
Educational processes in American Indian cultures; history of school programs established for tribes by missionaries and the U.S. and Canadian governments; the importance of boarding schools in shaping the lives, families, communities, and educational expectations of Indian people in the late-19th and early-20th centuries.

AMIN 3920. American Indian Studies Topics. (1-3 cr [max 6 cr]; A-F only)
Various topics in American Indian Studies.

AMIN 4201. Topics in American Indian Literature. (3 cr)
Topics organized around issues of theme or genre or region or tribe or gender.

AMIN 4231. The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States. (3 cr. §AAS 4231, AFRO 4231, CHIC 4231)
Structural or institutional conditions through which people of color have been marginalized in public policy. Critical evaluation of social theory in addressing the problem of contemporary communities of color in the United States.

AMIN 4301. American Indian Intellectuals. (3 cr; A-F only)
Contributions that American Indians have made to understanding American Indian topics and the world around them. Works that have stood as paradigms of American Indian thinking. Emphasizes works written after 1945.

AMIN 4501. Law, Sovereignty, and Treaty Rights. (3 cr. Prereq=1001)
History of American Indian law and the post-contact effects of colonial and U.S. law on American Indians through the 20th century.

AMIN 4511. American Indian Political Economy. (3 cr. Prereq=1001)
Sources, nature, consequences of social/economic development/change in Indian communities. Precontact Indian communities. Effect of European contact. Social movements into 20th century, including phenomenon of urban Indian communities.

AMIN 4515. Contemporary American Indian Movements. (3 cr. Prereq=1001)
American Indian organizations and social movements of the 20th century. Explorations of political activism on and off reservations; treaty disputes; economic development strategies; the revival of traditional beliefs.

AMIN 4525W. Federal Indian Policy. (3 cr. §POL 4525W)
Formulation, implementation, evolution, comparison of Indian policy from pre-colonial times to self-governance new millennium. Theoretical approaches to federal Indian policy. Major federal Indian policies. Views/attitudes of policy-makers, reactions of indigenous nations to policies. Effect of bodies of literature related to policies.

AMIN 4990. Topics in American Indian Studies. (1-4 cr [max 8 cr])
Topics specified in *Class Schedule*.

AMIN 4991. Independent Study. (1-12 cr [max 18 cr]. Prereq=#, Δ, □)

AMIN 4994. Directed Research. (1-12 cr [max 18 cr]. Prereq=#, Δ, □)
Individually arranged research with faculty to meet student needs and interests.

AMIN 4996. Field Study. (1-12 cr [max 18 cr]. Prereq=#, Δ, □)
Opportunities for experiential learning in a variety of American Indian community settings. Consult department faculty at least one term before enrolling.

AMIN 5107. The Structure of Anishinaabemowin, the Ojibwe Language. (3 cr; A-F only. §AMIN 3107. Prereq=3104)
Analysis of grammatical structures of Anishinaabemowin.

AMIN 5108. History of Anishinaabemowin, the Ojibwe Language. (3 cr; A-F only. §AMIN 3108. Prereq=3107 or #)
Historical development of Anishinaabemowin.

AMIN 5109. Anishinaabe Literature. (3 cr; A-F only. §AMIN 3109. Prereq=3107 or 5107 or #)
Readings in Anishinaabe oral literature.

AMIN 5141. American Indian Language Planning. (3 cr; A-F only. §AMIN 3141. Prereq=3103 or 3123 or #)
Planning for maintenance/revitalization of North American indigenous languages. Condition/status of languages. Documentation, cultivation, literacy, education.

AMIN 5301. American Indian Intellectuals. (3 cr)
Major works produced by two most important generations of American Indian intellectual history. 1890-1934 Transition Period, in which Charles Eastman, Zitkala-Sa, Luther Standing Bear, and Arthur Parker defined American Indian culture and history as integral parts of contemporary American society. Impact of 1968-1975 Red Power movement and its continuing influence on American Indian Studies, as exemplified by works of Vine Deloria, Jr., N. Scott Momaday, Paula Gunn Allen, and Gerald Vizenor.

AMIN 5303. American Indians and Photography. (3 cr. §AMIN 3303)
Historical/comparative overview of photos in which American Indian people are central subjects. Primary features of images in American Indian photos. Relationships among those involved in making/viewing photos. Ways in which photos are interpreted. Relation of photos to social contexts in which they are produced and to agencies of those who stand behind their making.

AMIN 5402. American Indians and the Cinema. (3 cr; A-F only)

Representations of American Indians in film, historically/contemporarily. What such representations assert about Native experience and cultural viability. What they reflect about particular relationships of power.

AMIN 5409. American Indian Women: Ethnographic and Ethnohistorical Perspectives. (3 cr. \$AMIN 3409, WOST 3412)

Comparative survey of ethnographic/ethnohistorical writings by/about American Indian women.

AMIN 5890. Problems in American Indian History. (3 cr. \$HIST 5890. Prereq-#)

Intensive consideration of topics in American Indian history. Possible topics include social history, Indian history of particular regions, political systems, education, and American Indian policy.

AMIN 5920. Topics in American Indian Studies. (3 cr [max 12 cr]; A-F only)

Various topics in American Indian Studies depending upon instructor and semester

American Sign Language (ASL)

Department of Educational Psychology

College of Education and Human Development

ASL 1701. American Sign Language I. (5 cr)

First of a 4-course sequence. American Sign Language (ASL), cultural values/rules of behavior of Deaf community in the United States. Receptive/expressive readiness activities, sign vocabulary, grammatical structure, receptive/expressive fingerspelling, aspects of Deaf culture. Lab sessions.

ASL 1702. American Sign Language II. (5 cr. Prereq-1701 with a final grade of at least [S or C-] or #)

Second of a four-course sequence. American Sign Language (ASL), cultural values/rules of behavior of Deaf community in the United States. Receptive/expressive readiness activities, sign vocabulary, grammatical structure, receptive/expressive fingerspelling, aspects of Deaf culture. Lab sessions.

ASL 3703. American Sign Language III. (5 cr. Prereq-1702 with final grade of at least [S or C-] or #)

Third of a four-course sequence. American Sign Language (ASL), cultural values/rules of behavior of Deaf community in the United States. Receptive/expressive readiness activities, sign vocabulary, grammatical structure, receptive/expressive fingerspelling, aspects of Deaf culture. Lab sessions.

ASL 3704. American Sign Language IV. (5 cr. Prereq-3703 with final grade of at least [S or C-] or #)

Fourth of a four-course sequence. American Sign Language (ASL), cultural values/rules of behavior of Deaf community in the United States. Receptive/expressive readiness activities, sign vocabulary, grammatical structure, receptive/expressive fingerspelling, aspects of Deaf culture. Lab sessions.

ASL 3705. Cultural Perspectives of Deafness. (3 cr)

Introduction to the deaf community as a linguistic and cultural minority group. Role of deaf people in the larger society; political activism; laws; access to information; educational philosophies and methods; and communication systems.

ASL 5642. Classroom Communication Through ASL. (1-2 cr [max 5 cr]; S-N only. Prereq-Fluency in ASL, # required) American Sign Language (ASL) form/function, vocabulary production, grammatical features needed by professionals working with children, storytelling strategies, technical sign language for classroom teachers. Content progresses in repeated segments.

American Studies (AMST)

Department of American Studies

College of Liberal Arts

AMST 1001. American Popular Arts and Public Life, 1900-1940. (4 cr)

Interdisciplinary study of American society from precontact to industrialization. American literature, art, music, and popular culture in historical context.

AMST 1001H. Honors: American Popular Arts and Public Life, 1900-1940. (4 cr)

Interdisciplinary study of American society from precontact to industrialization. American literature, art, music, and popular culture in historical context.

AMST 1002. American Popular Arts and Public Life, 1940 to present. (4 cr)

Interdisciplinary study of American society from industrialization through the present. Examination of American literature, art, music, and popular culture in historical context.

AMST 1011. Religions and American Identity in the United States, from World War II to the Present. (3 cr)

Political changes of last 60 years through lens of religion. Diversity of religious experience within U.S. How religious communities have shaped and been shaped by political events. Historical context of religion's role in current debates over race, gender, sexuality, science and foreign policy.

AMST 1401. Comparative Genders and Sexualities. (3 cr)

Gender and sexual practices/identities within a comparative (i.e. international) frame. How such practices/identities reflect/refract national ideals, that is, how gender and sexual practices express national/international division.

AMST 1902. Freshman Seminar. (3 cr; A-F only.

Prereq-Freshman)

Topics specified in *Class Schedule*.

AMST 1907W. Freshman Seminar. (3 cr [max 6 cr]; A-F only.

Prereq-Freshman)

Topics specified in *Class Schedule*.

AMST 1908W. Freshman Seminar. (3 cr; A-F only.

Prereq-Freshman)

Topics specified in *Class Schedule*.

AMST 1909W. Topics: Freshman Seminar. (3 cr; A-F only.

Prereq-Freshman)

Topics specified in *Class Schedule*.

AMST 2011. The United States since September 11. (3 cr)

How American citizenship and nationhood have changed since 9/11. The event and its aftermath in historical perspective. Political, economic, and military antecedents. How 9/11 has changed relations between the U.S. government, U.S. citizens, immigrants, and international community. How 9/11 has been remembered.

AMST 3001. Contemporary Perspectives on Asian America. (3 cr)

Interdisciplinary overview of Asian American experiences/identities. Emphasizes post-1965 migration/community. History, cultural productions, and contemporary concerns of Americans of Chinese, Japanese, Korean, South Asian, Filipino, and Southeast Asian ancestry.

AMST 3003. Public History. (3 cr; A-F only. Prereq-[AMST jr or sr], #)

Interpretations of a collective past as produced in various public venues, including museum exhibitions, films, theme parks, and Web sites. Intellectual/political issues associated with history produced for public audiences. Introduction to career opportunities in the field.

AMST 3111. American Cultures and the Arts. (3 cr)

Relationships between American cultures and artistic production through study of the works and lives of selected artists. How American societies and cultures shape, and are shaped by, artistic forms and expressions.

AMST 3113W. America's Diverse Cultures. (3 cr)

Diverse cultural (racial, ethnic, class) groups in America. Institutions/processes that shape their relations and create domination, resistance, hybridity, nationalism, racism, alliance. Specific content may vary.

AMST 3114. America in International Perspective. (3 cr. \$JPN 3167)

The nature of international cultural exchange.

The impact of U.S. cultures and society on other countries of the world as well as the impact of other cultures and societies on the United States.

AMST 3116. Jews and Popular Culture in 20th Century United States. (3 cr. \$JWST 3116)

How theater, film, music, humor, and television were affected by Jews. innovations, social marginality, and wish to assimilate or resist assimilation to the culture. How the nation was and was not reshaped in the process.

AMST 3212. Dissident Sexualities in U.S. History. (3 cr; A-F only. Prereq-AMST [Jr or sr], #)

History of sexuality in the United States. Emphasizes sexualities that have challenged dominant social/cultural norms. Development of transgender, bisexual, lesbian, and gay identities/communities. Politics of sex across lines of race/ethnicity. Historical debates over controversial practices, including sex work.

AMST 3252W. American Popular Culture and Politics: 1900 to 1940. (4 cr)

Historical analysis of how popular arts represent issues of gender, race, consumerism, and citizenship. How popular artists define boundaries of citizenship and public life: inclusions/exclusions in polity and national identity. How popular arts reinforce/alter political ideologies.

AMST 3253W. American Popular Culture and Politics: 1940 to the Present. (4 cr; A-F only)

Historical analysis of how popular arts represent issues of gender, race, consumerism, and citizenship. How popular artists define boundaries of citizenship and public life: inclusions/exclusions in polity and national identity. How popular arts reinforce/alter political ideologies.

AMST 3301W. Senior Proseminar in American Studies. (3 cr. Prereq-AMST sr or #)

Problem related to representative theme, figure, or period. Students research/write senior theses.

AMST 3402. American Indians and the Cinema. (3 cr; A-F only)

Representations of American Indians in film, historically/contemporarily. What such representations assert about Native experience and cultural viability. What they reflect about particular relationships of power.

AMST 3632W. Jewish Women in the United States. (3 cr. \$JWST 3632W, WOST 3403W)

History of American Jewish women. Uses literary/religious texts, primary documents, films, and histories to analyze Jewish women's experiences in the United States and their transformation of Judaism, political activism, and their role in the bourgeois family. How they are represented, how they represent themselves. Interdisciplinary approach.

AMST 3920. Topics in American Studies. (2-4 cr [max 8 cr]. Prereq-jr or sr)

Topics specified in *Class Schedule*.

AMST 3993. Directed Studies. (1-9 cr [max 9 cr]. Prereq-#)

Guided individual reading or study.

AMST 4101. Gender, Sexuality, and Politics in America. (3 cr; A-F only)

Ways public and private life intersect through the issues of gender, sexuality, family, politics, and public life; ways in which racial, ethnic, and class divisions have been manifest in the political ideologies affecting private life.

AMST 4301. Workers and Consumers in the Global Economy. (3 cr. Prereq—AMST major or advanced undergrad or #) Impact of global economy on workplaces/workers in the United States, Mexico, and Caribbean countries. Influence on consumption. Consequences for American culture/character. Effects on U.S./Mexican factory work, service sector, temporary working arrangements, offshore production jobs in Dominican Republic, and professional/managerial positions. How work/consumption is lived through race, class, gender, and nation.

AMST 4961. Proseminar I. (3 cr. Prereq—AMST jr or AMST sr or #) Classic/contemporary works/problems. Development of American Studies. Idealizing of American past. Challenges of multiculturalism. Contemporary themes.

AMST 4962W. Second Proseminar in American Studies. (3 cr. Prereq—AMST sr or #) Problem related to representative theme, figure, or period. Students research/write senior theses.

AMST 5101. Religion and American Culture. (3 cr; A-F only) Role of religion in shaping contemporary American cultural pluralism. Institutions and processes, intellectual frameworks, aesthetic and symbol systems that form religious communities and contribute to religious conflicts in U.S. society and culture.

AMST 5202. Thought and Practice of American Religions. (4 cr. Prereq—#) Holidays, festivals, religious arts, organizations, spirituality, ethics, and systems of thought of “civil religion,” “women’s religion,” indigenous American religions, American versions of Christianity, Judaism, Islam, Buddhism, and other world faiths, and their interactions in the United States and worldwide.

AMST 5402. American Indians in the Cinema. (3 cr; A-F only) Representations of American Indians in film, historically/contemporarily. What such representations assert about Native experience and cultural viability. What they reflect about particular relationships of power.

AMST 5920. Topics in American Studies. (1-4 cr [max 9 cr]) Topics specified in *Class Schedule*.

Anatomy (ANAT)

*Department of Integrative Biology and Physiology
Medical School*

ANAT 3001. Human Anatomy. (3 cr. \$ANAT 3301. Prereq—[BIOL 1009 or equiv], soph; §13002 or §13302 recommended)

ANAT 3002. Human Anatomy Laboratory. (1 cr. \$ANAT 3302. Prereq—[BIOL 1009 or equiv], soph) Complements 3001 or 3301.

ANAT 3301. Human Anatomy. (3 cr. \$ANAT 3001. Prereq—[BIOL 1009 or equiv], soph; §13002 or §13302 recommended)

ANAT 3302. Human Anatomy Laboratory. (1 cr. \$ANAT 3002. Prereq—[BIOL 1009 or equiv], soph) Complements 3001 or 3301.

ANAT 4900. Directed Studies in Anatomy. (2 cr [max 6 cr] Prereq—#)

ANAT 5999. Head and Neck Anatomy. (3 cr; A-F only. Prereq—#)

Animal Science (ANSC)

Department of Animal Science

College of Food, Agricultural and Natural Resource Sciences

ANSC 1001. Orientation to Animal Science. (1 cr; S-N only. Prereq—Incoming fr) Current issues, career planning, professional development. Interviews with faculty and other resource persons.

ANSC 1007. Horse in Your Backyard. (2 cr; A-F only. \$AGRO 1007) Role of horses in society. How to keep a horse well fed and healthy. Nutrition, feedstuffs, pasture, health. How to seek/interpret information on vaccination, worming, nutrition, grazing management, hay selection, manure handling, and use of dietary feed additives/enhancers.

ANSC 1011. Animals and Society. (3 cr) Controversial issues in animal agriculture including animal products in the human diet. Livestock/human competition for limited resources. Animal behavior, welfare, and rights. Organic vs. conventionally-produced food. Livestock integration into sustainable resource utilization.

ANSC 1021. Avian Sampler. (1 cr) Aspects of avian biology. Planned environmental/conservation practices. Wildlife rehabilitation programs for maintaining healthy populations of wild birds in Minnesota. Emphasizes care, management, and health considerations of avian species such as domestic poultry, raptors, and companion birds.

ANSC 1101. Introductory Animal Science. (4 cr) Fundamental concepts of animal breeding, physiology, nutrition, and management as they apply to the production of beef, dairy, horses, poultry, sheep, swine, and other livestock.

ANSC 1403. Companion Animal Nutrition and Care. (3 cr) For those without animal or nutrition training who have an interest in animal care. Nutrition of healthy animals and factors including behavior, environmental conditions, food type and availability. Focus on companion animals.

ANSC 1511. Food Animal Products for Consumers. (3 cr. \$FSCN 1511) Introduction to the compositional variation, processing, selection, storage, cookery, palatability, nutritional value, and safety of red meat, poultry, fish, and dairy products.

ANSC 2001. Animal Science Orientation for Transfer Students. (1 cr) The major, the faculty. Clubs, organizations, resources. Career exploration/preparation. Internship opportunities, working on a resume, developing interview skills.

ANSC 2011. Dairy Cattle Judging. (2 cr. Prereq—#) Evaluation of dairy animals on the basis of physical appearance, including classes of heifers and cows from the six major dairy breeds. Held in conjunction with the Minnesota State Fair. Training in oral reasons.

ANSC 2012. Livestock and Carcass Evaluation. (3 cr) Evaluation of cattle, swine, and sheep. Breeding stock evaluated on live appraisal, performance records, and breeding values. Market animals evaluated, graded, and priced on physical appearance followed by evaluation and grading of their carcasses.

ANSC 2013. Beginning Livestock Judging. (2 cr. Prereq—Soph or jr or sr, #; §12012 recommended) Visual evaluation of beef cattle, swine, and sheep for type, muscling, degree of finish, structure, and soundness. Short oral presentations. Preparation for collegiate livestock judging competition.

ANSC 2014. Poultry Judging. (2 cr) How to distinguish subtle differences among poultry and poultry products. Intact eggs, broken-out eggs, chicken carcasses, live chickens. Students compete for position on four-person team representing the U of M at U.S. Poultry & Egg Association's Collegiate Poultry Judging.

ANSC 2055. Horse Health Management. (2 cr) Theory/practice related to horse health/disease. Strategies for prevention of disease. Environmental hygiene, facility design, parasite control, prevention of infectious disease through vaccination. Major infectious, parasitic, developmental, nutritional, and metabolic diseases of North American horses. Physical therapies to treat injuries and maintain performance of sport horses. Body condition scoring, estimation of body weight, administration of vaccines and parasite control products, intramuscular injections. Bandaging methods, physical exam, first aid techniques. Lectures, labs, field trips.

ANSC 2102. Horse Production. (3 cr) Fundamentals of horse care. Equine nutrition, behavior, diseases. Hoof care. First aid, health care, disease prevention. Parasites.

ANSC 2211. Biometrics for Livestock. (3 cr. \$STAT 3011, STAT 5021. Prereq—MATH 1031 or higher) Descriptive statistics. Elementary probability. Correlation. Regression. ANOVA. Statistics as applied to livestock.

ANSC 2401. Animal Nutrition. (3 cr) Classification/function of nutrients. Use of nutrients for body maintenance, growth, egg production, gestation, and lactation. Comparative study of digestive systems of farm animal species.

ANSC 3007. Equine Nutrition. (3 cr. Prereq—2401) Principles of nutrition. Emphasizes unique aspects of equine nutrition. Nutritional needs of healthy animals. Factors in feeding. Animal behavior, growth/development, physiological status, environmental conditions, food type, availability. How physiology of horse's gastrointestinal tract, utilization of feedstuffs, and horse's nutritional requirements interrelate. Balanced rations, nutritional related ailments. Pasture management, forage selection, use of dietary feed additives/enhancers.

ANSC 3052. Equine Anatomy and Exercise Physiology. (4 cr. Prereq—Jr or sr; 3301 recommended) Interrelationship between physical structure/function. Emphasizes ways in which specialized aspects of anatomy/physiology contribute to unique athletic performance capabilities of horse.

ANSC 3141. Advanced Dairy Judging. (1 cr. Prereq—2011 or #) Training in presentation of oral reasons in dairy cattle judging. Selected students from this course participate in fall intercollegiate dairy judging contest.

ANSC 3142. Advanced Livestock Judging. (2 cr. Prereq—2013 or #) Visual evaluation of beef cattle, swine, and sheep for muscling, finish, structure, and soundness. Use of production (growth and reproduction) records in evaluation. Oral presentations. Preparation for national collegiate livestock judging contest.

ANSC 3143. Meat Judging and Grading. (2 cr. Prereq—1511, #) In-depth training in beef, pork, and lamb judging, writing reasons, and beef carcass grading and specifications. Field trips to packing plants. Students selected from course participate in intercollegiate meats judging contests.

ANSC 3144. Advanced Poultry Judging. (1 cr. Prereq—2014) How to judge live poultry and poultry products. Students compete for a position on four-person team representing U of M at National Collegiate Poultry Judging contest.

ANSC 3203W. Environment, Global Food Production, and the Citizen. (3 cr. §AGRO 3203W, AGUM 2224)

Ecological/ethical concerns of food production systems in global agriculture: past, present, and future. Underlying ethical positions about how agroecosystems should be configured. Interactive learning using decision cases, discussions, videos, other media.

ANSC 3221. Animal Breeding. (4 cr)

Application of qualitative and quantitative genetics to animal breeding. Concepts of livestock improvement through selection and mating programs.

ANSC 3301. Systemic Physiology. (4 cr. Prereq=[BIOL 1009 or equiv], [CHEM 1011 or CHEM 1021])

Introduction to physiology of neural, circulatory, respiratory, immune, and digestive systems of domestic animals.

ANSC 3305. Reproductive Biology in Health and Disease. (4 cr. Prereq=BIOL 1009 or equiv)

Reproductive organ functions, fertilization, estrous cycle and endocrine control, reproductive efficiency, problems/principles of artificial insemination. Anatomy, physiology, biochemistry of mammary gland. Mammary growth, initiation/maintenance of lactation, milk synthesis, factors influencing lactation curve.

ANSC 3307. Artificial Insemination Techniques. (1 cr; S-N only. Prereq=3305 recommended, #)

Hands-on training and techniques of artificial insemination at an off-campus laboratory setting. Proper techniques of AI and semen handling, and criteria for selection of bulls.

ANSC 3501. FARM Animal Environment. (3 cr. Prereq=[2301, jr] or #)

Biological/physical processes involved in adjustment of animals to ambient environments. Applications to farm animal management.

ANSC 3509. Animal Biotechnology. (3 cr. Prereq=BIOL 4003 or #)

Scientific, social, and ethical issues related to current topics in animal biotechnology. Introduction to molecular genetics. Use of animals as biological reagents/tools, topics in reproductive biotechnology, methods for genetic modification of animals.

ANSC 3511. Animal Growth and Development. (3 cr. Prereq=BIOL 1009)

Principles of animal growth. Interaction of nutrition, hormones, exercise, heredity, and disease in regulating growth.

ANSC 3609. Animal Production Systems. (2 cr)

Systems approach to decision making and problem solving in production enterprises. Planning, long range goal setting, production analysis, risk analysis, and cost-benefit analysis. Quality-of-life issues.

ANSC 4011. DAIRY Cattle Breeding. (3 cr. Prereq=3221)

Applying quantitative genetic principles to the breeding of dairy cattle. Primary emphasis on the evaluation of males, females, and systems of mating. Rates of genetic improvement with and without AI.

ANSC 4092. Special Problems in Animal Science. (1-4 cr [max 4 cr]. Prereq=#)

Research in an area of animal science under the supervision of a faculty member. Written report on the research is required.

ANSC 4093. Tutorial in Animal Science. (1-4 cr [max 4 cr]. Prereq=#)

Informally structured to encourage in-depth study of specific disciplines in animal science. Pertinent readings; preparation of written essays of high quality required.

ANSC 4096. Professional Experience Program: Internship.

(1-3 cr [max 6 cr]; S-N only. Prereq=COAFES undergrad, #, complete internship contract available in COAFES Career Services before enrolling; UC only)

Supervised professional experience in animal industries and farm enterprise systems with study of various aspects of the industry and related fields; evaluative reports and consultations with faculty advisers and employers.

ANSC 4099. Special Workshop in Animal Science. (1-4 cr [max 4 cr])

Workshops on a variety of topics in animal science. Consult Class Schedule or department for offerings. Topics may use guest lecturers/experts.

ANSC 4102. Equine Management. (3 cr. Prereq=2102)

Fundamentals of horse management. Record keeping (traditional, computerbased). Marketing, sales techniques. Legal aspects (e.g., contracts, zoning, liability, insurance). A management project involves establishing, maintaining, improving an equine business.

ANSC 4401. Swine Nutrition. (3 cr. Prereq=2401, 3511 recommended)

A comprehensive review of major considerations in providing optimum, cost-effective nutrition to swine in all stages of production.

ANSC 4403. Ruminant Nutrition. (3 cr. Prereq=2401)

Nutrient requirements of ruminants, physiology of digestion in ruminants, nutrient content of feedstuffs, primarily forages; energy utilization, protein and nonprotein nitrogen utilization; nutritional disorders; formulation of adequate rations.

ANSC 4404. Applied Dairy Nutrition. (2 cr. Prereq=ANSC 4403 recommended)

Application of nutrition principles to dairy cow nutrition. Nutrient requirements of dairy cows, feed ingredient selection/usage, formulation/evaluation of dairy cow rations using computer programs. Case study analysis of feeding programs used on dairy farms.

ANSC 4405. Poultry Nutrition. (3 cr. Prereq=2401)

Nutrient requirements of chickens and turkeys; feed composition and use in formulation of adequate diets. Role of feed additives. Least cost formulations, nutritional interrelationships, and feeding systems.

ANSC 4601. Pork Production Systems Management. (4 cr)

Interrelationships of business, marketing, and biological performance of pigs in various types of production systems.

ANSC 4602. Sheep Production Systems Management.

(4 cr. Prereq=2401; 3221 recommended)

Sheep management using feeding, breeding, selection, health, and physiological management aids for breeding flock and market lamb production. Taught via ITV with Crookston campus and the West Central Experiment Station, Morris.

ANSC 4603. Beef Production Systems Management. (4 cr)

How to resolve problems and manage cow-calf, stocker, or feedlot operations. Various segments of the beef industry and their current challenges. Nutrition, reproduction, genetics, and health as they relate to beef cattle production. Students evaluate a beef cattle enterprise and contribute solutions to problems in areas of marketing, selection, reproduction, nutrition, or health management.

ANSC 4604. Dairy Production Systems Management. (4 cr)

Practical applications of principles of animal breeding, nutrition, physiology, reproduction, housing, and economics in a problem solving context. Decision-cases, farm visits, field diagnostic techniques labs.

ANSC 4605. Poultry Production Systems Management.

(4 cr. Prereq=2401; 4405 recommended)

Physiology, genetics, diseases, nutrition of poultry and relation to current management practices for production of eggs, broilers, and turkeys. Technical and practical phases of production and marketing in relation to their underlying principles. Visits to commercial production units.

ANSC 4611. Advanced Pork Production Systems Management. (2 cr. Prereq=#4609; 4601)

Analysis of pork production systems using case studies and visits to modern pork production operations.

ANSC 4613. Advanced Beef Production Systems Management. (2 cr. Prereq=4609, #4603, sr)

Half semester course. Student enterprise-analysis teams evaluate a beef cattle enterprise and contribute solutions to problems in areas of marketing, selection, reproduction, nutrition, or health management.

ANSC 4614. Advanced Dairy Production Systems Management. (2 cr. Prereq=#4609; 4604)

Analysis of dairy production systems using case studies and visits to actual dairies.

ANSC 5099. Special Workshop in Animal Science. (1-6 cr [max 12 cr]; A-F only. Prereq=#)

Topics vary. See Class Schedule or department. Topics may use guest lecturers/experts.

ANSC 5200. Statistical Genetics and Genomics. (4 cr. §CMB 5200. Prereq=[STAT 3021 or equiv], [BIOL 4003 or equiv])

Linkage analysis for mapping genes with codominance, dominance, imprinting inheritance modes, linkage/transmission disequilibrium. Radiation hybrid mapping. Parentage testing. Testing/estimation of candidate gene effects. Experimental designs, statistical analysis for mapping quantitative trait loci (QTL) with additive, dominance, and epistasis effects, and for gene expression studies using microarrays. QTL analysis of gene expression data for mapping transcriptional regulation factors.

ANSC 5327. Endocrine and Reproductive Physiology. (2 cr. Prereq=2301, BIOC 3021)

Endocrine system. Synthesis, structure, actions, and regulation of hormones. Major endocrine glands/tissues, including the hypothalamus, anterior/posterior pituitary, thyroid, parathyroid, pancreas, adrenal cortex and medulla, gastrointestinal tract, and gonads. Emphasizes metabolic/reproductive endocrinology.

Anthropology (ANTH)

Department of Anthropology

College of Liberal Arts

ANTH 1001. Human Evolution. (4 cr)

From ancestors of chimpanzees and humans to origins of modern humans. Principles of evolutionary theory, behavioral biology, and comparative anatomy used to reconstruct the major events in human evolution and the behavior of ourselves and our ancestors.

ANTH 1001H. Honors: Human Evolution. (4 cr. Prereq=honors)

From ancestors of chimpanzees/humans to origins of modern humans. Principles of evolutionary theory, behavioral biology, comparative anatomy used to reconstruct the major events in human evolution, behavior of ourselves/our ancestors.

ANTH 1003V. Understanding Cultures: Honors. (4 cr. Prereq=Honors)

Introduction to social/cultural anthropology. Comparative study of societies/cultures around world. Adaptive strategies. Economic processes. Kinship, marriage, gender. Social stratification. Politics/conflicts. Religion/ritual. Personality/culture.

ANTH 1003W. Understanding Cultures. (4 cr)

Introduction to social and cultural anthropology. Comparative study of societies and cultures around the world. Topics include adaptive strategies; economic processes; kinship, marriage, and gender; social stratification; politics and conflicts; religion and ritual; personality and culture.

ANTH 1005V. Introduction to Cultural Diversity and the World System. (4 cr; A-F only)

Anthropology of cultural diversity in the United States and around the world. Comparative study of relationship between local cultures, global processes. Race/ethnicity, economic/social organization, political/religious systems, gender, social change.

ANTH 1005W. Introduction to Cultural Diversity and the World System. (4 cr)

Anthropology of cultural diversity, in the United States and around the world. Comparative study of relationship between local cultures and global processes. Race/ethnicity, economic/social organization, political/religious systems, gender, social change.

ANTH 1111. Human Origins. (3 cr; A-F only)

World prehistory as investigated by anthropologists. Methods/concepts used to study prehistoric human biological/cultural development.

ANTH 1902. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

ANTH 1904. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

ANTH 1905. Freshman Seminar: Anthropology of Dreaming and Myth. (3 cr; A-F only. Prereq—Fr)

Topics specified in *Class Schedule*.

ANTH 1906W. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics vary. See *Course Guide*.

ANTH 1907W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

ANTH 1908W. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

ANTH 1909W. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

ANTH 1910W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

ANTH 3001. Introduction to Archaeology. (4 cr)

The fundamentals of fieldwork, laboratory analysis, and interpretation in archaeology. How field and laboratory research are designed and implemented, and how results are interpreted.

ANTH 3002. Sex, Evolution, and Behavior: Examining Human Evolutionary Biology. (4 cr; A-F only)

Methods/theories used to understand humans in an evolutionary framework. What can be known only, or primarily, form an evolutionary perspective. How evolutionary biology of humans might lead to better evolutionary theory. How physiology, development, behavior, and ecology coordinate/co-evolve in humans.

ANTH 3003. Cultural Anthropology. (3 cr. §GLOS 3003. Prereq—1003 or 1005 or #)

Areas of study may include: field research and politics of ethnographic knowledge; Marxist/feminist theories of culture; culture, language, and discourse; psychological anthropology; culture/transnational processes.

ANTH 3004. Great Controversies in Anthropology. (3 cr; A-F only)

Notable controversies in anthropology: Is human “reason” the same in all cultures? What makes up evidence/truth when we study people? Whose “voices” should be heard? Should anthropologists support contemporary attempts at economic “development”? Is it possible to agree on a set of universal individual or cultural rights? Can we make qualitative judgments about cultures? What civic/political responsibilities does the anthropologist have at home and with the people whom she or he studies? In-class debates.

ANTH 3005W. Language, Culture, and Power. (4 cr)

Studying sociocultural forms by analyzing linguistic data obtained in fieldwork setting. Students work with fluent speaker of non-English language to explore an unfamiliar culture in manner of an ethnographer working with a key informant.

ANTH 3007. Laboratory Techniques in Archaeology. (1-4 cr [max 4 cr]. Prereq—#)

Plant remains, material culture, faunal remains, human osteology. Emphasizes lab experience.

ANTH 3008. Introduction to Flintknapping. (3 cr; A-F only)

Hands-on experience in replication of prehistoric stone tools, as basis for archaeological analysis and as art form in itself.

ANTH 3009. Rise of Civilization. (3 cr)

Concept of civilization, from early hunter gatherer groups through settled agricultural villages to rise of towns/cities. Compares processes of change in eight regions of the world.

ANTH 3010. Native North Americans in Regional Perspective. (3-4 cr [max 6 cr])

An in-depth cultural and historical survey of native peoples who inhabit a particular region of North America (e.g., the greater southwest, prairie/woodland transition zone, Great Lakes area, Northwest coast, etc.).

ANTH 3017. Peoples and Cultures of Middle America. (3 cr. §LAS 3017)

Indian and Mestizo (Hispanic) cultures of Mexico and Guatemala and parts of Belize, Honduras, and Nicaragua. Describes both pre-Hispanic and Hispanic influences, with attention to area-wide patterns and local traditions.

ANTH 3019. Hispanic Cultures of Latin America. (3 cr. §LAS 3019)

Hispanic cultures from Mexico to South America. Economy, underdevelopment. The family and ritual kinship. Gender, religion, values, ideology, and change. Continuity/change.

ANTH 3020. Topics in the Anthropology of Africa. (3-6 cr [max 6 cr])

Perspectives on Africa using ethnographic methods and theories. Topics such as kinship and gender; ecological adaptations; economic systems; belief systems; political organization; art and aesthetics; Islamicization; colonization; liberation movements and nationalism; culture change.

ANTH 3023. Culture and Society of India. (3 cr. §ALL 3676, §GLOS 3961)

Contemporary society and culture in South Asia from an anthropological perspective with reference to nationalism; postcolonial identities; media and public culture; gender, kinship and politics; religion; ethnicity; and the Indian diaspora.

ANTH 3025. Pacific Island Societies. (3 cr. Prereq—1003 or 1005 or 3003 or #)

Geography, prehistory, and Western exploration of Pacific Islands from Hawaii to Papua New Guinea. Culture change as these peoples become incorporated into the modern world system. Topics in regional ethnology. Relationship of societies to major issues in anthropological thought.

ANTH 3027W. Archaeology of Prehistoric Europe. (3 cr. §ANTH 5027W)

Early development of non-Mediterranean European society from Old Stone Age through Iron Age to the Roman Period, based on archaeological evidence. Principle transformations of European culture with introduction of agriculture, development of metallurgy, and emergence of towns and cities.

ANTH 3028. Introduction to Historical Archaeology. (3 cr; A-F only)

Emphasizes research approaches. Documentary research, oral history, probate inventories/acclulturation, integration of documents/archaeological data, analysis of community patterning, social analysis of architecture, foodways, artifact identification, mean ceramic dating, industrial archaeology, estimation of social status with cemetery data, sampling, report writing.

ANTH 3029. Archaeology of Native Americans. (3 cr.

Prereq—1001)
Pre-European contact and contact period archaeology of American Indians north of Mexico.

ANTH 3031. Altering States: After Communism. (3 cr)

Post-socialist transitions in Central/Eastern Europe from anthropological perspective. Daily life under socialism. Collapse of socialist rule in relation to key areas of social life such as gender, identity, nationalism, and ethnicity.

ANTH 3035. Anthropologies of Death. (3 cr; A-F only)

Anthropological perspectives on death. Diverse understandings of afterlife, cultural variations in death ritual, secularization of death in modern era, management of death in medicine, cultural shifts/conflicts in what constitutes good or natural death.

ANTH 3041. Ecological Anthropology. (3 cr. §ANTH 5041, ANTH 8213. Prereq—1003 or #)

Concepts, theories, and methods of ecological anthropology (cultural ecology). How humans interact with biophysical environment. Compares biological/cultural interactions with environment. Examines adaptive strategies cross-culturally.

ANTH 3043. Art, Aesthetics and Anthropology. (3 cr)

The relationship of art to culture from multiple perspectives including art as a cultural system; the cultural context of art production; the role of the artist in different cultures; methodological considerations in the interpretation of art across cultural boundaries.

ANTH 3045. Religion and Culture. (3 cr. Prereq—1003 or 1005 or #)

Religious beliefs and world views cross-culturally. Religious dimensions of human life through theories of origins, functions, and forms (e.g. myth, ritual, and symbolism) of religion in society.

ANTH 3046W. Romance and Culture. (3 cr)

Romance, aspects of this kind of love relationships from different perspectives in social/biological sciences. Draws on cross-cultural materials.

ANTH 3047W. Gender in Cross-Cultural Perspectives. (3 cr)

Relationship of biology and culture; cultural construction of gender and sexuality; variations in economic organization; women’s involvement in ritual and religion; impact of colonialism on gender; rise of the state and gender issues.

ANTH 3143. American Indian Languages and Cultures. (3 cr. §AMIN 3143)

Survey of cultural developments among native peoples of North American from historic times to present.

ANTH 3212. Globalization, Markets, and Inequality. (3 cr; A-F only. §GLOS 3212)

Globalization of American business/culture, uneven relationships between developed/underdeveloped national economies, social/economic consequences of market economies and free trade. Focuses on growing inequalities in global economy. Wall Street and transnational corporations, sweatshops, consumer culture, brand-name global marketing, mass downsizings.

ANTH 3221. Archaeology Field School. (3-6 cr [max 6 cr]. Prereq—3001, #)

Archaeological field excavation, survey and research. Intensive training in excavation techniques, recordation, analysis, and interpretation of archaeological materials.

ANTH 3306W. Medical Anthropology. (4 cr; A-F only. Prereq—1003 or 1005 or entry level social science course recommended)

Relations among human affliction, health, healing, social institutions, and cultural representations cross-culturally. Human health/affliction. Medical knowledge/power. Healing. Body, international health, colonialism, and emerging diseases. Reproduction. Aging in a range of geographical settings.

ANTH 3310. Topics in Biological and Physical Anthropology. (3-6 cr [max 6 cr]. Prereq=1001)

Topics may include faunal analysis, the human skeleton and osteology, primate and human evolution, and forensic anthropology. Topics vary according to student and faculty interest.

ANTH 3913. Senior Project Planning. (1 cr. Prereq=Jr or sr) ANTH major, #)

Evaluation of work to date. Planning future course work and prospectus for senior research project. Defining senior project, finding an adviser, developing preliminary bibliography.

ANTH 3980. Topics in Anthropology. (3 cr [max 6 cr])

Topics specified in *Class Schedule*.

ANTH 4001. Advanced Method and Theory in Archaeology. (3 cr. Prereq=1001 or 3001)

Survey and in-depth discussion of past and contemporary archaeological, theoretical, and methodological issues and approaches. Projects incorporating theories and methods. Emphasis on problem solving and integrating method and theory.

ANTH 4003W. Contemporary Perspectives in Cultural Anthropology. (3 cr; A-F only. Prereq=[1003 or 1005], jr | or #)

Concept of culture, practice of fieldwork as they relate to various social institutions. Anthropological perspectives on race, ethnicity, gender.

ANTH 4011. Senior Seminar. (3 cr; A-F only. Prereq=Sr, ANTH major)

Research seminar. Topics/methodologies differ according to staff, student interests. Students complete substantial research paper.

ANTH 4013. Senior Project. (3 cr. Prereq=Sr major, #)

Independent research project fulfilling the senior option; directed by a faculty member.

ANTH 4019. Symbolic Anthropology. (3 cr. \$ANTH 8211.

Prereq=1003 or 1005 or grad student or #)

Pragmatic/structural aspects of social symbolism cross-culturally. Focuses on power, exchange, social boundaries, gender, and rituals of transition/reversal.

ANTH 4021. Psychological Anthropology. (3 cr. \$ANTH 8209.

Prereq=[1003 or 1005], 3003 or #)

Self, emotion, cognition, and child development in cross-cultural perspective. Examines cultural and social influences on personality, and psychological foundations of society and culture.

ANTH 4023W. Culture Theory. (3 cr; A-F only. Prereq=Jr or sr or grad or #)

In-depth examination of key developments in the culture concept, from Darwin to present-day postmodern approaches. Examines the view that cultures have an inherent order that cannot be explained psychologically or biologically, and reactions to this view.

ANTH 4025. Studies in Ethnographic Classics. (3 cr; A-F only. Prereq=1003 or 1005)

Five types of explanations employed in ethnographic research: diffusionism and theory of survivals; functionalist response; British structuralists; French structuralism; interpretive turn. Problems in ethnographic practice, analysis, and writing. Focuses on several classic monographic examples and associated theoretical writing.

ANTH 4031W. Anthropology and Social Justice. (4 cr.

Prereq=1003 or 1005 or 4003 or grad student or #)

Practical application of theories/methods from social/cultural anthropology. Issues of policy, planning, implementation, and ethics as they relate to applied anthropology.

ANTH 4035. Ethnographic Research Methods. (3 cr. Prereq=1003 or 1005 or grad student)

History of and current issues in ethnographic research. Research projects, including participant observation, interviewing, research design, note taking, life history, and other ethnographic methods.

ANTH 4043. Archaeology of Northern Europe. (3 cr)

Archaeology of Scandinavia, British Isles, and northern parts of continental Europe, from late-Bronze Age through Viking Period. Themes include art and symbolism; growth of towns; societal interactions; religion and ritual; introduction of Christianity; and development of long-distance trade.

ANTH 4045. Gender and Power in South Asia. (3 cr)

Analysis of the politics of gender in South Asia, especially India, focusing on colonial and nationalist constructions of gender and "tradition"; kinship, class and gender; gender and women's speech; feminism in India; fundamentalism and postcolonial identities; gender and violence.

ANTH 4047. Anthropology of American Culture. (3 cr. Prereq=1003 or 1005 or 3003 or #)

Anthropological approaches to contemporary American society and culture. Tensions between market and family. Unity and diversity. Individualism and community.

ANTH 4049. Religion and Culture. (3 cr. Prereq=1003 or 1005 or #)

Religious beliefs and world views cross-culturally. Religious dimensions of human life through theories of origins, functions, and forms (e.g. myth, ritual, symbolism) of religion in society.

ANTH 4051. Kinship, Gender, and Diversity. (3 cr. Prereq=1003 or 1005)

Cross-cultural variation in meanings, expectations, and practices related to marriage, family, sexuality and parenthood. Applies knowledge of variations to cultural diversity and other issues in U.S. society (e.g. changing marriage and family forms, incest, reproductive rights, reproductive technology).

ANTH 4053. Economy, Culture, and Critique. (3 cr. \$ANTH 8205)

Systems of production/distribution, especially in nonindustrial societies. Comparison, history, and critique of major theories. Cross-cultural anthropological approach to material life that subsumes market/nonmarket processes.

ANTH 4057. Politics and Law. (3 cr. Prereq=1003 or 1005 or grad student)

Problems of inequality, order and authority in nonstate as well as state-based societies. Historical and cross-cultural survey of the concepts through which these problems have been understood. Comparative political/legal systems, featuring case studies from Africa, Burma, New Guinea, Indonesia, and the United States.

ANTH 4065. The Anthropology of Development. (3 cr)

Anthropological contributions to development practice/theory. Anthropological analysis of development institutions. Theories of development. Case studies from several parts of world explore relation of global forces and local cultures.

ANTH 4069. Environmental Archaeology. (3 cr. Prereq=1001, 3001 or grad)

Use of remains from archaeological sites and off-site records of ancient landscapes, vegetation, and climate to reconstruct how humans interacted with their environments. Interdisciplinary approaches toward reconstructing past human environments; long-term local and global environmental change.

ANTH 4071. Race and Culture. (3 cr; A-F only. Prereq=1003 or 1005 or 3003 or #)

Evaluation of main trends in study of racism. Psychological, sociological, symbolic, and "critical" approaches that treat racism as a social discursive phenomenon. Racist discourse as a practice that defines an "other" and subjugates that other to strategies of exclusion.

ANTH 4075. Cultural Histories of Healing. (3 cr; A-F only. Prereq=Jr or sr or grad student or #)

Introduction to historically informed anthropology of healing practice. Shift to biologically based medicine in Europe, colonialist dissemination of biomedicine, political/cultural collisions between biomedicine and "ethnomedicines," traffic of healing practices in a transnationalist world.

ANTH 4077. Neanderthals: Biology and Culture of Humanity's Nearest Relative. (3 cr. Prereq=1001 or 3001 or 3002 or #)

Paleontological/archaeological record. Students reconstruct behavioral similarities/differences between Neanderthals and modern humans. Why humans alone survived end of Pleistocene.

ANTH 4980. Topics in Sociocultural Anthropology. (3 cr [max 6 cr]. Prereq=1003 or #)

Special topics in social/cultural anthropology. Topics specified in *Class Schedule*.

ANTH 4990. Topics in Archaeology: Seminar. (3-6 cr [max 6 cr]. Prereq=1001 or 3001 or #)

Discussion/review/analysis of specific current theoretical and/or methodological issues in archaeology. Topics specified in *Class Schedule*.

ANTH 4991. Independent Study. (1-6 cr [max 6 cr]. Prereq=#)

Under special circumstances and with the approval of the instructor, qualified students may register for a listed course on a tutorial basis.

ANTH 4992. Directed Readings. (1-6 cr [max 6 cr]. Prereq=#)

Allows students to pursue special interests in anthropology through reading materials under the guidance of a faculty member.

ANTH 4993. Directed Study. (1-6 cr [max 6 cr]. Prereq=#)

Allows students to pursue special interests in anthropology under the guidance of a faculty member.

ANTH 4994W. Directed Research. (1-6 cr [max 6 cr]. Prereq=#)

Qualified students may conduct a well-defined research project under the guidance of a faculty member.

ANTH 5008. Advanced Flintknapping. (3 cr; A-F only. Prereq=[3008 or 5269] or #)

Hands-on training in techniques of advanced stone tool production, artifact reproduction, and lithic experimental design for academic/artistic purposes.

ANTH 5025W. Cultural Semantics. (3 cr)

Understanding cultures and cognitive classification systems through lexical semantics.

ANTH 5027W. Origins of European Civilization. (3 cr. \$ANTH 3027W)

Early development of European society, from Old Stone Age to Roman period. Principle transformations of European culture with introduction of agriculture, development of metallurgy and trade, and emergence of towns and cities.

ANTH 5029. Philosophical Anthropology. (3 cr; A-F only. Prereq=Sr or grad or #)

Advanced survey of traditional problems associated with broad-ranging views on human nature and culture. Specific arguments of relativists, behaviorists, phenomenologists, and others in relation to social life. Structuralist and post-structuralist approaches.

ANTH 5031. Science as Cultural Practice. (3 cr. Prereq=Sr or grad student or #)

Ethnographic, historical and sociological accounts of scientific practice. How facts are constructed/negotiated. Social, cultural, and political influences on scientific methods. How scientific projects articulate with hierarchies of race/gender. International differences in scientific practice.

ANTH 5033. Feminist Anthropology. (3 cr. Prereq=3047 or grad or #)

Advanced introduction to the development of feminist theory in anthropology. Theoretical and methodological shifts in feminist anthropology and ethnography. Feminist ethnography within the discipline as a whole; current debates concerning the reading and writing of ethnography.

ANTH 5041. Ecological Anthropology. (3 cr; §ANTH 3041, ANTH 8213. Prereq—Grad or #)
Concepts, theories, and methods of ecological anthropology (cultural ecology) show how humans interact with the biophysical environment. Compare biological and cultural interactions with the environment; examine adaptive strategies cross-culturally.

ANTH 5043. Colonialism and Culture. (3 cr; A-F only. §GLOS 5643)

Making of culture as colonial/anthropological object of knowledge. Relationship between colonial knowledge/formation of academic disciplines (especially anthropology). Colonial/postcolonial transformations of colony, nation, and metropole.

ANTH 5045. Urban Anthropology. (3 cr. Prereq—4003 or grad or #)

Anthropological approaches to urban life in Western and non-Western settings. Topics include social networks and voluntary organizations; class, ethnicity, gender and power; migration and immigration; urban labor and economics; and urban “problems.”

ANTH 5221. Anthropology of Material Culture. (3 cr; A-F only)

Material culture as a social creation, studied from multiple perspectives (e.g., social anthropology, archaeology, primatology). Conceptions of how humans articulate with material world they construct.

ANTH 5244. Skeletal Materials for Archaeologists. (4 cr; A-F only. §ANTH 8244. Prereq—#)

How anthropologists use fossil bones to answer questions of past human diet, behavior, and environments. Basics of skeletal-element/species identification of humans and large mammals. Project where students analyze a small assemblage of bones. Emphasizes scientific method, data analysis using computers.

ANTH 5269. Analysis of Stone Tool Technology. (4 cr; A-F only. Prereq—1001 or 3001 or #)

Practical lab experience. How to analyze archaeological collections of stone tools to learn about human technological behavior in past. Students analyze archaeological/experimental collections, make stone tools themselves.

ANTH 5980. Topics in Anthropology. (3 cr [max 6 cr])
Topics specified in *Class Schedule*.

ANTH 5990. Topics in Archaeology. (3 cr [max 9 cr]; A-F only. Prereq—#)

Topics specified in *Class Schedule*.

Applied Business (ABUS)

College of Continuing Education

ABUS 4011. Historical Perspectives and Contemporary Business Challenges. (3 cr; A-F only. Prereq—At least 45 cr)

Global competitiveness, product and service quality, information revolution, and changing customer/workforce demographics. Approaches to meeting contemporary challenges studied against historical backdrop of evolving management practices. Emphasizes developing systematic ways of analyzing complex problems.

ABUS 4012. Problem Solving in Complex Organizations. (3 cr; A-F only. Prereq—At least 45 cr)

Open systems perspective. Analyzing root causes/effects of problems/solutions across boundaries in organization. Process analysis as problem-solving tool. Problem-solving frameworks/processes. Techniques for analyzing root causes, expanding alternatives, predicting consequences, making choices.

ABUS 4021. Small Group Behavior and Teamwork. (3 cr; A-F only. Prereq—At least 45 cr)

Emphasizes work groups in organizations. Factors affecting performance/productivity. Identify formal/informal roles. How effective teamwork is created/sustained. Leadership/followership practiced.

ABUS 4022. Management in Organizations. (3 cr; A-F only. Prereq—45 cr completed)

Demands on today's managers. Techniques/ideas beyond traditional studies. Focuses on small to medium-sized organizations. Applying management theory to all levels. Managing in global workplace. Organizational planning and decision making. Organizing resources. Leading/motivating people. Controlling/evaluating organizational activities.

ABUS 4023W. Communicating for Results. (3 cr; A-F only. Prereq—45 cr completed)

Aspects of communication essential for being persuasive/influential. Organizing/presenting ideas effectively, strategies for audience analysis, choosing communication methods, making appropriate use of informal influence methods, handling dissent. Processes for intercultural communication.

ABUS 4024. Effective Oral Communication and Business Presentations. (1 cr [max 2 cr]; A-F only. Prereq—BAS student with at least 45 cr)

Building/developing business presentation skills and oral communications effectiveness. Videotaping/critiques of actual presentations based on audience analysis, technique selection, and handling receptive/hostile audiences.

ABUS 4025. Negotiating for Agreement. (1 cr; A-F only. Prereq—At least 45 cr)

Practical negotiating tools, hands-on practice to engage in win-win negotiations.

ABUS 4031. Accessing and Using Information Effectively. (3 cr; A-F only. Prereq—Computer literacy, at least 45 cr)

Role of information in business operations. Information systems, data management. Accessing external information using information search services, CD-ROMs and periodicals. Accessing internal information using desktop database system, electronic mail, or computer conferencing. Typology of information applied in case studies and exercises.

ABUS 4032. Quantitative Skills for Decision Making. (3 cr; A-F only. Prereq—College algebra, college statistics, at least 45 cr)

Exploratory data analysis, visual display of data, basic mathematical/statistical techniques for analysis. Decision theory, decision modeling.

ABUS 4041. Dynamics of Leadership. (3 cr; A-F only. Prereq—At least 45 cr)

Successful leadership via flexible approach. Knowledge, skills, and abilities that leaders develop from eight leadership strategies: academic, bureaucratic, eclectic, economic, fellowship, military, political, social. Ways to lead diverse populations in a global environment.

ABUS 4042. Planning and Implementing Strategic Decisions. (3 cr; A-F only. Prereq—4101, [4103 or 4701], at least 45 cr)

Strategic assessment of a company's competitive capabilities/performance. How companies allocate resources to their activities. Analyzing business environment, assessing business risk, determining what actions are needed. Evaluating choices firms make to compete successfully and sustain profitability.

ABUS 4043. Project Management in Practice. (3 cr; A-F only. Prereq—4102, at least 45 cr)

Introduction to project management, including tools/techniques to support project leader in scheduling, coordinating, and allocating resources. Students work in teams to develop/conduct a field project, putting tools of project management into practice. Requires use of MS Project (bundled w/textbook), Word, PowerPoint.

ABUS 4044. Tools for International Trade. (3 cr; A-F only. Prereq—At least 45 cr)

International forces/trends. Identifying ways in which businesses can work within context of international change. Tools used in specific transactions, ways to diagnose in what circumstances they are most appropriately applied.

ABUS 4101. Accounting for Managers. (3 cr; A-F only. Prereq—Financial accounting, at least 45 cr)

Using accounting data to make day-to-day management decisions. Determining cost-volume-profit relationships, measuring various costs, evaluating capital budgets. Acceptability of investment projects. Constructing profit plans, evaluating budget variances. Analyzing activity costing and standard costs.

ABUS 4102. Operations in Manufacturing and Service Businesses. (3 cr; A-F only. Prereq—At least 45 cr)

Concepts/principles related to management of operations functions. Operations strategy, process, design, just-in-time inventory management, forecasting, scheduling, quality improvement. Relationships between operations and the environment.

ABUS 4103. Marketing and Sales. (3 cr; A-F only. Prereq—At least 45 cr)

Legal, behavioral, ethical, competitive, economic, and technological factors as they affect product pricing, promotion, and marketing. Personal selling function as integral part of distribution system. Sales force organization, selection, training, motivation, compensation, forecasting, budgeting, control.

ABUS 4104. Management and Human Resource Practices. (3 cr; A-F only. Prereq—At least 45 cr)

Providing day-to-day leadership. Organizing work, motivating employees. Delegating, coordinating, and achieving results. Front line human resource practices, including selection, induction, and training of new employees, employee appraisal. Handling grievances/discipline.

ABUS 4501. Entrepreneurship. (3 cr; A-F only. Prereq—4101, [4103 or 4701], at least 45 cr)

Self-employment as alternative to employment. Phases of entrepreneurship, including identifying an opportunity, start-up, managing/harvesting a small business. Emphasizes all aspects of business plan.

ABUS 4503. Technological Change, Work Organization, and Management Practices. (3 cr; A-F only. Prereq—At least 45 cr)

Evolution of work organization in the United States. Factors responsible for changes. Effect of changes on labor-management relations. Revolutions in technology, scientific management, collective bargaining, self-directed work teams, and lean production methods.

ABUS 4505. Values and Ethics at Work. (1 cr; A-F only. Prereq—At least 45 cr)

Ways in which we look at work/our jobs. Religious, legal, social, cultural, and personal viewpoints. Topics may include pay equity/benefits, discrimination, product liability, corporate political contributions, loyalty, family/work conflicts, community responsibility, and role of business in society. Case examples.

ABUS 4507. Change-Agent Skills. (3 cr; A-F only. Prereq—At least 45 cr)

Assessing needed change in relation to environment. Phases of change. Persuasive techniques. Shared responsibilities in carrying out change. Change as internal/external process. Leadership practices.

ABUS 4509. New Product Development. (3 cr; A-F only. Prereq—[4103 or 4701 or MKTG 3001], at least 45 cr or #)

How new consumer, industrial, and service products are planned/developed. Idea generation, concept/buyer testing, pricing, sales/profit strategies, product positioning, promotion, packaging/distribution. Marketing case histories. Student projects.

ABUS 4511. Small Business Management Skills. (3 cr; A-F only. Prereq—[4501 or business plan experience], [4101 or 4701 or equiv], at least 45 cr)

Forging realistic growth trajectory. Designing adaptive organization. Identifying/building on strengths. Avoiding growth-induced failure. Coping in environment of resource poverty. Real-life cases.

ABUS 4515. Changing the American Workplace: Choice or Destiny? (3 cr; A-F only. Prereq—At least 45 cr)
Evolution of work organization. Revolutions in technology, scientific management, collective bargaining, self-directed work teams, and lean production methods. Limited to 25.

ABUS 4601. Corporate Finance. (3 cr; A-F only. Prereq—ACCT 2050, [ECON 1101 or ECON 1102], MATH 1031, 45 cr completed)
Principles of financial management. Implementation by corporate financial managers in strategic financial decisions. Financial statement analysis. Time value of money. Risk/return. Equity valuation. Fixed income securities. Capital budgeting analysis. Cost of capital. Long-term financing. Capital structure analysis. Dividend policy.

ABUS 4701. Introduction to Marketing. (3 cr; A-F only. Prereq—ACCT 2050, ECON 1101, 45 cr completed)
Conceptual tools for creating a marketing plan. How marketing relates to other functional areas of business. Importance of an ethical, global view.

ABUS 4901. Special Topics in Applied Business. (3 cr; A-F only. Prereq—At least 45 cr)
Management issues in a changing workplace. Topics vary.

ABUS 4993. Directed Study. (1-3 cr [max 6 cr]. Prereq—#, Δ)
Specially arranged projects, trips, or field work.

ABUS 4999. Practicum. (3 cr [max 9 cr]; A-F only. Prereq—BAS student in applied business, at least 33 applied-business cr, #, Δ)
Project in student's employing organization or in organization providing an internship. Integrates projects from previous coursework or develops plan for new venture or expands existing business. Limited class meetings.

Applied Economics (APEC)

Department of Applied Economics

College of Food, Agricultural and Natural Resource Sciences

APEC 1001. Orientation to Applied Economics. (1 cr; A-F only)

Introduction to curriculum offerings, liberal education requirements, employment opportunities, faculty in the Department of Applied Economics. Emphasizes historical development of the discipline, areas of specialization, coursework expectations, career planning.

APEC 1101. Principles of Microeconomics. (3 cr. §ECON 1101, ECON 1101H, ECON 1104)

Theory of the household and firm; demand and supply; price determination; government in the market; market structures; agriculture and food; externalities and the environment; labor markets and unions; capital and interest; project evaluation; human capital.

APEC 1102. Principles of Macroeconomics. (3 cr. §ECON 1102, ECON 1102H, ECON 1105. Prereq—1101 or ECON 1101)
Unemployment/inflation, measures of national income, macro models, fiscal policy/problems. Taxes and the national debt. Money/banking, monetary policy/problems. Poverty and income distribution. International trade and exchange rates. Economic growth/development.

APEC 1251. Principles of Accounting. (3 cr. §ACCT 2050. Prereq—30 cr; not recommended for premajors in AgFoodBus majors)
Fundamentals of business accounting, basic finance concepts, use of accounting data for income tax and managerial decision making.

APEC 1905. Topics: Freshman Seminar. (1-3 cr [max 3 cr]; A-F only. Prereq—Fr)
Topics vary.

APEC 3000. Seminar in International Agriculture. (1 cr [max 3 cr]. Prereq—#)
Presentation and discussion of students' research papers, literature reviews of selected topics, or discussions by students and faculty of their experiences in international agriculture.

APEC 3001. Applied Microeconomics: Consumers, Producers, and Markets. (4 cr. §ECON 3101, ECON 3101H, ECON 3105. Prereq—[[1101 or ECON 1101], [MATH 1142 or MATH 1271]] or #)
Consumer/producer decisions. Supply/demand, market structure. General equilibrium and welfare. Effects of government regulations, market failure.

APEC 3002. Applied Microeconomics: Managerial Economics. (4 cr. Prereq—[[3001 or ECON 3101], [OMS 2550 or STAT 3011]] or #)
Microeconomic theory, its application to managerial problems. Introduction to regression analysis, demand analysis, demand function estimation, forecasting, cost function estimation, resource allocation decisions, linear programming, market structure, pricing policy, risk analysis, investment analysis.

APEC 3006. Applied Macroeconomics: Government and the Economy. (3 cr. §ECON 3102, ECON 3102H. Prereq—[[1102 or ECON 1102], [3001 or ECON 3101]] or #)
Public sector and market economics. Public goods, externalities, and other allocation issues. Government and stabilization of national economy. Overview of new classical/Keynesian models. Principles of taxation. Individual income tax. Sales, business, and property taxes.

APEC 3007. Applied Macroeconomics: Policy, Trade, and Development. (3 cr. Prereq—[1101 or ECON 1101], [1102 or ECON 1102]; 3001, 3006 recommended)
Foreign trade, development, and growth. General equilibrium models for affects of trading blocks on U.S. agriculture and broader economy. Importance of growth on incomes. Foreign trade. Policies that impact world trade, economic growth.

APEC 3041W. Economic Development of U.S. Agriculture. (3 cr. Prereq—1101 or ECON 1101)
Economic, political, social, and technical forces that have shaped development of U.S. agriculture. Role of agricultural development in national economic development in the United States. Implications for developing countries.

APEC 3071. Agriculture and Economic Growth in Developing Countries. (3 cr. Prereq—1101, 1102, ECON 1101, 1102 or #)

Characteristics and performance of peasant agriculture; potential role of agriculture in economic development, and design of economic policies to achieve agriculture and economic development; role of women in agricultural development.

APEC 3411. Commodity Marketing. (3 cr. Prereq—1101 or ECON 1101)

Economic concepts related to marketing agricultural commodities. Conditions of competitive markets, historical perspectives on market institutions/policy, structural characteristics of markets, policies/regulations affecting agricultural marketing of livestock, crop, and dairy products.

APEC 3451. Food and Agricultural Sales. (3 cr. Prereq—1101 or ECON 1101)

Professional selling of agricultural and food products. Students build/refine sales abilities, identify/qualify prospects, deliver sales presentations, close the sale. Principles of market research.

APEC 3501. Agribusiness Finance. (3 cr. §FINA 3000, FINA 3001. Prereq—[[1251 or ACCT 2050], 60 cr] or #)
Analysis of financing and investment strategies for agribusiness firms and their effects on liquidity, solvency, and profitability. Analysis of financial institutions, markets, and instruments. Management problems, issues facing financial intermediaries serving agriculture.

APEC 3611. Environmental and Natural Resource Economics. (3 cr. Prereq—1101 or ECON 1101)

Basic concepts of resource use. Financial/economic feasibility. External effects, market failures. Resource use, environmental problems. Measuring impacts of resource development. Economics of alternative resource programs, environmental strategies.

APEC 3801. Health Economics and Policy. (3 cr. §PUBH 3801. Prereq—[[1101 or ECON 1101], knowledge of plane geometry] or #)

Economics of health care markets. Problems faced by consumers and health care services. Builds on microeconomic principles of supply/demand for health, health care, health insurance, and role of government. Theoretical/empirical models, applications.

APEC 3811. Principles of Farm Management. (3 cr. Prereq—1101 or ECON 1101)

Strategic and operations aspects of farm management; financial analysis, budgeting, strategic management; marketing plan and control; enterprise and whole farm planning and control; investment analysis, quality, risk, and personnel management.

APEC 3821. Retail Center Management. (3 cr. Prereq—[1101 or ECON 1101], [1251 or ACCT 2050])

Management of garden centers, grocery stores, and other retail units selling perishable agricultural products.

APEC 3991. Independent Study in Applied Economics. (1-4 cr [max 4 cr]. Prereq—#)

Independent study and supervised reading and research on subjects and problems not covered in regularly offered courses.

APEC 4096. Professional Experience Program: Internship. (1-3 cr [max 6 cr]; S-N only. Prereq—COAFES jr or sr, #, complete internship contract available in COAFES Career Services before enrolling; UC only)

Professional experience in agribusiness firms or government agencies gained through supervised practical experience; evaluative reports and consultations with faculty advisers and employers.

APEC 4103. World Food Problems. (3 cr. §AGRO 4103, CVM 6060, FSCN 4103. Prereq—jr or sr or grad)

A multi-disciplinary look at problems and possible solutions affecting food production, storage, and utilization in developing countries. Presentations and discussions introduce conflicting views on population, technology, and ethical and cultural values of people in various parts of the world.

APEC 4311. Tourism Development: Principles, Processes, Policies. (3 cr. Prereq—1101, 1102 or ECON 1101, 1102)

Evolution of tourism industry; economic, environmental, and sociocultural impacts of tourism development; influence of government policies and organizations; models and tools needed for successful development; consequences of development activities and ways to involve stakeholders in decisions.

APEC 4451W. Food Marketing Economics. (3 cr. §APEC 5451. Prereq—[[1101 or ECON 1101], MKTG 3001, 60 cr] or #)
Economics of food marketing in the United States. Food consumption trends, consumer food behavior, marketing strategies, consumer survey methodology, food distribution/retailing system. Policy issues related to food marketing. Individual/group projects.

APEC 4481. Futures and Options Markets. (3 cr. §APEC 5481. Prereq—[[3001 or ECON 3101], [ANSC 2211 or OMS 1550 or STAT 3011], 60 cr] or #)
Economics of futures/options trading in theory/application. Basis/price relationship in storable/nonstorable commodities. Hedging/commercial use of futures/options contracts. Speculation. Pricing efficiency. Market performances/regulation.

APEC 4501. Financial Applications. (3 cr; A-F only. Prereq—[3501 or FINA 3001], [1251 or ACCT 2050])
Designing/implementing solutions to financial problems with Microsoft Excel® spreadsheet software. Development of computer-based tools. Interpreting/implementing concepts/theories in economics/finance.

APEC 4821W. Agribusiness Management. (5 cr. Prereq—3002, [3501 or FINA 3001], MGMT 3001)
Strategic/operations management for production, processing, wholesaling, retailing, and service. Establishing mission/goals. Strategy formulation, implementation, and control. Quality management, process selection, operations planning, inventory management, human resource issues. Business plans. Case study analysis.

APEC 5031. Methods of Economic Data Analysis. (3 cr. Prereq—MATH 1271, STAT 5021, knowledge of matrix algebra)
Statistical and econometrics techniques for applied economists. Theory and application of multivariate regression model using data sets from published economic studies. Emphasis on use of statistical technique to understand market behavior.

APEC 5032. Economic Data Analysis for Managerial and Policy Decisions. (3 cr. Prereq—5031 or #, familiarity with SAS)

Statistical/econometric methods for the analysis of large data sets to support managerial/policy decisions. Methods for organizing, accessing, and ensuring the quality of data. Estimation techniques include panel data methods, limited dependent variable models, and time series analysis. Emphasizes clarity of reporting and design of procedures for maintaining/updating data estimates.

APEC 5151. Applied Microeconomics: Firm and Household. (3 cr. Prereq—3001 or MATH 1271 or Math 2243 or equiv or grad student or #)

Quantitative techniques for analysis of economic problems of firms and households. Links between quantitative tools and economic analysis Regression analysis, mathematical programming, and present value analysis.

APEC 5152. Applied Macroeconomics: Income and Employment. (3 cr. Prereq—3001 or MATH 1271 or Math 2243 or equiv or grad student or #)

Static general equilibrium open economy models and simple business cycle models that examine economic growth, business cycles, and fiscal and monetary policy. Input-output analysis and large scale econometric models. Sources/properties of economy and sector-wide data. Empirical applications.

APEC 5321. Regional Economic Analysis. (3 cr. Prereq—3006 or ECON 3102 or #)

Regional development patterns and role of resources, transportation, and institutional constraints. Trade, migration, and investments in regional growth and change. Regional economic information in investment and location decisions. Evaluation of economic development policies and tools. Economic impact analysis.

APEC 5341. Public Finance. (3 cr; A-F only. Prereq—3001 or ECON 3101 or PA 5021)

Which services should the public sector provide? Which level of government should provide them? How should governments fund those services? Which types of taxes should be levied and on whom? Applying economic theory/analysis to spending, revenue, and tax policy issues facing governments.

APEC 5451. Food Marketing Economics. (3 cr; A-F only. SAPEC 4451W. Prereq—Grad student)

Economics of food marketing in the United States. Food consumption trends. Consumer food behavior, expenditure, data collection. Consumer utility models, demand forecasting. Food distribution system. Changes in supply chain, industry structure that serves retail food outlets. Individual/group projects.

APEC 5481. Futures and Options Markets. (3 cr. SAPEC 4481. Prereq—Grad student)

Economic concepts related to futures/options trading. Hedging, speculation.

APEC 5511. Labor Economics. (3 cr. Prereq—[[3001 or ECON 3101 or PA 5021], [PA 5032 or equiv], grad student] or #)

Theoretical foundations of labor markets. Intertemporal/household labor supply. Demand for labor, efficiency wages. Human capital theory, unemployment, migration decisions. Analysis of econometric research applied to labor policy issues such as minimum wage, tax policy, social insurance, education.

APEC 5581. Human Capital and Household Economics. (3 cr. Prereq—3001 or ECON 3101 or #)

Household economics and investment in human capital (e.g., children, education, health and nutrition); labor force participation, lifetime earnings, and nonmarket work; time allocation and substitution of capital for labor in the household in the western and third world.

APEC 5611. Economic Aspects of Environmental Management. (3 cr; A-F only. Prereq—[Sr or grad student] in [biological science or conservation biology or ecology or fisheries or forestry or public affairs or water resources or wildlife conservation] or CLA or #)

Economist approach to environmental problems such as water/air pollution. Application of supply/demand concepts to evaluation of environmental resources. Methods of evaluation. Analysis of pollution control policies from economic point of view.

APEC 5651. Economics of Natural Resource and Environmental Policy. (3 cr. Prereq—[[3001 or ECON 3101], [4611 or ECON 3611 or NRES 3261W]] or #)

Economic analyses, including project evaluation of current natural resource/environmental issues. Emphasizes intertemporal use of natural resources, natural resource scarcity/adequacy, environmental quality, and mechanisms for pollution control and their implications for public policy.

APEC 5711. U.S. Agricultural and Environmental Policy. (3 cr. Prereq—3001 or ECON 3101)

U.S. agricultural policy in an open world economy; role of private markets and government in regulating supply and demand; income vs. price support, supply controls, environmental constraints, and export protectionism; functioning of markets; roles of public interest groups and future of American agricultural policy.

APEC 5721. Economics of Science and Technology Policy. (3 cr. Prereq—[[5151 or #5151], PA 5022] or #)

Economics of technical change, research, and technology. Productivity. Methods for evaluating impacts of R&D. Intellectual property rights.

APEC 5731. Economic Growth and International Development. (3 cr. Prereq—3002 or [ECON 3101, STAT 3022]; ECON 4211 recommended)

Economics of research/development. Technical change, productivity growth. Impact of technology on institutions. Science/technology policy.

APEC 5751. Global Trade and Policy. (3 cr. Prereq—3001 or ECON 3101 or PA 5021)

Trade policies of import/export nations, gains from trade, trade negotiations/agreements. Free trade and common market areas. Exchange rate impacts. Primary commodities and market instability. Current trade issues.

APEC 5811. Cooperative Organization. (3 cr. Prereq—3001 or ECON 3101 or PA 5021 or #)

Application of economic analysis to cooperative form of organization. Producer/consumer cooperatives used to examine economic issues such as changing market organization, financing, management incentives, taxation, and antitrust regulations. Cooperatives as a tool for economic development.

APEC 5891. Independent Study: Advanced Topics in FARM and Agribusiness Management. (1-4 cr [max 4 cr]. Prereq—#)

Special topics or individual work suited to the needs of particular groups of students.

APEC 5991. Special Topics and Independent Study in Applied Economics. (1-4 cr [max 12 cr]. Prereq—#)
Special classes, independent study, and supervised reading and research on subjects and problems not covered in regularly offered courses.

Arabic (ARAB)

Department of African American and African Studies

College of Liberal Arts

ARAB 1101. Beginning Arabic. (5 cr)

Oral practice, reading, comprehension, basic grammar. For students with no previous training in Arabic.

ARAB 1102. Beginning Arabic. (5 cr. Prereq—1101 or equiv or #)

Comprehension, oral practice, and reading of standard Arabic. Continuation of 1101.

ARAB 1201. Reading in Arabic I. (4 cr. Prereq—1101 or equiv or #)

Reading authentic texts/articles in Arabic. Translation, interpretation.

ARAB 1202. Reading in Arabic II. (4 cr. Prereq—1201 or equiv or #)

Reading authentic texts/articles in Arabic. Translation, interpretation.

ARAB 3036. Islam: Religion and Culture. (3 cr. HIST 3493, HUM 3036, RELA 3036)

Religion of Islam, faith, practices, sectarian splintering, expansion outside original home to status of world religion, institutions, status in world societies—Asia, Europe, the Americas.

ARAB 3101. Intermediate Arabic I. (5 cr. Prereq—1102 or equiv or #)

Advanced grammar and conversational practice. Reading Arabic texts.

ARAB 3102. Intermediate Arabic II. (5 cr. Prereq—3101 or #)

Advanced grammar, analyses of readings, oral comprehension.

ARAB 3491. Classical Islamic Civilization. (3 cr. SARAB 5491, HIST 3491, MELC 3491)

Islamic legacy in the classical age (800-1400), including medical and natural sciences, mathematics, philosophy, literature, and their transmission to Europe.

ARAB 3505. Survey of the Middle East. (3 cr. SARAB 5505, HIST 3505, MELC 3505)

Peoples, lands, and cultures of the Middle East. Historical survey from earliest civilizations to the present.

ARAB 3514. African-Arabic Literature in Translation. (3 cr)

Literature from continental Africa in Arabic. Novels, short stories, poetry, and drama by such writers as Abd-al-Hayy, Abd-al-Sabur, Mahfouz, El-Saadawi, and Wattar. No knowledge of Arabic required.

ARAB 3524. Introduction to the Qur'an. (3 cr)

Textual, thematic, interpretive, and narrative aspects of the Qur'an and its influence on modern Arabic literature. All readings in English.

ARAB 3541. Islam in the Catholic Age: ARAB Phase 600 A.D. to 900 A.D.. (3 cr. SARAB 5541, HIST 3541, MELC 3541)

The rise of Islam in its Arabian setting. Roles of the prophet, the Orthodox and Umayyad Caliphs. Development of the Islamic state and empire. Status of Muslims and non-Muslims.

ARAB 3542. Medieval Islam. (3 cr. SARAB 5542, HIST 3542, MELC 3542)

Islamic dynasties, Mamluks and Mongols, and Crusaders and Assassins. Abbasid Caliphate's disintegration and rise of Seljuk Turks.

ARAB 3543. Arabs Under Mamluks and Ottomans: 1300-1920. (3 cr. \$ARAB 5543, HIST 3543, MELC 3543)
Struggle against Crusaders and Mongols. Disintegration and reemergence under Muhammad Ali of Egypt; dynastic struggles in Syria; rise of Young Turks; Arab revolt.

ARAB 3544. Arab World 1920 to the Present. (3 cr. \$ARAB 5544, HIST 3544, MELC 3544)
Struggle in the Arab world for independence and its course since independence. Emphasis on development, political stability and unity; political structures; the Arab-Israeli conflict.

ARAB 3547. The Ottoman Empire. (3 cr. \$HIST 3547)
Founding of Ottoman society and state to empire, 1300 to end of the empire in 1920. Lands, institutions, peoples, legacy, impact on Europe.

ARAB 3900. Topics in Arabic Culture and Literature. (4 cr [max 8 cr])
Topics specified in course guide.

ARAB 3993. Directed Study. (1-3 cr [max 3 cr]. Prereq-#)
For advanced students with individual faculty members.

ARAB 5001. Research Methods in Arabic Studies. (3 cr)
Skills and techniques required to deal with medieval and modern works in Arabic literature and Islam. A survey of the most important research bibliographies in Arabic and Islamic studies. Bibliographic references in English and, when appropriate, Arabic.

ARAB 5011. Islam in Africa. (3 cr)
Ideological, doctrinal, and ritual aspects of continental African Islam. Emphasis on various religious brotherhoods and Sufi orders from different African countries in the 20th century. No knowledge of Arabic required.

ARAB 5036. Islam: Religion and Culture. (3 cr)
Religion of Islam, faith, practices, sectarian splintering, expansion outside original home to status of world religion, institutions, status in world societies - Asia, Europe, Americas.

ARAB 5101. Advanced Arabic I. (3 cr [max 4 cr]. Prereq-3102 or equiv or #)
Advanced readings in classical and modern Arabic. Compositions based on texts.

ARAB 5102. Advanced Arabic II. (3 cr [max 4 cr]. Prereq-5101 or #)
Readings of Arabic texts. Writing compositions based on texts. Continuation of 5101.

ARAB 5491. Classical Islamic Civilization. (3 cr. \$ARAB 3491, HIST 3491, MELC 3491)
Islamic legacy in the classical age (800-1400), including medical/natural sciences, mathematics, philosophy, literature, and their transmission to Europe.

ARAB 5501. Modern Arabic Poetry in Translation. (3 cr)
Free verse movement and its major trends: post-romantic, social realist, symbolist, resistance, prose poem. Emphasizes leading poets such as al-Mala'ika, al-Sayyab, al-Bayati, and Adunis. Theoretical/critical essays. All readings in English.

ARAB 5502. The Arabic Novel in Translation. (3 cr)
The novel as a new genre in Arabic literature. Trends: realist, psychological, existentialist, feminist, post-modernist, fantastic, experimentalist. Emphasizes major writers such as Mahfouz, Ghanem, Salih, Jabra, El Sa'dawi, Munif, and Khouri. Theoretical/critical essays. Cultural/historical context.

ARAB 5503. Arabic Drama in Translation. (3 cr)
Emergence and development of drama as a European-inspired genre in Arabic literature. Emphasizes major trends and playwrights. All readings in English.

ARAB 5505. Survey of the Middle East. (3 cr. \$ARAB 3505, HIST 3505, MELC 3505)
Peoples, lands, and cultures of the Middle East. Historical survey from earliest civilizations to the present.

ARAB 5541. Islam in the Catholic Age: Arab Phase 600 A.D. to 900 A.D.. (3 cr. \$ARAB 3541, HIST 3541, MELC 3541)
The rise of Islam in its Arabian setting. Roles of the prophet, the Orthodox and Umayyad Caliphs. Development of the Islamic state and empire. Status of Muslims and non-Muslims.

ARAB 5542. Medieval Islam. (3 cr. \$ARAB 3542, HIST 3542, MELC 3542)
Islamic dynasties, Mamluks and Mongols, and Crusaders and Assassins. Abbasid Caliphate's disintegration and rise of Seljuk Turks.

ARAB 5543. Arabs Under Mamluks and Ottomans: 1300-1920. (3 cr. \$ARAB 3543, HIST 3543, MELC 3543)
Struggle against Crusaders and Mongols. Disintegration and reemergence under Muhammad Ali of Egypt; dynastic struggles in Syria; rise of Young Turks; Arab revolt.

ARAB 5544. ARAB World 1920 to the Present. (3 cr [max 4 cr]. \$ARAB 3544, HIST 3544, MELC 3544)
Struggle in the Arab world for independence and its course since independence. Emphasis on development, political stability and unity; political structures; the Arab-Israeli conflict.

ARAB 5678. Seminar: African-Arabic Fiction in Translation. (3 cr)
African fiction in Arabic, including works of Barrada, Idris, Mahrouz, al-Matwi, El-Saadawi, and el-Zayat. Emphasizes twentieth century. Tests discussed in historical/cultural context. Theoretical/critical essays. All readings in English.

ARAB 5900. Topics in Arabic Literature and Culture. (3 cr [max 9 cr]. Prereq-5102 or #)
Readings and discussion of selected works in Arabic. Topics specified in *Class Schedule*.

ARAB 5992. Directed Readings. (1-3 cr [max 3 cr]. Prereq-#)
Individual research and readings for advanced students.

Aramaic (ARM)

*Department of Classical and Near Eastern Studies
College of Liberal Arts*

ARM 5011. Biblical Aramaic and Old Aramaic Inscriptions. (3 cr. Prereq-1 yr Hebrew or Arabic or #)
Biblical Aramaic — grammar, fluency in reading Biblical Aramaic and Old Aramaic inscriptions.

ARM 5012. Syriac. (3 cr. Prereq-1 yr Hebrew or Arabic or #)
Emphasis on fundamentals of grammar and reading Syriac texts fluently.

Architecture (ARCH)

Department of Architecture

College of Design

ARCH 1281. Design Fundamentals I. (4 cr)
Design thinking, theory/principles. Films, design reviews in small groups. Off-campus service learning project.

ARCH 1301. Introduction to Drawing in Architecture. (4 cr; A-F only. Prereq-ARCH major or #)
Perceiving/representing the material environment. Sketching/drawing conventions of visual phenomena/forms.

ARCH 1701. The Designed Environment. (3 cr; A-F only)
Examination of seminal issues in the designed environment, including relationships between place and space, and realms of the ideal and real, public and private. Survey of how the fields of architecture, landscape architecture, and urban design have explored those issues.

ARCH 1701H. Honors: The Designed Environment. (3 cr; A-F only. Prereq-[Fr or soph], honors; meets HON req)
How seminal issues (e.g., relationships of place, space, ideal/real, public/private) have been reflected in, explored through architecture, landscape architecture, urban design.

ARCH 1905. Architecture: Ideas, Making. (3 cr)
Ideas about architecture as simultaneous/two-way relationship between thinking and making, between architecture as "idea" and as "verb." Architecture as a group of conscious intentions within larger framework of our cultural past, present, and speculative future.

ARCH 1906W. Waste (Not): Envisioning Alternatives to a Throw-Away Culture. (2 cr; A-F only. Prereq-Freshman)
What we use. What we waste. Thinking creatively about how to live/work more sustainably. How objects/environments might be designed to allow multiple uses, have longer life-cycles, or enable recycling/reuse.

ARCH 2281. Design Fundamentals II. (4 cr. Prereq-1281)
Foundation architectural design studio. Design principles, technical drawing, material manipulation.

ARCH 3150. Topics in Architecture. (1-3 cr [max 3 cr])
Selected topics in architecture design, theory, representation, or history.

ARCH 3301. Drawing for Design in Architecture. (3 cr; A-F only. Prereq-1301)
Introduction to practical/conceptual function of drawing in architecture.

ARCH 3311. Design in the Digital Age. (3 cr; A-F only. \$ARCH 5611)
Introduction to design, design process. Developing/understanding ways of seeing, thinking, and acting as a designer. Changes in design being wrought by digital technology. Team design project.

ARCH 3351. AutoCAD I. (3 cr. \$ARCH 5351. Prereq-ARCH major or BED major or #)
Concepts, tools, and techniques of computer-aided drawing with current AutoCAD Release. Producing dimensioned/annotated drawings for plotting. 3-D drawing capabilities. Use of dimension variables, attributes, blocks, symbols.

ARCH 3352. AutoCAD II. (3 cr. Prereq-BA or BS or BED ARCH major or #)
Concepts, tools, and techniques of computer-aided drawing with current AutoCAD Release. Strategies for producing dimensioned/annotated drawing for plotting. Dimension variables, attributes, blocks, symbols. Creation of customized menus.

ARCH 3381. Introduction to Computer Aided Architectural Design. (3 cr; A-F only. Prereq-ARCH or BED)
2-D drawing, 3-D modeling/animation, printing, plotting. Electronic networking/communications, database management, spreadsheet analysis, land-use analysis, project management.

ARCH 3411. Architectural History to 1750. (3 cr)
History of architecture and city planning from antiquity to 1750, as illustrated by major monuments from western and non-western cultures.

ARCH 3412. Architectural History since 1750. (3 cr)
History/theories of architecture and related landscapes and urban forms since 1750.

ARCH 3422H. Honors: Architectural History Since 1750. (3 cr; A-F only. Prereq-Soph, honors)
History/theories of architecture and related landscapes and urban forms since 1750.

ARCH 3490H. Honors Theory Seminar. (3 cr; A-F only. Prereq-[CLA BA or CALA BS] honors or #)
Topics selected by faculty, from their area of scholarship, in contemporary issues from literature of architecture. Specific buildings or building types, or areas of architectural thought, history, representation, design, technology. See *Class Schedule*.

ARCH 3711V. Honors: Environmental Design and the Sociocultural Context. (3 cr. Prereq-Soph or #)
Designed environment as cultural medium and as product of a sociocultural process and expression of values, ideas, and behavioral patterns. Design/construction as complex political process.

ARCH 3711W. Environmental Design and the Sociocultural Context. (3 cr. Prereq—Soph or #)
Designed environment as cultural medium/product of a sociocultural process and as expression of values, ideas, and behavioral patterns. Design/construction as complex political process.

ARCH 3993. Directed Study. (1-6 cr [max 6 cr]. Prereq—#)
Guided individual reading or study.

ARCH 4150. Topics in Architecture. (1-4 cr [max 24 cr]
Prereq—ARCH undergrad major or #)
Topics in architecture design, technology, history, theory, representation, or urbanism.

ARCH 4250. Advanced Topics in Design. (1-6 cr [max 24 cr];
A-F only. Prereq—[4282, ARCH major] or #)

ARCH 4281. Undergraduate Architecture Studio I. (6 cr.
Prereq—ARCH major, CALA)
Architectural questions in settlement patterns, architectural elements in their formal organization. Mapping techniques, orthographic projections, analytic drawing, models.

ARCH 4282. Undergraduate Architecture Studio II. (6 cr;
A-F only. Prereq—4281, CALA)
Human response to natural forces of gravity, light, and air. Their influence on organization of material form to create places of human habitation.

ARCH 4283. Undergraduate Architecture Studio III. (6 cr.
Prereq—ARCH BS, CALA)
Design issue or topic, its influence on organization of material form to create places of human habitation.

ARCH 4284. Undergraduate Architecture Studio IV. (4 cr.
Prereq—ARCH BS student, CALA)
Design studio.

ARCH 4301. Conceptual Drawing. (3 cr. Prereq—1301, [ARCH
or M Arch major])
Drawing as a way of analyzing, exploring, and generating design ideas. Projection systems, diagramming, mapping. Different modes of visual perception. Nonverbal structures.

ARCH 4311. Theory of Architectural Representation. (3 cr;
A-F only. §ARCH 5311. Prereq—[3301, [BA or BS or BED]] or #)
Integration of emerging computer graphics with photography and architectural graphic conventions. Historical, theoretical, and critical issues of representation. Influence of visual media on architectural field.

ARCH 4313. Visual Communication Techniques in Architecture. (3 cr; A-F only. §ARCH 5313. Prereq—[3301 or
jr or sr], #)
Delineation, presentation, and design techniques. Various visual media, methods of investigation.

ARCH 4321. Architecture in Watercolor. (3 cr; A-F only.
§ARCH 5321. Prereq—3301 or #)
Watercolor as a tool in design process. Foundation principles, techniques, medium, tools, materials. Color relationships, mixing, composition, applications to design.

ARCH 4361. 3-D Computer Architectural Modeling and Design. (3 cr; A-F only. §ARCH 5361. Prereq—3351, ARCH
major)
Use of 3D computer modeling for representation in abstract/realistic ways. Creation/arrangement of objects. Setting up lighting. Developing surface materials. Creating still renderings/animations. Ways computer visualization can be used for design exploration, feedback during idea development, and realistic representation of designs.

ARCH 4421W. Architecture and Intertwined: The Cave and the Light. (3 cr. §ARCH 5421. Prereq—[3411, 3412] or #)
Historical/hermeneutical investigation of iconography of grotto. Intertwined themes of descent into earth and ascent to light, from earliest strata of human culture to present day.

ARCH 4423. Gothic Architecture. (3 cr; A-F only. §ARCH
5423. Prereq—3411 or #)
History of architecture and urban design in Western Europe, from 1150 to 1400.

ARCH 4424. Renaissance Architecture. (3 cr; A-F only.
§ARCH 5424. Prereq—3411 or #)
History of architecture and urban design in Italy, from 1400 to 1600. Emphasizes major figures (Brunelleschi, Alberti, Bramante, Palladio) and evolution of major cities (Rome, Florence, Venice).

ARCH 4425. Baroque Architecture. (3 cr; A-F only. §ARCH
5425. Prereq—3411 or #)
Architecture and urban design in Italy, from 1600 to 1750. Emphasizes major figures (Bernini, Borromini, Cortona, Guarini) and evolution of major cities (Rome, Turin).

ARCH 4426. Architecture and Nature: 1500-1750. (3 cr.
§ARCH 5426. Prereq—3411, 3412, ARCH major)
History of interaction of architecture and nature in Italy, England, and France in 16th/17th centuries. Major monuments, their relationship to theories of architecture/gardening and to urban/rural life.

ARCH 4431W. Eighteenth-Century Architecture and the Enlightenment. (3 cr; A-F only. §ARCH 5431. Prereq—3411,
3412, undergrad ARCH major)
Architecture, urban planning, and garden design in Europe and America, 1650 to 1850.

ARCH 4432. Modern Architecture. (3 cr; A-F only. §ARCH
5432. Prereq—3412, ARCH major)
Architecture and urban design in Europe and the United States from early 19th century to World War II.

ARCH 4434. Contemporary Architecture. (3 cr; A-F only.
§ARCH 5434. Prereq—3412, ARCH major)
Developments, theories, movements, and trends in architecture and urban design from World War II to present.

ARCH 4439. History of Architectural Theory. (3 cr; A-F only.
§ARCH 5439. Prereq—3412, ARCH major)
History of architectural theory from antiquity to 20th century.

ARCH 4445W. Suburbia. (3 cr)
Suburbia, from origins in 18th-century England to present. Historical changes and present challenges, especially in America. Ideology, mythology, planning, development, geography, transportation, the family. Specific sites/designs. Representations in film, television, popular literature, and music.

ARCH 4446. Architecture Since World War II: Post-War Experimentation; Aesthetics and Politics of Architecture. (3 cr. Prereq—3412 or #)
Avant-garde responses to post-war consciousness of social/meaning in architecture. Eroding communal identity, common man, architectural symbolism, monumentality, critical regionalism, place/technology in form making, popular culture, rise of theory.

ARCH 4461. North American Indian Architecture. (3 cr.
§ARCH 5461. Prereq—ARCH 3412, ARCH or AMIN major)
Historic/contemporary principles/theories of North American Indian architecture. Culture, technology, environment, art, and craft of North American Indians in their settlements/architecture.

ARCH 4511. Building Systems I. (3 cr; A-F only. Prereq—ARCH
BS)
Building materials, assemblies, and construction operations shaping building designs. Material properties for design/detailing of building systems, elements, and components. Implications in design applications. Modeling, hands-on building experiences.

ARCH 4521. Introduction to Environmental Technology. (3 cr. Prereq—ARCH BS)
Issues related to environmental quality/design. Climate response. Heating, cooling, lighting design. Indoor air quality.

ARCH 4542. Building Energy Systems. (3 cr; A-F only)
Functions of building mechanical systems and their integration with other building components. Residential/commercial HVAC systems, alternative energy sources, energy efficiency, structural implications of mechanical systems, indoor air quality, environmental strategies. Case studies.

ARCH 4552. Integrated Design Processes. (3 cr; A-F only)
Wood/steel building design topics. Emphasizes whole building design and individual structural elements. Conceptual design strategies. Planning/design phases. Criteria for selection of building systems. Principles of wood/steel structural systems. Basic building code requirements. Individual/group design/research projects.

ARCH 4561. Architecture and Ecology. (4 cr; A-F only.
§ARCH 5501. Prereq—ARCH major or #)
Introduction to theories/practices of ecological approaches to architectural design. Ecological context, implications/opportunities of architecture. Historical/theoretical framework for ecological design thinking. Issues studied at various scales: site/community, building, component.

ARCH 4571. Introduction to Structures. (3 cr; A-F only.
Prereq—ARCH BS)
Concepts/methods to find effective/efficient structural forms. Elements of structural mechanics, graphic/quantitative analysis. Loads, materiality, strength, equilibrium, stability, serviceability, reliability. Relationships between external/internal forces: tension, compression, shear, bending, moments, stress, strain. Shear/moment diagrams/calculations. Graphical/quantitative form finding methods/analysis. Structural behavior of building systems and their components. Computation, analysis. Basic design problems using wood/steel members.

ARCH 4572. Structural Frames and Building Design/Construction. (3 cr; A-F only. Prereq—AEM 2011 or BP 3001
or BP 3393)
Basic contemporary structural systems in masonry, steel, and wood framing systems. Forms/performance of systems.

ARCH 4671. Historic Preservation. (3 cr)
Philosophy, theory, and origins of historic preservation. Historic archaeology, research, descriptive analysis, and documentation of historic buildings. Government's role in historic preservation, preservation standards and guidelines, preservation and building codes, neighborhood preservation, preservation advocacy, and future directions for historic preservation. Research on architectural/historical aspects of historic sites using primary/secondary resources and on controversial aspects of preservation.

ARCH 4672. Historic Building Conservation. (3 cr.
Prereq—[3412, 4671] or #)
Historic building materials, systems, and methods of conservation. Structural systems, building repair/pathology. Introduction of new environmental systems in historic buildings. Conservation of historic interiors. Research on historic building materials/techniques, using primary/secondary resources. Documentation of a specific historic site through large-format photography and measured drawings

ARCH 4701. Introduction to Urban Form and Issues. (3 cr.
Prereq—3412 or #)
Urban form and related issues of design/culture. Thematic history of cities. Lectures, discussions, field exercises, assignments.

ARCH 5101. Architectural Design Studies. (7 cr. Prereq—3+
track for MArch)
Principles/methods architecture design. Theories, history, technologies, media, and processes as foundation for critical thinking. Analytic modeling, visual thinking.

ARCH 5123. Architectural Thesis. (8 cr; A-F only. Prereq—
5122, 5241, BA ARCH major; students must submit thesis plan
in semester before writing thesis)
Student's choice, study and solution of an architectural problem to demonstrate proficiency in all phases of design.

ARCH 5241. Principles of Design Programming. (3 cr; A-F only. Prereq—For undergrads 5122, BA ARCH major; for grads 8255, M Arch major or #)
Concepts and techniques of architectural programming, including space and activity analysis, site selection, precedent study, code review, appropriate technology identification, hypothesis formulation and evaluation. Emphasis on conceptual development, research, and analytic drawing.

ARCH 5291. Accelerated Undergraduate Architecture Studio I. (6 cr; A-F only. Prereq—#)
Selected architectural problems developed by faculty to deepen/enrich ideas introduced in required architectural studio sequence.

ARCH 5292. Accelerated Undergraduate Architecture Studio II. (6 cr; A-F only. Prereq—[5291, accelerated status] or #)
Architectural problems. Emphasizes development of structures as integral part of design, site planning, design process.

ARCH 5301. Conceptual Drawing. (3 cr. Prereq—[1301, M.Arch major] or #)
Drawing as way of analyzing, exploring, and generating design ideas. Projection systems, diagramming, mapping. Different modes of visual perception. Nonverbal structures.

ARCH 5311. Theory of Architectural Representation. (3 cr; A-F only. §ARCH 4311. Prereq—[5371, 5372, M Arch] or instr consent)
Integration of emerging computer graphics with photography and architectural graphic conventions. Historical, theoretical, and critical issues of representation. Influence of visual media on architectural field.

ARCH 5313. Visual Communication Techniques in Architecture. (3 cr; A-F only. §ARCH 4313. Prereq—M Arch major or instr consent)
Delineation, presentation, and design techniques. Various visual media and methods of investigation.

ARCH 5321. Architecture in Watercolor. (3 cr; A-F only. §ARCH 4321. Prereq—M Arch grad student or #)
Watercolor as a tool in design process. Foundation principles, techniques, medium, tools, materials. Color relationships, mixing, composition, applications to design.

ARCH 5350. Topics in Architectural Representation. (1-3 cr [max 3 cr]; A-F only. Prereq—[5321, [ARCH major or M. Arch major]] or #)
Selected topics in architectural representation.

ARCH 5351. AutoCAD I. (3 cr. §ARCH 3351. Prereq—M Arch major or instr consent; may not be taken for graduate credit)
Basic concepts, tools, and techniques of computer-aided drawing with current AutoCAD Release. Strategies and techniques for producing dimensioned and annotated drawings suitable for plotting and an introduction to 3-D drawing capabilities. Use of dimension variables, attributes, blocks, symbols, and the creation of customized menus.

ARCH 5361. 3-D Computer Architectural Modeling and Design. (3 cr; A-F only. §ARCH 4361. Prereq—M Arch major)
Use of 3D computer modeling for representation in abstract/realistic ways. Computer modeling software. Creation/arrangement of objects, setting up lighting, developing surface materials, creating still renderings/animations. Ways in which computer visualization can be used for design exploration, for feedback during development of ideas, and for realistic representation of fully formed designs.

ARCH 5371. Computer Methods I. (1 cr; S-N only. §LA 5371. Prereq—Concurrent enrollment 8251, M Arch major or #)
Introduction to current techniques, computer programs, and their application to architectural computing.

ARCH 5372. Computer Methods II. (1 cr; S-N only. §LA 5372. Prereq—5371, ¶8252 and M Arch major or #)
Current techniques, computer programs, and their application to architectural computing and design.

ARCH 5373. Computer Methods III. (1 cr; S-N only. §LA 5373. Prereq—5372, ¶8253, M Arch major or #)
Advanced techniques, computer programs, and their application to architectural computing in design, theory, and technology.

ARCH 5374. Computer Methods IV. (1 cr. Prereq—5373, ¶8254, M Arch major or #)
Advanced architectural computing applications in design, history, theory, representation, and technology.

ARCH 5381. Introduction to Computer Aided Architectural Design. (3 cr; A-F only. Prereq—Arch or BED or M Arch or grad student in LA or #)
2-D drawing, 3-D modeling/animation, printing, plotting. Electronic networking/communications, database management, spreadsheet analysis, land-use analysis, project management.

ARCH 5382. Computer Aided Architectural Design. (3 cr; A-F only. Prereq—[3381, [BA or BS or BED]] or #)
2-D/3-D CAD, image manipulation. Advanced multimedia visualization techniques for design, including solid modeling, photo-/realistic imaging, animation, video-editing/recording.

ARCH 5410. Topics in Architectural History. (3 cr [max 12 cr]; A-F only. Prereq—M Arch major or #)
Advanced study in architectural history. Readings, research, seminar reports.

ARCH 5411. Principles of Design Theory. (3 cr; A-F only. Prereq—M Arch major or #)
Principles of design and their instrumentation. How and why architecture theory is generated. Types and significance of formal analysis. Theoretical positions and modes of criticism.

ARCH 5421. Architecture and Interpretation: The Cave and the Light. (3 cr. §ARCH 4421W. Prereq—[3411, 3412] or #)
Historical/hermeneutical investigation of iconography of grotto. Intertwined themes of descent into earth and ascent to light, from earliest strata of human culture to present day.

ARCH 5423. Gothic Architecture. (3 cr; A-F only. §ARCH 4423. Prereq—M Arch major or #)
History of architecture and urban design in Western Europe, from 1150 to 1400.

ARCH 5424. Renaissance Architecture. (3 cr; A-F only. §ARCH 4424. Prereq—M Arch major or instr consent)
History of architecture and urban design in Italy from 1400 to 1600. Emphasizes major figures (Brunelleschi, Alberti, Bramante, Palladio) and evolution of major cities (Rome, Florence, Venice).

ARCH 5425. Baroque Architecture. (3 cr; A-F only. §ARCH 4425. Prereq—M Arch major or instr consent)
Architecture and urban design in Italy from 1600 to 1750. Emphasizes major figures (Bernini, Borromini, Cortona, Guarini) and evolution of major cities (Rome, Turin).

ARCH 5426. Architecture and Nature: 1500-1750. (3 cr. §ARCH 4426. Prereq—M Arch major or instr consent)
History of interaction of architecture and nature in Italy, England, and France in 16th/17th centuries. Major monuments, their relationship to theories of architecture/gardening and to urban/rural life.

ARCH 5431. Eighteenth-Century Architecture and the Enlightenment. (3 cr; A-F only. §ARCH 4431W. Prereq—M Arch grad student or #)
Architecture, urban planning, and garden design in Europe and America from 1650 to 1850.

ARCH 5432. Modern Architecture. (3 cr; A-F only. §ARCH 4432. Prereq—M Arch major or instr consent)
Architecture and urban design in Europe and the United States from early 19th century to World War II.

ARCH 5434. Contemporary Architecture. (3 cr; A-F only. §ARCH 4434. Prereq—M Arch major or instr consent)
Developments, theories, movements, and trends in architecture and urban design from World War II to present.

ARCH 5439. History of Architectural Theory. (3 cr; A-F only. §ARCH 4439. Prereq—M Arch major or instr consent)
History of architectural theory from antiquity to 20th century.

ARCH 5445. Suburbia. (3 cr)
Suburbia, from origins in 18th-century England to present. Historical changes and present challenges, especially in America. Ideology, mythology, planning, development, geography, transportation, the family. Specific sites/designs. Representations in film, television, popular literature, and music.

ARCH 5446. Architecture Since World War II: Postwar Experimentation, Aesthetics, and Politics of Architecture. (3 cr. Prereq—3412 or #)
Avant-garde responses to post-war consciousness of social issues/meaning in architecture. Eroding communal identity, common man, architectural symbolism, monumentality, critical regionalism, place/technology in form making, popular culture, rise of theory.

ARCH 5450. Topics in Architectural Theory. (1-3 cr [max 9 cr]; A-F only. Prereq—ARCH major or M Arch major or #)
Selected topics in architectural theory and criticism.

ARCH 5451. Architecture: Defining the Discipline. (3 cr; A-F only. Prereq—M Arch major or #)
Architecture as a discipline: its nature, role, purpose, and meaning discussed within a general, philosophical, and theoretical framework. Investigation and discussion of paradigms defining architectural theory and practice.

ARCH 5452. Architecture: Design, Form, Order, and Meaning. (3 cr; A-F only. Prereq—M Arch major or #)
Architecture and the issue of meaning. Explores fundamental and constituent elements of architectural form and order; their inherent tectonic, phenomenal, experiential, and symbolic characteristics; their potential and implications for the creation and structure of meaningful human places.

ARCH 5455. Typology and Architecture: Theories of Analysis and Synthesis. (3 cr; A-F only. Prereq—5411, M Arch major, #)
Theoretical traditions and development of typology's role in architecture. Investigates works of Laugier, Quatremere de Quincy, Viollet-Le Duc, Ledoux, Durand, Camillo Sitte, and Le Corbusier. Recent developments and theoretical positions of neo-rational and contextual arguments for contemporary applications of the idea of type.

ARCH 5458. Architecture and Culture. (3 cr; A-F only. Prereq—3412, ARCH major or grad student or #)
Architecture as a cultural medium. Relationships among architecture, people, and culture; research findings and design; vernacular and high style architecture. Physiological and symbolic messages; reception theory in architecture; cultural critique and change; implications for architectural practice.

ARCH 5459. Gender and Architecture. (3 cr. Prereq—ARCH or WoSt major or M Arch major or #)
Examination of ideas related to gender and architecture, gendered and non-gendered places and practices, and their relations to cultural norms and change.

ARCH 5461. North American Indian Architecture. (3 cr. §ARCH 4461. Prereq—M Arch major or instr consent)
Historic/contemporary principles/theories of North American Indian architecture. Culture, technology, environment, art, and craft of North American Indians in their settlements/architecture.

ARCH 5511. Construction Materials in Architecture. (3 cr; A-F only. Prereq—M Arch or #)
Building materials, assemblies, and construction operations shaping building designs. Material properties for design/detailing of building systems, elements, and components. Implications in design applications. Modeling, hands-on building experiences.

ARCH 5512. Building Methods in Architecture. (3 cr; A-F only. Prereq–5511, M Arch major or #)
Analysis of architectural materials, building systems, and construction operations related to enclosure systems design, building infrastructure, and detailing. Application of legal constraints and regulations (e.g., ADA, building codes, life-safety issues) in preparation of drawings, specifications, and construction documents for building design.

ARCH 5513. Environmental Technology I: Thermal Design in Architecture. (3 cr; A-F only. Prereq–M Arch major or #)
Thermal and climatic issues in the design of small and mid-size buildings. Investigations in built and mechanical methods to modify climate. Evaluation of the impact of design techniques on energy use, the environment, and architectural meaning.

ARCH 5514. Environmental Technology II: Lighting and Acoustic Design. (3 cr; A-F only. Prereq–M Arch major or #)
Principles of daylighting, electric lighting, and acoustic design in architecture. Relationship between luminous and acoustic environments, human comfort and architectural experience. Analytical methods, design process, and modeling of daylighting.

ARCH 5525. Design in Masonry. (3 cr; A-F only. Prereq–5512, M Arch major or #)
Design principles, construction methods, and document production for masonry structures.

ARCH 5539. Daylighting and Architecture Design. (3 cr; A-F only. Prereq–5514, M Arch major or #)
Role of daylighting in architectural design: principles, strategies, energy and environmental issues, psychology of light, color, and integration of electric lighting. Design projects investigate qualitative and quantitative issues through drawing, physical models, and photometric analysis.

ARCH 5550. Topics in Technology. (1-3 cr [max 6 cr]. Prereq–#)
Selected topics in architecture technology, including construction, environmental management, energy performance, lighting, or materials.

ARCH 5561. Building Production Processes. (3 cr. Prereq–M Arch major or #)
Document production, contract execution, building project management. Construction industry organization, scheduling, consultant relations, legal/code restraints, contractual stipulations, budget/project resource allocations. Case studies, hands-on experiences.

ARCH 5571. Architectural Structures I: Wood and Steel Design. (3 cr; A-F only. Prereq–M Arch or #)
Influence of history/culture on architecture/structure. Structural mechanics, analysis, form finding, and design by experimental, qualitative/intuitive, and quantitative methods. Vector-/form-active structural systems, funicular structures. Bending/compression elements, plates/grids. Tensile architecture, shells. Traditional construction materials.

ARCH 5572. Architectural Structures II: Concrete and Masonry Design. (3 cr; A-F only. Prereq–5571, M Arch major or #)
Overview of advanced materials: reinforced fiberglass, structural glass, and structural tensile fabrics. Impact of construction technology on architecture and methods of integrating knowledge of structural materials and construction methods into the design process.

ARCH 5611. Design in the Digital Age. (3 cr; A-F only. \$ARCH 3311. Prereq–Grad student or upper level undergrad student)
Introduction to design, design process. Developing/understanding ways of seeing, thinking, and acting as a designer. Changes in design being wrought by digital technology. Team design project.

ARCH 5621. Professional Practice in Architecture. (3 cr; A-F only. Prereq–M Arch major or #)
Legal, ethical, business, and practical requirements of architectural practice. Contemporary and historical models of contract formation, business principles, accounting, project management, design services, and marketing.

ARCH 5631. Legal Contracts in Architecture. (3 cr; A-F only. Prereq–M Arch major or #)
Legal subject matter relevant to the work of architects and design professionals.

ARCH 5645. Real Estate Development in Architecture. (3 cr. Prereq–For undergrads BA ARCH major; for grads M Arch major or #)
Fundamentals of real estate development and investment building. Processes and rules of specialists in development of investment projects. Topics include pro forma value and depreciation, tax shelter, feasibility, market analysis, appraisal equity financing, design, construction, leasing, and property management.

ARCH 5650. Topics in Architectural Practice. (1-4 cr [max 8 cr]. Prereq–5621, ARCH major or 5621, M Arch major or #)
Topics in architectural practice, methods of design production, marketing, operation, and relationships among clients, architecture, and society.

ARCH 5670. Topics in Historic Preservation. (1-3 cr [max 3 cr]. Prereq–ARCH or M Arch major or #)
Selected topics in the theory, philosophy, research, and methods of architectural historic preservation.

ARCH 5671. Historic Preservation. (3 cr. Prereq–3412 or #)
Philosophy, theory, and origins of historic preservation. Historic archaeology and research, descriptive analysis, and documentation of historic buildings. Government's role in historic preservation, preservation standards and guidelines, preservation and building codes, neighborhood preservation, preservation advocacy, and future directions for historic preservation. Research on architectural and historical aspects of historic sites using primary and secondary resources and on controversial aspects of preservation.

ARCH 5672. Historic Building Conservation. (3 cr. Prereq–3412, 5671 or #)
Historic building materials, systems, and methods of conservation. Discussion of structural systems, building repair and pathology, introduction of new environmental systems in historic buildings, and conservation of historic interiors. Research on historic building materials and techniques using primary and secondary resources and on documentation of a specific historic site through large-format photography and measured drawings.

ARCH 5673. Historic Building Research and Documentation. (3 cr. Prereq–3412, 5672 or #)
Philosophy, theory, and methods of historic building research, descriptive analysis of buildings, building documentation, historical archaeology, and architectural taxonomy.

ARCH 5711. Design Principles of the Urban Landscape. (3 cr; A-F only. Prereq–BED major or M Arch major or LA grad major or grad student or #)
Art/design of creating city, neighborhood, and development plans. Public policies, planning tools/processes, and physical models used by design professionals and private/civic institutions to shape physical environment.

ARCH 5721. Proseminar in Metropolitan Design. (3 cr; A-F only. \$LA 5721. Prereq–[5711 or equiv], enrollment in CMD prog) or #)
Reading seminar. Evolution of the contemporary city. Dynamics that created contemporary urban spatial patterns. Planning/design theories that have guided public interventions in the built environment. Thematic texts, classroom discussions.

ARCH 5750. Topics in Urban Design. (1-4 cr [max 4 cr]; A-F only. Prereq–ARCH major)
Special topics in theory/practice of urban design.

ARCH 5790. Special Topics in Metropolitan Design. (3 cr [max 6 cr]; A-F only. \$LA 5790. Prereq–Enrollment in CMD prog or #)

ARCH 5993. Directed Study. (1-4 cr [max 3 cr]; A-F only. Prereq–#)
Guided individual reading or study.

Art (ARTS)

Department of Art

College of Liberal Arts

ARTS 1001W. Concepts in Visual Art. (4 cr)
Concepts of visual art-making in contemporary/historical contexts. The media, environment, concerns of the practicing artist. Creative process, visual expression, criteria. Aesthetic foundation for beginning studio courses.

ARTS 1101. Drawing. (4 cr)
Introduction to fundamental principles and processes of drawing; exploration of various drawing media. Work from still life, nature, the life model, and imagination.

ARTS 1102. Painting. (4 cr. Prereq–1101 or #)
Introduction to painting with attention to understanding and applying the fundamental principles of spatial organization and color interaction.

ARTS 1301. Sculpture. (4 cr)
An introduction to sculptural practice examining materials, methods, concepts, and history with emphasis on the correlation between concepts and materials. Work in clay, plaster, metal, and wood.

ARTS 1501. Printmaking: Intaglio and Lithography. (4 cr)
Introduction to techniques of intaglio etching/lithography. Historical approaches/use through contemporary materials/concepts. Emphasizes interrelationship of process, materials, and ideas/aesthetics.

ARTS 1502. Printmaking: Relief, Screen, and Digital. (4 cr)
Introduction to techniques of relief (linoleum and woodcut), screenprint, and digital printmaking. Historical approaches and use through contemporary materials, concepts, and practices. Emphasizes interrelationship of process, materials, and ideas.

ARTS 1505. Papermaking. (4 cr)
Introduction to approaches, forms, and aesthetic possibilities of paper as an expressive medium. Studio work in both Eastern and Western traditions and sculptural applications.

ARTS 1601. Time and Interactivity. (4 cr)
Introduction to use of computer technologies as source for creative art making. Emphasizes digital time-based/interactive processes that use image/sound editing software and basic scripting languages.

ARTS 1701. Photography. (4 cr)
Presents conceptual, technical, and historical aspects of photography within the fine arts context. Emphasis on the creative process through hands-on experience in use of camera, film development, enlarging, and printing.

ARTS 1702. Digital Photography. (4 cr)
Introduction to conceptual, technical and historical aspects of photography as a creative medium using digital technology. Digital image capture, related software, digital output and studio procedures. Historical issues, contemporary practice.

ARTS 1801. Ceramics. (4 cr)
Fundamentals of wheel-thrown and hand-built ceramics as forms of creative expression. Introduction to clay, glazes, and firing techniques.

ARTS 1902. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq–Freshman)
Topics specified in *Class Schedule*.

ARTS 1905. Freshman Seminar. (3 cr; A-F only. Prereq–Freshman)
Topics specified in *Class Schedule*.

ARTS 1910W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq–Freshman)
Topics specified in *Class Schedule*.

ARTS 3101. Intermediate Drawing. (4 cr. Prereq—1001, 1101)

Further exploration and understanding of drawing elements with emphasis on developing visual judgment, drawing process, and execution. Specific problems to promote the understanding of pictorial structure and personal expression.

ARTS 3102. Intermediate Painting. (4 cr. Prereq—1001, 1101, 1102)

Emphasizes development of visual sensibility, individual direction, critical judgment.

ARTS 3105. Dimensional Painting. (4 cr. Prereq—1001, 1101, 1102)

Application of two-dimensional visual concerns as they relate to sculptural form. Exploration of how painting ideas affect perception of real space.

ARTS 3106. Drawing: Interpreting the Site. (4 cr. Prereq—1001, 1101)

Field trips to draw or paint in various metropolitan area locations. Site interpretations, experimentation with marks/symbols. Focuses on search for personal content as inspired by site.

ARTS 3111. Life Drawing I. (4 cr. Prereq—1001, 1101)

Focus on the human form with an introduction to anatomy. Exploration of various concepts of representation and methods of image construction. Work from life, anatomical casts, memory and imagination.

ARTS 3112. Life Drawing II. (4 cr. Prereq—3111 or #)

The human form in pictorial structure, single, and multiple figure compositions. The creative process, work toward a personal direction. Attention to representation of the human image in cultural, historical, and contemporary context.

ARTS 3301. Sculpture: Direct Metal. (4 cr. Prereq—1001, 1301)

Constructive approach to sculpture through welding in steel, other metals. Studio practice, investigation of historical/contemporary methods/concepts.

ARTS 3302. Sculpture: Spatial Problems. (4 cr. Prereq—1001, 1301)

Focuses on sculptural practice outside traditional media/approaches. Theoretical constructions of space as primary medium of sculpture. Installation, theater, public art, architecture.

ARTS 3303. Sculpture: Metalcasting. (4 cr. Prereq—1001, 1301)

Metal casting of sculpture in bronze, iron, aluminum, other metals. Studio practice, investigation of historical/contemporary methods/concepts.

ARTS 3304. Sculpture: Carving and Construction. (4 cr. Prereq—1001, 1301)

Carving/construction using wood, other materials. Studio practice, investigation of historical/contemporary methods/concepts. Development of personal sculptural imagery.

ARTS 3305. Sculpture: Kinetics. (4 cr. Prereq—1001, 1301)

The exploration of movement in sculpture (wind, water, electric). Studio practice and investigation of historical and contemporary methods and concepts.

ARTS 3306. Performance Art and Installation. (4 cr. Prereq—1001, 1301)

Studio practice, investigation of forms of expression involving narrative, performance, installation. Hybrid art forms introduced by Dada movement in 1920's, continued by Fluxus movement in 1950's, to contemporary performance/installation artists.

ARTS 3307. Sculpture: Traditional Approaches. (4 cr. Prereq—1001, 1301)

Clay modeling of human figure, other forms. Mold-making, plaster casting with historical/contemporary systems. Studio practice, investigation of traditional sculptural methods/concepts.

ARTS 3401W. Critical Theories and Their Construction From a Studio Perspective. (3 cr. Prereq—1001, jr, or #)

Primary critical theories that shape the analysis of works of art. Evaluation of works from the artist's perspective. Theory as an organizational structure from which to understand contemporary works.

ARTS 3402. Artists' Books. (4 cr. Prereq—1001, one visual art course)

Study/creation of unique, handmade books using various structures, media, techniques. Critical, historical, theoretical issues surrounding contemporary book arts.

ARTS 3403. Women's Images and Images of Women. (3 cr. SARTS 5403. Prereq—1001 or #)

Women's place in Western art from the artist's perspective. Women as artists and the imagery they have created. Women as the object of imagery and the social and political attitudes those images convey. Survey of women artists from late-Renaissance through contemporary feminism; relevant issues.

ARTS 3411H. Honors Tutorial in Visual Arts. (1-4 cr [max 6 cr]; A-F only. Prereq—Honors, #)

Individual consultation with a faculty member on visual work, research project, presentation, paper, or bibliography.

ARTS 3415H. Honors Exhibition. (2 cr; A-F only. Prereq—Magna or Summa Honors candidate, #, Δ)

Advanced problems in studio and research, leading to a magna or summa exhibition.

ARTS 3416H. Honors Thesis. (1 cr; A-F only. Prereq—Summa level honors candidate, #)

Summa thesis paper written in support of honors exhibition or in relation to candidate's visual/conceptual interests.

ARTS 3420. Visiting Artists Program. (1 cr [max 2 cr] Prereq—ARTS or #)

Guest speakers, artist presentations. Identification of themes, correlations between ideas presented by guest artists/critics and students' own creative work.

ARTS 3444. Major Project. (1 cr; S-N only. Prereq—#)

Individually designed independent project or exhibition.

ARTS 3496. Internship in the Arts. (1-3 cr [max 3 cr]; S-N only. Prereq—BFA Art major, #)

Field work at local, regional, national, or international arts organization or with professional artist provides experience in activities/administration of art/art-based organizations.

ARTS 3499. Internship at Katherine E. Nash Gallery. (3 cr; S-N only. Prereq—1001, #)

Hands-on experience in day-to-day operation/mission of Department of Art's professional gallery.

ARTS 3501. Printmaking: Intaglio and Screen. (4 cr. Prereq—1001, 1501)

In-depth investigation of intaglio/screenprinting. Application of traditional/contemporary techniques. Emphasizes individual artistic expression. Review of historical/cultural development of the media.

ARTS 3502. Printmaking: Relief and Lithography. (4 cr. Prereq—1001, 1501)

Expressive/formal aesthetics of woodcut relief, hand lithography. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages.

ARTS 3505. Papermaking as an Art Form. (4 cr. Prereq—1001, 1505)

Further exploration of Eastern, Western, and sculptural applications of papermaking as an art form. Development of visual vocabulary through experimentation and focused inquiry into historical and contemporary methods.

ARTS 3510. Intermediate Printmaking: Traditional and Contemporary Approaches. (4 cr [max 8 cr]. Prereq—1001W or 1501 or 1502)

The print as vehicle for conceptual/personal expression. Traditional printmaking techniques, evolving contemporary processes for realizing visual concepts. Historical/cultural development of multiple/matrix as means of communication.

ARTS 3601. New Media: Making Art Interactive. (4 cr. Prereq—1001W, 1601)

Conceptual/aesthetic development with digital, interactive art. Experimental approaches to interactive technologies. Responsive, tangible media. Critical theory/history of new media.

ARTS 3602. Narrative Digital Video. (4 cr. Prereq—1001W, 1601)

Narrative forms of video. Documentary, live action, memoir, experimental forms. Digital video production/editing. Personal aesthetic/conceptual directions. Theory, critical readings about historical/contemporary works in video.

ARTS 3603. Experimental Video. (4 cr. Prereq—1001W, 1601)

Experimental approaches in producing digital video within a contemporary art context. Using digital media technologies in installation, performance, and interactive video art. Emphasizes development of personal, creative projects. Theoretical issues. Critical/historical readings in media arts.

ARTS 3604. Animation. (4 cr. Prereq—1001W, 1601)

Creating ideas visually with 2-/3-dimensional animation technologies. Vector-/layer-based raster animation. Modeling objects/spaces, creating textures, lighting, movement, sound track.

ARTS 3605. Sound Art. (4 cr. Prereq—1001W, 1601)

Sound Art practice/theory. Students produce creative projects using sound as primary material. History of experimental sound art from early 20th century to present. Critiques, readings, writing, public presentations.

ARTS 3606. The Body Electric: Sensing New Domains for Creative Expression. (4 cr. Prereq—1001W, 1601)

Cultural conceptions of the most personal of new media's hybrid domains of physical/virtual interplay. Readings of contemporary/historic conceptions of the body and the machine. Boundaries/membranes, response/reaction. The biological, the computational, the bionic. Aesthetic explorations with interactive, sensing, and programmable technologies.

ARTS 3701. Photography: Silver Processes. (4 cr. Prereq—1001, 1701)

Classical photographic practice, concentrating on camera/darkroom controls. Historical overview of the medium. Conceptual/contemporary approaches to traditional themes.

ARTS 3702. Photography: The Extended Image. (4 cr. Prereq—1001, 1701)

Manipulation of the photo image using various camera and darkroom methods including sequence, multiples, narrative, and book formats. Marking and altering photographic surfaces, applied color, and toning. Use of the photograph in interdisciplinary projects.

ARTS 3703. Photography: Digital Imaging. (4 cr. Prereq—1001, 1701)

Photographic digital imaging in fine arts. Manipulation, computer applications. Editing in photo imaging software.

ARTS 3801. Ceramics: Wheel Throwing. (4 cr. Prereq—1001, 1801)

Expands wheel-throwing skills, develops aesthetic awareness of ceramic forms. Kiln firing, glaze formulation.

ARTS 3802. Ceramics: Handbuilding. (4 cr. Prereq—1001, 1801)

Intermediate handbuilding. Development of abilities, critical awareness. Kiln firing, glaze formulation.

ARTS 3803. Ceramics: Mold Making. (4 cr. Prereq—1001, 1801)

Introduction to plaster mold making for ceramics. Plaster mold fabrication, ceramic production, contemporary methods/concepts. Development of personal visual expression.

ARTS 3804. Neon. (4 cr. Prereq—1001)

Introduction to neon sculpture; investigating materials, methods, concepts, history, and studio procedures. Work with glass tubing, electrical components, mixed media, and installation.

ARTS 3810. Intermediate Ceramics. (4 cr [max 8 cr]; A-F only. Prereq—1001W, 1801, 3801, 3802)

Studio ceramics. Handbuilding, wheelthrowing, kiln firing, glaze formulation, contemporary issues. Development of a slide portfolio. Review for entrance into advanced ceramics.

ARTS 5104. The Nature of Abstraction. (4 cr. Prereq–3102 or #)

Exploration of abstraction as concept. Studio practice with attention to developing individual work. Emphasizes understanding topics relevant to abstraction. Approached from discipline of painting, open to various material sensibilities.

ARTS 5105. Advanced Dimensional Painting. (4 cr. Prereq–3105 or #)

Illusionary space applied to sculptural forms. Practical applications of spatial/painterly concepts. Emphasizes critical/visual judgment. Development of cohesive body of work reflecting interaction of two/three dimensions.

ARTS 5106. Advanced Drawing: Interpreting the Site. (4 cr. Prereq–3106 or #)

Search for personal content as inspired by site. Field trips (2/3 of course) to draw or paint from various metropolitan area locations. Interpretations enhanced by experimentation with new marks/symbols.

ARTS 5110. Advanced Drawing. (4 cr [max 12 cr]. Prereq–3101 or 3111 or #)

Developing personal direction in form/content. Various media. Various aesthetic/conceptual approaches.

ARTS 5120. Advanced Painting. (4 cr [max 12 cr]. Prereq–3102 or #)

Developing personal vision/content through painting. Emphasizes critical thinking, self-evaluation, and independent pursuit of ideas.

ARTS 5130. Advanced Painting: Watercolor. (4 cr [max 12 cr]. Prereq–3102 or #)

Expressive/technical possibilities of transparent watercolor. Emphasizes pictorial structure, color relationships, visual expression. Work from still life, nature, life model, imagination.

ARTS 5310. Advanced Sculpture: Direct Metal. (4 cr [max 12 cr]. Prereq–3301 or #)

Direct metal sculpture in steel, other metals. Studio practice, investigation of historical/contemporary methods/concepts. Development of personal sculpture imagery.

ARTS 5320. Advanced Sculpture: Spatial Problems. (4 cr [max 12 cr]. Prereq–3302 or #)

Sculptural practice outside traditional media/ approaches. Installation, theater, public art, architecture as topics for individual investigations into spatial organization.

ARTS 5330. Advanced Sculpture: Metal Casting. (4 cr [max 12 cr]. Prereq–3303 or #)

Metal casting of sculpture in bronze, iron, aluminum, other metals. Studio practice, investigation of historical/contemporary methods/concepts. Development of personal sculptural imagery.

ARTS 5340. Advanced Sculpture: Carving and Construction. (4 cr [max 12 cr]. Prereq–3304)

Carving/construction using wood, other materials. Studio practice, investigation of historical/contemporary methods/concepts. Development of personal sculptural imagery.

ARTS 5350. Advanced Sculpture: Kinetics. (4 cr [max 12 cr]. Prereq–3305 or #)

Studio practice in kinetic sculpture. Historical/contemporary methods/concepts of sculpture produced by motion. Development of personal imagery.

ARTS 5360. Advanced Performance Art and Installation. (4 cr [max 12 cr]. Prereq–3306 or #)

Studio practice in performance art and installation; investigation of historical and contemporary methods and concepts of interdisciplinary expression. Development of personal imagery.

ARTS 5370. Advanced Sculpture: Traditional Approaches. (4 cr [max 12 cr]. Prereq–3307 or #)

Clay figure modeling. Mold making using historical/contemporary systems. Casting in semi-permanent materials. Studio practice, traditional sculptural methods/concepts. Development of personal imagery.

ARTS 5400. Seminar: Concepts and Practices in Art. (3 cr [max 6 cr]. Prereq–BFA candidate or #)

Various ideologies, cultural strategies that influence practice/interpretation of art. Emphasizes diversity of viewpoints. Application of issues in developing final BFA exhibition.

ARTS 5402. Artists' Books. (4 cr. Prereq–3402 or #)

Advanced projects in creation of unique, handmade books using various structures, media, techniques. Critical, historical, theoretical issues surrounding contemporary book arts.

ARTS 5403. Women's Images and Images of Women. (3 cr. SARTS 3403. Prereq–1001 or #)

Women's place in Western art from the artist's perspective. Women as artists and the imagery they have created. Women as the object of imagery and the social and political attitudes those images convey. Survey of women artists from late-Renaissance through contemporary feminism; relevant issues.

ARTS 5405. Visual Narrative Structures. (4 cr. Prereq–[1001, one 1xxx art course] or #)

Visual/verbal investigation of structures of visual narratives. Contemporary efforts to integrate cogent images in visual texts. Development of methods for personal visual communication of cultural, spiritual, aesthetic, environmental experiences. Historical/cultural focuses. Studio work.

ARTS 5441. Professional Practices. (3 cr. Prereq–Grad or #)

Intensive writing seminar provides a context for theoretical issues, business practices, and professional skills required for career management and development in the visual arts.

ARTS 5444. Bachelor of Fine Arts Exhibition. (1 cr; S-N only. Prereq–BFA candidate, sr. #)

Final solo or small group exhibition and artist's statement developed in consultation with faculty adviser. Visual documentation of work and statement as appropriate to media.

ARTS 5490. Workshop in Art. (1-4 cr [max 12 cr])

Selected topics and intensive studio activity. Topics vary yearly.

ARTS 5510. Advanced Printmaking. (4 cr [max 12 cr]. Prereq–3510 or #)

In-depth research of personal imagery using a broad range of historical and contemporary applications. Development of imagery using color, photo-mechanical, digital processes. Cross-media approaches.

ARTS 5520. Advanced Printmaking: Relief and Lithography. (4 cr [max 12 cr]. Prereq–3502 or #)

Relief printing, lithography for creative expression. Studio practice with stone, metal, wood. Developing personal visual language/aesthetics. Historical/contemporary awareness, evolving technologies/strategies.

ARTS 5550. Advanced Papermaking. (4 cr [max 12 cr]. Prereq–3505 or #)

Distinct expressive qualities of handmade paper, its versatility as contemporary art form. Independent research pursued in consultation with instructor.

ARTS 5610. New Media: Making Art Interactive. (4 cr [max 12 cr]. Prereq–3601 or #)

Conceptual/aesthetic development with digital, interactive art. Experimental approaches to interactive technologies. Projects with responsive/tangible media. Theory/history of new media.

ARTS 5620. Narrative Digital Video. (4 cr [max 12 cr]. Prereq–3602)

Individual, advanced, creative projects with narrative forms of video art. Documentary, live action, memoir. Relationships between conceptual, aesthetic, and artistic process.

ARTS 5630. Advanced Experimental Video. (4 cr [max 12 cr]. Prereq–3603 or #)

Experimental approaches in producing digital video within a contemporary art context. Using digital media technologies in installation, performance, and interactive video art. Emphasizes expanding personal artistic development. Theoretical issues, critical/historical readings/writings in media arts.

ARTS 5640. Advanced Animation. (4 cr [max 12 cr]. Prereq–3604 or #)

Two-/three-dimensional animation with digital technologies. Individual projects. Expansion of personal voice/visual clarity within framework of animated imagery and time-based artwork.

ARTS 5650. Advanced Sound Art. (4 cr [max 12 cr]. Prereq–3605)

Sound art practice/theory. Emphasizes individual creative projects using sound as primary material. History of experimental sound art from early 20th century to present. Critiques, readings, writing, public presentations.

ARTS 5660. The Body Electric: Sensing New Domains for Creative Expression. (4 cr [max 12 cr]; S-N only)

Cultural conceptions of the most personal of new media's hybrid domains of physical/virtual interplay. Readings of contemporary/historic conceptions of body/machine. Boundaries/membranes, response/reaction. The biological, the computational, the bionic. Advanced projects with interactive, sensing, and programmable technologies.

ARTS 5670. Interdisciplinary Media Collaborations. (3 cr [max 9 cr]. Prereq–Upper-division undergraduate or graduate student in art, creative writing, dance, music or theater)

Interdisciplinary, collaborative artist teams explore modes of creative expression at intersections of the arts. Students collaborate to co-author/produce works of art for public presentation. Emphasizes integration of media arts with visual art, music, dance, and theater to produce interdisciplinary/collaborative art.

ARTS 5710. Advanced Photography. (4 cr [max 12 cr]. Prereq–Two semesters of 3xxx photography or #)

Design/implementation of individual advanced projects. Demonstrations, lectures, critique. Reading, writing, discussion of related articles/exhibitions.

ARTS 5810. Advanced Ceramics. (4 cr [max 12 cr]. Prereq–[3801, 3802, 3810] or #)

Critical discourse of aesthetics. History of, contemporary issues in clay and criticism. Independent, advanced projects.

ARTS 5821. Ceramic Materials Analysis. (4 cr. Prereq–3801 or 3802 or #)

Ceramic materials, their interrelationships. Advanced investigation of glazes, slip formulation, clay bodies in high/low temperature ranges. Individual interests related to students' aesthetic needs.

ARTS 5830. Advanced Ceramics: Mold Making. (4 cr [max 12 cr]. Prereq–3803 or #)

Advanced mold making for ceramics. Plaster mold fabrication, ceramic production, contemporary methods/concepts. Development of personal visual expression.

ARTS 5840. Advanced Neon. (4 cr [max 12 cr]. Prereq–3804 or #)

Emphasis on the development of personal sculptural sensibility. Studio practice with neon glass tubing and electrical components. A mixed media approach is encouraged.

ARTS 5990. Independent Study in Art. (1-4 cr [max 12 cr]. Prereq–major, #)

Independent study project designed by student in consultation with instructor.

Art History (ARTH)

Department of Art History

College of Liberal Arts

ARTH 1001. Introduction to Art History. (3 cr [max 4 cr])
History of art examined through selected monuments of major periods, from Paleolithic to modern times. Covers Western, other cultures.

ARTH 1002W. Why Art Matters. (4 cr)
Introduction to history of topics that investigate power/importance of art both globally and in its diverse forms, from architecture and painting to video and prints. Sacred space, propaganda, the museum, art/gender, art/authority, tourism.

ARTH 1004W. Introduction to Asian Art. (4 cr. §ARTH 1004V)
Issues/themes of South Asian, Southeast Asian, and East Asian art from earliest times to present.

ARTH 1909W. Topics: Freshman Seminar. (3 cr.
Prereq—Freshman)
Topics specified on One Stop Course Guide.

ARTH 1910W. Topics: Freshman Seminar. (3 cr; A-F only.
Prereq—Freshman)
Topics specified on Onestop Course Guide.

ARTH 1921W. Introduction to Film Study. (4 cr. §CSCL 1921)
Fundamentals of film language, major theories of cinema. Detailed analysis of several films, including John Ford's Stagecoach, Jean-Luc Godard's Breathless.

ARTH 1940. Topics in Art History. (1-4 cr [max 4 cr])
Topics specified in Course Guide.

ARTH 3005. American Art. (4 cr)
Survey of American art from colonial to the present with special emphasis on the relationship of painting, sculpture, the decorative arts, architecture, costume, and material culture to current interpretations of American history.

ARTH 3008. History of Ancient Art. (4 cr. §CNES 3008)
Architecture, sculpture, and painting of selected early cultures; emphasis on influences contributing to the development of Western art.

ARTH 3009. History of Medieval Art. (4 cr)
Emphasis on principal monuments, their decoration and function (e.g. Old St. Peter's, Rome; Hagia Sophia, Istanbul; Palace Chapel, Aachen; St. Sernin, Toulouse; Cathedral of Chartres, Paris, Rheims).

ARTH 3011W. History of Renaissance and Baroque Art. (4 cr)
Major architects, sculptors, and painters in Western Europe from the 15th through the 18th centuries (e.g. Brunelleschi, Michelangelo, Raphael, Leonardo, Caravaggio, Bernini, Rembrandt, Rubens, Poussin, Watteau).

ARTH 3012. 19th and 20th Century Art. (3 cr)
Major monuments/issues of modern period. Sculpture, architecture, painting, prints. Neo-classicism, romanticism, realism, impressionism, evolution of modernism, symbolism, fauvism, cubism, dadaism, surrealism, abstract expressionism, pop art, conceptualism, postmodernism.

ARTH 3013. Introduction to EAST Asian Art. (3 cr [max 4 cr]. §EAS 3013)
A selective examination of works of art produced in China, Korea and Japan from the neolithic era to modern times. Nearly every major type of object and all major styles are represented.

ARTH 3014W. Art of India. (4 cr. §ALL 3014W)
Indian sculpture, architecture, and painting from the prehistoric Indus Valley civilization to the present day.

ARTH 3015W. Art of Islam. (4 cr)
Architecture, painting, and other arts from Islam's origins to the 20th century. Cultural and political settings as well as themes that unify the diverse artistic styles of Islamic art will be considered.

ARTH 3017. Islamic Culture. (4 cr)
Emphasis on visual arts and literature produced by the Muslim world from Spain to the Indian sub-continent. Analysis of original visual and literary sources will form the basis for understanding diverse cultural developments.

ARTH 3035. Classical Myth in Western Art. (4 cr. §CNES 3035)
An exploration of the role of myth in the visual arts through examination of major figures and stories that became popular in the ancient world and have fascinated artists and audiences ever since.

ARTH 3142. Art of Egypt. (4 cr. §CNES 3142)
Arts and architecture of Egypt from prehistoric times to the emergence of modern Egypt, with emphasis on elements of continuity and change that have shaped Egyptian culture.

ARTH 3152. Art and Archaeology of Ancient Greece. (4 cr. §CNES 3152)
Introduction to the civilization of ancient Greece through art and material culture. Case studies of selected monuments and sites.

ARTH 3162. Roman Art and Archaeology. (4 cr. §CNES 3162)
Introduction to the art and material culture of the Roman World: origins, changes and continuities, "progress" or "decay" in the later Empire, legacy to the modern world.

ARTH 3201. The Olympic Games. (3 cr. §CLCV 1301, CLCV 3301)
Surveys the Olympic Games (776 B.C. to A.D. 338) and other ancient athletic festivals, including those for women participants. Greek art and literature serve as basic sources. Comparisons are made with modern athletic events.

ARTH 3340. Practicum in Archaeological Field and Computer Techniques. (3 cr. §ARTH 5340, CLCV 3340, CNES 3340, CNES 5340. Prereq—One course in ancient art/archaeology or #)
Methods for excavation of Old/New World sites. Meets at archaeometry/computer lab for part of semester and at selected site in Minnesota for day-long sessions for 9 to 10 weeks.

ARTH 3401. Art Now. (3 cr; A-F only)
Analysis of visual representations in fine arts and popular media, in context of social issues. Obscenity, censorship, democracy, technology, commerce, the museum, propaganda, social role of artist. Understanding the contemporary world through analysis of dominant aesthetic values.

ARTH 3422. History of Graphic Arts: 1780 to 1980. (4 cr)
History and theory of the creation of lithography, social caricature (e.g., Daumier, Gavarni), the revival of etching (e.g., Goya and mid-century practitioners, Whistler), and color lithography (e.g., Toulouse-Lautrec, Vuillard, Bonnard). Media changes of 20th century; the revolutionary nature of new media.

ARTH 3464. Art Since 1945. (4 cr)
Broad chronological overview of U.S./international art movements since 1945. Assessment of critical writings by major theoreticians (e.g., Clement Greenberg) associated with those movements. Theoretical perspective of postmodernism.

ARTH 3484. The Art of Picasso and the Modern Movement. (4 cr)
Works of Picasso in all media. Blue, Rose, Cubist, Classical, and later periods of Picasso's development against innovations in media; collage, utilization of found-objects, printmaking and ceramics. Autobiographical nature of imagery gives methodological basis for exploring frequently personalized themes.

ARTH 3575. The Art of Walt Disney in American Culture. (4 cr)
Walt Disney, his companies, and the influence of their products on 20th century American culture. Animation, architecture, city planning, the relationship between the fine arts and popular culture, and the creation of art under industrial conditions of collaboration and profit.

ARTH 3578. Arts of Africa. (4 cr. §AFRO 3578)
Surveys the diverse arts of Africa, from antiquity to present. Introduces visual arts of several civilizations and their relation to larger cultural issues (e.g., religion, cosmology, gender, identity, political power).

ARTH 3585. African American Art. (3 cr; A-F only. §AFRO 3585)
Four hundred year history of African American art. How/why African Americans created artwork at specific times, in specific places. Arts of African Americans within their own communities, National arts movements, and American life during historical junctures.

ARTH 3588. Architecture of Africa, Pre-Colonial to Present. (4 cr)
Introduces the history of architecture in West Africa, from eighth century to present. From the prosperity of early empires of Western Sudan (Ghana, Mali, Songhai), and the impact of Islam on traditional architecture, to colonial/post-colonial architecture.

ARTH 3921W. Art of the Film. (4 cr)
History of the motion picture as an art form; major films, directors, genres, and styles. Films discussed include *The Birth of a Nation*, *Citizen Kane*, *Bicycle Thief*, *Rashomon*, and *Jules and Jim*.

ARTH 3927. Documentary Cinema. (4 cr)
History of nonfiction filmmaking, from early forms of reportage and birth of documentary to emergence of "film-verite" and "guerrilla television" and work by independents (e.g., Errol Morris, Michael Moore).

ARTH 3930. Junior-Senior Seminar. (3 cr; A-F only.
Prereq—[jr or sr] ARTH major, #)
Major art-historical theme, artist, period, or genre. Topics specified in *Class Schedule*.

ARTH 3930H. Honors: Junior-Senior Seminar. (3 cr; A-F only. Prereq—Honors [jr or sr] ARTH major)
Major art-historical theme, artist, period, or genre.

ARTH 3940. Topics in Art History. (1-4 cr [max 21 cr])
Topics specified in *Class Schedule*.

ARTH 3971V. Honors: Major Project. (1 cr; A-F only.
Prereq—Honors ARTH major, #)
Completion of research paper begun in a 5xxx course.

ARTH 3971W. Major Project. (1 cr; A-F only. Prereq—ARTH major, #)
Completion of research paper begun in a 5xxx course.

ARTH 3975. Directed Museum Experience. (1-2 cr [max 2 cr]; S-N only. Prereq—#)
Internship or docentship in an approved program in an art institution or museum. Open to both majors and nonmajors. Must consult with director of undergraduate studies.

ARTH 3993. Directed Study. (1-4 cr [max 12 cr]; A-F only. Prereq—#)

ARTH 3994. Directed Research. (1-4 cr [max 12 cr]; A-F only. Prereq—#)

ARTH 5101. Myths in Art: Cross-Cultural Comparison. (3 cr; A-F only)
Relationships of text/image, efficacy of each in conveying meaning. Properties of visual/verbal communication. Ways in which artists convey mythological meanings, how such these ways differ according to place/time. Students prepare/critique visual presentations through Web pages.

ARTH 5103. Hellenistic and Early Roman Art and Archaeology. (3 cr. §CNES 5103. Prereq—Clas/ARTH 3008, jr or #)
Sculpture, architecture, painting, and topography in developing centers of Hellenistic culture in the eastern Mediterranean, and in Etruscan and Roman towns from 400 B.C. to the beginnings of the Roman Empire.

ARTH 5108. Greek Architecture. (3 cr. §CNES 5108.

Prereq—ARTH/Clas 3008, jr or sr or grad, or #)

Geometric through classical examples of religious and secular architecture and their setting at archaeological sites in Greece, Asia Minor, and Italy.

ARTH 5111. Prehistoric Art and Archaeology of Greece.

(3 cr. §CNES 5111. Prereq—Jr or sr or grad student, Greek art/archaeology course or #)

Artistic and architectural forms of Neolithic period in Aegean area and Cycladic, Minoan, and Mycenaean cultures. Aims and methods of modern field archaeology; the record of human habitation in the Aegean area. Archaeological evidence as a basis for historical reconstruction.

ARTH 5112. Archaic and Classical Greek Art. (3 cr.

Prereq—jr or sr or grad or #)

Sculpture, painting, architecture, and minor arts in Greek lands from the 9th through 5th centuries B.C. Examination of material remains of Greek culture; archaeological problems such as identifying and dating buildings; analysis of methods and techniques.

ARTH 5112. Archaic and Classical Greek Art. (3 cr.

Prereq—Jr, Clas/ARTH 5111)

Sculpture, painting, architecture and minor arts in Greek lands from the 9th through 5th centuries B.C. Examination of material remains of Greek culture; archaeological problems such as identifying and dating buildings; analysis of methods and techniques. Emphasis on Periclean Athens.

ARTH 5120. Field Research in Archaeology. (3-6 cr [max 6

cr]. §ARTH 5120, CLCV 5120, CNES 5120. Prereq—#)

Field excavation, survey, and research at archaeological sites in the Mediterranean area. Techniques of excavation and exploration; interpretation of archaeological materials.

ARTH 5172. House, Villa, Tomb: Roman Art in the Private

Sphere. (3 cr. §CNES 5172. Prereq—One intro art history course or #)

The architecture, painting, and sculpture of urban houses, country estates, and tombs in the Roman World. Relationships between public and private spheres, and literary and physical evidence; usefulness of physical evidence in illuminating gender roles.

ARTH 5182. Art and the State: Public Art in the Roman

Empire. (3 cr. §CNES 5182. Prereq—One intro art history course or #)

Origins of Roman public art; use in maintaining community; exploitation by the first Emperor, Augustus; development and diffusion through the later Empire; varying capabilities to adjust to the demands of a Christian Empire.

ARTH 5234. Gothic Sculpture. (3 cr. Prereq—jr or sr or grad

or #)

The origin, character, and development of Gothic sculpture in France, the German empire, and the Netherlands, 1150-1400. Emphasis on French sculpture of the cathedral age and the emergence of a court style in Paris and elsewhere in Europe (e.g. London, Prague).

ARTH 5252. History of Early Christian Art in Context. (4 cr.

§CNES 5252. Prereq—One 3xxx ARTH course or #)

The role played by art in the formation of early Christian and Byzantine communities, and in establishing their relationships with the Pagan world and early Islam.

ARTH 5301. Visual Culture of the Atlantic World. (3 cr; A-F only)

Visual culture of Atlantic world, from Columbus to American Revolution. Visual objects, practices considered in context of Europe's colonization of Americas. Slavery, religious conflict, international commerce, production of scientific knowledge addressed in terms of their impact upon visual imagery.

ARTH 5302. Print Culture in Early Modern Europe. (3 cr;

A-F only)

Cultural history of printed images in Europe from their emergence in 15th century through about 1750. Book illustration, reproductive printmaking. History of print connoisseurship. Prints and scientific knowledge. Role of print culture in major social/political events such as Protestant Reformation.

ARTH 5324. 15th-Century Painting in Northern Europe.

(3 cr. Prereq—jr or sr or grad or #)

The origin, character, and development of painting in France, the Netherlandish area, and the German Empire during the years 1350 to 1500. Emphasis on the Flemish school (e.g., Van Eyck brothers, Campin, Van der Weyden) and its influences.

ARTH 5340. Practicum in Archaeological Field and**Computer Techniques.** (3 cr. §ARTH 3340, CLCV 3340,

CNES 3340, CNES 5340. Prereq—One course in ancient art/archaeology or #)

Methods for excavation of Old/New World sites. Meets at archaeometry/computer lab for part of semester and at selected site in Minnesota for day-long sessions for 9 to 10 weeks.

ARTH 5411. Gender and Sexuality in Art Since 1863. (3 cr)

History of art from late 19th to early 21st century.

How gender/sexuality have been central to that period's artistic production, art criticism, and aesthetic theorization. How gender/sexuality are important themes for artists. How the writing of history reveals assumptions about gender/sex. Critical reading/writing.

ARTH 5413. Alternative Media: Video, Performance, Digital

Art. (3 cr; A-F only. Prereq—3464 or #)

In-depth examination of development of alternative media in 20th/21st century art. Video technologies. Performance, time based art. Digital art.

ARTH 5417. Twentieth Century Theory and Criticism. (3 cr.

Prereq—3464 or #)

Trends in 20th-century art theory, historical methodology, criticism. Key philosophical ideas of modernism/postmodernism: formalism, semiotics, poststructuralism, feminism, marxism, psychoanalysis, deconstruction.

ARTH 5454. Design Reform in the Era of Art Nouveau.

(3 cr)

History of art nouveau in France, Belgium, England, Germany, Austria, Scotland, United States. Innovations in architecture, graphics, decorative arts; continental variants of the style. Major promoters and pioneers of modern design. Critical issues of design reform; texts integrated with principal monuments.

ARTH 5463. Early 20th-Century Painting and Sculpture.

(3 cr)

Primary movements of early 20th century: fauvism, German expressionism, cubism, futurism, dadaism, surrealism, non-objective painting, constructivism, Orphism, early abstraction. Framed against postimpressionism and internationalism at turn of century.

ARTH 5466. Contemporary Art. (3 cr. Prereq—3464 or #)

Survey of the art and important critical literature of the period after 1970. Origins and full development of postmodern and subsequent aesthetic philosophies.

ARTH 5535. Style, Tradition, and Social Content in**American Painting: Colonial Era to 1876.** (3 cr)

America's colonial, Revolutionary era, and 19th-century painters' responses to the influence of European aesthetics. Key American painting types: portraiture, rural genre, and landscape from Copley and Gilbert Stuart to the Hudson River School and the chroniclers of the Western frontier.

ARTH 5536. Topical Studies in American Art. (3 cr)

Course description varies from year to year, depending on the current research interests of the instructor and the needs and interests of advanced undergraduate and graduate students in modern and American art.

ARTH 5546. American Architecture: 1840 to 1914. (3 cr)

American architecture from 1840 to 1914, examined in relation to European precedents and American sociohistorical conditions. Critical attention to problems of style, the architectural profession, vernacular vs. "high" architecture, technology, economics, urbanism, and social reform.

ARTH 5655. African American Cinema. (3 cr. §AFRO 4655)

African American cinematic achievements, from silent films of Oscar Micheaux through contemporary Hollywood and independent films. Class screenings, critical readings.

ARTH 5725. Ceramics in the Far East. (3 cr)

Selective examination of representative pottery and ceramic wares produced in China, Korea, and Japan from the Neolithic era to modern times. Nearly every major ceramic type is represented.

ARTH 5765. Early Chinese Art. (3 cr)

Develop a more effective way to understand the unique qualities of an individual work of art. Concentration is on accessible works of art in local private and museum collections.

ARTH 5766. Chinese Painting. (3 cr)

Major works from the late bronze age to the modern era that illustrate the development of Chinese landscape painting and associated literary traditions.

ARTH 5767. Japanese Painting. (3 cr)

Japanese pictorial arts from the late tomb period to the modern era; special attention to the development of indigenous traditions.

ARTH 5769. Connoisseurship in Asian Art. (3 cr)

A selective examination of representative works of art produced in China from the Neolithic era to the Han Dynasty. Major archaeological sites and examples of art in local collections.

ARTH 5775. Formation of Indian Art: 2500 BCE to 300 CE.

(3 cr)

Sculpture/architecture, from Indus Valley civilization through Kushana period.

ARTH 5776. Redefining Tradition: Indian Art, 400 to 1300.

(3 cr)

India's art/architecture, from earliest free-standing temples through 13th century. Focuses on temples, associated sculpture. Mural painting, beginnings of Islamic architecture in India.

ARTH 5777. The Diversity of Traditions: Indian Art 1200 to**Present.** (3 cr. Prereq—Art history course or #)

Issues presented by sculpture, architecture and painting in India from the prehistoric Indus Valley civilization to the present day.

ARTH 5781. Age of Empire: The Mughals, Safavids, and Ottomans. (3 cr)

Artistic developments under the three most powerful Islamic empires of the 16th through 19th centuries: Ottomans of Turkey; Safavids of Iran; Mughals of India. Roles of religion and state will be considered to understand their artistic production.

ARTH 5785. Art of Islamic Iran. (3 cr)

Architecture, painting, and related arts in Iran from the inception of Islam (7th century) through the 20th century. Understanding the nature of Islam in Persianate cultural settings and how artistic production here compares to the Islamic world.

ARTH 5925. History of Photography as Art. (3 cr)

Origins and development of photography, with attention to technology and cultural impact. Major aesthetic achievements in photography from its beginning to present.

ARTH 5927. Documentary Cinema. (4 cr)

History of nonfiction filmmaking, from early forms of reportage and birth of documentary to emergence of "film-verite" and "guerrilla television" and work by independents (e.g., Errol Morris, Michael Moore).

ARTH 5940. Topics: Art of the Film. (3 cr)

Topics in film history including individual directors (e.g., Hitchcock, Welles), genres (e.g., westerns, musicals), and other topics (e.g., American independent filmmaking, film noir).

ARTH 5950. Topics: Art History. (2-4 cr [max 12 cr])
Topics specified in *Class Schedule*.

ARTH 5993. Directed Study. (1-4 cr [max 12 cr]; A-F only.
Prereq=#)

ARTH 5994. Directed Research. (1-4 cr; A-F only. Prereq=#)

Asian American Studies (AAS)

Department of American Studies

College of Liberal Arts

AAS 1101. Imagining Asian America. (3 cr)

Issues in Asian American Studies. Historical/recent aspects of the diverse/multifaceted vision of Asian America, using histories, films, memoirs, and other texts as illustrations.

AAS 3001. Contemporary Perspectives on Asian America. (3 cr)

Interdisciplinary overview of Asian American experiences/identities. Emphasizes post-1965 migration/community. History, cultural productions, and contemporary concerns of Americans of Chinese, Japanese, Korean, South Asian, Filipino, and Southeast Asian ancestry.

AAS 3270. Service Learning in the Asian Community. (1-4 cr [max 4 cr]. Prereq=#)

Students engage in service learning among members of local Asian communities. Readings, mentoring, English language instruction. Other activities as deemed appropriate by instructor and sponsoring agency.

AAS 3409W. Asian American Women's Cultural Production. (3 cr)

Diversity of cultures designated "Asian American." Understanding women's lives in historical, cultural, economic, and racial contexts.

AAS 3501. Asian America Through ARTS and Culture. (4 cr)

Interdisciplinary questions of Asian American experience, identity, and community. Literature, dance, music, photography, film, theater, other cultural forms. Students work with local Asian American arts groups/organizations. Students express their own cultural contradictions through writing and other forms of artistic expression and attend local arts events.

AAS 3877. Asian American History, 1850 to Present. (3 cr)

Asian American history and contemporary issues, from 1850 to present. Immigration, labor, anti-Asian movements, women/families, impact of World War Two, new immigrant/refugee communities, civil rights, Asian American identity/culture.

AAS 3920. Topics in Asian American Studies. (2-4 cr [max 8 cr]. Prereq=jr or sr)

Topics specified in *Class Schedule*.

AAS 3993. Directed Studies in Asian American Studies. (1-9 cr [max 9 cr]. Prereq=#)

Guided individual reading or study.

AAS 4231. The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States. (3 cr. \$AFRO 4231, AMIN 4231, CHIC 4231)

Structural or institutional conditions through which people of color have been marginalized in public policy. Critical evaluation of social theory in addressing the problem of contemporary communities of color in the United States.

AAS 4311. Asian American Literature and Drama. (3 cr; A-F only)

Literary/dramatic works by Asian American writers. Historical past of Asian America through perspective of writers such as Sui Sin Far and Carlos Bulosan. Contemporary artists such as Frank Chin, Maxine Hong Kingston, David Henry Hwang, and Han Ong. Political/historical background of Asian American artists, their aesthetic choices.

AAS 4920. Topics in Asian American Studies. (2-4 cr [max 8 cr])

Topics specified in *Class Schedule*.

Asian Languages and Literatures (ALL)

Department of Asian Languages and Literatures

College of Liberal Arts

ALL 1001. Asian Film and Animation. (3 cr)

Various film styles within Asian film/animation production. Ways of analyzing film. Work of 20th-century directors in Asia.

ALL 1275. Buddhism in EAST Asia. (3 cr)

Introduction to traditions of Buddhism in China, Korea, and Japan. Arrival of Buddhism in East Asia, impact on those cultures. Modes of Buddhist transmission/interaction within East Asia. Forms of Buddhist practice. Development of monastic communities. Evolution of Buddhist doctrinal/devotional schools.

ALL 1335W. Chinese Ways of Living: Philosophical and Literary Approaches. (3 cr)

Premodern Chinese conceptions of the good and ethical life. Primary texts. Personal liberation philosophy of Zhuangzi. Han Fei zi's political legalism. Buddhist popular piety. Chan (Zen) approaches to enlightenment. Ethical/moral uses of poetry. Neo-Confucian ideals of self-cultivation. Modern Confucianism/Buddhism.

ALL 1441. Popular Music and Media in Modern Japan. (3 cr)

Traditional forms of Japanese music in relation to social/historical change. Focuses on transformation in modes of music associated with introduction of phonographs/radio. Rise of Japanese recording industry, popular music it produced. Musicology, music history, cultural history, gender studies, postcolonial studies.

ALL 1904. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq=Freshman)

Topics specified in *Class Schedule* and *Course Guide*.

ALL 1905. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq=Freshman)

Topics specified in *Class Schedule* and *Course Guide*.

ALL 1909W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq=Freshman)

Topics specified in *Class Schedule* and *Course Guide*.

ALL 1910.W Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq=Freshman)

Topics specified in *Class Schedule* and *Course Guide*.

ALL 3001. Reading Asian Cultures. (3 cr; A-F only)

Introduction to primary Asian texts in translation. Emphasizes introducing/applying various methods of interpretation to a particular text in sequence. Close reading, methodological rigor. Practice, application.

ALL 3014W. Art of India. (4 cr. \$ARTH 3014W. Prereq=\$ARTH 3014W)

Indian sculpture, architecture, and painting, from prehistoric Indus Valley civilization to present.

ALL 3110. Study of an Asian Language. (1-5 cr [max 10 cr]. Prereq=Δ)

Study of an Asian language in another country or at other non-campus locations. Students study in situations complementary to regular University course offerings.

ALL 3220. Study Abroad Topics in Asian Culture. (1-4 cr [max 12 cr]; A-F only)

Part of University of Minnesota sponsored study abroad experience.

ALL 3232W. "Short Poetry in China and Japan. (3 cr)

Short poetic forms of China and Japan. Chinese quatrains and octets. Japanese tanka and haiku. Translations by modern poets. Texts in original languages (with provided glosses). Art of translation. Translators' conceptions of East Asian exoticism.

ALL 3265W. The Fantastic in East Asia: Ghosts, Foxes, and the Alien. (3 cr. Prereq=Some coursework in East Asia recommended)

How the strange/alien is constructed in premodern Chinese/Japanese literature. East Asian theories of the strange and their role in the classical tale, through the works of Pu Songling, Ueda Akinari, and others. Role of Buddhist cosmology/salvation in other works (e.g., *Journey to the West*, drama).

ALL 3270. Service Learning in the Asian Community.

(1-4 cr [max 8 cr]. Prereq=#)

Students engage in service learning among members of local Asian communities. Readings, mentoring, English language instruction. Other activities as deemed appropriate by instructor and sponsoring agency.

ALL 3300. Topics in Chinese Literature. (1-3 cr [max 9 cr])

Selected topics in Chinese literature. Topics specified in the *Class Schedule*.

ALL 3320. Topics in Chinese Culture. (1-3 cr [max 9 cr])

Selected topics in Chinese culture. Topics specified in the *Class Schedule*.

ALL 3333. Gender and Sexuality in Traditional Chinese Literature. (3 cr)

How writers have written about gender in traditional China. Traditional Chinese attitudes toward sexuality. Poetry from early period, "stories of the strange," later fiction/drama. Transformation of these themes in popular cinema.

ALL 3336. Revolution and Modernity in Chinese Literature and Culture. (3 cr)

Introduction to modern Chinese literature, visual culture, and critical thought from beginning of 20th century to end of Mao era. Examples of literature/culture, parallel readings of Chinese critical essays. Readings are in English translation.

ALL 3337. Chinese Literature and Popular Culture Today. (3 cr)

Introductory survey of contemporary Chinese literature and popular culture from end of Mao era in 1979 to present. Creative results of China's "opening and reform." Recent commercialization/globalization of culture. Literature, visual culture, popular music.

ALL 3356W. Chinese Film. (3 cr)

Survey of Chinese cinema from China (PRC), Taiwan, and Hong Kong. Emphasizes discussion/comparison of global, social, economic, sexual, gender, psychological, and other themes as represented through film.

ALL 3361W. Maps, Pictures, and Writing in the Representation of Taiwan. (3 cr)

How visual (maps, pictures, and photographs) and written (travelogues, stories, and essays) media are used to contribute to formation of identity in representing people, place, and history of Taiwan, in historical/contemporary contexts.

ALL 3363. Imagined Worlds in Ming Qing China. (3 cr)

Imaginative worlds (fictional, religious, erotic) that were available to men and women in China of the Ming and Qing dynasties. Fiction, other texts, visual materials. Ways in which texts were produced/distributed.

ALL 3371. History of Chinese Cities and Urban Life. (3 cr; A-F only)

Introduction to traditional Chinese cities, their modern transformation. Ideal city plan in Confucian classics compared with physical layout of some major cities. Models about Chinese cities, influence of the models on our understanding of Chinese history/society.

ALL 3373. Religion and Society in Imperial China. (3 cr)
Introduction to religious traditions of imperial China (Buddhism, Daoism, Confucianism, “popular” religion), their relation to society. Role of gender. Conceptualizing relations with the divine. Ritual and its goals. Position of religious specialists such as monks and Daoist priests. Primary/secondary readings.

ALL 3400. Topics in Japanese Literature. (3 cr [max 9 cr])
Selected topics in Japanese literature. Topics specified in the *Class Schedule*.

ALL 3420. Topics in Japanese Culture. (1-3 cr [max 9 cr])
Selected topics in Japanese culture. Topics specified in the *Class Schedule*.

ALL 3433W. Traditional Japanese Literature in Translation. (3 cr. Prereq—No knowledge of Japanese necessary)
Survey of texts in different genres, from 8th to early 19th centuries, with attention to issues such as “national” identity, gender/sexuality, authorship, and popular culture.

ALL 3436. Postwar Japanese Literature in Translation. (3 cr. Prereq—Basic knowledge of modern Japanese history helpful, knowledge of Japanese language not required)
Survey of ideas/styles of recent Japanese literature. Writers include Dazai Osamu, Ibuse Masuji, Oe Kenzaburo, Mishima Yukio, and Yoshimoto Banana. All readings in English translation.

ALL 3437. Early 20th Century Japanese Literature in Translation. (3 cr)
Survey of the principal authors and genres of the period spanning Japan’s opening to the West (1860s) to World War II. Writers include Natsume Soseki, Shiga Naoya, Kawabata Yasunari, and Tanizaki Junichiro.

ALL 3441W. Japanese Theater. (3 cr)
Japanese performance traditions. Emphasizes noh, kabuki, and bunraku in their literary/cultural contexts. Relationship between these pre-modern traditions and modern theatrical forms (e.g., Takarazuka Revue).

ALL 3456. Japanese Film. (3 cr)
Themes, stylistics, and genres of Japanese cinema through work of classic directors (Kurosawa, Mizoguchi, and Ozu) and more recent filmmakers (Itami, Morita). Focuses on representations of femininity/masculinity.

ALL 3457. War and Peace in Japan Through Popular Culture. (4 cr; A-F only. Prereq—Some knowledge of modern Japanese history or #)
War-related issues in Japan. Animation films, comics from 1940s to 1990s. Mobilization of culture for WWII. Conflict between constitutional pacifism and national security. Japan’s role in cold war and post-cold war worlds.

ALL 3500. Topics in Korean Literature. (1-3 cr [max 9 cr])
Selected topics in Korean literature. Topics specified in the *Class Schedule*.

ALL 3520. Topics in Korean Culture. (1-3 cr [max 9 cr])
Selected topics in Korean culture. Topics specified in the *Class Schedule*.

ALL 3632. Readings in Indian Epic Traditions: Islamic Epic and Romance. (3 cr)
Literary traditions of epic/romance that arose in Islamic societies of Central/Southern Asia. How genres of love/war interacted with political, religious, and cultural authorities over centuries. Virtue, constructions of fantasy/understandings of reality in tales of heroes, beautiful princesses, evil kings, fairies, Jinns, magicians, and tricky secret agents.

ALL 3637W. Modern South Asian Literature. (3 cr; A-F only)
Survey of 20th century literature from South Asian countries, including India, Pakistan, and Sri Lanka. All readings in English. Focuses on colonialism, post-colonialism, power, and representation.

ALL 3676. Culture and Society of India. (3 cr. \$ANTH 3023, GLOS 3961)
Contemporary society/culture in South Asia from anthropological perspective with reference to nationalism; postcolonial identities; media and public culture; gender, kinship, and politics; religion; ethnicity; and Indian diaspora.

ALL 3720. Topics in Hmong Literature. (1-3 cr [max 9 cr])
Selected topics in Hmong culture. Topics specified in the *Class Schedule*.

ALL 3736. Hmong American Literature. (3 cr)
Emerging literature of Hmong (American) community. How Hmong literature fits into Asian, American, and Asian American literatures. Its definitions/borders. Students read, meet writers/artists, and write reflectively, analytically, and creatively.

ALL 3900. Topics in Asian Literature. (3 cr [max 9 cr])
Topics specified in *Class Schedule*.

ALL 3920. Topics in Asian Culture. (3 cr [max 9 cr])
Topics specified in *Class Schedule*.

ALL 3990. Directed Study. (1-3 cr [max 12 cr]. Prereq—#, Δ, □)
Individual reading/study, with guidance of a faculty member, on topics not covered in regular courses.

ALL 4900W. Major Project. (1 cr; A-F only. Prereq—[ALL major, sr, #])
Directed research/writing on topic selected according to individual interest and in consultation with faculty adviser.

ALL 5220. Pedagogy of Asian Languages and Literatures. (1-3 cr [max 9 cr] Prereq—Grad student)
Second language acquisition theory, methods, testing, and technology applicable to teaching of modern Asian languages/literatures.

ALL 5265. Traditional Poetics and Aesthetics in EAST Asia. (4 cr. Prereq—Some knowledge of EAST Asian culture/literature suggested)
Introduction to traditional theories of poetics/aesthetics in East Asia. Emphasizes China and Japan. Chinese interpretations of classic Poetry, their impact on conception of poetry in general. Correspondences of poetic/painting theory. Impact of Zen Buddhism on aesthetics. Japanese court treatises on poetry.

ALL 5333. Poetry and Power in Early China: Book of Songs and Songs of the South. (4 cr. Prereq—Upper div undergrad or grad student)
How to read/analyze poems from early anthologies in terms of their display/invocation of different types of cultural power. Power that poems have held over Chinese literary tradition in subsequent millennia, their literary influence/position in intellectual/political lives of Chinese readers. Studies that relate to the poetry and social/material culture.

ALL 5343. Lovers, Clowns, and Acrobats: An Introduction to Chinese Drama. (4 cr)
Traditional Chinese drama/theater. Students read/discuss major masterpieces of Chinese drama in English translation. Major secondary scholarship. Theatrical practices of modern opera (especially Beijing opera) through in-class viewings. Focuses on representation of gender/romance.

ALL 5356. Gender and Sexuality in Chinese Film. (4 cr. Prereq—Upper div undergrad or grad student)
How gender/sexuality have been depicted, constructed, and subverted in Chinese cinemas (including mainland China, Hong Kong, Taiwan) from 1930s to present. Weekly film screenings, readings on Chinese film, key works of feminist film theory.

ALL 5357. Chinese Cinematic Realisms. (4 cr)
Various styles of realism in Chinese cinemas (mainland, Taiwan) from silent era to present. Theories of realism, conceptions of “the Real” applied in close readings of major films, placed in historical context. China’s negotiation of modernity during 20th century.

ALL 5366. The Nation in Modern Chinese Film and Literature. (4 cr. Prereq—Jr or sr or grad student)
Chinese nationhood as represented/negotiated in film/literature from early 20th Century to present. How China was re-imagined as a modern nation in culture, from Republican era to Mao era to the reform era. How alternative national visions of nationhood arose in Hong Kong and Taiwan.

ALL 5374W. Representing the Past: Chinese Myth, Legend, and Ideology. (4 cr)
Analysis of texts that contain early Chinese myths, legends, and historical narratives in their construction of an understandable world. How such materials have been incorporated into different cultural formations from later periods, including contemporary popular culture. How they have figured into the construction of China and Chineseness in 20th Century.

ALL 5433. Women’s Writing in Premodern Japan in Translation. (4 cr; A-F only)
Genji monogatari, a lengthy narrative, Makura no soshi, a collection of vignettes, and poetry. Gendered writing system/authorship, narrative techniques. Sexuality/figure of author. Strategies of fictionality.

ALL 5436. Literature by 20th-Century Japanese Women in Translation. (4 cr)
Literary and historical exploration of selected works by Japanese women writers in a variety of genres. All literary texts read in English.

ALL 5466. Japanese Popular Culture in a Global Context. (4 cr)
What happens when one nation’s popular culture begins to permeate others. Japanimation, manga, fashion, and music. Relationship of popular culture to nation(alism), ethnicity, gender, and identity. Effects of popular culture on consumers, socialization. Ways that consumption affects us personally.

ALL 5476. Japanese Minority Literatures. (4 cr; A-F only. Prereq—One 3xxx course in modern [Meiji or later] Japanese literature)
Fiction/poetry by Okinawans, zainichi (Japanese of Korean descent) writers, and authors from outcaste burakumin. Interrogation of “minority literature” as theoretical construct. Alteration of what constitutes “Japanese literature.” Relationships between a group’s historical experiences and literary representation.

ALL 5477. Kurosawa, Masculinity, and Cold War. (4 cr. Prereq—Advanced undergrad or grad student)
Akira Kurosawa’s work as a film director. Emphasizes revising dominant interpretations of Japanese film/masculinity in context of pre-WWII Japanese and Cold War Japanese-U.S. situation. Politics of culture, class, social agency, and gender coding.

ALL 5636. South Asian Women Writers. (4 cr; A-F only. Prereq—Grad student or advanced undergrad)
Survey of South Asian women’s writing, from early years of nationalist movement to present. Contemporary writing includes works by immigrant writers. Concerns, arguments, and nuances in works of women writing in South Asia and diaspora.

ALL 5900. Topics in Asian Literature. (4 cr [max 16 cr])
Topics specified in *Class Schedule*.

ALL 5920. Topics in Asian Culture. (4 cr [max 16 cr])
Topics specified in *Class Schedule*.

ALL 5990. Directed Study. (1-4 cr [max 16 cr]. Prereq—#, Δ, □)
Individual reading/study, with guidance of a faculty member, on topics not covered in regular courses.

Astronomy (AST)

Department of Astronomy

Institute of Technology

AST 1001. Exploring the Universe. (4 cr. §AST 1005, AST 1011H)

The human place in the Universe. Study of Earth, other planets, sun, stars, galaxies. Background and fragility of life on Earth. Scale, origin, history of universe and our relationship to it.

AST 1005. Descriptive Astronomy. (3 cr. §AST 1001, AST 1011H. Prereq–non-science major)

Twentieth century astrophysics, current frontiers of astrophysical research.

AST 1011H. Exploring the Universe, Honors. (4 cr. §AST 1001, AST 1005. Prereq–high school trigonometry, high school physics or chemistry)

The human place in the universe. Study of Earth, other planets, sun, stars, galaxies. Background and fragility of life on Earth. Scale, origin, history of universe and our relationship to it. Honors version of Ast 1001.

AST 1901. Freshman Seminar. (1-3 cr [max 3 cr]. Prereq–Freshman)

Topics vary. See *Class Schedule*.

AST 1905. Freshman Seminar. (1-3 cr [max 3 cr]. Prereq–Freshman)

Topics vary. See *Class Schedule*.

AST 1910W. Freshman Seminar, Writing Intensive. (1-3 cr [max 3 cr]. Prereq–Freshman)

Topics vary. See *Class Schedule*.

AST 2001. Introduction to Astrophysics. (4 cr. Prereq–1 yr calculus, PHYS 2303 or #)

Physical principles and study of solar system, stars, galaxy, universe. How observations and conclusions are made.

AST 2990. Directed Studies. (1-5 cr [max 5 cr]. Prereq–1 yr calculus, PHYS 1302, #)

Independent, directed study in observational and theoretical astrophysics. Arranged with faculty member.

AST 4001. Astrophysics I. (4 cr; A-F only. Prereq–2001, PHYS 2601)

Astrophysics of stars and stellar populations. Stellar formation, evolution, interiors/atmospheres. Stellar populations, galactic distribution of stars.

AST 4002. Astrophysics II. (4 cr; A-F only. Prereq–2001, PHYS 2601)

Astrophysics of galaxies and the universe. Diffuse matter, galactic structure, and evolution. Clusters of galaxies. Introductory cosmology, evolution of the universe.

AST 4101. Computational Methods in the Physical Sciences. (4 cr. Prereq–Upper div CLA or upper div IT or grad or #)

Introduction to using computer programs to solve problems in physical sciences. Selected numerical methods, mapping problems onto computational algorithms. Arranged lab.

AST 4299H. Senior Honors Astrophysics Research Seminar. (1 cr [max 2 cr]. Prereq–Upper div honors student in IT or CLA, inst consent)

Based on department's research seminar.

AST 4990. Directed Studies. (1-5 cr [max 5 cr]. Prereq–2001, #)

Independent, directed study in observational and theoretical astrophysics. Arranged with faculty member.

AST 4994W. Directed Research. (3-5 cr [max 5 cr]. Prereq–#)

Independent research in observational or theoretical astrophysics. Senior Thesis for undergraduate astrophysics majors. Arranged with faculty member.

AST 5012. The Interstellar Medium. (4 cr. Prereq–2001, PHYS 2601 or #)

Survey of physical processes in the interstellar medium. Dynamic processes, excitation processes, emission and absorption by gas and dust. Hot bubbles, HII regions, molecular clouds.

AST 5022. Relativity, Cosmology, and the Universe. (4 cr. §PHYS 5022. Prereq–[2001, PHYS 2601] or #)

Large-scale structure/history of universe. Introduction to Newtonian/relativistic world models. Physics of early universe, cosmological tests, formation of galaxies.

AST 5201. Methods of Experimental Astrophysics. (4 cr. Prereq–Upper div IT or grad or #)

Contemporary astronomical techniques and instrumentation. Emphasizes data reduction and analysis, including image processing. Students make astronomical observations at O'Brien Observatory and use department's computing facilities for data analysis. Image processing packages include IRAF, AIPS, IDL, MIRA.

Bio-based Products (BP)

Department of Bio-based Products

College of Food, Agricultural and Natural Resource Sciences

BP 1001. Bio-based Products Orientation. (1 cr; S-N only) Introduction to professions/careers related to bio-based products. One half-day field trip required.

BP 1002. Wood and Fiber Science. (3 cr; A-F only. §BP 5202) Wood as a bio-material. Wood's anatomical/cellular structure compared with other plant-derived materials. Wood's physical properties/characteristics in various applications. Non-wood fiber, bio-product characteristics.

BP 1003. Wood and Fiber Science Lab. (1 cr; A-F only. Prereq–recommend concurrent enrollment in BP 1002)

Structure/properties of wood and agricultural plants and of fibers derived from them.

BP 1005. Introduction to Pulp and Paper Technology. (3 cr) Technology of pulp/paper manufacturing.

Terminology, key parameters. Stepwise description of processes, from harvesting of trees through fiber production and papermaking. Vista based online course.

BP 1302. Wood as a Raw Material. (3 cr. Prereq–#; cr not granted to CNR majors; distance learning)

Physical/chemical nature of wood and wood fiber. Raw material requirements, manufacturing processes, product characteristics for principal forest products. World wood supply, consumption trends.

BP 1901. Freshman Seminar. (3 cr [max 6 cr]. Prereq–Freshman)

Issues/topics related to natural resources and the environment. Topics vary each semester.

BP 1906W. Freshman Seminar. (3 cr. Prereq–Fr)

Issues/topics related to natural resources and the environment. Topics vary each semester.

BP 3001. Statics, Mechanics, and Structural Design. (4 cr; A-F only. Prereq–General physics, algebra, trigonometry)

Fundamental statics and engineering principles of structural materials. Safe/efficient engineering design skills. Emphasizes structural bio-based products.

BP 3101. Introductory Statics and Structures for Construction Management. (3 cr; A-F only. Prereq–Working knowledge of [trigonometry, geometry, algebra])

Statics, engineering wood design principles, mechanical properties of wood. Design techniques for individual components. Trusses, beams, columns. Using conventional lumber products, engineered wood products, and steel. Simple structures explored through examples, assignments.

BP 3102. Residential Indoor Air Quality. (3 cr; A-F only. §BP 5102. Prereq–Jr, one yr of college-level [physics or chemistry or biology]) or #)

Indoor air pollution issues found in residential structures, especially in north central region of the United States. Pollutant descriptions, including measurement techniques and typical ranges of concentrations. Health effects 3) Pathways and transport mechanisms. Control strategies, including mitigation and prevention.

BP 3393. Directed Study. (1-3 cr [max 12 cr]. Prereq–#)

Opportunity to pursue projects not available through independent study or extra credit. In consultation with an adviser, students develop a prospectus and complete progress reports and a final report on the project.

BP 3396. Industrial Internship (Industrial Assignment). (1 cr; A-F only. Prereq–WPS cooperative ed student)

Industrial work assignment in forest products cooperative education program. Evaluation based on formal report written by student at end of each semester of work assignment.

BP 3411. Introduction to Residential Construction. (2 cr)

Housing/construction terminology, building materials/components. Design, construction, and sales process: basic building science concepts, blueprint reading, computer-aided design, construction site logistics.

BP 3412. Introduction to Residential Building Materials Estimating. (1 cr; A-F only)

Residential construction terminology. Estimating procedures, including blueprint reading and piece-by-piece building material 'take-off' from construction plans. Held second half of semester.

BP 3503. Marketing of Bio-based Products. (4 cr; A-F only. §BP 5503)

Intro to marketing function as it relates to current/emerging bio-based products industries (building materials, paper, fuels, etc.). Product positioning, pricing, promotion, and channel management within strategic planning and environmental marketing management.

BP 4001. Chemistry of Plant Materials. (4 cr; A-F only.

§ECON 3031, ECON 4031. Prereq–CHEM 2302, [jr or sr or #]) Chemical principles underlying structure, properties, processing, and performance of plant materials.

BP 4200H. Honors Seminar. (1 cr; A-F only. Prereq–BP upper div honors, #)

Current topics presented by faculty/students. Lecture/discussion.

BP 4301. Surface and Colloid Science in Bio-based Products Manufacturing. (3 cr. §BP 5301. Prereq–CHEM 3501, [jr or sr or #])

Principles of surface/colloid science, their application to understanding manufacturing/performance of bio-based products.

BP 4302. Organisms Impacting Bio-based Products. (3 cr. §BP 5302. Prereq–1002 or WPS 1301 or #)

Organisms of importance to bio-based products. Deterioration, control, bioprocesses for benefit.

BP 4303. Bio-Based Materials Science. (3 cr. §BP 5303. Prereq–CHEM 3501, [jr or sr or #])

Basic principles of materials science, their application to bio-based materials.

BP 4305. Pulp and Paper Technology. (3 cr. §BP 5305. Prereq–Jr or #)

Pulping processes, fiber refining/processing, paper manufacturing, fiber/paper properties, paper recycling. Water requirements, effluent treatment. Chemical/mechanical pulping, pulp preparation, secondary fiber, de-inking, wet end additives. Lab problems/exercises supplemented by lectures. Online course.

BP 4313. Pulp and Paper Unit Operations. (4 cr. \$BP 5313. Prereq-4305 or #)
Application of principles of momentum, heat, and mass transfer to unit operations in pulp/paper industry. Fluid transport, filtration, sheet formation, sedimentation, drainage, pressing, heat exchange, evaporation, washing, bleaching, humidification/drying, chemical/energy recovery. Computer simulation of multiple-stage systems. Online course.

BP 4314. Papermaking Processes and Process Engineering Laboratory. (3 cr. \$BP 5314. Prereq-#)
Theory/practice of design/operation of paper machines and associated finishing/converting equipment. Experiments illustrate/apply principles of momentum, heat, and mass transfer. Operation/performance optimization of pilot-plant paper machine. Process engineering studies of industrial production systems. Online course.

BP 4320. Applied Statistics for Process Industries: Measurement, Analysis, and Control. (3 cr. \$BP 5320. Prereq-MATH 1272 or #)
Presented through the Internet. Basic concepts and most frequently used methods in statistical process control, analysis of variances, experiment design, and regression analysis. Online course.

BP 4355. Design of Wood Structures. (3 cr. Prereq-3001 or WPS 4301 or CE student or #)
Design of wood structures using Allowable Stress Design. Wood properties/characteristics important to structural design. Heavy/light frame wood construction.

BP 4362. Pulping and Bleaching. (4 cr. \$BP 5362. Prereq-BP 4305 or WPS 4305)
Chemistry/technologies in producing paper-making raw material. Focuses on wood pulping/bleaching, including non-wood fibers and recycled fiber materials. Online course.

BP 4401. Bio-based Products Engineering. (4 cr; A-F only. \$BP 5401. Prereq-CHEN 4001, CE 3502, [jr or sr or #])
Unit operations of bio-based products engineering/manufacture.

BP 4402. Bio-based Products Engineering Lab I. (1 cr; A-F only. \$BP 5402. Prereq-CHEM 2302, [jr or sr or #])
Laboratory exercises in bio-based products engineering.

BP 4403. Bio-based Products Engineering Lab II. (1 cr; A-F only. \$BP 5403. Prereq-CHEM 2302, [jr or sr or #])
Lab exercises in bio-based products engineering.

BP 4404. Bio-based Composites Engineering. (3 cr; A-F only. \$BP 5404. Prereq-3001, CHEM 3501, [jr or sr or #])
Properties of bio-based composites.

BP 4405. Process Control and Simulation. (3 cr. \$BP 5405. Prereq-CHEN 4001, CE 3502, [jr or sr or #])
Fundamental principles in system dynamics and control. Emphasizes process systems, problems faced by process engineers.

BP 4406. Understanding Wood. (2 cr. Prereq-UC only)
For woodworking professionals and serious craftspersons. Cellular structure of wood, identification of hardwoods and softwoods, interaction of water and wood. No prior technical training in wood properties is needed, although general experience with woodworking is helpful.

BP 4407. Bio-based Products Manufacturing and Applications I. (2 cr. \$BP 5407. Prereq-1002 or #)
Manufacturing and product service considerations for wood/bio-based products. Chemistry of plant-based materials. Process of papermaking.

BP 4411. Application and Performance of Wood-based Composites in Services. (2 cr; A-F only. Prereq-[1002 or WPS 1301 or 4406 or WPS 4406 or #], [UC or CEE])
Physical/mechanical properties of composites. Composite applications/installations.

BP 4412W. Bio-based Products Manufacturing and Applications II. (3 cr. \$BP 5412. Prereq-1002, upper div BP)
Manufacturing processes, end-use applications of bio-based products.

BP 4413. Systems Approach to Residential Construction. (3 cr. \$BP 5413. Prereq-[4413, upper div BP] or #)
Dynamic/interrelated issues of energy, moisture control, indoor air quality in residential bldgs. Emphasizes design, construction, and operational aspects to provide an energy efficient, durable structure/healthy living environment. Special consideration to interaction between moisture and wood products within building system.

BP 4414. Advanced Residential Building Science. (3 cr. \$BP 5414. Prereq-3001 or WPS 4301)
Theory, advanced applications for residential buildings. Focuses on heat/mass transfer.

BP 4415. Advanced Residential Building Science Lab. (1 cr; A-F only. \$BP 5415. Prereq-[3001, 4302, 4413W] or # or [(WPS 4301, 4303, 4333) or #], [4414 or WPS 4334])
Exercises on advanced applications of heat/mass transfer to predict performance of residential buildings.

BP 4416. Building Testing and Diagnostics. (2 cr. \$BP 5416. Prereq-4413W or WPS 4333)
Theoretical basis for performance testing. Diagnostics applications for residential structures. Focuses on existing structures and retrofit/remedial applications. Digital differential pressure gauges, blower doors, airflow hoods/grids, duct pressure testing, infrared thermography. Hands-on sessions for equipment use, problem solving.

BP 4491. Senior Topics: Independent Study. (1-4 cr [max 4 cr]. Prereq-Sr, #)
Independent study in student's area of interest.

BP 4501. Process and Product Design I. (2 cr. Prereq-[4001, 4301, 4303, [4401 or 4401], [4403 or 4403], fr writing req, [jr or sr]] or #)
Students develop, formulate, and complete an open-ended, engineering process-design project at conceptual level.

BP 4502W. Process and Product Design II. (3 cr. Prereq-4501, [jr or sr])
Students develop, select, formulate, and complete an open-ended, comprehensive engineering process/product design project.

BP 4504W. Bio-based Products Development and Management. (3 cr; A-F only. \$BP 5504. Prereq-Jr or sr or #)
Concepts of new-product development and product management, their application to bio-based products.

BP 4801H. Honors Research. (2 cr; A-F only. Prereq-BP upper div honors)
First semester of independent research project supervised by faculty member.

BP 4802H. Honors Research. (2 cr; A-F only. Prereq-BP upper div honors, #)
Complete honors thesis. Oral report.

BP 5001. Chemistry of Plant Materials. (4 cr; A-F only. Prereq-Grad student or #)
Chemical principles underlying structure, properties, processing, and performance of plant materials.

BP 5002. Fundamentals of Bio-renewable Resources. (3 cr; A-F only. Prereq-Grad student or sr who has undergrad training in engineering or physical or biological science or degrees in agriculture or economics)
Science/engineering of converting bio-renewable resources into bioenergy and biobased products. Defining resource base. Physical/chemical properties of bio-renewable resources. Biobased products. Methods of production for bio-renew resources. Processing technologies for fuels, chemicals, fibers, and energy. Environmental impacts. Economics of biobased products and bioenergy.

BP 5102. Residential Indoor AIR Quality. (3 cr; A-F only. \$BP 3102. Prereq-Grad student or #)
Indoor air pollution issues found in residential structures, especially in the north central region of the United States. Pollutant descriptions, including measurement techniques and typical ranges of concentrations. Health effects. Pathways, transport mechanisms. Control strategies including mitigation and prevention.

BP 5202. Wood and Fiber Science. (3 cr; A-F only. \$BP 1002)
Wood as a bio-material. Wood's anatomical/cellular structure compared with other plant-derived materials. Wood's physical properties/characteristics in various applications. Non-wood fiber, bio-product characteristics.

BP 5301. Surface and Colloid Science in Bio-based Products Manufacturing. (3 cr. \$BP 4301. Prereq-Grad student or #)
Principles of surface and colloid science, their application to manufacturing/performance of bio-based products.

BP 5302. Organisms Impacting Bio-based Products. (3 cr. \$BP 4302. Prereq-Grad student or #)
Organisms and their importance to bio-based products: deterioration, control, bioprocesses for benefit.

BP 5303. Bio-Based Materials Science. (3 cr. \$BP 4303. Prereq-Grad student or #)
Basic principles of materials science, their application to bio-based materials.

BP 5305. Pulp and Paper Technology. (3 cr. \$BP 4305. Prereq-Grad student or #)
Pulping processes, fiber refining/processing, paper manufacturing, fiber/paper properties, paper recycling. Water requirements, effluent treatment. Chemical/mechanical pulping, pulp preparation, secondary fiber, de-inking, wet end additives. Lab problems/exercises supplemented by lectures. Online course.

BP 5313. Pulp and Paper Unit Operations. (4 cr. \$BP 4313. Prereq-Grad student or #)
Application of principles of momentum, heat, and mass transfer to unit operations in pulp/paper industry. Fluid transport, filtration, sheet formation, sedimentation, drainage, pressing, heat exchange, evaporation, washing, bleaching, humidification/drying, chemical/energy recovery. Computer simulation of multiple-stage systems. Online course.

BP 5314. Papermaking Processes and Process Engineering Laboratory. (3 cr. \$BP 4314. Prereq-Grad student or #)
Theory/practice of design/operation of paper machines and associated finishing/converting equipment. Experiments illustrate/apply principles of momentum, heat, and mass transfer. Operation/performance optimization of pilot-plant paper machine. Process engineering studies of industrial production systems. Online course.

BP 5320. Applied Statistics for Process Industries: Measurement, Analysis, and Control. (3 cr. \$BP 4320. Prereq-Grad student or #)
Presented through the Internet. Basic concepts and most frequently used methods in statistical process control, analysis of variances, experiment design, and regression analysis. Online course.

BP 5362. Pulping and Bleaching. (4 cr. \$BP 4362. Prereq-Grad student or #)
Chemistry/technologies in producing paper-making raw material. Focuses on wood pulping/bleaching, including non-wood fibers and recycled fiber materials. Online course.

BP 5401. Bio-based Products Engineering. (4 cr; A-F only. \$BP 4401. Prereq-Grad student or #)
Unit operations of bio-based products engineering/manufacture.

BP 5402. Bio-based Products Engineering Lab I. (1 cr; A-F only. \$BP 4402. Prereq-Grad student or #)
Laboratory exercises in bio-based products engineering.

BP 5403. Bio-based Products Engineering Lab II. (1 cr; A-F only. \$BP 4403. Prereq-Grad student or #)
Laboratory exercises in bio-based products engineering.

BP 5404. Bio-based Composites Engineering. (3 cr; A-F only. \$BP 4404. Prereq-Grad student or #)
Properties of bio-based composites.

BP 5405. Process Control and Simulation. (3 cr. \$BP 4405. Prereq—Grad student or #)
Fundamental principles in system dynamics/control. Emphasizes process systems and problems faced by process engineers.

BP 5407. Bio-based Products Manufacturing and Applications I. (2 cr. \$BP 4407. Prereq—Grad student or #)
Manufacturing and product service considerations for wood/bio-based products. Chemistry of plant-based materials. Process of papermaking.

BP 5412. Manufacturing and Applications of Bio-based Products. (4 cr. \$BP 4412W. Prereq—Grad student or #)
Manufacturing processes, end-use applications of bio-based products.

BP 5413. A Systems Approach to Residential Construction. (3 cr. \$BP 4413. Prereq—Grad student or #)
Dynamic/interrelated issues of energy, moisture control, indoor air quality in residential bldgs. Emphasizes design, construction, and operational aspects to provide an energy efficient, durable structure, and healthy living environment. Interaction between moisture and wood products within building system.

BP 5414. Advanced Residential Building Science. (3 cr. \$BP 4414. Prereq—Grad student or #)
Building science theory, advanced applications for residential buildings. Focuses on heat/mass transfer.

BP 5415. Advanced Residential Building Science Lab. (1 cr; A-F only. \$BP 4415. Prereq—Grad student or #)
Concurrent with 4334. Exercises on advanced applications of heat/mass transfer to predict performance of residential buildings.

BP 5416. Building Testing & Diagnostics. (2 cr. \$BP 4416. Prereq—Grad student or #)

Theoretical basis for performance testing. Diagnostics applications for residential structures. Focuses on existing structures and retrofit/remedial applications. Digital differential pressure gauges, blower doors, airflow hoods/grids, duct pressure testing, infrared thermography. Hands-on sessions for equipment use, problem solving.

BP 5503. Marketing of Bio-based Products. (4 cr; A-F only. \$BP 3503. Prereq—Grad student or #)
Introduction to marketing function as it relates to current/emerging bio-based products industries (building materials, paper, fuels, etc.). Product positioning, pricing, promotion, and channel management within strategic planning and environmental marketing management.

BP 5504. Bio-based Products Development and Management. (3 cr; A-F only. \$BP 4504W. Prereq—Grad student or #)
Concepts of new product development and product management and their application to bio-based products.

Biochemistry (BioC)

Department of Biochemistry, Molecular Biology, and Biophysics

College of Biological Sciences

BIOC 1001. Elementary Biochemistry. (3 cr. Prereq—High school CHEM or college general chem)
Chemistry and biochemistry as they apply to the organization, function, and regulation of living systems, especially humans. Suitable for undergraduates who desire an introduction to biochemistry including students in health science programs such as dental hygiene or occupational therapy.

BIOC 2011. Biochemistry for the Agricultural and Health Sciences. (3 cr. \$BIOC 1012, BIOC 3001. Prereq—CHEM 1011, BIOL 1009; not for biology majors)
Survey of organic chemistry/biochemistry outlining structure/metabolism of biomolecules, metabolic regulation, and principles of molecular biology.

BIOC 3021. Biochemistry. (3 cr. \$BIOC 6021. Prereq—[BIOL 1002 or 1009], CHEM 2301)
Fundamentals of biochemistry including structure and function of proteins, nucleic acids, lipids and carbohydrates; metabolism and regulation of metabolism; quantitative treatments of chemical equilibria, enzyme catalysis and bioenergetics; the chemical basis of genetic information flow.

BIOC 3960. Research Topics in Biochemistry. (1 cr [max 2 cr]; S-N only. Prereq—3021 or 13021 or 4331 14331 or #)
Lectures, discussion on current research in the department.

BIOC 4025. Laboratory in Biochemistry. (2 cr. Prereq—3021 or 4331 or BIOL 3021)
Theory, principles, and practical use of fundamental techniques in modern biochemistry laboratories.

BIOC 4125. Laboratory in Molecular Biology and Biotechnology. (3 cr; A-F only. \$BIOC 4125, BIOL 4125, BIOL 4185. Prereq—[3021 or BIOL 3021 or BIOL 4003], [4025 or GCD 4015 or GCD 4025 or MICB 3301])
Basic recombinant DNA techniques: methods for growing, isolating, and purifying recombinant DNA and cloning vectors, DNA sequencing and sequence analysis, gene expression, Polymerase Chain Reaction (PCR), other current techniques.

BIOC 4185. Laboratory in Molecular Biology and Biotechnology. (3 cr; A-F only. \$BIOC 4185, BIOL 4125, BIOL 4185. Prereq—Enrollment in summer undergrad Research prog in life sciences [biochemistry or genetics course], intermed-level lab in [bioCHEM or genetics or cell BIOL or microbiol])
Basic recombinant DNA techniques: methods for growing, isolating, and purifying recombinant DNA and cloning vectors, DNA sequencing and sequence analysis, gene expression, Polymerase Chain Reaction (PCR), other current techniques.

BIOC 4331. Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems. (4 cr. Prereq—[[BIOL 1002 or 1009 or equiv], CHEM 2302 or equiv] or #)
Advanced survey of structure/catalysis, metabolism/bioenergetics.

BIOC 4332. Biochemistry II: Molecular Mechanisms of Signal Transduction and Gene Expression. (4 cr. Prereq—4331 or #)
Advanced survey of molecular biology, mechanisms of gene action, and biological regulation.

BIOC 4521. Introduction to Physical Biochemistry. (3 cr. Prereq—CHEM 1022, MATH 1272, PHYS 1202)
Introduction to physical chemical principles and their applications in biochemistry. Thermodynamics, kinetics, spectroscopy, and solution dynamics as applied to biochemical reactions and biopolymers.

BIOC 4793W. Directed Studies: Writing Intensive. (1-7 cr [max 7 cr]; S-N only. Prereq—#, Δ)
Individual study on selected topics or problems. Emphasizes readings, use of scientific literature. Written report.

BIOC 4794W. Directed Research: Writing Intensive. (1-6 cr [max 42 cr]; S-N only. Prereq—#, Δ)
Laboratory or field investigation of selected areas of research, including written report.

BIOC 4993. Directed Studies. (1-7 cr [max 7 cr]; S-N only. Prereq—#, Δ)
Individual study on selected topics or problems. Emphasizes selected readings, use of scientific literature.

BIOC 4994. Directed Research. (1-6 cr [max 42 cr]; S-N only. Prereq—#, Δ)
Laboratory or field investigation of selected areas of research.

BIOC 5001. Biochemistry, Molecular and Cellular Biology. (5 cr. \$BIOC 6001. Prereq—Undergrad course in biochemistry, #)
Integrated course in biochemistry, molecular biology, cell biology, and developmental biology.

BIOC 5309. Biocatalysis and Biodegradation. (3 cr. \$MICE 5309. Prereq—Chemistry through organic chemistry, knowledge of wordprocessing, e-mail, access to World Wide Web, access to college-level science library)
Assess validity of information on biocatalysis and biodegradation; learn fundamentals of microbial catabolic metabolism as it pertains to biodegradation of environmental pollutants; biocatalysis for specialty chemical synthesis; display of this information on the Web.

BIOC 5352. Microbial Biochemistry and Biotechnology: Proteins. (3 cr; A-F only. \$MICB 5352. Prereq—[[3021 or 4331 or BIOL 3021 or MICB 4111], [BIOL 3301 or MICB 3301]] or #)
Protein biotechnology. Microorganisms used as hosts for protein expression, protein expression, and engineering methods. Production of enzymes of industrial interest. Applications of protein biotechnology in bioelectronics. Formulation of therapeutic biopharmaceuticals.

BIOC 5353. Microbial Biochemistry and Biotechnology: Small Molecules. (3 cr; A-F only. Prereq—[[3021 or 4331 or BIOL 3021 or MICB 4111], [BIOL 3301 or MICB 3301]] or #)
Small molecule biotechnology. Screening strategies for drug discovery. Secondary metabolite and antibiotic biosynthesis. Combinatorial methods for generating new pharmaceutically active natural products. Production of organic acids and vitamins. Introduction to metabolic engineering.

BIOC 5361. Microbial Genomics and Bioinformatics. (3 cr. Prereq—College-level courses in [organic chemistry, biochemistry, microbiology])
Introduction to genomics. Emphasizes microbial genomics. Sequencing methods, sequence analysis, genomics databases, genome mapping, prokaryotic horizontal gene transfer, genomics in biotechnology, intellectual property issues.

BIOC 5401W. Advanced Metabolism and Its Regulation. (3 cr. Prereq—3021 or 4331 or BIOL 3021)
Underlying principles that determine metabolism of common/unusual compounds in plants, animals, microorganisms. Regulation of carbon, energy flow in whole organisms.

BIOC 5444. Muscle. (3 cr. \$PHSL 5444. Prereq—Biol/BIOC 3021 or 4331 or PHSL 3061 or #)
Muscle structure/function: molecular mechanism by which force is generated.

BIOC 5527. Introduction to Modern Structural Biology. (4 cr. Prereq—[intro biochemistry, intro physics] or physical chemistry or #)
Methods employed in modern structural biology to elucidate macromolecular structures. Primary focus on X-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy and mass spectrometry. Principles underlying structural biology and structure/function relationships.

BIOC 5528. Spectroscopy and Kinetics. (4 cr. Prereq—Intro physical chemistry or equiv; intro biochemistry recommended)
Biochemical dynamics from perspectives of kinetics and spectroscopy. Influence of structure, molecular interactions, and chemical transformations on biochemical reactions. Focuses on computational, spectroscopic, and physical methods. Steady-state and transient kinetics. Optical and magnetic resonance spectroscopies.

BIOC 5531. Macromolecular Crystallography I: Fundamentals and Techniques. (1 cr; S-N only. Prereq—[[One organic chemistry or biochemistry course], [two calculus or college physics courses]] or instr approval)
Macromolecular crystallography for protein structure determination/engineering. Determining macromolecule structure by diffraction.

BIOC 5532. Macromolecular Crystallography II: Techniques and Applications. (1 cr; S-N only. Prereq—5531)
Determining structure of macromolecule by diffraction. Using software in macromolecular crystallography.

Bioinformatics (BINF)

Department of Laboratory Medicine and Pathology

Medical School

BINF 5480. Bioinformatics Journal Club. (1 cr [max 12 cr]; S-N only)
Bioinformatics Journal Club

BINF 5490. Topics in Bioinformatics. (1-6 cr [max 12 cr]. Prereq=#)
Independent or group study in bioinformatics.

Biology (BIOL)

College of Biological Sciences

BIOL 1001. Introductory Biology I: Evolutionary and Ecological Perspectives. (4 cr. §BIOL 1009, BIOL 1009H)
Biological diversity from genetic variation to diversity of species/ecosystems. Genetic, evolutionary, and ecological processes governing biological diversity. Genetic, evolutionary, and ecological perspectives on issues concerning human diversity, human population growth, health, agriculture, and conservation. Lab.

BIOL 1002V. Introductory Biology II: Molecular, Cellular, and Developmental Perspectives. (5 cr; A-F only. Prereq=[1001 or equiv], CHEM 1021)
Chemistry of living things, cell structure/transport, energy processing in cells, introduction to primary metabolism, molecular genetics, cell physiology, cell cycles, principles of animal/plant development, regulation of development. Lab focuses on molecular scientific techniques, investigative designs. Discussion session focuses on scientific problem solving, experimental design, analysis of recent research.

BIOL 1002W. Introductory Biology II: Molecular, Cellular, and Developmental Perspectives. (5 cr; A-F only. Prereq=[1001 or equiv], CHEM 1021)
Chemistry of living things, cell structure/transport, energy processing in cells, introduction to primary metabolism, molecular genetics, cell physiology, cell cycles, principles of animal/plant development, regulation of development. Lab focuses on molecular scientific techniques, investigative designs.

BIOL 1009. General Biology. (4 cr. §BIOL 1001, BIOL 1009H. Prereq=high school chemistry; 1 term college chemistry recommended)
Major concepts of modern biology. Molecular structure of living things, energy recruitment/utilization, flow of genetic information through organisms/populations. Principles of inheritance, ecology, and evolution. Includes lab.

BIOL 1009H. Honors: General Biology. (4 cr. §BIOL 1001, BIOL 1009. Prereq=high school chemistry, honors; one term of college chemistry recommended)
Major concepts of modern biology. Molecular structure of living things, energy recruitment/utilization, flow of genetic information through organisms/populations. Principles of inheritance, ecology, and evolution. Includes lab.

BIOL 1011. General Biology for Institute of Technology Students. (4 cr. Prereq=High school chemistry; one term college chemistry recommended)
Major concepts of modern biology. Molecular structure of living things, energy recruitment/utilization, flow of genetic information through organisms/populations. Principles of inheritance, ecology, and evolution. Lecture component is concurrent with 1009 lecture.

BIOL 1020. Biology Colloquium. (1 cr [max 2 cr]; S-N only)
Introduction to the diverse fields of biology through seminars, lab tours, trips to Itasca Biological Station, and interaction with other biology students and faculty. Course may be repeated once.

BIOL 1041. Preparation for Graduate Programs in Science. (1 cr; S-N only. Prereq=#)
Necessary elements for excelling in mathematics, physical and biological sciences to prepare for graduate work in science. Required for new freshmen in the Mathematics and Science Tutorial (MST) Program.

BIOL 1093. Biology Colloquium: Directed Study. (1 cr; S-N only. Prereq=1020 and ¶1020)
Individual study or research undertaken by a student concurrently enrolled in Biol 1020 with oversight by a faculty sponsor.

BIOL 1101W. Heredity and Human Society. (3 cr. Prereq=no cr if taken after 4003 or GCB 3022)
Principles of heredity and their social and cultural implications.

BIOL 1105. Introduction to Biology, Society, and the Environment. (2 cr; A-F only)
Social context of biology, relevance of biology to social/environmental issues. How biology shapes and is shaped by current events, legislation, ethical concerns, and history. Case studies, discussion.

BIOL 1805. Nature of Life: Introducing New Students to the Biological Sciences. (2 cr. Prereq=Fr in College of Biological Sciences)
Biological sciences, from molecules to ecosystems and from laboratory science to field biology. Introduction to the College of Biological Sciences community and opportunities. Held at Itasca Biological Station and Laboratories. Transportation, board, and lodging fee.

BIOL 1901. Freshman Seminar for the Biological Sciences. (1-2 cr [max 2 cr]; A-F only. Prereq=Freshman)
Orientation to University environment. Special topics illustrate importance of biological issues.

BIOL 1903. Freshman Seminar for the Biological Sciences. (1-2 cr [max 2 cr]; A-F only. Prereq=Freshman)
Orientation to University environment. Special topics illustrate importance of biological issues.

BIOL 1905. Freshman Seminar for the Biological Sciences. (1-3 cr [max 3 cr] Prereq=Freshman)
Orientation to University environment. Special topics that illustrate the importance of biological topics/issues in modern society.

BIOL 1910W. Freshman Seminar for the Biological Sciences. (2 cr; A-F only. Prereq=Freshman)
Orientation to University environment. Special topics that illustrate the importance of biological topics/issues in modern society. Writing-intensive.

BIOL 1981. Intersections of Biology at Lake Itasca. (1 cr; A-F only. Prereq=[45 or fewer cr] or #)
Plant biochemistry, terrestrial ecology, aquatic ecology, ecological genetics, molecular biology. Ten-day course at Lake Itasca Forestry and Biological Station in north central Minnesota. Lab, field work.

BIOL 2005. Animal Diversity Laboratory. (1 cr. §BIOL 2012. Prereq=3211 or ¶3211)
Dissection and direct observation of representatives of major animal groups.

BIOL 2012. General Zoology. (4 cr. §BIOL 2005. Prereq=1009 or 1001)
Major animal groups (phyla). Applications of morphological, physiological, and developmental characteristics to define evolutionary relationships. Parasitic forms affecting human welfare. Lab requires dissection, including mammals.

BIOL 2022. General Botany. (3 cr; A-F only. §BIOL 2822. Prereq=1001 or 1009)
Principles of plant biology. Organization, function, growth/development, and reproductive biology of plants and plant-like organisms. Lab.

BIOL 2032. General Microbiology with Laboratory. (4 cr. §MICB 3301. Prereq=1002 or 1009, CHEM 1022, intended primarily for non-microbiology majors)
Fundamental principles of microbiology. Bacterial metabolism, growth, and genetics. Biology of viruses/fungi. Control of microorganisms. Host-microbe interactions. Microorganisms and disease. Applied microbiology. Includes lab.

BIOL 2201. Introduction to Computing in Biology. (1 cr; S-N only. Prereq=[1009 or 1002 or equiv], biological sciences major)
Hands-on use of microcomputers to show how computers manipulate data, prepare graphs/graphics, acquire/analyze scientific data, perform literature searches, prepare scientific presentations, communicate via network.

BIOL 2812. Field Zoology. (4 cr. Prereq=Beginning biology)
Major animal groups. Native Minnesota organisms in their natural habitat. Lecture, lab, and field experiences emphasize morphological, physiological, and developmental characteristics to define evolutionary relationships. Parasitic forms affecting human welfare. Labs require dissections, including mammals.

BIOL 2822. General botany. (3 cr; A-F only. §BIOL 2022. Prereq=[1001 or 1009], Δ)
Principles of plant biology. Organization, function, growth/development, and reproductive biology of plants and plant-like organisms. Lab, field work.

BIOL 2960H. Explorations in the Biological Sciences: Honors Colloquium. (1 cr; A-F only. Prereq=CBS honors program, soph, Δ)
Students explore various areas of biological research, interact with scientists and fellow students, and prepare an in-depth review paper.

BIOL 3002. Plant Biology: Function. (2 cr. Prereq=1002 or 1009, one sem chemistry with some organic content [e.g., CHEM 1011], ¶3005 or AGRO 3005 or HORT 3005)
How plants make and use food; mineral function and uptake; water relations; transport processes; growth and development.

BIOL 3005W. Plant Function Laboratory. (2 cr. Prereq=Concurrent enrollment 3002)
Various plant processes at subcellular, organ, whole plant levels. Lab, recitation.

BIOL 3007W. Plant Biology: Diversity and Adaptation. (4 cr. Prereq=1002 or 1009, CHEM 1021)
Evolution/diversity of plants, their adaptations for survival in varied environments. Includes lab.

BIOL 3211. Animal Physiology. (3 cr. Prereq=[1002 or 1009], CHEM 1021; ¶2005 strongly recommended)
Compares ways different animals solve similar physiological problems.

BIOL 3407. Ecology. (3 cr. §BIOL 3807, BIOL 5407, EEB 3001. Prereq=[1001 or 1009 or equiv], [MATH 1142 or MATH 1271 or equiv])
Principles of population growth/interactions and ecosystem function applied to ecological issues. Regulation of human populations, dynamics/impacts of disease, invasions by exotic organisms, habitat fragmentation, biodiversity. Lab.

BIOL 3409. Evolution. (3 cr. §BIOL 5409. Prereq=1002 or 1009)
Diversity of forms in fossil record and in presently existing biology. Genetic mechanisms of evolution. Examples of ongoing evolution in wild/domesticated populations and in disease-causing organisms. Lab.

BIOL 3411. Introduction to Animal Behavior. (3 cr. §BIOL 3811. Prereq=1002 or 1009 or #)
Biological study of animal behavior. Mechanism development, function, and evolution. Emphasizes evolution of adaptive behavior, social behavior in the natural environment. Lab.

BIOL 3503. Biology of Aging. (2 cr. Prereq=1002 or 1009)
Age-related changes in individuals/populations. Evolution of senescence. Genes that influence aging. Interventions. Prospects for an aging human society.

BIOL 3600. Directed Instruction. (1-2 cr [max 6 cr]; S-N only. Prereq=1020, upper div, application, #; up to 4 cr may apply to major)
Students assist with biology colloquium.

BIOL 3610. Internship: Professional Experience in Biological Sciences. (1-6 cr [max 6 cr]; S-N only. Prereq=Acceptance into CBS Internship Program, internship workshop, □)

Matches student's academic or career goals with opportunities in industry, non-profit organizations, and government agencies.

BIOL 3700. Undergraduate Seminar. (1 cr [max 3 cr]; S-N only)

Faculty members lead groups of students in discussions on topics of current interest.

BIOL 3807. Ecology. (4 cr; A-F only. §BIOL 3407, BIOL 5407, EEB 3001. Prereq=[1001 or 1009 or equiv], [MATH 1142 or MATH 1271 or equiv])

Principles of population growth/interactions and ecosystem function applied to ecological issues. Regulation of human populations, dynamics/impacts of disease, invasions by exotic organisms, habitat fragmentation, biodiversity. Lab, field work.

BIOL 3811. Introduction to Animal Behavior. (4 cr; A-F only. §BIOL 3411. Prereq=[1002 or 1009] or #)

Biological study of animal behavior. Mechanism development, function, and evolution. Emphasizes evolution of adaptive behavior, social behavior in the natural environment. Lab, field work.

BIOL 3820. Aquatic Toxicology. (2 cr. Prereq=Courses in [general biology, chemistry])

Principles of Aquatic Toxicology. Environmental, industrial, and natural chemicals. Fate/interactions of chemicals with organisms and the aquatic environment. Insecticides, endocrine disruptors, biomarkers/bioassays, molecular sensors, risk assessment.

BIOL 3960H. Honors Seminar. (1 cr [max 2 cr] Prereq=Limited to participation in CBS honors program, Δ)

Oral reports on topics of current interest to biologists. Progress reports on laboratory and field research by students.

BIOL 4003. Genetics. (3 cr. §GCD 3022. Prereq=BIOC 3021 or BIOC 4331)

Introduction to the nature of genetic information, its transmission from parents to offspring, its expression in cells and organisms, and its course in populations.

BIOL 4004. Cell Biology. (3 cr. Prereq=BIOL/BIOC 3021 or BIOC 5331, BIOL 4003 or BIOC 4332)

Processes fundamental to cells emphasizing eukaryotic cells. Assembly and function of membranes and organelles. Cell division, cell form and movement, intercellular communication, transport, and secretion pathways. Some discussion of specialized cells including cancer cells and differentiated cells.

BIOL 4185. Recombinant DNA Laboratory. (3 cr; A-F only. §BIOC 4125, BIOC 4185, BIOL 4125. Prereq=[biochemistry or genetics course], [intermediate-level lab in biochemistry or genetics or cell biology or microbiology], enrollment in Summer Undergraduate Research Program in Life Sciences, o) Basic recombinant DNA techniques. Methods for growing, isolating, and purifying recombinant DNAs and for cloning vectors.

BIOL 4501. Social Uses of Biology. (3 cr. Prereq=7 cr in sciences)

Influence of biological science on the quality of human life: agriculture, medicine, occupational health, environmental science, and theories of human nature. Responsibilities and roles of biologists in policy formulation in the scientific and political world.

BIOL 4850. Special Topics in Biology. (2-5 cr [max 10 cr] Prereq=Beginning biology)
Offered at Itasca Biological Station and Laboratories. Topics include telemetry/animal behavior, aquatic botany, and field evolution.

BIOL 4862. Biological Photography and Digital Imaging Techniques. (3 cr; A-F only. Prereq=1001 or 1009)

Field photography techniques for documentation of invertebrates, vertebrates, aquatic organisms, and habitats of Itasca area. Digital imaging equipment, software, related techniques. Building video files for the Web.

BIOL 4894. Directed Research at Itasca. (1-7 cr [max 7 cr]; S-N only. Prereq=#, Δ; max of 7 cr of [4894 or 4993 or 4994] may count toward major requirements)

Field investigation of selected areas of research at Itasca Field Station.

BIOL 4950. Special Topics in Biology. (1 cr [max 10 cr]. Prereq=[1009 or equiv or basic biology/genetics], #)

Science used to make genetically modified plants. Potential benefits/dangers of releasing these plants into the environment and including them in global food supply.

BIOL 5407. Ecology. (3 cr. §BIOL 3407, BIOL 3807, EEB 3001. Prereq=[1001 or 1009 or equiv], [MATH 1142 or MATH 1271 or equiv], grad] or inst consent)

Principles of population growth/interactions and ecosystem function applied to ecological issues, including regulation of human populations, dynamics/impacts of disease, invasions by exotic organisms, habitat fragmentation, and biodiversity. Lab.

BIOL 5409. Evolution. (3 cr. §BIOL 3409. Prereq=[1001 or 1009], grad] or #)

Diversity of forms in fossil record and in presently existing biology. Genetic mechanisms of evolution. Examples of ongoing evolution in wild/domesticated populations and in disease-causing organisms. Lab.

BIOL 5485. Introductory Bioinformatics. (3 cr. Prereq=4003 or #4003 or equiv)

Modern computational tools used in molecular biology and genomics research. When/how to use particular tools, how to interpret results. Principles and advantages/disadvantages of various methods.

BIOL 5511. Teaching the Biological Sciences. (3 cr; A-F only. Prereq=6 cr in the life sciences)

Methods and teaching styles used by outstanding university teachers including reviews and critiques from research on teaching. Opportunities for students to practice and evaluate teaching strategies.

BIOL 5910. Special Topics in Biology for Teachers. (1-4 cr [max 12 cr]. Prereq=BA or BS in science or science education or elementary education or K-12 licensed teacher)

Courses developed for K-12 teachers depending on topics or subtopics which might include any of the following: plant biology, animal biology, genetics, cell biology, biochemistry, microbiology.

BIOL 5913. Biology for Teachers: Monarchs in the Classroom. (3 cr. Prereq=[Elementary or middle school or high school or preservice] teacher or #), application)

Two-week summer workshop. Week one focuses on monarch butterfly biology taught through fieldwork, labs, lecture, and research projects. A 2- to 3-week break follows, when students raise monarchs, conduct simple experiments. Week two focuses on designing classroom activities/projects based on monarch biology. Follow-up meetings held during academic year.

Biomedical Engineering (BMEN)

Biomedical Engineering Institute

Institute of Technology

BMEN 1601. Biomedical Engineering Undergraduate Seminar I. (1 cr)

Introduction to biomedical engineering from academic/industrial perspectives. Survey of current/emerging areas.

BMEN 2401. Programming for Biomedical Engineers. (2 cr. Prereq=MATH 1272, PHYS 1302)

Introduction to structured programming in biomedical engineering. Development of programming skills/logic relevant for numerical methods used for analyzing biomedical signals and solving algebraic/differential equations using Matlab. Programming logic/structured programming, introduction to scientific computation motivated by signal representations. Weekly lecture, computer lab modules.

BMEN 2501. Cellular and Molecular Biology for Biomedical Engineers. (4 cr; A-F only. Prereq=CHEM 1022, MATH 1372, PHYS 1302, [Δ or □])

Fundamentals of cellular/molecular biology. Chemistry of proteins, lipids, and nucleic acids. Applications to biomedical engineering. Function/dynamics of intracellular structures and differentiated animal cells. Emphasizes application of physical/chemical fundamentals to modeling cellular/subcellular processes. Lecture/lab.

BMEN 2602. Biomedical Engineering Undergraduate Seminar II. (1 cr. Prereq=2601 or Δ)

Continuation of 2601. Emphasizes biomedical engineering design and numerical analysis.

BMEN 3001. Biomechanics. (4 cr; A-F only. Prereq=MATH 2374, PHYS 1302, [BME upper div or Δ])

Statics, dynamics, and deformable body mechanics applied to biological/biomedical problems. Mechanical properties of biological and commonly used biomedical engineering materials. Techniques for numerical solution of biomechanics problems. Lecture/laboratory.

BMEN 3002. Biomechanics Laboratory. (1 cr; A-F only. Prereq=Math 2374, PHYS 1302, [BME upper div or Δ]; not intended for students taking 3001)

Laboratory experiments in statics, dynamics, and deformable body mechanics applied to biological/biomedical problems.

BMEN 3101. Biomedical Transport Processes. (4 cr; A-F only. Prereq=Math 2374, PHYS 1302, [BMEN upper div or Δ])

Principles of momentum, heat, and mass transfer illustrated with applications in physiological processes. Fluid mechanics, heat condition, mass diffusion, convection. Lecture/laboratory.

BMEN 3201. Bioelectricity and Bioinstrumentation. (4 cr; A-F only. Prereq=[Math 2263 or Math 2374], PHYS 1302, [BMEN upper div or Δ])

Principles of electrical phenomena, instruments relevant to biomedical applications. Lecture/laboratory.

BMEN 3202. Bioelectricity and Bioinstrumentation Laboratory. (1 cr; A-F only. Prereq=Math 2374, PHYS 1302, [BME upper div or Δ]; not intended for students taking 3201)

Laboratory experiments in electrical phenomena. Instruments relevant to biomedical applications.

BMEN 3301. Biomaterials. (4 cr; A-F only. Prereq=[Math 2263 or Math 2374], PHYS 1302, [BMEN upper div or Δ])

Principles of biomaterials. Organic chemistry and biochemistry of natural/artificial biomaterials. Physical characterization and mechanical testing. Biomedical applications. Lecture/laboratory.

BMEN 3701. Physiology Lab. (2 cr; A-F only. §PHSL 3061, PHSL 3063, PHSL 3701. Prereq=[Math 2263 or Math 2374], PHYS 1302, [BMEN upper div or Δ])

Laboratory experiments in physiology. Emphasizes quantitative aspects, including analysis of organ systems.

BMEN 4001W. Biomedical Engineering Design I. (3 cr [max 4 cr]; A-F only. Prereq=2501, 3001, 3101, 3201, 3301, 3701)

Design/analysis of biomedical devices/technologies. Students work in teams on open ended design project, present completed work at design show.

BMEN 4002W. Biomedical Engineering Design II. (3 cr; A-F only. Prereq=4001W)

Continuation of 4001W.

BMEN 4710. Directed Research. (1-4 cr [max 4 cr]; A-F only. Prereq-#, Δ)
Independent laboratory research under faculty supervision.

BMEN 4720. Directed Study. (1-4 cr [max 4 cr]; A-F only. Prereq-#, Δ)
Directed study under faculty supervision.

BMEN 4910. Special Topics in Biomedical Engineering. (1-4 cr [max 4 cr]; A-F only. Prereq-#)
New or experimental special topics.

BMEN 5001. Advanced Biomaterials. (3 cr; A-F only. Prereq-3301 or MATS 3011 or grad student or #)
Commonly used biomaterials. Chemical/physical aspects. Practical examples from such areas as cardiovascular/orthopedic applications, drug delivery, and cell encapsulation. Methods used for chemical analysis and for physical characterization of biomaterials. Effect of additives, stabilizers, processing conditions, and sterilization methods.

BMEN 5041. Tissue Engineering. (3 cr. Prereq-IT upper div or grad student or med student or #)
Fundamentals of wound healing and tissue repair; characterization of cell-matrix interactions; case study of engineered tissues, including skin, bone marrow, liver, vessel, and cartilage; regulation of biomaterials and engineered tissues.

BMEN 5101. Advanced Bioelectricity and Instrumentation. (3 cr. Prereq-[IT upper div, grad student] or #)
Instrumentation, computer systems, and processing requirements for clinical physiological signals. Electrode characteristics, signal processing, and interpretation of physiological events by ECG, EEG, and EMG. Measurement of respiration and blood volume/flow.

BMEN 5102. Bioelectric Measurements and Therapeutic Devices II. (3 cr. Prereq-5101 or #)
Theory/application of electrical stimulation in areas of therapeutic/functional neuromuscular stimulation and pain control, cardiac pacing, defibrillation, tissue healing, and electrotherapy. Safety of electric fields. Electrical tissue impedance measurements.

BMEN 5151. Biomedical MEMS. (4 cr; A-F only. Prereq-Analog circuit principles, basic electromagnetic theory)
Survey of solid-state biomed transducers. Physical principles of operation and technology implementation of microsensors/microactuators. Physical, chemical, and biomed sensors. Actuators for surgery. Other precision positioning applications, materials, and fabrications. Emphasizes recent advances in biomed microelectromechanical systems.

BMEN 5201. Advanced Biomechanics. (3 cr. Prereq-[[3001 or equiv], [IT upper div or grad student]] or #)
Introduction to biomechanics of musculoskeletal system. Anatomy, tissue material properties. Kinematics, dynamics, and control of joint/limb movement. Analysis of forces/motions within joints. Application to injury, disease. Treatment of specific joints, design of orthopedic devices/implants.

BMEN 5212. Tissue Mechanics. (2 cr; A-F only. Prereq-5201 or AEM 5501)
Fundamental principles of continuum mechanics applied to physiological systems. Systematic consideration of individual tissues and organs. Relationships among histology, anatomy, physiology, and mechanical function in these tissues. Changes in mechanical properties related to pathology. Emphasizes tissues in the cardiovascular system.

BMEN 5311. Advanced Biomedical Transport Processes. (3-4 cr [max 4 cr]. \$CHEN 5753, ME 5381. Prereq-IT upper div or grad student or #; [CHEN 5103 or ME 5342] recommended)
Introduction to biological fluid, mass, and heat transport. Mass transfer across membranes. Fluid flow in vessels/interstitium. Heat transfer in cells, tissues, and body. Applications to blood oxygenation, respiration, drug delivery, and tissue engineering.

BMEN 5351. Cell Engineering. (3 cr. Prereq-[2501 or 5501], CSCI 1107, [Math 2243 or Math 2373], [IT upper div or grad student or #])
Engineering approaches to cell-related phenomena important to cell/tissue engineering. Receptor/ligand binding. Trafficking/signaling processes. Applications to cell proliferation, adhesion, and motility. Cell-matrix interactions.

BMEN 5371. Biomedical Applications of Heat Transfer in Humans. (3-4 cr [max 4 cr]. Prereq-PHSL 3061, PHSL 3071, PHSL 5061)
Overview of physiology underlying thermoregulation in humans, clinical applications of heat transfer in humans, framework for design project.

BMEN 5401. Advanced Functional Biomedical Imaging. (3 cr; A-F only. Prereq-IT upper div or grad student or #)
Functional biomedical imaging modalities. Principles/applications of representative functional imaging technologies that offer high spatial resolution or temporal resolution. Emphasizes principles and methodological foundations of bioelectromagnetic imaging and magnetic resonance imaging. Other functional biomedical imaging modalities.

BMEN 5444. Muscle. (3 cr)
Muscle structure/function: molecular mechanism by which force is generated.

BMEN 5501. Biology for Biomedical Engineers. (3-4 cr [max 4 cr]. Prereq-Engineering upper div or grad student)
Concepts of cell/tissue structure/function. Basic principles of cell biology. Tissue engineering, artificial organs.

BMEN 5502. Pathobiology of Medical Devices. (3 cr; A-F only. Prereq-IT upper division or grad student)
