Biological response to biomaterials presented in context of fundamental principles of cell injury, adaptation, repair, or death. Diversity of medical uses of biomaterials, by organ system. Unique features of specific biological systems in which medical devices are used.

BMEN 5910. Special Topics in Biomedical Engineering. (1-4 cr [max 4 cr])

BMEN 5920. Special Topics in Biomedical Engineering. (2-3 cr [max 6 cr])

Biosystems and Agricultural Engineering (BAE)

Institute of Technology

College of Food, Agricultural and Natural Resource Sciences

BAE 1011. Biosystems and Agricultural Engineering Orientation. (1 cr; S-N only)
Introduction to biosystems and agricultural engineering profession through readings and discussions by faculty, practicing engineers, and students; curriculum and intern, undergraduate research, and honors opportunities. Ethics, safety, environmental issues.

BAE 2113. Introduction to Design. (3 cr; A-F only. Prereq-MATH 1271)
Creativity, problem formulation, identification of alternative solutions, safety/health considerations, economic feasibility. Engineering economics. Engineering graphics, computer drafting. Projects involving written, graphic, and oral presentations.

BAE 3013. Engineering Principles of Molecular and Cellular Processes. (3 cr; A-F only. Prereq-BIOL 1009, [CHEM 1022 or CHEM 1022])
Applied engineering principles in biological processes, classification of microbes of industrial importance, parameters for cellular control, modeling of cell growth/metabolism, enzymatic catalysis, bioreactor design, product recovery operations design, case studies.

BAE 3023. Engineering Principles of Soil-Water-Plant Processes. (3 cr. Prereq-BIOL 1009, [CE 3502 or ICE 3502])
Physical, thermal, texture, strength, and moisture properties of soil. Saturated/unsaturated moisture movement. Energy/water balances in soil-plant systems. Plant stresses from drought, flooding, temperature, radiation, compaction, pollution. Engineering/management impacts on soil-water-plant systems.

BAE 3093. Directed Studies. (1-5 cr [max 5 cr]. Prereq-#)
Independent study of topic(s) involving physical principles as applied to agricultural production and land resources.

BAE 4013. Transport in Biological Systems. (4 cr; A-F only. Prereq-[3013 or 13013 or CHEN 3701], CE 3502, [ME 3331 or CHEN 4101], upper div IT)
Application of thermodynamics, fluid flow, heat/mass transfer to design problems involving biological processes and materials at cell, organism, and system level. Agricultural, environmental, food, and bioprocess applications. Solution of equations involving computer programming assignments. Hands-on instruction in Visual Basic.

BAE 4023. Instrumentation and Control for Biological Systems. (3 cr; A-F only. Prereq-EE 3005 or ICE 3005, STAT 3021, upper div IT)
Measurement of motion, force, pressure, flow, temperature, size, shape, color, texture, rheology, moisture, water mobility, fat, and pH. Linking physical and biological control systems.

BAE 4114W. Capstone Design Project. (4 cr; A-F only. Prereq-2113, [upper div IT or sr] or #)
Design concepts, design process. Case studies involving engineering design. Health, safety, and ethical issues facing engineers. Proposal for capstone design team project, including oral presentation of written proposal. Comprehensive design project, including written report, poster, and oral presentation of final design.

BAE 4313. Design of Machine Systems. (3 cr; A-F only. Prereq-AEM 2021, AEM 3031, [CE 3502 or ICE 3502], upper div IT)
Case studies of machines/processes. Design for world markets; crop production (tractors, harvesters, implements). Food-/crop-processing systems (pumping, conveying). Animal systems (milking parlor design, waste-handling machines).

BAE 4323. Machinery Elements. (3 cr. Prereq-AEM 2021, AEM 3031, [CE 3502 or ICE 3502], upper div IT)
Building blocks for machines used in crop production and food processing. Power from diesel engines, electric/hydraulic motors. Performance characteristics, efficiency. Machine-control systems modeling (electro-hydraulic), machinery/hydraulic circuit design, safety.

BAE 4523. Water Management Engineering. (3 cr; A-F only. Prereq-3023 or CE 3301, CE 3502, upper div IT)
Applying engineering principles to management of water for production and environmental protection in agricultural systems. Designing facilities to irrigate/drain croplands and enhance water quality.

BAE 4533. Agricultural Waste Management Engineering. (3 cr; A-F only. Prereq-3023, upper div IT)
Sources and characteristics of agricultural wastes, including livestock, food processing, and domestic wastes. Physical, biological, chemical, rheological, and microbiological properties. Effects on environment. Collection, storage, treatment (aerobic and anaerobic), and use/disposal. Land application.

BAE 4713. Bioprocess Engineering. (3 cr; A-F only. Prereq-[4013 or 14013], upper div IT) Fermentation/separation as applied to biological systems. Product recovery in bioprocess technology. Topics in bioremediation. Modeling of separation processes in biological systems.

BAE 4723. Food Process Engineering. (3 cr; A-F only. Prereq-[4013 or 14013], upper div IT) Application of principles of heat transfer and fluid flow to design of food processing operations such as thermal/aseptic processing, freezing, pumping, drying, evaporation, extrusion. Marketing, government regulation, nutrition issues.

BAE 4744. Engineering Principles for Biological Scientists. (4 cr; A-F only. SFSCN 4331. Prereq-[MATH 1142 or MATH 1271], PHYS 1101; intended for non engineering students) Material/energy balances applied to processing systems. Principles of fluid flow, thermodynamics, heat, mass transfer applied to food and bioprocess unit operations such as pumping, heat exchange, refrigeration/freezing, drying, evaporation, and separation.

BAE 4900. Intern Reports. (2 or [max 4 cr]; S-N only. Prereq-IT or COAFES student in BAE, #) Reports on intern work assignments reviewed by faculty and industry advisers.

BAE 5095. Special Problems. (1-5 cr [max 5 cr]. Prereq-#) Advanced individual-study project. Application of engineering principles to specific problem.

BAE 5203. Environmental Impacts of Food Production. (3 cr; A-F only. Prereq-intended for non-engineering students; Credit will not be granted if credit has been received for AGET 5203)

Crop production intensity, animal raising options, food processing waste alternatives, pest control.

BAE 5212. Safety and Environmental Health Issues in Plant and Animal Production and Processing. (3 cr; A-F only. Prereq-Grad student or sr or #; Credit will not be granted if credit has been received for AGET 5212)

Safety/health issues in food production, processing and horticultural work environments using public health, injury control, and health promotion frameworks: regulation, engineering, education. Traumatic injury, occupational illness, ergonomics, pesticide health effects, biotechnology, air contaminants.

BAE 5513. Watershed Engineering. (3 cr; A-F only. Prereq-3023, upper div IT)

Application of engineering principles to managing surface runoff from agricultural, range, and urban watersheds. Design of facilities and selection of land use practices for controlling surface runoff to mitigate problems of flooding and degradation of surface-water quality.

Business Administration (BA)

Curtis L. Carlson School of Management

BA 1001. Introduction to Information Technology. (1 cr; S-N only)

Assess computing skills. Identify resources to develop skills in word processing, spreadsheets, presentation software, e-mail, LUMINA, remote access, and Web. Self-paced.

BA 1905. Freshman Seminar. (3 cr [max 6 cr] Prereq-Fr) Topics vary.

BA 1910.W Freshman Seminar, WI. (2-3 cr [max 9 cr]; A-F only. Prereq-Freshman) Topics vary. See *Class Schedule*.

BA 1998. Independent Study. (1-4 cr. Prereq-#) Special project or independent study.

BA 3000. Career Skills. (1 cr; A-F only. Prereq-CSOM pre-major with 30 credits or upper division major) Career planning. Use of Carlson School of Management's Business Career Center. Students gain awareness, knowledge, skills associated with career/job search process.

BA 3033V. Honors: Business Communication. (3 cr; A-F only. Prereq-60 cr, CSOM honors)

Written/oral communication skills for effective participation in contemporary organizations. From basic principles to communication strategy. Communication technology. Cases, simulations of "real-world" situations. Student small groups meet with instructor three times for presentation coaching/feedback. Recitation times are arranged with instructor at start of semester.

BA 3033W. Business Communication. (3 cr; A-F only. Prereq-Fr composition, CSOM upper-div, at least 60 cr)

Written/oral communication skills for effective participation in contemporary organizations. From basic principles to communication strategy. Communication technology. Cases, simulations of "real-world" situations. Student small groups meet with instructor three times for presentation coaching/feedback. Recitation times are arranged with instructor at start of semester.

BA 3101W. Global Seminar: Supplemental Writing. (1 cr [max 2 cr]; A-F only. Prereq-Current enrollment in 3100)

Projects developed by instructor of Global Seminar. Students analyze/process intercultural experience of studying abroad. Individualized feedback/coaching in writing skills. Taught during intersession. Writing intensive, if concurrently enrolled in 3100.

BA 3200H. Securian Foundation Leadership Colloquium. (2 cr. Prereq-Honors)

How to cultivate, evaluate, and apply leadership concepts in all phases of life. Emphasizes real leadership experiences. Ethical leadership, leadership communication, management vs leadership, motivation/empowerment, leading in a diverse environment, leading during change.

BA 3701H. Healthcare Marketplace: Principals and Agents in a Trillion-Dollar Economy. (4 cr. Prereq-honors student)

Introduction to healthcare sector markets for goods/services. Physician services, hospital services, insurance, long-term care, pharmaceuticals, medical devices, information technology. Lectures, recitations, presentations from healthcare business leaders.

BA 3900. Topics. (1-4 cr [max 12 cr]) Topics in business vary.

BA 3990H. Honors Topics. (2-4 cr [max 8 cr]; A-F only. Prereq-Honors) Topics vary.

BA 3998. Independent Study. (1-6 cr [max 16 cr]. Prereq-CSOM upper div, #)

Student-initiated project or independent study.

BA 3999. Internship Seminar. (1 cr; S-N only. Prereq-30 cr, approved internship, #)

Integrates students' internship experiences with in-class discussions, relevant readings/assignments on issues related to world of work, workplace, and transition from college to work.

BA 4000H. Honors Seminar. (4 cr; A-F only. Prereq-CSOM honors, 2nd sem sr)

Capstone course for Carlson honors program. Organizational or cross-functional topics.

Business and Industry Education (BIE)

Department of Work and Human Resource Education

College of Education and Human Development

BIE 1396. Supervised Career and Technical Education Teaching. (4 cr; S-N only. Prereq-□)

Supervised teaching for beginning teachers, or teaching activities for preservice teachers.

BIE 3061. Professional Sales Management. (3 cr; A-F only) Examination of the sales manager's role in training and mentoring sales representatives in strategic selling, customer-oriented service, and problem-solving tactics. Includes recruitment, hiring, training, and retention of a sales force.

BIE 3111. Exploring Technology Systems. (3 cr) Communication, information, construction, manufacturing, design, technical drawing, biotechnology, energy, power, and transportation technologies. Students develop problem solving and manipulative skills as well as understanding of the principles and processes through hands-on activities in a multiple activity laboratory.

BIE 3112. Technical Drawing and Production Technologies. (3 cr; A-F only. \$AFEE 3112)

Instruction and laboratory experiences in technical drawing and design technologies; production technologies related to construction and manufacturing. Students will develop manipulative skills and techniques and an understanding of principles and processes of the technologies through hands-on work and lab activities.

BIE 3113. Manufacturing Technology. (3 cr. Prereq-Concurrent enrollment 3111) Manufacturing concepts, principles, and applications. Automated manufacturing, including computer integrated manufacturing and robotics. Design, operation, and management of manufacturing systems/products. Lab.

BIE 3114. Construction Technology. (3 cr. Prereq-Concurrent enrollment 3111)

Introduction to principles, concepts, and techniques involved in civil, commercial, and residential construction. Laboratory experiences in planning, designing, organizing, producing, and testing structures.

BIE 3122. Communication and Information Technology. (3 cr; A-F only. Prereq-Concurrent enrollment 3121)

Information/communication systems, electronic publishing, printing technology, broadcast/recording technologies, telephone/online communication, photography, multimedia, and computer technology. Lab.

BIE 3123. Energy, Power, and Transportation Technology. (3 cr; A-F only. Prereq-Concurrent enrollment 3121)

Mechanical, fluid, and electrical power/technologies associated with transportation of people/materials. Lecture, lab.

BIE 3151. Technical Development: Advanced. (1-32 cr [max 32 cr]. Prereq-#)

Work experience in business/industry.

BIE 3993. Directed Study: BIE. (1-4 cr [max 4 cr])

Self-directed study preceded by classroom instruction in basic research procedures.

BIE 5001. Teaching Marketing Promotion. (3 cr; A-F only)

Materials, methods, and approaches to teaching marketing promotion. Covers the basic elements of the marketing mix: advertising, promotion, public relations, direct selling, visual merchandising, and direct marketing.

BIE 5011. Introduction to Computer Applications. (3 cr) Instructional uses of computers and representative business/marketing education applications, including word processing, databases, spreadsheets, and graphics.

BIE 5012. Advanced Word Processing. (3 cr. Prereq–5011 or equiv)
Develop/apply solution methods for office problems using word processing software including advanced editing, printing, and desktop publishing capabilities.

BIE 5013. Spreadsheet Analysis Using Computers. (3 cr. Prereq–5011 or equiv)
Using spreadsheets to analyze data, monitor business records, and create models.

BIE 5014. Database Computer Applications. (3 cr. Prereq–5011 or equiv)
Business needs for computerized databases. Using database software to develop, maintain, and prepare reports.

BIE 5015. Integrated Computer Applications in Business and Marketing Education. (3 cr. Prereq–[5011, 5012, 5013, 5014] or equiv)
Realistic business computer problems requiring integration of two or more application packages. Pedagogical issues of learning/teaching advanced computer applications.

BIE 5080. Special Topics in Business and Industry Education. (1-4 cr [max 4 cr])
Content varies by offering.

BIE 5101. Technological Problem Solving. (3 cr; A-F only. Prereq–3111, 3112, 3121, 3122)
Capstone technology education course in which students research problems relative to various technological systems and develop solution(s) to the identified problems.

BIE 5151. Technical Development: Specialized. (1-12 cr [max 12 cr]; A-F only. Prereq–#)
Students select/study technical processes/principles based on subjects they plan to teach, integrate specialized technical instruction in advanced/emerging areas.

BIE 5321. Vocational Guidance in Business and Industry Education. (2 cr; A-F only)
Self assessment, use of occupational and labor market information, job seeking skills, work and work satisfaction. For industrial teachers and trainers in school and industry settings.

BIE 5325. Foundations of Industrial Education. (3 cr)
Social, economic, psychological, philosophical, legislative, and pedagogical foundations of industrial education in the United States. Comparison with selected foreign countries. Analysis of contemporary trends against backdrop of early foundations.

BIE 5344. Facilities Management in Business and Industry. (3 cr; A-F only. Prereq–3112)
Planning, evaluating, and managing industrial education shop and lab facilities.

BIE 5365. Curriculum Development in Technology Education. (3 cr)
Conceptualization and derivation of content for the K-12 technology curriculum. Comparison of U.S. approaches to technology curriculum with selected countries.

BIE 5440. Business and Industry Observation and Seminar. (1-3 cr [max 6 cr])
Current operating practices and career opportunities in business and industry. Planned experiences in work environments and related seminars.

BIE 5452. Methods of Teaching Business and Marketing Concepts. (3 cr; A-F only)
Recent research/developments in teaching business concepts related to economics, business organization/management, business law, entrepreneurship, marketing, international business, information systems, accounting, risk management, and personal finance.

BIE 5457. Methods of Teaching Business Employment and Marketing Employment. (3 cr; A-F only)
Recent research/developments in teaching for business employment. Administrative support positions, accounting/information processing, marketing, sales, computer operations, other occupations using desktop computing.

BIE 5463. Methods in Teaching Keyboarding and Word Processing. (2 cr; A-F only)
Implementing keyboarding and word processing; effective teaching strategies; expected learner outcomes; evaluation methods; selecting hardware; instructional materials (including print, software, Internet); organizing and managing labs.

BIE 5475. Curriculum Development for Business and Marketing Education. (3 cr; A-F only)
Introduction to conceptual models for design/delivery of business/marketing education programs in secondary/postsecondary schools, in adult education settings, and in business/industry. Preparing programs of instruction for secondary/postsecondary level. Making decisions regarding course content.

BIE 5596. Occupational Experience in Business and Industry. (1-10 cr [max 10 cr]; S-N only. Prereq–#)
Observation/employment in business/industry to develop technical/occupational competencies. Includes 100 clock hours of supervised work experience per credit.

BIE 5597. Internship: Business and Industry Education. (1-8 cr [max 12 cr]; S-N only. Prereq–#)
Practical experience in business or industry as a professional educator or supervisor. Requires an integrative paper.

BIE 5605. Critical Issues in Business and Industry. (3 cr)
Identification and analysis of major current issues in business and industry education.

BIE 5662. Computer Training in School and Industry Settings. (3 cr. \$HRD 5662. Prereq–5011 or equiv)
Alternative teaching practices for business applications software: word processors, spreadsheets, graphics, desktop publishing, databases, and communications; public school and industry settings.

BIE 5796. Field Based Projects in Business and Industry. (1-4 cr [max 4 cr]; S-N only)
Curricular, instructional, developmental, or evaluative problems and projects applicable to local school or business and industry situations.

BIE 5801. The Business of Tourism. (3 cr; A-F only)
Introduction to major theories, concepts, skills, and techniques influencing tourism business/industry.

BIE 5802. Education and Human Resource Development Through Tourism. (3 cr; A-F only)
Policies/practices of education and human resource development in tourism industry.

BIE 5803. Tourism Studies Capstone Seminar. (3 cr; S-N only. Prereq–Tourism studies major)
Students present, critique, and discuss implications of supporting programs for tourism.

BIE 5993. Directed Study in Business and Industry. (1-4 cr [max 4 cr])
In-depth individual inquiry in the content areas related to business and industry.

Business Law (BLAW)

Department of Accounting

Curtis L. Carlson School of Management

BLAW 3058. The Law of Contracts and Agency. (4 cr; A-F only. Prereq–40 or more credits)
Origin of law, its place in and effect on society; history and development of law; system of courts; legal procedure. Law of contracts as the basic law affecting business transaction. Laws affecting the sale of goods and contracts and the law of agency.

Center for Spirituality and Healing (CSPH)

Health Sciences

CSPH 1001. Principles of Holistic Health and Healing. (2 cr)
Principles/measures of holistic health that promote health and well being. Theory, how holistic health is incorporated into health care delivery system. Application/integration of holistic health into daily personal life.

CSPH 5000. Explorations in Complementary Therapies and Healing Practices. (1-4 cr [max 12 cr]. Prereq–Jr or sr or grad student or #)
Research/practice on therapies, delivery of complementary therapies, regulatory issues.

CSPH 5101. Introduction to Complementary Healing Practices. (3 cr. Prereq–Jr or sr or grad student or #)
Cultural contexts of healing traditions. Complementary therapies presented by practitioners, including traditional Chinese medicine, meditation, mind-body healing, spiritual practices, energy healing, naturopathy, herbalism, movement therapies, homeopathy, manual therapies, and nutrition.

CSPH 5102. Art of Healing: Self as Healer. (1 cr. Prereq–Jr or sr or grad student or #)
Introduction to individual transformational journey as part of health science education. Students become aware of their responsibility/resources to facilitate development of the self. Research data, experience of self that is part psychoneuroimmunology, mind-body-spirit approaches. Lecture, scientific literature, meditation, imagery, drawing, group interaction.

CSPH 5111. Ways of Thinking about Health. (2 cr. Prereq–Jr or sr or grad student or #)
Cultural contexts explored through field-trip immersion experiences. Aspects of different health care systems: Indigenous North American, Vedic, Traditional Chinese, biomedicine. Writing assignment.

CSPH 5115. Cultural Knowledge, Health, and Contemporary Cultural Communities. (3 cr. Prereq–Jr or sr or grad student or #)
How personal cultural experience affects one's view of health, illness, and healing and one's professional practice. Wisdom of cultural communities. Cultural construct underpinning the medical system. Role of culture in interaction between practitioner and patient. Reconnecting to cultural heritage in healing.

CSPH 5201. Spirituality and Resilience. (2 cr. Prereq–Jr or sr or grad student or #)
Links between resilience and spirituality. Applications of resilience/health realization model to students' personal/professional lives. Review of literature, theory, and research.

CSPH 5211. Peacemaking and Spirituality: A Journey Toward Healing and Strength. (2-3 cr [max 3 cr]; A-F only. Prereq–Jr or sr or grad student or #)
Influence of spirituality upon process of resolving conflict and making peace in intense interpersonal/intrapersonal conflicts in multiple health care and social work settings, including in families, between patients/clients and nurses/social workers, within communities, among friends, between co-workers, or within ourselves.

CSPH 5215. Forgiveness and Healing: A Journey Toward Wholeness. (2 cr. Prereq–Jr or sr or grad student or #)
Impact of forgiveness on process of inter/intra-personal healing. Forgiveness/healing in health care and social work settings from multiple spiritual/secular traditions.

CSPH 5221. Significant Spiritual Texts of the 20th Century. (3 cr. Prereq–Jr or sr or grad student or #)
Diverse "spiritual classics" (i.e., elements of western canon that have proven over time to be resources of values). Resources of meaning for inner-life healers. How to establish a personal library for life-long journey of spiritual development.

CSPH 5225. Meditation: Integrating Body and Mind. (2 cr. Prereq—Jr or sr or grad student or #)

Meditation as a physical, emotional, intellectual, and spiritual inquiry. Students examine a variety of texts and develop ability to enter a state of calm, meditative awareness.

CSPH 5226. Advanced Meditation: Body, Brain, Mind, and Universe. (1 cr. Prereq—[5225, [Jr or sr or grad student]] or #)

Students work to integrate meditation practice into daily life, cultivating awareness of the fundamental oneness of body, brain, mind, and universe. Mind-body interactions in health. “Hard problem” of consciousness in brain science. Emergence of compassion, wisdom, and healing in non-discursive awareness.

CSPH 5301. Cultures, Faith Traditions, and Health Care. (2 cr; A-F only. Prereq—Jr or sr or grad student or #)

Culturally/spiritually based health care practices of selected native/immigrant populations in Minnesota. Clinical implications. Personal/professional conflicts for delivery of competent care to culturally diverse groups by those trained in Western health care.

CSPH 5311. Introduction to Traditional Chinese Medicine.

(2 cr; A-F only. Prereq—Jr or sr or grad student or #) Philosophical roots of Shamanism, Confucianism, Taoism, and Buddhism. Influence of these philosophies on Chinese medicine. Evolution of concepts of the tao, Yin-Yang, microcosm, macrocosm. Development of herbal medicine, Tui Na, Qi Gong, acupuncture, moxibustion. Traditional Chinese medicine etiology of disease, physiology, diagnosis, therapy, disease prevention, ethics, psychology, cosmology.

CSPH 5315. Traditional Tibetan Medicine: Ethics, Spirituality, and Healing. (2 cr. Prereq—Jr or sr or grad student or #)

Ethics, spirituality, and healing from perspective of traditional Tibetan medicine. Belief that illness results from imbalance and that treating illness requires correcting underlying imbalance. How to apply these principles, integrate them into clinical practice, and consult with a traditional Tibetan doctor.

CSPH 5317. Yoga: Ethics, Spirituality, and Healing. (2 cr. Prereq—[5101, 5315] or #)

Ethics, spirituality, and healing from perspective of yoga, an ancient Indian discipline. Students test the claim that systematic yoga practice leads to optimal health. Evaluating yoga’s philosophy, scientific evidence, practical application. Students propose research-based programs for integrating yoga into personal/professional life.

CSPH 5321. Public Health Priorities in the Developing World. (2 cr. §INMD 7567. Prereq—Jr or sr or grad student or #)

Primary public health problems, priorities, and interventions in developing countries. Issues related to culture/indigenous health systems and of concern to health care providers who work abroad or with refugee communities in countries of resettlement.

CSPH 5325. Latinos: Culture and Health. (3 cr. Prereq—jr or sr or grad student or #)

How Latino world view (cosmovision) affects health and compares with U.S. perspective. Differences in perception of time, family involvement, community “belonging,” gender roles, and communication styles. Folkloric beliefs. Specific issues such as AIDS, pregnancy, women’s issues, pharmacy, and nutrition. Health issues of workers. Cultural competency.

CSPH 5331. Foundations of Shamanism and Shamanic Healing. (2 cr; S-N only. Prereq—Jr or sr or grad student or #)

3 Ω-day retreat intensive. Shamanic philosophies, ritual etiquette, Core beliefs common to all shamanic healing practices. Cross-cultural healing beliefs/practices, unique psychology for understanding them, their use with contemporary healing practices and for personal growth.

CSPH 5332. Global Healing Traditions: Amazonia Plant Spirit Medicine. (2 cr; S-N only. Prereq—[5331, [grad student or jr or sr in health science or practicing health professional]] or #)

Non-biomedical traditional healing paradigms as practiced in other parts of the world. Focuses on indigenous healing practices in Peru as directed by a local shaman.

CSPH 5401. People, Plants, and Drugs: Introduction to Ethnopharmacology. (3 cr. Prereq—Jr or sr or grad student or #)

Biologically active substances used in traditional cultures. Ethnopharmacology’s past, current, and potential contributions to human knowledge. Concrete examples.

CSPH 5405. Plants in Human Affairs. (4 cr. Prereq—Jr or sr or grad student or #)

Twelve-day, intensive course. Introduction to ethnobotany/ethnopharmacology. Lectures, field trips, presentations by local experts.

CSPH 5411. Dietary Supplements: Regulatory, Scientific, and Cultural Perspectives. (3 cr. Prereq—Jr or sr or grad student or #)

Concepts/principles of dietary supplements, RDA, dose-response, risk assessment. Laws/regulations concerning dietary supplements. Vitamin/mineral supplements. Philosophy/use of botanicals/nutraceuticals and common herbal supplements in western medicine. Use of supplements and evidence-based recommendations as influenced by culture.

CSPH 5421. Botanical Medicines in Complementary Healthcare. (3 cr. Prereq—Jr or sr or grad student or #)

Widely-used botanical medicines from biomedical perspective. Alternative therapeutic systems presented according to bodily systems/processes. Evidence for therapeutic use. Botanical characteristics, traditional uses, chemical properties, dosage, hazards/safety issues, quality control.

CSPH 5431. Functional Nutrition: An Expanded View of Nutrition, Chronic Disease, and Optimal Health. (2 cr. Prereq—[Jr or sr or grad student] in Health Sciences or #)

Principles of nutrition related to metabolic function. Model attempts to reduce chronic disease by looking for underlying causes/triggers and to intervene to restore function and achieve optimal health. Emphasizes importance of nutrition as a component of self-care.

CSPH 5501. Therapeutic Use of Plant Essential Oils. (3 cr. Prereq—Jr or sr or grad student or #; intended for students in health sciences or practicing health professionals; [basic science, health science knowledge, computer skills, internet skills] recommended)

Fundamentals of essential oil therapy for licensed health professionals. History, scientific basis, practice issues, use of 30 essential oils in clinical practice. Controlled use of essential plant oils for specific, measurable physiological/psychological therapeutic outcomes. Topical application, inhalation.

CSPH 5511. Interdisciplinary Palliative Care: An Experiential Course in a Community Setting. (2 cr)

Multidisciplinary student teams partner with interdisciplinary community hospice teams in delivery of care to patients in a variety of settings. Series of seminars employs self-analysis/case studies.

CSPH 5521. Therapeutic Landscapes. (3 cr. Prereq—[Jr or sr or grad student] in [health sciences or therapeutic recreation or horticulture or landscape architecture] or health professional or #)

Principles of therapeutic design for specific population requirements. Therapeutic landscape design. Incorporates interdisciplinary interaction between horticulture, landscape architecture, and health science departments.

CSPH 5522. Therapeutic Horticulture. (3 cr. Prereq—5101 or HORT 5072 or #)

Central elements of therapeutic horticulture in context of multiple health care settings. Evidence-based history, principles, precepts, and practical application of therapeutic horticulture. Various plant/plant-related modalities from current research findings are related to populations, using therapeutic horticulture as a treatment intervention.

CSPH 5523. Applications in Therapeutic Horticulture. (2 cr. Prereq—CSPH 5521 or CSPH 5522)

How to develop comprehensive program plans in therapeutic horticulture. Evidence-based principles, facilitation techniques in therapeutic horticulture. Systematic programming through documentation, assessment, program development techniques, and evaluation. Leadership training, program plan components, book reviews, reading assignments, comprehensive exam.

CSPH 5533. Introduction to Energy Healing. (2 cr. Prereq—Jr or sr or grad student or #)

Healing techniques (Therapeutic Touch, Reiki, acupuncture, reflexology, magnets, homeopathy) that use energetic systems in the body to enhance the body’s ability to heal. Scientific theories. Students interact with practitioners and have the opportunity to experience feeling “energy.”

CSPH 5535. Reiki Healing. (1 cr. Prereq—Jr or sr or grad student or #)

History, principles, precepts, and practical application of Reiki energy healing. Alternative energy healing modalities, current research findings. Activation of the Reiki energy, hand positions to perform a treatment. Students provide Reiki treatments, discuss findings.

CSPH 5536. Advanced Reiki Healing: Level II. (1 cr. Prereq—5535, #)

Principles/application of Reiki energy healing. Four levels of healing. Emphasizes healing at spiritual level. Activation of Reiki energy. Symbols that allow for energy transfer through space/time. Using second level Reiki energy for both distance healing and standard Reiki treatment. Students provide Reiki treatments, discuss findings. Current literature, research findings.

CSPH 5541. Integrative Psychotherapy. (3 cr. Prereq—5102, [grad student or #])

In depth, experiential-based training. Support for students to practice integrative psychotherapy, mindfulness meditation, and related mind/body approaches to clinical work. Multiple client/patient populations, issues, and settings.

CSPH 5545. Mind-Body Healing Therapies. (2 cr; A-F only. Prereq—Grad student or jr or sr or #)

Philosophies/paradigms. Four modalities commonly used in allopathic nursing, medicine and other health professions (biofeedback, hypnosis, imagery/visualization, meditation). Experiential and group discussion format.

CSPH 5555. Introduction to Body and Movement-based Therapies. (2 cr. Prereq—Jr or sr or grad student or #)

Theories/approaches of selected somatic therapies, including dance, movement, and body-based therapies. Historic/theoretical perspectives on use of movement, dance, and somatic re-patterning. Demonstrations of techniques. Application of techniques to specific populations/settings.

CSPH 5601. Music, Health and Healing. (2 cr. Prereq—Jr or sr or grad student or #)

Music therapy, music medicine, music psychotherapy. Techniques/interventions. Hypotheses/rationale related to interventions. Related research.

CSPH 5611. Healthy Humor. (1 cr. Prereq—Jr or sr or grad student or #)

Use of humor to enhance communication, treatment, and relationships with patients. How to create a positive work environment and outlook. Physiologic effects/benefits of humor/laughter. Humor and spirituality. Connection between positive outlook and health.

CSPH 5701. Fundamentals of Health Coaching I. (4 cr. Prereq—Admitted to Complementary Therapies and Healing Practice certificate program's health coaching track or #) Tenets of health coaching model. Tools for self development, deep listening, and communication. Building blocks for optimal health from holistic perspective. How to identify/benchmark stages/patterns of change, interface with interdisciplinary health care providers, and educate clients on self-care practices.

Central Asian Studies (CAS)

Institute of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

CAS 1904. Freshman Seminar. (3 cr; A-F only. \$MELC 1904) Topics vary. See *Class Schedule*.

CAS 3511. Ancient Iran. (3 cr. \$MELC 3511) Development of ancient Iranian culture under the Achaemenians and Sassanians; the impact of the Zoroastrian religion on Iranians and of Hellenism on the east, especially on domains such as Bactria; Iran's contribution to the flourishing cultures of the Silk Road.

CAS 3512. Modern Iran. (3 cr. \$MELC 3512) The development of medieval Iranian culture under the Arab, Turkish, and Mongol rules. Study two major trends: Islamization beginning after the Arab conquest to A.D. 1500; westernization from the Safavids to the Islamic Republic in 1979.

CAS 3526. Islam and Communism. (3 cr. \$CAS 5526, MELC 3526, MELC 5526) Development of medieval Islamic culture in Transoxiana; formation of Sufi orders; rise and development of Communist ideology; introduction of socialist principles into Central Asia; clash of Islamic principles with Communist dicta; Pan-Islamism; Pan-Turkism.

CAS 3531. Central Asian Culture and Literature. (3 cr. \$GLOS 3641, MELC 3531) Dynamics of life in contemporary Afghanistan, Iran, and Central Asia. Emphasizes role of ethnicity/ideology. Central Asian fictional illustrations of impact of sovietization on Islamic traditions.

CAS 3532. Russia and Central Asia. (3 cr. \$CAS 5532, MELC 3532, MELC 5532) Rise and fall of the Mongol Empire, formation of the Chaghatai Khanate and the Golden Horde. Russian expansion into Central Asia and rivalry with Britain. Russia and the Central Asian republics during and after the Soviet period.

CAS 3533. Islam and the West. (3 cr. \$GLOS 3643, MELC 3533) Cultural/intellectual trends that have defined the fundamental differences between Islam and the West. Development of the historical, philosophical, and intellectual mindset of both spheres. Factors that have contributed and continue to contribute to tension, anxiety, and hatred between the Muslim world and Europe and the United States.

CAS 3601. Persian Fiction in Translation. (3 cr. \$CAS 5601, MELC 3601, MELC 5601) Impact of westernization on Iran, from 1920s to present. Materials produced by Iranian writers, film makers, and intellectuals. Internal/external forces that bind contemporary Iranian society to world civilization. Works of Hedayat (especially *Blind Owl*), Chubak, Al-i Ahmad, Daneshvar, and Behrang are analyzed/interpreted.

CAS 3602. Persian Poetry in Translation. (3 cr. \$CAS 5602, MELC 3602, MELC 5602) Major poetic works of Iran in translation dealing with life at the medieval courts, Sufic poetry, and "new" poetry. Rudaki, Khayyam, Rumi, Hafiz, Yushij, and Farukhzad are among the poets whose works are examined.

CAS 3900. Topics in Central Asian Studies. (1-4 cr [max 16 cr]; A-F only. \$MELC 3900) Topics vary. See *Class Schedule* or contact department for details.

CAS 5311. Medieval Sages. (3 cr. \$MELC 5311. Prereq—background in Iranian, Central Asian, or Islamic studies recommended) Study and discussion of the intellectual life of the region from the rise of the Ghaznavids (A.D. 1000) to the fall of the Timurids (A.D. 1500). Ibn Sina (Avicenna), al-Biruni, al-Ghazali, Rumi, Sa'di, and Firdowsi are among the sages whose lives are examined.

CAS 5526. Islam and Communism. (3 cr. \$CAS 3526, MELC 3526, MELC 5526) Development of medieval Islamic culture in Transoxiana; formation of Sufi orders; rise and development of Communist ideology; introduction of socialist principles into Central Asia; clash of Islamic principles with Communist dicta; Pan-Islamism; Pan-Turkism.

CAS 5532. Russia and Central Asia. (3 cr. \$CAS 3532, MELC 3532, MELC 5532) Rise and fall of the Mongol Empire, formation of the Chaghatai Khanate and the Golden Horde. Russian expansion into Central Asia and rivalry with Britain. Russia and the Central Asian republics during and after the Soviet period.

CAS 5601. Persian Fiction in Translation. (3 cr. \$CAS 3601, MELC 3601, MELC 5601. Prereq—\$ 3601, MELC 5601) Impact of westernization on Iran, from 1920s to present. Materials produced by Iranian writers, film makers, and intellectuals. Internal/external forces that bind contemporary Iranian society to world civilization. Works of Hedayat (especially *Blind Owl*), Chubak, Al-i Ahmad, Daneshvar, and Behrang are analyzed/interpreted.

CAS 5602. Persian Poetry in Translation. (3 cr. \$CAS 3602, MELC 3602, MELC 5602) Major poetic works of Iran dealing with life at the medieval courts, Sufic poetry, and "new" poetry are studied. Rudaki, Khayyam, Rumi, Hafiz, Yushij, and Farukhzad are among the poets whose works are examined.

CAS 5994. Directed Research. (1-10 cr [max 10 cr]. Prereq—#, Δ, □) Directed Research

Chemical Engineering (CHEN)

Department of Chemical Engineering and Materials Science

Institute of Technology

CHEN 1001. Advances in Chemical Engineering and Materials Science. (1 cr [max 2 cr]; S-N only. \$MATS 1001. Prereq—Recommended for [chemical engineering, materials science/engineering] majors) Survey of important advances in chemical engineering, materials science/engineering. Design problems, career opportunities. Lectures, demonstrations, interactive exercises.

CHEN 3041. Industrial Assignment I. (2 cr; A-F only. \$MATS 3041. Prereq—CHEN upper Div, completion of required courses in CHEN prog through fall sem of 3rd yr, GPA of at least 2.80, registered in co-op prog) Industrial work assignment in engineering co-op program. Formal written report.

CHEN 3045. Chemical Engineering Industrial Internship. (1-2 cr [max 2 cr] Prereq—Proposed plan approved by FI/CC, report signed by industrial supervisor describing engineering work completed) Industrial internship, three to eight months.

CHEN 3701. Introduction to Biomolecular Engineering I. (3 cr; A-F only. Prereq—[4001 or equiv], [CHEM 2302 or CHEM 2302], [Math 2373 or equiv]; high school biology recommended) Fundamentals of biological systems, from biomolecules to interplays of biomolecules that give rise to "processes" of life. Students apply chemical engineering principles to analysis of living systems.

CHEN 4001. Material and Energy Balances. (4 cr; A-F only. Prereq—[CHEM 2302 or CHEM 2302], [CHEM 3501 or CHEM 3501 or equiv], [Math 2273 or CHEM 2373 or equiv], [Math 2374 or CHEM 2374 or equiv], PHYS 1302) Description/analysis of chemical engineering systems: units/dimensions, materials balances on systems with/without chemical reactions, elementary phase equilibria/diagrams, energy balances. Elementary treatment of multistage steady-state equilibrium operations.

CHEN 4005. Transport Phenomena: Momentum and Heat. (4 cr; A-F only. Prereq—[4001 or [transfer student, Δ]], upper div CHEN major) Fluid statics/dynamics and their applications to chemical engineering systems, conduction, and diffusion. Principles/applications of heat transfer in chemical engineering systems.

CHEN 4006. Mass Transport and Separation Processes. (4 cr; A-F only. Prereq—[4001 or Δ], 4005, 4101, [upper div CHEN major or Δ]) Introduction to principles of mass transfer. Mass transfer operations used in separation processes, unit operations.

CHEN 4041. Industrial Assignment II. (2 cr; A-F only. \$MATS 4041. Prereq—3041, completion of required courses in CHEN prog through fall sem of 4th year, GPA of at least 2.80, registration in co-op prog) Industrial assignment in engineering co-op program. Application of chemical engineering principles to engineering design problems in an industrial work environment. Formal written report.

CHEN 4101. Chemical Engineering Thermodynamics. (4 cr; A-F only. Prereq—[4001 or [transfer student, Δ]], CHEM 3501, [upper div CHEN major or Δ]) Applications of concepts of thermodynamics and chemical equilibrium to problems in chemical engineering.

CHEN 4102. Reaction Kinetics and Reactor Engineering. (4 cr; A-F only. Prereq—4001, 4101, [upper div CHEN major or Δ]) Chemical equilibrium and chemical kinetics applied to chemical engineering systems. Behavior/design of chemical reactors, interaction between chemical and physical rate processes. Mathematical modeling, design of reactors.

CHEN 4201. Numerical methods in CHEN applications. (3 cr; A-F only. Prereq—[4001 or Δ], [4005 or equiv], [4006 or CHEM 4006 or equiv], [upper div CHEN major or Δ]) Numerical methods and applications in heat/mass transfer and advanced chemical engineering applications.

CHEN 4214. Polymers. (3 cr. Prereq—Grade of at least C in MATS 3011, CHEN major upper division or #) Polymer structure-property relations: structure/morphology of crystalline/amorphous states. Crystallization kinetics. Vitrification and the glass transition. Mechanical properties, failure, permeability, optical/electrical properties, polymer composites, effect of processing on properties.

CHEN 4401W. Chemical Engineering Lab I. (3 cr; A-F only. Prereq—[4005, 4006, 4101, 4102, 4001, 4201, CHEM 2311, CHEM 4121, English composition requirement, upper div CHEN major] or Δ) Principles/techniques of efficient design, structure, measurement, planning, analysis, and presentation of experiments and experimental results. Problems in energy balances, fluid flow, heat transfer, and mass transfer. Design of new systems using experimental data obtained in lab. Oral/written presentations.

CHEM 4402W. Chemical Engineering Lab II. (2 cr. Prereq–4006, 4101, 4401W, upper div CHEM major) Principles/techniques of efficient design, structure, measurement, planning, analysis, and presentation of experiments and experimental results. Experimental problems in energy balances, fluid flow, heat transfer, and mass transfer. Design of new systems using data obtained in lab. Oral/written presentations.

CHEM 4501W. Chemical Engineering Process Design. (3 cr. Prereq–[4005, 4006, 4101, 4102, 4001, 4201, CHEM 2311, CHEM 4121, fr writing requirement, upper div CHEM major] or Δ) Engineering economics of process evaluation, including time/bases for cost estimation. Engineering design through group projects. Case studies.

CHEM 4502W. Chemical Engineering Process Design II. (2 cr; A-F only. Prereq–4501W, [upper div CHEM major or Δ]) Continue review from 4501 of unit processes/operations, introducing detail for design, cost analysis, control, operability, modifications, and alternatives. Case studies, special topics.

CHEM 4593. Directed study. (1-4 cr [max 4 cr]. Prereq–CHEM major upper division, #) Directed study under faculty supervision.

CHEM 4594. Directed Research. (1-4 cr [max 4 cr]) Independent lab research under faculty supervision.

CHEM 4601. Process Control. (3 cr; A-F only. Prereq–4102, [upper div CHEM major or Δ]) Analysis of dynamic behavior/design of linear control systems for chemical processes. Dynamic response and stability of linear ODE systems, tuning of PID controllers, synthesis of feedback, feedforward/feedback controller.

CHEM 4701. Advanced Undergraduate Applied Math I: Linear Analysis. (3 cr; A-F only. §CHEM 8201. Prereq–4102, CHEM major upper division) Integrated approach to solving linear mathematical problems (linear algebraic equations, linear ordinary/partial differential equations) using theoretical/numerical analysis based on linear operator theory. Undergraduate version of 8201.

CHEM 4702. Advanced Undergraduate Rheology. (2 cr; A-F only. Prereq–4002, #) Deformation/flow of non-Newtonian/viscoelastic fluids, plastic materials, perfectly elastic solids. Phenomenological/molecular interpretation of rheology of elastomers, polymer melts, polymer solutions. Application of rheology to polymer processing. Undergraduate version of 8102.

CHEM 4703. Advanced Undergraduate Applied Math II: Nonlinear Analysis. (3 cr; A-F only. Prereq–CHEM 4002, CHEM major upper division; grad-level course in linear analysis recommended) Nonlinear mathematical problems (nonlinear ordinary/partial differential equations) using theoretical/numerical analysis. Undergraduate version of 8202.

CHEM 4704. Advanced Undergraduate Physical Rate Processes I: Transport. (3 cr; A-F only. Prereq–4002, CHEM major upper division)

Survey of mass transfer, dilute/concentrated diffusion, Brownian motion. Diffusion coefficients in polymers, of electrolytes, at critical points. Multicomponent diffusion. Mass transfer correlations/predictions. Mass transfer coupled with chemical reaction. Undergraduate version of 8301.

CHEM 4706. Advanced Undergraduate Physical and Chemical Thermodynamics. (3 cr; A-F only. Prereq–CHEM 3502, 4101, 4002, CHEM major upper division; recommend background in undergraduate engineering or chemistry courses in thermodynamics) Principles of classical thermodynamics, introduction to nonequilibrium thermodynamics. Applications in chemical engineering, materials science. Undergraduate version of 8401.

CHEM 4707. Advanced Undergraduate Statistical Thermodynamics and Kinetics. (3 cr; A-F only. Prereq–4002, 4101, CHEM 3501, CHEM 3502, CHEM major upper division) Introduction to statistical mechanical description of equilibrium/non-equilibrium properties of matter. Emphasizes fluids, classical statistical mechanics. Undergraduate version of 8402.

CHEM 4708. Advanced Undergraduate Chemical Rate Processes: Analysis of Chemical Reactors. (3 cr; A-F only. Prereq–4102, CHEM major upper division) Design of reactors for heat management, with catalytic processes, through detailed analysis of steady state, transient behavior. Polymerization, combustion, solids processing, environmental modeling. Design of multiphase reactors. Undergraduate version of 8501.

CHEM 5104. Coating Process Fundamentals. (2 cr; A-F only. Prereq–4003, 4102)

Viscous flow, rheology of polymer solutions and of particulate suspensions. Capillarity, wetting. Electrostatic effects. Phase change, colloidal transformations, mass/heat transfer in drying. Kinetics in curing. Stress, property development in solidifying polymeric coatings. Illustrations drawn from theoretical modeling, flow visualization, and stopped-process microscopy.

CHEM 5221. Introduction to Polymer Chemistry. (3 cr; A-F only. §CHEM 4221, CHEM 8221, MATS 5221, MATS 8221. Prereq–[CHEM 2302, CHEM 3501] or #) Condensation, radical, ionic, emulsion, ring-opening, metal-catalyzed polymerizations. Chain conformation, solution thermodynamics, molecular weight characterization, physical properties.

CHEM 5531. Electrochemical Engineering. (3 cr. §MATS 5531. Prereq–[MATS 3011 or #], [upper div IT or grad student]) Fundamentals of electrochemical engineering. Electrochemical mass transfer electrokinetics, thermodynamics of electrochemical cells, modern sensors. Formation of thin films and microstructured materials. Computer-based problems.

CHEM 5595. Special Topics. (1-4 cr [max 4 cr]) New or experimental special topics.

CHEM 5751. Biochemical Engineering. (3 cr; A-F only. Prereq–4002, ¶4003, ¶4102) Chemical engineering principles applied to analysis/design of complex cellular/enzyme processes. Quantitative framework for design of cells for production of proteins, synthesis of antibodies with mammalian cells, or degradation of toxic compounds in contaminated soil.

CHEM 5752. Quantitative Biology for Engineers. (3 cr; A-F only. §CHEM 8752. Prereq–Engineering background, #) Biological fundamentals of biotechnology. Structural basis of biological systems. Communication between cells/environment. Gene expression. Proteins and their functional classes. Metabolic pathways and their reactions. From genome to physiology. Genomics/proteomics as technologies. Biotechnology and society: ethics, law, public policy. Biotechnology-based commercial enterprises.

CHEM 5753. Biological Transport Processes. (3-4 cr [max 4 cr]; A-F only. §BMEN 5311, ME 5381. Prereq–4003 or ME 3322) Introduction to fluid, mass, and heat transport in biological systems. Mass transfer across membranes, fluid flow in capillaries, interstitium, veins and arteries. Heat transfer in single cells and tissues. Whole organ and body heat transfer issues. Blood flow and oxygenation. Heat and mass transfer in respiratory system. Biotransport issues in artificial organs, membrane oxygenators, and drug delivery applications.

CHEM 5754. Food Processing Technology. (3 cr; A-F only. Prereq–4002) Introduction to food processing as it interfaces with engineering. Case studies. Engineering economics and practical design problems in food processing. Heat transfer; freezing, conduction (unsteady state); thermal processing; extruder design; protein processing; order-of-magnitude estimating; and economic concepts such as ROI, discounted cash flow, and capital estimating.

CHEM 5759. Principles of Mass Transfer in Engineering and Biological Engineering. (2 cr; A-F only. Prereq–4002) Principles of mass transfer in gases, liquids, biological and macromolecular solutions, gels, solids, membranes, and capillaries. Porous solids interaction between mass transfer and chemical reaction. Applications in biological, environmental, mineral, and chemical engineering systems.

CHEM 5771. Colloids and Dispersions. (3 cr; A-F only. Prereq–Physical chemistry) Preparation, stability, coagulation kinetics or colloidal solutions. DLVO theory, electrokinetic phenomena. Properties of micelles, other microstructures.

Chemistry (CHEM)

Department of Chemistry

Institute of Technology

CHEM 1011. Introductory Chemistry: Lecture and Laboratory. (4 cr. Prereq–[high school chemistry or equiv], two yrs high school math, not passed CHEM placement exam; high school physics recommended) Elementary organic chemistry. Matter/energy, atoms, compounds, solutions, chemical reactions, mole/chemical calculations, gases, liquids, solids, chemical bonding, atomic/molecular structure, acids, bases, equilibria. Physical/chemical properties of hydrocarbons and organic compounds containing halogens, nitrogen, or oxygen. Emphasizes problem solving.

CHEM 1015. Introductory Chemistry: Lecture. (3 cr. Prereq–[high school chemistry or equiv], two yrs high school math, not passed CHEM placement exam; high school physics recommended) Broad survey of chemical concepts. Matter and energy, atoms, compounds, solutions, chemical reactions, mole and chemical calculations, gases, liquids, solids, chemical bonding, atomic and molecular structure, acids, bases, equilibria. Physical and chemical properties of hydrocarbons and organic compounds containing halogens, nitrogen, or oxygen. Problem solving emphasized.

CHEM 1017. Introductory Chemistry: Laboratory. (1 cr. Prereq–1015, Δ) Same curricular content as lab component of 1011.

CHEM 1021. Chemical Principles I. (4 cr. §CHEM 1031H. Prereq–Grade of at least C- in [1011 or 1015] or passing placement exam; intended for science or engineering majors) Atomic theory, periodic properties of elements. Thermochemistry, reaction stoichiometry. Behavior of gases, liquids, and solids. Molecular/ionic structure/bonding. Organic chemistry and polymers. Energy sources, environmental issues related to energy use.

CHEM 1022. Chemical Principles II. (4 cr. §CHEM 1032H. Prereq–1021 or equiv) Chemical kinetics; radioactive decay; chemical equilibrium; solutions; acids and bases; solubility; second law of thermodynamics; electrochemistry and corrosion; descriptive chemistry of the elements; coordination chemistry; biochemistry; applications of chemical principles to environmental problems.

CHEM 1031H. Honors Chemistry I. (4 cr; A-F only. §CHEM 1021. Prereq—IT honors student or o, permission from IT honors office)

Advanced introduction to atomic theory. Periodic properties of elements. Behavior of gases, liquids, and solids. Molecular/ionic structure, bonding. Aspects of organic chemistry, spectroscopy, and polymers. Energy sources, environmental issues. Mathematically demanding quantitative problems. Writing for scientific journals. Lecture, lab.

CHEM 1032H. Honors Chemistry II. (4 cr; A-F only. §CHEM 1022. Prereq—[1301 or equiv], [IT honors student or consent of IT honors office])

Advanced introduction. Chemical kinetics/reaction mechanisms, chemical/physical equilibria, acids/bases, entropy/second law of thermodynamics, electrochemistry/corrosion; descriptive chemistry of the elements; coordination chemistry; biochemistry; applications of chemical principles to environmental problems. Lab emphasizes writing for scientific journals.

CHEM 1905. Freshman Seminar. (1-3 cr [max 3 cr]; A-F only. Prereq—Freshman)

Topics vary. See freshman seminar topics.

CHEM 1910W. Freshman Seminar: Writing Intensive. (1-3 cr [max 4 cr]; A-F only. Prereq—Freshman)

Topics vary. See freshman seminar topics.

CHEM 2094. Directed Research. (1-3 cr [max 3 cr]. Prereq—#)

Learning experience in areas not covered by regular courses. Individually arranged with faculty member.

CHEM 2101. Introductory Analytical Chemistry Lecture. (3 cr. Prereq—1022 or equiv)

Primarily for chemistry majors. Methods/concepts of measurement by chemical/instrumental analysis, including titrimetry, quantitative spectrophotometric analysis, chromatographic separations, equilibrium/rate methods.

CHEM 2111. Introductory Analytical Chemistry Lab. (2 cr. Prereq—2101 or ¶2101)

Lab for 2101. High precision methods, acidimetry and complexometry, single and multicomponent analysis by spectrophotometry, analysis of mixtures by ion exchange and gas chromatography, enzymatic and rate methods.

CHEM 2301. Organic Chemistry I. (3 cr. Prereq—Grade of at least C- in [1022 or 1032H] or equiv)

Important classes of organic compounds, their constitutions, configurations, conformations, and reactions. Relationships between molecular structure and chemical reactivity/properties. Spectroscopic characterization of organic molecules.

CHEM 2302. Organic Chemistry II. (3 cr. Prereq—2301)

Reactions, synthesis, and spectroscopic characterization of organic compounds, organic polymers, and biologically important classes of organic compounds such as lipids, carbohydrates, amino acids, peptides, proteins, and nucleic acids.

CHEM 2311. Organic Lab. (4 cr. Prereq—2302 or ¶2302)

Lab techniques in synthesis, purification, and characterization of typical organic compounds.

CHEM 2312. Honors Organic Lab. (5 cr; A-F only. Prereq—[2301 or ¶2301], [CHEM or ChemE or BioC] major, #)

Honors organic chemistry lab.

CHEM 2910. Special Topics in Chemistry. (1 cr [max 6 cr]; S-N only. Prereq—1 sem 1xxx chemistry or #)

Topics in chemistry. Opportunities and current research.

CHEM 2920. Special Topics In Chemistry. (1 cr [max 6 cr]; S-N only. Prereq—1 sem 1xxx chemistry or #)

Topics in chemistry. Opportunities and current research.

CHEM 3001. Chemical Literature and Information Retrieval. (1 cr; S-N only. Prereq—2302 or ¶2302 or #)

Forms of chemical literature, relationships among them. Major information sources in chemistry. Basic search techniques for print/electronic sources, choosing sources most appropriate for various information needs.

CHEM 3501. Introduction to Thermodynamics, Kinetics, and Statistical Mechanics. (3 cr. Prereq—[1022 or 1032H], [MATH 2263 or MATH 2374], [PHYS 1302 or PHYS 1402V])

Physical chemistry as it relates to macroscopic descriptions of chemical systems. Chemical thermodynamics, phase equilibria, chemical equilibria. Statistical mechanics. Phenomenological reaction kinetics. Kinetic theory of gases. Collision and statistical theories of reaction rates.

CHEM 3502. Introduction to Quantum Mechanics and Spectroscopy. (3 cr. Prereq—One yr college chemistry, one yr college physics, one yr college calculus)

Introduction to microscopic descriptions of chemical systems. Elementary quantum theory. Applications to atomic/molecular structure. Molecular spectroscopy. Quantum statistical mechanics. While a course in differential equations is not required, solutions to several such equations are discussed.

CHEM 4001. Chemistry of Plant Materials. (4 cr; A-F only. Prereq—2302, [jr or sr or #])

Chemical principles underlying structure, properties, processing, and performance of plant materials.

CHEM 4011. Mechanisms of Chemical Reactions. (3 cr. Prereq—2302 or equiv)

Reaction mechanisms and methods of study. Mechanistic concepts. Gas phase reactions. “Electron pushing” mechanisms in organic and enzymatic reactions. Kinetic schemes and other strategies.

CHEM 4021. Computational Chemistry. (3 cr. Prereq—3502 or equiv)

Theoretical methods for study of molecular structure, bonding, and reactivity. Ab initio and semi-empirical calculations of molecular electronic structure. Theoretical determination of molecular electronic structure and spectra; relation to experimental techniques. Molecular mechanics. Structure determination for large systems. Molecular properties and reactivity. Computational tools. Critical assessment of methods and theoretical work in the literature. Lab.

CHEM 4066. Chemistry of Industry. (3 cr. Prereq—CHEM sr or grad student or #)

Industrial and polymer chemistry technology. Relation of basic properties to industrial utility. Economics, social problems, industrial environment.

CHEM 4094W. Directed Research. (1-5 cr [max 75 cr]. Prereq—Any 3xxx or 4xxx CHEM course, #)

Learning experience in areas not covered by regular courses. Individually arranged with faculty member.

CHEM 4101. Intermediate Analytical Chemistry Lecture. (3 cr; A-F only. Prereq—2101, 2111, 2311, ¶3501)

Basic electronic, optical, computer technologies employed in design of chemical instrumentation. Advanced topics in spectroscopy (e.g., FT-nmr, FT-IR, atomic absorption/emission). Electrochemistry. Mass spectrometry.

CHEM 4111W. Intermediate Analytical Chemistry Lab. (2 cr; A-F only. Prereq—4101, chemistry major)

Instrumental techniques, including spectroscopic methods, electrochemical methods, and analysis based on separation. Emphasizes use of computers in data collection and reduction.

CHEM 4121. Process Analytical Chemistry. (3 cr; A-F only. Prereq—2302, 2311, 3501, chemical engineering major)

Strategies and techniques for analysis. Use of modern instruments, including spectrophotometry, chromatography and electrochemistry.

CHEM 4201. Materials Chemistry. (3 cr. §CHEM 8201.

Prereq—[[3502 or equiv], 4701] or #)

Crystal systems/unit cells, phase diagrams, defects/interfaces, optical/ dielectric properties, electrical/thermal conductivity, X-ray diffraction, thin film analysis, electronic structure, polarons/phonons, solid state chemistry, liquid/molecular crystals, polymers, magnetic/optical materials, porous materials, ceramics, piezoelectric materials, biomedical materials, catalysts.

CHEM 4221. Introduction to Polymer Chemistry.

(3 cr. §CHEM 8221, CHEN 5221, MATS 5221, MATS 8221. Prereq—[2302, 3501] or #)

Condensation, radical, ionic, emulsion, ring-opening, metal-catalyzed polymerizations. Chain conformation, solution thermodynamics, molecular weight characterization, physical properties.

CHEM 4223W. Polymer Laboratory. (2 cr. §MATS 5223W. Prereq—§MATS 5223; 5221 or 8221 or CHEN 4214 or #)

Synthesis, characterization, and physical properties of polymers. Free radical, condensation, emulsion, anionic polymerization. Infrared spectroscopy/gel permeation chromatography. Viscoelasticity, rubber elasticity, crystallization.

CHEM 4301. Surface and Colloid Science in Bio-based Products Manufacturing. (3 cr. Prereq—3501, [jr or sr or #])

Principles of surface/colloid science, their application to understanding manufacturing/performance of bio-based products.

CHEM 4311W. Advanced Organic Chemistry Lab. (2 cr. Prereq—2311)

Reactions, techniques, and instrumental methods in synthetic organic chemistry.

CHEM 4321. Organic Synthesis. (3 cr. Prereq—[2302 or equiv], #)

Fundamental concepts, reactions, reagents, structural/stereochemical issues, and mechanistic skills for organic chemistry.

CHEM 4322. Advanced Organic Chemistry. (3 cr. Prereq—[2302 or equiv], #)

Topics vary by instructor. Examples: natural products, heterocycles, asymmetric synthesis, organometallic chemistry, polymer chemistry.

CHEM 4352. Physical Organic Chemistry. (3 cr. Prereq—2302, [5011 or 8011])

Fundamental concepts and mechanistic tools for analysis of organic reaction mechanisms. Solvation, reactive intermediates, gas phase chemistry, photochemistry or strained-ring chemistry or both.

CHEM 4361. Interpretation of Organic Spectra. (3 cr. Prereq—[2302 or equiv], #)

Application of nuclear magnetic resonance, mass, ultraviolet, and infrared spectral analyses to organic structural problems.

CHEM 4411. Introduction to Chemical Biology. (3 cr. Prereq—2302 or equiv)

Chemistry of amino acids, peptides, proteins, lipids, carbohydrates, and nucleic acids. Structure, nomenclature, synthesis, and reactivity. Techniques to characterize biomolecules.

CHEM 4412. Chemical Biology of Enzymes. (3 cr. Prereq—2302 or equiv)

Enzyme classification with examples from current literature; strategies to decipher enzyme mechanisms; chemical approaches to control enzyme catalysis.

CHEM 4413. Nucleic Acids. (3 cr. Prereq—2302 or equiv)

Chemistry and biology of nucleic acids. Structure, thermodynamics, reactivity, DNA repair, chemical oligonucleotide synthesis, antisense approaches, ribozymes, techniques for nucleic acid research, interactions with small molecules and proteins.

CHEM 4511W. Advanced Physical Chemistry Lab. (2 cr. Prereq—3501-3502, chemistry major)

Experiments illustrating principles and methods of thermodynamics, reaction kinetics, and quantum mechanics.

CHEM 4701. Inorganic Chemistry. (3 cr. Prereq—2311, [3501 or ¶3501 or 3502 or ¶3502])

Advanced introduction to inorganic chemistry. Periodic trends. Structure and bonding concepts in compounds where s and p electrons are important. Descriptive chemistry of solids and transition metal compounds. Emphasizes transition metal chemistry. Advanced topics in main group and materials chemistry.

CHEM 4711W. Advanced Inorganic Chemistry Lab. (2 cr; A-F only. Prereq=4701, CHEM major)
Lab experiments in inorganic/organometallic chemistry illustrating synthetic/spectroscopic techniques.

CHEM 4715. Physical Inorganic Chemistry. (3 cr. Prereq=4701 or equiv, CHEM major or #)
Physical methods (e.g., IR, UV-VIS, ESR, Mossbauer and mass spectroscopy, magnetic measurements, X-ray diffraction) and concepts applied to inorganic and organometallic systems.

CHEM 4725. Organometallic Chemistry. (3 cr. Prereq=4701 or equiv, CHEM major or #)
Synthesis, reactions, structures, and other properties of main group and transition metal organometallic compounds; electronic and structural theory, emphasizing their use as stoichiometric and homogeneous catalytic reagents in organic and inorganic systems.

CHEM 4735. Bioinorganic Chemistry. (3 cr. Prereq=4701 or equiv, CHEM grad or #)
Role of metal ions in biology. Emphasizes structure, function, and spectroscopy of metalloproteins and their synthetic analogs.

CHEM 4745. Advanced Inorganic Chemistry. (3 cr. Prereq=4701, CHEM major, #)
Topics in main group and transition metal chemistry. Emphasizes synthesis, structure, physical properties, and chemical reactivity.

CHEM 5210. Materials Characterization. (4 cr; A-F only. Prereq=Grad student or #)
Modern tools/techniques for both bulk- and thin-film characterization. Topics may include ion-solid interactions, Rutherford back scattering, secondary ion mass spectrometry, solid-state NMR, x-ray photoelectron spectroscopy, small-angle x-ray/neutron scattering, transmission/scanning electron/probe microscopy, near-field scanning optical microscopy, porosimetry, adsorption techniques, and ellipsometry.

CHEM 5245. Introduction to Drug Design. (3 cr; A-F only. §MEDC 5245, PHAR 6245. Prereq=2302 or equiv)
Concepts that govern design/discovery of drugs. Physical, bioorganic, medicinal chemical principles applied to explain rational design and mechanism of action drugs.

CHEM 5501. Introduction to Thermodynamics, Kinetics, and Statistical Mechanics. (3 cr; A-F only. Prereq=[1022 or 1032H], [Math 2263 or Math 2374], [PHYS 1302 or PHYS 1402V])
Physical chemistry as it relates to macroscopic descriptions of chemical systems. Chemical thermodynamics, phase equilibria, chemical equilibria. Statistical mechanics. Phenomenological reaction kinetics. Kinetic theory of gases. Collision, statistical theories of reaction rates.

CHEM 5502. Introduction to Quantum Mechanics and Spectroscopy. (3 cr; A-F only. Prereq=Grad student, one yr college chemistry, one yr college physics, one yr college calculus, Δ)
Microscopic descriptions of chemical systems. Quantum theory. Applications to atomic/molecular structure. Molecular spectroscopy. Quantum statistical mechanics. Discussion of solutions to several differential equations.

CHEM 5541. Dynamics. (3 cr. §CHEM 8541. Prereq=Undergrad physical CHEM course, #)
Hamilton's/Lagrange's equations of motion. Normal modes and molecular rotation. Langevin equation and Brownian motion. Time correlation functions, collision theory, cross-sections, energy transfer. Molecular forces and potential energy surfaces. Classical electrostatics.

CHEM 5551. Quantum Mechanics I. (3 cr. §CHEM 8551. Prereq=Undergrad physical CHEM course, #)
Review of classical mechanics. Postulates of quantum mechanics, with applications to determination of single particle bound state energies and scattering cross-sections in central field potentials. Density operator formalism, with applications to description of two-level systems, two-particle systems, entanglement, and Bell inequality.

CHEM 5755. X-Ray Crystallography. (4 cr; A-F only. Prereq=CHEM grad student or #)
Essentials of crystallography as applied to modern, single crystal X-ray diffraction methods. Practical training in use of instrumentation in X-ray crystallography facility in Department of Chemistry. Data collection, correction/refinement, structure solutions, generation of publication materials, use of Cambridge Crystallographic Structure Database.

Chicano Studies (CHIC)

Department of Chicano Studies

College of Liberal Arts

CHIC 1102. Latinos in the United States: Culture and Citizenship. (3 cr)
Historical/cultural knowledge on the complex/multi-layered relationship that Latinos have to the U.S., their country of origin. Influence of social, cultural, and political dynamics on Latino identity, politics, and sense of belonging in the U.S. Cultural citizenship.

CHIC 1102H. Latinos in the United States: Culture and Citizenship. (3 cr)
Historical/cultural knowledge on the complex/multi-layered relationship that Latinos have to the U.S., their country of origin. Influence of social, cultural, and political dynamics on Latino identity, politics, and sense of belonging in the U.S. Cultural citizenship.

CHIC 1112. Introduction to Chicana/o Studies: Critical Paradigms. (3 cr)
Prevailing paradigms of analysis, methodologies of research, and guiding theoretical concepts that have shaped Chicano Studies. Chicano history, culture, and meanings, including (im)migration, repatriation, community formation, Chicano movement. Contemporary trends in art and culture.

CHIC 1275. Service Learning in the Chicano/Latino Community. (3 cr. §CHIC 3275)
Hands-on, minds-on engagement in service learning. Integration of community service and related academic study. Students work as tutors/mentors in a Chicano-Latino based K-12 educational setting (school or after school program).

CHIC 1901. Freshman Seminar. (3 cr; A-F only. Prereq=Freshman)
Topics specified in *Class Schedule*.

CHIC 1902. Freshman Seminar. (3 cr)

CHIC 1907W. Freshman Seminar. (3 cr. Prereq=Fr)
Topic specified in *Class Schedule*.

CHIC 1908W. Freshman Seminar. (3 cr; A-F only. Prereq=Freshman)
Topics specified in *Class Schedule*.

CHIC 3212. La Chicana. (3 cr. §WOST 3410)
This class centers on Chicanas or politically defined women of the Mexican American community. Our method is interdisciplinary. It emphasizes the importance of historical context and cultural process to any discussion of the Chicana experience.

CHIC 3213. Chicano Music and Art. (3 cr; A-F only)
Survey of diverse forms of cultural expressiveness in Mexican American music/art. History of various types of artistic production and musical forms in their regional specificity. Social/economic implications of several genres, styles, and traditions.

CHIC 3221. Introduction to Chicana/o Cultural Studies: Barrio Culture and the Aesthetics of Everyday Life. (3 cr)
Cultural studies approach to investigating aesthetic dimensions of experience that inform and are informed by dynamic relationship between culture, class, ethnicity, and power.

CHIC 3223. Chicana/o and Latina/o Representation in Film. (3 cr)
Introduction to Chicana/o and Latina/o visual representation. Depiction of Latina/o experience, history, and culture in film. Analyzing independent/commercial films as texts that illuminate deeply held beliefs around race, class, ethnicity, gender, and national origin.

CHIC 3275. Service Learning in the Chicano/Latino Community. (3 cr. §CHIC 1275)
Hands-on, minds-on engagement in practice/theory of service learning. Integration of community service and related academic study. Students work as tutors/mentors in a Chicano-Latino based K-12 educational setting (school or after school program).

CHIC 3310. Chicanas/os and the Law. (3 cr)
Surveys the status of Chicanas and Chicanos in the law. A wide realm of case law and articles introduce key issues. Examines history, inequality, education, employment, affirmative action, criminal law, immigration, housing, and environmental racism.

CHIC 3352. Transnational Chicana/o Theory: Global Views/Borderland Spaces. (3 cr)
Demographic realities, political/economic shifts, cultural exchanges that characterize U.S.-Mexico borderland spaces in global economy. Historically contextualized, transnational approach to cultures, politics, and economics of U.S.-Mexico Borderlands. Dynamics of borderland spaces.

CHIC 3374. Migrant Farmworkers in the U.S.: Families, Work, and Advocacy. (3 cr)
Social, economic, and legal realities of migrant workers. Demographic shifts, laws, and policies. Farmworker movements and other responses to conditions facing migrants in contemporary economy. Gendered nature of work. Way in which commodities are produced and resistance expressed within structures/traditions of an increasingly globalized system.

CHIC 3375. Folklore of Greater Mexico. (3 cr)
Scholarly survey and exploration of the sociocultural function of various types of folklore in Greater Mexico. Students analyze the ways in which folklore constructs and maintains community, as well as resists and engenders cultural shifts.

CHIC 3444. Chicana and Chicano History: 1821-1945. (3 cr. §HIST 3441, HIST 3444, LAS 3441)
Experiences of people of Mexican descent in the United States. Important eras in histories of Mexico, the United States, and Mexican Americans. Central role of Chicana/os in U.S. history, culture, and politics.

CHIC 3446. Chicana/o History II: WWII, El Movimiento, and the New Millennium. (3 cr)
Experiences of people of Mexican descent in the U.S. Notions of citizenship from WWII. Chicano civil rights movement. Impact of immigration patterns/legislation. Cultural wars, changing demographics. Social, economic, and political changes that influenced day-to-day life of Mexican Americans. Meaning of racialized Mexican identity. How different groups of Mexicans have understood their relationships to other Americans and other Latino groups.

CHIC 3452. Xicana/Indigena Studies: History, Culture, and Politics. (3 cr)
Historical, cultural, and political processes that have impacted Chicanas/os and their understanding of being indigenous to North American continent and Southwestern U.S. History as dynamic process intimately related to present/future constructions of Mexican American identities and sociopolitical perspectives.

CHIC 3507W. Introduction to Chicana/o Literature. (3 cr)
Cultural, intellectual, and socio-political traditions of Mexican Americans as they are represented in creative literature. Various genres/forms of creative cultural expression and their significance as representations of social, cultural, and political life in the United States. Novels, short stories, drama, poetry.

CHIC 3672. Chicana/o Experience in the Midwest. (3 cr)
Lived experience of Chicano/as in Midwest. Art, music, and spoken word as media for how Chicano/as convey that experience. How/why groups, affiliations, and organizations form in alliance/competition. How living in Midwest impacts those relationships.

CHIC 3712. Chicanas(os): Psychological Perspectives. (3 cr)
Textual analysis of Chicana/Latina writings with special emphasis on the psychological motivations of the subjects pertaining to race, class, and gender relationships.

CHIC 3752. Chicanas and Chicanos in Contemporary Society. (3 cr)
Introduction to sociological analysis of theoretical/methodological approaches to Chicano/a and Latina/o communities. Socioeconomic conditions, education, cultural change, the family, gender relations, political experiences. Theories, issues, methods of sociological research. Debates regarding qualitative/quantitative research methods.

CHIC 3852. Chicana/o Politics. (3 cr. \$POL 3752)
Foundations/contradictions of contemporary Chicano politics. Policy issues that concern Latinos, successes/failures of Latino empowerment strategies, electoral impact of Latino votes. Question of whether there is a Latino politic/community.

CHIC 3900. Topics in Chicano Studies. (3 cr [max 6 cr]; A-F only)
Topics vary by section of course.

CHIC 3993. Directed Studies. (1-9 cr [max 16 cr]. Prereq-#)
Guided individual reading, research, and study. Students often do preliminary readings and research in conjunction with plans for education abroad programs.

CHIC 4231. The Color of Public Policy: African Americans, American Indians, and Chicanos in the United States. (3 cr. \$AAS 4231, AFRO 4231, AMIN 4231)
Examination of the structural or institutional conditions through which people of color have been marginalized in public policy. Critical evaluation of social theory in addressing the problem of contemporary communities of color in the United States.

CHIC 4232. Chicana/o - Latina/o Gender and Sexuality Studies. (3 cr)
Critical thinking of Chicanas/os and Latinas/os around construction of gender. Politics of sexual identity. How the self is gendered in relationship to sexual, racial, class, and national identities under different social structural conditions. Way in which the "borders" that define/confine sexual norms shift over time.

CHIC 4275. Theory in Action: Community Engagement in a Social Justice Framework. (3 cr)
Sociopolitical issues in Latina/o community. Various theories advocating a more just society. Problem-solving approaches. What it means to be a responsible/ethical citizen. Need for communication/understanding between members of diverse/unequal groups in working toward social transformation.

CHIC 4401. Chicana/Latina Cultural Studies. (3 cr. \$WOST 4401)
Diversity of cultures that are called "Hispanic"; women in these cultures; Chicanas and Latinas living in the United States or migrating from their home nations to the United States.

CHIC 4900W. Proseminar: Senior Project. (1 cr)
Students work closely with a faculty member to complete their senior project.

CHIC 4901W. Senior Paper. (2 cr. Prereq-14900)
Capstone experience. Students produce original research paper or creative project on a topic determined in consultation with a faculty adviser.

CHIC 5374. Migrant Farmworkers in the U.S.: Families, Work, and Advocacy. (3 cr)
Social, economic, and legal realities of migrant workers. Demographic shifts, laws, and policies. Farmworker movements and other responses to conditions facing migrants in contemporary economy. Gendered nature of work. Way in which commodities are produced and resistance expressed within structures/traditions of an increasingly globalized system.

CHIC 5920. Topics in Chicana(o) Studies. (3 cr. Prereq-Sr or grad student)
Multidisciplinary themes in Chicano studies. Issues of current interest.

CHIC 5993. Directed Studies. (1-3 cr [max 16 cr]. Prereq-#)
Guided individual reading, research, and study for completion of the requirements for a senior paper or honors thesis.

Child Psychology (CPSY)

Institute of Child Development

College of Education and Human Development

CPSY 1905. Freshman Seminar. (1-3 cr [max 6 cr]. Prereq-Fr)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CPSY 2301. Introductory Child Psychology. (4 cr. Prereq-4 cr intro psych)
Introduction to the science of child behavior; review of theory and research.

CPSY 3301. Introductory Child Psychology for Social Sciences. (4 cr)
The science of child behavior; review of theory and research. Designed for majors in psychology, sociology, and related disciplines; not suggested for child psychology majors.

CPSY 3308. Introduction to Research Methods in Child Psychology. (4 cr; A-F only. Prereq-2301, PSY 1001)
Techniques used in the study of child development; emphasis on collection, organization, and analysis of data.

CPSY 3360. Child Psychology Honors Seminar. (2 cr; A-F only. Prereq-CPSY honors student)
Acquaints students with the various research projects and activities in the Institute for Child Development and in related departments. Faculty are invited to discuss their research projects with seminar participants.

CPSY 4302. Infant Development. (4 cr; A-F only. Prereq-2301 or #)
Perceptual, motor, emotional, social, and cognitive development during the first two years of life; the developing infant in his or her social and physical environment.

CPSY 4303. Adolescent Psychology. (4 cr; A-F only. Prereq-PSY 1001)
Overview of development in the second decade of life. Interactions of adolescents with family, school, and society.

CPSY 4310. Special Topics in Child Development. (1-4 cr [max 12 cr]. Prereq-2301)
Topics/credits vary.

CPSY 4311. Behavioral and Emotional Problems of Children. (4 cr; A-F only. Prereq-Intro psych)
Behavioral and emotional problems of children and adolescents; psychopathology contrasted to normal development; symptoms, causes, course, and prevention of common disorders, excluding physical and sensory handicaps.

CPSY 4313. Disabilities and Development. (4 cr. Prereq-PSY 1001)
Surveys all areas of exceptionality. Mental, hearing, vision, physical, speech, language handicaps. Learning disabilities. Autism. Emotional/behavior disorders. Giftedness.

CPSY 4329. Biological Foundations of Development. (4 cr; A-F only. Prereq-2301 or equiv)
Evolutionary theory and behavioral genetics applied to understanding of development of human behavior; formation of species-typical adaptive behavior and individual differences in infancy, childhood, and adolescence. This course is only offered Fall semesters.

CPSY 4331. Social and Personality Development. (4 cr; A-F only. Prereq-2301, PSY 1001)
Development of social relations and personality; research, methodology, and contrasting theoretical perspectives. Survey of findings on interpersonal relationships, the concept of self, prosocial and antisocial behavior, and acquisition of social roles.

CPSY 4334W. Children, Youth in Society. (4 cr; A-F only. Prereq-2301)
Child development principles relative to social policy decision making. Issues in applying theories, findings to problems (e.g., media influences, mainstreaming, day care, child abuse, effects of peers).

CPSY 4336W. Development and Interpersonal Relations. (4 cr; A-F only. Prereq-2301 or equiv, 4331)
Processes and functions of interactions with parents and peers; analysis of theory and research on developmental changes and influences.

CPSY 4341. Perceptual Development. (4 cr. Prereq-2301)
Perceptual learning and the development of sensory and perceptual processes.

CPSY 4343. Cognitive Development. (4 cr; A-F only. Prereq-2301)
Cognitive processes; relevant theory, research literature, and methodology.

CPSY 4345. Language Development and Communication. (4 cr; A-F only. Prereq-2301)
Structure and function of language; factors influencing development; methodological problems, language scales, theories.

CPSY 4347W. Senior Project. (2 cr; A-F only. Prereq-CPSY sr)
Current literature on self-selected developmental topic. Students write a literature review.

CPSY 4993. Directed Instruction in Child Psychology. (1-4 cr [max 8 cr]; S-N only. Prereq-4 cr CPSy, #)
Students serve as teaching assistants or peer advisers.

CPSY 4994. Directed Research in Child Psychology. (1-4 cr [max 8 cr]. Prereq-4 cr in CPSy, #, Δ)
Individual empirical investigation. Students help plan/implement scientific studies, gain experience/expertise in methodology of research.

CPSY 4994V. Directed Research in Child Psychology (Honors Thesis). (1-6 cr [max 6 cr]. Prereq-4 cr in CPSy, CPSY honors, #, Δ)
Individual empirical investigation. Students help plan/implement scientific studies while gaining experience/expertise in research methodology.

CPSY 4996. Field Study in Child Psychology. (1-4 cr [max 8 cr]; S-N only. Prereq-4 cr CPSy, #)
Independent reading. Varies depending on student's specific area of interest. Students receive credit while interning in metropolitan area.

CPSY 5251. Social and Philosophical Foundations of Early Childhood Education. (3 cr. Prereq-[MED student in ECE or ECSE] or #)
Surveys imagery, history, philosophy, and psychology of early childhood education. Analyzing/interpreting trends in early education, including diversity, special needs, legislation, public policy, and educationally appropriate practice.

CPSY 5252. Facilitating Social and Physical Learning in Early Childhood Education. (3 cr. Prereq—Student in early childhood ed or early childhood special ed)
Current theoretical/empirical literature and developmental knowledge as basis for planning, implementing, and evaluating social/physical growth/development of young children. For students obtaining ECE/ECSE licensure.

CPSY 5253. Facilitating Cognitive and Creative Learning in Early Childhood Education. (3 cr; A-F only. Prereq—MEd student in early childhood ed or early childhood special ed, or #)
Overview of cognitive, creative, and language characteristics of children ages 0-8 years and of how teachers can plan curriculum to facilitate children's development in these areas.

CPSY 5281. Student Teaching in Early Childhood Education. (3-6 cr [max 6 cr]; S-N only. Prereq—MEd student in early childhood ed or early childhood special ed)
Application of theory/research relating to teaching preschool children. For individuals obtaining ECE licensure.

CPSY 5413. Early Childhood and Public Policy. (3 cr)
State, federal, and international policies and legislative activity touching first five years of a child's life. Family, community, and institutional roles in promoting children's social, cognitive, and emotional development. Issues related to health, mental health, poverty, developmental delays, and special needs.

CPSY 5414. Individualized Learning Experience in Early Childhood and Public Policy. (1-3 cr [max 3 cr]. Prereq—Early Childhood Policy Certificate student, #)
Individualized, applied learning experience. Focuses on early childhood policy development, research, or evaluation. Students attend an early childhood policy lecture series and participate in small discussion groups and follow-up activities.

Chinese (CHN)

Department of Asian Languages and Literatures

College of Liberal Arts

CHN 1011. Beginning Modern Chinese. (6 cr. §CHN 4001)
Speaking and reading modern standard Chinese through structured practice.

CHN 1012. Beginning Modern Chinese. (6 cr. §CHN 4002. Prereq—1011 or equiv or #)
Speaking and reading modern standard Chinese through structured practice.

CHN 1015. Accelerated Beginning Modern Chinese. (5 cr. Prereq—Oral/aural skills or speaker of other Chinese dialect recommended)
Reading, writing, standard pronunciation. Meets with 4005.

CHN 1016. Accelerated Intermediate Modern Chinese. (5 cr. Prereq—1012 or 1015; oral/aural skills or speaker of other Chinese dialect recommended)
Continuation of CHN 1015. Mandarin Chinese course designed primarily for students with oral/aural skills but with little or no exposure to reading and writing. Also for speakers of other Chinese dialects and others with prior experience. Concentration on reading, writing, and standard pronunciation. Equivalent to two semesters, Chinese 3021-3022. Upon completion, student may enter Advanced Modern Chinese, Chinese 3031.

CHN 3021. Intermediate Modern Chinese. (5 cr. §CHN 4003. Prereq—1012 or 1015 or equiv or #)
Modern standard Chinese skills developed further through conversations, writing, and reading.

CHN 3022. Intermediate Modern Chinese. (5 cr. Prereq—3021)
Modern standard Chinese skills developed further through conversation and reading.

CHN 3031. Advanced Modern Chinese. (4 cr. Prereq—3022 or equiv or #)
Reading and analysis of 20th-century texts.

CHN 3032. Advanced Modern Chinese. (4 cr. Prereq—3031 or equiv or #)
Reading and analysis of 20th-century texts.

CHN 3041. Business Chinese. (4 cr. Prereq—3032 or equiv or #)
Reading and analysis of commercial and business texts.

CHN 3111. Introductory Classical Chinese. (3 cr. Prereq—3022 or equiv or #)
Study of classical Chinese through reading and analysis of representative texts.

CHN 3112. Introductory Classical Chinese. (3 cr. Prereq—3111)
Study of classical Chinese through reading and analysis of representative texts.

CHN 3161. Media Cultures in Modern China. (3 cr. Prereq—Soph or higher; Chinese language not required, background in modern Chinese history recommended)
Relations among media technologies, cultural identities, and politics in China from 19th century to present. Emphasizes photography, graphic arts, popular music/recording. Some attention to cinema and popular fiction. Ways of analyzing popular/mass culture.

CHN 3201. Chinese Calligraphy. (2 cr)
Appreciation and execution of Chinese calligraphy through guided practice.

CHN 3202. Intermediate Chinese Calligraphy. (2 cr. Prereq—3201 or #)
Advanced techniques of composing Chinese characters using regular style of Chinese calligraphy.

CHN 3290. Chinese Language Teaching Tutorial. (1 cr [max 2 cr] Prereq—Grade of A in 3032)
Students tutor beginning students of Chinese and are part of department's Chinese language team.

CHN 4001. Beginning Modern Chinese. (3 cr. §CHN 1011. Prereq—[passing score on GPT in another language or grad student])
Speaking/reading modern standard Chinese through structured practice. Meets with 1011.

CHN 4002. Beginning Modern Chinese. (3 cr. §CHN 1012. Prereq—4001, [passing score on GPT in another language or grad student])
Speaking/reading modern standard Chinese through structured practice. Meets with 1012.

CHN 4003. Intermediate Modern Chinese. (3 cr. §CHN 3021. Prereq—4002; [passing score on GPT in another language or grad student])
Modern standard Chinese skills developed through conversations, writing, and reading. Meets with 3021.

CHN 4004. Intermediate Modern Chinese. (3 cr. Prereq—4003, [passing score on GPT in another language or grad student])
Modern standard Chinese skills developed through conversation and reading. Meets with 3022.

CHN 4005. Accelerated Beginning Modern Chinese. (3 cr. Prereq—#; oral/aural skills or other Chinese dialect recommended)
Mandarin Chinese. Reading, writing, standard pronunciation.

CHN 4006. Accelerated Intermediate Modern Chinese. (3 cr. Prereq—1012 or 1015 or #; oral/aural skills or other Chinese dialect recommended)
Continuation of 1015. Mandarin Chinese. Reading, writing, standard pronunciation.

CHN 4007. Advanced Modern Chinese. (3 cr. Prereq—4004, [passing score on GPT in another language or grad student])
Reading/analysis of 20th-century texts. Meets with 3031.

CHN 4008. Advanced Modern Chinese. (3 cr)
Reading/analysis of 20th-century texts. Meets with 3032.

CHN 4011. Chinese Traditional Literature in Translation I. (4 cr)
Representative works of Chinese literature in translation from ancient times until the end of the T'ang dynasty.

CHN 4012W. Chinese Traditional Literature in Translation II. (4 cr)
Representative works of Chinese literature in translation from end of T'ang dynasty until end of 19th Century.

CHN 4023. 20th-Century Chinese Literature in Translation. (4 cr. Prereq—Background in modern Chinese history desirable; knowledge of Chinese language not required)
Main trends in Chinese literature from May 4th, 1919 to 1979, including Taiwanese literature.

CHN 4024. Contemporary Chinese Literature in Translation. (4 cr. Prereq—Background in modern Chinese history desirable; knowledge of Chinese language not required)
Main trends in Chinese literature from 1979 to the present.

CHN 4121. History of the Chinese Language. (4 cr. Prereq—3111)
Sources and methods in the study of the historical development of the Chinese language.

CHN 4125. Structure of Modern Chinese. (4 cr. Prereq—3022 or equiv or #)
Analysis of the grammatical structures of modern standard Chinese.

CHN 4234. Chinese Poetry in Translation. (4 cr. Prereq—No knowledge of Chinese required)
Major themes, genres, and technical conventions of Chinese poetry from the classical age of poetry to the modern period.

CHN 4241. Filmic Construction of Modernity in China. (4 cr)
A survey of important films made after the Cultural Revolution with a special emphasis on the critically acclaimed "Fifth Generation" filmmakers.

CHN 4292. Directed Reading. (1-5 cr [max 5 cr]. Prereq—#, Δ, □)
Guided individual reading or study.

CHN 5011. Research Methods. (4 cr. Prereq—3032 or 3112)
Introduction to the sources and approaches of research in language and literature.

CHN 5015. Chinese Philosophical/Historical Texts. (4 cr. Prereq—3112)
Readings from major texts in Chinese philosophical and historical traditions.

CHN 5018. Chinese Religious Texts. (4 cr. Prereq—3112)
Traditional Chinese religious systems through selected texts.

CHN 5040. Readings in Chinese Texts. (2-4 cr [max 12 cr]; A-F only. Prereq—3032 or equiv or #)
Students read authentic materials of various types to increase reading/speaking ability. Topics specified in *Class Schedule*.

CHN 5120. Topics in Chinese Linguistics. (4 cr [max 8 cr]. Prereq—4121 or 4125)
Studies of the structure and change in the Chinese language.

CHN 5230. Topics in 20th-Century Chinese Literature. (4 cr [max 8 cr]. Prereq—3032)
Studies of representative literary works from May 4, 1919 to the present.

CHN 5240. Topics in Chinese Poetry. (4 cr [max 8 cr]. Prereq—3112)
Selected major Chinese poets and poetic forms.

CHN 5242W. Chinese Classical Drama and Theatre. (4 cr)
A multimedia course on traditional Chinese theatre.

CHN 5250. Topics in Chinese Fiction. (4 cr [max 8 cr]. Prereq—3032 or 3112)
Studies of traditional and modern Chinese fiction.

CHN 5260. Topics in Premodern Chinese Prose. (4 cr [max 8 cr])
Studies of representative Chinese prose writings of the pre-modern period.

CHN 5393. Directed Study. (1-5 or [max 18 cr]. Prereq—#, A, □)
Guided individual reading or study.

Civil Engineering (CE)

Department of Civil Engineering

Institute of Technology

CE 5. Refresher Course for Civil Engineers. (0 cr; S-N only. Prereq—BCE or equivalent degree or completion of PARTS I and II of the State Board ExAMINation)
Review of civil engineering fundamentals required to pass the Minnesota Professional Engineering Examination in civil engineering.

CE 1101. Civil Engineering Orientation. (1 cr; S-N only)
Introduction to the Civil Engineering Department and civil engineering practice. Presented by faculty members and professional engineers.

CE 3101. Computer Applications in Civil Engineering I. (3 cr; A-F only. Prereq—MATH 1272, IT)
Introduction to computer tools/methods for solving civil engineering problems. Spreadsheets, Autocad, Mathcad, Visual Basic. Numerical integration, curve fitting, linear/nonlinear equations, differential equations.

CE 3102. Uncertainty and Decision Analysis in Civil Engineering. (3 cr; A-F only. Prereq—[MATH 1371, MATH 1372] or equiv)
Stochastic models and their usefulness in reasoning about uncertainty in civil engineering. Techniques for identifying, fitting, and validating models using data samples. Testing hypotheses about, and bounding the uncertainty attached to, important engineering parameters. Applications to problems arising in construction, environmental, geotechnical, structural, transportation, and water resources engineering.

CE 3111. CADD for Civil Engineers. (2 cr. Prereq—3201)
Introduction to AutoCAD and land development desktop software. Students complete all tasks to design two-lane roadway using civil engineering design software, including topography, plan/profile, contours, cross sections, and quantity calculations.

CE 3201. Transportation Engineering. (3 cr. Prereq—PHYS 1301)
Apply laws of motion to describe vehicle performance and determine constraints for highway designs. Traffic flow principles and their relation to capacity and level of service. Introduction to geometric design, pavement design, and transportation planning.

CE 3202. Surveying and Mapping. (2 cr; A-F only. Prereq—IT or #; MATH 1271, 1272)
Theory of precision measurements of distance, elevation, angle, and direction of points and lines above, on, or beneath the earth's surface; establishing such points or lines. Elements of coordinate systems, datum planes, and maps.

CE 3301. Soil Mechanics I. (3 cr; A-F only. \$GEOE 3301. Prereq—IT, AEM 3031)
Index properties and soil classification. Effective stress. Permeability and seepage. Elasticity theory. One-dimensional compression and consolidation; settlements. Compaction; cut and fill problems.

CE 3401. Linear Structural Analysis. (3 cr; A-F only. Prereq—Grade of at least C- in AEM 3031, IT)
Analysis of determinate/indeterminate trusses and frames and of deformation by virtual work. Application of energy, slope-deflection, and moment distribution methods to indeterminate structures. Influence lines. Design.

CE 3402. Construction Materials. (3 cr; A-F only. Prereq—Grade of at least C- in AEM 3031, IT)
Basic concepts of behavior mechanisms for construction materials such as concrete, metals, asphalt, plastics, and wood. Standard specifications for material properties. Techniques for testing.

CE 3406. Construction Materials for Managers. (3-4 cr; A-F only. Prereq—[AEM 2011 or WPS 4301], construction management major)
Basic concepts of physical properties and behavior mechanisms for construction materials such as concrete, steel, aluminum, and wood. Standard specifications for material properties. Laboratory techniques for evaluation of each material.

CE 3501. Environmental Engineering. (3 cr; A-F only. Prereq—CHEM 1022, PHYS 1302)
Introduction to environmental engineering. Quantitative approach to environmental problems. Scientific background for understanding roles of engineers and scientists.

CE 3502. Fluid Mechanics. (4 cr; A-F only. Prereq—[AEM 2012 or AEM 3031], Math 2373, [IT or ForP major])
Fluid statics/dynamics. Kinematics of fluid flow, equations of motion, pressure-velocity relationships, viscous effects, boundary layers. Momentum/energy equations. Lift/drag. Flow in pipes and pipe systems. Hydraulic machinery. Fluid measurements.

CE 4011. Special Topics. (1-4 cr [max 12 cr] Prereq—Upper div IT)
Topics/credits vary.

CE 4101W. Project Management. (3 cr. Prereq—Upper div IT or construction management)
Survey of engineering project management, economics. Project planning, scheduling, and controlling. Budgeting, staffing, task cost control. Communicating with, motivating, leading, and managing conflict among team members. Engineering economics.

CE 4102W. Capstone Design. (3 cr; A-F only. Prereq—3201, 3202, 3301, 3401, 3402, 3501, 3502)
Teams formulate/solve civil engineering problems. >From conceptual stage through preliminary planning, public hearings, design, environmental impact statements, final plans/specifications, and award of contracts.

CE 4111. Engineering Systems Analysis. (3 cr. \$GEOE 4111. Prereq—Upper div IT)
"Systems" approach to problems. Operations research—decision engineering, network analysis, simulation, linear programming, and expert systems—is used to represent systems and assess trade-offs.

CE 4121. Computer Applications in Civil Engineering II. (3 cr; A-F only. \$GEOE 4121. Prereq—CE or upper div GeoE, 3101, Math 2243, Math 2263)
Advanced application of computer tools and methods in solving partial differential equations from civil engineering problems. The major tools are Spreadsheet and Visual Basic programming. Methods include finite differences, boundary element, finite element, and control volume finite element.

CE 4170. Independent Study I. (1-4 cr [max 4 cr]. Prereq—#)
Special studies in planning, designing, or analyzing civil engineering systems. Lab problems, literature studies, or reports supervised by staff.

CE 4180. Independent Study II. (1-4 cr [max 4 cr]. Prereq—#)
Special studies in the planning, design, or analysis of civil engineering systems. Individual lab research problems, literature studies, reports. Supervised by staff.

CE 4190. Engineering Co-op Assignment. (2-6 cr [max 6 cr]; S-N only. Prereq—Upper div CE, approval of department co-op director)
Formal written report of work during six-month professional assignment.

CE 4201. Highway Design. (3 cr; A-F only. Prereq—CE or upper div GEOE or grad, 3202, 3201 or #)
Vertical and horizontal alignment, earthwork computations, highway capacity, forecast of traffic volume demand, impact of vehicle type on geometric design, intersection design.

CE 4211. Traffic Engineering. (3 cr. Prereq—3201 or STAT 3021 or equiv)
Principles of vehicle/driver performance as they apply to safe/efficient operation of highways. Design/use of traffic control devices. Capacity/level of service. Trip generation, traffic impact analysis. Safety/traffic studies.

CE 4231. Pavement Engineering. (3 cr. Prereq—[3201, 3301, 3402, [upper div IT or grad student]] or #)
Concepts/principles in rigid/flexible pavement design. Traffic loads, soil considerations, material characteristics for highway/airfield pavement design.

CE 4232. Cemented Materials. (3 cr. Prereq—Upper div IT or grad, CE 3402 or #)
Characteristics of and lab testing for mineral aggregates: cement, mortar, fresh/hardened concrete, and asphalt-cement mixtures. Construction and long-term performance of mixtures.

CE 4301. Soil Mechanics II. (3 cr; A-F only. \$GEOE 4301. Prereq—[[3301 or GEOE 3301], upper div IT] or #)
Traction and stress. Mohr-Coulomb failure criterion. Experiments on strength and on angle of internal friction. Earth pressure theories, rigid/flexible retaining walls. Bearing capacity of shallow foundations. Stability of slopes.

CE 4311. Rock Mechanics . (4 cr; A-F only. Prereq—3301 or GEOE 3301 or #)
Site investigation/classification. In-situ stresses. Strength/failure criteria of rock/interfaces. Stereographic projections. Kinematic analysis of rock slopes. Block size/stability. Reinforcement. Methods of stress analysis. Pillar design, stiffness effects. Elastoplastic analysis. Rock-support interaction. Numerical modeling of support systems. Lab testing of rock.

CE 4341. Engineering Geostatistics. (3 cr; A-F only. \$GEOE 4341. Prereq—CE, GEOE or upper div Geo or grad, STAT 3021 or #)
Problem solving and decision making in civil and geological engineering using applied statistics. Emphasizes spatially correlated data, e.g., geologic site characterization, spatial sampling design.

CE 4351. Groundwater Mechanics. (3 cr; A-F only. \$GEOE 4351. Prereq—Upper div IT or grad, CE 3502 or #)
Shallow confined and unconfined flows. Two-dimensional flow in vertical plane, transient flow. Flow toward wells. Determination of streamlines and pathlines in two and three dimensions. Introduction to contaminant transport. Elementary computer modeling.

CE 4352. Groundwater Modeling. (3 cr; A-F only. \$GEOE 4352. Prereq—Upper div IT or grad, CE 4351, GEOE 4351 or #)
Analytic element method. Mathematical and computer modeling of single and multiple aquifer systems. Field problems. Theory and application of contaminant transport models, including capture zone analysis.

CE 4401. Steel and Reinforced Concrete Design. (4 cr; A-F only. Prereq—Grade of at least C- in 3401, #3402, [upper div IT or grad student])
Limit-states design. Steel: tension, compression, flexure, combined compression/flexure, connections. Concrete: beams in flexure/shear, one-way slabs, T-beams, development length, serviceability.

CE 4411. Matrix Structural Analysis. (3 cr; A-F only. Prereq—[Grade of at least C- in [3101, 3401] or in a CSCI programming course], [upper div IT or grad student]] or #)
Analysis of linear structural systems by matrix methods, stiffness, and flexibility methods. Introduction to computerized structural analysis of trusses/frames, including coding in programming language.

CE 4412. Reinforced Concrete Design II. (3 cr; A-F only. Prereq—[Grade of at least C- in 4401, [upper div IT or grad student]] or #; 4411 recommended)
Advanced design of reinforced concrete structures: footings, retaining walls, columns with slenderness effects and biaxial loading, torsion, continuous systems, two-way floor systems.

CE 4413. Steel Design II. (3 cr; A-F only. Prereq—[Grade of at least C- in 4401, [upper div IT or grad student]] or #; 4411 recommended)

Design of steel and composite steel/concrete structures, including multistory frames and plate-girders bridges. Beam-columns, torsion, connections, frames.

CE 4414. Prestressed Concrete Design. (3 cr; A-F only. Prereq—[Grade of at least C- in 4401, [upper div IT or grad student]] or #; 4412 recommended)

Design of prestressed concrete structures. Time dependent effects, behavior, flexure, shear, torsion, deflections, continuous systems.

CE 4415. Masonry Structures. (3 cr; A-F only. Prereq—[Grade of at least C- in 3401, [upper div IT or grad student]] or #; 4401 recommended)

Masonry materials and their production. Mortars, grouts. Design of unreinforced, reinforced, and prestressed masonry structural systems. Walls, columns, lintels, arches. Codes/specifications, testing, inspection.

CE 4501. Hydrologic Design. (4 cr; A-F only. Prereq—3502)

Hydrologic cycle: precipitation, evaporation, infiltration runoff. Flood routing through rivers and reservoirs. Statistical analysis of hydrologic data and estimation of design flows. Open channel flow, flow through conduits. Detention basin design, hydraulic structure sizing, estimation of risk of flooding.

CE 4502. Water and Wastewater Treatment. (3 cr; A-F only. Prereq—3501)

Theory of chemical, physical, and biological processes in treating water and wastewater. Sequencing of processes. Design of treatment facilities.

CE 4511. Hydraulic Structures. (4 cr; A-F only. Prereq—4501)

Hydraulic design procedures for culverts, dams, spillways, outlet works, and river control works. Drop structures, water intakes, bridge crossings. Offered alt yrs.

CE 4512. Open Channel Hydraulics. (4 cr; A-F only. Prereq—IT or grad, 3502 or #)

Theories of flow in open channels, including gradually varied and rapidly varied flows, steady and unsteady flows. Computational methods for unsteady open channel flows, applications to flood routing. Introduction to moveable bed mechanics.

CE 4531. Environmental Process Engineering. (3 cr; A-F only. Prereq—3501, ¶4541)

Physical principles that influence behavior of engineered and natural environmental systems. Flow behavior through reactors, mass transfer, interfacial effects, stability, kinetics.

CE 4561. Solid Hazardous Wastes. (3 cr. Prereq—IT or grad, CHEM 1022, 3501 or #)

Solid and hazardous waste characterization; regulatory legislation; waste minimization; resource recovery; chemical, physical, and biological treatment; thermal processes; disposal practices. Analysis and design of systems for treatment and disposal.

CE 4562. Environmental Remediation Technology. (3 cr; A-F only. Prereq—[3501, 4501] or #)

Technologies designed for removal of pollutants from groundwater and soils. Advances in technological design. Emerging technologies such as in situ bioremediation, phytoremediation. Role of environmental biotechnology in pollution abatement.

CE 4591. Environmental Law for Engineers. (3 cr; A-F only. Prereq—Upper div IT or grad or #)

Environmental regulatory law relevant to civil and environmental engineering; specific provisions of federal statutory and regulatory laws such as NEPA, CWA, RCRA, CAA, and CERCLA.

CE 5094. Civil Engineering Research. (1-4 cr [max 4 cr]. Prereq—#)

Research or independent study in concrete, structural steel, soils, hydraulics, hydrology/municipal, environmental, or transportation problems. Investigations, reports, tests, designs.

CE 5170. Internet Based Study. (1-5 cr [max 15 cr]; A-F only. Prereq—Upper div IT)

Internet based teaching with bi-weekly exercises on topic of concern.

CE 5180. Special Topics. (1-4 cr [max 4 cr]; A-F only. Prereq—#)

Topics vary depending on faculty and student interests.

CE 5211. Traffic Engineering. (3 cr. Prereq—3201, STAT 3021 or equiv)

Principles of vehicle and driver performance as they apply to the safe and efficient operation of highways. Design and use of traffic control devices. Capacity and level of service. Trip generation and traffic impact analysis. Safety and traffic studies.

CE 5212. Transportation Policy, Planning, and Deployment. (3 cr. Prereq—3201 or equiv)

Techniques of analysis and planning for transportation services. Demand-supply interactions. Evaluating transportation alternatives. Travel demand forecasting. Integrated model systems. Citizen participation in decision-making.

CE 5214. Transportation Systems Analysis. (3 cr. Prereq—3201)

Systems approach, its application to transportation engineering/planning. Prediction of flows and level of service. Production functions, cost optimization, utility theory, demand modeling, transportation network analysis, equilibrium assignment, decision analysis, multidimensional evaluation of transportation projects.

CE 5231. Pavement Management and Rehabilitation. (3 cr. Prereq—Upper div IT or grad, CE 4231 or #)

Concepts and practices in monitoring, maintaining, and rehabilitating flexible and rigid pavement systems. Manual and automated means of pavement assessment, structural and functional definitions of pavement performance, decision-making processes, and optimization.

CE 5232. Advanced Portland Cement Concrete. (3 cr. Prereq—Upper div IT or grad, CE 4232 or #)

Advanced topics in cement chemistry and selection of materials for and design of portland cement concrete mixtures. Lab assignments pertaining to mixture design and short-term and long-term behavior. Use of admixtures and fiber reinforcement. Effects of proportionment of standard materials.

CE 5233. Advanced Bituminous Materials. (3 cr. Prereq—Upper div IT or grad, CE 3402 or #)

Advanced topics in selection and design of bituminous materials. Asphalt cement, rheology, emulsions, chip seals, hot-mix asphalt design, viscoelastic characterization. Lab assignments pertaining to rheology, mixture design and viscoelastic behavior.

CE 5311. Experimental Geomechanics. (3 cr; A-F only. §GEOE 5311. Prereq—Upper div IT or grad, 4301, GEOE 4301 or #)

Machine stiffness, closed-loop testing. Small-strain theory. Measurement of deformation: strain gages, LVDTs, accelerometers, and associated circuits. Direct and indirect testing. Material behavior: experiments on anisotropic, damaged, and fluid-filled solids.

CE 5321. Geomechanics. (3 cr; A-F only. §GEOE 5321. Prereq—Upper div IT or grad, 4301 or GEOE 4301)

Elasticity theory and solution of elastic boundary value problems. Wave propagation in unbounded elastic media. Elements of fracture mechanics and applications. Elements of poroelasticity and applications.

CE 5331. Geomechanics Modeling. (3 cr; A-F only. §GEOE 5331. Prereq—Upper div IT or grad, 4301 or #)

Soil and rock response in triaxial testing; drained and undrained behavior; elastic and plastic properties. Modeling stresses, strains, and failure in geomechanics problems.

CE 5341. Wave Methods for Nondestructive Testing. (4 cr; A-F only. Prereq—[AEM 2021, AEM 3031] or #)

Introduction to contemporary methods for nondestructive characterization of objects of civil infrastructure (e.g., highways, bridges, geotechnical sites). Imaging technologies based on propagation of elastic waves such as ultrasonic/resonant frequency methods, seismic surveys, and acoustic emission monitoring. Lecture, lab.

CE 5351. Advanced Mathematics for Civil Engineers. (3 cr; A-F only. Prereq—[[Math 2263 or Math 2374 or equiv], [sr or grad student] in civil engineering]] or #)

Emphasizes skills relevant for civil engineers. Mathematical principles explained in an engineering setting. Applications from various areas in civil engineering.

CE 5411. Applied Structural Mechanics. (3 cr; A-F only. Prereq—[Grade of at least C- in 4401, [upper div IT or grad student]] or #)

Principal stresses and failure criteria in 3 dimensions. Introduction to plane elasticity, energy methods, torsion of beams, and bending of unsymmetrical beams.

CE 5541. Environmental Water Chemistry. (3 cr [max 4 cr]; A-F only. Prereq—3501, CHEM 1021, CHEM 1022)

Introduction to water chemistry. Physical chemical principles, geochemical processes controlling chemical composition of waters, behavior of contaminants that affect the suitability of water for beneficial uses.

CE 5542. Experimental Methods in Environmental Engineering. (3 cr; A-F only. Prereq—3501, CHEM 1021, CHEM 1022)

Tools necessary to conduct research in environmental engineering and chemistry. Theory of operation of analytical equipment. Sampling and data handling methods, statistical analyses, experimental design, laboratory safety. Lecture, laboratory.

CE 5551. Environmental Microbiology Laboratory. (4 cr; A-F only. Prereq—3501, [upper div or grad] student)

Role of microorganisms in environmental bioremediation, pollution control, water/wastewater treatment, biogeochemistry, and human health. Basic microbiological techniques: isolation, identification/ enumeration of bacteria, BOD, biodegradation kinetics, disinfection. Lecture, lab.

CE 5581. Water Resources: Individuals and Institutions. (3 cr; A-F only)

Control of water resources by natural system functions, user actions, and influence of social, economic, and political institutions. Water resource policy in the United States. Case studies (e.g., flood/drought management).

Classical and Near Eastern Studies (CNES)

Department of Classical and Near Eastern Studies

College of Liberal Arts

CNES 1001. World of the Bible: Religions, Empires, and Discourses of Power. (3 cr)

Hebrew Bible (Old Testament), its cultural background in Ancient Near East. Comparative study of Ancient Near Eastern and biblical literature, religion, lifestyles, and law. Nature of myth, concepts of divine. Origins, authorship, and transmission of texts that constitute Hebrew Bible.

CNES 1002. World of Greece. (3 cr)

Ancient Greek civilization, from second millennium BCE to Roman period. Art/archaeology, philosophy, science, literature, social/political institutions. Focuses on connections with contemporary cultures corresponding to Ancient Near East.

CNES 1003. World of Rome. (3 cr)

Roman civilization, from Etruscan origins to late antiquity. Cultural diversity of Mediterranean civilization. Ways of life, social, and political institutions as evidenced by literature, art, architecture, history, and material culture.

CNES 1042. Greek and Roman Mythology. (4 cr. §CNES 1042H. Prereq-§: CLAS 1042, 1042H)

Introduction to the stories and the study of Greek and Roman mythology.

CNES 1042H. Honors Course: Greek and Roman Mythology. (4 cr. §CNES 1042. Prereq-Honors or #)

Introduction to stories/study of Greek/Roman mythology.

CNES 1043. Introduction to Greek and Roman Archaeology. (4 cr)

Role that material culture, including art/architecture, plays in forming our picture of Classical past. Relationship between archaeology and other disciplines dealing with past. Selected sites, motives/methods of research. How results are used by archaeologists and general public.

CNES 1044. Introduction to Near Eastern Archaeology. (3 cr)

Near Eastern peoples before Greco-Roman times, how archaeology discovered them. Cultural history going back 10,000+ years, including rise of farming, domestic life, states, and empires. Art, ideas, and architecture of Egypt, Babylonia, Persia, and other civilizations.

CNES 1046. Technical Terminology for the Health Professions. (3 cr. Prereq-§: CLAS 1148)

Greek and Latin prefixes, suffixes, and roots basic to the vocabulary of health professions; taught through computer-assisted instruction.

CNES 1082. Jesus in History. (3 cr. §RELA 1082)

Jesus of Nazareth in his original setting. Modern approaches to the historical Jesus. Perspectives/needs of early gospel writers, effects on portrayals of Jesus. Shifting representations of Jesus in new historical/cultural situations. Meets with Clas 1082.

CNES 1082H. Honors Course: Jesus in History. (4 cr. §RELA 1082H. Prereq-honors)

Jesus of Nazareth in his original setting. Modern approaches to the historical Jesus. Perspectives/needs of early gospel writers, effects on portrayals of Jesus. Shifting representations of Jesus in new historical/cultural situations. Meets with 1082.

CNES 1201. The Bible: Context and Interpretation. (3 cr. §CNES 3201, JWST 1201, JWST 3201, RELA 3201)

Survey of literary and historical narrative texts from Pentateuch, Joshua, Judges, Samuel, Kings, and Ruth. Art of biblical narrative, major themes of biblical stories. Comparison with other Ancient Near Eastern literatures. Literary conventions of biblical writers.

CNES 1905. Freshman Seminar. (3 cr)

Topics specified in *Class Schedule*.

CNES 1909W. Freshman Seminar. (3 cr)

Topics specified in *Class Schedule*.

CNES 1910W. Freshman Seminar. (3 cr. Prereq-Fr or up to 30 cr)

Topics specified in *Class Schedule*.

CNES 3008. History of Ancient Art. (4 cr. §ARTH 3008)

Architecture, sculpture, and painting of selected early cultures; emphasis on influences on the development of Western art.

CNES 3035. Classical Myth in Western Art. (4 cr. §ARTH 3035)

Role of myth in visual arts. Major figures/stories that became popular in ancient world and have fascinated artists/audiences ever since.

CNES 3070. Topics in Ancient Religion. (3 cr [max 18 cr]. §RELA 3070)

Study of a specific aspect of religion in Classical and Near Eastern antiquity such as healing cults, magic and divination, Gnosticism, or prophecy and authority. Topics specified in the *Class Schedule*.

CNES 3071. Greek and Hellenistic Religions. (3 cr. §CNES 5071, RELA 3071, RELA 5071)

Greek religion from the Bronze Age to Hellenistic times. Sources include literature, art, and archaeology. Homer and Olympian deities, ritual performance, prayer/sacrifice, temple architecture, death and the afterlife, mystery cults, philosophical religion, Near Eastern salvation religions.

CNES 3072. The New Testament. (3 cr. §CNES 5072, RELA 3072, RELA 5072. Prereq-§: CLAS 3072)

Early Jesus movement in its cultural and historical setting. Origins in Judaism; traditions about Jesus. The apostle Paul, his controversies and interpreters. Questions of authority, religious practice, and structure; emergence of the canon of scripture. Contemporary methods of New Testament study; biblical writings as history and narrative.

CNES 3073. Roman Religion and Early Christianity. (3 cr)

Etruscan, Republican religion. Appeal of non-Roman cults. Ruler worship. Christians in Asia Minor, Egypt, and the West. Popular piety, Christian and non-Christian. Rabbinic Judaism. Varieties of Christianity in 2nd and 3rd centuries. Influence of Greco-Roman culture on emerging church. Constantine and Julian.

CNES 3081W. Classical Epic in Translation. (3 cr. §CNES 5081)

Homer's Iliad and Odyssey, Virgil's Aeneid. Cultural context of epic. Development of the hero. Epic style. Poetics of epic.

CNES 3082W. Greek Tragedy in Translation. (3 cr)

Origins of tragedy. Ancient theatres. Selected plays of Aeschylus, Sophocles, and Euripides.

CNES 3104. Ancient Rome: Kings and Consuls. (3 cr)

Roman Republic, from its origins to Caesar's death.

CNES 3105. Ancient Rome: The Age of Augustus. (3 cr. Prereq-§: CLAS 1005)

Transition from republic to empire. Political strategies of Augustus (first emperor). "Golden age" of Latin literature. Monuments.

CNES 3107. Age of Constantine the Great. (3 cr)

Change/continuity in Roman Empire from its 2nd-century zenith through 3rd-century crisis, first Christian emperor (306 to 337 A.D.), and beyond. Replacement of classical paganism by Christianity. Beginnings of monasticism. Superpower relations between Roman, Persian empires. Meets with 1023.

CNES 3108. Age of St. Augustine of Hippo. (3 cr. §CLAS 1024. Prereq-§: CLAS 3024)

Cultural diversity (A.D. 363 to circa 500 A.D.). Replacement of Roman Empire in Western Europe by barbarian kingdoms, consolidation of Constantinople as capital in the East. Literature, art, thought resulting from new dominance of Christianity, particularly Augustine of Hippo. Meets with 1024.

CNES 3142. Art of Egypt. (4 cr. §ARTH 3142)

Arts and architecture of Egypt, from prehistoric times to emergence of modern Egypt. Emphasizes elements of continuity and of change that have shaped Egyptian culture.

CNES 3152. Art and Archaeology of Ancient Greece. (4 cr. §ARTH 3152. Prereq-§: CLAS 3152)

Introduction to civilization of ancient Greece as revealed through art and material culture. Case studies of selected monuments/sites.

CNES 3162. Roman Art and Archaeology. (4 cr. §ARTH 3162. Prereq-§: CLAS 3162)

Introduction to art and material culture of Roman world: origin, change, continuity. "Progress" or "decay" in the later Empire, its legacy to modern world.

CNES 3172. Archaeology of Israel. (3 cr)

Archaeological data relevant to the Old Testament. Major sites in the Holy Land and other areas of the Mediterranean and Near East. Evidence of pottery, inscriptions, manuscripts, and coins. Excavation methods. Archaeology as a tool for study of ancient religions.

CNES 3201. The Bible: Context and Interpretation.

(3 cr. §CNES 1201, JWST 1201, JWST 3201, RELA 3201. Prereq-Knowledge of Hebrew not required) Survey in English of literary/historical narrative texts from Pentateuch, Joshua, Judges, Samuel, Kings, and Ruth. Art of biblical narrative. Major themes of biblical stories. Comparison with other Ancient Near Eastern literatures. Literary conventions of biblical writers.

CNES 3202. Prophecy in Ancient Israel. (3 cr. §ANE 1002, RELA 3202. Prereq-1001 or 1201 or 3201 or #)

Survey of Israelite prophets. Emphasizes Amos, Hosea, Isaiah, Jeremiah, Ezekiel, and Second Isaiah. Prophetic contributions to Israelite religion. Personality of prophets. Politics and prophetic reaction. Textual analysis and biblical scholarship. Prophecy viewed cross-culturally.

CNES 3203. The Bible: Wisdom, Poetry, and Apocalyptic. (3 cr. §ANE 1003, RELA 3203. Prereq-Knowledge of Hebrew not required)

Survey of books of Psalms, Proverbs, Job, Song of Songs, Lamentations, Ecclesiastes (Qoheleth). Characteristics of biblical poetry. Conceptions of Israelite wisdom writing. Traits of early Jewish apocalyptic writing.

CNES 3321. Ships and Seafaring: An Introduction to Nautical Archaeology. (3 cr)

Archaeology of ships, from Mediterranean to Great Lakes. Method/theory of underwater archaeology. Examples from antiquity to modern times: Egyptian solar barges, ancient warships, oceanic freighters. Aspects of nautical culture, including routes/trade, using evidence of ship construction, materials, cargoes.

CNES 3340. Practicum in Archaeological Field and Computer Techniques. (3 cr. §ARTH 3340, ARTH 5340, CLCV 3340, CNES 5340. Prereq-CLCV major or # or 1 course in ancient art and archaeology)

Methods used for excavation of Old and New World sites. Meets at archaeometry/computer lab for part of the semester and at a selected site in Minnesota for day-long sessions for 9 to 10 weeks.

CNES 3502. Ancient Israel: From Conquest to Exile. (3 cr. §CNES 5502, HIST 3502, RELA 3502. Prereq-Knowledge of Hebrew not required, 3501 recommended)

Israelite history in context of what is known from Egyptian, Canaanite, and Mesopotamian sources. Focuses on issues raised by archaeological data related to Israelite conquest of Canaan.

CNES 3503. History and Development of Israelite Religion I. (3 cr. §ANE 3503, ANE 5503, CNES 5503, RELA 3503, RELA 5503)

Survey of the evolution of Israelite religion. Cultic practices. Law and religion. Prophecy. Religion and historiography. Relationship to surrounding religious systems.

CNES 3535. Death and the Afterlife in the Ancient World. (3 cr. §CNES 5535, RELA 3535, RELA 5535)

Beliefs, attitudes, and behaviors related to death and the afterlife found in the cultures of the ancient Mediterranean and Near East. Literature, funerary art/epitaphs. Archaeological evidence for burial practices and care of dead.

CNES 3951W. Major Project. (4 cr. Prereq-[[Three 3xxx ANE courses, [major in ANE or CNEA or RelS]] or #)

Research project pertaining to the study of the ancient world, using documents or other primary sources along with secondary sources. Students select project in consultation with a faculty member.

CNES 3993. Directed Studies. (1-4 cr [max 16 cr])

Guided individual reading or study.

CNES 4051. Ancient Near East and Egypt: Neolithic to 1500 BCE. (3 cr; A-F only. §HIST 4051. Prereq-Previous coursework in ancient history recommended)

Lands of Western Asia and Northeast Africa from Neolithic through Middle Bronze Age. Interdependent technological/political developments such as agriculture, state formation, and writing. Use of literature/art as vehicles for articulating concepts. Changing relationships among cultures/polities of ancient Near East and regions beyond.

CNES 4052. Ancient Near EAST and Egypt: 1500 to 323 BCE. (3 cr; A-F only. §HIST 4052. Prereq—4051 or prev coursework in ancient history recommended)
Lands of Western Asia and Northeast Africa from Late Bronze Age to death of Alexander in 323 BCE. Growth/decline of empires. Diplomatic relations and sociopolitical transformations among Late Bronze and Iron Age states. New military technologies. Developments in religion/theology.

CNES 5013. Introduction to Roman Law. (3 cr)
Survey of Roman law from social and historical perspectives. Basic concepts of Roman private law and legal procedure.

CNES 5051. Before Herodotus: History and Historiography of Mesopotamia and the Ancient Near East. (3 cr; A-F only. §HIST 5051. Prereq—Prev coursework in Ancient Near Eastern history recommended)
Historical method/sources for Ancient Near Eastern history. Seminar. Emphasizes historical tradition and historiographic texts of Mesopotamia and neighboring regions of Ancient Near East. Secondary emphasis on their relationship to the works of classical historians such as Herodotus. Use of these sources in modern historiography of Ancient Near East.

CNES 5070. Topics in Ancient Religion. (3 cr [max 18 cr]. §RELA 5070. Prereq—Sr or grad student or #)
Specific aspect of religion in Classical and Near Eastern antiquity, such as healing cults, magic/divination, Gnosticism, or prophecy/authority. Topics specified in *Class Schedule*.

CNES 5071. Greek and Hellenistic Religions. (3 cr. §CNES 3071, RELA 3071, RELA 5071. Prereq—#)
Greek religion from the Bronze Age to Hellenistic times. Sources include literature, art, and archaeology. Homer and Olympian deities; ritual performance; prayer and sacrifice; temple architecture; death and the afterlife; mystery cults; philosophical religion; Near Eastern salvation religions. Meets with 3071.

CNES 5072. The New Testament. (3 cr. §CNES 3072, RELA 3072, RELA 5072)
Early Jesus movement in its cultural and historical setting. Origins in Judaism; traditions about Jesus. Apostle Paul, his controversies and interpreters. Questions of authority, religious practice, and structure; emergence of the canon of scripture. Contemporary methods of New Testament study; biblical writings as history and narrative. Meets with 3072.

CNES 5073. Roman Religion and Early Christianity. (3 cr. §RELA 5073)
Etruscan, Republican religion. Appeal of non-Roman cults. Ruler worship. Christians in Asia Minor, Egypt, and the West. Popular piety, Christian and non-Christian. Rabbinic Judaism. Varieties of Christianity in 2nd and 3rd centuries. Influence of Greco-Roman culture on emerging church. Constantine and Julian. Meets with 3073.

CNES 5080. New Testament Proseminar. (3 cr [max 18 cr]. §RELA 5080. Prereq—1082 or 3072 or equiv)
Study of some specific aspect of the New Testament and related literature. The class is organized as a discussion seminar. Topics specified in *Class Schedule*.

CNES 5081. Classical Epic in Translation. (3 cr. §CNES 3081W)
Homer's Iliad and Odyssey. Virgil's Aeneid. Cultural context of epic. Development of the hero. Epic style. Poetics of epic.

CNES 5082W. Greek Tragedy in Translation. (3 cr)
Origins of tragedy. Selected plays of Aeschylus, Sophocles, and Euripides.

CNES 5083. Ancient Comedy. (3 cr)
Greek/Roman comic drama (e.g., Aristophanes, Menander, Plautus, Terence).

CNES 5103. Hellenistic and Early Roman Art and Archaeology. (3 cr. §ARTH 5103. Prereq—Jr, Clas/ARTH 3008 or #)
Sculpture, architecture, painting, and topography in developing centers of Hellenistic culture in eastern Mediterranean and in Etruscan and Roman towns, from 400 B.C. to the beginnings of the Roman Empire.

CNES 5108. Greek Architecture. (3 cr. §ARTH 5108. Prereq—Jr, Clas/ARTH 3008 or #)
Geometric through classical examples of religious and secular architecture and their setting at archaeological sites in Greece, Asia Minor and Italy.

CNES 5111. Prehistoric Art and Archaeology of Greece. (3 cr. §ARTH 5111. Prereq—Jr, Greek art or archaeology course or #)
Artistic and architectural forms of Neolithic period in Aegean area and Cycladic, Minoan, and Mycenaean cultures. Aims and methods of modern field archaeology; the record of human habitation in the Aegean area. Archaeological evidence as a basis for historical reconstruction.

CNES 5112. Archaic and Classical Greek Art. (3 cr. Prereq—Jr, Clas/ARTH 5111)
Sculpture, painting, architecture and minor arts in Greek lands from the 9th through 5th centuries B.C. Examination of material remains of Greek culture; archaeological problems such as identifying and dating buildings; analysis of methods and techniques. Emphasis on Periklean Athens.

CNES 5120. Field Research in Archaeology. (3-6 cr [max 6 cr]. §ARTH 5120, CLCV 5120. Prereq—#)
Field excavation, survey, and research at archaeological sites in the Mediterranean area. Techniques of excavation and exploration; interpretation of archaeological materials.

CNES 5172. House, Villa, Tomb: Roman Art in the Private Sphere. (3 cr. §ARTH 5172. Prereq—Intro art history course or #)
Architecture, painting, and sculpture of urban houses, country estates, and tombs in Roman world. Relationships between public/private spheres and literary/physical evidence. Usefulness of physical evidence in illuminating gender roles.

CNES 5182. Art and the State: Public Art in the Roman Empire. (3 cr. §ARTH 5182. Prereq—Intro art history course or #)
Origins of Roman public art. Use in maintaining community. Exploitation by first emperor, Augustus. Development/diffusion through later empire. Varying capabilities to adjust to demands of a Christian Empire.

CNES 5251. Archaeology of Herodian Israel. (3 cr; A-F only. §RELA 5251, RELS 5251. Prereq—One course in [archaeology or ancient history] or grad student)
Archaeological sites in Israel dating to era of Herod the Great (37-4 BC). Palaces and religious edifices. Remains from Jewish/gentile settlements throughout the kingdom. Course readings consist of contemporary literary sources and excavation reports.

CNES 5252. History of Early Christian Art in Context. (4 cr. §ARTH 5252. Prereq—3xxx art history course or #)
Role played by art in formation of early Christian/Byzantine communities and in establishing their relationships with Pagan world and early Islam.

CNES 5340. Practicum in Archaeological Field and Computer Techniques. (3 cr. §ARTH 3340, ARTH 5340, CLCV 3340, CNES 3340. Prereq—CLCV major or ancient art and archaeology course or #)
Methods used for excavation of Old and New World sites. Meets at archaeometry/computer lab for part of the semester and at a selected site in Minnesota for day-long sessions for 9 to 10 weeks. Meets with 3340.

CNES 5502. Ancient Israel: From Conquest to Exile. (3 cr. §CNES 3502, HIST 3502, RELA 3502. Prereq—Knowledge of Hebrew not required; 5501 recommended)
Israelite history in context of what is known from Egyptian, Canaanite, and Mesopotamian sources. Focuses on issues raised by archaeological data related to Israelite conquest of Canaan.

CNES 5503. History and Development of Israelite Religion I. (3 cr. §ANE 3503, ANE 5503, CNES 3503, RELA 3503, RELA 5503)

Survey of the evolution of Israelite religion. Cultic practices. Law and religion. Prophecy. Religion and historiography. Relationship to surrounding religious systems.

CNES 5535. Death and the Afterlife in the Ancient World. (3 cr. §CNES 3535, RELA 3535, RELA 5535)
Beliefs, attitudes, and behaviors related to death and afterlife found in cultures of ancient Mediterranean and Near East. Literature, funerary art/epitaphs. Archaeological evidence for burial practices and care of dead.

CNES 5701. Alphabetic Epigraphy of the Ancient Near East. (3 cr)
Survey of comparative Semitic linguistics. Emphasizes Northwest Semitic. Reading of Phoenician, Moabite, and Judean inscriptions.

CNES 5713. Introduction to Ugaritic. (3 cr. Prereq—Adv Hebrew, previous study of biblical texts or #)
Ugaritic alphabetic cuneiform script, morphology, and syntax. Reading of representative samples of Ugaritic literature. Attention to linguistic and cultural issues and links to biblical and other Ancient Near Eastern texts.

CNES 5794. Introduction to Classical and Near Eastern Studies. (1 cr; S-N only. Prereq—Grad major or minor or #)
Introduction to core research materials and reference materials in the various disciplines which make up classical studies.

CNES 5940. Topics in Classical Literature. (3 cr [max 9 cr]. Prereq—Two literature courses or #)
Additional work for graduate credit. Topics specified in *Class Schedule*. Meets with 3940.

CNES 5950. Aspects of Classical Culture. (1-3 cr [max 12 cr])
Topics specified in *Class Schedule*. Meets with 3950.

CNES 5993. Directed Studies. (1-4 cr [max 12 cr]. Prereq—#, Δ, □)
Guided individual reading or study.

CNES 5994. Directed Research. (1-12 cr [max 12 cr]. Prereq—#, Δ, □)
Guided individual research.

CNES 5996. Directed Instruction. (1-12 cr [max 12 cr]. Prereq—#, Δ, □)
Guided individual research.

Classical Civilization (CLCV)

Department of Classical and Near Eastern Studies

College of Liberal Arts

CLCV 1301. The Olympic Games. (3 cr. §ARTH 3201, CLCV 3301)
Surveys the Olympic Games (776 B.C. to A.D. 338) and other ancient athletic festivals, including those for women participants. Greek art and literature serve as basic sources. Comparisons are made with modern athletic events.

CLCV 3301. The Olympic Games. (3 cr. §ARTH 3201, CLCV 1301)
The Olympic Games (776 B.C. to A.D. 338) and other ancient athletic festivals, including those for women participants. Greek art and literature serve as basic sources. Comparisons are made with modern athletic events.

CLCV 3340. Practicum in Archaeological Field and Computer Techniques. (3 cr. §ARTH 3340, ARTH 5340, CNES 3340, CNES 5340. Prereq—CLCV major or # or one course in ancient art and archaeology)
Methods used for excavation of Old and New World sites. Meets at archaeometry/computer lab for part of the semester and at a selected site in Minnesota for day-long sessions for 9 to 10 weeks.

CLCV 3510. Great Books. (3 cr [max 9 cr]. Prereq—Jr or sr or #) Intensive study of major works of classical antiquity and later (written in or translated into English), related by kind, theme, style, or perspective. Sometimes including works from non-Western cultures.

CLCV 3711. Classics of Literary Criticism. (3 cr. Prereq—1 course in literature, 2nd course in literature or philosophy or #) Principles of criticism as expounded and employed in major critical works by writers such as Plato, Aristotle, Horace, Longinus, Sir Philip Sidney, John Dryden, Samuel Johnson, David Hume, William Wordsworth, Samuel Taylor Coleridge, and T. S. Eliot.

CLCV 3940. Proseminar: Classical Traditions in Western Culture. (3-4 cr [max 6 cr]. Prereq—CLCV major or #) The nature of Greco-Roman classical traditions manifested in various cultural spheres: language and literature, fine arts, history, science, philosophy, theology, and other disciplines; the political, social, educational, and religious life of society. The perspective, scope, breadth, and depth of the course will vary.

CLCV 3950. Topics in Classical Civilization. (3-4 cr [max 9 cr]) Topics specified in the *Class Schedule*.

CLCV 3993. Directed Studies in Classical Civilization. (1-4 cr [max 4 cr])

CLCV 3994. Directed Research in Classical Civilization. (1-4 cr [max 4 cr])

CLCV 3996. Directed Instruction in Classical Civilization. (1-4 cr [max 4 cr])

CLCV 5120. Field Research in Archaeology. (3 cr. \$ARTH 5120, CNES 5120)

Field excavation, survey, and research at archaeological sites in Minnesota. Techniques of excavation/exploration. Interpretation of archaeological materials.

Classics (CLAS)

Department of Classical and Near Eastern Studies

College of Liberal Arts

Clas 3173. Honors Course: Roman Religion and Early Christianity. (4 cr)

Etruscan, Republican religion. Appeal of non-Roman cults. Ruler worship. Christians in Asia Minor, Egypt and the West. Popular piety, Christian and non-Christian. Rabbinic Judaism. Varieties of Christianity in 2nd and 3rd centuries. Influence of Greco-Roman culture on emerging church. Constantine and Julian. Honors recitation meets once a week for an additional recitation section. Meets with ReLA 3173.

Clinical Laboratory Science (CLS)

Department of Laboratory Medicine and Pathology

Medical School

CLS 5064. Introduction to Clinical Immunohematology. (2 cr; A-F only. \$MEDT 4064. Prereq—#) Principles of blood grouping, antibody identification, compatibility testing, serology, and immunology.

CLS 5065. Introduction to Clinical Immunohematology: Laboratory. (2 cr; A-F only. \$MEDT 4065. Prereq—#) Exercises illustrating techniques in blood grouping, antibody identification, compatibility testing, and detection of antibodies by serological and immunological methods.

CLS 5090. Special Laboratory Methods. (1-2 cr [max 2 cr]; A-F only. \$MEDT 4090. Prereq—#) Assignment on an individual basis to one of a variety of special areas of experience in the clinical lab.

CLS 5100. Virology, Mycology, and Parasitology for Medical Technologists. (2 cr; A-F only. \$MEDT 4100. Prereq—microbiology course with lab, bioCHEM course) Lab diagnosis of viral, fungal, and parasitic infections. Lecture.

CLS 5104. Principles of Diagnostic Microbiology: Lecture. (2 cr; A-F only. \$MEDT 4104. Prereq—One microbiology course with lab, one biochemistry course, #) Current techniques used in lab diagnosis of infectious disease. Isolating/identifying bacteria and yeasts. Antimicrobial susceptibility testing. Lecture.

CLS 5105. Principles of Diagnostic Microbiology: Laboratory. (2 cr; A-F only. \$MEDT 4105. Prereq—One microbiology course with lab, one biochemistry course, #) Current techniques used in lab diagnosis of infectious disease. Isolating/identifying bacteria/yeasts. Antimicrobial testing. Laboratory.

CLS 5120. Seminar: Clinical Laboratory Science. (1 cr [max 3 cr]; S-N only. Prereq—#) Current literature. Presentation/discussion of research.

CLS 5121. Journal Presentations. (1 cr [max 2 cr]; S-N only. Prereq—1st yr CLS grad student) Critical analysis, evaluation, discussion of current journal articles in student's specialty area.

CLS 5125. Practicum Teaching. (1-2 cr [max 2 cr]; A-F only. Prereq—#) Supervised teaching experience, develop skills using instructional materials, tests, and measurements.

CLS 5127. Introduction to Management and Education I. (1 cr; A-F only. \$MEDT 4127W. Prereq—#)

CLS 5129. Elements of Laboratory Administration. (2 cr; A-F only. Prereq—#) Leadership styles, employee selection and evaluation, communications, motivation, morale, discipline, job descriptions, record keeping, budgets, cost accounting, purchasing, product evaluation, lab safety, labor relations, government regulations.

CLS 5130. Practicum in Laboratory Administration. (2 cr; A-F only. Prereq—#) Supervised experience and assignment of specific problems related to lab service and management in health care institutions.

CLS 5140. Techniques for Teaching. (2 cr; A-F only. Prereq—#) Developing objectives, classroom activities, and evaluation criteria for medical technology education.

CLS 5155. Advanced Clinical Hematology. (3 cr; A-F only. Prereq—#) Observation, study, and practice in special problems, advanced techniques, and methodology.

CLS 5165. Advanced Clinical Immunohematology. (3 cr; A-F only. Prereq—#) Observation, study, and practice in special problems, advanced techniques, and methodology.

CLS 5175. Advanced Clinical Chemistry. (3 cr; A-F only. Prereq—#) Observation, study, and practice in special problems, advanced techniques, and methodology.

CLS 5251. Hematology I: Basic Techniques. (3 cr; A-F only. \$MEDT 4251. Prereq—#) Theory and application of basic principles and techniques in clinical hematology and hemostasis. Lecture and lab.

CLS 5252. Hematology II: Morphology and Correlation. (2 cr; A-F only. \$MEDT 4252. Prereq—5251 or MEDT 4251) Fundamentals of blood and bone marrow examination emphasizing microscopic identification of immature and abnormal cells. Clinical correlation of lab findings in hematology and hemostasis. Lecture and lab.

CLS 5253. Hemostasis. (1 cr; A-F only. \$MEDT 4253. Prereq—5251 or MEDT 4251) Theory and application of specific concepts and techniques in hemostasis and coagulation. Lecture and lab.

CLS 5310. Clinical Chemistry I: Lecture. (2 cr; A-F only. \$MEDT 4310. Prereq—organic CHEM course with lab bioCHEM course, #)

Principles and theory of clinical chemistry for assessing renal and metabolic disease/dysfunction, electrolyte balance, and acid-base balance. Principles and processes for quality management in the clinical lab.

CLS 5311. Clinical Chemistry I: Laboratory Applications. (2 cr; A-F only. \$MEDT 4311. Prereq—One organic chemistry course with laboratory; one biochemistry course, #) Application of clinical chemistry principles and laboratory techniques in the analysis of urine, plasma, and body fluids. Emphasis on laboratory tests to evaluate renal function, electrolytes, and acid-base balance. Introduction to principles and processes for managing test quality. Laboratory.

CLS 5320. Clinical Chemistry II: Lecture. (2 cr; A-F only. \$MEDT 4320. Prereq—organic CHEM course with lab, biochem course, 5310 or MEDT 4310, #)

Principles and theory of clinical chemistry for assessing metabolic disease/dysfunction involving hormones, enzymes, lipids/lipoproteins, cardiac function, liver, and digestive tracts. Emphasis on measurement methods and physiological significance.

CLS 5321. Clinical Chemistry II: Laboratory Applications. (2 cr; A-F only. \$MEDT 4321. Prereq—organic CHEM course with lab, biochem course, 5310 or MEDT 4310, #) Application of clinical chemistry principles and lab techniques in analyzing serum, plasma, and urine. Focus on tests to evaluate selected disorders. Developing lab and instrumentation use skills with emphasis on quality control and technique.

CLS 5768. Advanced Hematology. (5-10 cr [max 30 cr]; A-F only. Prereq—#) Practical experience collecting bone marrow from patients. Diagnosing hematological diseases by evaluating and interpreting cells from clinical specimens of bone marrow, peripheral blood, and, if applicable, lymph nodes.

CLS 5864. Research Seminar. (1 cr [max 10 cr]; S-N only. Prereq—#)

Departmental research seminar series.

CLS 5865. Departmental Seminar. (1 cr [max 10 cr]; S-N only. Prereq—#)

Departmental clinical lab research seminar series.

College of Food, Agricultural & Natural Resource Sciences (CFAN)

CFAN 1000H. Honors Colloquium. (2 cr [max 8 cr] Prereq—Admission to honors program or #) Topics vary by semester.

CFAN 1501. Biotechnology, People, and the Environment. (3 cr; A-F only) Basic concepts in genetic engineering as a foundation for studying the impact of biotechnology on agriculture, medicine, industry, and the environment. Controversial aspects of biotechnology related to public policy issues are discussed.

CFAN 1901. Topics: Freshman Seminar. (1-3 cr [max 3 cr]; A-F only. Prereq—Freshman) Interdisciplinary seminar. Topics specified in *Class Schedule*.

CFAN 1902. Topics: Freshman Seminar. (3 cr. Prereq—Freshman) Interdisciplinary seminar. Topics specified in *Class Schedule*.

CFAN 1902H. Freshman Seminar. (3 cr. Prereq—Fr) Topics will vary. See *Class Schedule*.

CFAN 1903. Topics: Freshman Seminar. (1-3 cr [max 3 cr]; A-F only. Prereq—Freshman) Interdisciplinary seminar. Topics specified in *Class Schedule*.

CFAN 1904. Topics: Freshman Seminar. (1-3 cr [max 3 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CFAN 1905. (1-3 cr [max 3 cr]; A-F only. Prereq—Fr)
Freshman Seminar. Topics vary.

CFAN 1908W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CFAN 1910W. Freshman Seminar: Topics. (1-3 cr [max 3 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CFAN 3000. Directed Studies in International Agriculture. (1-4 cr [max 8 cr]; A-F only. Prereq—#)
Oral presentations, discussion of students' research papers. Literature review of selected topics. Discussions with students/staff about their experiences in international agriculture.

CFAN 3001. Pests and Crop Protection. (3 cr; A-F only. Prereq—BIOL 1009 or equiv or #)
Introduction to biology/identification of insects, weeds, and diseases that affect agricultural crops. Management of these organisms based on principles of integrated pest management.

CFAN 3100H. Honors Experience. (2-3 cr [max 6 cr]; A-F only. Prereq—Approved proposal by COAFES honors program committee)
Developed by student and COAFES faculty mentor. May include foreign study-travel, research, position or policy paper, or any experience demonstrating advanced study/service/understanding.

CFAN 3101H. Honors Seminar. (1-3 cr [max 9 cr]; A-F only. Prereq—COAFES honors)
Junior/senior course.

CFAN 3500. International Field Studies Seminar. (3 cr; A-F only. Prereq—#)
Interface of agriculture with various natural resource, environmental, economic, food safety, public policy, ethical issues transcending national borders. Seminars take place in other countries or regions of world, providing global perspective. Active learning, lectures, discussion tutorials, field trips, reports, exams.

CFAN 3900. Topics in International Agriculture. (2-4 cr [max 25 cr]; A-F only. Prereq—#)
International, on-site, classroom, and field-study of agricultural systems. Sites vary. Can include language study.

CFAN 4009W. Undergraduate Senior Thesis: Science in Agriculture. (1-6 cr [max 12 cr]; A-F only. Prereq—jr or sr major in ScAg, #)
Research and thesis experience conducted under supervision of a COAFES faculty member. Recommended course length is one full year. A written bound thesis and oral presentation of research results is required.

CFAN 4201. Strategic Career Planning. (1 cr. Prereq—Jr or sr or grad student)
Self exploration, networking, industry research, job/internship search, resumes, cover letters, interviewing, salary negotiation, goal setting.

CFAN 5000. Special topics for K-12 Educators: Agricultural, Food, and Environmental Sciences and Technologies. (1-3 cr [max 6 cr]. Prereq—#)
Students engage in instruction and applications that lead to new understandings, techniques, and materials for teaching about the science, technology and utilization of plants, animals, foods, natural resources, and the environment for the benefit of society and our ecosystems.

College of Liberal Arts (CLA)

CLA 1001. Introduction to CLA Student Life. (1 cr; S-N only)
Time management, study skills. Devising a four-year graduation plan. Portfolio planning. Major/career planning. Study abroad. Special learning opportunities. Wellness and finance. Academic/co-curricular resources.

CLA 1003. Introduction to Student-Athlete Life. (2 cr. Prereq—First-year student-athlete)
Time management, study skills. Devising a four-year graduation plan. Portfolio planning. Major/career planning. Study abroad. Special learning opportunities. Wellness/finance. Academic/co-curricular resources. Balancing both student and student-athlete.

CLA 1050. Faculty Mentor Freshman Seminar. (2 cr; A-F only. Prereq—Δ, Faculty Mentor Program)
Discussions led by faculty mentors on liberal education, nature of University life, major exploration, study skills appropriate to various disciplines.

CLA 1301. SEAM First Year Seminar. (2 cr; A-F only. Prereq—SEAM)
Exploration of issues related to students' academic/career interests. Multiculturalism, other skills. Small-group discussions.

CLA 1302. SEAM First-Year Colloquium. (2 cr; A-F only. Prereq—SEAM)
Introduction to resources that enhance academic/professional interests. Focus on multiculturalism. Small group discussions led by professional staff, guest speakers.

CLA 1901. Topics: Freshman Seminar. (1-4 cr [max 4 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CLA 1902. Topics: Freshman Seminar. (1-4 cr [max 4 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CLA 1903. Topics: Freshman Seminar. (1-4 cr [max 4 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CLA 1904. Topics: Freshman Seminar. (1-3 cr [max 3 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CLA 1905. Topics: Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)
Freshman seminar. Topics specified in *Class Schedule*.

CLA 1906W. Topics: Freshman Seminar. (1-4 cr [max 4 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CLA 1907W. Topics: Freshman Seminar. (1-4 cr [max 4 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CLA 1908W. Topics: Freshman Seminar. (1-4 cr [max 4 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CLA 1909W. Topics: Freshman Seminar. (1-4 cr [max 4 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CLA 1910W. Topics: Freshman Seminar. (1-4 cr [max 4 cr]; A-F only. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

CLA 3001. Success Strategies for Transfer Students. (1 cr; S-N only)
Effective learning/academic skills, academic/career goals, use of advanced technology in University learning. Academic/career options available at the University. Students develop comprehensive educational plan, identify their long-range educational goals, and learn how to evaluate/select courses to meet goals.

CLA 3500. Topics. (2-4 cr [max 8 cr])
Topics specified in *Class Schedule*.

CLA 5300. Topics by Visiting Winton Chair. (1-5 cr [max 10 cr])
Topics specified in *Course Guide*.

CLA 5500. Topics. (3-5 cr [max 10 cr])
Topics specified in Course Catalog.

Communication Studies (COMM)

Department of Communication Studies

College of Liberal Arts

COMM 1101. Introduction to Public Speaking. (3 cr. §COMM 1101H, PSTL 1461, RHET 1223)
Oral communication processes/elements. Criticism of and response to oral discourse. Individual speaking.

COMM 1101H. Honors: Introduction to Public Speaking. (3 cr. §COMM 1101, PSTL 1461, RHET 1223. Prereq—honors)
Oral communication processes/elements. Criticism of, response to oral discourse. Individual speaking.

COMM 1102. Introduction to Communication. (3 cr)
Verbal and nonverbal communication: public address, interpersonal, organizational, intercultural, and electronic. Ways in which new communication technologies influence and are influenced by existing forms of communication.

COMM 1102H. Honors: Introduction to Communication. (3 cr. Prereq—honors)
Verbal/nonverbal communication: public address, interpersonal, organizational, intercultural, electronic. Ways in which new communication technologies influence/are influenced by existing forms of communication.

COMM 1313V. Honors: Analysis of Argument. (3 cr. Prereq—honors)
Strategies for analyzing, evaluating, generating arguments. Problems in listening/responding to argument.

COMM 1313W. Analysis of Argument. (3 cr)
Strategies for analyzing, evaluating, generating arguments. Problems in listening/responding to argument.

COMM 1902. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Freshman seminar. Topics specified in *Class Schedule*.

COMM 1905. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Fr)
Topics specified in *Class Schedule*.

COMM 1907W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

COMM 1908W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

COMM 1909W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

COMM 3110. Topics in Speech-Communication. (3 cr [max 15 cr]. Prereq—[3211 or 3401 or 3601 [whichever is relevant to topic])
Cases illustrating speech-communication theory, underlying issues.

COMM 3131. Leadership Theory and Practice. (3 cr; S-N only. Prereq—Student hired for leadership position in New Student Programs, #)
Preparation for New Student Program leadership position. Attitudes/skills with leadership and student life issues. Building authentic community.

COMM 3190H. Honors Course: Research Seminar in Communication. (3 cr [max 6 cr]; A-F only. Prereq—Honors candidate in comm, #, Δ)
Students conduct original research in rhetoric, communication theory, or media for honors thesis. Theory, methods, research writing.

COMM 3201. Introduction to Electronic Media Production. (4 cr; A-F only)
Production/criticism of messages for electronic media. Theory/practice in planning, scripting, production, and criticism in various electronic media. Student productions in lab.

COMM 3204. Advanced Electronic Media Production. (4 cr; A-F only. Prereq—3201 or #)
Video as communicative medium integrating visual/aural aesthetics. Creation of broadcast-quality production integrating message creation, audience analysis, argument development, and visual/audio scripting. Utilization of media aesthetics to develop/shape production content.

COMM 3211. Introduction to U.S. Electronic Media. (3 cr)
Historical development and current issues in electronic media technologies and programming. Effects of governmental, industrial, and public organizations on message content. Problem areas of electronic media.

COMM 3401. Introduction to Communication Theory. (3 cr. Prereq—1101)
Social scientific theory in communication. Communication history; logic of scientific theories and communication types of theories in interpersonal, small group, organizational, intercultural, and electronically mediated communication.

COMM 3402. Introduction to Interpersonal Communication. (3 cr)
Nature and function of communication between individuals in formal and informal relationships. Communicative interactions from theoretical and practical viewpoints.

COMM 3404. Language Borderlands. (3 cr)
Effect of multilingualism on self identity and sense of community. Subjective and social dimensions of being multilingual. Experience of language loss.

COMM 3405. Language and Gender. (3 cr. \$WOST 3305. Prereq—One women's studies course)
Gender/communication. Interdisciplinary theory. Role of communication in creating, maintaining, reinforcing, and changing gender relations in society.

COMM 3406. Language and Sexual Diversity. (3 cr)
Language use in lesbian, gay, bi-sexual, and transgender communities. Ways in which sexual diversity affects language use.

COMM 3409. Nonverbal Communication. (3 cr)
Nonverbal communication in interpersonal communication process. Nonverbal codes (touch, space, smell, eye contact) and their communicative functions (impression management, flirting, persuading, lying) in relational contexts (intimate relationships, friendships, work relationship). Theories, practices.

COMM 3411. Introduction to Small Group Communication. (3 cr)
Cooperative thinking in task-oriented groups. Planning, preparing for, and participating in small groups in private and public contexts.

COMM 3422. Interviewing and Communication. (3 cr; A-F only. Prereq—1101 or #)
Application of communication concepts in information interview process. Practical experience in planning, conducting, and evaluating informational, journalistic/elite, helping, persuasive, appraisal, and employment interviews. Class training and field experience.

COMM 3431. Persuasion Theories. (3 cr. Prereq—Soph recommended)
Sociological, psychological, and communication perspectives. Theoretical knowledge applied to persuasion problems.

COMM 3441. Introduction to Organizational Communication. (3 cr. Prereq—1101 or equiv)
Functions of communication in work groups, in organizational hierarchies, and between organizations.

COMM 3451W. Intercultural Communication: Theory and Practice. (3 cr. Prereq—Planning an intercultural experience)
Theories of and factors influencing intercultural communication. Development of effective intercultural communication skills.

COMM 3452W. Communication and the Intercultural Reentry. (3 cr. Prereq—Return from an intercultural experience)
Intercultural experience explored through stories and story telling, participant observation, and social scientific theory. Constructs include identity, learning styles, cultural adaptation, values, ethics.

COMM 3601. Introduction to Rhetorical Theory. (3 cr. Prereq—1101)
Theoretical systems intended to explain or direct the creation of public discourse. Traditional rhetoric to contemporary perspectives. Using theory to explain the practice of public discourse.

COMM 3605W. Persuasive Speaking and Speech Writing. (3 cr. Prereq—Soph)
Performance and composition with critical inquiry into rhetoric theories. Develops writing, thinking, and speaking skills.

COMM 3615. Argumentation. (3 cr. Prereq—Soph)
Argument(s) in relation to logic, dialectics, and rhetorical performance. Structured reasoning, informal conversation, familial arguments, debates in technical professions, communication ethics, and public/social argumentation.

COMM 3625. Communication Ethics. (3 cr; A-F only. Prereq—1101)
Applying concepts/theories from philosophy and social science to ethical issues in interpersonal, group, organizational, intercultural, and media communication.

COMM 3631. Freedom of Speech. (3 cr)
Communication theories and principles that underlie the concept of freedom of speech in the United States. A variety of contexts and practices are examined in order to understand how communicative interaction should be described and, when necessary, appropriately regulated.

COMM 3970. Directed Study. (1-3 cr [max 6 cr]. Prereq—One COMM course, #, Δ, □)
Guided individual reading or study.

COMM 3980. Directed Instruction. (3 cr [max 6 cr]; S-N only. Prereq—#, Δ)
Supervised planning/teaching of undergraduate courses.

COMM 3990. Research Practicum. (1-3 cr [max 6 cr])
How communication research is designed, implemented, and published. Focus is on working with senior faculty on their current research projects.

COMM 3995W. Major Project. (1-2 cr [max 2 cr]; S-N only. Prereq—COMM major, #)
Individualized instruction leading to completion of senior project.

COMM 4231. Comparing Electronic Media Systems. (3 cr. Prereq—3211 or #)
Historical, political, and sociological aspects of electronic media systems throughout the world, including United States, Canada, Great Britain, France, Germany, and Russia. Regulation and impact on political, social, and economic development.

COMM 4235. Electronic Media and Ethnic Minorities—A World View. (3 cr)
Representation and involvement of various ethnic groups (e.g., African-Americans, Native Americans in United States and Canada, Maori, Turks in Europe) in radio, TV, cable, Internet. Roles of government, industry, public organizations, and minority groups in regulating, managing, and financing ethnic media activities.

COMM 4291. New Telecommunication Media. (3 cr; A-F only. Prereq—3211 or #)
Development and current status of new telecommunication media such as cable TV, satellites, DBS, MDS, and video disk/cassettes. Technology, historical development, regulation, and programming of these media and their influence on individuals, organizations, and society.

COMM 4407. Communication and Conflict. (3 cr; A-F only. Prereq—3401 or #)
Aspects of conflict common across types of relationships. Theories as alternative lenses to illuminate aspects of conflict. Communication strategies to manage or resolve conflict.

COMM 4452W. Intercultural Interaction: Theory and Application. (3 cr)
Small group interaction across cultures for both international and U.S. students. Discussion, simulations, readings.

COMM 4471. Communication in Marriage and Family. (3 cr. Prereq—3401 or 3402 or #)
Contemporary theories of marriage/family communication using life-cycle approach. Role/function of communication in changing relational contexts. Ways of improving marriage/family relationships.

COMM 4602W. Contemporary Political Persuasion. (3 cr. Prereq—1101, 3431 or #)
Contemporary political speech. Ideologies in political persuasion.

COMM 4616. African American Civil Rights Rhetoric. (3 cr. Prereq—Jr)
Uses the struggle of African Americans to explore and analyze philosophical concepts, political issues, moral complexities, and discursive characteristics of civil rights rhetoric.

COMM 4621W. Rhetoric of Feminism. (3 cr. Prereq—4615 or #)
History and criticism of the rhetoric of feminism from 19th century to the present.

COMM 5110. Special Topics in Communication Theory. (3 cr [max 6 cr])
Advanced theoretical problems. See department office for current offering.

COMM 5210. Contemporary Problems in U.S. Electronic Media. (3 cr. Prereq—3211)
Problems affecting U.S. commercial and educational electronic media. Audiences; race/gender issues; regulation.

COMM 5220. Television Genres. (3 cr)
Nature, historical development, and influence on society of specific genres of television programming: drama, situation comedy, mystery, soap opera. Program genre change over time and how society, government regulation, and economics of production influence that historical process.

COMM 5233W. Electronic Media and National Development. (3 cr)
Use of electronic media to change social, political, economic, and cultural life. Use by developing nations to improve agricultural practices, hygienic standards, literacy, and awareness of civic responsibility.

COMM 5261. Political Economy of Media Culture. (3 cr. Prereq—3211 or #)
Organizational practices of media communicators. Media content as link between communicators and audiences. How viewers use/process media content.

COMM 5401. Advanced Theories of Communication. (3 cr. Prereq–3401 or grad)

Survey of major theoretical approaches to communication including, positivism, constructivism, and systems.

COMM 5402. Advanced Interpersonal Communication. (3 cr. Prereq–3401 or 3402)

Social scientific approaches to interpersonal communication. Theory, research findings.

COMM 5404. Language and Culture. (3 cr. Prereq–3401 or #)

How language/communication transmit cultural knowledge, attitudes, and beliefs. Connections among language, thought, and culture. Social/ethnic perspectives on study of language/communication.

COMM 5406. Communication and Gender. (3 cr. \$WOST 5300. Prereq–One women's studies course, #)

How gender affects verbal communication. Development of analytical skills through readings, exercises, research that raise awareness of the power of language and the influence of gender prescriptions. Comparisons across languages where possible.

COMM 5408. Social Cognition. (3 cr)

Role of cognitive processing in communication studies. Models include perception, attention, memory and their use in communication. Evaluation of social cognition theory and research.

COMM 5411. Small Group Communication Research. (3 cr; A-F only. Prereq–3411 or #)

Survey of small group communication research; theory and practice. Group decision-making and leadership.

COMM 5421. Quantitative Methods in Communication Research. (3 cr; A-F only. Prereq–3401 or #)

Social scientific methods used in studying human communication. Optional data processing laboratory for additional credit.

COMM 5431. The Process of Persuasion. (3 cr. Prereq–3431)

Communication campaigns (e.g., advertising, political) illustrating persuasive processes and theories. Research paper required.

COMM 5441. Communication in Human Organizations. (3 cr. Prereq–9 cr social science, 3441 or #)

Communication in organizational settings. Organizational structure and dynamics and their effect upon the communication process. Individual projects.

COMM 5451W. Intercultural Communication Processes. (3 cr)

Theory and research on cultural differences in values, norms, behaviors, and perceptions that affect communication across cultures internationally and domestically.

COMM 5461. Conversation Analysis. (3 cr. \$LING 5461. Prereq–LING 3001 or LING 5001)

Discourse processes in dyadic and multiparty conversation. Application of concepts through analysis of conversations.

COMM 5462. Field Research in Spoken Language. (3 cr. \$LING 5462. Prereq–5461, LING 3001 or LING 5001)

Transcribing and analyzing verbal communication and movement related to it. Applying concepts to recorded conversations.

COMM 5611. Survey of Rhetorical Theory. (3 cr. Prereq–1101)

Survey of rhetorical theory from ancient to contemporary period; application of theory to public discourse.

COMM 5615W. Introduction to Rhetorical Criticism. (3 cr. Prereq–1101; 3601 recommended)

Analysis of public discourse using various theoretical perspectives.

COMM 5617. History and Criticism of U.S. Public Discourse: 1630-1865. (3 cr. Prereq–Jr)

How discourse has been used to establish or maintain power. Speeches and public debates used to examine American public address from 17th century (e.g., Puritan sermons) to the Civil War.

COMM 5618. History and Criticism of U.S. Public Discourse: 1865-1950. (3 cr. Prereq–Jr)

How discourse has been used to establish or maintain power. Speeches and public debates used to examine U.S. public address from the mid 19th century to 1950.

COMM 5970. Directed Study. (1-3 cr [max 6 cr]; S-N only. Prereq–Nine 3xxx-5xxx Spch cr, #, Δ, o)

Guided individual reading or study.

COMM 5994. Communication Research Practicum. (1-3 cr [max 9 cr]; S-N only. Prereq–#)

Students participate in research group.

Comparative Literature (CL)

Department of Cultural Studies and Comparative Literature

College of Liberal Arts

CL 5331. Discourse of the Novel. (3 cr. \$CSCL 5331)

Comparative study of the novel (eighteenth century to present): its relation to ordinary language practices, emergent reading publics, technologies of cultural dissemination, problems of subjectivity; its role in articulating international cultural relations.

CL 5555. Introduction to Semiotics. (3 cr. \$CSCL 5555)

Problems of the nature of the sign; sign function; sign production; signifying systems as articulated in philosophy, linguistics, anthropology, psychoanalysis, and art theory. Applying semiotics to various signifying practices (e.g., literature, cinema, daily life).

CL 5751. Basic Concepts of Cinema. (4 cr. \$CSCL 5751, CSDS 5751)

Cinema as object of theoretical/historical analysis. Emphasizes concepts that have transformed scope/aim of film analysis since 1960s. Readings of filmic/theoretical texts.

CL 5910. Topics in Comparative Literature. (3 cr [max 24 cr])

Topics specified in *Class Schedule*.

CL 5992. Directed Reading in Comparative Literature. (1-3 cr [max 9 cr]. Prereq–#)

Guided individual reading and study.

Comparative Studies in Discourse and Society (CSDS)

Department of Cultural Studies and Comparative Literature

College of Liberal Arts

CSDS 5301. Society, Ideology, and the Production of Art. (3 cr. \$CSCL 5301)

Recent critical theories of relation of arts to social/ideological forces. Selected artifices from Western culture (e.g., Renaissance to 20th century; high, popular, mass culture). Music, visual art, literature.

CSDS 5302. Aesthetics and the Valuation of Art. (3 cr. \$CSCL 5302)

Society, ideology, aesthetic value in light of recent critical theories of visual art, music, literature. Mediations of place, social class, gender, ideology on aesthetic judgment in post-renaissance Western culture.

CSDS 5555. Introduction to Semiotics. (3 cr)

Problems of the sign. Sign function/production. Signifying systems as articulated in philosophy, linguistics, anthropology, psychoanalysis, and art theory. Applying semiotics to various signifying practices (e.g., literature, cinema, daily life).

CSDS 5751. Basic Concepts of Cinema. (4 cr. \$CL 5751, CSDL 5751)

Cinema as object of theoretical/historical analysis. Emphasizes concepts that have transformed scope/aim of film analysis since 1960s. Readings of filmic/theoretical texts.

CSDS 5910. Topics in Comparative Studies in Discourse and Society. (3 cr [max 24 cr])

Themes in comparative, sociohistorical analysis of discursive practices. Individually or team taught. Topics specified in *Class Schedule*.

CSDS 5993. Directed Study. (1-3 cr [max 9 cr]. Prereq–#)

Guided individual reading and study.

Computer Science (CSCI)

Department of Computer Science

Institute of Technology

CSCI 1001. Overview of Computer Science. (4 cr. Prereq–None)

Foundations/limits of today's computing/information technology. How to reason about applications and technological advances. Policy issues. Algorithms for automating solutions. Abstraction in design/problem solving. Concepts of computer databases, networks, expert systems human-computer interaction, Internet, Web, desktop software, and personal computers.

CSCI 1103. Introduction to Computer Programming in Java. (4 cr)

Programming and problem solving fundamentals. Significant portions of Java programming language. Students design/write Java programs relating to various subjects. Substantial programming projects, integral weekly lab.

CSCI 1107. Introduction to FORTRAN Programming for Scientists and Engineers. (3 cr. Prereq–MATH 1271 or MATH 1371 or #)

Algorithm development and principles of computer programming using FORTRAN. Emphasizes numerical methods for science and engineering applications.

CSCI 1109. C# Programming. (1-3 cr [max 3 cr])

Provides credit for transfer students who have taken a freshman or sophomore-level C# class.

CSCI 1113. Introduction to C/C++ Programming for Scientists and Engineers. (4 cr. Prereq–MATH 1271 or MATH 1371)

Programming for scientists/engineers. C/C++ programming constructs, object-oriented programming, software development, fundamental numerical techniques. Exercises/examples from various scientific fields.

CSCI 1121. Introduction to the Internet 1. (4 cr; A-F only)

Concepts of the internet, analog vs digital communication, networking, packet switching, software protocols. E-mail, search engines, file transfer (ftp), remote login (Telnet). Creating Web pages using HTML and Cascading Style Sheets. Advanced programming concepts such as Java, Perl, and CGI.

CSCI 1901. Structure of Computer Programming I. (4 cr. Prereq–MATH 1271 or equiv or #)

Principles of programming. Different programming paradigms (message-passing, data-driven, event-driven). Students develop algorithms/data types using language such as Scheme and techniques such as abstraction, procedures, recursion, iteration.

CSCI 1902. Structure of Computer Programming II. (4 cr. Prereq–1901 or #)

Object-oriented programming using language such as C++ or Java. Builds on 1901, presenting additional data structures/algorithms. Object-oriented approach to implement data structures/operations as abstract data types.

CSCI 2011. Discrete Structures of Computer Science. (4 cr. Prereq—MATH 1272 or MATH 1372 or #) Foundations of discrete mathematics. Sets, sequences, functions, big-O, propositional and predicate logic, proof methods, counting methods, recursion and recurrences, relations, trees/graph fundamentals.

CSCI 2021. Machine Architecture and Organization. (4 cr. Prereq—1902 or #) Introduction to hardware/software components of a computer system: data representation, boolean algebra, machine-level programs, instruction set architecture, processor organization, memory hierarchy, virtual memory, compiling, linking. Programming in C.

CSCI 2031. Introduction to Numerical Computing. (4 cr. §CSCI 5301. Prereq—Math 2243 or #) Introduction to numerical computing for CSci, mathematics, and science/engineering students. Uses Mathematica or Matlab to cover numerical error, root finding, systems of equations, interpolation, numerical differentiation and integration, least squares, and differential equations.

CSCI 2121. Introduction to the Internet 2. (4 cr; A-F only. Prereq—1121) Programming for the Internet using HTML, JavaScript, and Perl. CGI, database programming with Perl. Database concepts such as relational vs object oriented database technologies, querying data using SQL. Interfacing databases to the Web. E-commerce, emerging trends such as XML.

CSCI 2980. Special Topics in Computer Science. (1-4 cr; A-F only. Prereq—#) Special topics. Lectures, informal discussions.

CSCI 3003. Introduction to Computing in Biology. (3 cr. Prereq—1002H or BIOL 1002 or 1009H or BIOL 1009 or equiv or #) Emphasizes computing tasks common in biology. Programming techniques: variables, flow control, input/output, strings, pattern matching, arrays, hash tables, functions, subroutines. Concepts in computing: algorithms, complexity, documentation, regular expressions/grammars, local variables, encapsulation. Students complete lab projects in Perl language.

CSCI 3081W. Program Design and Development. (4 cr. §CSCI 4081W, CSCI 4089. Prereq—[1902, 2021] or #) Principles of programming design/analysis. Concepts in software development. Uses C/C++ language to illustrate key ideas in program design/development, data structures, debugging, files, I/O, state machines, testing, and coding standards.

CSCI 3921W. Social, Legal, and Ethical Issues in Computing. (3 cr. Prereq—At least soph or #) Impact of computers on society. Computer science perspective of ethical, legal, social, philosophical, political, and economic aspects of computing.

CSCI 3970. Industrial Student Co-op Assignment. (2 cr [max 4 cr]; S-N only. Prereq—CSci, in co-op program, #) Industrial work assignment in a co-op program involving advanced computer technology. Reviewed by a faculty member. Grade based on final written report.

CSCI 3980. Undergraduate Colloquium. (1 cr [max 2 cr]. Prereq—Upper div CSci; can be repeated for cr) Current computing trends and hot topics; industrial and career related topics; research topics; research projects and undergraduate research opportunities; graduate school options.

CSCI 4011. Formal Languages and Automata Theory. (4 cr. Prereq—1902 and 2011 or #; cannot be taken for grad CSCI cr) Logical and mathematical foundations of Computer Science. Theoretical models and their applications. Formal languages, models of computation, computability, undecidability, computational complexity. Emphasizes grammars, parsing, interpreters, and compilers.

CSCI 4041. Algorithms and Data Structures. (4 cr. Prereq—1902 and 2011 or #; cannot be taken for grad CSCI cr) Rigorous analysis of algorithms and their implementation. Algorithm analysis, sorting algorithms, binary trees, heaps, priority queues, heap sort, balanced binary search trees, AVL trees, hash tables and hashing, graphs, graph traversal, single source shortest path, minimum cost spanning trees.

CSCI 4061. Introduction to Operating Systems. (4 cr. Prereq—2021 or EE 2361; no cr for grads in CSci) Foundations of operating systems. History/evolution of operating systems, shells, tools, memory organization, file system overview, I/O, concurrent processes, interprocess communication.

CSCI 4107. Introduction to Computer Graphics Programming. (3 cr. §CSCI 5107. Prereq—4041 or #; cannot be taken for grad CSCI cr) Theory/practice of computer graphics programming using C/C++ and OpenGL. Practical concepts in computer graphics modeling, rendering, and animation. Emphasizes effective use of graphics toolkits.

CSCI 4131. Internet Programming. (3 cr. §CSCI 5131. Prereq—4061, 4211 recommended, cannot be taken for grad CSCI cr) Issues in internet programming. Internet history, architecture/protocols, network programming, Web architecture. Client-server architectures and protocols. Client-side programming, server-side programming, dynamic HTML, Java programming, object-oriented architecture/design, distributed object computing, Web applications.

CSCI 4203. Computer Architecture. (4 cr. §EE 4363, EE 5361. Prereq—2021 or #) Introduction to computer architecture. Aspects of computer systems, such as pipelining, memory hierarchy, and input/output systems. Performance metrics. Examines each component of a complicated computer system.

CSCI 4211. Introduction to Computer Networks. (3 cr. §CSCI 5211. Prereq—4061 or #; basic knowledge of [computer architecture, operating systems] recommended, cannot be taken for grad CSCI cr) Concepts, principles, protocols, and applications of computer networks. Layered network architectures, data link protocols, local area networks, routing, transport, network programming interfaces, networked applications. Examples from Ethernet, Token Ring, TCP/IP, HTTP, WWW.

CSCI 4707. Practice of Database Systems. (3 cr. §CSCI 5707, INET 4707. Prereq—4041 or #) Concepts, conceptual data models, case studies, common data manipulation languages, logical data models, database design, facilities for database security/integrity, applications.

CSCI 4921. History of Computing. (3 cr. §HSCI 4321) Developments in last 150 years; evolution of hardware and software; growth of computer and semiconductor industries and their relation to other businesses; changing relationships resulting from new data-gathering and analysis techniques; automation; social and ethical issues.

CSCI 4950. Senior Software Project. (3 cr [max 6 cr] Prereq—Upper div CSci, #) Student teams develop a software system, distribute system to users, and extend/maintain it in response to their needs. Software engineering techniques. Software development, team participation, leadership.

CSCI 4970W. Advanced Project Laboratory. (3 cr [max 9 cr]. Prereq—Upper div CSci, 4061, #; cannot be taken for grad cr) Formulate and solve open-ended project: design, implement, interface, document, test. Team work strongly encouraged. Arranged with CSci faculty.

CSCI 4980. Special Topics in Computer Science for Undergraduates. (1-3 cr [max 9 cr]; A-F only. Prereq—Undergrad, #; no cr for grads in [CSCI or CompE]) Lectures and informal discussions on current topics in computer science.

CSCI 5103. Operating Systems. (3 cr. Prereq—4061 or #) Conceptual foundation of operating system designs and implementations. Relationships between operating system structures and machine architectures. UNIX implementation mechanisms as examples.

CSCI 5104. System Modeling and Performance Evaluation. (3 cr. Prereq—5103 or #) Techniques for modeling computing systems for performance evaluation through analytical/simulation techniques. How to model computing systems and communications protocols to evaluate their performance under different operating conditions.

CSCI 5105. Foundations of Modern Operating Systems. (3 cr. Prereq—5103 or #) Advanced concepts that build foundations of modern operating systems. Advanced scheduling algorithms, distributed communication/synchronization, consistency/replication models, distributed file systems, security, protection/virtualization, OS architectures.

CSCI 5106. Programming Languages. (3 cr. Prereq—4011 or #) Design and implementation of high-level languages. Course has two parts: (1) language design principles, concepts, constructs; (2) language paradigms, applications. Note: course does not teach how to program in specific languages.

CSCI 5107. Fundamentals of Computer Graphics 1. (3 cr. §CSCI 4107. Prereq—[4041 or #], fluency in C/C++, mastery of basic concepts in linear algebra) Fundamental algorithms in computer graphics. Emphasizes programming projects in C/C++. Scan conversion, hidden surface removal, geometrical transformations, projection, illumination/shading, parametric cubic curves, texture mapping, antialiasing, ray tracing. Developing graphics software, graphics research.

CSCI 5108. Fundamentals of Computer Graphics II. (3 cr. Prereq—5107 or #) Advanced topics in image synthesis, modeling, and rendering. Image processing, image warping, global illumination, non-photorealistic rendering, texture synthesis. Parametric cubic surfaces, subdivision surfaces, acceleration techniques, advanced texture mapping. Programming is in C/C++.

CSCI 5109. Visualization. (3 cr. Prereq—1902, 4041 or equiv or #) Fundamental theory/practice in data visualization. Emphasizes programming applications. Volume visualization, vector field visualization, information visualization, multivariate visualization, visualization of large datasets, visualization in immersive virtual environments, and perceptual issues in effective data representation. Projects are implemented in C++ using VTK or similar visualization API.

CSCI 5115. User Interface Design, Implementation and Evaluation. (3 cr. Prereq—4041 or #) Theory, design, programming, and evaluation of interactive application interfaces. Human capabilities and limitations, interface design and engineering, prototyping and interface construction, interface evaluation, and topics such as data visualization and World Wide Web. Course is built around a group project.

CSCI 5116. GUI Toolkits and Their Implementation. (3 cr. Prereq—5115 or 5107 or #) Structure and design of user interface toolkits and frameworks. Aspects of GUI toolkits (e.g., window system protocols, event processing, geometry management, resource management, data management, constraints). Course is built around implementation assignments and case studies of toolkits.

CSCI 5131. Advanced Internet Programming. (3 cr. §CSCI 4131. Prereq—5106 or 5211 or #: [4081 or 5801], 5707 recommended)

Issues in internet programming: Java programming, concurrent programming, workflow, distributed databases, security, collaborative computing, object-oriented architecture/design, network publishing, messaging architecture, distributed object computing, internets.

CSCI 5143. Real-Time and Embedded Systems. (3 cr. Prereq—[4061 or #], experience with C language)
How to control robots and video game consoles. Lecture, informal lab.

CSCI 5161. Introduction to Compilers. (3 cr. Prereq—4011 or #)

Theories and mechanisms of programming language processing tools. General compiler organization: lexical scanner, syntax parser, symbol table, internal program representation, code generator. Relationship between design and implementation. Run-time memory management mechanism.

CSCI 5204. Advanced Computer Architecture. (3 cr. Prereq—4203 or EE 4363)

Instruction set architecture, processor microarchitecture, memory, I/O systems. Interactions between computer software and hardware. Methodologies of computer design.

CSCI 5211. Data Communications and Computer Networks. (3 cr. §CSCI 4211. Prereq—[4061 or #], basic knowledge of [computer architecture, operating systems, probability])

Fundamental concepts, principles, protocols, and applications of computer networks. Layered network architectures, data link protocols, local area networks, network layer/routing protocols, transport, congestion/flow control, emerging high-speed networks, network programming interfaces, networked applications. Case studies using Ethernet, Token Ring, FDDI, TCP/IP, ATM, Email, HTTP, and WWW.

CSCI 5221. Advanced Computer Networks. (3 cr. Prereq—4211 or 5211 or equiv; intro course in computer networks recommended)

design principles and protocol mechanisms, network algorithmics and implementation techniques, advanced network architectures, state-of-art and emerging networking technologies and applications, network modeling, simulation and experiments.

CSCI 5271. Introduction to Computer Security. (3 cr. Prereq—4061 or equiv or #)

Concepts of computer, network, and information security. Risk analysis, authentication, access control, security evaluation, audit trails, cryptography, network/database/application security, viruses, firewalls.

CSCI 5283. Computer-Aided Design I. (3 cr. Prereq—2021 or #)

CAD for digital systems. Emphasizes VLSI. Hardware description languages, synthesis, simulation, test generation.

CSCI 5302. Analysis of Numerical Algorithms. (3 cr. Prereq—2031 or #)

Additional topics in numerical analysis: interpolation, approximation, extrapolation, numerical integration/differentiation, numerical solutions of ordinary differential equations.

CSCI 5304. Computational Aspects of Matrix Theory. (3 cr. Prereq—5302 or #)

Perturbation theory for linear systems and eigenvalue problems. Direct and iterative solution of large linear systems. Decomposition methods. Computation of eigenvalues and eigenvectors. Singular value decomposition. LAPACK and other software packages. Methods for sparse and large structured matrices.

CSCI 5403. Computational Complexity. (3 cr. Prereq—4041 or #)

Computational models, complexity measures in each model, and related complexity classes.

CSCI 5421. Advanced Algorithms and Data Structures. (3 cr. Prereq—4041 or #)

Fundamental paradigms of algorithm and data structure design. Divide-and-conquer, dynamic programming, greedy method, graph algorithms, amortization, priority queues and variants, search structures, disjoint-set structures. Theoretical underpinnings. Examples from various problem domains.

CSCI 5451. Introduction to Parallel Computing: Architectures, Algorithms and Programming. (3 cr. Prereq—4041 or #)

Parallel architectures design, embeddings, routing, examples of parallel computers, fundamental communication operations, performance metrics, parallel algorithms for sorting, matrix problems, graph problems, dynamic load balancing, types of parallelisms, parallel programming paradigms, message passing programming in MPI, data parallel programming in HPF, shared-address space programming in threads.

CSCI 5471. Modern Cryptography. (3 cr. Prereq—[2011, 4041, [familiarity with number theory or finite fields]] or #)

Introduction to cryptography. Theoretical foundations, practical applications. Threats, attacks, and countermeasures, including cryptosystems and cryptographic protocols. Secure systems/networks. History of cryptography, encryption (conventional, public key), digital signatures, hash functions, message authentication codes, identification, authentication, applications.

CSCI 5481. Computational Techniques for Genomics. (3 cr. Prereq—4041 or #)

Techniques to analyze biological data generated by genome sequencing, proteomics, cell-wide measurements of gene expression changes. Algorithms for single/multiple sequence alignments/assembly. Search algorithms for sequence databases, phylogenetic tree construction algorithms. Algorithms for gene/promoter and protein structure prediction. Data mining for micro array expression analysis. Reverse engineering of regulatory networks.

CSCI 5511. Artificial Intelligence I. (3 cr. Prereq—2011 or #)
Introduction to AI. Problem solving, search, inference techniques. Logic and theorem proving. Knowledge representation, rules, frames, semantic networks. Planning and scheduling. Lisp programming language.

CSCI 5512W. Artificial Intelligence II. (3 cr. §CSCI 5519. Prereq—5511 or #)

Advanced topics in AI for solving complex problems. Machine learning (symbolic/neural networks approaches), genetic algorithms, reasoning with uncertainty, utility theory and decision theoretic methods, natural language processing, perception robotics, introduction to Prolog programming language.

CSCI 5519. Artificial Intelligence II (non-WI). (3 cr. §CSCI 5512W. Prereq—prereq 5511 or #)

Advanced topics in AI for solving complex problems. Machine learning (symbolic and neural networks approaches), genetic algorithms, reasoning with uncertainty, utility theory and decision theoretic methods, natural language processing, perception robotics, introduction to Prolog programming language.

CSCI 5521. Pattern Recognition. (3 cr. Prereq—[2031, STAT 3021] or #)

Problems of pattern recognition, feature selection, measurement techniques. Classification methods: statistical decision theory, nonstatistical techniques. Automatic feature selection and data clustering. Syntactic pattern recognition. Mathematical pattern recognition and artificial intelligence. Applications in information retrieval and WWW data mining.

CSCI 5523. Introduction to Data Mining. (3 cr. Prereq—4041 or equiv or #)

Data pre-processing techniques, data types, similarity measures, data visualization/exploration. Predictive models (e.g., decision trees, SVM, Bayes, K-nearest neighbors, bagging, boosting). Model evaluation techniques, Clustering (hierarchical, partitional, density-based), association analysis, anomaly detection. Case studies from areas such as earth science, the Web, network intrusion, and genomics. Hands-on projects.

CSCI 5525. Machine Learning. (3 cr. Prereq—Grad student or #)

Models of learning. Supervised algorithms such as perceptrons, logistic regression, and large margin methods (SVMs, boosting). Hypothesis evaluation. Learning theory. Online algorithms such as winnow and weighted majority. Unsupervised algorithms, dimensionality reduction, spectral methods. Graphical models.

CSCI 5541. Natural Language Processing. (3 cr. Prereq—5511 or #)

Elements of linguistic analysis for speech and unstructured text. Phonology, syntactic parsing, semantic interpretation, information extraction. Techniques for modeling uncertainty in linguistic analysis: probabilistic models, Hidden Markov Models (HMMs), Dynamic Bayes Nets (DBNs), Probabilistic Context-Free Grammars (PCFGs), Discounting and backoff smoothing, Maximum entropy modeling. Elements of information theory: entropy, perplexity, metrics for comparing models.

CSCI 5551. Introduction to Intelligent Robotic Systems. (3 cr. Prereq—5511 or #)

Transformations, kinematics/inverse kinematics, dynamics, control. Sensing (robot vision, force control, tactile sensing), applications of sensor-based robot control, robot programming, mobile robotics, and microrobotics.

CSCI 5552. Sensing and Estimation in Robotics. (3 cr. Prereq—[5551, STAT 3021] or #)

Bayesian estimation, maximum likelihood estimation, Kalman filtering, particle filtering. Sensor modeling and fusion. Mobile robot motion estimation (odometry, inertial, laser scan matching, vision-based) and path planning. Map representations, landmark-based localization, Markov localization, simultaneous localization/mapping (SLAM), multi-robot localization/mapping.

CSCI 5561. Computer Vision. (3 cr. Prereq—5511 or #)

Issues in perspective transformations, edge detection, image filtering, image segmentation, and feature tracking. Complex problems in shape recovery, stereo, active vision, autonomous navigation, shadows, and physics-based vision. Applications.

CSCI 5707. Principles of Database Systems. (3 cr. §CSCI 4707, INET 4707. Prereq—4041 or #)

Concepts, database architecture, alternative conceptual data models, foundations of data manipulation/analysis, logical data models, database designs, models of database security/integrity, current trends.

CSCI 5708. Architecture and Implementation of Database Management Systems. (3 cr. Prereq—4707 or 5707 or #)

Techniques in commercial/research-oriented database systems. Catalogs. Physical storage techniques. Query processing/optimization. Transaction management. Mechanisms for concurrency control, disaster recovery, distribution, security, integrity, extended data types, triggers, and rules.

CSCI 5801. Software Engineering I. (3 cr. Prereq—[1902, 2011] or #)

Advanced introduction to software engineering. Software life cycle, development models, software requirements analysis, software design, coding, maintenance.

CSCI 5802. Software Engineering II. (3 cr. Prereq–5801 or #)
Introduction to software testing, software maturity models, cost specification models, bug estimation, software reliability models, software complexity, quality control, and experience report. Student groups specify, design, implement, and test partial software systems. Application of general software development methods and principles from 5801.

CSCI 5980. Special Topics in Computer Science. (1-3 cr [max 9 cr]. Prereq–#; may be repeated for cr)
Lectures and informal discussions on current topics in computer science.

CSCI 5991. Independent Study. (1-3 cr [max 9 cr]. Prereq–#; may be repeated for cr)
Independent study arranged with CS faculty member.

CSCI 5994. Directed Research. (1-3 cr [max 9 cr]. Prereq–#; may be repeated for cr)
Directed research arranged with faculty member.

CSCI 5996. Curricular Practical Training. (1 cr [max 3 cr]; S-N only. Prereq–[CSCI or CompE] major, #)
Industrial work assignment involving advanced computer technology. Reviewed by faculty member. Grade based on final report covering work assignment.

Construction Management (CMGT)

College of Continuing Education

CMGT 2019. AutoCAD for Construction Managers. (2 cr; S-N only. Prereq–30 sem cr)
AutoCAD software skills. Techniques of computer-aided design and drafting (CAD) at job entry level. Lecture, lab.

CMGT 3001. Introduction to Construction. (3 cr)
Introduction to construction/processes that shape our environment. Construction types and their differences. Key participants and their vocabulary. Delivery systems. Construction specialists and their roles. Construction plan reading. Construction management. Lectures, field trips.

CMGT 3011. Construction Plan Reading. (2 cr)
Intro to construction plan reading and construction documents (using architectural, civil, mechanical, electrical drawings and project manual). Read, understand, and interpret commercial construction plans and project manuals, including notes, symbols, and plan layout.

CMGT 4011. Construction Documents and Contracts. (3 cr. Prereq–3001, 45 sem cr)
Definition, interpretation, and utilization of drawings. Specifications, agreements, bidding forms, general conditions. Bonds, contracts, subcontracts, and related documents. Appropriate provisions for minority business participation, such as tax exempt status and wage rates.

CMGT 4012. Risk Management, Bonds, and Insurance. (2 cr. Prereq–3001, 45 sem cr)
Identification/evaluation of property, liability, and financial risks of a construction project. Tools of risk control/financing. Review of insurance coverage, contract bonds, and underwriting factors.

CMGT 4013. Legal and Ethical Issues in Construction. (3 cr. Prereq–4011 or equiv or #)
Role of construction management professional in society. Principles of conduct for construction management professional, goals in professional performance/behavior, reviews of mandatory requirements.

CMGT 4016. Construction Software. (2 cr; A-F only)
Current/future uses of technology by owners, general contractors, subcontractors, and facilities management personnel. Networking, databases, wireless communication, software selection, Web-based project management, online plan rooms. Hands-on, workshop environment.

CMGT 4018. E-Business in Construction. (2 cr; A-F only)
Selection/implementation of Web-based project management tools. Software such as Bidcom, E-builder, Bricsnet, Constructware, Frametech. Hands-on work with live building sites. Digital technologies in construction industry. Wire/wireless communication, online plan/bid rooms, mobile computing, video conferencing.

CMGT 4021. Construction Planning and Scheduling. (3 cr. Prereq–3001, [3011 or CE 4101], 45 sem cr)
Project planning, scheduling, and control. Considering/understanding alternatives. Industry techniques. Introduction to critical path method. Using commercial software on personal computers. Updating/analyzing project schedules.

CMGT 4022. Construction Estimating. (3 cr. Prereq–3001, [3011 or CE 4101], 45 sem cr)
Purposes/uses of various estimates. Performing quantity take-off, organizing bidding process. Requesting/analyzing subcontractor proposals. Unit pricing. Using published resources. Preparing systems-based estimates. Related software, spreadsheets, custom applications. Linkages among estimates, budgets, cost control systems, and cost records.

CMGT 4023. Value Engineering. (2 cr)
Step by step approach. Defining building system/materials functions. Allocating cost to functions. Defining alternative methods to perform functions. Evaluating methods for best value. Five phases of function analysis (value engineering): information, creative, evaluation, planning, implementation.

CMGT 4024. Estimating and Value Engineering. (4 cr; A-F only. Prereq–CMSV 2860 [available at NHCC])
Purposes/uses of various kinds of estimates. Performing quantity take-off. Organizing bidding. Requesting/analyzing subcontractor proposals. Unit pricing. Using published resources. Preparing systems-based estimates. Personal computer programs, spreadsheets, custom applications. Defining building system, materials function. Allocating cost. Defining alternative methods for performing. Evaluating to yield best value.

CMGT 4025. Computer-Based Construction Planning and Scheduling. (2 cr; A-F only. Prereq–[4021, upper div] or #)
Project planning, scheduling, and control. Considering/understanding alternatives. Industry techniques such as critical path method. Updating/analyzing project schedules.

CMGT 4026. Computer-Based Construction Estimating. (2 cr; A-F only. Prereq–4022)
Various kinds of estimates via computer. Techniques for performing quantity take-off, organizing bidding process, requesting/analyzing subcontractor proposals, unit pricing, utilizing published resources, and preparing systems-based estimates. Personal computer programs, spreadsheets, custom applications. Linkages between estimates, budgets, cost control systems, and historical cost records.

CMGT 4027. Computer-Based Project Management. (2 cr. Prereq–CE 4101 or equiv or #)
Practical application of construction project management using computer software. Students manage one or two real projects through all phases of construction. Planning, scheduling, budgeting, estimating, staffing projections, cost control, communication tools.

CMGT 4031. Construction Safety and Loss Control. (3 cr. Prereq–3001, 45 sem cr)
Introduction to construction safety, health, and loss control. Hazard recognition. Control procedures. Management systems for measuring/evaluating loss-control performances in construction industry.

CMGT 4041. Specifications and Technical Writing for Construction Professionals. (3 cr. Prereq–4011 or #4011)
Develop/enhance appropriate oral/written communication necessary for use in the construction process from planning phase through contract closeout. Develop construction-specific practical applications to facilitate the process and avoid common pitfalls.

CMGT 4051. Construction Materials for Managers. (3 cr. Prereq–3001, [AEM 2011 or BP 3001 or BP 3101], 45 sem cr)
Concepts of physical properties. Behavior mechanisms for construction materials such as concrete, aggregate, steel, and wood. Standard specifications for material properties. Lab techniques for evaluation of each material.

CMGT 4111. Construction Productivity Management. (2 cr. Prereq–4021, 4022, CE 4101)
How to manage/supervise a project to maximize effectiveness/efficiency. Applying theoretical concepts of improving productivity in people, materials, equipment, and processes via on-going case study. Leadership/communication as applied to construction industry.

CMGT 4193. Directed Study. (1-4 cr [max 16 cr]. Prereq–CMGT major or minor or certificate student)
Topic arranged with BAS construction management academic adviser.

CMGT 4196. Construction Management Internship. (1-4 cr [max 12 cr] Prereq–[CMGT major or minor or certificate student], [jr or sr], Δ)
Hands-on work experiences in a construction company, applying coursework in the work place, contributing knowledge of best practices, and participating in career development exercises.

CMGT 4201. Construction Accounting. (3 cr. Prereq–3001, ACCT 2050, ABUS 4101)
Unique characteristics and dissimilarities crucial for all parties involved to understand/manage the construction process. Unique aspects of construction financial accounting, managerial accounting, tax planning, and auditing.

CMGT 4550. Topics in Construction Management. (3 cr [max 9 cr]; A-F only)
Topics in construction management.

CMGT 4572. Structural Frames and Building Design/Construction. (3 cr; A-F only. Prereq–3001, [AEM 2011 or BP 3001 or BP 3101])
Basic contemporary structural systems in masonry, steel, and wood framing systems. Forms/performance of systems.

CMGT 4901. Communication and the Construction Process. (2 cr. Prereq–45 sem cr)
Traces construction project from client's idea to completion. Interaction skills that construction managers need to deliver a building project through the hoops, hurdles, and pitfalls of its lifecycle. Managerial written/oral communication skills/techniques. Guest speakers, student debates in mock situations.

Coptic (COPT)

Department of Classical and Near Eastern Studies

College of Liberal Arts

COPT 5001. Elementary Coptic. (3 cr)
Introduction to Coptic grammar and vocabulary, chiefly in the Sahidic dialect.

COPT 5002. Elementary Coptic. (3 cr. Prereq–5001 or equiv)
Reading a variety of Coptic literature, such as Gnostic, martyrological, or monastic texts.

This is COPT to FR of the Course Description section of the
2006-2008 Undergraduate Catalog for the
University of Minnesota, Twin Cities campus.

Course Descriptions

Contents		
Academic Health Center Shared (AHS)	358	English: Composition (ENGC)..... 436
Accounting (ACCT)	358	English: Creative Writing (ENGW)..... 437
Adult Education (ADED)	358	English: Literature (ENGL)..... 437
Aerospace Engineering and Mechanics (AEM)	359	Entomology (ENT)..... 441
Aerospace Studies (AIR)	360	Environmental Sciences, Policy, and Management (ESPM)..... 442
Afro-American Studies (AFRO)	361	Family Social Science (FSOS)..... 444
Agricultural Industries and Marketing (AIM)	363	Finance (FINA)..... 446
Agricultural, Food, and Environmental Education (AFEE)	363	Finnish (FIN)..... 446
Agronomy and Plant Genetics (AGRO)	364	Fisheries and Wildlife (FW)..... 446
Akkadian (AKKA)	365	Food Science and Nutrition (FSCN)..... 447
American Indian Studies (AMIN)	365	Forest Resources (FR)..... 449
American Sign Language (ASL)	367	French (FREN)..... 450
American Studies (AMST)	367	French and Italian (FRIT)..... 452
Anatomy (ANAT)	368	Gay, Lesbian, Bisexual, and Transgender Studies (GLBT)..... 452
Animal Science (ANSC)	368	Genetics, Cell Biology and Development (GCD)..... 453
Anthropology (ANTH)	369	Geographic Information Science (GIS)..... 453
Applied Business (ABUS)	372	Geography (GEOG)..... 453
Applied Economics (APEC)	373	Geological Engineering (GEOE)..... 456
Arabic (ARAB)	374	Geology and Geophysics (GEO)..... 457
Aramaic (ARM)	375	German (GER)..... 459
Architecture (ARCH)	375	German, Scandinavian, and Dutch (GSD)..... 460
Art (ARTS)	378	Gerontology (GERO)..... 460
Art History (ARTH)	381	Global Studies (GLOS)..... 460
Asian American Studies (AAS)	383	Greek (GRK)..... 463
Asian Languages and Literatures (ALL)	383	Health Informatics (HINF)..... 464
Astronomy (AST)	385	Health Systems Management (HSM)..... 464
Bio-based Products (BP)	385	Hebrew (HEBR)..... 464
Biochemistry (BioC)	387	Hindi (HNDI)..... 465
Bioinformatics (BINF)	388	History (HIST)..... 465
Biology (BIOL)	388	History of Medicine (HMED)..... 473
Biomedical Engineering (BMEN)	389	History of Science and Technology (HSCT)..... 474
Biosystems and Agricultural Engineering (BAE)	390	Hmong (HMNG)..... 475
Business Administration (BA)	391	Honors Seminar (HSEM)..... 475
Business and Industry Education (BIE)	391	Horticultural Science (HORT)..... 475
Business Law (BLAW)	392	Human Resource Development (HRD)..... 477
Center for Spirituality and Healing (CSPH)	392	Human Resources and Industrial Relations (HRIR)..... 477
Central Asian Studies (CAS)	394	Humanities (HUM)..... 478
Chemical Engineering (CHEN)	394	Icelandic (ICEL)..... 479
Chemistry (CHEM)	395	Industrial Engineering (IE)..... 479
Chicano Studies (CHIC)	397	Information and Decision Sciences (IDSC)..... 480
Child Psychology (CPSY)	398	Information Networking (INET)..... 480
Chinese (CHN)	399	Innovation Studies (IS)..... 481
Civil Engineering (CE)	400	Institute of Technology (IOFT)..... 481
Classical and Near Eastern Studies (CNES)	401	Insurance and Risk Management (INS)..... 481
Classical Civilization (CLCV)	403	Inter-College Program (ICP)..... 481
Classics (CLAS)	404	Interdepartmental Study (ID)..... 481
Clinical Laboratory Science (CLS)	404	Interdisciplinary Archaeological Studies (INAR)..... 482

Cultural Studies and Comparative Literature (CSCL)

Department of Cultural Studies and Comparative Literature

College of Liberal Arts

CSCL 1001. Introduction to Cultural Studies: Rhetoric, Power, Desire. (4 cr)

Ways of reading texts, artistic forms, everyday practices that define ongoing conflicts over meaning, value, truth. Examples from visual arts, music, film, literature, myth, ritual, built environment.

CSCL 1101. Literature. (4 cr)

Introduction to literature across time, national boundaries. Basic genres, including poetry, novel, drama, historical/philosophical writing. Key questions: What is literature? What forms does it take? Why does literature matter?

CSCL 1201. Introduction to Cinema and Media Culture. (4 cr. SSCMC 1201)

Critical analysis of media, particularly film. Emergence/prominence of the visual in contemporary culture. Formal film analysis/theory. Issues of production/reception.

CSCL 1301W. Reading Culture: Theory and Practice. (4 cr)

Culture and cultural conflict. Reading cultural theory/texts such as film, literature, music, fashion, commercial art, and built environment.

CSCL 1401W. Reading Literature: Theory and Practice. (4 cr)

How can we read/understand different ways that literature is meaningful? Emphasizes practice in reading a broad spectrum of world literature, literary theory.

CSCL 1501W. Reading History: Theory and Practice. (4 cr)

What is history? How can we understand its meanings/uses? Emphasizes practice in reading cultural texts from various historical perspectives.

CSCL 1903. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

CSCL 1904. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

CSCL 1905. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

CSCL 1907W. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

CSCL 1909W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Fr)

Topics specified in *Class Schedule*.

CSCL 1910W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

CSCL 1921. Introduction to Film Study. (4 cr. §ARTH 1921W)

Fundamentals of film analysis and an introduction to the major theories of the cinema, presented through detailed interpretations of representative films from the international history of the cinema.

CSCL 2910H. Topics in Cultural Studies and Comparative Literature. (3 cr [max 6 cr] Prereq—Honors)

Topics specified in *Class Schedule*.

CSCL 3000. Topics. (1-3 cr [max 2 cr])

Selected topics.

CSCL 3115. Cinema and Ideology. (4 cr)

The cinema as a social institution with emphasis on the complex relations it maintains with the ideological practices that define both the form and the content of its products. Specific films used to study how mass culture contributes to the process of shaping beliefs and identities of citizens.

CSCL 3172. Music as Discourse. (3 cr)

Close examination of widely varying musical forms and styles, “classical” and “popular,” in relation to human subjectivity and configurations of culture, ideology, and power.

CSCL 3173W. The Rhetoric of Everyday Life. (3 cr)

How discourse reproduces consciousness and persuades us to accept that consciousness and the power supporting it. Literary language, advertising, electronic media; film, visual and musical arts, built environment and performance. Techniques for analyzing language, material culture, and performance.

CSCL 3174. Poetry as Cultural Critique. (3 cr)

Examines the status of “poetry” in several cultures of the Americas bringing together techniques of close reading and broad cultural inquiry.

CSCL 3175. Comedy: Text and Theory. (3 cr)

Comedy as a discursive/political practice. Jokes, stand-up routines, plays, films, satire, and social ritual. Philosophical, literary, psychological, anthropological, feminist, and postmodern theory.

CSCL 3176. Oppositional Cinemas. (4 cr)

The ways diverse national cinemas engage the international hegemony of Hollywood cinema. The cinematic struggle against cultural imperialism and the role of race, class, and gender in the domain of international cultural politics.

CSCL 3177. On Television. (4 cr)

Key debates in the history, theory, and criticism of television. Focuses on critical/creative “readings” of television’s past/present forms. TV’s influence on film, music, and digital media.

CSCL 3179. Reading Literary Movements. (3 cr)

Literary movement that emerge when a group of writers puts forth a new definition of literature. Literary movements created by scholars after the fact. Focuses on one or two related movements (e.g., surrealism and dadaism).

CSCL 3181. EAST Asian Cinemas. (4 cr)

East Asian cinemas. Structure/content of films from China, Japan, Hong Kong, Taiwan, Korea, Thailand, Vietnam. Historical representation, aesthetic strategies, narrative content. Race, class, gender, revolution, colonialism.

CSCL 3321W. Theories of Culture. (3 cr)

Examination of three prevalent theoretical perspectives on culture — philosophical, anthropological, and aesthetic — as they converge in the work of writers who have contributed to our contemporary conception of cultural diversity.

CSCL 3331. Science and the Humanities. (3 cr)

The sciences and humanities battle over “truth” and “reality,” while technology recasts the world of knowledge and work. The question of texts-as-truth also facilitates the ongoing religious attacks on science in this millennial moment.

CSCL 3361. Visions of Nature: The Natural World and Political Thought. (4 cr. §EEB 3361)

Theories about organization of nature, human nature, and their significance for development of ethics, religion, political/economic philosophy, civics, and environmentalism in Western/other civilizations. Lecture/discussion, film assignments.

CSCL 3366W. Landscape, Nature, Society. (3 cr)

Importance of the concept of nature in Anglo-american culture in the period 160-1875. Focuses on role of property relations, travel and exploration, religion, and philosophy. Topics include “the Garden in the Wilderness,” English landscape gardens, American painters of the West, and the sublime.

CSCL 3412W. Psychoanalysis and Literature Part I: The Essential Freud. (3 cr)

Theoretical writings of Sigmund Freud; basic concepts of psychoanalytic criticism; dream and interpretation; genre of the case study; Freud’s ideas concerning the constitution of ethnicity, culture, identity, and gender; fantasy vs. reality; psychoanalysis of the author/character/culture.

CSCL 3413W. Psychoanalysis and Literature Part II: Post Freudian Criticism. (3 cr)

Impact of psychoanalytic discourses on literary studies and vice versa. Archetypal of Jung; structural of Lacan; post-structural of Derrida and Kristeva; feminist psychoanalysis of Mitchell; self/object of Kernberg and Kohut; the unconscious and society of Deleuze and Guattari.

CSCL 3421. Culture and the Production of Modern Identity I: 1600-1750. (3 cr)

History of cultural, perceptual and/or conceptual changes in Western societies, 1600 to 1750, concerning new and conflicting understandings of the human imagination, subjectivity, identity, and the body; addressed through philosophy, literature, visual arts, music, pedagogical and medical treatises, and manners.

CSCL 3422. Culture and the Production of Modern Identity II: 1750-1900. (3 cr)

History of cultural, perceptual and/or conceptual changes in Western societies, 1750 to 1900, concerning new and conflicting understandings of the human imagination, subjectivity, identity, and the body; addressed through philosophy, literature, visual arts, music, pedagogical and medical treatises, and manners.

CSCL 3456W. Sexuality and Culture. (3 cr)

Historical/critical study of forms of modern sexuality (heterosexuality, homosexuality, romance, erotic domination, lynching). How discourses constitute/regulate sexuality. Scientific/scholarly literature, religious documents, fiction, personal narratives, films, advertisements.

CSCL 3458W. The Body and the Politics of Representation. (3 cr)

Western representation of the human body, 1500 to present. Body’s appearance as a site and sight for production of social and cultural difference (race, ethnicity, class, gender). Visual arts, literature, music, medical treatises, courtesy literature, erotica.

CSCL 3461. Monsters, Robots, Cyborgs. (3 cr)

Historical/critical reading of figures (e.g., uncanny double, monstrous aberration, technological hybrid) in mythology, literature, and film, from classical epic to sci-fi, cyberpunk, and Web.

CSCL 3472. Gay Men and Homophobia in American Culture. (3 cr)

The historical experience of gay men, the social construction of same-sex desire in American society since 1700, studied in a broad context of cultural history and discourse, including literature and the arts, journalism, science and medicine, religion, and law.

CSCL 3557W. Close Reading. (3 cr)

History/theory of ‘close reading’ (i.e., the most intense encounter between reader and text) exemplified through critical texts. Students perform close readings of various texts.

CSCL 3621W. Colonial and Postcolonial Literatures and Theory: 1700 to the Present. (3 cr)

Readings in colonial/postcolonial literatures/theory from at least two world regions: Africa, the Americas, the Arab world, Asia, Europe, and the Pacific. Cultural/psychological dynamics and political economy of world under empire, decolonization, pre- vs. post-coloniality, globalization.

CSCL 3631. Jewish Writers and Rebels in German, Austrian, and American Culture. (3 cr. §GER 3631, JWST 3631. Prereq—No knowledge of German required; cr toward major or minor requires reading in German)

Literary/cultural modes of writing used by Jewish writers in Germany, Austria, and America to deal with problems of identity, anti-Semitism, and assimilation. Focus on 20th century. All readings (novels, poetry, stories) in English.

CSSL 3771. Basic Concepts of Literary Study. (3 cr)
Concepts used when carrying out work of reading/interpretation. How analysis works: aspects of distinction between text/text/context, other concepts. How to understand/justify literary interpretation. Course does not engage in the reading of literature.

CSSL 3910. Topics in Cultural Studies and Comparative Literature. (3 cr [max 24 cr])
Topics specified in *Class Schedule*.

CSSL 3910H. Topics in Cultural Studies and Comparative Literature: Honors. (3 cr [max 12 cr])
Topics specified in *Class Schedule*.

CSSL 3920. Topics in Cultural Studies and Comparative Literature. (2 cr [max 3 cr])
Topics specified in *Class Schedule*.

CSSL 3979. Issues in Cultural Pluralism. (3 cr)
Critical/comparative basis for study of racial, ethnic, and cultural communities, primarily in the U.S. Perspectives on identity, citizenship, democracy, and power.

CSSL 3993. Directed Study. (1-3 cr [max 3 cr]. Prereq-#, Δ, □)
Guided individual reading or study.

CSSL 4944H. Honors Thesis. (3 cr [max 33 cr]. Prereq-
Candidate for magna or summa honors in CSSL, consent of CSSL honors adviser/college approval)
Magna or summa honors thesis.

CSSL 4993. Directed Study. (1-3 cr [max 6 cr]; A-F only)
Guided individual study.

CSSL 5147. Teaching as Dialogue. (3 cr)
Teaching and the teacher are the subject. Entering into dialogue is the method. Issues with the politics of teaching, the means of entering into dialogue, questions of judgment, and the idea of self-teaching as the goal of teaching.

CSSL 5154W. Theoretical Constructions of Space. (3 cr)
Inquiry into theories of space drawn from various disciplines including anthropology, architecture, geography, history, landscape design, philosophy, planning, and sociology. Focus on sociopolitical interests that are served and sustained; emphasis on opportunities and implications for personal identity.

CSSL 5256W. Suburbia. (3 cr)
Suburbia from origins in 18th-century England to the present. Historical changes and present challenges, especially in America. Ideology, mythology, planning, development, geography, transportation, the family. Specific sites and designs; representations in film, television, popular literature, and music.

CSSL 5301. Society, Ideology, and the Production of Art. (3 cr. §CSDS 5301)
Recent critical theories on the relation of the arts to social and ideological forces; selected artifices from Western culture (Renaissance to 20th century; high, popular, and mass culture). Music, visual art, literature.

CSSL 5302. Aesthetics and the Valuation of Art. (3 cr. §CSDS 5302)
Society, ideology, and aesthetic value considered in light of recent critical theories of visual art, music, and literature. Meditations of place, social class, gender and ideology on aesthetic judgment in post-Renaissance Western culture.

CSSL 5331. Discourse of the Novel. (3 cr. §CL 5331)
Comparative study of the novel, 18th century to present. Its relations to ordinary language practices, emergent reading publics, technologies of cultural dissemination, problems of subjectivity, and its role in articulating international cultural relations.

CSSL 5555. Introduction to Semiotics. (3 cr. §CL 5555)
Problems of the nature of the sign; sign function; sign production; signifying systems as articulated in philosophy, linguistics, anthropology, psychoanalysis, and art theory. Application of semiotics to various signifying practices (literature, cinema, daily life).

CSSL 5711. Sociocriticism. (3 cr)
Sustained consideration of the modern tradition of sociological reflection on literature. Early and late Birmingham School, Frankfurt School, Bakhtin circle, and the various French initiatives associated with both *Les Temps Modernes* and *Tel Quel*.

CSSL 5835. Richard Wagner's "Der Ring des Nibelungen": Music, Myth, and Politics. (3 cr. Prereq-#)
Literary and musical analysis and historical context of the four works of Wagner's "Ring": *Das Rheingold*, *Die Walküre*, *Siegfried*, *Götterdämmerung*. Critical assessment of Wagner's achievement and influence.

CSSL 5910. Topics in Cultural Studies and Comparative Literature. (3 cr [max 24 cr])
Topics specified in *Class Schedule*.

CSSL 5993. Directed Study. (1-3 cr [max 9 cr]. Prereq-#, Δ, □)
Guided individual reading or study.

Curriculum and Instruction (CI)

Department of Curriculum and Instruction

College of Education and Human Development

CI 1001. Introduction to the Elementary School. (3 cr; A-F only)
Three modules focus on important aspects of contemporary urban elementary school teaching: the principal's role, the teacher's role, and the students. Central to each module are school-based visits, observations, and interviews.

CI 3401. Children's Literature: Pre-K Through Grade 5. (3 cr; A-F only. Prereq-Jr or sr or #)
Introduction to children's literature as field of study and as part of pre-K through elementary school curriculum. Classic and recently published books in all genres. Research in children's reading interests/responses to literature. Methods of implementing literature-based instruction/assessment.

CI 5111. Introduction to Elementary School Teaching. (3 cr; A-F only. Prereq-Foundations of ed major or elem ed initial lic)
Curriculum organization, instruction, management, assessment, professional decision making.

CI 5181. Clinical Experience in Elementary School Teaching. (3-8 cr [max 16 cr]; S-N only. Prereq-Foundations of education and elem ed initial licensure only)
Students spend full days in the elementary classroom gradually assuming responsibility for teaching the class. Students prepare a portfolio based on criteria given. One seminar per week.

CI 5401. Literature for the Elementary School. (3 cr; A-F only. Prereq-Children's lit course or #)
Evaluative survey of books for children. Research related to children's reading interests. Response to literature, instructional strategies.

CI 5415. Literacy Development in the Primary Grades. (3 cr; A-F only. Prereq-Elem teaching exper or #)
Theory/practice of integrated teaching of reading, literature, writing, and language in primary classroom settings. Uses national/state language arts standards and assessment protocols to examine primary literacy curricula.

CI 5504. Elementary School Science: Materials and Resources. (3 cr. Prereq-Elem tchg exper or #)
Examination of the teacher's role in inquiry teaching; the current science curriculum; and resources for teaching science in the elementary school.

CI 5701. Teaching Social Studies in the Elementary School. (2 cr; A-F only. Prereq-5111 or equiv, elem ed initial licensure only)
Content and organization of elementary social studies programs; programs of understanding, improving the learning situation, and effective use of materials.

CI 5821. Teaching Mathematics in the Elementary School. (2 cr; A-F only. Prereq-Elem ed initial licensure only)
Principles of learning pertinent to the modern program of mathematics in elementary grades. Objectives, content, philosophy, instructional materials, and methods of instruction and evaluation.

Dance (DNCE)

Department of Theatre Arts and Dance

College of Liberal Arts

DNCE 1001. Modern Dance Technique 1. (1 cr)
Expressive body movement: alignment, proprioceptiveness, body mechanics, weight, momentum, line, and intent.

DNCE 1002. Modern Dance Technique 2. (1 cr. Prereq-1001, Δ)
Continuation of 1001. Expressive body movement: alignment, proprioceptiveness, body mechanics, weight, momentum, line, and intent.

DNCE 1010. Modern Dance Technique 3. (2 cr [max 4 cr]. Prereq-Δ)
Continuation of physical training. Theory of space, time, and energy. Correct placement, power from pelvic center, rotation/turnout, muscular tonality, articulation of joints, clarity of emotional intent, physical stretch, strength, and stamina.

DNCE 1020. Modern Dance Technique 4. (2 cr [max 4 cr]. Prereq-1010, Δ)
Continuation of 1010. Correct placement, power from pelvic center, rotation/turnout, muscular tonality, articulation of joints, clarity of emotional intent, physical stretch, strength, and stamina.

DNCE 1101. Ballet Technique 1. (1 cr)
Principles, basic technique, and vocabulary of ballet; barre, center, and allegro.

DNCE 1102. Ballet Technique 2. (1 cr. Prereq-1101, Δ)
Continuation of 1101. Principles, basic technique, and vocabulary of ballet; barre, center, and allegro.

DNCE 1110. Ballet Technique 3. (2 cr [max 4 cr]. Prereq-Δ)
Continuation of ballet training. Correct placement, line and historical development; barre, center, and allegro.

DNCE 1120. Ballet Technique 4. (2 cr [max 4 cr]. Prereq-1110, Δ)
Continuation 1110. Ballet training; correct placement, line and historical development. Barre, center, and allegro.

DNCE 1201. Jazz Technique 1. (1 cr)
Jazz dance technique and its origins. Warm-up, center-floor work, and across-the-floor combinations.

DNCE 1202. Jazz Technique 2. (1 cr. Prereq-1201, Δ)
Continuation of 1201. Jazz dance technique and its origins. Warm-up, center-floor work, and across-the-floor combinations.

DNCE 1210. Jazz Technique 3. (1 cr [max 2 cr]. Prereq-Δ; , audition)
Jazz technique. Body isolations, placement, and musicality.

DNCE 1220. Jazz Technique 4. (1 cr [max 2 cr]. Prereq-1210, Δ)
Continuation of 1210. Jazz technique; body isolations, placement, and musicality.

DNCE 1301. Tap Technique 1. (1 cr)
Learning fundamental terms, basic rhythm structures, stock steps, and standard time steps.

DNCE 1302. Tap Technique 2. (1 cr. Prereq-1301 or #)
Fundamental terms, basic rhythms and syncopation, stock steps, and standard time steps; clarity of sound and rhythm.

DNCE 1311. International Folk Dance 1. (1 cr)
Basic folk steps including the schottische, polka, waltz, and grapevine; technical emphasis on footwork and partnering.

DNCE 1312. International Folk Dance 2. (1 cr. Prereq–1311, Δ)
Continuation of 1311. Basic folk steps including the schottische, polka, waltz, and grapevine; technical emphasis on footwork and partnering.

DNCE 1313. African Based Movement. (1 cr)
Varied movement of African diaspora, primarily but not limited to West African region and continent of Africa. Traditional movement. Movement inspired by Africa, the Caribbean, and African diaspora at large. In-class movement participation, one movement midterm, one two-page paper.

DNCE 1315. Flamenco. (1 cr)
Basic terminology and movement styles of Spanish Flamenco dance technique. Focuses on arm movements and footwork. Basic choreography. One class period is devoted to viewing videos of traditional Flamenco dance.

DNCE 1317. Arabic Dance. (1 cr)
Basic movements/stylings of dances of Arabic-speaking world. Emphasizes classical women's performing dances of traditional/contemporary movements in Egypt, the Levant, the Arabian Peninsula, North Africa, and Turkey. Body awareness, conditioning, cultural context of movements/dances.

DNCE 1321. Ballroom 1. (1 cr)
Principles of partnering. Elementary steps of the foxtrot, waltz, swing, cha-cha, rumba, and tango.

DNCE 1322. Ballroom 2. (1 cr. Prereq–1321, Δ)
Continuation of 1321. Elementary steps of the foxtrot, waltz, swing, cha-cha, rumba, tango, mamba, and bolero. Partnering, style, and phrasing.

DNCE 1323. Swing Dance. (1 cr)
Traditional swing dances popular in the United States from 1930s through early 1960s. Each week new movements/figures are taught and previous dances reviewed. Students are expected to change partners.

DNCE 1325. Latin Dance. (1 cr)
Basic vocabulary, lead/follow techniques of most popular Latin social dance styles. Salsa, Chacha, Rumba, Merengue. First half of class focuses on basic footwork/partnering; second half focuses on rhythm and musical styling.

DNCE 1331. Yoga. (1 cr)
Theory/practice of Yoga. Standing postures, forward bends, twists, balancing, seated postures, inversions, back bends, guided relaxation/meditation. Proper alignment, weight placement, body awareness, relaxation, breathing techniques. Midterm paper, movement demonstration final.

DNCE 1332. Yoga for Dancers. (1 cr. Prereq–Dance major, Δ)
Physical experience and related aesthetic topics. Historical aspects. Philosophical ideas of yoga. Improving body mechanics through alignment, flexibility, and strength. Developing mental focus/control. Reinforcing positive body language.

DNCE 1335. T'ai Chi Ch'uan. (1 cr)
Ancient Chinese slow-motion exercise. Helping body/mind to become relaxed/centered. Natural movement patterns, deep breathing, tranquil stress-free mind. Self-defense applications of movements. Non-competitive, non-aggressive.

DNCE 1347. Stott Pilates Conditioning. (1 cr)
Essential mat work of Pilates method. Contemporary approach to mind-body system of exercise pioneered by Joseph Pilates. Neuro-muscular resistance exercises to develop strong, flexible muscles and better alignment for optimal physical/mental well-being.

DNCE 1349. Contact Improvisation. (1 cr)
Safe, clear introduction to principles of contact improvisation. Rolling point of contact, supporting/being supported, falling/recovering, connecting with center as source/support for movement. Classes include warm-up.

DNCE 1362. Dance for Musical Theatre. (2 cr; A-F only. \$TH 1362)
Movement based lab. Dance skills in musical theatre performance. Focuses on various styles/disciplines of dance throughout its culturally diverse heritage. Character development necessary to execution of various dance styles.

DNCE 1401. Introduction to Dance. (3 cr)
Modern dance, ballet, and world dance, primarily in the 20th century. Dance forms, choreographers, and dance issues through lecture, discussion, and viewing of live and taped performance.

DNCE 1402. Dance History. (3 cr. Prereq–1401)
“Ways of knowing” in dance history by reading the works of critics, historians, and philosophers who address questions concerning the nature of dance.

DNCE 1500. Topics in Dance. (1-3 cr [max 10 cr])
Topics specified in *Class Schedule*.

DNCE 1601. Dance Improvisation. (1 cr; A-F only. Prereq–Concurrent registration in a modern dance technique course, Δ)
Individual ways of moving linked to fundamental elements of dance: time, space, and energy. Metered time, musical phrasing. Movement speed, shape, and quality. Creative process, individual movement vocabulary, structural devices in dance.

DNCE 1626. Music for Dance. (3 cr. Prereq–Δ)
Elements of music theory, form, analysis, and history necessary for the potential dancer, choreographer, and musician to better understand each art.

DNCE 3010. Modern Dance Technique 5. (2 cr [max 4 cr]. Prereq–Δ; audit registration not permitted)
Application of principles of space, time, energy. Alignment, power from pelvic center, rotation/turnout, muscular tonality, joint articulation, clarity of intent, stretch, strength, stamina.

DNCE 3020. Modern Dance Technique 6. (2 cr [max 4 cr]. Prereq–3010, Δ)
Continuation of 3010. Application of principles of space, time, energy. Alignment, power from pelvic center, rotation/turnout, muscular tonality, joint articulation, clarity of intent, stretch, strength, stamina.

DNCE 3110. Ballet Technique 5. (2 cr [max 4 cr]. Prereq–Δ; audit registration not permitted)
Continuation of beginning technique. Stretch, strength, balance, musicality. Longer phrases in adagio/allegro work. More complex elevations in petit allegro. Practical work conducted in context of study of technical development of ballet.

DNCE 3120. Ballet Technique 6. (2 cr [max 4 cr]. Prereq–3110, Δ; audit registration not permitted)
Continuation of 3110. Ballet technique. Stretch, strength, balance, musicality. Longer phrases in adagio/allegro work. More complex elevations in petit allegro.

DNCE 3210. Jazz Technique 5. (1 cr [max 2 cr]. Prereq–Δ; audit registration not permitted)
Continuation of jazz technique. Rhythm structures, longer phrases, greater physical speed, attack/control.

DNCE 3220. Jazz Technique 6. (1 cr [max 2 cr]. Prereq–3210, Δ; audit registration not permitted)
Continuation of 3210. Jazz technique. Rhythm structures, longer phrases, greater physical speed, attack/control.

DNCE 3301. Tap Technique 3. (1 cr. Prereq–1302 or #)
Tap techniques and creative development through improvisational studies.

DNCE 3302. Tap Technique 4. (1 cr. Prereq–3301 or #)
Tap techniques and rhythm structures.

DNCE 3337. Body Mind Centering. (2 cr)
Improvisational movement explorations, hands-on re-patterning work. Direct experience of the way mind (desire, attention, intention) is expressed through various body systems. Students use imagery, touch, and anatomical information to access a range of inner sensations and movement experiences. Emphasizes each individual's unique experience of the body.

DNCE 3401W. Dance History 1. (3 cr)
History/theory of dance in varied forms/aspects. From origins of dance as movement-form, through early Renaissance. First half of year-long survey.

DNCE 3402W. Dance History 2. (3 cr. Prereq–3401)
History/theory of dance in varied forms/aspects. From development of ballet, through 20th century modern dance. Second half of year-long survey.

DNCE 3433. Articulate Body. (3 cr. Prereq–DNCE major, Δ)
Lectures and movement sessions in biodynamic considerations for optimal dance performance and metabolistic demands of dance.

DNCE 3487W. Ethnic Dance Traditions in American Society. (3 cr)
Traditional dances as preserved and transformed by Native Americans, African-Americans, Latinos, Asian-Americans, and European-Americans in the United States. Interpretation of roles of dance in these cultures.

DNCE 3488W. Dance as Cultural Practice. (3 cr)
Study of dance as art, ritual, social activity, and entertainment in selected cultures of Asia, Africa, Eastern Europe, the Middle East, and the Americas.

DNCE 3500. Topics in Dance. (1-3 cr [max 10 cr])
Topics specified in *Class Schedule*.

DNCE 3601. Dance Composition 1. (3 cr. Prereq–1020, 1601, concurrent regis in a modern dance technique course, Δ)
Movement, vocabulary in relation to theme, space, time, energy, and body parts; solo, duet, and trio forms.

DNCE 3602. Dance Composition 2. (3 cr. Prereq–3601, Δ, concurrent regis in a modern dance technique course)
Movement, vocabulary in relation to theme, space, time, energy, and body parts. Solo, duet, and trio forms.

DNCE 3621. Dance Production I. (2 cr; A-F only. Prereq–Dance major, Δ)
Technical/administrative aspects of dance production. Lighting, costumes, sound, marketing, stage management, fundraising, publicity. Emphasizes practical project management and personal management skills.

DNCE 3622. Dance Production II. (2 cr; A-F only. Prereq–3621, dance major, Δ)
Continuation of 3621. Students produce the spring Student Dance Concert.

DNCE 3700. Performance. (1 cr [max 4 cr]. Prereq–Concurrent enrollment in a technique course, audition, Δ)
Creation or reconstruction of a dance theatre work under the direction of a guest artist or faculty member. Work is performed at the end of the rehearsal period.

DNCE 3901. Survival Strategies in Dance. (3 cr; A-F only. Prereq–Dance major, Δ)
Strategies fundamental to a dancer's survival. Injury prevention/care. Development of healthy dietary and muscular/skeletal habits. Career tracks.

DNCE 4443. Philosophy and Aesthetics. (3 cr. Prereq–3402, Δ)
Major developments in Western philosophic thought on dance and dance theory from its beginnings to the present.

DNCE 4454W. (Re)Writing the Dancing Body. (3 cr)
Modes of verbal expression that best capture the meaning created by primarily non-verbal artistic forms. Chapters from text and issues are discussed/debated in class. Writing during every class period.

DNCE 4601. Dance Composition 3. (3 cr. Prereq–3602, concurrent regis in a modern dance technique course, Δ)
Continuation of movement vocabulary through improvisation, analysis of form and structure, experimentation with tone and performance persona. Effects of lights/costumes/text/props/music; development of larger ensemble works.

DNCE 4602. Dance Composition 4. (3 cr. Prereq-4601, †[modern dance technique course, Δ]) Continuation of 4601. Movement vocabulary through improvisation, analysis of form and structure, experimentation with performance persona, and the effects of technical elements. Development of larger ensemble works.

DNCE 4901. Senior Seminar. (2 cr; S-N only. \$TH 4901. Prereq-Sr; [DNCE or Th major]; offered fall semester only) Development of senior project, alone or in groups, under guidance of faculty members.

DNCE 5010. Modern Dance Technique 7. (2 cr [max 4 cr]. Prereq-Δ; audit registration not permitted) Continuation of technical development. Performance range/style. Students study with various guest artists.

DNCE 5020. Modern Dance Technique 8. (2 cr [max 4 cr]. Prereq-5010, Δ; audit registration not permitted) Continuation 5010. Performance range/style. Students study with various guest artists.

DNCE 5110. Ballet Technique 7. (1 cr [max 2 cr]. Prereq-Δ; audit registration not permitted) Continuation of ballet technique. Musicality, performance, stylistic differences. Practical work conducted within context of choreographic/aesthetic development of ballet.

DNCE 5120. Ballet Technique 8. (1 cr [max 2 cr]. Prereq-5110, Δ; audit registration not permitted) Continuation of 5110. Musicality, performance, stylistic differences. Practical work conducted within context of choreographic/aesthetic development of ballet.

DNCE 5210. Jazz Technique 7. (1 cr [max 2 cr]. Prereq-Δ; audit registration not permitted) Continuation of jazz technique. Syncopation, performance projection. Specific styles: swing, bebop, lyrical, funk, latin.

DNCE 5220. Jazz Technique 8. (1 cr [max 2 cr]. Prereq-5210, Δ; audit registration not permitted) Continuation of 5210. Syncopation, performance projection. Specific styles: swing, bebop, lyrical, funk, latin.

DNCE 5337. Body-Mind Centering II. (2 cr. Prereq-[3337 or equiv], #) Embodied consciousness. How knowledge is created. How mind/body are indissolubly linked. How body gives rise to states of consciousness that influence and often unconsciously control opinions, feelings, thoughts, and actions.

DNCE 5500. Topics in Dance. (1-3 cr [max 10 cr]) Topics specified in *Class Schedule*.

DNCE 5601. Dance Composition 5. (1 cr. Prereq-4601, 4602, Δ) Final part of six-semester sequence in dance composition. Exploration of movement through independently scheduled rehearsals. Choreographic concepts. Tools in dance creation, development/refinement of movement, structure of group choreography.

DNCE 5700. Performance. (1 cr [max 4 cr]. Prereq-[technique course, Δ]) Technique, improvisation, choreography, music, design, and technical production as they relate to dance performance.

DNCE 5858. Teaching Dance. (4 cr. Prereq-1020, Δ, #) Methods, principles, and techniques of teaching dance.

DNCE 5970. Directed Studies. (1-4 cr [max 10 cr]. Prereq-#, Δ, □) Guided individual study.

Danish (DAN)

Department of German, Scandinavian, and Dutch College of Liberal Arts

DAN 1001. Beginning Danish. (5 cr. \$DAN 4001) Emphasis on working toward novice-intermediate low proficiency in all four language modalities (listening, reading, speaking, writing). Topics include everyday subjects (shopping, directions, family, food, housing, etc.).

DAN 1002. Beginning Danish. (5 cr. \$DAN 4002. Prereq-1001) Continues the presentation of all four language modalities (listening, reading, speaking, writing), with a proficiency emphasis. Topics include free-time activities, careers, and the Danish culture.

DAN 1003. Intermediate Danish. (5 cr. \$DAN 4003. Prereq-1002) Emphasis on intermediate proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is combined with authentic readings and essay assignments.

DAN 1004. Intermediate Danish. (5 cr. \$DAN 4004. Prereq-1003) Emphasis on developing intermediate mid-high proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is supported by work with authentic readings and essay assignments.

DAN 3011. Advanced Danish. (3 cr. Prereq-1004 or 4004) Fiction, film, journalistic and professional prose. Grammar, vocabulary building exercises. Review of oral/written modes of communication.

DAN 3012. Advanced Danish. (3 cr. Prereq-1004 or 4004) Novels, short stories, plays, articles. Structural, stylistic, vocabulary building exercises.

DAN 4001. Beginning Danish. (2 cr. \$DAN 1001. Prereq-1004 in another language or passing score on LPE or grad student) Meets concurrently with 1001 See 1001 for course description.

DAN 4002. Beginning Danish. (2 cr. \$DAN 1002. Prereq-1004 in another language or passing score on LPE or grad student) Meets concurrently with 1002. See 1002 for description.

DAN 4003. Intermediate Danish. (2 cr. \$DAN 1003. Prereq-1004 in another language or passing score on LPE or grad student) Meets concurrently with 1003. See 1003 for description.

DAN 4004. Intermediate Danish. (2 cr. \$DAN 1004. Prereq-1004 in another language or passing score on LPE or grad student) Meets concurrently with 1004. See 1004 for description.

Dental Hygiene (DH)

Preventive Sciences

School of Dentistry

DH 1191. Dental Hygiene Care Process. (6 cr; A-F only. Prereq-DH student) Assessment principles related to medical and oral health status, dental hygiene clinical procedures, and development of instrumentation and hypertension screening skills.

DH 1203. Dental Specialties. (2 cr; S-N only. Prereq-DH student) Various dental specialties and the dental hygienist's role in services provided.

DH 2111. Dental Anatomy. (2 cr; A-F only. Prereq-DH student) All deciduous and permanent teeth, including tooth form, function, and relationship to oral health. Calcification, eruption, and exfoliation patterns. Ideal static occlusion, dental terminology, and tooth annotation systems. Lab includes identification/annotation of teeth and restoration, in wax, of portions of a typodont tooth.

DH 2121. The Dental Hygiene Care Process Clinical Application I. (5 cr; A-F only. Prereq-DH student) Dental hygiene care process, assessment principles related to medical and oral health status, dental hygiene clinical procedures, and development of instrumentation skills.

DH 2132. Head and Neck Anatomy. (1 cr; A-F only. Prereq-DH student) Anatomical structures of head/neck as they relate to practice of dental hygiene.

DH 2191. Independent Study. (0-6 cr [max 6 cr]. Prereq-DH student) Individually arranged study, instruction, or research with faculty to meet student needs/interests.

DH 2210. General and Oral Pathology. (2 cr; A-F only. Prereq-DH student) Topics in pathology related to dentistry and oral cavity. Oral benign/malignant tumors. Infectious, inflammatory, and immunologically mediated lesions/diseases.

DH 2211. Oral Histology and Embryology. (2 cr; A-F only. \$DENT 5315. Prereq-DH student) Development of orofacial region. Structural microscopic anatomy of oral hard/soft tissues applicable for rendering clinical treatment.

DH 2212. Dental Hygienist-Patient Relationship. (2 cr; A-F only. Prereq-DH student) Use of clinical research and evidence-based clinical decision making when communicating scientifically based clinical therapy and treatment modalities. Promotion of active participation by patient in clinical decision making.

DH 2221. Periodontology. (3 cr; A-F only. Prereq-DH student) Periodontal diseases. Etiology, assessment, and treatment options. Clinical experience in debridement, root planing, and placing periodontal dressings.

DH 2222. Dental Hygiene Care Process Clinical Application II. (1-4 cr [max 4 cr]; A-F only. Prereq-DH student) School of Dentistry clinical systems. Various medical/emergency conditions affecting patient care and preventive strategies for dental diseases. Skill development in fluoride, sealant, and air polishing techniques. Evaluation of products used in treatment of dental caries and periodontal diseases.

DH 2231. Cariology. (2 cr; A-F only. Prereq-DH student) Dental caries. Etiology, pathology, and prevention.

DH 2233. Dental Hygiene Care Process: Clinical Application. (1 cr; S-N only. Prereq-DH student) Clinical experience in dental hygiene patient care.

DH 2235. Oral and Maxillofacial Radiology. (2 cr; A-F only. Prereq-DH student) General principles of radiology, radiation physics, dosimetry, biology, radiation protection, regulations, recent concepts of imaging.

DH 3111. Biomaterials and the Principles of Restorative Techniques I. (5 cr; A-F only. Prereq-DH student) Principles of biomaterials, restorative techniques. Lecture, preclinical experiences.

DH 3112. General and Oral Pathology. (2 cr; A-F only. Prereq-DH student) Circulatory disturbances, inflammation, and tumors. Emphasizes diseases affecting oral cavity, dental caries, periodontal diseases, oral neoplasias, and similar problems.

DH 3123. The Dental Hygiene Care Process Clinical Application III. (4 cr; A-F only. Prereq—DH student)

Dental hygiene treatment planning, alternative instruments and advanced skills related to implementation of dental hygiene care. Clinical experience in dental hygiene patient care and dental dietary counseling.

DH 3126. Oral and Maxillofacial Radiology Clinic I. (0 cr; A-F only. Prereq—DH student)

Exposing patient radiographs, interpretation, panoramic/extraoral technique, quality assurance procedures.

DH 3131. Periodontology I Lecture. (1 cr; A-F only. \$DENT 5611. Prereq—DH student)

Periodontal anatomy. Physiology/etiology of periodontal diseases. Clinical, histopathological, and pathogenesis of gingivitis/periodontitis. Role of genetics, tobacco use, and systemic disorders. Preventive/therapeutic procedures associated with diagnosis, prognosis, treatment planning, and initial phase of periodontal therapy.

DH 3132. Applied Nutrition in Dental Hygiene Care. (1 cr; A-F only. Prereq—DH student)

Principles of diet/nutrition applied to dental hygiene patient care. Skills in dental dietary counseling.

DH 3133. Pharmacology. (2 cr; A-F only. Prereq—DH student)

Principles of pharmacology, physical/chemical properties of drugs, modes of administration, therapeutic/adverse effects, drug actions/interactions.

DH 3134. Dental Hygiene Care for Pediatric Patients.

(1.5 cr; A-F only. Prereq—DH student)

Knowledge, skills, and attitudes required for providing dental hygiene care for pediatric patients.

DH 3135. Oral and Maxillofacial Radiology: Theory, Principles, and Radiographic Analysis. (2 cr; A-F only. Prereq—DH student)

Atomic radiations. Characteristics, production, and control of radiographs. Radiographic exposures, recent concepts. Radiation biology, dosimetry, protection, regulations. Discrepancies and technical errors in intraoral radiographs. Radiographic anatomy. Radiographic evidence of deviations from normal anatomic variations.

DH 3136. Patient Care Group I (PCGs). (1 cr; A-F only)

Small-group, cooperative learning integrating dental and dental hygiene students. Application of patient care skills taught in other courses. Focuses on communication skills, patient management, team work, collegiality, and practice philosophy necessary for practice of dental hygiene.

DH 3191. Independent Study. (0 cr. Prereq—DH student)

Individually arranged study, instruction, or research with faculty to meet student needs/interests.

DH 3203. Dental Hygiene Care for Special Needs Patients I. (2 cr; A-F only)

Knowledge, skills, and attitudes required for providing dental hygiene care for pediatric/orthodontic and geriatric patients and individuals with disabilities.

DH 3221. Local Anesthesia and Pain Management. (2 cr; A-F only)

Concepts in administration of local anesthesia, nitrous oxide-oxygen sedation, and other methods of pain management. Anatomy, physiology, pharmacology, patient assessment, indications and contraindications, selection of agents, injection techniques, complications, emergency management, and legal/ethical considerations. Lecture, lab, clinic.

DH 3224W. The Dental Hygiene Care Process Clinical Application IV. (1-4 cr [max 4 cr]; A-F only)

Evaluation of dental hygiene patient care and assurance of quality in the dental hygiene profession. Clinical experience in dental hygiene patient care.

DH 3225. Extramural Clinical Dental Hygiene. (0-6 cr [max 6 cr]; S-N only. Prereq—#)

Students participate in educational/clinical experiences with diverse patient populations in community outreach clinics.

DH 3226. Extramural Clinical Dental Hygiene. (0-6 cr [max 6 cr]; A-F only. Prereq—#)

Students participate in educational/clinical experiences with migrant worker health care program.

DH 3227. Oral and Maxillofacial Radiology Clinic II. (0 cr; A-F only. Prereq—DH student)

Exposing patient radiographs, interpretation, panoramic/extraoral technique, and quality assurance procedures.

DH 3231W. Research Methods in Dental Hygiene. (3 cr; A-F only. Prereq—DH student)

Develop skills in scientific method and analyzing research findings; emphasis on types of research, problem selection, hypothesis writing, research planning and design, data collection and measuring techniques, analysis and interpretation of data, and writing the research proposal.

DH 3235. Dental Hygiene Care for the Geriatric Patient and the Patient With Special Needs. (2 cr; A-F only. Prereq—DH student)

Knowledge, skills, and attitudes required for providing dental hygiene care for geriatric patients and patients with special needs.

DH 3237. Patient Care Group II (PCGs). (1 cr; A-F only)

Small-group, cooperative learning integrating dental and dental hygiene students. Application of patient care skills taught in other courses. Focuses on communication skills, patient management, team work, collegiality, and practice philosophy necessary for practice of dental hygiene.

DH 4125W. The Dental Hygiene Care Process Clinical Application V. (1-7 cr [max 7 cr]; A-F only. Prereq—DH student)

Adapt dental hygiene care process to meet preventive/treatment needs of traditional and special needs patients. Analyze patient preventive/treatment need through case presentation. Community service, cultural diversity, family violence issues. New products, techniques, research.

DH 4128. Oral and Maxillofacial Radiology Clinic III. (0 cr; A-F only. Prereq—DH student)

Exposing patient radiographs, interpretation, panoramic/extraoral technique, quality assurance procedures.

DH 4131. Epidemiology, Prevention, Dental Public Health, and Community Outreach. (3 cr; A-F only. \$DENT 5401. Prereq—DH student)

Epidemiological methods of investigation and patterns of oral diseases. Scope/content of the specialty of dental public health. Public health process as related to community setting.

DH 4132W. Ethics, Jurisprudence, and Principles of Practice. (2 cr; A-F only. Prereq—DH student)

Career planning, team building, employment seeking, jurisprudence, and ethical decision making.

DH 4137. Patient Care Group III (PCGs). (1 cr \$DENT 6434. Prereq—DH student)

Small class discussions with senior dental and senior dental hygiene students. Integration of more advanced clinical procedures into patient care. Advanced principles of patient management, practice management, and dental marketing. Development of a philosophy of practice. Mentoring the transition from dental and dental hygiene school to practice and planning for lifelong learning.

DH 4191. Independent Study. (0-6 cr [max 6 cr]. Prereq—DH student)

Individually arranged study, instruction, or research with faculty to meet student needs/interests.

DH 4211. Principles of Restorative Techniques II. (3 cr) Restorative Techniques. Clinical experiences.**DH 4226. Dental Hygiene Care Process Clinical Application VI.** (1-5 cr [max 5 cr]; A-F only. Prereq—DH student)

Adapt dental hygiene care process to meet preventive/treatment needs of traditional and special needs patients. Analyze patient preventive/treatment need through case presentation. Community service, cultural diversity, family violence issues. New products, techniques, research.

DH 4227. Advanced Dental Hygiene Clinical Experience I. (0-6 cr [max 6 cr]. Prereq—DH student)

Development of skills in sonic/ultrasonic scaling/assessment, treatment planning, documentation, implementation/evaluation of dental hygiene care.

DH 4228. Advanced Dental Hygiene Clinical Experience II. (0-6 cr [max 6 cr]. Prereq—DH student)

Development of skills in sonic/ultrasonic scaling/assessment, treatment planning, documentation, implementation/evaluation of dental hygiene care.

DH 4229. Oral and Maxillofacial Radiology Clinic IV. (3 cr; A-F only. Prereq—DH student)

Exposing patient radiographs, interpretation, panoramic/extraoral technique, quality assurance procedures.

DH 4231. Periodontology III Lecture. (1 cr; A-F only. \$DENT 6613. Prereq—DH student)

Clinical procedures associated with surgical phase of periodontal therapy. Evaluation of periodontal treatment, maintenance phase, and relationship between periodontics and other dentistry disciplines. Roles of clinical research in periodontics.

DH 4232. Community Outreach. (1 cr; S-N only. Prereq—DH student)

Dental hygiene education in various community settings.

DH 4233. Legislative, Social, Economic, and Practice Factors in Oral Health. (2 cr; A-F only. Prereq—DH student)

Current status/trends in dentistry in relation to health care promotion, regulation, and delivery and political/legislative process.

DH 4238. Patient Care Group IV. (1 cr; S-N only. \$DENT 6435. Prereq—DH student)

Small class discussions with senior dental and senior dental hygiene students. Integration of more advanced clinical procedures into patient care. Advanced principles of patient management, practice management, and dental marketing. Development of a philosophy of practice. Mentoring the transition from dental and dental hygiene school to practice/planning for lifelong learning.

DH 4241. Extramural Clinical Dental Hygiene. (0-6 cr [max 6 cr]; A-F only. Prereq—#)

Students participate in educational/clinical experiences with diverse patient populations in community outreach clinics.

DH 4242. Extramural Clinical Dental Hygiene. (0-6 cr [max 6 cr]; A-F only. Prereq—#)

Students participate in educational/clinical experiences with Jamaica Mission Program.

DH 4250. Dental Hygiene Community Outreach Elective. (0-8 cr [max 8 cr]; S-N only. Prereq—DH student)

Individually arranged dental hygiene clinical experience in community outreach clinics.

DH 4292. Curriculum Development in Dental Hygiene. (3 cr)

Curriculum development /management. Competency based education and outcomes assessment. Role of accreditation in dental hygiene education.

DH 4293. Course Development in Dental Hygiene. (0-4 cr [max 4 cr]; A-F only)

Principles/practice of course development, testing, and evaluation.

DH 4294W Directed Research. (0-4 cr [max 4 cr])

Critical literature review and/or individual empirical research project leading to a written report, and/or intensive observation/participation in the clinical research center.

DH 4295. Instructional Methods in Dental Hygiene Education. (0-4 cr [max 4 cr]; A-F only)

Application of principles of learning, learning styles, teaching styles, and instructional methods. Microteaching of selected instructional skills.

DH 4296. Issues in Dental Hygiene. (0-3 cr [max 3 cr]; A-F only)

Issues, trends, and research related to dental hygiene. Current literature.

DH 4297. Dental Hygiene Education: Supervised Teaching. (1-4 cr [max 4 cr]; A-F only)
Observation/participation in supervised teaching experience in dental hygiene education.

DH 4298W. Dental Hygiene Process of Care: Clinical Application. (1-4 cr [max 4 cr])
Clinical care of patients.

Design Institute (DESI)

College of Design

DESI 3010. Travels in Typography: Design Institute Seminar. (3 cr; A-F only)
Using collection in James Ford Bell Library, students study rare book/map collections and undertake hands-on exercises on history of type, including developments in typesetting, calligraphy, and letterpress printing.

DESI 3040. Introduction to Furniture Design: Design Institute Case Study Seminar. (3 cr; A-F only. Prereq—Design minor or #)
Furniture design as discipline, not as method. Material, sensual, and aesthetic, both sublime and mundane. Objects that mediate our environment. History, design criteria, technology, craft. Group case-study, research presentation, individual making/presenting of a concept-prototype.

DESI 3050. Streetlife Urban Design Seminar. (3 cr; A-F only)
The street as part of network of urban systems/fragments: sidewalks, private interiors, curbs, terraces, boulevards, parking lots, bus stops, public institutions, urban architectures, utility lines, storm/sewer systems, groundwater, satellite communication systems, gardens, and lighting. Readings in urban studies, geography, design, economics and art history. Students review case studies, envision possible transformations of streets/streetlife.

DESI 4001. Design Minor Seminar. (3 cr; A-F only. Prereq—Design minor)
Students share ideas/conclusions with one another and create a summary statement (eg., document, multimedia display, designed object) of a significant learning insight.

DESI 4002. Design Institute Seminar: Topics. (3 cr [max 6 cr]; A-F only)
Offerings vary. See Design Institute for descriptions.

DESI 4050. Design Institute Seminar: Mapcity. (3 cr [max 6 cr]; A-F only. Prereq—Design minor or #)
Develops alternative cartography that reveals the city in ways conventional maps do not. Classic texts explore urban representation and more recent material in cartographic criticism. Student mapmaking projects include producing a map of Twin Cities, alternative city atlas, and (as part of competition in conjunction with Twin Cities Design Celebration) wearable cartography. Readings, quizzes, projects presented in class.

DESI 5100. Design Institute Directed Study. (1-3 cr [max 9 cr]; A-F only)
Guided independent study in design.

Design, Housing, and Apparel (DHA)

Department of Design, Housing, and Apparel

College of Design

DHA 1100H. First Year Honors Colloquium. (1-2 cr [max 4 cr]; A-F only. Prereq—Honors)
Diverse ways of knowing about world, fields of study organized to understand human environment, their place within academic/career pathways that cross within intellectual traditions/professional fields.

DHA 1101V. Honors: Introduction to Design Thinking. (4 cr)
Theories/processes that underpin design thinking. Interactions between humans and their natural, social, and designed environments where purposeful design helps determine quality of interaction. Design professions.

DHA 1101W. Introduction to Design Thinking. (4 cr; A-F only. \$LA 1101W)
Theories/processes that underpin design thinking. Interactions between humans and their natural, social, and designed environments where purposeful design helps determine quality of interaction. Design professions.

DHA 1170. Special Topics in Design, Housing, and Apparel. (1-4 cr [max 16 cr]; A-F only)
In-depth investigation of specific topic, announced in advance.

DHA 1171. Freshman Seminar in Design, Housing, and Apparel. (1-3 cr [max 4 cr]; A-F only. Prereq—Fr)
Topic in design, housing, or apparel. Small-group seminar.

DHA 1201. Clothing Design, Merchandising, and the Consumer. (3 cr; A-F only)
An orientation to the apparel business covering the multiple steps in the process of creating and merchandising apparel, and the ethical positions reflected in decision making at each step.

DHA 1221. Clothing Assembly Fundamentals. (3 cr; A-F only. Prereq—Pre-clothing design major or #)
Methods/applications of clothing assembly, from micro to macro perspective.

DHA 1311. Foundations: Drawing and Design in Two and Three Dimensions. (4 cr; A-F only. Prereq—DHA major or premajor)
Design elements/principles in context of observational drawing. Integrative approach to two-dimensional design, three-dimensional design, and drawing. Broad conceptual framework for design exploration. Emphasizes perceptual aspects of visual forms.

DHA 1312. Foundations: Color and Design in Two and Three Dimensions. (4 cr; A-F only. Prereq—DHA major or pre-major)
Color theory and its application in two- and three-dimensional design. Emphasizes effective use of color by studying traditional color systems, perception, and interaction. Lectures, demonstrations, extensive studio work, critiques.

DHA 1315. Foundations: The Graphic Studio. (4 cr; A-F only. Prereq—[DHA major or pre-major] or #)
Graphic design process. Creative procedure, terminology, technology. Computer applications. Digital illustration, page layouts, image scanning/manipulation.

DHA 1601. Interior Design Studio I. (4 cr; A-F only. Prereq—DHA pre-major)
Theories used to solve interior design problems related to human behavior. Design process. Communication skills that are required for interior design profession.

DHA 1602. Interior Design Studio II. (4 cr; A-F only. Prereq—[DHA pre-major], 1601 with grade of at least C-)
Introduction to interior design programming as method for understanding behaviors/requirements of humans in spaces. Use of color in three-dimensional environments. Developing communication skills. Problem-solving.

DHA 1905. Freshman Seminar. (1-3 cr [max 6 cr]; A-F only. Prereq—Fr)
Special topics. Topics vary by term. See *Class Schedule*.

DHA 2100H. Freshman/Sophomore Honors Colloquium. (2 cr [max 4 cr]; A-F only. Prereq—[Fr or soph], honors)
Special Topics. Topics vary by term. See *Class Schedule*.

DHA 2211. Illustration for Clothing Design. (2 cr; A-F only. Prereq—Pass portfolio review or #)
Development of illustration skills specific to garments/textiles. Exploration of various traditional media/CAD applications. Critique/analysis of visual communication of clothing design concepts.

DHA 2213. Textile Analysis. (4 cr; A-F only. Prereq—DHA major or pre-major or #)
Physical, chemical, and biological characteristics of fibers, yarns, textile structures, and finishes. Their effect on performance/appearance of textile products, including clothing, interior, and industrial textiles.

DHA 2214. Softlines Analysis. (3 cr; A-F only. Prereq—1201, 2213)
Physical characteristics of softline products related to function for target market. Class experiences based on methods of analysis, including visual inspection, quality, construction, costing, and fit/sizing.

DHA 2221. Clothing Design Studio I. (4 cr; A-F only. Prereq—1201, [1221 or pass sewing proficiency exam], DHA [major or pre-major])
Theories/methods in designing clothing for various user groups. Relation of a 2-dimensional pattern shape to a 3-dimensional body. Introduction to flat-pattern draping.

DHA 2222. Clothing Design Studio II. (4 cr; A-F only. Prereq—2221 with a grade of at least C-, DHA major, pass portfolio review)
Design process in developing clothing for a specific user group. Advanced principles/methods of developing patterns for the body, including advanced flat pattern, draping, fitting. Computer-aided design tools for illustration, patternmaking.

DHA 2311. Drawing and Illustration. (3 cr; A-F only. Prereq—1311, 1312, [DHA major or premajor])
Advanced drawing skills. Illustration concepts/techniques. Illustration assignments for concepts, stories, and ideas.

DHA 2334. Computer Applications I: Digital Composition for Design. (3 cr; A-F only. Prereq—DHA major or pre-major, 1311, 1312, 1315)
Composition of visual elements in electronic media. Use of computer to design for traditional media, digital environments.

DHA 2345. Typographic Design. (3 cr; A-F only. Prereq—DHA major, pass portfolio review)
History of typographic forms, principles of composition, expressive potential of type. Design process from problem-solving through exploration, experimentation, selection, critique, and refinement. Readings, research, exercises, design production.

DHA 2351. Graphic Design I: Text and Image. (3 cr; A-F only. Prereq—2345, DHA major, pass portfolio review)
Composition of visual information using grid structures to integrate text/image. Informational/expressive aspects of graphic design, hierarchical relationships of text elements. Methods of text layout that enhance communication.

DHA 2385W. Design and Factors of Human Perception. (4 cr; A-F only. Prereq—DHA major, pass portfolio review)
Introduction to human-factor variables of design. Color perception, type legibility, and other aspects of the human interface with designed objects. Students develop design prototypes. Methods to evaluate effectiveness of designed projects.

DHA 2401. Introduction to Housing. (3 cr; A-F only)
Physical, social, economic, psychological aspects of housing design/construction. Housing as process/product in context of the individual, the family, the community. Effects of federal, state, local governmental policies, economic trends.

DHA 2402. Residential Technology. (3 cr; A-F only)
Survey of technological systems in housing. Emphasizes consumption/conservation of natural resources and energy sources. Human factor considerations in kitchen design.

DHA 2463. Housing and Community Development. (3 cr; A-F only)
Meaning/significance of neighborhood/community, residential neighborhood change, impact of housing on neighborhood conditions. Gentrification, displacement, racial segregation, suburbanization, community-based revitalization.

DHA 2603. Interior Design Studio III. (4 cr; A-F only. Prereq—1602 with grade of at least C-, pass portfolio review, DHA major) Expanding presentation skills, visual communication of design process. Design of interior environment as influenced by neighborhood, adjacent structures, regional context, diverse cultures.

DHA 2604. Interior Design Studio IV. (4 cr; A-F only. Prereq—[2603, 2612, 2621] with grade of at least C-, DHA major) Relationship between exterior/interior design as it pertains to building construction. Methods/materials, principles of structure, building systems, construction details. Interface of electrical, HVAC, and plumbing systems in buildings.

DHA 2612. Interior Materials and Specifications. (4 cr; A-F only. Prereq—Pass portfolio review, DHA major) Environmental issues, from global to interior spaces. Effect of building codes/legislation, social awareness. Functional/aesthetic relation of materials/resources to interior design.

DHA 2613. Lighting Design and Life Safety Issues. (4 cr; A-F only. Prereq—[DHA major, pass portfolio review] or #) Lighting design technology, aesthetics, and human factors for interior spaces. Codes, standards, and legislation related to built environment.

DHA 2621. Computer Aided Design: Interior Design. (4 cr; A-F only. Prereq—[DHA major, pass portfolio review] or #) Application of two- and three-dimensional computer drawing in design/visualization of interior space. AutoCAD software used on Windows-based system.

DHA 3170. Special Topics in Design, Housing, and Apparel. (1-4 cr [max 32 cr]; A-F only) In-depth investigation of specific topic.

DHA 3196. Field Study: National or International. (1-10 cr [max 10 cr]; A-F only. Prereq—#) Faculty-directed field study in a national or international setting.

DHA 3201. Strategic Career Planning. (1 cr; A-F only. Prereq—[Jr or sr or at least 60 cr], retail merchandising major) Students research career opportunities related to retail industry, set career objectives based on an assessment of individual skills/interests, and identify job search skills to implement a transition from college to employment.

DHA 3217. Fashion Trends and Visual Analysis. (3 cr; A-F only. Prereq—2213) Relation of fashion trends to visual analysis of apparel. Application to design/retail.

DHA 3223. Clothing Design Studio III. (4 cr; A-F only. Prereq—2222 with grade of at least C-, DHA major, pass portfolio review) Study tailored/non-tailored clothing structures. Experiment with various materials/structures using traditional/innovative methods. Principles of manipulating materials/structures applied to series of garments.

DHA 3224. Clothing Design Studio IV. (4 cr; A-F only. Prereq—[2213, 3223] with grade of at least C-, DHA major) Principles/theory of functional clothing design. Conduct/apply research in designing clothing for situations requiring thermal or impact protection, accommodation for mobility, or facilitation for bodily function.

DHA 3242. Retail Buying. (3 cr; A-F only. Prereq—1201, MATH 1031, [Jr or sr], [DHA major or minor or Δ]) Principles/mathematics of merchandise inventory control, merchandise selection.

DHA 3243. Visual Merchandising. (3 cr; A-F only. Prereq—1101, 1201, [DHA major or minor or Δ]) Retail store environment. Physical/psychological effects that initiate/motivate consumer behavior. Merchandise display: creativity, department layout, fixturing, lighting, cross merchandising, visual resources, signing, maintenance.

DHA 3245. Multichannel Retailing. (3 cr; A-F only. Prereq—1201) Overview of retailing. Emphasizes issues related to multichannel options available to consumers. Features both store based (e.g., specialty store, department store) and non-store based (e.g., Internet, catalog) issues of retailing.

DHA 3312. Color and Form in Surface Design. (3 cr; A-F only. Prereq—1311, 1312, [DHA major or pre-major]) Use of color/form representation in two-dimensional surface applications. Historical use of color and of spatial representation in visual communication.

DHA 3352. Graphic Design II: Identity and Symbols. (3 cr; A-F only. Prereq—2351, DHA major) Representation of abstract ideas through symbols. Development of visual identity systems.

DHA 3353. Graphic Design III: Packaging and Display. (3 cr; A-F only. Prereq—3352 or #3352, DHA major) Application of graphic design principles to three-dimensional projects. Principles of three-dimensional design/space applied to labeling/packaging.

DHA 3482. Our Home, Our Environment. (3 cr; A-F only. \$ESPM 3601. Prereq—2402 or #) Effects of people and their homes on the environment. Energy/resource efficiency, environmental responsibility, occupant health. Affordability issues with respect to housing. Design, construction, renovation, retrofitting, landscaping. Consumer options for lighting, weatherization, water use, emissions, waste reduction, recycling, air quality, hazardous materials, and housing growth.

DHA 3605. Interior Design Studio V. (4 cr; A-F only. Prereq—[2402, 2604, 2613] with grade of at least C-, DHA major) Advanced interior design problems dealing with small to medium scale spaces. Emphasizes special-needs populations.

DHA 3606. Interior Design Studio VI. (4 cr; A-F only. Prereq—3605 with grade of at least C-, DHA major) Interior design problems dealing with medium-scale spaces. Focuses on medium office design.

DHA 3614. Interior Design Ethics and Professional Practice. (4 cr; A-F only. Prereq—2604, pass portfolio review) The business of interior design, professional ethics, and responsible design are emphasized. Students investigate their responsibility to their business, clients, colleagues, and the community at large. Professional portfolios and credentials will be discussed.

DHA 4001. Design Minor Seminar. (1 cr; A-F only. Prereq—Design minor) Students share ideas/conclusions with one another, create a summary statement (e.g., document, multimedia display, designed object) of a significant learning insight.

DHA 4121. History of Costume. (4 cr; A-F only. Prereq—Jr or sr or grad student) Survey of clothing/appearances in Western cultures, from 18th century to present. Role of gender, race, and class with respect to change in dress within historical moments and social contexts. Research approaches/methods in study/interpretation of dress.

DHA 4131W. History of Visual Communication. (4 cr; A-F only. Prereq—Intro history or art history course) Historical analysis of visual communication with an emphasis on the technological, cultural, and aesthetic influences on graphic design. Examination of how historical events are communicated and perceived through graphic presentation and imagery.

DHA 4150H. Honors Seminar. (1-3 cr [max 6 cr]. Prereq—Honors) Topics specified in *Class Schedule*.

DHA 4160H. Honors Capstone Project. (2 cr [max 4 cr]. Prereq—DHA honors) Individualizes honors experience by connecting aspects of major program with special academic interests.

DHA 4161. History of Interiors and Furnishings: Ancient to 1750. (4 cr; A-F only. Prereq—ARCH history course or #) Study of European and American interiors and furnishings including furniture, textiles, and decorative objects.

DHA 4162. History of Interiors and Furnishings: 1750 to Present. (4 cr; A-F only. Prereq—4161 or #) Study of European and American interiors and furnishings including furniture, textiles, and decorative objects.

DHA 4193. Directed Study in Design, Housing, and Apparel. (1-4 cr [max 4 cr]; A-F only. Prereq—Undergrad, #) Independent study in Design, Housing, and Apparel under tutorial guidance.

DHA 4196. Internship in DHA. (1-4 cr [max 4 cr]; S-N only. Prereq—Completion of at least one-half of professional sequence, plan submitted and approved in advance by adviser and internship supervisor, written consent of faculty supervisor, #) Supervised work experience relating activity in business, industry, or government to the student's area of study. Integrative paper or project may be required.

DHA 4212W. Dress, Society, and Culture. (3 cr; A-F only. Prereq—[[1101, jr] or grad student], [DHA major or minor or Δ]) Contemporary dress from diverse cultures within/outside USA analyzed using social science concepts. Dress as a nonverbal communication system.

DHA 4217. International Developments in Textiles and Apparel. (3 cr; A-F only. Prereq—[1201, APEC 1102, [Jr or sr or grad student]], [DHA major or minor or Δ]) Production, labor, trade, and marketing in textile, apparel, and related goods in global setting.

DHA 4225. Clothing Design Studio V. (4 cr; A-F only. Prereq—3224 with grade of at least C-, DHA major) Market research information/implementation. Designing for specific audience, market, user group. Applying market research to design line of clothing. Research of promotional methods for design project.

DHA 4226. Clothing Design Studio VI. (4 cr; A-F only. Prereq—4225 with grade of at least C-, DHA major) Synthesis of clothing design work based on concepts examined in previous studio classes. Principles of mass production applied to design projects completed in 4225. Implementation of public promotion of a clothing line. Individual strategies for promoting career goals. Exhibition/portfolio presentations.

DHA 4241. Retail Promotion. (3 cr; A-F only. Prereq—1201, [MKTG 3001 or equiv], [Jr or sr]) Integration of communication/consumer behavior theories with elements of retail promotion. Advertising, sales promotions, point-of-purchase communications, personal selling.

DHA 4247. Advanced Buying and Sourcing. (3 cr; A-F only. Prereq—3242, [DHA major or minor or Δ]) Technology application for buying/sourcing. Applications include six-month dollar merchandise planning, assortment planning, market purchase and sales promotions planning, inventory management, costing, markdowns, timing, and sourcing.

DHA 4330. Surface Fabric Design Workshop. (4 cr [max 8 cr]; A-F only)

Studio experience in the development and production of surface design. Screen printing, batik, resist dyeing, shibori, cyanotypes, and dye transfers are included.

DHA 4334. Computer Applications II: Design for the Digital Environment. (3 cr; A-F only. Prereq—[2334 or #], [DHA major or DHA grad student or #], pass portfolio review) Design of visual communication for electronic environments. Use of software to manipulate/create digital images/animation. Sound/video input combined with graphic images.

DHA 4340. Woven, Knit, and Non-Woven Fiber Design Workshop. (4 cr [max 8 cr]; A-F only)

Studio experiences in the development and production of woven, knit, and non-woven fiber projects. Explore several design methods and complete a major project using one of the structure techniques.

DHA 4345. Advanced Typographic Design. (4 cr; A-F only. Prereq—2351, [DHA major or grad student or #]) Expressive visual communication of words. Fundamental legibility of “invisible art.” overt expression through type. Students complete extended typographic project.

DHA 4351. Design Process: Photography. (3 cr; A-F only. Prereq—1311, 1312, [DHA major or grad or pre-major]) Relationship between photography, design projects. Composition, developing of film, printing.

DHA 4352. Design Process: Bookmaking. (3 cr; A-F only. Prereq—[DHA major or grad student or #], pass portfolio review) Construction of traditional/non-traditional book forms. Emphasizes material aspects of handmade books.

DHA 4354. Graphic Design IV: Integrative Campaign. (4 cr; A-F only. Prereq—3353, DHA major) Multi-faceted graphic communication campaign project involving substantial investigation and concept development. Project supports a unified concept for an identified client and is aimed at a specific market or interest group.

DHA 4355. Graphic Design Portfolio. (2 cr; S-N only. Prereq—[4354 or 4365], DHA major) Preparation of professional portfolio. Discussion of professional issues.

DHA 4365W. Graphic Design Senior Seminar. (4 cr; A-F only. Prereq—4354, DHA major) Students complete senior research/design project involving social, conceptual, and technical aspects. Capstone course.

DHA 4461. Housing Development and Management. (3 cr; A-F only. Prereq—[2401, 2402, 2463] or grad student or #) Housing development process/financing. Management of multifamily housing. Emphasizes housing for low-income families and special populations (e.g., elderly residents).

DHA 4465. Housing in a Global Perspective. (3 cr; A-F only. Prereq—[2401, 2463] or grad student or #) Housing, its relationship to global patterns of social/economic development examined in comparative framework. Emphasizes housing low income populations in rapidly growing cities of developing countries.

DHA 4607. Interior Design Studio VII. (4 cr; A-F only. Prereq—3606 with grade of at least C-, 3614, DHA major) Advanced interior design problems dealing with large scale spaces. Historic precedent, adaptive use, renovation.

DHA 4608. Interior Design Thesis. (4 cr; A-F only. Prereq—4615W with grade of at least C-, DHA major) Comprehensive independent interior design project developed from student-conducted research/program developed in 4615W.

DHA 4615W. Interior Design Research. (2 cr; A-F only. Prereq—[4607 or 4607], DHA major) Research methods for programming interior design solutions. Developing a comprehensive program. Issues that affect interior design research/practices.

DHA 5111. History of Decorative Arts. (4 cr; A-F only. Prereq—General art history survey course or #) In depth study of textiles, ceramics, metal, and glass from selected historical periods. Focus on the Goldstein Gallery collections.

DHA 5123. Living in a Consumer Society. (3 cr. Prereq—Sr or grad student) Consumerism within U.S. society. Commodification of health care, education, and production of news. Commercialization of public space/culture. What drives consumer society. How meaning is manufactured. What the lived experiences are of consumers today. Postmodern market. Alternatives to consumer society.

DHA 5170. Special Topics in Design, Housing, and Apparel. (1-4 cr [max 8 cr]; A-F only) In-depth investigation of a single specific topic, announced in advance.

DHA 5185. Human Factors in Design. (3 cr. Prereq—Grad student or sr or #) Theories/methods that influence the assessment of physical, social, and psychological human factors. Development of user needs with application to designed products that interact with human body.

DHA 5193. Directed Study in Design, Housing, and Apparel. (1-4 cr [max 4 cr]; A-F only. Prereq—#) Independent study in design, housing, and apparel under tutorial guidance.

DHA 5196. Field Study: National/International. (1-10 cr [max 10 cr]; A-F only) Faculty-directed field study in a national or international setting.

DHA 5215. Product Development: Softlines. (4 cr; A-F only. Prereq—2213 or clothing design major or retail merchandising major or grad student or #) Product development for apparel and other sewn products. Developing products in a laboratory studio setting for effectiveness, reliability, and marketability. Team approach using merchandising and design principles to develop products for specific markets.

DHA 5216. Retail Promotion and Consumer Decision Making. (4 cr; A-F only. Prereq—[1201, 2213, [jr or sr or grad student], [DHA major or minor]] or Δ) Consumer behavior theories/concepts as related to apparel. Application to understanding/developing retail promotional strategies: advertising/promotion.

DHA 5341. Interactive Design I. (3 cr; A-F only. Prereq—[[4334], [DHA major or grad student], pass portfolio review] or #) Design of interactive multi-media projects. Experience developing interactive presentations and electronic publishing. Software includes hypermedia, scripting, digital output.

DHA 5342. Interactive Design 2: Interface Design. (3 cr; A-F only. Prereq—[[4384 or 5341], [DHA major or DHA grad student]] or #) Introduction to design/usability of interface between humans and technology. Evaluation of visual elements that control/organize dealings with computers that are used to direct work. Students develop designs, evaluate their effectiveness through usability testing.

DHA 5382. Digital Sound and Video. (3 cr; A-F only. Prereq—[[4384 or 5341], [DHA major or grad student]] or #) Design solutions involving time-based media. Emphasizes sound/video. Electronic publishing via Internet.

DHA 5383. Digital Illustration and Animation. (4 cr; A-F only. Prereq—[[4384 or 5341], [DHA major or DHA grad student], experience with computer illustration] or #) Advanced computer design. Focuses on integration of design knowledge with Macintosh computer applications. Students use software to create digital illustration, 2D/3D digital animations. Technical/aesthetic investigation of processes inherent to 2D/3D motion graphics. Adobe Illustrator, After Effects, Macromedia Flash, 3D animation software.

DHA 5386. Fundamentals of Game Design. (3 cr; A-F only. Prereq—[[5341 or 4384], DHA major, [sr or grad student]] or #) Games of all kinds. Theoretical/practical aspects of making games. Investigation of design process. Rules, strategies, methodologies. Analysis of interactivity, choice, action, outcome, rules in game design. Social interaction, story telling, meaning/ideology, semiotics. Signs and cultural meaning.

DHA 5388. Design Planning, Analysis, and Evaluation. (3 cr; A-F only. Prereq—[4354, DHA major] or grad or #) Preliminary research, including theoretical, applied, and legal aspects. Planning/developmental models. Design prototyping, testing, and analysis.

DHA 5399W. Theory of Electronic Design. (3 cr; A-F only. Prereq—[DHA major, sr] or grad student or #; offered alternate yrs) Theories, methodologies, histories of electronic design, its impact on visual communications. Digital artifacts, processes, paradigms.

DHA 5463. Housing Policy. (3 cr; A-F only. SPA 5261. Prereq—2401, 2463 or #) Explore the institutional and environmental settings that make up housing policy in the United States. Examine competing ideas about solving the nation’s housing problems through public intervention in the market. Federal and local public sector responses to housing problems will be evaluated.

DHA 5467W. Housing and the Social Environment. (4 cr; A-F only. Prereq—2401 or #) Housing choices in context of social environment. Emphasizes special needs of elderly, disabled, minorities, large families, female-headed households, and low-income households. Students conduct a post-occupancy evaluation of housing.

DHA 5469. Understanding Housing: Assessment and Analysis. (3 cr; A-F only. Prereq—[2401, 2463] or #) How to formulate housing research problems and analyze/present information about housing characteristics/conditions. Students develop housing-related research/grant proposals, use/design cartographic/graphic information about housing, and give a presentation on a research project.

DHA 5471. Housing Studies Certificate Seminar. (2 cr; A-F only. Prereq—Admitted to Housing Studies Certificate Prog) Integrative seminar and “capstone” to Certificate program. Students prepare an individual career plan that focuses on application of housing studies to community/workplace.

DHA 5481. Housing for the Elderly and Special Populations. (3 cr; A-F only. Prereq—[2401, [jr or sr or grad student]] or #) Introduction to changing housing needs of individuals/families across life span. Emphasizes housing needs of children, older adults, and persons with disabilities.

DHA 5484. Rural Housing Issues. (3 cr; A-F only. Prereq—2401, 2463 or #) Housing issues in nonmetropolitan areas. The housing concerns of specific rural populations (e.g., low income, elderly persons, American Indians, migrant workers) are identified and comparisons with urban housing issues are made.

Dutch (DTCH)

Department of German, Scandinavian, and Dutch College of Liberal Arts

DTCH 1001. Beginning Dutch. (5 cr. \$DTCH 4001) Emphasis on working toward novice-intermediate low proficiency in all four language modalities (listening, reading, speaking, writing). Topics include everyday subjects (shopping, directions, family, food, housing, etc.).

DTCH 1002. Beginning Dutch. (5 cr. \$DTCH 4002. Prereq—1001) Continues the presentation of all four language modalities (listening, reading, speaking, writing), with a proficiency emphasis. Topics include free-time activities, careers, and Dutch culture.

DTCH 1003. Intermediate Dutch. (5 cr. \$DTCH 4003. Prereq—1002) Emphasis on intermediate proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is combined with authentic readings and essay assignments.

DTCH 1004. Intermediate Dutch. (5 cr. \$DTCH 4004. Prereq—1003) Emphasis on developing intermediate mid-high proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is supported by work with authentic readings and essay assignments.

DTCH 3011. Conversation and Composition. (3 cr. Prereq=1004 or 4004 or #)
Practice/refinement of spoken/written Dutch. Composition, vocabulary. Reading, viewing, and discussion of Dutch/Flemish media reports. Grammar review, critical corrective grammatical skills.

DTCH 3012. Conversation and Composition. (3 cr. Prereq=3011)
Further practice and refinement of spoken and written Dutch beyond the intermediate level; development of compositional skills and vocabulary based on the reading, viewing, and discussion of relevant Dutch and Flemish media reports. Grammar review and development of critical corrective grammatical skills.

DTCH 3310. Studies in Dutch Literature. (3 cr [max 9 cr]. Prereq=Reading knowledge of Dutch)
In-depth study of authors or topics from various periods in Dutch literature (e.g., 19th-century Dutch novels, colonial novels, literature of Golden Age). All primary literature is read in the original.

DTCH 3510. Topics in Dutch Culture. (3 cr [max 9 cr]. Prereq=No knowledge of Dutch required)
A single topic or theme of Dutch or Flemish culture explored in depth. Past topics have included Dutch national character, origin of the Batavian myth, and images of Dutchness.

DTCH 3610. Dutch Literature in Translation. (3 cr [max 9 cr]. Prereq=No knowledge of Dutch required)
In-depth study of authors or topics from various periods in Dutch literature. All primary/secondary literature is read in English translation.

DTCH 3993. Directed Studies. (1-5 cr [max 12 cr]. Prereq=#, Δ, □)
Guided reading in or study of Dutch literature, culture, or advanced language skills.

DTCH 4001. Beginning Dutch. (2 cr. §DTCH 1001. Prereq=1004 in another language or passing score on LPE or grad student)
Meets concurrently with 1001. See DTCH 1001 for description.

DTCH 4002. Beginning Dutch. (2 cr. §DTCH 1002. Prereq=1004 in another language or passing score on LPE or grad student)
Meets concurrently with 1002. See 1002 for description.

DTCH 4003. Intermediate Dutch. (2 cr. §DTCH 1003. Prereq=1004 in another language or passing score on LPE or grad student)
Meets concurrently with 1003. See 1003 for description.

DTCH 4004. Intermediate Dutch. (2 cr. §DTCH 1004. Prereq=1004 in another language or passing score on LPE or grad student)
Meets concurrently with 1004. See 1004 for description.

DTCH 5490. Topics in Dutch Literature. (3 cr [max 9 cr])
Topic may focus on a specific author, group of authors, genre, period, or subject matter. Topics specified in *Class Schedule*.

DTCH 5993. Directed Studies. (1-4 cr [max 12 cr]. Prereq=#, Δ, □)
Guided individual reading or study.

East Asian Studies (EAS)

Institute of International Studies

College of Liberal Arts

EAS 1462. Introduction to East Asia in Modern Times: 1600-2000. (4 cr. §HIST 1462)
Formation/decline of early modern Asian empires. Western imperialism, Asian nationalism. Social revolution, economic modernization, cultural change in China, Japan, Korea, Vietnam, 1600-2000.

EAS 3013. Introduction to East Asian Art. (3 cr. §ARTH 3013)
A selective examination of representative works of art produced in China, Korea, and Japan from the neolithic era to modern times. Nearly every major type of object and all major styles are represented.

EAS 3211. East Asia. (3 cr. §EAS 3211, GEOG 3211, GEOG 3215, GEOG 5211, GEOG 5215)
Physical and human geography of Japan, mainland China and Taiwan, North and South Korea; population pressure, economic and urban development, and international relations.

EAS 3461. Introduction to East Asia I: The Imperial Age. (4 cr. §HIST 3461)
Comparative survey of early history of China, Japan, Korea, and Vietnam; early Chinese thought; diffusion of Confucianism, Buddhism, and other values throughout East Asia; political and social history of region to 1600.

EAS 3462. Introduction to East Asia II: 1600-2000. (3-4 cr. §HIST 3462)
Formation/decline of early modern Asian empires. Western imperialism and Asian nationalism. Social revolution, economic modernization, and cultural change in China, Japan, Korea, and Vietnam.

EAS 3464. China in the Song, Yuan, and Ming Dynasties. (3 cr. §HIST 3464, HIST 5464)
China during the Song (976-1279), Yuan (1279-1368) and Ming (1368-1644) dynasties, political institutions and social structures. Attention to primary sources and how historians ask and answer questions about the past.

EAS 3465W. China in the Ming and Qing Dynasties. (3 cr. §HIST 3465W, HIST 5465)
The political and social history of China from about 1600 until the end of the Qing dynasty in 1911. Topics include ethnicity, daily life, legal structures, city life, and peasantry.

EAS 3467W. State and Revolution in Modern China. (3 cr. §HIST 3467W, HIST 5467)
Modern China's political evolution including the Taiping Rebellion, Republican Revolution, rise of Nationalist and Communist parties, Maoist era; reform under Deng Xiaping, and the emergence of democracy in Taiwan.

EAS 3468. Social Change in Modern China. (3 cr. §HIST 3468, HIST 5468)
Opium War and opening of Treaty Ports in 19th century; missionary activity and cultural influence; changes in education system; women's movement; early industrialization; socialism and collectivization after 1949; industrialization of Taiwan; PRC's entry into the world trading system.

EAS 3471. Modern Japan, Meiji to the Present (1868-2000). (3 cr. §HIST 3471)
World War I, Japan's emergence as an industrial society, world power in the 1920s. Rise of militarism, World War II in the Pacific. Political reform, economic resurgence, cultural change in postwar era.

EAS 3472. Early Modern Japan. (3 cr. §HIST 3472)
Tradition/change in society/culture under Tokugawa shoguns (1600-1867). Growth of cities. Decline of samurai class. Response to Western intrusion.

EAS 3473. Family, School, and Work in Modern Japanese History. (3 cr)
Impact of economic, social, and cultural change on males and females in the family, the education system, the employment system from the 17th through 20th centuries.

EAS 3474. The Rise of Modern Japan: 1850s to 1900s. (3 cr; A-F only. §HIST 3474)
The Meiji Revolution from Commodore Perry to the eve of World War I; origins of constitutional monarchy, industrial economy, Western influences, and modern cultural change.

EAS 3940. Topics in Asian History. (1-4 cr [max 16 cr]. Prereq=Jr or sr or #)
Selected topics in Asian history not covered in regular courses.

EAS 3970. Supplemental Discussion in East Asian Studies. (1 cr [max 3 cr]. Prereq=13xxx course)
Extra discussion section with T.A.

EAS 4473. Chinese Politics. (3 cr. §EAS 4473, POL 4473)
Focuses on fundamental conflicts in Chinese society; the democracy movement, human rights, class divisions, gender struggles, environmental issues, and capitalist vs. socialist development strategies. Secondary topics include Chinese foreign relations and domestic and foreign political issues in Taiwan.

EAS 4662. Comparative East Asian Development: A New Model for Growth and Prosperity? (3 cr; A-F only. Prereq=3661 or SOC 3661 or related Asian or sociology courses or East Asian experience or #)
Social and cultural reasons for the rapid growth and relative equity of Japan, South Korea, Taiwan, Hong Kong, Singapore and more recently, China. Relation of these examples to more general theories of development.

EAS 5940. Topics in Asian History. (1-4 cr [max 16 cr]. Prereq=Grad or intr consent)
Selected topics such as cultural, economic, intellectual, political, and social history.

Ecology, Evolution, and Behavior (EEB)

Department of Ecology, Evolution and Behavior

College of Biological Sciences

EEB 3001. Ecology and Society. (3 cr; A-F only. §BIOL 3407, BIOL 3807, BIOL 5407. Prereq=[Jr or sr] recommended; biological sciences students may not apply or toward major)
Basic concepts in ecology. Organization, development, function of ecosystem. Population growth/regulation. Human effect on ecosystems.

EEB 3361. Visions of Nature: The Natural World and Political Thought. (4 cr. §CSCL 3361. Prereq=Soph or jr or sr; biological sciences students may not apply these credits toward the major)
Theories about the organization of nature, human nature, and their significance for the development of ethics, religion, political and economic philosophy, civics, and environmentalism in Western and other civilizations.

EEB 3963. Modeling Nature and the Nature of Modeling. (3 cr. §EEB 5963. Prereq=[MATH 1281, MATH 1282] or equiv or #)
Hands-on modeling experiences in context of biological applications. Reviews calculus concepts. Students carry out modeling steps, from developing the model, to analytical analysis, to developing computer code, to running the models.

EEB 4014. Ecology of Vegetation. (3 cr. Prereq=3407, BIOL 3007)
Methods of describing, sampling, classifying vegetation. Spatial/temporal variation of vegetation, ecosystem properties on landscapes. Theory of structure/dynamics of terrestrial communities, ecosystems. Analysis of quantitative data. Field trips to local ecosystem types.

EEB 4016W. Ecological Biogeography. (3 cr. Prereq=BIOL 3407)
Biotic regions of world in general and North America in detail. Ecological principles of distribution, interpretations of regional/temporal patterns in distribution of vegetation, taxonomic groups of plants/animals. Includes one weekend field trip.

EEB 4129. Mammalogy. (4 cr; A-F only. §FW 4129. Prereq=BIOL 1001 or BIOL 2012)
Evolutionary and biogeographic history of mammalia. Recognize, identify, and study natural history of mammals at the ordinal level, North American mammals at familial level, and mammals north of Mexico at generic level. Minnesota mammals at specific level. Includes lab.

EEB 4134. Introduction to Ornithology. (4 cr. Prereq—BIOL 1001 or BIOL 2012)
Structure, evolution, classification, distribution, migration, ecology, habitats, identification of birds. Lecture, lab, weekly field walks. One weekend field trip.

EEB 4329. Primate Ecology and Social Behavior. (3 cr; A-F only. Prereq—BIOL 1001 or BIOL 1009 or BIOL 3411 or ANTH 1001 or #)
Primates as a model system to explore basic questions in animal/human behavior. Factors influencing sociality and group composition. Mating systems. Prevalence of altruistic, cooperative, and aggressive behavior. Strength of social bonds in different species. Evolution of intelligence/culture.

EEB 4601. Limnology. (3 cr; A-F only. Prereq—CHEM 1022)
Description and analysis of lakes and other aquatic environments beginning with lake origins and progressing through lake physics, chemistry, and biology. Interrelationships among these topics and effects of human activities.

EEB 4605. Limnology Laboratory. (1 cr; A-F only. \$GEO 4605. Prereq—4601 or #)

Field and lab methods used to obtain information on environmental conditions in aquatic environments and measure the abundance of aquatic organisms, especially plankton. Field/lab instruments, sampling devices, microscopy, water chemistry, data analysis.

EEB 4607. Plankton Ecology. (4 cr; A-F only. Prereq—4601 or GEO 4601)

Planktonic bacteria, algae, and animals in lakes, reservoirs, and oceans with special attention to processes that cause variations of abundance.

EEB 4609W. Ecosystem Ecology. (3 cr. Prereq—BIOL 3407 or #)

Regulation of energy and elements cycling through ecosystems. Dependence of cycles on kinds/numbers of species within ecosystems. Effects of human-induced global changes on functioning of ecosystems.

EEB 4611. Biogeochemical Processes. (3 cr. Prereq—[CHEM 2301, [BIOL 2032 or MICB 2032 or VPB 2032 or BIOL or 3301 or MICB 3301], PHYS 1201] or #)

Application of biochemistry, ecology, chemistry, and physics to environmental issues. Current issues in biogeochemistry. Impact of humans on biogeochemical processes in soils, lakes, oceans, estuaries, forests, urban/managed ecosystems, and extreme environments (e.g., early Earth, deep sea vents, thermal springs).

EEB 4631. Global Ecology. (4 cr; A-F only. Prereq—[college level ecology course, 2 semesters of [chemistry, high-school physics]] or #)

Interactions between biosphere/lithosphere, atmosphere/oceans throughout Earth history. How climate is influenced on long time scales (evolution of photosynthesis) and on decadal time scales (forest clearance). Earth as an interacting ecosystem. Evaluating future effects of accumulating greenhouse gases.

EEB 4793W. Directed Studies: Writing Intensive. (1-7 cr [max 7 cr]; S-N only. Prereq—#, Δ)
Individual study on selected topics or problems. Emphasizes readings, use of scientific literature. Written report.

EEB 4794W. Directed Research: Writing Intensive. (1-6 cr [max 42 cr]; S-N only. Prereq—#, Δ)
Laboratory or field investigation of selected areas of research, including written report.

EEB 4801. Field Limnology. (4 cr. Prereq—[CHEM 1022, [3001 or BIOL 3407]] or #)

Description/analysis of lakes, streams, and other aquatic environments. Lake origins, physics, chemistry, and biology. Focuses on how different forcings, including human ones, affect biological dynamics and interactions. Field work emphasizes comparative approach to differences in northern Minnesota's lakes, bogs, and streams.

EEB 4809. Field Ecosystem Ecology. (3 cr. Prereq—Beginning biology)

Introduction to ecosystem ecology. Emphasizes field application of ecosystem theory/techniques. Material/energy flow through ecosystems. How factors such as natural disturbances and human activities affect ecosystems. Productivity and trophic transfers in lakes, prairies, and forests. Impacts of fire. Bison grazing on grasslands. Forest competition/regeneration. Atmospheric nitrogen deposition. Paleo-ecological techniques for understanding long-term ecosystem dynamics.

EEB 4814. Plant Community Ecology. (4 cr; A-F only. Prereq—Ecology course)

Communities represented in Itasca Park and vicinity with emphasis on vegetation, patterns of distributions of communities, their interaction with environment and dynamic relationships, methods of community, and description and analysis.

EEB 4817. Vertebrate Ecology. (4 cr. Prereq—Beginning biology)

Field studies on vertebrate populations, their relationships to local environments, habitat analysis, and ecological research methods. Students work individually or in teams to investigate behavioral/ecological aspects of selected vertebrates. Lectures, field trips.

EEB 4825. Telemetry and Animal Behavior. (2 cr. Prereq—General biology)

Using latest techniques in radio telemetry to study animal behavior, especially animal movements and home ranges. Methods of attaching radio transmitters, locating radio-tagged animals, determining accuracy of positional data, calculating positions. Software for home range calculations/ placement of data on a GIS base system.

EEB 4839. Field Studies in Mammalogy. (4 cr; A-F only. Prereq—[College-level biology course that includes study of animals or #], Δ)

Techniques for studying small mammals. lectures and field projects emphasize identification, distributions, community interactions, ecophysiology, and population ecology.

EEB 4842. Arctic Field Ecology. (4 cr; A-F only. Prereq—Basic courses in [ecology, organismal biology], approved application)

Arctic natural history/ecology explored via a four-week trip to Northwest Territories of Canada. Students travel by van, air, and inflatable canoes; design their own research projects; help with ongoing studies in landscape/riparian ecology; learn field skills/techniques associated with ecological studies in Arctic regions; and work directly with local Inuit people about traditional ecological knowledge.

EEB 4844. Field Ornithology. (4 cr; A-F only. Prereq—General biology including zoology, Δ)

Introduction to biology of breeding birds through use of field techniques at Lake Itasca Forestry and Biological Station. Daily field work emphasizes identification, behavioral observations, netting/ censusing.

EEB 4993. Directed Studies. (1-7 cr [max 7 cr]; S-N only. Prereq—#, Δ)

Individual study on selected topics or problems. Emphasizes selected readings, use of scientific literature.

EEB 4994. Directed Research. (1-6 cr [max 42 cr]. Prereq—#, Δ)

Laboratory or field investigation of selected areas of research.

EEB 5001. Spatiotemporal Dynamics of Plant Communities. (3 cr. Prereq—[BIOL 3407, 4014] or #)

Dynamic nature of plant communities in times of environmental changes. Emphasizes species invasion as key for structure/dynamics of plant assemblages. Observational, theoretical, and experimental studies on spatiotemporal dynamics of plant communities under various changes in biological/environmental conditions, including human-induced Global Warming.

EEB 5008. Forest Response to Quaternary Climate Change. (2 cr; A-F only. Prereq—BIOL 3407, EEB 4631 or GEO 4631 concurrent registration EEB 5009)

Forest responses to past climate change at the population, community, and ecosystem level. Response to natural and human disturbance, range shifts and invasions. Limitations to the speed of response to rapid climate change.

EEB 5009. Quaternary Vegetation History and Climate. (3 cr. Prereq—[[4631 or GEO 4631], BIOL 3407] or #)

History of vegetation/climate change in Quaternary period. Importance of mechanistic understanding on interpretation of historical events. Vegetation distribution/climate. Mechanisms of climate change and long-term vegetation dynamics. Vegetation and climate reconstructions. Modeling in paleoecology and paleoclimatology. Case studies in North America and other parts of globe. Human impacts on vegetation and climate.

EEB 5011. Pollen Morphology. (2 cr. Prereq—BIOL 3007, PBIO 4321 or #)

Morphology and nomenclature of pollen grains and pteridophyte spores, survey of pollen and spores of major plant families, lab techniques.

EEB 5013. Quaternary Plant Macrofossils. (2 cr. Prereq—PBIO 4321 or 4511 or #)

Morphology of seeds, fruits, and other macroscopic remains likely to occur in Quaternary deposits, survey of fossils of major plant families, lab techniques.

EEB 5033. Population and Quantitative Genetics. (4 cr; A-F only. Prereq—[[BIOL 4003 or GCD 3022], intro statistics] or #)

Fundamentals of quantitative genetics. Genetic/ environmental influences on expression of quantitative traits. Approaches to characterizing genetic basis of trait variation. Processes that lead to change in quantitative traits. Applied/evolutionary aspects of quantitative genetic variation.

EEB 5042. Quantitative Genetics. (3 cr. Prereq—[BIOL 4003 or GCD 3022] or #; a course in statistics is recommended)

Fundamentals of quantitative genetics. Genetic/ environmental influences on expression of quantitative traits. Approaches to characterizing genetic basis of trait variation. Processes that lead to change in quantitative traits. Applied/evolutionary aspects of quantitative genetic variation.

EEB 5051. Analysis of Populations. (3 cr. \$FW 5051. Prereq—Intro biology, intro statistics or #)

Factors involved in the regulation, growth, and general dynamics of populations. Data needed to describe populations, population growth, population models, and regulatory mechanisms.

EEB 5053. Ecology: Theory and Concepts. (4 cr. Prereq—BIOL 3407 or #)

Classical and modern mathematical theories of population growth, interspecific interactions, ecosystem dynamics and functioning, with emphasis on underlying assumptions and on effects of added biological reality on robustness of predictions, stability, interspecific interactions, ecosystem structure and functioning.

EEB 5122W. Plant Interactions with Animals and Microbes. (3 cr; A-F only. Prereq—BIOL 2012 or 3002, 3407 or 3409)

Ecological and environmental implications of mutualistic and antagonistic interactions between plants, animals and microbes at organismal, population, and community levels.

EEB 5124. Plant Physiological Ecology/Plant Physiological Ecology. (4 cr)

Plant function, its plasticity/diversity in an ecological context. Impact of environmental stresses on major physiological processes of plants, including photosynthesis, respiration, water uptake/transport, and nutrient uptake/assimilation. Lab, field trip to Cedar Creek.

EEB 5146. Science and Policy of Global Environmental Change. (3 cr; A-F only. \$FR 5146. Prereq=BIOL 3407 BIOL 5407 or equiv)

Critical issues underpinning global change and its biological implications. Current scientific literature in exploring evidence for human-induced global change and its potential effects on a wide range of biological processes. Emphasizes terrestrial ecosystems. Economic drivers, economic consequences. Local, national, and international laws and policies.

EEB 5221. Molecular and Genomic Evolution. (3 cr; A-F only. Prereq=[BIOL 4003 or GCD 3022], grad student) or #) Molecular basis of evolutionary change. Current studies of selection and neutral evolutionary processes at molecular level. Evolution from gene to genome level: protein structure and function, multigene families, organelle genomes, genome organization. Lectures, discussions of current literature, and workshops where students practice analyses.

EEB 5321. Evolution of Social Behavior. (3 cr; A-F only. Prereq=BIOL 3411 or #) Introduction to theories and concepts relating to behavior evolution, mating systems, and cooperative behavior in animals.

EEB 5322. Evolution and Animal Cognition. (3 cr. Prereq=BIOL 3411 or PSY 3061 or #) Animal cognitive abilities. Learning, perception, memory, navigation, and communication from evolutionary/comparative perspective. Cognitive abilities as adaptations that solve specific environmental problems. Empirical methods for assessing cognitive abilities. Emphasizes parsimonious interpretations of data. Controversial topics such as animal intelligence, animal language and whether non-human animals have a "theory of mind."

EEB 5323. Neural and Endocrine Mechanisms Underlying Vertebrate Behavior. (2 cr; A-F only. Prereq=BIOL 3411 or BIOL 3101 or NSC 3101 or PHSL 3101 or #) Selected aspects of the physiological basis of vertebrate behavior with emphasis on neural and endocrine integration and the effects of evolutionary pressures on it. Hormones and sex behavior, sensory perception, neuroethology of communication.

EEB 5327. Behavioral Ecology. (3 cr. Prereq=BIOL 3411 or #) Evolutionary principles applied to aggressive competition, mate choice, cooperation, and parental investment. Optimization models used to examine foraging strategies, predator/prey interactions, and territoriality. Evolution of sex, sexual selection, dispersal. Evolutionary game theory.

EEB 5361. Visions of Nature: The Natural World and Political Thought. (4 cr. Prereq=Advanced studies in history, philosophy, or biology) Theories about the organization of nature, human nature, and their significance for the development of ethics, religion, political and economic philosophy, civics, and environmentalism in Western and other civilizations. Graduate credit requires paper on conceptual topic on human ecology.

EEB 5371. Principles of Systematics. (3 cr. Prereq=Grad student or #) Theoretical/practical procedures of biological systematics. Phylogeny reconstruction. Computer-assisted analyses, morphological and molecular approaches, species concepts/speciation, comparative methods, classification, historical biogeography, nomenclature, use/value of museums.

EEB 5609. Ecosystem Ecology. (3 cr. Prereq=BIOL 3407 or BIOL 5407) or #) Regulation of energy and elements cycling through ecosystems. Dependence of cycles on kinds/numbers of species within ecosystems. Effects of human-induced global changes on functioning of ecosystems.

EEB 5961. Decision Analysis and Modeling in Conservation Biology. (3 cr. Prereq=Grad student or #) Decision analysis/modeling in conservation biology. Techniques, concepts, software.

EEB 5963. Modeling Nature and the Nature of Modeling. (3 cr. \$EEB 3963. Prereq=[MATH 1281, MATH 1282] or equiv or #)

Hands-on modeling experiences in context of biological applications. Reviews calculus concepts. Students carry out modeling steps, from developing the model, to analytical analysis, to developing computer code, to running the models.

Economics (ECON)

Department of Economics

College of Liberal Arts

ECON 1101. Principles of Microeconomics. (4 cr. \$APEC 1101, ECON 1101H, ECON 1104. Prereq=knowledge of plane geometry and advanced algebra)

Microeconomic behavior of consumers, firms, and markets in domestic and world economy. Demand and supply. Competition and monopoly. Distribution of income. Economic interdependencies in the global economy. Effects of global linkages on individual decisions.

ECON 1101H. Honors Course: Principles of Microeconomics. (4 cr. \$APEC 1101, ECON 1101, ECON 1104. Prereq=MATH 1271)

Microeconomic behavior of consumers, firms, markets in domestic/world economy. Demand/supply. Competition/monopoly. Distribution of income. Effects of economic interdependencies, global linkages on individual decisions. Emphasizes algebra, geometry, basic logic, proofs.

ECON 1102. Principles of Macroeconomics. (4 cr. \$APEC 1102, ECON 1102H, ECON 1105. Prereq=[1101 or equiv], knowledge of plane geometry and advanced algebra)

Aggregate consumption, saving, investment, and national income. Role of money, banking, and business cycles in domestic and world economy. International trade, growth, and development. U.S. economy and its role in the world economy. International interdependencies among nations.

ECON 1102H. Honors: Principles of Macroeconomics. (4 cr. \$APEC 1102, ECON 1102, ECON 1105. Prereq=[1111 or equiv], MATH 1271, CSOM honors)

Aggregate consumption, saving, investment, and national income. Money, banking, and business cycles in domestic/global economy. International trade, growth, and development. Role of the United States in world economy, international interdependencies. Emphasizes economic models to explain macroeconomic phenomena.

ECON 1104. Principles of Microeconomics. (4 cr. \$APEC 1101, ECON 1101, ECON 1101H. Prereq=MATH 1271)

Microeconomic behavior of consumers, firms, and markets in domestic/world economy. Demand and supply. Competition and monopoly. Distribution of income. Effects of economic interdependencies and global linkages on individual decisions. Use of calculus and mathematical models.

ECON 1105. Principles of Macroeconomics. (4 cr. \$APEC 1102, ECON 1102, ECON 1102H. Prereq=[1104 or equiv], MATH 1271)

Aggregate consumption, saving, investment, national income. Role of money, banking, and business cycles in the domestic/world economy. International trade, growth, and development. U.S./world economy. International interdependencies among nations. Emphasizes calculus and mathematical reasoning.

ECON 1902. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq=Freshman) Topics specified in *Class Schedule*.

ECON 1903. Freshman Seminar. (3 cr; A-F only. Prereq=Freshman) Topics specified in *Class Schedule*.

ECON 1904. Freshman Seminar. (3 cr; A-F only. Prereq=Freshman) Topics specified in *Class Schedule*.

ECON 1905. Freshman Seminar. (3 cr. Prereq=Freshman) Topics specified in *Class Schedule*.

ECON 1910W. Freshman Seminar. (3 cr; A-F only. Prereq=Freshman) Topics specified in *Class Schedule*.

ECON 3021. Survey of Economic Ideas. (3 cr. \$ECON 4022. Prereq=1101, 1102 or equiv; not open to ECON majors) A historical and analytical treatment of how important economic ideas developed over time, and their relationship to prevailing economic conditions and politics. Economic ideas from Adam Smith to the present.

ECON 3031. American Economic Problems. (3 cr. \$BP 4001, ECON 4031. Prereq=1101, [1102 or equiv]; ECON majors consult first with CLA adviser) American economic problems/relationships. Relevance of simple economic principles to economic problems in the United States.

ECON 3033. Current Economics Issues. (3 cr [max 6 cr]. \$ECON 4033. Prereq=1101, 1102 or equiv; not open to ECON majors) Current controversies over economic policies used to deal with some economic problems. Students focus in part on a specific issue of their choice. Different economic issues are discussed each time the course is offered (every three years).

ECON 3041. Prospective World Economy. (3 cr. \$ECON 4041. Prereq=[1101, 1102] or equiv or ECON major with CLA adviser approval) What economic future holds. What can be done about global issues. How to improve economic prospects of countries.

ECON 3101. Intermediate Microeconomics. (4 cr. \$APEC 3001, ECON 3101H, ECON 3105. Prereq=1101, 1102 or equiv, MATH 1271 or equiv) Behavior of households, firms, and industries under competitive and monopolistic conditions; factors influencing production, price, and other decisions of the firm; applications of the theory. Economic efficiency and distribution of well-being.

ECON 3101. Honors Course: Intermediate Microeconomics. (4 cr. \$APEC 3001, ECON 3101, ECON 3105. Prereq=1101, 1102 or equiv, MATH 1271 or equiv, honors) Behavior of households, firms, and industries under competitive and monopolistic conditions; factors influencing production, price, and other decisions of the firm; applications of the theory. Economic efficiency and distribution of well-being.

ECON 3102. Intermediate Macroeconomics. (4 cr. \$APEC 3006, ECON 3102H. Prereq=3101 or equiv) Determinants of national income, employment, and price level; effects of monetary and fiscal policies; emphasis on a general equilibrium approach. Applications of the theory, especially to current macroeconomic policy issues.

ECON 3102H. Honors Course: Intermediate Macroeconomics. (4 cr. \$APEC 3006, ECON 3102. Prereq=3101 or equiv, honors) Determinants of national income, employment, and price level; effects of monetary and fiscal policies; emphasis on a general equilibrium approach. Applications of economic efficiency and distribution of well-being.

ECON 3105. Managerial Economics. (4 cr. \$APEC 3001, ECON 3101, ECON 3101H. Prereq=1101, [1102 or equiv], [MATH 1271 or equiv]; not open to ECON majors) Theory of the firm. Managerial decision problems. Demand theory. Production technology and cost concepts. Pricing/output decisions under different market structures. Investment behavior. Government regulation.

ECON 3501. Labor Economics. (3 cr. \$ECON 4531. Prereq=1101, 1102 or equiv; not open to ECON majors) Role of labor in economy; labor as factor of production, population, and labor force; economics of labor markets; labor market institutions; theories of wages and employment; unions and collective bargaining; public policy.

ECON 3601. Industrial Organization and Antitrust Policy. (3 cr. §ECON 4631, ECON 4631H. Prereq—1101, 1102 or equiv; not open to ECON majors)
Industrial organization and market structures. Relations between market structure, economic efficiency, and welfare. Purposes and effects of antitrust and related legislation. Industrial policy.

ECON 3611. Environmental Economics. (3 cr. Prereq—1101, 1102, or equiv; not open to ECON majors)
Dependence of the economy on the environment; alternative visions of the future and issues on which actual outcome will depend, particular attention to global warming; future generations and sustainability; economic incentives for environmental protection and degradation; economic aspects of environmental policies.

ECON 3701. Money and Banking. (3 cr. §ECON 4721, ECON 4721H. Prereq—1101, 1102 or equiv; not open to ECON majors)
Historical development, present characteristics, and economic role of financial institutions. Commercial banking, the Federal Reserve System, and monetary policy.

ECON 3801. Elements of Public Economics. (3 cr. §ECON 4821. Prereq—[1102 or equiv]; not open to ECON majors)
Competing views on proper role of government in economy. Effects of tax/spending policies. Private agents' response to government actions. Optimal policies. Applications primarily to U.S. federal government.

ECON 3951. Major Project Seminar. (2 cr. Prereq—3101, 3102 or equiv, ENGC 3027)
Students produce a significant piece of written work in economics. Project should demonstrate critical thinking, collection and analysis of data, problem solving, effective interpretation of findings. Students should attain understanding and proficiency in modes of inquiry in economics.

ECON 3960. Topics in Economics. (3 cr [max 6 cr]. Prereq—1101, 1102 or equiv)
Topics specified in *Class Schedule*.

ECON 3991. Independent Study. (1-3 cr [max 3 cr]; A-F only. Prereq—1101, 1102, #)
Students confirm topic of study with faculty supervisor or with director of undergraduate studies before beginning (otherwise no credit).

ECON 3993. Directed Studies. (1-3 cr [max 3 cr]. Prereq—1101, 1102 or equiv, #)
Guided individual reading or study in areas not available in regular course offerings.

ECON 4021. Economics, Ethics, and Economic Philosophy. (3 cr. Prereq—[1101, 1102] or equiv)
Types of economics. Ethics and its economic applications. Bases of different economic philosophies. Topics vary by semester. Examples: relationships between freedoms/responsibilities, economics/ethics of stakeholder concept, different concepts of property rights or justice.

ECON 4022. Survey of Economic Ideas. (3 cr. §ECON 3021. Prereq—3101, 3102 or equiv)
Historical and analytical view of how important economic ideas developed and their relationship to prevailing economic conditions and politics. Economic ideas from Adam Smith to the present.

ECON 4031. American Economic Problems. (3 cr. §BP 4001, ECON 3031. Prereq—3101, 3102 or equiv)
Discussion of American economic problems and relationships. Relevance of simple economic principles to economic problems in the United States.

ECON 4033. Current Economic Issues. (3 cr [max 6 cr]. §ECON 3033. Prereq—3101, 3102 or equiv)
Current controversies over economic policies used deal with some economic problems. Students focus in part on a specific issue. Different economic issues are discussed every time the course is offered (every three years).

ECON 4041. The Prospective World Economy. (3 cr. §ECON 3041. Prereq—3102 or equiv)
Considers what the economic future holds, what can be done now to deal with global issues, and how to improve economic prospects of countries.

ECON 4100W. Undergraduate Writing in Economics. (1 cr [max 2 cr]; A-F only. Prereq—3101, [14831 or Economics honors course], #)
Research essay.

ECON 4109H. Honors Course: Game Theory and Applications. (4 cr. Prereq—3101, 3102 or equiv, MATH 1271-1272 or equiv)
Games; normal form and extensive form; wars of attrition; games of timing; bargaining applications in industrial organization, macroeconomics, and international economics.

ECON 4113. Introduction to Mathematical Economics. (4 cr. Prereq—3101, 3102 or equiv, MATH 1271-1272-2243 or equiv)
Development of selected models of economic behavior in mathematical terms. Topics selected to illustrate the advantages of a mathematical formulation.

ECON 4161. Microeconomic Analysis. (2 cr. Prereq—[3101 or 5151 or equiv], Math 2243, Math 2263, #)
Theories of consumer demand, producer supply, and market equilibrium. General equilibrium and welfare. May include topics such as externalities, economics of information/uncertainty. Seven-week course. Meets with 8001.

ECON 4162. Microeconomic Analysis. (4 cr; A-F only. Prereq—4161, #)
Theories of consumer demand, producer supply, and market equilibrium. General equilibrium and welfare. May include topics such as externalities, economics of information/uncertainty, and game theory. Seven-week course. Meets with 8002.

ECON 4163. Microeconomic Analysis. (2 cr. Prereq—4162, #)
Theories of consumer demand, producer supply, and market equilibrium. General equilibrium and welfare. May include topics such as externalities, economics of information/uncertainty, and game theory. Seven-week course. Meets with 8003.

ECON 4164. Microeconomic Analysis. (2 cr. Prereq—4163, #)
Theories of consumer demand, producer supply, and market equilibrium. General equilibrium and welfare. May include topics such as externalities, economics of information/uncertainty, and game theory. Seven-week course. Meets with 8004.

ECON 4165. Macroeconomic Theory. (2 cr. Prereq—[3102, [(Math 2243, Math 2263] or equiv)], #)
Dynamic general equilibrium models: solving for paths of interest rates, consumption, investment, and prices. Seven-week course. Meets with 8105.

ECON 4166. Macroeconomic Theory. (2 cr. Prereq—4165, #)
Dynamic general equilibrium models: solving for paths of interest rates, consumption, investment, and prices. Seven-week course. Meets with 8106.

ECON 4167. Macroeconomic Theory. (2 cr. Prereq—4166, #)
General equilibrium models with uncertainty, search, matching, indivisibilities, private information. Implications of theory for measurement and data reporting. Overlapping generations, dynasty models with money/government. Variational/recursive methods. Seven-week course. Meets with 8107.

ECON 4168. Macroeconomic Theory. (2 cr. Prereq—4167, #)
General equilibrium models with uncertainty, search, matching, indivisibilities, private information. Implications of theory for measurement and data reporting. Overlapping generations, dynasty models with money/government. Variational/recursive methods. Seven-week course. Meets with 8108.

ECON 4171. History of Economic Thought. (3 cr. Prereq—3101, 3102 or equiv)
Primarily a critical reading course. Topics include Smith, Ricardo, Malthus, and Marx; neoclassicists, Keynes, the mercantilist and physiocratic doctrines; and modern theory.

ECON 4211. Principles of Econometrics. (4 cr. Prereq—[[1101, 1102] or equiv], Math 2243 [or equiv], [STAT 3021, STAT 3022] or equiv, familiarity with computers)
Data analysis/quantitative methods in economics. Violation of classical regression model assumptions, modified estimation procedures that retain desirable properties. Multi-equation models. Computer applications/interpretation of empirical results.

ECON 4261. Introduction to Econometrics. (4 cr; A-F only. Prereq—[3101 or equiv], [[MATH 1271, MATH 1272] or equiv], Math 2243, Math 2263, [STAT 4101, STAT 4102] or [STAT 5101, STAT 5102]; MATH 4242 strongly recommended)
Review of basic linear regression model, its variants. Time series/simultaneous equation models. Material may include panel data, censored/truncated regressions, discrete choice models.

ECON 4262. Econometric Analysis. (2 cr. Prereq—4261)
Review of basic linear regression model, its variants. Time series/simultaneous equation models. Material may include panel data, censored/truncated regressions, discrete choice models.

ECON 4301. Economic Development. (3 cr. §ECON 4331W. Prereq—[[1101, 1102] or equiv], non-ECON major)
Economic growth in low income countries. Theory of aggregate and per capita income growth. Population growth, productivity increases, capital formation. Allocation of resources between consumption and investment and among sectors. International assistance and trade.

ECON 4307. Comparative Economic Systems. (3 cr. §ECON 4337. Prereq—1101, 1102 or equiv; not open to ECON majors)
Functions of economic systems; market economy vs. centrally planned economy. Post socialist transitions in Eastern Europe, Russia, and China and reforms undertaken. Initial conditions and strategies for reforms; results of reforms in terms of key economic indicators.

ECON 4311. Economy of Latin America. (3 cr. Prereq—[1101, 1102] or equiv)
Economic evolution in Latin America since 1950. Trade liberalization, poverty, inflation, development strategies in selected Latin American countries. Theory/applications of important issues.

ECON 4313. The Russian Economy. (3 cr. Prereq—1101, 1102 or equiv)
Main features of the Soviet economic system and its economic development from 1971 to 1980s. Collapse of the Soviet Union in 1991. Recent economic reforms adopted by Russia and the Commonwealth of Independent States. Russia and its relations with the world.

ECON 4315. The Japanese Economy. (3 cr. Prereq—1101, 1102 or equiv)
Economic development following contact with western civilization. Issues covered include trade, development and growth, population growth, capital formation, international economic relations, agricultural and industrial policies; role of the government in the economy, and current issues of interest.

ECON 4331W. Economic Development. (3 cr. §ECON 4301. Prereq—3101, 3102 or equiv)
Economic growth in low income countries. Theory of aggregate and per capita income growth. Population growth, productivity increases, and capital formation. Allocation of resources between consumption and investment and among sectors. International assistance and trade.

ECON 4337. Comparative Economic Systems. (3 cr. §ECON 4307. Prereq—3101, 3102 or equiv)
Functions of economic systems; market economy versus centrally planned economy. Comparison of different economic systems. Post socialist transitions in Eastern Europe, Russia, and China. Initial conditions and strategies for reforms; results of reforms in terms of key economic indicators.

ECON 4401. International Economics. (3 cr. Prereq—[[1101, 1102] or equiv], not open to ECON majors)
International trade flows. Commercial policy and welfare implications, protection. Global trade organizations. International factor mobility. Balance of payments analysis and open-economy macroeconomics. Foreign exchange markets and exchange rate determination. International monetary system. Regional integration.

ECON 4421W. Economic Integration of the Americas. (3 cr. Prereq—3101, 3102 or equiv or #)
Analysis of economic relationships among countries in the Western Hemisphere. Modeling the impact of NAFTA and similar regional trade accords. Prospects for further integration. Comparison with European integration.

ECON 4431V. Honors Course: International Trade. (4 cr. Prereq—[[3101, 3102] or equiv], MATH 1271)
Theories of trade and explanations of trade patterns. Trade restrictions and commercial policy. International factor movements. Economic growth, economic development, and trade. Multinational corporations. Regional integration. Transition economies and trade.

ECON 4431W. International Trade. (3 cr. Prereq—3101, 3102 or equiv)
Theories of trade and explanations of trade patterns. Trade restrictions and commercial policy. International factor movements. Economic growth, economic development, and trade. Multinational corporations. Regional Integration. Transition economies and trade.

ECON 4432W. International Finance. (3 cr. Prereq—3101, 3102 or equiv; 4431 or 4439 or equiv recommended)
Balance of payments; international financial markets; exchange rate determination; international monetary system; international investment and capital flows; financial management of the multinational firm; open economy macroeconomic policy.

ECON 4531. Labor Economics. (3 cr. §ECON 3501. Prereq—3101, 3102 or equiv)
Economic analysis of labor markets and their operations; population and labor force; labor market institutions; wage and employment theories; unions and collective bargaining; public policy.

ECON 4560. Economics of Discrimination. (3 cr. Prereq—[3101, 3102] or equiv; [STAT 3011, STAT 3022] recommended)
Theory and empirical evidence of labor/consumer markets discrimination. Race/gender differentials. Effects of anti-discrimination policies such as affirmative action. Use of economic models, formal statistical analysis.

ECON 4611H. Honors Course: Environmental Valuation. (4 cr. §ECON 4831. Prereq—[3101 or equiv], [MATH 1271 or equiv])
Principles of cost-benefit analysis used for valuing the environment, costs of pollution. Defining, measuring, valuating benefits/costs. Economic growth, sustainable growth. Economic, ecological, ethical issues in using renewable/non-renewable resources. Optimal rate of use. Optimal pollution control.

ECON 4621H. Honors Course: Urban Economics. (4 cr. Prereq—3101 or equiv)
Economics of urbanization. Location of economic activity and cities. Central place theory. Site rents and form of city. Urban economic base and economic policy. Urban problems and economic policies: transportation, poverty/segregation, housing, public finance.

ECON 4623. Housing Markets and Public Policy. (3 cr. Prereq—1101, 1102 or equiv)
Analysis of housing markets. Market failures, externalities and the case for government intervention. Relative efficiency of particular forms of intervention.

ECON 4631. Industrial Organization and Antitrust Policy. (3 cr. §ECON 3601, ECON 4631H. Prereq—3101 or equiv)
Relations between market structure, economic efficiency and welfare. Economic origins of monopoly and other restraints on competition. Purposes and effects of antitrust and related legislation. Industrial policy.

ECON 4631H. Honors Course: Industrial Organization and Antitrust Policy. (4 cr. §ECON 3601, ECON 4631. Prereq—3101 or equiv)
Economic aspects of antitrust and related policies. Relations between market structure, economic efficiency, and welfare. Economic origins of monopoly and other restraints on competition. Purposes/effects of antitrust/related legislation.

ECON 4721. Money and Banking. (3 cr. §ECON 3701, ECON 4721H. Prereq—3101 or equiv)
Theories of money demand and money supply. Financial intermediation and banking, banking practices and regulation, role of the Federal Reserve system. Monetary policy.

ECON 4721H. Honors Course: Money and Banking. (4 cr. §ECON 3701, ECON 4721. Prereq—[3101 or equiv]; MATH 1271)
Theories of money demand and money supply. Financial intermediation, banking, nonbank financial institutions, banking practices, bank regulation, international banking, role of Federal Reserve system. Monetary policy.

ECON 4731. Macroeconomic Policy. (3 cr. Prereq—3101, 3102 or equiv)
Monetary vs. fiscal policy debate in the context of the underlying macroeconomic theory controversy. Comparison of Keynesian, Monetarist, and Classical theories; rational expectations; policy ineffectiveness; time inconsistency; rules vs. discretion; budget deficits; unemployment and inflation.

ECON 4731H. Honors Course: Macroeconomic Policy. (4 cr. Prereq—[[3101, 3102] or equiv], MATH 1271, honors)
Monetary vs. fiscal policy debate in context of underlying macroeconomic theory controversy. Comparison of Keynesian, Monetarist, and Classical theories. Rational expectations, policy ineffectiveness, time inconsistency, rules versus discretion, budget deficits. Unemployment and inflation.

ECON 4741. Quantitative Analysis of the Macroeconomy. (3 cr. Prereq—[[3101, 3102] or equiv], [STAT 3011 or equiv])
Development/calibration of growth model. Effects of policies on output, employment, other aggregate variables. Documentation of business cycle facts. Estimation of business cycles' cost. Real business theory, prediction of business cycle facts. Money in augmented model.

ECON 4741H. Honors: Quantitative Analysis of the Macroeconomy. (4 cr. Prereq—[[3101, 3102] or equiv], [STAT 3011 or equiv])
Development/calibration of growth model. Effects of policies on output, employment, and other aggregate variables. Documentation of business cycle facts. Estimation of business cycles' cost. Real business theory. Prediction of business cycle facts. Money in augmented model.

ECON 4751. Financial Economics. (3 cr. §ECON 4751H. Prereq—3101 or equiv, MATH 1271 or equiv, 1 sem statistics)
Financial decisions of firms and investors. Determination of interest rates and asset prices. Role of risk and uncertainty. Emphasis on economic models rather than the details of financial institutions.

ECON 4751H. Honors Course: Financial Economics. (4 cr. §ECON 4751. Prereq—3101, [3102 or equiv], [MATH 1271 or equiv], [STAT 3011 or equiv])
Efficiency of financial markets. Theoretical concepts, empirical evidence.

ECON 4821. Public Economics. (3 cr. §ECON 3801. Prereq—§ECON 3801; prereq 3101, 3102 or equiv)
Competing views on the proper role of government in the economy. Effects of tax and spending policies, taking into account private agents' response to government actions and the ways government officials may use their powers; optimal policies. Applications primarily to U.S. government.

ECON 4831. Cost-Benefit Analysis. (3 cr. §ECON 4611H. Prereq—3101 or equiv)
Principles for evaluation of benefits/costs of public projects or programs. Issues connected with definition/measurement of benefits/costs. Rate of return, rate of discount. Market imperfections, risk, and uncertainty. Case studies of applications of theory.

ECON 4960. Topics in Economics. (3 cr [max 6 cr]. Prereq—3101, 3102 or equiv; MATH 1271 [may change based on topic])
Topics specified in *Class Schedule*.

ECON 4991. Independent Study. (1-4 cr [max 4 cr]. Prereq—Honors student, topic approved by [faculty supervisor or dir of undergrad studies])
Honors thesis.

ECON 4993. Directed Study. (1-4 cr [max 4 cr]. Prereq—For honors thesis, #)
Guided individual reading or study in areas not available in regular course offerings.

ECON 5109H. Game Theory for Engineers. (4 cr; A-F only. Prereq—[[[Math 2283, Math 2373, Math 2374, MATH 3283] or MATH 4606], M.S./Ph.D. student in [engineer or comp sci or info tech or operations mgmt]] or #; not for ECON [undergrads or PhD students])
Introduction to game theory and its applications. Utility theory, noncooperative/cooperative games, bargaining theory. Games in normal/extensive form, Nash equilibria/refinements.

ECON 5151. Elements of Economic Analysis: Firm and Household. (2 cr. Prereq—3101, 3102, or equiv, MATH 1271 or equiv, Math 2243 or equiv, grad or #)
Decision-making by households and firms under conditions of perfect competition, monopoly, and monopolistic competition.

ECON 5152. Elements of Economic Analysis: Income and Employment. (2 cr. Prereq—3101, 3102 or equiv, MATH 1271 or equiv, Math 2243 or equiv, grad or #)
Determinants of national income, employment, and price level; aggregate consumption, investment, and asset holding.

ECON 5312. Growth, Technology, and Development. (3 cr. Prereq—3101, 3102 or equiv or #)
Economics of research and development; technical change and productivity growth; impact of technology on institutions; science and technology policy.

ECON 5890. Economics of the Health-Care System. (3 cr; A-F only. §PUBH 6832. Prereq—[3101, 3102] or #)
Economic analysis of U.S. health-care sector. Emphasizes problems of pricing, production, distribution. Health-care services as one factor contributing to nation's health.

Education and Human Development (EDHD)

College of Education and Human Development

EDHD 1901. Freshman Seminar, Environment. (1-3 cr [max 6 cr]. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDHD 1902. Freshman Seminar: Cultural Diversity. (1-3 cr [max 6 cr]. Prereq—Fr)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDHD 1903. Freshman Seminar, Citizenship/Public Ethics. (1-3 cr [max 6 cr]. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDHD 1904. Freshman Seminar, International Perspectives. (1-3 cr [max 6 cr]. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDHD 1905. Freshman Seminar. (1-3 cr [max 6 cr]. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDHD 1906W. Freshman Seminar, Environment and Writing Intensive. (1-3 cr [max 6 cr]. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDHD 1907W. Freshman Seminar, Cultural Diversity and Writing Intensive. (1-3 cr [max 6 cr]. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDHD 1908W. Freshman Seminar, Citizenship/Public Ethics and Writing Intensive. (1-3 cr [max 6 cr]. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDHD 1909W. Freshman Seminar, International Perspectives and Writing Intensive. (1-3 cr [max 6 cr]. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDHD 1910W. Freshman Seminar, Writing Intensive. (1-3 cr [max 6 cr]. Prereq—Freshman)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDHD 3001. Exploring the Teaching Profession. (1 cr [max 4 cr]; S-N only. Prereq—Early admit for init lic/MEd program, ☐)
Self as teacher, the culture of teaching, students as learners, learning contexts, societal influences on teaching/schools.

EDHD 5001. Learning, Cognition, and Assessment. (3 cr. \$EPSY 3119. Prereq—MEd/initial licensure student or CLA music ed or preteaching major or #; psych course recommended)
Principles of learning, cognition, cognitive development, classroom management, motivation, instruction, assessment. Approaches include behaviorism, cognitive and social constructivism, human information processing theory. Topics include intelligence, knowledge acquisition, reasoning skills, scholastic achievement, standardized testing, reliability, validity, student evaluation, performance assessment, portfolios, demonstrations. Applications to instruction and organization of curricular materials.

EDHD 5003. Developmental and Individual Differences in Educational Contexts. (3 cr; A-F only. Prereq—Jr or sr or post-bac or MEd/initial licensure or CLA music ed or preteaching major or FOE or agriculture or kinesiology or #)
Emphasizes dynamic systems perspective. Developmental transitions in childhood/adolescence. Interactions between student, environment, and task. Accommodations/adaptations for students in special education.

EDHD 5005. School and Society. (2 cr; A-F only. Prereq—Jr or sr or MEd/initial licensure student or CLA music ed major or preteaching major or #)
Readings in history, philosophy, social sciences, and law revealing diverse educational values in a pluralistic society. Multiple expectations of schools. Civil liberties, rights, community. Varying cultural backgrounds of students, family circumstances, exceptional needs.

EDHD 5007. Technology for Teaching and Learning. (1.5 cr; A-F only. Prereq—[MEd/initial licensure or CLA music ed major or preteaching major or #], basic computer skills)
Diverse educational technology in K-12 classrooms. Effective use of technology. Computer technologies used to stimulate personal productivity/communication and to enhance teaching/learning processes.

EDHD 5009. Human Relations: Applied Skills for School and Society. (1 cr; A-F only. Prereq—MEd/init lic or CLA music ed or preteaching or #)
Issues of prejudice/discrimination in terms of history, power, social perception. Knowledge/skills acquisition in cooperative learning, multicultural education, group dynamics, social influence, leadership, judgment/decision making, prejudice reduction, conflict resolution, teaching in diverse educational settings.

Educational Policy and Administration (EDPA)

Department of Educational Policy and Administration

College of Education and Human Development

EDPA 1080. Special Topics in Leadership. (1-3 cr [max 6 cr]; A-F only)
For topic, see *Class Schedule*.

EDPA 1301W. Personal Leadership in the University. (3 cr. \$PA 1961W)
Introduces leadership using a personal leadership framework. Students examine their own views on leadership. Differences between personal/positional leadership, characteristics of leaders within the University, importance of personal development.

EDPA 1909W. Freshman Seminar: International Perspectives and Writing Intensive (IP, WI). (1-3 cr [max 6 cr]. Prereq—Fr)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EDPA 2124. Intercultural Communication and Service Learning: Interdisciplinary Approaches to Public Engagement. (3 cr. Prereq—#)
Cross-cultural competence. Social/economic issues in U.S. and abroad. Major theories, concepts, and models in intercultural/multicultural education. Classroom, research, and service learning activities.

EDPA 3010. Special Topics for Undergraduates. (1-3 cr [max 9 cr])
Inquiry into educational policy and administration problems and issues.

EDPA 3021. Introduction to Historical Foundations of Modern Education. (3 cr. \$EDPA 5021, HUM 3021, HUM 4021)
Analysis/interpretation of important elements in modern education derived from pre-classical sources: Greeks, Romans, Middle Ages, Renaissance, Reformation, Enlightenment, Industrial Revolution.

EDPA 3023. Introduction to History of Western Educational Thought. (3 cr. \$EDPA 5023, HUM 3023, HUM 4023)
Great educational classics of Western civilization: Plato, Aristotle, Quintilian, Montaigne, Milton, Locke, Rousseau, others.

EDPA 3101. Understanding Southeast Asia: an Intercultural/Interdisciplinary Policy Perspective. (3 cr [max 30 cr])
Contemporary southeast Asia. Complexities/diversity of region. Interdisciplinary orientation. Humanities and social science material. Case studies, critical incidents.

EDPA 3102. Maximizing Study Abroad Through Culture and Language Strategies: Pre-Departure Preparation. (1 cr. Prereq—#)
Preparation for overseas sojourn: understanding culture, ways cultures differ in values, seeing oneself as a member of a culture or cultures.

EDPA 3103. Maximizing Study Abroad Through Culture and Language Strategies: In-Country Experience. (1 cr. Prereq—3102 or #)
Reflect on activities/readings of study abroad experiences overseas. E-journaling, written activities, group interaction using various formats.

EDPA 3104. Maximizing Study Abroad Through Culture and Language Strategies: Re-Entry. (1 cr. Prereq—3103 or #)
Reflect upon personal study abroad experience through readings/activities to ease transition back into the United States and to maximize learning from study abroad experience.

EDPA 3302W. Leadership, You, and Your Community. (3 cr. \$PA 3961W. Prereq—[1301W, PA 1961W] with grade of at least C, [soph or at least 60 cr])
Leadership and leadership capacities from multicultural/multidimensional perspectives. Students examine their own views on leadership. Leadership theory/practice, group dynamics/behavior, applying knowledge.

EDPA 3303. Introduction to Women in Leadership. (3 cr)
Sex discrimination, female career patterns, women leaders, inclusive conceptualizations of managerial/administrative theory.

EDPA 3304. Strategic Leadership for Future Societies. (3 cr)
Emerging leadership implications of selected short-/long-range trends. Construction of context-relevant effective leadership scenarios for selected institutions in real/hypothetical societies.

EDPA 3305. Learning About Leadership Through Film and Literature. (3 cr)
Readings from leadership studies, literature, and film. Ethical dilemmas. Different styles of leadership and their consequences. Intersection of public/private in exercising leadership. Competing loyalties/pressures felt by leaders/followers. Fundamental questions about nature/desirability of leadership.

EDPA 3402. Leadership Minor: Field Experience. (2 cr; A-F only. \$PA 3971. Prereq—[3302W or PA 3961W] with grade of at least C)
Students integrate lessons learned from core leadership courses, choose from a variety of settings (e.g., community organizations, corporations, University student organizations, education).

EDPA 4303W. Leadership in the World. (3 cr; A-F only. \$PA 4961W. Prereq—[3402 or PA 3971])
Leadership theory, community building, social change, interdisciplinary approaches to complex global issues. Students finalize portfolios, submit scholarly products to demonstrate understanding of personal/positional leadership in changing global context. Capstone course.

EDPA 5001. Formal Organizations in Education. (3 cr)
Classical/current theories of organizations. Applications to education and related fields.

EDPA 5021. Historical Foundations of Modern Education. (3 cr. \$EDPA 3021, HUM 3021, HUM 4021)
Analysis and interpretation of important elements in modern education derived from pre-classical sources: Greeks, Romans, Middle Ages, Renaissance, Reformation, Enlightenment, and Industrial Revolution.

EDPA 5023. History of Western Educational Thought. (3 cr. \$EDPA 3023, HUM 3023, HUM 4023)
Great educational classics of Western civilization: Plato, Aristotle, Quintilian, Montaigne, Milton, Locke, Rousseau, and others.

EDPA 5024. History of Ideas in American Education. (3 cr)
Readings in American cultural development related to education, including: Franklin, Jefferson, Mann, B.T. Washington, W.E.B. DuBois, Dewey. Special reference to the emerging system of public education in changing contexts, agrarian to urban-industrial, moderate pluralism to intense diversity.

EDPA 5028. Education Imagery in Europe and America. (3 cr)
Images and ideas of education expressed in the visual arts of Western civilization (antiquity to 20th century) in relation to concurrent educational thought and practice; symbolism, myth, propaganda, didacticism, genre, caricature.

EDPA 5032. Comparative Philosophies of Education. (3 cr)
Exploration of the principal philosophies in educational thought today, e.g., realism, idealism, pragmatism, and postmodernism. Practice in philosophical critique.

EDPA 5036. Ethics, Morality, and Values in Education. (3 cr)
Application to key issues of professional practice. Moral education, virtues, principles.

EDPA 5041. Sociology of Education. (3 cr. §SOC 5455)
Structures and processes within educational institutions; linkages between educational organizations and their social contexts, particularly related to educational change.

EDPA 5044. Introduction to the Economics of Education. (3 cr)
Costs and economic benefits of education, with a focus on K-12; educational markets, prices, and production relationships; investment and cost-benefit analysis.

EDPA 5048. Cross-Cultural Perspectives on Leadership. (2-3 cr [max 3 cr])
Introduction to cultural variables of leadership that influence functioning of cross-cultural groups. Lectures, case studies, discussion, problem-solving, simulations. Intensive workshop.

EDPA 5052. Ethnic Groups and Communities: Families, Children, and Youth. (3 cr)
Roles of young people in widely varied North American communities. Comparative aspects of youth commitment to society, economic value of youth, youth-adult conflict, youth roles in family. Well-defined analyses of contextual roles. Complexity of policy for appropriate educational/community development.

EDPA 5056. Case Studies for Policy Research. (3 cr; A-F only)
Qualitative case study research methods and their applications to educational policy and practice. Emphasis on designing studies that employ open-ended interviewing as primary data collection technique.

EDPA 5057. Research in International Education. (3 cr)
Key skills/proficiencies for rigorous graduate research. Quantitative/qualitative/mixed methods. How to be a critical consumer of policy-related, comparative/intercultural research. Conducting cross-cultural/comparative research. Related ethical issues.

EDPA 5061. Ethnographic Research Methods. (3 cr)
Practice in aspects of field methodology below the level of full field study; detailed reading; analysis of studies in anthropology and education for methodological content.

EDPA 5064. Divergent Perspectives in Educational Policy and Practice. (3 cr)
Examines fundamental and current issues in the field of education. Participants learn how to approach an issue from multiple perspectives, develop skills to identify and analyze its component parts, and examine personal belief systems to place a given issue within a personal context.

EDPA 5070. Special Topics: School Leadership. (1-5 cr [max 15 cr]. Prereq—BA or BS or other baccalaureate degree)
Skills/knowledge necessary to respond to multiple challenges of reduced budgets, increased accountability requirements, and growing concerns about impact of technology investments in education.

EDPA 5080. Special Topics: Educational Policy and Administration. (1-3 cr [max 24 cr])
Topical issues in educational policy/administration.

EDPA 5087. Seminar: Educational Policy and Administration. (1-3 cr [max 24 cr])
Shared responsibility of students/instructor in presentation of topics.

EDPA 5095. Problems: Educational Policy and Administration. (1-3 cr [max 24 cr])
Course or independent study on specific topic within department program emphasis.

EDPA 5096. Internship: Educational Policy and Administration. (1-9 cr [max 24 cr])
Internship in elementary, secondary, general, or postsecondary administration, or other approved field related setting.

EDPA 5101. International Education and Development. (3 cr)
Introduction to comparative and international development education, contemporary theories regarding the role of education in the economic, political, and sociocultural development of nations; examination of central topics and critical issues in the field.

EDPA 5102. Knowledge Formats and Applications: International Development Education Contexts. (3 cr)
Analyzes the interrelationships of “knowledge capital” (noetic symbolic resources) and culture through intrinsic, cross-, and multicultural perspectives. Distinguishes knowledge from information and data, focusing on national and international developments occurring along basic and applied knowledge paths.

EDPA 5103. Comparative Education. (3 cr)
Examination of systems and philosophies of education globally with emphasis upon African, Asian, European, and North American nations. Foundations of comparative study with selected case studies.

EDPA 5104. Strategies for International Development of Education Systems. (3 cr; A-F only. Prereq—Grad student)
Strategies for improving quality/efficiency of schooling in developing countries. Introduction to current research on what policy/programmatic interventions have proven most successful in increasing access, raising quality, and improving efficiency of education in developing countries.

EDPA 5121. Educational Reform in International Context. (3 cr)
Critical policy analysis of educational innovation and reform in selected countries. Use theoretical perspectives and a variety of policy analysis approaches to examine actual educational reforms and their implementation.

EDPA 5124. Critical Issues in International Education and Educational Exchange. (3 cr)
Analysis of comprehensive policy-oriented frameworks for international education; practices of U.S. and other universities; conceptual development of international education and its practical application to programs, to employment choices, and to pedagogy.

EDPA 5128. Anthropology of Learning. (3 cr. §ANTH 5128)
Cross-cultural perspectives in examining educational patterns; the implicit and explicit cultural assumptions underlying them. Methods and approaches to cross-cultural studies in education.

EDPA 5132. Intercultural Education and Training: Theory and Application. (3 cr)
Examination of intercultural education; formal and nonformal education programs intended to teach about cultural diversity, promote intercultural communication and interaction skills, and teach students from diverse background more effectively.

EDPA 5134. Futures Research for Educational Leaders. (3 cr. Prereq—Grad student)
Perspectives/methods of futures research. Historical/antecedent and contemporary influences on futures research. Futures research as social technology vs social (inexact) science. Primary toolbox of futures Research. Emerging potentials of futures research.

EDPA 5136. Scenario and Story Planning for Educational Innovators. (3 cr. Prereq—Grad student)
How to create/use strategic scenarios/stories to anticipate/shape forces/events that could impact future educational design, policy, practice, and administration. Designing, analyzing, comparing multiple scenarios/stories under different initial conditions, including assumptions, information content, and contexts.

EDPA 5141. Global Youth Policy and Leadership: Comparative Youth Policy and Leadership. (3 cr. Prereq—CIDE student or #)
Comparative approach to public responses at global level to youth development and leadership issues. Social systems such as education, health, employment and recreation. Role of individuals, communities, governments, and international organizations directed to provide programs/services to young persons.

EDPA 5142. Global Youth Policy and Leadership: Strategic Projections, Visions, and Alternative Futures. (3 cr. Prereq—CIDE student or #)
Address strategic trends in global youth development, including positive/negative implications. Attention to reconciling positive/negative trends with normative scenarios with respect to presence, absence, and projected likelihood of suitable policies, workable collaborations, and funding.

EDPA 5301. Contexts of Learning: Historical, Contemporary, and Projected. (3 cr; A-F only)
Contextual understanding of education as a social institution. Education is studied as one institution among the several that constitute its dynamic context.

EDPA 5302. Educational Policy: Context, Inquiry, and Issues. (3 cr)
Review of social science concepts/research in considering educational policies/issues, process of inquiry that affect policy development, implementation, evaluation. Focus on pre-K-12. Role of educational leaders, administrators.

EDPA 5303. Managing the Learning Organization. (3 cr; A-F only)
Examines schools, colleges, and other human service organizations centered on learning. Focuses on perspectives and skills needed to manage organizations effectively.

EDPA 5304. Educational Leadership for Equity, Opportunity, and Outcome. (3 cr)
Implications of multiple contexts in which leadership occurs. Role of followers. Complexities of collaborative structures and of shared governance.

EDPA 5305. Leadership and Vision in School Technology. (1 cr. Prereq—Broadband Internet access, a newer computer)
How to create a shared vision for comprehensive integration of technology into educational environments. Ways to foster environment/culture conducive to realizing that vision.

EDPA 5306. Staff Technology Development and Support. (1 cr. Prereq—Broadband Internet access, a newer computer)
How to lead an organization in designing, implementing, evaluating, improving, and sharing approaches to staff development. Technology-related development. Facilitating staff development through use of technology.

EDPA 5307. School Management and Technology. (1 cr. Prereq—Broadband Internet access, a newer computer)
Various organizational/management issues impacted by information technology. Focuses on hardware, software, and database technologies designed to facilitate management/operations of school organizations.

EDPA 5308. Emerging Issues and School Technology. (1 cr. Prereq—Broadband Internet access, a newer computer)
Needs of schools/administrators to remain on forefront of information technologies. Focuses on anticipated technological trends years/decades ahead.

EDPA 5309. Electronic Communication Tools and Environments for Schools. (1 cr. Prereq—Broadband Internet access, a newer computer)
Various electronic communication channels, information environments to facilitate educational organizations’ operations/communication. Focuses on networked environments, integration with handheld computers, and outreach to internal/external stakeholders.

EDPA 5310. Data-Driven Decision Making I. (1 cr.
Prereq—Broadband Internet access, a newer computer)
Data-driven decision making for schools/administrators. Focuses on data collection/analysis needs of educational organizations and on use of appropriate software/databases to collect, manage, analyze, and report school information.

EDPA 5311. Data-Driven Decision Making II. (1 cr.
Prereq—Broadband Internet access, a newer computer)
Continuation of 5310. Data-driven decision making for schools/administrators. Hands-on training in students' own organizations in using technology to analyze data to make educational decisions.

EDPA 5312. School Technology Policy Issues. (1 cr.
Prereq—Broadband Internet access, a newer computer)
Various state/national policy issues related to educational technology. Focuses on "digital divide" in schools/communities, federal educational technology policy initiatives, and state/federal educational technology legislation.

EDPA 5313. Legal and Ethical Issues in School Technology. (1 cr. Prereq—Broadband Internet access, a newer computer)
Social, legal, and ethical issues related to school technology. How to model responsible decision-making related to these issues.

EDPA 5314. School Technology Safety and Security. (1 cr.
Prereq—Broadband Internet access, a newer computer)
School safety/security issues impacted by information technology. Network/data security. Physical safety of students, employees, and facilities. Computer recycling/disposal. Appropriate ergonomic environments for students/employees.

EDPA 5315. School Technology Leadership Multimedia Project. (1 cr. Prereq—[[Mac or PC] with 256 MB RAM, [Windows NT 2000 or XP or Mac OS 9 or 10], Pentium [2 or faster], internet connection, [Netscape or Internet Explorer], virus protection software, School Technology Leadership] or #)
Students focus on individualized school technology leadership topic of choice, deliver a multimedia presentation of project results. Regular consultation with faculty, peer mentors, and outside mentors.

EDPA 5321. The Principalship. (3 cr)
Role of the principal: qualifications, duties, and problems.

EDPA 5322. School Superintendency. (3 cr)
Role/responsibility of superintendent in school district. Emphasizes real life experiences, leadership potential as CEO. Purposes, power, politics, practices of position. Interplay of internal school forces, external community forces analyzed in multiple contexts. Manifestations of leadership in public, high-profile appointment.

EDPA 5323. Women in Leadership. (3 cr. Prereq—technology access)
Women in leadership, in context of larger systems and their own lives. Supporting equity/equality across areas of difference.

EDPA 5324. Financial Management for Elementary-Secondary Education. (3 cr)
Provides an overview of state-local school finance systems, budgeting, governmental fund accounting, and interpretation of financial information. For graduate students pursuing licensure as elementary-secondary principals and superintendents.

EDPA 5325. Analytical Tools for Educational Leadership. (1 cr. Prereq—#)
Technological/analytical tools associated with data-driven decision-making processes in K-12 school environments.

EDPA 5326. Data Analysis for Educational Leadership. (2 cr. Prereq—[5325 or equiv], #)
Advanced technological/analytical tools associated with data-driven decision-making processes in K-12 school environments.

EDPA 5328. Introduction to Educational Planning. (3 cr)
Principles, tools, comparative practices, and emerging issues in K-12 and higher education settings; decision making models; strategic and project planning; barriers to effectiveness; and change management processes.

EDPA 5332. Leadership Development Seminar. (3 cr)
Assessment and development of skills required of the educator in planning, decision making, and human relations. Introduction to contemporary issues in educational administration.

EDPA 5336. Laboratory in Decision Making. (3 cr)
Contributions of recent research and theory to effective administration. Analysis of administrative behavior in realistic settings; relations of administration to human behavior.

EDPA 5341. The American Middle School. (3 cr)
Focus on the uniqueness of the early adolescent and appropriate learning situations. For educators working with middle-level students.

EDPA 5344. Legal Aspects of Elementary and Secondary Education. (3 cr)
Overview of legal foundations of elementary/secondary education. Statutory themes, relevant case law, emergent policy issues. Implications for educational organizations and for administrative practice.

EDPA 5346. Politics of Education. (3 cr; A-F only. Prereq—postbac, MEd, or grad student)
Political dimensions of policy formulation/implementation in education. Use of power/influence in shaping educational policies and in resolving conflicts over educational issues. Analysis of consequences/cross-impacts.

EDPA 5348. Administration of Human Resources in Education. (2 cr. Prereq—Designed for students working on licensure for dir of community ed or superintenDENT or K-12 principal or dir of special educ)
Effective personnel practices. Skills required for effective administrator/leader. Emphasizes human resources administration, including employee recruitment, selection, orientation/support, supervision, and performance appraisal of school district personnel.

EDPA 5352. Projective Leadership for Strategic Learning Communities. (3 cr)
Explores many trends and changes facing society, culture, and education from a strategic learning community perspective; helps students "futuraize the present."

EDPA 5356. Disability Policy and Services. (3 cr)
Policy, research, and current practices related to education, health, and social services that support children, youth, and adults with special needs, and that support their families. Federal, state, and local perspectives.

EDPA 5361. Project in Teacher Leadership. (3 cr [max 6 cr]; S-N only. §CI 5178. Prereq—MEd student in Teacher Leadership Program)
Create, implement, evaluate, and present a leadership project designed to initiate positive change in educational environments. Review of related literature, proposal development, project development, implementation and evaluation, critical reflection, sharing learning outcomes.

EDPA 5364. Context and Practice of Educational Leadership. (3 cr; A-F only)
Current research/practice on educational leadership. Focuses on creating school cultures conducive to continuous improvement/change. Strategies for personal/organizational leadership in PK-12 settings.

EDPA 5368. Special Services Policy and Administration. (3 cr)
Legislative, procedural, executive, and judicial actions that affect services, families, and children with special needs at all levels of government: federal, state, and local. For administrators, supervisors, and other professionals responsible for managing general, special, and alternative education programs.

EDPA 5372. Youth in Modern Society. (3 cr)
Youth in advanced societies and as a social entity; functions and roles in industrial society, family, education, politics and government, economy and work, welfare and religion; organizations, social movements, and subcultures; empirical research and cross-cultural perspectives.

EDPA 5374. Leadership for Professional Development. (4 cr. Prereq—Postbaccalaureate, at least 3 yrs teaching experience)
Designing, implementing, evaluating staff development in preK-12 settings. Research-based standards for effective staff development. Need for embedded time for collaborative learning, evaluating staff/student outcomes.

EDPA 5376. Organizational Approaches to Youth Development. (3 cr)
Defining youth development within framework of formal and informal organizations; organizational systems responsible for youth development in the community; policy issues surrounding these systems.

EDPA 5378. Experiential Learning: Theory and Practice. (3 cr)
Theory/practice of learning by doing. Educator's personal engagement in process. Technical, motivational, and evaluative aspects.

EDPA 5381. The SeARCH for Children and Youth Policy in the U.S. (3 cr)
Review of contemporary policy issues affecting children and youth in the U.S. and South Africa; identify national standards, norms and principles of youth development; conflicting expectations facing policy-makers; and search for the critical content of youth policy.

EDPA 5384. Collaboration in Heterogeneous Classrooms and Schools. (3 cr; A-F only)
Policy, research, practice base for addressing range of student abilities/backgrounds in diverse schools. Collaborative approaches to curricular, instructional, social support.

EDPA 5385. Licensure Seminar. (1 cr [max 4 cr]; S-N only)
Preparation for licensure program. Program overview, preassessment, reflective practice, APA writing, exit panel review, administrative employment interview.

EDPA 5386. Portfolio Seminar. (1 cr [max 4 cr]; S-N only)
Development of electronic administrative licensure portfolio as part of process to earn endorsement for license as a school superintendent, K-12 principal, director of special education, or director of community education.

EDPA 5387. Administration of Teaching and Learning. (1 cr)
Administration of teaching/learning as a system in an inclusive school system. Multiple experts present components of system. Focuses on questions an administrator must address when functioning as leader of learning.

EDPA 5388. Master(ful) Schedule Building. (2 cr. Prereq—5387)
Scheduling models. Strategies for personalizing schools. Hands-on "infinite campus student system." Master schedule is built online.

EDPA 5389. Administration of Community and Alternative Education Programs. (3 cr)
Competencies of leadership, community relations, communication, community assessment, program development, program evaluation. Philosophy/administration of community/alternative education programs.

EDPA 5391. Special Education Law. (1 cr. Prereq—Designed for students working on licensure in PK-12 administration)
Competencies of leadership, policy, and political influence. Legal/regulatory applications focusing on special education law.

EDPA 5396. Field Experience in PK-12 Educational Administration. (3 cr [max 6 cr]; S-N only. Prereq-#)
Field experience or internship arranged for students seeking licensure as PK-12 principal/superintendent. Content/credit depend on licensure requirements specified in individual field experience agreement.

EDPA 5501. Principles and Methods of Evaluation. (3 cr. §EPSY 5243)

Introduction to program evaluation. Planning an evaluation study, collecting and analyzing information, reporting results; evaluation strategies; overview of the field of program evaluation.

EDPA 5521. Cost and Economic Analysis in Educational Evaluation. (3 cr)
Use and application of cost-effectiveness, cost-benefit, cost-utility, and cost-feasibility in evaluation of educational problems and programs.

EDPA 5524. Evaluation Colloquium. (1 cr [max 24 cr]; S-N only. §EPSY 5246. Prereq-5501 or EPSY 5243)
Informal seminar of faculty and advanced students. Issues/problems of program evaluation.

EDPA 5701. U.S. Higher Education. (3 cr)
U.S. higher/postsecondary education in historical/contemporary perspective. Emphasizes structure, history, and purposes of system as a whole.

EDPA 5704. College Students Today. (3 cr. §EPSY 5451)
Issues involving population of students in colleges/universities. College student development theory, students' expectations/interests. How college affects student outcomes. Role of curricular/extracurricular activities. Student-faculty interaction.

EDPA 5721. Racial and Ethnic Diversity in Higher Education. (2-3 cr [max 3 cr])
Review of research. Theoretical frameworks, methodological perspectives, and research strategies used to study students, staff, and faculty; historical perspectives.

EDPA 5724. Leadership and Administration of Student Affairs. (2-3 cr [max 3 cr]. §EPSY 5421)
Scope, administration, coordination, and evaluation of programs in college and university student affairs.

EDPA 5727. Developmental Education Programs and Postsecondary Students. (2-3 cr [max 3 cr]. Prereq-Bachelor's degree)
Focuses on populations served by developmental education programs in the United States and abroad. Defines developmental education. Historical perspective for need for developmental education, student development theories that guide practice in developmental education. Identifying student needs. Model programs, best practices for student retention. Current issues/trends in field.

EDPA 5728. Two-Year Postsecondary Institutions. (2-3 cr [max 3 cr])
Present status, development, functions, organization, curriculum, and trends in postsecondary, but nonbaccalaureate, institutions.

EDPA 5732. The Law and Postsecondary Institutions. (3 cr)
Analysis of court opinions and federal regulations affecting postsecondary educational institutions.

EDPA 5734. Institutional Research in Postsecondary Education. (2-3 cr [max 3 cr]; A-F only. Prereq-[5701, (EPSY 5231 or EPSY 8261), grad student] or #)
Scope, role, administration, research strategies, and evaluation of institutional research in postsecondary institutions. Overview of research methodologies, disciplinary foundations of institutional research. Use of institutional, state, and national databases in addressing full range of institutional missions/functions.

EDPA 5795. Plan B Research Design. (3 cr [max 6 cr]; A-F only. Prereq-Grad student)
Foundation to design Plan B research project relevant to student's professional interests. Literature review strategies to establish conceptual framework for project. Relates research question to design alternatives and to associated qualitative/quantitative analysis techniques. Issues such as human subjects and APA guidelines for preparing research papers.

Educational Psychology (EPSY)

Department of Educational Psychology

College of Education and Human Development

EPSY 1600. Special Topics: Developing Special Educational and Human Service Programs. (1-4 cr [max 15 cr]. Prereq-#)

Explores the concepts, issues, and practices in developing special education and human services for persons with disabilities. Appropriate for persons in paraprofessional positions.

EPSY 1905. Freshman Seminar. (1-3 cr [max 6 cr]. Prereq-Fr)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

EPSY 3101. Creativity and Intelligence: an Introduction. (3 cr)
Classic/contemporary theories of creativity/intelligence, their development, implications for behavioral/social sciences and psychological/educational practices.

EPSY 3111W. Introduction to Critical Thinking. (3 cr)
Prominent issues and research findings related to critical thinking. How to critically evaluate controversies/arguments in editorials and published essays. Applications of critical thinking to various fields.

EPSY 3119. Learning, Cognition, and Assessment. (3 cr; A-F only. §EDHD 5001)
Principles of learning, cognition, cognitive development, classroom management, motivation, instruction, and assessment. Topics: behaviorism, cognitive and social constructivism, human information processing theory, intelligence, knowledge acquisition, reasoning skills, scholastic achievement, standardized testing, reliability, validity, student evaluation, performance assessment, and portfolios.

EPSY 3132. Psychology of Multiculturalism in Education. (3 cr; A-F only)
Course critically examines social and cultural diversity in the United States, confronting social issues of poverty, handicappism, homophobia, racism, sexism, victim-blaming, violence, and so on, and presenting models for change. Students examine how and why prejudices develop.

EPSY 3133. Practicum: Service Learning, Psychology of Multiculturalism in Education. (1 cr [max 3 cr]. Prereq-[3132 or 13132], #)

Thirty hours of service learning in multicultural communities. Students work with children, youth, or adults in ESL tutoring or after-school youth programs. Sensitivities/competencies related to multicultural issues in U.S. society.

EPSY 3134W. Social Diversity and Deculturalization in Education. (3 cr)
How educational practices affect cultures of minority-status peoples in the United States. Emphasizes historical/contemporary educational issues of deculturalization related to assimilation, segregation, integration, and educational labeling, achievement, and interaction of students.

EPSY 3264. Basic and Applied Statistics. (3 cr. §EPSY 5231, EPSY 5261)
Introductory statistics. Emphasizes understanding/applying statistical concepts/procedures. Visual/quantitative methods for presenting/analyzing data, common descriptive indices for univariate/bivariate data. Inferential techniques.

EPSY 3300. Special Topics in Educational Psychology. (1-4 cr [max 9 cr])
Current issues in educational psychology or related coursework in areas not normally available through regular curriculum offerings.

EPSY 4300. Special Topics in Educational Psychology. (1-3 cr [max 3 cr])
Current issues in educational psychology or related coursework in areas not normally available through regular curriculum offerings.

EPSY 5101. Intelligence and Creativity. (3 cr; A-F only)
Contemporary theories of intelligence and intellectual development and contemporary theories of creativity and their implications for educational practices and psychological research.

EPSY 5112. Knowing, Learning, and Thinking. (4 cr; A-F only)
Principles of human information processing, memory, and thought; mental operations in comprehension and problem solving; developing expertise and automaticity; emphasis on applied settings.

EPSY 5113. Psychology of Instruction and Technology. (3 cr)
Introduction to adult learning and instructional design. Application of core foundational knowledge to development of effective learning environments for adults. Topics include philosophy, learning theories, instructional models, development and experience, individual differences, evaluation, assessment, and technology.

EPSY 5114. Psychology of Student Learning. (3 cr; A-F only)
Principles of educational psychology; how learning occurs, why it fails, and implications for instruction. Topics include models of learning, development, creativity, problem-solving, intelligence, character education, motivation, diversity, special populations.

EPSY 5115. Psychology of Adult Learning and Instruction. (3 cr)
Survey of adult learning/instruction. Emphasizes instructional design, learning theories, experience, individual differences, evaluation, tests/measurement, technology. Implications for curricular/instructional design in higher education, continuing education, professional/business related training.

EPSY 5117. Problem Solving and Decision Making. (3 cr; A-F only)
Strategies, rules, methods, and other cognitive components involved in problem solving and decision making, implications for educational practices, and applied domains.

EPSY 5118. Language: Psycholinguistic Research and Educational Application. (3 cr; A-F only)
Psychological study of language. Psychological processes involved in language use, mechanisms that guide these processes. Failures of these mechanisms. How language operates.

EPSY 5135. Human Relations Workshop. (4 cr)
Experiential course addressing issues of prejudice and discrimination in terms of history, power, and social perception. Includes knowledge and skills acquisition in cooperative learning, multicultural education, group dynamics, social influence, effective leadership, judgment and decision-making, prejudice reduction, conflict resolution.

EPSY 5141. Aggression in Schools. (3 cr; A-F only. Prereq-5xxx course in [developmental or educational] psychology)
Development of aggression in schools. Aggression defined, compared to cooperative/prosocial behavior. Theories, methods, gender/individual differences.

EPSY 5151. Cooperative Learning. (3 cr)
Participants learn how to use cooperative learning in their setting. Topics include theory and research, teacher's role, essential components that make cooperation work, teaching social skills, assessment procedures, and collegial teaching teams.

EPSY 5152. Psychology of Conflict Resolution. (3 cr)
Overview of the field of conflict resolution. Major theories, research, major figures in the field, factors influencing quality of conflict resolution are covered. The nature of conflict, the history of field, and intrapersonal, interpersonal, intergroup conflict, negotiation, mediation are discussed.

EPSY 5154. Organization Development and Change. (3 cr)
Overview of organizational development and change. Normative models of effective organizations, entry and contracting skills, diagnosis procedures and intervention procedures (data feedback, skills training, continuous improvement, mediation).

EPSY 5155. Group Dynamics and Social Influence. (3 cr)
Overview of the field of group dynamics with emphasis on social influence. Major theories, research, and figures in the field are covered. Group goals, communication, leadership, decision making, problem solving, conflicts, power, uniqueness theory, deindividuation, and minority influence will be covered.

EPSY 5157. Social Psychology of Education. (3 cr; A-F only)
Overview of social psychology and its application to education. Participants study the major theories, research, and major figures in field. Class sessions include lectures, discussions, simulations, role-plays, and experiential exercises.

EPSY 5158. Using Power and Influence to Effect Change. (3 cr. Prereq—3xxx course in social sciences or #)
How people can influence others and avoid manipulation. Factors that shape extent to which influence is successful. Indirect/direct influence processes, minority influence, motivation, behavior management, conformity, followership, group dynamics.

EPSY 5191. Education of the Gifted and Talented. (3 cr; A-F only)
Theories of giftedness, talent development, instructional strategies, diversity and technological issues, implications for educational practices and psychological inquiry, and international considerations.

EPSY 5200. Special Topics: Psychological Foundations. (1-4 cr [max 30 cr])
Focus on special topics in psychological and methodological concepts relevant to advanced educational theory, research, and practice not covered in other courses.

EPSY 5216. Introduction to Research in Educational Psychology and Human Development. (3 cr; A-F only. Prereq—5261 or intro statistics course)
Designing/conducting a research study. Reviewing literature, formulating research problem, using different approaches to gather data, managing/analyzing data, reporting results.

EPSY 5221. Principles of Educational and Psychological Measurement. (4 cr. Prereq—5261 or equiv)
Concepts, principles, and methods in educational/psychological measurement. Reliability, validity, item analysis, scores, score reports (e.g., grades). Modern measurement theories, including item response theory and generalizability theory. Emphasizes construction, interpretation, use, and evaluation of assessments regarding achievement, aptitude, interests, attitudes, personality, and exceptionality.

EPSY 5222. Measurement and Analysis: K-12 Education Accountability. (4 cr. Prereq—5231 or [5221, 5261] or [PSY 3305, PSY 5862] or #)
Methods of educational accountability. Meaning of student/school accountability. Measurement of educational inputs, processes, and results. Data analysis, data use for school improvement.

EPSY 5231. Introductory Statistics and Measurement in Education. (4 cr. §EPSY 3264, EPSY 5261)
Students develop an understanding of basic statistics and measurement concepts and tools and apply them to the collection, analysis, and interpretation of data.

EPSY 5243. Principles and Methods of Evaluation. (3 cr. §EDPA 5501)
Introductory course in program evaluation; planning an evaluation study, collecting and analyzing information, reporting results; overview of the field of program evaluation.

EPSY 5244. Survey Design, Sampling, and Implementation. (3 cr. Prereq—[5221 or 5231 or 5261 or equiv], [CEHD grad student or MEd student])
Survey methods, including mail, phone, and Web-based/e-mail surveys. Principles of measurement, constructing questions/forms, pilot testing, sampling, data analysis, reporting. Students develop a survey proposal and a draft survey, pilot the survey, and develop sampling/data analysis plans.

EPSY 5246. Evaluation Colloquium: Psychological Foundations. (1 cr [max 8 cr]; S-N only. §EDPA 5524. Prereq—5243 or EDPA 5501)
Informal seminar of faculty and advanced students interested in the issues and problems of program evaluation.

EPSY 5247. Qualitative Methods in Educational Psychology. (3 cr. Prereq—Grad student)
Introduction to qualitative methods of inquiry. Contrasting different research traditions (e.g., case study, phenomenology, ethnography, social interactionism, critical theory). Practice with field notes, observations, and interviewing. Use of NVIVO to track/code data.

EPSY 5261. Introductory Statistical Methods. (3 cr. §EPSY 3264, EPSY 5231)
Application of statistical concepts/procedures. Graphs, numerical summaries. Normal distribution, correlation/regression analyses, probability, statistical inferences for one or two samples. Hypothesis tests, Chi-square tests. Conceptual understanding/application of statistics.

EPSY 5262. Intermediate Statistical Methods. (3 cr. Prereq—3264 or 5261 or equiv)
Application of statistical concepts/procedures. Analysis of variance, covariance, multiple regression. Experimental design: completely randomized, block, split plot/repeated measures.

EPSY 5271. Becoming a Teacher of Statistics. (3 cr. Prereq—5261 or equiv)
Current methods of teaching first courses in statistics. Innovative teaching methods, materials, and technological tools. Types of first courses, reform recommendations, goals for student learning, recommended content, teaching methods, technology, student assessment.

EPSY 5272. Statistics Teaching Internship. (3 cr; S-N only. Prereq—Grad student, #)
Supervised teaching experience.

EPSY 5273. Methodology Teaching Internship. (1 cr [max 2 cr]; S-N only. Prereq—Grad student, #)
Supervised teaching experience as part of a course in statistics, measurement, or evaluation.

EPSY 5281. Introduction to Computer Operations and Data Analysis in Education and Related Fields. (3 cr; S-N only)
Introductory computer literacy course to familiarize students with personal computers and computing resources at the University. Applications include electronic communications, spreadsheets, graphical presentation, and data analysis.

EPSY 5300. Special Topics in Educational Psychology. (1-9 cr [max 9 cr])
Current issues in educational psychology or related areas not normally available through regular curriculum offerings.

EPSY 5400. Special Topics in Counseling Psychology. (1-4 cr [max 8 cr])
Theory, research, and practice in counseling and student personnel psychology. Topics vary.

EPSY 5401. Counseling Procedures. (3 cr. Prereq—Upper div student)
Emphasis on the counseling relationship and principles of interviewing. Case studies, role playing, and demonstration. For individuals whose professional work includes counseling and interviewing.

EPSY 5412. Introduction to Developmental Counseling and Guidance. (3 cr. Prereq—#)
Contemporary models of counselors as advocates for all students. Emphasizes prevention and systems intervention with counselors involved in the developmental guidance curriculum, school change, staff and community collaboration, individual student planning, and learning success with diverse populations.

EPSY 5415. Child and Adolescent Development and Counseling. (4 cr; A-F only. Prereq—Grad student or MEd student or K-12 [counseling endorsement or licensure] student)
Development, issues, and needs of children, kindergarten through high school ages. Counseling/developmental theory/strategies, family/social environment. Cultural diversity, legal/ethical issues in counseling children/adolescents.

EPSY 5421. Leadership and Administration of Student Affairs. (3 cr. §EDPA 5724)
Theoretical approaches, administrative structure, and evaluation methods used in college/university student affairs.

EPSY 5422. Principles of Group Work: Theory and Procedures. (3 cr. Prereq—Advanced undergrad or grad student in the helping professions)
Principles and practices of group work for educators and the helping professions. Discussion of various types of groups (e.g., counseling support, task, psychoeducational). Applications to various settings and populations (e.g., schools and community agencies).

EPSY 5432. Foundations of Individual/Organizational Career Development. (3 cr)
Introduction to individual and organizational career development theory and practice. Examines critical issues in work patterns, work values, and workplaces in a changing global society, with implications for career planning, development, and transitions, emphasizing personal and organizational change. For nonmajors: serves students in adult ed, HRD, IR, college student advising, and other related fields.

EPSY 5433. Counseling Women Over the Life Span. (3 cr. Prereq—Counseling or career development course)
Counseling skills and interventions to facilitate career development of girls and women of different life stages and backgrounds (school girls to older women); developmental issues from a systematic integrative life planning framework; facts, myths, and trends regarding women's changing roles.

EPSY 5434. Counseling Adults in Transition. (3 cr. Prereq—Advanced undergrad or grad student in the helping professions)
Psychological, physical, and social dimensions of adult transitions (e.g., family and personal relationships, career). Adult development theories, stress and coping, and helping skills and strategies as they relate to adult transition.

EPSY 5451. College Students Today. (3 cr. §EDPA 5704)
Issues involving diverse populations of students in colleges/universities. Student development theory, students' expectations/interests, how college affects student outcomes. Role of curricular/extracurricular activities and of student-faculty interactions.

EPSY 5461. Cross-Cultural Counseling. (3 cr; A-F only)
Effect of cross-cultural/cross-national psychological differences in human traits/characteristics. Framework for development/implementation of counseling interventions.

EPSY 5601. Survey of Special Education. (2 cr)
Introduction to programs and services provided to people with disabilities in school and community settings. Emphasis on the needs of families, to the roles and responsibilities of teachers, and to related service providers.

EPSY 5604. Transition from School to Work and Community Living for Persons with Special Needs. (2 cr)
Design of training programs to promote independent living. Vocational and community adjustment for persons with disabilities and who are at-risk. Curriculum materials, methods, and organizational strategies for adolescents and adults, families, and community service providers.

EPSY 5609. Family-Centered Services. (2 cr; A-F only)

Methods for collaborating with families in the education of children with disabilities. Focus on family-centered approach to design of educational plans and procedures. Specific emphasis on multicultural perspectives of family life and expectations for children.

EPSY 5612. Understanding of Academic Disabilities.

(3 cr; A-F only)

Introduction to issues related to the education of students with academic disabilities (learning disabilities, mild mental intellectual disabilities, and emotional/behavioral disabilities) including history, definition, assessment, classification, legislation, and intervention approaches.

EPSY 5613. Foundations of Special Education I. (3 cr; A-F only. Prereq—Child development course, 5601 or equiv)

Emphasis on the organization of educational programs and services for people with disabilities and their families. First course for students seeking to become licensed teachers in special education.

EPSY 5614. Foundations of Special Education II. (3 cr; A-F only. Prereq—5613)

Emphasis on assessment, planning, and implementing educational programs for people with disabilities. Second course for students seeking to become licensed teachers in special education.

EPSY 5615. Advanced Academic Interventions. (3 cr; A-F only. Prereq—5612)

Develop knowledge and skills in designing, implementing, and evaluating Individual Educational Plans (IEPs) for students eligible for special education service in learning disabilities, emotional/behavioral disorders, and mild mental intellectual disabilities.

EPSY 5616. Behavior Analysis and Classroom Management. (3 cr)

Introduction to assumptions, principles, and procedures of behavioral approach to analyzing behavior and programs for classroom management. Emphasis on specifying problems, conducting observations, intervening, and evaluating behavioral change.

EPSY 5621. Functional/Basic Academic Interventions in Mental Retardation. (3 cr; A-F only. Prereq—5613, 5614)

Methods and materials course emphasizing functional approaches to promoting academic learning in students with mild to moderate mental retardation and moderate to severe mental retardation.

EPSY 5622. Programs and Curricula for Learners with Severe Disabilities. (3 cr. Prereq—5616)

Emphasis on developing programs and curricula for students with moderate, severe, and profound developmental delays, as well as severe multihandicapping conditions. Special consideration given to preparing children and youth for integrated community environments.

EPSY 5624. Biomedical and Physical Aspects of Developmental Disabilities. (2 cr [max 3 cr]; A-F only)

Anatomy, physiology, and kinesthology. Central/peripheral nervous system. Prenatal, perinatal, and postnatal development. Physically disabling conditions. Management/education procedures.

EPSY 5625. Education of Infants, Toddlers, and Preschool Children with Disabilities: Introduction. (2 cr; A-F only)

Overview of the issues, problems, and practical applications in designing early intervention services for young children with disabilities and their families.

EPSY 5626. Seminar: Developmental Disabilities and Instructional Management. (3 cr. Prereq—[5621, 5622] or #)

Data-based strategies for school and nonschool instruction of learners with developmental disabilities including assessment, design, implementation, and evaluation of curriculum and instruction: curriculum content, concept and task analysis, classroom arrangements, natural and instructional cues, corrections, and consequences.

EPSY 5635. Education of Students with Physical and Health Disabilities. (3 cr; A-F only. Prereq—5601 or #)

Introduction to students with physical and health disabilities and their characteristics; the educational implications of physical disabilities; assessment procedures and appropriate educational interventions for learners with physical and health disabilities.

EPSY 5636. Education of Multihandicapped Learners with Sensory ImpAIRments. (2 cr [max 3 cr]. Prereq—5613, 5614)

Characteristics of learners with visual and auditory impairments; design of instructional programs to remediate or circumvent disabilities, including use of prosthetic devices; related areas of performance affected by sensory impairments.

EPSY 5641. Foundations of Education for Individuals Who Are Deaf/Hard of Hearing. (3 cr)

Historical and current issues related to education of individuals who are deaf or hard of hearing. Implications of causes of hearing loss, social and cultural relationships, philosophies of education, characteristics and legislative guidelines and their applicability to education of individuals who are deaf or hard of hearing.

EPSY 5642. Early Childhood Intervention for Infants, Toddlers, and Preschoolers Who Are Deaf/Hard of Hearing. (3 cr. Prereq—Preservice teacher in deaf education licensing program or #)

Early identification/assessment. Family-centered, interdisciplinary servicing. Program development for infants, toddlers, preschoolers who are deaf/hard of hearing. Presentations, discussions, activities.

EPSY 5644. Language Development and Programming for Deaf/Hard of Hearing Children. (3 cr)

Comparative study of the development of functional language in communicatively disabled and nondisabled individuals. Philosophies, programs, and practices focusing on the development of language with deaf and hard of hearing individuals. Models of assessment and instruction for use in educational settings.

EPSY 5646. Reading and Writing Practices with Deaf/Hard of Hearing Children. (3 cr. Prereq—5644 or general educ methods in tchg reading and writing skills, or #)

Gain knowledge and skills to assess, plan, and implement instruction for children and youth with hearing loss. Emphasis is placed on research, theoretical, and programmatic issues in developing reading and writing skills, curricular adaptations, and effective instructional approaches.

EPSY 5647. Aural and Speech Programming for Persons Who Are Deaf/Hard of Hearing. (3 cr)

Study of the speech and hearing mechanisms, causes of hearing loss, and rehabilitation. Emphasis on instructional practices, aural rehabilitation in the educational setting, adaptive technology, and adaptations to optimize functional skills with individuals who are deaf or hard of hearing.

EPSY 5648. Communication Systems for Children with Disabilities. (2 cr)

Applied study of assessment, selection, and application of alternative communication strategies for infants, children, and youth with disabilities. Emphasis on children with hearing loss and additional disabilities.

EPSY 5649. Models of Instructional Programming With Deaf and Hard of Hearing Students. (3 cr. Prereq—[5641, 5644] or #)

Design/development of portfolios for various models of educational service delivery systems for individuals with hearing loss. Emphasizes consultation skills, curriculum management/modifications, material/technology applications, and support service adaptations.

EPSY 5656. Social and Interpersonal Characteristics of Students with Disabilities. (3 cr; A-F only)

Emphasis on children and youth of school age and on the ways in which their emotional, social, and behavioral disorders affect their functioning in school and on ways in which their behaviors disturb others.

EPSY 5657. Interventions for Social and Emotional Disabilities. (3 cr; A-F only. Prereq—5616, 5656)

Developing comprehensive behavioral programs for students with social and emotional disabilities. Instructing students with social and emotional disabilities.

EPSY 5661. Introduction to Autism Spectrum Disorder. (3 cr. Prereq—5616, Autism Spectrum Disorder certificate student)

Knowledge/skills needed to promote learning/success for school age children with Autism Spectrum Disorder. Definition, etiology, and characteristics of ASD. Current research/issues. Emphasizes collaborative problem solving approach that facilitates effective family-professional partnerships and educational programming for this population.

EPSY 5671. Literary Braille. (3 cr; A-F only)

Mastery of literary braille code including all contractions and short-form words used in Grade 2 English Braille: American Usage. Use of specialized braille writing equipment including, braille writer, slate and stylus, and computer programs with six-key input.

EPSY 5672. Advanced Braille Codes. (2 cr; A-F only. Prereq—5671 or #)

Mastery of the Nemeth code for braille mathematics transcription including elementary math computation, algebra, geometry, trigonometry, and symbolic logic notation. Introduction to foreign languages, computer notation, music, and raised line drawing techniques.

EPSY 5674. Techniques of Orientation, Mobility, and Independence for Students with Visual Disabilities. (3 cr; A-F only. Prereq—5675 or #)

Introduction to basic techniques to gain skills in pre-cane techniques, orientation to learning environments, and adaptations for activities of daily living and independence. Introduction to mobility maps, consideration of cane, guide dog, and telescopic aids to mobility.

EPSY 5676. Case Management for Children with Visual Disabilities. (3 cr; A-F only. Prereq—5671, 5673, 5675)

Advanced course evaluating and managing cognitive, psychosocial, physical, and academic needs of students. Consideration of parent, teacher, and student in counseling and educational program management.

EPSY 5681. Education of Infants, Toddlers, and Preschool Children with Disabilities: Methods and Materials. (3 cr; A-F only. Prereq—5625)

Overview of the methods and materials available to maximize the developmental and educational outcomes for young children, birth to age 5, with disabilities and their families in home, community, and school based-settings.

EPSY 5701. Practicum: Field Experience in Special Education. (1-6 cr [max 12 cr]; A-F only. Prereq—[5614, [FOE or SpEd grad or licensure student]] or #)

Observations and supervised support of teaching practice in schools or agencies serving children with disabilities in integrated programs.

EPSY 5702. Practicum in Autism Spectrum Disorder. (3 cr. Prereq—5616, 5661, 5609, one of [5622 or 5644 or SLHS 5606], enrolled in Autism Spectrum Disorder certificate program, #)

Four hundred hours of supervised work in settings where individuals with Autism Spectrum Disorder are served. On-site supervision is provided by qualified professionals. A University supervisor conducts on-site observations. Bi-weekly seminars.

EPSY 5703. Practicum in Applied Behavior Analysis.

(3 cr. Prereq—5616, 5657, PSY 4011, Applied Behavior Analysis Certificate student, #)

Four hundred hours of supervised experience in applied behavior analytic intervention with individuals with significant challenging behavior and learning difficulties. On-site supervision is provided by qualified professionals. A University supervisor conducts on-site observations. Bi-weekly seminars.

EPSY 5720. Special Topics: Special Education. (1-4 cr [max 12 cr]. Prereq=#)

Lab and fieldwork approach, often assuming a product orientation, e.g., generation of action plan, creating set of observation field notes, collecting data in some form. Provides opportunities for educational personnel to study specific problems and possibilities related to special education.

EPSY 5740. Special Topics: Interventions and Practices in Educational and Human Service Programs. (1-4 cr [max 8 cr]. Prereq=#)

Concepts, issues, and practices related to the community inclusion of children, youth, and adults with developmental disabilities through weekly seminar and extensive supervised experience working with individuals within the community.

EPSY 5751. Student Teaching: Deaf/Hard of Hearing. (1-6 cr [max 10 cr]. Prereq=#)

Students participate in educational programming for infants, children, and youth who are deaf or hard of hearing, as well as in onsite, directed experiences under the supervision of master teachers of deaf and hard of hearing students.

EPSY 5752. Student Teaching: Learning Disabilities. (1-6 cr [max 10 cr]; S-N only. Prereq=#)

Supervised experience in teaching or related work in schools or other agencies serving children and adolescents with learning disabilities.

EPSY 5753. Student Teaching: Early Childhood Special Education. (1-6 cr [max 8 cr]; S-N only. Prereq=#, completion of all course requirements for license in ECSE)

Supervised experience in teaching or related work in schools, agencies, or home settings with infants, toddlers, and preschoolers with disabilities and their families.

EPSY 5754. Student Teaching: Social and Emotional Disabilities. (1-6 cr [max 8 cr]; A-F only. Prereq=Completion of licensure courses for social and emotional disorders, #)

Teach students with social and emotional disorders at public schools and other appropriate sites. Attend a weekly seminar on student teaching competencies.

EPSY 5755. Student Teaching: Developmental Disabilities, Mild/Moderate. (1-6 cr [max 6 cr]; A-F only. Prereq=Completion of all licensure coursework, #)

Supervised student teaching, or special practicum project, in schools or other agencies serving students at elementary/secondary levels who have mild to moderate developmental disabilities.

EPSY 5756. Student Teaching: Developmental Disabilities, Moderate/Severe. (1-6 cr [max 6 cr]; A-F only. Prereq=Completion of all licensure coursework, #)

Supervised student teaching, or special practicum projects, in schools or other agencies serving students at elementary/secondary levels who have moderate to severe developmental disabilities.

EPSY 5757. Student Teaching: Physical and Health Related Disabilities. (1-6 cr [max 8 cr]; A-F only. Prereq=#)

Supervised student teaching and related work (direct instruction and consultation) in schools or other agencies serving children and adolescents who have physical disabilities.

EPSY 5758. Student Teaching: Visual ImpAIRments. (1-6 cr [max 8 cr]; A-F only. Prereq=#)

Supervised student teaching, or special practicum project, in schools or other agencies serving children and adolescents who have visual impairments.

EPSY 5800. Special Topics in School Psychology. (1-9 cr [max 9 cr])

Current issues in school psychology or areas not normally available through regular curriculum offerings.

EPSY 5801. Assessment and Decision Making in School and Community Settings. (3 cr; A-F only)

Introduction to psychological and educational assessment for individuals who work with children, especially those experiencing academic and behavior problems. Study of standardized group and individual tests of intelligence, achievement, socio-emotional functioning, perception, reading, mathematics, adaptive behavior, and language.

EPSY 5849. Observation and Assessment of the Preschool Child. (3 cr [max 4 cr])

Introduction to assessment principles and practices, including observational assessment methods, for children (birth to 5). Intended primarily for teachers in training and others interested in basic information regarding assessment and its relationship to intervention services for young children.

EPSY 5851. Collaborative Family-School Relationships. (2-3 cr [max 3 cr]. Prereq=Honors senior or grad student)

Theoretical and empirical bases for creating collaborative family-school relationships for students' development and educational success in school. Emphasis on model programs for K-12 and practical strategies for educational personnel to address National Educational goal 8.

EPSY 5852. Prevention and Early Intervention. (3 cr)

Theory/research base for school-based primary/secondary programs to promote academic/social competence of children/youth (birth to grade 12).

EPSY 5871. Interdisciplinary Practice and Interagency Coordination in Education and Human Services. (3 cr)

Principles and procedures of interdisciplinary practice and interagency coordination. Examine the relative strengths of interdisciplinary approaches, develop skills for collaborating with others, and examine different approaches to interagency coordination.

EPSY 5991. Independent Study in Educational Psychology. (1-8 cr [max 20 cr]; A-F only. Prereq=#)

Self-directed study in areas not covered by regular courses. Specific program of study is jointly determined by student and advising faculty member.

Electrical and Computer Engineering (EE)

Department of Electrical and Computer Engineering

Institute of Technology

EE 1. Refresher Course for Electrical Engineers. (0 cr; A-F only. Prereq=[BSEE or BEE], pass EIT exam, four yrs elec eng experience)

Review of electrical engineering fundamentals required to pass the Minnesota Professional Engineering Examination in electrical engineering. Organized review of material ordinarily contained in electrical engineering college curriculum. Emphasizes problem solving with orientation as close possible to type of questions in exam.

EE 301. Introduction to Digital System Design: Discussion. (0 cr; S-N only. Prereq=Concurrent registration in 2301)

Discussion section to go with 2301.

EE 361. Introduction to Microcontrollers: Discussion. (0 cr; S-N only. Prereq=Concurrent registration in 2361)

Discussion section to go with 2361.

EE 1001. Introduction to Electrical and Computer Engineering. (1 cr; S-N only. Prereq=Lower div IT or Δ)

Introduction to engineering in general and to computer engineering in particular. Exploration of techniques and technologies developed by electrical and computer engineers.

EE 1301. Introduction to Computing Systems. (4 cr. Prereq=MATH 1271 or MATH 1371)

Fundamental concepts of computing systems, from machine level to high-level programming. Transistors, logic circuits. Instruction set architecture. Memory, pointer addressing. Binary arithmetic, data representation. Data types/structures. Assembly language, C programming. Control flow, iteration, recursion. Integral lab.

EE 1701W. Energy, Environment, and Society. (3 cr)

Energy supply and demand; generation of electricity; environmental impact of energy usage; energy conservation methods; utility deregulation; role of communication and computers. Demos, computer simulation, teamwork, and projects.

EE 2001. Introduction to Electronic and Electrical Circuits. (3 cr. Prereq=PHYS 1302, ¶is required in Math 2243, 2373, 2573)

Physical principles underlying modeling of circuit elements. Two- and three-terminal resistive elements, Kirchhoff's laws. Independent and dependent sources, opamps. Small signal models for BJT and FET, elementary amplifiers. Simple resistive circuits. Linearity in circuits. First- and second-order circuits. Circuits in sinusoidal steady state.

EE 2002. Introductory Circuits and Electronics Laboratory. (1 cr. Prereq=2001 or ¶2001)

Introductory lab in electronics to accompany 2001. Experiments with simple circuits. Familiarization with basic measurement tools and equipment.

EE 2006. Introductory Circuits Laboratory. (.5 cr)

Meets concurrently with an arranged 2002 section.

EE 2011. Linear Systems and Circuits. (3 cr. Prereq=2001)

Elements of signals and of linear system analysis. Time-domain modeling of linear systems by differential equations. Laplace and Fourier domain modeling/analysis. High frequency models of diodes/transistors. Frequency response of amplifiers. Design of electronic filters. Multistage amplifiers.

EE 2101. Introduction to Electronics I. (1.5 cr. Prereq=Linear circuits)

Diodes, field effect transistors and bipolar junction transistors, small signal transistor models. Amplifier circuits. Covers electronics content of 2001 in half a semester.

EE 2103. Introduction to Electronics II. (1 cr. Prereq=2001 or 2101)

Active and passive analog filters, high frequency diode and transistor models, amplifier frequency response, multistage amplifiers. Covers electronics content of 2011 in half a semester.

EE 2301. Introduction to Digital System Design. (4 cr. Prereq=Math [1272 or 1372 or 1572], concurrent registration in 0301)

Boolean algebra, logic gates, combinational logic, logic simplification, sequential logic, design of synchronous sequential logic, VHDL modeling, design of logic circuits. Integral lab.

EE 2361. Introduction to Microcontrollers. (4 cr. Prereq=[1301 or CSCI 1113 or [2301, CSCI 1901]], ¶0361)

Computer organization, assembly language programming, arithmetic/logical operations, parallel/serial input/output. Exception handling, interrupts, using special-purpose features such as A/D converters, fuzzy logic, DSP operations. Integral lab.

EE 3005. Fundamentals of Electrical Engineering. (4 cr. Prereq=Math 2243, PHYS 1302; not for EE majors)

Fundamentals of analog electronics, digital electronics, and power systems. Circuit analysis, electronic devices and applications, digital circuits, microprocessor systems, operational amplifiers, transistor amplifiers, frequency response, magnetically coupled circuits, transformers, steady state power analysis.

EE 3006. Fundamentals of Electrical Engineering Laboratory. (1 cr. Prereq=Concurrent enrollment in 3005 is allowed but not required)

Lab to accompany 3005.

EE 3015. Signals and Systems. (3 cr. Prereq=[2011, IT] or Δ)

Basic techniques for analysis/design of signal processing, communications, and control systems. Time/frequency models, Fourier-domain representations, modulation. Discrete-time/digital signal/system analysis. Z transform. State models, stability, feedback.

EE 3025. Statistical Methods in Electrical and Computer Engineering. (3 cr. Prereq=[3015, IT] or instr approval)

Notions of probability. Elementary statistical data analysis. Random variables, densities, expectation, correlation. Random processes, linear system response to random waveforms. Spectral analysis. Computer experiments for analysis and design in random environment.

- EE 3101. Circuits and Electronics Laboratory I.** (2 cr. Prereq—[2002, [3115 or [3115], IT] or Δ) Experiments in circuits/electronics.
- EE 3102. Circuits and Electronics Laboratory II.** (2 cr. Prereq—[3101 or IT or Δ], attendance first day of class) Experiments in circuits/electronics. Team design project.
- EE 3105. Circuits Electronics Transition Laboratory.** (.75 cr; A-F only. Prereq—3015) Together with 3400, completes the 3101 requirement.
- EE 3115. Analog and Digital Electronics.** (4 cr. Prereq—[3015 or [3015, IT] or Δ) Feedback amplifiers. Stability and compensation. Oscillators. Internal structure of operational amplifiers. Switching active devices. BJT and FET logic gates. Sequential circuits. Designing complex digital circuits.
- EE 3161. Semiconductor Devices.** (3 cr. Prereq—Upper div IT, 2011, PHYS 1302, PHYS 2303 or CHEM 1022) Elementary semiconductor physics; physical description of pn junction diodes, bipolar junction transistors, field-effect transistors.
- EE 3601. Transmission Lines, Fields, and Waves.** (3 cr. Prereq—[2011, [Math 2243 or Math 2373 or Math 2573], [PHYS 1302 or PHYS 1402], IT] or Δ) Properties of transmission lines, electrostatics, magnetostatics, and electromagnetic waves in unbounded space. Guides, cavities, radiation theory, antennas.
- EE 3940. Special Topics in Electrical and Computer Engineering.** (1-4 cr [max 8 cr]. Prereq—#) Topics that are not available in regular courses. Topics vary.
- EE 3961. Industrial Assignment I.** (1 cr; S-N only. Prereq—Admission to ECE co-op) Industrial work assignment in Electrical and Computer Engineering co-op program. Grade based on student's written report of semester's assignment, but deferred until completion of 4961.
- EE 3990. Curricular Practical Training.** (1-3 cr [max 3 cr] Prereq—#, undergrad EE or CompE major) Industrial work assignment involving advanced electrical engineering technology. Reviewed by faculty member. Final report covering work assignment
- EE 4111. Advanced Analog Electronics Design.** (4 cr. Prereq—3015, 3115) Basic integrated circuit building blocks of differential amplifiers, high bandwidth, instrumentation amplifiers. Current/voltage references. Feedback, stability, and noise in electronic circuits. Integral lab.
- EE 4231. Linear Control Systems: Designed by Input/Output Methods.** (3 cr. Prereq—[3015, [upper div IT or grad student in IT major]] or #; no [EE or CompE] grad cr) Modeling, characteristics, and performance of feedback control systems. Stability, root locus, and frequency response methods. Digital implementation, hardware considerations.
- EE 4233. State Space Control System Design.** (3 cr. Prereq—[3015, upper div IT] or #; no EE or CompE grad cr) State space models, performance evaluation, numerical issues for feedback control. Stability, state estimation, quadratic performance. Implementation, computational issues.
- EE 4235. Linear Control Systems Laboratory.** (1 cr. Prereq—4231 or [4231; no EE or CompE grad cr] Lab to accompany 4231.
- EE 4237. State Space Control Laboratory.** (1 cr. Prereq—4233 or [4233; no cr for [EE or CompE] grad students] Lab to accompany 4233.
- EE 4301. Digital Design With Programmable Logic.** (4 cr. Prereq—2301, CSCI 1113 or CSCI 1901) Introduction to system design and simulation. Design using VHDL code and synthesis. Emulation using VHDL code.
- EE 4341. Microprocessor and Microcontroller System Design.** (4 cr. Prereq—2301, 2361, upper div IT; no EE or CompE grad cr) Microprocessor interfacing. Memory design. Exception handling/interrupts. Parallel/serial input/output. Bus arbitration control. Multiprocessor systems. Direct memory access (DMA). Designing dynamic RAM memory systems. Special DRAM modes. Interleaved memory. Advanced bus structures. Integral lab.
- EE 4363. Computer Architecture and Machine Organization.** (4 cr. [SCSI 4203, EE 5361. Prereq—2361]) Introduction to computer architecture. Aspects of computer systems, such as pipelining, memory hierarchy, and input/output systems. Performance metrics. Examines each component of a complicated computer system.
- EE 4501. Communications Systems.** (3 cr. Prereq—3025; no EE or CompE grad cr) Systems for transmission/reception of digital/analog information. Characteristics/design of wired/wireless communication systems. Baseband, digital, and carrier-based techniques. Modulation. Coding. Electronic noise and its effects on design/performance.
- EE 4505. Communications Systems Laboratory.** (1 cr [max 3 cr]. Prereq—4501 or [4501; no EE or CompE grad cr] Experiments in analysis/design of wired/wireless communication systems. Lab to accompany 4501.
- EE 4541. Digital Signal Processing.** (3 cr. Prereq—[3015, 3025] or #) Review of linear discrete time systems and sampled/digital signals. Fourier analysis, discrete/fast Fourier transforms. Interpolation/decimation. Design of analog, infinite-impulse response, and finite impulse response filters. Quantization effects.
- EE 4609. Digital Signal Integrity.** (3 cr. [EE 5609. Prereq—2011, PHYS 1301, 1302, [sr EE or CompE major]) Introduction to high speed interconnect design. Transmission line theory, coupled line theory, elements of microwave circuit theory, parasitic calculations/measurement, techniques for good interconnect design.
- EE 4701. Electric Drives.** (3 cr [max 4 cr]. Prereq—3015) AC/DC electric-machine drives for speed/position control. Integrated discussion of electric machines, power electronics, and control systems. Computer simulations. Applications in electric transportation, robotics, process control, and energy conservation.
- EE 4703. Electric Drives Laboratory.** (1 cr. Prereq—4701 or [4701]) Laboratory to accompany 4701. Simulink-based simulations of electric machines/drives in applications such as energy conservation and motion control in robotics.
- EE 4721. Introduction to Power System Analysis.** (3 cr. Prereq—2011) AC power systems. Large power system networks. Mathematics and techniques of power flow analysis, short circuit analysis, and transient stability analysis. Use of a power system simulation program for design. Integral lab.
- EE 4722. Power System Analysis Laboratory.** (1 cr. Prereq—4721 or [4721]) Lab analysis of AC power systems, power system networks, power flow, short circuit, transient stability.
- EE 4724. Power System Planning and Operation.** (3 cr. Prereq—4721) Engineering considerations of economics, expansion, and reliability of power systems. Costs/scheduling of generation sources. Planning for system reliability. Operation of power systems to maintain reliability.
- EE 4741. Power Electronics.** (3 cr [max 4 cr]. Prereq—3015, 3115) Switch-mode power electronics. Switch-mode DC power supplies. Switch-mode converters for DC and AC motor drives, wind/photovoltaic inverters, interfacing power electronics equipment with utility system. Power semiconductor devices, magnetic design, electro-magnetic interference (EMI).
- EE 4743. Switch-Mode Power Electronics Laboratory.** (2 cr. Prereq—4741 or [4741]) Laboratory to accompany 4741. PSpice-/Simulink-based simulations of converters, topologies, and control in switch-mode dc power supplies, motor drives for motion control, and inverters for interfacing renewable energy sources to utility grid.
- EE 4940. Special Topics in Electrical and Computer Engineering.** (1-4 cr [max 8 cr]. Prereq—IT or #) Topics that are not available in regular courses. Topics vary.
- EE 4951W. Senior Design Project.** (2 cr. Prereq—3015, 3115, 3102, 3601, attendance first day of class) Team participation in formulating/solving open-ended design problems. Oral/written presentations.
- EE 4961. Industrial Assignment II.** (2 cr; S-N only. Prereq—3961, ECE co-op; no grad cr) Industrial work assignment in ECE co-op program. Grade based on student's formal written report covering semester's work.
- EE 4962. Industrial Assignment III.** (1 cr; S-N only. Prereq—4961, EE co-op, Δ; no grad cr) Industrial work assignment in ECE co-op program. Formal written report covering semester's work.
- EE 4970. Directed Study.** (1-3 cr [max 3 cr]. Prereq—Cr ar [may be repeated for cr]; Δ) Studies of approved projects, either theoretical or experimental.
- EE 4981H. Senior Honors Project I.** (2 cr. Prereq—ECE honors, sr, #) Experience in research/design for electrical/computer engineering. Oral/written reports.
- EE 4982V. Senior Honors Project II.** (2 cr. Prereq—4981) Experience in research/design for electrical/computer engineering. Oral/written reports.
- EE 5121. Transistor Device Modeling for Circuit Simulation.** (3 cr. Prereq—[3115, 3161, IT grad student] or Δ) Basics of MOS, bipolar theory. Evolution of popular device models from early SPICE models to current industry standards.
- EE 5141. Introduction to Microsystem Technology.** (4 cr. Prereq—[3161, 3601, IT grad student] or Δ) Microelectromechanical systems composed of microsensors, microactuators, and electronics integrated onto common substrate. Design, fabrication, and operation principles. Labs on micromachining, photolithography, etching, thin film deposition, metallization, packaging, and device characterization.
- EE 5163. Semiconductor Properties and Devices I.** (3 cr. Prereq—[3161, 3601, IT grad student] or Δ) Principles/properties of semiconductor devices. Selected topics in semiconductor materials, statistics, and transport. Aspects of transport in p-n junctions, heterojunctions.
- EE 5164. Semiconductor Properties and Devices II.** (3 cr. Prereq—[5163, IT grad student] or Δ) Principles/properties of semiconductor devices. Charge control in different FETs, transport, modeling. Bipolar transistor models (Ebers-Moll, Gummel-Poon), heterostructure bipolar transistors. Special devices.
- EE 5171. Microelectronic Fabrication.** (4 cr. Prereq—IT grad student or Δ) Fabrication of microelectronic devices. Silicon integrated circuits, GaAs devices. Lithography, oxidation, diffusion. Process integration of various technologies, including CMOS, double poly bipolar, and GaAs MESFET.

EE 5173. Basic Microelectronics Laboratory. (1 cr. Prereq—[[5171 or ¶5171], IT grad student] or Δ) Students fabricate a polysilicon gate, single-layer metal, NMOS chip, performing 80 percent of processing, including photolithography, diffusion, oxidation, and etching. In-process measurement results are compared with final electrical test results. Simple circuits are used to estimate technology performance.

EE 5231. Linear Systems and Optimal Control. (3 cr. Prereq—[3015, IT grad student] or #) Properties and modeling of linear systems. Linear quadratic and linear-quadratic-Gaussian regulators. Maximum principle.

EE 5235. Robust Control System Design. (3 cr. Prereq—IT grad, 3015, 5231 or #) Development of control system design ideas; frequency response techniques in design of single-input/single-output (and MI/MO) systems. Robust control concepts. CAD tools.

EE 5239. Introduction to Nonlinear Optimization. (3 cr. Prereq—[3025, Math 2373, Math 2374, IT grad student] or Δ) Nonlinear optimization. Analytical/computational methods. Constrained optimization methods. Convex analysis, Lagrangian relaxation, non-differentiable optimization, applications in integer programming. Optimality conditions, Lagrange multiplier theory, duality theory. Control, communications, management science applications.

EE 5301. VLSI Design Automation I. (3 cr. Prereq—[2301, IT grad student] or Δ) Basic graph/numerical algorithms. Algorithms for logic/high-level synthesis. Simulation algorithms at logic/circuit level. Physical-design algorithms.

EE 5302. VLSI Design Automation II. (3 cr. Prereq—[5301, IT grad student] or Δ) Basic algorithms, computational complexity. High-level synthesis. Test generation. Power estimation. Timing optimization. Current topics.

EE 5323. VLSI Design I. (3 cr. Prereq—[2301, 3115, IT grad student] or Δ) Combinational static CMOS circuits. Transmission gate networks. Clocking strategies, sequential circuits. CMOS process flows, design rules, structured layout techniques. Dynamic circuits, including Domino CMOS and DCVS. Performance analysis, design optimization, device sizing.

EE 5324. VLSI Design II. (3 cr. Prereq—[5323, IT grad student] or Δ) CMOS arithmetic logic units, high-speed carry chains, fast CMOS multipliers. High-speed performance parallel shifters. CMOS memory cells, array structures, read/write circuits. Design for testability, including scan design and built-in self test. VLSI case studies.

EE 5327. VLSI Design Laboratory. (3 cr. Prereq—[4301, [5323 or ¶5323], IT grad student] or Δ) Complete design of an integrated circuit. Designs evaluated by computer simulation.

EE 5329. VLSI Digital Signal Processing Systems. (3 cr. Prereq—[[5323 or ¶5323], IT grad student] or Δ) Programmable architectures for signal/media processing. Data-flow representation. Architecture transformations. Low-power design. Architectures for two's complement/redundant representation, carry-save, and canonic signed digit. Scheduling/allocation for high-level synthesis.

EE 5333. Analog Integrated Circuit Design. (3 cr. Prereq—[3115, IT grad student] or Δ) Fundamental circuits for analog signal processing. Design issues associated with MOS/BJT devices. Design/testing of circuits. Selected topics (e.g., modeling of basic IC components, design of operational amplifier or comparator or analog sampled-data circuit filter).

EE 5364. Advanced Computer Architecture. (3 cr. Prereq—[[4363 or CSCI 4203], IT grad student] or Δ) Instruction set architecture, processor microarchitecture. Memory and I/O systems. Interactions between computer software and hardware. Methodologies of computer design.

EE 5371. Computer Systems Performance Measurement and Evaluation. (3 cr. §EE 5863. Prereq—[[4364 or 5361 or CSCI 4203 or 5201], IT grad student] or Δ) Tools/techniques for analyzing computer hardware, software, and system performance. Benchmark programs, measurement tools, performance metrics. Deterministic/probabilistic simulation techniques, random number generation/testing. Bottleneck analysis.

EE 5381. Telecommunications Networks. (3 cr. Prereq—[4501, 5531, IT grad student] or Δ) Fundamental concepts of modern telecommunications networks, mathematical tools required for their performance analysis. Layered network architecture, point-to-point protocols/links, delay models, multiaccess communication/routing.

EE 5391. Computing With Neural Networks. (3 cr. Prereq—[3025 or STAT 3091], IT grad student] or Δ) Neural networks as a computational model. Connections to AI, statistics and model-based computation. Associative memory and matrix computation; Hopfield networks. Supervised networks for classification and prediction. Unsupervised networks for data reduction. Associative recognition/retrieval, optimization, time series prediction, knowledge extraction.

EE 5501. Digital Communication. (3 cr. Prereq—[3025, 4501, IT grad student] or Δ) Theory/techniques of modern digital communications. Communication limits. Modulation/detection. Data transmission over channels with intersymbol interference. Optimal/suboptimal sequence detection. Equalization. Error correction coding. Trellis-coded modulation. Multiple access.

EE 5505. Wireless Communication. (3 cr. Prereq—[4501, IT grad student] or Δ; 5501 recommended) Introduction to wireless communication systems. Propagation modeling, digital communication over fading channels, diversity and spread spectrum techniques, radio mobile cellular systems design, performance evaluation. Current European, North American, and Japanese wireless networks.

EE 5531. Probability and Stochastic Processes. (3 cr. Prereq—[3025, IT grad student] or Δ) Probability, random variables and random processes. System response to random inputs. Gaussian, Markov and other processes for modeling and engineering applications. Correlation and spectral analysis. Estimation principles. Examples from digital communications and computernetworks.

EE 5542. Adaptive Digital Signal Processing. (3 cr. Prereq—[4541, 5531, IT grad student] or Δ) Design, application, and implementation of optimum/adaptive discrete-time FIR/IIR filters. Wiener, Kalman, and Least-Squares. Linear prediction. Lattice structure. LMS, RLS, and Levinson-Durbin algorithms. Channel equalization, system identification, biomedical/sensor array processing, spectrum estimation. Noise cancellation applications.

EE 5545. Digital Signal Processing Design. (3 cr. Prereq—[4541, IT grad student] or Δ) Real-time implementation of digital signal processing (DSP) algorithms, including filtering, sample-rate conversion, and FFT-based spectral analysis. Implementation on a modern DSP Platform. Processor architecture. Arithmetic operations. Real-time processing issues. Processor limitations. Integral laboratory.

EE 5549. Digital Signal Processing Structures for VLSI. (3 cr. Prereq—[4541, IT grad student] or Δ) Pipelining. Parallel processing. Fast convolution. FIR, rank-order, IIR, lattice, adaptive digital filters. Scaling and roundoff noise. DCT. Viterbi coders. Lossless coders, video compression.

EE 5551. Multiscale and Multirate Signal Processing. (3 cr. Prereq—[4541, 5531, IT grad student] or Δ) Multirate discrete-time systems. Bases, frames. Continuous wavelet transform. Scaling equations. Discrete wavelet transform. Applications in signal/image processing.

EE 5561. Image Processing and Applications. (3 cr. Prereq—[4541, 5581, IT grad student] or #) Two-dimensional digital filtering/transforms. Application to image enhancement, restoration, compression, and segmentation.

EE 5581. Information Theory and Coding. (3 cr. Prereq—[5531, IT grad student] or Δ) Source/channel models, codes for sources/channels. Entropy, mutual information, capacity, rate-distortion functions. Coding theorems.

EE 5583. Error Control Coding. (3 cr. Prereq—[[3025, Math 2373] or equiv], [IT grad student or Δ]) Error-correcting codes. Concepts, properties, polynomial representation. BCH, Golay, Reed-Muller/Reed-Solomon codes. Convolutional codes. Iterative codes.

EE 5585. Data Compression. (3 cr. Prereq—IT grad student or Δ) Source coding in digital communications and recording. Codes for lossless compression. Universal lossless codes. Lossless image compression. Scalar and vector quantizer design. Loss source coding theory. Differential coding, trellis codes, transform/subband coding. Analysis/synthesis schemes.

EE 5601. Introduction to RF/Microwave Engineering. (3 cr. Prereq—[3601, IT grad student] or Δ) Fundamentals of EM theory and transmission lines concepts. Transmission lines and network analysis. CAD tool. Lumped circuit component designs. Passive circuit components. Connectivity to central communication theme.

EE 5602. RF/Microwave Circuit Design. (3 cr. Prereq—[5601 or equiv], [IT grad student or #]) Transmission lines, network analysis concepts. CAD tools for passive/active designs. Diode based circuit designs (detectors, frequency multipliers, mixers). Transistor based circuit design (amplifiers, oscillators, mixer/doubler).

EE 5607. Wireless Hardware System Design. (3 cr. Prereq—[3015, 3115, 3601, IT grad student] or Δ) Review of random processes, noise, modulation, and error probabilities. Basis antenna operation, power transfer between antennas, rf propagation phenomena, transmitters/receivers, transmission lines, effect of antenna performance on system performance, rf/microwave device technologies, small-signal amplifiers, mixers, power amplifiers, rf oscillators.

EE 5609. Digital Signal Integrity. (3 cr. §EE 4609. Prereq—[2011, PHYS 1301, PHYS 1302, IT grad student] or Δ) Introduction to high speed interconnect design. Transmission line theory, coupled line theory, elements of microwave circuit theory, parasitic calculations/measurement, techniques for good interconnect design. Term paper.

EE 5611. Plasma-Aided Manufacturing. (4 cr; A-F only. §ME 5361. Prereq—[[ME 3321, ME 3322] or equiv], [upper div IT or grad student] or Δ) Manufacturing using plasma processes. Plasma properties as a processing medium. Plasma spraying, welding and microelectronics processing. Process control and system design; industrial speakers. Cross-disciplinary experience between heat transfer design issues and manufacturing technology.

EE 5613. RF/Microwave Circuit Design Laboratory. (2 cr. Prereq—[[5601 or §5601], IT grad student] or Δ) Scattering parameters, planar lumped circuits, transmission lines, RF/microwave substrate materials, matching networks/tuning elements, resonators, filters, combiners/dividers, couplers. Integral lab.

EE 5616. Antenna Theory and Design. (3 cr. Prereq—[[5601 or §5601], IT grad student] or Δ) Antenna performance parameters, vector potential/radiation integral, wire antenna structures, broadband antenna structures, microstrips/aperture theory, antenna measurements.

EE 5621. Physical Optics. (3 cr. Prereq—[3015, IT grad student] or Δ) Physical optics principles, including Fourier analysis of optical systems/images, scalar diffraction theory, interferometry, and coherence theory. Diffractive optical elements, holography, astronomical imaging, optical information processing, microoptics.

EE 5622. Physical Optics Laboratory. (1 cr. Prereq—[[5621 or §5621], IT grad student] or Δ) Fundamental optical techniques. Diffraction and optical pattern recognition. Spatial/temporal coherence. Interferometry. Speckle. Coherent/incoherent imaging. Coherent image processing. Fiber Optics.

EE 5624. Optical Electronics. (4 cr. Prereq—[[3601 or PHYS 3002], IT grad student] or Δ) Fundamentals of lasers, including propagation of Gaussian beams, optical resonators, and theory of laser oscillation. Polarization optics, electro-optic, acousto-optic modulation, nonlinear optics, phase conjugation.

EE 5627. Optical Fiber Communication. (3 cr. Prereq—[3015, 3601, IT grad student] or Δ) Components/systems aspects of optical fiber communication. Modes of optical fibers. Signal degradation/dispersion. Optical sources/detectors. Digital/analog transmission systems. Direct/coherent detection. Optical amplifiers. Optical soliton propagation.

EE 5628. Fiber Optics Laboratory. (1 cr. Prereq—[[5627 or §5627], IT grad student] or #) Experiments in fiber optics. Dielectric waveguides, modes in optical fibers, fiber dispersion/attenuation, properties of light sources/detectors, optical communication systems.

EE 5629. Optical System Design. (2 cr. Prereq—IT grad student or Δ) Elementary or paraxial optics. Non-paraxial, exact ray tracing. Energy considerations in instrument design. Fourier optics and image quality. Design examples: telescopes, microscopes, diffraction-limited lenses, projectors, scientific instruments.

EE 5653. Physical Principles of Magnetic Materials. (3 cr. Prereq—IT grad student or Δ) Physics of diamagnetism, paramagnetism, ferromagnetism, antiferromagnetism, ferrimagnetism. Ferromagnetic phenomena. Static/dynamic theory of micromagnetics, magneto-optics, and magnetization dynamics. Magnetic material applications.

EE 5655. Magnetic Recording. (3 cr. Prereq—IT grad student or Δ) Magnetic fundamentals, recording materials, idealized models of magnetic records/reproduction, analytic models of magnetic record heads, sinusoidal magnetic recording, digital magnetic recording, magnetic recording heads/media, digital recording systems.

EE 5657W. Physical Principles of Thin Film Technology. (4 cr. Prereq—IT grad student or #) Physical principles of deposition, characterization, and processing of thin film materials. Materials science, vacuum science, and technology. Physical vapor deposition techniques. Properties of thin films and metallurgical/protective coatings. Modification of surface films. Emerging thin film materials/applications. Lab. Demonstration experiments.

EE 5705. Advanced Electric Drives. (3 cr. Prereq—[4701, IT grad student] or Δ) D-q axis analysis of salient-pole synchronous motor drives. Vector-controlled induction motor drives, sensor-less drives, voltage space-vector modulation techniques, current-source inverter drives, reluctance drives. Power quality issues. Integrated software lab.

EE 5721. Power Generation Operation and Control. (3 cr. Prereq—[4721, IT grad student] or Δ) Engineering aspects of power system operation. Economic analysis of generation plants & scheduling to minimize total cost of operation. Scheduling of hydro resources and thermal plants with limited fuel supplies. Loss analysis, secure operation. State estimation, optimal power flow. Power system organizations.

EE 5725. Power Systems Engineering. (3 cr. Prereq—[4721, IT grad student] or Δ) Reliability analysis of large power generation/transmission systems. Writing programs for state-by-state analysis and Monte Carlo analysis. Power system protection systems, circuit current calculations, short circuit detection, isolating faulted components. Characteristics of protection components.

EE 5741. Advanced Power Electronics. (3 cr. Prereq—IT grad student] or Δ) Physics of solid-state power devices, passive components, magnetic optimization, advanced topologies. Unity power factor correction circuits, EMI issues, snubbers, soft switching in dc/ac converters. Practical considerations. Very low voltage output converters. Integrated computer simulations.

EE 5811. Biomedical Instrumentation. (3 cr. Prereq—IT grad student or life-science grad student or Δ) Biological signal sources. Electrodes, microelectrodes, other transducers. Characteristics of amplifiers. Noise in biological signals. Filtering, recording, display. Protection of patients from electrical hazards. Experiments in neural/muscle stimulation, EKG/EMG recording, neuron simulation, filtering, and low-noise amplifiers.

EE 5821. Biological System Modeling and Analysis. (3 cr. Prereq—IT grad student or life science grad student or Δ) Purpose of biological system modeling. Advantages, limitations, special problems. Models of nerve excitation and propagation. Biological control systems. Respiratory/cardiovascular systems. Sensory organs, theories of perception. Limbs/locomotion.

EE 5863. Computer Systems Performance Analysis. (2 cr. §EE 5371. Prereq—[[4363 or 5361], IT grad student] or Δ) Basic performance measurement/simulation techniques necessary for experimental computer science/engineering. Hands-on performance evaluation techniques using simulations/measurements of existing systems. Using measured data to compare computer systems or to judge how much a new architectural feature improves systems performance.

EE 5940. Special Topics in Electrical Engineering I. (1-4 cr [max 12 cr]) Special topics in electrical and computer engineering. Topics vary.

EE 5950. Special Topics in Electrical Engineering II. (1-4 cr [max 12 cr]) Special topics in electrical and computer engineering. Topics vary.

EE 5960. Special Topics in Electrical Engineering III. (1-4 cr [max 12 cr]) Special topics in electrical and computer engineering. Topics vary.

EE 5990. Curricular Practical Training. (1-2 cr [max 6 cr]; S-N only. Prereq—#) Industrial work assignment involving advanced electrical engineering technology. Review by faculty member. Final report covering work assignment.

Emergency Health Services (EHS)

College of Continuing Education

EHS 2999. Certification Credit. (1-40 cr [max 40 cr]; A-F only) Evaluation of credits earned for certification

EHS 3112. First Responder for Coaches and Athletic Trainers. (3 cr; A-F only)

Critical thinking skills in emergency settings. Patient assessment, airway management, CPR, splinting, spinal immobilization. Certifications: AHA-BLS, First Responder.

EHS 3312. Emergency Medical Technician. (6 cr; A-F only) Foundation for basic life support treatment of medical/trauma patients. Patient assessment, airway management, AHA BLS, mass casualty/bio-terrorism response, critical thinking, decision making. Meets USDOT standards for Emergency Medical Technician (EMT).

EHS 3999. Special Exam. (1-15 cr [max 15 cr])

EHS 4011. Concepts of Emergency Health Service. (3 cr; A-F only)

Emergency medical system (EMS). Its impact on all aspects of U.S. culture. Basic practices generalized across systems. Comprehensive review of components required for effective EMS. Historical perspective, medical-legal concerns, medical oversight, accountability, scope of practice, communications/transportation, rural vs. urban issues, disaster management.

EHS 4021. EMS Planning and Fiscal Management. (3 cr; A-F only)

Fundamentals of planning, fiscal, and process management as related to emergency medical systems (EMS). Regulatory requirements, EMS delivery models, contract negotiations, budgeting, scenario planning.

EHS 4999. Practicum. (1-3 cr [max 9 cr]; A-F only. Prereq—EHS)

Project in student's employing organization or project in organization providing internship or integration of projects from previous coursework or development of program-related project.

EHS 5031. Basic Principles of Research in Emergency Health Services. (3 cr; A-F only)

Basic principles of research in emergency health services.

English as a Second Language (ESL)

Department of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

ESL 10. TOEFL Preparation. (0 cr [max 8 cr]; S-N only. Prereq—Nonnative English speaker; see Minnesota English Center for override)

Describes the format of the TOEFL test. Focuses on strategies for improving skills for each section of the test.

ESL 20. Pronunciation Workshop. (0 cr [max 8 cr]; S-N only. Prereq—Nonnative English speaker; see Minnesota English Center for override)

Individual attention to specific areas of spoken language, including intonation, rhythm, segmentals.

ESL 40. Skills Enhancement. (0 cr [max 8 cr]; S-N only. Prereq—Nonnative English speaker; see Minnesota English Center for override)

Student will focus on specific areas of their English which need improvement.

ESL 80. English Through Literature. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

An advanced course designed for students who want further practice in reading, listening, speaking and writing for non-academic purposes.

ESL 90. English Through Music. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Student will learn English vocabulary and culture through folksongs and by looking at popular music in various decades.

ESL 100. Topics in American Culture. (0 cr [max 6 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Students will learn about areas of U.S. culture such as American humor, religions, ethnic groups, lifestyles, and popular culture.

ESL 111. Beginning Grammar. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Introduces and reviews grammatical structures with attention to meaning, use, and form.

ESL 121. Beginning Reading/Composition. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Reading short passages of limited difficulty. Emphasizes main ideas, vocabulary, reading speed, skimming and scanning. Writing fundamentals, spelling, punctuation, paragraphing, and basic organization. Writing exercises and free writing.

ESL 131. Beginning Oral Skills. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Focuses on the ability to communicate in English in everyday situations. Listening and speaking are emphasized.

ESL 181. Beginning Integrated English. (0 cr [max 18 cr]; S-N only. Prereq–Nonnative English Speaker, Δ; see Minnesota English Center for override)

Reading, writing, speaking, listening, grammar.

ESL 191. English Skills Enhancement. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Improving basic English language skills through work in computer/language lab. Focused activities for individual learners.

ESL 193. Pronunciation. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Addresses important aspects of English pronunciation necessary to improve comprehensibility and reduce foreign-accents. Includes work on enunciation; word, phrasal, and sentence stress; intonation; linking; thought groups; and rhythm.

ESL 200. Understanding American Universities. (0 cr [max 2 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Strategies for success in academic classes including vocabulary development, lecture comprehension, and textbook reading; application of listening skills and the reading of supporting unadapted material.

ESL 211. High Beginning Grammar. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Reviews and adds to students' skills with basic structures. Focuses on increasingly complex structures with attention to form, meaning, and use; practice of structures in controlled speaking and writing activities.

ESL 221. High Beginning Reading/Composition. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Reading longer passages of limited difficulty with increased speed. Main ideas, vocabulary development, reading speed, skimming and scanning. Writing fundamentals, spelling, punctuation, paragraphing, and organization. Writing exercises and free writing.

ESL 231. High Beginning Oral Skills. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Ability to communicate in English in everyday situations. Emphasis on listening and speaking, and increasing vocabulary and fluency in spoken English.

ESL 300. Computer Lab: Intro to Computer Basics. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Students will learn basic word processing.

ESL 310. Computer Lab: Using the Internet for Language Learning. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Students will complete projects on email and the internet.

ESL 311. Low Intermediate Grammar. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Reviews and adds to students' skills with basic structures. Emphasizes increasingly complex structures with attention to form, meaning, and use; practice of structures used in controlled speaking and writing situations.

ESL 321. Low Intermediate Reading/Composition. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Reading for main ideas and supporting ideas with increased speed; vocabulary development, word formation, and use of dictionary; spelling, punctuation and paragraphing. Organization and writing as a process.

ESL 331. Low Intermediate Oral Skills. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Practice in speaking in structured and semi-structured situations with special attention to basic regularities in pronunciation.

ESL 400. Library and Research Skills. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Students will learn the basics of using the university library system for research purposes.

ESL 411. Intermediate Grammar. (0 cr [max 8 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)

Reviews and adds to students' skills with basic structures. Increasingly complex structures with attention to form, meaning and use. Verb phrases; practice of structures in controlled speaking and writing activities.

ESL 421. Intermediate Reading/Composition. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Reading for main ideas and supporting ideas with increased speed; vocabulary development through study of word formation and use of dictionary. Writing fundamentals; organization and writing as a process.

ESL 431. Intermediate Oral Skills. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Develop fluency and accuracy; language for specific functions; communication strategies; standard forms of organization for academic lectures; understanding natural conversational speech.

ESL 500. Community Service Learning. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Students will learn about and participate in community service projects.

ESL 511. High Intermediate Grammar. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Reviews and adds to repertoire of structures with attention to meaning, use and form; emphasizes verb phrase and control of grammar in writing.

ESL 521. High Intermediate Reading/Composition. (0 cr [max 16 cr]; S-N only. Prereq–Prerequisite: Nonnative English speaker. See Minnesota English Center for override)

Reading unadapted as well as adapted passages; efficiency, vocabulary, drawing inferences, identifying point of view, using knowledge of organization to aid understanding, writing process, academic-style assignments.

ESL 531. High Intermediate Oral Skills. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Develop fluency and accuracy in everyday situations and in academic situations; special attention to communication strategies; prepares students for academic lectures by introducing standard forms of organization and note-taking skills. Students also work on understanding natural conversational speech using a variety of authentic materials.

ESL 600. International Business Communication. (0 cr [max 4 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)

How to write business letters in English. E-mail, voice mail for business.

ESL 611. Advanced Grammar. (0 cr [max 4 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Focuses on difficult areas of grammar and on providing students with resources to work on them. Meaning, use and form are emphasized with increased emphasis on complex sentence patterns.

ESL 621. Advanced Reading Composition: The Written Word. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Focuses on improving reading efficiency, including strategy development, as well as vocabulary skill building. Some focus on using reading to support academic writing.

ESL 622. Advanced Reading/Composition: The Written Word. (0 cr [max 16 cr]; S-N only. Prereq–0621) Continuation of ESL 0621.

ESL 631. Advanced Oral Skills. (0 cr [max 16 cr]; S-N only. Prereq–Nonnative English speaker, override from Minnesota English Center)

Listening/speaking skills, U.S. culture. Presentations, readings, film, discussion, travel. Meets for 20 hours weekly. Ten-day camping trip through sites of cultural/historical significance in Minnesota and South Dakota.

ESL 641. Advanced Listening Comprehension. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Lecture comprehension with attention to note taking, recognizing main ideas and support, and determining the attitude of the speaker toward the subject; comprehension of complex information presented in a nonlecture format, as in television documentaries.

ESL 651. Advanced Speaking/Pronunciation. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Emphasizes the use of spoken English in academic settings as well as in conversation. Pronunciation focuses on individual needs.

ESL 661. Advanced Reading. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Students will work on comprehending authentic texts of significant lengths. Develop strategies to apply in academic reading.

ESL 671. Advanced Composition. (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)

Skills needed at every stage of the writing process: finding a topic, determining an approach to the topic, planning and drafting a composition, revising, and editing. Suiting one's writing to audience and topic, and looking at one's own writing critically.

- ESL 700. Topics in the Media.** (0 cr [max 8 cr]; S-N only. Prereq–Nonnative English speaker; see Minnesota English Center for override)
News media as means of English improvement and as source of information/entertainment. Major international news events via radio broadcasts, newspaper, and other news sources. Understanding American culture and developing listening/speaking skills using American movies/television.
- ESL 711. Grammar Through Writing.** (0 cr [max 8 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
Focuses on production of grammatically sophisticated structures in writing. Students edit their assignments.
- ESL 712. Grammar Through Writing.** (0 cr; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
Production of grammatically sophisticated structures in writing. Students edit their assignments.
- ESL 713. Grammar Through Writing.** (0 cr [max 8 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
Production of grammatically sophisticated structures in writing. Students edit their assignments.
- ESL 721. High Advanced Reading/Composition.** (0 cr [max 16 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
Emphasizes reading for academic purposes. Focus on comprehension of scholarly reading selections and on increasing reading efficiency. Focus on writing process, academic-style assignments.
- ESL 731. High Advanced Oral Skills.** (0 cr [max 16 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
Emphasizes listening and speaking skills in addition to understanding of U.S. culture through interaction with American students. Attend a weekly seminar with American university students and visit local schools to make presentations about your home country. Pronunciation instruction will focus on individual needs.
- ESL 732. High Advanced Oral Skills.** (0 cr [max 16 cr]; S-N only. Prereq–0731)
Continuation of 0731
- ESL 741. High Advanced Listening Comprehension.** (0 cr [max 8 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
Lecture comprehension with special attention to note taking, recognizing main ideas and support, and understanding relationship of ideas, implied information, and structure of speech; comprehension of information presented in a wide variety of authentic materials.
- ESL 751. High Advanced Speaking/Pronunciation.** (0 cr [max 8 cr]; S-N only. Prereq–Non-native English speaker; see Minnesota English Center for override)
Emphasizes use of spoken English in academic settings, including presentation skills and discussion skills; pronunciation focuses on individual needs of students.
- ESL 761. High Advanced Reading.** (0 cr [max 8 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
Continued development of strategies to increase reading efficiency and comprehension; paraphrasing/summarizing text; quoting and citing sources; understanding writer's perspective.
- ESL 771. High Advanced Composition.** (0 cr [max 8 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
Refining of skills needed in the writing process; refinement of use of complex grammatical structures; research to support writing.
- ESL 800. English for Science and Technology.** (0 cr [max 2 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
English for formulating hypotheses, describing experiments, and presenting results; includes reading, writing, listening, and speaking activities based on scientific and technical English.
- ESL 810. SIELOP: Grammar.** (0 cr; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
Form, function, meaning of English grammar.
- ESL 820. SIELOP: Reading.** (0 cr; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
English language reading skills.
- ESL 830. SIELOP: Composition.** (0 cr; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
English writing skills.
- ESL 840. SIELOP: Speaking/Pronunciation.** (0 cr; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
English speaking, pronunciation skills
- ESL 850. SIELOP: Listening.** (0 cr; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
English listening skills.
- ESL 900. Topics in English as a Second Language.** (0 cr; S-N only. Prereq–Non-native English speaker; see Minnesota English Center for override)
Topics vary - see Schedule or ONESTOP
- ESL 901. Topics in English as a Second Language.** (0 cr; S-N only. Prereq–Non-native English speaker; see Minnesota English Center for override)
Topics vary. See *Class Schedule*.
- ESL 902. Topics in English as a Second Language.** (0 cr; S-N only. Prereq–Non-native English speaker; see Minnesota English Center for override)
Topics vary. See *Class Schedule*.
- ESL 903. Topics in English as a Second Language.** (0 cr; S-N only. Prereq–Non-native English speaker; see Minnesota English Center for override)
Topics vary. See *Class Schedule*.
- ESL 911. Fundamentals in English as a Second Language.** (0 cr [max 12 cr]; S-N only. Prereq–A, satisfactory score on [EPT or MNBatt or TOEFL])
Basic knowledge/skills needed for daily communication in spoken English. Grammatical structures explained with reference to their uses in social situations. Pronunciation.
- ESL 912. Fundamentals in English as a Second Language.** (0 cr [max 12 cr]; S-N only. Prereq–A, satisfactory score on [EPT or MNBatt or TOEFL])
Basic knowledge/skills needed for daily communication in spoken English. Grammatical structures explained with reference to their uses in social situations. Pronunciation.
- ESL 931. Developing Fluency in English as a Second Language.** (0 cr [max 12 cr]; S-N only. Prereq–A, satisfactory score on [EPT or MNBatt or TOEFL])
Communication skills for social, academic, and professional purposes. Emphasizes listening/speaking. Content drawn from mass media.
- ESL 932. Developing Fluency in English as a Second Language.** (0 cr [max 12 cr]; S-N only. Prereq–A, satisfactory score on [EPT or MNBatt or TOEFL])
Communication skills for social, academic, and professional purposes. Emphasizes listening/speaking. Content drawn from mass media.
- ESL 933. Developing Fluency in English as a Second Language.** (0 cr [max 10 cr]; S-N only. Prereq–Satisfactory score on [EPT or MNBatt or TOEFL])
Communication skills for social, academic, and professional purposes. Emphasizes listening/speaking. Content drawn from mass media.
- ESL 937. International Business Communication.** (0 cr [max 16 cr]; S-N only. Prereq–Non-native speaker of English; see Minnesota English Center for override)
Oral communication in a business setting. English as used in international trade, finance, and marketing. Listening/speaking skills for business materials. E-mail, voice mail. Writing business letters.
- ESL 971. Advanced Academic Writing.** (0 cr [max 8 cr]; S-N only. Prereq–A, grad student, non-native speaker of English, satisfactory score on [EPT or MNBatt or TOEFL])
Introduction to the use of library system and to types of writing required in graduate school courses. Developing/organizing ideas, drafting, revising/editing papers, writing essay exams.
- ESL 993. Directed Studies in English as a Second Language.** (0 cr [max 40 cr]; S-N only. Prereq–Non-native English speaker; see Minnesota English Center for override)
Directed study in English as a second language
- ESL 994. Directed Studies in English as a Second Language.** (0 cr [max 20 cr]; S-N only. Prereq–Non-native English speaker; see Minnesota English Center for override)
- ESL 995. Directed Studies in English as a Second Language.** (0 cr [max 30 cr]; S-N only. Prereq–Non-native English speaker; see Minnesota English Center for override)
- ESL 996. Directed Studies in English as a Second Language.** (0 cr [max 40 cr]; S-N only. Prereq–Non-native English speaker; see Minnesota English Center for override)
- ESL 3101. Advanced English Grammar.** (4 cr [max 8 cr]. Prereq–A, non-native speaker of English, [C-TOEFL score 153-180 or equiv], ESL program consent)
Form, meaning, and use of common English grammatical structures in written/oral discourse. Adverb, adjective, and noun clauses. Verb tense, aspect, and modality. Grammar beyond sentence level. Application to development of revision/editing skills.
- ESL 3102. English Grammar for Academic Purposes.** (4 cr [max 8 cr]. Prereq–3101, [Non-native speaker of English, [C-TOEFL score of at least 183 or equiv], A)
Form, meaning, and use of an expanded repertoire of complex English grammatical structures used in academic written/oral discourse. Subordination, coordination, transition. Complex referential expressions. Complementation. Lexical grammar. Independent self-editing of academic writing.
- ESL 3201. Advanced English Reading and Composition.** (5 cr [max 10 cr]. Prereq–Non-native speaker of English, [C-TOEFL score of 153-180 or equiv], A)
Comprehension of main ideas, organization, and support in longer authentic English texts. Expanded vocabulary comprehension. Fluency, focus, and persuasiveness through draft/revision. Focuses on accuracy/variety of expression.
- ESL 3202. Academic Reading and Composition.** (5 cr [max 10 cr]. Prereq–3201, Non-native speaker of English, [C-TOEFL score of at least 183 or equiv], A)
Academic writer's purpose, main ideas, and supporting evidence in English language texts. Expansion of academic vocabulary. Use of source material in English research writing in different academic genres. Focuses on revision to improve fluency/accuracy.
- ESL 3302. Writing for Academic Purposes.** (4 cr [max 8 cr]. Prereq–3202, non-native speaker of English, [C-TOEFL score of at least 183 or equiv], A)
Writing process. Idea generation/development, drafting, revision, editing. Focuses on different genres of academic writing, including critical response to scholarly argument, scholarly review, and incorporation of source material in writing. "Rush writing" under time pressure to improve fluency in writing.
- ESL 3501. Advanced English Listening and Speaking.** (5 cr [max 10 cr]. Prereq–Non-native speaker of English, [C-TOEFL score 153-180 or equiv], A)
Speaking/understanding naturally spoken English in academic activities such as lecture comprehension, note-taking, participation in class discussions, and oral presentations. Emphasizes cross-cultural interaction related to academic subject matter.
- ESL 3502. Academic Listening and Speaking.** (5 cr [max 10 cr]. Prereq–3501, non-native speaker of English, [C-TOEFL score of at least 183 or equiv], A)
Understanding lectures and academic discussions. Focuses on critical listening. Students produce academic presentations and participate in discussions on subjects of general academic interest. Cross-cultural awareness. Negotiation of disagreement/misunderstanding.

ESL 3551. English Pronunciation. (4 cr [max 8 cr]. Prereq—Non-native speaker of English, Δ)
Improving production/perception of sounds of English language. Intelligibility of individual sounds, rhythm, intonation, word/sentence stress, linking phenomena in fast speech. Rules of pronunciation in relation to rules of English spelling.

ESL 3602. Speaking for Academic Purposes. (4 cr [max 8 cr]. Prereq—3502, non-native speaker of English, [C-TOEFL score of at least 183 or equiv], Δ)
Students participate in American academic interactions of various types: lectures, presentations, seminar-style discussions, informal exchanges. Presenting oneself professionally/socially in collegial settings with accuracy, variety, and flexibility.

ESL 3993. Directed Studies. (1-5 cr [max 15 cr]. Prereq—Non-native speaker of English, #)

English: Composition (ENGC)

Department of English Language and Literature

College of Liberal Arts

ENGC 1001. Preparation for University Writing. (4 cr. Prereq—Category 4 placement; some sections may be limited to ESL students)
Guided writing practice in prewriting, drafting, and revising as well as grammar, sentence structure, and paragraphing. For students who are not fully prepared for academic writing. Weekly meetings with a tutor in the Student Writing Center required.

ENGC 1011. University Writing and Critical Reading: Contemporary Public Issues. (4 cr. §ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1423, PSTL 1424, RHET 1101. Prereq—Some sections limited to non-native speakers)
Critical reading/interpretation of selected texts. Research in various types of resources. Writing through several drafting steps. Finished writing is revised/edited to meet university-level standards of persuasiveness, precision, and correctness.

ENGC 1011H. Honors: University Writing and Critical Reading. (4 cr. §ENGC 1011, ENGC 1012, ENGC 1012H, ENGC 1011H, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1423, PSTL 1424, RHET 1101. Prereq—Honors)
Critical reading/interpretation of texts, research in various resources, writing through several drafting steps. Finished writing is revised/edited to meet university-level standards of persuasiveness, precision, and correctness.

ENGC 1012. University Writing and Critical Reading: Perspectives on Multiculturalism. (4 cr. §ENGC 1011, ENGC 1011H, ENGC 1012H, ENGC 1013, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1423, PSTL 1424, RHET 1101)
Extended practice in writing on topics concerning cultural diversity. Projects involving critical reading/interpretation of selected texts, research in various types of resources, and writing that moves through several drafting steps. Finished writing is revised/edited to meet university-level standards of persuasiveness, precision, and correctness.

ENGC 1012H. University Writing and Critical Reading: Perspectives on Multiculturalism. (4 cr. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1013, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1423, PSTL 1424, RHET 1101. Prereq—Honors)
Extended practice in writing on topics concerning cultural diversity. Critical reading/interpretation of texts, research in various resources, writing through several drafting steps. Finished writing is revised/edited to meet university-level standards of persuasiveness, precision, and correctness.

ENGC 1013. University Writing and Critical Reading: Nature and the Environment. (4 cr. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1423, PSTL 1424, RHET 1101)
Writing on topics concerning the environment. Critical reading/interpretation of selected texts. Research in various types of resources. Writing through several drafting steps. Finished writing is revised/edited to meet university-level standards.

ENGC 1013H. University Writing and Critical Reading: Nature and the Environment. (4 cr. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013, ENGC 1014, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1423, PSTL 1424, RHET 1101. Prereq—Honors)
Writing on topics concerning the environment. Critical reading/interpretation of texts, research in various resources, writing through several drafting steps. Finished writing is revised/edited to meet university-level standards of persuasiveness, precision, and correctness.

ENGC 1014. University Writing and Critical Reading: Contemporary Public Issues. (4 cr. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013, ENGC 1013H, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1423, PSTL 1424, RHET 1101)
Writing on topics concerning citizenship and public ethics. Projects involve critical reading/interpretation of selected texts, research in various types of resources, and writing through several drafting steps. Finished writing is revised/edited to meet university-level standards.

ENGC 1014H. University Writing and Critical Reading: Contemporary Public Issues. (4 cr. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013, ENGC 1013H, ENGC 1014, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1423, PSTL 1424, RHET 1101. Prereq—honors)
Writing on topics concerning citizenship, public ethics. Critical reading/interpretation of texts, research in various resources, writing through several drafting steps. Finished writing is revised/edited to meet university-level standards of persuasiveness, precision, and correctness.

ENGC 1015. University Writing and Critical Reading: Perspectives on Globalization. (4 cr. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1016, PSTL 1422, PSTL 1423, PSTL 1424, RHET 1101)
Critical reading/interpretation of selected texts. Research in various types of resources, including Internet. Writing through several drafting steps. Finished writing is revised/edited to meet university-level standards of persuasiveness, precision, and correctness.

ENGC 1016. University Writing and Critical Reading: Community Learning and Civic Engagement. (4 cr. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1015, PSTL 1422, PSTL 1423, PSTL 1424, RHET 1101. Prereq—Some sections limited to non-native speakers)
Extended practice in writing academic prose in response to community engagement. Students serve at least two hrs per week at a local school, agency, or community organization. Critical reading/interpretation of selected texts. Research in various types of resources, including Internet media resources. Writing that moves through several drafting steps. Finished writing is revised/edited to meet university-level standards of persuasiveness, precision, and correctness.

ENGC 1021V. Intermediate Expository Writing. (4 cr. Prereq—[1011 or 1012 or 1012H or 1013 or 1013H or 1014 or 1014H or 1015 or 1016 or GC 1422 or GC 1423 or GC 1424 or RHET 1101 or exemption from fr writing req], [honors placement in category 2 or 3])
Choices academic writers make based on audience, purpose, and context. Emphasizes effective use of University Libraries, including locating, evaluating, and using scholarly sources. Reading/writing assignments to extend/clarify arguments and improve control over writing. Selecting/limiting topics. Revision.

ENGC 1021W. Intermediate Expository Writing. (4 cr. Prereq—1011 or 1012 or 1013 or 1014)
Focuses on the range of choices writers make based on audience, purpose, and context. Relies on critical reading and a variety of writing assignments to improve control over writing and the effect it will have on intended audiences.

ENGC 3027W. Advanced Expository Writing. (4 cr. Prereq—Completion of freshman writing req)
Incorporating narrative, descriptive, analytical, persuasive techniques into writing on general topics. Effective argumentation through critical reading, use of library resources, awareness of context/audience.

ENGC 3029W. Professional Writing. (3 cr. Prereq—Daily access to e-mail)
How to write for various professional purposes/audiences, using differing styles, tones, and organizational elements. Potential genres include grant proposals, feasibility studies, job search portfolios, progress reports, annotated bibliographies. Broader issues of professional literacy.

ENGC 3650. Topics in Composition. (3 cr)
Topics specified in *Class Schedule*.

ENGC 5051. Graduate Research Writing Practice for Non-native Speakers of English. (3 cr. Prereq—Grad student)
Graduate-level writing techniques/formats for summaries, critiques, research, and abstracts. Persuasion, documentation, structure, grammar, vocabulary, field-specific requirements. Writing through several drafts, using mentor in specific field of study. Revising/editing to meet graduate standards. Discussions.

ENGC 5052. Graduate Research Presentations and Conference Writing for Non-Native Speakers of English. (3 cr. Prereq—[Grad student, non-native speaker of English] or #)
Practice in writing/presenting graduate-level research for conferences or professional seminars. Delivery of professional academic presentations to U.S. audiences. Conference abstract, paper, and poster presentation. Communication in research process. Students select topics from their own research/studies. Format, style, transitions, topic narrowing, non-verbal presentation skills.

English: Creative Writing (ENGW)

Department of English Language and Literature

College of Liberal Arts

ENGW 1101W. Introduction to Creative Writing. (4 cr)
Writing poetry and prose. Small group workshops and lecture presentations by visiting writers. For those who want to try creative writing, improve reading skills, and learn more about the creative process.

ENGW 1102. Introduction to Fiction Writing. (3 cr)
Beginning instruction in the art of fiction: characterization, plot, dialogue, and style. Writing exercises to help students generate ideas. Students read and discuss published fiction as well as their own writing.

ENGW 1103. Introduction to Poetry Writing. (3 cr)
Beginning instruction in the art of poetry. Discussion of student poems and contemporary poetry, ideas for generating material, and writing exercises both in and out of class.

ENGW 1104. Introduction to Literary Nonfiction Writing. (3 cr)
Beginning instruction in the art of literary nonfiction, including the memoir. Discussion of student work and contemporary creative nonfiction, ideas for generating material, and writing exercises.

ENGW 3102. Intermediate Fiction Writing. (3 cr. Prereq—1101 or 1102 or Δ)
Exercises, experiments, assigned readings, discussion of student work.

ENGW 3104. Intermediate Poetry Writing. (3 cr. Prereq—1101 or 1103 or Δ)

Exercises, experiments, assigned readings, discussion of student work.

ENGW 3105. Advanced Poetry Writing. (4 cr. Prereq—3104 or Δ)

Opportunity to explore new poetic possibilities and read widely in contemporary poetry/poetics. Advanced workshop.

ENGW 3106. Intermediate Literary Nonfiction Writing. (3 cr. Prereq—1104 or Δ)

Exercises, experiments, assigned readings, and discussion of students' work.

ENGW 3107. Advanced Literary Nonfiction. (4 cr [max 8 cr]. Prereq—3106 or Δ)

Advanced workshop. Writing memoir, literary essays.

ENGW 3110. Topics in Creative Writing. (3 cr [max 9 cr]. Prereq—1101 or 1102 or 1103 or 1104 or Δ)

Topics specified in *Class Schedule*.

ENGW 3110H. Topics in Creative Writing. (3 cr [max 9 cr]. Prereq—[1101 or 1102 or 1103 or 1104], honors)

Topics specified in *Class Schedule*.

ENGW 3960W. Writing Workshop for Majors. (4 cr. Prereq—ENGL major, 6 cr of ENGW [including 3xxx appropriate for workshop genre], [jr or sr], major adviser approval, Δ)

Topics specified in *Class Schedule*.

ENGW 5102. Advanced Fiction Writing. (4 cr [max 8 cr]. Prereq—Δ)

Advanced workshop for graduate students with considerable experience in writing fiction.

ENGW 5104. Advanced Poetry Writing. (4 cr [max 8 cr]. Prereq—Δ)

Advanced workshop for graduate students with considerable experience in writing poetry. An opportunity to explore new poetic possibilities and to read widely in contemporary poetry and poetics.

ENGW 5105. Advanced Poetry Writing. (4 cr [max 8 cr]. Prereq—Δ)

Advanced workshop for students with considerable experience in writing poetry. An opportunity to explore new poetic possibilities and to read widely in contemporary poetry and poetics.

ENGW 5106. Advanced Literary Nonfiction Writing. (4 cr [max 8 cr]. Prereq—Δ)

Advanced workshop for graduate students with considerable experience in writing literary nonfiction.

ENGW 5110. Topics in Advanced Fiction Writing. (4 cr [max 16 cr]. Prereq—Δ)

Special topics in fiction writing. Topics specified in *Class Schedule*.

ENGW 5120. Topics in Advanced Poetry. (4 cr [max 16 cr]. Prereq—Δ)

Special topics in poetry writing. Topics specified in *Class Schedule*.

ENGW 5130. Topics in Advanced Creative Writing. (4 cr [max 16 cr]. Prereq—#)

Workshop. Might include work in more than one genre.

ENGW 5201. Journal and Memoir Writing. (3 cr)

Using memory in writing, from brainstorming to drafting to revising, in several genres (poems, traditional memoir essays, fiction). How diverse cultures shape memory differently.

ENGW 5202. Journal and Memoir Writing. (3 cr)

Using memory in writing, from brainstorming to drafting to revision, in several genres (poems, traditional memoir essays, fiction). How diverse cultures shape memory differently.

ENGW 5204. Playwriting. (4 cr [max 8 cr]. Prereq—[jr or sr], one ENGW 3xxx course, permission number [available in creative writing office])

Advanced workshop. Contact creative writing program for specific description.

ENGW 5205. Screenwriting. (4 cr. Prereq—[jr or sr], one ENGW 3xxx course, Δ [permission number available in creative writing office])

Advanced workshop. Contact creative writing program for specific description.

ENGW 5207. Screenwriting II. (4 cr. Prereq—5205, one [Eng W or ENFA or EngC] 3xxx course, [jr or sr], Δ)

Story structure, dialogue, description. Students turn story created in 5205 into a fully realized screenplay.

ENGW 5210. Topics in Advanced Literary Nonfiction. (4 cr [max 16 cr]. Prereq—Δ)

Special topics in essay writing (e.g., arts reviewing, writing about public affairs, writing in personal voice). Topics specified in *Class Schedule*.

ENGW 5310. Reading as Writers. (4 cr [max 8 cr]. Prereq—Grad student, Δ)

Special topics in reading fiction, literary nonfiction, poetry. Topics specified in *Class Schedule*.

ENGW 5501. Minnesota Writing Project Invitational Institute. (1-3 cr [max 3 cr]. Prereq—Competitive selection for 20 educators (K-college))

Emphasizes participants' teaching each other best practices in writing instruction. Participants attend a retreat before beginning.

ENGW 5502. Minnesota Writing Project Open Institute. (1-2 cr [max 2 cr]. Prereq—Teacher (K-college), [school district sponsorship or MWP approval])

Summer workshop to refine skills in writing instruction.

ENGW 5570. Minnesota Writing Project Directed Studies. (1-3 cr [max 3 cr]; A-F only. Prereq—Participants must be members of the Minnesota Writing Project)

Current theories of writing and writing pedagogy. Topics vary. Workshop.

ENGW 5606. Literary Aspects of Journalism. (3 cr; A-F only. \$JOUR 5606W)

Literary aspects of journalism as exemplified in and influenced by works of English/American writers past/present. Lectures, discussions, weekly papers.

ENGW 5993. Directed Study in Writing. (1-4 cr [max 18 cr]. Prereq—#, Δ, □)

Projects in writing poetry, fiction, drama, and nonfiction, or study of ways to improve writing.

English: Literature (ENGL)

Department of English Language and Literature

College of Liberal Arts

ENGL 1001V. Honors: Introduction to Literature:

Poetry, Drama, Narrative. (4 cr; A-F only. \$ENGL 1001V. Prereq—honors)

Basic techniques for analyzing/understanding literature. Readings of novels, short stories, poems, plays.

ENGL 1001W. Introduction to Literature: Poetry, Drama, Narrative. (4 cr. \$ENGL 1001V)

Basic techniques for analyzing/understanding literature. Readings of novels, short stories, poems, plays.

ENGL 1171. The Story of King Arthur. (3 cr; A-F only)

Arthurian literature, from earliest times to present. How the same story can accommodate many different systems of belief. Form and changing historical backgrounds.

ENGL 1181V. Honors: Introduction to Shakespeare. (4 cr; A-F only. \$ENGL 1181W. Prereq—honors)

Survey of Shakespeare's work, treating approximately 10 plays. Lecture.

ENGL 1181W. Introduction to Shakespeare. (4 cr. \$ENGL 1181V)

Survey of Shakespeare's work, treating approximately 10 plays. Lecture.

ENGL 1201V. Honors: Introduction to American Literature.

(4 cr; A-F only. \$ENGL 1201W. Prereq—honors)

Chronologically/thematically based readings from American literature. Approaches to literary analysis/criticism. Social/historical contexts of authorship/reading, literary artistry/conventions. Discussion, writing.

ENGL 1201W. Introduction to American Literature. (4 cr. \$ENGL 1201V)

Chronologically/thematically based readings from American literature. Approaches to literary analysis/criticism. Social/historical contexts of authorship/reading, literary artistry/conventions. Discussion, writing.

ENGL 1301V. Honors: Introduction to Multicultural American Literature. (4 cr; A-F only. \$ENGL 1301W. Prereq—honors)

Representative works by African American, American Indian, Asian American, and Chicano/Chicana writers, chiefly from twentieth century. Social/cultural factors in America's literary past/present.

ENGL 1301W. Introduction to Multicultural American Literature. (4 cr. \$ENGL 1301V)

Representative works by African American, American Indian, Asian American, and Chicano/Chicana writers, chiefly from 20th century. Social/cultural factors informing America's literary past/present.

ENGL 1401V. Honors: Introduction to "Third World" Literatures in English. (4 cr; A-F only. \$ENGL 1401W. Prereq—honors)

Diverse work produced in English outside the United States and Britain. Works represent different cultures, but treat concerns derived from a common post-colonial legacy.

ENGL 1401W. Introduction to "Third World" Literatures in English. (4 cr. \$ENGL 1401V)

Diverse works produced in English outside the United States and Britain. Works represent different cultures, but treat concerns derived from common post-colonial legacy.

ENGL 1501W. Literature of Public Life. (4 cr; A-F only)

Meaning/practice of citizenship. Historical themes, contemporary issues in American public life: access of citizenship, tensions between social duties and individual freedoms, role of moral values in public life. Diverse literary materials.

ENGL 1601W. English Language and Society. (4 cr)

Nontechnical understanding of systematic, dynamic, creative nature of human language. Emphasizes English language.

ENGL 1701. Modern Fiction. (4 cr)

Basic techniques for analyzing/understanding fiction. Readings from novels and short stories written in English-speaking countries and elsewhere (in translation). Introduction to fictional techniques such as point of view, fictional conventions, and some forms of experimentation.

ENGL 1701H. Honors: Modern Fiction. (4 cr)

Basic techniques for analyzing/understanding fiction. Readings from novels and short stories written in English-speaking countries and elsewhere (in translation). Introduction to fictional techniques such as point of view, fictional conventions, and some forms of experimentation.

ENGL 1905. Topics: Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

ENGL 1910W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

ENGL 1930. General Topics in Literature. (3 cr; A-F only. Prereq—#)

Topics determined by instructor.

ENGL 3001V. Honors: Textual Analysis, Methods. (4 cr §ENGL 3001W. Prereq—CLA honors, [SOPH 1st term or higher]) Training/practice in analyzing various literary forms. Emphasizes poetry. Argument, evidence, and documentation in literary papers. Introduction to major developments in contemporary criticism.

ENGL 3001W. Textual Analysis: Methods. (4 cr §ENGL 3001V. Prereq—English major or minor or premajor or BIS/ADIM-English) Close/critical reading, placing literature in history/culture. Idea of multiple approaches to literary works. Analysis of various literary forms, including poetry.

ENGL 3002. Modern Literary Criticism and Theory. (3 cr. §ENGL 3002H) Problems of interpretation/criticism. Questions of meaning, form, authority, literary history, social significance.

ENGL 3002H. Honors: Modern Literary Criticism and Theory. (3 cr. §ENGL 3002. Prereq—CLA honors) Problems of interpretation/criticism. Questions of meaning, form, authority, literary history, social significance.

ENGL 3003W. Historical Survey of British Literatures I. (4 cr) An introductory historical survey of British literature and culture from the Anglo-Saxon invasions through the end of the 18th century.

ENGL 3004W. Historical Survey of British Literatures II. (4 cr) An introductory historical survey of British literature and culture in the 19th and 20th centuries. Includes Romantic, Victorian, and Modernist authors, such as Wordsworth, Keats, Tennyson, the Brontes, Austen, Dickens, Wilde, Yeats, Woolf, and Thomas.

ENGL 3005W. Survey of American Literatures and Cultures I. (4 cr) Readings in American literature from first European contact, through colonial times, to mid-19th century. Texts in several genres by diverse authors. Classics, less familiar works. Historical, social, and aesthetic contexts.

ENGL 3006W. Survey of American Literatures and Cultures II. (4 cr) Readings from the mid-19th to the mid-20th century; including the realists' and regionalists' response to the growth of industrial capitalism, Modernism in the 1920s, and the issues which united and divided the country throughout the 20th century.

ENGL 3007H. Shakespeare. (3 cr; A-F only) Plays from all of Shakespeare's periods, including at least *A Midsummer Night's Dream*, *Hamlet*, the history plays, *King Lear*, *Macbeth*, *The Tempest*, *Twelfth Night*, *Antony and Cleopatra*, *Othello*, and *The Winter's Tale*.

ENGL 3007. Honors: Shakespeare. (3 cr; A-F only. Prereq—CLA honors) Plays from all of Shakespeare's periods, including at least *A Midsummer Night's Dream*, *Hamlet*, the history plays, *King Lear*, *Macbeth*, *The Tempest*, *Twelfth Night*, *Antony and Cleopatra*, *Othello*, and *The Winter's Tale*.

ENGL 3010. Studies In Poetry. (3 cr [max 9 cr]) Special topics related to reading poetry in various interpretive contexts.

ENGL 3010H. Studies In Poetry. (3 cr. Prereq—honors) Special topics related to reading poetry in various interpretive contexts.

ENGL 3020. Studies in Narrative. (3 cr [max 9 cr]) Examine issues related to reading and understanding narrative in a variety of interpretive contexts. Topics may include "The 19th-century English (American, Anglophone) Novel," "Introduction to Narrative," or "Techniques of the Novel." Topics specified in the *Class Schedule*.

ENGL 3020H. Honors: Studies in Narrative. (3 cr; A-F only. Prereq—honors) Issues related to reading/understanding narrative in various interpretive contexts. Topics may include nineteenth-century English (American, Anglophone) novel; narrative; or techniques of the novel. Topics specified in *Class Schedule*.

ENGL 3030. Studies in Drama. (3 cr [max 9 cr]) Topics may include English Renaissance tragedy, English Restoration and 18th century, or American drama by writers of color; single-author courses focused on writers such as Tennessee Williams and Eugene O'Neill, or issues and themes, such as gender and performance.

ENGL 3030H. Studies in Drama. (3 cr [max 9 cr] Prereq—honors) Topics may include English Renaissance tragedy; English Restoration and 18th century; American drama by writers of color; single-author courses focused on writers such as Tennessee Williams and Eugene O'Neill; issues/themes such as gender and performance.

ENGL 3040. Studies in Film. (3 cr [max 9 cr]) Topics regarding film in a variety of interpretive contexts, from the range and historic development of American, English and Anglophone film. Recent examples: "American Film Genres," "Film Noir," "Chaplin and Hitchcock." Topics and viewing times announced in *Class Schedule*.

ENGL 3040H. Honors: Studies in Film. (3 cr [max 9 cr]. Prereq—CLA honors) Topics regarding film in various interpretive contexts. Range, historic development of American, English, and Anglophone film. Recent examples: "American Film Genres," "Film Noir," "Chaplin and Hitchcock." For topics, see *Class Schedule*.

ENGL 3060. Studies in Literature and the Other Arts. (3 cr [max 9 cr]) Examines literature's role in conjunction with other arts including music, the visual arts, dance, etc. Topics specified in *Class Schedule*.

ENGL 3070. Studies in Literary and Cultural Modes. (3 cr [max 9 cr]) Modes of literary expression/representation that transcend conventional demarcations of genre and historical periods. Topics may include horror, romance, mystery, comedy, and satire.

ENGL 3090. General Topics. (1-3 cr [max 9 cr]) Topics specified in *Class Schedule*.

ENGL 3090H. Honors: General Topics. (3 cr [max 9 cr]) Topics specified in *Class Schedule*.

ENGL 3101. Survey of Medieval English Literature. (3 cr; A-F only) Major/representative Medieval English works, including Sir Gawain the Green Knight, Chaucer's *Canterbury Tales*, *Piers Plowman*, *Book of Margery Kempe*, Julian of Norwich's *Revelations*, and Malory's *Morte D.Arthur*.

ENGL 3102. Chaucer. (3 cr; A-F only) Major/representative works written by Chaucer, including *The Canterbury Tales*, *Troilus and Criseyde*, and the dream visions. Historical, intellectual, and cultural background of the poems. Language, poetic theory, form.

ENGL 3110. Medieval Literatures and Cultures: Intro to Medieval Studies. (3 cr [max 9 cr]) Major and representative works of the Middle Ages. Topics specified in the *Class Schedule*.

ENGL 3111. Survey of English Literature I, Transition. (3 cr; A-F only) Historical survey of major figures, movements, and trends in English literature. Chaucer to Marvell, including Spenser, Shakespeare, and Donne.

ENGL 3112. Survey of English Literature II, Transition. (3 cr; A-F only) Historical survey of major figures, movements, and trends in English literature. Milton to Johnson, including Dryden, Swift, and Pope.

ENGL 3113. Survey of English Literature III, Transition. (3 cr; A-F only) Historical survey of major figures, movements, and trends in English literature. Blake to Yeats, including Wordsworth, Coleridge, Keats, Tennyson, and the Brownings.

ENGL 3115. Medieval and Renaissance Drama. (3 cr; A-F only) Medieval/Renaissance drama in terms of performance. Performance history, enactments of scenes from cycle/morality plays, informal production of a morality play.

ENGL 3121H. Tudor England: 16th-Century Literature and Culture. (3 cr. Prereq—Honors or #) Major/representative works of Renaissance (1485-1660). Typical authors: More, Sidney, Spenser, Donne, Milton.

ENGL 3122. Shakespeare II: The Major Themes. (3 cr. Prereq—3007 or #) Intensive study of two to four plays. Less familiar plays or other works, including the Sonnets. Performance as interpretation. Comparative analysis of multiple performances of a play or plays. Multiple-text plays.

ENGL 3132. Tudor England: 16th-Century Literature and Culture. (3 cr) Major/representative works of the Renaissance (1485-1660). Typical authors: More, Sidney, Spenser, Donne, Milton.

ENGL 3133. Stuart England: 17th-Century Literature and Culture. (3 cr) Major/representative works of the Restoration and 18th century (1660-1798). Typical authors: Dryden, Pope, Swift, Johnson, Boswell, Fielding.

ENGL 3134. Milton and the Century of Revolution. (3 cr; A-F only) Milton's poetry/prose in political, social, and cultural contexts of 17th century England. His major literary achievements: *Paradise Lost*, *Paradise Regained*, *Samson Agonistes*. His early experiments in lyric poetry. Several representative selections of his political writing.

ENGL 3141. The Restoration and the Eighteenth Century. (3 cr; A-F only. §ENGL 5140) Major/representative works of the Restoration and 18th century (1660-1789). Typical authors: Dryden, Behn, Swift, Pope, Fielding, Burney.

ENGL 3151. Romantic Literatures and Cultures. (3 cr) British literature written between 1780 and 1830. Examine the concept of Romanticism, the effects of the French Revolution on literary production, and the role of the romantic artist.

ENGL 3161. Victorian Literatures and Cultures. (3 cr) The literature of the British Victorian period (1832-1901) in relation to its cultural and historical contexts. Typical authors include Tennyson, the Brownings, Dickens, Arnold, Hopkins, and the Brontes.

ENGL 3161H. Victorian Literatures and Cultures. (3 cr) The literature of the British Victorian period (1832-1901) in relation to its cultural and historical contexts. Typical authors include Tennyson, the Brownings, Dickens, Arnold, Hopkins, and the Brontes.

ENGL 3171. Modern British Literatures and Cultures. (3 cr) Survey of principal writers, intellectual currents, conventions, genres and themes in Britain from 1950 to the present. Typically included are Beckett, Golding, Kingsley and Martin Amis, Murdoch, Larkin, Hughes, Heaney, Lessing, Shaffer, Stoppard, Fowles, and Drabble.

ENGL 3175. 20th-Century British Literatures and Cultures I. (3 cr) Survey of principal writers, intellectual currents, conventions, and genres/themes in Britain/Ireland, from 1900 to 1945. Fiction/nonfiction by Conrad, Richardson, Forster, Joyce, Mansfield, Rhys, West, Woolf, Lawrence, and Huxley. Poetry by Hardy, Hopkins, Loy, H.D., Yeats, Pound and Eliot. Drama by Synge and Shaw.

ENGL 3176. 20th-Century British Literatures and Cultures II. (3 cr)

Survey of principal writers, intellectual currents, conventions, genres, and themes in Britain/Ireland, 1945-1999. Fiction/nonfiction by Greene, Bowen, Amis, Fowles, Lessing, Drabble, Murdoch, Naipaul, Carter, Rushdie, and Winterson. Poetry by Smith, Auden, Thomas, Larkin, Hughes, Heaney, Smith, Boland, and Walcott. Drama by Beckett, Pinter, Shaffer, Stoppard, Devlin, Friel, and Carr.

ENGL 3180. Contemporary Literatures and Cultures. (3 cr [max 9 cr])

Examine issues related to the reading and understanding of British, American, and Anglophone fiction and poetry in a variety of interpretive contexts.

ENGL 3180H. Contemporary Literatures and Cultures. (3 cr [max 9 cr]; A-F only. Prereq=honors)

Examine issues related to the reading and understanding of British, American, and Anglophone fiction and poetry in a variety of interpretive contexts.

ENGL 3211. American Poetry to 1900. (3 cr)

Poets from the Puritans to the end of the 19th century. The course attends to the intellectual and cultural background of the poets, poetic theory, and form.

ENGL 3212. American Poetry from 1900. (3 cr)

Famous and lesser-known poems from the Modernist era, the time of Frost, HD, Pound, Eliot and the Harlem Renaissance. The course attends to the intellectual and cultural background of the poets, poetic theory and form.

ENGL 3221. American Novel to 1900. (3 cr)

Novels, from early Republic, through Hawthorne, Melville, and Stowe, to writers at end of 19th century (e.g., Howells, Twain, James, Chopin, Crane). Development of a national literature. Tension between realism and romance. Changing role of women as writers and as fictional characters.

ENGL 3222. American Novel From 1900. (3 cr)

Novels from early 1900's realism through the Modernists (e.g., Faulkner, Hemingway, Fitzgerald) to more recent writers (e.g., Ellison, Bellow, Erdrich, Pynchon). Stylistic experiments, emergence of voices from formerly under-represented groups, and novelists' responses to a technologically changing society.

ENGL 3231. American Drama. (3 cr. §ENGL 3231H)

Representative dramas from the 18th through 20th centuries. Topics include the staging of national identities, the aesthetics of modern and contemporary drama, and the production concerns of mainstream, regional, and community theaters.

ENGL 3231H. Honors: American Drama. (3 cr. §ENGL 3231)

Representative dramas, from 18th through 20th centuries. Staging of national identities, aesthetics of modern/contemporary drama. Production concerns of mainstream, regional, and community theaters.

ENGL 3300. Multicultural American Literatures and Cultures. (3 cr [max 9 cr])

Writings of specific ethnic groups. Emphasizes historical or cultural context. Topics may include American minority drama, Harlem Renaissance, Asian-American literature/film, African-American women writers. Topics specified in *Class Schedule*.

ENGL 3330. Gay, Lesbian, Bisexual, and Transgendered Literature. (3 cr [max 9 cr])

Literature/culture produced by/about gay, lesbian, bisexual, and transgendered people. Emphasizes importance of materials falsified/ignored in earlier literary/cultural studies. How traditional accounts need to be revised in light of significant contributions of GLBT people.

ENGL 3350. Women Writers. (3 cr [max 9 cr])

Groups of writers in the 19th and/or 20th centuries. Will focus either on writers from a single country or be comparative in nature. The course will be organized thematically or according to topics of contemporary and theoretical interest.

ENGL 3350H. Honors: Women Writers. (3 cr. Prereq=CLA honors or Δ)

Groups of writers in 19th or 20th century. Either focuses on writers from a single country or is comparative. Organized thematically or according to topics of contemporary/theoretical interest.

ENGL 3351W. Voices from the Gaps: Writing and Art by Women of Color. (4 cr)

Collaborative/individual student research, writing, and Web site production for VG (Voices from the Gaps). Focuses on visual arts, film, music, and literature by North American women writers of colour. Texts/discussions in English.

ENGL 3400. Post-Colonial Literatures. (3 cr [max 9 cr])

Varied topics in post-Colonial literatures. Typical novelists include Chinua Achebe, Tsitsi Dangaremba, Fadia Faqir, Salman Rushdie; filmmaker Kidlat Tahimik; and "dub" poets Mutabaruka and Jean Binta Breeze.

ENGL 3501. Public Discourse: Reading Between and Beyond the Lines. (3 cr)

Public discourse in various geographic regions and historical periods. See *Course Guide* for specific course description.

ENGL 3505. Community Learning Internships I. (3 cr; A-F only)

Connections between literature/literacy, theory/practice, community work and academic study. Students work as interns in local community-based education projects. Interns meet with faculty and community representatives to reflect on daily work and practical relevance. Students receive initial training from Career and Community Learning Center and Minnesota Literacy Council, and orientations at community sites. Four hours weekly work at community site, readings, journal writing, monthly short papers.

ENGL 3506. Learning Internships II. (4 cr; A-F only.

Prereq=3505 in preceding semester or #)
Students work at a community site. In weekly meetings with faculty and community representatives, students explore relationship between their academic skills and community experiences. Social functions of literacy and liberal education in the United States. Eight hours weekly work at community site, readings in history/theory of literacy, written reflection exercises, design/execution of scholarly or educational project at community site.

ENGL 3591. Introduction to African American Literature. (4 cr. §AFRO 3591W)

Afro-American autobiography, fiction, essay, poetry, drama, and folklore from the late 18th century to the present.

ENGL 3592W. Introduction to Black Women Writers in the United States. (3 cr)

Literature of African American women writers explored in novels, short stories, essays, poetry, autobiographies, drama from 18th to late-20th century.

ENGL 3597W. Introduction to African American Literature and Culture I. (4 cr)

African American oral tradition, slave narrative, autobiography, poetry, essay, fiction, oratory, and drama, from colonial era through Harlem Renaissance.

ENGL 3601. Analysis of the English Language. (4 cr)

Introduction to structure of English. Phonetics, phonology, morphology, syntax, semantics, pragmatics. Language variation/usage.

ENGL 3711. Literary Magazine Production and History. (4 cr)

Literary magazine production and history

ENGL 3713. Editing for Publication. (4 cr. Prereq=Soph or jr or 1st sem sr)

Practice professional editing of various kinds of texts (e.g., scientific/technical writing). Introduction to editing levels, from substantive revision to copyediting. Computer-mediated editorial practices.

ENGL 3741. Literacy and American Cultural Diversity. (4 cr)

Nature, acquisition, institutionalization, and state of literacy in the United States. Focuses on issues of culturally diverse, disadvantaged members of society. Service-learning component requires tutoring of children/adults in community service agencies.

ENGL 3751W. Seminar: Theory and Practice of Writing Consultancy. (4 cr. Prereq=Currently working in a University writing center, instr consent)

How writers learn to write, how writing is taught in the academy, and how rhetorical conventions vary across disciplines.

ENGL 3753W. Writing Beyond the Academy. (4 cr.

Prereq=Completion of fr writing requirement, 60 cr)
Internship. Analyses of writing styles, genres, and rhetorical contexts outside the academy.

ENGL 3870. Figures in English and North American Literature. (3 cr [max 9 cr])

Topics specified in the *Class Schedule*.

ENGL 3881. London Seminar. (3 cr. Prereq=Completion of 3xxx level composition requirement, Δ)

Broad topic of literary investigation crossing and integrating several areas of study. Team taught. "Literature in London" program course.

ENGL 3883V. Honors Thesis. (1-4 cr [max 4 cr]; A-F only.

Prereq=Honors candidacy in English, consent of English honors advisor)
See guidelines available from English honors adviser.

ENGL 3960W. Senior Seminar. (4 cr; A-F only. Prereq=English major, [jr or sr], major adviser approval, Δ)

Rigorous/intensive seminar. Students write extended scholarly essay. Topics specified in *Class Schedule*.

ENGL 3980. Directed Instruction. (1-6 cr [max 6 cr].

Prereq=#, Δ, □)
Directed study arranged between student and advising faculty member.

ENGL 3993. Directed Reading/Study. (1-8 cr [max 3 cr].

Prereq=#, Δ, college approval)
Guided individual study.

ENGL 4003. History of Literary Theory. (3 cr; A-F only)

How thinkers from classical to modern times posed/answered questions about language (how words mean), audience (to whom they mean), and the literary (how literary writing differs from other forms of writing). Works by Plato, Aristotle, Augustine, Christine de Pizan, Dante, Sidney, Behn, Wordsworth, Shelley, and Woolf.

ENGL 4041. Old Age in Film and Literature. (3 cr; A-F only)

How/why subject of old age is focus of a selection of primarily modern verbal/visual texts (fiction, non-fiction). Philosophical, sociological, and psychological perspectives. Ways in which varied experiences of old age have as much to do with culture as with biology.

ENGL 4152. Nineteenth Century British Novel. (3 cr; A-F only)

British novel during the century in which it became widely recognized as a major vehicle for cultural expression. Possible topics include the relation of novel to contemporary historical concerns: rise of British empire, developments in science, and changing roles for women; formal challenges of the novel; definition of realism.

ENGL 4153. Nineteenth-Century British Poetry. (3 cr; A-F only)

Poetry written in Britain during 19th century. Possible authors include Wordsworth, Byron, Hemans, Tennyson, Robert and Elizabeth Browning, D. G. and Christina Rossetti, Swinburne, and Hopkins.

ENGL 4232. American Drama by Writers of Color. (3 cr; A-F only)

Selected works by Asian American, African American, American Indian, Latino, and Chicano playwrights. How racial/ethnic differences are integral to shaping different visions of American drama. History of minority/ethnic theaters, politics of casting, mainstreaming of the minority playwright.

ENGL 4233. Modern and Contemporary Drama. (3 cr; A-F only)

Works written for theater in 19th/20th century. Emphasizes how major aesthetic forms of modern drama (the well-made play, realism, expressionism, symbolism, epic theater, absurdism) presented not just distinctive theatrical styles, but also new ways of seeing for the theatrical spectator. How social differences, as informed by gender, class, and race, inform content/presentation.

ENGL 4311. Asian American Literature and Drama. (3 cr; A-F only)

Literary/dramatic works by Asian American writers. Historical past of Asian America through perspective of writers such as Sui Sin Far and Carlos Bulosan. Contemporary artists such as Frank Chin, Maxine Hong Kingston, David Henry Hwang, and Han Ong. Political/historical background of Asian American artists, their aesthetic choices.

ENGL 4602W. Gender and the English Language. (4 cr. Prereq-§: 3602W)

Connections between gender and other social factors that influence history/future of English language. Race, ethnicity, class, regional/national variation, religion, technology. Gender theories as they relate to social issues, texts, and discourse practices.

ENGL 4603W. World Englishes. (4 cr)

Historical background, psychosocial significance, and linguistic characteristics of diverging varieties of English spoken around world, especially in postcolonial contexts (Caribbean, Africa, Asia). Development of local standards/vernaculars. Sociolinguistic methods of analysis.

ENGL 4605. Social Variation in American English. (4 cr)

Description/analysis of English language variation from sociohistorical perspective in the United States and the Caribbean. Social history of migrations (voluntary, enforced) leading to development of regional/rural dialects, pidgins, creoles, and urban varieties.

ENGL 4612. Old English I. (3 cr)

Introduction to the language through 1150 A.D. Culture of Anglo-Saxons. Selected readings in prose/poetry.

ENGL 4613. Old English II. (3 cr. §ENGL 5613. Prereq-3612, 3613, 4612)

Critical reading of texts. Introduction to versification. Readings of portions of Beowulf.

ENGL 4721. Electronic Text. (3 cr. §ENGL 5632)

Status/function of text, related questions as framed by electronic text.

ENGL 4722. Alphabet to Internet: History of Writing Technologies. (4 cr)

Equivocal relation of memory and writing. Literacy, power, control. Secrecy and publicity. Alphabetization and other ways of ordering world. Material bases of writing. Typographical design/expression. Theories of technological determinism.

ENGL 4752. Seminar: Theory and Practice of Tutoring Writing. (3 cr; A-F only. Prereq-#)

Teaching writing through one-on-one tutorials. How writers learn to write. How writing is taught in the academy. How rhetorical conventions and views of literacy vary across disciplines. Students practice tutoring strategies in class activities and in a writing center.

ENGL 5001. Introduction to Methods in Literary Studies. (3 cr. Prereq-Grad or #)

Ends/methods of literary research, including professional literary criticism, analytical bibliography, and textual criticism.

ENGL 5002. Introduction to Literary and Cultural Theory. (3 cr. Prereq-Grad or #)

Approaches to practical/theoretical problems of literary history/genre.

ENGL 5030. Readings in Drama. (3 cr [max 9 cr].

Prereq-Grad student or #)

Wide reading in literature of a given period or subject. Prepares students for work in other courses/seminars. Relevant scholarship/criticism. Topics specified in *Class Schedule*.

ENGL 5090. Readings in Special Subjects. (3-4 cr [max 9 cr]. §ENGL 5100. Prereq-Grad student or #)

General background preparation for advanced study. Diverse selection of literatures written in English, usually bridging national cultures and time periods. Readings specified in *Class Schedule*.

ENGL 5110. Readings in Middle English Literature and Culture. (3 cr [max 9 cr]. Prereq-Grad student or #)

Wide reading in literature of period. Relevant scholarship/criticism. Topics vary. See *Class Schedule*.

ENGL 5121. Readings in Early Modern Literature and Culture. (3 cr [max 9 cr]. Prereq-Grad student or #)

Topical readings in early modern poetry, prose, fiction, and drama. Attention to relevant scholarship or criticism. Preparation for work in other courses or seminars.

ENGL 5140. Readings in 18th Century Literature and Culture. (3 cr. §ENGL 3141. Prereq-Grad student or #)

Literature written in English, 1660-1798. Topics may include British literature of Reformation and 18th century, 18-century American literature, a genre (e.g., 18th-century novel).

ENGL 5150. Readings in 19th-Century Literature and Culture. (3 cr [max 9 cr]. Prereq-Grad student or #)

Topics may include British Romantic or Victorian literatures, American literature, important writers from a particular literary school, a genre (e.g., the novel). Readings.

ENGL 5170. Readings in 20th-Century Literature and Culture. (3 cr [max 9 cr]. Prereq-Grad student or #)

British, Irish, or American literatures, or topics involving literatures of two nations. Focuses either on a few important writers from a particular literary school or on a genre (e.g., drama). Topics specified in *Class Schedule*.

ENGL 5175. 20th-Century British Literatures and Cultures I. (3 cr)

Survey of principal writers, intellectual currents, conventions, genres and themes in Britain/Ireland, 1900-1945. Fiction/nonfiction by Conrad, Richardson, Forster, Joyce, Mansfield, Rhys, West, Woolf, Lawrence and Huxley. Poetry by Hardy, Hopkins, Loy, H.D., Yeats, Pound and Eliot. Drama by Synge and Shaw.

ENGL 5176. 20th-Century British Literatures and Cultures II. (3 cr)

Survey of principal writers, intellectual currents, conventions, genres, and themes in Britain/Ireland, 1945-1999. Fiction/nonfiction by Greene, Bowen, Amis, Fowles, Lessing, Drabble, Murdoch, Naipaul, Carter, Rushdie, and Winterson. Poetry by Smith, Auden, Thomas, Larkin, Hughes, Heaney, Smith, Boland, and Walcott. Drama by Beckett, Pinter, Shaffer, Stoppard, Devlin, Friel, and Carr.

ENGL 5180. Readings in Contemporary Literature and Culture. (3 cr. Prereq-Grad student or #)

Multi-genre reading in contemporary American, British, Anglophone literature. Relevant scholarship/criticism. Topics vary. See *Class Schedule*.

ENGL 5200. Readings in American Literature. (3 cr [max 9 cr]. Prereq-Grad student or #)

General background/preparation for advanced graduate study. Readings cover either a wide historical range (e.g., 19th century), a genre (e.g., the novel), or a major literary movement (e.g., Modernism).

ENGL 5300. Readings in American Minority Literature. (3 cr [max 9 cr]. Prereq-Grad or #)

Contextual readings of 19th-/20th-century American minority writers. Topics specified in *Class Schedule*.

ENGL 5400. Readings in Post-Colonial Literature. (3 cr [max 9 cr]. Prereq-Grad student or #)

Selected readings in post-colonial literature. Topics specified in *Class Schedule*.

ENGL 5510. Readings in Criticism and Theory. (3 cr [max 9 cr]. Prereq-Grad or #)

Major works of classical criticism in the English critical tradition from Renaissance to 1920. Leading theories of criticism from 1920 to present. Theories of fiction, narratology. Feminist criticisms. Marxist criticisms. Psychoanalytic criticisms. Theories of postmodernism.

ENGL 5593. The AFRO-American Novel. (3 cr. §AFRO 4593)

Contextual readings of 19th-/20th-century black novelists, including Chesnut, Hurston, Wright, Baldwin, Petry, Morrison, and Reed.

ENGL 5597. Harlem Renaissance. (3 cr. §AFRO 4597)

Multidisciplinary review of Jazz Age's Harlem Renaissance: literature, popular culture, visual arts, political journalism, major black/white figures.

ENGL 5602. Gender and the English Language. (3 cr. Prereq-Grad student or #)

Introduction to features of English that are gender-marked or gender-biased. Connections between language theory and social structures, including class and ethnicity. Patterns of women's/men's speech in specific social contexts. Gender and writing. Sociolinguistics and sexual orientation.

ENGL 5603. World Englishes. (3 cr. Prereq-Grad student or #)

Historical background, psychosocial significance, and linguistic characteristics of diverging varieties of English spoken around world, especially in postcolonial contexts (Caribbean, Africa, Asia). Development of local standards/vernaculars. Sociolinguistic methods of analysis.

ENGL 5605. Social Variation in American English. (3 cr. Prereq-Grad student or #)

Description/analysis of English language variation from sociohistorical perspective in the United States and the Caribbean. Social history of voluntary/enforced migrations leading to development of regional/rural dialects, pidgins, creoles, and urban varieties.

ENGL 5612. Old English I. (3 cr. §ENGL 3612. Prereq-Grad student or #)

Introduction to the language through A.D. 1150. Anglo-Saxon culture. Selected readings in prose/poetry.

ENGL 5613. Old English II. (3 cr. §ENGL 4613. Prereq-[[3612 or 5612], grad student] or #)

Critical reading of texts, introduction to versification. Reading of Beowulf.

ENGL 5621. Modern Irish Language I. (4 cr [max 5 cr]. Prereq-Jr or sr or grad or #)

Grammatical structures of modern Irish dialect of Connemara, Co. Galway. Development of oral/written language skills: vocabulary, manipulation of grammatical structures, speaking, listening, reading, writing. Modern Gaelic culture.

ENGL 5622. Modern Irish Language II. (5 cr. Prereq-5621 or #)

Grammatical structures of modern Irish dialect. Development of oral/written language skills: vocabulary, manipulation of grammatical structures, speaking, listening, reading, writing. Modern Gaelic culture.

ENGL 5630. Theories of Writing and Writing Instruction. (3 cr. Prereq-Grad student or #)

Introduction to major theories that inform teaching of writing in college and upper-level high school curriculums. Topics specified in *Class Schedule*.

ENGL 5690. Minnesota Writing Project: Directed Studies. (1-3 cr [max 30 cr]. Prereq-#)

Workshops. Theories of writing and writing pedagogy. Writing for publication. Research topics in applied literacy.

ENGL 5711. Introduction to Editing. (4 cr)

Editor-writer relationship, manuscript reading, author querying, rewriting, style. Some discussion of copy editing. Students develop editing skills by working on varied writing samples.

ENGL 5712. Advanced Editing. (4 cr. Prereq—5401 or 5711 or Δ)

Editing long text. Fiction, children's literature, translations, indexes. Workshop/seminar.

ENGL 5743. History of Rhetoric and Writing. (3 cr.

Prereq—Grad student or #)

Assumptions of classical/contemporary rhetorical theory, especially as they influence interdisciplinary field of composition studies.

ENGL 5790. Topics in Rhetoric, Composition, and

Language. (3 cr. Prereq—Grad student or #)

Topics specified in *Class Schedule*.

ENGL 5800. Practicum in the Teaching of English. (2 cr.

Prereq—Grad student or #)

Discussion of and practice in recitation, lecture, small-groups, tutoring, individual conferences, and evaluation of writing/reading. Emphasizes theory informing effective course design/teaching for different disciplinary goals. Topics vary. See *Class Schedule*.

ENGL 5805. Writing for Publication. (3 cr. Prereq—Grad

student in ENGL or #)

Conference presentations, book reviews, revision of seminar papers for journal publication, and preparation of a scholarly monograph. Style, goals, and politics of journal and university press editors/readers. Electronic publication. Professional concerns.

ENGL 5880. General Topics. (3 cr [max 9 cr])

Topics specified in the *Class Schedule*.

ENGL 5992. Directed Readings, Study, or Research. (1-3 cr

[max 45 cr]. Prereq—#, □)

Entomology (ENT)

Department of Entomology

College of Food, Agricultural and Natural Resource Sciences

ENT 1905. Topics: Freshman Seminar. (1-3 cr [max 3 cr].

Prereq—Fr)

ENT 3005. Insect Biology. (3 cr)

Survey of diverse biology of insects. Insect behavior (including social insects), pollination, herbivory, insects as disease vectors, beneficial insects, insect population dynamics/ecology. Emphasizes insects' role in agricultural, urban, natural systems. Lecture/lab.

ENT 3925. Insects, Aquatic Habitats, and Pollution. (3 cr;

A-F only. Prereq—[[3005 or BIOL 3407 or FW 2001], [jr or sr]] or #)

Effects differing classes of pollutants have on insects that are aquatic. Insect life-cycle dynamics, trophic guilds, community structure. Hypotheses to explain community structure in streams, rivers, wetlands, ponds, lakes, reservoirs. Organic pollution, eutrophication, heavy metal pollution, runoff/siltation, acidification, thermal pollution. Changes in aquatic insect community structure. Designing/maintaining biological monitoring networks.

ENT 4015. Ornamentals and Turf Entomology. (3 cr.

Prereq—1xxx course in BIOL or hort or forest resources)

Diagnosis and management of insect pests in landscape plants. Emphasis on the principles of biological control, biorational pesticides, and integrated pest management.

ENT 4021. Honey Bees and Insect Societies. (3 cr.

Prereq—BIOL 1009 or #)

Natural history, identification, and behavior of honey bees and other social insects. Evolution of social behavior, pheromones and communication, organization and division of labor, social parasitism. Lab with honey bee management and maintenance of other social bees for pollination.

ENT 4022. Honey Bee Management. (1 cr. Prereq—BIOL 1009

or #; †4021 recommended)

Field course for students interested in honey bee management and the conservation and maintenance of other bee pollinators. Work with live bee colonies and participate in field research problems related to honey bee behavior and management.

ENT 4096. Professional Experience Program: Internship.

(1-3 cr [max 3 cr]; S-N only. Prereq—COAFES jr or sr, complete internship contract available in COAFES Career Services before enrolling, UC only, #)

Professional experience in entomology firms or government agencies through supervised practical experience; evaluative reports and consultations with faculty advisers and employers.

ENT 4231. Insect Behavior. (3 cr; A-F only. Prereq—BIOL 1009

or equiv or #; [3005 or EEB 3111] recommended)

Diversity of behavior in insects. Modes of perception, ways in which stimuli are translated into behavior. Genetic basis of behavior. Behavioral traits with Mendelian and more complex modes of inheritance. Natural history of insect behavior. Emphasizes how evolution has shaped diversity of behaviors. Movement/dispersal, feeding, defense/escape, mating/reproduction, sociality. Case studies.

ENT 4251. Forest and Shade Tree Entomology. (3 cr)

Biology, ecology, population management of forest/shade tree insects. Emphasizes predisposing factors/integrated management. Lecture/lab. Required Saturday field trip on second weekend of semester.

ENT 4281. Veterinary Entomology. (3 cr; A-F only)

Biology/management of insects, mites, ticks that affect livestock, poultry, companion animals. Emphasizes problem identification/solving. Lecture, lab.

ENT 5011. Insect Structure and Function. (4 cr; A-F only.

Prereq—3005 or #)

Comparative study of insect structures/functions from evolutionary perspective. Introduction to physiology of digestion, respiration, other organ systems.

ENT 5021. Insect Taxonomy and Phylogeny. (4 cr)

Identification of families of adult insects. Evolution/classification of insects. Techniques of collecting/curating insects. Principles of phylogeny reconstruction.

ENT 5041. Insect Ecology. (3 cr. Prereq—BIOL 5041 or EBB

5122 or #)

Synthetic analysis of the causes of insect diversity and of fluctuations in insect abundance. Focus on abiotic, biotic, and evolutionary mechanisms influencing insect populations and communities.

ENT 5045. Insect Population Dynamics. (3 cr; A-F only.

Prereq—3005 or #)

Analytical/experimental approaches to study of insect abundance. Path/loop diagrams, time series analyses. Life tables and demography. Single-/multiple-species models for population growth/interactions with competitors. Predators/pathogens in time/space.

ENT 5051. Scientific Illustration of Insects. (3 cr)

Traditional/computer-assisted techniques of scientific illustration. Emphasizes insects. Pencil, pen/ink, color (water color, acrylics, colored pencil). Vector/raster illustration using Adobe Illustrator and Adobe Photoshop. Digital photography, microscopy, photomontage, traditional/electronic publication.

ENT 5081. Insects, Aquatic Habitats, and Pollution. (3 cr;

A-F only. Prereq—[3005, BIOL 3407, FW 2001, EEB 4601] or #) Effects of pollutants on biology. Ecology and community structure of aquatic insects. Life-cycle, trophic guilds, community structure in lotic/lentic habitats. Organic pollution/eutrophication, heavy metal pollution, runoff/siltation, acidification, thermal pollution. Changes in aquatic insect community structure according to original literature sources for each class of pollutant. Biological monitoring networks.

ENT 5121. Applied Experimental Design. (4 cr. §AGRO 5121.

Prereq—STAT 5021 or equiv or #)

Principles of sampling methodologies, experimental design, and statistical analyses. Methods/procedures in generating scientific hypotheses. Organizing, initiating, conducting, and analyzing scientific experiments using experimental designs and statistical procedures. Offered with AGRO 5121.

ENT 5211. Insect Pest Management. (3 cr. Prereq—3005

or #)

Prevention or suppression of injurious insects by integrating multiple control tactics, e.g., chemical, biological, cultural. Strategies to optimize the dynamic integration of control methodologies in context of their economic, environmental, and social consequences.

ENT 5241. Ecological Risk Assessment. (3 cr. Prereq—#)

Evaluating current/potential impact of physical, chemical, biological agents on ecosystems. Identifying ecological stressors, assessing level of exposure, measuring ecological responses, communicating/managing risks. Class participation, two reaction papers, final exam, small-group project.

ENT 5275. Medical Entomology. (3 cr. Prereq—#)

Biology of arthropod vectors of human disease. Emphasizes disease transmission and host, vector, and pathogen interactions.

ENT 5321. Ecology of Agricultural Systems. (3 cr; A-F only. §AGRO 5321. Prereq—[[3xxx or above] course in [AGRO or ANSC

or Hort], [3xxx or above] course in [Ent or PLPA or Soil]] or #)

Ecological approach to problems in agricultural systems. Formal methodologies of systems inquiry are developed/applied.

ENT 5341. Biological Control of Insects and Weeds. (3-4

cr [max 4 cr]; A-F only. Prereq—3001, BIOL 1009, EEB 3001 or grad)

Biological control of arthropod pests and weeds. Analysis of relevant ecological theory and case studies; biological control agents. Lab includes natural enemy identification, short experiments, and computer exercises.

ENT 5351. Insect Pathology. (2 cr. Prereq—5011)

Major pathogenic microorganisms that cause diseases in insects. Routes of infection of insects. Lab propagation of disease agents. Factors in application of disease to pest insect control. Safety considerations.

ENT 5361. Aquatic Insects. (4 cr; A-F only. Prereq—#)

Taxonomy, natural history of aquatic insects including their importance in aquatic ecology, water resource management, recreation, and conservation. Emphasizes family-level identification of immatures/adults. Field trips scheduled to local aquatic habitats. A collection is required.

ENT 5371. Principles of Systematics. (3 cr. Prereq—#; offered

alt yrs)

Theoretical/practical procedures of biological systematics. Phylogeny reconstruction, including computer assisted analyses, morphological/molecular approaches, species concepts, speciation, comparative methods, classification, historical biogeography, nomenclature. Use/value of museums.

ENT 5481. Invertebrate Neurobiology. (2-3 cr [max 3 cr].

§NSC 5481)

Fundamental principles/concepts underlying cellular bases of behavior/systems neuroscience. Particular invertebrate preparations.

ENT 5900. Basic Entomology. (1-6 cr [max 12 cr]. Prereq-#)
For graduate students who need to make up certain deficiencies in their biological science background.

Ent 5910. Special Problems in Entomology. (1-6 cr [max 10 cr]. Prereq-#)
Individual field, lab, or library studies in various aspects of entomology.

ENT 5920. Special Lectures in Entomology. (1-3 cr [max 3 cr])
Lectures or labs in special fields of entomological research. Given by visiting scholar or regular staff member.

Environmental Sciences, Policy, and Management (ESPM)

Department of Environmental Sciences, Policy, and Management

College of Food, Agricultural and Natural Resource Sciences

ESPM 1001. Orientation to Environmental Sciences, Policy, and Management. (1 cr; A-F only)
Academic planning, ESPM careers, liberal education requirements, internships. Building relationships with other students/faculty, student life, information technology, critical computer skills.

ESPM 1003H. Honors Colloquium. (1 cr [max 2 cr]; A-F only. Prereq—Lower division honors, #)
Lectures from experts, readings, discussions of current environmental topics/issues. Topics vary, see *Class Schedule*.

ESPM 1011. Issues in the Environment. (3 cr)
Introduction to environmental sciences, management of the environment. Ethics, historical perspectives on current condition. How values influence problem definition, use of natural/social sciences in integrated problem solving. Comparative historical reflection on problem of solving overtime. Public/private factors. Ethical professionalism within integrated environmental teams.

ESPM 1425. The Atmosphere. (4 cr; A-F only. §GEOG 1425)
Basic physical, chemical, and biological processes that drive changes in Earth's weather/climate. Radiation and energy exchange, greenhouse effect, stratospheric ozone depletion, severe weather hazards, general circulation of atmosphere. Climate teleconnections, including El Nino. Impacts of human activities on climate. Weekly field/computer labs investigate how weather/climate data are measured, analyzed, and interpreted. All lecture and lab material are made available on the course Web site.

ESPM 1480. Topics in Natural Resources. (1-4 cr [max 6 cr]. Prereq—Lower div)
Lectures by visiting scholar or regular staff member. Topics specified in *Class Schedule*.

ESPM 1901. Topics: Freshman Seminar. (3 cr. Prereq—Fr)
Topics vary.

ESPM 1901H. Topics: Freshman Seminar. (3 cr. Prereq—Fr)
Topics vary.

ESPM 2041. Natural Resources Consumption and Sustainability. (3 cr)
Trends in national/global population growth, economic growth, and consumption of food, energy, minerals, wood, and other raw materials. Natural resources as raw materials for industry and for economic development. Environmental/economic trade-offs in gathering, processing, and use. Balancing consumption and environmental needs. Environmental impacts of extraction/use. Sustainability.

ESPM 3000. Seminar on Current Issues for ESPM. (1 cr [max 6 cr]; A-F only. Prereq—Jr)
Environmental issues students will have to address in their future careers. Small group discussion, in-depth/focused intellectual debate. Topics depend on faculty selection or student interest.

ESPM 3001. Treaty Rights and Natural Resources. (3 cr; A-F only. §ESPM 5001)
Readings, class discussion about nature of treaty rights reserved by indigenous Americans with respect to utilization of natural resources. Emphasizes Midwest issues. Web-assisted course.

ESPM 3002. Colloquium: Exotic Plants and Animals. (1 cr; A-F only)
Current exotic plants/animals in Great Lakes region and around the world. Gypsy moths, brown tree snakes, zebra mussels, Eurasian watermilfoil. Impact/control. Readings, discussions, and lectures from experts on topics such as invasion theory and real world management.

ESPM 3011W. Ethics and Leadership in Resource Management. (3 cr)
Normative/professional ethics, and leadership considerations, applicable to managing natural resources and the environment. Readings, discussion.

ESPM 3021. Ecological Vegetation Management: a Consulting Approach. (3 cr. §ESPM 5021. Prereq—BIOL 3407 or EEB 3001 or FR 3104 or equiv)
Application of ecological concepts such as succession/competition to ecosystems under management. Wetlands, riparian zones, urban interfaces, agriculture, agroforestry. Northern/boreal conifer, hardwood forests, grasslands (prairie). Management objectives, methods, impacts. Evaluating practices for sustainability. Social issues. Regional (Great Lakes area), national, global case studies.

ESPM 3031. Applied Global Positioning Systems for Geographic Information Systems. (3 cr; A-F only. §ESPM 5031. Prereq—Intro GIS course, [jr or sr])
GPS principles, operations, techniques to improve accuracy. Datum, projections, and coordinate systems. Differential correction, accuracy assessments discussed/applied in lab exercises. Code/carrier phase GPS used in exercises. GPS handheld units, PDA based ArcPad/GPS equipment. Transferring field data to/from desktop systems, integrating GPS data with GIS.

ESPM 3101. Conservation of Plant Biodiversity. (3 cr; A-F only. §ESPM 5101. Prereq—BIOL 1001 or BIOL 1009)
Introduction to principles underlying assessment/conservation of plant biodiversity at individual, population, and community levels. Case studies in management of biodiversity to restore/maintain ecosystem function. Issues such as genetics, timber harvesting, invasive species, plant reproduction.

ESPM 3111. Hydrology and Water Quality Field Methods. (3 cr; A-F only. §ESPM 5111. Prereq—4061 or EEB 4601 or GEO 4601 or FR 3114)

Integrates water quality, surface/groundwater hydrology. Case studies, hands-on field data collection, calculations of hydrological/water quality parameters. Meteorological data, snow hydrology, stream gauging, well monitoring, automatic water samplers. Designing water quality sampling program. Geomorphology, interception, infiltration.

ESPM 3128. Seminar: Environmental Science. (1 cr; S-N only)
Students analyze environmental topics presented by guest speakers. Job opportunities in environmental science. Resume writing, interviewing skills.

ESPM 3131. Environmental Physics. (3 cr; A-F only. Prereq—PHYS 1101)
Concepts/principles of classic/modern physics applied to environmental problems arising from interaction between humans and the natural environment. Forms of pollution (e.g., land, water, air). Transport mechanisms. Anthropogenic greenhouse gas emissions. Global climate change. Social issues related to environmental problems.

ESPM 3202W. Environmental Conflict Management, Leadership, and Planning. (3 cr; A-F only. §ESPM 5202)
Negotiation of natural resource management issues. Use of collaborative planning. Case study approach to conflict management, strategic planning, and building leadership qualities. Emphasizes analytical concepts, techniques, and skills.

ESPM 3207. Emerging Issues in Tropical Agriculture and Forestry: Costa Rica. (3 cr. §ESPM 5207. Prereq—[Jr or sr], #)
Experiential learning through field trips. From conventional to organic bird-friendly coffee production/marketing to sustainable management of high-/low-land tropical forests and biodiversity. Lectures, seminars, labs field work, written project. A travel short course offered thru CATIE/UofM.

ESPM 3211. Survey, Measurement, and Modeling for Environmental Analysis. (3 cr. §ESPM 5211. Prereq—[MATH 1031 or MATH 1051], [STAT 3011 or FW 4001], computer competency)
Introduction to survey, measurement, and modeling concepts/methods for study of natural resources and environmental issues. Emphasizes survey design for data collection, estimation, and analysis for issues encompassing land, water, air, vegetation, animal, soil, and human/social variables.

ESPM 3221. Soil Conservation and Land-Use Management. (3 cr. Prereq—1125 or 2125 or #)
Water quality impacts of soil erosion, including nutrient transport to surface waters. Causes/consequences of soil erosion. Physical processes of wind/water erosion. Soil conservation techniques for agriculture, forestry, mining, and urban land uses. Economic, political, and sociological influences on soil conservation. Strategies for reducing nutrient losses to surface waters.

ESPM 3241W. Natural Resource and Environmental Policy: History, Creation, and Implementation. (3 cr. §ESPM 5241)
Basic concepts of political/administrative processes important to natural resource policy and program development. Case study approach to policy/legislative process, participants in policy development, and public programs. Federal/state laws/regulations, international issues.

ESPM 3245. Sustainable Land Use Planning and Policy. (3 cr; A-F only. §ESPM 5245. Prereq—All lower div RRM reqs or #)

Overview of policies that affect recreation at local, state, and federal levels. Landscape-level planning. Collaborative relationships as means to implement sustainable natural/social policy. Class project involves all aspects of implementing recreation policy, from public meetings to hands-on evaluation of options.

ESPM 3251. Natural Resources in Sustainable International Development. (3 cr; A-F only. §ESPM 5251, LAS 3251)

International perspectives on resource use in developing countries. Integration of natural resource issues with social, economic, and policy considerations. Overviews of agriculture, forestry, agroforestry, non-timber forest products, water resources, certification, and development issues. Latin American case studies.

ESPM 3261W. Economics and Natural Resources Management. (4 cr; A-F only. §ESPM 5261)

Introduction to microeconomic principles, Relationship of economic principles to natural resource management. Tools to address market failure, project analysis. Economic/financial considerations. Benefit/cost analysis. Valuation/assessment methods for property/resources. Planning/management problems. Managing renewable natural resources.

ESPM 3480. Topics in Natural Resources. (1-4 cr [max 6 cr])
Lectures by visiting scholar or regular staff member. Topics specified in *Class Schedule*.

ESPM 3575. Wetlands Conservation. (3 cr. §ESPM 5575)
Freshwater wetland classification, wetland biota, current/historic status of wetlands, value of wetlands. National, regional, Minnesota wetlands conservation strategies, ecological principles used in wetland management.

- ESPM 3601. Our Home, Our Environment.** (3 cr; A-F only. §DHA 3482)
Effects of people and their homes on the environment. Energy/resource efficiency, environmental responsibility, occupant health. Affordability issues with respect to housing. Design, construction, renovation, retrofitting, landscaping. Consumer options for lighting, weatherization, water use, emissions, waste reduction, recycling, air quality, hazardous materials, and housing growth.
- ESPM 3602. Regulatory and Ethical Frameworks for CEM.** (3 cr. Prereq—APEC 1101 or ECON 1101 or 3261W)
Concepts/issues relating to industrial ecology and industry as they are influenced by current standards/regulations at local, state, and national levels.
- ESPM 3603. Environmental Life Cycle Analysis.** (3 cr. §MGMT 3603. Prereq—[MATH 1142 or [MATH 1271, MATH 1272]], [APEC 1101 or ECON 1101 or 3261W])
Concepts/issues relating to inventory, subsequent analysis of production systems. Production system from holistic point of view, using term commonly used in industrial ecology: “metabolic system.”
- ESPM 3604. Environmental Management Systems and Strategy.** (3 cr. §ESPM 5604)
Environmental problems such as climate change, ozone depletion, and loss of biodiversity.
- ESPM 3605. Recycling: Extending Raw Materials.** (3 cr. §ESPM 5605)
Principles of recycling. Role of recycling in raw materials utilization, energy, and the environment. Recycling processes for commonly recycled materials/products. Properties, environmental implications of recycling.
- ESPM 3606. Minimizing Industrial Emissions.** (3 cr. §ESPM 5606. Prereq—CHEM 1011, or #)
Fundamental waste streams and pollution control technologies in natural resource conversion.
- ESPM 3612W. Soil and Environmental Biology.** (3 cr. Prereq—BIOL 1009 or equiv, CHEM 1021 or equiv; 2125 recommended)
Properties of microorganisms that impact soil fertility, structure, and quality. Nutrient requirements of microbes and plants, and mineral transformations in biogeochemical cycling. Symbiotic plant/microbe associations and their role in sustainable agricultural production. Biodegradation of pollutants and bioremediation approaches.
- ESPM 3703. Agroforestry in Watershed Management.** (3 cr. §ESPM 5703)
Biological, physical, and environmental attributes of agroforestry as pertains to watershed management. Coupling production with watershed protection benefits. Implications for policy, economics, and human dimensions in sustainable development. Examples, case studies from N Amer and from developing countries.
- ESPM 4021W. Environmental Impact Statements.** (3 cr)
Roles of governmental agencies, consultants, and private citizens in EIS process. Students read EIS/EAW, analyze their content/scope, and prepare an EAW and an EIS according to Minnesota EQB guidelines.
- ESPM 4061W. Water Quality and Natural Resources.** (3 cr. §ESPM 5061)
Issues, parameters, and decision making strategies for managing surface/groundwater resources in Minnesota and globally. Biophysical and human side of water management. Wetlands, exotic species, heavy metal deposition. Cultural, political, and societal dimensions. Case studies, discussions, problem-solving, debates, projects.
- ESPM 4093. Directed Study.** (1-7 cr [max 20 cr]. Prereq—#)
Research, readings, and instruction.
- ESPM 4094. Directed Research.** (1-7 cr [max 7 cr]. Prereq—#)
Research under the direction of department faculty.
- ESPM 4096. Professional Experience Program: Internship.** (1-3 cr [max 6 cr]. Prereq—CFANS undergrad, #, completed internship contract)
Students create oral/written report based on paid or volunteered work or field experience.
- ESPM 4195W. Problem Solving and Planning in Natural Resources.** (4 cr; A-F only. Prereq—ESPM sr)
Applying problem solving tools/skills in policy, planning, and managerial situations. Students work with “real world” clients, produce publishable technical report, and present their results in a professional public forum.
- ESPM 4200H. Honors Seminar.** (1 cr; A-F only. Prereq—ENR upper div honors, #)
Topics presented by faculty, students, guest speakers. Lecture/discussion.
- ESPM 4216. ContAMINant Hydrology.** (2 cr; A-F only)
Principles of contaminant transport in percolate solution and in overland flow. Hydrologic cycle, percolation/runoff processes, contaminant transport, leachate sampling methods, remediation technologies, scale effects on runoff water quality, tillage technologies, control of sediment/chemical losses. Discussions mostly descriptive, but involve some computations.
- ESPM 4295W. GIS in Environmental Science and Management.** (4 cr; A-F only. §ESPM 5295. Prereq—FR 3131 or #)
Application of spatial data inventory/analysis in complex environmental planning problems. Spatial data collection, database development methods including GPS, DLG, TIGER, NWI data, spatial analysis. Topics identified by non-University partners.
- ESPM 4601. Soils and Pollution.** (3 cr. Prereq—[2125, [CHEM 1021 or equiv], [PHYS 1042 or equiv]] or #; 3416 recommended)
Principles of microbiology, chemistry, physics applied to evaluation of pollution of soils. Mitigation of pollution in agricultural/urban settings, remediation of polluted sites.
- ESPM 4607. Industrial Biotechnology and the Environment.** (2 cr §ESPM 5607. Prereq—BIOC 2011)
Biotechnology pertaining to biobased products development, their environmental impact.
- ESPM 4608. Bioremediation.** (2 cr §ESPM 5608. Prereq—[BIOL 1001 or BIOL 1009], CHEM 1011, BIOC 2011)
Use of organisms in remediation of waste/pollution problems related to bio-based product industries. Types, characteristics, and identification of useful microorganisms. Applications of microbes to benefit industrial processes of wood and fiber.
- ESPM 4801H. Honors Research.** (2 cr; A-F only. Prereq—ENR upper div honors, #)
Independent research project supervised by faculty member.
- ESPM 4802H. Honors Research.** (2 cr; A-F only. Prereq—ENR upper div honors, #)
Completion of honors thesis. Oral report.
- ESPM 4811. Environmental Interpretation.** (3 cr; A-F only. §ESPM 5811. Prereq—Jr or sr or grad student)
Theories of interpretation. Nonformal teaching pedagogy. Interpretive talks, walks, and programs. Camp leadership, oral presentation. Newsletter development, Web site design. Development of self-guided trail guides, brochures, and exhibits. Planning, evaluation. Interpretive work in private, state, or federal agencies. First-hand experience.
- ESPM 5001. Treaty Rights and Natural Resources.** (3 cr; A-F only. §ESPM 3001. Prereq—Grad student or #)
Readings, class discussion about treaty rights reserved by indigenous Americans with respect to use of natural resources. Emphasizes Midwest issues. Web-assisted course.
- ESPM 5002. Colloquium: Restoration of Stream Ecosystems.** (1 cr)
Key concepts/techniques. Overview of stream habitat restoration. Relationship of restoration to natural stream systems, planning, research, watershed groups, interagency coordination, and management decision process.
- ESPM 5019. Business, Natural Environment, and Global Economy.** (2 cr)
Business strategies that affect natural environment. Ways business strategies/practices can produce win-win outcomes for the environment and business.
- ESPM 5021. Ecological Vegetation Management: a Consulting Approach.** (3 cr. §ESPM 3021. Prereq—Grad student or #)
Application of ecological concepts such as succession/competition to ecosystems under management. Wetlands, riparian zones, urban interfaces, agriculture, agroforestry. Northern/boreal conifer, hardwood forests, grasslands (prairie). Management objectives, methods, impacts. Evaluating practices for sustainability. Social issues. Regional (Great Lakes area), national, global case studies.
- ESPM 5031. Applied Global Positioning Systems for Geographic Information Systems.** (3 cr; A-F only. §ESPM 3031. Prereq—Grad student or #)
GPS principles, operations, techniques to improve accuracy. Datum, projections, and coordinate systems. Differential correction, accuracy assessments discussed/applied in lab exercises. Code/carrier phase GPS used in exercises. GPS handheld units, PDA based ArcPad/GPS equipment. Transferring field data to/from desktop systems, integrating GPS data with GIS.
- ESPM 5061. Water Quality and Natural Resources.** (3 cr. §ESPM 4061W. Prereq—Grad student or #)
Issues, parameters, and decision making for managing surface/groundwater resources in Minnesota and globally. Biophysical/human side of water management. Wetlands, exotic species, heavy metal deposition. Cultural, political, and societal dimensions. Case studies, discussions, problem-solving, debates, projects.
- ESPM 5101. Conservation of Plant Biodiversity.** (3 cr; A-F only. §ESPM 3101. Prereq—Grad student or #)
Introduction to principles underlying assessment/conservation of plant biodiversity at individual, population, and community levels. Case studies in management of biodiversity to restore or maintain ecosystem function. Genetics, timber harvesting, invasive species, plant reproduction.
- ESPM 5111. Hydrology and Water Quality Field Methods.** (3 cr; A-F only. §ESPM 3111. Prereq—Grad student or #)
Integrates water quality, surface/groundwater hydrology. Case studies, hands-on field data collection, calculations of hydrological/water quality parameters. Meteorological data, snow hydrology, stream gauging, well monitoring, automatic water samplers. Designing water quality sampling program. Geomorphology, interception, infiltration.
- ESPM 5131. Environmental Biophysics and Ecology.** (3 cr; A-F only. Prereq—[[BIOL 1009 or equiv], MATH 1271, PHYS 1101, [upper div or grad student]] or #)
Basic concepts of environmental variables such as temperature, humidity, wind, and radiation. Mechanics of heat/mass transfer between a living organism and its surrounding environment. Set of practical examples to integrate concepts and transport processes.
- ESPM 5195. Problem Solving and Planning in Natural Resources.** (4 cr; A-F only. Prereq—Grad student or #)
Applying problem solving tools/skills in policy, planning, and managerial situations. Students work with ‘real world’ client to produce publishable technical report, present results in professional public forum.

ESPM 5202. Environmental Conflict Management, Leadership, and Planning. (3 cr; A-F only. §ESPM 3202W. Prereq-Grad or #)
Negotiation of natural resource management issues. Use of collaborative planning. Case study approach to conflict management, strategic planning, and building leadership qualities. Emphasizes analytical concepts, techniques, and skills.

ESPM 5207. Emerging Issues in Tropical Agriculture and Forestry: Costa Rica. (3 cr. §ESPM 3207. Prereq-Grad student, #)
Experiential learning through field trips. From conventional to organic bird-friendly coffee production/marketing. Sustainable management of high-/low-land tropical forests and of biodiversity. Lectures, seminars, labs field work, written project. Offered through CATIE/UoFM.

ESPM 5211. Survey, Measurement, and Modeling for Environmental Analysis. (3 cr. §ESPM 3211. Prereq-Grad student or #)
Introduction to survey, measurement, and modeling concepts/methods for study of natural resources and environmental issues. Emphasizes survey design for data collection, estimation, and analysis for issues encompassing land, water, air, vegetation, animal, soil, and human/social variables.

ESPM 5241. Natural Resource and Environmental Policy: History, Creation, and Implementation. (3 cr. §ESPM 3241W. Prereq-Grad student or #)
Basic concepts of political/administrative processes important to natural resource policy and program development. Case study approach to policy/legislative process, participants in policy development, and public programs. Federal/state laws/regulations, international issues.

ESPM 5245. Sustainable Land Use Planning and Policy. (3 cr; A-F only. §ESPM 3245. Prereq-Grad student or #)
Overview of policies that affect recreation at local, state, and federal levels. Landscape-level planning. Collaborative relationships as means to implement sustainable natural/social policy. Class project involving all aspects of implementing recreation policy, from public meetings to hands-on evaluation of options.

ESPM 5251. Natural Resources in Sustainable International Development. (3 cr; A-F only. §ESPM 3251, LAS 3251. Prereq-Grad student or #)
International perspectives on resource use in developing countries. Integration of natural resource issues with social, economic, and policy considerations. Agriculture, forestry, agroforestry, non-timber forest products, water resources, certification, development issues. Latin American case studies.

ESPM 5261. Economics and Natural Resources Management. (4 cr; A-F only. §ESPM 3261W. Prereq-Grad student or #)
Microeconomic principles in natural resource management. Tools to address market failure, project analysis, and evaluation. Economic/financial considerations. Benefit/cost analysis methods/examples. Valuation/assessment methods for property/resources. Managing renewable natural resources.

ESPM 5295. GIS in Environmental Science and Management. (4 cr; A-F only. §ESPM 4295W. Prereq-Grad student or #)
Application of spatial data inventory/analysis in complex environmental planning problems. Spatial data collection. Database development methods, including GPS, DLG, TIGER, NWI data, and spatial analysis. Topics identified by non-University partners.

ESPM 5402. Biometeorology. (3 cr. Prereq-MATH 1271, PHYS 1201, STAT 3011)
Calculus-based introduction to atmospheric boundary layer (ABL), the interface between earth's surface and the atmosphere. ABL development/turbulence, surface energy balance, ABL clouds, air quality, microclimate, observational/modeling methods.

ESPM 5480. Topics in Natural Resources. (1-4 cr [max 6 cr]. Prereq-Sr or grad student)
Lectures by visiting scholar or regular staff member. Topics specified in *Class Schedule*.

ESPM 5482. Biosafety Science and Policy. (3 cr)
Science/policy for governing environmental/health safety of genetic engineering through Minnesota, national, and international cases.

ESPM 5501. Biological Collections: Curation and Management. (1 cr. Prereq-One [gen biology or intro to natural resources] course or #)
Roles/value of biology collections in natural history museums. Conservation of biodiversity record. Students participate in various hands-on curatorial activities. Lectures, tours.

ESPM 5555. Wetland Soils. (3 cr; A-F only. §SOIL 5555. Prereq-1125 or 2125 or equiv or #; ¶4511 recommended)
Morphology, chemistry, hydrology, formation of mineral/organic soils in wet environments. Soil morphological indicators of wet conditions, field techniques of identifying hydric soils for wetland delineations. Peatlands. Wetland benefits, preservation, regulation, mitigation. Field trips, lab, field hydric soil delineation project.

ESPM 5575. Wetlands Conservation. (3 cr. §ESPM 3575. Prereq-§: 3575; sr or grad student or #)
Freshwater wetland classification, wetland biota, current/historic status of wetlands, value of wetlands. National, regional, Minnesota wetlands conservation strategies. Ecological principles used in wetland management.

ESPM 5601. Principles of Waste Management. (3 cr; A-F only. Prereq-1125 or 2125, BIOL 1002/1009 or CHEM 1021, STAT 3011, APEC 1101 or #)
Waste and waste management principles. Issues, problems, and solutions in remedying waste stream. MSW and yard waste composting, WTE incineration operation, ash disposal, recycling, land fill requirements, direct land disposal, regulatory trends, and case studies.

ESPM 5602. Regulatory and Ethical Frameworks for CEM. (3 cr. Prereq-APEC 1101 or ECON 1101)
Concepts, major issues relating to industrial ecology and industry as they are influenced by current standards/regulations at local, state, and national levels.

ESPM 5603. Environmental Life Cycle Analysis. (3 cr. Prereq-[MATH 1142 or [MATH 1271, MATH 1282]], [ECON 1101 or APEC 1101])
Concepts, major issues relating to inventory and subsequent analysis of production systems. Production system from holistic point of view, using term commonly used in industrial ecology: "the metabolic system."

ESPM 5604. Environmental Management Systems and Strategy. (3 cr. §ESPM 3604)
Environmental problems such as climate change, ozone depletion, and loss of biodiversity.

ESPM 5605. Recycling: Extending Raw Materials Supplies. (3 cr. §ESPM 3605)
Principles of recycling. Role of recycling in raw materials utilization, energy, and the environment. Recycling processes for number of commonly recycled materials/products. Properties, environmental implications of recycling.

ESPM 5606. Minimizing Industrial Emissions. (3 cr. §ESPM 3606. Prereq-CHEM 1011 or #)
Fundamental waste streams and pollution control technologies in natural resource conversion.

ESPM 5607. Industrial Biotechnology and the Environment. (2 cr. §ESPM 4607. Prereq-BIOC 2011, grad student)
Biotechnology pertaining to biobased products development and their environmental impact.

ESPM 5608. Bioremediation. (2 cr. §ESPM 4608. Prereq-[BIOL 1001 or BIOL 1009], CHEM 1011, BIOC 2011)
Use of organisms in remediation of waste/pollution problems related to bio-based product industries. Types, characteristics, and identification of useful microorganisms. Applications of microbes to benefit industrial processes of wood/fiber.

ESPM 5703. Agroforestry in Watershed Management. (3 cr. §ESPM 3703. Prereq-Grad student or #)
Biological, physical, and environmental attributes of agroforestry as pertains to watershed management. Coupling production with watershed protection benefits. Implications for policy, economics, and human dimensions in sustainable development. Examples/case studies from North America and developing countries.

ESPM 5811. Environmental Interpretation. (3 cr; A-F only. §ESPM 4811. Prereq-Grad student or #)
Theories of interpretation, nonformal teaching pedagogy. Interpretive talks, walks, and programs. Camp leadership. Oral presentation. Newsletter development. Web site design. Development of self-guided trail guides, brochures, and exhibits. Planning, evaluation. Interpretive work in private, state, or federal agencies. Hands-on experience.

Family Social Science (FSOS)

Department of Family Social Science

College of Education and Human Development

FSOS 1101. Intimate Relationships. (4 cr)
Focuses on couple dynamics and gives an overview of how to develop, maintain, and terminate an intimate relationship. Relationship skills and issues including communication, conflict resolution, power, and roles. Programs for marriage preparation, marriage enrichment, and marital therapy are described.

FSOS 1201. Human Development in Families: Lifespan. (4 cr)
Human development in a family context. Life-course and human development theories. Individual/family development, mate selection, birth, life cycle. Physical, cognitive, language, social, and personality development. Historical, social, and cultural factors. How theory/research are applied to everyday lives.

FSOS 1301. Cash or Credit: You Need to Know. (1 cr; A-F only. Prereq-Fr or soph or PSEO)
Money management. Responsible use of credit, specifically credit cards. Online course: 15 Web-based lessons.

FSOS 1905. Freshman Seminar. (1-3 cr [max 6 cr]. Prereq-Fr)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

FSOS 2101. Preparation for Working With Families. (2 cr; A-F only)
Systematic preparation for upper division education, research/field internships, and career possibilities in Family Social Science.

FSOS 2103. Family Policy. (3 cr)
Connections between policies that governments enact, and families and their well-being. Conceptual frameworks for influences underlying policy choices. Evaluating consequences of such choices for diverse families.

FSOS 2105. Methods in Family Research. (3 cr. §FSOS 4105)
Scientific method. Major questions/objectives of family research. Data collection/analysis/reporting. Social context of family research.

FSOS 2191. Independent Study in Family Social Science. (1-4 cr [max 12 cr]. Prereq-Soph, #)
Independent reading or writing or research under faculty supervision.

FSOS 3101. Personal and Family Finances. (3 cr. Prereq—At least soph or #)

Analysis of personal/family financial management principles. Financial planning of savings, investments, credit, mortgages, and taxation. Life, disability, health, and property insurance. Public/private pensions. Estate planning.

FSOS 3102. Family Systems and Diversity. (3 cr. §FSOS 5101. Prereq—At least soph or #)

Family systems/theories applied to dynamics/processes relevant to family life. Diversity issues related to gender, ethnicity, sexual orientation, and disability. Divorce, single parenthood, remarriage. Family strengths/problems.

FSOS 3104. Global and Diverse Families. (3 cr. §FSOS 4102. Prereq—at least Soph or #)

Perspectives on family dynamics of various racial/ethnic populations in the United States/other countries in context of national/international economic, political, and social processes.

FSOS 3150. Special Topics in Family Social Science. (1-4 cr [max 4 cr]. Prereq—Varies by topic, at least soph) Review of research/scholarly thought. Topics specified in *Class Schedule*.

FSOS 3191. Independent Study in Family Social Science. (1-5 cr [max 12 cr]. Prereq—Jr, #)

Independent reading or writing or research under faculty supervision.

FSOS 3426. Alcohol and Drugs: Families and Culture. (3 cr. §FSOS 5426)

Psychology/sociology of drug use/abuse. Life-span, epidemiological, familial, cultural data regarding use. Fundamentals of licit/illicit drug use behavior. Variables of gender, ethnicity, social class, sexuality, sexual orientation, disability.

FSOS 3429. Counseling Skills Practicum I. (3 cr. §FSOS 5429)

Basic counseling skills. Counselor needs/motivations, non-verbal communication, basic/advanced empathy, identifying strengths, maintaining focus, challenging discrepancies, use of self. Emphasizes building from client strengths, learning through role-playing.

FSOS 3431. Counseling Skills Practicum II. (3 cr. §FSOS 5431. Prereq—[3429, 5429])

Advanced therapeutic methods. Processes of change. Identifying, reinforcing, challenging core beliefs. Reframing. Paradox. Trance, guided imagery. Cognitive-behavioral, solution-focused, narrative therapies. Emphasizes non-pathologizing models of therapy.

FSOS 3432. Chemical Abuse and Families: An Overview. (3 cr)

Relationships, family systems, families in which alcohol or drug use is a problem. Family types, family of origin, models of family therapy, family systems theory, alcoholism. Review of literature.

FSOS 4101. Sexuality and Gender in Families and Close Relationships. (3 cr. Prereq—At least jr or #)

Human ecology/development as frameworks for examining sexuality in close relationships. Diversity of sexual beliefs, attitudes, behaviors within differing social contexts. Using scientific knowledge to promote sexual health among individuals, couples, families through various life stages.

FSOS 4104W. Family Psychology. (3 cr. Prereq—At least jr or #)

Processes in families of origin, families of choice, and other close relationships, within diverse social contexts. Evaluating current research on family dynamics within/across generations.

FSOS 4106. Family Resource Management. (3 cr. Prereq—at least jr or #)

Analysis of how individuals/families use interpersonal, economic, natural, and community resources to make decisions, solve problems, and achieve central life purposes.

FSOS 4150. Special Topics in Family Social Science.

(1-4 cr [max 12 cr]. Prereq—[Varies by topic], at least jr) Review of research/scholarly thought. Topics specified in *Class Schedule*.

FSOS 4152. Gay, Lesbian, and Bisexual People in Families. (3 cr. Prereq—At least jr or #)

Perspectives on gay, lesbian, and bisexuals (GLB) in families. Unique contributions of GLB to understanding diversity among families. Homophobia, mythologies, coming-out, identity, gender, social networks, intimacy, sexuality, children, parenting, aging, AIDS, ethnicity.

FSOS 4153. Family Financial Counseling. (3 cr; A-F only. Prereq—[3101, 3102, 3429] or #)

Introduction to family financial management applications through different stages in family financial life cycle. Case studies.

FSOS 4154W. Families and Aging. (3 cr. Prereq—At least jr or #)

Aging families from diverse socioeconomic/cultural groups as complex multigenerational systems interacting within ever-changing social structures.

FSOS 4155. Parent-Child Relationships. (3 cr; A-F only. Prereq—At least jr or #)

History, theories, research, and contemporary practices of parent-child relationships in diverse families/cultures across the life span. Preparation for professionals in education, social work, and other human service occupations.

FSOS 4156. Legal-Economic Controversies in Families. (3 cr. Prereq—3101 or #)

Interdisciplinary course for critical thinking about legal-economic controversies across family life span. Principles of argumentation/debate are used to analyze controversies for public decision making about controversial family issues.

FSOS 4160H. Honors Capstone Project. (2 cr [max 4 cr]. Prereq—FSOS honors)

Individualizes the honors experience by connecting aspects of major program with special academic interests.

FSOS 4191. Independent Study in Family Social Science. (1-4 cr [max 12 cr]. Prereq—Sr, #)

Independent reading or writing or research under faculty supervision.

FSOS 4294. Research Internship. (1-4 cr [max 4 cr]. Prereq—[FSOS major, at least jr] or #)

Research project with faculty. May include planning, proposal writing, literature review, data collection/coding/cleaning/analysis, and reporting.

FSOS 4296. Field Study: Working With Families. (1-12 cr [max 12 cr]; S-N only. Prereq—[2101, at least jr] or #)

Directed paraprofessional work experience related to student's area of study.

FSOS 5014. Quantitative Family Research Methods I. (3 cr. Prereq—Grad student or #)

Family research methods, issues associated with multiple levels of analysis. Conducting family-focused data analyses using basic/intermediate methods (through ANOVA and multiple regression), including power analysis. Ethical issues involved in family research such as IRB/HIPAA regulations.

FSOS 5015. Family Research Laboratory. (1 cr; S-N only. Prereq—Grad student or #)

Application of basic family research methods into experiential learning using statistical software. Analyses that correspond with problem situations in 5014 and that involve secondary data analyses. Using statistical software for basic family research. Preparation to work with quantitative family data sets.

FSOS 5032. Family Systems Theories and Interventions. (3 cr. Prereq—Grad student or #)

Systemic/cybernetic frameworks as they apply to diverse families. Thinking systemically about families across multiple ecological systems. How to identify crucial epistemological issues in theoretical/applied areas of family science. Theoretical frameworks. Experiential role-playing, guest presenters, videos, field work, research projects, reading clubs, class discussion.

FSOS 5101. Family Systems. (3 cr. §FSOS 3102. Prereq—Grad student)

Family systems and other family theories focusing on the dynamics and processes relevant to family life. Diversity issues related to gender, ethnicity, sexual orientation, and disability. Issues related to divorce, single parenthood, and remarriage are covered. Family strengths and family problems are integrated.

FSOS 5150. Special Topics in Family Social Science. (1-4 cr [max 24 cr]. Prereq—#)

Review of research/scholarly thought. Topics specified in *Class Schedule*.

FSOS 5193. Directed Study in Family Social Science.

(1-6 cr [max 6 cr]. Prereq—FSOS or grad student in related field)

FSOS 5426. Alcohol and Drugs: Families and Culture. (3 cr. §FSOS 3426)

Overview of psychology/sociology of drug use/abuse. Life-span, epidemiological, familial, cultural data regarding use. Fundamentals of licit/illicit drug use behavior. Gender, ethnicity, social class, sexuality, sexual orientation, disability.

FSOS 5429. Counseling Skills Practicum I. (3 cr. §FSOS 3429)

Basic counseling skills. Counselor needs/motivations, non-verbal communication, basic/advanced empathy, identifying strengths, maintaining focus, challenging discrepancies, use of self. Emphasizes building from client strengths, learning through role-playing.

FSOS 5431. Counseling Skills Practicum II. (3 cr. §FSOS 3431. Prereq—[3429, 5429])

Advanced therapeutic methods, processes of change. Identifying, reinforcing, challenging core beliefs. Reframing, paradox, trance, guided imagery. Cognitive-behavioral, solution-focused, narrative therapies. Emphasizes non-pathologizing models of therapy.

FSOS 5432. Chemical Abuse and Families: An Overview. (3 cr)

Relationships, family systems with particular application to families in which alcohol or drug use is a problem. Family types, family of origin, models of family therapy, family systems theory, alcoholism. Review of literature.

Finance (FINA)

Department of Finance

Curtis L. Carlson School of Management

FINA 3001. Finance Fundamentals. (3 cr; A-F only. §APEC 3501, FINA 3000. Prereq—ACCT 2050, OMS 1550, 60 cr)

Comprehensive introduction to financial management principles. Money/capital markets, risk/return/valuation triad, capital budgeting basics. Capital structure, financial leverage. Cost of capital, financial performance measures, dividend policy, working capital management, international financial management/derivatives.

FINA 4121. Financial Markets and Interest Rates. (2 cr; A-F only. Prereq—4241)

Basic framework for valuing fixed income securities. Term structure on interest rates, forward rates, principles of fixed-income valuation. Surveys treasury, corporate, municipal, securitization markets.

FINA 4122. Banking Institutions. (2 cr; A-F only. Prereq—4121, 4241)

Managing banking institutions, including commercial banks and thrifts. Theory/practice of banking. Asset management, liability management, capital management. Public policy issues in banking.

FINA 4241. Corporate Financing Decisions. (4 cr; A-F only. Prereq—3001)

Theoretical/applied understanding of corporate financial decisions. Efficient markets, financial decisions, tax effects, managerial incentives, investment banking, effect of financing issues on investment decisions, basic options.

FINA 4242. Corporate Investment Decisions. (4 cr; A-F only. Prereq=4241)

Focuses on efficiently managing working capital and fixed assets. Cases illustrate some of the topics: working capital management, making capital budgeting decisions, targeting/evaluating firm performance, assessing mergers/acquisitions.

FINA 4321. Portfolio Management and Performance Evaluation. (2 cr; A-F only. Prereq=4241)

Introduces investment environment and concepts used to manage security portfolios. Portfolio/security risk/return tradeoffs, portfolio diversification, asset allocation, active portfolio management versus indexed portfolios, portfolio performance evaluation.

FINA 4322. Security Analysis. (2 cr; A-F only. Prereq=4241, 4321)

Valuation of equity securities. Basic valuation principles. Relationships between various valuation approaches. Develops/applies tools for self-designed security selection rules.

FINA 4541. Futures, Options, and Other Derivative Securities. (4 cr; A-F only. Prereq=4121, 4241, 4321)

Foundations of stochastic cash flow representations, construction portfolios of futures/options, basic methods for valuing real/financial futures, swaps, options.

FINA 4641. International Finance and Risk Management. (4 cr; A-F only. Prereq=3001)

Introduction to international dimensions of corporate financing, investment, risk management decisions. Foreign exchange markets, international financial systems, foreign exchange rate determination, measuring/managing currency risk, multinational capital budgeting, cost of capital in emerging economies.

Finnish (FIN)

*Department of German, Scandinavian, and Dutch
College of Liberal Arts*

FIN 1001. Beginning Finnish. (5 cr. \$FIN 4001)

Emphasis on working toward novice-intermediate low proficiency in all four language modalities (listening, reading, speaking, writing). Topics include every day subjects (shopping, directions, family, food, housing, etc.).

FIN 1002. Beginning Finnish. (5 cr. \$FIN 4002. Prereq=1001)

Continues the presentation of all four language modalities (listening, reading, speaking, writing), with a proficiency emphasis. Topics include free-time activities, careers, and the Finnish culture.

FIN 1003. Intermediate Finnish. (5 cr. \$FIN 4003.

Prereq=1002)

Emphasis on intermediate proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is combined with authentic readings and essay assignments.

FIN 1004. Intermediate Finnish. (5 cr. \$FIN 4004.

Prereq=1003)

Emphasis on developing intermediate mid-high proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is supported by work with authentic readings and essay assignments.

FIN 3011. Advanced Finnish. (3 cr. Prereq=1004 or 4004)

Designed to help students achieve advanced proficiency in Finnish. Discussion of fiction, film, journalistic, and professional prose is complemented by grammar, vocabulary building exercises, and review of oral/written modes of communication.

FIN 3012. Advanced Finnish. (3 cr. Prereq=3011)

Discussion of novels, short stories, plays, articles. Structural, stylistic, vocabulary-building exercises.

Fin 3670. Topics in Finnish Studies. (3 cr [max 9 cr])

Interdisciplinary social science topics on Finnish people, culture, and society. In English.

Fin 4001. Beginning Finnish. (2 cr. \$FIN 1001. Prereq=1004

in another language or passing score on LPE or grad student)

Meets concurrently with 1001. See 1001 for description.

Fin 4002. Beginning Finnish. (2 cr. \$FIN 1002. Prereq=1004

in another language or passing score on LPE or grad student)

Meets concurrently with 1002. See 1002 for description.

Fin 4003. Intermediate Finnish. (2 cr. \$FIN 1003.

Prereq=1004 in another language or passing score on LPE or grad student)

Meets concurrently with 1003. See 1003 for description.

Fin 4004. Intermediate Finnish. (2 cr. \$FIN 1004.

Prereq=1004 in another language or passing score on LPE or grad student)

Meets with 1004. See 1004 for description.

Fin 5670. Topics in Finnish Studies. (3 cr [max 9 cr])

Interdisciplinary social science topics on Finnish people, culture, and society. Taught in English.

Fisheries and Wildlife (FW)

*Department of Fisheries, Wildlife, and
Conservation Biology*

College of Food, Agricultural and Natural Resource Sciences

FW 1001. Orientation in Fisheries, Wildlife, and Conservation Biology. (1 cr; A-F only)

Survey of technical requirements and education needed for careers in fisheries, wildlife, and conservation biology. Introduction to fields of work, problems, career opportunities.

FW 1002. Wildlife: Ecology, Values, and Human Impact.

(3 cr. Prereq=Recommended for students without natural science background)

Controversial issues involving specific wildlife management principles/techniques.

FW 1901. Freshman Seminar. (1-3 cr [max 3 cr]. Prereq=Fr

with no more than 29 cr)

In-depth study of issues/topics related to natural resources and the environment. Topics vary each semester.

FW 1905. Freshman Seminar. (1-3 cr [max 6 cr]. Prereq=Fr)

Issues/topics related to natural resources and the environment. Topics vary.

FW 2001. Introduction to Fisheries, Wildlife, and

Conservation Biology. (3 cr. Prereq=BIOL 1001 or BIOL 1009)

Theory/practice of fisheries and wildlife management. Single species populations, ecosystem, landscape approaches. Biota, habitat, sociopolitical aspects of human use. Case studies explore current issues in conservation.

FW 2002. Threatened and Endangered Wildlife: Causes, Consequences, and Future Conservation. (3 cr. Prereq=Intro biology course)

Introduction to extinction as a process both natural and human caused. Illustrates differences in extinction events and why we should be concerned about rate of extinction. Definitions of current jargon used to describe imperiled species due to their legal/biological connotations. Case history examples of wildlife species that are threatened or endangered.

FW 3136. Biology of Fishes. (4 cr. \$FW 5136. Prereq=BIOL 1001 or BIOL 2012)

Fish biology, adaptations to different environments, modes of living, and environmental relationships. Lab emphasizes anatomy/identification of Minnesota fishes.

FW 4001. Biometry. (4 cr; A-F only. Prereq=MATH 1031)

Basic statistical concepts such as probability, sampling space, and frequency distributions. Descriptive statistics: sample tests, linear regression (simple and multiple), ANOVA, goodness of fit, nonparametric method and other relevant selected topics (e.g., clustering and classification).

FW 4102. Principles of Conservation Biology. (3 cr.

Prereq=BIOL 1009 or equiv; BIOL 3407 recommended)

Introduction to themes/concepts of diverse, dynamic, and interdisciplinary field. Biological/social underpinnings of conservation problems/solutions.

FW 4104. Hunting and Fishing Traditions: Field Sports

Reflected in Arts, Literature, and Practice. (3 cr. Prereq=#)

Philosophical foundations, history, traditions, and current importance of field sports in North American society. Laboratory sessions introduce making/using modern sport fishing equipment. Optional experiential learning laboratory introduces safe handling/operation of firearms, leading to State of Minnesota Firearms Safety Certificate. Lectures, invited guests, readings.

FW 4105. Hunting and Fishing Traditions: Field Sports

Reflected in Arts, Literature, and Practice. (2 cr)

Philosophical foundations, history, traditions, and current importance of field sports in North American society. Laboratory sessions introduce making/using modern sport fishing equipment. Optional experiential learning laboratory introduces safe handling/operation of firearms, leading to State of Minnesota Firearms Safety Certificate. Lectures, invited guests, readings.

FW 4106. Important Plants in Fisheries and Wildlife

Habitats. (1 cr; A-F only. Prereq=BIOL 3407, [jr or sr], FW

major)

Field identification of important plants in fisheries and wildlife habitats.

FW 4108. Field Methods in Research and Conservation of

Vertebrate Populations. (3 cr; A-F only. Prereq=BIOL 3407, [jr

or sr], FW major)

Planning/implementation of research/management projects. Collect/analyze data in groups. Group/individual oral/written reports. Each student keeps a field journal.

FW 4132. Invertebrate Diversity. (4 cr; A-F only. Prereq=BIOL

1001 or BIOL 2012)

Survey of major invertebrate phyla from standpoints of structure, function, development, and their environmental/evolutionary relationships. Focuses on major groups of multicelled invertebrates. Special unit dedicated to invertebrates of Minnesota.

FW 4191. Independent Study: Conservation Biology. (1-5

cr [max 5 cr]. Prereq=#)

Individual field, library, and lab research in conservation biology.

FW 4200H. Honors Seminar. (1 cr. Prereq=FW upper div

honors, #)

Current topics presented by faculty/students. Lecture/discussion.

FW 4291. Independent Study: Fisheries. (1-5 cr [max 15

cr]. Prereq=#)

Individual field, library, and lab research in fisheries.

FW 4292. Special Lectures: Fisheries. (1-5 cr [max 15 cr].

\$FW 5292. Prereq=#)

Lectures in special fields of fisheries given by visiting scholar or regular staff member.

FW 4391. Independent Study: Wildlife. (1-5 cr [max 5 cr].

Prereq=#)

Individual field, library, and lab research in wildlife.

FW 4392. Special Lectures: Wildlife. (1-5 cr [max 15 cr].

\$FW 5392. Prereq=#)

Lectures on special topics of wildlife given by visiting scholar or staff member.

FW 4401. Introduction to Fish Physiology and Behavior.

(4 cr. Prereq=BIOL 1001 or BIOL 1009)

How life in aquatic environment has influenced fish biology. Ionic/osmotic balance, sensory systems, gas exchange, endocrinology, growth, foraging, locomotion, reproduction, orientation/migration, toxicology.

FW 4565. Fisheries and Wildlife Ecology and Management: Field Trip. (1 cr; S-N only. Prereq-#) Ten-day field trip to Wyoming and points en route during spring break. Emphasizes broad range of fisheries and wildlife management, including big game, waterfowl, endangered species.

FW 4701. Fisheries and Wildlife Problem Solving. (2 cr. Prereq-FW sr or grad student or #) Management problem identification/analysis, information gathering/analysis, oral/written reporting. Selected management issues.

FW 4801H. Honors Research. (2 cr; A-F only. Prereq-FW upper div honors, #) Independent research project supervised by faculty member.

FW 4802H. Honors Research. (2 cr; A-F only. Prereq-FW upper div honors, #) Completion of honors thesis. Oral report.

FW 5003. Human Dimensions of Biological Conservation. (3 cr. Prereq-[BIOL 1001 or BIOL 1009], BIOL 3407) Survey of social, psychological, economic, policy aspects of managing/conserving wildlife, fisheries, and related resources.

FW 5051. Analysis of Populations. (3 cr. SEEB 5051. Prereq-[BIOL 1001 or BIOL 1009], [FW 4001 or STAT 3011 or STAT 5021]) or #) Factors involved in regulation, growth, general dynamics of populations. Data needed to describe populations, population growth, population models, regulatory mechanisms.

FW 5136. Biology of Fishes. (4 cr. §FW 3136. Prereq-Grad student) Fish biology. Adaptations to different environments and modes of living. Environmental relationships. Lab emphasizes anatomy/identification of Minnesota fishes.

FW 5292. Special Lectures: Fisheries. (1-5 cr [max 15 cr]. §FW 4292. Prereq-Grad student or #) Lectures in special fields of fisheries given by visiting scholar or regular staff member.

FW 5392. Special Lectures: Wildlife. (1-5 cr [max 15 cr]. §FW 4392. Prereq-Grad student or #) Lectures given by visiting scholar or staff member.

FW 5411. Aquatic Toxicology. (3 cr. Prereq-Intro chem, intro ecol, #) Pollution assessment approaches, biological effects, fate/flow of contaminants in aquatic systems, major types of pollutants.

FW 5455. Sustainable Aquaculture. (3 cr. Prereq-[Intro biology, intro chemistry] or #) How aquaculture affects the environment and human well-being in Minnesota and world-wide. Role of aquaculture as world's fastest growing food sector and in hatcheries to support fishing and rebuild endangered species. Organic aquaculture, other innovations.

FW 5571. Avian Conservation and Management. (3 cr. Prereq-EEB 4134 or grad or #) Current problems in avian conservation/management. Nongame, wetland, game birds.

FW 5601. Fisheries Population Analysis. (3 cr; A-F only. Prereq-[4001 or STAT 5021], BIOL 3407, [MATH 1142 or MATH 1271]) Introduction to theory/methods for estimating vital statistics of fish populations. Using microcomputers/statistical software to describe, analyze, model attributes of fish populations. Case studies from literature of marine/freshwater fisheries management.

FW 5603W. Habitats and Regulation of Wildlife. (3 cr; A-F only. Prereq-BIOL 3407) Environmental interactions of wildlife at population/community levels. Environmental threats from human activities. Habitat management practices. Objectives, polices, regulations in population management.

FW 5604W. Fisheries Ecology and Management. (3 cr. Prereq-EEB 4601) Managed species/systems. Applied aquatic/fish ecology related to fisheries. Role of planning in fisheries management. Application of management tools, assessment of their efficacy.

FW 5625. Wildlife Handling and Immobilization for Research and Management. (2 cr; S-N only. Prereq-General biology, [grad student or vet med student or FW sr], Δ) Practical techniques to maximize human/animal safety and encourage effective operations. Preparation procedures, legal responsibilities, capture drugs/delivery systems, safety measures, ethical issues, basic veterinary procedures for handling wildlife. Field course. Uses live animals.

Food Science and Nutrition (FSCN)

Department of Food Science and Nutrition
College of Food, Agricultural and Natural Resource Sciences

FSCN 1001. Orientation to Nutrition. (1 cr. Prereq-Enrolled in nutrition undergrad prog) Nutrition as a professional career track. Services available at the University to achieve academic success. Various paths to becoming a registered dietician. Use of nutrition undergraduate major as a preparation for professional schools. Work environment.

FSCN 1012. Sports Nutrition. (2 cr) Physiological function and metabolic fate of all six classes of nutrients ingested by active individuals to improve athletic performance. Impact on physiology of ergogenic aids and various dietary supplements. Overview of these components in fulfilling energy/recovery needs for continual/progressive athletic performance. Web-based course.

FSCN 1013. Dietary Supplements: scientific, regulatory, and cultural aspects. (3 cr) Use of dietary supplements in the U.S. How to measure risk of a dietary supplement, approach used by National Institute of Medicine for dietary recommendations. Dietary Supplements Health and Education Act, FTC responsibilities. How dietary supplements are marketed. Other cultures as sources of supplements. Intellectual property rights of indigenous cultures. Use of supplements for health/performance. Course is online.

FSCN 1021. Introductory Microbiology. (4 cr) Broad introduction to the diverse world of microbes and how they impact our world in both deadly and life-saving ways.

FSCN 1090. Topics. (3 cr; A-F only) Non-lab microbiology for nursing

FSCN 1102. Food: Safety, Risks, and Technology. (3 cr) Ethical use of public policy and food technology to reduce or control risks in our food supply. Survey of microbiological, chemical, and environmental risks, and government and industry controls used to ensure food safety.

FSCN 1112. Principles of Nutrition. (3 cr. Prereq-High school [biology, chemistry]) Fundamental concepts of nutrition, nutrient functions, human nutritional requirements, food sources. Evaluating nutrition information/food safety. Role of nutrition in chronic disease, public policy, and the environment.

FSCN 1904. Topics: Freshman Seminar. (3 cr; A-F only) Interdisciplinary seminar. Topics vary.

FSCN 3102. Introduction to Food Science. (3 cr. Prereq-CHEM 1022) Introduction to composition of and chemical/physical properties of foods. Evaluating interaction/reaction of foods due to formulation, processing, and preparation.

FSCN 3612. Life Cycle Nutrition. (3 cr. Prereq-1112, CHEM 1022) Nutritional changes throughout lifecycle. Pregnancy, lactation, childhood, adulthood, aging. Topics relevant to lifecycle changes (e.g., body composition, immunity, sports nutrition).

FSCN 3614. Nutrition Education and Counseling. (3 cr. Prereq-1112)

Application of theories/principles of learning, behavior change, instructional methods to nutrition education and counseling in community settings.

FSCN 3615. Sociocultural Aspects of Food, Nutrition, and Health. (3 cr. Prereq-1112)

Sociocultural aspects of regional and cultural diversity in food preferences and food behavior, food habits, demographics, lifestyles, food consumption, and expenditures. Effect of socioeconomic status, religious beliefs, age, and cultural meaning of food on food choices.

FSCN 3662. Introduction to Dietetic Practice. (2 cr; A-F only. Prereq-1112, admitted to Coordinated Program in Dietetics, #) Introduction to the practice of dietetics in medical centers, residential care centers, ambulatory care clinics, and community service agencies.

FSCN 3731. Food Service Operations Management Laboratory. (2 cr; A-F only. Prereq-[3102 or §3102], [3732 or §3732])

Experience in managing a food service operation. On-/off-campus commercial/institutional restaurants used as labs. Required field trips.

FSCN 3732. Food Service Operations Management. (3 cr; A-F only. Prereq-3102 or §3102) Planning, preparing, delivering, serving, managing foods served away from home.

FSCN 3796. Field Experience in Food Service Management. (3 cr; A-F only. Prereq-[3732 or §3732], admitted to Coordinated Dietetics Program, #) Supervised food service production/management experience in a community or health care facility.

FSCN 4096. Professional Experience Program: Internship. (1-3 cr [max 6 cr]; A-F only. Prereq-FSCN undergrads, #; UC only) Supervised practical and professional experience in food industry firms or government agencies; evaluative reports and consultations with faculty advisors and employees. Registration information in COAFES Career Services.

FSCN 4103. World Food Problems. (3 cr. §AGRO 4103, APEC 4103, CVM 6060. Prereq-jr or sr or grad) A multidisciplinary look at problems and possible solutions in food production, storage, and utilization in developing countries. Presentations and discussions introduce conflicting views of population, use of technology, and ethical and cultural values of people in various parts of the world.

FSCN 4111. Food Chemistry. (3 cr. Prereq-3102, BIOC 3021) Study of chemical structures and functional properties of food components in relation to their roles as parts of complex biochemical systems and as modified by environmental and processing factors.

FSCN 4121. Food Microbiology and Fermentations. (3 cr. Prereq-1102, [VPB 2032 or MICB 3301 or MICB 2032], BIOC 3021) Relationship of environment to occurrence, growth, and survival of microorganisms in foods, methods of evaluation, genera and species of importance, control of food-borne pathogens and spoilage organisms in foods, and use of microorganisms in food fermentations.

FSCN 4122. Laboratory Methods in Food Microbiology and Fermentations. (2 cr. Prereq-Concurrent enrollment 4121) Microbiological methods for analysis of foods. Use of microorganisms for production of foods.

FSCN 4131. Food Quality. (3 cr. Prereq–4111, 4121)

Management systems in the processing and distribution of foods that insure food quality and compliance with food laws and regulations. Quality management, HACCP, audits, plant/equipment design for sanitation, specifications, recalls, and control systems.

FSCN 4210. Topics in Food Science and Nutrition. (1-4 cr [max 8 cr]. Prereq–#)

In-depth investigation of a specific topic in nutrition and food science not covered by other courses. Topic announced in advance.

FSCN 4291. Independent Study. (1-4 cr [max 4 cr].

Prereq–Undergrads, #)

Individual lab or library research in an area related to food science or nutrition.

FSCN 4312W. Food Analysis. (4 cr. Prereq–4111, STAT 3011)

Examination of components in foods with analytical measurement as the primary focus. Chemical, physical, and sensory techniques are used to identify and characterize major and minor components in food systems.

FSCN 4331. Food Process Engineering I. (3 cr [max 5 cr]; A-F only. \$BAE 4744. Prereq–3102, MATH 1272, [PHYS 1102 or PHYS 1302])

Specific applications of engineering principles (e.g., heat/mass transfer, kinetics, thermodynamics) to unit operations in food production.

FSCN 4332. Food Processing Operations. (3 cr; A-F only. Prereq–4331 or BAE 4744)

Engineering principles applied to commonly used food processing operations. Blanching, pasteurization, sterilization, frying, baking, milling, extrusion. Meat processing, water treatment, waste management.

FSCN 4342. Properties of Water in Foods. (4 cr. Prereq–4331)

Principles involved in processing, handling, and storage of frozen, dry and intermediate moisture biological materials (foods, drugs, biologics) with emphasis on the physio-chemical properties of water in food.

FSCN 4343. Processing of DAIRY Products. (4 cr. Prereq–4111, 4122, 4331)

Demonstration/application of basic concepts of food engineering/processing, food chemistry, and food microbiology to production of fluid, fermented, concentrated, and dehydrated dairy products.

FSCN 4345. Flavor Technology. (3 cr. Prereq–4111, 4331, ¶4121)

Flavor/off-flavor development in foods. Industrial production of food flavorings, their proper application to food systems.

FSCN 4346. Functional Foods: Regulations and Technology. (3 cr; A-F only. Prereq–[4111, 4121] or [4111, 4131] or [4121, 4131])

Overview of application of regulatory principles, food science, nutritional science to development of nutraceuticals, functional foods, dietary supplements. Scientific basis, technologies, legal requirements, animal/clinical evaluation, consumer usage versus need. Review of products available in world market, with focus on the United States.

FSCN 4596. Field Experience: Community Nutrition. (3 cr; A-F only. Prereq–Admitted to first year Coordinated Program in Dietetics, #)

Application of nutrition knowledge in the solution of problems related to health promotion. Assigned readings, discussion, and experiences in community agencies.

FSCN 4612. Human Nutrition. (3 cr. Prereq–1112, CHEM 1022, PHSL 3051)

Advanced study of digestion/absorption of nutrients. Research techniques in nutrition, including human/epidemiological studies. Health promotion, disease prevention theories.

FSCN 4613. Experimental Nutrition. (2 cr. Prereq–4612, BIOC 3021, STAT 3011)

Lab in chemical/biochemical methods of analysis of nutritional status.

FSCN 4614. Community Nutrition. (3 cr. Prereq–1112)

Community-based nutrition issues are explored including nutrition risks associated with different age, sex, ethnic, and socioeconomic groups; community needs assessment; program planning and evaluation, and programs that address the needs and interests of people in different stages of the life cycle, ethnic or cultural backgrounds, and literacy levels.

FSCN 4621W. Nutrition and Metabolism. (4 cr. Prereq–4612, BIOC 3021, PHSL 3051)

Carbohydrate, lipid, and protein metabolisms. Uses systems/holistic approach to emphasize how metabolic pathways interrelate.

FSCN 4665. Medical Nutrition Therapy I. (3 cr; A-F only. Prereq–4612, PHSL 3051, BIOC 3021)

Nutrition assessment and support. Pathology, management, and nutrition therapy for disorders of the gastrointestinal, immune, and respiratory systems, and cancer.

FSCN 4666. Medical Nutrition Therapy II. (3 cr; A-F only. Prereq–4665)

Pathology, management, and nutrition therapy for disorders of the cardiovascular, endocrine, urinary, and neuromuscular and skeletal systems. Nutrition intervention for inborn errors of metabolism, and eating disorders and obesity.

FSCN 4696. Field Experience: Medical Nutrition Therapy I. (6 cr; A-F only. Prereq–Second year students in Coordinated Program in Dietetics or #)

Application of nutrition knowledge in the solution of problems related to disease and injury; assigned readings, discussions, and experience in medical centers and long-term care facilities. Emphasis on nutrition support; gastrointestinal, immune and respiratory disorders, and cancer.

FSCN 4732. Food and Nutrition Management. (3 cr; A-F only. Prereq–3732, MGMT 3001)

Financial and human resource management applied to a variety of business and institutional settings. Field trips may be required.

FSCN 4796. Field Experience in Food and Nutrition Management. (3 cr; A-F only. Prereq–Second year students in Coordinated Program in Dietetics or #)

Application of principles of food service management to problems in community, commercial, or health care facilities.

FSCN 4896. Field Experience: Medical Nutrition Therapy II. (3 cr; A-F only. Prereq–[4696, admitted to Coordinated Program in Dietetics] or #)

Application of nutrition knowledge to problems related to health/disease. Readings, discussions, experience in medical centers. Emphasizes cardiovascular, endocrine, urinary tract, energy imbalance; eating disorders.

FSCN 4996. Field Experience: Medical Nutrition Therapy III. (2-4 cr [max 4 cr]; A-F only. Prereq–[4896, Admitted to Coordinated Program in Dietetics] or #)

Application of nutrition knowledge to problems related to health/disease, clinical management experience in medical centers. Emphasizes pediatrics, home health care, staff relief.

FSCN 5411. Food Biotechnology. (2 cr. Prereq–4121)

Genetic tools as applied to food biotechnology. Improvement of microbes used in food production by modern biotechnological approaches. Discuss need for stringent regulation of modern biotechnology as well as ethical and legal issues.

FSCN 5421. Introduction to Food Law. (3 cr. Prereq–1102)

Analysis of the federal legal requirements affecting the production processing, packaging, marketing, and distribution of food and food products using case law studies and regulatory history.

FSCN 5441. Introduction to New Product Development.

(2 cr. Prereq–4111, 4331)

Interactive course that introduces students to the principles of new product development, from identification and testing of new product concepts, through prototype testing, to basic process design using examples from industry.

FSCN 5461. Food Packaging. (2 cr. Prereq–1102, 3102, PHYS 1102 or PHYS 1302)

Materials, principles, and procedures of packaging as they apply to food products. Emphasis is on consumer products, but the principles also apply to bulk and institutional foods and ingredients.

FSCN 5471. Advanced Food Chemistry. (3 cr. Prereq–4111)

Chemical reactions taking place in formation, stability, and degradation of important food constituents. Examples of reactions for major chemical changes occurring in food systems.

FSCN 5481. Sensory Evaluation of Food Quality. (2 cr. Prereq–3102, STAT 3011)

Fundamentals of sensory perception. Test designs and methods used in studying sensory qualities of foods. Current issues in sensory evaluation. Group research project.

FSCN 5531. Grains: Introduction to Cereal Chemistry and Technology. (2 cr. Prereq–BIOL 1009, CHEM 1022)

Origins, structure, biochemistry, and cellular properties of major cereal grains as they relate to primary processing (milling) and secondary processing (production of cereal products).

FSCN 5601. Management of Eating Disorders. (3 cr. Prereq–[Sr or grad student] in health related program or #)

Etiology, occurrence, course, treatment, and prevention of eating disorders from a multidisciplinary perspective. Roles/responsibilities of eating disorder treatment team members of varying types across various treatment milieus.

FSCN 5631. Dietary Supplements: Regulatory, Scientific, and Cultural Perspectives. (3 cr)

Concepts/principles of dietary supplements-RDA, dose-response, risk assessment. Laws/regulations, their interpretation concerning dietary supplements. Vitamins/minerals. Philosophy/use of botanicals/nutraceuticals in Western medicine in contrast to other cultures. Use of herbal supplements in Western medicine.

Forest Resources (FR)

Department of Forest Resources

College of Food, Agricultural and Natural Resource Sciences

FR 1001. Orientation and Information Systems. (1 cr; A-F only)

Forest resources, recreation resource management, urban forestry programs. Forestry and natural resource careers. Qualification requirements for government positions, competencies, internships, and experiences to compete for jobs in industry. Course planning, mentoring, alumni contacts. Leadership, organization, process. Lab equipment/software, GUIs, the Internet, spreadsheets, Lumina, periodical indexes.

FR 1101. Dendrology: Identifying Forest Trees and Shrubs. (3 cr)

Identification nomenclature, classification, and distribution of common/important forest trees/shrubs. Use of keys. Field/lab methods of identification.

FR 1901. Freshman Seminar. (1-3 cr [max 3 cr]. Prereq–Freshman)

In-depth study of issues/topics related to natural resources and the environment. Topics vary each semester.

FR 2101. Identifying Forest Plants. (1 cr; A-F only. Prereq—[BIOL 1001 or BIOL 1009]; 1101, BIOL 2022 recommended) Field identification of common northwoods trees, shrubs, and nonwoody vascular plants. Emphasizes concept of plant communities, soil site relationships, and wildlife values. Taught at Cloquet Forestry Center.

FR 2102. Northern Forests: Field Ecology. (2 cr; A-F only. Prereq—BIOL 1001 or BIOL 1009) Field examination of natural history of northern/boreal forests with respect to soils, ecological characteristics of trees, community-environment relationships, stand development, succession, and regeneration ecology. Taught at Cloquet Forestry Center.

FR 2104. Measuring Forest Resources. (1 cr; A-F only) Introduction to land survey, tree/forest stand measurement (mensuration), and forest sampling techniques. Taught at Cloquet Forestry Center.

FR 3104. Forest Ecology. (4 cr; A-F only. \$FR 5104. Prereq—BIOL 1001 or 1009; 1 semester college chemistry recommended) Form/function of forests as ecological systems. Characteristics/dynamics of species, populations, communities, landscapes, and ecosystem processes. Examples applying ecology to forest management. Weekly discussions focus on research topics in forest ecology, exercises applying course concepts, and current issues in forest resource management. Required weekend field trip.

FR 3114. Hydrology and Watershed Management. (3 cr. \$FR 5114. Prereq—[BIOL 1009, CHEM 1011] or #) Introduction to hydrologic cycle and water processes in upland/riparian systems. Applications of hydrological concepts to evaluate impacts of forest management and other land use patterns/activities on water yield, stormflow, erosion, sedimentation, and water quality. Concepts, principles, and applications of riparian/watershed management. Economic/social factors. Uses national/global examples. Emphasizes forest ecosystems.

FR 3131. Geographical Information Systems (GIS) for Natural Resources. (4 cr; A-F only. \$FR 5131. Prereq—jr or sr) Introduction to GIS. Focuses natural resources. Data structures, sources, collection, and quality. Lab exercises introduce geodesy, map projections, spatial analyses, and cartographic modeling.

FR 3203. Forest Fire and Disturbance Ecology. (3 cr; A-F only. \$FR 5203. Prereq—[3104 or equiv], course fee) Ecology, history, management, and control of fire, wind, insect infestation, browsing, and other disturbances in forests. Disturbance regimes of boreal, northern hardwood, and other major forest types of North America. Influence of disturbance on wildlife habitat, urban/wildland interfaces, forest management, and stand/landscape dynamics. Guest speakers on fire organization, training, and operations. Two-day field trip.

FR 3204. Landscape Ecology and Management. (3 cr; A-F only. \$FR 5204. Prereq—Ecology course) Introduction to landscape ecology at different scales in time/space. Development/implications of broad-scale patterns of ecological phenomena, role of disturbance in ecosystems, characteristic spatial/temporal scales of ecological events. Principles of landscape ecology as framework for landscape research, analysis, conservation, and management.

FR 3205. Productivity and Ecology of Forest Soils. (3 cr. \$FR 5205. Prereq—Forest ecology, silviculture) Soil-site factors affecting plant/wildlife communities. Site quality estimation, site modification/enhancement. Effects of forest management and other human-related disturbances on forest site quality.

FR 3218. Measuring & Modeling Forests. (3 cr; A-F only. \$FR 5218. Prereq—[MATH 1142 or [MATH 1271, MATH 1272]], STAT 3011) General sampling design and survey techniques to assess current resource conditions. Application of metrics/sampling methods to forest vegetation. Calculation of tree/stand volume. Selection of modeling approaches. Case studies of modeling to project future growth. Landscape processes, characterization, modeling.

FR 3262. Remote Sensing of Natural Resources and Environment. (4 cr. \$FR 5262) Principles/techniques of remote sensing and its applications to mapping/monitoring land/water resources from local to global scales. Forest and natural resource inventory. Forest cover and soil mapping. Landuse/global change analysis. Lab provides hands-on experience working with aerial photography and digital sensing imagery.

FR 3411. Managing Forest Ecosystems: Silviculture. (3 cr. \$FR 5411. Prereq—[3104, non FR [major or minor]] or [3104, ¶5413, FR [major or minor]] or #) Management of forest ecosystems for sustaining ecological integrity, soil productivity, water quality, wildlife habitat, biological diversity, commodity production in landscape context. Silvics, forest dynamics, disturbances, regeneration, restoration, silvicultural systems. Ramifications of management choices. Weekend field trip.

FR 3431. Timber Harvesting and Road Planning. (2 cr. \$FR 5431. Prereq—3411 or #) Introduction to forest operations. Terminology, basic engineering, equipment and harvesting system options, productivity/costs. Relationship to forest management and silviculture. Road planning, forest management guidelines, approaches for mitigating potential impacts to soil/water resources. Environmental implications of method/equipment choices. Selling timber. Sale design, layout, and administration. Two all-day field trips.

FR 3471. Forest Planning and Management. (3 cr; A-F only. \$FR 5471. Prereq—Intro silviculture or concurrent registration in silviculture or #) Processes/techniques for scheduling forest management activities. Goals of landowners, industry, government, and society. Predicting forest outcomes, financial analysis, forest regulation, mathematical models, linear programming, economic analysis. Landscape-level management, desired conditions, historical range of variability, wildlife management, carbon sequestration, resource monitoring, certification, adaptive management.

FR 3480. Topics in Natural Resources. (1-3 cr [max 12 cr]. \$FR 5480. Prereq—#) Lectures in peccial fields of natural resources given by visiting scholar or regular staff member. Topics specified in *Class Schedule*.

FR 3501. Arboriculture: Selection and Maintenance of Trees. (3 cr. Prereq—[1101 or HORT 1012], BIOL 2022) Selection, growth, propagation, and maintenance of trees for urban spaces. Tree selection, site preparation, plant health care management. Prevention, diagnosis, and remediation of urban tree risks such as insects, pathogens, pollution, development, and climate change.

FR 3612. Silviculture and Timber Harvesting Practices in Minnesota. (1 cr. \$FR 5612. Prereq—Forest ecology, managing forest ecosystems: silviculture) Silviculture practices as driven by landowner objectives. Compares/contrasts silvicultural practices employed by county, state, federal, and industrial foresters in Minnesota.

FR 4118. Trees: Structure and Function. (3 cr; A-F only. \$FR 5118. Prereq—One chemistry course, one biology course, one ecology course) Plant-water relations. Relations of biology to ecology/management. How physiological factors affect ecological processes and management decisions.

FR 4200H. Honors Seminar. (1 cr; A-F only. Prereq—FR upper division honors, #) Current topics presented by faculty/students. Lectures. Discussions.

FR 4293. Directed Study. (1-5 cr [max 15 cr]. Prereq—#) Study/project on topic of personal interest in consultation with faculty member. Initial proposal, reports of accomplishments.

FR 4501. Urban Forest Management: Managing Greenspaces for People. (3 cr. \$FR 5501. Prereq—[1101, 3501, Ent 4251, PLPA 3003, [UF major or minor]] or #) Management concepts for green infrastructure of cities, towns, and communities. Urban forest as a social/biological resource. Emphasizes management of urban forest ecosystem to maximize benefits to people. Tree selection, risk assessment, cost-benefit analysis, landscape planning, values, perceptions. How urban forestry can be a tool to improve community infrastructure.

FR 4801H. Honors Research. (2 cr; A-F only. Prereq—FR upper division honors, #) First semester of independent research project supervised by faculty member.

FR 4802H. Honors Research. (2 cr; A-F only. Prereq—FR upper division honors, #) Honors thesis. Oral report.

FR 5104. Forest Ecology. (4 cr; A-F only. \$FR 3104. Prereq—[BIOL 1001 or 1009], grad student] or #; 1 semester college chemistry recommended) Form/function of forests as ecological systems. Characteristics/dynamics of species, populations, communities, landscapes, and ecosystem processes. Examples applying ecology to forest management. Weekly discussions on research topics, exercises, current issues in forest resource management. Required weekend field trip.

FR 5114. Hydrology and Watershed Management. (3 cr. \$FR 3114. Prereq—Grad student or #) Introduction to hydrologic cycle and water processes in upland/riparian systems. Applications of hydrological concepts to evaluate impacts of forest management and other land use patterns/activities on water yield, stormflow, erosion, sedimentation, and water quality. Concepts, principles, and applications of riparian/watershed management. Economic/social factors. National/global examples. Emphasizes forest ecosystems.

FR 5118. Trees: Structure and Function. (3 cr; A-F only. \$FR 4118. Prereq—Grad student or #) Plant-water relations. Relations of biology to ecology and management. How physiological factors affect ecological processes and management decisions.

FR 5131. Geographical Information Systems (GIS) for Natural Resources. (4 cr; A-F only. \$FR 3131. Prereq—Grad student or #) Introduction to GIS. Focuses on natural resources. Data structures, sources, collection, and quality. Lab exercises introduce geodesy, map projections, spatial analyses, and cartographic modeling.

FR 5142. Tropical Forest Ecology. (3 cr. Prereq—3xxx ecology course) Ecological principles related to form, function, and development of wet/dry tropical forests at organismal, community, and ecosystem scales. Ecophysiology, succession, productivity, biodiversity, sustainability, agroforestry, social forestry, and management alternatives. Natural distribution of forest types. Causes, consequences, and extent of deforestation.

FR 5146. Science and Policy of Global Environmental Change. (3 cr [max 4 cr]. \$EEB 5146. Prereq—3104 or BIOL 3407 or equiv) Intro to critical issues underpinning global change and its biological implications. Current scientific literature on evidence for global change and potential effects on a wide range of biological processes. Economic/political impact on global change.

This is FR to LAT of the Course Description section of the
2006-2008 Undergraduate Catalog for the
University of Minnesota, Twin Cities campus.

Course Descriptions

FR 5153. Forest and Wetland Hydrology. (3 cr. Prereq—[Basic hydrology course, [upper div or grad student]] or #)
Current topics, methods/models in forest/wetland hydrology. Hydrologic role of forests, wetlands, riparian systems in snowfall/rainfall regimes. How activities such as deforestation, wetland drainage, and stream channel alterations, affect hydrologic response of watersheds. Runoff/streamflow response from undisturbed/altere forest/wetland watersheds. Problem-solving exercises.

FR 5161. Northern Forest Field Course. (2 cr; A-F only. Prereq—#)
Field identification of common trees, shrubs, and nonwoody vascular plants. Plant communities, soil site relationships, wildlife values. Natural history of northern/boreal forests in terms of soils, ecological characteristics of trees, community-environment relationships, stand development, succession, and regeneration ecology. Land survey, tree/forest stand measurement, forest sampling techniques. Taught at Cloquet Forestry Center.

FR 5203. Forest Fire and Disturbance Ecology. (3 cr; A-F only. \$FR 3203. Prereq—[Grad student or #], course fee)
Ecology, history, management, and control of fire, wind, insect infestation, browsing, and other disturbances in forests. Disturbance regimes of boreal, northern hardwood, and other major forest types of North America. Influence of disturbance on wildlife habitat, urban/wildland interfaces, forest management, and stand/landscape dynamics. Guest speakers on fire organization, training, and operations. Two-day field trip.

FR 5204. Landscape Ecology and Management. (3 cr; A-F only. \$FR 3204. Prereq—Grad student or #)
Introduction to landscape ecology at different scales in time/space. Development/implications of broad-scale patterns of ecological phenomena, role of disturbance in ecosystems. Characteristic spatial/temporal scales of ecological events. Principles of landscape ecology as framework for landscape research, analysis, conservation, and management.

FR 5205. Productivity and Ecology of Forest Soils. (3 cr. \$FR 3205. Prereq—Forest ecology, silviculture)
Soil-site factors affecting plant/wildlife communities. Site quality estimation, site modification/enhancement. Effects of forest management and other human-related disturbances on forest site quality.

FR 5218. Measuring and Modeling Forests. (3 cr; A-F only. \$FR 3218. Prereq—Grad student or #)
General sampling design and survey techniques to assess current resource conditions. Application of metrics/sampling methods to forest vegetation. Calculation of tree/stand volume, selection of modeling approaches. Case studies of modeling to project future growth. Landscape processes, characterization, and modeling.

FR 5228. Advanced Assessment and Modeling. (3 cr; A-F only. Prereq—3218, MATH 1272, STAT 5021)
Application of recently developed mathematics, computer science, and statistics methodologies to natural resource functioning, management, and use problems. Specific topics, software, and methodologies vary.

FR 5262. Remote Sensing of Natural Resources and Environment. (4 cr. \$FR 3262. Prereq—Grad student or #)
Principles/techniques of remote sensing. Mapping/monitoring land/water resources from local to global scales. Forest and natural resource inventory. Forest cover and soil mapping. Landuse/global change analysis. Lab provides hands-on experience working with aerial photography and digital sensing imagery.

FR 5264. Advanced Forest Management Planning. (3 cr. Prereq—3471 or #)
Applied models for forest planning to integrate forest resource conditions/uses. Stand-level management. Forest-wide/landscape-level planning. Regional timber supply analysis. Optimization models and heuristic techniques as tools. Integrating sustainable timber production with desirable future conditions and spatial structure for biodiversity. Problems, case studies involving recent large-scale applications.

FR 5411. Managing Forest Ecosystems: Silviculture. (3 cr. \$FR 3411. Prereq—Grad student or #)
Management of forest ecosystems for sustaining ecological integrity, soil productivity, water quality, wildlife habitat, biological diversity, commodity production in landscape context. Silvics, forest dynamics, disturbances, regeneration, restoration, silvicultural systems. Ramifications of management choices. Weekend field trip.

FR 5412. Digital Remote Sensing. (3 cr. Prereq—3262 or grad student or #)
Physical basis and practical applications of digital remote sensing. Energy-matter interactions. Measurements and sensors. Digital image processing/analysis. Experience working with remote sensing data, image processing, and models.

FR 5413. Managing Forest Ecosystems: Silviculture Lab. (1 cr. Prereq—FR [major or minor] or grad student)
Development of silvicultural prescriptions to achieve various landowner objectives. Timber cruise, growth/yield simulations, stand density management diagrams, thinning schedules, use of forest vegetation simulator. Field trips, computer labs, lectures.

FR 5431. Timber Harvesting and Road Planning. (2 cr. \$FR 3431. Prereq—Grad student or #)
Forest operations. Terminology, engineering, equipment/harvesting system options, productivity/costs. Relationship to forest management and silviculture. Road planning, forest management guidelines. Mitigating potential impacts to soil/water resources. Environmental implications of method/equipment choices. Selling timber. Sale design, layout, and administration. Two all-day field trips.

FR 5471. Forest Planning and Management. (3 cr; A-F only. \$FR 3471. Prereq—Grad student or #)
Processes/techniques for scheduling forest management. Goals of landowners, industry, government, and society. Issues/policies/regulations that influence management. Predicting outcomes, financial analysis, regulation, mathematical models, linear programming, economic analysis. Landscape-level management, historical range of variability, wildlife management, carbon sequestration, resource monitoring, certification, adaptive management.

FR 5480. Topics in Natural Resources. (1-3 cr [max 3 cr]. \$FR 3480. Prereq—#)
Lectures in special fields of natural resources given by visiting scholar or regular staff member. Topics specified in *Class Schedule*.

FR 5501. Urban Forest Management: Managing Greenspaces for People. (3 cr. \$FR 4501. Prereq—Grad student or #)
Management concepts for green infrastructure of cities, towns, and communities. Urban forest as social/biological resource. Emphasizes management of urban forest ecosystem to maximize benefits. Tree selection, risk assessment, cost-benefit analysis, landscape planning, values, perceptions. How urban forestry can be a tool to improve community infrastructure.

FR 5611. Field Silviculture. (2 cr. Prereq—3104, 3411, 3612)
Collection of field data to prepare/write silvicultural prescriptions for regeneration, thinning, and harvesting in context of landscape, watershed, and wildlife habitat issues. Field exercises in forest entomology, pathology, tree improvement, and non-timber forest products. Tree planting. Marking stands for harvest. Taught at Cloquet Forestry Center. Field trips to forests managed by state/industry.

FR 5612. Silviculture and Timber Harvesting Practices in Minnesota. (1 cr. \$FR 3612. Prereq—Forest ecology, managing forest ecosystems: silviculture)
Silviculture practices as driven by landowner objectives. Compares/contrasts silvicultural practices employed by county, state, federal, and industrial foresters in Minnesota.

FR 5615. Field Remote Sensing and Resource Survey. (2 cr; A-F only. Prereq—3218, 3262)
Field applications of remote sensing, sampling/measurement methods to inventory/mapping of forest and other natural resources. Offered at Cloquet Forestry Center.

FR 5621. Field Timber Harvesting and Road Planning. (2 cr. Prereq—[3411, 3431, 3612] or #)
Design, layout, and administration of timber sales. Forest road planning and design. Protecting residual trees during harvesting operations. Dealing with protesters. Field trips and on-site evaluations of timber harvesting systems. Timber appraisal, forest management guidelines. Road location and profiling. Planning/layout considerations. Taught at Cloquet Forestry Center.

FR 5700. Colloquium in Natural Resources. (1-3 cr [max 3 cr]. Prereq—#)
Colloquium in specialized topics in natural resources.

French (FREN)

Department of French and Italian

College of Liberal Arts

FREN 1. Reading French in the Arts and Sciences. (0 cr)
Basic reading knowledge of French language; intensive reading and translation of texts from a wide variety of disciplines. Students successfully completing the course obtain Language Certification in French which satisfies a Graduate School requirement.

FREN 100. Reading French in the Arts and Sciences. (0 cr)
Basic reading knowledge of French language. Intensive reading/translation of texts from a wide variety of disciplines. Students successfully completing the course obtain language certification in French.

FREN 1001. Beginning French. (5 cr)
Basic listening, speaking, reading, and writing skills. Emphasis on communicative competence. Some cultural readings.

FREN 1002. Beginning French. (5 cr. Prereq—1001 or equiv)
Basic listening, speaking, reading, and writing skills. Emphasis on communicative competence. Some cultural readings.

FREN 1003. Intermediate French. (5 cr. Prereq—1002 or Entrance Proficiency Test)
Development of listening, writing, and speaking skills in the context of cultural themes related to the Francophone world. Grammar review and elaboration.

FREN 1004. Intermediate French. (5 cr. Prereq—1003 or Entrance Proficiency Test)
Development of listening, reading, writing, and speaking skills in the context of cultural themes related to the Francophone world. Grammar review and elaboration.

FREN 1022. Accelerated Beginning French. (5 cr. Prereq—2 or more yrs high school French)
For students who have studied French in high school or at community colleges and who do not place high enough on placement exam to enter 1003. An accelerated review of Fren 1001 followed by the material covered in Fren 1002.

FREN 1904. The Poetry of Vision: Dante's "Purgatory" and Trecento Painting. (3 cr; A-F only. Prereq—Freshman)
Examples of art of Dante's time, including especially painting, but also architecture and manuscript illumination, from major Italian/French sources known to Dante.

FREN 1905. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

FREN 1909W. Remembering to Forget: Holocaust and Its Afterlife. (3 cr; A-F only. §JWST 1909W. Prereq—Freshman)
The urge to study Holocaust as singular event is studied through testimonies, artistic endeavors, popular culture, and theory. Drawbacks of a hyper-memory bordering on amnesia.

FREN 1910W. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

FREN 3010. French Expression. (3-6 cr [max 6 cr])
Intensive work in oral/written communication.

FREN 3014. French Phonetics. (2 cr. Prereq—1004)
Articulatory description of the sounds of French, phonetic transcription, and remedial practice to improve pronunciation.

FREN 3015. Advanced French Grammar and Communication. (4 cr. Prereq—1004 or equiv or #)
Advanced study of French with particular emphasis on grammar review, vocabulary building, oral communication skills, and language usage in cultural contexts.

FREN 3016. Advanced French Composition and Communication. (4 cr. Prereq—3015 or equiv or #)
Advanced study of grammar in context; emphasis on writing for varied communicative purposes, reading for style and content, translation.

FREN 3018. French Oral Communication. (3 cr. Prereq—3014, 3015)
Intensive work in oral expression, listening comprehension. Incorporates wide variety of cultural topics.

FREN 3019. French Diction and Speaking. (2 cr. Prereq—3014)
The relationship between the written and the spoken word in French. Learn to read prose and poetry aloud from a text using appropriate French pronunciation, etc. Leads to play readings and possible performance.

FREN 3022. The Language and Culture of Business in France. (3 cr. Prereq—3015; completion of 3016 recommended)
Examines French business language as well as business practices and culture in France. Includes cross-cultural analysis.

FREN 3101W. Introduction to French Literature. (4 cr. Prereq—3015 or equiv)
Close critical analysis of poetry, prose fiction, and plays. Introduction to literature and methods of literary analysis.

FREN 3111. Medieval Stories. (3 cr. Prereq—3101)
Reading/discussion of major forms of medieval tale (comic, bawdy, moralizing, fantasy, historical) in modern French translation. Explores their relationship to development of French culture, especially urbanization, class relations, marriage, role of Church.

FREN 3140. Topics in Medieval and Renaissance Literature. (3 cr [max 9 cr]. Prereq—3101)
Different aspects of French literature/culture of medieval/Renaissance periods (11th-16th century). Content varies depending on instructor. Literary, historical, or social problem. Period, author, genre, or topic of interest. Readings may be literary, critical, cultural, historical, political, etc. Specific content posted in department and in Course Guide.

FREN 3170. The Unruly Subject(s) of Classicism: Writing, History, Power in Ancien Régime France. (3 cr [max 9 cr]. Prereq—3101 or equiv)
The formation of subjectivity in the literature and culture of 17th- and 18th-century France. Aesthetics of classicism, consolidation of state power, and representations of the individual in theater, novel, and prose.

FREN 3172. The Court Society: Literature, Culture, Spectacle. (3 cr. Prereq—3101)
Examines the court and salon society in 17th-century France. The production of taste, sociability, and national identity is considered in literature, painting, architecture, and the plastic arts.

FREN 3181. Mapping Enlightenment in 17th- and 18th-Century French Prose. (3 cr. Prereq—3101)
The themes, values, and critical strategies of the social and intellectual movement designated by the term Enlightenment. The legacy of the Enlightenment project will also be evaluated.

FREN 3240. Topics in Ancien Regime Literature. (3 cr [max 9 cr]. Prereq—3101)
Different aspects of French literature/culture from early modern period (17th/18th centuries). Content varies depending on instructor. Literary, historical, or social problem. Period, author, genre or topic of interest. Readings may be literary, critical, cultural, historical, political, etc. Specific content posted in department and in *Course Guide*.

FREN 3250. French Poetry. (3 cr [max 9 cr]. Prereq—3101)
The historical, political, and social contexts of the evolution of French poetry from its origins to the modern era. While studying primarily lyric poetry, epic and dramatic poetry may also be considered when appropriate.

FREN 3260. Dramas of Culture: 20th-Century French and Francophone Theater. (3 cr [max 9 cr]. §TH 3261. Prereq—3101)
Key movements, dramatists, and contexts of 20th-century French and Francophone theater. Areas of study include naturalist and symbolist legacies as well as existentialist, avant-garde, and contemporary performance and drama.

FREN 3310. Literature of Revolution and Upheaval. (3 cr [max 9 cr]. Prereq—3101)
A study of revolutionary movements in France seen through novels placed in historical context. Content may vary, but course will deal with radical historical, cultural and literary changes in France primarily in the modern period.

FREN 3321. Producing the Bourgeois Subject: The Sense of Self in 18th-Century French Literature. (3 cr. Prereq—3101)
Examines the role of 18th-century literature in shaping the notion of self and social identity. Attention is given to the novel and its relation to new reading practices and publics.

FREN 3330. Literature and the Making of Modern France: 20th-Century Perspectives. (3 cr [max 9 cr]. Prereq—3101)
Developments of literary culture of 20th-century France in the context of historical events and social transformations.

FREN 3340. Topics in Modern French Literature. (3 cr [max 9 cr])
Different aspects of modern French literature/culture, defining modern period as that of post-Revolution France. Content varies depending on instructor. Literary, historical, or social problem. Period, author, genre, or topic of interest. Readings may be literary, critical, cultural, historical, political, etc. Specific content posted in department and in Course Guide.

FREN 3350. Topics in Literature. (3 cr [max 9 cr]. Prereq—3101)
Focuses on a problem, period, author, or topic of interest. Specific content posted in department and listed in Course Guide.

FREN 3360. Coming of Age. (3 cr [max 9 cr]. Prereq—3101)
A study of the literature of education and of the process of youth coming to terms with society. Readings will vary and will be drawn from a number of time periods.

FREN 3371. Writing Crisis in (Post) Modern Times. (3 cr. Prereq—3101)
Examines the meaning and purpose of the notion of crisis in French novels. How crises, be they personal, social or political, prompt writers to create new modes of (dis)connecting with other persons, institutions, and society.

FREN 3380. Modern Times: Literature of the 19th and 20th Centuries. (3 cr [max 9 cr]. Prereq—3101)
Various emphasizing the two centuries. Sample topics include: esthetic currents (Realism and the novel); cultural considerations (gendered representations); philosophical concerns (the relation of individuals to the social body in civil society).

FREN 3410. Quebecois Literature. (3 cr [max 9 cr]. Prereq—3101)
Study writing produced in Quebec as a literature of its own, not simply as a part of Canadian literature. Literature will be studied in relation to other North American literatures and to Francophone literature produced elsewhere in the world.

FREN 3479. Francophone Writers of the African Diaspora. (3 cr. Prereq—3101)
Literature from Francophone North Africa, Africa, the Caribbean of the colonial and/or post-colonial eras, examined in its historical, cultural, or ideological contexts. Reading selections may include texts by immigrant or exiled writers in France.

FREN 3501. Structure of French: Phonology. (3 cr. §FREN 5501. Prereq—3014, 3015, LING 3001 or #)
Advanced study of the sound system of contemporary French.

FREN 3502. Structure of French: Morphology and Syntax. (3 cr. §FREN 5502. Prereq—3501, LING 3001 or #)
Linguistic study of contemporary French word forms (inflectional and derivational morphology); introduction to French syntax (linguistic study of grammar) and characteristic syntactic constructions.

FREN 3521. History of the French Language. (3 cr. Prereq—3015; LING 3001 recommended)
Origins and development of the French language from Latin to contemporary French. Selected texts. Present stage and development.

FREN 3531. Sociolinguistics of French. (3 cr. §FREN 5531. Prereq—3015, LING 3001 or #)
Explores variation in the use of French associated with factors such as medium (oral/written), style (formal/informal), region, social and economic groups.

FREN 3541. Oral Discourse of French. (3 cr. Prereq—3015; LING 3001 recommended)
Nature of contemporary spoken French discourse. Focuses on spontaneous, multi-speaker discourse. Readings include examples of various linguistic approaches to such discourse. Emphasizes syntactic analysis. Phonological/lexical particularities. ‘Macro’ level analyses such as discourse analysis and conversation analysis.

FREN 3601. French Civilization and Culture I. (3 cr. Prereq—3015)
Roman occupation of Gaul to 1715.

FREN 3602. French Civilization and Culture II. (3 cr. Prereq—3015)
1705 to present.

FREN 3650. Topics in French/Francophone Cultures. (3 cr [max 9 cr]. Prereq—3015)
Focus on aspects of French and/or francophone cultures in various historical, social, political, and geographical contexts.

FREN 3705. Atlantic Crossings: The French View Americans (and Vice Versa). (3 cr. Prereq—Not for majors)
French perspectives on the United States and American perspectives on France in “travel” literature and film examined in their historical, political, and cultural contexts. Taught in English. Knowledge of French helpful but not necessary.

FREN 3706. Quebec: Literature and Film in Translation. (3 cr. Prereq—Not for majors)
A survey of Quebec literature and film in English or with subtitles. Particular attention paid to cultural tensions as well as to the impact of women writers and filmmakers on each genre.

FREN 3710W. Reading *Libertinage: Dangerous Lessons in Translation*. (3 cr [max 9 cr]. Prereq—Non [major or minor] in French or [(French [major or minor], #]; students [majoring or minoring] in French arrange work in French [reading, writing] with instructor)

Libertinage and the libertine in French literature of 17th/18th centuries. Literary forms as ways to produce/question desire. Taught in English. All readings in English.

FREN 3733. *The Idea of Paris*. (3 cr)

Ranges across literature, painting, photography, film, and architecture. Meanings that the idea of Paris acquired in modern French cultural imagination. Paris read critically as protean metaphor, myth, or allegory of urban modernity. Views of Paris as defining American cultural imagination. Taught in English.

FREN 3750. Topics in French or Francophone Literature and Culture. (3 cr [max 9 cr]. Prereq—Non-French major; knowledge of French helpful)

Theme, problem, period, or topic of interest in French or Francophone literature or culture. See *Class Schedule*. Taught in English.

FREN 3995. Directed Teaching. (1-5 cr [max 25 cr]; S-N only. Prereq—Δ)

Directed teaching.

FREN 4001. Beginning French. (2 cr. Prereq—Grad student)

Meets concurrently with 1001. See 1001 for course description.

FREN 4002. Beginning French. (2 cr. Prereq—Grad student)

Meets concurrently with 1002. See Fren for course description.

FREN 4003. Intermediate French. (2 cr. Prereq—Grad student)

Meets concurrently with 1003. See 1003 for course description.

FREN 4004. Intermediate French. (2 cr. Prereq—Grad student)

Meets concurrently with 1004. See 1004 for course description.

FREN 4101V. Honors: Seminar in French Studies. (3 cr.

Prereq—Completion of all pre-elective requirements for major or permission of DUS)

Reading/discussion of contemporary issues in French studies, workshop on senior projects.

FREN 4101W. Seminar in French Studies. (3 cr.

Prereq—Completion of all pre-elective requirements for major or permission of DUS)

Reading and discussion of contemporary issues in French studies and workshop on senior projects.

FREN 4510. Topics in French Linguistics. (3 cr [max 9 cr]. Prereq—#)

Topics selected from French syntax, pragmatics, discourse analysis, or sociolinguistics.

FREN 4970. Directed Readings. (1-4 cr [max 9 cr]. Prereq—#)

Designed to meet unique requirements agreed upon by a faculty member and a student. Individual contracts are drawn up listing contact hours, number of credits, written and other work required. Each contract will vary.

FREN 5250. *Promenades Poétiques: The Subject in Motion*. (3 cr [max 9 cr]. Prereq—3111 or above)

The search for the subject in poetry and poetic prose as revealed through the motif of the “promenade” and experimentation with literary forms.

FREN 5260. *The Returns of Tragedy*. (3 cr [max 9 cr]. Prereq—3111 or above)

Tragedy as dramatic form in relation to social order, myth and history, and theatre.

FREN 5270. “To Change or not to Change?”: Speculations on (Post) Modern French Texts. (3 cr [max 9 cr]. Prereq—3111)

The meaning and purpose of the notion of “change” in French novels. Explore how a multiplicity of causes produces major changes in an individual’s personal and public life. The notion of change as it relates to financial and intellectual speculation.

FREN 5301. *Critical Issues in French Studies*. (3 cr.

Prereq—Grad or #)

Introduces the methods of interpretation and critical debates that have shaped and continue to define the discipline of French studies. Provides a practical introduction to graduate-level literary research.

FREN 5350. Topics in Literature and Culture. (3 cr [max 12 cr]. Prereq—3101 or equiv)

Problem, period, author, or topic of interest. See *Class Schedule*.

FREN 5470. *Post/Colonial Francophone Literatures*. (3 cr [max 9 cr]. Prereq—3111 or above)

Francophone literature from North Africa, Africa, and the Caribbean of the colonial and/or post-colonial eras in the light of relevant literary and cultural theories.

FREN 5501. *Structure of French: Phonology*. (3 cr. \$FREN 3501. Prereq—[LING 3001 or LING 5001], grad student)

Advanced study of sound system of contemporary French.

FREN 5502. *Structure of French: Morphology and Syntax*. (3 cr. \$FREN 3502. Prereq—5501 or #)

Linguistic study of contemporary French word forms (inflectional and derivational morphology); introduction to French syntax (linguistic study of grammar) and characteristic syntactic constructions.

FREN 5531. *Sociolinguistics of French*. (3 cr. \$FREN 3531. Prereq—\$: 3531; LING 3001 or 5001, grad)

Explores variation in the use of French associated with factors such as medium (oral/written), style (formal/informal), region, social and economic groups.

FREN 5541. *Oral Discourse of French*. (3 cr. Prereq—3015, grad student; LING 5001 recommended)

Nature of contemporary spoken French discourse. Focuses on spontaneous, multi-speaker discourse. Readings include examples of various linguistic approaches to such discourse. Emphasizes syntactic analysis. Phonological/lexical particularities. ‘Macro’ level analyses such as discourse analysis and conversation analysis.

FREN 5995. Directed Teaching. (1-6 cr [max 24 cr]; S-N only. Prereq—#)

Directed teaching.

French and Italian (FRIT)

Department of French and Italian

College of Liberal Arts

FRIT 3802. *Cinema and Realism*. (3 cr)

Examines French poetic realism, relating it to two other periods of realist film, Italian Neorealism and American film noir. Taught in English. Knowledge of French helpful but not necessary.

FRIT 3803. *New Wave Cinemas: Love, Alienation and Landscape in Post-War Italian and French Film*. (3 cr)

Modernist Italian and New Wave French cinema after WWII, focusing on film syntax, constructions of gender, and the individual’s relationship to the modern urban and rural landscape. Taught in English. Knowledge of Italian and French helpful but not necessary.

FRIT 3804. *Cinema and Culture: The City of Paris*. (3 cr)

How French cinema, from the silent era to the present, reflects and constructs the pleasures and anxieties of urbanization, new modes of entertainment, and new cultural roles for men and women. Taught in English. Knowledge of Italian and French helpful but not necessary.

FRIT 3850. Topics in French and Italian Cinema. (3 cr [max 9 cr]. Prereq—Knowledge of [French or Italian] helpful but not required)

Theme, problem, period, filmmaker, or topic of interest in French/Italian cinema. See *Class Schedule*. Taught in English.

FRIT 5257. *Passionate Beings: Literary and Medical Problematics in Italy and France from 1800 to the Present*. (4 cr)

Literary and medical representations of the passions in France and in Italy from 1800 to the present. Texts range from theatrical works to medical treatises on the passions as ways for exploring notions of subjectivity, responsibility, order. Taught in English.

FRIT 5850. Topics in French and Italian Cinema. (3 cr.

Prereq—Knowledge of [French or Italian] helpful but not required)

Focuses on a theme, problem, period, filmmaker, or other topic of interest in French or Italian cinema. See *Class Schedule*. Taught in English.

FRIT 5999. *Teaching of French and Italian: Theory and Practice*. (3 cr)

Theoretical and practical aspects of language learning and teaching applied to French and Italian. Includes history of foreign language teaching in 20th-century United States. Taught in English.

Gay, Lesbian, Bisexual, and Transgender Studies (GLBT)

College of Liberal Arts-Adm

GLBT 1001. *Introduction to GLBT Studies*. (3 cr)

History of contemporary GLBT-identified communities. Terms of theoretical debates regarding sexual orientation, identity, and experience. Analyzes problems produced and insights gained by incorporating GLBT issues into specific academic, social, cultural, and political discourses.

GLBT 3301. *Gay, Lesbian, Bisexual, and Transgender Social Movements in the United States*. (3 cr. \$SW 3301.

Prereq—[1001 or SOC 1xxx or WoSt 1001 or WoSt 1002 or SW 2001 or SW 2501] or #)

Interdisciplinary course. Development of GLBT social movements using social movement theory and service learning.

GLBT 3610. Topics in GLBT Studies. (3 cr)

Topics specified in *Class Schedule*.

GLBT 3993. Directed Studies. (1-6 cr [max 6 cr]; A-F only. Prereq—GLBT studies minor, #)

Guided individual study. GLBT topic not available through regular course offerings. Students work with faculty who share their research interests. Number of credits based on scope of project, student needs, and advising instructor’s approval.

Genetics, Cell Biology and Development (GCD)

Department of Genetics, Cell Biology, and Development

College of Biological Sciences

GCD 3022. *Genetics*. (3 cr. \$BIOL 4003. Prereq—BIOL 1002 or 1009; not for biology majors)

Mechanisms of heredity, their implications for biological populations, and applications to practical problems.

GCD 4015. *Genetics Laboratory*. (2 cr. Prereq—3022 or BIOL 4003 or BIOC 4332)

Introduction to experimental techniques used in genetic analyses. Although experiments may vary from semester to semester, genetic experiments with model systems ranging from viruses to plants and animals are performed.

GCD 4025. *Cell Biology Laboratory*. (2 cr. Prereq—BIOL 4004 or #)

Experimental approaches to cell structure, function, and replication. Microscopy, autoradiography, cell fractionation, molecular/chemical analyses.

GCD 4034. Molecular Genetics. (3 cr. Prereq—BIOL 4003, BIOL 4004; advanced bioscience undergrad recommended) Molecular genetics of prokaryotes/eukaryotes. Gene regulation, genome analysis. Modern techniques such as recombinant DNA, targeted mutations, genome manipulation, and gene chip technology.

GCD 4111. Histology: Cell and Tissue Organization. (4 cr. Prereq—BIOL 4004 or #)

Structure and function of vertebrate tissues and organs. Lectures combine electron microscopy, light microscopy, physiology, and cell biology of higher animals. Labs concentrate on light microscopy of mammalian tissues.

GCD 4134. Endocrinology. (3 cr. Prereq—BIOL 3211 or Biol/BIOC 3021 or BIOC 4331 or #)

Survey of structure and function of invertebrate and vertebrate endocrine systems.

GCD 4143. Human Genetics. (3 cr. Prereq—3022 or BIOL 4003 or #)

Principles of human genetics at the molecular, cellular, individual, and populations levels. Chromosomal and biochemical disorders; gene mapping; mutation and natural selection; variation in intelligence and behavior; genetic screening, counseling and therapy.

GCD 4151. Molecular Biology of Cancer. (3 cr. Prereq—BIOL 4003)

Regulatory pathways involved in directing normal development of complex eukaryotic organisms, how disruptions of these pathways can lead to abnormal cell growth/cancer. Causes, detection, treatment, prevention of cancer.

GCD 4161. Developmental Biology. (3 cr [max 4 cr]. Prereq—BIOL 4003, BIOL 4004)

Mechanisms that govern development from gametogenesis through fertilization. Embryogenesis/postembryonic development. Mechanisms of morphogenesis/differentiation. Classical/molecular approaches in various model organisms. Genetic models such as bacteriophage, yeast, *Drosophila*, *C. elegans*, *Arabidopsis*, zebrafish, and the mouse.

GCD 4793W. Directed Studies: Writing Intensive. (1-7 cr [max 7 cr]; S-N only. Prereq—#, Δ)

Individual study on selected topics or problems. Emphasizes selected readings, use of scientific literature. Written report.

GCD 4794W. Directed Research: Writing Intensive. (1-6 cr [max 42 cr]; S-N only. Prereq—#, Δ)

Laboratory or field investigation of selected areas of research including written report.

GCD 4993. Directed Studies. (1-7 cr [max 7 cr]; S-N only. Prereq—#, Δ)

Individual study on selected topics or problems. Emphasizes selected readings and use of scientific literature.

GCD 4994. Directed Research. (1-6 cr [max 42 cr]; S-N only. Prereq—#, Δ)

Laboratory or field investigation of selected areas of research.

GCD 5036. Molecular Cell Biology. (3 cr. Prereq—BIOL 4004 or #; [sr or grad student] recommended)

Modern, integrative approaches combining cell/molecular biology, biochemistry, and genetics to investigate cell organization/function. Membranes, signaling, extracellular matrix, secretion, endocytosis, cytoskeleton, nucleus. Analysis of scientific papers to illustrate new concepts in and experimental approaches to cell organization/function.

Geographic Information Science (GIS)

Department of Geography

College of Liberal Arts

GIS 5555. Basic Spatial Analysis. (3 cr. Prereq—[STAT 3001 or equiv, MGIS student] or #)

Analyses of data with spatial (locational) information. Exploratory data analysis. Descriptive statistics of point data. Descriptive statistics for line data. Descriptive statistics for polygon data. Spatial autocorrelation. Inferential statistical analysis of point data/polygons. Descriptive analysis of patches/landscapes. Spatial pattern recognition using empirical orthogonal functions and cluster analysis. Regression methods for spatially autocorrelated variables.

GIS 5571. Introduction to Arc/Info. (3 cr. Prereq—GEOG 5561 or equiv, status in MGIS program, familiarity with computer operating systems or #)

Introductory overview of the Arc/Info system. Topics include data capture, geometric transformations and map projections, topology, editing systems, database management and map production.

GIS 5572. Advanced Arc/Info. (3 cr. Prereq—5571, GEOG 5561 or equiv, status in MGIS program or #)

Advanced course in Arc/Info providing in-depth exploration of the topics emphasized in GIS 5571 as well as advanced topics including dynamic segmentation, address matching, and macro language programming.

GIS 5573. Desktop Mapping. (1.5 cr. Prereq—GEOG 5561 or equiv, GEOG 3 511 or equiv, status in MGIS program or #)

Introduction to desktop mapping systems such as ArcView, MapInfo and Maptitude. Emphasizes the application of these systems to the display and analysis of geographical data.

GIS 5574. GIS and the Internet. (1.5 cr. Prereq—GEOG 5561 or equiv, status in MGIS program or #)

The role of the Internet in GIS applications. Topics include GIS data sources on the Internet, the role of the Internet in information dissemination, Internet capabilities for interactive mapping and issues surrounding the development of GIS-related Web sites.

GIS 5575. Surveying and the Global Positioning System (GPS). (2 cr. Prereq—GEOG 5561 or equiv, status in MGIS program or #)

Introduction to GPS (Global Positioning System) and other surveying techniques of use to GIS professionals. Topics include geodesy, data adjustment, datums, ellipsoids, coordinate systems, and transformations.

GIS 5577. Spatial Data Administration. (3 cr. Prereq—#)

Theory/application for administration of geographic databases. Quality assurance, development planning/management, maintenance, access/distribution, documentation.

GIS 5578. GIS Programming. (2 cr. Prereq—MGIS student or #)

Opportunities/flexibility that computer programming offers to application of GIS technologies. Object-oriented programming techniques using Microsoft's Visual Basic programming language. Students apply GIS principles/concepts within Visual Basic programs using ESRI's MapObjects.

GIS 5590. Special Topics in GIS. (1-3 cr [max 6 cr]; A-F only. Prereq—#)

Special topics in geographic information science (GIS). Topics vary according to student needs, technological developments in field.

Geography (GEOG)

Department of Geography

College of Liberal Arts

GEOG 1301V. Honors: Introduction to Human Geography. (4 cr. Prereq—Honors)

Geography of population, principal ways of life. Capacity of earth for future population.

GEOG 1301W. Introduction to Human Geography. (4 cr)

Geography of population and principal ways of life; capacity of earth for future population.

GEOG 1372. Geography of Global Cities. (3 cr. §GLOS 1672)

Urban forms/processes. Uses key global cities as examples. Political, historical, and economic contexts of cities. Planning ideologies. Globalization. Race/segmentation. Population growth. Environmental problems. Current issues in global urbanization.

GEOG 1403. Biogeography of the Global Garden. (4 cr)

The geography of biodiversity and productivity, from conspicuous species to those that cause human disease and economic hardship. The roles played by evolution and extinction, fluxes of energy, water, biochemicals, and dispersal. Experiments demonstrating interactions of managed and unmanaged biotic with the hydrologic cycle, energy budgets, nutrient cycles, the carbon budget, and soil processes.

GEOG 1403H. Honors: Biogeography of the Global Garden. (4 cr. Prereq—Honors)

The geography of biodiversity and productivity, from conspicuous species to those that cause human disease and economic hardship. The roles played by evolution and extinction, fluxes of energy, water, biochemicals, and dispersal. Experiments demonstrating interactions of managed and unmanaged biotic with the hydrologic cycle, energy budgets, nutrient cycles, the carbon budget, and soil processes.

GEOG 1425. Introduction to Meteorology. (4 cr. §ESPM 1425)

Nature of atmosphere, its behavior. Atmospheric composition, structure, stability, motion. Precipitation processes, air masses, fronts, cyclones, anticyclones. General weather patterns. Meteorological instruments/observation. Weather map analysis. Weather forecasting.

GEOG 1502. Maps, Visualization and Geographical Reasoning. (4 cr)

Fundamental issues related to the acquisition, storage, manipulation, analysis, display and interpretation of spatially-referenced data. Emphasis on mathematical analysis of these data and interpretation of cultural and physical patterns critical to the development of geographical reasoning.

GEOG 1904. Freshman Seminar. (3 cr. Prereq—Freshman)

Topics specified in *Course Guide*.

GEOG 1905. Freshman Seminar. (3 cr. Prereq—Freshman)

Topic specified in *Course Guide*.

GEOG 1906W. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

GEOG 1910W. Freshman Seminar. (3 cr; A-F only. Prereq—Fr)

Topics specified in *Class Schedule*.

GEOG 1973. Geography of the Twin Cities. (3 cr. §GEOG 3973)

Social and physical characteristics of the Twin Cities. Their place in the urban network of the United States.

GEOG 3101. Geography of the United States and Canada. (4 cr. §GEOG 3 102)

Analysis of the ways in which the aspirations and abilities of diverse groups of people interact with the complexities of the natural environment to produce the contemporary pluralistic cultures and regional differentiation of the United States and Canada.

GEOG 3111. Geography of Minnesota. (3 cr)

The evolution of Minnesota and its current geographical characteristics. The state is a unique political entity that possesses similarities with other states because of the homogenizing influence of the federal government.

GEOG 3141. Africa. (3 cr. §AFRO 3141)

Regional differentiation of human groups and environments; culture contact and problems of underdeveloped countries south of the Sahara.

GEOG 3145. The Islamic World. (3 cr. §GLOS 3645)

Foundation of Islam in Arabian Peninsula, its spread to Asia and Africa. Islamic civilization, influence on Europe before rise of capitalism. Rise of Capitalist Europe, colonization of Islamic World Islamic resurgence and post-colonial world. State-society and development. Culture/conflict in Moslem societies. Gender and Islam. Islamic World and the West. Moslems in North America and Europe. Case studies.

GEOG 3158. Southern Africa: Apartheid and Beyond. (3 cr; A-F only. Prereq–Soph or jr or sr)

Historical geography. Clash of economic/cultural systems. Colonization, destruction of traditional political economy, settlement, dispossession. Capitalist agriculture, racist economy. Mining, consolidation of racist political economy. Migration/labor. Resistance to colonialism/apartheid. Independence/development north of Limpopo river. Regional implications of struggle against apartheid. Development in post-apartheid Southern Africa.

GEOG 3161. Europe: A Geographic Perspective. (3 cr. §GLOS 3921)

Comparative analysis and explanation of Europe. s physical, demographic, ethnic/cultural, economic, political, and urban landscapes; European integration - the European Union; transformation of Eastern Europe. German language discussion group in conjunction with the course for 1 extra credit.

GEOG 3181. Russia and Environs. (3 cr. §GEOG 5181)

Physical and human geography of Russia and former Soviet republics. Legacy of central planning on regional economies, city systems and city structure. Economic and cultural links among regions and republics. Conflicts rooted in religion, ethnicity and tradition. Relations with nearby states and regions. Physical environmental problems.

GEOG 3211. East Asia. (3 cr. §EAS 3211, GEOG 3215, GEOG 5211, GEOG 5215)

Physical and human geography of Japan, mainland China and Taiwan, North and South Korea; population pressure, economic and urban development, and international relations.

GEOG 3212. South Asia and Global Processes. (3 cr)

Bio-physical geography, colonial rule, historical geography. Anti-/post-colonial nationalisms. State, modernization, urban/agrarian change. Population, resources, sustainability. Social diversity, geographies of difference. Media, migrations, post-colonial politics. From .development to .globalization.. Domestic/international social movements/conflicts. Democracy, citizenship, and governance in globalized South Asia.

GEOG 3331. Geography of the World Economy. (3 cr)

Geographical distribution of resources affecting development; location of agriculture, industry, services; geography of communications; agglomeration of economic activities, urbanization, regional growth; international trade; changing global development inequalities; impact of globalizing production and finance on the welfare of nations, regions, cities.

GEOG 3355. Environmental Quality. (3 cr)

The quality of the human environment depends on 1) how humans make decisions about how to act, 2) how they act, and 3) how they evaluate both. In the United States, this process is best described as .disjointed incrementalism. in which governments, organizations, and individuals play distinct and important roles.

GEOG 3361W. Land Use, Landscapes, and the Law. (3 cr)

Landscapes are political statements. They reflect how individuals, organizations, and governments have exercised the legal rights that they possess to produce goods and provide services.

GEOG 3371V. Honors: Introduction to Urban Geography. (4 cr. Prereq–Honors)

Character, distribution, development of cities in present-day world. Internal/external locational relationships.

GEOG 3371W. Cities, Citizens, and Communities. (4 cr)

Character, distribution, and development of cities in present-day world. Internal/external locational relationships.

GEOG 3373. Changing Form of the City. (3 cr)

Urban origins, ancient cultures/cities, the medieval city, rediscovery of planning, colonial cities. Industrialization and urban expansion. Speculative cities, utopian cities, planning triumphs/disasters. Cities as reflections of society, culture, the past.

GEOG 3374V. Honors: The City in Film. (4 cr. §GEOG 3374W, GEOG 5374W. Prereq–honors)

Cinematic portrayal of changes in 20th-century cities worldwide. Social/cultural conflict, political/economic processes, changing gender relationships, rural versus urban areas, population/development issues (especially as they affect women/children). Additional weekly meeting discusses films, readings. Project on a topic selected in consultation with instructor.

GEOG 3374W. The City in Film. (4 cr. §GEOG 3374V, GEOG 5374W)

Cinematic portrayal of changes in 20th-century cities worldwide including social and cultural conflict, political and economic processes, changing gender relationships, rural versus urban areas, and population and development issues (especially as they affect women and children).

GEOG 3375. Minority Settlement in America. (3 cr)

Comparative analysis of minorities in American cities, including migration patterns, residential patterns, socioeconomic characteristics, public and private community enterprises, and class in urban structure.

GEOG 3376. Political Ecology of North America. (3 cr)

Social production of nature in North America related to questions of social/environmental justice. Economic, political, cultural, ecological relations that shape specific urban/rural environments, social movements that have arisen in response to environmental change. Importance of culture/identity in struggles over resources/environments.

GEOG 3377. Music in the City: Sounds and Bodies in Different Places. (3 cr; A-F only)

Geographical conceptions of place, space, embodiment, and identity. Case studies of music.

GEOG 3378. Third World Underdevelopment and Modernization. (3 cr)

Processes underlying socioeconomic change in the Third World. Evolving global economy and internal spatial and socioeconomic conditions. Theories of modernization, development, and underdevelopment.

GEOG 3379. Environment and Development in the Third World. (3 cr; A-F only. §GLOS 3303. Prereq–Soph or jr or sr)

Basic concepts for analyzing relations between capitalist development and environment in Third World. Analytical concepts about historical geography of capitalist development, geographically/historically specific case studies, likelihood of social/environmental sustainability.

GEOG 3381W. Population in an Interacting World. (4 cr)

Comparative analysis and explanation of trends in fertility, mortality, internal and international migration in different parts of the world; world population problems; population policies; theories of population growth; impact of population growth on food supply and the environment.

GEOG 3401. Geography of Environmental Systems and Global Change. (4 cr; A-F only. §GEOG 5401)

Geographic patterns, dynamics, and interactions of atmospheric, hydrospheric, geomorphic, pedologic, and biologic systems as context for human population, development, and resource use patterns.

GEOG 3401H. Honors: Geography of Environmental Systems and Global Change. (4 cr; A-F only. Prereq–Honors)

Geographic patterns, dynamics. Interactions of atmospheric, hydrospheric, geomorphic, pedologic, biologic systems as context for human population, development, resource use patterns.

GEOG 3411W. Geography of Health and Health Care. (4 cr. §GEOG 5411)

Application of human ecology, spatial analysis, political economy, and other geographical approaches to analyze problems of health and health care. Topics include distribution and diffusion of disease; impact of environmental, demographic, and social change on health; distribution, accessibility, and utilization of health practitioners and facilities.

GEOG 3431. Plant and Animal Geography. (3 cr. §GEOG 5431)

Introduction to biogeography. Focuses on patterns of plant/animal distributions at different scales over time/space. Evolutionary, ecological, and applied biogeography. Paleobiogeography, vegetation-environment relationships, vegetation dynamics/disturbance ecology, human impact on plants/animals, nature conservation. Discussions, group/individual projects, local field trips.

GEOG 3441. Quaternary Landscape Evolution. (3 cr; A-F only. Prereq–1403 or 3401 or #)

Roles of climate change, geomorphic history, vegetation change, and soil development in evolution of landscape patterns during Quaternary Period. Emphasizes North America.

GEOG 3511. Principles of Cartography. (4 cr. Prereq–3 cr in geog or #)

History and development of U.S. academic cartography, coordinate systems and map projections, data classification and map generalization, methods of thematic symbolization, and cartographic design. A series of computer-based lab exercises will apply conceptual lecture material to the creation of thematic maps.

GEOG 3531. Numerical Spatial Analysis. (4 cr. §GEOG 5531)

Introduction to theoretical and applied aspects of geographical quantitative methods with a focus on spatial analysis. Emphasis placed on the analysis of geographical data for spatial problem solving in both the human and physical areas of the discipline.

GEOG 3561. Principles of Geographic Information Science. (4 cr. Prereq–Jr or sr)

Introduction to study of geographic information systems (GIS) for geography and non-geography students. Topics include GIS application domains, data models and sources, analysis methods and output techniques. Lectures, readings and hands-on experience with GIS software.

GEOG 3561H. Honors: Principles of Geographic Information Science. (4 cr. Prereq–Honors, [jr or sr])

Introduction to study of geographic information systems (GIS). GIS application domains, data models/sources, analysis methods, output techniques. Lectures, readings, hands-on experience with GIS software.

GEOG 3605V. Honors: Geographical Perspectives on Planning. (4 cr. §GEOG 3605W, GEOG 5605V, GEOG 5605W, PA 5203W)

Role of planning in reshaping 19th-/20th-century cities in Europe, North America, selected Third World countries. History of planning. Societal change, interest groups, power relations in planning process. Citizen participation/practice in planning. Meets with 3605W. Includes additional weekly seminar-style meeting, bibliography project on a topic selected in consultation with instructor.

GEOG 3605W. Geographical Perspectives on Planning. (4 cr. §GEOG 3605V, GEOG 5605V, GEOG 5605W, PA 5203W) Role of planning in reshaping 19th- and 20th-century cities in Europe, North America, and selected Third World countries. History of planning. Societal change, interest groups and power relations in the planning process. Citizen participation and practice in planning.

GEOG 3900. Topics in Geography. (3 cr [max 9 cr]) Special topics/regions covered by visiting professors in their research fields.

GEOG 3973. Geography of the Twin Cities. (3 cr. §GEOG 1973) Social/physical characteristics of Twin Cities. Their place in U.S. urban network.

GEOG 3985V. Honors Senior Project Seminar. (4 cr. Prereq-Honors, #) Completion of research/writing of senior project.

GEOG 3985W. Senior Project Seminar. (4 cr. Prereq-Jr or sr, #) Complete the research/writing of senior project.

GEOG 3992. Directed Reading. (1-8 cr [max 12 cr]. Prereq-#, Δ, □) Guided individual reading.

GEOG 3992H. Honors: Directed Reading. (1-8 cr [max 12 cr]. Prereq-Honors, #, □, Δ) Guided individual reading.

GEOG 3993. Directed Studies. (1-8 cr [max 12 cr]. Prereq-#, Δ, □) Guided individual study.

GEOG 3993H. Honors: Directed Studies. (1-8 cr [max 12 cr]. Prereq-Honors, #, Δ, □) Guided individual study.

GEOG 3994. Directed Research. (1-8 cr [max 12 cr]. Prereq-#, Δ, □) Individual guided research.

GEOG 3994H. Honors: Directed Research. (1-8 cr [max 12 cr]. Prereq-Honors, #, Δ, □) Individual guided research.

GEOG 4001. Modes of Geographic Inquiry. (4 cr) Examination of competing approaches to the study of geography. Environmental determinism; regional tradition; scientific revolution; behavioral geography; modeling and quantitative geography; radical geography; interpretive and qualitative approaches; feminist and postmodern geography; ecological thinking and complexity; geographic ethics.

GEOG 4002W. Social Theory and the Environment. (3 cr. Prereq-Jr or sr) How human-nature relations are understood from perspective of social theory. Contemporary debates within human sciences. Interdisciplinary, reading-intensive.

GEOG 4121W. Latin America. (4 cr. §LAS 4121W) Interplay of natural environment and history in shaping contemporary Latin America. Political ecology of natural resources, food supply and distribution, urbanization and the informal economy, migration, ethnicity, and the role of the state and international agencies in domestic economies.

GEOG 4382. Contemporary Immigrant America. (3-5 cr [max 5 cr]) Analysis and explanation of contemporary immigration trends; immigration policies; immigrant rights; immigrant integration and adaptation; ethnic group formation; ethnic identities; ethnic neighborhoods and communities; second generation; immigrant women; ethnic conflict; xenophobic reactions. Community Service Learning component for 2 extra credits.

GEOG 4393. The Rural Landscape. (4 cr) Analysis of the three principal components of the rural landscape (the form of the land surface, the plant life that cloaks it, and the structures that people have placed upon it). Emphasis on structures associated with agriculture including some discussion on mining, forestry, resort areas, and small towns.

GEOG 4700. Community Service Learning. (1-3 cr [max 6 cr]. Prereq-Concurrent enrollment in a Geog course that has community service learning as a component) Community service, readings, written assignments, classactivities that promote reflection/synthesis. Students interrogate what they learn in more traditional geographycourses and confirm/question their understanding of geographic themes and their own role as social actors.

GEOG 5181. Russia and Environs. (3 cr. §GEOG 3181) Physical and human geography of Russia and former Soviet republics. Legacy of central planning on regional economies, city systems and city structure. Economic and cultural links among regions and republics. Conflicts rooted in religion, ethnicity and tradition. Relations with nearby states and regions. Physical environmental problems.

GEOG 5361. Geography and Real Estate. (4 cr) Origins and evolution of land ownership in the United States.

GEOG 5371W. American Cities I: Population and Housing. (4 cr. §PA 5201W. Prereq-Grad or #) Emergence of North American cities; residential building cycles, density patterns; metropolitan housing stocks, supply of housing services; population and household types; neighborhood-level patterns of housing use; housing prices; intraurban migration; housing submarkets inside metro areas; emphasis on linking theory, method, case studies.

GEOG 5372W. American Cities II: Land Use, Transportation, and the Urban Economy. (4 cr. §PA 5202W) Urban economy, its locational requirements. Central place theory. Transportation, urban land use: patterns/conflicts. Industrial/commercial land blight. Real estate redevelopment. Historic preservation. Emphasizes links between land use, transportation policy, economic development, local fiscal issues. U.S.-Canadian contrasts.

GEOG 5374W. The City in Film. (4 cr. §GEOG 3374V, GEOG 3374W. Prereq-Grad student or #) Cinematic portrayal of changes in 20th-century cities worldwide. Social/cultural conflict, political/economic processes, changing gender relationships, rural versus urban areas, population/development issues (especially as they affect women/children). Meets concurrently with 3374. Additional weekly meeting discusses films, readings. Project on a topic selected in consultation with instructor.

GEOG 5377. Music in the City: Sounds and Bodies in Different Places. (3 cr) Geographical conceptions of place, space, embodiment, and identity. Case studies of music.

GEOG 5385. Globalization and Development: Political Economy. (4 cr. Prereq-Sr or grad or #) Nature/scope of modern world system (capitalism), its impact on regional development processes. Roles of state and of international financial institutions.

GEOG 5401. Geography of Environmental Systems and Global Change. (4 cr. §GEOG 3 401. Prereq-Grad student or #) Processes that create/change the spatial patterns of climate, vegetation, and soils. Potential of humans to alter climate, vegetation, and soil processes. Possible impacts of human-altered environmental conditions.

GEOG 5411. Geography of Health and Health Care. (4 cr. §GEOG 3411W) Application of human ecology, spatial analysis, political economy, and other geographical approaches to analyze problems of health and health care. Topics include distribution and diffusion of disease; impact of environmental, demographic, and social change on health; distribution, accessibility, and utilization of health practitioners and facilities.

GEOG 5421. Introduction to Atmospheric Science. (3 cr. §ES 5421. Prereq-Familiarity with fundamentals of physics, calculus, and statistics, including differential and integral calculus and basic differential equations and basic thermodynamics, mechanics, and the electromagnetic spectrum) Calculus-based introduction to atmospheric dynamics, radiation, thermodynamics, chemical composition, and cloud processes. Applications to climate, meteorology, the hydrologic cycle, air quality, and biogeochemical cycles.

GEOG 5423. Climate Models and Modeling. (3 cr. Prereq-3401 or #) Survey of development and research with simple and complex (three-dimensional) climate models. Environmental processes and their numerical representation in climate models; evaluation of model sensitivity and accuracy; coupling between atmosphere, biosphere, hydrosphere, and cryosphere; assessment of model predictions for climate change.

GEOG 5426. Climatic Variations. (3 cr. Prereq-1425 or 3401 or #) Theories of climatic fluctuations and change at decadal to centuries time scales; analysis of temporal and spatial fluctuations especially during the period of instrumental record.

GEOG 5431. Plant and Animal Geography. (3 cr. §GEOG 3431) Introduction to biogeography. Focuses on patterns of plant/animal distributions at different scales over time/space. Evolutionary, ecological, and applied biogeography. Paleobiogeography, vegetation-environment relationships, vegetation dynamics/disturbance ecology, human impact on plants/animals, nature conservation. Discussions, group/individual projects, local field trips.

GEOG 5441. Quaternary Landscape Evolution. (3 cr. Prereq-3401 or grad student or #) Roles of climate change, geomorphic history, vegetation change, and soil development in the evolution of landscape patterns during the Quaternary Period, with emphasis on North America.

GEOG 5511. Advanced Cartography. (3 cr) Topics on data sources for mapping. History of thematic cartography (focused on 19th-century European activity). Multivariate classification/symbolization. Models for cartographic generalization, spatial interpolation, and surface representation. Principles of animated/multimedia cartography.

GEOG 5512. Cartography: Topics. (3 cr. Prereq-3511 or 3531 or #) Selected topics include the system of cartographic communication, map design, map reading, map analysis, history of cartography.

GEOG 5530. Cartography Internship. (2-7 cr [max 10 cr]; S-N only. Prereq-#) Provides intensive hands-on experience in contemporary map production and design, ranging from GIS applications to digital prepress. Strong computer skills essential.

GEOG 5531. Numerical Spatial Analysis. (4 cr. §GEOG 3531) Applied/theoretical aspects of geographical quantitative methods for spatial analysis. Emphasizes analysis of geographical data for spatial problem solving in human/physical areas.

GEOG 5561. Principles of Geographic Information Science. (4 cr. Prereq-Grad) Introduction to the study of geographic information systems (GIS) for geography and non-geography students. Topics include GIS application domains, data models and sources, analysis methods and output techniques. Lectures, reading, and hands-on experience with GIS software.

GEOG 5562. Geographic Information Science and Analytical Cartography. (3 cr. Prereq—3561 or 5561 and 3511, or #)

Topics include algorithms and data structures for digital cartographic data, topological relationships, surface modeling and interpolation, map projections and geometric transformations, numerical generalization, and raster and vector processing. Hands-on experience using a variety of software packages.

GEOG 5563. Advanced Geographic Information Science. (3 cr. Prereq—B or better in 3561 or 5561 or #)

Advanced study of geographic information systems (GIS). Topics include spatial data models, topology, data encoding, data quality, database management, spatial analysis tools and visualization techniques. Hands-on experience using an advanced vector GIS package.

GEOG 5564. Urban Geographic Information Science and Analysis. (3 cr. Prereq—3561 or 5561)

Core concepts in urban geographic information science including sources for urban geographical and attribute data (including census data), urban data structures (focusing on the TIGER data structure), urban spatial analyses (including location-allocation models), geodemographic analysis, network analysis, and the display of urban data.

GEOG 5565. Geographical Analysis of Human-Environment Systems. (3 cr. Prereq—3561 or 5561 or FR 4131 or LA 5573 or one intro GIS course or grad student or #)

Applications of geographic information systems and other spatial analysis tools to analysis of environmental systems patterns, dynamics, and interactions. Focuses on global to landscape databases developed to analyze atmospheric, hydrospheric, geomorphic, pedologic, biologic, and human landuse systems.

GEOG 5588. Multimedia Cartography. (3 cr. Prereq—Minimum of three geog courses including one cartography course or advanced standing in an allied field such as landscape architecture or #)

Conceptualizing geographic topics in animatable form, selecting appropriate animation metaphors for specific ideas, using standard graphic software to prepare images for computer display and animation.

GEOG 5605V. Honors: Geographical Perspectives on Planning. (4 cr. \$GEOG 3605V, GEOG 3605W, GEOG 5605W, PA 5203W)

Role of planning in reshaping 19th-/20th-century cities in Europe, North America, selected Third World countries. History of planning. Societal change, interest groups, power relations in planning process. Citizen participation/practice in planning. Meets with 3605. Includes additional weekly seminar-style meeting, bibliography project on topic selected in consultation with instructor.

GEOG 5605W. Geographical Perspectives on Planning. (4 cr. \$GEOG 3605V, GEOG 3605W, GEOG 5605V, PA 5203W. Prereq—Grad student or #)

Open to graduate students and undergraduates wishing Honors credits. Includes one additional weekly seminar-style meeting and a bibliography project on a topic selected in consultation with the instructor. Meets with 3605.

GEOG 5701. Field Research. (3 cr. Prereq—9 or in geog, #)

Field investigation in physical, cultural, and economic geography; techniques of analysis and presentation; reconstruction of environments.

GEOG 5775. Geographic Education. (3 cr. Prereq—Three courses in geography or history or social sciences or education or #)

Teaching geography from middle school up; pedagogical use of geographical themes; methods for effective teaching of multiple cognitive domains—facts, theories, analytical skills, and evaluations; designing audio-visual aids, independent projects, simulations, etc. to meet National Standards in geography.

GEOG 5900. Topics in Geography. (3 cr [max 9 cr]. Prereq—Sr or grad, #)

Special topics and regions. Course offered by visiting professors in their research fields.

Geological Engineering (GEOE)

Department of Civil Engineering

Institute of Technology

GEOE 3111. How to Model It: Building Models to Solve Engineering Problems. (3 cr)

Problem formulation design and construction of models, and drawing conclusions from modeling results. Students learn how to use computer-based modeling tools working in small groups on a number of problems from various engineering contexts.

GEOE 3301. Soil Mechanics I. (3 cr; A-F only. \$CE 3301. Prereq—IT student, AEM 3031)

Index properties and soil classification. Effective stress. Permeability and seepage. Stresses from elasticity theory. One-dimensional compression and consolidation; settlements. Compaction; cut and fill problems.

GEOE 3311. Rock Mechanics I. (3 cr; A-F only. Prereq—IT student, AEM 3031)

Classifications and index properties. Behavior of intact rock and rock masses. Failure criteria. Stereographic projections; kinematic analysis of rock slopes. Reinforcement. Foundations on rock.

GEOE 4011. Special Topics. (1-4 cr [max 12 cr] Prereq—Upper div IT)

Topics, credits vary.

GEOE 4102W. Capstone Design. (3 cr; A-F only. Prereq—CE, GeoE, or Geo upper division or graduate student or #)

Team participation in formulation and solution of open-ended civil engineering problems from conceptual stage through preliminary planning, public hearings, design, and environmental impact statements to preparation of final plans and specifications, and award of contracts.

GEOE 4111. Engineering Systems Analysis. (3-4 cr. \$CE 4111. Prereq—Upper division IT)

Systems Analysis focuses on a broader “systems” approach of viewing problems. The techniques of operations research—decision engineering, network analysis, simulation, linear programming, and expert systems—are used to represent systems, and especially to assess trade-offs.

GEOE 4121. Computer Applications in Civil Engineering II. (3 cr; A-F only. \$CE 4121. Prereq—CE or GEOE upper div, 3101, Math 2243, Math 2263)

Advanced application of computer tools and methods in solving partial differential equations resulting from the analysis of civil engineering problems. The major tools used will be Spreadsheet and Visual Basic programming. Methods covered could include: finite differences, boundary element, finite element and control volume finite element.

GEOE 4301. Soil Mechanics II. (3 cr; A-F only. \$CE 4301. Prereq—Upper division student in IT; 3301, CE 3301, or #)

Traction and stress. Mohr-Coulomb failure criterion. Experiments on strength and angle of internal friction. Earth pressure theories; rigid and flexible retaining walls. Bearing capacity of shallow foundations. Stability of slopes.

GEOE 4311. Rock Mechanics II. (3 cr; A-F only. Prereq—Upper division or grad student in IT, 3311, CE 3311, or #)

Failure mechanisms in rock masses. Elasto-plastic solutions applied to underground excavations. Design of linings and support systems; rock-support interaction. In situ stresses and excavation shape. Instrumentation and monitoring.

GEOE 4341. Engineering Geostatistics. (3 cr; A-F only. \$CE 4341. Prereq—GeoE, CE, or Geo upper division or grad student, STAT 3021 or #)

Problem solving and decision making in civil and geological engineering using applied statistics. Emphasis on spatially correlated data, e.g. geologic site characterization, and spatial sampling design.

GEOE 4351. Groundwater Mechanics. (3 cr; A-F only. \$CE 4351. Prereq—IT upper division or grad student, CE 3502 or #)

Basic equations. Shallow confined and unconfined flows, two-dimensional flow in the vertical plane, and transient flow. Flow from rivers and lakes toward wells. Determination of streamlines and pathlines in two and three dimensions. Introduction to contaminant transport. Elementary computer modeling.

GEOE 4352. Groundwater Modeling. (3 cr; A-F only. \$CE 4352. Prereq—Upper division or grad student in IT, 4351, CE 4351, or #)

Principle of analytic element method. Mathematical and computer modeling of single and multiple aquifer systems. Application to actual field problems. Theory and application of contaminant transport models, including capture zone analysis.

GEOE 5311. Experimental Geomechanics. (3 cr; A-F only. \$CE 5311. Prereq—IT upper division or grad student, 4301, CE 4301, or #)

Machine stiffness; closed-loop testing. Small-strain theory. Measurement of deformation; strain gages, LVDTs, accelerometers, and associated circuits. Direct and indirect testing. Material behavior: experiments on anisotropic, damaged, and fluid-filled solids.

GEOE 5321. Geomechanics. (3 cr; A-F only. \$CE 5321.

Prereq—IT upper division or grad student, 4301, CE 4301 or #) Review of elasticity theory and solution of some elastic boundary value problems relevant to geomechanics. Wave propagation in unbounded elastic media. Elements of fracture mechanics and applications. Elements of poroelasticity and applications.

GEOE 5331. Geomechanics Modeling. (3 cr; A-F only. \$CE 5331. Prereq—IT upper division or grad student, 4301 or CE 4301)

Soil and rock response in triaxial testing; drained and undrained behavior; elastic and plastic properties. Modeling stresses, strains, and failure in geomechanics problems.

GEOE 5341. Wave Methods for Nondestructive Testing. (4 cr; A-F only. Prereq—[AEM 2021, AEM 3031] or #)

Introduction to contemporary methods for nondestructive characterization of objects of civil infrastructure (e.g., highways, bridges, geotechnical sites). Imaging technologies based on propagation of elastic waves: ultrasonic and resonant frequency methods, seismic surveys, acoustic emission monitoring. Lecture, lab.

Geology and Geophysics (GEO)

Department of Geology and Geophysics

Institute of Technology

GEO 1001. Earth and Its Environments. (4 cr)

Physical processes that shape the Earth: volcanoes, earthquakes, plate tectonics, glaciers, rivers. Current environmental issues/global change. Lecture/lab. Optional field experience.

GEO 1002. Earth History. (4 cr. \$GEO 1102, GEO 5002)

Evolution of life on Earth. Interrelationships of plate tectonism, climate change and organic evolution that led to the present ecosystem. Impacts of hominid evolution on Earth systems and of geological processes on human society.

GEO 1003. Dinosaur Evolution, Ecology, and Extinction: Introduction to the Mesozoic World. (3 cr. §GEO 5003)
Dinosaurs and the Mesozoic Earth are used to introduce evolution, plate tectonics, climate change, and Earth systems. Overview of the history of dinosaur interpretations illustrates the principles and social aspects of scientific investigation.

GEO 1005. Geology and Cinema. (4 cr. §GEO 1009, GEO 1101, GEO 2111H, GEO 5001)
Physical processes shaping the Earth, materials it comprises, its nearly five billion year history as told spectacularly, but often wrongly, by Hollywood movies.

GEO 1006. Oceanography. (4 cr. §GEO 1106, GEO 5006)
How various processes in the ocean interact. Marine biology, waves, tides, chemical oceanography, marine geology, and human interaction with the sea. Labs include study of live marine invertebrates, manipulation of oceanographic data, and discussion using videos showing unique aspects of ocean research.

GEO 1007. Geobiology: Origin and Evolution of Life on Earth. (4 cr)
Scientific evidence from biology, paleontology, and geology for origin/evolution of life over 4.5 billion years of Earth's history. Biochemical basis of life, biogeochemical cycles, natural selection, origin of species, genetics, phylogeny reconstruction, timescales for evolution.

GEO 1011. Volcanoes of the Earth. (4 cr)
Nonmathematical introduction to volcanoes, their origin and distribution on Earth and through time; theory of plate tectonics, origin of magmas and the Earth's interior; products of volcanoes, types of eruptions and hazards, and impact on climate, vegetation, and society.

GEO 1081. Conspiracies, Fraud, and Deception in Earth History. (1 cr)
Famous cases of geological deception from three centuries are presented in the intellectual context of their time and demonstrate the prevailing power of scientific reasoning.

GEO 1101. Introduction to Geology. (3 cr. §GEO 1005, GEO 1009, GEO 2111H, GEO 5001)
Physical processes that shape the Earth: volcanoes, earthquakes, plate tectonics, glaciers, rivers. Current environmental issues and global change. Lecture.

GEO 1102. Introduction to Earth History. (3 cr. §GEO 1002, GEO 5002)
Evolution of life on Earth. Interrelationships of plate tectonism, climate change, and organic evolution that led to the present ecosystem. Impacts of hominid evolution on Earth systems and of geological processes on human society.

GEO 1106. Oceanography. (3 cr. §GEO 1006, GEO 5006)
How various processes in the ocean interact. Marine biology, waves, tides, chemical oceanography, marine geology, human interaction with sea.

GEO 1901. Freshman Seminar: Environment. (1-3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Topics vary. See *Class Schedule*.

GEO 1905. Freshman Seminar. (1-3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Topics vary. See *Class Schedule*.

GEO 1906W. Freshman Seminar: Writing Intensive and Environmental Theme. (1-3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Topics vary: see freshman seminar topics.

GEO 2201. Geodynamics I: The Solid Earth. (3 cr. Prereq—PHYS 1301 or #)
Dynamics of solid Earth, particularly tectonic system. Seismology, internal structure of Earth. Earth's gravity, magnetic fields. Paleomagnetism, global plate tectonics, tectonic systems. Field trip.

Geo 2301. Mineralogy. (3 cr. Prereq—CHEM 1021 and MATH 1271 or #)
Crystallography, crystal chemistry, physics. Physical/chemical properties, crystal structures, chemical equilibria of major mineral groups. Lab includes crystallographic, polarizing microscope, X-ray powder diffraction exercises, hand-specimen mineral identification.

Geo 2302. Petrology. (3 cr. Prereq—2301 or #)
Magmatic and metamorphic processes, with an emphasis on plate tectonic interpretation of rock sequences.

Geo 2303W. Geochemical Principles. (3 cr. Prereq—CHEM 1021 or #)
Origin of elements (nucleosynthesis, elemental abundances). Geochemical classifications. Isotopes (radioactive, stable). Phase equilibria. Models of Earth's geochemical evolution. Basic geochemical processes that produced Earth's lithosphere, hydrosphere, atmosphere.

GEO 3001. Earth Materials. (3 cr)
Common rocks/minerals and their geologic settings. Properties of these materials as basis for identification/use in industry/society.

GEO 3002. Climate Change and Human History. (3 cr)
Causes of long-/short-term climate change. Frequency/magnitude of past climate changes; their geologic records. Relationship of past climate changes to development of agrarian societies and to shifts in power among kingdoms/city-states. Emphasizes last 10,000 years.

GEO 3003. Geohazards. (3 cr)
Geologic hazards associated with earthquakes/volcanoes. How society confronts dangers posed by these phenomena. Geological/geophysical nature/causes of earthquakes/volcanoes. Prediction/risk assessment. Public policy issues.

GEO 3004. Water and Society. (3 cr)
Processes that influence formation, circulation, composition, and use of water. Human influence on water quality through agricultural, industrial, and other land-use practices. International case studies examine human interaction with surface environment, influence of local land-use practices.

GEO 3005. Earth Resources. (3 cr)
Geologic aspects of energy/material resources. Resource size/life-times. Environmental consequences of resource use. Issues of international/public ethics associated with resource production, distribution, and use.

GEO 3006. Planets of the Solar System. (3 cr)
Recent accomplishments of space missions. Diverse/common characteristics of planetary formation. Surface processes/interior dynamics. Meteoritic impacts. Comets. Other solar systems/possibility of life.

GEO 3093. Problems in Geology and Geophysics: Junior. (1-4 cr [max 6 cr]. Prereq—#)
Geological or geophysical problems studied independently under the direction of a faculty member.

GEO 3096. Geology of Iceland. (4 cr; A-F only. Prereq—[1001 or 1011], 2301, 2302) or Δ)
Geologic processes that form Iceland. Tectonics, volcanology, geomorphology, glaciology. Interplay between physical environment of Iceland and its social structure and culture. Lectures, field trips.

GEO 3202. Geodynamics II: The Fluid Earth. (3 cr. Prereq—2201)
Dynamics of fluid Earth, mainly surface processes and convection.

GEO 3401. Geochronology and Earth History. (3 cr. Prereq—2303)
Modern high precision techniques for quantifying geologic time. Litho-, bio-, and chrono-stratigraphic correlation techniques for reconstructing geologic history.

GEO 3870. Modeling Workshop. (1 cr [max 2 cr]. Prereq—Geo or Geophys or GeoEng major or #)
Modeling of geologic or geophysical systems.

GEO 3880. Laboratory Workshop. (1 cr [max 2 cr]. Prereq—Geo or Geophys or GeoEng major or #)
Geologic or geophysical lab study.

GEO 3890. Field Workshop. (1 cr [max 2 cr]. Prereq—Geo or Geophys or GeoEng major or #)
Geologic or geophysical field study.

GEO 3911. Introductory Field Geology. (4 cr; A-F only. Prereq—2201, 3890, #)
Geologic mapping on topographic maps and aerial photos. Field identification of igneous, sedimentary, and metamorphic rocks. Measurement of stratigraphic sections. Structural/geomorphic features.

GEO 4010. Undergraduate Seminar: Current Topics in Geology and Geophysics. (1-4 cr [max 12 cr]. Prereq—#)
Topics in geology and geophysics investigated in a seminar format.

GEO 4093. Problems in Geology and Geophysics: Senior. (1-4 cr [max 6 cr]. Prereq—#)
Nonstructured research course enabling seniors to engage in independent research under faculty supervision.

GEO 4094. Senior Thesis. (2 cr [max 4 cr]. Prereq—Sr, Geo or GeoPhys major, #)
Nonstructured research course enabling senior-level majors to engage in independent research under faculty supervision. Select problems according to individual interests and in consultation with faculty committee. Thesis and oral defense.

GEO 4096. Geologic Field Studies in Iceland. (4 cr; A-F only. Prereq—[1001 or 1011], [2301, Geo 2302] or #)
Lectures, field research in various parts of Iceland. Focuses on individual projects in southwest Iceland. Write-up, oral presentation of field studies.

GEO 4102W. Vertebrate Paleontology: Evolutionary History and Fossil Records of Vertebrates. (4 cr; A-F only. Prereq—1001 or 1002 or BIOL 1001 or BIOL 1002 or BIOL 1009 or #)
Vertebrate evolution (exclusive of mammals) in phylogenetic, temporal, functional, and paleoecological contexts. Vertebrate anatomy. Methods in reconstructing phylogenetic relationships and origin/history of major vertebrate groups, from Cambrian Explosion to modern diversity of vertebrate animals.

GEO 4103W. Fossil Record of Mammals. (4 cr; A-F only)
Evolutionary history of mammals and their extinct relatives. Methods in reconstructing phylogeny. Place of mammals in evolutionary history of vertebrate animals. Major morphological/ecological transitions. Origins of modern groups of mammals. Continuing controversies in studying fossil mammals.

GEO 4203. Principles of Geophysical Exploration. (3 cr. Prereq—PHYS 1302)
Seismic exploration (reflection and refraction); potential techniques (gravity and magnetics) and electrical techniques of geophysical exploration.

GEO 4204. Geomagnetism and Paleomagnetism. (3 cr. Prereq—2201, PHYS 1302, MATH 1272 or #)
Present geomagnetic field at the Earth's surface, secular variation, geomagnetic field reversals. Physical and chemical basis of paleomagnetism: origin of natural remanent magnetization, mineralogy of magnetic minerals, magnetic polarity stratigraphy, apparent polar wander, and environmental magnetism.

GEO 4211. Solid Earth Geophysics I. (3 cr; A-F only. Prereq—2201, PHYS 1302)
Basic elasticity, basic seismology, and physical structure of the Earth's crust and deep interior.

GEO 4212. Solid Earth Geophysics II. (3 cr; A-F only. Prereq—2201, PHYS 1302)
Dynamics of the solid Earth, mostly mantle and core; seismic tomography, geothermal measurements, gravity, time-dependent deformation of the Earth, computer modeling.

GEO 4301. Igneous and Metamorphic Petrology. (3 cr. [max 4 cr]. Prereq—[2302, MATH 1272] or #)

Theoretical development of basic thermodynamic tools, chemographic analysis for interpreting chemical processes in igneous/metamorphic rocks. Problem sets.

GEO 4401. Aqueous Environmental Geochemistry. (3 cr. Prereq—CHEM 3501 or #)

General principles of solution chemistry applied to geology. Solution-mineral equilibria. Redox processes in natural waters. Geochemistry of hydrothermal fluids. Environmental geochemistry.

GEO 4402. Biogeochemical Cycles in the Ocean. (3 cr. Prereq—[CHEM 3501, 1 yr of calculus] or #)

Introduction to marine biogeochemistry and chemical oceanography. Processes controlling chemical composition of oceans past/present. Cycles of major/minor constituents, including carbon, nitrogen, phosphorus, silicon, and oxygen and their isotopes. Role of these cycles in climate system.

GEO 4501. Structural Geology. (3 cr. Prereq—2201, 2302)

Fundamental concepts related to deformation of Earth's crust. Processes associated with deformation, faulting, folding, fabric development. Lab/recitation include solving problems, conducting physical/numerical experiments. Field trips.

GEO 4502. Tectonic Styles. (3 cr. Prereq—4501 or #)

Origin and nature of major types of tectonic disturbances affecting the crust and lithosphere, including analysis of the form and development of individual structural components and relationship to plate tectonics. Changes over geologic time in the nature of orogenic processes.

GEO 4503. Neotectonics. (3 cr. Prereq—4501 or #)

Integration of diverse elements of geology, geodesy, and geophysics to examine recent and active tectonics of the Earth's lithosphere; extensional, compressional and wrench tectonic regimes with case studies around the world; modern global plate motions, geodetic techniques, seismic anisotropy, climatically driven tectonics.

GEO 4602. Sedimentology and Stratigraphy. (3 cr.

Prereq—[3402, [IT upper div major in [geology or geophysics or geo-engineering or mining engineering]] or CLA [jr or sr] major in geology] or #)

Interpretation of origin of sedimentary rocks through application of basic physical/chemical principles. Modern depositional environments, petrographic microscopy, basin dynamics, stratigraphy.

GEO 4631W. Earth Systems: Geosphere/Biosphere Interactions. (3 cr. Prereq—3401)

Interdisciplinary study of global-change forcing mechanisms, feedbacks, dynamics on various time scales, using paleorecord to illustrate processes.

GEO 4701. Geomorphology. (3-4 cr [max 4 cr]. Prereq—1001, MATH 1031 or #)

Origin, development, and continuing evolution of landforms in various environments. Environmental implications. Weathering, slope and shore processes, fluvial erosion and deposition, arid region processes, glacial processes.

GEO 4703. Glacial Geology. (4 cr. Prereq—1001 or 1004 or #)

Formation and characteristics of modern glaciers; erosional and depositional features of Pleistocene glaciers; history of quaternary environmental changes in glaciated and nonglaciated areas. Field trips and labs.

GEO 4911. Advanced Field Geology. (4 cr; A-F only.

Prereq—3911, #)

Geologic mapping; study of igneous, metamorphic, and sedimentary rocks; structures and surficial features; problem solving. Paper required.

GEO 4971. Field Hydrogeology. (4 cr. Prereq—5701, #)

Aquifer, vadoze zone, and surface water hydrology field techniques. Shallow soil boring and sampling. Well installation. Single and multiple well aquifer testing. Ground water sampling for chemical analysis. Weather data collection, hydrogeologic mapping, water balance calculation.

GEO 5001. Earth Systems Science for Teachers. (3 cr. §GEO

1005, GEO 1009, GEO 1101, GEO 2111H. Prereq—Educ degree) Solid Earth, hydrosphere, atmosphere, biosphere, their interconnections in natural cycles of material/energy. Consequences of natural cycles for land-water-atmosphere-life environments/Earth's habitability. Human impact on natural cycles. Evidence for global environmental changes. Required project.

GEO 5108. Principles of Environmental Geology. (3 cr.

Prereq—Geology majors: core curriculum through 4501 or #; nonmajors: 1001 or #)

Human impact on geological environment and effect of geology/geologic processes on human life from an ecosystems and biogeochemical cycles perspective. Geologic limits to resources and carrying capacity of Earth. Land use planning, environmental impact assessment, ecogeologic world models. Field project and trip.

GEO 5201. Time-Series Analysis of Geological

Phenomena. (3 cr; A-F only. Prereq—Math 2263 or #) Time-series analysis of linear and nonlinear geological and geophysical phenomena. Examples drawn from ice age cycles, earthquakes, climatic fluctuations, volcanic eruptions, atmospheric phenomena, thermal convection and other time-dependent natural phenomena. Modern concepts of nonlinear dynamics and complexity theory applied to geological phenomena.

GEO 5203. Mineral and Rock Physics. (3 cr. Prereq—2201, PHYS 1302)

Physical properties of minerals and rocks as related to the composition and dynamics of the Earth's crust, mantle, and core.

GEO 5204. Geostatistics and Inverse Theory. (3 cr. Prereq—STAT 3011 or #)

Statistical treatment of geological and geophysical data. Statistical estimation. Stochastic processes/fields. Non-linear/non-assumptive error analysis. Cluster analysis. Eigenvalue-eigenvector methods. Regional variables. Correlograms and kriging. Theoretical framework of linear geostatistics and geophysical inverse theory.

GEO 5302. Isotope Geology. (3 cr; A-F only. Prereq—2303 or #)

Theory and uses of radioactive, radiogenic, and stable isotopes in geology. Radioactive dating, geothermometry, and tracer techniques in geologic processes.

GEO 5353. Electron Microprobe Theory and Practice. (2-3

cr [max 3 cr]. Prereq—[One yr chem, one yr physics] or #) Characterizing solid materials with electron beam instrumentation, including reduction of X-ray data to chemical compositions.

GEO 5502. Advanced Structural Geology. (3 cr. Prereq—4501 or #)

Analysis of structures and fabric of deformed rocks. Determination of states of stress and strain in rocks and of evolution of these with time. Deformation mechanisms. Extensive reading in journal literature. Field trips.

GEO 5601. Advanced Sedimentology. (4 cr. Prereq—4602 or #)

Modern techniques of sedimentary basin analysis focusing on interactions among the lithosphere, atmosphere, and hydrosphere. Sedimentary facies of modern and ancient systems, petrology of clastic and carbonate deposits, tectonic and paleoclimatic interpretations, paleooccurrent analysis, diagenetic effects on subsurface fluid flow, and volcanic sedimentation.

GEO 5602. Depositional Mechanics. (3 cr. Prereq—4602, Math 2243 or #)

Elementary mechanics of sediment transport applied to quantitative interpretation of sedimentary rocks.

GEO 5701. General Hydrogeology. (3 cr [max 4 cr].

Prereq—CHEM 1022, MATH 1271, PHYS 1201, Geo majors-core curriculum through 2402 or #)

Theory of groundwater geology, hydrologic cycle, watershed hydrology, Darcy's law, governing equations of groundwater motion, flow net analysis, analog models, and groundwater resource evaluation and development. Applied analysis of steady and transient equations of groundwater motion and chemical transport. Chemistry of natural waters.

GEO 5702. Regional Aquifer Systems of North America. (3 cr. Prereq—5701 or #)

Geologic controls on flow patterns within aquifer systems. Case histories and specific examples from glaciated terrains and Paleozoic basins in Minnesota. Analysis of basin-scale regional aquifer systems of North America. Survey of famous aquifer systems of the world.

GEO 5705. Limnogeology and Paleoenvironment. (3 cr. Prereq—#)

Within-lake, hydrogeologic, and landscape (geological/biological) processes that lead to formation of various proxy records of paleoenvironment. Systems approach to physical, geochemical, biogeochemical, and biotic proxies. Basic principles, case studies. Emphasizes how proxy records relate to paleoclimate.

GEO 5713. Tracers and Karst Hydrogeology. (3 cr. Prereq—5701, #)

Karst hydrogeology and application of tracers to determine source, age, and mixing parameters of water in various natural reservoirs. Physical and chemical principles and processes operating in karst hydrogeology; use of natural and synthetic chemical and isotopic labels or tracers to follow movement and mixing of water through hydrologic cycle.

GEO 5802. Scientific Visualization. (3 cr. Prereq—CSCI 1107 or CSCI 1113 or #)

Visualization hardware and software, three-dimensional graphics, representation of scientific data, modeling, user interface techniques, output, commonly used algorithms, animation, case studies and examples.

German (GER)

Department of German, Scandinavian, and Dutch

College of Liberal Arts

GER 222. Reading German. (0 cr; A-F only)

Teaches only a reading knowledge of German. Enables graduate students to satisfy departmental requirements for an advanced degree. Intensive reading of German scholarly texts. Emphasizes reading, grammar, some listening, discipline-specific vocabulary.

GER 1001. Beginning German. (5 cr)

Emphasis on working toward novice-intermediate low proficiency in all four language modalities (listening, reading, speaking, writing). Topics include everyday subjects (shopping, directions, family, food, housing, etc.).

GER 1002. Beginning German. (5 cr. Prereq—1001)

Listening, reading, speaking, writing. Emphasizes proficiency. Topics include free-time activities, careers, and culture of German-speaking areas.

GER 1003. Intermediate German. (5 cr. Prereq—1002 or Entrance Proficiency Test)

Listening, reading, speaking, writing. Contextualized grammar/vocabulary. Authentic readings. Essay assignments.

GER 1004. Intermediate German. (5 cr. Prereq—1003 or completion of Entrance Proficiency Test at 1004 level)

Listening, reading, speaking, writing. Contextualized grammar/vocabulary. Authentic readings. Essay assignments.

GER 1020. Beginning German Conversation. (2 cr [max 8 cr]. Prereq–1001 or equiv)

Maintaining language skills through conversational practice. Emphasizes speaking skills, but also includes listening, reading, writing. Reviews essential grammatical structures.

GER 1022. Beginning German Review. (5 cr. Prereq–Placement above 1001)

Intended for students with previous experience in German, primarily those who have studied German in high school or at community colleges, or who are transfer students. Intensive review of all four language modalities (listening, reading, speaking, writing), with a proficiency emphasis to prepare for German 1003.

GER 1024. Advanced Intermediate German. (5 cr. Prereq–1003 or satisfactory completion of Entrance Proficiency Test with competency at the 1004 level)

Intended for students who have not taken the Graduation Proficiency Test and need a review before taking it. Emphasis on developing intermediate mid-high proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is supported by authentic readings and essay assignments.

GER 1030. Intermediate German: Reading and Writing. (2 cr [max 8 cr]. Prereq–1003 or equiv)
Consolidating/developing reading/writing skills.

GER 1601. Fleeing Hitler: German and Austrian Filmmakers Between Europe and Hollywood. (3 cr)
German/American films by famous directors who left Europe in Nazi period. Analysis of films by Fritz Lang, Max Ophuls, Robert Siodmak, Otto Preminger, Billy Wilder, Douglas Sirk, and others. Films as art works and as cultural products of particular social, political, and historical moments.

GER 1905. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq–Fr)
Topics specified in *Class Schedule*.

GER 1909W. Freshman Seminar. (3 cr; A-F only. Prereq–Freshman)
Topics specified in *Class Schedule*.

GER 1910W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq–Freshman)
Topics specified in *Class Schedule*.

GER 3011W. Conversation and Composition. (4 cr. Prereq–1004)
Achieving proficiency in professional or academic German. Refinement of oral/written expression. Review of important communicative modes of language. Wide range of topics to develop advanced level of proficiency.

GER 3012W. Conversation and Composition. (4 cr. Prereq–3011)
Prepares students for upper-level language and content courses in German. Continues the same focus and approach as 3011 with the addition of a larger reading component.

GER 3014. German Media. (3 cr. Prereq–3011)
Introduction to German language media. German language newspaper/magazine articles. The Internet. Radio/TV broadcasts. Structure/style of journalistic prose.

GER 3016. Techniques of Translation. (3 cr. Prereq–3011)
Theory/practice of translation from/to German in various genres. Idiomatics, stylistics, and cross-cultural aspects of translation.

GER 3021. Business German. (3 cr. Prereq–3011 or equiv)
German economy, business culture. Practice of language used in business. Reading/discussion of German business documents. Preparation of formal letters and reports.

GER 3022. Advanced Business German. (3 cr. Prereq–GER 3021 or equiv)
Provides more intensive training in vocabulary and practices of German business in such areas as banking, trade, import/export, business management, marketing. Prepares students for the “International Test of Business German.”

GER 3104W. Reading and Analysis of German Literature. (4 cr. Prereq–3011)

Introduction to literary analysis. Readings from drama, prose, and lyric poetry, from 18th century to present.

GER 3410. German Literature Before 1750. (3 cr [max 9 cr]. Prereq–3011)
Representative literary texts of German High Middle Ages, Renaissance, Reformation, and the Baroque, in cultural-historical context. Readings in modern German translation or English.

GER 3421. 18th-Century German Literature. (3 cr. Prereq–3011)
German literature, 1720–1810, Enlightenment/Weimar classicism in historical/cultural context. Reading/discussion of literary/philosophical works, aesthetic criticism.

GER 3431. 19th-Century Literature. (3 cr. Prereq–3011)
Literary/cultural exploration of 19th-century German literature through an investigation of romanticism, realism, and naturalism. Reading/discussion of literary/critical texts.

GER 3441. 20th-Century Literature. (3 cr. Prereq–3011)
German literature, from 1890 to present, in historical, political, social, and cultural context.

GER 3460. Women Writers in German Literature. (3 cr [max 9 cr]. Prereq–3011)
Literary/historical investigation of selected German women writers, from perspectives of feminist theory, gender studies, and cultural studies/theory. Approaches may be thematic, generic, or chronological.

GER 3490. Topics in German Literature. (3 cr [max 9 cr]. Prereq–3011)
Intensive exploration of specific authors, literary genres, or literary topics not covered in period courses.

GER 3501. Contemporary Germany. (3 cr. Prereq–3011)
Social, political, and cultural developments in Germany, from 1945 to present.

GER 3510. Topics in German Studies. (3 cr [max 9 cr]. Prereq–3011)
One topic in depth dealing with culture or civilization of German-speaking countries.

GER 3511W. German Civilization and Culture: Middle Ages to 1700. (4 cr)
Survey of representative cultural-historical events in Germany from early Germanic times to 1700.

GER 3512W. German Civilization and Culture: 1700 to the Present. (4 cr)
Survey of representative cultural-historical events in Germany from 1700 to the present.

GER 3520. Topics in Austrian and Central European Culture. (3 cr [max 9 cr]. Prereq–3011)
Culture, politics, and economy in Austria and Central Europe. Comparative analysis of cultural/political developments. Topics vary.

GER 3531. Selected Writings in German Intellectual History. (3 cr. Prereq–3011)
Philosophical writings on culture, history, and art. Authors include Lessing, Schiller, Kant, Hegel, Marx, Nietzsche, and Freud.

GER 3593. Directed Studies: German-Speaking Countries. (4 cr [max 12 cr]. Prereq–3011, Δ)
Preparation for research abroad during semester before departure. Written/oral reports upon return.

GER 3601. German Medieval Literature. (3 cr. Prereq–No knowledge of German required)
Literary investigation of the greatest works of medieval German poetry. Readings in English. Majors will be required to write a paper with use of secondary sources in English and German.

GER 3604W. Introduction to German Cinema. (3 cr)
An introduction to the study of German cinema, with a focus on the relation between German film and German history, literature, culture, and politics.

GER 3610. German Literature in Translation. (3 cr [max 9 cr]. Prereq–No knowledge of German required; cr toward major or minor requires reading in German)
In-depth study of authors or topics from various periods in German literature.

GER 3631. Jewish Writers and Rebels in German, Austrian, and American Culture. (3 cr. §CSCL 3631, JWST 3631. Prereq–No knowledge of German required; cr toward major or minor requires reading in German)
Literary/cultural modes of writing used by Jewish writers in Germany, Austria, and America to deal with problems of identity, anti-Semitism, and assimilation. Focus on 20th century. All readings (novels, poetry, stories) in English.

GER 3634. German Women and Cultural History: Constructing Selves in Narrative Texts. (3 cr. Prereq–No knowledge of German required; cr toward major or minor requires reading in German)
Examination of narrative texts by German women writers against a background of the cultural history of Germany during the 20th century. Focus on personal narrative texts, both written and pictorial, and readings in literary and cultural theory and history. All readings in English.

GER 3641. German Folklore. (3 cr. Prereq–No knowledge of German required; cr for major or minor by arrangement with instructor)
Literary and cultural investigation of the main folklore genres: charms, legends, folktales, and ballads; their composition, origin, and role in society with a strong emphasis on their international character. Readings in English. Majors required to write a paper with use of secondary sources in English and German.

GER 3642. The Grimms' Fairy Tales, Feminism, and Folklore. (3 cr. Prereq–No knowledge of German required; cr toward major or minor requires reading in German)
Exploration of the Grimms' fairy tales and investigation of how various folktale types and gender stereotypes developed and became classical models for children and adults. The genre of the literary fairy tale in Germany, Europe, and North America. Comparisons of original literary versions with contemporary tales. All readings in English.

GER 3701. History of the German Language. (3 cr. Prereq–1004)
Change in grammar and lexicon, 750 A.D. to present.

GER 3702. Beginning Middle High German. (3 cr. Prereq–1004)
Middle High German grammar. Selected literary texts.

GER 3704. German Dialects. (3 cr. Prereq–1004)
Contemporary regional dialects recorded on tape and written in texts. Synchronic and diachronic analysis.

GER 3993. Directed Studies. (1–4 cr [max 12 cr]. Prereq–#, Δ, 0)
Guided individual reading or study.

GER 4001. Beginning German. (2 cr. Prereq–Grad student)
Meets concurrently with 1001. See 1001 for course description.

GER 4002. Beginning German. (2 cr. Prereq–Grad student)
Meets concurrently with 1002; see Ger 1002 for course description.

GER 4003. Intermediate German. (2 cr. Prereq–Grad student)
Meets concurrently with 1003. See 1003 for course description.

GER 4004. Intermediate German. (2 cr. Prereq–Grad student)
Meets concurrently with 1004. See 1004 for course description.

GER 4040. German Play: Oral Interpretation and Performance of German. (1–3 cr [max 9 cr])
Dramatic reading of German play for pronunciation; preparation and rehearsal for production and performance of German play.

GER 4621. German Cinema to 1945. (3 cr. Prereq=3xxx film course or #)

Beginnings of German cinema late 19th/early 20th century. "Golden age" during Weimar Republic (1918-1933). Expressionism and "New Objectivity." Its subordination to ideological/entertainment needs of Nazis "Third Reich" (1933-45).

GER 4622. German Cinema Since 1945. (3 cr. Prereq=3xxx film course or #)

German cinema during the first years of postwar occupation and then in each of the two postwar German states, East and West Germany, from 1949-1990, and finally in the unified Germany from 1990 on. Includes films of DEFA, "New German Cinema," feminist cinema, German comedies of the 1980s and 1990s, etc.

GER 5011. Advanced Conversation and Composition. (3 cr. Prereq=3011, [grad student or adv undergrad])
Achieving high proficiency in writing/speaking professional/academic German.

GER 5016. Advanced Translation: Theory and Practice. (3 cr. Prereq=3016 or #)
Translation theory, related issues in stylistics, philosophy of language; sample translations; student production of translations with methodological commentary.

GER 5101. Analysis of German. (3 cr. Prereq=1004, LING 3001 or LING 5001 or #)
Phonology, morphology, and syntax of standard German.

GER 5410. Topics in German Literature. (3 cr [max 9 cr]. Prereq=3011)
Topic may focus on a specific author, group of authors, genre, period, or subject matter. Topics specified in *Class Schedule*.

GER 5510. Topics in Contemporary German Culture. (3 cr [max 9 cr]. Prereq=3011)
A topic of contemporary German culture explored in depth.

GER 5610. German Literature in Translation. (3 cr [max 9 cr]. Prereq=No knowledge of German required; cr toward major or minor requires reading in German)
Study in depth of authors or topics from various periods in German literature. Requires no knowledge of German.

GER 5630. Topics in German Cinema. (3 cr [max 9 cr]. Prereq=3xxx film course or #)
Topics chosen may focus on specific directors, genres, film production or reception, and/or other formal, theoretical, historical, or political issues.

GER 5711. History of the German Language I. (3 cr. Prereq=3011)
Historical development of German, from beginnings to 1450.

GER 5712. History of the German Language II. (3 cr. Prereq=5711)
Historical development of German from 1450 to 2000.

GER 5721. Introduction to Middle High German. (3 cr)
Introduction to Middle High German language and literature. Study of grammar through formal description of Middle High German phonology, morphology, and syntax. Normalized MHG texts read.

GER 5722. Middle High German: Advanced Readings. (3 cr. Prereq=5721)
Acquisition of fluency in reading Middle High German normalized as well as non-normalized texts, both poetry and prose.

GER 5731. Old High German I. (3 cr)
Study of the monuments of Old High German. Detailed investigation of Old High German in comparison with the other Germanic languages.

GER 5732. Old High German II. (3 cr. Prereq=5731)
Study of the monuments of Old High German. Detailed investigation of Old High German in comparison with the other Germanic languages.

GER 5734. Old Saxon. (3 cr)
Study of the poetry of Old Saxon. Detailed investigation of Old Saxon in comparison with the other Old Germanic languages.

GER 5740. Readings in Philology. (3 cr [max 9 cr])
Philological analysis of a chosen text in any medieval Germanic language.

GER 5993. Directed Studies. (1-4 cr [max 12 cr]. Prereq=#, Δ, □)
Guided individual reading or study.

German, Scandinavian, and Dutch (GSD)

*Department of German, Scandinavian, and Dutch
College of Liberal Arts*

GSD 3451V. Honors Major Project Seminar. (4 cr; A-F only. \$GSD 3451W. Prereq=Honors student)
Major project under supervision of faculty member. Oral exam based on project.

GSD 3451W. Major Project Seminar. (4 cr; A-F only. \$GSD 3451V)
Students prepare major project under supervision of faculty member.

GSD 5103. Teaching of Germanic Languages. (3 cr)
Second language acquisition theory, methods, testing, and technology applicable to teaching of modern Germanic languages.

Gerontology (GERO)

School of Public Health-Admin

GERO 5105. Multidisciplinary Perspectives on Aging. (3 cr)
Sociological, psychological aspects of aging. Theories of aging. Death/bereavement. Issues/problems of older adults in America. Human services, their delivery systems (health, nutrition, long-term care, education). Public policy, legislation. Environment/housing. Retirement.

GERO 5110. Biology of Aging. (3 cr)
Biological changes that occur with aging. Methods for studying aging, descriptions of population aging, theories on how/why we age. Process of aging in each body system, variation between individuals/populations. Clinical implications of biological changes with age. Guest lecturers from different disciplines.

GERO 5111. Studying Aging and Chronic Illness. (2 cr. Prereq=Introductory course in epidemiology or #)
Methodological issues unique to studies of older populations. Focuses on measurement of epidemiological characteristics. Health conditions/disorders of older Americans.

Global Studies (GLOS)

Institute of International Studies

College of Liberal Arts

GLOS 1015V. Honors: Introduction to Global History Since 1950. (4 cr. \$GLOS 1015W, HIST 1015V, HIST 1019. Prereq=honors)
Global history in information age. East-West divisions during Cold War: North-South relations in global economy. Emerging consciousness of global systems. Issues of human rights, labor migration, environmental degradation, and indigenous peoples. Emphasizes comparison of cases from Asia, Africa, Latin America.

GLOS 1015W. Introduction to Global History Since 1950. (4 cr. \$GLOS 1015V, HIST 1015V, HIST 1019. Prereq=Fr or soph)
Global history in information age. East-West divisions during Cold War: North-South relations in global economy. Emerging consciousness of global systems. Issues of human rights, labor migration, environmental degradation, and indigenous peoples. Emphasizes comparison of cases from Asia, Africa, Latin America.

GLOS 1112. Globalization and Social Justice. (3 cr)
How and why did the term "globalization" become commonplace, what it describes. Uses questions of social justice to explore portrayals of globalization in popular media and culture.

GLOS 1200. Global Studies Practicum. (3 cr [max 6 cr]; A-F only)
Exploratory experience in one part of the world as an integral feature of an undergraduate education and as preparation for learning the language of the area visited.

GLOS 1672. Geography of Global Cities. (3 cr. \$GEOG 1372)
Urban forms/processes. Key global cities as examples. Political, historical, and economic contexts of cities. Planning ideologies. Globalization. Race/segregation. Population growth. Environmental problems.

GLOS 1902. Freshman Seminar. (3 cr; A-F only. Prereq=Freshman)
Topics specified in *Class Schedule*.

GLOS 1904. Freshman Seminar. (3 cr; A-F only. Prereq=Freshman)
Topics specified in *Class Schedule*.

GLOS 1905. Freshman Seminar. (3 cr; A-F only. Prereq=Freshman)
Topics specified in *Class Schedule*.

GLOS 1909W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq=Fr)
Topics specified in *Class Schedule*.

GLOS 3003. Cultural Anthropology. (3 cr. \$ANTH 3003. Prereq=ANTH 1003 or #)
Marxist/feminist theories of culture. Culture and language/discourse. Psychological anthropology. Culture and transnational processes. May include field research, politics of ethnographic knowledge.

GLOS 3103. Empire and Modernity. (3 cr. Prereq=[3101, 3144] or #)
How modern world has been constituted by colonial encounter. Role of colonialism in construction of west. Images of non-western societies. Modernity in colonial/postcolonial societies. Problems/potential of universal categories such as democracy, gender, history, human rights. Globalization at the margins.

GLOS 3144. Knowledge, Power, and the Politics of Representation in Global Studies. (4 cr. \$GLOS 3144H. Prereq=6 cr in social sciences including [GEOG 1301 or HIST 1015 or HIST 1019 or HIST 1012 or HIST 1018 or POL 1025])
Introduction to theoretical issues. Power/production of knowledge about world regions. Knowledge, power, and politics in contemporary world. Colonialism, nationalism, and modernity in shaping academic disciplines.

GLOS 3144H. Honors: Knowledge, Power, and the Politics of Representation in Global Studies. (4 cr. \$GLOS 3144. Prereq=honors, 6 cr in social sciences [including GEOG 1301 or HIST 1015 or HIST 1019 or HIST 1012 or HIST 1018 or POL 1025])
Introduction to theoretical issues. Power, production of knowledge about world regions. Knowledge, power, and politics in contemporary world. Colonialism, nationalism, and modernity in shaping academic disciplines.

GLOS 3145. Theoretical Approaches to Global Studies.

(4 cr; A-F only. §GLOS 3145H. Prereq—6 credits in the social sciences including at least one of the following: GEOG 1 301; HIST 1012/1018; GLOS 1015W; or PolSci 1025 or #)
Theoretically informed introduction to the social, political, economic, cultural, and historical processes shaping contemporary global phenomena. Topics may include nationalism, colonialism, cultural production, environmental sustainability, globalization of the economy, migration and diasporas, global conflict and cooperation.

GLOS 3145H. Theoretical Approaches to Global Studies.

(4 cr; A-F only. §GLOS 3145. Prereq—6 credits in the social sciences including at least one of the following: GEOG 1 301; HIST 1012/1018; GLOS 1015W; or PolSci 1025; or #)
Theoretically informed introduction to the social, political, economic, cultural, and historical processes shaping contemporary global phenomena. Topics may include nationalism, colonialism, cultural production, environmental sustainability, globalization of the economy, migration and diasporas, global conflict and cooperation.

GLOS 3212. Globalization, Markets, and Inequality. (3 cr; A-F only. §ANTH 3212)

Globalization of American business/culture, uneven relationships between developed/underdeveloped national economies, social/economic consequences of market economies and free trade. Focuses on growing inequalities in global economy. Wall Street and transnational corporations, sweatshops, consumer culture, brand-name global marketing, mass downsizings.

GLOS 3301. Environment & Empire. (3 cr; A-F only.

Prereq—[3101, 3144] or #)
Key issues in environmental history. Global/colonial processes that have made the modern environment. Global spread of diseases, modern remaking of world's flora/fauna, idea of nature. New technologies and the environment. Conservationist ideology.

GLOS 3302. Debating "Development": Contested Visions.

(3 cr; A-F only. Prereq—[3101, 3144] or #)
Radical critiques of idea/practice of "development." Debates over development. Vocabularies (Marxist, feminist, post-structuralist, ecological) that drive the debates.

GLOS 3303. Environment and Development in the Third World. (3 cr; A-F only. §GEOG 3 379. Prereq—Soph or jr or sr)

Basic concepts for analyzing relations between capitalist development and environment in Third World. Analytical concepts about historical geography of capitalist development, geographically/historically specific case studies, likelihood of social/environmental sustainability.

GLOS 3401. International Human Rights Law. (3 cr; A-F

only. Prereq—[3101, 3144] or #)
Issues, procedures, advocacy strategies regarding promotion/protection of international human rights. Students analyze recent case studies of human rights violations in light of evolving laws, enforcement mechanisms.

GLOS 3402. Human Rights Internship. (3 cr; A-F only.

Prereq—3401, #)
Hands-on experience in one of many Twin Cities area organizations engaged in promoting/protecting international human rights. Students work 100 hours in non-governmental organization. Substantive background on human rights laws/procedures, organizational theory/management information about human rights organizations.

GLOS 3410. Interactive Global and Local Studies. (3 cr; A-F only. Prereq—#)

Global studies topics studied through their local manifestations in the Twin Cities or Minnesota, and internationally through linked communication with classes at cooperating universities in other countries. Students communicate with counterparts abroad through e-mail to develop comparative/interactive elements in their studies. Sample topics: role of the river in local history, grain storage and processing, manufacturing and trade, growth of the metropolitan area.

GLOS 3415. Global Institutions of Power: World Bank, International Monetary Fund, and World Trade Organization. (3 cr)

Introduction to World Bank, International Monetary Fund, and World Trade Organization. Emphasizes their daily practices and political, economic, and cultural effects around the world. Politics/business of development. Free market and trade. New transnational professional class. Social activism.

GLOS 3550V. Honors Course: Supervised Research Paper. (4 cr)

Supervised research paper.

GLOS 3552H. Honors Seminar: Making of the Modern World. (3 cr; A-F only. Prereq—MacArthur Program or [IntR, honors], #)

Interaction across ecological frontiers, changing power relations, restructuring of systems of production, creation of new cultures/identities.

GLOS 3553H. Honors: Change in the Contemporary Global Order. (3 cr; A-F only. Prereq—#)

Important issues of global change: population growth, human migration; human relations with physical environment; struggles for popular power, sustainable democratic institutions; relations/conditions of work; cultural representations of social identities. Attention to U.S.-Mexican arena.

GLOS 3558V. Honors: Research Seminar. (3 cr; A-F only. Prereq—Honors, global studies major)

Theoretical perspectives/methods available for research in global studies. Focus varies with instructor.

GLOS 3602. Other Worlds: Globalization and Culture. (3 cr; A-F only. Prereq—[3101, 3144] or #)

Globalization produces complex, sometimes volatile, local responses. Course explores interconnectedness of the world, considering not one world, but many. Topics include colonialism, consumption, diasporic conditions, global media, nationalism, supra-national governance. Examines how globality is experienced and contested locally and specifically.

GLOS 3605. From Printing Press to Internet: Media, Communications, and History. (3 cr; A-F only. §HIST 3705)

Print public sphere in 17th, early 18th century. Political conflicts over freedom of press in 18th, 19th century. Emergence of advertising, public relations industries in 20th century. Significance of broadcast, computer network technologies for democratic political systems.

GLOS 3607. Gender and the Global Politics of Health. (3 cr; A-F only. §WOST 3207)

Politics, global processes, and social relations that shape health/disease patterns world wide. Case studies, including HIV/AIDS in Africa, diabetes and health care in the U.S., new reproductive technologies, and access to food. How gender, poverty, geographic/social location, citizenship, sexuality, and other factors help determine degree of vulnerability to disease or right to health.

GLOS 3613W. Food, Culture, and Society. (3 cr)

Tools to understand food issues from a sociological perspective. Cross-cultural differences in the way groups/societies think about and relate to food.

GLOS 3620. Foreign Language News Coverage of International Events. (1 cr. Prereq—Completion of college language requirement in language used for course)

Compares coverage of current news in selected foreign language newspapers with coverage in a U.S. paper such as The New York Times.

GLOS 3641. Central Asian Culture and Literature. (3 cr. §CAS 3531, MELC 3531)

Dynamics of life in contemporary Afghanistan, Iran, and Central Asia. Emphasizes role of ethnicity/ideology. Central Asian fiction illustrates impact of sovietization on Islamic traditions of region.

GLOS 3643. Islam and the West. (3 cr. §CAS 3533, MELC 3533)

Cultural/intellectual trends that have defined fundamental differences between Islam and the West. Development of historical, philosophical, and intellectual mindset of both spheres. Factors that have contributed and continue to contribute to tension, anxiety, and hatred between the Muslim world and Europe and the United States.

GLOS 3645. Islamic World. (3 cr; A-F only. §GEOG 3145)

Foundation of Islam in Arabian Peninsula, its spread to Asia and Africa. Islamic civilization, influence on Europe before rise of capitalism. Rise of Capitalist Europe, colonization of Islamic World Islamic resurgence and post-colonial World. State-society and development. Culture/conflict in Moslem societies. Gender and Islam. Islamic World and the West. Moslems in North America and Europe. Case studies.

GLOS 3701W. Population in an Interacting World. (4 cr)

Comparative analysis/explanation of trends in fertility, mortality, and internal/international migration in different parts of the world. World population problems, population policies, theories of population growth. Impact of population growth on food supply and the environment.

GLOS 3900. Topics in Global Studies. (1-5 cr [max 15 cr])

Topics vary every semester. See *Class Schedule*.

GLOS 3906. Foreign Language Immersion Program Completion. (1 cr [max 2 cr]; S-N only. Prereq—Enrolled in full

course load in target language, permission of Foreign Language Immersion Program)
Credit attached to Foreign Language Immersion Program.

GLOS 3910. Topics in East Asian Studies. (1-3 cr [max 6 cr])

Selected topics in East Asian Studies not covered in regular courses. Topics reflect instructor interests.

GLOS 3920. Topics in European Studies. (3 cr [max 9 cr])

Topics vary. See *Class Schedule*.

GLOS 3921. Europe: A Geographic Perspective. (3 cr. §GEOG 3 161)

Comparative analysis/explanation of Europe's physical, demographic, ethnic/cultural, economic, political, and urban landscapes. European integration: European Union, transformation of Eastern Europe.

GLOS 3930. Topics in Latin American Studies. (3 cr [max 9 cr])

Topics vary. See *Class Schedule*.

GLOS 3940. Topics in Middle Eastern Studies. (4 cr [max 12 cr])

Description varies with topic title.

GLOS 3950. Topics in Russian Area Studies. (3 cr)

Description varies with topic title.

GLOS 3960. Topics in South Asian Studies. (3 cr)

Topics vary. See *Class Schedule*.

GLOS 3961. Culture and Society of India. (3 cr. §ALL 3676, ANTH 3023)

Contemporary society/culture in South Asia from an anthropological perspective. Nationalism, postcolonial identities. Media, public culture. Gender, kinship/politics. Religion, ethnicity, Indian diaspora.

GLOS 3981W. Major Project Seminar. (3 cr; A-F only)

Supports senior project requirement by allowing students to formulate their own research questions, select a topic, develop and produce a 25-30 page undergraduate research paper.

GLOS 3993. Directed Study. (1-5 cr [max 12 cr]. Prereq—#, Δ, □)

Guided individual reading or study.

GLOS 4221. Sociology of Globalization: Culture, Norms, and Organization. (3 cr; A-F only. \$SOC 4321. Prereq—SOC 1001 or #)

Sociological literature on globalization of organizations, political relations, and culture. Dependency, world systems theories. Growth of international nongovernmental organizations, their impact on state policies and civil society. Expansion of international norms governing nation-state behavior. Globalization of popular culture (movies, computer games, etc.). Contemporary trend toward globalization, its manifold impacts on societies/individuals.

GLOS 4311. Race, Class, and the Politics of Nature. (3 cr) Global debates over how nature is produced, consumed, degraded, sustained, and defended. Analytics of race/class. Politics of North-South relations.

GLOS 4504W. Senior Project. (3 cr. Prereq—Sr or #) Research methods, writing skills, and bibliography related to field of study.

GLOS 4609. MSID Directed Research. (2-8 cr [max 8 cr]. Prereq—Admission to MSID program, Δ) Research project based on field work in Ecuador, India, Kenya, or Senegal through Minnesota Studies in International Development program.

GLOS 4801. International Development: Critical Perspectives on Theory and Practice. (4 cr; A-F only. Prereq—Δ) Interdisciplinary approaches to development. Assumptions, competing paradigms, analysis of policies, projects, problems. Globalization, societal crisis, indigenous alternatives to dominant paradigm. Partially taught in separate sections to deepen understanding of particular topic (e.g., environment, health, education).

GLOS 4802. Cross-Cultural Perspectives on Work. (4 cr; A-F only. Prereq—□) Intercultural communication concepts/skills. US cultural/value system. Stages of adjustment. Coping strategies for crossing cultural boundaries. Host-country cultural characteristics. Emphasizes work, family, community, views of development.

GLOS 4803. MSID Country Analysis. (4 cr; A-F only. Prereq—Δ) Multidisciplinary study of host country. Emphasizes social sciences and history, especially concepts/information regarding development issues.

GLOS 4805. Community Internships in the Global South. (4 cr. Prereq—Admission to MSID program, Δ) Grassroots internship with a host-country development agency or project through Minnesota Studies in International Development. Community characteristics, development strategies/problems, organizational structure/culture, cross-cultural communication issues.

GLOS 4806. Topics: Case Studies in International Development. (4 cr; A-F only. Prereq—Admission to MSID program) Development issues illustrated in students. local-level projects through MSID. Focuses on a particular sector as it relates to development of country. Sample topics: environment and development; health and development; education, literacy, and development; women and development.

GLOS 4807. Applied Field Methods. (4 cr; A-F only) Application of selected field research methods in rural/urban settings in Asia, Africa, and Latin America. Analysis of practical, ethical, and theoretical issues raised through small field assignments and individual research projects.

GLOS 4808. MSID Directed Research. (4 cr [max 8 cr]; A-F only. Prereq—Admission to MSID program, #) Research project based on field work in Ecuador, India, Kenya, or Senegal through Minnesota Studies in International Development (MSID).

GLOS 4809. Advanced International Development Internship. (4 cr) Study abroad course for Minnesota Studies in International Development.

GLOS 4900. Senior Seminar in Global Studies. (3 cr; A-F only. \$GLOS 4900H. Prereq—[3101, 3144, global studies major] or #)

Globalization, nationalism, colonialism, cultural production, environmental sustainability, globalization of economy, migration, diasporas, global conflict/cooperation, human rights. Students examine theoretical debates and cutting edge scholarship and may develop their own research projects. Capstone course.

GLOS 4900H. Honors: Senior Seminar in Global Studies. (3 cr; A-F only. \$GLOS 4900. Prereq—[3101, 3144, honors student, Global Studies major] or #) Globalization, nationalism, colonialism, cultural production, environmental sustainability, globalization of economy, migration, diasporas, global conflict/cooperation, human rights. Students examine theoretical debates and cutting edge scholarship and develop their own research projects. Capstone course.

GLOS 4910. Topics in Global Studies. (3 cr [max 9 cr]) Topics vary every semester. See *Class Schedule*.

GLOS 4940. Topics in Asian History. (1-4 cr [max 16 cr]) Selected topics in Asian history not covered in regular courses.

GLOS 4960. Advanced Topics in South Asian Studies. (3 cr. Prereq—Jr or sr or grad or #) Topics vary. See *Class Schedule*.

GLOS 5103. Empire and Modernity. (3 cr; A-F only. Prereq—[3101, 3144] or #) How modern world has been constituted by colonial encounter. Role of colonialism in construction of west. Images of non-western societies. Modernity in colonial/postcolonial societies. Problems/potential of universal categories such as democracy, gender, history, human rights. Globalization at the margins.

GLOS 5114. International Perspectives: U.S.-Mexico Border Cultures. (3 cr. Prereq—Grad student) The relations of Mexico and the United States from an international perspective with a central focus on the cultural interchange in the border lands between the two countries. Uses both literary and historical materials.

GLOS 5301. Environment & Empire. (3 cr; A-F only. Prereq—[3101, 3144] or #) Key issues in environmental history. Emphasizes global/colonial processes that have made modern environment. Global spread of diseases, modern remaking of world's flora/fauna, idea of nature. New technologies and the environment. Conservationist ideology.

GLOS 5410. Interactive Global and Local Studies. (3 cr; A-F only. Prereq—#) Global studies topics, locally in the Twin Cities and Minnesota, and internationally through linked communication with classes at cooperating universities in other countries. Students communicate with counterparts abroad through e-mail to develop comparative/interactive elements. Possible topics: role of river in local history, grain storage/processing, manufacturing/trade, growth of metropolitan area.

GLOS 5602. Other Worlds: Globality and Culture. (3 cr; A-F only. Prereq—[3101, 3144, grad student] or #) Interconnectedness of world. Considering not one world, but many. Colonialism, consumption, diasporic conditions, global media, nationalism, supra-national governance. How globality is experienced/contested locally/specifically.

GLOS 5603. Socialist/Post-socialist Transformations. (3 cr; A-F only. \$HIST 5251) Transformations underway in post-socialist societies of Eastern Europe, former Soviet Union. Ramifications of abandonment of state socialism, introduction of market relations. Effect of former system, new market system on cultural institutions/identities.

GLOS 5643. Colonialism and Culture. (3 cr; A-F only. \$ANTH 5043) Making of culture as colonial/anthropological object of knowledge. Relationship between colonial knowledge/formation of academic disciplines (especially anthropology). Colonial/postcolonial transformations of colony, nation, and metropole.

GLOS 5801. International Development: Critical Perspectives on Theory and Practice. (3 cr; A-F only. Prereq—Admission to MSID prog, grad student) Interdisciplinary approaches to development. Assumptions, competing paradigms, analysis of policies, projects, problems. Globalization, societal crisis, indigenous alternatives to dominant paradigm. Partially taught in separate sections to deepen understanding of particular topic (e.g., environment, health, education).

GLOS 5802. Cross-Cultural Perspectives on Work. (3 cr; A-F only. Prereq—Admission to MSID prog, grad student) Intercultural communication concepts/skills. U.S. cultural/value system. Stages of adjustment. Coping strategies for crossing cultural boundaries. Host-country cultural characteristics. Emphasizes work, family, community, views of development.

GLOS 5803. MSID Country Analysis. (3 cr; A-F only. Prereq—Admission to MSID prog, grad student) Multidisciplinary study of host country. Emphasizes social sciences and history, especially concepts/information regarding development issues.

GLOS 5805. Community Internships in the Global South. (3 cr. Prereq—Admission to MSID prog, grad student) Grassroots internship with a host-country development agency or project through Minnesota Studies in International Development. Community characteristics, development strategies/problems, organizational structure/culture, cross-cultural communication issues.

GLOS 5806. Topics: Case Studies in International Development. (3 cr; A-F only. Prereq—Admission to MSID prog, grad student) Development issues illustrated in students. local-level projects through MSID. Focuses on a particular sector as it relates to development of country. Sample topics: environment and development; health and development; education, literacy, and development; women and development.

GLOS 5807. Applied Field Methods. (3 cr; A-F only. Prereq—Admission to MSID program) Application of selected field research methods in rural/urban settings in Asia, Africa, and Latin America. Analysis of practical, ethical, and theoretical issues raised through small field assignments and individual research projects.

GLOS 5808. MSID Directed Research. (3 cr; A-F only. Prereq—Admission to MSID prog, grad student) Research project based on field work in Ecuador, India, Kenya, or Senegal through Minnesota Studies in International Development (MSID).

GLOS 5809. Advanced International Development Internship. (3 cr) Study abroad course for Minnesota Studies in International Development.

GLOS 5900. Topics in Global Studies. (1-4 cr [max 4 cr]) Proseminar. Selected issues in global studies. Topics specified in *Class Schedule*.

GLOS 5910. Topics in East Asian Studies. (1-3 cr [max 3 cr]) Description varies with topic title.

GLOS 5920. Topics in European Studies. (3 cr) Description varies with topic title.

GLOS 5930. Topics in Latin American Studies. (3 cr) Description varies with topic title.

GLOS 5940. Topics in Middle Eastern Studies. (3 cr) Description varies with topic title.

GLOS 5950. Topics in Russian Area Studies. (3 cr) Description varies with topic title.

GLOS 5960. Topics in South Asian Studies. (3 cr [max 4 cr]) Description varies with topic title.

GLOS 5993. Directed Studies. (1-4 cr [max 12 cr]. Prereq-#, Δ, □)
Guided individual reading or study. Open to qualified students for one or more semesters.

GLOS 5994. Directed Research. (1-4 cr [max 12 cr]. Prereq-#, Δ, □)
Qualified students work on a tutorial basis.

Greek (GRK)

Department of Classical and Near Eastern Studies
College of Liberal Arts

GRK 1001. Beginning Classical Greek I. (5 cr)
Introduction to classical Greek.

GRK 1002. Beginning Classical Greek II. (5 cr. Prereq-Grade of at least [C- or S] in 1001 or #)
Greek grammar/syntax. Readings from classical Greek authors, including Herodotus and Aristophanes.

GRK 1111H. Honors Course: Beginning Classical Greek. (3 cr. Prereq-Concurrent registration in 1112H, [honors or high ability as indicated by high school trANScript])
Intensive Classical Greek covering material normally taught over two semesters.

GRK 1112H. Honors Course: Classical Greek, Recitation. (3 cr. Prereq-¶1111H, [honors or high ability as indicated by high school transcript])
Drills, composition exercises.

GRK 3111. Intensive Classical Greek. (3 cr. Prereq-Enrollment 3112; previous exper in another foreign language desirable)
Intensive introduction to classical Greek covering two semesters of material in one semester. Undergraduates in this course must also register for 3112 when taking this class.

GRK 3112. Intensive Classical Greek, Recitation. (3 cr. Prereq-¶3111; previous exper in another foreign language desirable)
Drills and composition exercises to help students learn classical Greek. Students must also register for 3111 when taking this course.

GRK 3113. Intermediate Greek Prose. (4 cr; A-F only. Prereq-Grade of at least [C- or S] in 1002 or #)
Readings in Classical Greek prose texts by one or more authors (e.g., Plato, Lysias, Xenophon, Herodotus). Review of grammar/morphology.

GRK 3114. Ionic Authors. (4 cr. Prereq-3113 or Δ)
Students progress from intermediate to advanced Greek reading while exploring the world of Herodotus and Homer.

GRK 3120. Greek New Testament. (3 cr [max 6 cr]. Prereq-Grade of at least [C- or S] in 3113 or #)
Readings from Gospels, epistles of Paul, and related literature. Emphasizes proficiency in reading Greek New Testament. Selections vary.

GRK 3300. Intermediate Greek Poetry. (4 cr [max 8 cr]; A-F only. Prereq-Grade of at least [C- or S] in 3113 or #)
Readings in ancient Greek poetry. Introduction to Greek meter. Homer and tragedy offered in alternate years.

GRK 3310. Advanced Undergraduate Greek: Oratory. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
One or more appropriate authors studied during each course offering.

GRK 3320. Advanced Undergraduate Greek: Tragedy. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
Advanced reading in Greek tragedy.

GRK 3330. Advanced Undergraduate Greek: Comedy. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
Advanced readings in Greek comedy.

GRK 3340. Advanced Undergraduate Greek: History. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
Advanced readings from the Greek historians; traditions of Greek historiography.

GRK 3350. Advanced Undergraduate Greek: Philosophy. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
Read one or more works of Plato or Aristotle in the original Greek and find out what they really mean. Texts vary with each offering.

GRK 3360. Advanced Undergraduate Greek: Religious Texts. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
Reading and discussion of religious texts from Greek antiquity. Selections vary with each course offering.

GRK 3370. Advanced Undergraduate Greek: Epic. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
Reading of classical Greek epic on an advanced level.

GRK 3380. Advanced Undergraduate Greek: Lyric. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
Selections from Greek lyric poets.

GRK 3390. Advanced Undergraduate Greek: Romance. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
Selections from the Hellenistic Romances.

GRK 3440. Advanced Undergraduate Greek: Later Greek Authors. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
Selected topics in later Greek literature, especially Byzantine prose.

GRK 3450. Advanced Undergraduate Greek: Classical Authors. (3 cr [max 9 cr]. Prereq-3114 or 3 years HS Greek or Δ)
Selected topics in classical Greek literature; topics specified in *Class Schedule*.

GRK 3951W. Major Project. (4 cr. Prereq-[[Greek-Latin or Greek major], three 3xxx Greek courses], #, Δ)
Research project using documents and other sources from the ancient world. Students select project in consultation with a faculty member, who directs the research/writing.

GRK 3960H. Honors Course: Advanced Undergraduate Greek Reading. (3 cr [max 12 cr]. Prereq-Enroll in honors program or high ability as indicated by transcript)
Student attends Greek 33xx, 3440, 3450 and does additional work for honors credit.

GRK 3993. Directed Studies. (1-4 cr [max 4 cr])

GRK 5012. Prose Composition. (3 cr. Prereq-Grad student or #)
Moving step by step through Ancient Greek grammar, starting with simple sentences and progressing to complex ones. Course ends with students translating short passages of modern English prose into Greek.

GRK 5013. Advanced Composition. (3 cr. Prereq-Grad student or #)
English-to-Greek verse composition or writing styles of individual Greek authors.

GRK 5032. Text Criticism. (3 cr. Prereq-Grad student or #)
Theory/practice. Elements of paleography and manuscript study. Tools for analyzing textual apparatus; constructing a critical edition of a literary text.

GRK 5121. Biblical and Patristic Greek. (3 cr. Prereq-Grad student or #)
Septuagint, Philo, Josephus, New Testament, Apostolic Fathers, and other patristic literature to 5th century CE. Reading/discussion of selected texts in major genres.

GRK 5310. Greek Literature: Oratory. (3 cr [max 9 cr]. Prereq-Grad student or #)
One or more authors.

GRK 5320. Greek Literature: Tragedy. (3 cr [max 9 cr]. Prereq-Grad student or #)
Reading of Greek tragedy.

GRK 5330. Greek Literature: Comedy. (3 cr [max 9 cr]. Prereq-Graduate student status or instructor consent)
Readings in Greek comedy.

GRK 5340. Greek Literature: History. (3 cr [max 9 cr]. Prereq-Grad student or #)
Readings from Greek historians. Traditions of Greek historiography.

GRK 5350. Greek Literature: Philosophy. (3 cr. Prereq-Grad student or #)
Readings from one or more works of Plato or Aristotle in original Greek. Selections vary.

GRK 5360. Literature: Religious Texts. (3 cr [max 9 cr]. Prereq-Grad student or #)
Reading/discussion of religious texts from Greek antiquity, such as Homeric Hymns, cultic verse, aretology, sacred tales, oracle texts.

GRK 5370. Greek Literature: Epic. (3 cr [max 9 cr]. Prereq-Grad student or #)
Reading classical Greek epic.

GRK 5380. Greek Literature: Lyric. (3 cr [max 9 cr]. Prereq-Grad student or #)
Selections from Greek lyric poets.

GRK 5390. Greek Literature: Romance. (3 cr [max 9 cr]. Prereq-Grad student or #)
Selections from Hellenistic Romances of, e.g., Chariton, Longus.

GRK 5440. Greek Literature: Later Authors. (3 cr [max 9 cr]. Prereq-Grad student or #)
Selected topics in later Greek literature, especially Byzantine prose.

GRK 5450. Greek Literature: Classical Authors. (3 cr [max 9 cr]. Prereq-Grad student or #)
Selected topics in classical Greek literature. Topics specified in *Class Schedule*.

GRK 5621. GRK Paleography. (3 cr. Prereq-Grad student or #)
Analysis of various hands used in Greek manuscripts with attention to date/provenance. History of transmission of Greek literature.

GRK 5715. Introduction to the Historical-Comparative Grammar of Greek and Latin. (3 cr. \$LAT 5715. Prereq-Grad student or #)
Historical/comparative grammar of Greek/Latin, from their Proto-Indo-European origins to classical norms.

GRK 5716. History of Greek. (3 cr. Prereq-Grad student or #)
Reading and formal analysis of documents illustrating evolution of Greek language from Mycenaean to modern times.

GRK 5993. Directed Studies. (1-4 cr [max 18 cr]. Prereq-Grad student or #)
Guided individual reading or study.

GRK 5994. Directed Research. (1-12 cr [max 18 cr]. Prereq-Grad student or #)
Supervised original research on topic chosen by student.

GRK 5996. Directed Instruction. (1-12 cr [max 20 cr]. Prereq-Grad student or #)
Supervised teaching internship.

Health Informatics (HINF)

Department of Laboratory Medicine and Pathology

Medical School

HINF 5430. Health Informatics I. (4 cr; A-F only)
History/challenges of health informatics. Structure of healthcare delivery system. Electronic medical records. Clinical information systems. Basics of information, computation, communication. Data management in health settings. Added value of information systems in health care, Ethical and legal considerations.

HINF 5431. Health Informatics II. (4 cr; A-F only)
Topics related to health care information systems. System integration and communications. System selection/deployment. Current technologies/architectures. Security. Special topics such as telemedicine.

HINF 5436. Seminar. (1 cr; S-N only)
Presentation and discussion of research problems, current literature and topics of interest in Health Informatics.

HINF 5494. Topics in Health Informatics. (1-6 cr [max 6 cr]. Prereq-#)
Individual or group studies in health informatics.

HINF 5496. Internship in Health Informatics. (1 cr [max 3 cr]; S-N only. Prereq-5430, 5431, #)
Practical industrial experience not directly related to student's normal academic experience.

HINF 5499. Capstone Project for the Masters of Health Informatics. (3 cr; A-F only. Prereq-[[5430, 5431] or #], MHI student)

Students apply related knowledge/skills to a practical problem in health informatics. Proper design of projects, past exemplar projects. Students work with adviser to design/complete a project in a practical setting. Students submit a written project report in lieu of a final examination.

Health Systems Management (HSM)

College of Continuing Education

HSM 3501. Clinical Research Concepts and Practice. (3 cr; A-F only. Prereq-College algebra)

Research processes. Focuses on health science applications. Statistics (descriptive, inferential). Research study design, problem statement and protocol development, hypothesis development, feasibility, sampling methods/instruments, data management, data analysis/interpretation, dissemination of research.

HSM 3521. Health Care Delivery Systems. (3 cr; A-F only)

Health care (HC) delivery systems, health economics, third-party/public reimbursement, current trends in HC organizations/management/administration. Regulations, standards, quality assurance, accreditation, current ethical issues. Implications for HC providers/professionals, patients/families, communities, international health.

HSM 4501. Writing for the Health Professions. (3 cr; A-F only)

How to critically review medical literature and present research data. Scientific method, logic, systematic approach, objective analysis. Students support a hypothesis using research of previously conducted work and present data in graphic/narrative form according to professional standards.

HSM 4541. Health Care Finance. (3 cr; A-F only)

General principles of financial management for health care industry. Operational knowledge of financial management theory, esp., how hospitals and their departments develop/balance operating/capital budget for business growth/development. Governmental policies, procedures, and ethical issues controlling the health care industry.

HSM 4561. Health Care Administration and Management. (3 cr; A-F only)

Background/skills in business/administrative aspects of health care. Applications of business theory to medical settings, including organization models, reimbursement methodologies, information systems, staff-scheduling, employee evaluation, accreditation agencies, productivity management, budget planning, and group leadership.

HSM 4581. Teaching in the Health Care Setting. (3 cr; A-F only)

Basic components of contemporary learning theory. How to design teaching strategies, evaluate educational outcomes. Evaluation of educational needs, development of curriculum, application of various instructional methods, assessment of learning. Working with allied health practitioners, patients, and families.

HSM 4611. Allied Health Grand Rounds. (2 cr; A-F only.

Prereq-Respiratory care major)
Capstone course. Allied health clinical/professional issues. Caregiver roles. Global views of national health policy, economics, ethical/legal problems. Challenging clinical cases. Multidisciplinary review. Cases relating individual patient and family experiences. Service project.

Hebrew (HEBR)

Department of Classical and Near Eastern Studies

College of Liberal Arts

HEBR 1001. Beginning Hebrew I. (5 cr. \$HEBR 4001)

For beginners whose goal is biblical or post-biblical Jewish studies, or modern Israeli Hebrew. Leads to speaking, listening comprehension, and reading/writing Hebrew. Emphasizes communication proficiency. Cultural materials are incorporated.

HEBR 1002. Beginning Hebrew II. (5 cr. \$HEBR 4002.

Prereq-Grade of at least [C- or S] in [1001 or 4001] or #)
Continuation of 1001. Leads to speaking, listening comprehension, reading, and writing Hebrew. Emphasizes communication proficiency. Cultural materials.

HEBR 1101. Beginning Biblical Hebrew I. (5 cr. \$HEBR 4104)

Basic grammar/syntax preparatory to reading simple narrative texts in Bible. Multiple approaches to problems/issues in biblical scholarship.

HEBR 1102. Beginning Biblical Hebrew II. (5 cr. \$HEBR 4105.

Prereq-Grade of at least [C- or S] in [1101 or 4104] or #)
Progression to more sophisticated reading of narrative, prophetic, and legal texts. Presentation/discussion of multiple approaches to problems/issues in biblical scholarship.

HEBR 3011. Intermediate Hebrew I. (5 cr. Prereq-Grade of at least [C- or S] in [1002 or 4002] or #)

Prepares students for CLA language requirement. Speaking, reading, writing, and comprehension of modern Hebrew. Students read/discuss prose, poetry, news, and film. Important features of biblical/classical Hebrew. Taught primarily in Hebrew.

HEBR 3012. Intermediate Hebrew II. (5 cr. Prereq-Grade of at least [C- or S] in in 3011 or #)

Extensive reading of simplified modern Hebrew prose selections. Students discuss poetry, newspaper, film, and TV in Hebrew. Israeli cultural experiences. Hone composition, listening comprehension, speaking skills to prepare for proficiency exams. Biblical prose, simple poetic texts. Taught in Hebrew.

HEBR 3090. Advanced Modern Hebrew. (3 cr [max 18 cr]. Prereq-3012 or #)

Preparation to read various kinds of authentic Hebrew texts and to develop higher levels of comprehension/speaking. Conducted entirely in Hebrew. Emphasizes Modern Israeli Hebrew. Introduction to earlier genres. Grammar, widening vocabulary. Contemporary short fiction, essays, articles on cultural topics, films, Hebrew Internet sites, TV.

HEBR 3101. Intermediate Biblical Hebrew I. (4 cr.

Prereq-Grade of at least [C- or S] in [1102 or 4105] or #)
Text of Hebrew Bible. Basic research tools/commentaries. Close reading of narrative biblical texts. Reading fluency, methods of research in biblical studies.

HEBR 3102. Intermediate Biblical Hebrew II. (4 cr.

Prereq-Grade of at least [C- or S] in 3101 or #)
Text of Hebrew Bible, basic research tools/commentaries. Close reading of narrative biblical texts. Reading fluency, methods of research in biblical studies.

HEBR 3200. Advanced Classical Hebrew. (3 cr [max 18 cr].

\$HEBR 5200. Prereq-3012 or 3102 or #)
In-depth reading, analysis, and discussion of classical Hebrew texts. Grammar, syntax. Introduction to text-criticism, history of scholarship, and scholarly tools. Format varies between survey of themes (e.g., law, wisdom, poetry) and extended concentration upon specific classical texts.

HEBR 3300. Post-Biblical Hebrew: Second Temple Period. (3 cr [max 18 cr]. Prereq-3102 or #)

Readings in late-/post-biblical Hebrew literature of Persian, Hellenistic, and early Roman periods (e.g., Chronicles, Ezra-Nehemiah, Ecclesiastes, Daniel, Dead Sea Scrolls, apocrypha, pseudepigrapha). Focuses on historical development of Hebrew language/literature in relation to earlier biblical sources.

HEBR 3400. Rabbinic Texts. (3 cr [max 18 cr]. Prereq-3012 or 3102 or #)

Language, idiom, and literary forms of classical Rabbinic sources in Hebrew. Selections drawn from legal, homiletical, and narrative texts (Mishnah, Tosefta, Talmud, Midrash). Original socio-historical/cultural background of Rabbinic literature, its enduring religious significance.

HEBR 3951W. Major Project. (4 cr. Prereq-[Hebr major, three 3xxx Hebrew courses], #, Δ)

Research project using primary and secondary sources. Students select project in consultation with a faculty member, who directs the research/writing.

HEBR 3980. Directed Instruction. (1-4 cr [max 4 cr].

Prereq-#)
For students interested in careers in Hebrew education. Observe and discuss classes. Gradually increased participation in preparing and presenting instructional materials to a beginning Hebrew class. Evaluation of materials, teaching techniques. Seminars with instructor and staff on language teaching issues.

HEBR 3990. Topics in Hebrew Studies. (1-4 cr [max 12 cr]. Prereq-#, Δ)

Historical, linguistic, literary, religious, or humanistic study of Hebrew society and culture. Approach and method of study varies with topic.

HEBR 3993. Directed Studies. (1-4 cr)

Guided individual reading or study.

HEBR 4001. Beginning Hebrew I. (3 cr. \$HEBR 1001.

Prereq-Grad student)
Leads to speaking, listening comprehension, reading/writing Hebrew. Emphasizes communication proficiency. Cultural materials are incorporated. Meets concurrently with 1001.

HEBR 4002. Beginning Hebrew II. (3 cr. \$HEBR 1002.

Prereq-Grade of at least [C- or S] in [1001 or 4001] or #)
Speaking, listening comprehension, reading/writing Hebrew. Emphasizes communication proficiency. Cultural materials. Meets with 1002.

HEBR 4011. Intermediate Hebrew I. (3 cr. Prereq-Grade of at least [C- or S] in [1002 or 4002] or #)

Prepares students for CLA language requirement. Speaking, reading, writing, and comprehension of modern Hebrew. Students read/discuss prose, poetry, news, and film. Taught primarily in Hebrew. Meets with 3011.

HEBR 4012. Intermediate Hebrew II. (3 cr)

Extensive reading of simplified modern Hebrew prose selections. Students discuss poetry, newspaper, film, and TV in Hebrew. Israeli cultural experiences. Composition, listening comprehension, speaking. Taught in Hebrew. Meets with 3012.

HEBR 4104. Basics of Biblical Hebrew I. (3 cr. \$HEBR 1101. Prereq-Grad student)

Basic grammar/syntax preparatory to reading simple narrative texts in Bible. Multiple approaches to problems/issues in biblical scholarship. Meets with 1104.

HEBR 4105. Basics of Biblical Hebrew II. (3 cr. §HEBR 1102. Prereq—Grade of at least [C- or S] in [1101 or 4104] or #) Progression to more sophisticated reading of narrative, prophetic, and legal texts. Presentation/discussion of multiple approaches to problems/issues in biblical scholarship. Meets with 1105.

HEBR 4106. Intermediate Biblical Hebrew I. (3 cr. Prereq—Grade of at least [C- or S] in [1102 or 4105] or #) Text of Hebrew Bible. Basic research tools/commentaries. Close reading of narrative biblical texts. Reading fluency, methods of research in biblical studies. Meets with 3101.

HEBR 4107. Intermediate Biblical Hebrew II. (3 cr. Prereq—Grade of at least [C- or S] in 3101 or #) Text of Hebrew Bible, basic research tools/commentaries. Close reading of narrative biblical texts. Reading fluency, methods of research in biblical studies. Meets with 3102.

HEBR 5090. Advanced Modern Hebrew. (3 cr [max 18 cr]. Prereq—3012 or #) Preparation to read various kinds of authentic Hebrew texts and to develop higher levels of comprehension/speaking. Conducted entirely in Hebrew. Emphasizes Modern Israeli Hebrew. Introduction to earlier genres. Grammar, widening vocabulary. Contemporary short fiction, essays, articles on cultural topics, films, Hebrew Internet sites, TV.

HEBR 5200. Advanced Classical Hebrew. (3 cr [max 18 cr]. §HEBR 3200. Prereq—[3 sem of biblical Hebrew, 5 sem of modern Hebrew] or #) In-depth reading, analysis, and discussion of classical Hebrew texts. Grammar, syntax. Introduction to text-criticism, history of scholarship, and scholarly tools. Format varies between survey of themes (e.g., law, wisdom, poetry) and extended concentration upon specific classical texts.

HEBR 5300. Post-Biblical Hebrew: Second Temple Period. (3 cr [max 18 cr]. Prereq—Grad student or #) Readings in late-/post-biblical Hebrew literature of Persian, Hellenistic, and early Roman periods (e.g., Chronicles, Ezra-Nehemiah, Ecclesiastes, Daniel, Dead Sea Scrolls, apocrypha, pseudepigrapha). Focuses on historical development of Hebrew language and literature in relation to earlier biblical sources.

HEBR 5400. Rabbinic Texts. (3 cr [max 18 cr]. Prereq—Grad student or #) Language, idiom, and literary forms of classical Rabbinic sources in Hebrew. Selections drawn from legal, homiletical, and narrative texts (Mishnah, Tosefta, Talmud, Midrash). Original socio-historical/cultural background of Rabbinic literature, its enduring religious significance.

HEBR 5990. Topics in Hebrew Studies. (1-4 cr [max 12 cr]. Prereq—Grad student or #) Historical, linguistic, literary, religious, or humanistic study of Hebrew society/culture. Approach/method of study varies with topic.

HEBR 5992. Directed Readings. (1-4 cr [max 12 cr]. Prereq—3012 or #) Guided individual reading or study.

Hindi (HNDI)

Department of Asian Languages and Literatures
College of Liberal Arts

HNDI 1001. Introduction to Conversational Hindi. (3 cr; A-F only) Advanced grammatical structures, oral forms, new vocabulary reinforced from lessons around everyday life situations. Oral/written drills, reading for comprehension, audio-visual work.

HNDI 1015. Accelerated Beginning Hindi. (5 cr) Aspects of linguistic performance: speaking, reading, writing, listening. Cultural/linguistic literacy about South Asia and, in particular, India. Emphasizes individual learning styles/preferences for students to understand/retain information.

HNDI 1016. Accelerated Intermediate Hindi. (5 cr. Prereq—1015 or 1102 or 4002 or #) Conversational aspect of Hindi. Interactive group activities, video/lab sessions. Engaging in reasonably fluent discourse. Formal grammar. Advanced reading, writing, and comprehension. Different genres/styles of spoken/written Hindi. Taught mainly in Hindi.

HNDI 1017. Accelerated Hindi. (5 cr. Prereq—Ability in basic spoken Hindi) Intensive course. Reading, writing, listening, and speaking in various functions and cultural contexts. Focuses on reading/writing.

HNDI 1101. Beginning Hindi. (5 cr. §HNDI 4001) Basic listening, speaking, reading, and writing skills. Emphasis on the development of communicative competence.

HNDI 1102. Beginning Hindi. (5 cr. §HNDI 4002. Prereq—1101) Basic listening, speaking, reading, and writing skills. Emphasizes communicative competence.

HNDI 3101. Beginning Hindi. (5 cr) Basic listening, speaking, reading, and writing skills. Emphasis on the development of communicative competence.

HNDI 3102. Beginning Hindi. (5 cr) Basic listening, speaking, reading, and writing skills. Emphasis on the development of communicative competence.

HNDI 3131. Intermediate Hindi. (5 cr. §HNDI 4003. Prereq—1102 or #) Development of reading, writing, speaking, and listening skills. Grammar review, some basic compositions and oral presentations.

HNDI 3132. Intermediate Hindi. (5 cr. §HNDI 4004. Prereq—3131 or #) Development of reading, writing speaking, and listening skills. Grammar review, some basic compositions and oral presentations.

HNDI 3290. Hindi Language Teaching Tutorial. (1 cr [max 2 cr]. Prereq—Grade of A in 4162) Students tutor beginning students of Hindi and are part of department's Hindi language team.

HNDI 4001. Beginning Hindi. (3 cr. §HNDI 1101. Prereq—passing score on GPT in another language or grad student) Listening, speaking, reading, and writing skills. Emphasizes development of communicative competence. Meets with 1101.

HNDI 4002. Beginning Hindi. (3 cr. §HNDI 1102. Prereq—[4001, passing score on GPT in another language] or grad student) Listening, speaking, reading, and writing skills. Emphasizes development of communicative competence. Meets with 1102.

HNDI 4003. Intermediate Hindi. (3 cr. §HNDI 3131. Prereq—4002, [passing score on GPT in another language or grad student]) Reading, writing, speaking, and listening skills. Grammar review, basic compositions, oral presentations. Meets concurrently with 3131.

HNDI 4004. Intermediate Hindi. (3 cr. §HNDI 3132. Prereq—4003, [passing score on GPT in another language or grad student]) Reading, writing, speaking, and listening skills. Grammar review, basic compositions, oral presentations. Meets concurrently with 3132.

HNDI 4161. Advanced Hindi. (4 cr. Prereq—3132 or #) Continued emphasis on the development of communication skills, i.e., the ability to comprehend both written and spoken texts, and to speak, read, and write in Hindi beyond the intermediate level.

HNDI 4162. Advanced Hindi. (4 cr. Prereq—4161 or #) Continued emphasis on the development of communication skills, i.e., the ability to comprehend both written and spoken texts, and to speak, read, and write in Hindi, beyond the intermediate level.

HNDI 5040. Readings in Hindi Texts. (2-4 cr [max 12 cr]; A-F only. Prereq—4162 or equiv or #) Students read authentic materials of various types to improve reading/speaking ability. Topics specified in *Class Schedule*.

HNDI 5710. Topics in Hindi Language, Literature, and Culture. (4-5 cr [max 5 cr]) Topics in Hindi literature or the linguistic structure of Hindi.

HNDI 5990. Directed Research. (3-5 cr [max 5 cr]. Prereq—#, Δ, □)

HNDI 5993. Directed Readings. (1-4 cr [max 12 cr]. Prereq—#, Δ, □) Guided individual reading or study of modern Hindi texts.

History (HIST)

Department of History

College of Liberal Arts

HIST 1011V. Honors:World History. (4 cr. §HIST 1011W, HIST 1017. Prereq—Fr or soph, honors student) World civilizations in 1550. Compares religion, politics, economy, society, culture. Examples from Africa, Europe, Asia, the Americas.

HIST 1011W. World History. (4 cr. §HIST 1011W, HIST 1017. Prereq—[Fr or soph (any)] or [jr or sr, non-Hist mjr only]) World civilizations, from prehistory to 1550. Compares religion, politics, economy, society, and culture. Examples drawn from Africa, Europe, Asia, and the Americas.

HIST 1012V. Honors: World History. (4 cr. §HIST 1018. Prereq—Fr or soph, honors student) World history, from 1450 to 1920s. Comparisons of and connections among various cultures. Emphasizes analyzing primary documents to show how historical knowledge is produced. Case studies. Web-enhanced.

HIST 1012W. World History: The Age of Global Contact. (4 cr. Prereq—[Fr or soph (any)] or [jr or sr, non-Hist mjr only]) Case study approach to world history from 1450 to 1920s. Comparisons of and connections among various cultures. Emphasizes analyzing primary documents to show how historical knowledge is produced. Web-enhanced course.

HIST 1015V. Introduction to Global History Since 1950. (4 cr; A-F only. §GLOS 1015V, GLOS 1015W, HIST 1019. Prereq—Fr or soph honors) Global History in Information Age. East-West divisions during Cold War: North-South relations in global economy. Emerging consciousness of global systems. Issues of human rights, labor migration, environmental degradation, indigenous peoples. Emphasizes comparison of cases from Asia, Africa, Latin America.

HIST 1015W. Introduction to Global History Since 1950. (4 cr; A-F only. Prereq—[Fr or soph (any)] or [jr or sr, non-Hist mjr only]) Global History in Information Age. East-West divisions during Cold War: North-South relations in global economy. Emerging consciousness of global systems. Issues of human rights, labor migration, environmental degradation, indigenous peoples. Emphasizes comparison of cases from Asia, Africa, Latin America.

HIST 1017. World History. (3 cr. §HIST 1011W, HIST 1011W) World civilizations from prehistory to 1550, comparing religion, politics, economy, society, and culture. Examples drawn from Africa, Europe, Asia, and the Americas.

HIST 1018. World History: The Age of Global Contact. (3 cr. §HIST 1012V)
Case study approach to world history from 1450 to 1920s. Comparisons of and connections among various cultures. Emphasizes analyzing primary documents to show how historical knowledge is produced. Course is Web-enhanced.

HIST 1019. Introduction to Global History Since 1950. (3 cr. §GLOS 1015V, GLOS 1015W, HIST 1015V)
Global History in Information Age. East-West divisions during Cold War: North-South relations in global economy. Emerging consciousness of global systems. Issues of human rights, labor migration, environmental degradation, indigenous peoples. Emphasizes comparison of cases from Asia, Africa, Latin America.

HIST 1026. Western Civilization from its Origins to ca 1500. (3 cr. §HIST 1031V)
Western civilization from its origins in ancient Middle East to Europe in 1500. Law, religion, governments, history of ideas, social organization.

HIST 1027. Western Civ From 1500 to Present. (3 cr. §HIST 1032V)
Role of European civilization in world history from early 16th century to present. Broad chronological periods/themes.

HIST 1031V. Honors: Survey of Western Civilization From its Origins to ca 1500. (4 cr. §HIST 1026. Prereq—Fr or soph, honors student)
Development of western civilization, from its origins in ancient Middle East to Europe in 1500. Law, religion, government, history of ideas, social organization.

HIST 1031W. Western Civilization, From Its Origins to ca 1500. (4 cr. Prereq—[Fr or soph (any)] or [Jr or sr, non-Hist mjr only])
Western civilization, from its origins in ancient Middle East to Europe in 1500. Law, religions, governments, history of ideas, social organization.

HIST 1032V. Honors: Western Civilization, From 1500 to Present. (4 cr. §HIST 1027. Prereq—Fr or soph, honors student)
Role of European civilization in world history, from early 16th century to present. Broad chronological periods/themes.

HIST 1032W. Western Civilization, From 1500 to Present. (4 cr. Prereq—[Fr or soph (any)] or [Jr or sr, non-Hist mjr only])
Role of European civilization in world history, from early 16th century to present. Broad chronological periods/themes.

HIST 1301V. Honors: U.S. History to 1877. (4 cr. §HIST 1301W, HIST 1307. Prereq—[Fr or soph], honors)
Issues, events, and ideas in the social, political, and intellectual history of the United States, from colonial era through the Civil War and reconstruction. Colonization, revolution, national expansion, religion, reform movements, slavery, immigration, industrialization, gender roles, and labor relations.

HIST 1301W. U.S. History to 1877. (4 cr. §HIST 1301V, HIST 1307. Prereq—[Fr or soph (any)] or [Jr or sr, non-Hist mjr only])
Issues, events, and ideas in the social, political, and intellectual history of the United States, from colonial era through the Civil War and reconstruction. Colonization, revolution, national expansion, religion, reform movements, slavery, immigration, industrialization, gender roles, and labor relations.

HIST 1302V. Honors: U.S. History, From 1865 to Present. (4 cr. §HIST 1302W, HIST 1308. Prereq—[Fr or soph], honors)
Forces that shaped emergence of modern America, from end of Civil War to present. Shaping of the industrial/post-industrial economy. Work and everyday life. Race relations and immigration. Popular culture. Politics and reform movements. Impact of war on American society. Role of the United States as a global power, before, during, and after Cold War.

HIST 1302W. U.S. History, From 1865 to Present. (4 cr. §HIST 1302V, HIST 1308. Prereq—[Fr or soph (any)] or [Jr or sr, non-Hist mjr only])
Forces that shaped emergence of modern America, from end of Civil War to present. Shaping of the industrial/post-industrial economy. Work and everyday life. Race relations and immigration. Popular culture. Politics and reform movements. Impact of war on American society. Role of the United States as a global power, before, during, and after Cold War.

HIST 1307. American History to 1877. (3 cr. §HIST 1301V, HIST 1301W)
Issues, events, and ideas in the social, political, and intellectual history of the United States, from colonial era through Civil War and reconstruction. Colonization, revolution, national expansion, religion, reform movements, slavery, immigration, industrialization, gender roles, and labor relations.

HIST 1308. U.S. History: From 1865 to Present. (3 cr. §HIST 1302V, HIST 1302W)
Forces that shaped emergence of modern America, from end of Civil War to present. Shaping of industrial/post-industrial economy. Work and everyday life. Race relations and immigration. Popular culture. Politics and reform movements. Impact of war on American society. Role of the United States as a global power, before, during, and after Cold War.

HIST 1902. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

HIST 1904. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

HIST 1905. Freshman Seminar. (2-3 cr [max 3 cr]; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

HIST 1907W. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

HIST 1908W. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

HIST 1909W. Freshman Seminar. (3 cr [max 6 cr]; S-N only. Prereq—Freshman)
Topics specified in *Class Schedule*.

HIST 1910W. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)
Topics specified in Course Guide.

HIST 3001. Public History. (3 cr; A-F only. Prereq—[Jr or sr], #)
Interpretations of a collective past as produced in various public venues, including museum exhibitions, films, theme parks, and Web sites. Intellectual/political issues associated with history produced for public audiences. Introduction to career opportunities in the field.

HIST 3051. Ancient Civilization: Near EAST and Egypt. (3 cr)
A broad survey of ancient Near Eastern and Egyptian history and culture from the prehistoric to the rise of Persia around 550 B.C.

HIST 3052. Ancient Civilization: Greece. (3 cr)
A broad survey of ancient Greek culture and history from the third millennium B.C. to the death of Alexander the Great in 323 B.C.

HIST 3053. Ancient Civilization: Rome. (3 cr)
A broad survey of the culture and history of Rome from its origins to the decline and fall of the Roman Empire in the third and fourth centuries A.D.

HIST 3061. "Bread and Circuses": Spectacles and Mass Culture in Antiquity. (3 cr)
Development of large-scale public entertainments in ancient Mediterranean world, from athletic contests of Olympia and dramatic festivals of Athens to chariot races and gladiatorial games of Roman Empire. Wider significance of these spectacles in their impact on political, social, and economic life of the societies that supported them.

HIST 3101. Introduction to Medieval History. (3 cr)
Europe from decline of Rome to early Renaissance. Politics, institutions, society, economy, and culture of Middle Ages.

HIST 3151W. British History to the 17th Century. (4 cr)
The making of the English nation: Anglo-Saxons and Normans; development of English law and Parliament; Reform and constitutional crisis; early Wales, Scotland, and Ireland.

HIST 3152. British History From the Seventeenth Century. (4 cr)
Civil War, Revolution, and constitutional settlement. Industrialization and growth of democracy. Rise/decline of British Empire.

HIST 3211. History of Sexuality in Europe. (3 cr; A-F only)
History of sexuality in Europe, from ancient Greece to present. Plato's philosophy of love, St. Augustine's conception of sin, prostitution in 15th century, sexual science of Enlightenment. Industrial revolution and homosexual subcultures. Rape scares and imperialism. Eugenics and Nazi Germany.

HIST 3212. Dissident Sexualities in U.S. History. (3 cr; A-F only. Prereq—Jr or sr or #)
History of sexuality in the United States. Emphasizes sexualities that have challenged dominant social/cultural norms. Development of transgender, bisexual, lesbian, and gay identities/communities. Politics of sex across lines of race/ethnicity. Historical debates over controversial practices, including sex work.

HIST 3244. History of Eastern Europe. (3 cr)
History of the peoples of the region from their origins to modern times, culture and society in the Middle Ages; Golden Age of Eastern Europe; loss of independence; nationalism and formation of national states; fascism and World War II, Jews in Eastern Europe; communist and post-communist periods.

HIST 3271. The Viking World: Story, History, and Archaeology. (3 cr. §HIST 5271)
Viking society and expansion of Viking influence abroad. Viking impact on Western Europe; interactions with Slavic lands; settlement of North Atlantic islands; and Western Europe's impact on Scandinavian lands. Analyzes archaeological, historical, linguistic, and numismatic evidence.

HIST 3281. European Intellectual History: The Early Modern Period, 1400-1750. (3 cr. §HUM 3281)
First of a two-semester course. European thought in its historical/cultural context. Emphasizes development of philosophical/scientific thought, its relation to thinking about the individual and the community. Readings are from original sources.

HIST 3282. European Intellectual History: The Modern Period, 1750-Present. (3 cr. §HUM 3282)
Second of a two-semester course. European thought in its historical/cultural context. Emphasizes development of philosophical/scientific thought, its relation to thinking about the individual and the community. Readings are from original sources.

HIST 3347. Women in Early and Victorian America: 1600-1890. (3 cr. §WOST 3407)
The varied experiences of American women 1600-1900. Topics include women's involvement in the dispossession of native peoples, westward expansion, slavery, industrialization, reform, revolution, and transformations in family life and sexuality.

HIST 3348. Women in Modern America. (3-4 cr. §WOST 3408)
History of women in the United States from 1890 to the present. Explores women's changing roles in politics, the labor force, the family, and popular culture.

HIST 3349. U.S. Women's Legal History. (3 cr; A-F only. Prereq—[Jr or sr], basic grasp of U.S. history)
Women's legal status, from colonial era through 20th century. Women's citizenship, civil rights. Marriage, divorce, and child custody. Reproductive/physical autonomy/integrity. Economic/educational equality.

- HIST 3401W. Early Latin America to 1825.** (4 cr; A-F only. §LAS 3401W)
American/Iberian societies before contact. Social, cultural, and economic interactions among Native Americans, African slaves, Europeans, and people of mixed race during colonial period (c. 1492-1825).
- HIST 3402W. Modern Latin America 1825 to Present.** (4 cr. §LAS 3402W)
National and contemporary period 1825 to present, with emphasis on social, cultural, political, and economic change.
- HIST 3415. Migrations in Modern Global History.** (3 cr)
Today's debates about immigration in historical/comparative perspective. Major migrations into, within, and out of Americas over 500 years. Lives/identities of U.S. immigrants compared with foreigners living/working in Latin America, Europe, and Asia. Words/voices of migrants.
- HIST 3419. The World's Economy Since 1500 in Comparison.** (3 cr)
Causes of economic inequities in contemporary world. Long-term economic developments in cases taken from Africa, Asia, Europe, and North/South America. Various theoretical approaches to study of economic development. Introduction to key concepts.
- HIST 3421. The World and the West 1400-1900.** (3 cr; A-F only. Prereq—one sem of world history or Western civilization recommended)
Survey of the political, economic, religious, and cultural interaction between the peoples of Europe and the peoples of Africa, the Americas, and Asia, with reference to perceptions of alien cultures by both sides.
- HIST 3423. Central American Revolutions.** (3 cr. §CHIC 3423)
Social, political and economic issues that have shaped Central American history for nearly two centuries. Focuses on influences of colonial histories, capitalist development, ethnic/racial conflict, foreign intervention, Catholic Church, civil war throughout region. Readings cover events in Guatemala, Honduras, El Salvador, Nicaragua, Costa Rica, Panama.
- HIST 3424. Women and Gender in Latin American History.** (3 cr. §WOST 3413)
Changing gender norms in Latin America over time as compared with lives of women and men of diverse classes and ethnic groups. How women responded to their position in society, on a continuum from accommodation to resistance.
- HIST 3425. History of Modern Mexico.** (3 cr. §CHIC 3425)
Mexico from independence to the present: struggles for land, liberty, and equality; ethnicity, gender, and class; economic growth, nationalism, and globalization; urbanization, immigration, demographic transition.
- HIST 3427. History of Cuba and Puerto Rico.** (3 cr. §CHIC 3427, LAS 3427)
Historical development of Cuba and Puerto Rico from pre-Columbian times through Spanish conquest to the present. Conquest and colonization, slavery, Hispanic Caribbean society and culture, Operation Bootstrap, Cuban Revolution.
- HIST 3429. Latin American History in Film and Text.** (3 cr)
Cinematic representations of Latin America in context of other historical/literary narratives. Experiences of Latinos in Hollywood. U.S. films compared with those produced in Latin America. Themes vary (e.g., women, revolution, colonialism).
- HIST 3431. Early Africa and Its Global Connections.** (4 cr. §AFRO 3431)
Survey of African history from earliest times to 1800. Focuses on socioeconomic, political, and cultural development in pre-colonial Africa from ancient Egypt through the era of the trans-Atlantic slave trade.
- HIST 3432. Modern Africa in a Changing World.** (4 cr. §AFRO 3432)
Survey of modern African history from early 19th century to present. Focuses on socioeconomic, political, and cultural development in Africa, from abolition of trans-Atlantic slave trade through postcolonial era.
- HIST 3433. Images of Africa.** (3 cr)
Major themes in African history, from early human development to present. History of western "knowledge" about Africa. Assumptions that have influenced production of African history. Extent to which African history is "packaged" for public consumption inside/outside Africa. How history is used to support modern political agendas.
- HIST 3434. History of South Africa to 1910.** (3 cr. §AFRO 3204)
Introduction to history of South Africa from early humans to arrival of first Dutch settlers at Cape of Good Hope in 1652 to formation of Union of South Africa in 1910.
- HIST 3435. History of South Africa from 1910.** (3 cr. §AFRO 3205)
History of South Africa from union to present. Focuses on issues such as African/Afrikaner nationalism, structures of apartheid, forced population removals, divestment/sanctions, and post-apartheid era.
- HIST 3436. Historical Background to Contemporary African Conflicts: Case Studies.** (3 cr)
Using case studies. Historical contexts in which specific contemporary political conflicts developed. Slave trade, colonial conquest, indirect rule, forced labor, discretionary justice, and other historical issues. Patterns of human rights violations and of socio-political conflict. Cases studies might include Somalia, Democratic Republic of Congo, and Rwanda.
- HIST 3437. History of East Africa.** (3 cr. §AFRO 3437, AFRO 5437, HIST 5437)
Major themes in history of East Africa, from era of early human cultural development to present. Methods that historians use to reconstruct history. Varying interpretations/constructions of history over time.
- HIST 3438. History of Women in South Africa.** (3 cr. §AFRO 4001)
Changing role/status of women in South Africa from pre-colonial era to present. Relationships to political, social, economic development.
- HIST 3439. Popular Narratives of the African Past.** (3 cr)
Diverse ways that ordinary Africans have interpreted/portrayed particular events in African history. Different popular depictions of African past, their relationships with academic histories.
- HIST 3441. Chicana/o History to 1900.** (3 cr. §CHIC 3444, HIST 3444, LAS 3441)
History of the Mexican people from the 16th through the 19th centuries. Historical theories of colonialism, expansion, economy, assimilation, migration, and settlement; race, class and gender, political, social, and cultural interaction and conflict.
- HIST 3442. Chicana/o History: 1900 to Present.** (3 cr. §CHIC 3442, LAS 3442)
Migration, repatriation, the Bracero program, contemporary Chicana/o politics, the Chicana/o movement, work, society, and culture. Lecture format with 2-3 videos/movies on selected topics. A wide range of reading from texts and articles.
- HIST 3444. Chicana and Chicano History: 1821-1945.** (3 cr. §CHIC 3444, HIST 3441, LAS 3441)
Experiences of people of Mexican descent in the United States. Important eras in histories of Mexico, the United States, and Mexican Americans. Central role of Chicana/os in U.S. history, culture, and politics.
- HIST 3452. African Conservation Histories.** (3 cr)
Historical roots of conservation in Africa in 19th/20th centuries. Historical context of contemporary laments about Africa's environmental degradation, older efforts to exploit/control African people/resources. Focuses on how Africans have interacted with and managed their lands/resources.
- HIST 3453. African Rural Social History Since 1800.** (3 cr)
Change in lives of African rural people. Focuses on changing livelihood strategies, labor, households, and families. Competition for resources among African farmers/herders in 19th/20th centuries.
- HIST 3461. Introduction to EAST Asia I: The Imperial Age.** (3-4 cr [max 4 cr]. §EAS 3461)
Comparative survey of early history of China, Japan, Korea, and Vietnam. Early Chinese thought. Diffusion of Confucianism, Buddhism, and other values throughout East Asia. Political and social history of region to 1600.
- HIST 3462. Introduction to EAST Asia II: 1600-2000.** (3-4 cr [max 4 cr]. §EAS 3462)
Formation/decline of early modern Asian empires. Western imperialism/Asian nationalism. Social revolution, economic modernization, and cultural change in China, Japan, Korea, and Vietnam, 1600-2000.
- HIST 3464. China in the Song, Yuan, and Ming Dynasties.** (3 cr. §EAS 3464, HIST 5464)
China during the Song (976-1279), Yuan (1279-1368), and Ming (1368-1644) dynasties; political institutions and social structures. Attention to primary sources and how historians ask and answer questions about the past.
- HIST 3465W. China in the Ming and Qing Dynasties.** (3 cr. §EAS 3465W, HIST 5465)
The political and social history of China from about 1600 until the end of the Qing dynasty in 1911. Topics include ethnicity, daily life, legal structures, city life, and peasantry.
- HIST 3467W. State and Revolution in Modern China.** (3 cr. §EAS 3467W, HIST 5467)
Modern China's political evolution, including the Taiping Rebellion, Republican Revolution, Rise of Nationalist and Communist Parties, Maoist era; reform under Deng Xiaping and the emergence of democracy in Taiwan.
- HIST 3468. Social Change in Modern China.** (3 cr. §EAS 3468, HIST 5468)
Opium War and opening of Treaty Ports in 19th century. Missionary activity and cultural influence. Changes in education system. Women's movement. Early industrialization. Socialism/collectivization after 1949. Industrialization of Taiwan. PRC's entry into world trading system.
- HIST 3471. Modern Japan, Meiji to the Present (1868-2000).** (3 cr. §EAS 3471)
Japan's early development as industrial/imperial power after Meiji Restoration of 1868. Political developments in Taisho years: social, cultural, economic trends that supported them. Militarization/mobilization for war in 1930s. Japan's war with China, Pacific War with the United States. American Occupation. Postwar economic recovery, high growth. Changing political/popular culture of 1980s, '90s.
- HIST 3472. Early Modern Japan.** (3 cr. §EAS 3472)
Tradition/change in society/culture under Tokugawa shoguns (1600-1867). Growth of cities. Decline of samurai class. Response to Western intrusion.
- HIST 3474. The Rise of Modern Japan: 1850s to 1900s.** (3 cr; A-F only. §EAS 3474)
The Meiji Revolution from Commodore Perry to the eve of World War I; origins of constitutional monarchy, industrial economy, Western influences, and modern cultural change.

HIST 3476. War and Peace in Japan Through Popular Culture. (4 cr; A-F only. Prereq—Some knowledge of modern Japanese history or #)
War-related issues in Japan. Animation films, comics from 1940s to 1990s. Mobilization of culture for WWII. Conflict between constitutional pacifism and national security. Japan's role in cold war and post-cold war worlds.

HIST 3479. History of Chinese Cities and Urban Life. (3-4 cr [max 4 cr]; A-F only. \$HIST 5479)
Introduction to traditional Chinese cities, their modern transformation. Ideal city plan in Confucian classics compared with physical layout of some major cities. Models about Chinese cities, influence of the models on our understanding of Chinese history/society.

HIST 3485. History of Southeast Asia. (3 cr; A-F only)
Origins of civilization, rise of empires such as Angkor, diffusion of Hinduism, Buddhism, Islam, and Christianity, West European intrusion through the imperialist era, rise of nationalism, and the establishment of nation-states.

HIST 3489. 20th Century India. (3 cr; A-F only)
India under British hegemony in 1914 through Mahatma Gandhi and his nationalist movement; World War II; the British departure; creation of India and Pakistan; Nehru; Indira and Rajiv Gandhi.

HIST 3491. Classical Islamic Civilization. (3 cr. \$ARAB 3491, ARAB 5491, MELC 3491)
Islamic legacy in the classical age (800-1400) in the sciences - natural and medical - mathematics, philosophy, and literature, and their transmission to Europe.

HIST 3493. Islam: Religion and Culture. (3 cr. \$ARAB 3036, HUM 3036, RELA 3036. Prereq—Soph or jr or sr)
Religion of Islam, faith, practices, sectarian splintering. Expansion outside original home to status of world religion. Institutions. Status in Asia, Europe, and Americas.

HIST 3502. Ancient Israel: From Conquest to Exile. (3 cr. \$CNES 3502, CNES 5502, RELA 3502)
Israelite history in context of what is known from Egyptian, Canaanite, and Mesopotamian sources. Focuses on issues raised by archaeological data related to Israelite conquest of Canaan.

HIST 3505. Survey of the Middle East. (3 cr. \$ARAB 3505, ARAB 5505, MELC 3505)
Peoples, lands, and cultures of the Middle East. Historical survey from earliest civilizations to the present.

HIST 3541. Islam in the Catholic Age: ARAB Phase 600 A.D. to 900 A.D.. (3 cr. \$ARAB 3541, ARAB 5541, MELC 3541)
The Rise of Islam in its Arabian setting. Roles of the prophet, the orthodox and Umayyad caliphs. Development of Islamic state and empire, organizations, institutions, and status of Muslims and non-Muslims.

HIST 3542. Medieval Islam. (3 cr. \$ARAB 3542, ARAB 5542, HIST 3542, MELC 3542)
Islamic dynasties, Umayyads of Spain, Shiites, assassins, Abbasid Caliphate's disintegration and rise of Seljuk Turks. Sunnism re-emerges. Ikhhanids.

HIST 3543. Arabs Under Mamluks and Ottomans: 1300-1920. (3 cr. \$ARAB 3543, ARAB 5543, MELC 3543)
Arabs under Mamluk rule. Ottomans conquer Mamluk territory. Ottoman rule. Disintegration and re-emergence under Muhammad Ali of Egypt, dynastic struggles in Syria, rise of Young Turks and Arab revolt.

HIST 3544. ARAB World 1920 to the Present. (3 cr. \$ARAB 3544, ARAB 5544, MELC 3544)
Arab world since independence; the struggle for liberation, political stability, development and unification; political structure and conflicts; impact of Arab-Israeli conflict.

HIST 3547. The Ottoman Empire. (3 cr. \$ARAB 3547)
Founding of Ottoman society/state to empire, 1300 to end of empire in 1920. Lands, institutions, peoples, legacy. Impact on Europe.

HIST 3608W. History of the Catholic Church in the Middle Ages. (3 cr. Prereq—Intro course in European history before 1500 recommended)
Religious beliefs of Latin Christianity as officially taught and as received by ordinary folk; organization of the church and its implantation in lay society; relations between Latin Christendom and its neighbors, Orthodoxy and Islamdom.

HIST 3609. Military History of Medieval Western Europe. (3 cr)
Concept and conduct of war in Western Europe in the Middle Ages and the relation between the military and society.

HIST 3611. Medieval Cities of Europe: 500-1500. (3 cr)
Evolution of Western European cities from the late Roman town to the early Renaissance city-state.

HIST 3613. History of the Crusades. (3 cr)
Crusading spirit in Europe. Results of classic medieval crusades ca 1095-1285. States established by crusaders in Near East. Internal European crusades. Chronological prolongation of crusading phenomenon.

HIST 3614. Women in Medieval Europe. (3 cr)
Women's role in family, politics, religion, work, and social movements. Representations of women in religious texts, art, literature, scientific studies, and law. Methods/approaches to study of women's history.

HIST 3615W. Women in European History: 1500 to the Present. (3 cr)
Women's history and gender relations in modern European history. Methods and primary sources for women's history and the implications of inclusion of women in historical study.

HIST 3616. France in the Middle Ages. (3 cr)
Politics, society and culture in medieval France from the end of the Carolingians to the end of the Hundred Years War.

HIST 3618. The Dark Ages Illumined: Medieval Europe to 1050. (3 cr)
Origins of medieval Europe, Germanic and Viking invasions, feudalism, manorialism, Islam, the papacy, monarchies, intellectual developments.

HIST 3619. Chivalry, Crisis, and Revival: Medieval History 1050-1500. (3-4 cr [max 4 cr])
Chivalry and courtly love, crusades, revival of towns and trade, monarchies, religious developments, Black Death, famine, and wars

HIST 3621. Renaissance Italy: 1200-1550. (3 cr. Prereq—Intro course in European history before 1500 recommended)
Political/cultural history of city-states of northern/central Italy, 1200-1550. Emphasizes Florence and Venice. Readings include Dante and Machiavelli.

HIST 3623W. Germany in the Age of Reformation. (3 cr. Prereq—General course in European history before 1500 recommended)
History of religious reform movements - Lutheran, Calvinist, and Catholic - in the context of German politics, society, and culture; emphasis on primary source readings (written during the period).

HIST 3626. France From the Late 16th Century Through Napoleon: 1594-1815. (3 cr)
The evolution of French government, economy, and society in a broad context: monarchical power and its disintegration; Louis XIV at the apex of the Old Regime; the Enlightenment; the French Revolution; and the rise and fall of Napoleon Bonaparte.

HIST 3632. History of Germany; Reformation to Unification: 1500-1871. (3 cr)
The Reformation era; warfare and demographic catastrophe of the early 1600s; life in town and country; absolutism; Baroque culture; family life and its transformation; economic crisis; Revolution of 1848; the military path to unification.

HIST 3633. Modern Germany, 1870-Present. (3 cr [max 4 cr])
Unifying the nation. Industrial development and political instability. Bourgeois culture, growth of socialism. World War I and revolution. Weimar Era, depression, Nazi seizure of power, Hitler's state. World War II and the Holocaust. Cold War and two Germanies. Reunification.

HIST 3637. Modern Russia: From Peter the Great to the Present. (3 cr)
Political, social, and cultural forces which have shaped modern Russia. Emphasis will be on modernization, attempts at reforms in the imperial and Soviet period, and the dissolution of empires.

HIST 3642. Knights, Peasants, and Bandits in Medieval England. (3-4 cr [max 4 cr])
Social history of medieval England from 1066 to 1500. Peasants, nobility, and bourgeoisie, including their economic institutions, living conditions, and entertainments. Legal and illegal ways of coping with economic and social change resulting from plague and wars.

HIST 3651. England Under the Tudors: 1485-1603. (3-4 cr [max 4 cr])
Henry VIII and the English Reformation. The early Tudor period, 1485-1547; the reign of Henry VIII and his break with the papacy.

HIST 3652. England Under the Stuarts: 1603-1689. (3 cr)
History of England from the accession of James I (1603) to the Glorious Revolution (1689), including political, social, religious, military, and intellectual history.

HIST 3671. Modern Britain: 1783-1867. (3 cr)
Britain from the end of the American Revolution to the mid-Victorian age; industrialization and reform.

HIST 3672. Modern Britain Since 1867. (3 cr)
Britain from the mid-Victorian age to the near-present; the growth of democracy, the height and depth of world power.

HIST 3681. Irish History. (3 cr)
History of Ireland, primarily modern, with emphasis on politics and Anglo-Irish relations.

HIST 3691W. The British Empire. (3 cr; A-F only)
Gain/loss of colonies in Ireland, America, India, Africa. Development of racism, multicultural composition of British society, debates about economic motives for empire, resistance of colonized peoples to conquest/domination.

HIST 3703W. European Cities: 1300-1800. (3 cr. Prereq—Background in European civilization of late Middle Ages)
The historical experience of selected cities in early modern Europe set within the context of ideas about urban formation and development. Key cities are Venice, Florence, Antwerp, Madrid, Seville, Amsterdam, Paris, and London.

HIST 3704W. Daily Life in Europe: 1300-1800. (3 cr)
Living conditions and daily life in Europe before the Industrial Revolution. Topics include marriage and family, life at court, nobles, peasants, disease, farming, livestock-raising, urban life, the middle classes, manufacturing, trade, piracy, witchcraft, war, crime, and social deviance.

HIST 3705. From Printing Press to Internet: Media, Communications, and History. (3 cr; A-F only. \$GLOS 3605)
Print public sphere in 17th, early 18th century. Political conflicts over freedom of press in 18th, 19th century. Emergence of advertising, public relations industries in 20th century. Significance of broadcast, computer network technologies for democratic political systems.

HIST 3707. Social History of Modern Europe. (3 cr)
Transformation from traditional agrarian to modern society, 18th to 20th centuries. Social change; history of the family, marriage and sexuality; the roots of nationalism and racism.

- HIST 3709. Science and Enlightenment.** (3 cr)
History of scientific revolution and its relationship to Enlightenment, 1650-1800. Copernicus, Galileo, Newton, Voltaire. Science and politics, culture, and religion. Civil society, expertise, objectivity, publicity.
- HIST 3712. Economic History of Modern Europe.** (3 cr)
Long-term rise/transformation of European economy. Emergence of capitalism and spread of economic growth up to WWI. Political economy of growth, instability, and structural change in 20th century.
- HIST 3714. Medieval Spain.** (3 cr)
Development of the medieval kingdoms of Spain from Roman times to ca. 1500. Major social, economic, and cultural developments. Christians, Jewish, and Muslim interaction. Role of Spain in the beginning of European expansion.
- HIST 3715. Modern Spain: 1500 to the Present.** (3 cr)
Ferdinand and Isabella, the Habsburg and Bourbon dynasties, the 20th-century Civil War and Franco regime, and into the present. Readings, lectures, films, slides, and music will provide a comprehensive view of a vibrant people and their modern history.
- HIST 3721. 20th-Century Europe From the Turn of the Century to the End of World War II: 1900-1945.** (3 cr. \$HIST 5721)
The social, political, and cultural changes and conflicts in Europe from the late 19th century to the end of World War II. The background to WWI, its impact, revolution, the failure of interwar stability, fascism, WWII and its consequences.
- HIST 3722. 20th-Century Europe From the End of World War II to the End of the Cold War: 1945-1991.** (3 cr)
The social, economic, political, and cultural impacts of WWII upon Europe; the division of Europe, communist regimes in Eastern Europe, cooperation in Western Europe, impacts of modernization and the end of the Cold War in 1991.
- HIST 3727W. History of the Holocaust.** (3 cr. \$JWST 3521W, RELS 3521W)
Study of 1933-1945 extermination of six million Jews and others by Nazi Germany on basis of race. European anti-Semitism. Implications of social Darwinism and race theory. Perpetrators, victims, onlookers, resistance. Theological responses of Jews and Christians.
- HIST 3728. Race, Nation, and Genocides in the Modern World.** (3 cr; A-F only)
Meaning of the term "genocide." Particular cases, such as Armenians in the late Ottoman Empire, Jews in the Third Reich, and Muslims in the former Yugoslavia.
- HIST 3729. Nazi Germany and Hitler's Europe.** (3 cr; A-F only)
Comprehensive exploration of Third Reich. Students will examine How the Nazis came to power, transformations of 1930s, imposition of racial politics against Jews/others, nature of total war. Students read historical accounts, memoirs, state documents, view films.
- HIST 3731. Citizens and the State in Modern France From the Revolution of 1789 to Post-de Gaulle: 1789-1991.** (3 cr)
A history of the citizen and the state in France from the French Revolution to the present.
- HIST 3735. Politics of Ideas: European Thought in 20th Century Contexts.** (3 cr; A-F only)
Development of political ideas/ideologies in 20th century. How to understand ideas in various contexts of their production, dissemination, and appropriation. Students read primarily original political/social philosophical texts that have shaped social, cultural, and political landscape.
- HIST 3747. Habsburg Central Europe: 1740-1918.** (3 cr)
Evolution of Habsburg rule in Central Europe, from reforms of Maria Theresa to imperial collapse in 1918. Economic/social transformation. Revolutions of 1848. Political modernization. Rise of nationalism/anti-Semitism. Fin-de-siecle culture. WWI.
- HIST 3748. Austria in the 20th Century.** (3 cr)
Austria from Paris Peace Treaties to present. Political instability, social conflict, and economic stagnation between the World Wars. Nazi rule and WWII. Economic miracle, consensus politics, and neutrality after 1945. Austria after Cold War.
- HIST 3767. Eastern Orthodoxy: History and Culture.** (3 cr)
Development of the orthodox church in Byzantium, the Islamic Near East, the Slavic world and in the diaspora; impact of orthodoxy on political and cultural institutions, interaction with other Christian and non-Christian communities; orthodox spirituality and aesthetics.
- HIST 3775. History of the European Jews from the Middle Ages to the Present.** (3 cr)
Social, economic, and cultural history of the Jewish people in Europe and their interaction with other peoples; history and causes of anti-Semitism; Zionism and assimilation; Chasidism and socialism.
- HIST 3797. History of Population.** (3 cr)
History of births, deaths, migration, population size, and population characteristics. Evidence from Europe, the United States, and Latin America with comparative material from Africa and Asia. Methods of historical population analysis and research of historical population data.
- HIST 3800. Topics in Early American History.** (3 cr [max 15 cr])
For advanced undergraduate majors and non-majors. Focus on intensive exploration of particular topics in early American history such as economic history, demographic regimes, social history, intellectual history, regions, slavery, religion, and witchcraft in colonial America.
- HIST 3801. The People of Early America: 16th to 18th Centuries.** (3 cr)
Multicultural approach to early American history focusing on the interactions of Africans, Europeans, and American Indians who came together to create a new world in North America during the 16th, 17th, and 18th centuries.
- HIST 3809. The Peoples of Revolutionary America.** (3 cr)
Culture/structure of late colonial politics. Regionalism. Connections between society and politics. Imperial crisis and independence. Military history of the Revolution. Origins of national politics and the constitution.
- HIST 3812. The Civil War and Reconstruction.** (3 cr)
United States from 1848 to 1877. Causes of sectional crisis; Southern secession; Lincoln and emancipation; military history; impact of war North and South; Reconstruction efforts to change the Southern life and transform the status of African Americans.
- HIST 3821. United States in the 20th Century to 1945.** (3 cr)
American politics and society in the progressive era, the 1920's, the Great Depression and World War II. Economic reform at home, the challenges of world war abroad, and social change affecting the status of women and racial minorities.
- HIST 3822. United States in the 20th Century Since 1945.** (3 cr)
American politics and society in the postwar era, the diplomacy of the Cold War, the civil rights movement, the Vietnam War, cultural clashes in the 1960's, Watergate, the conservative resurgence, and the end of the Cold War.
- HIST 3834. Law in American Life, Colonial Era to Civil War.** (3 cr; A-F only)
Understandings of law/property held by colonists, Indians. Conceptions of relationships among family, community, state held in colonial America; conceptions held today. Law of slavery in colonial era. American Revolution/Constitution. Law, industrialization. Legal legitimacy, federalism, Civil War as constitutional crisis.
- HIST 3835. Law in American Life: 1865 to Present.** (3 cr)
Centralization of state power, rise of individual rights. Constitutionalization of American law. Passage, promise, abrogation, rediscovery of 13th, 14th, 15th Amendments. Expansion of federal administrative state. Origins of civil liberties. Law and the welfare state. Civil Rights Revolution of 1950s, '60s, '70s. Product liability law. Second half of two-semester survey. May be taken independently.
- HIST 3837. Minnesota History.** (3 cr)
Topics in political/social history of Minnesota and its region in nineteenth/twentieth centuries.
- HIST 3841. American Business History.** (3 cr)
Development of the modern corporation and its managerial structure. Contributions of Eli Whitney, Edison, Ford, Carnegie, Rockefeller, J.P. Morgan, Alfred Sloan, others. History of relation of business to economic development, social change, and government policies.
- HIST 3842. History of Silicon Valley.** (3 cr; A-F only)
Critical, historical examination of birth/development of "Silicon Valley," the high-tech region around San Jose, California. Myths/ideologies that define Silicon Valley in popular imagination. Deeper history of region. Comparisons with Twin Cities as framework for analysis.
- HIST 3844. American Economic History to 1870.** (3 cr)
Economic development, regional specialization and early industrialization. Slavery and southern development. The role of railroads and government policies. Economic impact of the Civil War.
- HIST 3845. American Economic History: 1870 to the Present.** (3 cr)
Farm problems in the 19th century. Rise of big business and finance capitalism. The 1920s economy and the Great Depression. Corporate capitalism, government policies and the modern economy.
- HIST 3851. Labor in the 19th-Century United States.** (3 cr)
The development of U.S. labor in and after the Age of Industry. Industrial unionism and radicalism's challenge to the AFL; organized labor's uneasy integration into American society. Management theories and workers actions. Race, gender, and the changing working class.
- HIST 3852. U.S. Labor in the 20th Century.** (3 cr)
The development of a working class from the preindustrial to an industrial age. Responses of American workers through labor organization, slave resistance, and political reform. The Knights of Labor, the formation of the AFL, and the challenges of Marxism.
- HIST 3861. European American; From Immigrants to Ethnic: 1790-1890.** (3 cr; A-F only)
Conditions which contributed to the mass exodus from northern/western Europe during this century as well as the attraction of the United States. Major theme will be how immigrants shaped and in turn were shaped by America.
- HIST 3862. European Americans: 1890-1990.** (3 cr; A-F only)
From the 1890s, immigrants came predominantly from southern/eastern Europe. A central theme is the role of immigrants in the transformation of America from a rural agricultural to an urban industrial society.
- HIST 3864. African American History, 1619-1865.** (4 cr; A-F only. \$AFRO 3864)
Importance of dynamics of class, gender, region, and political ideology. Changing nature of race/racism.
- HIST 3865. African American History, 1865 to Present.** (4 cr; A-F only. \$AFRO 3865)
Integral migrations, industrialization, unionization, Great Depression, world wars, large-scale movements for social/political change.

HIST 3866. African American Gender History: 1865-Present. (3 cr)

Relationship between race, gender, and the struggle for equality. Focuses on African-Americans. Changing definitions of manhood/womanhood over the past 130 years. Critical role race and racial thought have played in these changes. How ethnicity, class, and sexuality have transformed black gender experiences.

HIST 3867. Black Women s History: From Slavery to the Present. (3 cr)

Introduction to black women s histories in America and Atlantic World. How black women on two continents defined themselves in context of migration, slavery, colonialism, post-colonialism, and social movements. Meanings, problems, and possibilities of black womanhood in global era.

HIST 3868. Race, War, and Race Wars in American History. (3 cr)

Role that race has played in American war history. Impact that wars have had on race and race relations in the U.S. and the world. Literature, film.

HIST 3869. Urban American History: Race, Class, Gender, and Sexuality in Urban America. (3 cr)

History/formation of American metropolis. Roots of "urban problem." Framework for understanding life in contemporary urban spaces. How ideas about race, class, gender, and sexuality created/permeated urban infrastructures and stratified urban populations/economies.

HIST 3870. Topics in American Indian History. (3 cr. \$AMIN 3870)

Designed for advanced undergraduates. Topics may include social history, oral history, history of particular regions, political systems, education, and policy.

HIST 3871. American Indian History: Pre-Contact to 1830. (4 cr. \$AMIN 3871)

Introduction to American Indian history from ancient native America to the removal era. Focuses on the social, cultural, political, and economic diversity of Native American peoples and Native American experiences with European colonialism.

HIST 3872. American Indian History: 1830 to the Present. (4 cr. \$AMIN 3872)

Focus on the impact of federal Indian policy on American Indian cultures and societies, and on American Indian culture change.

HIST 3875W. Comparative Race and Ethnicity in US History. (3-4 cr; A-F only)

America through its cultural diversity. Changing notions of "American" national identity/citizenship from nineteenth century to present. Historical experiences of Native Americans, African Americans, Hispanic Americans, European immigrants, and Asian Americans: How these groups were defined in relation to each other and in relation to the nation.

HIST 3877. Asian American History, 1850-Present. (3 cr)

Asian American history and contemporary issues, from 1850 to the present. Immigration, labor, anti-Asian movements, women/families, impact of World War Two, new immigrant/refugee communities, civil rights, Asian American identity/culture.

HIST 3878. American West. (3 cr)

American West from Mexican-American War to present. U.S. expansion, Native-Anglo conflict, migration/immigration. Race, ethnicity, labor, class, and gender in the West. Business/politics of "settling" the region.

HIST 3881. History of American Foreign Relations to 1914. (3 cr)

American involvement in world affairs from 1760-1914 including political, economic, social, and cultural relations by individuals, groups, governmental, and non-governmental agencies focusing on nation building, creation of continental and commercial empires, hemispheric hegemony, cultural expansion, and wartime diplomacy.

HIST 3882. History of American Foreign Relations: 1914 to Present. (3 cr)

American involvement in world affairs 1914 to present. Political, economic, social, and cultural activities by individuals, groups, and governmental and non-governmental agencies, participation in international organizations, commercial and cultural imperialism, and war and Cold War diplomacy.

HIST 3891. American Military History. (4 cr)

Interaction of geography, politics, society, and technology in military growth. Influence of military on American national development 17th-20th centuries. Expansion/effect of land, sea, and air forces in 20th century.

HIST 3900. Topics in Medieval and Modern European History. (1-4 cr [max 16 cr]. Prereq-Jr or sr or #)

Selected topics in medieval and modern European history not covered in regular courses. To be taught as staffing and demand exist.

HIST 3910. Topics in U.S. History. (1-4 cr [max 15 cr].

Prereq-Jr or sr or #)

Selected topics in U.S. history not covered in regular courses. To be taught as staffing and demand exist.

HIST 3920. Topics in African History. (1-4 cr [max 16 cr].

Prereq-Jr or sr or #)

Selected topics in African History not covered in regular courses. To be taught as staffing and demand exist.

HIST 3930. Topics in Ancient History. (3 cr [max 15 cr])

Selected topics in Near Eastern, Egyptian, Greek, and Roman History.

HIST 3940. Topics in Asian History. (1-4 cr [max 16 cr].

Prereq-Jr or sr or #)

Selected topics in Asian history not covered in regular courses. To be taught as staffing and demand exist.

HIST 3950. Topics in Latin American History. (1-4 cr [max 16 cr]. Prereq-Jr or sr or #)

Selected topics in Latin American history not covered in regular courses. To be taught as staffing and demand exist.

HIST 3951H. Junior Honors Seminar. (4 cr. Prereq-History honors candidate)

Intended for History honors majors in their junior year, the course is run as a seminar, with emphasis on readings and discussion. Weekly sessions focus on selected topics relating to historical method and historiography.

HIST 3960. Topics in History. (1-4 cr [max 16 cr]. Prereq-Jr or sr or #)

Selected topics in history not covered in regular courses and covering more than one geographic area/time period. To be taught as staffing and demand exist.

HIST 3970. Supplemental Discussion in History. (1 cr [max 3 cr]. Prereq-Concurrent registration)

Extra discussion section with T.A. Attached to concurrent 3xxx course.

HIST 3980W. Supplemental Writing in History. (1 cr [max 4 cr]; A-F only. Prereq-#; must take a 3-cr 3xxx or 5xxx course taken concurrently)

May be attached, by agreement of instructor and students, to any 3xxx or 5xxx course to make a writing-intensive experience.

HIST 3990. Historical Internship. (1-4 cr [max 4 cr]. Prereq-#)

Internship with a historical society, government, or community historical organization. Arranged through and supervised by department.

HIST 3993. Directed Study. (1-16 cr [max 16 cr]; A-F only.

Prereq-#, Δ, □)

Guided individual reading or study. Open to qualified students for one or more semesters.

HIST 3994. Directed Research. (1-16 cr [max 16 cr]; A-F only.

Prereq-#, Δ, □)

Qualified students work on a tutorial basis.

HIST 4051. Ancient Near East and Egypt: Neolithic to 1500 BCE. (3 cr; A-F only. \$CNES 4051. Prereq-Previous coursework in ancient history recommended)

Lands of Western Asia and Northeast Africa from Neolithic through Middle Bronze Age. Interdependent technological/political developments, such as agriculture, state formation, and writing. Use of literature/art as vehicles for articulating concepts. Changing relationships among culture/polities of ancient Near East and regions beyond.

HIST 4052. Ancient Near East and Egypt: 1500 to 323 BCE. (3 cr; A-F only. \$CNES 4052. Prereq-4051 or prev

coursework in ancient history recommended)

Lands of Western Asia and Northeast Africa from Late Bronze Age to death of Alexander in 323 BCE. Growth/decline of empires. Diplomatic relations and sociopolitical transformations among Late Bronze and Iron Age states. New military technologies. Developments in religion/theology.

HIST 4061. History of the Greek World from Earliest Times to 400 B.C.. (3 cr)

Trace the history of the Greeks from their initial appearance in Greece in the Bronze Age to the close of the 5th century B.C. Special attention will be devoted to the polis, military development, and intellectual change.

HIST 4062. History of the Greek World: 400 to 30 B.C.. (3 cr)

Trace the history of the Greeks from the end of the Peloponnesian War through the decline of the polis, the rise of Macedon and Alexander the Great, the fragmentation of Alexander's empire in the Hellenistic World and the eventual Roman take over of that world.

HIST 4071. History of Rome to 78 B.C.. (3 cr. Prereq-An appropriate introductory course is recommended)

Intensively examine the political, institutional, and socioeconomic history of Rome from its origins to the death of Sulla in 78 B.C. The institutional strengths and weaknesses that led to the rise and fall of the Republic are the primary theme.

HIST 4072. History of Rome: 78 B.C. to A.D. 117. (3 cr.

Prereq-An appropriate introductory course is recommended) Intensively examine the political, institutional, and socioeconomic history of Rome from the death of Sulla in 78 B.C. to the death of Trajan in A.D. 117.

HIST 4073. History of Rome: A.D. 117 to 641. (3 cr.

Prereq-An appropriate introductory course is recommended) Intensively examine the political, institutional, and socioeconomic history of Rome from the death of Trajan in A.D. 117 to the death of Theodosius in A.D. 395. Explores one historical question—the decline and fall of the Roman Empire.

HIST 4135. Vikings, East Slavs, Turks, and Finns: European Russia in the Early Middle Ages. (4 cr; A-F only)

An analysis of the Turkic nomads, East Slavic agriculturalists, and Finnic foragers who inhabited early medieval European Russia and the Khazar, Bulghar, and Rus'/Viking states which came to rule them.

HIST 4337. Bill of Rights and the Supreme Court Since 1865. (4 cr. Prereq-Jr or sr or grad student)

Constitutional, political, philosophical, social context of leading U.S. Supreme Court cases on Bill of Rights. Emphasizes property rights, free speech, freedom of religion, right to bear arms, criminal defendants' rights, death penalty.

HIST 4910. Topics in U.S. History. (1-4 cr [max 15 cr].

Prereq-Jr or sr or grad or #)

Selected topics in U.S. history not covered in regular courses. Taught as staffing permits.

HIST 4930. Topics in Ancient History. (1-4 cr [max 16 cr];

A-F only. Prereq-Advanced undergrad or grad)

Selected topics in Ancient history not covered in regular courses. Taught as staffing permits.

HIST 4959. How to Do History. (3 cr; A-F only)

Skills/research experience to complete senior paper. How to answer questions such as, "What is history?" How to locate/use historical sources, develop a thesis, and turn a rough idea into a full research proposal.

- HIST 4959H. Honors: How to Do History.** (3 cr)
Skills/research experience to complete senior paper. How to answer questions such as, "What is history?" How to locate/use historical sources, develop a thesis, and turn a rough idea into a full research proposal.
- HIST 4960. Topics in History.** (1-4 cr [max 16 cr]. Prereq—Jr or sr or grad or #)
Selected topics in history not covered in regular courses. Taught as staffing permits.
- HIST 4961V. Honors: Major Paper.** (4 cr. Prereq—Δ, #; sign up in Undergraduate Studies Office two sem in advance)
Research paper on topic of student's choice. Work largely with primary sources. Faculty guidance.
- HIST 4961W. Major Paper.** (4 cr; A-F only. Prereq—Δ, #; sign up in Undergraduate Studies Office two sem in advance)
Research paper on topic of student's choice. Work largely with primary sources. Faculty guidance.
- HIST 4962. History Undergraduate Proseminar.** (3 cr. Prereq—[Honors, [jr or sr]] or [history major, Δ])
Themes vary by instructor. Reading/discussion of historiography/methodology. Research component.
- HIST 4962H. Undergraduate Honors Proseminar.** (3 cr. Prereq—[Jr or sr], honors)
Themes vary depending on the instructor. Reading/discussion of historiography/methodology, research.
- HIST 4970. Historical Internship.** (1-12 cr [max 12 cr]; S-N only)
Internship with a historical society, government or community historical organization. Arranged through and supervised by the department.
- HIST 5011. Quantitative Methods for Historical Research.** (4 cr. Prereq—#)
Basics of quantitative historical data collection, measurement, and analysis.
- HIST 5051. Before Herodotus: History and Historiography of Mesopotamia and the Ancient Near East.** (3 cr; A-F only. §CNES 5051. Prereq—Prev coursework in ancient Near Eastern history recommended)
Historical method/sources for ancient Near Eastern history. Historical traditions. Historiographic texts of Mesopotamia and neighboring regions of the ancient Near East, secondary emphasis on their relationship to works of classical historians such as Herodotus. Use of these sources in modern historiography of ancient Near East.
- HIST 5053. Doing Roman History: Sources, Methods, and Trends.** (3 cr. Prereq—Grad student or #)
Survey of major scholarship in field of Roman history since Mommsen. Political, cultural, social, military, and economic history. Focuses on methodological problems posed by evidence. Ways in which these issues shape research.
- HIST 5111. Proseminar in the History of Medieval Europe.** (3 cr; A-F only. Prereq—Advanced undergrads of exceptional ability or grads, #)
Examination of basic scholarly bibliography for medieval Western European history. Aim is to help students to prepare for M.A. and Ph.D. examinations.
- HIST 5115. Medieval Latin Historians.** (3 cr. Prereq—Reading knowledge of Latin)
Writing of history in Western Europe during the Middle Ages. Focus on idea of history, philosophy of various historians, techniques of research by medieval historians and chroniclers, history as literature, and value of medieval histories to modern research scholars. Latin texts only.
- HIST 5251. Socialist/Post-socialist Transformations.** (3 cr; A-F only. §GLOS 5603)
Transformations underway in post-socialist societies of Eastern Europe, former Soviet Union. Ramifications of abandonment of state socialism, introduction of market relations. Effect of former system, new market system on cultural institutions/identities.
- HIST 5264. Imperial Russia: Formation and Expansion of the Russian Empire in the 18th and 19th Centuries.** (3 cr [max 4 cr])
Interaction with Europe and Asia; attempts at modernization and reform; emancipation of the serfs and rise of revolutionary movements.
- HIST 5265. 20th-Century Russia: The Collapse of Imperial Russia, the Revolutions, and the Soviet Regime.** (3 cr)
Analysis of the factors that led to the collapse of the tsarist regime; discussion of the 1917 revolution, the evolution of the Soviet regime and the collapse of Soviet communism. Emphasis on the role of nationalities and the rise of the Commonwealth of independent states.
- HIST 5271. The Viking World: Story, History, and Archaeology.** (3 cr; A-F only. §HIST 3271)
Viking society and expansion of Viking influence abroad. Viking impact on Western Europe, interactions with Slavic lands, settlement of North Atlantic islands, Western Europe's impact on Scandinavian lands. Analyzes archaeological, historical, linguistic, and numismatic evidence.
- HIST 5285. Problems in Historiography and Representation of the Holocaust.** (3 cr. §JWST 5111. Prereq—JWST 3521 or RelS 3521 or #)
Issues connected with the Holocaust. Inclusiveness of other groups, Holocaust vs. "Shoah," historiographical conflicts about perpetrators, problems of representation in literature/art, problems of narrative theology after Auschwitz.
- HIST 5294. Social History of Russia and Eastern Europe Through the 19th Century.** (3 cr)
Lives of peasants and workers, nobles and merchants. Topics include family, marriage, sexuality; culture and tradition; transformation from an agricultural to a modern society.
- HIST 5295. Social History of Russia and Eastern Europe From the Late 19th Century to the Present.** (3 cr)
Social movements (revolutionary, nationalist, women's); communist and post-communist societies.
- HIST 5301. U.S. Women's Legal History.** (3 cr)
Women's legal status in U.S. history, 1648 to present. Changes in women's legal status in marriage, divorce, and child custody; reproductive/sexual autonomy; and economic/educational equality. Differences among women based on race, class, and ethnicity.
- HIST 5379. Problems in Early American History.** (3 cr)
Intensive consideration of topics in early American history. Topics may include readings in race, class, and gender; comparative colonialism; slavery; demography; economic history; religion; and regions in the colonial world.
- HIST 5381. Minnesota History Workshop.** (3-4 cr [max 4 cr]. Prereq—1301, 1302)
A case study and seminar approach to historical research and interpretation. It offers teachers and other scholars a chance to survey a particular topic in Minnesota history and to write their own historical narrative based on primary source research.
- HIST 5421. Gender in Latin American History.** (3 cr)
Women's history/masculinity. Gender/colonialism, marriage, sexuality, nationalism, labor, political movements, feminism.
- HIST 5436. Social History of African Women: 1850 to the Present.** (3 cr. Prereq—Grad or #)
Explore the historical forces which have shaped African women's everyday lives and the ways in which these women have been active agents in the making of their own histories.
- HIST 5437. History of East Africa.** (3 cr. §AFRO 3437, AFRO 5437, HIST 3437)
Major themes in history of East Africa, from era of early human cultural development to present. Methods that historians use to reconstruct history. Varying interpretations/constructions of history over time.
- HIST 5439. Environment and Society in Africa.** (3 cr. Prereq—#)
Major historiographical, theoretical, and methodological debates concerning people-environment relations in Africa, from rise of human societies to present. Environment and the rise of civilizations. Demography, colonial environmental policies, conservation, disease, indigenous knowledge, water management, food.
- HIST 5441. Transformations in Pre-Colonial African History.** (3 cr; A-F only. Prereq—#)
African internal/external processes before 1600. Framework by which early African history is understood, tools for reconstructing it, themes/debates that have shaped it, new directions in which it is moving.
- HIST 5446. Problems in West African History.** (3 cr. Prereq—Grad or #)
This problem-centered course explores several of the major historiographical, methodological, and theoretical debates in West African history. Core topics include state formation, trade, slavery, Islam, gender, and colonialism.
- HIST 5464. China in the Song, Yuan, and Ming Dynasties.** (3 cr. §EAS 3464, HIST 3464)
China during the Song (976-1279), Yuan (1279-1368) and Ming (1368-1644) dynasties, political institutions, and social structures. Attention to primary sources and how historians ask and answer questions about the past.
- HIST 5465. China in the Ming and Qing Dynasties.** (3 cr. §EAS 3465W, HIST 3465W)
Political/social history of China from 1600 until end of Qing dynasty in 1911. Ethnicity, daily life, legal structures, city life, peasantry.
- HIST 5467. State and Revolution in Modern China.** (3 cr. §EAS 3467W, HIST 3467W)
Modern China's political evolution including the Taiping Rebellion, Republican Revolution, rise of Nationalist and Communist parties, Maoist era; reform under Deng Xiaoping, and the emergence of democracy in Taiwan.
- HIST 5468. Social Change in Modern China.** (3 cr. §EAS 3468, HIST 3468)
Opium War and opening of Treaty Ports in 19th century; missionary activity and cultural influence; changes in education system; women's movement; early industrialization; socialism and collectivization after 1949; industrialization of Taiwan; PRC's entry into the world trading system.
- HIST 5469. Historiographies of China, 1000-1700.** (3 cr; A-F only. Prereq—Grad student or #)
Important recent English-language work on Chinese culture during the Song, Yuan, and Ming dynasties. Topics include religion, gender, family structures, ethnic identity, commerce/economics, and political structures/events.
- HIST 5473. Japan's Modernities: Historiographies.** (3 cr; A-F only. Prereq—[Advanced undergrad, #] or grad student)
Historiography on modern Japan in English language scholarship. Major trends since 1950s, latest scholarship. Issues concerning Japan's modernity. Definitions of modernity, modernization, and modernism. Relationship between knowledge-making and nation building. Japan's place in world.
- HIST 5474. Sex and the Politics of Desire: Japan and Beyond.** (3 cr; A-F only. Prereq—Grad student or #)
History of gender/sexuality in modern Japan and Korea. Geography of Japan. Theoretical/methodological literature not specific to Japan. Sexology, eugenics, feminism, nationalism, colonialism, cyber sexuality.
- HIST 5479. History of Chinese Cities and Urban Life.** (3 cr; A-F only. §HIST 3479)
Introduction to traditional Chinese cities, their modern transformation. Ideal city plan in Confucian classics compared with physical layout of some major cities. Models about Chinese cities, influence of the models on our understanding of Chinese history/society.

HIST 5501. Medieval Europe and the World. (3 cr; A-F only. Prereq-#)

Place of medieval Europe in the world. Relations of Europe with Asia, Africa, and the Americas. European knowledge of the world's other great cultures. European travelers/explorers. Assessment of other cultures' knowledge of Europe in the period.

HIST 5505. Survey of the Middle East. (3 cr. Prereq-Grad or #)

Peoples, lands, cultures of the Middle East, from earliest civilizations to present.

HIST 5520. Topics in Chinese History. (3 cr [max 12 cr]) Selected topics not covered in regular courses. Taught as staffing permits.

HIST 5541. Islam in the Catholic Age. (3 cr. Prereq-Grad or #)

Rise of Islam in its Arabian setting. Roles of prophet, orthodox/Umayyad caliphs. Development of Islamic state/empire, organizations, institutions, status of Muslims/non-Muslims.

HIST 5547. The Ottoman Empire. (3 cr. Prereq-Grad student or #)

Founding of Ottoman society/state to empire, 1300 to end of empire in 1920. Lands, institutions, peoples, legacy. Impact on Europe.

HIST 5611. Proseminar in Medieval History. (3 cr; A-F only. Prereq-Grad student or #)

Basic scholarly bibliography for medieval Western European history during early Middle Ages. Foundation for teaching courses in medieval history, preparing for general doctoral exam.

HIST 5612. Proseminar in Medieval History. (3 cr; A-F only. Prereq-[5611, grad student] or #)

Basic scholarly bibliography for medieval Western European history during central/later Middle Ages. Foundation for teaching courses in medieval history, preparing for general doctoral exam.

HIST 5614. The Medieval Church. (3 cr. Prereq-Grad student or #)

Introduction to history of western church in Middle Ages. Emphasizes church teachings and institutional structures, beliefs/practices of lay people, medieval Christian encounter with non-Christian world.

HIST 5616. Proseminar in Medieval Spain. (3 cr; A-F only. Prereq-#)

Graduate research on the development of the medieval kingdoms of Spain from Roman times to ca. 1500. Emphasis on major social, economic, and cultural developments. Christian, Jewish, and Muslim interaction. Spain and the beginnings of European expansion.

HIST 5617. Spain in the Early Modern Period: 1492-1814. (3 cr)

Historiography, documents, and archives of early modern Spain analyzed. Includes reading in modern English and Spanish and practical experience with Spanish manuscript documents from the period.

HIST 5621. Proseminar: The French Revolution. (3 cr; A-F only. Prereq-Grad student or [advanced undergrad, #])

Historical literature about French Revolution of 1789. Old Regime political culture, Enlightenment, origins of the revolution, revolutionary transformations in society, politics/culture both in France and abroad, the Terror, Napoleon, revolutionary legacy.

HIST 5631. Proseminar: Comparative Early Modern History. (3 cr; A-F only. Prereq-Hist grad or #)

Critical reading of historical literature dealing with integration of the globe during the early modern period, ca. 1350-1750; book reports, class discussion.

HIST 5632. World History Proseminar. (3 cr; A-F only. Prereq-#)

Theoretical approaches to world/global history. Review of major theories, controversies, chronologies, pedagogical approaches.

HIST 5633. Socio-Economic History of China. (3 cr; A-F only. Prereq-Grad student or [adv undergrad, #])

Nature of Chinese socio-political formations and economic development in Qing and Republican eras, 1644-1937. Establishment/methods of state rule, merchants, agrarian social structure, domestic industry, demographic regimes, capitalism, and imperialism. Comparisons using theoretical and case studies of economic development.

HIST 5649. Ideas in Context: Making Early Modern Knowledge, 1500-1800. (3 cr; A-F only. Prereq-Grad student or #)

Role of institutions/locale in development of early-modern European thought/culture. University, academy, learned society, princely court, museum, printing house, workshop, trading company, armies/navies, state bureaucracies, salons, other independent associations of nascent civil society.

HIST 5650. Proseminar: Early Modern Europe. (3 cr; A-F only. Prereq-Hist grad or #)

Critical reading of historical literature for early modern Europe, ca. 1450-1700., dealing with France, Germany, Italy, the Low Countries, and Spain. Each student chooses a country to focus on; book reports, class discussion.

HIST 5651. Proseminar in Tudor England: 1485-1603. (3 cr; A-F only. Prereq-#)

A critical study of principal writings about English history during the Tudor and Stuart periods.

HIST 5652. Proseminar in Stuart England: 1603-1689. (3 cr; A-F only. Prereq-#)

Critical study of principal writings about English history.

HIST 5671. Proseminar: Modern Britain. (3 cr; A-F only. Prereq-#)

Critical study of major writings in British history, 1760-1945, and preparation for research in field.

HIST 5715. Readings in European Women's History: 1450-1750. (3 cr; A-F only)

Introduction to current historical research on European women's history, 1450-1750. Topics include gender roles and form of family structure, women's participation in religious movements, legal status of women.

HIST 5720. Society/Politics:Modern Europe. (3 cr [max 6 cr]; A-F only. Prereq-Grad or #)

Introduction to literature in English on problems of modern European social, cultural, political history. Thematic/geographic focus varies year to year. Topics include historical approaches to class/gender relations, state formation as social/political process, family history, evolution of public life, popular culture.

HIST 5721. Contemporary Europe From the Late 19th Century to the Beginning of the Cold War: 1890-1950. (3 cr. 3HIST 3721. Prereq-previous coursework in 19th- and/or 20th-century Europe, #)

The historical literature and debates surrounding major issues in the social, political, cultural, and economic development of Europe from the turn of the century through the impact of WWII. Topics include the development of imperialism, national rivalries, social and political conflict, the rise of fascism and communism, and the origins of war.

HIST 5735. European Women's History; 1750 to the Present. (3-4 cr [max 4 cr]. Prereq-#)

Selected themes in modern European women's history. Forms of patriarchy. Women in the Enlightenment. Women and revolution. Gender, class, and family life. Women in the labor force. Sexuality and reproduction. Female education. Women's political movements. Women and imperialism. Gender and fascism.

HIST 5740. Topics in Modern German History. (3-4 cr [max 12 cr]; A-F only. Prereq-#)

Readings and discussions on some central questions concerning the history of Germany during the modern period with a particular emphasis on the relationship between social change and political development. Offerings vary in thematic and chronological focus.

HIST 5761. Proseminar - Imperial Russia.. (3 cr. Prereq- Knowledge of Russian or German or French)

Western and Russian historiography on crucial issues of imperial Russia. Political institutions; culture and society; modernization and reforms; new interpretations.

HIST 5762. Proseminar in 20th Century Russia. (3 cr. Prereq-5761, knowledge of Russian or German or French)

Western and Russian historiography on crucial issues of 20th-century Russia. The nature of revolutions, debate over the evolution of the Soviet regime, the collapse of empires, new interpretations.

HIST 5777. Proseminar in Habsburg Central Europe. (3 cr. Prereq-#)

Central Europe under Habsburg rule from the reforms of Maria Theresa to imperial collapse. Continuity and change in society; economic and political modernization; the rise of national consciousness and anti-Semitism; politics and culture in the Fin de Siecle; the Empire and World War I.

HIST 5794. Proseminar in European Economic History. (3 cr. Prereq-#)

Europe's rise in the world economy; England's industrial revolution and uneven development in Europe; imperialism and World War I; the Great Depression; the post-1945 economic miracle; continuity and change in Eastern Europe.

HIST 5797. Methods of Population History. (3 cr)

Standard methods of population analysis. Focuses on methods widely used for historical population research.

HIST 5801. Seminar in Early American History. (3 cr; A-F only)

Introduction to the literature of early American history. Readings selected from some of the best scholarship in the field, the questions that now hold the attention of colonial historians, and the theories, methods, and sources they use in pursuit of those questions.

HIST 5811. Nineteenth-Century U.S. History. (3 cr; A-F only. Prereq-[Grad or honors] history major, #)

Proseminar. Central themes/debates in historiography of 19th-century United States. Market revolution, antebellum party politics. Slavery, the Civil War, Reconstruction. Immigration and nationalism. Transformations in ideologies/experiences of race/gender. Industrialization, labor, and urbanization. Western expansion. Emergence of populism/progressivism.

HIST 5821. American History in the Twentieth Century. (3 cr [max 4 cr]; A-F only. Prereq-Grad student, #)

Intensive readings seminar.

HIST 5841. Proseminar in American Economic History. (3 cr; A-F only. Prereq-#)

Historical literature on American economic and business history from American Revolution to the modern economy.

HIST 5844. U.S. Labor History. (3 cr)

Readings in classic and recent approaches to the history of the working class in the United States. Central topics include slavery and free labor, women's paid and unpaid labor, management strategy, labor protest, and trade union organization.

HIST 5845. History of American Capitalism. (3 cr; A-F only. Prereq-Grad student or #)

Historiography/history of American capitalism. Crucial events (e.g., market "revolution," development of industrial cities) focus weekly discussions of new literature. Students analyze theoretical models of capitalism and new work in social, political, and economic history.

HIST 5857. Proseminar: Readings in the History of American Women. (3 cr. Prereq-#)

An intensive graduate-level readings course. Survey selected significant topics in historical literature, conceptual frameworks, and methodological problems in the history of American women from 1600 to the present.

HIST 5861. History of American Immigration. (3 cr; A-F only. Prereq-#)

Readings in historical literature on immigration to the United States. Emphasis on recent works distinguished by new research methodologies and interpretations.

HIST 5862. History of American Immigration. (3 cr; A-F only. Prereq-#)

Readings in historical literature on immigration to the United States. Emphasis on recent works distinguished by new research methodologies and interpretations. Each student undertakes an independent reading and/or research project.

HIST 5863. Proseminar: U.S.-Mexico Border. (3 cr) Part of a two-semester sequence. Historiographical approaches to region. Vision of a unified border.

HIST 5871. Readings in U.S. Intellectual History: 19th-20th Centuries. (3 cr. Prereq-#)

Definitions of American national identity from 1789 to the present as expressed in politics, religion, literature, painting, music, architecture, and history.

HIST 5877. Asian American History. (3 cr; A-F only)

Introduction to key issues, theoretical frameworks, research, and methodologies of Asian American history. Seminal texts that defined the field. Recent scholarship in history and in related disciplines. Emphasis field's comparative/transnational linkages to ethnic studies, Asian studies, and the Americas.

HIST 5881. American Foreign Relations to 1895. (3 cr. Prereq-#)

Intensive readings in the historiography of American foreign relations with emphasis on American imperialism, domestic courses of foreign policy, and international political, economic, and cultural relations.

HIST 5882. American Foreign Relations Since 1895. (4 cr. Prereq-#)

Intensive readings in the historiography of American foreign relations with emphasis on American imperialism, domestic courses of foreign policy, and international political, economic, and cultural relations.

HIST 5890. Problems in American Indian History. (3 cr. \$AMIN 5890. Prereq-#)

Intensive consideration of topics in American Indian history. Topics may include social history, history of particular regions, political systems, education, and American Indian policy.

HIST 5900. Topics in European/Medieval History. (1-4 cr [max 16 cr] Prereq-Grad or [advanced undergrad with #]) Selected topics in European or medieval history not covered in regular courses; taught as staffing permits.

HIST 5901. Latin America Proseminar: Colonial. (3 cr. Prereq-#)

Introduces beginning graduate and advanced undergraduate students to major historical writings on various Latin American themes.

HIST 5902. Latin America Proseminar: Modern. (3 cr. Prereq-#)

Introduces beginning graduate and advanced undergraduate students to major historical writings on various Latin American themes.

HIST 5910. Topics in U.S. History. (1-4 cr [max 16 cr].

Prereq-Grad or advanced undergrad student with #) Selected topics in U.S. history not covered in regular courses. Taught as staffing permits.

HIST 5920. Topics in African Social History. (3 cr [max 15 cr]. Prereq-Grad or #)

Focuses on the experiences of Africans in their workplaces, households, and communities. Detailed treatment of selected historical themes. Topics vary by semester.

HIST 5930. Topics in Ancient History. (1-4 cr [max 16 cr]; A-F only. Prereq-Grad or #)

Selected topics in ancient history not covered in regular courses. To be taught as staffing permits and as enrollment warrants.

HIST 5931. Topics in Comparative Third World History.

(3 cr [max 16 cr]; A-F only. Prereq-Grad student or #) Topics specified in *Class Schedule*.

HIST 5932. African Historiography and the Production of Knowledge. (3 cr; A-F only. Prereq-Major in African history or [grad student, #])

Recent scholarship on social history of Africa. Focuses on new literature on daily lives of ordinary people in their workplaces, communities, households.

HIST 5933. Seminar in Ancient History. (3 cr; A-F only.

Prereq-Previous coursework in Greek or Roman history, #) Seminar on a selected topic in ancient history.

HIST 5934. Comparative History and Social Theory. (3 cr;

A-F only. Prereq-Grad student or [upper-div undergrad, #]) Works of history/sociology that are broadly comparative/theoretical. Issues of state formation, social movements, social structure, and economic development.

HIST 5935. Methods and Pedagogy in African History.

(3 cr; A-F only. Prereq-Grad student or #) Current historical methods/sources of African history. Pedagogical issues. Students design their own courses.

HIST 5940. Topics in Modern Chinese History. (1-4 cr [max

16 cr]. Prereq-Grad student or [advanced undergrad, #]) Possible topics include cultural, economic, intellectual, political, and social history.

HIST 5941. Readings in Chinese Documents. (3 cr.

Prereq-Reading knowledge of Chinese) Readings in Chinese on a topic to be selected by the instructor. Depending on the topic and the time period, readings may involve a mixture of modern and classical Chinese or may be entirely in modern Chinese. Consult instructor for more information.

HIST 5942. Topics: History of Medicine. (3-4 cr [max 16 cr].

Prereq-Prior history of medicine or history of science course recommended for undergrads) An exploration of topics central to the history of medicine. Emphasis on mid-18th century to the present. Topics vary yearly.

HIST 5950. Topics in Latin American History. (1-4 cr [max

15 cr]. Prereq-Grad or advanced undergrad with #) Selected topics in Latin American history not covered in regular courses. Taught as staffing permits.

HIST 5960. Topics in History. (1-4 cr [max 16 cr]. Prereq-

Grad or [advanced undergrad with #]) Selected topics in history not covered in regular courses. Taught as staffing permits.

HIST 5962. Expansion of Europe. (3 cr; A-F only. Prereq-Grad student, #)

Research proseminar on actions of Europeans in wider world, 1350-1790. Based on documents in James Ford Bell Library.

HIST 5964. Comparative Economic History. (3 cr. Prereq-#)

Theoretical approaches guide cross-cultural examinations of major issues in the economic history of East Asia, Europe, and the New World. Agrarian structures in economic development, markets, the state and economic development, and the industrial revolution.

HIST 5970. Advanced Research in Quantitative History.

(4 cr [max 16 cr]) Students will carry out publishable-quality research on a quantitative historical topic.

HIST 5971. Proseminar: Editing and Publishing. (3 cr; A-F only)

Evolution of modern scholarly publication as system of knowledge. Survey of history of printing/manufacture of books. Recent changes in information technology. Contemporary academic publishing. Basics of editing/editorial policy. Journals/presses.

HIST 5980. Topics in Comparative Women's History. (3 cr

[max 15 cr]. Prereq-Grad student or [advanced undergrad, #]) Cross-cultural/thematic explorations in history of women. Topics vary. May include gender and colonialism; women and class formation; women and religion; sexuality; medical construction of gender; women's narratives as historical sources; gender and politics.

HIST 5990. Readings in Comparative History. (3 cr [max 9 cr]. Prereq-#)

Students read/discuss historical works that focus on common theme or employ similar methods in different geographic areas. Issues of cross-area comparison. Topics vary (e.g., peasant societies, race/ethnicity, states/nationalism).

HIST 5993. Directed Study. (1-16 cr [max 16 cr]. Prereq-

[Grad student or sr], #, Δ, □) Guided individual reading or study.

HIST 5994. Directed Research. (1-16 cr [max 16 cr].

Prereq-[Grad student or sr], #, Δ, □) Work on a tutorial basis.

History of Medicine (HMED)

Medical School-Adm

HMED 3001V. Health Care in History I. (3 cr. \$HMED 3001W. Prereq-Honors)

Introduction to intellectual/social history of European/American medicine, health care from classical antiquity through 18th century. Meets with 3001W.

HMED 3001W. Health Care in History I. (3 cr. \$HMED 3001V)

Introduction to intellectual/social history of European/American medicine, health care from classical antiquity through 18th century.

HMED 3002W. Health Care in History II. (3 cr)

Introduction to intellectual/social history of European/American medicine, health care in 19th/20th centuries.

HMED 3040. Human Health, Disease, and the Environment in History. (3 cr)

Introduction to changing relationship of human health and the environment. Ways in which human-induced environmental changes have altered our experiences with disease and our prospects for health.

HMED 3055. Women, Health, and History. (3 cr)

Women's historical roles as healers, patients, research subjects, health activists. Biological determinism, reproduction, mental health, nursing, women physicians, public health reformers, alternative practitioners. Gender disparities in diagnosis, treatment, research, careers. Assignments allow students to explore individual interests.

HMED 3065. Body, Soul, and Spirit in Medieval and Renaissance European Medicine. (3 cr; A-F only)

Body/soul in medieval theology/cosmology. Religious conceptions of body/soul. Medical conceptions in medieval world. Medieval/renaissance psychology. Medical astrology and its consequences. Medical normal/abnormal body. Medicine of reproduction and sexual identity. Death, burial, dissection, and resurrection in medical/religious perspective. Macrocosmic/microcosmic body. Limits to human power/authority over body. Anatomical/chemical body/spirit.

HMED 5002. Public Health Issues in Historical Perspective. (3 cr)

Introduction to the evolution of major recurring problems and issues in public health including environment and health, food customs and nutrition, control of alcohol and drugs, venereal diseases and public policy, human resources regulation, and relationship of science to promotion of health.

HMED 5035. The Germ Theory and Modern Medicine. (3 cr)
Analysis of the formulation of the germ theory of disease and of its consequences for medical procedures (therapeutics, surgery, management of hospitals), public health programs, and the structure and prestige of the medical profession.

HMED 5045. Modern Medical Profession. (3 cr)
Historical analysis of American medical profession in 19th/20th centuries. Role of institutions, influence of social/moral values. Consequences of specialization, scientific innovation.

HMED 5055. Women, Health, and History. (3 cr. Prereq—Grad student or [jr or sr] with prev coursework in hist or #)
Women's historical roles as healers, patients, research subjects, health activists. Biological determinism, reproduction, mental health, nursing, women physicians, public health reformers, alternative practitioners. Gender disparities in diagnosis, treatment, research, careers. Assignments allow students to explore individual interests.

HMED 5200. Early History of Medicine to 1700. (3 cr; A-F only)
An introductory survey of the history of medicine in Europe and America.

HMED 5201. History of Medicine from 1700 to 1900. (3 cr. Prereq—5200)
An introductory survey of the history of medicine in Europe and America.

HMED 5210. Seminar: Theories and Methods in Medical History. (3 cr; A-F only)
Historiography of the history of medicine.

HMED 5211. Seminar: Theories and Methods in Medical History. (3 cr; A-F only. Prereq—5210)
Use of archives, primary sources. Supervised research project.

HMED 5940. Topics in the History of Medicine. (3-4 cr [max 16 cr])
Seminar on the historical relations between medicine and the State from the 18th to 20th centuries.

History of Science and Technology (HSCI)

*Department of History of Science and Technology
Institute of Technology*

HSCI 1212. Life on Earth: Perspectives on Biology. (4 cr. §HSCI 1214W)
How humans have developed theories/observations over 400 years about life on earth. Applying a historical perspective to issues today. Scientific ideas, environmental debates across national boundaries. Origins of life on earth. Evolution and natural theology. Ecosystems. Agricultural/industrial environmental degradation and species regeneration. "Guns, germs, and steel" hypothesis. Disease threats such as tuberculosis, influenza.

HSCI 1214W. Life on Earth: Perspectives on Biology. (4 cr. §HSCI 1212)
How humans have developed theories/observations over 400 years about life on earth. Applying a historical perspective to issues today. Scientific ideas, environmental debates across national boundaries. Origins of life on earth. Evolution and natural theology. Ecosystems. Agricultural/industrial environmental degradation and species regeneration. "Guns, germs, and steel" hypothesis. Disease threats such as tuberculosis, influenza.

HSCI 1714. Technology and Civilization: Stone Tools to Steam Engines. (4 cr. §HSCI 3714)
History of technology in its cultural context from earliest times to the Industrial Revolution. Neolithic Revolution, Bronze and Iron Ages, ancient civilizations, Greece, Rome, Middle Ages, and Renaissance.

HSCI 1715. Technology and Civilization: Waterwheels to the Web. (4 cr)
Relations of technology to culture since Industrial Revolution. Diffusion of Industrial Revolution, modes of adaptation by different cultures, social impact.

HSCI 1814. Revolutions in Science: The Babylonians to Newton. (4 cr. §HSCI 3814)
Development and changing nature of sciences in their cultural context. Babylonian/Greek science. Decline/transmission of Greek science. Scientific Revolution (1500-1700) from Copernicus to Newton.

HSCI 1815. Revolutions in Science: Lavoisier, Darwin, and Einstein. (4 cr. §HSCI 3815)
Development and changing nature of sciences in their cultural context. Newton and new mechanics. New chemistry. Light. Darwin and species. New experimental biology. Atomic/nuclear physics. Relationships among science, technology, society, and politics.

HSCI 1905. Freshman Seminar. (2 cr; A-F only. Prereq—Fr with no more than 30 cr or FRFY)
Topics vary. See *Class Schedule*.

HSCI 3211. Biology and Culture in the 19th and 20th Centuries. (3 cr. §HSCI 5211)
Changing conceptions of life and aims and methods of biology; changing relationships between biology and the physical and social sciences; broader intellectual and cultural dimensions of developments in biology.

HSCI 3242. The Darwinian Revolution. (3 cr. §HSCI 5242)
Development of evolutionary thought in 19th/20th centuries. Emphasizes Darwin's theory of evolution by natural selection. Scientific, economic, political, religious, philosophical dimensions of Darwinism. Comparative reception of Darwinism in different countries/cultures.

HSCI 3244. History of Ecology and Environmentalism. (3 cr. §HSCI 5244)
Development of ecological thought from 18th century natural theology to contemporary ecology and conservation biology; changing views of the "balance" and the "economy" of nature; conceptual and methodological developments in ecosystems ecology; connections between ecology and conservation, and between population and environmental politics.

HSCI 3331. Technology and American Culture. (3 cr. §HSCI 5331)
American technology in its cultural and intellectual context from 1790 to present. Transfer of technology to America; infrastructure promoting economic growth; social response to technological developments.

HSCI 3332. Science and American Culture. (3 cr. §HSCI 5332)
American science since 1600, including transfer of science to America; development of indigenous traditions for pursuit of science; infrastructure for education and research; public response to scientific development.

HSCI 3333H. Honors Course: Issues in Twentieth Century American Science and Technology. (3 cr)
Historical approach to understanding science and technology. Emphasizes intellectual, political, and social contexts. Decision-making by practitioners on issues of importance to the profession and the community. Topics relating to popular science, science, and warfare.

HSCI 3401. Ethics in Science and Technology. (3 cr. §HSCI 5401)
Historical issues involve research ethics including utilitarian, social Darwinian, and other ethical systems developed in science. Ethical problems posed by modern science and technology, including nuclear energy, chemical industry, and information technologies.

HSCI 3714. Technology and Civilization: Stone Tools to Steam Engines. (4 cr. §HSCI 1714)
History of technology in its cultural context from earliest times to the Industrial Revolution. Neolithic Revolution, Bronze/Iron Ages, ancient civilizations, Greece, Rome, Middle Ages, Renaissance.

HSCI 3715. Technology and Civilization: Waterwheels to the Web. (4 cr)
Relations of technology to culture since Industrial Revolution. Diffusion of Industrial Revolution, modes of adaptation by different cultures, social impact.

HSCI 3814. Revolutions in Science: The Babylonians to Newton. (4 cr. §HSCI 1814)
Development and changing nature of sciences in their cultural context. Babylonian/Greek science. Decline/transmission of Greek science. Scientific Revolution (1500-1700) from Copernicus to Newton.

HSCI 3815. Revolutions in Science: Lavoisier, Darwin, and Einstein. (4 cr. §HSCI 1815)
Development and changing nature of sciences in their cultural context. Newton and new mechanics. New chemistry. Light. Darwin and species. New experimental biology. Atomic/nuclear physics. Relationships among science, technology, society, and politics.

HSCI 4050. Special Topics in History of Science. (3 cr)
Topics specified in *Class Schedule*.

HSCI 4060. Special Topics in History of Technology. (3 cr)
Topics specified in *Class Schedule*

HSCI 4111. History of 19th-Century Physics. (3 cr. §PHYS 4111. Prereq—General physics or #)
Legacy of 17th-century experimental and theoretical physics. Experimental and theoretical discoveries in 19th-century physics (light, atomic theory, heat, thermodynamics and statistical mechanics, electromagnetism) within the context of educational, institutional, and political developments in Europe and the United States.

HSCI 4121. History of 20th-Century Physics. (3 cr. §PHYS 4121. Prereq—General physics or #)
Experimental and theoretical discoveries in 20th-century physics (modern physics, theory of relativity, quantum theories, nuclear physics to World War II) within the context of educational, institutional, and political developments in Europe and the United States.

HSCI 4125. The Nuclear Age. (3 cr)
Discoveries of X-rays, radiation, the atom and its nucleus, and subatomic particles. Development of nuclear weapons/power. Nuclear legacies of Hiroshima, Eniwetok, Chernobyl, and the cold war.

HSCI 4302. History of High-Technology Weapons. (3 cr)
Ancient missile launchers, gunpowder, cannons, and their role in expansion of West. Influence of arms-making on American system of manufacture. Naval warfare, air power, nuclear weapons, ICBMs, chemical/biological warfare, stealth/smart weapons.

HSCI 4321. History of Computing. (3 cr. §CSCI 4921)
Developments in the last 150 years; evolution of hardware and software; growth of computer and semiconductor industries and their relation to other business areas; changing relationships resulting from new data-gathering and analysis techniques; automation; social and ethical issues.

HSCI 4455. Women, Gender, and Science. (3 cr. §WOST 4102)
Three intersecting themes analyzed from 1700s to the present: women in science, sexual and gendered concepts in modern sciences, and impact of science on conceptions of sexuality and gender in society.

HSCI 5211. Biology and Culture in the 19th and 20th Centuries. (3 cr. §HSCI 3211)
Changing conceptions of life and aims and methods of biology; changing relationships between biology and the physical and social sciences; broader intellectual and cultural dimensions of developments in biology.

HSCI 5242. The Darwinian Revolution. (3 cr. §HSCI 3242)
Development of evolutionary thought in 19th/20th centuries. Emphasizes Darwin's theory of evolution by natural selection. Scientific, economic, political, religious, philosophical dimensions of Darwinism. Comparative reception of Darwinism in different countries/cultures.

HSCI 5244. History of Ecology and Environmentalism. (3 cr. §HSCI 3244)
Development of ecological thought from 18th century natural theology to contemporary ecology and conservation biology; changing views of "balance" and the "economy" of nature; conceptual and methodological developments in ecosystems ecology; connections between ecology and conservation, population and environmental politics.

HSCI 5331. Technology and American Culture. (3 cr. §HSCI 3331)
Development of American technology in its cultural/intellectual context from 1790 to present. Transfer of technology to America. Establishment of an infrastructure promoting economic growth. Social response to technological developments.

HSCI 5332. Science and American Culture. (3 cr. §HSCI 3332)
Development of American science since 1600, including transfer of science to America. Development of indigenous traditions for pursuit of science. Establishment of infrastructure for education/research. Response of public to scientific development.

HSCI 5401. Ethics in Science and Technology. (3 cr. §HSCI 3401)
Historical issues involving ethics in science. Ethical problems posed by modern science/technology, including nuclear energy, chemical industry, and information technologies.

HSCI 5411. Art and Science in Early Modern Europe. (3 cr.)
Interaction of art and science, from Renaissance to 19th century. Development of linear perspective, color theory, artistic practice, and scientific illustration/representation.

HSCI 5993. Directed Studies. (1-15 cr [max 15 cr]. Prereq-#)
Guided individual reading or study.

HSCI 5994. Directed Research. (1-15 cr [max 15 cr]. Prereq-#)

Hmong (HMNG)

Department of Asian Languages and Literatures

College of Liberal Arts

HMNG 1011. Beginning Hmong. (5 cr. §HMNG 3022, HMNG 4001)
Listening, speaking, reading, and writing skills. Emphasizes development of communicative competence.

HMNG 1012. Beginning Hmong. (5 cr. §HMNG 4002. Prereq-1011)
Continuation of 1011. Listening, speaking, reading, and writing skills. Emphasizes development of communicative competence.

HMNG 1015. Accelerated Beginning Hmong. (5 cr. Prereq-Ability in basic spoken Hmong)
Review of grammar/usage, practice in reading/writing. Introduction to Hmong literature and formal writing. Topics in Hmong culture.

HMNG 1016. Accelerated Intermediate Hmong. (5 cr. §HMNG 4006. Prereq-1015, ability in basic spoken Hmong)
Review of grammar/usage, continued practice in reading/writing. Expanded introduction to Hmong literature and formal writing. Selected topics in Hmong culture.

HMNG 3021. Intermediate Hmong. (5 cr. §HMNG 4003. Prereq-1012)
Listening, speaking, reading, and writing. Grammar review/elaboration. Authentic texts, cultural readings, basic compositions, oral presentations.

HMNG 3022. Intermediate Hmong. (5 cr. §HMNG 1011, HMNG 4001. Prereq-3021)
Continuation of 3021. Listening, speaking, reading, writing. Grammar review/elaboration. Authentic texts, cultural readings, basic compositions, oral presentations.

HMNG 3290. Hmong Language Teaching Tutorial. (1 cr [max 2 cr]. Prereq-Grade of A in 3022)
Students tutor beginning students of Hmong and are part of department's Hmong language team.

HMNG 4001. Beginning Hmong. (3 cr. §HMNG 1011, HMNG 3022. Prereq-passing score on GPT in another language or grad student)
Listening, speaking, reading, and writing skills. Emphasizes development of communicative competence. Meets with 1011.

HMNG 4002. Beginning Hmong. (3 cr. §HMNG 1012. Prereq-[4001, passing score on GPT in another language] or grad student)
Continuation of 1011. Listening, speaking, reading, and writing skills. Emphasizes development of communicative competence. Meets with 1012.

HMNG 4003. Intermediate Hmong. (3 cr. §HMNG 3021. Prereq-[4002, passing score on GPT in another language] or grad student)
Listening, speaking, reading, writing. Grammar review/elaboration. Authentic texts, cultural readings, basic compositions, oral presentations. Meets with 3021.

HMNG 4004. Intermediate Hmong. (3 cr. Prereq-[4003, passing score on GPT in another language] or grad student)
Continuation of 4003. Listening, speaking, reading, writing. Grammar review/elaboration. Authentic texts, cultural readings, basic compositions, oral presentations. Meets with 3022.

HMNG 4005. Accelerated Beginning Hmong. (3 cr. Prereq-ability in basic spoken Hmong)
Review of proper grammar/usage, practice in reading/writing. Introduction to Hmong literature and other formal writing. Topics on Hmong culture.

HMNG 4006. Accelerated Intermediate Hmong. (3 cr. §HMNG 1016. Prereq-[1015 or 4005], ability in basic spoken Hmong)
Review of proper grammar/usage, practice in reading/writing. Expanded introduction to Hmong literature and other formal writing. Topics on Hmong culture.

HMNG 5040. Readings in Hmong Texts. (2-4 cr [max 12 cr]. Prereq-1016 or 3022 with grade of at least B or #)
Comprehensive, multidimensional overview of Hmong oral forms/traditions. Hmong legends, mythology, folksons, birth, marriage/funeral rites. History, social/cultural anthropology. Values, life ways of traditional village society. Societal changes resulting from emigration to U.S.

Honors Seminar (HSEM)

HSEM 1001H. Introduction to Arts and Sciences. (1 cr. Prereq-1st sem fr, honors)
Small-class discussion with outstanding faculty members. Meets for 10 weeks.

HSEM 1210H. Honors Book Discussion. (1 cr [max 2 cr]; S-N only)
Honors Book Discussion.

HSEM 2010H, 2020H, 2030H, 2040H, 2050H, 2060H, 2070H, 2080H, 2090H. Honors Seminar. (3 cr [max 9 cr]; A-F only. Prereq-[Fr or soph with less than 60 cr], honors)
Topic specified in *Course Guide*.

HSEM 2110V, 2120V, 2130V. Writing Intensive Honors Seminar. (3 cr [max 9 cr] Prereq-[Fr or soph], honors)
Topics course, often interdisciplinary, writing intensive.

HSEM 3010H, 3020H, 3030H, 3040H, 3050H, 3060H, 3070H, 3080H, 3090H. Honors Seminar. (3 cr [max 12 cr]; A-F only. Prereq-[Jr or sr], honors)
Special topics. Discussions, active learning. Often interdisciplinary.

HSEM 3093H. Directed Studies. (1-4 cr [max 16 cr]. Prereq-[Jr or sr], honors, #, Δ, □)
Additional research related to seminar topic.

HSEM 3110V, 3120V, 3130V, 3140V. Writing Intensive Honors Seminar. (3 cr [max 12 cr]. Prereq-[Jr or sr], honors)
Special topics course. Discussions, active learning. Often interdisciplinary in perspective.

HSEM 3210H. Honors Book Discussion. (1 cr [max 2 cr]. Prereq-[Jr or sr], honors)
Students read a text, meet to discuss. Lectures on text by faculty, other experts.

Horticultural Science (HORT)

Department of Horticultural Science

College of Food, Agricultural and Natural Resource Sciences

HORT 1001. Plant Propagation. (4 cr)
Principles and techniques of propagating plants by seeds, cuttings, grafts, buds, layers, and division. Lectures on principles; labs on practice of various propagating techniques.

HORT 1003. Master Gardener Core Course: Horticulture for Home & Garden. (3 cr)
Foundation in soils; botany; entomology; plant pathology; indoor, herbaceous, and wood plants; lawn fruits/vegetables; pesticides; wildlife. Emphasizes extension publications/resources useful in answering consumer horticulture questions.

HORT 1004. Building Your Horticulture Learning Community. (1 cr; A-F only. Prereq-[New NHS admit or new NAS admit], environmental horticulture major)
How to use personal, departmental, college, and University resources to increase learning. Building collegial relationships with other incoming students to form a "student learning community" that will support personal/professional growth.

HORT 1013. Floral Design. (2 cr [max 3 cr])
Design for use in commercial flower shops and at home. Principles/elements of design. Wedding arrangements. Corsages. Decorative use of dried materials.

HORT 1015. Woody and Herbaceous Plants. (4 cr)
How to identify plants around the world. A few hundred of the most important cultivated plants for northern climates, their distinguishing features, common uses, cultural specificities, and notable cultivars.

HORT 1031. Vines and Wines: Introduction to Viticulture and Enology. (3 cr. Prereq-21 yrs of age by date of 1st class meeting)
History of wine, principles of biology, culture of grapevine, fermentation, sensory evaluation of wine.

HORT 3002W. Greenhouse Management. (3 cr; A-F only. Prereq-1001)
Worldwide floricultural production; selection of greenhouse site, construction, heating, and cooling. Greenhouse cost accounting and analysis. Root media, sanitation, water, fertilization, chemical growth regulation, temperature, light, and marketing. Lab in greenhouse operations plus field trips.

HORT 3005. Environmental Effects on Horticultural Crops. (2 cr; A-F only. Prereq-[1001, CHEM 1011] or #, §BIOL 3002)
Effects of environment on plant growth/physiology. How horticulturalists manipulate environment to produce high quality plants.

HORT 3090. Horticultural Practicum. (2-4 cr [max 12 cr]. Prereq-Jr or sr Hort major, #)
Approved field, laboratory, or greenhouse experiences in application of horticultural information and practices.

HORT 4000. International Experiences in Horticultural Science. (3 cr [max 6 cr]. Prereq=1001 or #)
Perspectives in horticultural science and cultural diversity through various international settings. Focuses on different aspects, depending on interests/expertise of lead faculty. First part of course is preparation for an international study tour of one to three weeks, usually during May Session.

HORT 4000H. International Experiences in Horticultural Science: Honors. (3 cr [max 6 cr]. Prereq=[1001 or #], honors)
Perspectives in horticultural science and cultural diversity through various international settings. Focuses on different aspects, depending on interests/expertise of lead faculty. First part of course is preparation for an international study tour of one to three weeks, usually during May Session.

HORT 4015. Advanced Woody and Herbaceous Plant Topics. (1 cr [max 7 cr] Prereq=1015)
Species, cultivars, identification, and use for each genus of one group of plants.

HORT 4021. Landscape Design and Implementation I. (4 cr. Prereq=1001, 1015)
Based on philosophy of sustainable landscape theory/practice. Emphasizes sustainability to all phases of landscape development. Lab includes design, implementation, and management of actual landscape.

HORT 4022. Applications in Computer-Aided Design for Landscapes. (3 cr. Prereq=5021)
Training in computer-aided design and related software programs for use in developing landscape design solutions. Focuses on practical, real life applications. Students develop base plans, concept, draft designs, and completed landscape design.

HORT 4061W. Turfgrass Management. (3 cr. Prereq=1001, SOIL 2125)
Biology of turfgrasses, ecology of landscape systems. Turfgrass installation, management, and culture of turfgrass communities and landscape plant systems. Sod production, industrial grounds, general lawn care, park/recreation areas, athletic field management. Business management, decision making programs. Problem solving, case studies.

HORT 4062. Turfgrass Weed and Disease Science. (3 cr. Prereq=4061, PLPA 2001)
Turfgrass weed/disease problems. How to deal with these problems using an integrated approach. Biology, identifying features, and management strategies for several turfgrass diseases/weeds. How to apply IPM principles to turfgrass weed/disease problems.

HORT 4071W. Applications of Biotechnology to Plant Improvement. (4 cr. Prereq=[BIOL 1009 or equiv or grad student], #)
Fundamentals of plant genetics, molecular biology, and plant biotechnology. Emphasizes their applications to plant propagation and crop improvement. Hands-on experience with crossing plants, analysis of phenotypes and segregation data, plant tissue culture/transformation, gel electrophoresis, molecular cloning, use of genetically modified crops. Principles of ethics/citizenship to decision making in plant genetics and biotechnology. Debate, discussion, writing exercises.

HORT 4072. Growing Plants Organically: What It Means To Be Green. (3 cr. Prereq=1001 or BIOL 2022 or PBIO 3XXX or equiv, jr or sr or #)
Science and ethics of organic cultivation. What is meant by "green" from a legal, scientific, and ethical perspective? Explore original literature on an organic practice, prepare a written report, and lead a class discussion.

HORT 4096. Professional Experience Program: Internship. (1-3 cr [max 6 cr] Prereq=COAFES undergrad, #, completed internship contract)
Professional experience in horticulture firms or government agencies attained through supervised practical experience. Students evaluate reports, consult with faculty advisers and employers.

HORT 4401. Plant Genetics and Breeding. (4 cr. SAGRO 4401. Prereq=BIOL 1009 or equiv or grad, #)
Principles of plant genetics and environmental variation. Applications of genetics to crop evolution and breeding of self-pollinated, cross-pollinated, and asexually propagated crops. Lab experiments investigate hybridization, variation, and selection.

HORT 5009. Pesticides in Horticulture: Their Use and Abuse. (3 cr; A-F only. Prereq=[ENT 4015 or ENT 4251], PLPA 2001)
History of and practical information about pesticides used by horticulture industry. Pesticide modes of action. Use, application methods, environmental effects. Final three weeks devoted to labs on practical mixing/delivery systems.

HORT 5018. Landscape Operations and Management. (3 cr. Prereq=1001 or #)
Business, managerial, and technical aspects of landscape management relative to environmental horticulture and green industry. Tasks associated with maintaining turf and woody/herbaceous plants in landscape. Relationship of those tasks to preparation/justification of labor, equipment, and supply budgets. Labs, demonstrations, hands-on experiences associated with science and technically-based landscape maintenance/operations.

HORT 5021. Landscape Design and Implementation II. (4 cr. Prereq=4021)
Residential, commercial, and recreational sites. Architectural/graphic techniques, plan drawings, sections elevations, perspectives, working drawings. Grading and site manipulation, including surveying, irrigation, and drainage. Development of business/grounds management plans. Landscape estimating/bidding.

HORT 5023. Public Garden Management. (2 cr)
Overview of knowledge/skills necessary to manage a public garden. History of public gardens. Development of mission and vision. Planning and design. Operations. Education and research. Fund raising, business management, personnel, marketing, conservation.

HORT 5031. Sustainable Fruit Production Systems. (2 cr; A-F only. Prereq=1001, 3005)
Principles of fruit production. Emphasizes temperature fruit crops. Integrated management of fruit cropping systems, including site selection, cultural management practices, taxonomic classification, physiological/environmental control of plant development. Integration of writing into understanding various fruit cropping systems.

HORT 5032. Sustainable Commercial Vegetable Production Systems. (3 cr; A-F only. Prereq=[3005, Ent 3005, PLPA 2001, SOIL 2125] or #)
Principles of commercial vegetable production. Integrated management of vegetable cropping systems. Site selection/environment, seed/stand establishment, cultural management practices, commodity use, handling from harvest to market. Perspectives on types of vegetable cultivars. Origin, historical significance/improvement through breeding, nutrition/medicinal aspects, physiological/environmental control of development.

HORT 5041W. Nursery Management. (4 cr; A-F only. Prereq=[1001, 1015] or #)
Production, maintenance, and marketing of woody ornamental plants. Establishment/management of nursery or garden centers. Lab, field trips.

HORT 5051. Floriculture Crop Production. (4 cr; A-F only. Prereq=1001, 1015, 3002)
Propagation, production, and use of floral crops. Emphasizes bedding plants, perennials, and cut flowers. Growing, marketing, and using herbaceous plants. Cultural practices. Manipulation of environment for growth/quality. Lab, field trips.

HORT 5052. Specialty Greenhouse Crop Production. (3 cr; A-F only. Prereq=1001, 1015, 3002)
Media management, insect/disease control, management of annual versus perennial plant production systems. Soil modification, seed germination, transplanting, scheduling, weed control, fertilization/irrigation. Environment management, hydroponic solution management, pest management in closed environment. Post-harvest management/care, drying/dying procedures. Consumer surveys at Minneapolis and St. Paul farmers' markets.

HORT 5061. Turfgrass Science. (3 cr. Prereq=4061)
For advanced students in turf with career objectives in professional turf management. Emphasis on ecology, physiology, and theory of turf population dynamics and specialized management situations such as golf course, commercial sod production, and fine turf athletic settings.

HORT 5071. Restoration and Reclamation Ecology. (3 cr. Prereq=BIOL 2022 or BIOL 3002, BIOL 1001 or BIOL 3407 or equiv or #)
Ecological and physiological concepts as a basis for revegetation of grasslands, wetlands, forests, and other landscapes. Plant selection, stand establishment, evaluating revegetation success. State and federal programs that administer restoration and reclamation programs. Field trips within Minnesota.

HORT 5090. Directed Studies. (1-6 cr [max 18 cr]. Prereq=8 cr upper div Hort courses, #)
In-depth exploration of concepts, technology, materials, or programs in specific area to expand professional competency/self-confidence. Planning, organizing, implementing, and evaluating knowledge obtained from formal education and from experience.

Human Resource Development (HRD)

Department of Work and Human Resource Education

College of Education and Human Development

HRD 3001. Introduction to Human Resource Development. (3 cr)
Human resource development theories, principles, concepts, and practices.

HRD 3196. Profession and Practice of Human Resource Development. (2 cr. Prereq=HRD undergrad)
Skills/strategies necessary for HRD internships/careers.

HRD 3201. Introduction to Training and Development. (3 cr; A-F only)
Processes to carry out theoretically sound training/development practices. Systemic relationship with host organization or system.

HRD 3301. Introduction to Organization Development. (3 cr. Prereq=Udngergrad)
Organization development theories, principles, concepts, and practices. How development is used to direct change in an organization.

HRD 5101. Foundations of Human Resource Development. (1 cr)
Introduction to human resource development as a field of study and practice.

HRD 5102. Economic Foundation of Human Resource Development. (1 cr. Prereq=5101)
Introduction to economics as a core discipline supporting the theory and practice of human resource development.

HRD 5103. Psychological Foundation of Human Resource Development. (1 cr. Prereq=5101)
Introduction to psychology as a core discipline supporting the theory and practice of human resource development.

HRD 5104. Systems Foundation of Human Resource Development. (1 cr. Prereq=5101)

Introduction to system theory as a core discipline supporting the theory and practice of human resource development.

HRD 5105. Strategic Planning through Human Resources.

(3 cr; A-F only. Prereq=5001 or 5101, 5102, 5103, 5104)
The theory and practice of strategically developing, utilizing, and aligning human resources as a major contributor to organizational and quality improvement success.

HRD 5106. Evaluation in Human Resource Development.

(3 cr; A-F only)
Evaluation of human resource development efforts from the perspective of impact on organizations, work processes, and individuals, plus follow-up decisions.

HRD 5111. Facilitation and Meeting Skills. (1 cr)

Introduction to the disciplines of planning and running effective meetings. Tools and methods for meeting management and evaluation are presented within the context of organization development.

HRD 5196. Internship: Human Resource Development.

(1-10 cr [max 10 cr]; S-N only. Prereq=5001, 5201 or 5301)
Students apply and contract for human resource development positions. Contracts describe specific HRD responsibilities to be fulfilled during internship and theory-to-practice learning outcomes.

HRD 5201. Training and Development of Human Resources. (3 cr; A-F only)

Training/development of human resources in organizations. Process phases of analysis, design, development, implementation, and evaluation.

HRD 5202. Training on the Internet. (3 cr)

Major concepts, skills, and techniques for giving and receiving training on the Internet.

HRD 5301. Organization Development. (3 cr; A-F only)

Introduction to major concepts, skills, and techniques for organization development/change.

HRD 5302. Managing Work Teams in Business and Industry. (3 cr; A-F only. Prereq=2 core courses in HRD)

Frameworks and strategies for developing effective work teams. Skill development in facilitating resolution of conflicts in organizations. Provides foundational information as well as practical applications for participants (upper-level and graduate students) to become small team leaders.

HRD 5405. Quality Improvement Through Human Resources. (3 cr; A-F only. Prereq=[5201, 5301] or #)

Quality management, productivity improvement theory/practice from a human resource perspective. Organization development/training as integral components of quality improvement. HR role within quality standards. History of quality improvement, contributions of major leaders.

HRD 5408. International Human Resource Development.

(3 cr)
Problems, practices, programs, theories, and methodologies in human resource development as practiced internationally.

HRD 5409. Planning and Decision-Making Skills. (1 cr)

Introduction to the disciplines of planning and decision making typically used in process improvement interventions. Tools and methods for facilitating group decisions and problem solving.

HRD 5410. Survey of Research Methods and Emerging Research in Human Resource Development. (3 cr; A-F only. Prereq=[Registered, in attendance] at conference of Academy of HRD)

Role of research in HRD. Standards/criteria for evaluating research, critique of conference research papers, identification of emerging research themes. Offered in conjunction with the annual conference of Academy of HRD.

HRD 5496. International Field Study in Human Resource Development. (3 cr. Prereq=5001)

Field study of the organization development, personnel training and development, career development, and quality improvement theories and practices in a selected nation.

HRD 5624. Sales Training. (3 cr; A-F only)

Strategies and techniques for developing effective sales people.

HRD 5625. Technical Skills Training. (3 cr)

Analyzing technical skills training practices in business and industry. Systems and process analysis and trouble-shooting of work behavior; design methods and developing training materials.

HRD 5626. Customer Service Training. (3 cr; A-F only)

Overview of customer service strategies used by successful organizations and training practices used to develop customer-oriented personnel.

HRD 5627. Management and Supervisory Development.

(3 cr)
Problems, practices, programs, and methodologies relating to the training and development of managers and supervisors, including needed competencies, needs assessment, delivery modes, and evaluation.

HRD 5770. Special Topics in Human Resource Development. (1-4 cr [max 12 cr])

Issues, methods, and knowledge in HRD areas. Topics vary.

HRD 5802. Education and Human Resource Development Through Tourism. (3 cr; A-F only)

Policies/practices of education and human resource development in tourism industry.

HRD 5821. Diversity Issues and Practices in Work, Community, and Family Settings. (3 cr)

Nature of diverse populations and their unique learning and training needs, exemplary programs, and collaborative efforts among persons representing work, community, and family settings.

Human Resources and Industrial Relations (HRIR)

Industrial Relations Center

Curtis L. Carlson School of Management

HRIR 1907W. Freshman Seminar. (3 cr [max 6 cr]. Prereq=Fr)

Topics vary.

HRIR 3021. Human Resource Management and Industrial Relations. (3 cr. \$HRIR 8021. Prereq=1102, ECON 1101, PSY 1001, 60 cr)

Role of human resource management in organizations. Labor markets, recruitment, selection, training, compensation, labor relations, and performance management. Evolution of work. Discrimination in employment. Work performance and its reward. Effects of changing technology.

HRIR 3031. Staffing and Selection: Strategic and Operational Concerns. (2 cr. Prereq=CSOM upper div undergrad major grad)

Introduction to theory/practice of staffing decisions: recruitment, selection, promotion, demotion, transfer, dismissal, layoff, retirement. Staffing analyzed from strategic/operational perspectives. Legal issues.

HRIR 3032. Training and Development. (2 cr. Prereq=CSOM upper div undergrad major grad)

Introduction to theory/research/practice of design/implementation/evaluation of employee training/development programs. Training as process for influencing individual/organizational outcomes (e.g., performance, job satisfaction, work climate).

HRIR 3041. The Individual in the Organization. (2 cr)

Focus on factors influencing individual work performance. Includes motivation, perceptual differences, career choice, psychological contracts, assumptions about workers/work, leadership/management, learning/skill development, openness to change. Examines evidence on current trends.

HRIR 3042. The Individual and Organizational Performance. (2 cr)

Factors influencing group, team, and organizational performance. Examines systems that drive organizational success. Topics include job design and organization structure, organization effectiveness measures, culture, group dynamics, teamwork; power and influence.

HRIR 3051. Compensation: Theory and Practice. (2 cr. Prereq=[At least 60 sem cr or 75 qtr cr], 2.00 GPA) or Δ)

Introduction to compensation/reward programs in employing organizations. Theories of organizational/employee behavior used in design/implementation of pay programs. Design, implementation, and evaluation of job evaluation, salary surveys, skill-based pay, merit-based pay, and other compensation programs.

HRIR 3071. Union Organizing and Labor Relations. (2 cr. Prereq=CSOM upper div undergrad major grad)

Analysis of labor unions, employee associations, and collective bargaining within the framework of contemporary American legislation and policy. Covers forming/organizing labor unions; union, employee, and management strategies and responsibilities, historical influences on policy and practice in the private and public sectors.

HRIR 3072. Collective Bargaining and Dispute Resolution.

(2 cr. Prereq=CSOM upper div undergrad major grad)
Collective bargaining, contract administration, grievance processing, interest/rights arbitration, strikes and related policies and practices of employers, workers, and labor unions in dealing with worker representation in the private and public sectors. Impact and transfer of practices to the non-union sector are considered.

HRIR 5000. Topics in Human Resources and Industrial Relations. (2 cr [max 8 cr])**HRIR 5021. Systems of Conflict and Dispute Resolution.** (4 cr. Prereq=CSOM upper div undergrad major grad)

Introduction to theoretical and practical treatment of conflict settlement in interpersonal, work-related, community, business, and international settings. Lectures, discussions, observations of actual dispute resolution sessions, and lab exercises with students participating in dispute resolution simulations applied to real world conflicts.

HRIR 5022. Managing Diversity. (2 cr. Prereq=CSOM upper div undergrad major grad)

Ways to effectively manage increasingly diverse workforce. Human resource practices examined with respect to diversity. How to incorporate diversity into decision making to enhance organizational performance.

HRIR 5023. Employment and Labor Law for the HRIR Professional. (2 cr. Prereq=[At least 60 sem cr or 75 qtr cr], 2.00 GPA) or grad student or #)

Application of statutes and case law to work settings. Civil rights and equal opportunity. Discrimination and harassment. Compensation and benefits. Employee protection and privacy, labor relations. Emphasizes application and ability to recognize legal aspects of HRIR issues.

HRIR 5024. Employee Performance: Appraisal and Management. (2 cr. Prereq=CSOM upper div undergrad major grad)

How employee performance is organized, appraised, and managed to achieve organizational/individual performance goals. Job design standards, employee appraisal systems, worker satisfaction.

HRIR 5025. Comparative and International Human Resources and Industrial Relations. (2 cr. Prereq—Grad majors must register A-F)
Emergence, evolution, structures, functions, current challenges of labor movements in industrialized societies. Critical differences in key human resource management practices. Industrial relations systems, collective bargaining in comparative perspective. International Labor Organization.

HRIR 5026. Innovative HR Leadership in the Context of Change and Uncertainty. (2 cr. Prereq—[At least 60 cr], 2.00 GPA) or grad student or Δ; grad majors must register A-F)
Overview of leadership in managing human resources. Historical evolution. Major theories/models. Principles of effective HR leadership in practice. Effects of uncertainty/change on leadership style/practice. HR leadership as powerful management tool.

HRIR 5054. Public Policies on Employee Benefits: Social Safety Nets. (2 cr. Prereq—Undergrad in micro economics; HRIR grad majors must register A-F)
Analysis of social safety nets through government-mandated employee benefits: workers' compensation, unemployment insurance, social security, health insurance. Rationale for social safety nets. Administration/evaluation of existing programs. Effects on worker well-being and on behavior of employers/workers. Need for reform.

HRIR 5061. Public Policies on Work and Pay. (3 cr)
Analysis of public policies regarding employment, unions, and labor markets. Public programs affecting wages, unemployment, training, worker mobility, security, and quality of work life. Policy implications of the changing nature of work.

HRIR 5062. Personnel Economics. (2 cr. Prereq—[ECON 1101, at least 60 sem cr, 2.00 GPA] or HRIR grad major)
Application of economic tools to problems in human resources and industrial relations. Human capital/training. Incentives, information. Hiring, turnover.

HRIR 5991. Independent Study in Human Resources and Industrial Relations. (1-8 cr [max 8 cr]. Prereq—Δ or #)
Individual readings or research topics.

Humanities (HUM)

Department of Humanities

College of Liberal Arts

HUM 1001. Humanities in the West I. (4 cr. \$HUM 3001)
Greek and Roman civilization, rise of Christianity. Epic and lyric poetry, drama, architecture, sculpture, philosophy religion. Integrative study of works by creative figures such as Homer, Hesiod, Aeschylus, Sophocles, Euripides, Aristophanes, Plato, Aristotle, Caesar, Lucretius Virgil, Ovid, Petronius, Augustine, Boethius.

HUM 1002. Humanities in the West II. (4 cr. \$HUM 3002)
Sixth to Fourteenth centuries: Growth of Christendom; monasticism; feudalism and courtly love, rise of towns and universities. Art and architecture: Byzantine, Romanesque and Gothic. Music: Gregorian chant, minstrelsy, liturgical drama. Literature: epic, romance, Dante. Islam. Scholastic philosophy: Abelard, Aquinas.

HUM 1003. Humanities in the West III. (4 cr. \$HUM 3003)
European civilization from 15th/16th centuries. Religious/cultural reaction in northern Europe, humanism, counter-reformation, religious wars, philosophy, literature, art, music. Works by creative figures such as Petrarch, Machiavelli, Erasmus, Luther, Michelangelo, Josquin.

HUM 1004. Humanities in the West IV. (4 cr. \$HUM 3004)
European civilization from 17th/18th centuries. Old Regime through French Revolution/Napoleon, new science, Enlightenment, cult of sensibility, art, music. Integrative study of works by creative figures such as Cervantes, Descartes, Rembrandt, Bach, Pope, Voltaire, Rousseau, Goethe, Watteau, David, Goya, Mozart.

HUM 1005. Humanities in the West V. (4 cr. \$HUM 3005)
Industrial Revolution, liberalism, socialism, romanticism. Impact of science, especially evolution theory, on religious/humanistic thought. Roots of existentialism: art, music. Wordsworth, Adam Smith, Marx, Dostoevsky, Delacroix, Courbet, Beethoven, Darwin, Nietzsche, Joyce, Monet, Wagner.

HUM 1006. Humanities in the West VI. (4 cr. \$HUM 3006)
The Western world, 1914-1970. Ideas and forms of society and culture: Leninist, fascist-Nazi, Freudian. Existentialism, "the absurd"; influence of oriental spiritual traditions; art, music. Integrative study of works by creative figures such as Lenin, Freud, Kafka, Picasso, Stravinsky, Bartok, Gropius, Sartre, Ionesco, Jung, Watts, Pollock, Cage, Fellini.

HUM 1905. Topics: Freshman Seminar. (3 cr. Prereq—Fr)
Topics specified in *Class Schedule*.

HUM 1909W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

HUM 3001. Humanities in the West I. (4 cr. \$HUM 1001)
Greek and Roman civilization, rise of Christianity. Epic/lyric poetry, drama, architecture, sculpture, philosophy of religion. Integrative study of works by creative figures such as Homer, Hesiod, Aeschylus, Sophocles, Euripides, Aristophanes, Plato, Aristotle, Caesar, Lucretius Virgil, Ovid, Petronius, Augustine, Boethius.

HUM 3002. Humanities in the West II. (4 cr. \$HUM 1002)
Sixth to Fourteenth centuries: Growth of Christendom; monasticism; feudalism and courtly love, rise of towns and universities. Art and architecture: Byzantine, Romanesque and Gothic. Music: Gregorian chant, minstrelsy, liturgical drama. Literature: epic, romance, Dante. Islam. Scholastic philosophy: Abelard, Aquinas.

HUM 3003. Humanities in the West III. (4 cr. \$HUM 1003)
European civilization from 15th/16th centuries. Religious/cultural reaction in northern Europe, humanism, counter-reformation, religious wars, philosophy, literature, art, music. Works by creative figures such as Petrarch, Machiavelli, Erasmus, Luther, Michelangelo, Josquin.

HUM 3004. Humanities in the West IV. (4 cr. \$HUM 1004)
European civilization from 17th/18th centuries. Old Regime through French Revolution/Napoleon, new science, Enlightenment, cult of sensibility, art, music. Integrative study of works by creative figures such as Cervantes, Descartes, Rembrandt, Bach, Pope, Voltaire, Rousseau, Goethe, Watteau, David, Goya, Mozart.

HUM 3005. Humanities in the West V. (4 cr. \$HUM 1005)
Industrial Revolution, liberalism, socialism, romanticism. Impact of science, especially evolution theory, on religious/humanistic thought. Roots of existentialism: art, music. Wordsworth, Adam Smith, Marx, Dostoevsky, Delacroix, Courbet, Beethoven, Darwin, Nietzsche, Joyce, Monet, Wagner.

HUM 3006. Humanities in the West VI. (4 cr. \$HUM 1006)
The Western world, 1914-1970. Ideas and forms of society and culture: Leninist, fascist-Nazi, Freudian. Existentialism, "the absurd"; influence of oriental spiritual traditions; art, music. Integrative study of works by creative figures such as Lenin, Freud, Kafka, Picasso, Stravinsky, Bartok, Gropius, Sartre, Ionesco, Jung, Watts, Pollock, Cage, Fellini.

HUM 3021. Introduction to Historical Foundations of Modern Education. (3 cr. \$EDPA 3021, EDPA 5021, HUM 4021)
Analysis and interpretation of important elements in modern education derived from pre-classical sources, the Greeks, Romans, Middle Ages, Renaissance, Reformation, Enlightenment, and Industrial Revolution. Basic background course.

HUM 3023. Introduction to History of Western Educational Thought. (3 cr. \$EDPA 3023, EDPA 5023, HUM 4023)
Great educational classics of Western civilization, by: Plato, Aristotle, Quintilian, Montaigne, Milton, Locke, Rousseau, and others.

HUM 3027. Lyric Song in Medieval Culture. (3 cr)
Courtly, paraliturgical, and popular song traditions, 1100-1500, in specific contexts: castle, palace, monastery, nunnery, cathedral, theater, tavern, street and countryside. Social roles of men and women as patrons, performers, poets, composers. Writing historical narratives and recreating medieval performance traditions.

HUM 3029. Music in the 20th Century. (3 cr. \$MUS 3029)
Surveys music in European and American culture from 1890s to present. Emphasizes interactions between high art, popular and ethnic musics, contributions of men and women as composers and performers, concurrent developments in the arts, dance, and literature, music as social commentary.

HUM 3036. Islam: Religion and Culture. (3 cr. \$ARAB 3036, HIST 3493, RELA 3036)
Religion of Islam, faith, practices, sectarian splintering, expansion outside original home to status of world religion. Institutions. Status in world societies: Asia, Europe, Americas.

HUM 3256. Aesthetics, Arts, and Society: France, 1848-1900. (2 cr)
Major movements in painting, literature, and poetry in France during second half of 19th century. Aesthetic concepts of artists and their critics, in context of historical events and social and political changes.

HUM 3281. European Intellectual History: the 18th and 19th Centuries. (3 cr. \$HIST 3281)

First of a two-semester course dealing with logical, philosophical and methodological issues in the historical, social and natural sciences. The period covered is from the late seventeenth century to the mid-nineteenth.

HUM 3282. European Intellectual History: The Late 19th and 20th Centuries. (3 cr. \$HIST 3282)

Second and concluding semester of readings in fundamental texts dealing with issues in logic, philosophy and the methodologies of the historical, social and natural sciences, from the late nineteenth century to the present. There is no text. Readings are from original sources.

HUM 3531. The Mysterious William Shakespeare: Authorship and World View. (4 cr; A-F only)

Focuses on Shakespeare authorship controversy through intensive study of Shakespeare of Stratford and Edward de Vere. Brilliance of court of Queen Elizabeth, ideas of renaissance England.

HUM 3635. Hinduism: From Guptas to 13th Century. (2 cr)
Development of classical Hinduism in its multiple cultural and social manifestations, from the 4th to 13th century C.E. Art, religion, mythology, literature, philosophy, caste system.

HUM 3677. Self-Realization in 20th-Century Western Literature. (2 cr)

Quest for meaning and process of individuation. Works by Conrad, Kate Chopin, Joyce, Sartre, Hesse.

HUM 3837. Nietzsche. (3 cr. \$HUM 4837. Prereq—Jr or sr)
Nietzsche's contributions to philosophy, psychology, and criticism of religion, culture, and society.

HUM 3910. Topics in the Humanities. (2-4 cr [max 4 cr]. Prereq—Jr or sr or #)
Topics vary by offering.

HUM 3920. Honors Course: Topics in the Humanities. (2-4 cr [max 4 cr]. Prereq—Jr or sr or #)
Topics will vary from offering to offering, and will be specified in *Class Schedule*.

HUM 3970. Directed Studies. (1-4 cr [max 4 cr]. Prereq—#)
Guided individual reading or study.

HUM 3971. Directed Studies. (1-4 cr [max 4 cr]. Prereq—#)
Guided individual reading or study.

HUM 4021. Historical Foundations of Modern Education. (3 cr. §EDPA 3021, EDPA 5021, HUM 3021. Prereq-§: 3021, EDPA 3021, EDPA 5021)
Analysis and interpretation of important elements in modern education derived from pre-classical sources, the Greeks, Romans, Middle Ages, Renaissance, Reformation, Enlightenment, and Industrial Revolution. Basic background course.

HUM 4023. History of Western Educational Thought. (3 cr. §EDPA 3023, EDPA 5023, HUM 3023)
Great educational classics of Western civilization by: Plato, Aristotle, Quintilian, Montaigne, Milton, Locke, Rousseau, and others.

HUM 4837. Nietzsche. (3 cr. §HUM 3837. Prereq-Sr or grad student)
Nietzsche's contributions to philosophy, psychology, and criticism of religion, culture, and society.

HUM 4910. Topics in the Humanities. (2-4 cr [max 4 cr]. Prereq-Sr or grad)
Topics vary by offering.

HUM 4920. Honors Course: Topics in the Humanities. (2-4 cr [max 4 cr]. Prereq-Jr or sr or grad)
Topics will vary from offering to offering and will be specified in *Class Schedule*.

HUM 4970. Directed Studies. (1-4 cr [max 4 cr]. Prereq-Jr or sr or grad, #)
Guided individual reading or study.

HUM 4971. Honors Course: Directed Studies. (1-4 cr [max 4 cr]. Prereq-Jr or sr or grad, #)
Guided individual reading or study.

Icelandic (ICEL)

ICEL 1101. Intensive Modern Icelandic. (6 cr. §ICEL 4101. Prereq-A)
Basic listening, speaking, reading, writing. Everyday subjects (shopping, directions, family, food, housing). Culture/society. First half is at University of Minnesota-Twin Cities; second half is at University of Iceland-Reykjavik. Six-week course.

ICEL 4101. Intensive Modern Icelandic. (3 cr. §ICEL 1101. Prereq-Grad student, A)
Basic listening, speaking, reading, writing. Everyday subjects (shopping, directions, family, food, housing). Culture/society. First half is at University of Minnesota-Twin Cities; second half is at University of Iceland-Reykjavik. Six-week course. Meets with 1101.

Industrial Engineering (IE)

Department of Mechanical Engineering

Institute of Technology

IE 3041. Industrial Assignment I. (2 cr; A-F only. Prereq-ME upper division, registration in ME co-op program)
Industrial work assignment in engineering intern program. Evaluation based on student's formal written report covering semester's work assignment.

IE 4042. Industrial Assignment II. (2 cr; A-F only. Prereq-ME upper div, registration in ME co-op program)
Industrial work assignment in engineering intern program. Evaluation based on student's formal written report.

IE 4043. Industrial Assignment III. (4 cr; A-F only. Prereq-4042)
Solution of system design problems that require developing criteria, evaluating alternatives, and generating a preliminary design. Final report emphasizes design communication and describes design decision process, analysis, and final recommendations.

IE 4521. Statistics, Quality, and Reliability. (4 cr. Prereq-Upper div or grad student or CNR)
Random variables/probability distributions, statistical sampling/measurement, statistical inferencing, confidence intervals, hypothesis testing, single/multivariate regression, design of experiments, statistical quality control, quality management, reliability, maintainability, availability.

IE 5080. Topics in Industrial Engineering. (1-4 cr [max 4 cr]. Prereq-Upper div or grad student)
Topics vary each semester.

IE 5111. Systems Engineering I. (2 cr; A-F only. Prereq-IT upper div or grad student)
Overview of systems-level thinking/techniques in context of an integrated, design-oriented framework. Elements of systems engineering process, including lifecycle, concurrent, and global engineering. Framework for engineering large-scale, complex systems. How specific techniques fit into framework.

IE 5112. Introduction to Operations Research. (3 cr; A-F only. Prereq-[Math 2243 or Math 2373 or equiv], [one semester of probability or statistics], [IT upper div or grad student])
Survey of Operations Research models/methods in deterministic/stochastic settings. Linear programming, integer programming, networks, forecasting, Markov chains, and queuing systems. Examples from various application areas, such as systems engineering, logistics, design, and project management.

IE 5113. Systems Engineering II. (4 cr; A-F only. Prereq-5111, a course on basic probability, [IT upper div or grad student])
Systems engineering thinking/techniques presented in 5111. Hands-on techniques applied to specific problems. Topics pertinent to effectiveness of design process. Practices and organizational/reward structure to support collaborative, globally distributed design team.

IE 5441. Engineering Cost Accounting and Cost Control. (4 cr; A-F only)
Financial accounting, managerial accounting, engineering economics. Preparing financial statements, handling accounts payable/receivable, inventories, depreciation. Financing sources, capital cost/structure. Time value of money and of risk in managerial decision making. Design of cost accounting system and activity-based accounting.

IE 5511. Human Factors and Work Analysis. (4 cr; A-F only. Prereq-Upper div IT or grad student)
Human factors engineering (ergonomics), methods engineering, and work measurement. Human-machine interface: displays, controls, instrument layout, and supervisory control. Anthropometry, work physiology and biomechanics. Work environmental factors: noise, illumination, toxicology. Methods engineering, including operations analysis, motion study, and time standards.

IE 5512. Applied Ergonomics. (4 cr; A-F only. Prereq-Upper div IT or grad student, 5511)
Small groups of students work on practical ergonomic problems in local industrial firms. Projects cover a variety of ergonomic issues: workstation design, equipment and tool design, back injuries and material handling, cumulative trauma disorders, illumination and noise, and safety.

IE 5513. Engineering Safety. (4 cr; A-F only. Prereq-Upper div IT or grad student)
Occupational, health, and product safety. Standards, laws, and regulations. Hazards and their engineering control, including general principles, tools and machines, mechanics and structures, electrical safety, materials handling, fire safety, and chemicals. Human behavior and safety, procedures and training, warnings and instructions.

IE 5522. Quality Engineering and Reliability. (4 cr. Prereq-[4521 or equiv], [upper div or grad student or CNR])
Quality engineering/management, economics of quality, statistical process control design of experiments, reliability, maintainability, availability.

IE 5531. Engineering Optimization I. (4 cr. Prereq-Upper div or grad student or CNR)
Linear programming, simplex method, duality theory, sensitivity analysis, interior point methods, integer programming, branch/bound/dynamic programming. Emphasizes applications in production/logistics, including resource allocation, transportation, facility location, networks/flows, scheduling, production planning.

IE 5541. Project Management. (4 cr. Prereq-Upper div or grad student)
Project screening/selection, multiple-criteria methods for project evaluation, project structuring/work breakdown, project teams, project scheduling, resource management, life-cycle costing, project control, project termination, research/development projects, computer support for project management.

IE 5545. Decision Analysis. (4 cr. Prereq-4521 or equiv)
Normative theories of decision making. Emphasizes structuring of hard decision problems arising in business and public policy contexts. Decision trees, expected utility theory, screening prospects by dominance, assessment of subjective probability, multiple attribute utility, analytic hierarchy process, benchmarking with data envelopment analysis, basics of game theory.

IE 5551. Production Planning and Inventory Control. (4 cr. Prereq-CNR or upper div or grad student)
Inventory control, supply chain management, demand forecasting, capacity planning, aggregate production and material requirement planning, operations scheduling, and shop floor control. Quantitative models used to support decisions. Implications of emerging information technologies and of electronic commerce for supply chain management and factory operation.

IE 5552. Design and Analysis of Manufacturing Systems. (4 cr. Prereq-Upper div or grad student)
Flow lines, assembly systems, cellular manufacturing systems, and flexible manufacturing systems. Emphasis is on methodologies for modeling, analysis and optimization. Lead time analysis, capacity and workload allocation, scheduling and shop floor control, work-in-process management, facilities planning and layout, and information management.

IE 5553. Simulation. (4 cr. Prereq-CNR or upper div or grad student)
Discrete event simulation. Using integrated simulation/animation environment to create, analyze, and evaluate realistic models for various manufacturing, assembly, and material handling systems. Experimental design for simulation. Random number generation. Selecting input distributions. Evaluating simulation output.

Information and Decision Sciences (IDSC)

Department of Information and Decision Sciences

Curtis L. Carlson School of Management

IDSC 3001. Information Systems for Business Processes and Management. (3 cr; A-F only. Prereq-[BA 1001 or experience using Windows/Internet], 30 cr)
Developing/using IS to support business processes, managerial decision making, and organizational strategy. Technology components of IS. Impact on organizations. Creation/change processes. Managerial issues. Techniques for designing, developing, and implementing IS. Databases and user interfaces. Computer/communications network platforms. Internet, e-business, and e-commerce applications.

IDSC 3201. Introduction to Programming for Systems Development. (4 cr; A-F only. Prereq-3001, MIS major)
Programming language syntax and control logic. User interface design. File/database access. Structured, event, and object-oriented design. Coding, testing, and debugging. Hands-on use of application-development environment and contemporary-development tools.

IDSC 3202. Analysis and Modeling for Business Systems Development. (4 cr; A-F only. Prereq=3001)
Data modeling, database querying using SQL, use of database management systems. Process modeling of work flow, data flow, and organization flow. Decomposition. Traditional/object-oriented analysis with use cases and user interface design.

IDSC 4131. Advanced Database Design and Administration. (3 cr; A-F only. Prereq=4103)
Role, organization, functions, and tools of data administration. Data planning and information architectures. Object-oriented DBMS and support for graphics and CAD/CAM applications. Data security, maintaining database integrity, and managing data shared, networked or distributed environment. Strategies for using advanced DBMS tools and CASE tools.

IDSC 4153. Telecommunications: Domestic and International Policy and Regulation. (3 cr; A-F only. Prereq=3001)
Regulation and policy making in telecommunications. Evolution of the industry. Industry structure. Models for policy. Roles and relationships of U.S. standards organizations, the telecommunications industry, and governmental units. Evolution of international telecommunications organizations and regulatory systems. Analysis of current issues.

IDSC 4203. Information Technology Infrastructure. (4 cr; A-F only. Prereq=3201, 3202)
Technology/infrastructure for developing large-scale information systems. Processes to identify, evaluate, and select appropriate infrastructure components. Application of systems analysis and design techniques in a class project.

IDSC 4204. Managing Information Services. (4 cr; A-F only. Prereq=3202)
Information services as a service function. Techniques, activities, and issues for management/control of systems development at project level. Relationship of function, roles, and organizational structures. IS planning/business strategy, skill development, career pathing. Management of acquisition, subcontracting, outsourcing, operations, and user support.

IDSC 4401. Information Security. (2 cr)
Concepts/issues of security and data integrity threats that undermine utility, robustness, and confidence in electronic technologies in facilitating business transactions.

IDSC 4421. Financial Information Systems and Technologies. (2 cr; A-F only. Prereq=3001)
IS in financial services, corporate financial operations, and investment management. Traditional vs. electronic financial markets, computerized trading, digital sources of financial data, electronic money, and decision technologies in financial services. Software development skills for personal investments.

IDSC 4431. Advanced Database Design. (2 cr; A-F only. Prereq=3202)
Comparative review of data modeling methodologies. Advanced constructs in database design. Modeling subtypes and supertypes, ternary and higher-order relationships, integrity constraints. CASE tools; representation of facts; verbalization of a data model for human understanding and validation.

IDSC 4432. Advanced Database Management and Administration. (2 cr; A-F only. Prereq=4431 or 4431)
Managing information resources. Data planning, global information architectures. Advanced data manipulation languages, comprehensive DBMS facilities, and O-O DBMS. Analysis and data mining tools. Deploying/managing databases in a distributed environment. Data integrity, security, and privacy.

IDSC 4441. Electronic Commerce. (2 cr; A-F only. Prereq=3001)
Service relationships as a conceptual basis. Evolutionary execution strategy based on application of business principles of key functions using proven product development practices. Measurement/evaluation principles/practice. Case studies from advertising, marketing, and fulfillment functions.

IDSC 4461. Data Warehousing. (2 cr; A-F only. Prereq=3202)
Designing, developing, using, and managing data warehouses. Data warehousing vs traditional databases. ETL processes. Dimensional analysis and multidimensional modeling. Supporting business intelligence. Marketplace for vendors/tools. Operational performance/management of data warehouses. Deploying data warehouse on the Internet. Hands-on use of data warehousing tools.

IDSC 4490. Information Systems Special Topics. (2 cr [max 10 cr]; A-F only)
Discussion and analysis of current topics and developments in information systems.

IDSC 4491. Independent Study in Information Systems. (1-4 cr [max 4 cr]; A-F only. Prereq=#)

IDSC 4496. Information Systems Industry Internship. (2 cr; A-F only. Prereq=3202, 4)
Learning by working in IS activities and receiving appropriate training from a sponsoring organization. Custom designed to meet pre-established learning objectives. "Work practice" plan required and must be approved by the organization and the director of IDSc undergraduate studies.

Information Networking (INET)

College of Continuing Education

INET 1001. Survey of Information Technology. (1 cr; A-F only)
Facets of information technology. Differentiating degree programs within information technology. Trends, career opportunities, governing standards.

INET 3350. Special Topics in IT Infrastructure. (1-3 cr [max 6 cr]; A-F only)
Topics in information technology infrastructure.

INET 4011. Network Administration. (4 cr; A-F only. Prereq=CSCI 4211 or #)
Network architecture, switching, routing, algorithms, protocols, infrastructure hardware, cable plant, security, network management. Lecture, expert guest speakers, labs.

INET 4021. Network Programming. (4 cr; A-F only. Prereq=CSCI 4061 or #, 45 cr)
Network/distributed programming concepts. Design using C, Java, and other higher level programming languages. Sockets, TCP/IP, RPC, streaming, CORBA, .NET, SOAP. Labs use UNIX/Linux and MS Windows operating systems.

INET 4031. Systems Administration. (4 cr; A-F only. Prereq=CSCI 4061 or #, 45 cr)
Integration of hardware, software and operational practice. Recap of machine architecture/organization. Complex technology issues, e.g. designing for scalability, configuring systems, architecting storage systems, monitoring/testing performance, executing recovery processes, managing software licenses. Lab based, Microsoft Server, and Linux OS.

INET 4041. Emerging Network Technologies and Applications. (3 cr; A-F only. Prereq=CSCI 4211 or #)
Underlying theory. Driving needs (technological, business). Developing technology. Competing technologies. Lectures by guest expert speakers, case studies, labs.

INET 4051. IT Infrastructure Operations (Capstone). (3 cr; A-F only. Prereq=CSCI 4211, one INET concentration course, sr)
Network, server, and database operations. Infrastructure architecture, organizational structure, security, metrics, vendor relations, outsourcing, capacity planning, strategic planning, budgeting. Online case study.

INET 4061. Introduction to Data Warehousing. (3 cr; A-F only. Prereq=4707 or CSCI 4707 or #)
Data warehouse architecture. Star schema and dimensional modeling. Extract-Load-Transform processes. Query design. Administration/operation. Lecture, lab.

INET 4081. Introduction to Software Engineering. (4 cr; A-F only. Prereq=CSCI 4061 or equiv or #, 45 cr)
Theory/practice of software engineering. Software development, requirements/specifications, design, verification, validation.

INET 4131. Advanced Database Design. (3 cr; A-F only. Prereq=4707 or CSCI 4707 or [hands-on experience using DBMS to define/populate/query a database using SQL], basic understanding of [ER diagrams, relational databases], 45 cr)
High-level, conceptual data modeling to capture robust data semantics before implementing in a Relational DBMS. ER/relational DB design concepts and normalization. Subtypes/supertypes, ternary relationships, integrity constraints, business rules. Document/present designs. Design problem-solving with Object Role Modeling (ORM) and MS VisioEA.

INET 4153. Telecommunications: Domestic and International Policy and Regulation. (3 cr; A-F only. Prereq=45 sem cr, experience with Windows/Internet)
Regulation and policy making in telecommunications. Evolution of the industry. Industry structure. Models for policy. Roles/relationships of U.S. standards organizations, telecommunications industry, and governmental units. Evolution of international telecommunications organizations and regulatory systems. Current issues.

INET 4193. Directed Study. (1-4 cr [max 12 cr]; A-F only. Prereq=ITI student, 4)
Independent project. Topic arranged with and supervised by ITI faculty.

INET 4707. Practice of Database Systems. (3 cr; A-F only. §CSCI 4707, CSCI 5707. Prereq=CSCI 4061, at least 45 cr completed; CSCI majors contact CSCI dept before registering)
Concepts, data models. Case studies, data manipulation languages, logical data models, database design, facilities for database security/integrity, applications.

Innovation Studies (IS)

College of Continuing Education

IS 5001. Introduction to Innovation Studies. (1-4 cr [max 4 cr]; A-F only. Prereq=4)
Key concepts/models from sociology, futures study, and business. Innovative, team leadership strategies. Definition/application of just-in-time concept. Life-long self-improvement skills.

IS 5002. Final Project for Innovation Studies. (4 cr; A-F only. Prereq=Completion of IS requirements, 4)
Either an internship in an organization or a hands-on study project on a contemporary issue or problem. Students apply expertise/ideas to a real-world situation.

IS 5100. Innovation Studies Seminar. (1-4 cr [max 24 cr]; A-F only. Prereq=4)
Innovation studies topics.

IS 5950. Special Topics. (1-4 cr [max 12 cr]; A-F only. Prereq=4)
Special interdisciplinary topics.

Institute of Technology (IOFT)

Institute of Technology

IOFT 1. Fundamentals of Engineering Review (E.I.T. Refresher). (0 cr; S-N only. Prereq=Bachelor's degree in engineering)

For engineering graduates who are preparing for the Engineer-in-Training examination, the first of two written exams required for registration as a professional engineer. Review of mathematics, chemistry, materials, statics, dynamics, strength of materials, thermodynamics, electric circuits, fluid mechanics, and engineering economics.

IOFT 1101. Environmental Issues and Solutions. (4 cr. Prereq=High school chemistry or equiv, one yr high school algebra)

Importance of science in understanding/solving various environmental problems. Case studies. Laboratory exercises.

IOFT 1311. Engineering Basics. (2 cr. Prereq=IT lower div or #)

Elements of engineering. Philosophy, tools, practice. Role of engineering in society. Engineering's relationship to science. Modeling, mathematical analysis, software tools, hands-on design-and-build project. Students work in teams.

IOFT 1312. Exploring Careers in Science and Engineering. (2 cr)

Career development self assessment, career decision making, writing resumes and cover letters, identifying/contacting employers, interviewing. Using Career Services to find internships, co-ops, and permanent positions. Topics presented by employers and by Career Services staff.

IOFT 1901. Freshman Seminar, Environment. (1-3 cr [max 4 cr]; A-F only. Prereq=Freshman)

Topics vary. See *Class Schedule*.

IOFT 1904. Freshman Seminar: International Perspective.

(1-3 cr [max 4 cr]; A-F only. Prereq=Freshman)

Topics vary. See *Class Schedule*.

IOFT 1905. Freshman Seminar. (1-3 cr [max 4 cr].

Prereq=Freshman)

Topics vary. See *Class Schedule*.

IOFT 1906. Freshman Seminar: Environment/Writing

Intensive. (1-3 cr [max 4 cr]; A-F only. Prereq=Freshman)

Topics vary. See *Class Schedule*.

IOFT 1909W. Freshman Seminar, International

Perspective/Writing Intensive. (1-3 cr [max 4 cr]; A-F only.

Prereq=Freshman)

Topics vary. See *Class Schedule*.

IOFT 1910W. Freshman Seminar, Writing Intensive. (1-3 cr

[max 4 cr]; A-F only. Prereq=FYFR)

Topics vary. See *Class Schedule*.

IOFT 4101W. Communication Skills and Professional

Practice. (3 cr; A-F only. Prereq=Upper div IT or #)

Non-technical skills/topics important in engineering/scientific work environment. Group/team dynamics, intellectual property, running meetings, professional ethics, effective communication, negotiation. Emphasizes realistic work scenarios requiring public speaking, teamwork, and writing.

Insurance and Risk Management (INS)

Industrial Relations Center

Curtis L. Carlson School of Management

INS 4100. Corporate Risk Management. (2 cr)

Theory applied to corporate risk management and insurance practices. Identification, measurement, and treatment of an organization's financial risks integrated with its property, liability, workers compensation, and human resource risks. Selection and application of risk control and risk financing tools: risk retention, reduction and transfer, including insurance.

INS 4101. Employee Benefits. (2 cr. Prereq=4100 or 5100 or HRIR 3021 or #)

Design/administration of employee benefit plans and pension programs. Health insurance, disability plans. Salary reduction/deferred compensation programs, from social insurance to executive benefits. Multiple employer trusts. Alternative funding methods, including self-insurance. Ethical issues, legal liability, compliance with regulations.

INS 4200. Insurance Theory and Practice. (2 cr)

Risk theory is applied to practices in health, liability, life, property, and workers compensation insurance. Insurance marketing, pricing, underwriting, and claims administration, with adverse selection and moral hazard effects. Policy issues of tort versus no-fault compensation systems. Self-insurance and integrated risk financing methods.

INS 4201. Personal Financial Management. (2 cr)

Personal financial planning. Financial statements, cash flow/debt analysis, time value of money. Management of liability, disability, life, medical, and property risks. Investments, portfolio management. Tax reduction, employee benefits, retirement/estate planning. Ethical issues, regulation of financial planners.

INS 4202. Personal Financial Planning 2: Tax and Estate

Planning Techniques. (2 cr. Prereq=4201 or 5201)

Estate planning, tax management techniques. Charitable giving, probate process, use of health care directives, durable powers of attorney, revocable/irrevocable trusts, wills, asset distribution.

INS 5000. Personal Financial Planning 2: Tax and Estate

Planning Techniques. (2 cr. Prereq=5201)

In-depth treatment of estate planning and tax management techniques introduced in 5201. Charitable giving, probate process, use of health care directives, durable powers of attorney, revocable/irrevocable trusts, wills, asset distribution.

Inter-College Program (ICP)

College of Continuing Education

ICP 3000. Career Skills in the Professional Environment.

(2 cr. Prereq=60 cr)

Career planning and job search processes appropriate to business/professional careers in corporate culture.

ICP 3001. Introduction to Multidisciplinary Studies. (3 cr.

Prereq=Admitted to ICP Multidisciplinary Studies)

University study at a major research institution, its history/theory and expectations/outcomes. Students design their degree and select areas/courses. Institutional/student perspectives.

ICP 3075. Directed Study. (1-15 cr [max 15 cr]. Prereq=#)

Independent, directed study.

Interdepartmental Study (ID)

College of Liberal Arts-Adm

ID 1201. Career Exploration. (2 cr. Prereq=Fr or soph)

Students learn about their unique interests, skills, personality, values. Using this information in choosing major/career. Importance of internships, community service, other practical experiences.

ID 3201. Career Planning. (2 cr)

For juniors and seniors. A practical introduction to integrating individual talents, values, interests, and experience with critical career search strategies. Emphasis on understanding the marketplace, internet research, strategic resume writing, networking, and interviewing.

ID 3205. Law School Exploration. (2 cr)

Assessment of fit between individual, law school, and career field of law. Off-campus informational interviews, site visits.

ID 3211. Internship: Perspectives on Work. (4 cr. Prereq=Δ,

internship through Career and Community Learning Center)

Combines practical experience in an internship with reflection upon work in our society. Organizational structure, work as a cultural phenomenon, history of concepts of work, relationship of work to broader demands of citizenship.

ID 3301. Introduction to Marxism. (3 cr)

Marxist philosophy as a worldview and methodology for study of processes in nature, society, and thought; linkage between technological development and evolution of class-divided societies; economic theory of capitalism and socialism; transition to socialism theory and practice; racism, sexism, homophobia, and national conflicts; aesthetics.

ID 3311. Museum Exhibits: From Initial Vision to Practical Implementation. (2 cr. Prereq=# (for more information, call Kevin Williams at (612) 624-3898))

Introduces students to museum exhibit development culminating in the students designing a science exhibit. Study content research, educational strategies of informal science education, design, production stages, marketing, and evaluation. Multidisciplinary involving teachers in graphic art, biology, communication, marketing, science education, and others.

ID 3321. AIDS/HIV: Ethical Issues. (3 cr)

Multidisciplinary examination of AIDS/HIV in cultural context. Ethical issues in educational, medical, and political responses to AIDS. Community resources available to people with HIV. Local debates about who gets what services. Required group service project in the community.

ID 3395. OMSSA: Pre-Law Program. (4 cr. Prereq=#)

Non published course. OMSAA program for selected students to participate in a summer exchange program with William Mitchell Law School.

ID 3551. Metro Internship Seminar: Corporate and Non-

Profit Social Responsibility and Ethical Leadership. (6 cr.

Prereq=#)

Cross disciplinary course. Combines theoretical work with a 10-week internship in a local corporation. Focuses on ethics, leadership, organizational change, and strategies for bringing about social change.

ID 3571. HECUA Off-Campus Study Program: Metro Urban

Studies Term Reading Seminar. (4 cr. Prereq=I3572, 3573, Δ; contact CCLC, 345 FraserH, 626-2044)

Roots/strategies for addressing urban inequality/poverty. Interdisciplinary field study, seminar work, internship.

ID 3572. HECUA Off-Campus Study Program: Metro Urban

Studies Term Field Seminar. (4 cr. Prereq=I3571, 3573, Δ; contact CCLC, 345 FraserH, 626-2044)

Roots/strategies for addressing urban inequality/poverty. Interdisciplinary field study, seminar work, internship.

ID 3573. HECUA Off-Campus Study Program: Metro Urban Studies Term Internship Seminar. (8 cr. Prereq—¶3571, 3572, Δ; contact CCLC, 345 FraserH, 626-2044) Roots/strategies for addressing urban inequality/poverty. Interdisciplinary field study, seminar work, internship.

ID 3581. HECUA Off-Campus Study Program: City Arts Reading Seminar. (4 cr. Prereq—¶3582, 3583, Δ; contact CCLC, 345 FraserH, 626-2044) Arts, popular culture, social change. Interdisciplinary field study, seminar work, internship. Offered each spring semester.

ID 3582. HECUA Off-Campus Program: City Arts Field Seminar. (4 cr. Prereq—¶3581, 3583, Δ; contact CCLC, 345 FraserH, 626-2044) Arts, popular culture, social change. Interdisciplinary field study, seminar work, internship. Offered each spring semester.

ID 3583. HECUA Off-Campus Program: City Arts Internship Seminar. (8 cr. Prereq—¶3581, 3582, Δ; contact CCLC, 345 FraserH, 626-2044) Arts, popular culture, social change. Interdisciplinary field study, seminar work, internship. Offered each spring semester.

ID 3591. HECUA Off-Campus Study Program: Environmental Sustainability: Adaptive Ecosystem Management. (4 cr. Prereq—¶3592, ¶3593, ¶3594, Δ) Examine ecological and physical processes that underlie environmental degradation and learn to set up ecological monitoring through in-depth case studies of adaptive management projects.

ID 3592. HECUA Off-Campus Study Program: Environmental Sustainability: Dimensions of Environmental Change. (4 cr. Prereq—¶3591, ¶3593, ¶3594, Δ) How power dynamics and a global free market impact efforts to promote sustainability. The state's role in regulating resources and distributing environmental benefits. How social movements develop a collective future and mobilize actors to realize it.

ID 3593. HECUA Off-Campus Study Program: Environmental Sustainability: Field Methods. (2 cr. Prereq—¶3591, ¶3592, 3594, Δ) Semester-long field research project that focuses on environmental issues. Students work with scientists and community members and conduct publishable research.

ID 3594. HECUA Off-Campus Study Program: Environmental Sustainability, Internship. (6 cr. Prereq—¶3591, ¶3592, ¶3593, Δ) Students work with an organization addressing issues such as how to manage infrastructure for a booming economy and population in the metropolitan area, how rural communities can maintain viable livelihoods, and how to avert environmental decline in threatened ecosystems.

ID 3993. Directed Study. (1-4 cr [max 8 cr]. Prereq—#, Δ, □) Guided individual reading or study.

Interdisciplinary Archaeological Studies (INAR)

College of Liberal Arts

INAR 5100. Topics in Interdisciplinary Archaeological Studies. (3 cr; A-F only. Prereq—INAr grad major or #) Topics specified in the *Class Schedule*.

International Business (IBUS)

Curtis L. Carlson School of Management

IBUS 3001. International Business Topics. (3 cr. Prereq—Consent of Carlson International Programs) Terms, concepts, and skills for analyzing fundamental business practices in the global economy.

IBUS 5100. International Business: Undergraduate Exchange. (4-16 cr [max 48 cr]; S-N only. Prereq—60 cr completed by time of study abroad, Carlson International Programs consent) Semester of study at one of Carlson School's international exchange partner universities. Students select courses based on their academic needs/interests. For current offerings, contact Carlson International Programs.

Italian (ITAL)

Department of French and Italian

College of Liberal Arts

ITAL 100. Reading Italian in the ARTS and Sciences. (0 cr) Designed to teach a basic reading knowledge of the Italian language; full time is devoted to intensive reading and translation of texts from a wide variety of disciplines and to the teaching of translation techniques.

ITAL 1001. Beginning Italian. (5 cr. §ITAL 4001) Emphasis on the four language skills (listening, speaking, writing, and reading) and on Italian culture.

ITAL 1002. Beginning Italian. (5 cr. §ITAL 4002) Emphasis on the four language skills (listening, speaking, writing and reading) and on Italian culture.

ITAL 1003. Intermediate Italian. (5 cr. §ITAL 4003. Prereq—1001-1002) Grammar review and development of intermediate level of proficiency in listening, reading, writing and speaking. Emphasis on some cultural aspects of contemporary Italy.

ITAL 1004. Intermediate Italian. (5 cr. §ITAL 4004. Prereq—1001, 1002, 1003) Grammar review and development of intermediate level of proficiency in listening, reading, writing and speaking. Emphasis on some cultural aspects of contemporary Italy.

ITAL 1022. Accelerated Beginning Italian. (5 cr. Prereq—Italian [in high school or community college], score on placement exam too low to enter 1003) Accelerated review of 1001 followed by material covered in 1002.

ITAL 1737. Friends and Countrymen. (3 cr) Study of the problematic relation between friendship and citizenship as formulated by Dante in the "Inferno" and as we may interpret it in analyzing today's civic issues. Attention to Dante's reliance on and implicit critique of Aristotle's "Nicomachean Ethics". Taught in English.

ITAL 1837. Imagining Italy: Italian and Italian-American Culture, History, and Society Through Film. (4 cr. §ITAL 3837) Italian/Italian-American history, culture, and society through films. Name of the Rose, Cinema Paradiso, Big Night, Life is Beautiful. Lectures expand upon issues raised by films from different disciplinary perspectives. Urban life, nationalism, opera, terrorism, violence, food, family, emigration, ethnicity, desire.

ITAL 3015. Reading, Conversation, and Composition. (4 cr. Prereq—1004) Intensive reading, writing, speaking practice. Study of cultural materials in authentic formats.

ITAL 3201. Reading Italian Texts: Poetics, Rhetoric, Theory. (3 cr [max 9 cr]. §ITAL 5201. Prereq—3015) A basic course in understanding the rhetorical and poetic aspects of language and literature; interpretive methods and theoretical concepts.

ITAL 3203. Italian Travelers: From the Enlightenment to the Present. (3 cr [max 12 cr]. §ITAL 5203. Prereq—3015) Examines literary representations of travel, migration, immigration, exile, and tourism in Italy from the Enlightenment to the present.

ITAL 3209. Literature of Medieval City-States. (4 cr [max 16 cr]. Prereq—3015) The beginnings of Italian vernacular literature in the context of the city-states of the 11th to 14th centuries.

ITAL 3219. Literature of the Despotisms. (4 cr [max 16 cr]. Prereq—3015) Prose, verse, and drama of Italy under the Signoria and foreign invaders, 1400-1650.

ITAL 3301. Italian Dialects and Their Literature. (4 cr [max 16 cr]. Prereq—3015) Study of selected Italian dialects and dialect texts in their cultural and historical settings.

ITAL 3305. Staging the Self: Theater and Drama in Modern Italy. (4 cr [max 16 cr]. §ITAL 5305. Prereq—3015) Theatrical representations of the self in modern Italy. Particular attention given to issues of identity, gender, and class in theatrical works ranging from Alfieri's *Mirra*, Pirandello's *Enrico IV* to Dacia Maraini's *Clytemnestra*.

ITAL 3501. The World in the City: Italy 1100-1660. (3 cr [max 12 cr]. Prereq—3015) The culture and civilization of Italian cities in medieval and early modern periods.

ITAL 3502. Making of Modern Italy: From the Enlightenment to the Present. (3 cr [max 12 cr]. §ITAL 5502. Prereq—3015) Italian literary, cultural, and symbolic practices from the Enlightenment to the present.

ITAL 3550. Topics in 19th Century Italy. (3 cr [max 12 cr]. Prereq—3015 or #) Literature/culture of Italy in 19th century. Content varies depending on instructor. Literary, critical, cultural, historical, or social issues. Specific author, genre, or topic of interest. Readings. Specific content posted in department and listed in Course Guide.

ITAL 3640. Topics in Italian Studies. (3 cr [max 12 cr]) Topics of interest in studies of Italian or Italian American culture of 20th century. Literary, critical, cultural, historical, or social issues, a specific author, a genre, or other topic. Readings could be literary, critical, historical, or political. Content varies by instructor, see Course Guide.

ITAL 3806. Negotiating the Terms: Italian Film and Literature. (3 cr [max 12 cr]. §ITAL 5806) Examines cinematic representations of Italian literary texts; introduces the basic tools of literary and film analysis; discusses how both media impact Italian culture. Taught in English.

ITAL 3837. Imagining Italy: Italian and Italian-American Culture, History, and Society Through Film. (4 cr. §ITAL 1837) Italian/Italian-American history, culture, and society through films: "Name of the rose," "Cinema Paradiso," "Big Night," "Life is Beautiful." Issues raised by films: urban life, nationalism, opera, terrorism, violence, food, family, emigration, ethnicity, desire.

ITAL 4001. Beginning Italian. (2 cr. §ITAL 1001. Prereq—Grad student) Meets concurrently with 1001. See 1001 for course description.

ITAL 4002. Beginning Italian. (2 cr. §ITAL 1002. Prereq—Grad student) Meets concurrently with 1002. See 1002 for course description.

ITAL 4003. Intermediate Italian. (2 cr. §ITAL 1003. Prereq—Grad student)
Meets concurrently with 1003. See 1003 for course description.

ITAL 4004. Intermediate Italian. (2 cr. §ITAL 1004. Prereq—Grad student)
Meets concurrently with 1004. See 1004 for course description.

ITAL 4303. Drama and Spectacle in Italy, 1200–1770. (4 cr [max 16 cr]. Prereq—3015)
Italian drama, festival and spectacle from the medieval sacred plays to the reform of the theater by Goldoni.

ITAL 4307. Novellistica. (3 cr [max 16 cr]. Prereq—3201, or permission of director of undergrad studies)
Study of birth and development of the novella genre. Reading and discussion of stories from the Novellino, Boccaccio, Sacchetti, Bandello, Bigolini, Basile, Verga, Deledda, Calvino. Introduction to formal study of novella structure.

ITAL 4970. Directed Readings. (1-4 cr [max 16 cr]. Prereq—#)
Meets unique requirements decided on by faculty member and student. Individual contracts list contact hours, number of credits, written and other work required.

ITAL 5201. Reading Italian Texts: Poetics, Rhetoric, Theory. (3 cr [max 12 cr]. §ITAL 3201. Prereq—Grad student or #)
Rhetorical/poetic aspects of language and literature. Interpretive methods, theoretical concepts.

ITAL 5203. Italian Travelers: From the Enlightenment to the Present. (3 cr [max 12 cr]. §ITAL 3203. Prereq—Grad student or #)
Literary representations of travel, migration, immigration, exile, and tourism in Italy, from Enlightenment to present.

ITAL 5209. Trecento Literature: Ruling the Canon. (4 cr [max 16 cr]. Prereq—3015, 3201 or #)
Works of Boccaccio and Petrarch and their role in establishing the canon of Italian vernacular literature. Taught in English also as MeSt 5610.

ITAL 5289. The Narrow Door: Women Writers and Feminist Practices in Italian Literature and Culture. (4 cr [max 16 cr]. Prereq—3015)
Focuses on issues of gender, sexual difference, equality, and emancipation raised by Italian women writers and thinkers from the 19th century to the present.

ITAL 5305. Staging the Self: Theater and Drama in Modern Italy. (4 cr [max 16 cr]. §ITAL 3305. Prereq—Grad student or #)
Theatrical representations of the self in modern Italy. Focuses on issues of identity, gender, and class in theatrical works ranging from Alfieri's *Mirra*, Pirandello's *Enrico IV* to Dacia Maraini's *Clytemnestra*.

ITAL 5321. Italian Renaissance Epic. (4 cr [max 16 cr]. Prereq—3015, 3201 or #)
Study of the narrative poems of Boiardo, Ariosto, and Tasso in the context of the fashioning of early modern Europe.

ITAL 5337. Nation and Narration: Writings in the 19th Century. (4 cr [max 16 cr]. Prereq—3015)
Introduces the construction of modern Italian national identity by examining the role that literature plays in this process. Works by Manzoni, Foscolo, Leopardi, Gioia, Verga, Serao, and Deledda studied in the context of a range of sociopolitical and cultural issues.

ITAL 5401. Mondo di Dante. (4 cr [max 16 cr]. Prereq—3015, 3201 or #)
Intensive reading of Dante's *Inferno*, *Purgatorio*, and *Vita Nuova* with emphasis on Dante's linguistic and cultural contributions.

ITAL 5502. Making of Modern Italy: From the Enlightenment to the Present. (3 cr [max 12 cr]. §ITAL 3502. Prereq—Grad student or #)
Italian literary, cultural, and symbolic practices, from Enlightenment to present.

ITAL 5550. Topics in 19th Century Italy. (3 cr [max 12 cr]. Prereq—ITAL 3015 or #)
Explores the literature and culture of Italy in the 19th century. Content will vary depending on the instructor. Topics and readings may include literary, critical, cultural, historical, and/or social issues, a specific author, a genre, or other topics of interest for the period. Specific content will be posted in the department and listed in the Course Guide.

ITAL 5609. World of Dante. (4 cr [max 8 cr])
Taught in English. Intensive reading of Dante's *Inferno*, *Purgatorio*, and *Vita Nuova* with emphasis on the personal, poetic, and political stakes of the journey of Dante's pilgrim through hell to the earthly paradise.

ITAL 5640. Topics in Italian Studies. (3 cr [max 12 cr]. Prereq—ITAL 3015)
Topics of interest in studies of Italian and/or Italian American culture of the 20th century. Topics and readings may include literary, critical, cultural, historical, and/or social issues, a specific author, a genre, or other topics. Content varies by instructor. Specific content posted in the department and in the Course Guide.

ITAL 5806. Negotiating the Terms: Italian Film and Literature. (3 cr [max 12 cr]. §ITAL 3806. Prereq—Grad student or #)
Cinematic representations of Italian literary texts. Basic tools of literary/film analysis. How both media impact Italian culture. Taught in English.

ITAL 5970. Directed Readings. (1-4 cr [max 16 cr]. Prereq—#)
Meets unique requirements decided on by faculty member and student. Individual contracts list contact hours, number of credits, written and other work required.

Japanese (JPN)

Department of Asian Languages and Literatures

College of Liberal Arts

JPN 1011. Beginning Japanese. (6 cr. §JPN 4001)
An introduction to speaking, reading, and writing Japanese.

JPN 1012. Beginning Japanese. (6 cr. §JPN 4002. Prereq—1011)
Introduction to speaking, reading, and writing Japanese.

JPN 3001. Japanese Calligraphy and Appreciation I. (2 cr. Prereq—1001)
Basic tools (e.g., brush, sumi ink stick, rice paper). Practice in basic brush strokes. Different characters or hiragana in expressions that are appropriate for the season or that have cultural significance. Taught entirely in Japanese.

JPN 3002. Japanese Calligraphy and Appreciation II. (2 cr. Prereq—3001 or #)
Tools used in Japanese calligraphy (e.g., brush, sumi ink stick, rice paper). Basic brush strokes. Talk about/appreciation of calligraphy. Different characters or hiragana in expressions that are appropriate for the season or that have cultural significance. One-to-one feedback on practice calligraphy. Taught entirely in Japanese.

JPN 3021. Intermediate Japanese. (5 cr. §JPN 4003. Prereq—1012 or #)
Intermediate speaking, reading, and writing in Japanese.

JPN 3022. Intermediate Japanese. (5 cr. §JPN 4004. Prereq—3021 or #)
Intermediate-level instruction in speaking, reading, and writing in Japanese.

JPN 3031. Third-Year Japanese. (4 cr. Prereq—3022 or #)
Advanced intermediate-level instruction in speaking, reading, and writing Japanese. Development of reading proficiency in modern Japanese prose.

JPN 3032. Third-Year Japanese. (4 cr. Prereq—3031 or #)
Advanced intermediate-level instruction in speaking, reading, and writing Japanese. Development of reading proficiency in modern Japanese prose.

JPN 3090H. Honors Course: Tutorial. (1-4 cr [max 4 cr])
Tutorial.

JPN 3167. Re-examining "Geisha Girls." (3 cr. §AMST 3114)
Critically investigates conceptions/representations of Japanese women entertainers, commonly termed "geisha." Literary texts, visual/performing arts, film. Premodern/modern Japanese examples, examples from the United States.

JPN 3290. Japanese Language Teaching Tutorial. (1 cr [max 2 cr]. Prereq—Grade of A in 4042)
Students tutor beginning students of Japanese and are part of department's Japanese language team.

JPN 3451. Introduction to Japanese Linguistics. (3 cr. Prereq—3022 or #)
Analysis of structure and meaning of Japanese sentence patterns.

JPN 3993. Directed Studies. (1-15 cr [max 15 cr]. Prereq—#, Δ, □)
Directed study in topics of Japanese literature or linguistics.

JPN 4001. Beginning Japanese. (3 cr. §JPN 1011. Prereq—passing score on GPT in another language or grad student)
Speaking, reading, and writing Japanese. Meets with 1011.

JPN 4002. Beginning Japanese. (3 cr. §JPN 1012. Prereq—4001, passing score on GPT in another language or grad student)
Speaking, reading, and writing Japanese. Meets with 1012.

JPN 4003. Intermediate Japanese. (3 cr. §JPN 3021. Prereq—4002, [passing score on GPT in another language or grad student])
Speaking, reading, and writing in Japanese. Meets with 3021.

JPN 4004. Intermediate Japanese. (3 cr. §JPN 3022. Prereq—4003, [passing score on GPT in another language or grad student])
Speaking, reading, and writing in Japanese. Meets with 3022.

JPN 4005. Third Year Japanese. (3 cr. §JPN 4006. Prereq—3022 or 4004 or #)
Speaking, reading, and writing Japanese. Development of reading proficiency in modern Japanese prose. Meets with 3031.

JPN 4006. Third Year Japanese. (3 cr. §JPN 4005. Prereq—3031 or 4005 or #)
Speaking, reading, and writing Japanese. Development of reading proficiency in modern Japanese prose.

JPN 4041. Advanced Japanese Conversation and Composition. (4 cr. Prereq—3032 or #)
Practice in advanced spoken and written Japanese. Typical assignments include essays, summaries, and formal interviews in Japanese.

JPN 4042. Advanced Japanese Conversation and Composition. (4 cr. Prereq—4041 or #)
Practice in advanced spoken and written Japanese. Typical assignments include essays, summaries, and formal interviews in Japanese.

JPN 4061. Classical Japanese. (4 cr. Prereq—3021, 3022)
Study of the structures and arguments of classical Japanese poetry, narrative, and drama.

JPN 4062. Classical Japanese. (4 cr. Prereq—4061 or #)
Analysis of the structures and arguments of classical Japanese poetry, narrative, and drama.

JPN 5040. Readings in Japanese Texts. (2-4 cr [max 12 cr]; A-F only. Prereq—4041 or equiv or #)
Students read authentic materials of various types to increase reading/speaking ability. Topics specified in *Class Schedule*.

JPN 5071. Communicative Competence for Japan-Oriented Careers. (4 cr. Prereq—4041 or 4042 or #) Effective communication using spoken and written Japanese in contexts likely to be encountered by a career-oriented professional in Japan.

JPN 5072. Communicative Competence for Japan-Oriented Careers. (4 cr. Prereq—5071 or #) Effective communication using spoken and written Japanese in contexts likely to be encountered by a career-oriented professional in Japan.

JPN 5160. Topics in Japanese Literature. (4 cr [max 16 cr]) Literary, historical, or cultural study of selected Japanese literature.

JPN 5161. Women's Writing in Premodern Japan. (4 cr; A-F only. Prereq—3162, 4061 or # when readings are in Japanese; 3162 or # when in translation)

Works by women in premodern Japan including Genji monogatari, a lengthy narrative, Makura no soshi, a collection of vignettes, and poetry. Concerns include gendered writing system/authorship, narrative techniques, sexuality and the figure of the author, and strategies of fictionality.

JPN 5162. Tale Literature in Premodern Japan. (4 cr; A-F only. Prereq—3162, course from classical Japanese language sequence or #)

Tale literature, both Buddhist and secular, presents the world of the middle- to lower-class people. Rhetoric and religion, fiction and history, gender and sexuality, the role of the supernatural/fantastic, and re-tellings of earlier texts.

JPN 5163. Premodern Historical Narratives. (4 cr; A-F only. Prereq—3162, course from classical Japanese language sequence or #)

Narratives rooted in history. Issues include the problematization of reality, the formation of national identity, the idea of divine Imperial power, oral storytelling and its relationship to written texts, and the popularization of historical writings.

JPN 5164. Readings in Early Modern Japanese Literature. (4 cr; A-F only. Prereq—3032 when readings are in Japanese or #)

An examination of the stylistic and ideological aspects of the prose fiction, poetry, and non-fiction of the period 1863 to 1945. Offered in a rotating format alternating between readings in the original language and readings in English translation.

JPN 5165. Readings in Postwar and Contemporary Japanese Literature. (4 cr; A-F only. Prereq—3032 when offered in Japanese or #)

Literary and historical exploration of selected works published between 1945 and the present. Focus may be on a writer, a period, or a theme. Offered in a rotating format alternating between readings in the original language and readings in English translation.

JPN 5166. Literature by 20th-Century Japanese Women. (4 cr. Prereq—3032 or #)

Literary and historical exploration of selected works by Japanese women writers in a variety of genres. All literary texts read in Japanese; critical readings may be in English.

JPN 5251. History of the Japanese Language. (4 cr. Prereq—3032, 5451 or #)

Development of Japanese grammar from classical to the modern language.

JPN 5451. Structure of Japanese : Syntax/Semantics. (4 cr. Prereq—3032, LING 3001 or #)

Analysis of structure and meaning of Japanese sentence patterns.

JPN 5452. Structure of Japanese : Phonology/Morphology. (4 cr. Prereq—3032, LING 3001 or #)

Generative and nongenerative approaches to Japanese sound and word structure.

JPN 5453. Structure of Japanese : Discourse/Conversation Analysis. (4 cr. Prereq—3032, LING 3001 or #)

Analysis of Japanese written texts and conversations. Emergence of grammar in discourse, discourse/conversational structural units, patterns genre, strategies, style, and sociolinguistics variables.

JPN 5650. Proseminar: Japanese Linguistics. (4 cr [max 12 cr]. Prereq—5451 or 5452 or 5453 or #)

Selected topics in Japanese linguistics and/or contrastive analysis of Japanese and English with attention to contributions from Eastern and Western linguistic traditions.

JPN 5993. Directed Studies in Japanese. (1-15 cr [max 15 cr]. Prereq—#, A, □)

Individual study with guidance of a faculty member.

Jewish Studies (JWST)

Department of Classical and Near Eastern Studies

College of Liberal Arts

JWST 1034. Introduction to Jewish History and Civilization. (3 cr. §JWST 3034, RELA 1034, RELA 3034)

Jewish history, society, and culture from Second Temple period (5th century BCE) to modern era as illuminated by literature, philosophy, art, film, music, religious law/custom, and artifacts of daily life. Emphasizes political, social, and cultural contexts that shaped development of Jewish ideas, practices, and institutions.

JWST 1083. Jesus the Jew. (3 cr. §CLAS 1083, JWST 3083, RELA 1083, RELA 3083)

Historic figure of Jesus within context of first century Palestinian Judaism. Main groups/institutions of Judaism at time of Jesus. Rabbinic literature/traditions. Works describing Jesus' life/sayings (synoptic gospels). Jesus and the Law, Messianic ideals/expectations, problem of religious authority. Positions regarding Rome, its authority. James and the Jerusalem Church.

JWST 1201. The Bible: Context and Interpretation. (3 cr. §CNES 1201, CNES 3201, JWST 3201, RELA 3201)

Survey of literary and historical narrative texts from Pentateuch, Joshua, Judges, Samuel, Kings, and Ruth. Art of biblical narrative, major themes of biblical stories. Comparison with other Ancient Near Eastern literatures. Literary conventions of biblical writers.

JWST 1905. Freshman Seminar. (3 cr)
Topics specified in *Class Schedule*.

JWST 1909W. Remembering to Forget: The Holocaust and Its Afterlife. (3 cr; A-F only. §FREN 1909W. Prereq—Fr or less than 30 cr)

Holocaust as incomparable event and as ultimate measure of all traumatic events in history. Testimonies, artistic endeavors, popular culture, and theory. Emphasizes both urge to study Holocaust as singular event and drawbacks of hyper-memory bordering on amnesia.

JWST 3013W. Biblical Law and Jewish Ethics. (3 cr. §JWST 5013, RELA 3013W, RELA 5013)

Significance of religious law in Judaism. Babylonian background of biblical law. Biblical creation of the person as a legal category. Rabbinic transformations of biblical norms. Covenant in Christianity/Islam. Contemporary Jewish literature/philosophy.

JWST 3034. Introduction to Jewish History and Civilization. (3 cr. §JWST 1034, RELA 1034, RELA 3034)

Jewish history, society, and culture from Second Temple period (5th century BCE) to modern era as illuminated by literature, philosophy, art, film, music, religious law/custom, and artifacts of daily life. Emphasizes political, social, and cultural contexts that shaped development of Jewish ideas, practices, and institutions.

JWST 3083. Jesus the Jew. (3 cr. §CLAS 1083, JWST 1083, RELA 1083, RELA 3083)

Historic figure of Jesus within context of first century Palestinian Judaism. Main groups/institutions of Judaism at time of Jesus. Rabbinic literature/traditions. Works describing Jesus' life/sayings (synoptic gospels). Jesus and the Law, Messianic ideals/expectations, problem of religious authority. Positions regarding Rome, its authority. James and the Jerusalem Church.

JWST 3111. Too Jewish? The Complex Construction of the Jewish American Psyche in Literature, Art, and Film. (3 cr; A-F only)

Questions about image/location of Jews in American arts and pop culture. Examples from literature, music, film.

JWST 3112. Jewish Mysticism, Magic, and Kabbalah. (3 cr; A-F only. §JWST 5112, RELA 3112, RELA 5112)

Mystical traditions from early rabbinic traditions to Zohar (Book of Splendor) in 13th century. Literature of heavenly ascent (Hekhalot, Merkavah), Book of Creation (Sefer Yetzirah), precursors of Zohar. The Bahir. Schools of Provence, Gerona, and Zohar. Tension between legal/mystical aspects, magical theurgic techniques, evolution of doctrine of Sefirot, mystical interpretation of Scripture, erotic dimension.

JWST 3113. African American and Jewish American Relations in the United States. (3 cr)

Historical and social scientific study of relations between African Americans and Jewish Americans in the U. S. during the 20th century. Includes immigration, work, cultures, gender, and alliance, and conflict.

JWST 3115. Mishnah and Midrash in Translation. (3 cr. §JWST 5115, RELA 3115, RELA 5115)

Jewish law studied as a mirror of society and as a way to actualize its value. Consideration of original socioreligious contexts and current applications. Selections include biblical interpretations addressing moral, theological, legal, and literary problems.

JWST 3116. Jews and Popular Culture in 20th Century United States. (3 cr. §AMST 3116)

Many types of 20th century American popular culture shaped, in part, by European Jewish immigrants and their native born descendants. How theater, film, music, humor, and television were affected by the Jews' innovations, social marginality, their wish to assimilate and to resist assimilation to the culture. How the nation was and was not reshaped in the process.

JWST 3201. The Bible: Context and Interpretation. (3 cr. §CNES 1201, CNES 3201, JWST 1201, RELA 3201)

Survey of literary and historical narrative texts from Pentateuch, Joshua, Judges, Samuel, Kings, and Ruth. Art of biblical narrative, major themes of biblical stories. Comparison with other Ancient Near Eastern literatures. Literary conventions of biblical writers.

JWST 3315. Contemporary Israeli Literature in English. (3 cr. Prereq—Knowledge of Hebrew not required)

Modern short stories and poetry. Works of Agnon, Yizhar, Hazaz, Yehoshua, Greenberg, Amihai, Pagis, and others. Alienation, the crisis of faith, war, holocaust, Jews and Arabs.

JWST 3401. The Art and Architecture of the Jewish People. (3 cr)

Jewish art and architecture from antiquity to 7th-century C.E. Issues include Jewish art and the Second Commandment, non-Jewish artistic traditions, the nature of Jewish art.

JWST 3521W. History of the Holocaust. (3 cr. §HIST 3727W, JWST 3521W, RELS 3521W)

Study of the 1933-1945 extermination of six million Jews and others by Nazi Germany on the basis of race. European anti-Semitism, implications of social Darwinism and race theory, perpetrators, victims, onlookers, resistance, and theological responses of Jews and Christians.

JWST 3522. History of the Arab-Israeli Conflict. (3 cr)

The events leading to the re-establishment of the State of Israel in 1948 and subsequent conflicts and negotiations up to present. Zionism and Arab resistance, Great Powers' involvement, War of Independence/First Palestine War, subsequent conflicts and their aftermath.

JWST 3631. Jewish Writers and Rebels in German, Austrian, and American Culture. (3 cr. §SCSL 3631, GER 3631)

Investigate literary and cultural modes of writing used by Jewish writers in Germany, Austria, and America to deal with problems of identity, anti-Semitism, and assimilation. Focus on 20th century. All readings (novels, poetry, stories) in English.

JWST 3632W. Jewish Women in the United States. (3 cr. §AMST 3632W, WOST 3403W)

Analyze of the cultural, social, economic, and religious conditions of European Jewry and American society in the 19th- and 20th-centuries that structured the lives of American Jewish women.

JWST 3900. Topics: Jewish Studies. (3 cr [max 15 cr]; A-F only)

Historical, religious, sociological, anthropological, and humanistic study of Judaism and the Jewish people. Approach, method of study vary with topic.

JWST 3970. Supplemental Discussion in Jewish Studies.

(1 cr [max 3 cr]. Prereq-Concurrent registration) Extra discussion section with T.A. Attached to concurrent 3xxx course.

JWST 4000W. Final Project, Writing Intensive. (4 cr; A-F only. Prereq-JWST major, permission of dir of undergrad studies)

Independent research/writing under supervision of a faculty sponsor. A student may approach any JwSt faculty member to develop a program of independent research/writing in an area of student's choosing.

JWST 4001W. Final Project, Writing Intensive. (1 cr; A-F only. Prereq-15xxx, JWST major, permission of dir of undergrad studies)

Independent research and writing, under supervision of a faculty sponsor. Student makes a contract with instructor to write an in-depth research paper, or comparable project, to be completed in conjunction with a JwSt 5xxx course.

JWST 5013. Biblical Law and Jewish Ethics. (3 cr. §JWST 3013W, RELA 3013W, RELA 5013)

Significance of religious law in Judaism. Babylonian background of biblical law. Biblical creation of the person as a legal category. Rabbinic transformations of biblical norms. Covenant in Christianity/Islam. Contemporary Jewish literature/philosophy.

JWST 5111. Problems in Historiography and Representation of the Holocaust. (3 cr. §HIST 5285. Prereq-JWST 3521 or ReIS 3521 or #)

Focuses on issues connected with the Holocaust. Inclusiveness of other groups, Holocaust vs. Shoah, historiographical conflicts about perpetrators, an examination of the problems of representation in literature and art, problems of narrative theology after Auschwitz.

JWST 5112. Jewish Mysticism, Magic, and Kabbalah.

(3 cr; A-F only. §JWST 3112, RELA 3112, RELA 5112) Mystical traditions from early rabbinic traditions to Zohar (Book of Splendor) in 13th century. Literature of heavenly ascent (Hekhalot, Merkavah), Book of Creation (Sefer Yetzirah), precursors of Zohar. the Bahir. Schools of Provence, Gerona, and Zohar. Tension between legal/mystical aspects, magical theurgic techniques, evolution of doctrine of Sefirot, mystical interpretation of Scripture, erotic dimension.

JWST 5115. Mishnah and Midrash in Translation. (3 cr. §JWST 3115, RELA 3115, RELA 5115)

Jewish law studies as mirror of society and as way to actualize its value. Original socioreligious contexts, current applications. Biblical interpretations addressing moral, theological, legal, and literary problems.

JWST 5513. Scripture and Interpretation. (3 cr; A-F only. §RELA 5513)

Idea of divine revelation, its impact upon religion/literature. How history of Bible's creation, transmission, and interpretation help us think critically about role of idea of revelation in religious traditions. What is revelation? How does belief that a text is revealed affect the way it is read within the community for which it constitutes revelation?

JWST 5900. Topics in Jewish Studies. (3-4 cr [max 8 cr]) Topics specified in *Class Schedule*.

JWST 5992. Directed Readings. (1-12 cr [max 12 cr]. Prereq-#)

Guided individual reading or study.

Journalism and Mass Communication (JOUR)

School of Journalism and Mass Communications

College of Liberal Arts

JOUR 1001. Introduction to Mass Communication. (3 cr; A-F only. Prereq-Pre-jour or non-jour major)

Historical, economic, political, legal, ethical, and social aspects of mass communication. Changing media environment of books, magazines, newspapers, records, movies, radio, television, and the Internet in global context.

JOUR 1905. Freshman Seminar. (3 cr; A-F only. Prereq-Freshman)

Topics specified in *Class Schedule*.

JOUR 1910W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq-Freshman)

Topics specified in *Class Schedule*.

JOUR 3004V. Honors: Information for Mass Communication.

(3 cr. Prereq-Honors, [jour major or jour minor or approved IDIM major or ICP major or BIS major]) Information resources for professional/academic work in mass communication. Techniques for locating, retrieving, appraising, and verifying information acquired from public records, libraries, research institutions, databases, the Internet, observation, and interviews.

JOUR 3004W. Information for Mass Communication.

(3 cr; A-F only. Prereq-Jour major or jour minor or approved IDIM major or ICP major or BIS major)

Information resources for professional/academic work in mass communication. Techniques for locating, retrieving, appraising, and verifying information acquired from public records, libraries, research institutions, databases, the Internet, observation, and interviews.

JOUR 3006. Visual Communication. (3 cr; A-F only. Prereq-Jour major or jour minor or design COMM premajor or design COMM major or graphic design premajor or graphic design major or approved IDIM major or ICP major or BIS major or #)

Visual media, role of images in mass communication. Social, cultural, historical, psychological approaches to visual communication.

JOUR 3007. The Media in American History and Law: Case Studies.

(3 cr; A-F only. Prereq-Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval]) Media in socioeconomic-political-technological context of a specific historical period. Focuses on legal context and ethics questions.

JOUR 3008. Mass Communication Processes and Structure.

(3 cr; A-F only. Prereq-Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval]) Communication theories as they relate to mass communication processes. Major structural aspects of mass communication systems.

JOUR 3101. News Reporting and Writing. (3 cr; A-F only. §JOUR 3101H. Prereq-[3004W or 13004W or 3004V], [jour major or jour minor or approved IDIM major or ICP major or BIS major], typing skill)

Basic news gathering, journalistic writing. Developing story ideas. Problems associated with handling of news/features. Professional standards/responsibilities.

JOUR 3101H. Honors: News Reporting and Writing. (3 cr; A-F only. §JOUR 3101. Prereq-[3004W or 13004W], [jour major or jour minor or approved IDIM major or ICP major or BIS major], honors, typing skill)

News gathering, journalistic writing. Developing story ideas. Problems associated with handling of news/features. Professional standards/responsibilities.

JOUR 3102. Visual Journalism. (3 cr; A-F only. Prereq-[3004V or 3004W or 13004W], [jour major or approved IDIM major or ICP major or BIS major])

Introduction to nonfiction storytelling in multiple visual media. Photojournalism, news videography, print/Web graphics. Conceptualizing stories, information gathering, camera work, editing, presentation strategies for print/electronic media.

JOUR 3121. Intermediate News Reporting. (3 cr; A-F only. Prereq-[3004W or 3004V], 3101, [jour major or approved IDIM major or ICP major or BIS major])

Reporting news that is fundamental to basic beats in most news organizations. Crime, government, politics, environment, health, in-depth profiles, issues relating to civic life.

JOUR 3155. Publications Editing. (3 cr; A-F only. Prereq-3004W, 3101, [jour major or approved IDIM major or ICP major or BIS major])

Improving news/information copy through stylistically correct copyediting/rewriting. Selection/editing of news-editorial content for newspapers, magazines, and online services. Hands-on experience using news judgment to present information in print and on the Web.

JOUR 3173W. Magazine Writing. (3 cr; A-F only. Prereq-3004W, 3101, [jour major or approved IDIM major or ICP major or BIS major]; IDL sections are open to non-majors; prereqs do not apply to IDL sections)

Writing feature articles for consumer/trade publications. Market free-lance methods.

JOUR 3201. Principles of Strategic Communication: Advertising.

(3 cr; A-F only. Prereq-[3004V or 3004W or 13004W], [jour major or jour minor or design COMM major or graphics design premajor or graphics design major or approved IDIM major or ICP major or BIS major]) Market analysis, positioning, creative/media strategies, evaluation. Structure of advertising industry. Economic, social, and regulatory contexts influencing advertising.

JOUR 3202. Principles of Strategic Communication: Public Relations.

(3 cr; A-F only. Prereq-[3004W or 13004W], [jour major or jour minor or approved IDIM major or ICP major or BIS major])

History/development of public relations practice/principles. Professional writing assignments in various institutional settings. Analysis/critique of public relations in contemporary society.

JOUR 3241. Creative Strategy and Copywriting. (3 cr; A-F only. Prereq-3004W, 3201, [jour major or approved IDIM major or ICP major or BIS major])

Advertising appeals/strategy. Advertising for print/broadcast. Individual/group projects.

JOUR 3251. Strategic Communication Research. (3 cr; A-F only. Prereq-3004W, [3159 or 3201 or 3202], [jour major or approved IDIM major or ICP major or BIS major])

Introduction to applied quantitative/qualitative research methods in advertising/public relations campaign development, management, and evaluation.

JOUR 3279W. Public Relations Writing and Campaign Tactics.

(3 cr; A-F only. Prereq-[3004W, [3159 or 3201 or 3202], [jour major or approved IDIM major or ICP major or BIS major]] or # for professional jour track students) Public relations tactics. Emphasizes professional skills in writing for various audiences/purposes.

JOUR 3321. Basic Media Graphics. (3 cr; A-F only. Prereq-[3004V or 3004W or 13004W], [jour major or approved IDIM major or ICP major or BIS major])

Relationships between text, type, and image in communicating information. Typical individual or group projects include creating a Web site, experimenting with images/text, creating a basic layout, and new media image-making/storytelling.

JOUR 3451. Electronic News Writing and Reporting. (3 cr; A-F only. Prereq-3004W, 3101, [jour major or approved IDIM major or ICP major or BIS major])

News writing, reporting, video photography/editing, on-air delivery.

JOUR 3551. Economics of New Media. (3 cr; A-F only. Prereq—Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval]) Economic issues related to traditional/new media companies and emerging communications technologies.

JOUR 3552. Internet and Global Society. (3 cr; A-F only. Prereq—Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval]) Structure/processes of the Internet and global society in a comparative context. The Internet, via the World Wide Web, as an ideal site to explore how/why societies come to see/know the world and its issues the way they do.

JOUR 3614. History of Media Communication. (3 cr; A-F only. Prereq—Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval]) Historical perspective on tools of communication, from earliest times to present. Impact of new technologies on society.

JOUR 3741. People of Color and the Mass Media. (3 cr; A-F only. Prereq—Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval]) Past/present depictions of people of color in movies, literature, radio/TV, etc, against anthropological, psychological, and sociological knowledge/experience. Emphasizes personal/political effects of media depictions.

JOUR 3745. Mass Media and Popular Culture. (3 cr; A-F only. Prereq—Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval]) Mass media's role in formation of popular culture and cultural discourse. Prevalent media metaphors, caricatures, and stereotypes. Social/commercial pressures influencing media representation.

JOUR 3771. Mass Media Ethics: Moral Reasoning and Case Studies. (3 cr; A-F only. Prereq—Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval]) Overview of ethical dilemmas faced by journalists, advertisers, and public relations and communications specialists. Case studies, ethical principles/theories, professional codes of ethics, standards that have been used by mass media.

JOUR 3776. Mass Communication Law. (3 cr; A-F only. Prereq—Jour major or jour minor or approved IDIM major or ICP major or BIS major or #) Brief historical background, First Amendment rights, basic law of defamation, free press and fair trial, access to news, access to the press, privacy, contempt, obscenity, regulation of broadcasting/advertising.

JOUR 3796. Mass Media and Politics. (3 cr; A-F only. Prereq—Non-jour major or jour major with course appr on prog plan or pre-jour with adviser approval) Analysis of role of mass media in politics. Emphasizes television and electoral campaigns. News coverage vs newsmaking. Free press in democracy.

JOUR 3990. Special Topics in Mass Communication: Professional. (3 cr [max 6 cr]; A-F only. Prereq—Jour major or approved IDIM major or ICP major or BIS major) Professional-skills-learning opportunity not regularly offered. Topics specified in *Class Schedule*.

JOUR 3991. Special Topics in Mass Communication: Context. (3 cr [max 6 cr]; A-F only. Prereq—Jour major or jour minor or approved IDIM major or ICP major or BIS major) Context course not regularly offered. Topics specified in *Class Schedule*.

JOUR 3993. Directed Study. (1-3 cr [max 6 cr]; A-F only. Prereq—[jour major or jour minor or approved IDIM major or ICP major or BIS major], #, A, Δ) Directed study, projects.

JOUR 3996. Directed Internship. (1 cr [max 3 cr]; S-N only. Prereq—Jour major, Δ) Internship supervised by communications organization at which student is working and by student's academic sponsor.

JOUR 4171. Capstone: Covering the Arts. (3 cr; A-F only. Prereq—[3004W, 3101, [jour major or approved IDIM major or ICP major or BIS major]] or #) Assignments may follow flow of Twin Cities arts/entertainment scene, including its controversies, or may trace the journey of a particular arts organization (e.g., Jungle Theater) through its season. Weekly writing assignments, readings, field trips, guest lectures from artists/arts journalists.

JOUR 4193. Walter H Brovold and John Cameron Sim Community Newspaper Practicum. (3 cr; A-F only. Prereq—3004W, [3101 or 3201], [jour major or approved IDIM or BIS or ICP]) Field-based practicum at community newspaper in metropolitan area. Students work directly with editors, reporters, or advertising staff to produce news, features, or advertising material. Weekly meetings with instructor about newspaper assignments, readings, projects, or guest lectures.

JOUR 4259. Cases in Strategic Planning and Thinking. (3 cr; A-F only. Prereq—3004W, [3159 or 3201 or 3202], 3251, [jour major or approved IDIM major or ICP major or BIS major]) Strategic communication cases related to campaigns or issues in business, government, education, or community.

JOUR 4261. Advertising: Media Strategy. (3 cr; A-F only. Prereq—3004W, [3159 or 3201 or 3202], 3251, [jour major or approved IDIM major or ICP major or BIS major]) Strategic elements of media planning, media consumption patterns/trends. Context/role of media plan within marketing/advertising. Information resources, terminology, and tools used in media planning and negotiations.

JOUR 4263. Strategic Communication Campaigns. (4 cr; A-F only. Prereq—[3004W or 3004V], [3201 or 3202], 3251, [3179 or 3241 or 3279 or 4159 or 4259 or 4261], MKTG 3001, [jour major or approved IDIM major or ICP major or BIS major]) Developing campaign strategy/tactics. Emphasizes planning/decision-making skills. Students work in groups with varying specializations.

JOUR 4272. Interactive Advertising. (3 cr; A-F only. Prereq—Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval]) Interactive advertising models, how they differ from traditional ad models. Issues related to creating, measuring, pricing, and targeting interactive ads. Interactive ads in global, legal, and ethical contexts.

JOUR 4274W. Advertising in Society. (3 cr; A-F only. Prereq—Jour major or jour minor or approved IDIM major or ICP major or BIS major) Forms of regulation: self-regulation and governmental. Critique of advertising's role in society. Current issues (e.g., stereotyping, political advertising, advertising to children). Ethics in advertising.

JOUR 4302. Electronic Photojournalism. (3 cr; A-F only. Prereq—3004W, 3102, [jour major or approved IDIM major or ICP major or BIS major]) Practice of photojournalism in contemporary digital environment. Visual storytelling, digital processing, professional/ethical issues.

JOUR 4321. Publication Graphics. (3 cr; A-F only. Prereq—3004, 3321, [jour major or IDIM major or ICP major or BIS major]) Design process applied to production of magazines, brochures, newsletters. Computer as tool to prepare electronic documents for printing.

JOUR 4451. Capstone: Advanced Electronic News Writing and Reporting. (3 cr; A-F only. Prereq—[3004W or 3004V], 3101, 3121, 3451, [jour major or approved IDIM major or ICP major or BIS major]) Researching, reporting, shooting, writing, and editing TV news packages. Lecture, lab.

JOUR 4452. Capstone: Electronic Newscast Producing. (3 cr; A-F only. Prereq—[3004W or 3004V], 3101, 3121, 3451, [jour major or approved IDIM major or ICP major or BIS major]) Planning, writing, and producing live TV newscasts. Lecture, lab.

JOUR 4551. New Media Culture. (3 cr; A-F only. Prereq—Non-jour major or jour major with course appr on prog plan or pre-jour with adviser approval) Impact of "new media" (all forms of internet communication, wireless media, and combinations of "old" and "new" media) on current/future cultures. How new media may change ways we communicate, distribute, and process information. Social impact.

JOUR 4721. Mass Media and U.S. Society. (3 cr; A-F only. Prereq—Non-jour major or jour major with course appr on prog plan or pre-jour with adviser approval) Economic, political, social determinants of character/content of mass communications in America. Effect, structure, functioning of mass media. Problems, prospects, criticism. Professionalism, technology, reform.

JOUR 4731H. Honors: Communications Problems and Issues. (1 cr; A-F only. Prereq—[14171 or 14193 or 14263 or 14451 or 14452 or 14992 or 15131 or 15155 or 15174], jour major, honors) Honors discussion section in conjunction with capstone course.

JOUR 4801. Global Communication. (3 cr; A-F only. Prereq—Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval]) Structures, processes, and consequences of global mass communication. Problems in free flow of information. Roles of international organizations. Mass communication in social, political, and economic development. Implications for conflict resolution.

JOUR 4990. Special Topics in Mass Communication: Professional. (3 cr [max 6 cr]; A-F only. Prereq—Jour major or approved IDIM major or ICP major or BIS major) Professional-skills-learning opportunity not regularly offered. Topics specified in *Class Schedule*.

JOUR 4990H. Honors: Special Topics in Mass Communication. (3 cr [max 6 cr]; A-F only. Prereq—Honors, [jour major or approved IDIM major or ICP major or BIS major]) Topics specified in *Class Schedule*.

JOUR 4991. Special Topics in Mass Communication: Context. (3 cr [max 6 cr]; A-F only. Prereq—Jour major or jour minor or approved IDIM major or ICP major or BIS major) Special context topics not regularly offered. Topics specified in *Class Schedule*.

JOUR 4992. Capstone: Field Based Practicum. (3 cr [max 6 cr]; A-F only. Prereq—Jour major) Professional-skill-learning experience on-site at a media organization. Topics specified in *Class Schedule*.

JOUR 4993H. Honors: Thesis. (1-3 cr [max 3 cr]; A-F only. Prereq—Jour major, honors div regis, □, Δ, #)

JOUR 5004. Advanced Information for Mass Communication. (3 cr; A-F only. Prereq—Enrollment in M.A. in health journalism) Messages, information, audiences, and storytelling. Search strategy and question analysis. Informal information sources. Libraries, electronic information, and data tools. Institutional sources. Interviews, polls, surveys, and evaluating information. Ethics and information for messages.

JOUR 5101. Advanced News Writing and Reporting. (3 cr; A-F only. Prereq—Enrollment in MA in Health Journalism or #) Techniques of newspaper reporting and writing. Hands-on approach. What makes news. Basics of AP style. Thinking critically. Generating story ideas. Interviewing sources. Writing news stories and features. Exercises, discussion.

JOUR 5131. Capstone: In-Depth Reporting. (3 cr; A-F only. Prereq—[3004W or 3004V], 3101, 3121, [jour major or approved IDIM major or ICP major or BIS major] or grad student) Techniques/issues of special project stories. Explanatory, investigative, civic, and literary or ethnographic journalism. Topics (e.g., civil rights, governmental malfeasance, health care problems) typically involved in these stories.

JOUR 5155. Capstone: Advanced Reporting Methods. (3 cr; A-F only. Prereq—[[3004W or 3004V], 3101, 3121, [jour major or approved IDIM major or ICP major or BIS major]] or grad student)

Investigative techniques for mass media, computer-assisted reporting, use of records/documents, advanced interviewing, methods for adverse conditions, or field-based practicum.

JOUR 5174. Capstone: Magazine Editing and Production. (4 cr; A-F only. Prereq—[3004W, 3101, [3155 or 3173W or 3321 or 4302], [jour major or approved IDIM major or ICP major or BIS major]] or grad student)

Writing, editing, illustration, design, layout, and photocomposition of print or Web magazine. Emphasizes reporting, telling substantive stories. Students work in groups with varying specializations.

JOUR 5251. Psychology of Advertising. (3 cr; A-F only. Prereq—jour maj or min or design COMM or graphic pre-design or design COMM or graph design or IDIM/ICP/BIS or #)

Psychological principles, research techniques, and applications in advertising/selling. Consumer attitudes/behavior. Psychological mechanisms upon which effectiveness of advertisements/commercials depends.

JOUR 5316. Theories of Visual Communication. (3 cr; A-F only. Prereq—[3006, [jour major or jour minor or approved IDIM major or approved ICP major or approved BIS major]] or grad student or #)

Perspectives on study/analysis of visual communication. Message structure, systems of production, use of visual media. Contributions from sociology, anthropology, psychology, and history.

JOUR 5501. Communication and Public Opinion. (3 cr; A-F only. Prereq—Non-jour major or jour major with course appr on prog plan or prejour with adviser approval)

Theories of communication, persuasion, attitude change. Functions of interpersonal/mediated communication in diffusion of information and in opinion formation.

JOUR 5541. Mass Communication and Public Health. (3 cr. Prereq—Jour major or jour minor or grad major or IDIM major or ICP major or BIS major)

Intersection of mass media, public health, and behavior. Role of theory in understanding intended/unintended campaign effect. Role of health journalism. Decisions that inform media-based interventions.

JOUR 5552. Law of Internet Communications. (3 cr; A-F only. Prereq—Non-jour major or jour major with course appr on prog plan or [pre-jour with adviser approval])

Whether/how/which traditional media laws/regulations apply to the Internet. Developing law of communication on Internet, global/ethical issues.

JOUR 5601W. History of Journalism. (3 cr; A-F only.

Prereq—Jour major or jour minor or approved IDIM major or ICP major or BIS major; IDL sections are open to non-majors; prereqs do not apply to IDL sections) Development of American media, from beginnings in Europe to present day. Rise of film/radio/television/Internet. Relation of communications development to political, economic, social trends.

JOUR 5606W. Literary Aspects of Journalism. (3 cr; A-F only. \$ENGW 5606. Prereq—Jour major or jour minor or approved IDIM major or ICP major or BIS major; IDL sections are open to non-majors; prereqs do not apply to IDL sections) Literary aspects of journalism as exemplified in, and influenced by, works of American/British writers, past/present. Lectures, discussions, weekly papers, critiques.

JOUR 5615. History of the Documentary. (3 cr; A-F only. Prereq—Non-jour major or jour major with course appr on prog plan or pre-jour with adviser approval)

Social history of photography, film, video. Informational, documentary, propaganda, and entertainment functions of visual communication. Rise/influence of visual media industries and of public-image making.

JOUR 5725. Management of Media Organizations. (3 cr; A-F only. Prereq—Non-jour major or jour major with course appr on prog plan or prejour with adviser approval)

Introduction to concepts/principles of media management. Strategic planning, leadership, organizational strategies, ethical/legal issues. Working in teams. Balance sheets, income statements. Motivating/promoting people.

JOUR 5771. Media Ethics: Principles and Practice. (3 cr; A-F only. Prereq—Non-jour major or [jour major, course appr on prog plan] or [pre-jour, adviser approval])

Connecting theoretical approaches to media ethics with real-life case studies. History of ethical standards in print, broadcast, photojournalism, public relations, and advertising. Making ethical judgments in complex situations.

JOUR 5777. Contemporary Problems in Freedom of Speech and Press. (3 cr; A-F only. \$LAW 6030. Prereq—Jour major or jour minor or approved IDIM major or ICP major or BIS major)

Legal/constitutional derivation of freedom of press/speech. Emphasizes case law, statutes, judicial theories. Leading cases in privacy torts, prior restraints, news gathering/dissemination. Access to courts/government, including via the Internet. Legal-research techniques.

JOUR 5825. World Communication Systems. (3 cr; A-F only. Prereq—Non-jour major or jour major with course appr on prog plan or prejour with adviser approval)

Mass media systems of world, described/analyzed regionally/nationally. Historical roots. Social, economic, cultural context. Contemporary conditions/prospects. Relevance of journalism/mass communication to international affairs.

JOUR 5990. Special Topics in Mass Communication:

Professional. (3 cr [max 6 cr]; A-F only. Prereq—Jour major or approved IDIM major or ICP major or BIS major) Professional-skills-learning opportunity not regularly offered. Topics specified in *Class Schedule*.

JOUR 5991. Special Topics in Mass Communication:

Context. (3 cr [max 6 cr]; A-F only. Prereq—Jour major or jour minor or approved IDIM major or ICP major or BIS major) Special context topics not regularly offered. Topics specified in *Class Schedule*.

JOUR 5993. Directed Study. (1-3 cr [max 6 cr]; A-F only. Prereq—Jour major or jour minor or approved IDIM major or ICP major or BIS major). GPA of at least 3.00, o, Δ, #) Directed study/projects.

Kinesiology (KIN)

School of Kinesiology

College of Education and Human Development

KIN 1050. Beginning Military Physical Fitness Training. (1 cr [max 4 cr]; A-F only)

The Army's model of physical fitness training is used to address five aspects of fitness in the context of running, weight training, strength exercise, circuit training, and team sport activities. Students are organized into groups of similar fitness levels.

KIN 1375. Play Behavior. (3 cr)

Overview of play behavior across species, cultures, social settings. Relationship of play between physical/psychological development, role of sports/games in play, design of toys/playgrounds.

KIN 1871. Introduction to Kinesiology. (2 cr; A-F only)

Examination of the professional and disciplinary dimensions of physical activity. Representative experiences include lecture, discussion, small group activities, and laboratory tours.

KIN 1989. Health and Society. (3 cr; A-F only)

Major factors influencing human health, including behavior, the physical and social environments, policy, and economics. Opportunities for citizen participation in addressing each factor are explored, focusing on health topics such as nutrition and violence.

KIN 1993. Directed Study in Kinesiology. (1-6 cr [max 6 cr]; A-F only. Prereq—#)

For lower division students planning to major in kinesiology who wish to study a topic or problem under tutorial guidance.

KIN 3001. Lifetime Fitness and Health. (3 cr; A-F only)

Overview of health and wellness, including physical, emotional, intellectual, spiritual, social, environmental, and financial health. Societal changes and the influences of these changes on the general health and wellness of diverse populations.

KIN 3027. Human Anatomy for Kinesiology Students.

(3 cr; A-F only)

Introduction to human anatomy. Emphasizes musculoskeletal anatomy germane to athletic training, biomechanics, exercise physiology, motor learning/development.

KIN 3050. Advanced Military Physical Fitness Training.

(1 cr [max 4 cr]; A-F only. Prereq—4 cr of 1050 or #)

Students take on leadership roles in implementing Army's model of physical fitness training. Model addresses five aspects of fitness in the context of running, weight training, strength exercise, circuit training, and team sport activities.

KIN 3111. Human Anatomy. (2 cr; A-F only)

Beginning anatomy course for nonkinesiology students pursuing coaching licensure or for nonprofessional students interested in an exercise science approach to anatomy. Focus on a regional approach to muscle, nerve, and circulatory anatomy of the limbs and trunk and a systematic anatomy approach for circulatory, respiratory, digestive, urinary, and nervous systems. Students are encouraged to voluntarily attend arranged demonstrations of human cadaver dissections.

KIN 3112. Introduction to Biomechanics. (3 cr; A-F only.

Prereq—[[3027 or 3111 or CBN 1027], PHYS 1101W, CEHD student] or #)

Mechanical principles applied to human movement. Analytical methods of examining human motion. Quantitative/qualitative approaches.

KIN 3113. First Responder for Coaches and Athletic Trainers. (3 cr; A-F only)

Emergency medicine for coaches/athletic trainers. Patient assessment, airway management, CPR, splinting, spinal immobilization. Emphasizes critical thinking skills in emergency settings. Certifications: AHA-BLS, First Responder. Taught by a multidisciplinary faculty of health care professionals.

KIN 3114. Prevention and Care of Athletic Injuries. (3 cr; A-F only. Prereq—[[3027 or 3111 or CBN 1027], CEHD student] or #)

Principles in athletic training for prevention/care of injury. Taping/bracing techniques. Lab.

KIN 3126W. Psychology and Sociology of Sport. (3 cr; A-F only. Prereq—Kin major)

Introduction to sport psychology and sport sociology. Topics include factors related to individual and institutional behavior in the following physical activity settings: competitive and recreational athletics, exercise, physical education, and rehabilitative.

KIN 3131W. History and Philosophy of Sport. (3 cr; A-F only. Prereq—Kin major or #)

Introductory description and interpretation of the historical and philosophical development of physical education and sport from primitive societies to 20th century civilization.

KIN 3133. Motor Control, Learning, and Development.

(3 cr; A-F only. Prereq—Kin maj or #)

Concepts and principles of the coordination and control of movement, the learning of movement skills, and the changes in movement performance and physical growth across the life span.

KIN 3143. Organization and Management of Sport. (3 cr;

A-F only. \$SPST 3143. Prereq—Kin major or #)

Principles, policies, and procedures involved in the administration and management of sports programs at the interscholastic and intercollegiate levels.

KIN 3151. Measurement, Evaluation, and Research in Kinesiology. (3 cr; A-F only. Prereq—Kin major or #)
Introduction to the philosophy of evaluation and measurement in physical education and exercise science. Test selection, construction, evaluation, and administration. Basic research methods, statistical analysis, and interpretation of test scores.

KIN 3168. Soccer Coaching. (1 cr)
Fundamental approaches used in coaching soccer. Teaching/coaching technique, team organization/management, development of training schedules, rules/strategies related to the game.

KIN 3169. Volleyball Coaching. (1 cr. Prereq—Good understanding of volleyball)
Motivation, team building, communication, game strategies, philosophy. Lecture, discussion, practical application.

KIN 3171. Baseball Coaching. (1 cr. Prereq—Good understanding of baseball)
Safety, rules, team building, game strategies, and philosophy. Lecture, discussion, practical application.

KIN 3172. Basketball Coaching. (1 cr)
Teaching/coaching individual/team skills of basketball. Rules, strategies.

KIN 3173. Football Coaching. (1 cr)
Responsibilities/philosophies of coaching. Team management, skill development/analysis, rules, systems of play, psychology, scouting.

KIN 3174. Golf Coaching. (1 cr)
Safety, rules, etiquette, skill development and analysis, and philosophy. Students should have a good understanding of the sport before enrolling. Lecture, discussion, and practical application.

KIN 3175. Gymnastics Coaching. (1 cr)
Coaching gymnastics for males/females. Skill progression, skill analysis, spotting, routine construction, safety, training for competition, scoring, rules, psychology, off-season conditioning, responsibilities of coach.

KIN 3176. Ice Hockey Coaching. (1 cr)
Coaching hockey for males/females. Terminology, breakouts, penalty killing, power-plays, neutral ice play, offensive forechecking, defensive strategies, comparisons of men's/women's techniques.

KIN 3177. Swimming and Diving Coaching. (1 cr)
Coaching swimming for males and females. Stroke mechanics, starts/turns, safety, training for competition, psychology, off-season conditioning, roles/responsibilities of coach.

KIN 3178. Tennis Coaching. (1 cr)
Coaching strategies, safety/rules, training for competition, off-season training/conditioning, roles/responsibilities of coach.

KIN 3179. Track and Field Coaching. (1 cr)
Basic training/conditioning programs, event characteristics, coaching strategies, knowledge of track/field, meet administration.

KIN 3181. Wrestling Coaching. (1 cr)
Teaching/coaching of technique, team organization/management, rules interpretation, development of training schedules.

KIN 3327. Teaching Physical Education in the Elementary School. (2 cr; A-F only. Prereq—Elem ed major)
Overview of the elementary physical education process with focus on a classroom teacher's perspective and needs. Representative experiences include participation, lecture, micro-teaching, final test.

KIN 3385. Human Physiology for Kinesiology Students. (3 cr; A-F only. Prereq—[[3027 or CBN 1027 or equiv], kin major] or #)
Tissue/organ function, cell structure, cellular enzymes, energy production, chemical composition of the body. Nervous, muscular, endocrine, circulatory, renal, respiratory, and gastrointestinal physiological control systems studied in detail. Clinical, exercise, sport, work examples.

KIN 3696. Supervised Practical Experience. (1-10 cr [max 10 cr]; S-N only. Prereq—#)
On-the-job supervised practical experience in the fields of sport and exercise under a specialist in a particular area of study or emphasis.

KIN 3993. Directed Study in Kinesiology. (1-10 cr [max 10 cr]; A-F only. Prereq—#)
Student-selected clinical or research experience.

KIN 3993H. Directed Study in Kinesiology. (1-10 cr [max 10 cr]; A-F only. Prereq—Kin Honors, #)
Student selected clinical or research experience.

KIN 4001H. Honors Seminar in Kinesiology. (3 cr; A-F only. Prereq—Kinesiology honors)
Contemporary issues in kinesiological research. Laboratory rotations, development of UROP project proposal, development of senior thesis topic, advanced study, career opportunities in Kinesiology, special learning opportunities.

KIN 4132. Motor Development. (3 cr; A-F only)
Developmental aspects of human movement behavior/learning. Life span change of motor skills.

KIN 4135. Motor Control and Learning. (3 cr)
Main theoretical ideas/research that have advanced motor control/learning over last three decades.

KIN 4385. Exercise Physiology. (4 cr; A-F only. Prereq—[[3385 or equiv], Kin major] or #)
Effects of exercise on physiological systems of human body. Energy/nutritional requirements of exercise, exercise prescription, athletic conditioning, ergogenic aids, exercise in environmental extremes, gender/heritability factors related to adaptation to training.

KIN 4520. Current Topics in Kinesiology. (1-4 cr [max 8 cr]. Prereq—Upper div in [Kin or Rec or SPST or coaching] or #)
Issues in kinesiology or in areas not normally available through regular curriculum offerings.

KIN 5001. Foundations of Human Factors/Ergonomics. (3 cr; A-F only. SHUMF 5001)
Variability in human performance as influenced by interaction with designs of machines and tools, computers and software, complex technological systems, jobs and working conditions, organizations, and sociotechnical institutions. Emphasizes conceptual, empirical, practical aspects of human factors/ergonomic science.

KIN 5103. Developmental/Adapted Physical Education. (3 cr; A-F only)
Introduction to physical education for students with disabilities, emphasizing conceptual, organizational, and administrative issues. Topics include historical and legal foundations, service components, individualized education plans, professional roles, and assessment of movement skills.

KIN 5104. Physical Activities for Persons with Disabilities. (3 cr; A-F only)
Different approaches to providing physical education service and related movement interventions for persons with disabilities. Topics: movement behavior foundations, movement skill progressions, unique considerations for specific impairments, and sport for persons with disabilities

KIN 5111. Sports Facilities. (3 cr; A-F only. \$REC 5111. Prereq—Kin or Rec grad student or MEd student)
Steps in planning/building facilities for athletics, physical education, and sport for college, professional, and public use.

KIN 5115. Event Management in Sport. (3 cr; A-F only. Prereq—Grad student, #)
Techniques/principles of planning, funding, and managing sport events. Collegiate championships, non-profit events, benefits, professional events.

KIN 5121. Application of Basic Sciences to Kinesiology. (3 cr; A-F only)
Examination of how knowledge from the basics of science can lead to differing perspectives from which to approach questions directed to kinesiological inquiry.

KIN 5122. Applied Exercise Physiology. (3 cr; A-F only. Prereq—4385 or equiv or #)
Mechanisms of cardiorespiratory and muscular responses to exercise; application of exercise physiology to assessment of work capacity, athletic conditioning, and requirements of human powered vehicles; low to moderate exercise as an intervention in lowering risk for common health problems.

KIN 5126. Sport Psychology. (3 cr. Prereq—3126 or equiv or #)
Theory and research in sport psychology. Focus on the psychological study of human behavior in sport and physical activity settings.

KIN 5136. Psychology of Coaching. (3 cr)
Psychological dimensions of coaching across age levels, including coaching philosophy, leadership, communication skills, motivation, and mental skills training for performance enhancement.

KIN 5141. Nutrition for Health and Physical Performance. (3 cr; A-F only. Prereq—FSCN 1112 or equiv)
Requirements and physiologic roles of nutrients and physical activity in promotion of health/performance. Assessment of energy requirements. RDAs, food composition/safety, weight management. Prevention of chronic diseases; emphasizes coronary heart disease.

KIN 5142. Applied Sport Nutrition for Athletic Performance. (3 cr. Prereq—Grad student or #)
Latest research related to nutrition and human performance. Tools to differentiate between trends and scientific research related to optimizing human performance.

KIN 5152. Curriculum Development in Physical Education. (2 cr; A-F only. Prereq—Initial licensure/MEd phys ed student)
Trends, issues, and challenges in early childhood/K-12 physical education. Potential effect on curriculum.

KIN 5171. Foundations of Kinesiology. (3 cr; A-F only. Prereq—Kin major or #)
Introduction to the emerging field of kinesiology, broadly conceived as the study of human movement. Development and emergence of the term kinesiology and the scholarly, political, and educational ramifications of its development.

KIN 5196. Practicum: Developmental/Adapted Physical Education. (1-4 cr [max 4 cr]; S-N only. Prereq—5103 or ¶5103 or 5104 or ¶5104 or #; KIN undergraduate pre-teaching with sr status are limited to 2 practicum hrs)
Observation of, participation in physical education instruction for students with disabilities. Current issues in developmental/adapted physical education. Exchange of ideas/problems.

KIN 5235. Advanced Biomechanics II: Kinetics. (3 cr; A-F only. Prereq—[3112 or equiv], PMED 5135, undergrad college physics, intro calculus)
Kinetic aspects of human movement (single/multi-joint torques, simple inverted pendulum models, mass-spring systems). Analysis of experimental data and of computer simulations. Lectures, seminars, lab.

KIN 5371. Sport and Society. (3 cr; A-F only. \$REC 5371. Prereq—[3126, grad student] or #)
Sport, sporting processes, social influences, systems. Structures that have effected and exist within/among societies, nations, and cultures. Contemporary issues such as social differentiation, violence, and honesty.

KIN 5375. Competitive Sport for Children and Youth. (3 cr)
Cognitive, behavioral, and biological factors having important implications for competitive sport participants from early childhood through high school age. Emphasis on translating sport science research into practical implications for youth sport coaches, teachers, and administrators.

KIN 5385. Exercise for Disease Prevention and Management. (3 cr; A-F only. Prereq—Undergrad [physiology or biology])
Exercise testing/prescription with modifications required because of special considerations associated with aging, gender differences, environmental conditions, or presence of medical conditions.

KIN 5421. Sport Finance. (3 cr; A-F only. \$REC 5421. Prereq—Grad student or #)
Introduction to financial analysis in sport. Cash flow statements, budgeting issues, traditional/innovative revenue producing strategies available to sport organizations. Discussion, practical analysis of current market.

KIN 5435. Advanced Theory and Techniques of Exercise Science. (3 cr; A-F only. Prereq—[3385, 4385, Kin major] or #)
Theoretical constructs, in-depth description of procedures used in exercise science research and clinical settings. Laboratory exercises, lectures.

KIN 5461. Foundations of Sport Management. (3 cr; A-F only. Prereq—[Kin or Rec] student or #)
Theories/techniques in administration/management of sport enterprises. Organizational theory/policy, practical examples of sport management skills/strategies.

KIN 5485. Advanced Electrocardiogram, Graded Exercise Testing, and Prescription. (3 cr; A-F only. Prereq—[3385, 4385] or #)
Introduction to electrocardiogram. Placement/interpretation, use in clinical exercise testing and exercise prescription. Hands-on experience in electrocardiogram for exercise testing.

KIN 5511. Women in Sport and Leisure. (3 cr; A-F only. \$REC 5511)
Critically examines women's involvement in/ contributions to sport, physical activity, and leisure.

KIN 5601. Sport Management Ethics and Policy. (3 cr; A-F only. \$REC 5601. Prereq—MEd or grad student or #)
How to critically analyze ethical concepts that underpin or inform sport policies and evaluate sport policies from a normative point of view. Selected sport policy issues are used to illustrate relevance of ethical considerations in policy development and to explore the ethical implications of sport policy.

KIN 5631. Programming and Promotion in Sport. (3 cr; A-F only. \$REC 5631. Prereq—Kin or Rec grad student or #)
Introduction to marketing concepts as they apply to sport industry. Consumer behavior, market research, marketing mix, corporate sponsorship, licensing. Discussion, practical application.

KIN 5696. Practicum in Kinesiology. (1-6 cr [max 6 cr]; S-N only. Prereq—Grad student in KIN, #)
Practical experience in kinesiology under supervision of a University adviser and an agency supervisor.

KIN 5697. Student Teaching: Coaching. (1-10 cr [max 10 cr]; S-N only. Prereq—admission to coaching program, #)
Student coaching experience under supervision of a mentor coach.

KIN 5720. Special Topics in Kinesiology. (1-8 cr [max 8 cr]. Prereq—Kin upper div undergrad or grad student or #)
Current issues in the broad field and subfields in kinesiology, or related coursework in areas not normally available through regular offerings.

KIN 5723. Psychology of Sport Injury. (3 cr. Prereq—Intro psych course)
Psychosocial bases of risk factors preceding sport injury, responses to the occurrence of sport injury, and the rehabilitation process. Lecture, discussion, guest lecture, interviews, and presentation experience.

KIN 5725. Organization and Management of Physical Education and Sport. (3 cr; A-F only. Prereq—Grad/initial licensure or #)
Comprehensive analysis of organization and management of physical education and sport in educational settings. Focus on management and planning processes, management skills, functions, roles, decision making, leadership, shared systems, and organizational motivation. For physical education teachers, coaches, community sport administrators.

KIN 5726. Physical Education—Teaming and Trekking. (2 cr; A-F only. Prereq—Kin major, MEd student, or #)
Development of cooperative and team-building activities, group planning, and leadership skills in preparation for a two-day trip in a state park using practiced outdoor skills of camping, canoeing, and backpacking. Must be comfortable in water.

KIN 5727. Physical Education—An Adventure Experience. (1 cr; A-F only. Prereq—Kin major, MEd student, or #)
Group and individual initiatives in an experientially based program emphasizing participation in leadership, group cooperation, problem solving, low ropes, climbing walls, sensible risk taking, and trust-oriented activities.

KIN 5740. Topics: Coaching of Individual, Dual, or Team Sports. (1-9 cr [max 9 cr]; A-F only)
Instruction at the advanced level, including analyses of skills, game strategies, specific techniques of coaching, and methods of training and conditioning.

KIN 5801. Legal Aspects of Sport and Recreation. (4 cr; A-F only. Prereq—Kin or rec major)
Legal issues related to recreation, park, and sport programs/facilities in public/private sectors.

KIN 5941. Neural Basis of Movement. (3 cr; A-F only. Prereq—[3111, CBN 1027] or equiv, [PHSL 3051] or equiv)
Overview of various neural subsystems involved in controlling human/primate sensorimotor behavior. Effects of brain lesions on overt behavior, possibilities for rehabilitation. Systems theory approach. Lectures, seminars, class presentations.

KIN 5981. Research Methodology in Kinesiology, Recreation, and Sport. (3 cr; A-F only. \$REC 5981. Prereq—3151 or equiv)
Defines/reviews various types of research in exercise/sport science, physical education, and recreation studies. Qualitative research, field studies, and methods of introspection as alternative research strategies to traditional scientific paradigm.

KIN 5987. Professional Skills and Grant Writing for Health Sciences. (2 cr. Prereq—Grad student)
Introduction to structure/function of different organizations (e.g., NIH, AHA). Writing/reviewing grants/manuscripts. Preparing for a job in academia.

KIN 5992. Readings in Kinesiology. (1-9 cr [max 9 cr]; A-F only. Prereq—CEHD student, grad, #)
Independent study under tutorial guidance.

KIN 5995. Research Problems in Applied Kinesiology. (1-6 cr [max 6 cr]; A-F only. Prereq—[Grad or MEd student in Kin], #)
Selected topics in physical activity/human performance.

Korean (KOR)

Asian Languages and Literatures

College of Liberal Arts

KOR 1011. Beginning Korean. (5 cr. \$KOR 4001)
Basic grammatical structure, vocabulary, and expressions of modern colloquial Korean. Introduces Korean writing system.

KOR 1012. Beginning Korean. (5 cr. \$KOR 4002. Prereq—1011)
Basic grammatical structure, vocabulary, and expressions of modern colloquial Korean.

KOR 1017. Accelerated Korean. (5 cr. Prereq—Ability in basic spoken Korean)
Intensive course. Emphasizes reading/writing. Listening/speaking in various contexts.

KOR 3021. Intermediate Korean. (5 cr. \$KOR 4003. Prereq—1012)
Speaking, reading, and writing at intermediate level in modern colloquial Korean. Simple narration/written reports. Some basic Chinese characters may be introduced.

KOR 3022. Intermediate Korean. (5 cr. \$KOR 4004. Prereq—3021)
Speaking, reading, and writing at intermediate level in modern colloquial Korean. Narration/written reports. Introduction of additional basic Chinese characters.

KOR 3031. Third Year Korean. (4 cr. Prereq—3022)
Speaking, reading, writing at advanced level in modern colloquial Korean. Narration, written reports. Further Chinese characters introduced.

KOR 3032. Third Year Korean. (4 cr. Prereq—3031)
Speaking, reading, writing at advanced level in modern colloquial Korean. Narration, written reports. Further Chinese characters introduced.

KOR 3290. Korean Language Teaching Tutorial. (1 cr [max 2 cr] Prereq—Grade of A in 3032)
Students tutor beginning students of Korean and are part of department's Korean language team.

KOR 3650. 20th Century Korean Literature in Translation. (3 cr)
Various works of Korean literature from colonial age through 1990s. Literary responses to historical changes. Relationship of literary works with historical issues such as colonial experience, Korean civil war and its results, and modern industrial society.

KOR 4001. Beginning Korean. (3 cr. \$KOR 1011. Prereq—passing score on GPT in another language or grad student)
Grammatical structure, vocabulary, expressions of modern colloquial Korean. Korean writing system. Meets with 1011.

KOR 4002. Beginning Korean. (3 cr. \$KOR 1012. Prereq—[4001, passing score on GPT in another language] or grad student)
Basic grammatical structure, vocabulary, and expressions of modern colloquial Korean. Meets with 1012.

KOR 4003. Intermediate Korean. (3 cr. \$KOR 3021. Prereq—[4002, passing score on GPT in another language] or grad student)
Speaking, reading, and writing in modern colloquial Korean. Simple narration/written reports. Basic Chinese characters may be introduced. Meets with Hmng 3021.

KOR 4004. Intermediate Korean. (3 cr. \$KOR 3022. Prereq—[4003, passing score on GPT in another language] or grad student)
Speaking, reading, and writing at intermediate level in modern colloquial Korean. Narration/written reports. Introduction of additional basic Chinese characters. Meets with KOR 3022.

KOR 4005. Third Year Korean. (3 cr. Prereq—3022 or #)
Speaking, reading, and writing in modern colloquial Korean. Narration, written reports. Further Chinese characters. Meets with 3031.

KOR 4006. Third Year Korean. (3 cr. Prereq—3031 or 4005 or #)
Speaking, reading, and writing in modern colloquial Korean. Narration, written reports. Further Chinese characters.

Laboratory Medicine and Pathology (LAMP)

Department of Laboratory Medicine and Pathology

Medical School

LAMP 4172. Pathology for Allied Health Students. (3 cr. Prereq—Regis allied health program, anatomy course, physiology course or #)
General and organ system pathology.

LAMP 4177. Pathology for Allied Health Students. (3 cr. Prereq—Regis allied health program, anatomy course and physiology course or #)
General and organ system pathology.

LAMP 5100. General and Systemic Pathology for Dental Students. (4 cr; A-F only. Prereq—Regis dental student) Causes, courses, mechanisms and outcomes of disease. Required as preparation for clinical dental practice and oral pathology.

LAMP 5125. Chronobiology. (2-6 cr [max 6 cr]) How to interpret biologic time series and how to use them in practice as well as in designing chronobiology experiments. Chronobiologic procedures of data collection and analysis, interpretation of the output in clinical practice.

Landscape Architecture (LA)

Department of Landscape Architecture

College of Design

LA 1101W. Introduction to Design Thinking. (4 cr; A-F only. \$DHA 1101W)

Introduction to theories and processes that underpin design thinking. Survey of the design professions; the power of design; and interactions between humans and their natural, social, and designed environments.

LA 1201. Learning from the Landscape. (3 cr; A-F only) Physical elements shaping the world. Shapes, forms, and order of towns, cities, and countryside. How design, planning, and natural systems, taken together, shape physical surroundings. Lectures, discussions, field trips.

LA 1202. Making the Mississippi. (3 cr; A-F only) Historical overview and case studies of actions that have “made” the Mississippi River and the communities along its banks. Relations between the river and human settlements. What role various members of the public have had in making the river.

LA 1301. Introduction to Drawing in Architecture and Landscape Architecture. (3 cr; A-F only. \$LA 5301) Development of basic skills involved in perceiving and representing the material environment. Study of sketching and drawing conventions of visual phenomena and forms.

LA 1401. The Designed Environment. (3 cr; A-F only) Examination of relationships between place and space, and realms of the ideal and real, public and private. Survey of how the fields of architecture, landscape architecture, and urban design have explored those issues.

LA 3001. Understanding and Creating Landscape Space. (3 cr; A-F only. Prereq—B.E.D major or pre-LA student or #) Introduction to spatial design issues at all scales.

LA 3002. Informants of Creating Landscape Space. (3 cr; A-F only. Prereq—3001, ARCH 3401, 3501) Development of the design program. Site analysis of landscape space. Design exercises show how design program and site analysis inform creation of landscape space in developing schematic designs at varying geographic scales and in different geographic settings. Lectures, readings, discussions.

LA 3204. Landscape Ecology. (3 cr; A-F only. Prereq—EEB 3001 or equiv) Relationships among spatial patterns, temporal patterns, and ecological processes in landscape.

LA 3413. Introduction to Landscape Architectural History. (3 cr; A-F only. Prereq—One course in history at 1xxx or higher) Study of landscape architecture’s roots by examining the creation of landscapes over time. Areas of emphasis include ecological and environmental issues; and the political, economic, and social contexts of landscape architectural works.

LA 3501. Environmental Design and Its Biological and Physical Context. (3 cr; A-F only) Consideration of dynamic relationships between environmentally designed places and their biological and physical contexts. Case studies of successfully integrating created place and biological and physical contexts.

LA 3571. Landscape Construction: Site Systems and Engineering. (3 cr; A-F only. Prereq—BED major or BED minor or #) Theory applications of landform systems for design. Landform typology, representation methods, manipulation techniques, use of land survey data, earthwork construction issues. Spatial accommodation of vehicles in landscape architecture, including road design.

LA 5201. Making Landscape Spaces and Types. (6 cr; A-F only. Prereq—B.E.D accelerated status or LA grad or #) Design exploration using 3-D models and historical precedent studies to create outdoor spaces for human habitation and use. Application of the basic landscape palette of landform, plants, and structures to give physical, emotional, cognitive, and social definition to created places.

LA 5202. Landscape Analysis Workshop. (1 cr; S-N only) Introduction to field techniques for site analysis, including vegetation, soil, and landform description. One-week session, before fall term, at lake Itasca Forestry and Biological Station.

LA 5203. Ecological Dimensions of Space Making. (6 cr; A-F only. Prereq—LA major or #; recommended for both BED and Grad students) Design studio experience drawing on ecological, cultural, aesthetic influences to explore development of design ideas responsive to ecological issues and human experience.

LA 5204. Landscape Ecology. (3 cr. Prereq—B.E.D. accelerated status or LA grad student or #) Relationships among spatial patterns, temporal patterns, ecological processes in landscape. Factors affecting landscape patterns, measurement of landscape pattern, material transport through landscape, effects of landscape pattern on population dynamics, landscape planning.

LA 5301. Introduction to Drawing in Architecture and Landscape Architecture. (3 cr. \$LA 1301. Prereq—LA grad student, accelerated B.E.D. student) Perceiving/representing material environment. Sketching/drawing conventions, visual phenomena/forms.

LA 5351. AutoCAD I. (3 cr. Prereq—B.E.D. major or LA grad or #; may not be taken for graduate credit) Basic concepts, tools, and techniques of computer-aided drawing. Introduction to current AutoCAD Release software. Strategies and techniques for producing dimensioned and annotated drawings. Introduction to 3-D drawing capabilities. Use of dimension variables, attributes, blocks, symbols, and creation of customized menus.

LA 5352. AutoCAD II. (3 cr. Prereq—ARCH 5351 or LA 5351, B.E.D. major or LA grad or #; may not be taken for graduate credit) Intermediate concepts, tools, and techniques of computer-aided drawing with current AutoCAD Release software. Strategies and techniques for producing dimensioned and annotated drawing. Use of dimension variables, attributes, blocks, symbols, and creation of customized menus.

LA 5371. Computer Methods I. (1 cr; S-N only. \$ARCH 5371. Prereq—B.E.D. accelerated status or LA grad or #) Introduction to current techniques, programs, and new editions of computer programs, and their application to landscape architecture computing.

LA 5372. Computer Methods II. (1 cr; S-N only. \$ARCH 5372. Prereq—Arch/LA 5371, LA grad or #) Current techniques and computer programs, and their application to landscape architecture computing.

LA 5373. Computer Methods III. (3 cr. \$ARCH 5373. Prereq—LA grad or #) Advanced techniques and computer programs, and their application to landscape architecture computing in design, theory, and technology.

LA 5400. Topics in Landscape Architecture. (1-3 cr [max 12 cr]; A-F only. Prereq—B.E.D. accelerated status or LA grad or #) Current topics in landscape architecture. Taught by regular or visiting faculty in their areas of specialization.

LA 5401. Directed Studies in Emerging Areas of Landscape Architecture. (1-3 cr [max 12 cr]; A-F only. Prereq—#)

LA 5402. Directed Studies in Landscape Architecture History and Theory. (1-6 cr [max 12 cr]; A-F only. Prereq—#) Independent studies under the direction of landscape architecture faculty.

LA 5403. Directed Studies in Landscape Architecture Technology. (1-6 cr [max 12 cr]; A-F only. Prereq—#) Independent studies under the direction of landscape architecture faculty.

LA 5404. Directed Studies in Landscape Architecture Design. (1-6 cr [max 12 cr]; A-F only. Prereq—#) Independent studies under the direction of landscape architecture faculty.

LA 5405. Interdisciplinary Studies in Landscape Architecture. (1-6 cr [max 12 cr]; A-F only. Prereq—#) Research, planning, or design projects. Topics vary.

LA 5406. Urban Design Journal. (3-4 cr [max 4 cr]; A-F only. Prereq—Admitted to Denmark International Study Program co-sponsored by the University; given in Denmark) Methods and theories in urban design and human behavior. Students develop journal as tool for experiencing, analyzing, and recording the urban landscape, its fabric, spatial elements, and individual components, and for analyzing design solutions.

LA 5407. Landscape Architecture Studio. (3-4 cr [max 4 cr]; A-F only. Prereq—Admitted to Denmark International Study Program co-sponsored by the University; given in Denmark) Individual and small-group projects focusing on urban issues; design process in Danish conditions; solutions based on knowledge of Danish problems in landscape and urban design and an understanding of how these problems are solved within Danish and European contexts.

LA 5408. Landscape Architecture, Architecture, and Planning. (3-4 cr [max 4 cr]; A-F only. Prereq—Admitted to Denmark International Study Program co-sponsored by the University; given in Denmark) Methods and theories in urban design and human behavior. Students develop urban design journal as tool for experiencing, analyzing, and recording the urban landscape, its fabric, spatial elements, and individual components, and for analyzing design solutions.

LA 5413. Introduction to Landscape Architectural History. (3 cr; A-F only. Prereq—One course in history at 1xxx or higher) Introductory course examines the multiple roots of landscape architecture by examining the making of types of landscapes over time. Emphasis on ecological and environmental issues, and issues related to political, economic, and social contexts of landscape architectural works.

LA 5431. History of Landscape Architecture: Individual Influences. (3 cr; A-F only) Assessment of influences of individuals on formation of the profession of landscape architecture from 1800 to present. Lectures, presentations, field trips, readings, papers, projects.

LA 5571. Landscape Construction: Landform Systems and Spatial Performance. (3 cr; A-F only. Prereq—Accelerated BED student or LA grad student) Theory and professional applications of landform systems for design. Landform typology, representation methods, manipulation techniques, use of land survey data, earthwork construction issues. Spatial accommodation of vehicles in landscape architecture, including road design.

LA 5572. Plants in Design. (3 cr; A-F only. Prereq—[5201, 5203, plant identification course] or #) Design principles for using plants in landscape. Cultural/ecological principles in design projects of various scales. Lectures, presentations, field trips, readings, projects.

LA 5573. Landscape Technology: Introduction to Geographic Information Systems. (3 cr; A-F only. Prereq—jr or sr B.E.D. major or LA grad or #)
GIS as an analytical tool to solve geographical problems of regional landscape design and resource management. Topics include application techniques, analytical procedures, data characteristics, data sources, input/output methods, and implementation.

LA 5574. Identification of Minnesota Flora. (3 cr; A-F only. Prereq—BED accelerated status or LA grad student or #)
Introduction to identification of approximately 500 plants commonly used by landscape architects and environmental designers in Minnesota. Students develop a working knowledge of over 250 plants. Focuses on plant selection techniques, plant landscape associations, and issues of plants for use in standard landscape architectural settings. Regular field sessions.

LA 5712. Infrastructure, Natural Systems and the Space of Inhabited Landscapes. (3 cr; A-F only)
Relationship between natural/infrastructural systems for human dwelling. Land-embedded systems for hybrid agricultural/post-ag landscapes. Relationships between natural systems/resources and engineered systems. Appropriateness/fit versus flexible generalizability. Resolution of economic/ecological forces. Role of landscape architects in creating morphologies of settlement.

LA 5721. Proseminar in Metropolitan Design. (3 cr; A-F only. \$ARCH 5721. Prereq—[ARCH 5711 or equiv], enrollment in CMD prog) or #)
Reading seminar. Evolution of the contemporary city. Dynamics that created contemporary urban spatial patterns. Planning/design theories that have guided public interventions in the built environment. Thematic texts, classroom discussions.

LA 5790. Special Topics in Metropolitan Design. (3 cr [max 6 cr]; A-F only. \$ARCH 5790. Prereq—Enrollment in CMD prog or #)

Language, Teaching, and Technology (LGTT)

Institute of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

LGTT 5101. Applications of Technology in Language Teaching. (3 cr)
Explore uses of technology in language teaching; theoretical background, demonstrations, and applications.

LGTT 5110. Technology in the Second Language Classroom. (2 cr. \$LGTT 5611)
Examine, evaluate, and use technology in language teaching. Theoretical background, demonstration, hands-on exploration.

LGTT 5710. Special Topics in Language Teaching and Technology. (1-3 cr [max 12 cr])
Examine, evaluate, apply specific area of technology to K-higher education, second/foreign language teaching/learning in classroom, independent study, distance education environments.

LGTT 5738. Web-based Second Language Instruction: Issues, Models, and Designs. (3 cr [max 6 cr])
Issues, models, and designs related to Web-based second language instruction in K-Higher Education settings. Evaluating course Web sites. Pedagogical value of Web technology. Applying technology in creating course Web sites.

Latin (LAT)

Department of Classical and Near Eastern Studies

College of Liberal Arts

LAT 1001. Beginning Latin I. (5 cr. \$LAT 1111H, LAT 3111)
Gradual mastery of Latin structure in order to attain reading knowledge; practice in oral reading and composition.

LAT 1002. Beginning Latin II. (5 cr. Prereq—Grade of at least [C- or S] in 1001 or #)
Latin grammar/syntax. Graduated readings from Roman authors, including Cicero, Catullus, and Roman comedy.

LAT 1102. Beginning Latin II, Transition. (3.33 cr; A-F only)
Continuation of basic grammar/vocabulary, practice reading/writing. Latin readings, Roman legends.

LAT 1103. Selections from Latin Literature, Transition. (3.33 cr; A-F only)
Prose/poetry. Historical/literary background.

LAT 1111H. Honors Course: Beginning Latin. (3 cr. \$LAT 1001, LAT 3111. Prereq—Concurrent registration required in 1112; regis in honors program or high ability as indicated by high school transcript)
Intensive Latin course covering material usually taught over two semesters. Students must also register for 1112 when taking this class.

LAT 1112H. Honors Course: Beginning Latin, Recitation. (3 cr. Prereq—Concurrent registration in 1111, regis in honors program or high ability as indicated by high school transcript)
Drills and composition exercises. Students must also register for 1111 when taking this class.

LAT 3100. Reading Latin Prose. (3 cr. Prereq—1002 or 1111 or 1112 or 3111 or 3112 or #)
Introduction to reading Latin prose. Selections from Roman authors. Review of grammar/syntax. Follow-up course to intensive Latin or review for students returning to reading Latin after time lapse.

LAT 3111. Intensive Latin. (3 cr. \$LAT 1001, LAT 1111H. Prereq—Concurrent registration in 3112; previous exper in another foreign language desirable)
Intensive Latin course covering material usually taught over two semesters. Undergraduates must also register for 3112 when taking this class.

LAT 3112. Intensive Latin, Recitation. (3 cr. Prereq—Concurrent registration in 3111; previous exper in another foreign language desirable)
Drills and composition exercises. Students must also register for 3111 when taking this course.

LAT 3113. Intermediate Latin Prose. (4 cr. Prereq—Grade of at least [C- or S] in [1002 or 1112H or 3112] or #)
Reading Latin. Reviews elementary grammar, vocabulary, and morphology. Introduction to major themes/issues in Latin literature and Roman culture.

LAT 3114. Augustan Latin Authors. (4 cr. Prereq—3113 or Δ)
Students progress from intermediate to advanced Latin reading while surveying the world of Augustan Rome. Authors include Livy, Virgil, and Ovid.

LAT 3300. Intermediate Latin Poetry. (4 cr [max 8 cr]. Prereq—Grade of at least [C- or S] in 3113 or #)
Readings in Latin poetry. Introduction to Latin Meter. Vergil and Catullus/Ovid offered in alternate years.

LAT 3310. Advanced Undergraduate Latin: History. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
Roman history as the Romans wrote it; selections from Livy, Sallust, Tacitus, or Ammianus.

LAT 3320. Advanced Undergraduate Latin: Belles-Lettres. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
Selections from expository Latin literature (essays, epistles, monographs).

LAT 3330. Advanced Undergraduate Latin: Oratory. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
One or more appropriate authors studied each semester.

LAT 3340. Advanced Undergraduate Latin: Epic/Pastoral. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
One or more appropriate authors studied each semester.

LAT 3350. Advanced Undergraduate Latin: Lyric/Elegiac. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
One or more appropriate authors studied each semester.

LAT 3360. Advanced Undergraduate Latin: Drama. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
One or more appropriate authors studied each semester.

LAT 3370. Advanced Undergraduate Latin: Satire. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
One or more appropriate authors studied each semester.

LAT 3440. Advanced Undergraduate Latin: Later Latin. (3 cr [max 12 cr]. Prereq—3300 or 3114)
Reading course. Authors of Late Antiquity, Middle Ages, and Renaissance. Topics specified in *Class Schedule*.

LAT 3450. Advanced Undergraduate Latin: Classical Authors. (3 cr [max 12 cr]. Prereq—3114 or Δ)
Readings from various classical Latin authors. Topics specified in *Class Schedule*.

LAT 3951W. Major Project. (4 cr. Prereq—[Greek-Latin or Latin major], three 3xxx Latin courses, #, Δ)
Research project using documents and other sources from the ancient world. Students select project in consultation with a faculty member who directs the research and writing.

LAT 3960H. Honors Course: Advanced Undergraduate Latin Reading. (3 cr [max 12 cr]. Prereq—Regis in honors program or high ability as indicated by transCRIPT)
Student attends Latin 33xx, 3440, or 3450 and does additional work for honors credit.

LAT 3993. Directed Studies. (1-4 cr [max 12 cr]. Prereq—# and Δ)
Guided individual reading or study.

LAT 5012. Latin Prose Composition. (3 cr. Prereq—Grad student or #)
Latin grammar, syntax, diction, and prose style. Graduated exercises in prose composition.

LAT 5032. Text Criticism. (3 cr. Prereq—Grad student or #)
Theory/practice. Elements of paleography and manuscript study. Tools for analyzing a textual apparatus. Constructing a critical edition of a literary text.

LAT 5033. Epigraphy. (3 cr. Prereq—Grad student or #)
Practical/theoretical introduction to Latin epigraphy (study/interpretation of inscriptions). Readings/discuss of epigraphic texts. Focuses on their value as historical documents, as evidence for development of Latin language, and as literary texts.

LAT 5310. Latin Literature: History. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5320. Latin Literature: Epistles and Essays. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5330. Latin Literature: Oratory. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5340. Latin Literature: Epic and Pastoral. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5350. Latin Literature: Lyric and Elegiac Poetry. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5360. Latin Literature: Latin Dramatists. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5370. Latin Literature: Satire. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

This is LGTT to PUBH of the Course Description section of the 2006-2008 Undergraduate Catalog for the University of Minnesota, Twin Cities campus.

Course Descriptions

Contents		
Academic Health Center Shared (AHS)	358	English: Composition (ENGC)
Accounting (ACCT)	358	English: Creative Writing (ENGW)
Adult Education (ADED)	358	English: Literature (ENGL)
Aerospace Engineering and Mechanics (AEM)	359	Entomology (ENT)
Aerospace Studies (AIR)	360	Environmental Sciences, Policy, and Management (ESPM)
Afro-American Studies (AFRO)	361	Family Social Science (FSOS)
Agricultural Industries and Marketing (AIM)	363	Finance (FINA)
Agricultural, Food, and Environmental Education (AFEE)	363	Finnish (FIN)
Agronomy and Plant Genetics (AGRO)	364	Fisheries and Wildlife (FW)
Akkadian (AKKA)	365	Food Science and Nutrition (FSCN)
American Indian Studies (AMIN)	365	Forest Resources (FR)
American Sign Language (ASL)	367	French (FREN)
American Studies (AMST)	367	French and Italian (FRIT)
Anatomy (ANAT)	368	Gay, Lesbian, Bisexual, and Transgender Studies (GLBT)
Animal Science (ANSC)	368	Genetics, Cell Biology and Development (GCD)
Anthropology (ANTH)	369	Geographic Information Science (GIS)
Applied Business (ABUS)	372	Geography (GEOG)
Applied Economics (APEC)	373	Geological Engineering (GEOE)
Arabic (ARAB)	374	Geology and Geophysics (GEO)
Aramaic (ARM)	375	German (GER)
Architecture (ARCH)	375	German, Scandinavian, and Dutch (GSD)
Art (ARTS)	378	Gerontology (GERO)
Art History (ARTH)	381	Global Studies (GLOS)
Asian American Studies (AAS)	383	Greek (GRK)
Asian Languages and Literatures (ALL)	383	Health Informatics (HINF)
Astronomy (AST)	385	Health Systems Management (HSM)
Bio-based Products (BP)	385	Hebrew (HEBR)
Biochemistry (BioC)	387	Hindi (HNDI)
Bioinformatics (BINF)	388	History (HIST)
Biology (BIOL)	388	History of Medicine (HMED)
Biomedical Engineering (BMEN)	389	History of Science and Technology (HSCT)
Biosystems and Agricultural Engineering (BAE)	390	Hmong (HMNG)
Business Administration (BA)	391	Honors Seminar (HSEM)
Business and Industry Education (BIE)	391	Horticultural Science (HORT)
Business Law (BLAW)	392	Human Resource Development (HRD)
Center for Spirituality and Healing (CSPH)	392	Human Resources and Industrial Relations (HRIR)
Central Asian Studies (CAS)	394	Humanities (HUM)
Chemical Engineering (CHEN)	394	Icelandic (ICEL)
Chemistry (CHEM)	395	Industrial Engineering (IE)
Chicano Studies (CHIC)	397	Information and Decision Sciences (IDSC)
Child Psychology (CPSY)	398	Information Networking (INET)
Chinese (CHN)	399	Innovation Studies (IS)
Civil Engineering (CE)	400	Institute of Technology (IOFT)
Classical and Near Eastern Studies (CNES)	401	Insurance and Risk Management (INS)
Classical Civilization (CLCV)	403	Inter-College Program (ICP)
Classics (CLAS)	404	Interdepartmental Study (ID)
Clinical Laboratory Science (CLS)	404	Interdisciplinary Archaeological Studies (INAR)
College of Food, Agricultural & Natural Resource Sciences (CFAN)	404	International Business (IBUS)
College of Liberal Arts (CLA)	405	Italian (ITAL)
Communication Studies (COMM)	405	Japanese (JPN)
Comparative Literature (CL)	407	Jewish Studies (JWST)
Comparative Studies in Discourse and Society (CSDS)	407	Journalism and Mass Communication (JOUR)
Computer Science (CSCI)	407	Kinesiology (KIN)

LA 5573. Landscape Technology: Introduction to Geographic Information Systems. (3 cr; A-F only. Prereq—jr or sr B.E.D. major or LA grad or #)
GIS as an analytical tool to solve geographical problems of regional landscape design and resource management. Topics include application techniques, analytical procedures, data characteristics, data sources, input/output methods, and implementation.

LA 5574. Identification of Minnesota Flora. (3 cr; A-F only. Prereq—BED accelerated status or LA grad student or #)
Introduction to identification of approximately 500 plants commonly used by landscape architects and environmental designers in Minnesota. Students develop a working knowledge of over 250 plants. Focuses on plant selection techniques, plant landscape associations, and issues of plants for use in standard landscape architectural settings. Regular field sessions.

LA 5712. Infrastructure, Natural Systems and the Space of Inhabited Landscapes. (3 cr; A-F only)
Relationship between natural/infrastructural systems for human dwelling. Land-embedded systems for hybrid agricultural/post-ag landscapes. Relationships between natural systems/resources and engineered systems. Appropriateness/fit versus flexible generalizability. Resolution of economic/ecological forces. Role of landscape architects in creating morphologies of settlement.

LA 5721. Proseminar in Metropolitan Design. (3 cr; A-F only. \$ARCH 5721. Prereq—[ARCH 5711 or equiv], enrollment in CMD prog) or #)
Reading seminar. Evolution of the contemporary city. Dynamics that created contemporary urban spatial patterns. Planning/design theories that have guided public interventions in the built environment. Thematic texts, classroom discussions.

LA 5790. Special Topics in Metropolitan Design. (3 cr [max 6 cr]; A-F only. \$ARCH 5790. Prereq—Enrollment in CMD prog or #)

Language, Teaching, and Technology (LGTT)

Institute of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

LGTT 5101. Applications of Technology in Language Teaching. (3 cr)
Explore uses of technology in language teaching; theoretical background, demonstrations, and applications.

LGTT 5110. Technology in the Second Language Classroom. (2 cr. \$LGTT 5611)
Examine, evaluate, and use technology in language teaching. Theoretical background, demonstration, hands-on exploration.

LGTT 5710. Special Topics in Language Teaching and Technology. (1-3 cr [max 12 cr])
Examine, evaluate, apply specific area of technology to K-higher education, second/foreign language teaching/learning in classroom, independent study, distance education environments.

LGTT 5738. Web-based Second Language Instruction: Issues, Models, and Designs. (3 cr [max 6 cr])
Issues, models, and designs related to Web-based second language instruction in K-Higher Education settings. Evaluating course Web sites. Pedagogical value of Web technology. Applying technology in creating course Web sites.

Latin (LAT)

Department of Classical and Near Eastern Studies

College of Liberal Arts

LAT 1001. Beginning Latin I. (5 cr. \$LAT 1111H, LAT 3111)
Gradual mastery of Latin structure in order to attain reading knowledge; practice in oral reading and composition.

LAT 1002. Beginning Latin II. (5 cr. Prereq—Grade of at least [C- or S] in 1001 or #)
Latin grammar/syntax. Graduated readings from Roman authors, including Cicero, Catullus, and Roman comedy.

LAT 1102. Beginning Latin II, Transition. (3.33 cr; A-F only)
Continuation of basic grammar/vocabulary, practice reading/writing. Latin readings, Roman legends.

LAT 1103. Selections from Latin Literature, Transition. (3.33 cr; A-F only)
Prose/poetry. Historical/literary background.

LAT 1111H. Honors Course: Beginning Latin. (3 cr. \$LAT 1001, LAT 3111. Prereq—Concurrent registration required in 1112; regis in honors program or high ability as indicated by high school transcript)
Intensive Latin course covering material usually taught over two semesters. Students must also register for 1112 when taking this class.

LAT 1112H. Honors Course: Beginning Latin, Recitation. (3 cr. Prereq—Concurrent registration in 1111, regis in honors program or high ability as indicated by high school transcript)
Drills and composition exercises. Students must also register for 1111 when taking this class.

LAT 3100. Reading Latin Prose. (3 cr. Prereq—1002 or 1111 or 1112 or 3111 or 3112 or #)
Introduction to reading Latin prose. Selections from Roman authors. Review of grammar/syntax. Follow-up course to intensive Latin or review for students returning to reading Latin after time lapse.

LAT 3111. Intensive Latin. (3 cr. \$LAT 1001, LAT 1111H. Prereq—Concurrent registration in 3112; previous exper in another foreign language desirable)
Intensive Latin course covering material usually taught over two semesters. Undergraduates must also register for 3112 when taking this class.

LAT 3112. Intensive Latin, Recitation. (3 cr. Prereq—Concurrent registration in 3111; previous exper in another foreign language desirable)
Drills and composition exercises. Students must also register for 3111 when taking this course.

LAT 3113. Intermediate Latin Prose. (4 cr. Prereq—Grade of at least [C- or S] in [1002 or 1112H or 3112] or #)
Reading Latin. Reviews elementary grammar, vocabulary, and morphology. Introduction to major themes/issues in Latin literature and Roman culture.

LAT 3114. Augustan Latin Authors. (4 cr. Prereq—3113 or Δ)
Students progress from intermediate to advanced Latin reading while surveying the world of Augustan Rome. Authors include Livy, Virgil, and Ovid.

LAT 3300. Intermediate Latin Poetry. (4 cr [max 8 cr]. Prereq—Grade of at least [C- or S] in 3113 or #)
Readings in Latin poetry. Introduction to Latin Meter. Vergil and Catullus/Ovid offered in alternate years.

LAT 3310. Advanced Undergraduate Latin: History. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
Roman history as the Romans wrote it; selections from Livy, Sallust, Tacitus, or Ammianus.

LAT 3320. Advanced Undergraduate Latin: Belles-Lettres. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
Selections from expository Latin literature (essays, epistles, monographs).

LAT 3330. Advanced Undergraduate Latin: Oratory. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
One or more appropriate authors studied each semester.

LAT 3340. Advanced Undergraduate Latin: Epic/Pastoral. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
One or more appropriate authors studied each semester.

LAT 3350. Advanced Undergraduate Latin: Lyric/Elegiac. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
One or more appropriate authors studied each semester.

LAT 3360. Advanced Undergraduate Latin: Drama. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
One or more appropriate authors studied each semester.

LAT 3370. Advanced Undergraduate Latin: Satire. (3 cr [max 12 cr]. Prereq—3114 or equiv or #)
One or more appropriate authors studied each semester.

LAT 3440. Advanced Undergraduate Latin: Later Latin. (3 cr [max 12 cr]. Prereq—3300 or 3114)
Reading course. Authors of Late Antiquity, Middle Ages, and Renaissance. Topics specified in *Class Schedule*.

LAT 3450. Advanced Undergraduate Latin: Classical Authors. (3 cr [max 12 cr]. Prereq—3114 or Δ)
Readings from various classical Latin authors. Topics specified in *Class Schedule*.

LAT 3951W. Major Project. (4 cr. Prereq—[Greek-Latin or Latin major], three 3xxx Latin courses, #, Δ)
Research project using documents and other sources from the ancient world. Students select project in consultation with a faculty member who directs the research and writing.

LAT 3960H. Honors Course: Advanced Undergraduate Latin Reading. (3 cr [max 12 cr]. Prereq—Regis in honors program or high ability as indicated by transCRIPT)
Student attends Latin 33xx, 3440, or 3450 and does additional work for honors credit.

LAT 3993. Directed Studies. (1-4 cr [max 12 cr]. Prereq—# and Δ)
Guided individual reading or study.

LAT 5012. Latin Prose Composition. (3 cr. Prereq—Grad student or #)
Latin grammar, syntax, diction, and prose style. Graduated exercises in prose composition.

LAT 5032. Text Criticism. (3 cr. Prereq—Grad student or #)
Theory/practice. Elements of paleography and manuscript study. Tools for analyzing a textual apparatus. Constructing a critical edition of a literary text.

LAT 5033. Epigraphy. (3 cr. Prereq—Grad student or #)
Practical/theoretical introduction to Latin epigraphy (study/interpretation of inscriptions). Readings/discuss of epigraphic texts. Focuses on their value as historical documents, as evidence for development of Latin language, and as literary texts.

LAT 5310. Latin Literature: History. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5320. Latin Literature: Epistles and Essays. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5330. Latin Literature: Oratory. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5340. Latin Literature: Epic and Pastoral. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5350. Latin Literature: Lyric and Elegiac Poetry. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5360. Latin Literature: Latin Dramatists. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5370. Latin Literature: Satire. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5380. Latin Literature: Legal Texts. (3 cr [max 12 cr]. Prereq—Grad student or #)
One or more authors.

LAT 5390. Literature: Religious Texts. (3 cr [max 12 cr]. Prereq—Grad student or #)
Reading/discussion of religious texts from Latin antiquity, such as Varro's *Antiquitates Divinae*, Cicero's *De natura deorum*, Apuleius's *Metamorphoses*, or Christian writers (Tertullian, Cyprian, Lactantius, Jerome, Augustine).

LAT 5410. Latin of Late Antiquity. (3 cr [max 12 cr]. Prereq—Grad student or #)
Pagan/Christian Latin literature selected from authors of 3rd to 6th centuries AD. Topics specified in *Class Schedule*.

LAT 5420. Medieval Latin. (3 cr [max 12 cr]. Prereq—Grad student or #)
Literature from 6th to 15th centuries. Authors/genres vary. Topics specified in *Class Schedule*.

LAT 5621. Latin Paleography. (3 cr. Prereq—Grad student or #)
Analysis of various hands used in manuscripts of Latin authors, with attention to date/provenance. Transmission of ancient Latin literature.

LAT 5715. Introduction to the Historical-Comparative Grammar of Greek and Latin. (3 cr. §GRK 5715. Prereq—# or 2 yrs college Greek)
Historical and comparative grammar of Greek and Latin from their Proto-Indo-European origins to the classical norms.

LAT 5717. History of Latin. (3 cr. Prereq—Grad student or #)
Reading/analysis of documents illustrating stylistic registers/evolution of Latin language, from its earliest attestations through Middle Ages.

LAT 5993. Directed Studies. (1-4 cr [max 18 cr]. Prereq—#, Δ)
Guided individual reading or study.

LAT 5994. Directed Research. (1-12 cr [max 20 cr]. Prereq—Grad student or #)
Guided research on original topic chosen by student.

LAT 5996. Directed Instruction. (1-12 cr [max 20 cr]. Prereq—Grad student or #)
Supervised teaching internship.

Latin American Studies (LAS)

Institute of International Studies

College of Liberal Arts

LAS 3019. Hispanic Cultures of Latin America. (3 cr. §ANTH 3019. Prereq—ANTH 1003 or 1005 or #)
Overview of Hispanic cultures from Mexico to South America. Economy, underdevelopment. Family, ritual kinship. Gender, religion, values, ideology, change. Several concepts are introduced to explore continuity/change.

LAS 3114. International Perspectives: U.S.-Mexico Border Cultures. (3 cr. §CHIC 3114, CHIC 5114)
Examines the relations of Mexico and the United States from an international perspective, with a central focus on the cultural interchange in the border lands between the United States and Mexico, using both literary and historical materials.

LAS 3251. Role of Renewable Natural Resources in Developing Countries. (1 cr; A-F only. §ESPM 3251, ESPM 5251)

International perspectives on resource use in developing countries. Integration of natural resource issues with social, economic, and policy considerations. Overviews of agriculture, forestry, agroforestry, non-timber forest products, water resources, certification, and development issues. Latin American case studies.

LAS 3401W. Early Latin America to 1825. (4 cr; A-F only. §HIST 3401W)
Begins with American and Iberian societies before contact. Emphasizes social, cultural, and economic interactions among Native Americans, African slaves, Europeans, and people of mixed race during colonial period.

LAS 3402W. Modern Latin America 1825 to Present. (4 cr. §HIST 3402W)
National and contemporary period 1825 to present, with emphasis on social, cultural, political, and economic change.

LAS 3405. Latin American Women's Lives. (3 cr. §WOST 3405. Prereq—WoSt 1001, WoSt 1002 or WoSt 1003 or #)
An interdisciplinary approach to understanding women's lives in Latin America. Use of ethnography, history, poetry, fiction, and "testimonio" to understand the conditions of women's lives in Latin America.

LAS 3427. History of Cuba and Puerto Rico. (3 cr. §CHIC 3427, HIST 3427)
Historical development of Cuba and Puerto Rico from pre-Columbian times through Spanish conquest to the present. Conquest and colonization, slavery, Hispanic Caribbean society and culture, Operation Bootstrap, Cuban Revolution.

LAS 3441. Chicana/o History to 1900. (3 cr. §CHIC 3444, HIST 3441, HIST 3444)
The history of the Mexican people from the 16th through 19th centuries. Historical theories of colonialism, expansion, economy, assimilation, migration and settlement; race, class and gender, political, social and cultural interaction, and conflict.

LAS 3442. Chicana/o History: 1900 to Present. (3 cr. §CHIC 3442, HIST 3442)
The 20th-century Chicana/o experience: migration, repatriation, the Bracero program, politics, the Chicana/o movement, work, society, and culture.

LAS 3502W. Foundations of Brazilian Culture. (3 cr. §PORT 3502V, PORT 3502W. Prereq—PORT 3003 or equiv)
Emphasis on Brazilian modern society. History, culture (music, art, cinema, literature, intellectual thought, popular culture, media), and social problems (ethnicity, tropical deforestation). Discussions and readings are in Portuguese.

LAS 4121W. Latin America. (3 cr. §GEOG 4121W)
Interplay of natural environment and history in shaping contemporary Latin America. Political ecology of natural resources, food supply and distribution, urbanization and the informal economy, migration, ethnicity, and the role of the state and international agencies in domestic economies.

LAS 4465. Housing in World Perspective. (3 cr; A-F only. Prereq—DHA 2401, DHA 2463 or #)
Evaluation of theories and concepts that allow an understanding of housing policies and housing choices of individuals, families, and households in developed and developing countries.

LAS 4479. Latin American Politics. (3 cr. §LAS 4479, POL 4479, POL 5479. Prereq—POL 1054 or POL 3051 or non-pol sci grad or #)
An overview of Latin American politics and political economy focused on authoritarianism, human rights, and redemocratization; development and economic policy; social movements; ethnicity and race; religion; revolution; U.S.-Latin American relations.

Learning and Academic Skills (LASK)

Department of Educational Psychology

College of Education and Human Development

LASK 1001. Mastering Skills for College Success. (2 cr)
Practical assistance to develop efficient, effective learning/academic performance skills. Improve reading, memorization, test-taking, critical thinking; identify academic and career Learning styles, motivation, life skills, and their relation to successful academic performance.

LASK 1101. Academic Success. (1 cr; S-N only. Prereq—#)
Identifying factors interfering with academic performance, selecting strategies, and establishing a plan to promote academic success. Learning-style, educational goals, life management skills, motivation, attitude.

Liberal Studies (LS)

College of Continuing Education

LS 5100. Liberal Studies Seminar. (1-4 cr [max 24 cr]; A-F only. Prereq—Δ)
Interdisciplinary topics.

LS 5125. Field Experience. (1-8 cr [max 8 cr]; A-F only. Prereq—MLS student or #)
Off-campus observation, experience, and evaluation in interdisciplinary field of study.

LS 5950. Special Topics. (1-4 cr [max 12 cr]; A-F only. Prereq—Δ)
Interdisciplinary topics.

LS 5993. Directed Studies. (1-4 cr [max 15 cr]. Prereq—Grad student, Δ)
Guided individual reading or study.

LS 5994. Directed Research. (1-4 cr [max 15 cr]. Prereq—#)
Tutorial for qualified graduate students.

Linguistics (LING)

Institute of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

LING 1701. Language and Society. (4 cr)
Role of language in human social interaction; linguistic indicators of social status and attitudes; language and sex roles; linguistic ecology; language planning for multilingual communities; implications for education and public policy.

LING 1907W. Freshman Seminar. (3 cr [max 6 cr]. Prereq—Freshman)
Topic specified in Course Guide.

LING 1909W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

LING 3001. Introduction to Linguistics. (4 cr. §LING 3001H, LING 5001)
Phonetics, phonology, morphology, syntax, semantics, and historical-comparative linguistics; language learning and psychology of language; linguistic universals; language in society.

LING 3001H. Honors: Introduction to Linguistics. (4 cr. §LING 3001, LING 5001. Prereq—honors candidate or #)
Phonetics, phonology, morphology, syntax, semantics, historical-comparative linguistics, language learning, psychology of language, linguistic universals, language in society.

LING 3051H. Honors: Thesis. (3 cr. Prereq—Linguistics honors candidate, #)
Supervised planning and research for honors thesis to be completed in 3052.

LING 3052H. Honors: Thesis. (3 cr. Prereq–3051)

Supervised research, writing, and revision for honors thesis begun in 3051.

LING 3101W. Languages of the World. (3 cr. Prereq–3001 or 3001H or 3011 or 5001 or #)

Survey of language families of the world. Classifying languages genetically/typologically. Historical relationships among languages.

LING 3301. Phonetics. (4 cr. \$LING 5301. Prereq–3001 or 3001H or 5001 or concurrent registration 3001 or concurrent registration 3001H or concurrent registration 5001 or #)

Phonetic analysis, transcription of speech. Articulatory/acoustic correlates of speech sounds. Practice transcribing. Emphasizes narrow transcription of human speech. One section focuses on universal phonetics, another focuses on English.

LING 3601. Historical Linguistics. (3 cr. \$LING 5601.

Prereq–3001 or #)

Historical change in phonology, syntax, semantics, and lexicon. Linguistic reconstruction. Genetic relationship among languages.

LING 3707. Ethnic Bilingualism in the United States.

(3 cr. Prereq–Some knowledge of linguistics and a 2nd language helpful)

Social, behavioral, and cognitive aspects of bilingualism; the linguistic experience of American immigrants and ethnic minority groups, especially Asian Americans; attitudes and public policies with regard to linguistic minorities; field experience in bilingual communities.

LING 4002. Linguistic Analysis. (3 cr. Prereq–3001 or 3001H or 5001 or #)

Techniques for analyzing phonological, morphological, and syntactic data from a variety of languages. Discovering, stating, and justifying generalizations. Comparing diverse languages.

LING 4901W. Senior Project. (1 cr; S-N only. Prereq–Ling major, #)

Revision and/or expansion of a paper completed for a linguistics course.

LING 5001. Introduction to Linguistics. (4 cr. \$LING 3001, LING 3001H. Prereq–Grad or #)

Phonetics, phonology, morphology, syntax, semantics, and historical-comparative linguistics; language learning and psychology of language; linguistic universals; language in society.

LING 5005. Applications of Linguistics. (3 cr. Prereq–3001 or 3001H or 3011 or 5001 or #)

Relationships between linguistics and neighboring disciplines. Applications to practical fields such as lexicography, orthography, translation/interpreting, language planning, reading, language teaching, bilingual education, education of the deaf, and correction of language disorders. Computer applications, forensic applications. Topics vary.

LING 5101. Language Types and Linguistic Universals.

(3 cr. Prereq–[[3001 or 3001H or 5001], 5201, 5302] or #) Comparison of languages and language types. Cross-linguistic similarities/universals of language, their explanation.

LING 5105. Field Methods in Linguistics I. (4 cr.

Prereq–5201, 5302 or #)

Techniques for obtaining and analyzing linguistic data from unfamiliar languages through direct interaction with a native speaker.

LING 5106. Field Methods in Linguistics II. (4 cr.

Prereq–5105)

Techniques for obtaining and analyzing linguistic data from unfamiliar languages through direct interaction with a native speaker.

LING 5201. Syntax I. (3 cr. Prereq–3001 or 3001H or 5001 or #)

Syntactic phenomena/constructions in various languages. Principles of grammar construction/evaluation. Syntactic theories as instruments of grammatical analysis.

LING 5202. Syntax II. (3 cr. Prereq–5201)

Foundation in modern syntactic theory. Syntactic phenomena in various languages. Emphasizes syntactic argumentation, development of constraints on grammar formalisms.

LING 5205. Semantics. (3 cr. Prereq–5201 or #)

Analysis of sentence meaning. Semantic properties. Relations such as analyticity, entailment, quantification, and genericity. Philosophical background, formal techniques of semantic analysis, how sentence meaning depends on word meaning, syntax, and context. The role of semantics in grammatical theory.

LING 5206. Linguistic Pragmatics. (3 cr. Prereq–5201 or #)

The analysis of linguistic phenomena in relation to beliefs and intentions of language users; speech act theory, conversational implicature, presupposition, information structure, relevance theory, discourse coherence.

LING 5301. Phonetics. (4 cr. \$LING 3301. Prereq–3001 or 3001H or 5001 or #5001 or #)

Phonetic analysis/transcription of speech. Articulatory/acoustic correlates of speech sounds. Extensive practice transcribing. Emphasizes narrow transcription of human speech. One section focuses on universal phonetics, another focuses on English.

LING 5302. Phonology I. (3 cr. Prereq–3001 or 3001H or 5001 or #)

Concepts/types of information needed for describing patterns in sounds of words, for all speakers of all human languages, including current theoretical frameworks. Extensive practice identifying/analyzing phonological patterns in words of a language.

LING 5303. Phonology II. (3 cr. Prereq–5302 or #)

Phonology of human languages. Preparation for reading papers in the literature and for doing research in phonology.

LING 5461. Conversation Analysis. (3 cr. \$COMM 5461. Prereq–3001 or 3001H or 5001 or #)

Discourse processes. Application of concepts through conversation analysis.

LING 5462. Field Research in Spoken Language. (3 cr. \$COMM 5462. Prereq–5461 or Spch 5461 or #)

Transcribing and analyzing talk and movement related to talk. Applying concepts to recorded conversations.

LING 5501. Introduction to Language Acquisition. (3 cr. Prereq–3001 or 3001H or 5001 or #)

First/second language acquisition.

LING 5505. Introduction to Second Language Acquisition. (3 cr. Prereq–[3001 or 3011 or 5001], course on phonological/grammatical structure of a language)

Research on language and learning processes of second-language learners. Linguistic structure of interlanguage. Cognitive/social factors that influence acquisition of a new language.

LING 5601. Historical Linguistics. (3 cr. \$LING 3601. Prereq–3001 or 3011H or 5001)

Historical change in phonology, syntax, semantics, and lexicon. Linguistic reconstruction. Genetic relationship among languages.

LING 5701. Sociolinguistics. (3 cr. Prereq–3001 or 3001H or 3011 or 5001 or #)

Social determinants of linguistic diversity, variation, and change. Topics may include social and regional dialects, language style/register, style-/code-switching, quantitative study of speech, linguistic/social inequality.

LING 5721. Bilingualism. (3 cr. Prereq–3001 or 3001H or 3011 or 5001 or #)

Sociolinguistic theory/methods in study of bilingualism. Language ecology in multilingual societies. Language and language behavior in bilingual individual. Language in ethnic conflict. Implications for public policy/planning.

LING 5801. Introduction to Computational Linguistics.

(3 cr. Prereq–3001 or 3001H or 3011 or 5001 or #; programming experience helpful) Methods/issues in computer understanding of natural language. Programming languages, their linguistic applications. Lab projects.

LING 5802. Computational Linguistics. (3 cr. Prereq–5801 or #)

Computer processing of natural language. Applications to such areas as speech recognition and information retrieval.

LING 5900. Topics in Linguistics. (1-4 cr [max 12 cr])

Topics vary. See *Class Schedule*.

LING 5931. Morphology and Syntax of Contemporary English. (3 cr. Prereq–3001 or 3001H or 5001 or #)

Linguistic analysis of word/sentence structure of contemporary English. Focuses on data from recorded/written texts.

LING 5932. Topics in the Structure of Modern English.

(3 cr [max 12 cr]. Prereq–[[3001 or 3001H or 5001], [5201 or 5931]] or #)

Aspects of the morphology, syntax, or semantics/pragmatics of modern English. Emphasizes analysis of written or recorded texts. Topics vary.

LING 5993. Directed Study. (1-3 cr [max 10 cr]. Prereq–#, Δ, □)

Directed study for Linguistics.

Management (MGMT)

Department of Strategic Management and Organization

Curtis L. Carlson School of Management

MGMT 1350. Introduction to Business and Business Careers. (3 cr; A-F only)

Organizations as systems, profit centers, and political communities. Current business issues, trends for the future. Concepts applied to other settings. Basic business processes, needs, contexts, problems.

MGMT 3001. Fundamentals of Management. (3 cr; A-F only. Prereq–30 cr)

General aspects/characteristics of organizations and their members. Why people/groups in organizations feel/ behave as they do. Processes/methods that improve behavior/attitudes/effectiveness of organizational members. Organizational member/manager skills. Guest speakers, group presentations, films.

MGMT 3010. Introduction to Entrepreneurship. (4 cr; A-F only)

Fundamentals of entrepreneurship. Career paths, including new business start-ups, franchising, acquisitions (including family business succession), corporate venturing, and entre-preneurial services. Legal structures for new business formation. Aspects of business law/ethics.

MGMT 3014. Topics in International Business, Government, and Society. (4 cr; A-F only)

Selected topics.

MGMT 3040. Understanding the International Environment of Firms: International Business. (3 cr; A-F only. Prereq–3001, CSOM upper div, at least 60 cr)

Theories, frameworks, tools, and facts for understanding the environment of firms in international competition. Main world-level economic flows (trade, investment, finance). How country-/industry-level economic, political, and socio-cultural factors influence behavior/functions of firms in international competition.

MGMT 3040H. Honors: Understanding the International Environment of Firms, International Business. (3 cr. Prereq–3001, CSOM Honors, at least 60 cr)
Theories, frameworks, tools, and facts for understanding the environment of firms in international competition. Main world-level economic flows (trade, investment, finance). How country-/industry-level economic, political, and socio-cultural factors influence behavior/functions of firms in international competition.

MGMT 3070. Topics in Management. (4 cr; A-F only. Prereq–At least 60 cr [completed or in progress])
Selected topics.

MGMT 3080. Topics in Ethics. (4 cr; A-F only. Prereq–At least 60 cr [taken or in progress])
Topics vary with each offering.

MGMT 3090. Topics in Leadership. (4 cr; A-F only. Prereq–At least 60 cr [completed or in progress])
Selected topics.

MGMT 3480. Topics: Natural Resources. (3 cr)
Individual topics related to natural resources.

MGMT 3603. Topics: Environmental Issues. (3 cr. \$ESPM 3603. Prereq–[MATH 1142 or [MATH 1271, MATH 1272]], [APEC 1101 or ECON 1101 or 3261W])
Concepts/issues relating to inventory, subsequent analysis of production systems. Production system from holistic point of view, using term commonly used in industrial ecology: “metabolic system.”

MGMT 3604. Topics: Environmental Issues. (3 cr)
Environmental problems such as climate change, ozone depletion, and loss of biodiversity.

MGMT 4002. Managerial Psychology. (4 cr; A-F only)
Behavioral principles, methods, and skills that underlie and compose dimensions of managerial competence and contribute to managers’ effectiveness in preventing and solving problems within and between individuals and groups; development of human resource skills management needs based partially on experiential exercises.

MGMT 4004V. Honors: Business Policy: Strategy Formulation and Implementation. (3 cr. Prereq–At least 90 cr, CSOM honors, completion of business core courses)
Integrative perspective on overall direction of enterprise. Choice of products/markets, selection of organization structures and management styles. Case analysis: identifying key issues, evaluating options, and making recommendations, under conditions of uncertainty and incomplete information.

MGMT 4004W. Business Policy: Strategy Formulation and Implementation. (3 cr; A-F only. Prereq–90 credits, completion of business core courses)
Integrative perspective on overall direction of the enterprise involving both choice of products and markets and selection of organization structures and management styles; case analysis involving the identification of key issues, evaluation of options, and making recommendations under conditions of uncertainty and incomplete information.

MGMT 4005. Managing the Multinational Business. (4 cr; A-F only. Prereq–BGS 3040)
Structures/strategies of global business. Personnel, technology, and operations in host nations. Challenges unique to management of multinational firm. May include topics such as comparative culture, trade, and ethics.

MGMT 4008. Entrepreneurial Management. (4 cr. Prereq–3001, CSOM upper div)
Assessing opportunities, managing constraints in developing new business. Structuring the venture, perceiving critical issues, obtaining skills needed to succeed. Management, operations, marketing, financial, legal, and competitive issues. Business plan for start-ups, buyouts, franchises, and family firm.

MGMT 4050. Management of Innovation and Change. (2 cr; A-F only. Prereq–3001, CSOM upper div)
Applying theories/research on how new organizational programs, products, and technologies are developed/implemented. Diagnostic skills. How innovation unfolds.

MGMT 4101. Independent Study in Strategic Management and Organization. (1–4 cr [max 4 cr]; A-F only. Prereq–# or Δ)
Students contract with faculty on independent studies.

MGMT 4177. The Business Plan. (2 cr. Prereq–4008, CSOM upper div)
Structure of business plans. Critically analyzing business plans. Formulating an original business plan.

MGMT 5019. Business, Natural Environment, and Global Economy. (2 cr. Prereq–MBA student)
Resource deployment policies that affect the natural environment. Sustainability. Local/global environmental threats, how government policies address these issues. Business strategies/practices that produce “win-win” outcomes.

MGMT 5480. Topics in Natural Resources. (3 cr)
Specific topic for each offering.

Manufacturing Technology (MT)

College of Continuing Education

MT 2999. Manufacturing Technology Credit. (1–20 cr [max 20 cr])
Evaluation for Manufacturing Technology credit.

MT 3111. Elements of Microelectronic Manufacturing. (3 cr. Prereq–Completion of [higher of physics, chemistry, [college algebra or precalculus]] with grade of at least C-, 45 sem crs completed)
Common micro fabrication processes, how they are applied to CMOS manufacturing.

MT 3112. Elements of Micro and Nano Manufacturing Laboratory. (1 cr. Prereq–#3111, student in Dakota County Technical College NanoTech prog)
Basic process steps to make top-down micro- and nano-scaled structures. Oxidation, photolithography, electron beam lithography, chemical vapor deposition, etching, rapid thermal annealing, wet chemical/plasma etching. Students build a test chip containing various micro-mechanical structures.

MT 3121. Thin Films Deposition. (4 cr. Prereq–Completion of [physics, chemistry, [college algebra or precalculus]] with a grade of at least C-, 45 sem crs completed)
Thin film materials such as metals/oxides. Photolithography, methods of deposition. HV/UHV range. Vacuum evaporation, sputtering, chemical vapor deposition.

MT 3131. Introduction to Materials Characterization. (3 cr. Prereq–Completion of [physics, chemistry, [college algebra or precalculus]] with a grade of at least C-, 45 sem crs completed)
Four basic types of characterization methods: electron beam microscopy, optical microscopy/FTIR, proximal probe techniques, x-ray/ion beam scattering. Principles for, and information that can be reliably obtained from, each each technique.

MT 3132. Materials Characterization Lab. (1 cr. Prereq–#3131, 2nd yr student in Dakota County Technical College NanoTech prog)
Hands-on characterization of engineering materials by electron/optical microscopy, atomic force microscopy, x-ray diffraction. Spectroscopic methods, specimen preparation, data collection/analysis, maintaining lab notebook.

MT 3141. Principles and Applications of Bionanotechnology. (3 cr. Prereq–Completion of [physics, chemistry, [college algebra or precalculus]] with a grade of at least C-, 45 sem crs)
Intro to protein, lipid, and nucleic biochemistry. Biomolecule design, production using recombinant DNA technology. Use in nanodevices and nanomaterials. Applications of biological molecules in bionanotechnology. Effects of Brownian motion. Biomolecular surfaces forces. Biomolecule structure alterations due to molecular interaction. Self-assembly.

MT 3142. Nanoparticles and Biotechnology Laboratory. (1 cr. Prereq–#3141; 2nd yr student in Dakota County Technical College NanoTech prog)
Use of practical equipment of detecting particle formation. Performing size measurements, aerosol sampling. Optical/condensation counters. Basic biotech equipment, approaches.

MT 4001. Manufacturing Cost Accounting, Analysis, and Control. (3 cr; A-F only)
Basic accounting concepts. Financial statements. Analysis/control of current assets. Income tax planning. Cost analysis. Standard costs for product costing. Time value of money. Quantifying risk/uncertainty. Utility theory, cost of capital, capital structure. Capital budgeting under capital rationing. Management decisions and investment.

MT 4011. Design of Manufacturing Systems and Simulation. (3 cr; A-F only)
Design/analysis of manufacturing systems: flow lines, assembly systems, cellular manufacturing, flexible manufacturing, automated systems. Control issues in manufacturing systems: facility layout, scheduling, batch sizing, group technology, bottleneck management. Modeling/analysis tools, including computer simulation and operations.

MT 4012. Manufacturing Processes. (3 cr; A-F only)
Description/modeling of commonly used manufacturing processes. Process descriptions, process capabilities/performance, process models relating process parameters to part/process characteristics, process control.

MT 4015. Quality Engineering. (3 cr; A-F only. Prereq–4201)
Statistical, engineering, and management approaches to quality improvement. Economics. Teams and information systems. Problem-solving. Function deployment. Value analysis. Reliability engineering. Design for manufacturability analysis. Experiment design. Statistical control. Process validation/capability. Standards, audits, certification.

MT 4021. Properties of Materials. (3 cr; A-F only)
Classification of materials. Atomic bonding, crystal structures, diffusion, structure/properties of materials. Ceramics, polymers, wood, concrete. Corrosion of materials. Elasticity, plasticity, strengthening mechanisms, failure modes, phase diagrams. Transformations and thermal processing.

MT 4025. Computer Integrated Manufacturing. (3 cr. Prereq–4012, ABUS 4102)
Manufacturing systems as open systems. Manufacturing system design. Information flow and computer networks. Network classification/services, hardware components. Network protocols/architecture applied to product design/manufacturing. Computer software used to simulate system/environment interaction.

MT 4031. Engineering Materials Processing I. (3 cr; A-F only)
Manufacture of products. Manufacturing process. Casting, forming, cutting, sheet-metal working. Theories, practice. Lab.

MT 4032. Engineering Materials Processing II. (3 cr; A-F only)
Computer-Aided-Manufacturing (CAM), joining processes. Processing of non-traditional machining. Surface-finishing processes. Lab.

MT 4041. Fluid Mechanics. (3 cr; A-F only)
Pressure/flow measurements, hydrostatic force, continuity/momentum equations, flow in conduits, velocity distribution, drag force, pump calculations, flow through porous media.

MT 4042. Manufacturing Automation. (3 cr; A-F only)
CNC programming, computer-aided manufacturing (CAM), flexible automations, machining centers, robotics, programmable logic controllers, tooling systems, work holding devices.

MT 4102. Machine Control. (3 cr; A-F only)
Discrete control, digital control logic, sequential and feedback control, programmable logic controllers, stepper motors, other devices. Motion control methods, performance. Control languages/techniques, systems hierarchy.

MT 4105. Machine Tool Design. (3 cr; A-F only)

Precision, drives, economy. Cutting/forming tool materials, geometries, selections, sharpening, and standards. Designin Jigs, fixtures, and pressworking tools.

MT 4201. Statistical Process Control. (3 cr; A-F only)

Control charts, cost of quality, hypothesis testing, process capability, gage capability. Development/evaluation of process control chart systems. Experiment design. Six Sigma for business improvement. Computer analysis methods with Microsoft Excel.

MT 4301. Design and Analysis of Experiments. (3 cr; A-F only)

Introduction to applications of statistical methods used by industrial researchers to aid in solving industrial problems. Analysis of means, analysis of variance, factorial designs, fractional factorial (screening) designs. Industrial case studies. Experience at local industries when available.

MT 4501. Manufacturing Product/System Design I. (3 cr; A-F only)

Student teams develop a part or product from requirement definition through prototype fabrication. Definition of product requirements, development of product/tooling design, analysis, definition of fabrication process, development of quality assurance plan, fabrication of prototype, inspection/testing. Capstone project.

MT 4511. Manufacturing Product/System Design II. (3 cr; A-F only)

Continuation of Manufacturing Product/System Design I. Broader experience in manufacturing product and system design. Focuses on involving other stakeholders in design/production of a product. Products from student's workplace, teamwork. Final report. Capstone project.

Marathi (MAR)

Department of Asian Languages and Literatures

College of Liberal Arts

MAR 1101. Beginning Marathi. (4 cr. \$MAR 3101)

Basic listening, speaking, reading, and writing skills. Emphasis on the development of communicative competence.

MAR 1102. Beginning Marathi. (4 cr. \$MAR 3102)

Prereq-1101 or equiv or #)
Emphasis on developing proficiency in all four language modalities—listening, reading, speaking, and writing.

MAR 3101. Beginning Marathi. (4 cr. \$MAR 1101)

Basic listening, speaking, reading, and writing skills. Emphasis on the development of communicative competence.

MAR 3102. Beginning Marathi. (4 cr. \$MAR 1102)

Prereq-3101 or equiv or #)
Emphasis on developing proficiency in all four language modalities—listening, reading, speaking, and writing.

Mar 3131. Intermediate Marathi. (4 cr. Prereq-1102 or 3102 or equiv or #)

Speaking and comprehension; development of reading and writing skills based on Marathi-language material.

MAR 3132. Intermediate Marathi. (4 cr. Prereq-3131 or equiv or #)

Speaking and comprehension; development of reading and writing skills based on Marathi-language material.

MAR 5992. Directed Readings. (3-5 cr [max 12 cr]. Prereq-#, Δ, □)

Individualized guided reading or study of modern Marathi texts.

MAR 5994. Directed Research. (3-5 cr [max 12 cr]. Prereq-#, Δ, □)

Directed research on a subject agreed upon by student and instructor.

Marketing (MKTG)

Department of Marketing and Logistics
Management

Curtis L. Carlson School of Management

MKTG 3001. Principles of Marketing. (3 cr; A-F only)

Prereq-ECON 1101, at least 60 cr
Introduction to terms, concepts, and skills for analyzing marketing problems. Factors outside the organization affecting its product, pricing, promotion, and distribution decisions. Cases from actual organizations.

MKTG 3010. Marketing Research. (4 cr; A-F only)

Prereq-[3001 or ¶3001], [OMS 2550 or equiv])
Methods for collecting/analyzing data to solve marketing problems. Research design, secondary/primary data collection, sample design, data analysis.

MKTG 4020. Advanced Logistics and Supply Chain

Management. (2 cr; A-F only. Prereq-3001; 3010 recommended)
Flow of physical product through channels of distribution. Linkages between controlling physical flows and major functions of firm (e.g., finance, marketing, operations). Emphasizes organizing interactions between firms, developing an integrative supply chain management strategy.

MKTG 4030. Selling and Sales Management. (4 cr; A-F only)

Prereq-3001; 3010 recommended)
Role of sales manager in developing/implementing sales force plan. Impact of manager's decisions on behavior of individual sales persons.

MKTG 4040. Buyer Behavior. (4 cr; A-F only. Prereq-3001;

3010 recommended)
Application of behavioral sciences to buyer behavior. Perception, memory, affect, learning, persuasion, motivation, behavioral decision theory, social/cultural influences, managerial implications.

MKTG 4050. Integrated Marketing Communications. (4 cr;

A-F only. Prereq-3001; 3010 recommended)
Managing communication aspects of marketing strategy. Advertising, sales promotion, public relations, direct marketing. Setting communications objectives/budgets, media selection, creative strategy, sales promotion techniques.

MKTG 4060. Marketing and Distribution Channels. (4 cr;

A-F only. Prereq-3001; 3010 recommended)
Design/management of channels of distribution in consumer/industrial settings. Interrelationships between marketing institutions in channels of distribution. Logistics, supply chain strategies.

MKTG 4070. International Marketing. (2 cr; A-F only)

Prereq-3001)
Managing international marketing functions. Identifying marketing-based international business opportunities; understanding cultural factors in buyer behavior, constructing and evaluating global and culturally adjusted marketing strategies.

MKTG 4080. Marketing Strategy. (4 cr; A-F only. Prereq-

3001; 3010 recommended)
Determining product markets where organizations should compete based on ability to create/maintain competitive advantage. External environment of business. Marketing strategy.

MKTG 4090. Marketing Topics. (2 cr [max 4 cr]; A-F only)

Prereq-3001)
Selected topics and problems of current interest considered in depth. Class discussion and course projects.

Materials Science (MATS)

Department of Chemical Engineering and
Materials Science

Institute of Technology

MATS 1001. Advances in Chemical Engineering and

Materials Science. (1 cr; S-N only. \$CHEN 1001. Prereq-\$: CHEN 1001; Recommended for [chemical engineering, materials science/engineering] majors)
Introduction to chemical engineering, materials science/engineering. Practical examples of important advances in both fields. Design problems, career opportunities. Lectures, demonstrations, interactive exercises.

MatS 2001. Introduction to the Science of Engineering

Materials. (3 cr. Prereq-CHEM 1021, MATH 1272, PHYS 1301W, 2nd yr II)
Structure-property relationships of engineering materials. Atomic structure and bonding. Crystal structures. Imperfections in solids. Strength of materials, strengthening mechanisms. Phase transformations. Heat treatment/control of microstructures. Materials selection/design. Integrating properties of metals, ceramics, polymers, and composites.

MatS 2002. Introduction to the Science of Engineering

Materials Laboratory. (1 cr. Prereq-2001 or ¶2001)
Lab experiments dealing with mechanical properties of engineering materials. Elastic modulus, tensile strength, creep, impact strength, fracture.

MatS 2601. Introduction to Materials Science (Honors).

(3-4 cr. Prereq-IT lower div honors program)
Physical principles which govern materials properties at the microscopic scale. Starting from the atomic structure and interatomic bonding, it moves to more complex, physical properties: mechanical, electrical, optical, and thermodynamical properties.

MATS 3011. Introduction to Materials Science and

Engineering. (3 cr. Prereq-CHEM 1021, MATH 1272 or 1372, PHYS 1302)
Builds progressively from electrons to atoms to bonding to crystal structures. Defects, X-ray diffraction, phase diagrams, microstructure as a basis for understanding mechanical/electrical properties. Metals, polymers, ceramics, semiconductors, composites.

MATS 3012. Metals and Alloys. (3 cr. Prereq-[3011, [MatS or

CHEN upper div]) or #)
Structure of metals/alloys. Crystal structure/defects (point defects, dislocations, grain boundaries). Microstructure. Properties of metals, especially mechanical properties.

MATS 3041. Industrial Assignment I. (2 cr; A-F only. \$CHEN

3041. Prereq-MatS upper div, completion of required courses in MatS program through fall sem of 3rd yr, GPA of at least 2.80, regis in co-op program)
Industrial work assignment in engineering co-op program. Formal written report.

MATS 3045. Materials Science and Engineering Industrial

Internship. (1-2 cr [max 2 cr])
Industrial internship, three to eight months. Requirements for grade are a proposed plan approved by supervisor and Faculty Internship Co-op Coordinator (FI/CC), and report describing engineering work completed, signed by industrial supervisor prior to submission to faculty internship co-op coordinator.

MATS 3801. Structural Characterization Lab. (2 cr; A-F only)

Prereq-[3011, MatS upper div] or Δ)
Characterization of structure of engineering materials by optical/electron microscopy, atomic force microscopy, x-ray diffraction, spectroscopic method, related methods. Crystallography, defects, microstructure, macromolecular structure. Specimen preparation, data collection/analysis, maintaining laboratory notebook.

MATS 3851W. Materials Properties Lab. (2 cr; A-F only. Prereq—[3011, MatS upper div] or Δ) Characterization of properties of engineering materials. Mechanical, electrical, optical, magnetic, thermal properties. Relationship between properties, materials structure. Specimen preparation. Data collection/analysis, including statistical analysis. Laboratory notebook/report writing.

MATS 4001. Thermodynamics of Materials. (4 cr. Prereq—MatS upper div) Fundamental thermodynamic concepts, 1st, 2nd, 3rd Laws. Behavior of gases, liquids, solids. Phase diagrams. Reaction equilibria involving gases, condensed phases. Use of computer-based thermodynamic program(s). Electrochemistry.

MATS 4002. Mass Transport and Kinetics. (4 cr; A-F only. Prereq—CE 3101, upper div MatS) Mass transport in solids: solid state diffusion, Fick's laws, defects/diffusion mechanisms. Mass transport in fluids: fluid flow, diffusion with convection, mass transfer. Kinetics of chemical reactions and phase transformations. Computer-based problems illustrating applications.

MATS 4013. Electrical and Magnetic Properties of Materials. (3 cr; A-F only. Prereq—[3011, upper div [MatS or ChEn]] or #)

Electronic/magnetic properties of solids. Simple band theory of solids. Free electron theory of conductivity/transport. Optical/dielectric response functions. Elementary theory of magnetism. Electronic devices. Superconductivity. Computer-based problems to illustrate applications.

MATS 4041. Industrial Assignment II. (2 cr; A-F only. \S CHEN 4041. Prereq—3041, completion of required courses in MatS program through fall sem of 4th yr, GPA of at least 2.80, registration in co-op program)

Industrial assignment in engineering co-op program. Application of materials science principles to engineering design problems in an industrial work environment. Formal written report.

MATS 4212. Ceramics. (3 cr. Prereq—[3011, [MatS or ChEn] sr] or #)

Structure of ceramics: crystal structures, non-crystalline (glass) structures, microstructure. Ceramic phase relationships: binary/ternary diagrams. Ceramic properties: thermal, mechanical, electrical, magnetic, optical. Computer applications.

MATS 4214. Polymers. (3 cr. Prereq—[3011, [MatS or ChEn] sr] or #)

Polymer structure-property relations: structure/morphology of crystalline/amorphous state. Crystallization kinetics. Vitrification and glass transition. Mechanical properties, failure, permeability, optical/electrical properties, polymer composites, effect of processing on properties.

MATS 4221. Materials Design and Performance. (4 cr. Prereq—MATS 3012 or #)

Thermal and mechanical processing to control properties, selection of materials for electronic applications and other applications, analysis of costs/performance, analysis of failure in metallurgical structures by use of fracture mechanics methodology. Laboratory experiments involve creep, fracture, fatigue, optical and SEM metallography, surface science analysis, and statistics.

MATS 4301W. Materials Processing. (4 cr. Prereq—MATS 4212 and 4214)

Casting, solidification and plastic forming of metals; powder processing, forming operations, sintering of ceramics; and processing of thermoplastic and thermoset polymers. Computer applications of data collection and reduction. Additional laboratory projects available to graduate students.

MATS 4400. Senior Design Project. (3 cr. Prereq—Sr, [MatS major or CHEN major])

Students work in teams to apply their expertise in materials science/engineering toward a specific project. With guidance from a mentor from industry or a faculty member, each team defines a problem and follows design steps that culminate in a product design.

MATS 4401. Senior Design Thesis I. (2 cr; A-F only. Prereq— \S : 4400; MatS senior, Δ , GPA of at least 3.00, project approval by faculty adviser)

First semester of a 2-semester thesis project. Research and design work directed by faculty member in Department of Chemical Engineering and Materials Science. Written reports are due at midsemester and end of semester. At least one research presentation must be given.

MATS 4402. Senior Design Thesis II. (2 cr; A-F only. Prereq—4401)

Second of 2-semester thesis project. Students continue thesis design project, write thesis, and give final presentation. Lecture portion meets concurrently with 4400.

MATS 4511W. Corrosion and Electrochemistry of Corrosion. (4 cr. Prereq—MATS 3011 or #, upper div IT or grad)

Electrochemical thermodynamics, electrochemical kinetics, theory of aqueous corrosion, theory of high temperature oxidation; specific topics include general corrosion, passivation, pitting, galvanic protection/corrosion, environmental degradation of mechanical properties, corrosion of electronic components, growth of oxide scales by diffusion, materials selection and design. Computers used to collect lab data.

MATS 4512. Corrosion and Electrochemistry of Corrosion. (4 cr. Prereq—MATS 3011 or #, upper div IT or grad)

Electrochemical thermodynamics, electrochemical kinetics, theory of aqueous corrosion, theory of high temperature oxidation; specific topics include general corrosion, passivation, pitting, galvanic protection/corrosion, environmental degradation of mechanical properties, corrosion of electronic components, growth of oxide scales by diffusion, materials selection and design. Computers used to collect lab data.

MATS 4591. Independent Study in Materials Science. (1-3 cr [max 12 cr]. Prereq—Upper div mat sci)

Library, theoretical, laboratory or design studies of scientific or engineering topics in materials science for an individual student. Course content and credits by arrangement with professor. Design credits available if arranged with professor. May be used for upper division Honors Program experience if arranged with professor.

MATS 4593. Directed Study in Materials Science. (1-4 cr [max 12 cr]. Prereq—Upper div MatS)

This course can take two forms: (a) Library, theoretical or design studies of scientific or engineering topics in materials science for an individual or a small group of students. Course content and credits by arrangement with professor. Design credits available if arranged with professor. (b) Special topics course offered only once, e.g., by a visiting professor.

MATS 4594. Directed Research in Materials Science. (1-3 cr [max 12 cr]. Prereq—Upper div mat sci)

Research studies of scientific or engineering topics in materials science for an individual or small group of students. Course content and credits by arrangement with professor. Design credits available if arranged with professor. May be used for upper division Honors Program experience if arranged with professor.

MATS 5221. Introduction to Polymer Chemistry. (3 cr [max 4 cr]; A-F only. \S CHEN 4221, CHEM 8221, CHEN 5221, MATS 8221. Prereq—[3501, CHEM 2302] or #)

Condensation, radical, ionic, emulsion, ring-opening, metal-catalyzed polymerizations. Chain conformation, solution thermodynamics, molecular weight characterization, physical properties.

MATS 5223W. Polymer Laboratory. (2 cr. \S CHEN 4223W. Prereq—4214 or 5221 or CHEN 4214 or CHEM 5221 or 8221 or #)

Synthesis, characterization, and physical properties of polymers. Free radical, condensation, emulsion, anionic polymerization. Infrared spectroscopy/gel permeation chromatography. Viscoelasticity, rubber elasticity, crystallization.

MATS 5517. Electron Microscopy. (3 cr; A-F only)

Transmission electron microscope, scattering and diffraction, electron sources, lenses, apertures and resolution, specimen preparation, diffraction patterns, kikuchi diffraction, planar defects, strain fields, high resolution imaging, X-ray spectrometry.

MATS 5518. Imaging and Diffraction in the Scanning Electron Microscope. (1 cr; A-F only. Prereq—#)

Theory/practice of scanning electron microscopy. Classroom sessions cover how instrument works, best-use practices. Practical sessions allow students to hone skills.

MATS 5519. Basic Transmission Electron Microscopy. (1 cr; A-F only. Prereq—#)

Theory/practice of transmission electron microscope. Classroom sessions cover how instrument works, best-use practices. Practical sessions allow students to hone skills.

MATS 5520. Basic Analytical Electron Microscopy. (1 cr; A-F only. Prereq—5518, 5119)

Theory/practice of analytical electron microscopy. Classroom sessions cover techniques, best-use practices. Practical sessions allow students to hone skills.

MATS 5521. Thin Films and Interfaces. (3 cr. Prereq—IT upper div or grad, MATS 4013 or #)

Fundamentals of vacuum science; vapor pressures and thin film deposition processes (physical and chemical vapor deposition, sputtering, laser ablation); thermodynamics and kinetics of thin film growth; epitaxy; film stability and reactions; structure-property relationship; multilayers and diffusion barriers; characterization techniques to include photon, electron, and ion spectroscopies. Computer-based homework problems.

MATS 5531. Electrochemical Engineering. (3 cr. \S CHEN 5531. Prereq—MATS 3011 or #, upper div IT or grad)

Fundamentals of electrochemical engineering. Topics include electrochemical mass transfer electrokinetics, thermodynamics of cells, modern sensors, formation of thin films and microstructured materials. Computer-based problems will be assigned.

Mathematics (MATH)

School of Mathematics

Institute of Technology

MATH 1001. Excursions in Mathematics. (3 cr. Prereq—3 yrs high school math or placement exam or grade of at least C- in GC 0731)

Breadth of mathematics, its nature/applications. Power of abstract reasoning.

MATH 1008. Trigonometry. (2.67 cr; A-F only. Prereq—Plane geometry, two yrs high school algebra [or C or better in GC 0731])

Analytic trigonometry, identities, equations, properties of trigonometric functions, right/oblique triangles.

MATH 1031. College Algebra and Probability. (3 cr. Prereq—3 yrs high school math or grade of at least C- in GC 0731; Credit will not be granted if credit has been received for: 1051, 1151, 1155)

Algebra, analytic geometry explored in greater depth than is usually done in three years of high school mathematics. Additional topics from combinations, permutations, probability.

MATH 1038. College Algebra and Probability Submodule. (1 cr; A-F only. Prereq—1051 or 1151 or 1155)

For students who need probability/permutations/combinations portion of 1031. Meets with 1031, has same grade/work requirements.

MATH 1051. Precalculus I. (3 cr. Prereq—3 yrs high school math or placement exam or grade of at least C- in GC 0731; Credit will not be granted if credit has been received for: 1031, 1151)

Algebra, analytic geometry, exponentials, logarithms, beyond usual coverage found in three-year high school mathematics program.

MATH 1131. Finite Mathematics. (3 cr. Prereq—3 1/2 yrs high school math or grade of at least C- in [1031 or 1051]) Financial mathematics, probability, linear algebra, linear programming, Markov chains, some elementary computer programming.

MATH 1142. Short Calculus. (4 cr. \$MATH 1271, MATH 1281, MATH 1371, MATH 1571H. Prereq—3 1/2 yrs high school math or grade of at least C- in [1031 or 1051]) Derivatives, integrals, differential equations, partial derivatives, maxima/minima of functions of several variables covered with less depth than full calculus. No trigonometry included.

MATH 1143. Introduction to Advanced Mathematics. (4 cr; A-F only. Prereq—1142 or 1272 or 1372 or #; recommended especially for students in [social/biological sciences, business]) Topics that are covered in more depth in 2243 and 2263, plus probability theory. Matrices, eigenvectors, conditional probability, independence, distributions, basic statistical tools, linear regression. Linear differential equations and systems of differential equations. Multivariable differentiability and linearization.

MATH 1151. Precalculus II. (3 cr. Prereq—3 1/2 yrs high school math or placement exam or grade of at least C- in [1031 or 1051]; Credit will not be granted if credit has been received for: 1155)

Algebra, analytic geometry, trigonometry, complex numbers, beyond usual coverage found in three-year high school mathematics program.

MATH 1155. Intensive Precalculus. (5 cr. Prereq—3 yrs high school math or placement exam or grade of at least C- in GC 0731; Credit will not be granted if credit has been received for: 1031, 1051, 1151)

Algebra, analytic geometry, exponentials, logarithms, trigonometry, complex numbers, beyond usual coverage found in three-year high school mathematics program. One semester version of 1051-1151.

MATH 1271. Calculus I. (4 cr. \$MATH 1142, MATH 1281, MATH 1371, MATH 1571H. Prereq—4 yrs high school math including trig or placement test or grade of at least C- in 1151 or 1155) Differential calculus of functions of a single variable. Introduction to integral calculus of a single variable, separable differential equations. Applications: max-min, related rates, area, volume, arc-length.

MATH 1272. Calculus II. (4 cr. \$MATH 1252, MATH 1282, MATH 1372, MATH 1572H. Prereq—[1271 or equiv] with grade of at least C-) Techniques of integration. Calculus involving transcendental functions, polar coordinates. Taylor polynomials, vectors/curves in space, cylindrical/spherical coordinates.

MATH 1281. Calculus with Biological Emphasis I. (4 cr. \$MATH 1142, MATH 1271, MATH 1371, MATH 1571H. Prereq—[[four yrs high school math including trigonometry] or [grade of at least C- in [1151 or 1155]] or placement exam], [instr or o]) Differential calculus of single-variable functions, basics of integral calculus. Applications emphasizing biological sciences.

MATH 1282. Calculus With Biological Emphasis II. (4 cr. \$MATH 1252, MATH 1272, MATH 1372, MATH 1572H. Prereq—[1271 or 1281 or 1371] with grade of at least C-) Techniques/applications of integration, differential equations/systems, matrix algebra, basics of multivariable calculus. Applications emphasizing biology.

MATH 1371. IT Calculus I. (4 cr. \$MATH 1142, MATH 1271, MATH 1281, MATH 1571H. Prereq—IT, background in [precalculus, geometry, visualization of functions/graphs], #; familiarity with graphing calculators recommended) Differentiation of single-variable functions, basics of integration of single-variable functions. Applications: max-min, related rates, area, curve-sketching. Emphasizes use of calculator, cooperative learning.

MATH 1372. IT Calculus II. (4 cr. \$MATH 1252, MATH 1272, MATH 1282, MATH 1572H. Prereq—IT, grade of at least C- in 1371) Techniques of integration. Calculus involving transcendental functions, polar coordinates, Taylor polynomials, vectors/curves in space, cylindrical/spherical coordinates. Emphasizes use of calculators, cooperative learning.

MATH 1461H. Honors Calculus IA for Secondary Students. (2 cr. Prereq—High school student, #) Accelerated honors sequence. Foundations of calculus. Single variable calculus through differentiation, applications.

MATH 1462H. Honors Calculus IB for Secondary Students. (3 cr. Prereq—1461H) Accelerated honors sequence. Theory/techniques of integration. Applications. Introduction to parametric equations and polar coordinates.

MATH 1473H. Honors Calculus IIA for Secondary Students. (2 cr. Prereq—1462H) Accelerated honors sequence. Differential equations, sequence/series. Linear algebra.

MATH 1474H. Honors Calculus IIB for Secondary Students. (3 cr. Prereq—1473H) Accelerated honors sequence. Linear Algebra from geometric viewpoint. First-order systems of differential equations.

MATH 1571H. Honors Calculus I. (4 cr [max 5 cr]. \$MATH 1142, MATH 1271, MATH 1281, MATH 1371. Prereq—IT Honors office approval) Differential/integral calculus of functions of a single variable. Emphasizes hard problem-solving rather than theory.

MATH 1572H. Honors Calculus II. (4 cr [max 5 cr]. \$MATH 1252, MATH 1272, MATH 1282, MATH 1372. Prereq—Grade of at least C- in 1571, IT Honors Office approval; parts of this sequence may be taken for or by students who have taken non-honors calc classes) Continuation of 1571. Infinite series, differential calculus of several variables, introduction to linear algebra.

Math 2001. Actuarial Science Seminar. (1 cr; S-N only. Prereq—1272 or equiv) Actuarial science as a subject and career. Guest lectures by actuaries. Resume preparation and interviewing skills. Review and practice for actuarial exams.

Math 2066. Elementary Differential Equations. (1-4 cr [max 4 cr]) Not taught: merely provides credit for transfer students who have taken a sophomore-level differential equations class that does not contain enough linear algebra to qualify for credit for 2243.

Math 2142. Elementary Linear Algebra. (1-4 cr; A-F only) Not taught: merely provides credit for transfer students who have taken a sophomore-level linear algebra course that does not contain enough differential equations to qualify for credit for 2243.

Math 2243. Linear Algebra and Differential Equations. (4 cr. \$MATH 2373. Prereq—1272 or 1282 or 1372 or 1572) Linear algebra: basis, dimension, matrices, eigenvalues/eigenvectors. Differential equations: first-order linear, separable; second-order linear with constant coefficients; linear systems with constant coefficients.

Math 2263. Multivariable Calculus. (4 cr. \$MATH 2374, MATH 2573H, MATH 3251. Prereq—1272 or 1372 or 1572) Derivative as a linear map. Differential/integral calculus of functions of several variables, including change of coordinates using Jacobians. Line/surface integrals. Gauss, Green, Stokes Theorems.

Math 2283. Sequences, Series, and Foundations. (3 cr. \$MATH 3283W. Prereq—[[2243 or 2263 or 2373 or 2374]) Introduction to mathematical reasoning used in advanced mathematics. Elements of logic. Mathematical induction. Real number system. General, monotone, recursively defined sequences. Convergence of infinite series/sequences. Taylor's series. Power series with applications to differential equations. Newton's method.

Math 2373. IT Linear Algebra and Differential Equations. (4 cr. \$MATH 2243. Prereq—[1272 or 1282 or 1372 or 1572], IT) Linear algebra: basis, dimension, eigenvalues/eigenvectors. Differential Equations: linear equations/systems, phase space, forcing/resonance, qualitative/numerical analysis of nonlinear systems, Laplace transforms. Emphasizes use of computer technology.

Math 2374. IT Multivariable Calculus and Vector Analysis. (4 cr. \$MATH 2263, MATH 2573H, MATH 3251. Prereq—[1272 or 1282 or 1372 or 1572], IT) Derivative as a linear map. Differential/integral calculus of functions of several variables, including change of coordinates using Jacobians. Line/surface integrals. Gauss, Green, Stokes theorems. Emphasizes use of computer technology.

Math 2472H. Honors Calculus IIIA for Secondary Students. (3 cr. Prereq—1474H) Accelerated honors sequence for selected mathematically talented high school students. The geometry of IR^2 and IR^3 . Vectors and vector functions. Multivariable calculus through differentiation using linear algebra.

Math 2473H. Honors Calculus IIIB for Secondary Students. (3 cr. Prereq—2472H) Accelerated honors sequence. Integration in multivariable calculus using linear algebra. Vector Analysis. Topics from differential equations.

Math 2474H. Advanced Topics for Secondary Students. (3 cr. Prereq—2473H) Topics may include linear algebra, combinatorics, advanced differential equations, probability/statistics, numerical analysis, dynamical systems, topology/geometry. Emphasizes concepts/explorations.

Math 2573H. Honors Calculus III. (4 cr [max 5 cr]. \$MATH 2263, MATH 2374, MATH 3251. Prereq—1572 or IT Honors office approval) Integral calculus of several variables. Vector analysis, including theorems of Gauss, Green, Stokes.

Math 2574H. Honors Calculus IV. (4 cr. Prereq—[2573 or equiv], IT Honors office approval) Advanced linear algebra, differential equations. Additional topics as time permits.

Math 2582H. Honors Calculus II: Advanced Placement. (5 cr; A-F only. Prereq— Δ) First semester of integrated three semester sequence covering infinite series, multivariable calculus (including vector analysis with Gauss, Green and Stokes theorems, linear algebra (with vector spaces), ODE, and introduction to complex analysis. Material is covered at a faster pace and at a somewhat deeper level than the regular honors sequence.

Math 2583H. Honors Calc 3 - Adv Placement. (5 cr; A-F only. Prereq—2582H or #) Second semester of three-semester sequence. Infinite series. Multivariable calculus including vector analysis with Gauss, Green, and Stokes theorems. Linear algebra (with vector spaces), ODE, and introduction to complex analysis. Material is covered at faster pace and deeper level than in regular honors sequence.

Math 2999. Special Exam. (1 cr) Special exam.

MATH 3113. Topics in Elementary Mathematics I. (4 cr. Prereq—[Grade of at least C- in 1031] or placement exam) Arithmetic/geometric sequences. Counting, building on techniques from college algebra. Graph theory. Integers, rational numbers; emphasizes aspects related to prime factorization. Modular arithmetic with applications.

MATH 3116. Topics in Elementary Math II: Short Course. (2 cr; A-F only. Prereq—Grade of at least C- in 3113) Probability/Statistics, vector geometry, real/complex numbers. Meets during first half of semester only.

MATH 3118. Topics in Elementary Mathematics II. (4 cr. Prereq—Grade of at least C- in 3113) Probability/statistics, vector geometry, real/complex numbers, finite fields building on previously learned modular arithmetic, trees.

MATH 3283W. Sequences, Series, and Foundations:

Writing Intensive. (4 cr. \$MATH 2283. Prereq—[2243 or 2263 or 2373 or 2374])

Introduction to reasoning used in advanced mathematics courses. Logic, mathematical induction, real number system, general/monotone/recursively defined sequences, convergence of infinite series/sequences, Taylor's series, power series with applications to differential equations, Newton's method. Writing-intensive component.

MATH 3584H. Honors Calculus IV: Advanced Placement.

(5 cr. Prereq—[2583 or equiv], IT Honors office approval) Advanced linear algebra, differential equations. Introduction to complex analysis.

MATH 3592H. Honors Mathematics I. (5 cr; A-F only.

Prereq— Δ ; for students with mathematical talent)

First semester of three-semester sequence. Focuses on multivariable calculus at deeper level than regular calculus offerings. Rigorous introduction to sequences/series. Theoretical treatment of multivariable calculus. Strong introduction to linear algebra.

MATH 3593H. Honors Mathematics II. (5 cr; A-F only.

Prereq—3592H or #)

Second semester of three-semester sequence. Focuses on multivariable calculus at deeper level than regular calculus offerings. Rigorous introduction to sequences/series. Theoretical treatment of multivariable calculus. Strong introduction to linear algebra.

MATH 4005. Calculus Refresher. (4 cr; A-F only. Prereq— Δ)

Review of first-year calculus. Functions of one variable. Limits. Differentiation/integration of functions of one variable. Some applications, including max-min, related rates. Volume and surface area of solids of revolution. Vectors/curves in the plane and in space.

MATH 4065. Theory of Interest. (3 cr. Prereq—1272 or 1372 or 1572; primarily for [mathematics, business] majors interested in actuarial science)

Time value of money. Annuities, sinking funds, bonds, similar items.

MATH 4113. Topics in Elementary Mathematics I. (4 cr.

Prereq—[Grade of at least C- in 1031] or placement exam) Arithmetic/geometric sequences. Counting, building on techniques from college algebra. Graph Theory. Integers, rational numbers; emphasizes aspects related to prime factorization. Modular arithmetic with applications. Grading standard one-third higher than 3113.

MATH 4116. Topics in Elementary Math II: Short Course.

(2 cr; A-F only. Prereq—Grade of at least C- in 4113) Probability/Statistics, vector geometry, real/complex numbers. Meets during first half of semester only. Grading standard one-third higher than 3116.

MATH 4118. Topics in Elementary Mathematics II. (4 cr.

Prereq—Grade of at least C- in 4113)

Probability/statistics, vector geometry, real/complex numbers, finite fields building on previously learned modular arithmetic, trees. Grading standard one-third higher than 3118.

MATH 4151. Elementary Set Theory. (3 cr. Prereq—One soph math course or #)

Basic properties of operations on sets, cardinal numbers, simply and well-ordered sets, ordinal numbers, axiom of choice, axiomatics.

MATH 4152. Elementary Mathematical Logic. (3 cr. \$MATH

5165. Prereq—one soph math course or #)

Propositional logic. Predicate logic: notion of a first order language, a deductive system for first order logic, first order structures, Godel's completeness theorem, axiom systems, models of formal theories.

MATH 4242. Applied Linear Algebra. (4 cr. \$MATH 4457.

Prereq—2243 or 2373 or 2573)

Systems of linear equations, vector spaces, subspaces, bases, linear transformations, matrices, determinants, eigenvalues, canonical forms, quadratic forms, applications.

MATH 4281. Introduction to Modern Algebra. (4 cr.

Prereq—2283 or 3283 or #)

Equivalence relations, greatest common divisor, prime decomposition, modular arithmetic, groups, rings, fields, Chinese remainder theorem, matrices over commutative rings, polynomials over fields.

MATH 4428. Mathematical Modeling. (4 cr. Prereq—2243 or 2373 or 2573)

Modeling techniques for analysis/decision-making in industry. Optimization (sensitivity analysis, Lagrange multipliers, linear programming). Dynamical modeling (steady-states, stability analysis, eigenvalue methods, phase portraits, simulation). Probabilistic methods (probability/statistical models, Markov chains, linear regression, simulation).

MATH 4457. Methods of Applied Mathematics I. (4 cr.

\$MATH 4242. Prereq—[2243 or 2373 or 2573], [2263 or 2374 or 2574])

Vector spaces, minimization principles, least squares approximation, orthogonal bases, linear functions, linear systems of ordinary differential equations. Applications include statics/dynamics of electrical circuits, mechanical structures. Stability/resonance, approximation/interpolation of data. Numerical methods and geometry.

MATH 4458. Methods of Applied Mathematics II. (4 cr.

Prereq—4457)

Boundary value problems, partial differential equations, complex variables, dynamical systems, calculus of variations, numerical methods. Green's functions, delta functions, Fourier series/integrals, wavelets, conformal mapping, finite elements/differences. Applications: fluid/continuum mechanics, heat flow, signal processing, quantum mechanics.

MATH 4512. Differential Equations with Applications. (3 cr.

Prereq—2243 or 2373 or 2573)

Laplace transforms, series solutions, systems, numerical methods, plane autonomous systems, stability.

MATH 4567. Applied Fourier Analysis. (4 cr. Prereq—2243 or 2373 or 2573)

Fourier series, integral/transform. Convergence. Fourier series, transform in complex form. Solution of wave, heat, Laplace equations by separation of variables. Sturm-Liouville systems, finite Fourier, fast Fourier transform. Applications. Other topics as time permits.

MATH 4606. Advanced Calculus. (4 cr. Prereq—[2263 or 2374 or 2573], [2283 or 2574 or 3283 or #]; Credit will not be granted if credit has been received for: 5615)

Axioms for the real numbers. Techniques of proof for limit theorems, continuity, uniform convergence. Rigorous treatment of differential/integral calculus for single-/multi-variable functions.

MATH 4653. Elementary Probability. (4 cr. Prereq—[2263 or 2374 or 2573]; [2283 or 2574 or 3283] recommended)

Probability spaces, distributions of discrete/continuous random variables, conditioning. Basic theorems, calculational methodology. Examples of random sequences. Emphasizes problem-solving.

MATH 4707. Introduction to Combinatorics and Graph

Theory. (4 cr. Prereq—2243, [2283 or 3283]; Credit will not be granted if credit has been received for: 5705, 5707)

Existence, enumeration, construction, algorithms, optimization. Pigeonhole principle, bijective combinatorics, inclusion-exclusion, recursions, graph modeling, isomorphism. Degree sequences and edge counting. Connectivity, Eulerian graphs, trees, Euler's formula, network flows, matching theory. Emphasizes mathematical induction as proof technique.

MATH 4990. Topics in Mathematics. (1-4 cr [max 12 cr])**MATH 4991. Independent Study.** (1-4 cr [max 12 cr])**MATH 4992. Directed Reading.** (1-4 cr [max 12 cr])**MATH 4993. Directed Study.** (1-4 cr [max 12 cr])

MATH 4995. Senior Project for CLA. (1 cr; A-F only. Prereq—2 sem of upper div math, Δ)

Directed study. May consist of paper on specialized area of math or original computer program or other approved project. Covers some math that is new to student. Scope/topic vary with instructor.

MATH 4997W. Senior project (Writing Intensive). (1 cr [max 2 cr]; A-F only. Prereq—2 sem upper div math, Δ)

Directed study. A 10-15 page paper on a specialized area, including some math that is new to student. At least two drafts of paper given to instructor for feedback before final version. Student keeps journal of preliminary work on project. Scope/topic vary with instructor.

MATH 5067. Actuarial Mathematics I. (4 cr. Prereq—4065,

[one sem [4xxx or 5xxx] [probability or statistics] course])

Future lifetime random variable, survival function. Insurance, life annuity, future loss random variables. Net single premium, actuarial present value, net premium, net reserves.

MATH 5068. Actuarial Mathematics II. (4 cr. Prereq—5067)

Multiple decrement insurance, pension valuation. Expense analysis, gross premium, reserves. Problem of withdrawals. Regulatory reserving systems. Minimum cash values. Additional topics at instructor's discretion.

MATH 5075. Mathematics of Options, Futures, and

Derivative Securities I. (4 cr. Prereq—Two yrs calculus, basic computer skills)

Mathematical background (e.g., partial differential equations, Fourier series, computational methods, Black-Scholes theory, numerical methods—including Monte Carlo simulation). Interest-rate derivative securities, exotic options, risk theory. First course of two-course sequence.

MATH 5076. Mathematics of Options, Futures, and

Derivative Securities II. (4 cr; A-F only. Prereq—5075)

Mathematical background such as partial differential equations, Fourier series, computational methods, Black-Scholes theory, numerical methods (including Monte Carlo simulation), interest-rate derivative securities, exotic options, risk theory.

MATH 5165. Mathematical Logic I. (4 cr. \$MATH 4152.

Prereq—2283 or 3283 or PHIL 5201 or CSCI course in theory of algorithms or #)

Theory of computability: notion of algorithm, Turing machines, primitive recursive functions, recursive functions, Kleene normal form, recursion theorem. Propositional logic.

MATH 5166. Mathematical Logic II. (4 cr. Prereq—5165)

First-order logic: provability/truth in formal systems, models of axiom systems, Godel's completeness theorem. Godel's incompleteness theorem: decidable theories, representability of recursive functions in formal theories, undecidable theories, models of arithmetic.

MATH 5248. Cryptology and Number Theory. (4 cr. Prereq—2

sems soph math)

Classical cryptosystems. One-time pads, perfect secrecy. Public key ciphers: RSA, discrete log. Euclidean algorithm, finite fields, quadratic reciprocity. Message digest, hash functions. Protocols: key exchange, secret sharing, zero-knowledge proofs. Probabilistic algorithms: pseudoprimes, prime factorization. Pseudo-random numbers. Elliptic curves.

MATH 5251. Error-Correcting Codes, Finite Fields,

Algebraic Curves. (4 cr. Prereq—2 sems soph math)

Information theory: channel models, transmission errors. Hamming weight/distance. Linear codes/fields, check bits. Error processing: linear codes, Hamming codes, binary Golay codes. Euclidean algorithm. Finite fields, Bose-Chaudhuri-Hocquenghem codes, polynomial codes, Goppa codes, codes from algebraic curves.

MATH 5285H. Honors: Fundamental Structures of Algebra I. (4 cr. Prereq—[2243 or 2373 or 2573], [2283 or 2574 or 3283])

Review of matrix theory, linear algebra. Vector spaces, linear transformations over abstract fields. Group theory, including normal subgroups, quotient groups, homomorphisms, class equation, Sylow's theorems. Specific examples: permutation groups, symmetry groups of geometric figures, matrix groups.

MATH 5286H. Honors: Fundamental Structures of Algebra II. (4 cr. Prereq—5285)

Ring/module theory, including ideals, quotients, homomorphisms, domains (unique factorization, euclidean, principal ideal), fundamental theorem for finitely generated modules over euclidean domains, Jordan canonical form. Introduction to field theory, including finite fields, algebraic/transcendental extensions, Galois theory.

MATH 5335. Geometry I. (4 cr. Prereq—[2243 or 2373 or 2573], [12263 or 12374 or 12574])

Advanced two-dimensional Euclidean geometry from a vector viewpoint. Theorems/problems about triangles/circles, isometries, connections with Euclid's axioms. Hyperbolic geometry, how it compares with Euclidean geometry.

MATH 5336. Geometry II. (4 cr. Prereq—5335)

Projective geometry, including: relation to Euclidean geometry, finite geometries, fundamental theorem of projective geometry. N-dimensional Euclidean geometry from a vector viewpoint. Emphasizes $N \geq 3$, including: polyhedra, spheres, isometries.

MATH 5345. Introduction to Topology. (4 cr. Prereq—[2263 or 2374 or 2573], [12283 or 12574 or 13283])

Set theory. Euclidean/metric spaces. Basics of general topology, including compactness/connectedness.

MATH 5378. Differential Geometry. (4 cr. Prereq—[2263 or 2374 or 2573], [2243 or 2373 or 2574]; [2283 or 3283] recommended)

Basic geometry of curves in plane and in space, including Frenet formula, theory of surfaces, differential forms, Riemannian geometry.

MATH 5385. Introduction to Computational Algebraic Geometry. (4 cr. Prereq—[2263 or 2374 or 2573], [2243 or 2373 or 2574])

Geometry of curves/surfaces defined by polynomial equations. Emphasizes concrete computations with polynomials using computer packages, interplay between algebra and geometry. Abstract algebra presented as needed.

MATH 5445. Mathematical Analysis of Biological Networks. (4 cr. Prereq—Linear algebra, differential equations)

Development/analysis of models for complex biological networks. Examples taken from signal transduction networks, metabolic networks, gene control networks, and ecological networks.

MATH 5467. Introduction to the Mathematics of Image and Data Analysis. (4 cr. Prereq—[2243 or 2373 or 2573], [2283 or 2574 or 3283 or #]; [2263 or 2374], 4567) recommended)

Background theory/experience in wavelets. Inner product spaces, operator theory, Fourier transforms applied to Gabor transforms, multi-scale analysis, discrete wavelets, self-similarity. Computing techniques.

MATH 5481. Mathematics of Industrial Problems I.

(4 cr. Prereq—[2243 or 2373 or 2573], [2263 or 2374 or 2574], familiarity with some programming language) Topics in industrial math, including crystal precipitation, air quality modeling, electron beam lithography. Problems treated both theoretically and numerically.

MATH 5482. Mathematics of Industrial Problems II.

(4 cr. Prereq—[2243 or 2373 or 2573], [2263 or 2374 or 2574], familiarity with some programming language) Topics in industrial math, including color photography, catalytic converters, photocopying.

MATH 5485. Introduction to Numerical Methods I.

(4 cr. Prereq—[2243 or 2373 or 2573], familiarity with some programming language) Solution of nonlinear equations in one variable. Interpolation, polynomial approximation, numerical integration/differentiation, numerical solution of initial-value problems.

MATH 5486. Introduction To Numerical Methods II. (4 cr. Prereq—5485)

Direct/iterative methods for solving linear systems, approximation theory, methods for eigenvalue problems, methods for systems of nonlinear equations, numerical solution of boundary value problems for ordinary differential equations.

MATH 5487. Computational Methods for Differential and Integral Equations in Engineering and Science I. (4 cr. Prereq—4242)

Numerical methods for elliptic partial differential equations, integral equations of engineering and science. Methods include finite element, finite difference, spectral, boundary integral.

MATH 5488. Computational Methods for Differential and Integral Equations in Engineering and Science II. (4 cr. Prereq—5487)

Numerical methods for time-dependent partial differential equations of engineering/science. Methods include finite element, finite difference, spectral, boundary integral. Applications to fluid flow, elasticity, electromagnetism.

MATH 5525. Introduction to Ordinary Differential Equations. (4 cr. Prereq—[2243 or 2373 or 2573], [2283 or 2574 or 3283])

Ordinary differential equations, solution of linear systems, qualitative/numerical methods for nonlinear systems. Linear algebra background, fundamental matrix solutions, variation of parameters, existence/uniqueness theorems, phase space. Rest points, their stability. Periodic orbits, Poincaré-Bendixon theory, strange attractors.

MATH 5535. Dynamical Systems and Chaos. (4 cr. Prereq—[2243 or 2373 or 2573], [2263 or 2374 or 2574])

Dynamical systems theory. Emphasizes iteration of one-dimensional mappings. Fixed points, periodic points, stability, bifurcations, symbolic dynamics, chaos, fractals, Julia/Mandelbrot sets.

MATH 5583. Complex Analysis. (4 cr. Prereq—2 sems soph math [including [2263 or 2374 or 2573], [2283 or 3283]] recommended)

Algebra, geometry of complex numbers. Linear fractional transformations. Conformal mappings. Holomorphic functions. Theorems of Abel/Cauchy, power series. Schwarz' lemma. Complex exponential, trig functions. Entire functions, theorems of Liouville/Morera. Reflection principle. Singularities, Laurent series. Residues.

MATH 5587. Elementary Partial Differential Equations I.

(4 cr. Prereq—[2243 or 2373 or 2573], [2263 or 2374 or 2574]) Emphasizes partial differential equations w/physical applications, including heat, wave, Laplace's equations. Interpretations of boundary conditions. Characteristics, Fourier series, transforms, Green's functions, images, computational methods. Applications include wave propagation, diffusions, electrostatics, shocks.

MATH 5588. Elementary Partial Differential Equations II. (4 cr [max 400 cr]; A-F only. Prereq—[2243 or 2373 or 2573], [2263 or 2374 or 2574], 5587) or #)

Heat, wave, Laplace's equations in higher dimensions. Green's functions, Fourier series, transforms. Asymptotic methods, boundary layer theory, bifurcation theory for linear/nonlinear PDEs. Variational methods. Free boundary problems. Additional topics as time permits.

MATH 5594H. Honors Mathematics - Topics. (4 cr [max 12 cr]; A-F only. Prereq—[3593H with grade of at least B, experience in writing proofs] or Δ ; intended for mathematically-talented students with proven achievement in theoretical mathematics courses)

Topics vary depending on interests of instructor. Theoretical treatment of chosen topic.

MATH 5615H. Honors: Introduction to Analysis I. (4 cr. Prereq—[2243 or 2373], [2263 or 2374], [2283 or 3283]) or 2574)

Axiomatic treatment of real/complex number systems. Introduction to metric spaces: convergence, connectedness, compactness. Convergence of sequences/series of real/complex numbers, Cauchy criterion, root/ratio tests. Continuity in metric spaces. Rigorous treatment of differentiation of single-variable functions, Taylor's Theorem.

MATH 5616H. Honors: Introduction to Analysis II. (4 cr. Prereq—5615)

Rigorous treatment of Riemann-Stieltjes integration. Sequences/series of functions, uniform convergence, equicontinuous families, Stone-Weierstrass Theorem, power series. Rigorous treatment of differentiation/integration of multivariable functions. Implicit Function Theorem, Stokes' Theorem. Additional topics as time permits.

MATH 5651. Basic Theory of Probability and Statistics.

(4 cr. Prereq—[2263 or 2374 or 2573], [2243 or 2373]; [2283 or 2574 or 3283] recommended; Credit will not be granted if credit has been received for: STAT 4101, STAT 5101) Logical development of probability, basic issues in statistics. Probability spaces, random variables, their distributions/expected values. Law of large numbers, central limit theorem, generating functions, sampling, sufficiency, estimation.

MATH 5652. Introduction to Stochastic Processes. (4 cr. Prereq—5651 or STAT 5101)

Random walks, Markov chains, branching processes, martingales, queueing theory, Brownian motion.

MATH 5654. Prediction and Filtering. (4 cr. Prereq—5651 or STAT 5101)

Markov chains, Wiener process, stationary sequences, Ornstein-Uhlenbeck process. Partially observable Markov processes (hidden Markov models), stationary processes. Equations for general filters, Kalman filter. Prediction of future values of partially observable processes.

MATH 5705. Enumerative Combinatorics. (4 cr. Prereq—[2243 or 2373 or 2573], [2263 or 2283 or 2374 or 2574 or 3283]; Credit will not be granted if credit has been received for: 4707)

Basic enumeration, bijections, inclusion-exclusion, recurrence relations, ordinary/exponential generating functions, partitions, Polya theory. Optional topics include trees, asymptotics, listing algorithms, rook theory, involutions, tableaux, permutation statistics.

MATH 5707. Graph Theory and Non-enumerative Combinatorics. (4 cr. Prereq—[2243 or 2373 or 2573], [2263 or 2374 or 2574]; [2283 or 3283 or experience in writing proofs] highly recommended; Credit will not be granted if credit has been received for: 4707)

Basic topics in graph theory: connectedness, Eulerian/Hamiltonian properties, trees, colorings, planar graphs, matchings, flows in networks. Optional topics include graph algorithms, Latin squares, block designs, Ramsey theory.

MATH 5711. Linear Programming and Combinatorial Optimization. (4 cr. Prereq—2 sems soph math [including 2243 or 2373 or 2573])

Simplex method, connections to geometry, duality theory, sensitivity analysis. Applications to cutting stock, allocation of resources, scheduling problems. Flows, matching/transportation problems, spanning trees, distance in graphs, integer programs, branch/bound, cutting planes, heuristics. Applications to traveling salesman, knapsack problems.

MATH 5900. Tutorial in Advanced Mathematics. (1-6 cr [max 120 cr]; A-F only)

Individually directed study.

Mathematics Education (MTHE)

Department of Curriculum and Instruction

College of Education and Human Development

MTHE 3101. Mathematics and Pedagogy for Elementary Teachers I. (4 cr. Prereq—[College algebra, elementary FOE student] or #)

Math content knowledge of K-6 in an environment modeling pedagogy for future implementation. Integrated content/methods. Problem solving, connections, communication, reasoning, representation. Functions, proportionality, number, numeration.

MTHE 3102. Mathematics and Pedagogy for Elementary Teachers II. (4 cr. Prereq—3101, college algebra)

Math content knowledge of K-6 in an environment modeling pedagogy for future implementation. Integrated content/methods. Problem solving, connections, communication, reasoning, representation. Geometry, measurement, probability, statistics.

Mechanical Engineering (ME)

Department of Mechanical Engineering

Institute of Technology

ME 1. Refresher Course for Mechanical Engineers. (0 cr; S-N only)

Organized review of topics in mechanical engineering program in preparation for Minnesota Professional Engineering Exam. Emphasizes problem solving, organization of information/notes, trial exams.

ME 2011. Introduction to Engineering. (4 cr; A-F only. Prereq—IT lower div)

Develop skills critical for practicing engineers. Core disciplinary areas of mechanical engineering and engineering design. Extensive exposure to visual, written and oral communication forms, and to computer-based design tools. Substantial design projects, including prototype construction.

ME 3041. Industrial Assignment I. (2 cr; A-F only. Prereq—ME upper div, enrolled in ME co-op program)

Industrial work assignment in engineering intern program. Evaluation based on student's formal written report covering the quarter's work assignment.

ME 3080. Topics in Mechanical Engineering. (1-4 cr [max 8 cr]. Prereq—A)

Specialized topics within various areas of mechanical engineering. Topics vary each semester.

ME 3221. Design and Manufacturing I: Engineering Materials and Manufacturing Processes. (4 cr; A-F only. Prereq—2011, AEM 3031, MatS 2001, ME upper div)

Material behavior/failure in design/manufacturing. Models for material removal, bulk deformation, sheet metal forming, and consolidation processes. Characterization of process capabilities/parts.

ME 3222. Design and Manufacturing II. (4 cr; A-F only. Prereq—[3221 or #3221], [CSCI 1113 or equiv], ME upper div)

Selection of standard mechanical components such as bearings, gears, and fasteners. Analysis/synthesis of motion in machines. Displacement, velocity, and acceleration of mechanisms. Machine design project: Apply lecture topics to develop new machines that fulfill customer specifications.

ME 3281. System Dynamics and Control. (4 cr; A-F only. Prereq—AEM 2021, [Math 2243 or Math 2373], ME upper div)

Dynamics of mechanical, electrical, thermal, fluid, and hybrid systems. System response using Laplace transform and numerical integration. Fourier transform and convolution. Transfer functions and frequency response. Introduction to classical control.

ME 3321. Thermodynamics. (4 cr; A-F only. Prereq—CHEM 1021, Math 2243, PHYS 1301, IT student, [wood and paper science or paper science engineering] major)

Properties, equations of state, processes, cycles for reversible/irreversible thermodynamic systems. Modes of work/heat transfer. Equations for conservation of mass, linear momentum, energy, entropy. Mixture properties, thermochemistry, chemical equilibrium for ideal gases.

ME 3322. Heat Transfer and Fluid Flow. (4 cr; A-F only. Prereq—ME upper div, wood/paper sci, 3321)

Mechanisms of heat transfer: conduction, radiation, convection, phasechange. Fluid flow: mass/momentum conservation laws, statics, inviscid model, Bernoulli's equation. Convection: external/internal flows, heat transfer coefficient, forced/natural convection, heat exchangers. Phase change: boiling/condensation.

ME 3324. Introduction to Thermal Science. (3 cr; A-F only. Prereq—CHEM 1021, Math 2243, PHYS 1301, [IT student or COAFES pre-BAE major])

Thermodynamics, heat transfer. Thermal properties of substances. First/second laws of thermodynamics. Steady/unsteady heat conduction. Thermal resistance concept. Convection heat transfer. Radiative heat transfer between solid surfaces. Boiling/condensation heat transfer.

ME 3331. Thermal Sciences I. (3 cr. Prereq—CHEM 1021, PHYS 1301, IT student)

Properties, equations of state, processes, cycles for reversible/irreversible thermodynamic systems. Modes of work/heat transfer. Equations for conservation of mass, linear momentum, energy, entropy.

ME 3332. Thermal Sciences II. (3 cr. Prereq—Math 2243, 3331, ME upper div)

Mass, momentum conservation principles. Fluid statics, Bernoulli equation. Control volume analysis, dimensional analysis, internal/external viscous flow. Momentum and energy considerations. Introduction to hydrodynamic and thermal boundary layers.

ME 3333. Thermal Sciences III. (3 cr. Prereq—3332, [4031W or #4031W], ME upper div)

Mechanisms of heat transfer: conduction, convection, radiation. Differential analysis of momentum/energy equations. Forced/natural convection, heat exchangers.

ME 4031W. Basic Mechanical Measurements Laboratory. (4 cr; A-F only. Prereq—[3333 or #3333], IE 4521, upper div ME)

Experimental methods, instrumentation for engineering measurements, statistical estimates of experimental uncertainty, calibration, signal conditioning, selected transducers for mechanical measurements, data acquisition/processing, presentation of results. Measurement of temperature, pressure, humidity, stress-strain, force, velocity, and flow/radiative properties.

ME 4042. Industrial Assignment I. (2 cr; A-F only. Prereq—ME upper div, enrolled in ME co-op program)

Industrial work assignment in engineering intern program. Evaluation based on student's formal written report covering the quarter's work assignment.

ME 4043W. Industrial Assignment II. (4 cr. Prereq—3041)

Solution of system design problems that require developing criteria, evaluating alternatives, and generating a preliminary design. Final report emphasizes design communication and describes design decision process, analysis, and final recommendations.

ME 4044. Industrial Assignment III. (2 cr. Prereq—ME upper div, registration in ME co-op program)

Industrial work assignment in engineering co-op program. Evaluation based on student's formal written report covering semester work assignment.

ME 4054W. Design Projects. (4 cr; A-F only. Prereq—2011, 3221, 3222, 3281, 3321, 3322, 4031W, AEM 2021, AEM 3031, EE 3005)

Students work in teams and undertake single, substantial design project. Design problems are open-ended. Product design process. Teams give formal presentation of progress at mid-semester design review, show completed work at design show.

ME 4081H. Mechanical Engineering Honors Thesis I. (2 cr; A-F only. Prereq—ME upper div honors student, #)

Unstructured research course enabling honors students to do independent research supervised by faculty. Selection of suitable topics according to individual interests and faculty approval. Thesis and oral defense.

ME 4082H. Mechanical Engineering Honors Thesis II. (2 cr; A-F only. Prereq—ME upper div honors student, #)

Unstructured research course enabling honors students to do independent research supervised by faculty. Selection of suitable topics according to individual interests and faculty approval. Thesis and oral defense.

ME 4131W. Thermal Environmental Engineering Laboratory. (4 cr; A-F only. Prereq—3322, 4031W, [ME upper div or grad student])

Experiments in psychrometrics, refrigeration, air conditioning, solar energy, indoor air quality, and other topics related to refrigeration, building heating/cooling, and indoor air quality.

ME 4231. Motion Control Laboratory. (4 cr; A-F only. Prereq—3281, 4031W, ME upper div)

Microprocessor programming, digital filters, frequency response testing, modeling of electromechanical systems, closed loop velocity and position control, programmable logic controllers, factory automation, open loop position control of a vibratory system using input shaping, closed loop position control using pole placement.

ME 4232. Fluid Power Control Lab. (4 cr; A-F only. Prereq—3281, 4031W, ME upper div)

Fluid power fundamentals. Description/operation of components. Fluid power symbols/circuits. Component sizing. Modeling/simulation, system identification, controller design/implementation. Connecting/making measurements on hydraulic circuits. Lab.

ME 4331. Thermal Engineering Laboratory. (4 cr; A-F only. Prereq—[3321, 3322, 4031W], [IT upper div or grad student])

Measurement and analysis of heat transfer in single phase, multiphase, and reacting environments. Emphasis on experimental measurements relevant to thermal/fluid systems as well as the statistical design of experiments and uncertainty analysis. Heat exchange.

ME 4431W. Energy Conversion Systems Laboratory. (4 cr; A-F only. Prereq—3333, 4031W, [IT upper div or grad student])

Material from courses is applied to analyze operation/control of engines, power plants, and heating/ventilation systems. Emphasizes principles underlying performance characteristics of devices, measurement techniques, interpretation of experimental data, and presentation of results.

ME 5080. Topics in Mechanical Engineering. (1-4 cr [max 4 cr]. Prereq—IT upper div or grad student, submission of permission form, #)

Topics vary each semester.

ME 5090. Advanced Engineering Problems. (1-4 cr [max 4 cr]. Prereq—ME upper div, #)

Special investigations in various fields of mechanical engineering and related areas including an independent study project.

ME 5101. Vapor Cycle Systems. (4 cr; A-F only. Prereq—IT upper div or grad student)

Vapor compression and absorption refrigeration systems; heat pumps; vapor power cycle analysis, regeneration, reheat, compound cycle modifications, combines gas turbine—vapor cycle systems.

ME 5103. Thermal Environmental Engineering. (4 cr; A-F only. Prereq—IT upper div or grad, 3322 or 3323)

Thermodynamic properties of moist air; psychrometric charts; HVAC systems; solar energy; human thermal comfort; indoor air quality; heating and cooling loads in buildings.

ME 5105. HVAC System Design. (4 cr; A-F only. Prereq—5103, [IT upper div or grad student])

Design procedures used for heat exchangers, cooling towers, hydronic systems, and air handling systems. HVAC system design for a commercial building.

ME 5113. Aerosol/Particle Engineering. (4 cr; A-F only. Prereq—IT upper div or grad student)

Kinetic theory, definition, theory and measurement of particle properties, elementary particle mechanics, particle statistics; Brownian motion and diffusion, coagulation, evaporation and condensation, sampling and transport.

ME 5115. AIR Quality and AIR Pollution Control. (4 cr; A-F only. Prereq—IT upper div or grad student)

Air pollution sources, atmospheric transport, transformations, fate, and emissions control. Air pollution meteorology, dispersion, chemistry of secondary pollutant formation, standards and regulation. Control devices and techniques for gaseous and particulate emissions. Cyclones, electrostatic precipitators, wet and dry scrubbers, combustion modification.

ME 5116. Cleanroom Technology and Particle Monitoring. (4 cr; A-F only. Prereq—IT upper div or grad student)

Fundamentals of cleanroom technology for microelectronics manufacturing; airborne and liquid-borne particulate contaminants; particle monitors; optical and condensation particle counters, wafer surface scanner, microscopy; filter performance and testing; cleanroom design and operation; high purity systems; particle detection in processing equipment.

ME 5133. Aerosol Measurement Laboratory. (4 cr; A-F only. Prereq—IT upper div or graduate student)

Principles of aerosol measurement. Single particle analysis by optical and electron microscopy. Aerosol samplers and inertial collectors. Integral mass concentration and number concentration detectors. Size distribution by laser particle counter and differential mobility particle sizer. Aerosol generation and instrument calibration.

ME 5221. Computer-Assisted Product Realization. (4 cr; A-F only. Prereq—3221, AEM 3031, CSCI 1113, MatS 2001)

Injection molding with emphasis on design of manufacturing processes. Tooling design and specification of processing conditions using computer-based tools; process simulation software and computer-controlled machine tools. Simultaneous process and part design. Production of tooling and parts. Part evaluation.

ME 5223. Materials in Design. (4 cr. Prereq—3221)

Fundamental properties of engineering materials. Fabrication, treatment. Physical and corrosive properties. Failure mechanism, cost and value analysis as related to material selection and specification.

ME 5228. Introduction to Finite Element Modeling,

Analysis, and Design. (4 cr; A-F only. Prereq—IT upper div or grad, 3221, AEM 3031, CSCI 1113, MatS 2001)

Finite elements as principal analysis tool in computer-aided design (CAD); theoretical issues and implementation aspects for modeling and analyzing engineering problems encompassing stress analysis, heat transfer, and flow problems for linear situations. One-, two-, and three-dimensional practical engineering applications.

ME 5231. Digital and Analog Control Laboratory. (4 cr; A-F only. Prereq—ME or AEM upper div or grad student, 5281 or equiv)

Lab experiments illustrate and apply control theory to mechanical engineering systems. Emphasis on real-life control design and implementation, including dynamic modeling, controller design, analysis and simulation, hardware implementation, measurement techniques, sensor calibration, data acquisition, and processing.

ME 5241. Computer-Aided Engineering. (4 cr; A-F only.

Prereq—IT upper div or grad, 3222, CSCI 1113 or equiv)

Apply computer-aided engineering to mechanical design. Engineering design projects and case studies using computer-aided design and finite element analysis software; design optimization and computer graphical presentation of results.

ME 5243. Advanced Mechanism Design. (4 cr; A-F only.

Prereq—IT upper div or grad, 3222 or equiv, basic kinematics and dynamics of machines; knowledge of CAD packages such as Pro-E recommended)

Analytical methods of kinematic, dynamic, and kinetoelastodynamic analysis and synthesis of mechanisms. Computerized design for function, path, and motion generation based on Burmeister theory.

ME 5247. Stress Analysis, Sensing, and Transducers. (4 cr; A-F only. Prereq—AEM 3031, MatS 2001)

Electrical resistance strain gage theory and technology. Gage characteristics, selection, and use. Bridge circuits and temperature and stray strain compensation. Signal conditioning. Data analysis. Photoelasticity techniques. Interpretation of fringe patterns. Sensor principles and performance. Transducer design and characterization.

ME 5248. Vibration Engineering. (4 cr. Prereq—IT upper div or grad, 3281)

Apply vibration theory to design; optimize isolators, detuning mechanisms, viscoelastic suspensions and structures. Use modal analysis methods to describe free vibration of complex systems, relating to both theoretical and test procedures.

ME 5281. Analog and Digital Control. (4 cr. Prereq—3281)

Continuous and discrete time feedback control systems. Frequency response, stability, poles and zeros; transient responses; Nyquist and Bode diagrams; root locus; lead-lag and PID compensators, Nicols-Ziegler design method. Digital implementation aliasing; computer-aided design and analysis of control system.

ME 5286. Robotics. (4 cr; A-F only. Prereq—[3281 or equiv], [upper div ME or AEM or CSCI or grad student])

Manipulator forward/inverse kinematics, homogeneous transformations, coordinate frames, Jacobian/velocity control, task primitives/programming, computational issues. Determining path trajectories. Reaction forces, manipulator dynamics/control. Vehicle kinematics, dynamics, and guidance. Lab project demonstrates concepts.

ME 5312. Solar Thermal Technologies. (4 cr; A-F only.

Prereq—[3333, IT upper Div] or grad student)

Solar radiation fundamentals. Measurement/processing needed to predict solar irradiance dependence on time, location, and orientation. Characteristics of components in solar thermal systems: collectors, heat exchangers, thermal storage. System performance, low-temperature applications. Concentrating solar energy, including solar thermochemical processes, to produce hydrogen/solar power systems and photovoltaics. Solar design project.

ME 5341. Case Studies in Thermal Engineering and

Design. (4 cr; A-F only. Prereq—IT upper div or grad student, 3321, 3322)

Characteristics of applied heat transfer problems: nature of problem specification, incompleteness of needed knowledge base, accuracy issues. Categories of applied heat transfer problems (e.g., materials processing, turbomachinery, cooling of electronic equipment, biomedical thermal therapeutic devices, heat exchangers, HVAC systems).

ME 5344. Thermodynamics of Fluid Flow with

Applications. (4 cr; A-F only. Prereq—IT upper div or grad student, 3321, 3322)

Conservation of mass, momentum, and energy for compressible gas flows. Relevant thermodynamic properties. Nozzles, diffusers, thrust producers, shocks. Fluid-wall frictional interactions. Wall heat transfer, internal heat release. Temperature recovery. Mass addition. Chemical thermodynamics/applications.

ME 5351. Computational Heat Transfer. (4 cr; A-F only.

Prereq—IT upper div or grad student, 3322)

Numerical solution of heat conduction and analogous physical processes. Develop and use a computer program to solve complex problems involving steady and unsteady heat conduction, flow and heat transfer in ducts, flow in porous media, and other special applications.

ME 5361. Plasma-Aided Manufacturing. (4 cr; A-F only. SEE 5611. Prereq—Grad or IT upper div, ME 3321, ME 3322 or equiv)

Properties of plasmas as a processing medium, process control and system design considerations using specific examples of plasma spray coating, welding, and microelectronics processing.

ME 5381. Biological Transport Processes. (4 cr; A-F only. SBMEN 5311, CHEN 5753. Prereq—IT upper div or grad student, transport class, [3322 or CHEN 5103] or #)

Fluid, mass, and heat transport in biological systems. Mass transfer across membranes, fluid flow in capillaries, interstitium, veins and arteries. Biotransport issues in single cells and tissues, artificial organs, membrane oxygenators, and drug delivery applications.

ME 5446. Introduction to Combustion. (4 cr; A-F only. Prereq—IT upper div or grad student, 3321, 3322)

Thermodynamics, kinetics, energy and mass transport, and pollutants in reacting systems. Reactors, laminar and turbulent flames. Ignition, quenching, and flame stability. Diffusion flames. Combustion in reciprocating engines, furnaces, and turbines, with emphasis on internal combustion engine performance and emissions.

ME 5461. Internal Combustion Engines. (4 cr; A-F only.

Prereq—IT upper div or grad student, C or better in 3322 or 3324)

Basic spark ignition and diesel engine principles, air, fuel-air and actual engine cycles, cycle modeling, combustion and emissions, knock phenomena, air flow and volumetric efficiency, mixture requirements, ignition requirements and performance. Lectures and complementary labs.

ME 5462. Gas Turbines. (4 cr; A-F only. Prereq—IT upper div or grad student, 3321, #3322)

Gas turbine cycles, regeneration, recuperation, reheat, intercooling, combined cycle plants, and thermochemical regeneration. Axial and radial flow compressors and turbines; combustor designs, energy analysis, emissions, and noise. Turbojet, fanjet, turboprop engine performance. Stationary power plants, vehicular propulsion, hybrid vehicles.

Medical Technology (MEDT)

Allied-Medical Technology

Academic Health Center Shared

MEDT 1010. Orientation in Medical Technology. (1 cr; S-N only. Prereq—A)

Orientation to the medical technology (clinical laboratory science) profession.

MEDT 4064. Introduction to Clinical Immunohematology. (2 cr; A-F only. §CLS 5064)

Principles of blood grouping, antibody identification, compatibility testing, serology, and immunology.

MEDT 4065. Introduction to Clinical Immunohematology: Laboratory. (2 cr; A-F only. §CLS 5065)

Exercises illustrating basic techniques in blood grouping, antibody identification, compatibility testing, and detection of antibodies by serological and immunological methods.

MEDT 4082. Applied Clinical Chemistry. (3 cr; S-N only. Prereq—4310, 4311, 4320, 4321, enrolled MEDT student, #)

Application of basic methods/techniques in clinical chemistry lab.

MEDT 4085. Applied Clinical Hematology. (2 cr; S-N only. Prereq—4251, 4252, 4253, enrolled MEDT student, #) Application of methods/techniques in clinical hematology, morphology, and hemostasis.

MEDT 4086. Applied Clinical Immunohematology. (2 cr; S-N only. Prereq—4064, 4065, enrolled MEDT student, #) Application of basic techniques and methods in blood banking and immunology in clinical lab. Blood grouping, compatibility testing, and immunologic procedures.

MEDT 4088. Applied Diagnostic Microbiology. (2 cr; S-N only. Prereq—4100, 4102, enrolled MEDT student, #) Isolation, identification, and antimicrobial susceptibility testing of clinically relevant microbes (bacteria, fungi, parasites) from patient specimens.

MEDT 4089. Specialty Rotation. (1 cr; S-N only. Prereq—Completion of MEDT preclinical professional courses, enrolled MEDT student, #) One-week clinical rotation in a specialty lab such as immunophenotyping, cytogenetics, surgical pathology, molecular diagnostics, immunology, or forensics.

MEDT 4090. Special Laboratory Methods. (1-2 cr. §CLS 5090. Prereq—#) Individual assignment to a special area of experience in the clinical lab.

MEDT 4092. Honors Program: Laboratory Methods. (3 cr. Prereq—#) Individual assignment to special projects or research in one of the clinical areas of chemistry, hematology, immunohematology, or microbiology.

MEDT 4100. Virology, Mycology, and Parasitology for Medical Technologists. (2 cr; A-F only. §CLS 5100. Prereq—One microbiology course with lab, one bioCHEM course, enrolled MEDT student, #) Basic aspects of lab diagnosis of viral, fungal, and parasitic infections. Lecture.

MEDT 4104. Principles of Diagnostic Microbiology: Lecture. (2 cr; A-F only. §CLS 5104. Prereq—One microbiology course with lab, one bioCHEM course, enrolled MEDT student, #) Current techniques used in lab diagnosis of infectious disease. Isolating/identifying bacteria/yeasts. Antimicrobial susceptibility testing. Lecture.

MEDT 4105. Principles of Diagnostic Microbiology: Laboratory. (2 cr; A-F only. §CLS 5105. Prereq—One microbiology course with lab, one bioCHEM course, enrolled MEDT student, #) Current techniques used in lab diagnosis of infectious disease. Isolating/identifying bacteria/yeasts. Antimicrobial susceptibility testing. Lab.

MEDT 4127W. Introduction to Management and Education I. (1 cr; A-F only. §CLS 5127. Prereq—#) Basic concepts in management and education.

MEDT 4251. Hematology I: Basic Techniques. (3 cr; A-F only. §CLS 5251. Prereq—Enrolled MedT, #) Theory and application of basic principles and techniques in clinical hematology and hemostasis. Lecture and lab.

MEDT 4252. Hematology II: Morphology and Correlation. (2 cr; A-F only. §CLS 5252. Prereq—[4251 or CLS 5251], enrolled MEDT student, #) Fundamentals of examining blood and bone marrow. Emphasizes microscopic identification of immature/abnormal cells. Clinical correlation of lab findings in hematology/hemostasis. Lecture, lab.

MEDT 4253. Hemostasis. (1 cr; A-F only. §CLS 5253. Prereq—[4251 or CLS 5251], enrolled MEDT student, #) Theory/application of specific concepts/techniques in hemostasis/coagulation. Lecture, lab.

MEDT 4263. Comparative Hemostasis. (1 cr; A-F only) Theory and application of specific concepts and techniques in hemostasis and coagulation.

MEDT 4310. Clinical Chemistry I: Lecture. (2 cr; A-F only. §CLS 5310. Prereq—One organic CHEM course with lab, one biochem course, #) Principles and theory of clinical chemistry to assess renal and metabolic disease/dysfunction, electrolyte balance, and acid-base balance. Introduction to principles and processes for quality management in the clinical lab.

MEDT 4311. Clinical Chemistry I: Laboratory Applications. (2 cr; A-F only. §CLS 5311. Prereq—One organic CHEM course with lab, one biochem course, #) Application of clinical chemistry principles and lab techniques in the analysis of urine, plasma, and body fluids. Emphasis on lab tests to evaluate renal function, electrolytes, and acid-base balance. Principles and processes for managing test quality.

MEDT 4320. Clinical Chemistry II: Lecture. (2 cr; A-F only. §CLS 5320. Prereq—One organic CHEM course with lab, one biochem course, 4310 or CLS 5310) Principles and theory of clinical chemistry to assess metabolic disease/dysfunction involving hormones, enzymes, lipids/lipoproteins, cardiac function, liver and digestive tracts. Emphasis on measurement methods and physiological significance.

MEDT 4321. Clinical Chemistry II: Laboratory Applications. (2 cr; A-F only. §CLS 5321. Prereq—One organic CHEM course with lab, one biochem course, 4310 or CLS 5310) Application of clinical chemistry principles and lab techniques in the analysis of serum, plasma, and urine. Focus on tests to evaluate selected disorders. Development of lab skills and instrumentation use with emphasis on quality control and technique.

MEDT 4400. Immunological and Molecular Basis of Laboratory Testing. (1 cr [max 2 cr]; A-F only. Prereq—§: CLS 5400; BIOC 3021, #) Basic concepts in immunology, cytogenetics, molecular biology, and basic clinical laboratory testing. Lecture.

Medicinal Chemistry (MEDC)

Department of Medicinal Chemistry

College of Pharmacy

MEDC 5185. Principles of Biomolecular Simulation. (3 cr. Prereq—CHEM 3502 or #) Molecular simulation for students in medicinal chemistry, pharmaceuticals, biochemistry, and chemical physics

MEDC 5202. Research and Development Process of Pharmaceutical Products. (2 cr; S-N only) New drug development process in the U.S. pharmaceutical industry

MEDC 5245. Introduction to Drug Design. (3 cr; A-F only. §CHEM 5245, PHAR 6245. Prereq—Chem) Concepts that govern design/discovery of drugs. Physical, bioorganic, medicinal chemical principles applied to explain rational design, mechanism of action drugs.

MEDC 5494. Advanced Methods in Quantitative Drug Analysis. (3 cr; A-F only. Prereq—#) Quantitative methods (HPLC, GC, TLC, and immunoassays) for analysis of drugs and metabolites in biological fluids. Advanced techniques such as capillary electrophoresis, supercritical fluid chromatography, GC-MS, LC-MS, and tandem mass spectrometry. Chromatographic theory and statistical approaches to method validation.

MEDC 5495. Vistas in Medicinal Chemistry Research. (1 cr; S-N only) Selected topics of contemporary interest in medicinal chemistry

MEDC 5700. General Principles of Medicinal Chemistry. (2 cr; A-F only. Prereq—MEDC grad student or #) Fundamental principles of molecular recognition, physicochemical properties of drugs, drug metabolism and disposition, interaction of molecules with DNA/RNA.

MEDC 5710. General Principles of Medicinal Chemistry. (2 cr; A-F only. Prereq—MEDC grad student or #) Fundamental principles of enzyme inhibitors, combinatorial chemistry and library design, drug receptor interactions and signal transduction mechanisms, and molecular modeling.

Medieval Studies (MEST)

Center for Medieval Studies

College of Liberal Arts

MEST 1001. The Middle Ages: An Introduction to Medieval Studies/Middle Ages: Intro. (3 cr) An introduction to the history, culture, literature, and architecture of the Middle Ages and to interdisciplinary methods of study.

MEST 3610. Topics in Medieval Studies. (3-4 cr [max 24 cr]) Fall of Rome through end of the Middle Ages (ca. 300-1500 A.D.) Current topics specified in *Class Schedule*.

MEST 3993. Directed Studies in Medieval Studies. (3 cr. Prereq—Previous work in a medieval studies discipline, #) Directed study with one of core faculty members of Medieval Studies program.

MEST 4610. Intermediate Topics in Medieval Studies. (3-4 cr [max 32 cr])

Topics between fall of Roman Empire and end of Middle Ages (ca. 300-1500 A.D.). Topics specified in *Class Schedule*.

MEST 5610. Advanced Topics in Medieval Studies. (3-4 cr [max 15 cr]. Prereq—One yr work in some area of Middle Ages, reading knowledge of appropriate language, #) From late antiquity through end of Middle Ages (circa 300-1500 A.D.). Current topics specified in *Class Schedule*.

MEST 5993. Directed Studies in Medieval Studies. (1-3 cr [max 6 cr]. Prereq—One yr work in some area of Middle Ages, reading knowledge of appropriate language, #) Directed study with one of the core faculty of medieval studies program.

Microbial Engineering (MICE)

BioTechnology Institute

College of Biological Sciences

MICE 5309. Biocatalysis and Biodegradation. (3 cr. §BIOC 5309. Prereq—Chemistry through organic chemistry; knowledge of word processing, e-mail, access to World Wide Web, access to college-level science library recommended) Assessing validity of information on biocatalysis and biodegradation; fundamentals of microbial catabolic metabolism as it pertains to biodegradation of environmental pollutants; biocatalysis for specialty chemical synthesis; display of this information on the World Wide Web.

MICE 5355. Advanced Fermentation and Biocatalysis Laboratory. (3 cr; A-F only. Prereq—[BIOL 3301 or MICB 3301], [grad student in microbial engineering or upper-div major in [microbiology or CHEM engineering or biochemistry]], #) Methods in industrial microbiology, laboratory, and pilot scale fermentation/biocatalysis engineering. Laboratory experiments carried out in fermentation pilot plant. Operation of bench scale and pilot scale bioreactors, designing bioreactors, process optimization, process monitoring/control, scale-up experiments, experimental design, data analysis.

Microbiology (MICB)

Department of Microbiology

Medical School

MICB 3301. Biology of Microorganisms. (5 cr; A-F only. §BIOL 2032. Prereq-[BIOL 1002 or BIOL 1009], CHEM 2301, ¶CHEM 2302)

Taxonomy, anatomy, physiology, biochemistry, pathogenesis, immunology, ecology of microbes. Molecular structure in relation to bacterial function/disease. Includes lab.

MICB 4001. Microorganisms and Disease. (2 cr. Prereq-[4 cr BIOL sci or #], non-microbiology major) Pathogenic microorganisms, host-parasite interactions, disease treatment/prevention.

MICB 4111. Microbial Physiology and Diversity. (3 cr. Prereq-[2022 or VPB 2022 or BIOL 2032 or VPB 2032 or VBS 2032 or 3301 or BIOL 3301], [BIOC 3021 or BIOL 3021 or BIOC 4331])

Structural/functional organization of bacteria/archaea. Energy metabolism utilizing light, inorganic/organic chemicals. Cell morphologies, roles/assembly of surface structures. Growth/survival mechanisms in various extreme environments. Adaptation to changing conditions by development of specialized cells/structures, altering metabolic patterns.

MICB 4121. Microbial Ecology and Applied Microbiology. (3 cr; A-F only. §ES 4121, SOIL 4121. Prereq-3301) Evolution/structure of microbial communities. Population interaction within ecosystems. Quantitative/habitat ecology. Biogeochemical cycling. Molecular microbial ecology, gene transfer in the environment. Molecular phylogeny of microorganisms. Application of microbes in agriculture. Production of commodity chemicals, drugs, and other high-value products.

MICB 4131. Immunology. (3 cr. Prereq-[2022 or VPB 2022 or BIOL 2032 or VPB 2032 or VBS 2032 or 3301 or BIOL 3301], [BIOC 3021 or BIOL 3021 or BIOC 4331]) Molecular, genetic, and cellular bases for humoral/cell-mediated immunity. Innate immunity. Antigen recognition by B and T lymphocytes. Interactions between lymphocytes and other cells of immune system. Cytokines. Immunoregulation. Key aspects of clinical immunology.

MICB 4141W. Biology, Genetics, and Pathogenesis of Viruses: Writing Intensive. (4 cr. §MICB 4171. Prereq-[3301, BIOC 3021, BIOL 4003, BIOL 4004] or #) Properties/analysis of viruses. Structure, attachment, entry. Genome replication/mRNA production by RNA viruses. Reverse transcription. Transcription from DNA virus templates. Replication of DNA virus genomes. Processing of viral pre-mRNA. Translational control. Assembly, host defense, tumor viruses, pathogenesis, HIV, emerging viruses, antivirals and vaccines. Lectures, in-class activities, interactive Web site.

MICB 4151. Molecular and Genetic Bases for Microbial Diseases. (3 cr. Prereq-[3301, [4131 or ¶4131], [BIOC 3021 or BIOC 4331]]; [BIOL 4003 or GCD 3022] recommended) Genetic basis of microbial pathogenesis. Effect of gene transfer/regulation on evolution of microbial pathogens and on their capacity to colonize, induce disease. Biochemical/cellular interactions between bacteria and their human hosts.

MICB 4161. Eukaryotic Microbiology. (3 cr. Prereq-3301, GCD 3022) Cell biology of higher eukaryotes, animal/plant pathogenesis, evolution, industrial microbiology. Tetrahymena, Chlamydomonas, Paramecium, Toxoplasma, Aspergillus, Neurospora.

MICB 4171. Biology, Genetics, and Pathogenesis of Viruses. (3 cr; A-F only. §MICB 4141W. Prereq-[BIOC 3021, 3301, BIOL 4003, BIOL 4004] or #) Properties/analysis of viruses. Structure, attachment, entry. Genome replication/mRNA production by RNA viruses. Reverse transcription. Transcription from DNA virus templates. Replication of DNA virus genomes. Processing of viral pre-mRNA. Translational control. Assembly, host defense, tumor viruses, pathogenesis, HIV, emerging viruses, antivirals and vaccines. Lectures, in-class activities, interactive Web site.

MICB 4215. Advanced Laboratory: Microbial Physiology and Diversity. (3 cr; A-F only. Prereq-3301 or BIOL 2032 or VBS 2032 or intro microbiology course with lab) Isolation/cultivation of wide variety of bacteria. Physiological experiments illustrate characteristic features of microorganisms.

MICB 4235. Advanced Laboratory: Virology, Immunology, and Microbial Genetics. (3 cr. Prereq-BIOC 3021, 3301, two from [4131, 4141W, 4151, 4171]) Techniques, experimental methods in microbial genetics, immunology, and virology used to study microbes and their interactions with a host.

MICB 4793W. Directed Studies: Writing Intensive. (1-7 cr [max 7 cr]; S-N only. Prereq-#, Δ; no more than 7 cr of [4793, 4794, 4993, 4994] may count toward major requirements) Individual study on selected topics or problems. Emphasizes readings, use of scientific literature.

MICB 4794W. Directed Research: Writing Intensive. (1-7 cr [max 15 cr]; S-N only. Prereq-#, Δ; no more than 7 cr of [4793, 4794, 4993, 4994] may count toward major requirements) Laboratory or field investigation of selected areas of research.

MICB 4993. Directed Studies. (1-7 cr [max 7 cr]; S-N only. Prereq-Biol/MICB 3301 or #; 7 cr of 4993 and/or 4994 may count toward major requirements) Individual study on selected topics or problems with emphasis on selected readings and scientific literature.

MICB 4994. Directed Research. (1-7 cr [max 7 cr]; S-N only. Prereq-Biol/MICB 3301, #; 7 cr max of 4993 and/or 4994 may count toward major requirements) Lab or field investigation of selected areas of research.

MICB 5205. Microbiology and Immunology for Medical Students. (0-7 cr [max 7 cr]) Basic/clinical human immunology, medical microbiology. Molecular/cellular basis of immune responses, tolerance. Immunologic disease, serology, antimicrobial agents, chemotherapy. Basic/medical bacteriology, parasitology, mycology, virology. Unifying principles governing pathogenesis. Diseases are grouped with organisms important in differential diagnosis.

Middle Eastern Languages and Cultures (MELC)

Institute of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

MELC 1904. Freshman Seminar. (3 cr; A-F only. §CAS 1904) Topics vary. See *Class Schedule*.

MELC 3491. Classical Islamic Civilization. (3 cr. §ARAB 3491, ARAB 5491, HIST 3491) Islamic legacy in the classical age (800-1400) in medical and natural sciences, mathematics, philosophy, literature, and transmission to Europe.

MELC 3505. Survey of the Middle East. (3 cr. §ARAB 3505, ARAB 5505, HIST 3505) Peoples, lands, and cultures of the Middle East. Historical survey from earliest civilizations to the present.

MELC 3511. Ancient Iran. (3 cr. §CAS 3511)

The development of ancient Iranian culture under the Achaemenians and the Sassanians, the impact of the Zoroastrian religion on Iranians and of Hellenism on the east, especially on such domains as Bactria, Iran's contribution to the flourishing of the cultures of the Silk Road, the thread that connected distant China and Europe.

MELC 3512. Modern Iran. (3 cr. §CAS 3512)

Development of medieval Iranian culture under the Arab, Turkish, and Mongol rules. Study two major trends: Islamization beginning after the Arab conquest until A.D. 1500; westernization from the Safavids to the Islamic Republic in 1979.

MELC 3526. Islam and Communism and Communism. (3 cr. §CAS 3526, CAS 5526, MELC 5526)

Development of medieval Islamic culture in Transoxiana; formation of Sufi orders; rise and development of Communist ideology; introduction of socialist principles into Central Asia; clash of Islamic principles with Communist dicta; Pan-Islamism; Pan-Turkism.

MELC 3531. Central Asian Culture and Literature. (3 cr. §CAS 3531, GLOS 3641)

Dynamics of life in contemporary Afghanistan, Iran, and Central Asia. Emphasizes role of ethnicity/ideology. Central Asian fictional illustrations of impact of sovietization on Islamic traditions.

MELC 3532. Russia and Central Asia. (3 cr. §CAS 3532, CAS 5532, MELC 5532)

Rise and fall of the Mongol Empire, formation of the Chaghatai Khanate and the Golden Horde. Russian expansion into Central Asia and rivalry with Britain. Russia and the Central Asian republics during and after the Soviet period.

MELC 3533. Islam and the West. (3 cr. §CAS 3533, GLOS 3643)

Cultural/intellectual trends that have defined the fundamental differences between Islam and the West. Development of historical, philosophical, and intellectual mindset of both spheres. Factors that have contributed and continue to contribute to tension, anxiety, and hatred between the Muslim world and Europe and the United States.

MELC 3541. Islam in the Catholic Age: ARAB Phase 600 A.D. to 900 A.D.. (3 cr. §ARAB 3541, ARAB 5541, HIST 3541)

The rise of Islam in its Arabian setting. Roles of the prophet, the Orthodox and Umayyad Caliphs. Development of Islamic state and empire. Status of Muslims and non-Muslims.

MELC 3542. Medieval Islam. (3 cr. §ARAB 3542, ARAB 5542, HIST 3542, MELC 3542)

Islamic dynasties. Mamluks and Mongols, Crusaders and Assassins. Abbasid Caliphate's disintegration and rise of Seljuk Turks.

MELC 3543. Arabs Under Mamluks and Ottomans: 1300-1920. (3 cr. §ARAB 3543, ARAB 5543, HIST 3543)

Arabs under Mamluk rule. Struggle against Crusaders and Mongols. Disintegration and reemergence under Muhammad Ali of Egypt, dynastic struggles in Syria, rise of Young Turks and Arab revolt.

MELC 3544. ARAB World 1920 to the Present. (3 cr. §ARAB 3544, ARAB 5544, HIST 3544)

Struggle in the Arab world for independence and its course since independence. Emphasis on development, political stability and unity, political structures, and the Arab-Israeli conflict.

MELC 3601. Persian Fiction in Translation. (3 cr. §CAS 3601, CAS 5601, MELC 5601)

Impact of westernization on Iran, from 1920s to present. Materials produced by Iranian writers, film makers, and intellectuals. Internal/external forces that bind contemporary Iranian society to world civilization. Works of Hedayat (especially *Blind Owl*), Chubak, Al-i Ahmad, Daneshvar, and Behrangi are analyzed/interpreted.

MELC 3602. Persian Poetry in Translation. (3 cr. \$CAS 3602, CAS 5602, MELC 5602)

Major poetic works of Iran in translation dealing with life at the medieval courts, Sufic poetry, and “new” poetry. Rudaki, Khayyam, Rumi, Hafiz, Yushij, and Farrukhzad are among the poets whose works are examined.

MELC 3900. Topics in Middle Eastern Languages and Cultures. (1-4 cr [max 16 cr]; A-F only. \$CAS 3900)
Topics vary. See Class Schedule or contact department for details.

MELC 3993. Directed Studies. (1-10 cr [max 10 cr]. Prereq—#, Δ, □)
Guided individual study.

MELC 3994. Directed Research. (1-10 cr [max 10 cr]. Prereq—#, Δ, □)
Directed Research

MELC 5311. Medieval Sages. (3 cr. \$CAS 5311. Prereq—background in Iranian, Central Asian, or Islamic studies recommended)
Study and discussion of the intellectual life of the region from the rise of the Ghaznavids (A.D. 1000) to the fall of the Timurids (A.D. 1500). Ibn Sina (Avicenna), al-Biruni, al-Ghazali, Rumi, Sa’di, and Firdowsi are among the sages whose lives are examined.

MELC 5526. Islam and Communism. (3 cr. \$CAS 3526, CAS 5526, MELC 3526)
Development of medieval Islamic culture in Transoxiana; formation of Sufi orders; rise and development of Communist ideology; introduction of socialist principles into Central Asia; clash of Islamic principles with Communist dicta; Pan-Islamism; Pan-Turkism.

MELC 5532. Russia and Central Asia. (3 cr. \$CAS 3532, CAS 5532, MELC 3532)
Rise and fall of the Mongol Empire, formation of the Chagatai Khanate and the Golden Horde. Russian expansion into Central Asia and rivalry with Britain. Russia and the Central Asian republics during and after the Soviet period.

MELC 5601. Persian Fiction in Translation. (3 cr. \$CAS 3601, CAS 5601, MELC 3601)
Impact of westernization on Iran, from 1920s to present. Materials produced by Iranian writers, film makers, and intellectuals. Internal/external forces that bind contemporary Iranian society to world civilization. Works of Hedayat (especially Blind Owl), Chubak, Al-i Ahmad, Daneshvar, and Behrangi are analyzed/interpreted.

MELC 5602. Persian Poetry in Translation. (3 cr. \$CAS 3602, CAS 5602, MELC 3602)
Major poetic works of Iran dealing with life at the medieval courts, Sufic poetry, and “new” poetry are studied. Rudaki, Khayyam, Rumi, Hafiz, Yushij, and Farrukhzad are among the poets whose works are examined.

MELC 5993. Directed Studies. (1-10 cr [max 10 cr]. Prereq—#, Δ, □)
Directed Studies

MELC 5994. Directed Research. (1-10 cr [max 10 cr]. Prereq—#, Δ, □)
Directed Research

Military Science (MIL)

Department of Military Science (Army ROTC)

Office of the Senior Vice President for Academic Affairs and Provost

MIL 102. Military Science I Leadership Lab. (0 cr; A-F only. Prereq—Enrollment in 1010)

Learn and practice basic skills. Gain insight into the Advanced course in order to make an informed decision whether to apply for it. Build self confidence and team-building leadership skills that can be applied throughout life.

MIL 202. Military Science II Leadership Lab. (0 cr; A-F only. Prereq—Enrollment in 1220)

Learn and practice basic military skills. Gain insight into the Advanced Course in order to make an informed decision whether to apply for it. Build self confidence and team-building leadership skills that can be applied throughout life.

MIL 302. Military Science III Leadership Lab. (0 cr. Prereq—Enrollment in 3130)

Open only to students in the associated Military Science Course series with different roles for students at different levels. Involves leadership responsibilities for the planning, coordination, execution and evaluation of various training and activities with Basic course students and for the AROTC program as a whole. Students develop, practice and refine leadership skills by serving in a variety of leadership positions.

MIL 402. Military Science IV Leadership Lab. (0 cr. Prereq—Student must be enrolled in the Advanced Course and associated Military Science class)

Open only to students in the associated Military Science Course Series. Involves leadership responsibilities for the planning, execution and evaluation of various training activities within the program. Additional duties as a primary or secondary staff member is necessary for the completion of this course. Assist in the development of Basic and Advance Course cadet’s leadership skills.

MIL 1001. Military Science I Leadership Lab. (1 cr. Prereq—Enrollment in 1010)

Learn and practice basic skills. Gain insight into the Advance Course in order to make an informed decision whether to apply for it. Build self confidence and team building leadership skills that can be applied throughout life.

MIL 1002. Military Science I Leadership Lab. (1 cr. Prereq—Enrollment in 1011)

Learn and practice basic skills. Gain insight into the Advance Course in order to make an informed decision whether to apply for it. Build self confidence and team building leadership skills that can be applied throughout life.

MIL 1003. Military Science II Leadership Lab. (1 cr. Prereq—Enrollment in 1220)

Learn and practice basic skills. Gain insight into the Advance Course in order to make an informed decision whether to apply for it. Build self confidence and team building leadership skills that can be applied throughout life.

MIL 1004. Military Science II Leadership Lab. (1 cr. Prereq—Enrollment in 1221)

Learn and practice basic leadership skills. Build self confidence through individual and team building concepts. Gain insight into the advance course in order to make an informed decision on whether to apply. Further develop your leadership style through practical application scenarios.

MIL 1005. Military Science III Leadership Lab. (1 cr. Prereq—Enrollment in 3130)

Involves leadership responsibilities for the planning, coordination, execution, and evaluation of various training and activities with Basic Course students and for the ROTC program. Students develop, practice, and refine leadership skills by serving and being evaluated in a variety of responsible positions.

MIL 1006. Military Science III Leadership Lab. (1 cr. Prereq—Enrollment in 3131)

Involves leadership responsibilities for the planning, coordination, execution, and evaluation of various training and activities with Basic Course students and for the ROTC program. Students develop, practice, and refine leadership skills by serving and being evaluated in a variety of responsible positions.

MIL 1007. Military Science IV Leadership Lab. (1 cr. Prereq—Enrollment in 3140)

Involves leadership responsibilities for the planning, coordination, execution, and evaluation of various training and activities with Basic Course students and for the ROTC program. Students develop, practice, and refine leadership skills by serving and being evaluated in a variety of responsible positions.

MIL 1008. Military Science IV Leadership Lab. (1 cr. Prereq—Enrollment in 3141)

Involves leadership responsibilities for the planning, coordination, execution, and evaluation of various training and activities with Basic Course students and for the ROTC program. Students develop, practice, and refine leadership skills by serving and being evaluated in a variety of responsible positions.

MIL 1010. Introduction to ROTC. (1 cr. Prereq—Enrollment in 1001)

Increase self-confidence through team study and activities in basic drill, physical fitness, rappelling, leadership reaction course, first aid, making presentations, and basic marksmanship. Learn fundamental concepts of leadership in a profession in both classroom and outdoor lab environments.

MIL 1011. Introduction to Leadership. (1 cr. Prereq—Enrollment in 1002)

Learn/apply principles of effective leading. Reinforce self-confidence through participation in physically and mentally challenging exercises. Relate organizational ethical values to the effectiveness of a leader. Participation in a weekend exercise is optional, but highly encouraged.

MIL 1220. Self/Team Development. (2 cr; A-F only. Prereq—Enrollment in Basic Course)

Learn and apply ethics-based leadership skills that develop individual abilities and contribute to the building of effective teams. Develop skills in oral presentations, writing concisely, planning of events, coordination of group efforts, advanced first aid, land navigation, and basic military tactics. Fundamentals of ROTC’s Leadership Development program.

MIL 1221. Individual/Team Military Tactics. (2 cr; A-F only. Prereq—Enrollment in Basic Course)

Individual and team aspects of military tactics in small unit operations. Use of radio communications, making safety assessments, movement techniques, planning for team safety/security and methods of pre-execution checks. Practical exercises with upper division ROTC students.

MIL 3130. Leading Small Organizations I. (3 cr. Prereq—Enrollment in Advanced Course)

Series of practical opportunities to lead small groups, receive personal assessments and encouragement, and lead again in situations of increasing complexity. Uses small unit defensive tactics and opportunities to plan and conduct training.

MIL 3131. Leading Small Organizations II. (3 cr. Prereq—Enrollment in Advanced Course)

Continues methodology of 3130. Analyze tasks; prepare written or oral guidance for team members to accomplish tasks. Delegate tasks and supervise. Plan for and adapt to the unexpected in organizations under stress.

MIL 3140. Leadership Challenges and Goal Setting. (3 cr. Prereq—Enrollment in Advanced Course)

Plan, conduct, and evaluate activities of the ROTC cadet organization. Articulate goals, put plans into action to attain them. Assess organization cohesion and develop strategies to improve it. Develop confidence in skills to lead people and manage resources. Learn/apply various Army policies and programs.

MIL 3141. Transition to Lieutenant. (3 cr. Prereq—Enrollment in Advanced Course)

Continues the methodology from 3140. Identify and resolve ethical dilemmas. Refine counseling and motivating techniques. Examine aspects of tradition and law as they relate to leading as an officer in the Army. Prepare for a future as a successful Army lieutenant.

MIL 3970. Directed Studies. (3 cr. Prereq—A)

Modern Greek (MDGK)

Classical and Near Eastern Studies

College of Liberal Arts

MDGK 1001. Beginning Modern Greek I. (4 cr)

Speaking and reading demotic Greek. Pattern-practice drill, simple readings, some grammar.

MDGK 1002. Beginning Modern Greek II. (4 cr. Prereq—1001 or #)

Speaking and reading demotic Greek. Pattern-practice drill, simple readings, some grammar.

MDGK 1003. Intermediate Modern Greek I. (4 cr.

Prereq—1002 or #)

Review the fundamentals of syntax through various readings from Modern Greek prose writers and poets. Provides additional grammatical elements which are reinforced through reading, conversation, and composition.

MDGK 1004. Intermediate Modern Greek II. (4 cr.

Prereq—1003 or #)

Review the fundamentals of syntax through various readings from Modern Greek prose writers and poets. Provides additional grammatical elements which are reinforced through reading, conversation, and composition.

Mortuary Science (MORT)

Medical School

MORT 3005. History of Funeral Service. (2 cr; A-F only)

Development of funeral practices from a historical perspective with emphasis on ethnic and cultural groups that have had an impact on contemporary funeral service.

MORT 3012. Organization and Management of Funeral Business. (3 cr; A-F only. Prereq—Mortuary science major)

How to create an entrepreneurial marketing strategy and business plan for a small funeral business. Various forms of ownership. Financial requirements, risk management, human resources management. Theory supplemented with practical information, real-life experiences.

MORT 3014. Funeral Service Rules and Regulations. (2 cr; A-F only. Prereq—Mortuary science major)

Licensing/government regulations, compliance with regulations of state/federal regulatory agencies, cemetery and crematory rules and regulations, and Federal Trade Commission Funeral Practice Rule for the funeral industry.

MORT 3016. Funeral Service Marketing and Merchandising. (3 cr; A-F only. Prereq—Mortuary science major)

Introduction to key elements of funeral service merchandising/marketing. How to manage delivery process. Theory supplemented with contemporary product offerings, merchandising techniques.

MORT 3018. Funeral Practice. (3 cr. Prereq—Mortuary science major)

Practices and procedures related to funeral directing, including social, religious, ethical, and cultural issues; event planning; conducting funeral ceremonies; record keeping; computer applications.

MORT 3019. Funeral Practice II. (3 cr. Prereq—3018, mortuary science major)

Methods/procedures of final disposition. Cremation, cemetery, and interment laws. Monuments. Computer use/applications related to funeral service practice. Field trips to cemeteries and burial vault plant.

MORT 3021W. Funeral Service Psychology. (3 cr; A-F only)

Applied psychological principles helpful in dealing with clients, especially those experiencing emotional crisis.

MORT 3022W. Funeral Service Counseling. (3 cr; A-F only)

Principles, techniques, and basic helping skills of counseling as applied to funeral arrangement conference.

MORT 3025. Business Law. (3 cr; A-F only)

Basic concepts/principles of business law.

MORT 3030. Funeral Service Law. (3 cr; A-F only)

Duty of burial, right to control funeral arrangements. Torts involving final disposition of human remains. Wills, estates, probate. State/federal laws related to funeral practice.

MORT 3049. Microbiology. (2 cr; A-F only)

Basic principles of microbiology. Bacteriology, rickettsiology, virology, protozoology, mycology. Methods of transmission of infectious diseases. Control procedures for protection of public health as related to funeral service practice.

MORT 3050. Forensic Pathology. (3 cr. Prereq—Mort Sci major or Δ)

Investigating patterns of injury/disease as related to sudden, unusual, or unexpected deaths. Survey of natural disease processes, their effects on human body, from perspective of forensic investigation.

MORT 3051. Restorative Art. (2 cr; A-F only. Prereq—Mortuary science major)

Theory and procedures of restorative art.

MORT 3055W. Complicated Grief. (3 cr; A-F only. Prereq—

Working understanding of grief/loss)

Issues related to loss, grief, bereavement, traumatology. Complicated bereavement/traumatology, complicated vs. non-complicated loss. Current treatment methods.

MORT 3061. Embalming Theory. (3 cr; A-F only. Prereq—

Mortuary science major)

Principles/procedures of embalming theory as related to funeral service practice.

MORT 3065. Embalming Chemistry. (3 cr; A-F only.

Prereq—Intro course in general chemistry, registration in mortuary science)

Fundamentals of organic chemistry and biochemistry. Chemical changes in human body during life, after death, and during chemical preservation. Disinfection, toxicology, embalming fluids.

MORT 3090. Independent Study Project. (1-15 cr [max 30

cr]. Prereq—Mortuary science major)

Independent study contracted between instructor, program director, and student.

MORT 3091W. Independent Study in Funeral Service.

(1-4 cr [max 4 cr]. Prereq—Mortuary science major)

Students complete a project supervised by a faculty member. Credit(s) is negotiated with the faculty member based on the size and scope of the project. Students must demonstrate that the project has value within the major.

MORT 3151. Restorative Art Laboratory. (1 cr. Prereq—

Mortuary science major)

Practical principles and techniques for restorative art. Emphasis on modeling facial features with clay or wax and the use of restorative techniques and cosmetic application on dead human bodies.

MORT 3161. Embalming Laboratory. (1 cr. Prereq—Mortuary

science major)

Practices/procedures of embalming in a preparation room setting using human cadavers.

MORT 3171. Human Anatomy Laboratory. (2 cr; A-F only.

Prereq—3 cr of biology, 3 cr of human anatomy; limited space for non-mortuary science majors)

Study of gross human anatomy, using cadavers. How anatomical structures relate to processes of post-mortem examination, embalming, pathology, restorative art, and forensic science.

MORT 3370. Death and Dying Across Cultures and

Religions. (3 cr; A-F only. Prereq—Mort science major or Δ)

Cross-cultural competencies related to death, dying, and bereavement.

MORT 3379. Clinical Funeral Service Rotation. (3 cr [max

12 cr]; S-N only. Prereq—Mortuary science major)

Practical experience working in clinical settings related to funeral service. Rotation sites include licensed funeral homes, licensed crematories, licensed cemeteries, and affiliate institutions such as hospices, hospitals, morgues, and coroner/medical examiners offices.

MORT 3380. Funeral Service Practicum. (8 cr; S-N only.

Prereq—Mortuary science major who has completed all other coursework)

Practical experience during one academic term in a funeral home as assigned by the program.

Museum Studies (MST)

Bell Museum of Natural History

MST 5011. Museum History and Philosophy. (3 cr; A-F only.

Prereq—#)

Historical and philosophical roots of museum development in Europe and North America from the Renaissance to modern day museums and history centers. Emerging philosophical issues faced by museums today.

MST 5012. Museum Practices. (3 cr; A-F only. Prereq—5011

or #)

Practical aspects of museum work. Standards, practices, responsibilities, and issues, all set in greater museum context. Curatorial and educational duties, collections management, security, funding, boards, public relations, installation, and budgeting.

MST 5020. Internship. (1-4 cr [max 32 cr]; S-N only.

Prereq—5011, 5012, Δ)

Students arrange to perform a professional-level task in a museum of good standing under close supervision of a member of the museum's professional staff. Instructor must approve a work plan and report.

Music (MUS)

School of Music

College of Liberal Arts

MUS 440. Chamber Ensemble Registration. (0 cr)

Registration mechanism for chamber ensembles.

MUS 501. Fundamentals of Music for Music Majors. (0 cr.

Prereq—Music major or #)

Remedial theory course. Cover topics covered in 1501, but at a slower pace and with extra assistance.

Mus 901. Junior Recital. (0 cr; A-F only. Prereq—Music major, ¶applied music, #, Δ)

Preparation for junior recital. Student will be supervised by major applied instructor.

Mus 951. Senior Recital. (0 cr; A-F only. Prereq—Music major, ¶applied music, #, Δ)

Preparation for senior recital. Student will be supervised by major applied instructor.

MUS 1001. Fundamentals of Music. (3 cr. Prereq—For non-

music majors)

Study of music notation and fundamental concepts underlying musical structure. Intervals, clefs, chords, scales, cadences, harmonic analysis; rhythm and meter. Emphasis on active participation: playing the piano, singing, clapping rhythms, aural perception. Weekly lab assignments in vocal and piano performance.

MUS 1001H. Music Fundamentals. (3 cr)

Music notation. Concepts underlying musical structure. Intervals, clefs, chords, scales, cadences, harmonic analysis. Rhythm, meter. Emphasizes active participation: playing the piano, singing, clapping rhythms, aural perception. Weekly lab assignments in vocal/piano performance.

MUS 1013. Rock I: The Historical Origins and Development of Rock Music to 1970. (3 cr; A-F only) Musical, cultural, historical, social, and political evolution of rock music, from its traceable antecedents in mid-19th century America through the early 1970s. Emphasizes manner in which African, European, and other ethnic traditions combined in a uniquely American manner.

MUS 1014. Rock II: Rock Music from 1970 to the Present. (3 cr)

Musical, cultural, and historical evolution of rock music and related pop forms. Progressive rock, punk, disco, new wave, MTV, heavy metal, hip-hop, grunge, turntable-based styles, women in rock.

MUS 1015. Music and Movies: The Use and Representation of Music and Musicians in Film in a Global Context. (4 cr; A-F only)

Film from perspectives of its use/representation of music/musicians. How does music underscore nuances of action, characterization, and feeling in film? Roles of music in film musicals, rock, and other vernacular films. Films about musical life. Films whose structure is musically based.

MUS 1021. Introduction to Music. (3 cr. \$MUS 3021) Survey of European/American "art," "popular" music in context of those cultures. Aural analyses of musical styles/forms.

MUS 1051. Class Piano for Nonmusic Majors I. (2 cr) For nonmusic majors with little or no keyboard background. Functional skills such as reading, harmonizing, playing by ear and improvising, along with basic technique and study of elementary solo and ensemble repertoire.

MUS 1052. Class Piano for Non Music Majors II. (2 cr) For nonmusic majors with little or no keyboard background. Functional skills such as reading, harmonizing, playing by ear and improvising, along with basic technique and study of elementary solo and ensemble repertoire.

MUS 1151. Piano: Class Lessons I. (2 cr; A-F only. Prereq—Music major, #) Functional skills such as reading, transposing, harmonizing, improvising, and playing by ear. Keyboard theory, technique, and repertoire.

MUS 1152. Piano: Class Lessons II. (2 cr; A-F only. Prereq—1051, #) Functional skills such as reading, transposing, harmonizing, improvising, and playing by ear. Keyboard theory, technique, and repertoire.

MUS 1155. Keyboard Skills I. (2 cr; A-F only. Prereq—[Keyboard major or music major], extensive keyboard background, #) Reading, transposing, harmonizing, improvising, and playing by ear. Keyboard theory, technique, and music learning skills.

MUS 1156. Keyboard Skills II. (2 cr; A-F only. Prereq—1155, #)

Reading, transposing, harmonizing, improvising, and playing by ear. Keyboard theory, technique, and music learning skills.

MUS 1260. Voice Class. (2 cr [max 4 cr]. Prereq—Basic musicianship for learning and performing simple songs) The fundamentals of speech and singing including information about the vocal instrument, the vocal process, vocal technique, and how to learn and perform three simple songs.

MUS 1471. Guitar: Class Lessons I. (2 cr; A-F only) Fundamentals for the beginning guitarist; progressive development of skills. Basic strumming techniques, harmonizations in basic keys. Students must furnish acoustic guitar.

MUS 1472. Guitar: Class Lessons II. (2 cr; A-F only. Prereq—1471 or #) Fundamentals for the beginning guitarist; progressive development of skills. Advanced strumming techniques, bass runs, finger-picking strums. Students must furnish acoustic guitar.

MUS 1501. Theory and Analysis of Tonal Music I. (2 cr; A-F only. Prereq—Music major or #) Common-practice tonal harmony, part-writing, music analysis in various contexts.

MUS 1502. Theory and Analysis of Tonal Music II. (2 cr; A-F only. Prereq—[1501, 1511] with grade of at least C-] or diagnostic test administered by School of Music) Basics of common-practice tonal harmony/part-writing. Music analysis in various contexts.

MUS 1511. Ear-Training and Sight-Singing I. (1 cr; A-F only. Prereq—Music major or #) Ear-training, sight-singing of tonal music.

MUS 1801W. Music, Society, and Cultures. (3 cr; A-F only. Prereq—[Music major or #], permission number) Study rural, urban, tribal musics throughout world with interdisciplinary methods of humanities/social sciences. World-wide distribution of musical creativity with audio/video documentation.

MUS 1804. World Music. (3 cr) Musical practice/meaning around the world and in our backyard. World music styles/perspectives in cultural context. Lectures, in-class music making, guest artists, videos, listening.

MUS 1902. Topics: Freshman Seminar. (3 cr; A-F only. Prereq—Freshman) Topics specified in *Class Schedule*.

MUS 1904. Freshman Seminar. (3 cr [max 6 cr]) Topics vary.

MUS 1905. Topics: Freshman Seminar. (3 cr; A-F only. Prereq—Freshman) Topics specified in *Class Schedule*.

MUS 1907W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq—Freshman) Topics specified in *Class Schedule*.

MUS 1910W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq—Freshman) Topics specified in *Class Schedule*.

MUS 3021. Introduction to Music. (3 cr. \$MUS 1021) Survey of European and American .art. and .popular. music in the context of those cultures; aural analyses of musical styles and forms.

MUS 3029. Music in the 20th Century. (3 cr. \$HUM 3029) Music in European and American culture from 1890s to present. Emphasizes interactions between high art, popular and ethnic musics, contributions of men and women as composers and performers, concurrent developments in the arts, dance, and literature, and music as social commentary.

MUS 3045. The Avant-Garde. (3 cr; A-F only) Introduction to recent music. Composers of the American musical avant-garde, ca. 1950-1970, including John Cage and Pauline Oliveros, in their sonic/social contexts. Non-Western culture's recent effect on music. Reading, listening, journal writing, original composition, performance.

MUS 3150. Accompanying Skills. (1 cr [max 8 cr]; A-F only. Prereq—Jr or sr piano or organ major or #) A practical introduction to every facet of the art of piano as an accompaniment and collaborative instrument.

MUS 3230. Chorus. (1 cr [max 8 cr]. Prereq—Choral and/or instrumental music background, audition, #) Includes the University Women's Chorus, Men's Chorus, Concert Choir, and Choral Union. Choirs participate in a variety of programs exploring both Western and non-Western repertoire from the Middle Ages through the 20th century. Concerts include touring, and collaborative campus and community performances.

MUS 3241. Vocal Literature (German Lieder) and Pedagogy. (1 cr; A-F only. Prereq—[Vocal performance or accompanying major], 2 yrs music theory/history) German Lied: its origins, composers, and development. Musical/textual analysis of representative works. Poetry that serves as song text. Poets in German Romantic period. Topics/issues associated with voice in speech/singing. Vocal anatomy/physiology, process/methods/techniques, care. Listening assignments.

MUS 3242. Vocal Literature (French Melodie) and Pedagogy. (1 cr; A-F only. Prereq—[Vocal music or accompanying major], 2 yrs of music theory/history) French MÈlodie: its origins, composers, and development. Musical/textual analysis of representative works. Poetry that serves as song text. French symbolist poets. Listening assignments.

MUS 3261. Italian Diction for Singers. (1 cr; A-F only. Prereq—Voice or choral music major, # [applied voice]) The sounds and symbols of the International Phonetic Alphabet, rules for correct Italian lyric diction, rudimentary Italian grammar, the meanings of Italian musical expressive markings, and Italian words most commonly found in song texts.

MUS 3262. English Diction for Singers. (1 cr; A-F only. Prereq—Voice or choral music major, # [applied voice]) English lyric diction for performance of classical vocal music. Use International Phonetic Alphabet for standard transcriptions of song texts, compile a discography of British/American art songs, perform songs in class, and prepare poetry for oral presentation and improvisation.

MUS 3263. German Diction for Singers. (1 cr; A-F only. Prereq—Voice or choral music major, # [applied voice]) Principles and practice of German lyric diction for classical vocal music. Transcriptions of German Lieder into International Phonetic Alphabet, elementary German grammar and common song vocabulary, 4 to 5 German songs performed in class for critique, and rules for pronunciation.

MUS 3264. French Diction for Singers. (1 cr; A-F only. Prereq—Voice or choral music major, concurrent enroll in applied voice) Principles and practice of French lyric diction for classical vocal music. Transcriptions of French MÈlodie into International Phonetic Alphabet, elementary French grammar and common song vocabulary, 4 to 5 French songs performed in class for critique, and rules for pronunciation.

MUS 3340. Jazz Ensemble. (1 cr [max 8 cr]; A-F only. Prereq—Audition, #) A 20-member performing organization covering significant jazz compositions and arrangements written specifically for this medium.

MUS 3350. Jazz Combo. (1 cr [max 8 cr]; A-F only. Prereq—Audition, #) A performance laboratory class with emphasis on improvisation and learning the jazz vocabulary. A minimum of two public performances is required each semester.

MUS 3380. Gospel Choir. (1 cr [max 8 cr]; A-F only) Performance ensemble. Students explore history of gospel music through experiential/participatory songs. Field songs, songs of struggle. Southern, traditional, and contemporary songs.

MUS 3400. University and Campus Bands. (1 cr [max 10 cr]) Lab course.

MUS 3401. Basic Conducting. (2 cr; A-F only. Prereq—1502, music major) Beginning course in basic conducting techniques and role of the conductor.

MUS 3410. University Wind Bands. (1 cr [max 14 cr]; A-F only. Prereq—Audition, #) Wind ensemble and symphony bands perform standard and contemporary literature; concerts and tour appearances. Players from all colleges may participate.

MUS 3420. Orchestra. (1 cr [max 8 cr]; A-F only. Prereq–Audition, #)

Symphony orchestra performs standard repertoire and major works with chorus; concerts and tour appearances. Players from all colleges may participate.

MUS 3430. Campus Orchestra. (1 cr [max 8 cr]. Prereq–Audition, #)

An orchestra for players who are not music majors and/or are unable to register for University Orchestra. Standard chamber orchestra and string orchestra literature rehearsed and performed.

MUS 3440. Chamber Ensemble. (1 cr [max 8 cr]; A-F only. Prereq–#)

Performance of chamber music; duos, trios, quartets, quintets, and other ensemble combinations for instruments and voices.

MUS 3460. Ensemble for the Performance of Early Music, c900–1750. (1 cr [max 8 cr])

Performance of medieval, renaissance, and baroque music (sacred and secular) according to traditions established from c900 to 1750. Ensemble consists of a chamber chorus and consorts of period instruments. Repertoire includes Gregorian chant, masses, motets, chansons, madrigals, and choral/instrumental movements from cantatas, oratorios, passions, all in original languages.

MUS 3480. Marching Band. (1 cr [max 4 cr]; A-F only. Prereq–#)

A 250-member performing organization open to players from all colleges. Performs at University football games and other athletic functions.

MUS 3490. Athletics Bands. (1 cr [max 16 cr]; A-F only. Prereq–#)

Athletics bands for men's hockey, men's basketball, and women's sports.

MUS 3501. Theory and Analysis of Tonal Music III. (2 cr; A-F only. Prereq–[[1501, 1502, 1511, 1512] with grade of at least C-] or diagnostic test administered by School of Music) Harmony and voice-leading. Diatonic and basic chromatic chords. Form. Analysis of music from 18th/19th centuries.

MUS 3502. Theory and Analysis of Tonal Music IV. (2 cr; A-F only. Prereq–[[3501, 3511] with grade of at least C-] or diagnostic test administered by School of Music) Harmony and voice-leading. Chromatic tonal practices. Form, including sonata, rondo, variations, and other standard categories of tonal composition. Analysis of music from 18th/19th centuries.

MUS 3508. Review of Tonal Theory. (3 cr; A-F only. Prereq–Theory placement exam)

Fast-paced review of 1501, 1502, and 3501. Focuses on diatonic and basic chromatic procedures, part-writing, and analysis.

MUS 3509. Review of Tonal Theory IV. (2 cr; A-F only. Prereq–Grad music student or #)

Remedial course. Harmony, voice-leading. Chromatic tonal practices. Form, including sonata, rondo, variations, and other standard categories of tonal composition. Analysis of music from 18th/19th centuries.

MUS 3511. Ear-Training and Sight-Singing III. (1 cr; A-F only. Prereq–[[1501, 1511] with grade of at least C-] or diagnostic test administered by School of Music, [music major or #]) Melodic, harmonic, and rhythmic dictation. Sight-singing. Clef reading. Emphasizes chromatic harmony.

MUS 3518. Review of Ear-Training and Sight-Singing. (1 cr; A-F only. Prereq–Theory Placement Exam)

Fast-paced review of 1502 and 3501 focusing on diatonic and basic chromatic procedures. Emphasis on melodic and harmonic dictation. Individual sight-singing auditions.

MUS 3519. Review of Ear-Training and Sight-Singing. (1 cr; A-F only. Prereq–Grad student in music or #)

Remedial course. Fast-paced review of 3502. Focuses on diatonic/basic chromatic procedures. Emphasizes melodic/harmonic dictation. Individual sight-singing auditions.

MUS 3601W. History of Western Music I. (3 cr; A-F only. Prereq–Δ)

History of European art-music tradition, its social contexts from antiquity to 1700: composers, styles, structures, social institutions.

MUS 3602W. History of Western Music II. (3 cr; A-F only. Prereq–1502, 3601, music major, #)

History of European art-music tradition, its social contexts, from 1700 to 1850. Composers, styles, structures, social institutions.

MUS 3603W. History of Western Music III. (3 cr; A-F only. Prereq–1503, 3602, music major, #)

History of European/American art, popular music traditions, from 1850 to present. Composers, styles, structures, social institutions.

MUS 3950. Topics in Music. (1-3 cr [max 15 cr])

Each offering focuses on a single topic. Topics specified in *Class Schedule*.

MUS 3993. Directed Studies. (1-4 cr [max 10 cr]; A-F only. Prereq–#, Δ, α)

Guided individual reading or study.

MUS 3995. Major Project. (1 cr; A-F only. Prereq–Undergrad music major in B.A. program, #, Δ)

Required of music majors in senior year of the B.A. program. Research paper on topic of student's choice in consultation with faculty mentor. Sign up in Undergraduate Studies office one term in advance.

MUS 4502. 18th-Century Counterpoint. (3 cr; A-F only.

Prereq–[3501, 3508] or pass basic skills exam) Harmony and voice-leading. Advanced chromatic practices. Analysis of music from late 19th/early 20th centuries. Ear-training, sight-singing.

MUS 4503. Theory and Analysis of Tonal Music V. (3 cr)

Harmony, voice-leading. Advanced chromatic practices. Analysis of music from late 19th/early 20th centuries. Ear-training, sight-singing.

MUS 4504. Intensive Theory and Analysis of 20th-Century Music. (4 cr; A-F only. Prereq–3502 or #)

Theory/analysis of art music in various styles developed in 20th century.

MUS 4505. Jazz Theory. (3 cr; A-F only. Prereq–3502 or #)

Beginning through advanced techniques for chord construction. Extended chords. Nomenclature in jazz idiom.

MUS 5101. Piano Pedagogy I. (2 cr. Prereq–8 cr in MUSA 1301 or MUSA 1401 or #)

Demonstration and discussion of teaching techniques, methods, and materials for group and individual instruction at the elementary, early intermediate, and late intermediate levels.

MUS 5102. Piano Pedagogy II. (2 cr. Prereq–8 cr in MUSA 1301 or MUSA 1401 or #)

Demonstration and discussion of teaching techniques, methods, and materials for group and individual instruction at the elementary, early intermediate, and late intermediate levels.

MUS 5111. Advanced Piano Pedagogy I. (2 cr; A-F only. Prereq–5102 or grad piano major or #)

Demonstration and discussion of teaching techniques, methods, and materials for group and individual instruction at the intermediate and early advanced levels.

MUS 5112. Advanced Piano Pedagogy II. (2 cr; A-F only. Prereq–5101 or grad piano major or #)

Demonstration and discussion of teaching techniques, methods, and materials for group and individual instruction at the intermediate and early advanced levels.

MUS 5120. Piano Pedagogy Practicum. (1 cr [max 4 cr]; A-F only. Prereq–5101-5102 or 5111-5112 or #)

Supervised teaching of a piano pupil or group of pupils for one semester (minimum 12 weeks for one half-hour per week). Supervising instructor will assist with selection of materials, periodic consultation, and observation (live or video taped) of selected lessons.

MUS 5150. Body Awareness in Activity: The Alexander Technique for Musicians. (2 cr [max 4 cr])

Alexander technique with specific applications to music performance. Emphasis on body/mind awareness to promote technical ease and freedom.

MUS 5151. Organ Literature I. (3 cr; A-F only. Prereq–3502, 3603, sr or grad or #)

Organ literature from the 14th century to the mid-18th century. Influence of organ design of various periods and national schools on the literature and its performance.

MUS 5152. Organ Literature II. (3 cr; A-F only. Prereq–3502, 3603, sr or grad or #)

Organ literature of J. S. Bach and of other 19th- and 20th-century composers. Influence of organ design of various periods and national schools on the literature and its performance.

MUS 5160. Instrumental Accompanying Skills and Repertoire. (2 cr [max 4 cr]; A-F only. Prereq–Accomp major)

Performance class in accompanying skills particular to orchestral reductions and non-sonata instrumental accompanying. Repertoire to include, but not be limited to, classical and romantic string concerti, and "encore" pieces.

MUS 5170. Vocal Accompanying Skills and Repertoire. (2 cr [max 4 cr]; A-F only. Prereq–French, German and Italian diction, accomp or grad vocal major)

Performance class (Lieder, melodie, opera) with emphasis on coaching techniques and performance skills of pianists and singers.

MUS 5181. Advanced Piano Literature I. (2 cr; A-F only. Prereq–Grad piano major or #)

Literature for piano from late Baroque period to mid-20th century.

MUS 5182. Advanced Piano Literature II. (2 cr; A-F only. Prereq–Grad piano major or #)

Literature for piano from late Baroque period to mid-20th century.

MUS 5230. Chorus. (1 cr [max 8 cr]. Prereq–Choral and/or instrumental music background; audition, #)

University Women's Chorus, Men's Chorus, Concert Choir and Choral Union. Choirs participate in a variety of programs exploring both Western and non-Western repertoire from the Middle Ages through the 20th century. Concerts include touring, and collaborative campus and community performances.

MUS 5240. Chamber Singers. (1 cr [max 8 cr]; A-F only. Prereq–Audition, #)

Mixed chorus of about 24 voices. Performances each semester of works for small choirs.

MUS 5241. Vocal Literature I. (3 cr; A-F only. Prereq–[12 cr in MUSA 1304, grad music student] or #)

Vocal literature of major/minor composers from 17th century to present. Structure, style, performance practice.

MUS 5242. Vocal Literature II. (3 cr; A-F only. Prereq–12 cr in MUSA 1104 or MUSA 1304, grad music major or #)

Vocal literature of major and minor composers from 17th century to present; structure, style, and performance practice.

MUS 5250. Opera Workshop and Ensemble. (1 cr [max 8 cr]; A-F only. Prereq–audition, #)

Preparation and performance of operatic arias, choruses, and scenes. Participation in fully staged or workshop productions of music theatre repertoire.

MUS 5270. Voice Practicum. (1 cr [max 2 cr]. Prereq–Undergrad sr vocal major or #)

Teaching voice class or individual students with peer and faculty feedback. Assist in class voice instruction or teach two students weekly in conjunction with two one-hour observation labs. May be taken for two semesters.

MUS 5271. Diction for Singers I. (2 cr; A-F only. Prereq–12 cr MUSA 1304 or grad music major or #)

Principles and techniques of singing in English, Italian, Spanish, German, and French. International Phonetic Association alphabet used.

MUS 5272. Diction for Singers II. (2 cr; A-F only. Prereq=12 cr MUSA 1304 or grad music major or #)
Principles and techniques of singing in English, Italian, Spanish, German, and French. International Phonetic Association alphabet used.

MUS 5275. Vocal Pedagogy I. (3 cr. Prereq=Sr vocal major or #)
Advanced study of mind/body preparations for singing, anatomy, and physiology of the vocal mechanism. Voice use and care, historical and comparative pedagogy, learning theories, models and guidelines for teaching, instructional techniques, and diagnosing and solving vocal problems.

MUS 5277. Vocal Workshop. (1-2 cr [max 8 cr]; A-F only. Prereq=Music major or #)
Short term vocal workshops address specific topics including voice science, pedagogy, and performance of vocal repertoire. One workshop focuses on class voice instruction.

MUS 5279. Group Voice: Performance/Pedagogy. (2-3 cr; A-F only. Prereq=Performance only track: 2 cr per sem; performance/pedagogy track: 3 cr per sem; [upper div student or grad student], #)
Foundations/fundamentals of speech/singing. Vocal production, anatomy, physiology, terminology. Application of vocal techniques in learning/performing repertoire. Teaching methods, including voice/motion exercises.

MUS 5280. Opera Theatre. (2 cr [max 16 cr]; A-F only. Prereq=audition, #)
Preparation and performance of fully-staged operatic production. Major involvement in singing, acting, and technical aspects of opera.

MUS 5336. Jazz Arranging. (3 cr; A-F only. Prereq=3502 or #)
Beginning techniques of arranging for jazz combo and jazz ensemble; vocal and instrumental.

MUS 5340. Jazz Ensemble. (1 cr [max 6 cr]; A-F only. Prereq=audition, #)
A 20-member performing organization covering significant jazz compositions and arrangements written specifically for this medium.

MUS 5341. Jazz Pedagogy. (2 cr; A-F only. Prereq=#)
Teaching methods of vocal and instrumental jazz improvisation, basic arranging techniques, and jazz history; bibliographies and materials.

MUS 5380. Gospel Choir. (1 cr [max 4 cr]; A-F only)
Performance ensemble. Students explore history of gospel music through experiential/participatory songs. Field songs, songs of struggle. Southern, traditional, and contemporary songs.

MUS 5400. University and Campus Bands. (1 cr [max 10 cr])
Lab course.

MUS 5410. University Wind Bands. (1 cr [max 14 cr]; A-F only. Prereq=audition, #)
Wind ensemble and symphony bands perform standard and contemporary literature; concerts and tour appearances. Players from all colleges may participate.

MUS 5420. Orchestra. (1 cr [max 8 cr]; A-F only. Prereq=audition, #)
Symphony orchestra performs standard repertory and major works with chorus; concerts and tour appearances. Players from all colleges may participate.

MUS 5421. Suzuki Violin Pedagogy I. (2 cr; A-F only. Prereq=Violin major or #)
Philosophy and teaching techniques of Japanese pedagogue Shinichi Suzuki and their applications in Western culture. Discussion, playing experience, and observation of children's lessons in the MacPhail Center Suzuki Program.

MUS 5422. Suzuki Violin Pedagogy II. (2 cr; A-F only. Prereq=5421 or #)
Philosophy and teaching techniques of Japanese pedagogue Shinichi Suzuki and their applications in Western culture. Discussion, playing experience, and observation of children's lessons in the MacPhail Center Suzuki Program.

MUS 5423. Suzuki Pedagogy Practicum. (1 cr; A-F only. Prereq=(15424 or 15425), grad music student) or #, grad consent)
Supervised teaching of both individual and group lessons. Instructor provides periodic critiques from observation of live or videotaped lessons.

MUS 5424. Advanced Suzuki Violin Pedagogy I. (2 cr; A-F only. Prereq=5422 or #)
Intensive examination of Suzuki techniques for intermediate and advanced violin students in Western society. Discussion, playing experience, observation of children's lessons in the MacPhail Center Suzuki Program, and practical teaching experience.

MUS 5425. Advanced Suzuki Violin Pedagogy II. (2 cr; A-F only. Prereq=5424 or #)
Intensive examination of Suzuki techniques for intermediate and advanced violin students in Western society. Discussion, playing experience, observation of children's lessons in the MacPhail Center Suzuki Program, and practical teaching experience.

MUS 5427. Violin Pedagogy I. (2 cr; A-F only. Prereq=Violin or viola major or #)
Private teaching of violin students at beginning, intermediate, and advanced levels. Discussion and demonstrations of pedagogical techniques.

MUS 5428. Violin Pedagogy II. (2 cr; A-F only. Prereq=Violin or viola major or #)
Private teaching of violin students at beginning, intermediate, and advanced levels. Discussion and demonstrations of pedagogical techniques.

MUS 5430. New Music Ensemble. (1 cr [max 8 cr]; A-F only. Prereq=#)
Study/performance of contemporary ensemble (including small chamber orchestra) literature. Historical/theoretical analysis of works performed.

MUS 5440. Chamber Ensemble. (1 cr [max 8 cr]; A-F only. Prereq=audition, #)
Performance of chamber music; duos, trios, quartets, quintets, and other ensemble combinations for instruments and/or voices.

MUS 5450. Orchestral Repertoire. (1 cr [max 3 cr]; A-F only. Prereq=#)
Investigation of practical and performance problems in standard orchestral repertoire with regard to style and interpretation.

MUS 5460. Ensemble for the Performance of Early Music, c900-1750. (1 cr [max 8 cr])
Performance of medieval, renaissance, and baroque music (sacred and secular) according to traditions established from c900 to 1750. Ensemble consists of a chamber chorus and consorts of period instruments. Repertoire includes Gregorian chant, masses, motets, chansons, madrigals, and choral/instrumental movements from cantatas, oratorios, passions, all in original languages.

MUS 5464. Cello Pedagogy. (2 cr; A-F only)
Concentrated study of cello teaching methods. Provides students with the strategies for teaching cello privately, develops analytical skills, and increases knowledge of cello repertoire. For practical application in conjunction with string technique course.

MUS 5466. Guitar Pedagogy. (2 cr; A-F only. Prereq=Guitar principal or major or #)
Historical survey of methods and etudes from late 18th century to present, reflecting variety of content and approach. Works by Aguado, Sor, Giuliani, Tarrega, Segovia, Carlevaro, Duncan, Iznaola, Dodgson, and Brindle.

MUS 5470. Woodwind Chamber Ensemble. (1 cr [max 8 cr]; A-F only. Prereq=audition, #)
Chamber music performance using homogeneous or mixed combinations of woodwind instruments.

MUS 5471. Woodwind Literature and Pedagogy I. (3 cr; A-F only. Prereq=Music major or #)
A study of the major teaching materials for the five woodwind instruments including methods, duets, and solos used primarily for pedagogical reasons.

MUS 5472. Woodwind Literature and Pedagogy II. (3 cr; A-F only. Prereq=Music major or #)
A study of chamber music involving one or more woodwind instruments. May include additional instruments such as piano, strings, and/or voice.

MUS 5473. History and Acoustics of Single Reed Instruments. (2 cr; A-F only. Prereq=Music major or #)
Study of clarinet and saxophone history and literature, mechanical design and development, acoustics, modern schools of performance, selected teaching and performance techniques.

MUS 5480. University Brass Choir. (1 cr [max 8 cr]. Prereq=Audition, #)
The University Brass Choir is an ensemble of 16 brass and percussion players exploring unique literature that spans 400 years. From the rich antiphonal music of Giovanni Gabrieli (1557-1612) to the works of the 20th century. The Brass Choir performs in Twin Cities churches and concert halls.

MUS 5481. Trumpet Pedagogy. (2 cr. Prereq=Sr or grad in music or #)
Principles of trumpet pedagogy. Discussion of literature, history, and current teaching aids.

MUS 5485. TrANSCRIPTION for Winds. (2 cr. Prereq=3502 or #)
Principles of music manuscript and examination of transcription examples. Transcription projects with score and parts. Smaller projects that involve arrangements and original compositions.

MUS 5490. Percussion Ensemble. (1 cr [max 10 cr]; A-F only. Prereq=#)
Practice and performance of standard and contemporary compositions for percussion instruments in various combinations.

MUS 5491. Percussion Literature I. (2 cr; A-F only. Prereq=Jr or sr or grad or #)
Repertoire derived from orchestral and band literature for snare drum, timpani, mallet instruments, and various percussion accessories. Major works of the 20th century written for solo percussion, percussion ensemble, and chamber groups of percussion and non-percussion instruments.

MUS 5492. Percussion Literature II. (2 cr; A-F only. Prereq=Jr or sr or grad or #)
Repertoire derived from orchestral and band literature for snare drum, timpani, mallet instruments, and various percussion accessories. Major works of the 20th century written for solo percussion, percussion ensemble, and chamber groups of percussion and non-percussion instruments.

MUS 5541. 16th-Century Counterpoint. (3 cr; A-F only. Prereq=[3501, 3508] or pass basic skills exam)
Polyphonic counterpoint in modal style of Renaissance. Writing exercises in species counterpoint and in two, three, and four parts. Cantus firmus techniques, mixed values, invertible counterpoint, canon. Representative works by Josquin, Lassus, Palestrina, Victoria, and others. Renaissance treatises by Artusi, Banchieri, Diruta, Morley, Zarlino, and others.

MUS 5550. Class Composition. (2 cr [max 8 cr]; A-F only. Prereq=3502 or #)
Original works in various forms. Development of individual compositional style in a post-tonal idiom. Various forms, performing forces, techniques.

MUS 5561. Orchestration I. (3 cr; A-F only. Prereq=3502)
Scoring techniques for ensembles in combination and full orchestra; year-long sequence. Score study of representative works from 18th through 20th centuries.

MUS 5562. Orchestration II. (3 cr; A-F only. Prereq=5561)
Scoring techniques for ensembles in combination and full orchestra; year-long sequence. Score study of representative works from 18th through 20th centuries.

MUS 5571. Schenkerian Analysis for Performers. (3 cr; A-F only. Prereq=3502)

Theory/analysis of tonal music using principles developed by Henrich Schenker. Basic concepts/notation, their application to excerpts/short pieces from 18th/19th centuries.

MUS 5572. Chromaticism in Tonal Music. (3 cr. Prereq=3502)

Exploration of chromatic tonal practices through analysis of selected repertoire, completion of written exercises (figured bass, harmonization of melodies, model composition), ear-training, and keyboard exercises.

MUS 5573. Analysis of Late-Romantic Orchestral Literature. (3 cr; A-F only. Prereq=3502 or Theory IV Exam or # 3504 or equiv recommended)

Introduction to advanced tonal analysis. Corpus of dramatic orchestral music by Wagner, Strauss, Tchaikovsky, Rimsky-Korsakov, Moussorgsky, and Rachmaninoff as focus for projects and classroom discussions related to chromatic harmony, form, and orchestration.

MUS 5591. Electronic Music: History, Literature,

Principles. (3 cr; A-F only. Prereq=#, at least jr)

In-depth survey of electroacoustic music repertoire, from tape/analog music through computer-generated compositions. Basic principles of acoustics, electronic sound generation/manipulation, digital signal processing techniques. Programming languages for digital sound synthesis. Work with editing software, MIDI applications.

MUS 5592. Digital Music Synthesis and Processing

Techniques. (3 cr; A-F only. Prereq=5591 or #)

Study of specific dsp topics such as filtering, formant synthesis, reverberation techniques, and additive synthesis. Work with interactive MIDI applications.

MUS 5597. Music and Text. (3 cr; A-F only. Prereq=3502)

Designed for music majors only, this course gives an introduction to the analysis of music with texts such as art song and opera.

MUS 5611. Resources for Music Research. (3 cr; A-F only. Prereq=3603)

Development of skills in identifying, locating, and evaluating resources for research in music. Computer-searching techniques, acquaintance with basic reference sources in the field, preparation of the music research paper.

MUS 5620. Topics in Opera History. (3 cr [max 6 cr]; A-F only. Prereq=Grad music major or #)

Study of specific operas. Development of opera in context of other artistic, social, cultural, and political events, movements, and changes. Periods/countries vary each semester.

MUS 5644. Music in 20th-Century American Culture. (3 cr; A-F only. Prereq=3603, 5501 or #)

Stylistic and cultural bases of cultivated and vernacular traditions and their intersections. Topics include folk and ethnic musics, ragtime, city blues and jazz, rock, musical theater, impact of technology, modernism, nationalism, new accessibility.

MUS 5647. 20th-Century European/American Music. (3 cr. Prereq=3603 or equiv, 5501 or equiv, 12 undergrad or in music history)

Emphasizes major artistic movements, stylistic turning points, social roles of music. Interactions between high art, popular, ethnic musics; contributions of men and woman as composers and performers.

MUS 5658. History of the Symphony in the 20th Century. (3 cr; A-F only. Prereq=3603, 5501 or #)

History of symphony (and related genres) in Europe and America, ca. 1890 to present. Changing aesthetic concerns, structural, harmonic, and timbral innovations. Sociocultural contexts; analysis and criticism.

MUS 5666. Stravinsky. (3 cr; A-F only. Prereq=5502, 12 cr music history)

Analysis and criticism of representative works; aesthetic concerns as expressed in writings of Stravinsky and others; influence upon European and American composers; biographical issues and contributions to artistic life, particularly the ballet.

MUS 5668. Beethoven's Symphonies. (3 cr; A-F only.

Prereq=3603, #)

Analytical overview of selected movements from Beethoven's 9 symphonies. Principles of sonata analysis (norm and deformation); introduction to wider contexts of interpretation and understanding (generic, expressive, social).

MUS 5804. Folk and Traditional Musics: Selected Cultures of the World. (3 cr; A-F only. Prereq=1801 or 1804 or music grad or #)

A study of selected music traditions from 5 to 7 world cultures. Genres, social institutions, concepts, styles, instruments, and usages.

MUS 5950. Topics in Music. (1-4 cr [max 15 cr])

Each offering focuses on a single topic. Topics specified in *Class Schedule*.

MUS 5993. Directed Studies. (1-4 cr [max 12 cr]. Prereq=#, Δ, □)

Guided individual reading or study.

Music Applied (MUSA)

School of Music

College of Liberal Arts

Note: MUSA 1101 through MUSA 1123 are private instruction and include the following: (2 cr [max 16 cr]; A-F only. Prereq=Audition, Δ)

MUSA 1101. Piano—Elective.

MUSA 1102. Harpsichord—Elective.

MUSA 1103. Organ—Elective.

MUSA 1104. Voice—Elective.

MUSA 1105. Violin—Elective.

MUSA 1106. Viola—Elective.

MUSA 1107. Cello—Elective.

MUSA 1108. Double Bass—Elective.

MUSA 1109. Flute—Elective.

MUSA 1111. Oboe—Elective.

MUSA 1112. Clarinet—Elective.

MUSA 1113. Saxophone—Elective.

MUSA 1114. Bassoon—Elective.

MUSA 1115. French Horn—Elective.

MUSA 1116. Trumpet—Elective.

MUSA 1117. Trombone—Elective.

MUSA 1118. Euphonium—Elective.

MUSA 1119. Tuba—Elective.

MUSA 1121. Percussion—Elective.

MUSA 1122. Harp—Elective.

MUSA 1123. Guitar—Elective.

Note: MUSA 1301 through MUSA 1523 are private instruction and unless otherwise noted, include the following: (2-4 cr [max 16 cr]; A-F only. Prereq=Audition, Δ)

MUSA 1301. Piano—Major.

MUSA 1302. Harpsichord—Major.

MUSA 1303. Organ—Major.

MUSA 1304. Voice—Major.

MUSA 1305. Violin—Major.

MUSA 1306. Viola—Major.

MUSA 1307. Cello—Major.

MUSA 1308. Double Bass—Major.

MUSA 1309. Flute—Major.

MUSA 1311. Oboe—Major.

MUSA 1312. Clarinet—Major.

MUSA 1313. Saxophone—Major.

MUSA 1314. Bassoon—Major.

MUSA 1315. French Horn—Major.

MUSA 1316. Trumpet—Major.

MUSA 1317. Trombone—Major.

MUSA 1318. Euphonium—Major.

MUSA 1319. Tuba—Major.

MUSA 1321. Percussion—Major.

MUSA 1322. Harp—Major.

MUSA 1323. Guitar—Major.

MUSA 1401. Piano—Secondary.

MUSA 1402. Harpsichord—Secondary.

MUSA 1403. Organ—Secondary.

MUSA 1404. Voice—Secondary.

MUSA 1405. Violin—Secondary.

MUSA 1406. Viola—Secondary.

MUSA 1407. Cello—Secondary.

MUSA 1408. Double Bass—Secondary.

MUSA 1409. Flute—Secondary.

MUSA 1411. Oboe—Secondary.

MUSA 1412. Clarinet—Secondary.

MUSA 1413. Saxophone—Secondary.

MUSA 1414. Bassoon—Secondary.

MUSA 1415. French Horn—Secondary.

MUSA 1416. Trumpet—Secondary.

MUSA 1417. Trombone—Secondary.

MUSA 1418. Euphonium—Secondary.

MUSA 1419. Tuba—Secondary.

MUSA 1421. Percussion—Secondary.

MUSA 1422. Harp—Secondary.

MUSA 1423. Guitar—Secondary.

MUSA 1501. Piano: Major Beyond Requirements.

MUSA 1502. Harpsichord: Major Beyond Requirements.

MUSA 1503. Organ—Major Beyond Requirements.

MUSA 1504. Voice—Major Beyond Requirements.

MUSA 1505. Violin—Major Beyond Requirements.

MUSA 1506. Viola—Major Beyond Requirements.

MUSA 1507. Cello—Major Beyond Requirements.

MUSA 1508. Double Bass—Major Beyond Requirements.

MUSA 1509. Flute—Major Beyond Requirements.

MUSA 1511. Oboe—Major Beyond Requirements.

MUSA 1512. Clarinet—Major Beyond Requirements.

MUSA 1513. Saxophone—Major Beyond Requirements.

MUSA 1514. Bassoon—Major Beyond Requirements.

MUSA 1515. French Horn—Major Beyond Requirements.

MUSA 1516. Trumpet—Major Beyond Requirements.

MUSA 1517. Trombone—Major Beyond Requirements

MUSA 1518. Euphonium—Major Beyond Requirements.

(2-4 cr [max 32 cr]. Prereq=Audition, Δ)

MUSA 1519. Tuba—Major Beyond Requirements.

MUSA 1521. Percussion—Major Beyond Requirements.

MUSA 1522. Harp—Major Beyond Requirements.

MUSA 1523. Guitar—Major Beyond Requirements.

Note: MUSA 1901 through MUSA 1923 are private instruction for transfer students, one semester only and include the following: (2-4 cr [max 4 cr]; A-F only. Prereq—Audition, Δ).

MUSA 1901. Piano—Transfer.

MUSA 1902. Harpsichord—Transfer.

MUSA 1903. Organ—Transfer.

MUSA 1904. Voice—Transfer.

MUSA 1905. Violin—Transfer.

MUSA 1906. Viola—Transfer.

MUSA 1907. Cello—Transfer.

MUSA 1908. Double Bass—Transfer.

MUSA 1909. Flute—Transfer.

MUSA 1911. Oboe—Transfer.

MUSA 1912. Clarinet—Transfer.

MUSA 1913. Saxophone—Transfer.

MUSA 1914. Bassoon—Transfer.

MUSA 1915. French Horn—Transfer.

MUSA 1916. Trumpet—Transfer.

MUSA 1917. Trombone—Transfer.

MUSA 1918. Euphonium—Transfer.

MUSA 1919. Tuba—Transfer.

MUSA 1921. Percussion—Transfer.

MUSA 1922. Harp—Transfer.

MUSA 1923. Guitar—Transfer.

Note: MUSA2301 through MUSA 2323 are private instruction and include the following: (2-4 cr [max 16 cr]; A-F only. Prereq—Audition, Δ)

MUSA 2301. Piano—Performance Major.

MUSA 2302. Harpsichord—Performance Major.

MUSA 2303. Organ—Performance Major.

MUSA 2304. Voice—Performance Major.

MUSA 2305. Violin—Performance Major.

MUSA 2306. Viola—Performance Major.

MUSA 2307. Cello—Performance Major.

MUSA 2308. Double Bass—Performance Major.

MUSA 2309. Flute—Performance Major.

MUSA 2311. Oboe—Performance Major.

MUSA 2312. Clarinet—Performance Major.

MUSA 2313. Saxophone—Performance Major.

MUSA 2314. Bassoon—Performance Major.

MUSA 2315. French Horn—Performance Major.

MUSA 2316. Trumpet—Performance Major.

MUSA 2317. Trombone—Performance Major.

MUSA 2318. Euphonium—Performance Major.

MUSA 2319. Tuba—Performance Major.

MUSA 2321. Percussion—Performance Major.

MUSA 2322. Harp—Performance Major.

MUSA 2323. Guitar—Performance Major.

Note: MUSA3101 through MUSA 3123 are private instruction and include the following: (2 cr [max 8 cr]; A-F only. Prereq—Audition, Δ).

MUSA 3101. Piano—Elective.

MUSA 3102. Harpsichord—Elective.

MUSA 3103. Organ—Elective.

MUSA 3104. Voice—Elective.

MUSA 3105. Violin—Elective.

MUSA 3106. Viola—Elective.

MUSA 3107. Cello—Elective.

MUSA 3108. Double Bass—Elective.

MUSA 3109. Flute—Elective.

MUSA 3111. Oboe—Elective.

MUSA 3112. Clarinet—Elective.

MUSA 3113. Saxophone—Elective.

MUSA 3114. Bassoon—Elective.

MUSA 3115. French Horn—Elective.

MUSA 3116. Trumpet—Elective.

MUSA 3117. Trombone—Elective.

MUSA 3118. Euphonium—Elective.

MUSA 3119. Tuba—Elective.

MUSA 3121. Percussion—Elective.

MUSA 3122. Harp—Elective.

MUSA 3123. Guitar—Elective.

Note: MUSA 3301 through MUSA 3309 are private instruction and include the following: (2-4 cr [max 16 cr]; A-F only. Prereq—Audition, Δ).

MUSA 3301. Piano—Major.

MUSA 3302. Harpsichord—Major.

MUSA 3303. Organ—Major.

MUSA 3304. Voice—Major.

MUSA 3305. Violin—Major.

MUSA 3306. Viola—Major.

MUSA 3307. Cello—Major.

MUSA 3308. Double Bass—Major.

MUSA 3309. Flute—Major.

Note: MusA 3311 through MusA 3323 are private instruction and include the following: (2-4 cr [max 24 cr]; A-F only. Prereq—Audition, Δ)

MUSA 3311. Oboe—Major.

MUSA 3312. Clarinet—Major.

MUSA 3313. Saxophone—Major.

MUSA 3314. Bassoon—Major.

MUSA 3315. French Horn—Major.

MUSA 3316. Trumpet—Major.

MUSA 3317. Trombone—Major.

MUSA 3318. Euphonium—Major.

MUSA 3319. Tuba—Major.

MUSA 3321. Percussion—Major.

MUSA 3322. Harp—Major.

MUSA 3323. Guitar—Major.

Note: MUSA 5101 through MUSA 5123 are private instruction and include the following: (2 cr [max 8 cr]; A-F only. Prereq—Audition, Δ)

MUSA 5101. Piano—Elective.

MUSA 5102. Harpsichord—Elective.

MUSA 5103. Organ—Elective.

MUSA 5104. Voice—Elective.

MUSA 5105. Violin—Elective.

MUSA 5106. Viola—Elective.

MUSA 5107. Cello—Elective.

MUSA 5108. Double Bass—Elective.

MUSA 5109. Flute—Elective.

MUSA 5111. Oboe—Elective.

MUSA 5112. Clarinet—Elective.

MUSA 5113. Saxophone—Elective.

MUSA 5114. Bassoon—Elective.

MUSA 5115. French Horn—Elective.

MUSA 5116. Trumpet—Elective.

MUSA 5117. Trombone—Elective.

MUSA 5118. Euphonium—Elective.

MUSA 5119. Tuba—Elective.

MUSA 5121. Percussion—Elective.

MUSA 5122. Harp—Elective.

MUSA 5123. Guitar—Elective.

Note: MUSA 5401 through MUSA 5423 are private instruction and, unless otherwise noted, include the following: (2-4 cr [max 24 cr]; A-F only. Prereq—Audition, Δ).

MUSA 5401. Piano—Secondary.

MUSA 5402. Harpsichord—Secondary.

MUSA 5403. Organ—Secondary.

MUSA 5404. Voice—Secondary.

MUSA 5405. Violin—Secondary.

MUSA 5406. Viola—Secondary.

MUSA 5407. Cello—Secondary.

MUSA 5408. Double Bass—Secondary.

MUSA 5409. Flute—Secondary.

MUSA 5411. Oboe—Secondary.

MUSA 5412. Clarinet—Secondary.

MUSA 5413. Saxophone—Secondary.

MUSA 5414. Bassoon—Secondary.

MUSA 5415. French Horn—Secondary. (2-4 cr [max 4 cr]. Prereq—Audition, Δ)

MUSA 5416. Trumpet—Secondary.

MUSA 5417. Trombone—Secondary.

MUSA 5418. Baritone—Secondary.

MUSA 5419. Tuba—Secondary.

MUSA 5421. Percussion—Secondary.

MUSA 5422. Harp—Secondary.

MUSA 5423. Guitar—Secondary.

Music Education (MUED)

School of Music

College of Liberal Arts

MUED 1201. Introduction to Music Education. (1 cr; A-F only)

Orientation to the profession of music education through in-school observations, readings, presentations, and self-reflection. Introduction to technology for music educators.

MUED 1801. Introduction to Music Therapy. (2 cr; A-F only) Methods, materials, and applications of music therapy in various clinical settings with emphasis on field observation.

MUED 3301. Teaching Elementary Vocal and General Music. (3 cr; A-F only. Prereq—Music ed major)

Methods, materials, curriculum development, principals of learning, the child voice, rhythm, music reading, history, appreciation, listening, creativity, classroom instruments, and applications of technology for elementary school classroom music.

MUED 3350. Student Teaching in Classroom Music. (4-8 cr [max 8 cr]; A-F only. Prereq—Music ed major, #)

Supervised teaching and observing of classroom and general music in elementary, junior high, and senior high schools. Weekly seminar emphasizing classroom management, curriculum development, and administration of music programs.

MUED 3415. Choral Conducting and Methods I. (4 cr; A-F only. Prereq—Music ed major or music therapy major or #) Development of basic choral conducting skills and rehearsal techniques. Diction for singing. Repertoire/arranging for various choral ensembles. Strategies/methods for teaching secondary general music, including interdisciplinary issues, keyboard, and guitar. The adolescent voice. Applications of technology.

MUED 3416. Choral Conducting and Methods II. (4 cr; A-F only. Prereq—Music ed major or #) Development of choral conducting skills and rehearsal techniques. Emphasizes interpretation of choral compositions. Methods, materials, and curriculum for school choral ensembles. Diction for singing. Secondary general music methodology.

MUED 3450. Student Teaching in Vocal Music. (4-8 cr [max 8 cr]; A-F only. Prereq—Music ed major, #) Supervised teaching and observing of vocal music in elementary, junior high, and senior high schools. Weekly seminar emphasizing classroom management, curriculum development, and administration of music programs.

MUED 3502. STRING Techniques and Teaching. (2 cr [max 3 cr]; A-F only. Prereq—Music ed or music therapy major or #) Playing experience on orchestral string instruments. Historical/acoustical background. Scoring for strings. Principles of improvisation. Basic concepts of teaching. Methods/materials. Techniques of individual/class instruction.

MUED 3503. Woodwind Techniques and Teaching. (2 cr; A-F only. Prereq—Music ed or music therapy major or #) Playing experience on instruments of the woodwind family. Historical/acoustical background. Scoring for brasses. Principles of improvisation. Basic concepts of teaching. Methods/materials. Techniques of individual/class instruction.

MUED 3504. Brass Techniques and Teaching. (2 cr [max 3 cr]; A-F only. Prereq—Music ed or music therapy major or #) Playing experience on instruments of the brass family. Historical/acoustical background. Scoring for brasses. Principles of improvisation. Basic concepts of teaching. Methods/materials. Techniques of individual/class instruction.

MUED 3505. Percussion Techniques and Teaching. (2 cr [max 3 cr]; A-F only. Prereq—Music ed or music therapy major or #) Playing experience on percussion instruments. Historical/acoustical background. Scoring for percussion. Principles of improvisation. Basic concepts of teaching. Methods/materials. Techniques of individual/class instruction.

MUED 3516. Instrumental Methods and Conducting I. (3 cr; A-F only. Prereq—Music ed major) Techniques for administering a school instrumental music program. Emphasizes rehearsal techniques, literature, and materials for school use. School-based experiences. Orchestration and arranging.

MUED 3517. Beginning Instrumental Methods and Materials. (3 cr; A-F only. Prereq—[1201, 3502, 3503, 3504, 3505, 3516, MUS 3401] with at least C-) Development of skills for teaching beginning instrumentalists.

MUED 3518. Instrumental Methods and Conducting II. (3 cr; A-F only. Prereq—[1201, 3502, 3503, 3504, 3505, 3516, 3517, MUS 3401] with at least C-) Students synthesize knowledge/skills to develop/maintain curricular-oriented, comprehensive instrumental music program.

MUED 3550. Student Teaching in Instrumental Music. (4-8 cr [max 8 cr]; A-F only. Prereq—Music ed major, #) Supervised teaching and observing of instrumental music in elementary, junior high, and senior high schools. Weekly seminar emphasizing classroom management, curriculum development, and administration of music programs.

MUED 3650. Student Teaching Seminar. (2 cr; A-F only. Prereq—At least C- in all required [music, music education, professional education] courses) Reflective practice during student teaching. Developing materials for professional employment (e.g., resume, portfolio).

MUED 3800. Introduction to Clinical Music Therapy Practice. (4 cr; A-F only. Prereq—Music therapy major or #) Introduction to lab and field studies of music therapy and music behavior. Pre-internship experiences in health, welfare, recreational, and educational settings.

MUED 3804. Applications of Music Therapy I: Music Therapy for Children in Rehabilitative Settings. (4 cr; A-F only. Prereq—Music therapy major, #) Examination of specific techniques in quantification of study of music behavior; projects using behavioral observations.

MUED 3805. Applications of Music Therapy II: Music Therapy in Long Term Care and Psychiatric Care. (4 cr; A-F only. Prereq—Music therapy major or #) Methods and materials for music therapy in school and hospital settings; designing and implementing programs for severely and moderately handicapped children and adults.

MUED 3806. Preparing for a Music Therapy Career. (4 cr; A-F only. Prereq—Music therapy major or #) Identify and explore current controversies, issues, and values encountered in music therapy. Explore and analyze counseling processes and techniques. Students are placed in a health care facility for the term to gain pre-internship experience.

MUED 3855. Music Therapy Internship. (6 cr; S-N only. Prereq—Music therapy major, #) Six-month resident internship in music therapy at an affiliated, approved hospital or clinic.

MUED 5011. Music in the Elementary Classroom Curriculum. (2 cr. Prereq—MUS 1001, elem ed grad student, Δ) Fundamentals of music, methods, and materials for incorporating singing, rhythmic activities, classroom instruments, movement, listening, appreciation, and creation into context of classroom curriculum.

MUED 5112. Research in Music Education: Techniques. (3 cr; A-F only. Prereq—Grad music ed major or #) Methods and techniques employed in investigating and reporting music education problems; proposal development; bibliographic skills involved in conducting a significant review of related research.

MUED 5115. Research in Music Education: Measurement. (3 cr; A-F only) Assessment of music behaviors, including test design, interpretation of test results, and evaluation and reporting of student achievement; published tests in music; uses of assessment and measurement in the classroom and in research.

MUED 5118. Research in Arts Education: Qualitative. (3 cr; A-F only. Prereq—Grad student in ARTS or #) Practical/systematic introduction to qualitative research procedures in arts education. Prepares students to develop research proposals. Students participate in a joint field exploration. Those who have established research interests may also work in another setting relevant to their long-term research goals.

MUED 5211. Foundations of Music Education. (3 cr; A-F only) An overview of the historical, philosophical, and psychological foundations of music education.

MUED 5313. Youth Music: Preferences, Influences, and Uses. (2 cr; A-F only) Youth music preferences and their determinants; how music influences youth behavior; students' and teachers' uses of commercial styles. Particularly appropriate for educators and parents.

MUED 5433. Techniques and Materials: Choral Ensembles. (2 cr; A-F only. Prereq—Music or music ed major or #) Research and literature on vocal and choral music education; choral curriculum issues; repertoire selection; rehearsal techniques.

MUED 5500. Guitar Methods for Music Education/Therapy Professionals. (2 cr [max 8 cr]. Prereq—3502 recommended) Accelerated program for developing guitar performance skills. Classroom applications, therapy applications, pedagogy.

MUED 5606. Movement-Based Methods for Music Education. (2 cr; A-F only. Prereq—Music or music ed major or #) Participation in movement activities; study of Dalcroze philosophy and techniques; applications of movement to music education; examination of research.

MUED 5611. Teaching Music with Related Arts. (2 cr; A-F only) Methods and materials for teaching music in cultural context including other art forms.

MUED 5647. Teaching the Percussion Instruments. (2 cr; A-F only) Contemporary approaches for teaching percussion in the schools; development of curricular materials and practice in performance techniques.

MUED 5655. New Dimensions in Music Education. (2 cr; A-F only) Analysis of recent curricular trends and current issues.

MUED 5664. Teaching Music on the Internet. (3 cr; A-F only) Home page development techniques, investigation of software and materials, audio and video utilities, and research applications.

MUED 5667. Computer-Based Music Instruction. (3 cr; A-F only. Prereq—Music or music ed major or #) Design and development of computer applications for the music classroom. Creating interactive audio and video presentations for music theory, ear training, composition, analysis, music history, and appreciation.

MUED 5668. Computerized Music Notation. (3 cr [max 6 cr]) Fundamentals of music notation and printing utilizing the computer, MIDI keyboards, and Finale software program. Preparation of instrumental and vocal scores, part extraction and page layout. Basic techniques for sequencing and transcription.

MUED 5669. Psychology of Music. (3 cr; A-F only. Prereq—PSY 1001 or PSY 3604 or #) Basic study of the psychology and psychoacoustics of music including hearing, music perception and cognition, values and preferences, musical abilities, musical systems, media music effects, the influence of music on human behavior, and psycho-socio-physiological processes involved in musical behavior.

MUED 5750. Topics in Music Education. (1-4 cr [max 16 cr]; A-F only. Prereq—Grad student in [music education/therapy or education] or #) Focuses on single topic, specified in *Class Schedule*.

MUED 5991. Independent Study. (1-4 cr [max 8 cr]; A-F only. Prereq—Music ed or music therapy major or grad, #, Δ) Independent study project organized by the student in consultation with the appropriate instructor.

Naval Science (NAV)

Department of Naval Science (Navy ROTC)

Office of the Senior Vice President for Academic Affairs and Provost

NAV 1000. Professional Training in Naval Science. (1 cr; S-N only. Prereq—Enrolled in NROTC) Instruction and training in basic military subjects and professional development, including military leadership, close order drill, marksmanship, honors and ceremonies, personnel inspections, and computer-based war game simulations. Classes and small group seminars on leadership and ethical issues with case studies.

NAV 1101. Introduction to Naval Science. (3 cr; A-F only)
Navy organization, customs and traditions, officer and enlisted rank and rating structures, uniforms and insignia, shipboard duties, seamanship, damage control, and safety. Core values of the naval services, Navy regulations, and the Uniform Code of Military Justice.

NAV 1102. Seapower and Maritime Affairs. (3 cr; A-F only)
Historical influences on development of U.S. Navy, from American Revolution to present. Critical, contemporary issues.

Nav 2000. Professional Training in Naval Science. (1 cr; S-N only. Prereq—Soph enrolled in NROTC)
Instruction and training in basic military subjects and professional development, including military leadership, close order drill, marksmanship, honors and ceremonies, personnel inspections, and computer-based war game simulations. Classes and small group seminars on leadership and ethical issues with case studies.

Nav 2201. Ship Systems I: Naval Engineering. (3 cr; A-F only)
Detailed study of ship characteristics/types. Design, hydrodynamic forces, stability, compartmentation, propulsion, electrical/auxiliary systems, damage control, administration. Basic concepts of theory/design for steam, gas turbine, diesel, nuclear propulsion.

Nav 2202. Ship Systems II: Science and Technology in Naval Weapons Systems. (3 cr; A-F only)
Detection, evaluation, threat analysis, weapon selection, delivery, guidance, explosives. Physical aspects of radar, underwater sound. Facets of command, control, communications as means of weapons system integration.

NAV 3000. Professional Training in Naval Science. (1 cr; S-N only. Prereq—Jr enrolled in NROTC)
Instruction and training in basic military subjects and professional development, including military leadership, close order drill, marksmanship, honors and ceremonies, personnel inspections, and computer-based war game simulations. Classes and small group seminars on leadership and ethical issues with case studies.

NAV 3301. Navigation I: Piloting and Celestial Navigation. (3 cr; A-F only)
Theory/practice piloting a ship near land. Coordinate systems, chart reading, dead reckoning, fixes, tides, currents, anchoring. Theory based on observance of celestial bodies.

NAV 3302. Navigation II: Seamanship and Ship Operations. (3 cr; A-F only. Prereq—3301)
National/international nautical rules of the road, seamanship, tactical maneuvering/signaling, relative motion, vector-analysis, formation tactics, ship employment, ship behavior/characteristics. Application of maneuvering board in solving motion problems.

NAV 3310. Evolution of Warfare. (3 cr; A-F only)
Great military leaders of history. Development of warfare, from dawn of recorded history to present. Focuses on effect of major military theorists, strategists, tacticians, technological developments.

NAV 4000. Professional Training in Naval Science. (1 cr; S-N only. Prereq—Sr enrolled in NROTC)
Instruction and training in basic military subjects and professional development, including military leadership, close order drill, marksmanship, honors and ceremonies, personnel inspections, and computer-based war game simulations. Classes and small group seminars on leadership and ethical issues with case studies.

NAV 4401W. Leadership and Management I. (3 cr; A-F only)
Advanced study of organizational behavior/management. Major behavioral theories examined in detail. Practical applications. Exercises, case studies, seminar discussions.

NAV 4402W. Leadership and Ethics. (3 cr; A-F only. Prereq—4401)
Junior officer role. Responsibilities faced as leader, manager, professional officer of Naval Services. Develops specific competencies in areas of leadership, management, professional administration, development. Emphasizes Naval Service ethics, core values.

NAV 4410. Amphibious Warfare. (3 cr; A-F only)
Development of amphibious doctrine, its expansion in Pacific Campaign of World War II. Detailed case studies of Tarawa, Iwo Jima, Okinawa illustrate amphibious planning.

Neuroscience (NSC)

Medical School

NSC 4185. Itasca Summer Neurobiology Laboratory. (3 cr; A-F only. Prereq—#, ☐)
Concepts in cellular neurosciences. Basis of membrane properties, including ionic/molecular mechanisms of resting, action, and synaptic potentials. State-of-the-art equipment and contemporary techniques used to examine experimental evidence.

NSC 5031W. Perception. (3 cr. \$PSY 5031W. Prereq—PSY 3031 or PSY 3051 or #)
Cognitive, computational, and neuroscience perspectives on visual perception. Color vision, pattern vision, image formation in eye, object recognition, reading, impaired vision. Course is biennial: offered fall of odd years.

NSC 5037. Psychology of Hearing. (3 cr. \$PSY 5037. Prereq—PSY 3031 or #)
Biological and physical aspects of hearing, auditory psychophysics, theories and models of hearing, perception of complex sounds including music and speech, clinical and other applications.

NSC 5201. Computational Neuroscience I: Membranes and Channels. (3 cr. \$NSC 5201, PHSL 5201. Prereq—Calculus through differential equations)
Comprehensive examination of membrane and ion channels using UNIX workstations to simulate their properties. Hodgkin-Huxley model, nonlinear dynamic systems, voltage- and ligand-gated ion channels, impulse propagation.

NSC 5202. Theoretical Neuroscience: Systems and Information Processing. (3 cr. Prereq—[3101, 3102W] recommended)
Concepts of computational/theoretical neuroscience. Distributed representations and information theory. Methods for single-cell modeling, including compartmental/integrate-and-fire models. Learning rules, including supervised, unsupervised, and reinforcement learning models. Specific systems models from current theoretical neuroscience literature. Lecture/discussion. Readings from current scientific literature.

NSC 5461. Cellular and Molecular Neuroscience. (4 cr; A-F only. Prereq—NSC grad student or #)
Lectures by team of faculty, problem sets in important physiological concepts, discussion of original research papers.

NSC 5462. Neuroscience Principles of Drug Abuse. (2 cr. \$PHCL 5462. Prereq—#)
Current research on drugs of abuse, their mechanisms of action, characteristics shared by various agents, and neural systems affected by them. Offered biennially, spring semester of even-numbered years.

NSC 5481. Invertebrate Neurobiology. (3 cr; A-F only. \$ENT 5481)
Fundamental principles/concepts underlying cellular bases of behavior and “systems” neuroscience. Particular invertebrate preparations. Offered annually the last 10 weeks of spring semester.

NSC 5540. Advanced Survey of Biomedical Neuroscience. (2 cr. Prereq—#; intended for members of biomedical community or students with advanced scientific backgrounds)
Current topics in biomedical neuroscience, accompanied by supporting, fundamental concepts. Intensive, one week course.

NSC 5551. Itasca Cell and Molecular Neurobiology Laboratory. (4 cr; S-N only. Prereq—Neuroscience grad or #)
Intensive lab introduction to cellular and molecular aspects of research techniques in contemporary neurobiology; held at Itasca Biological Station. Electrophysiological investigations of neuronal properties, neuropharmacological assays of transmitter action, and immunohistochemical studies in experimental preparations.

NSC 5561. Systems Neuroscience. (4 cr; A-F only. Prereq—NSC grad student or #)
Principles of organization of neural systems forming the basis for sensation/movement. Sensory-motor/neural-endocrine integration. Relationships between structure and function in nervous system. Team taught. Lecture, laboratory.

NSC 5661. Behavioral Neuroscience. (3 cr; A-F only. Prereq—Grad NSC major or grad NSC minor or #)
Neural coding/representation of movement parameters. Neural mechanisms underlying higher order processes such as memorization, memory scanning, and mental rotation. Emphasizes experimental psychological studies in human subjects, single cell recording experiments in subhuman primates, and artificial neural network modeling.

NSC 5667. Neurobiology in Disease. (2 cr. Prereq—#)
Basic clinical/pathological features, pathogenic mechanisms. Weekly seminar course.

NSC 5668. Neurodegeneration and Repair. (2 cr. Prereq—#)
Pathogenic mechanisms of neuronal death, neurodegenerative disease, neuronal repair. Weekly seminar course.

Neuroscience Department (NSCI)

Department of Neuroscience

Medical School

NSCI 3101. Introduction to Neuroscience I: From Molecules to Madness. (3 cr; A-F only. \$BIOL 3101, PHSL 3101. Prereq—BIOC 3021 or ¶BIOC 3021 or BIOC 4331 or ¶BIOC 4331 recommended)
Basic principles of cellular/molecular neurobiology and nervous systems.

NSCI 3102W. Introduction to Neuroscience II: Biological Basis of Behavior. (3 cr; A-F only. Prereq—BIOL 3101 or NSCI 3101 or PHSL 3101)
Organization of neural systems/subsystems underlying sensory/motor aspects of behavior. Writing intensive.

NSCI 4105. Neurobiology Laboratory I. (2 cr; A-F only. \$BIOL 4105. Prereq—[3101 or BIOL 3101 or PHSL 3101], [3102W or BIOL 3102W], #)
Principles, methods, and laboratory exercises for investigating neural mechanisms and examining experimental evidence.

NSCI 4151. Advanced Topics in Neuroscience. (3 cr; A-F only. \$ANPH 4151, BIOL 4151, PHSL 4151, PHSL 5150. Prereq—\$: PHSL 4151; Biol/NSC/PHSL 3101 or #)
In-depth study of aspects of neurodevelopment, neurochemistry/molecular neuroscience, sensory systems, motor control, and behavioral neuroscience. Primarily for undergraduates majoring in neuroscience or related areas.

NSCI 4167. Neuroscience in the Community. (1-3 cr; A-F only. Prereq=#)

A service learning experience in which a student is paired with a middle school science teacher who has completed the BrainU program in neuroscience. Student observes and assists in implementing previously developed neuroscience educational activities and designs and implements a new classroom activity to teach concepts of neuroscience to middle school learners.

NSCI 4793W. Directed Studies: Writing Intensive. (1-7 cr [max 7 cr]; S-N only. Prereq=#, Δ; no more than 7 cr of [4793, 4794, 4993, 4994] may count toward major requirements) Individual study of selected topics. Emphasis on readings, use of scientific literature. Writing intensive.

NSCI 4794W. Directed Research: Writing Intensive. (1-7 cr [max 7 cr]; S-N only. Prereq=#, Δ; no more than 7 cr of [4793, 4794, 4993, 4994] may count toward major requirements) Lab or field investigation of selected areas of research. Writing intensive.

NSCI 4993. Directed Studies. (1-7 cr [max 7 cr]; S-N only. Prereq=#, Δ; max of 7 cr of 4993 and/or 4994 may count toward major requirements) Individual study of selected topics with emphasis on selected readings and use of scientific literature.

NSCI 4994. Directed Research. (1-7 cr [max 7 cr]; S-N only. Prereq=#, Δ; max of 7 cr of 4993 and/or 4994 may count toward major requirements) Lab or field investigation of selected areas of research.

NSCI 5101. Introduction to Neuroscience for Graduate Students. (3 cr; A-F only. Prereq=[BIOC 3021 or BIOC 4331], Δ; intended for grad students outside neuroscience program who require comprehensive intro) Basic principles of cellular/molecular neurobiology and nervous system. A term paper supplements lectures. Multiple-choice exams.

NSCI 5110. Dental Neuroscience for Graduate Students. (2 cr; A-F only. Prereq=S: 6110; BIOC 3021, BIOL 4004, #; intended for grad students who require a comprehensive grad-level neuroscience course) Structure/function of human nervous system. Lectures and reading assignments emphasize topics pertinent to dentistry.

NSCI 5111. Medical Neuroscience for Graduate Students. (5 cr; A-F only. Prereq=S: 6111; BIOC 3021, BIOL 4004, #; intended for grad students who require a comprehensive medically-oriented neuroscience course) Survey of molecular, cellular, and systems neuroscience as related to medicine. Lecture/lab.

NSCI 5540. Advanced Survey of Biomedical Neuroscience. (2 cr. Prereq=#; intended for members of biomedical community or students with advanced scientific backgrounds) Current topics in biomedical neuroscience. Supporting, fundamental concepts. Intensive, one week course.

NSCI 5913. BrainU 101: Neuroscience in the Classroom. (3 cr; A-F only. Prereq=[Elementary or middle school or high school or preservice] teacher, #, application) Two-week summer workshop. Week one focuses on training teachers in neuroscience through lectures, activities, and discussion sessions. Week two focuses on designing inquiry-based classroom investigations based on neuroscience education given during week one. Follow-up activities held during the academic year include BrainU staff/faculty classroom presentations and use of training materials.

NSCI 5914. BrainU 202: Neuroscience in the Classroom. (3 cr; A-F only. Prereq=[5913 or BIOL 5190], #, application) One-week summer workshop. Focuses on critiquing previously implemented neuroscience class activities, developing assessment tools, learning peer mentoring, and expanding neuroscience content knowledge. Follow-up activities held during academic year include BrainU staff/faculty classroom presentations, use of training materials, and peer mentoring sessions.

NSCI 5915. BrainU 303: Neuroscience in the Classroom. (2 cr; A-F only. Prereq=[5913 or BIOL 5190], 5914, #, application)

One-week summer workshop. Focuses on critiquing previously implemented neuroscience class activities and assessment tools, and expanding neuroscience content knowledge. Follow-up activities held during academic year include BrainU 303 participants. use of training materials and implementation of neuroscience investigations.

Norwegian (NOR)

German, Scandinavian, and Dutch

College of Liberal Arts

NOR 1001. Beginning Norwegian. (5 cr. \$NOR 4001) Emphasis on working toward novice-intermediate low proficiency in all four language modalities (listening, reading, speaking, writing). Topics include everyday subjects (shopping, directions, family, food, housing, etc.).

NOR 1002. Beginning Norwegian. (5 cr. \$NOR 4002. Prereq=1001) Continues the presentation of all four language modalities (listening, reading, speaking, writing) with a proficiency emphasis. Topics include free-time activities, careers, and the Norwegian culture.

NOR 1003. Intermediate Norwegian. (5 cr. \$NOR 4003. Prereq=1002) Emphasis on intermediate proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is combined with authentic readings and essay assignments.

NOR 1004. Intermediate Norwegian. (5 cr. \$NOR 4004. Prereq=1103) Emphasis on developing intermediate mid-high proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is supported by work with authentic readings and essay assignments.

NOR 1010. Online Basic Norwegian. (2 cr [max 8 cr]) Norwegian language/culture. Travel, weather, family, work, school, daily life. Students meet for orientation and midterm, then work at own pace using multi-media Web curriculum. Instructor-student interactions through e-mail, threaded discussions, and audio messages.

NOR 3011. Advanced Norwegian. (3 cr. Prereq=1004 or 4004) Fiction, film, journalistic, and professional prose. Grammar, vocabulary building exercises. Systematic review of oral/written modes of communication.

NOR 3012. Advanced Norwegian. (3 cr. Prereq=1004 or 4004) Novels, short stories, plays, articles. Structural, stylistic, and vocabulary-building exercises.

NOR 4001. Beginning Norwegian. (2 cr. \$NOR 1001. Prereq=1004 in another language or passing score on LPE or grad student) Meets concurrently with 1001. See 1001 for description.

NOR 4002. Beginning Norwegian. (2 cr. \$NOR 1002. Prereq=1004 in another language or passing score on LPE or grad student) Meets concurrently with 1002. See 1002 for description.

NOR 4003. Intermediate Norwegian. (2 cr. \$NOR 1003. Prereq=1004 in another language or passing score on LPE or grad student) Meets concurrently with 1003. See 1003 for description.

NOR 4004. Intermediate Norwegian. (2 cr. \$NOR 1004. Prereq=1004 in another language or passing score on LPE or grad student) Meets concurrently with 1004. See 1004 for description.

Nursing (NURS)

School of Nursing

NURS 1020. Challenge of Nursing. (2 cr; S-N only) Overview of nursing profession. Contemporary nursing, its historical roots/stages. Career opportunities/challenges.

NURS 1030H. Freshman Seminar in Nursing. (1 cr; A-F only. Prereq=#) Overview of nursing profession, including its historical roots, current roles/scope, and potential future evolution. Career opportunities/challenges.

Nurs 2001. Human Growth and Development: A Life Span Approach. (3 cr. Prereq=General psychology course) Biosocial, cognitive, and psychosocial domains of human development across life span. Major theoretical perspectives/research. Personal and culturally determined views of various ages/stage of human development.

NURS 3690. Life Span, Growth, and Development I. (2 cr. Prereq=One general psychology and one general biology course or #) An introductory, multimedia course that incorporates biological, sociological, and psychological perspectives of human life span development from the prenatal period through young adulthood.

NURS 3691. Life Span, Growth, and Development II. (1 cr. Prereq=3690, one general psychology and one general biology course or #) An introductory, multimedia course that incorporates biological, sociological, and psychological perspectives of human life span development for the period of young adulthood through aging and the death experience.

NURS 3700. Human Experience of Health and Illness. (2 cr; A-F only. Prereq=Nursing student or #) Uses literature, film, and fine arts to explore health/illness as multicultural individual, family, and community experiences. Theoretical perspectives about health/illness. Social-cultural organization of health services, social mandate for professional participation in health/illness events.

NURS 3702. Foundations of Professional Nursing. (3 cr; A-F only. Prereq=Nursing student or #) Nature of nursing, nursing practice, nursing history, roles, foundational concepts, classification systems, documentation. Students develop nursing care plans using nursing process. Clinical application in various settings.

NURS 3704. Nursing Fundamentals I: Assessment and Intervention. (4 cr; A-F only. Prereq=Nursing student or #) Foundational psychomotor skills/interventions used in nursing practice when caring for persons throughout lifespan in various contexts. Theory/skills of health assessment, including health history and physical exam of infants/adults.

NURS 3706. Therapeutic Communication. (3 cr; A-F only. Prereq=Nursing student or #) Developing therapeutic use of self. Applying communication strategies to provide optimal nursing care and to communicate with individuals, families, interdisciplinary teams, and communities.

NURS 3710. Statistics for Clinical Practice and Research. (3 cr; A-F only. Prereq=High school algebra or #) Quantitative literacy, numerical reasoning, measurement principles for clinical practice/research. Vital statistics, rates, data description. Probability and statistical inference (hypothesis testing, confidence intervals) for tests on means, proportions, correlations, and simple linear regression.

NURS 3800. Nursing Topics. (1-4 cr. Prereq=#) Topics not included in regular courses.

NURS 3999. Clinical Internship. (1 cr; S-N only. Prereq—Completed jr yr of a baccalaureate nursing prog, accepted into an approved clinical internship prog, #)
Clinical-based learning opportunities to encourage application of theory and research based knowledge in clinical practice. Students engage in experiences to enhance the development of their professional nursing role.

NURS 4104. Ethical Sensitivity and Reasoning in Health Care. (2 cr. Prereq—[14100, 4101, 4102, 4103] or #)
Range/complexity of ethical issues/dilemmas in health care. Ethical concepts, principles, and theories. Addressing specific morally troubling issues in health care settings.

NURS 4201. Nursing Care of Adults. (6 cr; A-F only)
Health promotion, disease prevention, acute/chronic illness management in context of family/environment. Individual/family assessment, recognition of response patterns, formulation of client goals, selection/application of nursing interventions, evaluation of outcomes.

NURS 4203. Nursing Fundamentals II: Assessment and Intervention. (4 cr; A-F only. Prereq—Nursing student or #)
Foundational, complex, and advanced psychomotor nursing interventions and their research basis. Lab components provide opportunities to perform psychomotor skills used in nursing/complementary interventions. Skills taught within caring framework.

NURS 4205V. Honors: Nursing Theory and Research. (3 cr. Prereq—Nurs honors)
Knowledge basic to discipline/practice of nursing. Relationships among research, theory, practice. Introduction to research process, with attention to use of research in practice. Students develop honors research proposal.

NURS 4205W. Nursing Theory and Research. (3 cr; A-F only. Prereq—Undergrad in nursing)
Knowledge basic to discipline/practice of nursing. Relationships among research, theory/theoretical formulations, and practice. Research process is introduced with attention to utilization of research in practice.

NURS 4320. Psychiatric and Mental Health Nursing. (6 cr; A-F only)
Assessing biopsychosocial needs. Developing a holistic plan of care. Helping clients negotiate care, evaluating client outcomes. Students establish therapeutic relationships with clients experiencing psychiatric illnesses. Use of self as therapeutic tool in promoting mental health.

NURS 4322. Population-based Public Health Nursing. (5 cr; A-F only. Prereq—Nursing or #)
Applying nursing process with individuals, families, communities, and systems. Students complete a community assessment, apply evidence-based practice within the context of social justice.

NURS 4324. Transcultural Nursing and Global Health. (3 cr; A-F only. Prereq—Nursing student or #)
Influence of culture on nursing care delivery. Role of nurse in providing culturally appropriate care for increasingly diverse populations. Global health issues, factors affecting health infrastructure of populations.

NURS 4326. Nursing Care of Older Adults. (3 cr; A-F only. Prereq—Human Experience of Health and Illness, Introduction to Ethics, Introduction to Nursing, Therapeutic Communication, Nursing Fundamentals, Complex Nursing Interventions, Family Focused Care Across the Lifespan: I)
Nursing care for older adults across the health/illness continuum. Focuses on promoting healthy aging, functional health, management of symptoms/chronic conditions. Biopsychosocial changes, specialized assessment of older adults, impact/management of common chronic conditions.

NURS 4402. Taking Ethical Action in Health Care. (1 cr)
Distribution of scarce resources to meet health care needs in various health care settings. Ethics in a managed care environment. Increasing focus on how to take ethical action in health care.

NURS 4403. Nursing Care of Childbearing Families. (4 cr; A-F only. Prereq—4201, 4203)
Nurse's role in providing care for childbearing families during antepartum period, birth experience, and immediate postpartum phase. Emphasizes health promotion, risk reduction, and active participation of clients to achieve optimum family health.

NURS 4404. Applied Nursing Research and Research Utilization. (2 cr. Prereq—4205 or #)
Design and carry out a research project of limited scope to develop fundamental skills in systematic inquiry, and interpreting and evaluating research as it applies to nursing practice. The final product is a scholarly research report.

NURS 4404H. Honors: Applied Research and Research Utilization. (2 cr. Prereq—4205V)
Fundamental skills in systematic inquiry. Interpreting/evaluating research for applicability to nursing practice. Implement study proposed in 4205V. Write report to serve as honors research project or thesis.

NURS 4406W. Leadership and Management for Shaping Professional Nursing Practice. (4 cr; A-F only. Prereq—4103, 4205, 4306)
Provides a basis for synthesis of current leadership and management theories within the professional practice of nursing. Examine the interaction among professional nursing issues, health care trends, and the leadership potential of nurses.

NURS 4408. Nursing Care of Infants, Children, and Adolescents. (4 cr; A-F only. Prereq—4201, 4203)
Family centered nursing care. Emphasizes culturally competent and developmentally appropriate nursing care during wellness/illness to promote healthy childhood/adolescence and family function.

NURS 4414. Chronic Health Conditions of Elders: a Cross-Cultural, International Perspective. (3 cr; A-F only. Prereq—4100, 4101, 4102, 4103, 4104, 4200, 4202, 4205, 4210, 4300, 4302)
Assessment/management of chronic health conditions of elders from cross-cultural, international perspective. Complex long-term health needs of elders, care delivery models that address these needs.

NURS 4420. Managing Care of Adult Clients With Complex Health Conditions Across the Continuum. (3 cr. Prereq—4100, 4101, 4102, 4103, 4104, 4200, 4202, 4205, 4210, 4300, 4302)
Coordination of comprehensive nursing care to clients with multi-system illnesses and complex socio-emotional situations, across settings and over time. Specialized strategies such as discharge planning, care paths, end-of-life interventions, and interdisciplinary collaboration. Emphasizes achieving quality health outcomes for clients and their families.

NURS 4430. Immunization Tour. (1 cr; S-N only. \$PHAR 6210. Prereq—4202, level II nursing student, #)
Student teams plan/implement influenza immunization clinics for U of M faculty, staff, and students. Interdisciplinary collaboration, public health principles, public health nursing interventions, leadership.

NURS 4500W. Nursing Leadership and Health Care Systems. (4 cr; A-F only. Prereq—Nursing student or #)
Nurse as leader/manager in client care and as colleague. Status, structure, environment, and operations of healthcare systems. Social, economic, technologic, and political factors influencing nursing care and health quality, access, and cost.

NURS 4501. Critical Care Nursing Practice. (3 cr. Prereq—4400, 4401, 4402, [4404 or 4404H], 4406W, 4410)
Students participate in care of critically-ill patients with a nurse preceptor. Synthesize theoretical knowledge and practice skills. Increase competence in evaluating patient data from numerous sources. Provide safe, organized care to patients with life-threatening, multi-system problems.

NURS 4502. Clinical Immersion. (6 cr; A-F only. Prereq—3702, 3704, 3706, 4200, 4203, [4205V or 4205W], 4322, 4326, 4500, 4504)
Underlying clinical processes associated with complex, acute, or chronic health disruptions of individuals, families, and populations (communities). Students design, provide, manage, and coordinate nursing interventions to meet client physiological, psychosocial, and spiritual needs and promote health. Students evaluate influence of health care system on achieving client outcomes for optimal function/quality of life. Preceptor professional internship in a selected setting.

NURS 4503. Acute and Critical Nursing Care of Children Practicum. (3 cr. Prereq—4100, 4101, 4103, 4104, 4200, 4202, 4205, 4210, 4300, 4412)
Acute/critical care setting. Students participate with preceptors in evaluating data from numerous sources, providing holistic care to children with life-threatening conditions or multi-system disorders, and providing care to their families.

NURS 4504. Professional Issues. (2 cr; A-F only. Prereq—[4500])
Social, economic, organization, and regulatory factors influencing profession/practice of nursing. Professional/social role of nurses in influencing policies/practices to improve health of persons/communities. Preparing for transition from student to novice nurse.

NURS 4505. Managing Chronic Health Conditions of Elders: a Study Abroad Practicum. (3 cr; A-F only. Prereq—4100, 4101, 4102, 4103, 4104, 4200, 4202, 4205, 4210, 4300, 4302, 4414)
Practicum in care of elders with complex, chronic health conditions in international setting using culturally focused, holistic framework. Students evaluate patient information from multiple sources to develop appropriate plans of care, analyze model of nursing and health care delivery.

NURS 4511. Practicum in Managing the Care of Adult Clients With Complex Health Conditions Across the Continuum. (3 cr. Prereq—4100, 4101, 4103, 4104, 4200, 4202, [4205V or 4205W], 4210, 4300, 4302, 4420)
Students participate in coordinating comprehensive nursing care to clients and their families with complex/chronic health problems across settings and over time with a nurse preceptor. Coordinating/implementing care for a group of clients. Functioning as an interdisciplinary team leader/member.

NURS 4800. Nursing Topics. (1-16 cr [max 16 cr]. Prereq—#)
Exploration of a topic to meet individual student needs.

NURS 4801. Research Topics. (1-16 cr [max 16 cr])
Exploration of research topic to meet individual student needs.

NURS 5016. Critical Reading of Scientific Literature in Adolescent Health. (1 cr. Prereq—[Grad-level Research methods course, inferential statistics course] or #)
Application of skills, from research methods and statistics courses to critical reading of empirical literature on adolescent health. Relevance of research findings to adolescent health practice.

NURS 5030. Clinical Foundations. (7 cr [max 21 cr]; A-F only. Prereq—Admission to postbaccalaureate certificate nursing program)
Foundation for culturally appropriate, ethical, evidence-based nursing practice across the life span. Emphasizes research/theory that underlie art/science of professional nursing. Concepts of person, environment, health, and nursing. Didactic, clinical, and laboratory experiences.

NURS 5031. Human Response to Health and Illness: Adults and Elders. (6 cr; A-F only. Prereq—Postbaccalaureate certificate prog)
Individual responses to health/illness, in context of families/environments. Clinical component emphasizes application of nursing process in adult/elderly populations.

NURS 5032. Human Response to Health and Illness:

Children and Childbearing Families. (6 cr; A-F only. Prereq–Postbaccalaureate certificate prog)
Family responses to health/illness. Emphasizes application of nursing process in children and childbearing families. Seminar and community-based project focus on family as unit of care.

NURS 5033. Population Response to Health and Mental Illness. (5 cr; A-F only. Prereq–Nursing postbaccalaureate certificate prog)

Population-based nursing practice. Emphasizes application of nursing process in promoting mental health and public health, and in preventing illness across life span. Clinical experiences include interactions with individuals, families, communities, and systems.

NURS 5034. Clinical Seminar: Nursing Care of Clients With Complex Health Conditions. (2 cr; A-F only. Prereq–5033, 8100, Nursing Postbaccalaureate Certificate Prog)

Exemplar cases from students. clinical settings used as basis for development of clinical decision-making. Critical analysis of current/emergent nursing care issues associated with caring for complex/diverse populations.

NURS 5035. Practical Nursing Care for Complex Health Conditions. (5 cr; A-F only. Prereq–Nursing postbaccalaureate certificate prog)

Clinical decision-making, comprehensive nursing care of clients with complex health problems. In collaboration with a clinical preceptor and a faculty adviser, students develop an individualized learning contract.

NURS 5040H. Seeking Solutions to Global Health Issues. (3 cr. Prereq–Grad student or sr nursing honors student or CLA upper div honors or #)

Global health issues from interdisciplinary perspective. Emphasizes ethical/cultural sensitivity/complexities. Students propose realistic actions that could be taken to resolve these issues.

NURS 5111. Learning Theories for Nursing Education. (1 cr)

Overview of selected learning theories used in academic, patient, and staff education in nursing.

NURS 5113. Web-based Teaching/Learning Strategies. (2 cr; S-N only. Prereq–#)

Skills necessary to design, produce, implement, and evaluate effective technology enhanced learning environments. Pedagogical/technological issues surrounding teaching with technology.

NURS 5141. Ethical Issues in Health Care of Elders. (3 cr. Prereq–Grad student or nursing sr or #)

Health care related ethical issues that confront elders, their families, health care providers, and society.

NURS 5170. Research Topics. (1-16 cr [max 16 cr]. SPUBH 6170)

Exploration of research topic to meet individual student needs.

NURS 5171. SPSS Programming and Data Analysis. (2 cr. Prereq–Inferential statistics, [[grad or professional] student] or #)

Skills needed to collect/analyze data using SPSS for Windows. Review of statistical methods.

NURS 5172. Decision Making in Health Care. (2 cr. Prereq–Grad student, #)

Selected classical conceptual models of decision making, their particular perspectives/limitations/usefulness for decision making about health care issues. Models/components used to assess, evaluate, teach, or help healthy people, patients, families, health care professionals, or policy making groups in making health care decisions.

NURS 5200. Holistic Health Assessment and Therapeutics for Advanced Practice Nurses. (3 cr. Prereq–Nursing grad student or nursing postbaccalaureate certificate student)

Health assessment knowledge/skills for advanced nursing practice with patients across age span, including pregnancy. Selected nursing interventions, complementary therapies for application to specific populations/illnesses.

NURS 5202. Introduction to Complementary Healing Practices. (3 cr)

Historical and cultural context of the allopathic and complementary healing traditions. Philosophies and paradigms of selected complementary therapies and culturally based healing traditions; descriptions of selected interventions.

NURS 5204. Population Focused Assessment and Intervention. (2 cr. Prereq–Grad nursing major, #)

Population focused assessment in health planning. Models of assessment for communities, organizations, other aggregates. Skill development in conducting/analyzing/using assessment in planning population focused interventions.

NURS 5222. Advanced Physiology. (3 cr. Prereq–Grad nursing major or #)

Systems approach to human physiology/pathophysiology. Physiologic changes across life span. Emphasizes clinical application using population-specific content related to various specialty areas in advanced practice nursing.

NURS 5223. Assessment of Psychopathology for Advanced Practice Psychiatric/Mental Health Nursing. (4 cr. Prereq–Nurs grad or #)

Advanced concepts from nursing theory and research, social sciences, neuropsychology, and neurophysiology used in the assessment of psychiatric symptoms and disorders across the age continuum. During clinical, develop proficiency in the assessment of psychopathology in clients with psychiatric symptoms.

NURS 5224. Clinical Pharmacotherapeutics. (3 cr.

Prereq–Nursing grad student in advanced practice in primary care, physiology course, #)

Foundation in pharmacotherapeutics across life span. Pharmacodynamics/kinetics/epidemiology, client patterns of medication use, selection of appropriate drugs for selected client conditions, and prescriptive writing privileges for advanced practice nurses.

NURS 5225. Psychopharmacology for Advanced Practice Psychiatric/Mental Health Nursing. (3 cr. Prereq–Grad student or RN [with master's degree] or #)

Advanced concepts in neuroscience, psychopharmacology, and clinical management related to psychopharmacologic treatment of psychiatric disorders/symptoms. Application to problems in various clinical settings.

NURS 5228. Acute Care Pharmacotherapeutics. (3 cr; A-F only. Prereq–Grad student)

Analysis of pharmacodynamics, physiological bases, therapeutic effects, and non-intended effects (common errors, adverse effects, side effects) for selected pharmacologic agents within drug categories commonly used in acute care.

NURS 5300. Health Behavior Intervention: Theory and Application. (3 cr. Prereq–Grad or #)

Interdisciplinary course examines theoretical foundations and research base of intervention strategies to promote health behavior acquisition, behavioral change, and maintenance for adults (individuals and groups). Critical examination of health behavior and patterns and health risk assessment; approaches to program creation.

NURS 5340. Group as a Health-Care Intervention. (2 cr. Prereq–Grad or #)

Theoretical concepts and research findings from the areas of group therapy and dynamics are applied in the development of a model for using group as an intervention for various client populations.

NURS 5501. Professional Issues in Nurse-Midwifery. (1-2 cr [max 2 cr]; S-N only. Prereq–Nurs grad major, #)

Analysis of professional issues that confront and impact the practice of certified nurse-midwives. History and development of the professional organization including certification, legislation, ethical dimensions, public policy, and clinical practice issues.

NURS 5522. Sociopolitical Context of Women's Health.

(1-2 cr [max 3 cr]; S-N only. Prereq–Grad student)
Women's health issues from multidisciplinary perspective. Sexual/reproductive health issues across life span. Sociocultural issues affecting health, such as poverty/violence.

NURS 5601. School Nursing in the Educational System and the Community. (1-3 cr [max 3 cr]; A-F only. Prereq–3 yrs of college level courses, #)

School health problems, assessment/intervention strategies. Integration of research findings. Applications with individuals, families, communities.

NURS 5604. Advanced Health Assessment and Interventions with Adolescents. (2 cr. Prereq–CPSY 5303 or equiv or #)

Integrates knowledge from nursing, public health, health behavior, and adolescent development as framework for developing health assessment/intervention strategies for clinical practice with adolescents.

NURS 5800. Nursing Topics. (1-4 cr [max 8 cr]. Prereq–#)

Course allows students to study a topic not included in regular courses, or for faculty to offer a course to determine interest in a topic.

NURS 5801. Policymaking, Health Policy, Political Action and Nursing. (3 cr)

Analysis of sociocultural values, public policymaking, health care policy, and the relationship to the health care delivery system. The impact of health care policy on the profession and practice of nurses, and on consumers. Enhanced participation of nurses in policymaking and political action.

NURS 5802. Spirituality and Nursing Practice. (2 cr.

Prereq–For undergrad cr: nurs sr or RN; for grad cr: nurs grad student or #)

Exploration of the concept of spirituality as integral to the whole person. Discussion of spiritual nursing care interventions.

NURS 5803. Transcultural Nursing: Theories and Issues. (2 cr. Prereq–Cultural ANTH course or #)

Study of cultural factors that influence theories, issues, and nursing care practices in diverse cultures and subcultures. Emphasis on nursing within international systems of health care and nursing practices related to various health-illness systems in this country and worldwide.

NURS 5804. Therapeutic Healing Touch: Research and Practice. (2 cr; S-N only. Prereq–[Upper div or grad] student in

[health sciences or health care])

Therapeutic/Healing Touch as energetic based, biofield healing modality. Art/science of this modality. Research literature related to Therapeutic Touch/Healing Touch. Explanations for effects. Practice of Therapeutic Touch, intervention techniques.

NURS 5805. The 'M' Technique. (1 cr; S-N only. Prereq–Undergrad nursing student or grad student in health sciences or health professional)

Scientific/theoretical foundations/practice of 'm' technique, a touch therapy for promoting relaxation by topically administering essential oils. Appropriate applications. Demonstration/practice of technique. Interdisciplinary course.

NURS 5806. Theoretical Foundations and Experiential Learning in Complementary/Alternative Therapies. (2-3 cr. Prereq–#)

Overview of complementary therapies. Demonstration of selected therapies. Theoretical/scientific knowledge supporting use of therapies.

NURS 5807. Stories of Illness. (3 cr)

Subjective experiences of various physical/mental illnesses. Social context of illness, society's responses to illness. Ethical implications for patients/practitioners. Uses fiction, art, film, music, first-person accounts of illness, and anthropological, sociological, and historical literature.

NURS 5808. American Indian Health and Health Care. (2 cr. Prereq—Upper div or grad student or #)
Examines health of native nations in Minnesota within historical/cultural contexts. Epidemiology of major health conditions, health services, traditional Indian medicine, health beliefs. Opportunities for contact with Native American community.

NURS 5809. Seminars in Critical Care. (2 cr)
Analyzes current research/developments in treatments, care delivery, and ethical issues affecting critically ill patients and their families. Students participate with team of multidisciplinary faculty from Center for Critical Care in critiquing/presenting literature and discussing applications to clinical practice.

NURS 5810. Health Activism. (3 cr)
Interdisciplinary skill-building workshops. Sessions taught by community leaders/activists. Community project focuses on issues of health disparities, environmental justice, and access to care.

NURS 5830. Advanced Clinical Nursing. (1-6 cr [max 2 cr]. Prereq—Graduate nursing major or #)
Independent study or faculty seminar on special clinical topic.

NURS 5900. Introduction to Principles and Practice of Anesthesia. (3 cr; A-F only. Prereq—Grad student in nurse ANES esi |si a |)
Safe/effective administration of anesthesia for nurse anesthetists. Application in operating room setting under one-to-one guidance of a certified registered nurse anesthetist (CRNA).

NURS 5901. Basic Principles and Practice of Nurse Anesthesia. (2 cr; A-F only. Prereq—5900)
Students apply principles of anesthesia to formulate nurse anesthesia care plans for care of adults undergoing anesthesia.

NURS 5910. Nurse ANES esi |si a | Care: Patients With Cardiothoracic Problems. (2 cr. Prereq—5222, 5224, 5228, 5901, PHSL 5115)

First in series of three courses. Delivering anesthesia to complex patients. Focuses on anesthesia for patients undergoing cardiothoracic procedures.

NURS 5920. Nurse Anesthesia Care: Pediatric Patients and Patients With Trauma. (3 cr; A-F only. Prereq—5910)
Second in a series of three courses. Theory/application of principles used to deliver anesthesia by nurse anesthetists to pediatric patients and to trauma patients.

NURS 5930. Nurse Anesthesia Care: Obstetric and Gynecology Patients. (3 cr; A-F only. Prereq—5920)
Third of three courses. Theory/application of principles used to deliver anesthesia by nurse anesthetists for complex patients with obstetric or gynecologic conditions and for effective management of pain. Increasing autonomy in decision-making processes and clinical experiences.

NURS 5941. Nurse Anesthesia Practicum A. (5 cr; S-N only. Prereq—5930)

First of a series of three clinical courses that focus on developing proficiency in nurse anesthesia practice. Emphasizes incorporating current research and demonstrating increasing autonomy in decision making and case management.

NURS 5942. Nurse Anesthesia Practicum B. (5 cr; S-N only. Prereq—5941)

Second of a series of three clinical courses. Analyzing impacts of research on clinical practice. Increasing efficiency in decision-making and case management for various patient populations.

NURS 5943. Nurse Anesthesia Practicum C. (5 cr; S-N only. Prereq—5942)

Third of a series of three. Evaluating impact of research on clinical practice, on achieving a level of safe beginning practice as a nurse anesthetist, and on demonstrating leadership in operating room. Increasing autonomy in decision-making. Case management for various patient populations.

NURS 5995. Research Dissemination. (2 cr. Prereq—Doctoral student or #)
Knowledge dissemination skills for advancement of health/nursing science/practice. Emphasizes interpretation/diffusion of research findings to health professional and scientific audiences in various venues and communication modalities.

Nutrition (NUTR)

College of Food, Agricultural and Natural Resource Sciences

NUTR 5621. Nutrition and Metabolism. (4 cr. Prereq—BIOC 3021, PHSL 3051, FSCN 4612)
Carbohydrate, lipid, and protein metabolism. Uses “systems” or “holistic” approach to emphasize how metabolic pathways interrelate.

NUTR 5622. Vitamin and Mineral Biochemistry. (3 cr. Prereq—BIOC 3021, PHSL 3051, FSCN 4612)
Nutritional, biochemical, and physiological aspects of vitamins/essential minerals in human/experimental-animal models.

NUTR 5623W. Regulation of Energy Balance. (2 cr. Prereq—5621 or FSCN 4621)
Regulation of energy balance in humans, including regulation of food intake and energy expenditure.

Operations and Management Sciences (OMS)

Department of Operations and Management Science

Curtis L. Carlson School of Management

OMS 2550. Business Statistics: Data Sources, Presentation, and Analysis. (4 cr; A-F only. \$OMS 2550H. Prereq—[MATH 1031 or equiv], at least 30 cr)
Data analysis, basic inferential procedures, statistical sampling/design, regression/time series analysis. How statistical thinking contributes to improved decision making.

OMS 2550H. Honors: Business Statistics: Data Sources, Presentation, and Analysis. (4 cr; A-F only. \$OMS 2550. Prereq—[MATH 1031 or equiv], CSOM honors, at least 30 cr)
Data analysis, basic inferential procedures, statistical sampling/design, regression/time series analysis. How statistical thinking contributes to improved decision making.

OMS 3001. Introduction to Operations Management. (3 cr; A-F only. Prereq—At least 60 cr)
Concepts, principles, and techniques for managing manufacturing/service operations. Emphasizes decision making in operations function of organizations. Quantitative/qualitative methods for improving management of operations.

OMS 3041. Project Management. (2 cr; A-F only. Prereq—3000 or #)
Principles and methods useful for planning and controlling a project, including development of project plan, resource planning and scheduling, and project monitoring and control. Selected computerized packages are studied, including PERT and CPM, and examples of different types of projects from manufacturing and service industries are used.

OMS 3045. Purchasing and Supply Management. (2 cr)
Strategic/operational role of purchasing/supply function in the organization. Aspects of supply management: organization, steps in purchasing cycle. Supplier-selection criteria such as quantity, quality, and cost/price considerations. Buyer-supplier relationships. Purchasing function's contribution to competitiveness of the firm.

OMS 3056. Operations Planning and Control. (4 cr; A-F only. Prereq—3001 or #)
Decisions/tradeoffs managers face when directing operations of supply chain. Forecasting, capacity/production planning, just-in-time, theory of constraints, managing supply chain flows, enterprise resource planning (ERP), supply chain design.

OMS 3059. Quality Management and Six Sigma. (4 cr; A-F only. Prereq—3001 or equivalent or #)
Critical concepts of process management from Quality Management and Six Sigma perspective. Managerial/technical aspects of improvement. Strategy, improvement tools/methods, Malcolm Baldrige Award, ISO 9000, Six Sigma.

OMS 3850. Topics in Operations and Management Science. (2-4 cr [max 16 cr]. Prereq—3001)
Discussion/analysis of current topics/developments in operations/management science.

OMS 4081. Operations Strategy and Technology. (4 cr. Prereq—3001)
How to achieve/sustain a competitive advantage through a consistent pattern of decisions in manufacturing/service operations. Coordinating operations with marketing/business strategy in a global context. Vertical integration, capacity, facilities, technology/infrastructure.

OMS 5170. Simulation Modeling and Analysis. (4 cr; A-F only. Prereq—MBA 6120 or BA 1550 or #)
Techniques and application of computer simulation modeling and analysis. Includes animations of existing or proposed real-world facilities and processes. Experiments in simulation programming language and environment. Simulation models and animations demonstrating actual operation of models. Planning, analysis, and interpretation of simulation experiment results.

Otolaryngology (OTOL)

Department of Otolaryngology

Medical School

OTOL 5101. Introduction to the Basic Sciences in Otolaryngology I: Ear. (2 cr; A-F only. Prereq—Otolaryngology major or #)
Multidisciplinary introduction to the basic sciences of the ear. Acoustics and psychoacoustics, temporal bone anatomy, external and middle ear mechanisms, cochlear physiology, auditory neurophysiology, ear embryology, ear biochemistry, immunology, fine structures, vestibular mechanisms and measurement. S-N grading option for nonmajors only.

OTOL 5102. Introduction to the Basic Sciences in Otolaryngology II: Head and Neck. (2 cr; A-F only. Prereq—Otol major or #)
Multidisciplinary introduction to the basic sciences of the head and neck. Laryngeal anatomy and physiology, nasal anatomy and physiology, immune biology, embryology of head and neck. S-N grading option for nonmajors only.

OTOL 5993. Directed Studies. (1-12 cr [max 24 cr]; A-F only. Prereq—#)
Directed readings and preparation of reports on selected topics.

Periodontics (PERO)

School of Dentistry

PERO 5123. Practice Management Externship. (1 cr. Prereq—Resident in advanced education program in periodontology)
Familiarizes periodontal students with the private practice environment and prepares them to select the type of practice they want to purchase or build and successfully manage their office.

Pharmacology (PHCL)

Department of Pharmacology

Medical School

PHCL 3100. Pharmacology for Pre-Med and Life Science Students. (2 cr; A-F only. Prereq—College-level biology; biochemistry or physiology recommended) Principles/mechanisms of drug action. Major drug categories for different organ systems.

PHCL 4001. Mechanisms of Drug Action. (2 cr; A-F only. Prereq—Upper div or #; [prev or concurrent] courses in [biology, biochemistry] recommended)

How drugs function as applied to treatment of a single medical condition. Pharmacokinetics, pharmacodynamics, pharmacogenetics, pharmacogenomics.

PHCL 5101. Pharmacology for Pharmacy Students. (3 cr; A-F only. Prereq—2nd yr pharmacy student or #) Action/fate of drugs. Lectures, lab.

PHCL 5102. Pharmacology for Pharmacy Students. (2 cr; A-F only. Prereq—5101 or #) Action/fate of drugs.

PHCL 5103. Pharmacology for Dental Students. (3 cr. Prereq—Enrolled dental student or #) Pharmacological principles/actions of drugs.

PHCL 5109. Problems in Pharmacology. (1-18 cr [max 18 cr]. Prereq—Upper div or grad student or #) Research projects and special problems by arrangement.

PHCL 5110. Introduction to Pharmacology. (3 cr; A-F only. Prereq—Grad student or #) Basic principles of Pharmacology. Focuses on molecular mechanisms of drug action.

PHCL 5111. Pharmacogenomics. (3 cr; A-F only. Prereq—Grad student or #) Human genetic variation, its implications. Functional genomics, pharmacogenomics, toxicogenomics, proteomics. Interactive, discussion-based course.

PHCL 5210. Pharmacology. (1 cr; A-F only. Prereq—Grad student or #) Principles of pharmacology. Meets with 6110.

PHCL 5211. Pharmacology. (2 cr; A-F only. Prereq—5210 or #) Continuation of 5210. Meets with 6111. Lectures on the major classes of drugs.

PHCL 5212. Pharmacology. (3 cr; A-F only. Prereq—5211 or #) Continuation of 5211. Meets with 6112

PHCL 5462. Neuroscience Principles of Drug Abuse. (2 cr. §NSC 5462. Prereq—#) Current research on drugs of abuse, their mechanisms of action, characteristics shared by various agents, and neural systems affected by them. Offered biennially, spring semester of even-numbered years.

Pharmacy (PHAR)

College of Pharmacy

PHAR 1001. Orientation to Pharmacy. (2 cr) Online (Vista) course. One-credit option provides information on need for pharmacists, work settings, and educational process. Two credit-option adds material on impact of pharmacists, professional challenges, and expanding roles.

PHAR 1002. Health Sciences Terminology. (2 cr) Self-study course. How to analyze and build words by using combining forms, suffixes, and prefixes in a systematic manner. Course information is sent to the U of M email addresses of registered students.

PHAR 1003. Non-Prescription Medications and Self-Care: Treating Minor Conditions. (2 cr) Self-study, online course. Nonprescription medications, appropriate self care. How to become informed consumer of over-the-counter medications and testing devices. Textbook is supplemented with online coursework. Students use Web CT.

PHAR 1004. Common Prescription Drugs and Diseases. (2 cr) Self-study, online course. Frequently prescribed medications, conditions medications are intended to treat. Diagnostic criteria, disease complications, mechanism-of-action, side effects. Direct-to-consumer advertising. Students use Vista to view powerpoint presentations, download materials, and complete study guides.

PHAR 1905. Seminar: What Your Mom Didn't Tell You About Caring for Yourself. (2 cr; A-F only. Prereq—Fr) Making independent decisions about self-care. Tools for being an educated health consumer.

PHAR 3800. Pharmacotherapy for the Health Professions. (3 cr; A-F only. Prereq—Enrolled [nursing or radiation therapy or respiratory therapy] student) General drug therapy.

PHAR 4200. Drugs and the U.S. Health Care System. (3 cr. \$PHAR 5200) How to be an informed/responsible user of medications within U.S. health care system.

PHAR 5200. Drugs and the U.S. Health Care System. (3 cr. \$PHAR 4200) How to be an informed/responsible user of medications within U.S. health care system.

PHAR 5201. Health Sciences Applied Terminology. (2 cr. Prereq—Basic knowledge of human anatomy/physiology) Self-study course. Medical terms, how to apply them when documenting/reporting patient care procedures. Course information is sent to the U of M e-mail addresses of registered students.

PHAR 5210. Diminishing Health Disparities Through Cultural Competence. (2 cr) Various dynamics of health disparities, cultural competencies. Uses sociological framework.

PHAR 5270. Therapeutics of Herbal and Other Natural Medicinals. (2 cr; A-F only. Prereq—PHSL 6051, organic chemistry, pathophysiology of disease states, [3rd or 4th yr pharmacy student]) Herbal products/supplements. Pharmacology, clinical indications, and drug interactions of most commonly used products in nontraditional complementary health care. Historical significance and evidenced-based role of these products in health care. Case studies of clinical applications.

PHAR 5280. Principles of Health Care Counseling. (1 cr. Prereq—2nd or 3rd yr pharmacy student) Basic counseling theory/practice. Means of bringing about behavioral change from perspective of pharmacy/health care practitioner. Application of course principles through interactive small group exercises. Case presentations by experienced pharmaceutical care practitioners.

Philosophy (PHIL)

Department of Philosophy

College of Liberal Arts

PHIL 1001. Introduction to Logic. (4 cr. \$PHIL 1001H, PHIL 1021) Application of formal techniques for evaluating arguments.

PHIL 1001H. Honors Course: Introduction to Logic. (4 cr. \$PHIL 1001, PHIL 1021. Prereq—§: 1021) Application of formal techniques for evaluating arguments.

PHIL 1002V. Honors: Introduction to Philosophy. (4 cr. \$PHIL 1002W, PHIL 1006W, PHIL 1026W, PHIL 1102) Problems. Methods. Schools of philosophy (historical, contemporary).

PHIL 1002W. Introduction to Philosophy. (4 cr. \$PHIL 1002V, PHIL 1006W, PHIL 1026W, PHIL 1102) Problems, methods, historical/contemporary schools of philosophy.

PHIL 1003V. Honors: Introduction to Ethics. (4 cr. \$PHIL 1003W, PHIL 1103) Central concepts, principal theories of moral philosophy.

PHIL 1003W. Introduction to Ethics. (4 cr. \$PHIL 1003V, PHIL 1103) Central concepts/principal theories of moral philosophy.

PHIL 1004V. Honors: Introduction to Political Philosophy. (4 cr. \$PHIL 1004W) Central concepts, principal theories of political philosophy.

PHIL 1004W. Introduction to Political Philosophy. (4 cr. \$PHIL 1004V) Central concepts, principal theories of political philosophy.

PHIL 1005. Scientific Reasoning. (4 cr. Prereq—[1st or 2nd] yr student or #) Techniques for understanding/evaluating scientific information as presented in popular media and in specialized publications. Emphasizes general reasoning skills that do not require extensive training in particular sciences.

PHIL 1006W. Philosophy and Cultural Diversity. (4 cr. \$PHIL 1002V, PHIL 1002W, PHIL 1026W, PHIL 1102) Central problems/methods of philosophy through culturally diverse texts. Focus is critical/comparative, reflecting range of U.S. philosophical traditions.

PHIL 1007. Introduction to Political Philosophy Practicum. (1 cr. Prereq—¶1004W) Students do at least two hours a week of community service and connect their service activities in writing to issues discussed in 1004.

PHIL 1021. Accelerated Introduction to Logic. (3 cr. \$PHIL 1001, PHIL 1001H) Application of formal techniques for evaluating arguments.

PHIL 1026W. Philosophy and Cultural Diversity. (3 cr. \$PHIL 1002V, PHIL 1002W, PHIL 1006W, PHIL 1102) Central problems/methods of philosophy through culturally diverse texts. Focus is critical/comparative, reflecting a range of U.S. philosophical traditions.

PHIL 1102. Introduction to Philosophy. (4 cr. \$PHIL 1002V, PHIL 1002W, PHIL 1006W, PHIL 1026W) Problems, methods, historical/contemporary schools of philosophy.

PHIL 1103. Introduction to Ethics. (4 cr. \$PHIL 1003V, PHIL 1003W) Central concepts, principal theories of moral philosophy.

PHIL 1303. Business Ethics. (4 cr; A-F only) Purpose of business, its obligations to various stakeholders (e.g. stockholders, customers, employees), its social function.

PHIL 1905. Topics: Freshman Seminar. (3 cr; A-F only. Prereq—Freshman) Topics specified in *Class Schedule*.

PHIL 1910W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq—Freshman) Topics specified in *Class Schedule*.

PHIL 1999. Dantes: "Ethics in America," SE-474 Test/Dantes: Ethics in America. (3 cr; S-N only) Defense Activity for Non-Traditional Support Subject Standardized Tests Program (*Dantes*): "Ethics in America," SE-474 Test.

PHIL 3001V. Honors: General History of Western Philosophy: Ancient Period. (4 cr. \$PHIL 3101) Major developments in ancient Greek philosophic thought: pre-Socratics, Socrates, Plato, Aristotle, Hellenistic thinkers.

PHIL 3001W. General History of Western Philosophy: Ancient Period. (4 cr) Major developments in ancient Greek philosophic thought: pre-Socrates, Socrates, Plato, Aristotle, Hellenistic thinkers.

PHIL 3005V. General History of Western Philosophy:**Modern Period.** (4 cr. \$PHIL 3005V, PHIL 3105. Prereq—honors)

Major developments in philosophic thought of the modern period: renaissance beginnings, Descartes through Hume, with some attention paid to Kant.

PHIL 3005W. General History of Western Philosophy:**Modern Period.** (4 cr. \$PHIL 3005V, PHIL 3105)

Major developments in philosophic thought of the modern period: renaissance beginnings, Descartes through Hume. Some attention to Kant.

PHIL 3010W. Classical Ancient Text. (3 cr)

Introduction to and in-depth analysis of Plato's Republic.

PHIL 3101. General History of Western Philosophy:**Ancient Period.** (4 cr. \$PHIL 3001V)

Major developments in ancient Greek philosophic thought: pre-Socrates, Socrates, Plato, Aristotle, Hellenistic thinkers.

PHIL 3105. General History of Western Philosophy:**Modern Period.** (4 cr. \$PHIL 3005V, PHIL 3005W)

Major developments in philosophic thought of the modern period: renaissance beginnings, Descartes through Hume. Some attention to Kant.

PHIL 3231. Philosophy and Language. (4 cr)

Philosophical issues concerning the nature and use of human language.

PHIL 3234. Knowledge and Society. (4 cr)

Critical discussion of concepts such as knowledge, objectivity, justification, rationality, evidence, authority, expertise, and trust in relation to the norms and privileges of gender, race, class, and other social categories.

PHIL 3301. Environmental Ethics. (4 cr)

Philosophical basis for membership in moral community. Theories applied to specific problems (e.g., vegetarianism, wilderness preservation). Students defend their own reasoned views about moral relations between humans, animals, and nature.

PHIL 3302W. Moral Problems of Contemporary Society.

(4 cr. \$PHIL 3322W, PHIL 3402)

Selected moral problems of private/public life.

PHIL 3304. Law and Morality. (4 cr)

A study of the relationship among law, morality, and our role as citizens.

PHIL 3305. Medical Ethics. (4 cr)

Moral problems confronting physicians, patients, and others concerned with medical treatment, research, and public health policy. Topics include abortion, living wills, euthanasia, genetic engineering, informed consent, proxy decision-making, and allocation of medical resources.

PHIL 3307. Social Justice and Community Service. (4 cr)

Exploration of concepts of justice, charity, equality, freedom, community service in connection with current social issues. Perspectives from philosophy, history, literature, and student involvement in the community. Community service for at least three hours per week.

PHIL 3308. Social Justice and Community Service. (4 cr)

Special exploration of diversity in connection with concepts of justice, charity, equality, freedom, community service. Perspectives from philosophy, history, literature, and student involvement in the community. Community service for at least three hours per week. Students may enroll in this course without having taken 3307.

PHIL 3311W. Introduction to Ethical Theory. (4 cr)

Nature and justification of moral judgments and moral principles; analysis of representative moral views.

PHIL 3322W. Moral Problems of Contemporary Society.

(3 cr. \$PHIL 3302W, PHIL 3402)

Selected moral problems of private/public life.

PHIL 3402. Moral Problems of Contemporary Society. (4 cr.

\$PHIL 3302W, PHIL 3322W)

Selected moral problems of private/public life.

PHIL 3502W. Introduction to Aesthetics. (3 cr [max 4 cr])

Development of aesthetic theories with applications to specific aesthetic problems.

PHIL 3601W. Scientific Thought. (4 cr. Prereq—One course in philosophy or natural science)

Introduction to philosophical issues concerning the nature of scientific knowledge. Reading of historical and contemporary sources that describe major scientific achievements and controversies.

PHIL 3602. Science, Technology, and Society. (3 cr; A-F only)

Philosophical issues that arise out of interaction between science, technology, society (e.g., religion and science, genetics and society, science and the environment).

PHIL 3607. Philosophy of Psychology. (4 cr. Prereq—One course in philosophy or psychology)

Major theories of mind including the "invention" of the mind by Descartes, classical empiricism, the impact of Darwinism, Freud's theories, Gestalt psychology, behaviorism, Chomsky's rationalism, contemporary functionalism, the computer model.

PHIL 3900H. Honors Seminar. (3 cr. Prereq—Honors enroll, 6 crs of 3xxx-5xxx philosophy courses)

Topics of contemporary interest varying from semester to semester.

PHIL 3910W. Major Seminar. (3 cr. Prereq—Phil major or #)

Development and presentation of the major project.

PHIL 3993. Directed Studies. (1-3 cr [max 6 cr]. Prereq—#, A, □)

Guided individual reading or study.

PHIL 4003. Medieval Philosophy. (3 cr. Prereq—[Grad or upper div undergrad] student)

Survey of several major figures of the medieval Christian synthesis (e.g., Augustine, Anselm, Aquinas, Scotus, Ockham).

PHIL 4004. 19th-Century Philosophy. (3 cr. Prereq—Upper div or grad student)

Survey of several major figures from 19th century, e.g., Hegel, Schopenhauer, Mill, Kierkegaard, Marx, Nietzsche. Kant, 18th century, will also be studied, as background.

PHIL 4008. Survey of Contemporary Philosophy. (3 cr. Prereq—3005 or #)

Survey of major figures in contemporary analytic/phenomenological philosophy (e.g., Dewey, Russell, Wittgenstein, Heidegger, Carnap, de Beauvoir).

PHIL 4009. Existentialism. (3 cr. Prereq—3005 or 4004 or #)

Central themes (e.g., being-in-the-world, freedom, engagement) of several important existentialist thinkers (e.g., Kierkegaard, Jaspers, Sartre, de Beauvoir, Baldwin).

PHIL 4010. Ancient Philosophers. (3 cr [max 6 cr].

Prereq—3001 or #)

Major work of selected ancient philosophers (e.g., Plato's Parmenides, Plato's Sophist, Aristotle's Metaphysics). Works discussed may vary from offering to offering.

PHIL 4030. Medieval Philosophers. (3 cr [max 6 cr].

Prereq—3001 or 4003 or #)

Major work of selected medieval philosophers (e.g., Anselm's Prosligion, Aquinas's Summa contra Gentiles, Books I/II, Nicholas of Cusa's On Learned Ignorance). Works discussed may vary from offering to offering.

PHIL 4040. Rationalists. (3 cr [max 6 cr]. Prereq—3005 or #)

Major work of selected early modern rationalists (e.g., Descartes' Principles of Philosophy, Spinoza's Ethics, Conway's Principles of the Most Ancient and Modern Philosophy, Leibniz's Discourse on Metaphysics). Works discussed may vary from offering to offering.

PHIL 4050. Empiricists. (3 cr [max 6 cr]. Prereq—3005 or #)

Major work of selected early modern empiricists (e.g., Locke's Essay Concerning Human Understanding, Berkeley's Principles of Human Knowledge, Hume's Treatise of Human Nature). Works discussed may vary from offering to offering.

PHIL 4055. Kant. (3 cr. Prereq—3005 or 4004 or #)

Major work (e.g., Critique of Pure Reason).

PHIL 4070. Selected 19th- or Early to Middle 20th-Century Philosophy. (3 cr [max 6 cr]. Prereq—One sem history of philosophy)

Major writings of selected 19th- or early to middle 20th-century philosopher (e.g., Schopenhauer's World as Will and Idea, Thoreau's Walden, Du Bois's The Souls of Black Folk, Wittgenstein's Philosophical Investigations, de Beauvoir's The Second Sex).

PHIL 4085. Wittgenstein. (3 cr. Prereq—3005 or 4231 or #)

Major work (e.g., Philosophical Investigations).

PHIL 4101. Metaphysics. (3 cr. Prereq—One course in history of philosophy or #)

Philosophical theories concerning nature of reality.

PHIL 4105W. Epistemology. (3 cr; A-F only. Prereq—1001 or #)

Theories of nature/sources of knowledge/evidence.

PHIL 4231. Philosophy of Language. (3 cr. Prereq—1001 or 5201 or #)

Theories of reference, linguistic truth, relation of language/thought, translation/synonymy.

PHIL 4310W. History of Moral Theories. (3 cr. Prereq—1003 or #)

Issues in western moral philosophy from classical age to present.

PHIL 4320W. Intensive Study of an Historical Moral Theory. (3 cr [max 6 cr]. Prereq—1003 or #)

Intensive consideration of an author or theory in the history of moral or political philosophy.

PHIL 4321W. Theories of Justice. (3 cr. Prereq—1003 or 1004 or #)

Philosophical accounts of concept/principles of justice.

PHIL 4324. Ethics and Education. (3 cr. \$PHIL 5324.

Prereq—6 cr in [philosophy or education] or #)

What constitutes good education, both in terms of educational outcomes and of processes that promote learning? What connections are there between concepts of good education and of good society?

PHIL 4325. Education and Social Change. (4 cr; A-F only.

\$PHIL 5323. Prereq—#)

Connections between education, social change. Theories of democratic/popular education, their application through in-depth practicum in community education setting.

PHIL 4326. Lives Worth Living: Questions of Self, Vocation, and Community. (6 cr. \$PHIL 5326. Prereq—#)

Immersion experience. Students live together as a residential community of learners. Works of philosophy, history, and literature form backdrop for exploring such questions as How is identity constructed? What is vocation? What experiences of community are desirable in a life? Each student creates a life-hypothesis for a life worth living.

PHIL 4330. Contemporary Moral Theories. (3 cr.

Prereq—1003 or #)

Discusses view that evaluative judgments cannot be based on factual considerations alone, relation of this view to objectivity of ethics.

PHIL 4414. Political Philosophy. (3 cr. Prereq—1004 or #)

Survey of historical/contemporary works in political philosophy.

PHIL 4501. Principles of Aesthetics. (3 cr. Prereq—3502 or one philosophy course or #)

Problems arising in attempts to identify, characterize, or evaluate art.

PHIL 4510. Philosophy of the Individual Arts. (3 cr.

Prereq—3502)

Aesthetic problems that arise in studying or practicing an art.

PHIL 4521. Philosophy of Religion. (3 cr. Prereq—8 cr in philosophy)

Conceptual problems that arise from attempts to provide rational justification for religious belief.

PHIL 4605. Space and Time. (3 cr. \$PHIL 5605. Prereq—Courses in [philosophy or physics] or #)
Philosophical problems concerning nature/structure of space, time, and space-time.

PHIL 4607. Philosophy of the Biological Sciences. (3 cr. Prereq—Courses in [philosophy or biology] or #)
Structure/status of evolutionary theory. Nature of molecular biology, genetics. Reductionism in biology. Legitimacy of teleology. Species concept.

PHIL 4611. Philosophy of the Social Sciences. (3 cr. \$PHIL 5611. Prereq—9 cr of [philosophy or social science] or #)
Criteria for describing/explaining human actions. Problems of objectivity, reduction, freedom.

PHIL 4614. Philosophy of Psychology. (3 cr. Prereq—3607 or PSY 3051 or #)
Problems/prospects in recent developments in psychology, cognitive science, and philosophy of mind.

PHIL 4615. Minds, Bodies, and Machines. (3 cr. Prereq—One course in philosophy or #)
Mind-body problem. Philosophical relevance of cybernetics, artificial intelligence, computer simulation.

PHIL 4622. Philosophy and Feminist Theory. (3 cr. \$PHIL 5622, WOST 4122, WOST 5122. Prereq—8 crs in [philosophy or women's studies] or #)
Encounters between philosophy/feminism. Gender's influence in traditional philosophical problems/methods. Social role of theorist/theorizing as they relate to politics of feminism.

PHIL 4760. Selected Topics in Philosophy. (3 cr [max 9 cr]. Prereq—3 [3xxx-5xxx] or in philosophy or #)
Philosophical problems of contemporary interest. Topics specified in *Class Schedule*.

PHIL 4993. Directed Studies. (1-3 cr [max 6 cr]. Prereq—#, Δ , \square)
Guided individual reading or study.

PHIL 5040. Rationalists. (3 cr [max 6 cr]. Prereq—3005 or #)
Major work of selected early modern rationalists (e.g., Descartes' *Principles of Philosophy*, Spinoza's *Ethics*, Conway's *Principles of the Most Ancient and Modern Philosophy*, Leibniz's *Discourse on Metaphysics*). Works discussed may vary from offering to offering.

PHIL 5050. Empiricists. (3 cr [max 6 cr]. Prereq—3005 or #)
Major work of selected early modern empiricists (e.g., Locke's *Essay Concerning Human Understanding*, Berkeley's *Principles of Human Knowledge*, Hume's *Treatise of Human Nature*). Works discussed may vary from offering to offering.

PHIL 5201. Symbolic Logic I. (4 cr. Prereq—1001 or #)
Study of syntax and semantics of sentential and first-order logic. Symbolization of natural-language sentences and arguments. Development of deductive systems for first-order logic. Metatheoretic proofs and methods, including proof by mathematical induction and proof of consistency and completeness.

PHIL 5202. Symbolic Logic II. (4 cr. Prereq—5201 or #)
Elements of set theory, including the concepts of enumerability and nonenumerability. Turing machines and recursive functions; the results of Church, Godel, and Tarski and the philosophical significance of those results.

PHIL 5211. Modal Logic. (3 cr. Prereq—5201 or #)
Axiomatic and semantic treatment of propositional and predicate modal logics; problems of interpreting modal languages.

PHIL 5221. Philosophy of Logic. (3 cr. Prereq—5202 or #)
Attempts to answer, "What is logic?" Scope of logic. Disputes about alternative logics. Theories concerning logical truth (e.g., conventionalism: view that logical truths are contingent).

PHIL 5222. Philosophy of Mathematics. (3 cr. Prereq—College level logic or mathematics course or #)
Major philosophical questions arising in connection with mathematics. What is mathematics about? How do we know the mathematics we do? What is the relation between mathematics and the natural sciences? Selected readings of leading contributors such as Frege, Dedekind, Russell, Hilbert, Brouwer, Godel, Quine.

PHIL 5323. Education and Social Change. (4 cr; A-F only. \$PHIL 4325)
Connections between education, social change. Theories of democratic/popular education, their application through in-depth practicum in community education setting.

PHIL 5324. Ethics and Education. (3 cr. \$PHIL 4324. Prereq—6 cr in [philosophy or education] or #)
What constitutes good education in terms of educational outcomes and of processes that promote learning. Connections between concepts of good education and of good society.

PHIL 5325. Biomedical Ethics. (3 cr. Prereq—Grad or #)
A survey of major topics and issues in biomedical ethics including patients' rights and duties, informed consent, confidentiality, ethical issues in medical research, the initiation and termination of medical treatment, euthanasia, abortion, and the allocation of medical resources.

PHIL 5326. Lives Worth Living: Questions of Self, Vocation, and Community. (4 cr. \$PHIL 4326. Prereq—#)
Immersion experience. Students live together as a residential community of learners. Works of philosophy, history, and literature form backdrop for exploring such questions as How is identity constructed? What is vocation? What experiences of community are desirable in a life? Each student creates a life-hypothesis for a life worth living.

PHIL 5415. Philosophy of Law. (3 cr. Prereq—1003 or 1004 or 3302 or social science major or #)
Analytical accounts of law and legal obligation.

PHIL 5601. History of the Philosophy of Science. (3 cr. Prereq—#)
History of logical empiricism, from its European origins in first half of 20th century to its emergence as nearly universal account of science in post-war Anglo-American philosophy.

PHIL 5602. Scientific Representation and Explanation. (3 cr. Prereq—#)
Contemporary issues concerning representation and explanation of scientific facts.

PHIL 5603. Scientific Inquiry. (3 cr. Prereq—#)
Philosophical theories of methods for evaluating scientific hypotheses, of role of experimentation in science, and of how hypotheses come to be accepted within a scientific community.

PHIL 5605. Space and Time. (3 cr. \$PHIL 4605. Prereq—Courses in [philosophy or physics] or #)
Philosophical problems concerning nature/structure of space, time, and space-time.

PHIL 5606. Philosophy of Quantum Mechanics. (3 cr)
Problems of interpretation in ordinary (nonrelativistic) quantum mechanics. Two-slit experiment, Schrodinger cat paradox (measurement problem), Einstein-Podolsky-Rosen paradox. Leading approaches to interpretation (Copenhagen, hidden variables, universal wave function) and their connections with philosophical issues.

PHIL 5611. Philosophy of the Social Sciences. (3 cr. \$PHIL 4611. Prereq—9 cr of [philosophy or social science], grad student] or #)
Criteria for describing/explaining human actions. Problems of objectivity, reduction, freedom.

PHIL 5622. Philosophy and Feminist Theory. (3 cr. \$PHIL 4622, WOST 4122, WOST 5122. Prereq—8 crs in [philosophy or women's studies] or #)
Encounters between philosophy/feminism. Gender's influence in traditional philosophical problems/methods. Social role of theorist/theorizing as they relate to politics of feminism.

PHIL 5760. Selected Topics in Philosophy. (3 cr [max 9 cr]. Prereq—3xxx-5xxx course in phil or #)
Philosophical problems of contemporary interest. Topics specified in *Class Schedule*.

PHIL 5993. Directed Studies. (1-3 cr [max 6 cr]. Prereq—#, Δ , \square)
Guided individual reading or study.

Physical Education (PE)

School of Kinesiology

College of Education and Human Development

PE 1004. Diving: Springboard. (1 cr. Prereq—1007 or equiv or #)
Fundamentals of diving. Proper mechanics/techniques to ensure safety. Technical/numerical aspects. Lecture, participatory testing.

PE 1007. Beginning Swimming. (1 cr)
Introduction to basic aquatic safety, fundamentals of swimming and hydrodynamics. Principles of hydrodynamics and stroke mechanics; five basic strokes; basic rescue techniques with use of pool equipment; hydrotherapy for disabilities and other conditions, opportunities for participative activities, lifetime enjoyment of aquatics.

PE 1014. Conditioning. (1 cr)
Fundamentals of personal fitness. Principles of fitness; health and motor skill components of fitness; principles of training/conditioning programs; nutrition; weight control; common fitness injuries; motivation and consistency in fitness programs; stress management.

PE 1015. Weight Training. (1 cr)
Introduction to weight training. Basic aspects of weight training including exercise selection and technique, charting workouts, program design, nutritional considerations, and safety.

PE 1016. Posture and Individual Exercise. (1 cr)
Good posture techniques, individual exercises, fitness concepts, and mental techniques. Specific overall sound body and mind techniques to include flexibility exercises, cardiovascular fitness, resistance training, nutrition management, weight control, stress management, and self-thought.

PE 1022. Whitewater Kayaking. (2 cr. Prereq—Good general health, intermediate swimming ability)
Basic/intermediate whitewater kayaking skills. Equipment parts/use, group development, river hydrology, navigation, paddle strokes, self-assisted rescues, river maneuvers/etiquette, swift-water safety. Emphasizes progression of practical skills necessary for kayaking. Includes 4-day paddling/camping trip.

PE 1029. Handball. (1 cr)
Hand and eye coordination, footwork in practice and game conditions, and skills and strategies of service and rally for the court sport handball (four-wall version). Novice to intermediate levels of play accommodated.

PE 1031. Sabre Fencing. (1 cr)
Basic sabre techniques, movement, an overview of fencing as a recreational sport and an Olympic sport, and the history of fencing.

PE 1032. Badminton. (1 cr)
Fundamentals including etiquette, terminology, game rules for singles and doubles, footwork, shot selection, and strategy.

PE 1033. Foil Fencing. (1 cr)
Fencing fundamentals, including basic foil techniques, movement, a general overview of fencing as a recreational sport and an Olympic sport, and the history of fencing.

PE 1034. Judo. (1 cr)

Basic skills for throwing, falling, grappling (matwork), choking, arm and neck techniques; contest judo from Jiu-Jitsu; fundamental rules and scoring of contests. Videotapes used for technique instruction and contest appreciation.

PE 1035. Karate. (1 cr)

Japanese Traditional Shotokan Karate (JTSK) is non-contact—no protective pads or gear are worn. Structural foundation, discipline and control, posture, basic body dynamics, blocking, kicking, punching techniques, as well as basic sparring (kumate) and forms (kata).

PE 1036. Racquetball. (1 cr)

Fundamentals of racquetball, including equipment; safety and etiquette; terminology; game rules of singles, doubles, and cutthroat; grips; basic strategies; serves and shots.

PE 1037. Squash Racquets. (1 cr)

Entry-level technique, basic equipment, international dimension courts, and fitness.

PE 1038. Beginning Tennis. (1 cr)

Fundamental strokes, including forehands, backhands, volleys, lobs, overheads, and serves; introduction to doubles play; terminology, rules, and etiquette.

PE 1041. Cycling. (1 cr)

Fundamentals of cycling, including physical fitness associated with aerobic training, stretching, safety, and bike maintenance. Students should provide bicycle in good working condition.

PE 1042. Orienteering. (1 cr)

Fundamentals, including navigation of an orienteering course using map and compass; types of orienteering courses; multiple techniques and tactics of orienteering. Course is physically challenging and requires participation in three orienteering meets (Sunday afternoons).

PE 1043. Beginning Horse Riding. (1 cr)

Techniques, styles, and communication of English riding. Students will learn riding techniques at a walk, trot, canter, and jumping.

PE 1044. Self-Defense. (1 cr)

Physical, psychological, and de-escalation skills for acting in crisis situations. Distance, body language, and tone of voice are addressed. Physical skills include striking, kicking, shifting, blocking, releasing techniques, floor defenses, and applications to armed attackers and multiple attackers.

PE 1045. Rock Climbing. (1 cr. Prereq—Good general health, no [neck or back] problems)

Safety, knots, equipment, techniques, and anchor systems used in climbing. Course includes all necessary equipment. Held at St. Paul Gym climbing wall.

PE 1046. Tae Kwon Do. (1 cr)

Fundamentals of Tae Kwon Do. Principles of martial arts, body mechanics of Tae Kwon Do, practical self-defense.

PE 1047. Backpacking. (2 cr. Prereq—Good general health, no back problems)

Packing/fitting a backpack, trip planning, trail safety, gear selection, backcountry cooking, minimum impact camping/travel. Emphasizes practical skills and best practices. Four-day backpacking trip.

PE 1048. Bowling. (1 cr)

Fundamentals, including stance, approach and delivery, scoring, bowling terminology, and etiquette.

PE 1053. Ice Skating. (1 cr)

Basic turns, basic stops, balance techniques, and various other skills from both the forward and backward positions. Equipment, safety issues, ice skating terminology.

PE 1055. Golf. (1 cr)

Proper grip, stance, ball address, swing, club selection, psychological management, rules, and etiquette. Basic instruction in analyzing, assisting with, and coaching golf.

PE 1056. Nordic (Cross-Country) Skiing. (1 cr)

Introduction to the fundamental techniques of classical and freestyle cross country skiing. Students will be taught through lecture and direct experience on cross country skiing trails.

PE 1057. Beginning Skiing. (1 cr. Prereq—\$100 facility fee)

Introduction to alpine skiing. Students are taught to stop, turn, and use lifts, as well as safety, etiquette, and purchase of equipment. Class held at Highland Hills ski area in Bloomington.

PE 1058. Snowboarding. (1 cr. Prereq—Good general health, injury free; \$100 facility fee)

Introduction to alpine snowboarding. Using American Teaching System, classes are split into nine skill levels, beginning through advanced. Held at Hyland Ski and Snowboard School in Bloomington.

PE 1059. Track and Field. (1 cr)

Introduction to track and field: conditioning and training, events and skills, strategies, track and field knowledge, equipment, facilities, and technology.

PE 1065. Beginning Tumbling and Gymnastics. (1 cr)

Rolls, handstands, cartwheels, extensions, handsprings, tucks (flips). Spotting techniques. Skills on bars, vault, and beam.

PE 1067. Basketball. (1 cr)

Fundamental skills and rules of basketball, with emphasis on basic court movement and different offensive and defensive strategies.

PE 1071. Beginning Cricket. (1 cr)

Fundamentals of Cricket. Laws of Cricket, bowling/batting techniques, competitive/recreational Cricket opportunities.

PE 1072. Soccer. (1 cr)

Fundamentals of soccer including sporting behavior both on and off the field, game rules, soccer terminology, participation and competition drills, fundamental soccer skills, practical instruction in strategy.

PE 1073. Softball. (1 cr)

Development of basic skills for lifetime involvement.

PE 1074. Beginning Volleyball. (1 cr)

Basic skills, team play, rules, officiating, and strategy.

PE 1075. Ice Hockey. (1 cr. Prereq—1053 or equiv or #)

Offensive/defensive strategies/techniques, goal tending, scrimmage play. Students need their own equipment.

PE 1107. Intermediate Swimming. (1 cr. Prereq—1007 or equiv, proficient ability to swim 100 meters or #)

Intermediate swimming skills. Fundamentals of swimming and hydrodynamics.

PE 1133. Intermediate Foil Fencing. (1 cr. Prereq—1033 or equiv or #)

Intermediate/advanced technical/tactical actions in foil, rudimentary epee skills, intermediate/advanced footwork. Rules, officiating, bout tactics.

PE 1135. Intermediate Karate. (1 cr. Prereq—1035 or equiv or #)

Techniques of Japanese traditional Shotokan Karate taught through Ippon Kumite (one step sparring), San Kumite (three step sparring), and Heian Shodan Kata/Nidan Kata (forms). Testing for orange belt is optional.

PE 1136. Intermediate Racquetball. (1 cr. Prereq—1036 or equiv, #)

Improvement of basic skills and strategies. Format is determined by the number of players and their level of ability.

PE 1138. Intermediate Tennis. (1 cr. Prereq—1038 or equiv or #)

Review terminology, rules, etiquette. Improve basic skills. Singles/doubles strategy, competitive play.

PE 1154. Figure Skating. (1 cr. Prereq—1053 or equiv or #)

Terminology, rules. Basic moves, jumps, spins. On-/off-ice assignments.

PE 1157. Intermediate Skiing. (1 cr. Prereq—1057 or equiv or #; assessment is made to determine skill level; \$100 facility fee)

Developing advanced skills in alpine skiing. Skiing safely on more difficult terrain. Class held at Highland Hills ski area in Bloomington.

PE 1165. Intermediate Tumbling and Gymnastics. (1 cr. Prereq—1065 or #)

Rolls, handstands, cartwheels, extensions, handsprings, tucks (flips), twists. Spotting techniques. Skills on bars, vault, and beam.

PE 1174. Intermediate Volleyball. (1 cr. Prereq—1074 or equiv, #)

Development of a broader understanding of volleyball systems of play, and incorporation of offensive and defensive formations into team play. Fundamental skills will be developed further and more advanced skills will be introduced. Team play, transition, coaching, and officiating.

PE 1205. Scuba and Skin Diving. (1 cr. Prereq—Ability to swim 400 yds comfortably or #)

Diving equipment, physics, physiology, decompression, emergencies, recreational dive planning, oceans, currents and aquatic life, snorkeling/SCUBA equipment usage, buoyancy control, entries, emergencies.

PE 1305. Scuba Stress Rescue and Accident Management. (1 cr. Prereq—[Open Water SCUBA Certification or higher], [CPR, First Aid] certified, [own SCUBA equipment [mask, fins, snorkel, buoyancy compensator, regulator depth pressure gauge, wet suit] or pay \$55 rental fee])

Continuing education after basic SCUBA certification course. Accident prevention, personal safety, SCUBA rescue, recognizing/reducing diver stress. SCUBA Schools International (SSI) Stress and Rescue certification.

PE 1306. Lifeguard Training. (1 cr. Prereq—[Proficiently swim 500 meters, at least 17 yrs old] or #)

Upon completion, certifications are obtained in the following categories: American Red Cross Lifeguarding Today and First Aid; CPR for the Professional Rescuer; and Waterfront Lifeguarding.

PE 1411. Water Safety Instructor. (2 cr. Prereq—[Proficiency in basic strokes, completion of skill/written pre tests] or #)

Advanced lifesaving techniques, treading strategies.

PE 1415. Advanced Weight Training and Conditioning. (1 cr. Prereq—[1014, [1015 or equiv]] or #; one yr of serious weight training recommended)

Introduction to advanced forms of cardiovascular/weight training. Powerlifting, Olympic weightlifting, bodybuilding, sport-specific training. Proper technique, exercise selection, programming, nutrition, anatomy/physiology of weight training.

PE 1720. Special Activities in Physical Education. (1-3 cr [max 9 cr])

Activities or related opportunities not normally available through regular course offerings.

Physical Medicine and Rehabilitation (PMED)

Department of Physical Medicine and Rehabilitation

Medical School

PMED 1003. Orientation to Occupational Therapy. (1 cr; S-N only)

Survey of the profession through lectures, films, demonstrations, and tours. For students investigating the field of occupational therapy.

PMED 5121. Issues in Mental Health. (1 cr; S-N only)

Prereq—One course gen psych, one course abnorm psych) Psychiatric/neuropsychological assessment/treatment. Issues related to medical/community management and to roles of OT/PT with respect to clients with mental health needs. Interaction between physical/mental health and disability.

PMED 5122. Descriptive Neurology. (2 cr; A-F only.

Prereq—OT student or #)

Relates neuroanatomical/neurophysiological principles to neurological conditions commonly seen in occupational/physical therapy practice.

PMED 5161. Theory of Physical Medicine and Rehabilitation Applied to Medical Sciences. (2 cr; A-F only.

Prereq—OT student or #)

Diagnostic procedures. Medical, surgical, and rehabilitation management of patient problems in orthopedics, surgery, pediatrics, dermatology, medicine, cancer, and speech. Correlation to current practice. Presentation of patients.

PMED 5182. Functional Neuroanatomy and Neurophysiology. (4 cr; A-F only. Prereq—Registered occupational therapy student or #)

Neuroanatomic structures as functional systems, basic neurophysiologic concepts. Emphasizes applications for understanding/treating physical dysfunctions.

PMED 5214. Clinical Practice of Physical Therapy. (1 cr; S-N only. Prereq—Registered PT student)

Clinical visitation.

PMED 5215. Clinical Practice of Physical Therapy I. (1 cr [max 2 cr]; S-N only. Prereq—Regis PT student)

First of three-course sequence. Emphasizes sensitivity to needs of patients, families, and health-care coworkers. Patient handling techniques, communication skills, awareness of cultural differences, psychological aspect of disability, and use of community resources.

PMED 5217. Clinical Practice of Physical Therapy III. (1 cr; S-N only. Prereq—Registered 2nd-year PT student)

Third of three-course sequence. Sensitivity to needs of patients, families, and health-care coworkers. Patient handling techniques, communication skills, awareness of cultural differences, psychological aspects of disability, use of community resources. Offered summer session.

PMED 5223. Electrotherapy and Electrophysiological Testing. (2 cr; A-F only. Prereq—Enrolled PT student)

Theory and technique of movement analysis and treatment using electrophysiological testing and therapeutic devices.

PMED 5231. Clinical Biomechanics. (4 cr; A-F only. SPT 6231. Prereq—Intro calculus, intro physics, [registered RSC student or registered PT student])

Forces/structures internal/external to body responsible for normal/abnormal human movement. Analysis techniques, independent assignments. Muscle function, palpation, posture. Gait of normal individuals, analysis to detect deviation from norm.

PMED 5260. Professional Issues in Physical Therapy. (3 cr; A-F only. Prereq—Enrolled PT student)

Current professional issues, dilemmas, and trends in health care. Evaluation and treatment skills in physical therapy specialty areas.

PMED 5284. Musculoskeletal II. (4 cr; A-F only. Prereq—Enrolled PT student)

Problem-solving approach to evaluating, treating, and preventing selected musculoskeletal conditions across life span. Chart review, history taking, strength testing, functional testing, gait/posture examination, special orthopedic tests. Therapeutic exercises, orthopedic ambulation, joint mobilization, splinting, patient education. Second of two-course sequence.

PMED 5287. Neurorehabilitation I. (4 cr; A-F only.

Prereq—Enrolled PT student)

Assessment and rehabilitation of patients with neurological conditions (e.g., cerebral vascular disease traumatic brain injury, multiple sclerosis, Parkinson's disease, amyotrophic lateral sclerosis). Using treatment procedures, orthotics, and equipment to improve function and prevent, stabilize, or decrease impairments.

PMED 5288. Neurorehabilitation II. (4 cr; A-F only.

Prereq—Registered PT student)

Pediatric assessment/rehabilitation for neurological, orthopedic, cardiac, prematurity, transplant, and behavioral conditions. Preparation for adult assessment/treatment with neurological, general medical, and vascular disease. Students use etiologic knowledge to assess patients in clinic and establish treatment plans and goals.

PMED 5300. Concepts for Occupational Therapy Practice. (4 cr; A-F only. Prereq—Enrolled OT student or #)

Critical thinking, ethics, professional resources/organizations, patient-therapist relationship. Level I fieldwork experience.

PMED 5313. Therapeutic Occupation. (4 cr; A-F only.

Prereq—Enrolled OT student or #)

Occupational therapy philosophy, history, and frames of reference. Activity analysis applied to purposeful, therapeutic activities for individuals and groups.

PMED 5341. Introduction: Evaluation and Intervention I. (4 cr; A-F only. Prereq—5393 or #)

Assessment concepts/techniques. Application to patient populations with both mental health/physical disabilities. Treatment planning/documentation.

PMED 5342. Compensatory Rehabilitation: Evaluation and Intervention II. (4 cr; A-F only. Prereq—5300, 5313 or #)

Assessment of daily living performance areas; adaptation techniques to compensate for performance deficits. Level I fieldwork experience.

PMED 5343. Specialty Topics: Evaluation and Intervention III. (4 cr; A-F only. Prereq—5342 or #)

Applies critical thinking model to assessment/intervention of selected patient populations with mental/physical problems requiring specialized approaches. Focus on habilitation/rehabilitation of populations with multiple performance component deficits. Fieldwork.

PMED 5344. Neurorehabilitation: Evaluation and Intervention IV. (5 cr; A-F only. Prereq—5343 or #)

Assessment/intervention related to perception, cognition, reflexes, sensory integration, and motor control. Application to individuals with multiple performance component deficits.

PMED 5360. Dynamics of Group Models. (2 cr; A-F only.

Prereq—5313 or #)

Application of group/team dynamics in diverse professional settings.

PMED 5370. Theory of Occupation. (1 cr [max 2 cr]; A-F only.

Prereq—Enrolled OT student or #)

Occupational therapy frames of reference, role of activity, and historical development of profession.

PMED 5375. Community Resources and Health-Care Issues. (2 cr; A-F only. Prereq—[5300, 5342] or #)

Analysis of community health-care systems, including cultural/family influences on individual health and decision making. Students identify current trends in health care and determine responses to them at social, political, or legislative level.

PMED 5376. Adult Education and Planning. (1 cr; A-F only.

Prereq—5313 or #)

Skills needed to plan, implement, and evaluate adult educational programs/materials for patient/family education, peer/professional education, and education of others in order to carry out therapeutic interventions. Student teaching unit, community based activity.

PMED 5380. Management of Occupational Therapy Services. (3 cr; A-F only. Prereq—[5360, 5375, 5376] or #)

Administration/management of occupational therapy services within managed care environment. Issues in Medicare, HMOs, TQM, consultation, human resources, promotion of profession. Emphasizes program development in current organizational structures.

PMED 5391. Occupation across the Life Span. (3 cr; A-F only.

Prereq—[5375, 5376] or #)

The well elderly, school therapy, work-related injuries/industrial rehabilitation. Fieldwork.

PMED 5392. Research in Occupational Therapy. (3 cr; A-F only.

Prereq—5313 or #)

Analysis of scientific literature, development of research proposals.

PMED 5393. Functional Anatomy and Kinesiology. (4 cr; A-F only. Prereq—Enrolled OT student or #)

Gross human anatomy emphasizing skeletal, muscular, circulatory, and peripheral nervous systems of the extremities and trunk. Includes cadaver lab prosections. Analyzing functional human movement from a biomechanical perspective.

PMED 5394. Orthotics. (3 cr; A-F only. Prereq—5341 or #)

Analysis, design, and construction of orthotic devices.

PMED 5395. Independent Study in Occupational Therapy. (1-4 cr [max 16 cr]. Prereq—Enrolled OT student or #)

Physics (PHYS)

Institute of Technology

PHYS 1001W. Energy and the Environment. (4 cr.

Prereq—1 yr high school algebra)

Fundamental principles governing physical world in context of energy/environment. Lab.

PHYS 1011. Physical World. (3 cr; A-F only. Prereq—1 yr high school algebra)

Fundamental laws and principles governing the physical world, discussed in the context in which encountered in modern science and technology.

PHYS 1012. Elementary Physics. (4 cr; A-F only. Prereq—1 yr high school algebra, Internet connectivity)

Topics represented in context of real world situations. Motion, forces, momentum, energy, heat, vibrations, sound, light, electricity, magnetism. Emphasizes development of logical reasoning skills. Lab.

PHYS 1101W. Introductory College Physics I. (4 cr. \$PHYS 1107, PHYS 1201W, PHYS 1301W, PHYS 1401V, PHYS 1501.

Prereq—High school algebra, plane geometry, trigonometry; primarily for students interested in technical areas)

Fundamental principles of physics in the context of everyday world. Use of kinematics/dynamics principles and quantitative/qualitative problem solving techniques to understand natural phenomena. Lecture, recitation, lab.

PHYS 1102W. Introductory College Physics II. (4 cr. Prereq—1101; primarily for students interested in technical areas)

Fundamental principles of physics in the context of everyday world. Use of conservation principles and quantitative/qualitative problem solving techniques to understand natural phenomena. Lecture, recitation, lab.

PHYS 1107. Introductory Physics Online. (4 cr. \$PHYS 1101W, PHYS 1201W, PHYS 1301W, PHYS 1401V, PHYS 1501.

Prereq—High school algebra, plane geometry, trigonometry)

Principles of physics in context of everyday world. Use of kinematics/dynamics principles together with quantitative/qualitative problem solving techniques to understand natural phenomena.

PHYS 1111. Basic Physics I. (3 cr. Prereq—High school algebra, high school geometry, high school trigonometry)

Algebra-based. Motion of a body in one dimension. Newton's laws of motion. Emphasizes developing systematic approach to problem solving and applying it to problems. Experiments. No lab component.

PHYS 1112. Basic Physics II. (3 cr [max 4 cr]. Prereq—1111 or equiv)

Algebra-based. Work, energy, momentum, collisions, circular motion, universal gravitation, heat, electricity. Systematic approach to problem solving. Experiments. No lab component.

PHYS 1201W. Introductory Physics for Biology and Pre-

medicine I. (5 cr. \$PHYS 1101W, PHYS 1107, PHYS 1301W, PHYS 1401V, PHYS 1501. Prereq—[high school or college] calculus, trigonometry, algebra)

Fundamental principles of physics. Description of motion, forces, conservation principles, structure of matter. Applications to mechanical systems, including fluids, waves, heat. Lab.

PHYS 1202W. Introductory Physics for Biology and Pre-medicine II. (5 cr. §PHYS 1302W, PHYS 1402V, PHYS 1502. Prereq–1201)

Fundamental principles of physics. Motion, forces, conservation principles, structure of matter. Applications to electromagnetic phenomena, including optics, atomic structure. Lab.

PHYS 1301W. Introductory Physics for Science and Engineering I. (4 cr. §PHYS 1101W, PHYS 1107, PHYS 1201W, PHYS 1401V, PHYS 1501. Prereq–1MATH 1271 or 1MATH 1371 or 1MATH 1571)

Use of fundamental principles to solve quantitative problems. Motion, forces, conservation principles, structure of matter. Applications to mechanical systems.

PHYS 1302W. Introductory Physics for Science and Engineering II. (4 cr. §PHYS 1202W, PHYS 1402V, PHYS 1502. Prereq–1301, 1MATH 1272 or MATH 1372 or MATH 1572)

Use of fundamental principles to solve quantitative problems. Motion, forces, conservation principles, fields, structure of matter. Applications to electromagnetic phenomena.

PHYS 1401V. Honors Physics I. (4 cr. §PHYS 1101W, PHYS 1107, PHYS 1201W, PHYS 1301W, PHYS 1501. Prereq–IT honors or consent of IT honors office)

Comprehensive, calculus-level general physics. Emphasizes use of fundamental principles to solve quantitative problems. Description of motion, forces, conservation principles. Structure of matter, with applications to mechanical systems.

PHYS 1402V. Honors Physics II. (4 cr. §PHYS 1202W, PHYS 1302W, PHYS 1502. Prereq–IT honors or consent of IT honors office)

Second semester of comprehensive, calculus-level general physics. Emphasizes use of fundamental principles to solve quantitative problems. Description of motion, forces, conservation principles, fields. Structure of matter, with applications to electromagnetic phenomena.

PHYS 1501. Enriched Physics for Science and Engineering I. (4 cr. §PHYS 1101W, PHYS 1107, PHYS 1201W, PHYS 1301W, PHYS 1401V. Prereq–High school physics, [AP calculus or equiv])

Enriched, calculus-based introductory physics. Use of fundamental principles. Structure of matter. Applications to mechanical systems.

PHYS 1502. Enriched Physics for Science and Engineering II. (4 cr. §PHYS 1202W, PHYS 1302W, PHYS 1402V. Prereq–1501W, physics experience, one yr of calculus)

Use of fundamental principles to solve quantitative problems in electromagnetic phenomena.

PHYS 1901. Freshman Seminar: Environment. (1-3 cr [max 6 cr]; A-F only. Prereq–Freshman)

Topics vary. See *Class Schedule*.

PHYS 1904. Freshman Seminar: International Perspective/Fresh Sem-Int'l Persp. (1-3 cr [max 6 cr]; A-F only. Prereq–Freshman)

Topics vary. See *Class Schedule*.

PHYS 1905. Freshman Seminar. (1-3 cr [max 6 cr]; A-F only. Prereq–Fr)

Topics vary. See *Class Schedule*.

PHYS 1910W. Freshman Seminar: Writing Intensive. (1-3 cr [max 3 cr]; A-F only. Prereq–Freshman)

Topics vary. See *Class Schedule*.

PHYS 2303. Physics III: Physics of Matter. (4 cr. §PHYS 2403H, PHYS 2503. Prereq–1302, [MATH 1272 or MATH 1372 or MATH 1572H])

Use of fundamental principles to solve quantitative problems. Structure of matter. Applications to 20th-century physics such as Bohr atom and models of the hydrogen atom, classical/quantum mechanical waves, molecules, solid state, nuclear physics.

PHYS 2311. Modern Physics. (4 cr. Prereq–[1302 or 1402], CHEM 1022, Math 2243)

Broad overview of physical concepts developed in twentieth century. Special relativity, wave-particle duality, Schrodinger equation, Bohr atom, hydrogen atom in wave mechanics, many-electron atoms, x-rays, nuclear structure, radioactivity, nuclear reactions, statistical physics.

PHYS 2403H. Honors Phys III. (4 cr. §PHYS 2303, PHYS 2503. Prereq–1402V, [IT honors or consent of IT honors office])

Third semester of comprehensive calculus-level general physics. Emphasizes use of fundamental principles to solve quantitative problems. Applications to 20th-century physics such as classical/quantum mechanical waves, optics, special relativity, and atomic structure of materials.

PHYS 2503. Physics III: Foundations of Modern Physics. (4 cr. §PHYS 2303, PHYS 2403H. Prereq–1302W, [MATH 1272 or MATH 1372 or MATH 1572H])

Use of fundamental principles to solve quantitative problems in wave mechanics. Statistical theory from probability to thermodynamics. Applications to matter and to electromagnetic waves, optics, and special relativity.

PHYS 2601. Quantum Physics. (4 cr. Prereq–[2403H or 2503], [1MATH 2243 or Math 2373 or Math 2574H])

Introduction to quantum mechanics. Applications to atomic, molecular, condensed-matter, nuclear, elementary-particle, and statistical physics. Associated lab is 2605.

PHYS 2605. Quantum Physics Laboratory. (3 cr. Prereq–12601)

Laboratory experiments in atomic, solid state, and nuclear physics offered in conjunction with 2601.

PHYS 3071W. Laboratory-Based Physics for Teachers. (4 cr. Prereq–No IT credit, college algebra; designed for students intending to be education majors)

Laboratory-based introductory physics. Topics selected to apply to elementary school curriculum: earth's motion, properties of matter, heat/temperature, kinematics, electric current.

PHYS 3993. Directed Studies. (1-5 cr [max 10 cr]. Prereq–#, Δ)

Directed study in Physics in areas arranged by the student and a faculty member.

PHYS 3994. Directed Research. (1-5 cr [max 10 cr]. Prereq–#, Δ)

Independent, directed study in physics in areas arranged by the student and a faculty member.

PHYS 4001. Analytical Mechanics. (4 cr. Prereq–[2303 or 2601 or CHEM 3501 or CHEM 3502], two sems soph math)

Analytic Newtonian mechanics. Mathematics beyond prerequisites developed as required.

PHYS 4002. Electricity and Magnetism. (4 cr. Prereq–[2303 or 2601 or CHEM 3501 or CHEM 3502], two sems soph math)

Classical theory of electromagnetic fields using vector algebra and vector calculus.

PHYS 4051. Methods of Experimental Physics I. (5 cr. Prereq–2605 or equiv lab experience or #)

Contemporary experimental techniques. Introduction to modern analog and digital electronics from an experimental viewpoint. Use of computers for data acquisition and experimental control. Statistics of data analysis.

PHYS 4052W. Methods of Experimental Physics II. (5 cr. Prereq–4051)

Second semester of laboratory sequence. Contemporary experimental techniques illustrated by experiments with data analysis. Students design and execute an experimental project. Lectures on specialized topics of professional concern.

PHYS 4071. Concepts in Physics. (3 cr. Prereq–2201, 2303)

Overview of physics with emphasis on 20th-century developments. Primarily for secondary teachers and science majors wishing to understand the conceptual connections within physics.

PHYS 4101. Quantum Mechanics. (4 cr. Prereq–[2303 or 2601 or CHEM 3502], two sems soph math)

Mathematical techniques of quantum mechanics. Schrodinger Equation and simple applications. General structure of wave mechanics. Operator methods, perturbation theory, radiation from atoms.

PHYS 4111. History of 19th-Century Physics. (3 cr. §HSCI 4111. Prereq–General physics or #)

Legacy of 17th-century experimental and theoretical physics especially light, electricity, magnetism, and heat. Experimental and theoretical discoveries in 19th-century physics set within the context of concurrent educational, institutional, and political developments in Europe and the United States. Heritage of 19th-century physics.

PHYS 4121. History of 20th-Century Physics. (3 cr. §HSCI 4121. Prereq–General physics or #)

Experimental and theoretical discoveries in 20th-century physics (birth of modern physics, special theory of relativity, old and new quantum theories, nuclear physics to WWII) within the context of concurrent educational, institutional, and political developments in Europe and the United States.

PHYS 4201. Statistical and Thermal Physics. (3 cr. §PHYS 5201. Prereq–2601)

Principles of thermodynamics and statistical mechanics. Selected applications such as kinetic theory, transport theory, and phase transitions.

PHYS 4211. Introduction to Solid-State Physics. (3 cr. Prereq–4101, 4201)

A modern presentation of the properties of solids. Topics include vibrational and electronic properties of solids; diffraction of waves in solids and electron band structure. Other possible topics include optical properties, magnetic phenomena, and superconductivity.

PHYS 4303. Waves, Optics, and Relativity. (3 cr. Prereq–4001, 4002)

Further topics in analytical mechanics, electricity and magnetism including mechanical and electromagnetic wave phenomena, physical and geometrical optics, and relativistic dynamics of particles and fields.

PHYS 4501. Experimental Project. (1-5 cr [max 5 cr]. Prereq–4052, #)

Research project in physics area of contemporary interest. Project must be approved by faculty coordinator before registration.

PHYS 4511. Introduction to Nuclear and Particle Physics. (3 cr. Prereq–4101)

Fundamental particles and Standard Model. Symmetries/quarks, models of nuclei, interactions between particles/nuclei, tests of conservation laws, fission/fusion.

PHYS 4611. Introduction to Space Physics. (3 cr. Prereq–2601, 4001, 4002)

Astrophysics of energetic particles in space, including cosmic rays and those of solar origin. Detection/identification. Interactions with matter/magnetic fields in space. Acceleration, modulation, and propagation.

PHYS 4621. Introduction to Plasma Physics. (3 cr. Prereq–4001, 4002)

Magnetohydrodynamics and properties of collisionless plasmas with applications to the magnetic field of the earth and sun, and to plasma confinement. Transport phenomena and effects of collisions.

PHYS 4711. Introduction to Optics. (3 cr. Prereq–4002)

Modern theoretical and experimental optics broadly defined to include, for example, radio astronomy and particle accelerators. Matrix methods in geometrical optics including charged particle optics; optical detectors and noise; phenomena in intense coherent radiation including nonlinear effects.

PHYS 4911. Introduction to Biopolymer Physics. (3 cr. §PHYS 5081. Prereq–[2303, 2403H, 2503] or CHEM 3501 or #)

Introduction to biological and soft condensed matter physics. Emphasizes physical ideas necessary to understand behavior of macromolecules and other biological materials. Elements of thermodynamics and statistical mechanics are presented as needed.

PHYS 4950H. Senior Thesis. (1-3 cr [max 6 cr]; S-N only. Prereq–#)

Independent project with adviser.

PHYS 4960H. Honors Seminar. (1 cr [max 2 cr] Prereq—Upper div honors, #)

Designed to prepare students for senior honors thesis projects and provide guidance in choice of future careers.

PHYS 4993. Directed Studies. (1-5 cr [max 10 cr]. Prereq—#) Directed study in Physics in areas arranged by student and faculty member.

PHYS 4994. Directed Research. (1-5 cr [max 10 cr]. Prereq—#) Independent, directed study in physics in areas arranged by student and a faculty member.

PHYS 5001. Quantum Mechanics I. (4 cr. Prereq—4101 or equiv or #)

Schrodinger equation: bound state and scattering problems in one dimension. Spherically symmetric problems in three dimensions, angular momentum, and the hydrogen atom. Approximation methods for stationary states. Time-dependent perturbation theory. Operators and state vectors: general formalism of quantum theory.

PHYS 5002. Quantum Mechanics II. (4 cr. Prereq—5001 or equiv)

Symmetry in quantum mechanics, space-time symmetries and the rotation group, Clebsch-Gordan coefficients and the Wigner-Eckart theorem. Scattering theory. Method of second quantization with elementary applications. Relativistic wave equations including Dirac equation.

PHYS 5011. Classical Physics I. (4 cr. Prereq—4001, 4002 or #)

Classical mechanics: Lagrangian/Hamiltonian mechanics, orbital dynamics, rigid body motion, special relativity.

PHYS 5012. Classical Physics II. (4 cr. Prereq—5011 or #)

Classical electromagnetism: electrostatics, magnetostatics, Maxwell's equations, electromagnetic waves, radiation, interaction of charged particles with matter.

PHYS 5022. Relativity, Cosmology, and the Universe. (4 cr. §AST 5022. Prereq—2601 or #)

Large-scale structure and history of universe. Introduction to Newtonian and relativistic world models. Physics of early universe. Cosmological tests. Formation of galaxies.

PHYS 5041. Analytical and Numerical Methods of Physics I. (4 cr. Prereq—Grad or #)

Survey of mathematical techniques, both analytic and numerical, needed for physics. Application to physical problems.

PHYS 5042. Analytical and Numerical Methods of Physics II. (4 cr. Prereq—5041 or #)

Survey of mathematical techniques, both analytic and numerical, needed for physics. Application to physical problems.

PHYS 5071. Physics for High School Teachers:

Experimental Foundations and Historical Perspectives. (3 cr. Prereq—Gen physics, #; no cr for physics grad or grad physics minor)

In-depth examination of a conceptual theme in physics, its experimental foundations and historical perspectives. Kinematics and dynamics from Aristotle through Einstein; nature of charge and light; energy and thermodynamics; electricity, magnetism, and quantized fields; structure of matter.

PHYS 5081. Introduction to Biopolymer Physics. (3 cr.

§PHYS 4911. Prereq—working knowledge of [thermodynamics, statistical mechanics]) Introduction to biological and soft condensed matter physics. Emphasizes physical ideas necessary to understand behavior of macromolecules and other biological materials.

PHYS 5201. Thermal and Statistical Physics. (3 cr; A-F only. §PHYS 4201. Prereq—2601 or equivalent)

Principles of thermodynamics and statistical mechanics. Selected applications such as kinetic theory, transport theory, and phase transitions.

PHYS 5401. Physiological Physics. (4 cr. Prereq—1301 or 1401)

Musculoskeletal system, circulatory system/membrane transport, biological control systems, propagation/action potential in nervous system, biomagnetism, electromagnetism at cellular level.

PHYS 5402. Radiological Physics. (4 cr. Prereq—1302 or 1402)

Signal analysis, medical imaging, medical x-rays, tomography, radiation therapy, nuclear medicine, MRI, and similar topics.

PHYS 5701. Solid-State Physics for Engineers and

Scientists. (4 cr. Prereq—Grad or advanced undergrad in physics or engineering or the sciences) Crystal structure and binding; diffraction; phonons; thermal and dielectric properties of insulators; free electron model; band structure; semiconductors.

PHYS 5702. Solid State Physics for Engineers and

Scientists. (4 cr. Prereq—5701 or #) Diamagnetism and paramagnetism; ferromagnetism and antiferromagnetism; optical phenomena; lasers; superconductivity; surface properties; ferroelectricity.

PHYS 5950. Colloquium Seminar. (1 cr; S-N only. Prereq—

[Grad student or advanced undergrad in physics], Δ) Colloquium of School of Physics and Astronomy.

PHYS 5980. Introduction to Research Seminar. (1 cr [max 3

cr]; S-N only. Prereq—Grad or upper div phys major) Introduction to the research activities of the School of Physics and Astronomy.

PHYS 5993. Directed Studies. (1-5 cr [max 15 cr]. Prereq—#, Δ)

Independent, directed study in physics in areas arranged by the student and a faculty member.

PHYS 5994. Directed Research. (1-5 cr [max 15 cr].

Prereq—Jr, Δ) Problems, experimental or theoretical, of special interest to students. Written reports.

Physiology (PHSL)

Department of Physiology

Medical School

PHSL 1001. Human Physiology. (3 cr. Prereq—High school chem, high school biol)

How major organ systems function (nerve, muscle, circulation, respiration, endocrine, renal, gastrointestinal, temperature regulation and energy metabolism). Function in terms of mechanism. Ideas presented in terms of scientific concepts and methods, although a scientific background is not assumed.

PHSL 3051. Human Physiology. (4 cr. Prereq—[BIOL 1009 or 1 yr college biol], 1 yr college chem)

For pre-allied health sciences majors. How major organ systems function (nerve, muscle, circulation, respiration, endocrine, renal, gastrointestinal, temperature regulation and energy metabolism). Fall offering emphasizes independent learning using e-mail extensively for information exchange between students and faculty. One-hour lecture, two-hour lab.

PHSL 3061. Principles of Physiology. (4 cr. §BMEN 3701, PHSL 3063, PHSL 3701. Prereq—1 year college CHEM and physics and math through integral calculus)

Human physiology with emphasis on quantitative aspects. Organ systems (circulation, respiration, gastrointestinal, renal, endocrine, muscle, peripheral and central nervous systems), cellular transport processes, and scaling in biology.

PHSL 3062W. Research Paper for Physiology Majors. (1 cr; A-F only. Prereq—[§3061, physiology major, 1 yr [college chem, physics], math through integral calculus)

Students write a research paper on a topic of interest, mentored by a faculty member.

PHSL 3063. Principles of Human Physiology. (6 cr. §BMEN

3701, PHSL 3061, PHSL 3701. Prereq—1 yr [college chem, physics], math through integral calculus) Physiology of human organ systems. Emphasizes quantitative aspects. Lab exercises integrated with lectures. All organ systems. cellular transport processes, scaling.

PHSL 3095. Problems in Physiology. (1-5 cr [max 20 cr].

Prereq—[college physiology, #) Individualized study in physiology. Students address a selected problem in physiology through library or lab research, supervised by physiology faculty.

PHSL 3701. Physiology Laboratory. (2 cr; A-F only. §BMEN 3701, PHSL 3061, PHSL 3063. Prereq—3062W or [§3062W or 3071W)

Experiments in physiology. Emphasizes quantitative aspects, including analysis of organ systems.

PHSL 4095. Honors Problems in Physiology. (2-4 cr [max

4 cr]; A-F only. Prereq—[§3061, physiology honors candidate, approval of director of undergrad studies in physiology) Students pursue a selected topic in physiology through library or lab research supervised by physiology faculty.

PHSL 5061. Principles of Physiology for Biomedical

Engineering. (4 cr. Prereq—Biomedical engineering grad, one yr college CHEM and physics and math through integral calculus) Human physiology with emphasis on quantitative aspects. Organ systems (circulation, respiration, renal, gastrointestinal, endocrine, muscle, central and peripheral nervous systems), cellular transport processes, and scaling in biology.

PHSL 5094. Research in Physiology. (1-5 cr [max 20 cr].

Prereq—#) Independent lab research project in physiology, supervised by physiology faculty.

PHSL 5095. Problems in Physiology. (1-5 cr [max 20 cr].

Prereq—#) Individualized study in physiology. Students address selected problem through library or lab research, supervised by physiology faculty.

PHSL 5101. Human Physiology. (5 cr. Prereq—Grad student)

Survey of human physiology. Muscle, cardiovascular, respiratory, gastrointestinal, renal physiology. Integrative, systems approach. Emphasizes normal function.

PHSL 5115. Advanced Clinical Physiology I for Nurse

Anesthetists. (3 cr; A-F only. Prereq—#) Cellular mechanisms underlying systems physiology. Cellular physiology, physiology of excitable tissues, renal physiology, cardiovascular physiology.

PHSL 5116. Advanced Clinical Physiology II for Nurse

Anesthetists. (3 cr; A-F only. Prereq—5115, #) Respiratory physiology, acid-base physiology, gastrointestinal physiology, metabolism, endocrinology, physiology of pregnancy and labor.

PHSL 5201. Computational Neuroscience I: Membranes

and Channels. (3 cr. §NSC 5201. Prereq—Calculus through differential equations) Neural excitation (ion channels, excitation models, effects of neural morphology) using UNIX workstations to simulate empirical results. Includes the Hodgkin-Huxley model, nonlinear dynamic systems analysis, voltage and ligand gated ion channels, ion transport theories, and impulse initiation and propagation.

PHSL 5444. Muscle. (3 cr. §BIOC 5444. Prereq—3061 or 3071

or 5061 or BIOC 3021 or BIOC 4331 or #) Muscle membranes: structures, mechanisms, and physiological roles of channels/pumps. Muscle contraction: force generation by actin/myosin.

PHSL 5510. Advanced Cardiac Physiology and Anatomy.

(2-3 cr. Prereq—#) Fundamental concepts, advanced topics related to clinical/biomedical cardiac physiology. Lectures, laboratories, workshops, anatomical dissections. Intense, one week course.

PHSL 5511. Advanced Neuromuscular Junction**Physiology.** (2-3 cr. Prereq-#)

Fundamental concepts and advanced topics related to clinical/biomedical aspects of neuromuscular junction physiology. Lectures, laboratories, workshops, anatomical dissections. Intense, one week course.

PHSL 5520. Advanced Pulmonary Mechanics: Physiology and Pathophysiology. (2-3 cr. Prereq-#)

Fundamental concepts and advanced topics related to mechanical aspects of pulmonary function (e.g., elastic recoil, airway resistance). Lectures, laboratories, demonstrations. Intense, one week course.

PHSL 5530. Physiology of Drug Absorption, Distribution, and Elimination. (1-2 cr [max 2 cr]. Prereq—Two semesters of calculus, #)

Topics in pharmacokinetics. Non-compartmental calculations of clearance and volume of distribution. Compartmental modeling. Deconvolution approaches. Physiologically-based pharmacokinetic modeling. Course is designed around the pharmacokinetic program PKQuest.

PHSL 5540. Advanced Exercise Medicine: Physiology and Bioenergetics. (1-2 cr [max 2 cr]. Prereq—[Grad student or practicing health professional], #)

Three-day intensive course. Physiology, bioenergetics, nutrition, and sports medicine. Focuses on application of principles to treatment of diseases and functional deficits. Lectures, demonstrations, hands-on experiences in an exercise medicine facility.

PHSL 5701. Physiology Laboratory. (1-2 cr [max 2 cr]; A-F only. Prereq-#)

Experiments in physiology. Emphasizes quantitative aspects, including analysis of organ systems.

Plant Biology (PBIO)

Department of Plant Biology

College of Biological Sciences**PBIO 1212. Plants and Society.** (3 cr. Prereq—Non-biology major)

Roles that plants play and have played in human biological and cultural development.

PBIO 4321. Minnesota Flora. (3 cr. Prereq—BIOL 1001 or BIOL 1009 or equiv)

Identification of common vascular plants of Minnesota and surrounding region. Distinguishing characteristics of local taxa. Descriptive terminology. Use of manuals of floras. Lab, field trips.

PBIO 4404. Developmental Plant Anatomy. (3 cr. Prereq—BIOL 2022 or BIOL 3007)

Introduction to the microscopic structure and development of plants at the cell, tissue, and organ level. Emphasis on relationships between anatomy and the ontogeny, phylogeny, and ecology of seed plants with some reference to lower vascular plants.

PBIO 4511. Flowering Plant Diversity. (3 cr. \$PBIO 4811. Prereq—BIOL 2022 or BIOL 3007)

Systematics of flowering plants of the world. Ecology, geography, origins, and evolution. Family characteristics. Floral structure, function, evolution. Pollination biology. Methods of phylogenetic reconstruction. Molecular evolution. Taxonomic terms. Methods of collection/identification. Includes lab.

PBIO 4516W. Plant Cell Biology: Writing Intensive. (3 cr. \$PBIO 5516. Prereq—[BIOL 2022 or BIOL 3002 or BIOL 3007], [BIOC 3021 or BIOL 3021 or BIOL 4003])

Structure, function, and dynamic properties of plant cellular components. How cellular structures function and contribute to cell growth. Cell fate/development. Developing a clear/concise writing style for incisive criticism of scientific papers.

PBIO 4793W. Directed Studies: Writing Intensive. (1-7 cr [max 7 cr]; S-N only. Prereq-#)

Individual study on selected topics or problems. Emphasizes readings, use of scientific literature. Written report.

PBIO 4794W. Directed Research: Writing Intensive. (1-6 cr [max 42 cr]; S-N only. Prereq-#, Δ)

Lab or field investigation of selected areas of research, including written report.

PBIO 4801. Plains and Boreal Flora. (4 cr; A-F only. Prereq—taxonomy course, Δ)

Survey of state summer flowering plants and ferns with particular reference to local flora. Identification of important plant families using technical keys, and field recognition of common species and habitat preferences; collecting methods, literature, and taxonomic methods.

PBIO 4811. Flowering Plant Systematics. (3 cr; A-F only. \$PBIO 4511. Prereq—[BIOL 1103 or BIOL 3012 or BIOL 3812])

Systematics of flowering plants of the world. Ecology, geography, origins, and evolution. Family characteristics. Floral structure, function, evolution. Pollination biology. Methods of phylogenetic reconstruction. Molecular evolution. Taxonomic terms. Methods of collection/identification. Fieldwork.

PBIO 4993. Directed Studies. (1-7 cr [max 7 cr]; S-N only. Prereq-#)

Individual study on selected topics or problems. Emphasizes selected readings, use of scientific literature.

PBIO 4994. Directed Research. (1-6 cr [max 42 cr]; S-N only. Prereq-#)

Lab or field investigation of selected areas of research.

PBIO 5109. Current Questions in Fungal Biology. (2 cr; A-F only)

Diversity of fungi and their interactions with other organisms. Pathogenic/mutualistic interactions with animals/plants. Use of fungal systems for drug discovery and understanding pathogenicity, signal transduction, morphogenesis, and evolution.

PBIO 5301. Plant Genomics. (3 cr. \$PLPA 5301. Prereq—[Intro course in genetics, intro course in biochemistry] or #)

Introduction to genomics. Emphasizes plants and relevant model organisms. DNA marker/sequencing technology, comparative genomics, whole genome sequencing, DNA chips/microarrays, EST libraries and SAGE analysis, gene-knockout systems, genome databases, sequence comparison/clustering algorithms, visualization tools.

PBIO 5412. Plant Physiology. (3 cr. Prereq—BIOL 2022 or BIOL 3002 or BIOL 3007, Bio/BIOC 3021 or BIOC 4331)

Physiological and biochemical bases of plant systems with emphasis on higher plants.

PBIO 5416. Plant Morphology, Development, and Evolution. (4 cr. Prereq—BIOL 2022 or BIOL 3002 or BIOL 3007)

Evolutionary history of land plants. Morphological changes in vegetative and reproductive structures. Morphology of green algal ancestors, nonvascular land plants, and spore bearing and seed bearing vascular plants are analyzed in an evolutionary framework.

PBIO 5514. Plant Molecular Biology. (3 cr. Prereq—BIOC 3021 or BIOL 3021 or BIOL 4003 or BIOC 4332 or equiv)

Survey topics in plant molecular biology. How advances in molecular/genomic biology are being used to better understand plant physiology and developmental biology. Uses of transgenic plants in research/biotechnology.

PBIO 5516. Plant Cell Biology. (3 cr. \$PBIO 4516W. Prereq—[BIOL 2022 or BIOL 3007 or BIOL 3022], [BIOL 3021 or BIOC 3021 or BIOL 4003])

Structure, function, and dynamic properties of plant cellular components such as organelles, cytoskeleton, and cell wall. How cellular structures are assembled, how it contributes to cell growth/division. Cell fate/development. Responses to hormones and external signals.

PBIO 5960. Special Topics. (1-3 cr [max 6 cr]. Prereq-#)

Plant Pathology (PLPA)

Department of Plant Pathology

College of Food, Agricultural and Natural Resource Sciences**PLPA 1002. Plant Diseases and Your Garden.** (1 cr)

Characteristics and causes of diseases that can affect the growth of plants with emphasis on flowers, small fruits, and vegetables. In-depth study of 18 different plant diseases that may appear in your garden, why they occur, and how to avoid them.

PLPA 1005. Plants Get Sick Too. (4 cr)

Classroom/online course. Plants, aspects of pathology or "the nature of disease." Elements of plant anatomy/physiology. What is actually happening when plants get sick.

PLPA 2001. Introductory Plant Pathology. (3 cr. Prereq—BIOL 1009 or equiv)

Pathogens that cause plant disease. Symptoms resulting when susceptible plants and causal agents interact. Roles environment and physio-chemical stresses have on incidence/severity of plant disease. Examples of how techniques of plant disease control can be integrated.

PLPA 3001. Plant Disease Biology and Management. (1 cr. Prereq—BIOL 1009 or equiv)

Introduction to organisms that cause plant diseases. Symptoms of plant diseases, economic losses due to plant diseases, and chemical and biological strategies for managing plant diseases will be discussed.

PLPA 3002. Air Pollution, People, and Plants: The Science and the Ethics. (3 cr. Prereq—BIOL 1009 or equiv, CHEM 1021, ¶CHEM 1022)

History of air pollution, its sources and types; global climate change; air pollution effects on human health, crops and forests; air pollution control and international perspective; risk perception and assessment; public ethics and decision making.

PLPA 3003. Diseases of Forest and Shade Trees. (3 cr)

Diseases of trees in urban and forested areas. Biology, ecology and control of tree diseases. Labs provide experience identifying disease agents and learning appropriate integrated control procedures.

PLPA 3090. Research in Plant Pathology. (1-4 cr [max 4 cr])

Assignment of special problems to undergraduates desiring opportunity for independent research in plant pathology.

PLPA 4000. Plant Pathology Practicum. (1 cr [max 5 cr]. Prereq—2001, [3001 or introductory plant pathology])

Analysis/identification of plant disease problems facing horticultural or agricultural enterprises. Developing procedures/practices that have the potential to improve existing programs for plant disease management in those businesses.

PLPA 4096. Professional Experience Program: Internship. (1-3 cr [max 6 cr]; S-N only. Prereq—COAFES undergrad, complete internship contract available in COAFES Career Services before registering; UC only)

Supervised practicum with professional experience in plant pathology and related industries including the Plant Disease and "Dial-U" clinics. Evaluative reports and consultations with faculty advisers and employers.

PLPA 5003. Diseases of Forest and Shade Trees. (3 cr)

Diseases of trees in urban and forested areas. Biology, ecology, and control of tree diseases. Identifying disease agents, integrated control procedures. Laboratory.

PLPA 5090. Issues in Plant Pathology. (1-4 cr [max 4 cr])

See *Class Schedule* or department for current offerings.

PLPA 5102. Epidemiology and Genetics of Host-Parasite Interactions. (3 cr; A-F only. Prereq=[5201 or equiv], GCD 3022)

Concepts/methodology in study of plant disease epidemics, host plant resistance, and host-parasite genetics. Disease assessment, epidemic progress models, environmental influences, crop loss assessment, disease forecasting, ecology of host-parasite. Environmentally sound management strategies. Use of resistance for disease control.

PLPA 5103. Plant-Microbe Interactions. (3 cr)

Genetics, physiology, molecular biology of plant-microbe interactions. Communication between plant/microbes, signal transduction, control of gene expression, symbiosis/parasitism, plant host response mechanisms, plant disease physiology.

PLPA 5201. Biology of Plant Diseases. (4 cr. Prereq=BIOL 1009 or equiv)

Principles and concepts of plant disease caused by selected viruses, bacteria, fungi, nematodes, and environmental factors. Pathogen biology, interaction of pathogens and the environment; epidemiology and control measures appropriate to plant disease.

PLPA 5202. Field Plant Pathology. (2 cr)

Characteristics of a variety of plant diseases. Field trips to observe symptoms and effects of diseases, and to learn about prevention and control of diseases in field, forest, golf course, greenhouse, nursery, orchard, and urban environments.

PLPA 5203. Biology and Ecology of Fungi. (3 cr. Prereq=BIOL 1009 or equiv)

Major groups of fungi, their roles in ecosystems and human society, environmental and nutritional needs, and modes of dissemination and survival. Representative species of fungi observed and manipulated.

PLPA 5204. Plant Disease Management. (3 cr; A-F only. Prereq=3001 or 3002)

Principles of crop/pathogen biology, epidemiology, crop ecology, crop management practices that influence occurrence of plant disease. Interaction of crop management practices with plant disease. Strategies for controlling plant disease through management practices illustrated by examples from agronomic, horticultural, forest crops.

PLPA 5300. Current Topics in Molecular Plant Pathology. (1 cr [max 2 cr] Prereq=[BIOC 4125, course in [plant pathology or microbiology], course in genetics, [lab in [molecular biology, Biotechnology] or equivalent]] or #)

Interactive class. Students read, discuss, and critique publications in molecular plant pathology. Each week, students focus on one article and examine it from different dimensions (underlying principles, experimental strategies, data analysis, impact on the broader discipline).

PLPA 5301. Plant Genomics. (3 cr. \$PBIO 5301. Prereq=Intro course in genetics or #)

Introduction to genomics. Emphasizes plants and relevant model organisms. DNA marker/sequencing technology, comparative genomics, whole genome sequencing, DNA chips/microarrays, EST libraries and SAGE analysis, gene-knockout systems, genome databases, sequence comparison/clustering algorithms, visualization tools.

PLPA 5302. Genomics of Plant-Associated Microbes.

(3 cr; A-F only. Prereq=[BIOC 4125, course in [plant pathology or microbiology], course in genetics, [lab in [molecular biology, biotechnology] or equiv]] or #)

Genomics research for plant-associated microbes. Journal articles, discussions, case studies. Identification/characterization of genes in plant-microbe interactions. Analysis of plant pathogens, research methodologies. Linkage/gene/physical mapping, candidate genes, sequencing, gene silencing, knock-out, ESTs, microarrays, bioinformatics. Online training modules, field trips, guest lectures, individual/group projects.

PLPA 5999. Special Workshop in Plant Pathology. (1-4 cr [max 4 cr])

Workshops on a variety of topics in plant pathology offered at locations other than the Twin Cities campus. See Class Schedule or department for current offerings.

Polish (PLSH)

Institute of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

PLSH 1101. Beginning Polish. (5 cr)

Develop basic proficiency in listening, speaking, reading, and writing and become acquainted with Polish culture. First of four courses designed to satisfy CLA language graduation requirement.

PLSH 1102. Beginning Polish. (5 cr. Prereq=1101 or equiv)

Develop basic proficiency in listening, speaking, reading and writing and to acquaint students with Polish culture. Second of four courses designed to satisfy CLA language graduation requirement.

PLSH 3001. Intermediate Polish. (5 cr. Prereq=1102 or equiv)

Conversation, composition, advanced grammar, translation, and readings in appropriate literature. Third of four courses designed to satisfy CLA language graduation requirement.

PLSH 3002. Intermediate Polish. (5 cr. Prereq=3001 or equiv)

Conversation, composition, advanced grammar, translation, and readings in appropriate literature. Fourth in a sequence of courses designed to satisfy CLA language graduation requirement.

PLSH 3601. Survey of Polish Literature: Baroque through Romanticism. (3 cr)

Reading and analysis of major works of Polish literature from Baroque through Romanticism.

PLSH 3602. Survey of Polish Literature: 1863 to the Present. (3 cr)

Reading and analysis of major works of Polish literature from 1863 to the present.

PLSH 5900. Topics. (1-4 cr [max 3 cr])

Topics specified in *Class Schedule*.

PLSH 5993. Directed Readings. (1-3 cr [max 3 cr])

Guided individual reading or study in Polish language, literature, and culture.

Political Science (POL)

Department of Political Science

College of Liberal Arts

POL 1001. American Democracy in a Changing World. (4 cr)

Introduction to politics/government in the United States. Constitutional origins/development, major institutions, parties, interest groups, elections, participation, public opinion. Ways of explaining politics, nature of political science. Emphasizes recent trends.

POL 1001H. Honors Course: American Democracy in a Changing World. (4 cr)

Introduction to politics/government in the United States. Constitutional origins/development, major institutions, parties, interest groups, elections, participation, public opinion. Ways of explaining politics, nature of political science. Emphasizes recent trends.

POL 1015. Mass Politics in a Media Age. (3 cr)

In a world of sound bites, soft news, and ubiquitous information/images, do we make rational voting decisions? Are we politically engaged? Do politicians, the media, and political institutions promote or obstruct our efforts to be good citizens? What does responsible citizenship entail? What can be done to enhance citizenship?

POL 1019. Indigenous Peoples: A Global Perspective. (3 cr; A-F only. \$AMIN 1002)

Colonial experiences of selected indigenous peoples in Americas, Euroasia, Pacific Rim.

POL 1025. Global Politics. (4 cr)

Study of international relations and issues in contemporary world affairs. Forms of state interaction from violent conflict to cooperation and integration; activities of international institutions; transnational relations involving non-state actors such as international businesses, human rights networks, and environmental movements.

POL 1026. We and They: U.S. Foreign Policy. (4 cr)

Contemporary foreign policy issues; how the United States makes foreign policy in a global era; historical background. How two regions (such as the Middle East and China) affect and are affected by U.S. policy.

POL 1054. Repression and Democracy Around the World. (4 cr)

Introduction to political life in all its worldwide variety. Focus on repression, democracy, rights, corruption, gender, and political change. Guest lectures by political science professors who are experts on different parts of the world. Non-majors welcome.

POL 1054H. Honors: Repression and Democracy. (4 cr)

Introduction to political life in all its worldwide variety. Focuses on repression, democracy, rights, corruption, gender, and political change. Guest lectures by political science professors who are experts on different parts of world.

POL 1065. Government and Medicine. (3 cr)

Why is the United States the only industrialized nation that lacks national health insurance? Should the government regulate health care? Who should address these issues? Introduction to American government. Health care policy, constitution, elections, congress, the presidency.

POL 1201. Political Ideas and Ideologies. (4 cr)

Analysis of key concepts and ideas (e.g., freedom, equality, democracy) as they are constructed by major theories and ideologies (liberalism, conservatism, socialism, etc.).

POL 1902. Topics: Freshman Seminar. (3 cr; A-F only. Prereq=Freshman)

Topics specified in *Class Schedule*.

POL 1903. Freshman Seminar. (3 cr. Prereq=Fr or no more than 30 cr)

Topics specified in *Class Schedule*.

POL 1904. Topics: Freshman seminar. (3 cr [max 6 cr]. Prereq=Fr or FRFY)

International perspectives.

POL 1905. Freshman Seminar. (3 cr)

Topics vary by instructor.

POL 1908W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq=Freshman)

Topics specified in *Class Schedule*.

POL 1909W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq=Freshman)

Topics specified in *Class Schedule*.

POL 3051. Power and Choice: Who Gets What, When, and Why. (3 cr)

Introduction to major concepts and issues in political science including political participation, policy making; justice, legitimacy, political development, and types of political systems. Explore empirical and normative problems and compare among major countries.

POL 3070. Faculty-Supervised Individual Field Work.

(1-13 cr [max 13 cr]; A-F only. Prereq=#, Δ) Faculty-supervised research related to work in political or governmental organizations.

POL 3080. Faculty-Supervised Individual Internships. (3-13 cr [max 15 cr]; A-F only. Prereq-#, Δ)

Internship with government or community organizations arranged by the department and awarded competitively each spring semester.

POL 3085. Quantitative Analysis in Political Science. (4 cr; A-F only. Prereq-9 cr social sciences or #)

Introduction to empirical research techniques, or how one tests a political hypothesis using data. Topics such as setting up a research question in political science, proper research design, and some basic techniques of data analysis.

POL 3085H. Honors Course: Quantitative Analysis in Political Science. (4 cr. Prereq-9 cr soc sci or #)

Introduction to empirical research techniques or how one tests a political hypothesis using data. Topics such as setting up a research question in political science, proper research design, and basic techniques of data analysis.

POL 3110H. Honors Thesis Credits. (1-4 cr [max 4 cr]; A-F only. Prereq-§: 3110; 3109, pol sci, honors)

Individual research/writing of departmental honors thesis.

POL 3210. Practicum. (2 cr [max 12 cr])

Offers different kinds of out-of-class opportunities to complement the readings, assignments, and objectives of a parent course in political science. Opportunities vary according to demands of the parent course.

POL 3225. American Political Thought. (3 cr)

Puritans, American Revolution, Constitution, pro- and anti-slavery arguments, civil war and reconstruction, industrialism, westward expansion, Native Americans, immigration, populism, socialism, social Darwinism, women's suffrage, red scares, Great Depression, United States as world power, free speech, pluralism and multiculturalism.

POL 3235W. Democracy and Citizenship. (3-4 cr [max 4 cr]. Prereq-1201 recommended)

Surveys models of democracy based on individual rights; pluralism; civic republicanism; community activism. Examines dilemmas of democratic government and citizenship in a race, class, and gender-stratified society; explores its possibilities in a changing world.

POL 3251. Greeks, Romans, and Christians: Ancient and Medieval Political Thought. (3-4 cr [max 4 cr]. §POL 5251. Prereq-§: 5251)

Politics and ethics in Greece, Rome, Christendom: Thucydides, Socrates, Plato, Aristotle, Cicero, Augustine, Aquinas, Marsilius.

POL 3252. Renaissance, Reformation, and Revolution: Early Modern Political Thought. (3-4 cr [max 4 cr]. Prereq-§: 5252)

Thinkers, themes, and discourses from the Renaissance to the French Revolution. Renaissance Humanists; Machiavelli; More; Reformation; Luther; Calvin; Natural Law; Grotius; Divine Right; Common Law; Bacon; English Revolutionaries; Hobbes; Locke; Astell; Enlightenment; Rousseau; French Revolutionaries; Hume; Burke; Wollstonecraft.

POL 3319. Education and the American Dream. (3 cr; A-F only)

Introduction to politics and education in the United States. Equality of educational opportunity, educating democratic citizens, school finance, role of political institutions in making educational policy. Efforts to reform/remake American education, including charter schools and private school vouchers.

POL 3321. Issues in American Public Policy. (3 cr. Prereq-1001 or equiv or #)

Analysis of the politics of the policy process including agenda formation, formulation, adoption, implementation, evaluation. Attention to selected policy areas.

POL 3323. Political Tolerance in the United States. (3-4 cr [max 4 cr])

Political importance of civil liberties in American society. Tolerance as a political phenomenon. Issues such as free speech, privacy, religion, race, gender.

POL 3441. Politics of Environmental Protection. (3 cr. §POL 5441. Prereq-§: 5441; jr or sr social science major)

How the American political system deals with environmental issues, how third world countries deal with problems of environmental protection and economic growth, and the way the international community deals with global environmental problems.

POL 3451W. Politics and Society in the New Europe. (3 cr. §SOC 3351W. Prereq-3051 or SOC 1001 or #)

Explores the changing politics and society of the new Europe. Particular focus on generational change and values, political parties, welfare state, the future of European integration, and political stability and democratization.

POL 3477. Political Development. (3-4 cr [max 4 cr]. Prereq-1054 or #)

Political processes/problems associated with economic development. Political economy of underdevelopment/development. Problems of state building, development of political institutions.

POL 3491. Film and Latin American Politics. (3 cr. Prereq-1054 recommended)

Introduction to using film to study Latin American politics. Hollywood films explore how the United States "sees" Latin America, its people, and its political problems; films from Latin America explore how Latin American popular culture reflects a country's political issues. One feature film per week. Brief readings about issues raised by each film.

POL 3701. American Indian Tribal Governments and Politics. (3 cr; A-F only. §AMIN 3501)

History, development, structure, politics of American Indian Governments. North American indigenous societies from pre-colonial times to present. Evolution of aboriginal governments confronted/affected by colonizing forces of European/Euro-American states. Bearing of dual citizenship on nature/powers of tribal governments in relation to states and federal government.

POL 3739. Politics of Race, Class, and Ethnicity. (3 cr. Prereq-6 cr in soc sci)

Introduction to how race, ethnicity, and class interact in political process. Focuses on political conflict through comparative analysis of United States, South Africa, and Brazil.

POL 3752. Chicano Politics. (3 cr. §CHIC 3852)

Foundations/contradictions of contemporary Chicano politics. Policy issues that concern Latinos, successes/failures of Latino empowerment strategies, electoral impact of Latino votes. Question of whether there is a Latino politic/community.

POL 3766. Political Psychology of Mass Behavior. (3 cr. Prereq-1001 or equiv or #)

How political behavior of citizens and political elites is shaped by psychological factors, including personality, attitudes, values, emotions, and cognitive sophistication. Political activism/apathy, leadership charisma, mass media, group identifications, political culture.

POL 3767. Political Psychology of Elite Behavior. (3 cr; A-F only)

Intersections of politics, personality, and social psychology. Focuses on political leaders and elites. Usefulness of psychological theories for conducting political analysis. Role of individual, of group processes, of political/social cognition, and of context in political decision-making.

POL 3785. Persuasion and Political Propaganda. (3 cr; A-F only)

Introduction to persuasion and political propaganda. Persuasion theories relevant to designing effective political propaganda. Applying theories to analyze WWI/WWII propaganda posters, films, and political campaign commercials. Use of fiction as propaganda tool.

POL 3835. International Relations. (3 cr)

Introduction to theoretical study of international relations. How theoretical perspective shapes one's understandings of structure/practices of global politics.

POL 3872W. Global Environmental Cooperation. (4 cr [max 5 cr]. Prereq-§5872)

Emergence of the environment as a key aspect of the global political agenda. Non-governmental and governmental international organizations. Politics of protection of the atmosphere, rain forest, seas, and other selected issues. International security and the environment.

POL 3873W. Global Citizenship and International Ethics. (3 cr)

Case studies of ethics in intervention, war, weapons, foreign aid, environmental practices, and human rights are used to examine the global ethical responsibilities of individual citizens and public officials; effectiveness of transnational social movements in influencing policy at domestic and international levels.

POL 4210. Topics in Political Theory. (3 cr [max 6 cr]; A-F only. §POL 5210)

POL 4225. Politics and Education. (3-4 cr [max 4 cr])

Politics/education: theoretically, historically, practically. Ancient/modern theories of politics (especially democratic politics) in connection with education. Course usually has a practicum in which students work with each other or coach younger students on problems of public importance to their communities.

POL 4253. Modernity and Its Discontents: Late Modern Political Thought. (3-4 cr [max 4 cr]. §POL 5253)

Theoretical responses to and rival interpretations of Western economy, society, politics, and democratic culture in modern age. Theories of history. Class struggle. End of metaphysics, death of God. Technology/bureaucracy. Psychology of culture in Hegel, Marx, Tocqueville, Mill, Nietzsche, Weber, Freud.

POL 4275. Contemporary Political Thought. (3 cr. Prereq-1201 recommended)

The 20th-century crisis of Western humanism in major works of contemporary political thought from World War II to the present. Relationships between force and freedom; ideology and truth; authority and resistance. Thinkers may include Arendt, Camus, Beauvoir, Fanon, Foucault, Habermas, Rawls, Sartre, Said. Ideas may include communitarianism, feminism, postcolonialism, postmodernism, socialism.

POL 4280. Topics in Political Theory. (3-4 cr [max 8 cr])

Topics in historical, analytical, or normative political theory. Topics vary.

POL 4303. American Democracy in Crisis. (3 cr [max 4 cr]. §POL 5303. Prereq-1001 or equiv, non-pol sci grad major or #)

Compare the performance of the American political system with the promises of democracy. Discuss a range of interpretations of democratic government and the American national governing process.

POL 4306. Presidential Leadership and American Democracy. (3-4 cr [max 4 cr]. §POL 5306. Prereq-1001 or equiv, non-pol sci grad major or #)

No single individual in the American political system is the subject of such high expectations as the president. Examine whether the president's political and constitutional powers are sufficient to satisfy the high expectations that Americans have of him. Should presidents be expected to dominate American politics?

POL 4308. Congressional Politics and Institutions. (3-4 cr [max 4 cr]. §POL 5308. Prereq-1001 or 1002, non-pol sci grad major or #)

Origin/development of U.S. congressional institutions, parties, committees, leaders, lobbying/elections, and relations between Congress/executive branch. Relationship of campaigning/governing, nature of representation, biases of institutional arrangements.

POL 4309. Justice in America. (3 cr. Prereq=1001 or 1002, non-pol sci grad major or #)

The American judiciary, the selection of judges and how and why these individuals and institutions behave the way they do. What influences judicial decisions? What impact do these decisions have? Why do people comply with them?

POL 4310. Topics in American Politics. (3 cr [max 9 cr]. Prereq=1001 or equiv or #)

See *Class Schedule* for description.

POL 4315W. State Governments: Laboratories of Democracy. (4 cr. \$POL 5315. Prereq=1001 or equiv, non-pol sci grad major or #)

Political behavior, governmental institutions, and public policies in American states; comparison among states, between state and national government, with special attention given to Minnesota.

POL 4322. Rethinking the Welfare State. (3-4 cr [max 4 cr]) Discuss competing arguments about welfare states in advanced industrial countries. Are welfare states the result of sectional interests, class relations, or citizenship rights? Compare American social policy with policies in other western countries.

POL 4327. The Politics of American Cities and Suburbs. (3 cr. Prereq=1001 or 1002, non-pol sci grad major or equiv or #)

Development and role of American local government; forms and structures; relationships with states and the federal government; local politics and patterns of power and influence.

POL 4331. Thinking Strategically in Domestic Politics. (3-4 cr [max 4 cr])

A survey of applications of rational-choice and game theories to important features of domestic politics in the United States and elsewhere.

POL 4403. Comparative Constitutionalism. (3 cr)

Theory/practice of constitutionalism in different countries. Conceptual/normative inquiry between constitutionalism, rule of law, and democracy. Origins/role of constitutions. Relevance of courts with constitutional review powers: U.S., Germany, Japan, Hungary, Russia, South Africa, Nigeria.

POL 4410. Topics in Comparative Politics. (3 cr)

Topics of current analytical or policy importance to comparative politics. Topics vary.

POL 4461W. European Government and Politics. (4 cr [max 7 cr]. \$POL 5461. Prereq=1054 or 3051 or non-pol sci grad or #)

European political institutions in their social settings; power and responsibility; governmental stability; political decision making, government and economic order.

POL 4465. Southeast Asian Politics. (3 cr)

Southeast Asia's increasingly important role in global political/economic affairs. U.S. involvement in region. Progress toward and resistance to democratic political systems. Economic development.

POL 4473. Chinese Politics. (3 cr [max 4 cr]. \$EAS 4473)

Focuses on fundamental conflicts in Chinese society; the democracy movement, human rights, class divisions, gender struggles, environmental issues, and capitalist vs. socialist development strategies. Secondary topics include Chinese foreign relations and domestic and foreign political issues in Taiwan.

POL 4477. Struggles and Issues in the Middle East. (4 cr. Prereq=1054 or 3051 or non-pol sci grad or #)

Turkey, Iran, Israel, and selected Arab states. Domestic politics of religious/secular, ethnic, economic, environmental, and other policy/identity issues. Regional politics of water access, Israeli/Palestinian/Arab world relationships, oil and the Persian/Arabian Gulf, and human rights.

POL 4478. Contemporary Politics in Africa and the Colonial Legacy. (4 cr. \$AFRO 4478, AFRO 5478, POL 5478. Prereq=1054 or 3051 or non-pol sci grad or #)

Examines how current politics in mainly, though not exclusively, sub-Saharan Africa have been shaped by the pre-colonial and colonial processes. Reality of independence; recurrent political and economic crises, global context and prospects for effective democracy.

POL 4479. Latin American Politics. (3 cr [max 4 cr]. \$LAS 4479, POL 5479. Prereq=1054 or 3051 or non-pol sci grad or #)

An overview of Latin American politics and political economy focused on authoritarianism, human rights, and redemocratization; development and economic policy; social movements; ethnicity and race; religion; revolution; U.S. - Latin American relations.

POL 4481. Governments and Markets. (3-4 cr [max 4 cr]. Prereq=1054 or 3051 or non-pol sci grad or #)

Study the connection between democracy and markets with attention to the experiences of countries in North America and Europe.

POL 4485. Human Rights and Democracy in the World.

(3 cr. \$POL 5485. Prereq=At least one 1xxx or 3xxx course in pol sci, non-pol sci major or #)

Examine the question of human and democracy rights in global and comparative perspectives. Explore the history of ideas about human rights and democracy and contrast economic, political, psychological, and ideological explanations for repression.

POL 4487. The Struggle for Democratization and Citizenship. (4 cr. \$POL 4501, POL 5487. Prereq=Non-pol sci grad)

Traces the origins of the democratic process with particular emphasis on how the disenfranchised fought to become included. Begins with the history of the democratic movement from its earliest moments in human history to the present and attempts to draw a balance sheet.

POL 4489W. Citizens, Consumers, and Corporations. (3 cr)

How ordinary people can act collectively to hold corporations accountable for effects their activities have on communities/nations. Mobilizing as citizens through mass protests, lobbying politicians, and pursuing claims through court system. Mobilizing as consumers through purchasing decisions.

POL 4501. The Supreme Court and Constitutional Interpretation. (3 cr. \$POL 4487, POL 5487. Prereq=1001 or 1002 or equiv or [non-pol sci] grad student or #)

Historical/analytical approaches to Court's landmark decisions. Explores theory/techniques of judicial review. Relates Court's authority to wider political/social context of American government.

POL 4502. The Supreme Court, Civil Liberties, and Civil Rights. (3 cr. Prereq=1001 or 1002 or equiv or [non-pol sci] grad major or #)

Supreme Court's interpretation of Bill of Rights, 14th amendment. Focuses on freedom of speech, press, religion; crime/punishment; segregation/desegregation, affirmative action; abortion/privacy.

POL 4525W. Federal Indian Policy. (3 cr; A-F only. \$AMIN 4525W)

Formulation, implementation, evolution, comparison of Indian policy from pre-colonial times to self-governance of new millennium. Theoretical approaches to federal Indian policy. Major federal Indian policies. Views/attitudes of policy-makers, reactions of indigenous nations to policies. Effect of bodies of literature on policies.

POL 4561. Comparative Legal Systems. (3 cr. \$POL 5561. Prereq=Jr or sr or non-pol sci grad major)

Survey of the principal legal systems of the Western world. Examine the role of the legal system in relation to various political and economic systems and the contrast between the common law and civil law traditions.

POL 4737. American Political Parties. (3-4 cr [max 4 cr].

\$POL 5737. Prereq=1001 or equiv or #)

The American two-party system; party influence in legislatures and executives; decline of parties and their future.

POL 4766. American Political Culture and Values. (3-4 cr [max 4 cr]. Prereq=1001 or equiv or non-pol sci grad major or #) Empirical analysis of basic political values—individualism, freedom, and equality; dominant beliefs about democratic principles, materialism, capitalism, citizenship, patriotism and heroism.

POL 4767. Public Opinion and Voting Behavior. (3 cr [max 4 cr]. \$POL 5767. Prereq=1001 or equiv or #)

Major factors influencing electoral decisions and political attitude formation/change. Data analysis lab required.

POL 4771. Racial Attitudes and Intergroup Conflict. (3 cr)

Basic approaches, findings, and controversies in research on racial attitudes and intergroup relations, from perspective of political psychology. Approaches developed by researchers in political science, social psychology, and sociology. Contemporary issues/debates, historical development of research/theory.

POL 4810. Topics in International Politics and Foreign Policy. (3 cr [max 6 cr])

Analysis of selected issues in contemporary international relations. Topics vary.

POL 4833. The U.S. in the Global Economy. (3-4 cr [max 4 cr]. Prereq=3835 recommended)

Domestic and international politics of United States, foreign economic policy (trade, aid, investment, monetary, and migration policies). Effects of policies and international economic relations on the U.S. economy and U.S. politics.

POL 4867. United States Foreign Policy Toward the Middle East. (4 cr. Prereq=Jr or sr)

U.S. foreign policy toward Israeli-Palestinian issue in Turkey, Iran, Iraq, etc. Mideast politics, debates, actions. Rationales for U.S. engagement with region. Readings of Middle East authors.

POL 4881. International Law. (3 cr. \$POL 5881. Prereq=3835 or non-pol sci grad or #)

How international law matters for world politics. Lectures, discussions, and simulations of cases examine key concepts and theories of international law. Topics include war crimes, human rights, law of the sea, the environment, and international crime.

POL 4883. Global Governance. (3 cr [max 4 cr]. Prereq=3835 or non-pol sci grad or #)

Seminar discussions and class simulations examine the rise and role of inter-governmental organizations such as the United Nations and non-governmental organizations. Topics include peacekeeping, trade, development, human rights, security and arms control, self-determination, refugees, health, and the environment.

POL 4885. International Conflict and Security. (3-4 cr [max 4 cr]. \$POL 5885)

An examination of alternative theories of the sources of militarized international conflict. Apply these theories to one or more past conflicts and discuss their relevance to the present.

POL 4887. Thinking Strategically in International Politics. (3 cr; A-F only)

Survey of applications of game theory to international politics; conflict and cooperation, global environmental commons, deterrence and reputation.

POL 4889. Governments and Global Trade and Money.

(3-4 cr [max 4 cr]. \$POL 5889. Prereq=3835 or non-pol sci grad or #)

Study the politics of international trade and monetary affairs including north-south and east-west relations

POL 4900V. Honors: Senior Paper. (1 cr; A-F only.

Prereq=Honors, pol sr, #)

Can be attached to any 3xxx or 4xxx course. A 10-15 page paper is submitted for evaluation/advice by instructor, then revised for final submission.

POL 4900W. Senior Paper. (1 cr; A-F only. Prereq—Pol sr, #) Can be attached to any 3xxx or 4xxx course (with the agreement of that course's instructor). A 10-15 page paper is submitted for evaluation/advice by instructor, then revised for final submission.

POL 4970. Individual Reading and Research. (1-4 cr [max 4 cr]. Prereq—#, Δ, □) Guided individual reading or study.

POL 5210. Topics in Political Theory. (3 cr [max 9 cr]; A-F only. \$POL 4210. Prereq—#3210, grad student, Δ)

POL 5251. Greeks, Romans, and Christians: Ancient and Medieval Political Thought. (4 cr. \$POL 3251. Prereq—Grad student)

Politics/ethics in Greece, Rome, Christendom: Thucydides, Socrates, Plato, Aristotle, Cicero, Augustine, Aquinas, Marsilius.

POL 5252. Renaissance, Reformation, and Revolution: Early Modern Political Thought. (4 cr. Prereq—\$: 3252)

Thinkers, themes, and discourses from the Renaissance to the French Revolution. Renaissance Humanists; Machiavelli; More; Reformation; Luther; Calvin; Natural Law; Grotius; Divine Right; Common Law; Bacon; English Revolutionaries; Hobbes; Locke; Astell; Enlightenment; Rousseau; French Revolutionaries; Hume; Burke; Wollstonecraft.

POL 5253. Modernity and its Discontents: Late Modern Political Thought. (4 cr. \$POL 4253. Prereq—\$: 3253)

Theoretical responses to and rival interpretations of Western economy, society, politics, and democratic culture in the modern age; theories of history; class struggle; end of metaphysics and death of God; technology and bureaucracy; psychology of culture in Hegel, Marx, Tocqueville, Mill, Nietzsche, Weber, Freud.

POL 5275. Contemporary Political Thought. (3 cr. Prereq—\$: 4275; grad student; 1201 recommended)

20th-century crisis of Western humanism in major works of contemporary political thought from World War II to present. Force and freedom. Ideology and truth. Authority and resistance. Thinkers may include Arendt, Camus, Beauvoir, Fanon, Foucault, Habermas, Rawls, Sartre, Said. Ideas may include communitarianism, feminism, postcolonialism, postmodernism, socialism.

POL 5280. Topics in Political Theory. (3-4 cr. Prereq—\$: 4280; grad student)

Topics in historical, analytical, or normative political theory. Topics vary, see *Class Schedule*.

POL 5303. American Democracy in Crisis. (3-4 cr. \$POL 4303. Prereq—Grad student or #)

Compares performance of American political system with promises of democracy. Interpretations of democratic government and American national governing process.

POL 5306. Presidential Leadership and American Democracy. (3 cr. \$POL 4306. Prereq—Grad student or #)

Examines whether president's political and constitutional powers are sufficient to satisfy citizens' high expectations and whether president should be expected to dominate American politics.

POL 5308. Congressional Politics and Institutions. (3 cr. \$POL 4308. Prereq—Grad student or #)

Origin/development of U.S. congressional institutions, parties, committees, leaders, lobbying/elections, and relations between Congress/executive branch. Relationship of campaigning/governing, nature of representation, biases of institutional arrangements.

POL 5309. Justice in America. (3 cr. Prereq—\$: 4309; [1001 or 1002], [non-pol sci grad major or equiv or #])

American judiciary, selection of judges, how/why these individuals/institutions behave the way they do. What influences judicial decisions. What impact decisions have. Why people comply with them.

POL 5310. Topics in American Politics. (3 cr. Prereq—Grad student or #)

See *Class Schedule* for description.

POL 5315. State Governments: Laboratories of Democracy. (4 cr. \$POL 4315W. Prereq—Grad student or #) Political behavior, governmental institutions, and public policies in American states. Comparison among states, between state and national government. Emphasizes Minnesota.

POL 5322. Rethinking the Welfare State. (3-4 cr. Prereq—\$: 4322; grad student)

Competing arguments about welfare states in advanced industrial countries. Whether welfare states result from sectional interests, class relations, or citizenship rights. Compares American social policy with policies in other western countries.

POL 5327. Politics of American Cities and Suburbs. (3 cr. Prereq—\$: 4327; [1001 or 1002], [non-pol sci grad major or equiv] or #)

Development/role of American local government. Forms and structures. Relationships with states and federal government. Local politics and patterns of power/influence.

POL 5331. Thinking Strategically in Domestic Politics. (3-4 cr. Prereq—\$: 4331; grad student)

Applications of rational-choice and game theories to important features of domestic politics in the United States and elsewhere.

POL 5403. Comparative Constitutionalism. (3 cr)

Theory/practice of constitutionalism in different countries. Conceptual/normative inquiry between constitutionalism, rule of law, and democracy. Origins and role of constitutions. Relevance of courts with constitutional review powers: U.S., Germany, Japan, Hungary, Russia, South Africa, Nigeria.

POL 5410. Topics in Comparative Politics. (3 cr. Prereq—Grad student)

Topics of current analytical or policy importance. Topics vary, see *Class Schedule*.

POL 5441. Environmental Policy. (3 cr. \$POL 3441. Prereq—non-pol sci grad student or #)

How American political system deals with environmental issues. How third world countries deal with environmental protection/economic growth. How international community deals with global environmental problems.

POL 5461. European Government and Politics. (4 cr. \$POL 4461W. Prereq—Grad student or #)

European political institutions in their social settings. Power and responsibility. Governmental stability. Political decision making. Government and economic order.

POL 5465. Southeast Asian Politics. (3 cr)

U.S. involvement in region. Progress toward and resistance to democratic political systems and economic development.

POL 5473. Chinese Politics. (3 cr. Prereq—\$: 4473, EAS 4473; grad student)

Fundamental conflicts in Chinese society. Democracy movement, human rights, class divisions, gender struggles, environmental issues, capitalist vs socialist development strategies. Secondary topics include Chinese foreign relations and domestic/foreign political issues in Taiwan.

POL 5477. Struggles and Issues in the Middle East. (4 cr. Prereq—\$: 4477; 1054 or 3051 or non-pol sci grad student or #)

Turkey, Iran, Israel, and selected Arab states. Domestic politics of religious/secular, ethnic, economic, environmental, and other policy/identity issues. Regional politics of water access, Israeli/Palestinian/Arab world relationships, oil and Persian/Arabian Gulf, human rights.

POL 5478. Contemporary Politics in Africa and the Colonial Legacy. (4 cr. \$AFRO 4478, AFRO 5478, POL 4478. Prereq—Grad student or #)

How current politics in mainly, though not exclusively, sub-Saharan Africa have been shaped by pre-colonial/colonial processes. Reality of independence, recurrent political/economic crises. Global context and prospects for effective democracy.

POL 5479. Latin American Politics. (3-4 cr. \$LAS 4479, POL 4479. Prereq—Grad student or #)

Overview of Latin American politics and political economy. Authoritarianism, human rights, redemocratization. Development and economic policy. Social movements. Ethnicity/race. Religion. Revolution. U.S.-Latin American relations.

POL 5481. Governments and Markets. (3-4 cr; S-N only. Prereq—\$: 4481; 1054 or 3051 or non-pol sci grad student or #)

Connection between democracy and markets. Focuses on countries in North America, Europe.

POL 5485. Human Rights and Democracy in the World. (3 cr. \$POL 4485. Prereq—Grad student or #)

History of ideas about human rights and democracy. Economic, political, psychological, and ideological explanations for repression.

POL 5487. Struggle for Democratization and Citizenship. (4 cr. \$POL 4487, POL 4501. Prereq—Grad student)

History of democratic movement from its earliest moments in history to present. Attempts to draw balance sheet. Emphasizes how disenfranchised fought to become included.

POL 5501. Supreme Court and Constitutional Interpretation. (3 cr. Prereq—Grad student or #)

Historical/analytical approaches to Court's landmark decisions. Theory/techniques of judicial review. Court's authority related to wider political/social context of American government.

POL 5502. Supreme Court, Civil Liberties, and Civil Rights. (3 cr. Prereq—\$: 4502; 1001 or 1002 or equiv or non-pol sci grad student or #)

Supreme Court's interpretation of Bill of Rights, 14th amendment. Freedom of speech, press, religion. Crime/punishment. Segregation/desegregation, affirmative action. Abortion/privacy.

POL 5525. Federal Indian Policy. (3 cr; A-F only. Prereq—\$: 4525, AMIN 4525; grad student)

Formulation, implementation, evolution, comparison of Indian policy from pre-colonial times to self-governance of new millennium. Theoretical approaches to federal Indian policy. Major federal Indian policies. Views/attitudes of policy-makers, reactions of indigenous nations to policies. Effect of bodies of literature on policies.

POL 5561. Comparative Legal Systems. (3 cr. \$POL 4561. Prereq—Grad student or #)

Survey of principal legal systems of Western world. Role of legal system in relation to various political/economic systems. Contrast between common law and civil law traditions.

POL 5737. American Political Parties. (3 cr. \$POL 4737. Prereq—Grad student or #)

American two-party system. Party influence in legislatures/executives. Decline of parties, their future.

POL 5766. American Political Culture and Values. (3-4 cr. Prereq—\$: 4766; 1001 or equiv or non-pol sci grad student or #)

Individualism, freedom, equality. Dominant beliefs about democratic principles, materialism, capitalism, citizenship, patriotism/heroism.

POL 5767. Public Opinion and Voting Behavior. (3 cr. \$POL 4767. Prereq—Grad student or #)

Major factors influencing electoral decisions. Political attitude formation/change. Data analysis lab required.

POL 5810. Topics in International Politics and Foreign Policy. (3 cr [max 6 cr]. Prereq—\$: 4810; grad student)

Selected issues in contemporary international relations. Topics vary, see *Class Schedule*.

POL 5833. The United States in the Global Economy/US For EGON Policy. (3-4 cr. Prereq—\$: 4833; grad student; 3835 recommended)

Domestic/international politics of United States. Foreign economic policy (trade, aid, investment, monetary, migration policies). Effects of policies and international economic relations on U.S. economy/politics.

POL 5872. Global Environmental Politics. (3 cr. Prereq—\$: 3872; non-pol sci grads only)
Emergence of the environment as a key aspect of the global political agenda. Non-governmental and governmental international organizations. Politics of protection of the atmosphere, rain forests, seas and other selected issues. International security and the environment.

POL 5881. International Law. (3 cr. \$POL 4881. Prereq—Grad student or #)
How international law matters for world politics. War crimes, human rights. Law of the sea and of the environment. International crime. Lectures, discussions, simulations of cases.

POL 5883. Global Governance. (3 cr. Prereq—\$: 4883; 3835 or non-pol sci grad student or #)
Rise/role of inter-governmental organizations such as United Nations, non-governmental organizations. Peacekeeping, trade, development, human rights, security and arms control, self-determination, refugees, health, environment. Seminar discussions, class simulations.

POL 5885. International Conflict and Security. (3 cr. \$POL 4885. Prereq—Grad student)
Alternative theories of sources of militarized international conflict. Theories applied to past conflicts. Theories' relevance to present.

POL 5887. Thinking Strategically in International Politics. (3 cr; A-F only. Prereq—\$: 4887; grad student)
Applications of game theory to international politics. Conflict/cooperation, global environmental commons, deterrence/reputation.

POL 5889. Governments and Global Trade and Money. (3 cr. \$POL 4889. Prereq—3835 or grad student or #)
Politics of international trade and monetary affairs, including north-south and east-west relations.

POL 5970. Individual Reading and Research. (1-4 cr [max 4 cr]. Prereq—#, Δ, □)
Guided individual reading or study.

Portuguese (PORT)

Department of Spanish and Portuguese Studies

College of Liberal Arts

PORT 1101. Beginning Portuguese. (5 cr)
Speaking and understanding Portuguese; pronunciation; introduction to writing and reading; basic grammar; cultural aspects of language and civilizations of Portuguese-speaking world.

PORT 1102. Beginning Portuguese. (5 cr. Prereq—1101 or #)
Speaking and understanding Portuguese; pronunciation; introduction to writing and reading; basic grammar; cultural aspects of language and civilizations of Portuguese-speaking world.

PORT 1103. Intermediate Portuguese. (5 cr. Prereq—1102 or #)
Speaking and comprehension. Development of reading and writing skills based on Portuguese-language materials.

PORT 1104. Intermediate Portuguese. (5 cr. Prereq—1103 or #)
Speaking and comprehension. Development of reading and writing skills based on materials from Portugal and Brazil. Grammar review; compositions and short presentations.

PORT 3001. Portuguese for Spanish Speakers. (4 cr. Prereq—[[SPAN 3015, LPE] or Port LPE or #]), speak other Romance language)
Based on student's knowledge of Spanish. Contrastive approach to Portuguese phonic/morpho-syntactic structures.

PORT 3003. Portuguese Conversation and Composition. (4 cr. Prereq—1104, 3001, Port LPE)
Speaking, writing. Cultural comparisons, current events. Grammar review. Writing workshops.

PORT 3501W. Foundations of Portuguese Culture. (3 cr. \$PORT 3501V. Prereq—3003)
Foundations of Portuguese-speaking culture (Portugal, Brazil, Lusophone Africa), from origins to present. Social/cultural trends that form basis for modern Portuguese-speaking world (literature, history, cinema, music).

PORT 3502W. Foundations of Brazilian Culture. (3 cr. \$LAS 3502W, PORT 3502V. Prereq—3003 or equiv)
Emphasis on modern Brazilian society. History, culture (music, art, cinema, literature, intellectual thought, popular culture, media), and social problems (ethnicity, tropical deforestation).

PORT 3503W. Literatures and Cultures of Lusophone Africa. (3 cr. \$PORT 3503V. Prereq—3003, #)
Origins/development of Lusophone Africa (Angola, Cape-Verde, Guinea-Bissau, Mozambique, São Tomé/Príncipe) using literature, cultural/literary criticism, history, anthropology, and various media (film, art, music, Internet).

PORT 3603. Portuguese-Speaking Cultures and Literatures in Translation. (3 cr)
Introduction to the Portuguese-speaking world using literature, history, anthropology, and film. Focuses on sociopolitical, cultural, and historical development of Brazil, Portugal, and Lusophone Africa (Angola, Mozambique, Cape-Verde, Guinea-Bissau, and São Tomé and Príncipe).

PORT 3800. Film Studies in Portuguese. (3 cr [max 6 cr]; A-F only. \$PORT 3800H. Prereq—3003 or [dept or #])
Films from Portuguese-speaking world in their historical, (geo)political, and socio-economic contexts. Films from Brazil, Portugal, or Lusophone Africa analyzed under interdisciplinary framework, noting aspects related to cinematography/rhetorics.

PORT 3910. Topics in Lusophone Literatures. (3 cr [max 9 cr]. \$PORT 3910H)
Critical reading of Lusophone literary texts (Brazil, Portugal, Portuguese-speaking Africa) representing various genres (novel, short story, poetry). Terminology of criticism, literary problems, techniques.

PORT 3920. Topics in Lusophone Cultures. (3 cr [max 9 cr]. Prereq—[1101, 1102, 1103, 1104] or [3001, 3003] or equiv)
Critical studies of various aspects of Portuguese-speaking cultures (Portugal, Brazil, or Lusophone Africa). Topics may include (among others) popular music, visual/media culture, religion, diaspora, the Amazon.

PORT 3970. Directed Readings. (1-4 cr [max 9 cr]. Prereq—3501 or 3502 or 3503 or 3910)
Guided individual reading or study

PORT 5520. Portuguese Literary and Cultural Studies. (3 cr [max 9 cr])
Study of origins and development of modern Portuguese nation (late 15th to 20th century) using literature, cultural and literary criticism, history, sociology) and various media (film, art, music, Internet). Main cultural problematics pertaining to Portugal as well as fundamental literary texts.

PORT 5530. Brazilian Literary and Cultural Studies. (3 cr [max 9 cr])
Study of origins and development of modern Brazilian nation (late 16th to 20th century) using literature, cultural and literary criticism, history, sociology) and various media (film, art, music, Internet). Main cultural problematics pertaining to Brazil as well as fundamental literary texts.

PORT 5540. Literatures and Cultures of Lusophone Africa. (3 cr [max 9 cr]. Prereq—#)
Origins/development of Lusophone Africa (Angola, Mozambique, Cape-Verde, Guinea-Bissau, S.,o Tomé, Príncipe) using literature, cultural/literary criticism, history, sociology, and various media (film, art, music, Internet).

PORT 5910. Topics in Lusophone Cultures. (3 cr [max 9 cr])
Cultural manifestations in Portuguese-speaking world (Portugal, Brazil, Lusophone Africa): literature, history, film, intellectual thought, critical theory, popular culture. Topics include: Portuguese colonialism; postcolonial nation in Lusophone world; Lusophone women writers; Luso-Brazilian (post)modernity.

PORT 5920. Figures in Lusophone Literatures. (3 cr [max 9 cr])
One Portuguese, Brazilian, or other major Portuguese-speaking writer or group of writers whose work has had impact on thought, literature, or social problems (e.g., Machado de Assis, Fernando Pessoa, Clarice Lispector). Figures specified in *Class Schedule*.

PORT 5930. Topics in Brazilian Literature. (3 cr [max 9 cr])
Major issues of Brazilian literature; focuses on important authors, movements, currents, genres. Problems, socioeconomic questions, literary techniques related to Brazilian themes. Topics specified in *Class Schedule*.

PORT 5970. Directed Readings. (3 cr [max 9 cr]. Prereq—MA or PhD candidate, #, Δ, □)
Lusophone studies (Portuguese-speaking Africa, Brazil, Portugal). Areas not covered in other courses. Students submit reading plans for particular topics, figures, periods, or issues.

PORT 5990. Directed Research. (1-4 cr [max 9 cr]. Prereq—#, Δ, □)
Graduate-level research in literatures and cultures of the Portuguese-speaking world. Topics vary.

Postsecondary Teaching and Learning (PSTL)

Postsecondary Teaching and Learning (PSTL)

College of Education and Human Development

PSTL 712. Introductory Algebra, Part I. (0 cr. Prereq—[4 cr equiv]; GC math placement)
Traditional lecture/discussion course with group work. Covers first half of content of a first course in algebra at level of difficulty geared for students at a research university. Arithmetic review, real number operations, expressions, equations, inequalities, rectangular (x-y) graphs.

PSTL 713. Introductory Algebra, Part II. (0 cr. Prereq—[4 cr equiv]; 0712, 0716, #)
Traditional lecture/discussion course with group work. Covers second half of content of a first course in algebra at level of difficulty geared for students at a research university. Graphing review, linear systems, word problems, exponents, polynomials, factoring.

PSTL 721. Introductory Algebra. (0 cr. Prereq—General Math Placement Test)
Real number operations, expressions, equations, inequalities, rectangular (x-y) graphs, linear systems, word problems, exponents, polynomials, factoring.

PSTL 722. Introductory Algebra (Computer). (0 cr. Prereq—General Math Placement Test)
Students learn via multimedia software. Instructor helps students individually during class. Real numbers, expressions, equations, inequalities, rectangular graphs, systems, word problems, exponents, polynomials, factoring.

PSTL 731. Intermediate Algebra. (0 cr. \$PSTL 732. Prereq—Grade of at least C in [0713 or 0717 or 0721 or 0722] or General Math Placement Test)
Rational expressions, absolute value, roots, radicals, quadratic, exponential, and logarithmic functions, complex numbers.

PSTL 732. Intermediate Algebra (Computer). (0 cr. \$PSTL 731. Prereq—Grade of at least C in [0713 or 0717 or 0721 or 0722] or General Math Placement Test)
Students learn via multimedia software. Instructor helps students individually during class. Rational expressions, absolute value, roots, radicals, quadratic, exponential, and logarithmic functions, complex numbers.

PSTL 1001. Introduction to Mathematical Modeling: Life Matters Through a Mathematical Lens. (3 cr. \$PSTL 1002)
Algebraic modeling. Numbers in culture. Voting/election methods. Quota methods, probability. Fair division. Routes/networks. Scheduling. Data/patterns. Collecting/interpreting Data. Consumer mathematics. Growth/decay. Inferential statistics.

PSTL 1002. Mathematics and Social Action: Mathematics Matters for Democracy. (3 cr. \$PSTL 1001)
Includes service learning component. Numbers in culture. Voting/election methods. Quota methods, probability. Fair division. Routes/networks. Scheduling. Data/patterns. Collecting/interpreting data. Consumer mathematics. Growth/decay. Inferential statistics.

PSTL 1003. Ethnomathematics. (3 cr)
Mathematical principles/ideas about space, number, time/ and design that have been developed by all human cultures. Case studies. Discrete math. Algebra/geometry, including graph theory, matrices, probability, transformational geometry, scaling, algorithmic recursion, numerical base systems, and modular arithmetic.

PSTL 1004. Statistics. (4 cr. Prereq—Grade of at least C in 0731 or equiv)
Problem solving and decision making through collection, analysis, and interpretation of data. Organization/presentation of data, summary statistics, sampling, probability, distributions, estimation, correlation, hypothesis testing, contingency tables, chi-square. Uses groups and computers.

PSTL 1005. Functions and Problems of Logic. (3 cr)
Formal (symbolic) techniques (e.g., Venn diagrams, truth tables, formal proofs) for evaluating validity of arguments. Translating English statements into symbolic system. Structure/complexity of valid reasoning.

PSTL 1041. Developing College Reading. (2 cr [max 6 cr]. Prereq—Non-native speaker of English, CE enrollment, #)
Comprehension/study strategies for reading college-level textbooks. Previewing a textbook for content/organization. Underlining and making margin notes. Outlining, anticipating test questions, and interpreting technical vocabulary. Paired with a designated content course.

PSTL 1042. Reading in the Content Area. (2 cr [max 6 cr]. Prereq—Non-native speaker of English, CE enrollment, #)
Reading skills/strategies for a content area. Previewing/predicting content/organization. Note taking, outlining, anticipating test questions, and interpreting technical/sub-technical vocabulary. Paired with designated content course.

PSTL 1051. Introduction to College Writing: Workshop. (2 cr. Prereq—Designed for non-native speaker of English)
Language editing strategies. Review of linguistic features of standard written English. Style/language in writing. Small-group activities. In-group or individual conferences.

PSTL 1076. Orientation to Self and Career. (2 cr)
How to organize what one knows about oneself to explore career paths and find a place world of work. Experiential exercises, discussion. Self-reflection/analysis through writing. Papers, oral presentation, final portfolio.

PSTL 1081. Academic Development Seminar: Supplemental Instruction in Social Sciences. (1 cr [max 2 cr]; A-F only. Prereq—[1081 or 1085], §[specific content course], adviser approval)
Methods of study in social science courses. Note taking, exam preparation, and time management. Specific writing tasks, critical thinking, research methods, essay/presentation styles associated with disciplinary content.

PSTL 1082. Academic Development Seminar: Supplemental Instruction in the Sciences. (1 cr [max 3 cr]; A-F only. Prereq—[1081 or 1085], §[specific content course], adviser approval)
Methods of study in science courses. Note taking, exam preparation, time management. Specific problem solving techniques, augmented problem sets, writing tasks, presentation styles associated with disciplinary content.

PSTL 1083. Academic Development Seminar: Supplemental Instruction in the Humanities. (1 cr; A-F only. Prereq—[1081 or 1085], §[specific content course], adviser approval)
Methods of study in humanities courses. Note taking, exam preparation, time management. Specific writing tasks, critical thinking skills, research methods, essay/presentation styles associated with disciplinary content.

PSTL 1084. Academic Development Seminar: Supplemental Instruction in Mathematics. (1 cr; A-F only. Prereq—[1081 or 1085], §[specific content course], adviser approval)
Methods of study in mathematics courses. Note taking, exam preparation, time management. Necessary math background, specific problem-solving techniques, application of mathematical concepts associated with disciplinary content.

PSTL 1085. Academic Development Seminar: Supplemental Instruction in Composition. (1 cr; A-F only. Prereq—[1081 or 1085], §[specific content course], adviser approval)
Methods of study in composition courses. Note taking, exam preparation, time management. Specific writing tasks, research methods, essay/presentation styles associated with disciplinary content.

PSTL 1086. The First-Year Experience. (2 cr; A-F only)
Awareness of roles, identity, needs, and interactions with diverse groups. Expectations, resources, and challenges associated with transition into college. Speakers, journals/portfolios, technology, reading/writing assignments, classroom exercises/experiences.

PSTL 1112. Ecological Evaluation of Environmental Problems. (4 cr)
Relating ecological concepts (energy flow, material cycling) to causes/effects of environmental problems (world hunger, toxic waste, global warming, acid rain). Methods of evaluating cultural practices' impact on the environment. Critical evaluation of potential interventions.

PSTL 1131. Principles of Biological Science. (4 cr)
Biodiversity/classification, genetics, evolution, ecology, life cycles/reproduction, cell theory, chemical bases for life from a "how-we-know" perspective, relevancy to modern life. Inquiry-based, collaborative lab.

PSTL 1133. Nature Study. (4 cr)
Natural history. Several Twin Cities habitats are surveyed/characterized. Students spend time in the field, measuring soil/climate conditions and identifying plants/animals found in each habitat. Students collect specimens and make a scientific plant collection.

PSTL 1135. Human Anatomy and Physiology. (4 cr)
In lecture section, students take notes, see multimedia presentations, and do group work. Lab section focuses on organ dissections (e.g., eye, heart) and physiology activities. Meets in a computer lab where students work in groups on quizzes and other assignments.

PSTL 1163. Physical Systems: Principles and Practices. (4 cr)
Fundamental physical principles governing properties of matter, electric circuits, and light/color. Applications to real-world systems. Integrated lecture/lab.

PSTL 1166. Principles of Chemistry. (3 cr. Prereq—0713 or 0721 or equiv)
Problem-solving. Classification of matter, elements, atomic/molecular structure, compounds, mole calculations, chemical bonding, empirical formulas, chemical reactions, stoichiometry, bond energy, enthalpy, gases/gas laws, solutions, solution concentrations, acids, bases, qualitative equilibrium.

PSTL 1171. Physical Geology. (4 cr)
Development of common land features (valleys, mountains, rivers, lakes) and processes responsible for their origin/change. Types of surface materials. Movements inside Earth and their effects on its surface. Lecture, lab: mineral/rock analysis, topographic map reading, landform identification, landscape interpretation.

PSTL 1172. Historical Geology. (4 cr)
Development of earth's physical/chemical features through time, with changing patterns of life as a response. Problem-solving, logical deductions from facts stressed. Lecture, lab: identification/interpretation of rocks, fossils, geologic maps, ancient environments, and geographies.

PSTL 1173. Geology of the National Parks. (4 cr)
Processes that produced scenic/geologic features of North America's national parks/monuments, using a regional approach. Role of national park system in modern society. Basic geology introduced as needed. Map analyses emphasized. Lecture, lab.

PSTL 1204. Ways of Knowing in the Social Sciences. (4 cr; A-F only)
Multidisciplinary social science exploration of an international issue. Local/global dimensions of worldwide immigration from perspective of economics, political science, history, sociology, anthropology, and geography.

PSTL 1211. People and Problems. (4 cr)
Social problems that arise in a diverse society. Sociology as source of concepts/theories used to analyze problems such as unemployment, social inequality, violence, and environmental crisis. Fifteen hours in community involvement/service.

PSTL 1231. Perspectives in American History. (4 cr)
One-semester survey of American history. Focuses on major issues from a variety of perspectives. Political, social, economic, and diplomatic developments in America, from pre-contact Indian civilizations and foundations of American society, through formation of the United States and crisis of Civil War, to maturation of American political system and exercise of world leadership in 20th century.

PSTL 1233. U.S. Government and Politics. (4 cr)
Structure and process. How government institutions address demands made on them. History/foundations of government structure. Institutions of power. Links between people and government. Government and social welfare. Economic, military, and foreign policies.

PSTL 1235W. Law in Society. (4 cr)
How social science concepts/research affect legal responses to social conflict. History/philosophy of American law. Interaction of social/legal institutions. Effect of beliefs/social conditions on laws addressing family, criminal, employment, and environmental controversies.

PSTL 1251. World History: Since 1500. (4 cr)
Political, economic, social, diplomatic, and intellectual aspects of major world cultures. Awareness of growing interdependence of peoples. International perspective on events that affect students, lives. Classroom simulations, lecture, discussion.

PSTL 1280. Psychology of Personal Development. (3 cr)

Using psychological research/theory for effective living. Establishing positive relationships, managing stress, maintaining physical/mental health, leadership, gender roles, and work roles. Development of appropriate study strategies for social science courses. Readings, writing assignments, discussion.

PSTL 1281. General Psychology. (4 cr. §PSTL 1289, PSY 1001, PSY 1001H)

Individual instruction and computer technology are used to survey major psychological theories, concepts, and methods.

PSTL 1285W. Introduction to Cultural Anthropology. (4 cr)

Ways our lives are conditioned by culture. Fundamental anthropological concepts, theories, methods. Study of anthropological materials, collaborative social research, cross-cultural comparison. Recognizing cultural realities. Ways of life of other cultures.

PSTL 1289. Psychology of the American Experience. (4 cr. §PSTL 1281, PSY 1001, PSY 1001H)

Students use traditional and cross cultural psychology to explore culture/development and its influence on individual perspectives. Purpose of stereotypes, prejudices, and other mental decision-making constructs. Relationship between culture and identity development across ethnicity.

PSTL 1311. Art: General Art. (3 cr)

Visual/performing arts produced in diverse American/international cultures. Slides, videos, galleries, performances, and music show how/why art is created. Students discuss various artworks, formulate/evaluate ideas/attitudes about art.

PSTL 1312. Identity, Community, and Culture in the Performing Arts. (4 cr)

How performing arts from around the world deal with themes of identity, community, and culture. Students practice at least one of the arts in interactive workshops. Films, music, and lectures complement the workshops. Assignments include creative writing, quizzes, performance.

PSTL 1350W. Political Power and Social Change. (3 cr)

Political power and agency as illustrated by individual/collective action. Draws upon traditional texts and strategies of social/political movements. Questions about political authority, role of state, conceptions of justice/equality, and rights/responsibilities of citizenship.

PSTL 1364. Literature of the American Immigrant Experience. (3 cr)

Literature by/about immigrants. Historical/contemporary American immigrant experiences (conditions leading to emigration, adjustments to and impact on the United States, inter-generational conflict). Readings include novels, poetry, expository prose, biographies, and oral histories.

PSTL 1365W. Literatures of the United States. (3 cr)

Stories, poetry, essays, and drama by diverse U.S. writers (mid-19th century to present) depicting conflicts/challenges of life in various stratas of American culture. Addresses multicultural aspect of the "American story."

PSTL 1366W. Images of Women in Literature. (4 cr)

Diversity of 20th-century American women writers. Focuses on feminist re-interpretations of the literary canon. Portrayals of women across various identities based on race, class, sexuality, age, and religion. Readings include novels, short stories, poetry, essays, and plays.

PSTL 1367W. Contemporary Literature: International Perspectives. (4 cr)

Comparative readings in fiction, poetry, drama, and autobiography from contemporary writing not originating in the United States. Extensive formal/informal written assignments. Lecture, discussion.

PSTL 1371. Reading Short Stories. (3 cr)

Current short story format from diverse communities within North America, Africa, the Caribbean, and Europe. Emphasizes written literature inspired by oral "storytelling," storytelling as "theatre," and storytelling as communal endeavor.

PSTL 1374W. The Movies. (3 cr)

Aesthetics of feature-length films. Work of selected contemporary directors. Fundamentals of film study: mise-en-sc[gr]ene, editing, sound, photography, movement, screenplay, acting, and directing. Students write about films viewed in class.

PSTL 1421. Writing Laboratory: Basic Writing. (3 cr)

Develop academic reading, writing, and research skills. Students write in response to a variety of assignments, receive extensive one-on-one assistance, and work on computers. Clear/effective expression emphasized through writing/revision.

PSTL 1422. Writing Laboratory: Communicating in Society. (3 cr. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1423, PSTL 1424, RHET 1101. Prereq–Grade of at least D in [1421 or equiv])

Conventions/skills of academic writing, reading, and research. How people communicate in society, perceive events/ideas, and think/write about them. Extensive use of computers for writing/research.

PSTL 1423. Writing Laboratory: Community Service Writing. (3 cr. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1424, RHET 1101. Prereq–Grade of at least D in [1421 or equiv], #)

Writing description, research, and analysis based on work in community setting, and on readings/analysis. Students work three hours weekly at off-campus site for approximately seven weeks. Extensive research and writing practice. Requires use of microcomputer.

PSTL 1424. Writing Laboratory: Communicating in a Diverse Society. (3 cr. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1423, RHET 1101. Prereq–Grade of at least D in [1421 or equiv])

Proficiency in academic writing, reading, research. Multicultural, thematic content. Extensive experience with computers as tools for writing/research.

PSTL 1461. Oral Communication in the Public Sphere. (3 cr. §COMM 1101, COMM 1101H, RHET 1223)

Communication, ethics, and citizenship in interpersonal, group, and public contexts. Communication theory/experience in diverse verbal/nonverbal communication patterns/strategies. Individual/group activities, public presentations.

PSTL 1464. Group Process and Discussion in a Multicultural Society. (3 cr)

Nature of groups, how they form/function, what purpose they serve in U.S. society, and how leadership and other role behaviors emerge from their structure. Multicultural approaches to conflict management, diverse verbal/nonverbal communication patterns/strategies.

PSTL 1481. Creativity Art Laboratory: Experiences in the Media. (3 cr)

Discussing, reading, and writing about art. Creating art that reflects personal/cultural identity. Multicultural art works explored through slides/videos. How to analyze, interpret, and evaluate artwork.

PSTL 1485. Creativity: Photography. (4 cr. Prereq–Own camera [35 mm w/adjustable controls preferred], UC, \$50 lab fee)

Conceptual, technical, and historical aspects of photography as art. Hands-on experience with camera control, film development, enlarging, and printing in black-and-white. Individual/group critiques of student portfolios. Lab.

PSTL 1511. Introduction to Business and Society. (4 cr)

Role of business in economic/social life of the United States. Symbiotic relationship between business activity and broader aspects of society. Environmentalism, consumerism, cultural diversity, economic systems, ethics, management, marketing, accounting/finance, legal issues.

PSTL 1513. Small Business Fundamentals With E-Business Applications. (3 cr)

Starting up, purchasing, owning, and operating a small business. Traditional research/developmental methods for growing a business, technology associated with the Internet. Moving toward one or more e-commerce applications in researching, starting, and operating a business.

PSTL 1534. Practical Law. (4 cr)

American legal process. Everyday legal matters. Courts, crimes, personal injury, contracts, consumer transactions, property ownership/insurance, debtor-creditor relations, banking, bankruptcy, international law.

PSTL 1540. Accounting Fundamentals I. (3 cr)

Hands-on course with a small-business orientation. Making accounting entries from business transactions in journals. Posting to ledger accounts. Completing accounting cycle. Preparing/interpreting financial statements.

PSTL 1571. Computer Literacy and Problem Solving. (4 cr)

Competencies in computer technologies used in social sciences and in business to solve problems. Using advanced word processing techniques to create complex written documents such as reports. Using electronic spreadsheet to analyze data and present it graphically. Using database management programs to store, organize, and query data. Using presentation software to communicate ideas/findings in multimedia format to larger groups.

PSTL 1816. African-American Literature. (3 cr)

Short stories, novels, poetry, and drama by African American writers evaluated in context of internationalization. Interconnection between literature of African Americans in the United States and other international writers of African descent.

PSTL 1836. Asian-American Literature. (3 cr)

Historical/contemporary prose, poetry, and drama analyzed to assess writers' interpretations of their identity. Issues of generational conflict/peer pressure.

PSTL 1851. Multicultural Relations. (3 cr)

Nature of historical/contemporary multicultural relationships within American society. Intercultural, interethnic, interracial, and cross-gender relationships from historical/contemporary perspectives. Tools to think about complex issues.

PSTL 1901. Freshman Seminar: Environmental Issues. (3 cr. §PSTL 1902, PSTL 1903, PSTL 1904, PSTL 1905. Prereq–Freshman)

Reading, discussion, critical analysis, and writing about environmental issues. Intensive, small-group setting.

PSTL 1902. Freshman Seminar: Cultural Diversity. (3 cr. §PSTL 1901, PSTL 1903, PSTL 1904, PSTL 1905. Prereq–Freshman)

Reading, discussion, critical analysis, and writing about cultural diversity. Intensive, small-group setting.

PSTL 1903. Freshman Seminar: Citizenship and Public Ethics. (3 cr. §PSTL 1901, PSTL 1902, PSTL 1904, PSTL 1905. Prereq–Freshman)

Reading, discussion, critical analysis, and writing about citizenship/public ethics. Intensive, small-group setting.

PSTL 1904. Freshman Seminar: International Perspectives. (3 cr. §PSTL 1901, PSTL 1902, PSTL 1903, PSTL 1905. Prereq–Freshman)

Reading, discussion, critical analysis, and writing about international perspectives. Intensive, small-group setting.

PSTL 1905. Freshman Seminar. (3 cr. \$PSTL 1901, PSTL 1902, PSTL 1903, PSTL 1904. Prereq—Freshman)
Reading, discussion, writing, and critical analysis. Intensive, small-group setting.

PSTL 1906W. Freshman Seminar: Environmental Issues. (3 cr. \$PSTL 1907W, PSTL 1908W, PSTL 1909W, PSTL 1910W. Prereq—Freshman)
Reading, discussion, critical analysis, and writing about environmental issues. Intensive, small-group setting.

PSTL 1907W. Freshman Seminar: Cultural Diversity. (3 cr. \$PSTL 1906W, PSTL 1908W, PSTL 1909W, PSTL 1910W. Prereq—Freshman)
Reading, discussion, critical analysis, and writing about cultural diversity. Intensive, small group setting.

PSTL 1908W. Freshman Seminar: Citizenship and Public Ethics. (3 cr. \$PSTL 1906W, PSTL 1907W, PSTL 1909W, PSTL 1910W. Prereq—Freshman)
Reading, discussion, critical analysis, and writing about citizenship and public ethics. Intensive, small group setting.

PSTL 1909W. Freshman Seminar: International Perspectives. (3 cr. \$PSTL 1906W, PSTL 1907W, PSTL 1908W, PSTL 1910W. Prereq—Freshman)
Reading, discussion, critical analysis, and writing about international perspectives. Intensive, small group setting.

PSTL 1910W. Freshman Seminar. (3 cr. \$PSTL 1906W, PSTL 1907W, PSTL 1908W, PSTL 1909W. Prereq—Freshman)
Reading, discussion, writing, critical analysis. Intensive, small-group setting.

PSTL 1990. Special Topics. (1-8 cr [max 8 cr]. Prereq—#, ☐)
Topics related to instructor's areas of expertise.

PSTL 1993. Directed Study. (1-8 cr [max 8 cr]. Prereq—#, ☐)
Student-initiated project in consultation with faculty monitor. Student determines topic, sets goals, designs a course of study, and finds an appropriate faculty member to work with collaboratively.

PSTL 1996. Internship. (1-8 cr [max 8 cr]. Prereq—#, ☐)
Skills, techniques, and research in disciplinary content associated with college teaching. Goals/functions of public/community agencies. Career goals. Internships supervised by faculty monitor and site supervisor.

PSTL 2271W. Stories and Storytellers. (3 cr. Prereq—At least 13 cr completed GPA)
Uses concepts and research methods of cultural studies to explore the “stories” we use to comprehend society (narratives, images, sounds, designed objects) and the “storytellers” that create them (family, friends, ghosts); the media (TV, movies, music); politics; religion; architecture; fashion; and schools.

PSTL 2283W. Psychology of Human Development. (4 cr. Prereq—[1281 or PSY 1001], [1422 or 1423 or 1424 or ENGC 1011 or ENGC 1012 or ENGC 1013 or ENGC 1014 or ENGC 1015 or ENGC 1011H or ENGC 1012H or ENGC 1013H or ENGC 1014H or RHET 1101])
Biosocial, cognitive, psychosocial development of individuals over life span. Writing intensive. Computer assisted instruction, video, small group discussion.

PSTL 2357. World Religious Beliefs. (4 cr. Prereq—[1421 or equiv], at least 15 cr)
Beliefs, rituals, attitudes of world's major living religions. Parallel “little traditions” in their historical, social, cultural settings. Intensive writing/reading.

PSTL 2375W. Film and Society. (4 cr)
Films as medium for social/cultural expression. Problems of individuals' values or identities in conflict with societal demands/constraints (racism, sexism, urban living, family living, aging, politics, education, sexual mores, adolescence). Social issues in contemporary documentary films.

Program for Individualized Learning (PIL)

College of Continuing Education

PIL 3200. Continuing Studies. (1-2 cr [max 2 cr]; S-N only. Prereq—PIL student, Δ)
Students complete work for another PIL course in which an incomplete was received. Registration allows students to access academic advising in PIL.

PIL 3211. Degree Planning. (5 cr; S-N only. Prereq—PIL student, Δ)
Students develop individualized curricular plans for their baccalaureate degrees.

PIL 3251. Project Registration. (5 cr [max 10 cr]; S-N only. Prereq—PIL student, Δ)
Students develop a project proposal, identify objectives/resources, conduct research, accomplish an outcome, secure a narrative evaluation from a project adviser/evaluator.

PIL 3252. Program Active. (1-5 cr [max 5 cr]; S-N only. Prereq—PIL student)
Registration maintains program activity and access to PIL advising and student service.

PIL 3281. Major Project. (5 cr; S-N only. Prereq—PIL student, Δ)
Students complete a major project as partial fulfillment of criterion for Primary Area Studies in their degree plans.

PIL 3291. Graduation Preparation. (5 cr; S-N only. Prereq—PIL student, Δ)
Students compile a graduation dossier for presentation to preliminary review committee. Dossier consists of criteria summary, introduction, transcripts, illustrative materials, project proposals, degree plan.

PIL 3293. Graduation Preparation. (4 cr [max 40 cr]; S-N only. Prereq—Admitted PIL student)
Students complete draft dossier.

PIL 4299. Graduation Review. (5 cr; S-N only. Prereq—PIL student, Δ)
Students revise graduation dossier, present it to graduation review committee for BA or BS degree recommendation.

Psychology (PSY)

Department of Psychology

College of Liberal Arts

PSY 1001. Introduction to Psychology. (4 cr. \$PSTL 1281, PSTL 1289, PSY 1001H)
Scientific study of human behavior. Problems, methods, findings of modern psychology.

PSY 1001H. Honors Introduction to Psychology. (4 cr. \$PSTL 1281, PSTL 1289, PSY 1001. Prereq—Honors)
Scientific study of human behavior. Problems, methods, findings of modern psychology.

PSY 1905. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

PSY 1907W. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.

PSY 1910W. Freshman Seminar. (3 cr; A-F only. Prereq—Fr or no more than 30 cr)
Topics specified in *Class Schedule*.

PSY 2801. Introduction to Psychological Measurement and Data Analysis. (3 cr. Prereq—High school algebra, [PSY 1001 or equiv]; intended for students who plan to major in psychology)

Descriptive/basic inferential statistics used in psychology. Measures of central tendency, variability, t tests, one-way ANOVA, correlation, regression, confidence intervals, effect sizes. Psychological measurement. Graphical data presentation. Statistical software.

PSY 3005V. Honors Introduction to Research Methods and Statistics. (4 cr; A-F only. Prereq—1001, [soph or jr or sr honors student])

Concepts/procedures used to conduct/evaluate research, especially in social sciences. Benefits/limitations of traditional research methods. Using statistics to describe/interpret research outcomes. Evaluating scientific claims.

PSY 3005W. Introduction to Research Methods and Statistics. (4 cr; A-F only. Prereq—1001, [soph or jr or sr])
Concepts/procedures used to conduct/evaluate research, especially in social sciences. Benefits/limitations of traditional research methods. Using statistics to describe/interpret research outcomes. Evaluating scientific claims.

PSY 3011. Introduction to Learning and Behavior. (3 cr. Prereq—1001)
Basic methods and findings of research on learning and behavior change. Survey of 20th-century theoretical perspectives, including contemporary models. Emphasis on animal learning and behavioral psychology.

PSY 3031. Introduction to Sensation and Perception. (3 cr. Prereq—1001)
Psychological, biological, and physical bases of sensory experience in humans and animals. Emphasis on the senses of vision and hearing.

PSY 3051. Introduction to Cognitive Psychology. (3 cr. Prereq—1001)
Scientific study of the mind in terms of representation and processing of information. Research and theory on cognitive abilities such as perception, attention, memory, language, and reasoning. Aspects of computational modeling and neural systems.

PSY 3061. Introduction to Biological Psychology. (3 cr. \$PSY 5061. Prereq—1001 or BIOL 1009)
Basic neurophysiology/neuroanatomy, neural mechanisms of motivation, emotion, sleep-wakefulness cycle, learning/memory in animals/humans. Neural basis of abnormal behavior, drug abuse.

PSY 3101. Introduction to Personality. (3 cr. \$PSY 5101. Prereq—1001)
Major theories, issues, facts about personality and personality assessment. Review of important historical/contemporary perspectives (e.g., psychoanalysis, humanistic psychology, trait psychology, behaviorism, evolutionary psychology) on human nature/individuality.

PSY 3135. Introduction to Individual Differences. (3 cr. \$PSY 5135. Prereq—1001)
Differential methods in studying human behavior. Psychological traits. Influence of age, sex, heredity, and environment in individual/group differences in ability, personality, interests, and social attitudes.

PSY 3201. Introduction to Social Psychology. (4 cr. Prereq—1001 or #)
Overview of theories/research in social psychology. Emphasizes attitudes/persuasion, social judgment, the self, social influence, aggression, prejudice, helping, and applications.

PSY 3301. Introduction to Cultural Psychology. (3 cr; A-F only. Prereq–1001)

Theories/research on how culture influences basic psychological processes (e.g., emotion, cognition, psychopathology) in domains that span different areas of psychology (e.g., social, clinical, developmental, industrial-organizational) and of other disciplines (e.g., anthropology, public health, sociology).

PSY 3511. Introduction to Counseling Psychology. (3 cr. Prereq–1001)

History, theories, and research related to counseling psychology. Development/application of counseling theories to diverse populations. Psychological research on counseling process. Psychological mechanisms that promote change in people's lives.

PSY 3604. Introduction to Abnormal Psychology. (3 cr. \$PSY 5604H. Prereq–1001)

Diagnosis, classification, etiologies of behavioral disorders.

PSY 3617. Introduction to Clinical Psychology. (3 cr. Prereq–3604 or 5604H)

Historical developments, contemporary issues. Trends in psychological assessment methods, intervention strategies, and clinical psychology research. Theories behind, empirical evidence for, usefulness of psychological intervention strategies.

PSY 3666. Human Sexuality. (3 cr. Prereq–1001)

Overview of theories, research, and contemporary issues in human sexual behavior from an interdisciplinary perspective. Topics include sexual anatomy and physiology, hormones and sexual differentiation, cross-cultural perspectives on sexual development, social and health issues, and sexual dysfunction and therapy.

PSY 3711. Introduction to Industrial and Organizational Psychology. (3 cr. Prereq–[1000, 3005 or 4801 or equiv, 1001 or #])

Application of psychological theory and research to recruitment, personnel selection, training and development, job design, work group design, work motivation, leadership, performance assessment, and job satisfaction measurement.

PSY 3902W. Major Project in Psychology. (4 cr; A-F only. Prereq–3005W, psy major, sr)

Completion of undergraduate major project.

PSY 3960. Undergraduate Seminar. (1-5 cr [max 45 cr]. Prereq–1001)

Current topics in psychology. Topics listed in psychology office.

PSY 3960H. Undergraduate Honors Seminar in Psychology. (1-4 cr [max 36 cr]. Prereq–Honors)

Topics in psychology.

PSY 3993. Directed Study. (1-6 cr [max 24 cr]. Prereq–#, Δ, □)

Independent reading leading to paper or to oral or written exam.

PSY 3994. Directed Research. (1-6 cr [max 24 cr]. Prereq–#, Δ, □)

Individual empirical project leading to written report.

PSY 3996. Undergraduate Fieldwork and Internship in Psychology. (1-6 cr [max 12 cr]. Prereq–1001, #, Δ, □)

Supervised fieldwork/internship in community/industry pertinent to formal academic training in psychology.

PSY 4011. Applied Behavioral Psychology. (3 cr. Prereq–3011, #)

Fundamental concepts of behavioral psychology. Practical techniques of behavior modification with humans/animals. Emphasizes functional analyses of behavior deficits/excesses, development/implementation of programs to bring about meaningful behavior change.

PSY 4012. Behavior Analysis and Autism. (4 cr; A-F only.

Prereq–Reliable transportation, #)

Off-campus work with autistic children, under professional supervision. Professional ethics, social responsibility, scientific methods, moral philosophy concerning children with autism. At least five hours per week, for 12 weeks, at service-learning site. One on-campus evening class meeting per week.

PSY 4036. Perceptual Issues in Visual Impairment. (3 cr. Prereq–1001 or #)

Contemporary knowledge on visual, tactile, and auditory perception informs us about the challenges and capabilities of people who are blind or have low vision. Topics include reading, space perception, mobility, and the strengths and weaknesses of pertinent adaptive technology.

PSY 4133. Psychological Testing and Assessment. (3 cr. Prereq–3005W)

Survey of psychological tests, assessment instruments. Methods for developing, administering, scoring tests. Criteria for evaluating test/assessment adequacy. Examples relevant to clinical psychology (e.g., abilities, personality, mental disorders). Hands-on opportunity to design/evaluate a psychological test. Small groups.

PSY 4501. Psychology of Women. (3 cr. Prereq–1001 or #)

Survey of current theory and research regarding psychology of women and psychological sex differences including topics related uniquely to women (e.g., pregnancy) as well as sex differences in personality, abilities, and behavior.

PSY 4801. Introduction to Statistics. (4 cr. Prereq–[3005W or 3005V], honors)

Descriptive/inferential statistics, hypothesis testing, correlation, regression.

PSY 4902V. Honors Project. (1-6 cr [max 5 cr]; A-F only. Prereq–Honors, #, Δ)

Critical literature review or empirical study.

PSY 4960. Seminar in Psychology. (1-4 cr [max 16 cr].

Prereq–[1001, psych major] or #)

Seminars in subjects of current interest in Psychology.

PSY 4993. Directed Research: Special Areas of Psychology and Related Sciences. (1-6 cr [max 48 cr]. Prereq–#, Δ)

This is a Directed Research course. Each section is a special area of Psychology or a related science.

PSY 4994V. Honors Research Practicum. (4 cr. Prereq–3005W, honors psych)

Practical experience conducting psychological research. Preparation for completion of honors thesis. Research ethics, practical aspects of conducting psychological research, writing research reports. Students assist faculty and advanced graduate students in research.

PSY 4996H. Honors Internship/Externship. (1-6 cr [max 6 cr]; A-F only. Prereq–Honors, #, Δ, □)

Supervised internship/externship experience in a community-service or industrial setting relevant to formal academic training/objectives.

PSY 5012. Learning and Cognition in Animals. (4 cr.

Prereq–3011 or 4011 or honors or grad student or #)

Review/evaluation of key questions, methods, theories, and data about forms of learning and elementary cognitive processes. Emphasizes animal models. Implications for human learning/behavior.

PSY 5014. Psychology of Human Learning and Memory.

(3 cr. Prereq–3011 or 3051 [except for honors/grad student])

Survey of basic methods and findings of research on human learning, memory, and cognition. Emphasis on major factors influencing human encoding or acquisition of information and skill, retention, and retrieval. Theoretical perspectives on underlying processes of encoding, retention, and retrieval.

PSY 5015. Cognition, Computation, and Brain. (3 cr. Prereq–3051 [except for honors/grad student])

Human cognitive abilities (perception, memory, attention) from different perspectives (e.g., cognitive psychological approach, cognitive neuroscience approach).

PSY 5018H. Mathematical Models of Human Behavior.

(3 cr. Prereq–MATH 1271 or #)

Mathematical models of complex human behavior, including individual/group decision making, information processing, learning, perception, and overt action. Specific computational techniques drawn from decision theory, information theory, probability theory, machine learning, and elements of data analysis.

PSY 5031W. Perception. (3 cr. \$NSC 5031W. Prereq–3031 or 3051 or #)

Cognitive, computational, and neuroscience perspectives on visual perception. Topics include color vision, pattern vision, image formation in the eye, object recognition, reading, and impaired vision.

PSY 5034. Psychobiology of Vision. (3 cr. \$NSC 5034. Prereq–3031 or #)

Analysis of the properties and biological bases of visual perception in humans and animals. Emphasis on color vision, visual sensitivity and adaptation, nerve cells and circuits in the eye, structure and function of the visual brain.

PSY 5036W. Computational Vision. (3 cr. Prereq–[[3031 or 3051], [MATH 1272 or equiv]] or #)

Applications of psychology, neuroscience, computer science to design principles underlying visual perception, visual cognition, action. Compares biological/physical processing of images with respect to image formation, perceptual organization, object perception, recognition, navigation, motor control.

PSY 5037. Psychology of Hearing. (3 cr. \$NSC 5037.

Prereq–3031 or #)

Biological and physical aspects of hearing, auditory psychophysics, theories and models of hearing, perception of complex sounds including music and speech, clinical, and other applications.

PSY 5038W. Introduction to Neural Networks. (3 cr. Prereq–[[3061 or NSC 3102], Math 2243] or #)

Parallel distributed processing models in neural/cognitive science. Linear models, Hebbian rules, self-organization, non-linear networks, optimization, representation of information. Applications to sensory processing, perception, learning, memory.

PSY 5051W. Psychology of Human-Machine Interaction. (3 cr. Prereq–3031 or 3051 or #)

Cognitive-science approach to human-machine interaction. Analysis of human errors, human-machine system evaluation, human-computer interaction, bionic interfaces, adaptive technology for visually impaired people.

PSY 5054. Psychology of Language. (3 cr. Prereq–3005W or honors or grad student)

Theories/experimental evidence in past/present conceptions of psychology of language.

PSY 5061. Neurobiology of Behavior. (3 cr. \$PSY 3061.

Prereq–3005W or BIOL 1009 or #)

Physiological/neuroanatomical mechanisms underlying behavior of animals, including humans. Neural basis of learning/memory, sleep, wakefulness, and attention processes. Effects of drugs on behavior.

PSY 5062. Cognitive Neuropsychology. (3 cr. Prereq–3031 or 3051)

Consequences of different types of brain damage on human perception/cognition. Neural mechanisms of normal perceptual/cognitive functions. Vision/attention disorders, split brain, language deficits, memory disorders, central planning deficits. Emphasizes function/phenomenology. Minimal amount of brain anatomy.

PSY 5064. Brain and Emotion. (3 cr; A-F only. Prereq–3061 or 5061 or #)

Introduction to affective neuroscience. Focuses on how brain promotes emotional behavior in animals/humans. Biological theories of emotion reviewed in historical, current theoretical contexts. Research related to specific “basic” emotions, including brain substrates for fear, sadness, pleasure, attachment. Implications for understanding emotional development, vulnerability to psychiatric disorders.

PSY 5101. Personality Psychology. (3 cr. §PSY 3101.

Prereq-§: 3101; 3005W, [honors or grad student]) Theories and major issues/findings on personality functioning, personality structure, and personality assessment. Historically important and currently influential perspectives.

PSY 5135. Psychology of Individual Differences. (3 cr. §PSY 3135. Prereq-3005W or 5862 or equiv or #)

Differential methods in study of human behavior. Psychological traits. Influence of age, sex, heredity, and environment in individual/group differences in ability, personality, interests, and social attitudes.

PSY 5137. Introduction to Behavioral Genetics. (3 cr. Prereq-3005W or equiv or #)

Genetic methods for studying human/animal behavior. Emphasizes nature/origin of individual differences in behavior. Twin and adoption methods. Cytogenetics, molecular genetics, linkage/association studies.

PSY 5138. Psychology of Aging. (3 cr. Prereq-3005W or equiv)

Theories/findings concerning age-related changes in mental health, personality, cognitive functioning, productivity are reviewed/interpreted within context of multiple biological, social, and psychological changes that accompany age.

PSY 5202. Attitudes and Social Behavior. (3 cr. Prereq-3201 or #)

Theory/research in social psychology, other fields in psychology of attitudes, beliefs, values. These fields' relationship to social behavior. Principles/theories of persuasion.

PSY 5204. Psychology of Interpersonal Relationships. (3 cr; A-F only. Prereq-[Honors or grad student], #)

Introduction to interpersonal relationship theory/ research findings. Emphasizes conceptual/ methodological issues.

PSY 5205. Applied Social Psychology. (3 cr. Prereq-3201 or grad student or #)

Applications of social psychology research/theory to domains such as physical/mental health, education, the media, desegregation, the legal system, energy conservation, public policy.

PSY 5206. Social Psychology and Health Behavior. (3 cr; A-F only. Prereq-3201 or grad student or #)

Survey of social psychological theory/research pertaining to processes by which people develop beliefs about health/illness. Relationship between these beliefs, adoption of health-relevant behavior. Effect of psychological factors on physical health.

PSY 5207. Personality and Social Behavior. (3 cr; A-F only. Prereq-3101 or 3201 or honors or grad student or #)

Conceptual/methodological strategies for scientific study of individuals and their social worlds. Applications of theory/research to issues of self, identity, and social interaction.

PSY 5501. Vocational and Occupational Health Psychology. (3 cr. Prereq-3005 or #)

Survey of history, concepts, theories, methods, and findings of vocational/occupational health psychology. Burnout, personality, violence, stressors/ stress-relations, counter productive behaviors, coping in workplace. Vocational development/assessment, career decision-making/counseling, person-environment fit.

PSY 5604H. Abnormal Psychology. (3 cr. §PSY 3604. Prereq-honors or grad student or #)

Comprehensive review of psychopathological disorders. Etiology, diagnostic criteria, clinical research findings.

PSY 5606. Clinical Psychophysiology. (3 cr. Prereq-3005 or equiv, 3061 or 5061, 3604 or 5604 or #)

How psychophysiological methods such as autonomic and central nervous system recording are used in the study of major psychopathological disorders.

PSY 5707. Personnel Psychology. (4 cr. Prereq-[[3005W or equiv], 3711] or #)

Application of psychological research/theory to organizational staffing, evaluation, and training. Principles of individual differences and psychological measurement applied to decision making, staffing, and instruction in organizations. Job analysis, recruitment, screening, selection, performance appraisals, criterion measurement, organizational training, learning, aptitude treatment interactions.

PSY 5708. Organizational Psychology. (4 cr. §PSY 5702, PSY 5705. Prereq-[[3005W or equiv], 3711] or #)

Psychological causes of behavior in work organizations. Consequences for individual fulfillment and organizational effectiveness. Individual differences, social perception, motivation, stress, job design, leadership, job satisfaction, teamwork, organizational culture.

PSY 5862. Psychological Measurement: Theory and Methods. (3 cr. Prereq-4801 or equiv)

Types of measurements (tests, scales, inventories) and their construction. Theory/measurement of reliability/validity.

PSY 5865. Advanced Psychological and Educational Measurement. (4 cr. §PSY 8222. Prereq-5862 or #)

Topics in test theory. Classical reliability/validity theory/methods, generalizability theory. Linking, scaling, equating. Item response theory, methods for dichotomous/polytomous responses. Comparisons between classical, item response theory methods in instrument construction.

PSY 5960. Topics in Psychology. (1-4 cr [max 8 cr]. Prereq-1001, [jr or sr or grad student])

Special course or seminar. Topics listed in psychology office.

Public Affairs (PA)

Humphrey Institute of Public Affairs

PA 1490. Topics in Social Policy. (1-3 cr [max 9 cr]) Topics in social policy.

PA 1907W. Freshman Seminar: Cultural Diversity. (1-3 cr [max 6 cr]. Prereq-Freshman)

Reading, discussion, critical analysis, writing. Intensive, small-group setting.

PA 1961W. Personal Leadership in the University. (3 cr. §EDPA 1301W)

Introduction to leadership theory, personal development, interpersonal relations, leadership at University of Minnesota. Personal assessment, written/verbal presentation, resume writing, electronic communication, goal setting, coping with group dynamics.

PA 1990. General Topics in Public Policy. (1-3 cr [max 9 cr]) General topics in public policy.

PA 3003. Nonprofit and Public Financial Analysis and Budgeting. (3 cr; A-F only)

Financial/budget documents from nonprofit/public organizations. Emphasizes conceptual frameworks analytical techniques applied to real-world problems.

PA 3401. The Arts of Liberty: Educating for Democracy in Information Age. (3 cr)

"Hands-on" approach to education for democracy. Core concepts and their different meanings in American history, especially ideas of freedom, work, and democracy. Students participate in community projects, either through the Jane Addams School or as "democratic coaches" for teams of young people. Two essays and a journal.

PA 3961W. Leadership, You, and Your Community. (3 cr. §EDPA 3302W. Prereq-[1961W or EDPA 1301W], [jr or sr])

Leadership, leadership capacities. Multicultural/multidimensional perspectives. Students examine their views on leadership. Leadership theory/practice. Group dynamics/behavior. Applying knowledge to practice.

PA 3971. Leadership Minor Field Experience. (2 cr; A-F only. §EDPA 3402. Prereq-3961W or EDPA 3302W)

Core leadership course information applied to leadership situations. Settings include community or educational organizations, corporations, University student organizations, and formal internships. Students identify two leadership objectives from among personal, interpersonal, and organizational development. Experiential learning, individual presentations, group discussions, critical reflection/writing.

PA 3990. General Topics in Public Policy. (1-3 cr [max 9 cr]) General topics in public policy.

PA 4101. Nonprofit Management and Governance. (3 cr)

Managing/governing nonprofit/public organizations. Theories, concepts, real-world examples. Governance systems, strategic management practices, effect of different funding environments, management of multiple constituencies.

PA 4190. Topics in Public and Nonprofit Leadership and Management. (3 cr [max 9 cr])

Topics in public/nonprofit leadership/management.

PA 4200. Urban and Regional Planning. (3 cr)

Fundamental principles of urban/regional land-use planning. Introduction to planning theory and its applications. Political-economic context of urban/regional planning.

PA 4290. Topics in Planning. (1-3 cr [max 12 cr]; A-F only)

Topics in social policy.

PA 4421. Racial Inequality and Public Policy. (3 cr)

Historical roots of racial inequality in American society. Contemporary economic consequences. Public policy responses to racial inequality. Emphasizes thinking/analysis that is critical of strategies offered for reducing racism and racial economic inequality.

PA 4490. Topics in Social Policy. (3 cr [max 9 cr])

Topics in social policy.

PA 4961W. Self-developed Leadership in the World. (3 cr; A-F only. §EDPA 4303W. Prereq-3971 or EDPA 3402)

Leadership theory, community building/social change, systems thinking. Students conduct/present research on leadership models through literature review, internships, and study groups. Student groups produce major paper describing research project. Students assemble portfolio, participate in two-day leadership retreat.

PA 5001. Intellectual Foundations of Public Action. (1.5 cr; A-F only. Prereq-Major in publ aff or publ policy or sci, tech, and environ policy or urban and regional planning or publ hlth or #)

Evolution of intellectual approaches that underlie public planning, management, and policy analysis as strategies for public action. How public decision making is shaped by knowledge and values; role of rationality. Conceptual approaches to public action along descriptive/normative lines and structure/process lines.

PA 5002. Introduction to Policy Analysis. (1.5 cr; A-F only. Prereq-Major in public policy or #)

Process of public policy analysis from problem structuring to communication of findings. Commonly used analytical methods. Alternative models of analytical problem resolution.

PA 5003. Introduction to Financial Analysis and Management. (1.5 cr; A-F only. Prereq-Major in public policy or #)

Basic finance/accounting concepts/tools used in public/nonprofit organizations. Fund accounting, balance sheet and income statement analysis, cash flow analysis, and public/nonprofit sector budgeting processes. Lectures, discussions. Cases/examples from nonprofit and public sector organizations.

- PA 5004. Introduction to Planning.** (3 cr; A-F only. Prereq—Major in urban/regional planning or #) History, institutional development of urban planning as a profession. Intellectual foundations, planning theory. Roles of urban planners in U.S./international settings. Scope, legitimacy, limitations of planning and of planning process. Issues in planning ethics and in planning in settings of diverse populations/stakeholders.
- PA 5011. Public Management and Leadership.** (3 cr; A-F only. Prereq—Major in public policy or #) Challenges facing higher-level managers in public/nonprofit organizations in a mixed economy and democratic republic. Distinctive features of public/nonprofit management, skills necessary for effective management, manager's role as creator of public value. Lectures, case discussions.
- PA 5012. The Politics of Public Affairs.** (3 cr; A-F only. Prereq—Major in public policy or [sci, tech, and environ policy] or #) Stages of policy making from agenda setting to implementation. Role/behavior of political institutions (courts, legislatures, executives, bureaucracies) and citizens, social movements, and interest groups. Concepts of political philosophy. Theories of the state. Team taught, interdisciplinary course. Small discussion sections.
- PA 5013. Law and Urban Land Use.** (1.5 cr; A-F only. Prereq—Major in urban/regional planning or #) Role of law in regulating/shaping urban development, land use, environmental quality, and local/regional governmental services. Interface between public/private sector.
- PA 5021. Economics For Policy Analysis and Planning I.** (3 cr; A-F only. Prereq—[[ECON 1101 or equiv], Major in public policy or [sci, tech, and environ policy]] or #) Introduction to tools useful for public policy: intermediate microeconomics, macroeconomics, concepts of international trade.
- PA 5022. Economics For Policy Analysis and Planning II.** (1.5-3 cr [max 4.5 cr]; A-F only. Prereq—[[5021 or equiv], public policy major] or #) Application of economic reasoning to various public policy issues. Cost-benefit analysis, nonmarket valuation, and tax analysis.
- PA 5031. Empirical Analysis I.** (4 cr; A-F only. Prereq—Major in publ policy or [sci, tech, and environ policy] or urban/regional planning or #) Basic statistical tools for empirical analysis of public policy alternatives. Frequency distributions, descriptive statistics, elementary probability and probability distributions, statistical inference. Estimation and hypothesis testing. Cross-tabulation and chi-square distribution. Analysis of variance, correlation. Simple/multiple regression analysis.
- PA 5032. Intermediate Regression Analysis.** (1-2 cr [max 2 cr]; A-F only. Prereq—[[5031 or equiv], major in [public policy or [sci, tech, and environ policy]]] or #) Bivariate/multivariate models of regression analysis, assumptions behind them. Problems using these models when such assumptions are not met.
- PA 5033. Multivariate Techniques.** (1-2 cr [max 2 cr]; A-F only. Prereq—[[5031 or equiv], major in [public policy or [sci, tech, and environ policy]]] or #; [5032 or equiv] recommended) Public affairs topics using maximum-likelihood estimation approaches.
- PA 5035. Survey Research and Data Collection.** (1.5 cr; A-F only. Prereq—[[5031 or equiv], [major in publ policy or [sci, tech, and environ policy] or urban/regional planning]] or #) Introduction to survey research methods. Emphasizes applications to policy and applied research. Research design choices (e.g., descriptive, experimental, case studies), sampling, variable specification, measurement. Conducting interviews, mailed questionnaires. Qualitative techniques.
- PA 5036. Regional Economic Analysis.** (1.5 cr. Prereq—Major in public policy or [science, tech, env policy] or urban/regional planning or #) Economic data analysis techniques for practitioners in planning and economic development working at local/regional levels. Shift-share analysis, economic base model, base multipliers, location quotient analysis, minimum requirements method, economic impact analysis. Individual/group projects.
- PA 5037. Regional Demographic Analysis.** (1.5 cr. Prereq—Major in public policy; or science, tech, and env. policy; or urban and regional planning; or instructor consent) Demographic data analysis, population projection techniques for practitioners in planning, social service delivery, and community development at local/regional levels. Population extrapolation using curve fitting methods, demographic indicators, cohort-component method of population projection, estimation of fertility/migration rates, life tables. Individual/group projects.
- PA 5101. Management and Governance of Nonprofit Organizations.** (3 cr. Prereq—Grad or #) Draws on theories, concepts, and real world examples to explore critical managerial challenges. Governance systems, strategic management practices, effect of different funding environments, management of multiple constituencies. Different types of nonprofits using economic/behavioral approaches.
- PA 5102. Organization Design and Change.** (3 cr. Prereq—Grad or #) Basic concepts related to organizational design decisions. Managerial challenges associated with organizational change in context of public sector agencies and nonprofit organizations. Major forces for change, kinds of change, management of change. Case-based analysis/discussion.
- PA 5104. Strategic Human Resource Management.** (3 cr) Theory/practice of developing, utilizing, and aligning human resources to improve culture/outcomes of nonprofit/public organizations. HR strategy, individual diversity, leadership, selection, training, compensation, classification, performance appraisal, future HR practices.
- PA 5111. Financial Management in Public and Nonprofit Organizations.** (3 cr. Prereq—[[5003, grad] or #) Design, installation, and use of accounting/control systems in public/nonprofit organizations. Public accounting standards/practices, financial administration/reporting, debt management, budgeting, contract/procurement management systems. Lecture, discussion, case analysis.
- PA 5112. Public Budgeting.** (3 cr. Prereq—Grad student or #) Budget processes in legislative/executive branches of federal, state, and local government. Program planning evaluation/administration. Techniques of budget/program analysis. Use of budget as policy/management tool. Analysis of fund flows within/among governments.
- PA 5113. State and Local Public Finance.** (3 cr. Prereq—Grad or #) Theory/practice of financing. Providing public services at state/local level of government. Emphasizes integrating theory/practice, applying materials to specific policy areas, and documenting wide range of institutional arrangements across/within the 50 states.
- PA 5122. Law and Public Affairs.** (3 cr. Prereq—Grad or #) Overview of evolution of American legal system. Role of courts, legislatures, and political actors in changing law. How law is used to change public policy.
- PA 5123. Financing Nonprofits: Philosophies and Realities.** (3 cr. Prereq—Grad student or #) Brief history of philanthropy in the United States. Foundation/other sources of funding for nonprofit activity. Philosophies of fundraising/grantmaking. Types of foundations/agencies that fund. Practical approaches to getting/managing money.
- PA 5131. Conflict Management: Readings in Theory and Practice.** (3 cr. Prereq—Grad or #) Current theory. Review of conflict resolution strategies. Aspects of interpersonal, group, organizational, and systemic conflict.
- PA 5132. Mediation Training.** (3 cr. Prereq—Grad or #) Creating an arena for mediation. Skills/expectations needed to mediate disputes between individuals, among groups: balanced (peer or colleague), imbalanced (power differentials). Role playing, group debriefing, critique. Cases.
- PA 5133. Conflict Management Proseminar.** (1 cr. Prereq—Grad or #) Topics in conflict management research/practice. Theoretical implications, practical applications from the perspectives of participants. National/international issues.
- PA 5134. Conflict Management Proseminar.** (1 cr. Prereq—Grad or #) Topics in conflict management. Theoretical implications, practical applications from the perspectives of participants. National/international issues.
- PA 5142. Public Issues Facilitation Strategies.** (1 cr. Prereq—Grad student or #) Course equips facilitators with processes that encourage civic participation and effective, timely decision-making. Students identify and examine facilitation components and link them to public issues, examine one approach or theory of facilitation and apply it to a case study, and share experiences and cases with other learners.
- PA 5143. Teaching Leadership for the Common Good.** (1 cr. Prereq—Grad student or #, basic ability to use the Internet and Web browsers) Introduces learners to main concepts in "Leadership for the Common Good" framework, offers a number of tools and exercises for applying these concepts, and prepares learners to teach others about leadership for the common good.
- PA 5190. Topics in Public and Nonprofit Leadership and Management.** (1-3 cr [max 9 cr]. Prereq—Grad or #) Selected topics.
- PA 5201W. American Cities I: Population and Housing.** (4 cr. §GEOG 5371W. Prereq—Grad or #) Emergence of North American cities. Residential building cycles, density patterns. Metropolitan housing stocks, supply of housing services. Population/household types. Neighborhood-level patterns of housing use. Housing prices. Intraurban migration. Housing submarkets inside metro areas. Emphasizes linking theory, method, and case studies.
- PA 5202W. American Cities II: Land Use, Transportation, and the Urban Economy.** (4 cr. §GEOG 5372W. Prereq—Grad student or #) Urban economy, its locational requirements. Central place theory. Transportation and urban land use, patterns/conflicts. Industrial/commercial land blight. Real estate redevelopment. Historic preservation. Emphasizes links between land use, transportation policy, economic development, and local fiscal issues. U.S.-Canadian contrasts.
- PA 5203W. Geographical Perspectives on Planning.** (3 cr. §GEOG 3605V, GEOG 3605W, GEOG 5605V, GEOG 5605W. Prereq—Grad student or #) Includes additional weekly seminar-style meeting and bibliography project on topic selected in consultation with instructor.
- PA 5211. Land Use Planning.** (3 cr. Prereq—Grad student or #) Physical/spatial basis for land use planning at community/regional level. Role of public sector in guiding private development. Land use regulations, comprehensive planning, growth management, innovative land use planning/policies.

PA 5212. Managing Urban Growth and Change. (3 cr. Prereq—Grad student or #)

Theory/practice of planning, promoting, and controlling economic growth/change in urban areas. Economic development tools available to state/local policymakers, historic context of their use in the United States. Legal, social, and economic implementation constraints. Interactions among economic, social, and demographic trends.

PA 5221. Private Sector Development. (3 cr. Prereq—Grad or #)

Roles of various participants in land development. Investment objectives, effects of regulation. Overview of development process from private/public perspective.

PA 5231. Transit Planning and Management. (3 cr. Prereq—Grad student or #)

Principles/techniques related to implementing transit systems. Historical perspective, characteristics of travel demand, demand management. Evaluating/benchmarking system performance. Transit-oriented development. Analyzing alternative transit modes. System design/finance. Case studies, field projects.

PA 5232. Transportation Policy, Planning, and Deployment. (3 cr. Prereq—Sr or grad student or #)

Development of transportation policy, making of transportation plans, deployment of transportation technologies. Lectures, interactive case studies, role playing.

PA 5251. Strategic Planning and Management. (3 cr; A-F only. Prereq—Grad student or #)

Theory/practice of strategic planning/management for public/nonprofit organizations/networks. Strategic planning process, management systems; stakeholder analyses. Tools/techniques such as purpose expansions, SWOT analyses, oval mapping, portfolio analyses, and logic models.

PA 5252. Strategy and Tactics in Project Planning and Management. (1.5 cr. Prereq—Grad or #)

Planning, analysis, evaluation, and implementation of short-term plans/projects. Technical analyses, interactional elements of completing projects within budget/time constraints. Strategic/tactical choices in planning. Case examples.

PA 5253. Designing Planning and Participation Processes. (3 cr. Prereq—Grad student or #)

Theory/practice of design, implementation, and evaluation of planning/participation processes in an increasingly diverse society. Types of planning. Stakeholders, including typically under-represented groups. Costs/benefits of participation. Participant roles. Planning/participation tools/techniques.

PA 5254. Strategic Planning Tools and Techniques. (1.5 cr; A-F only. Prereq—Grad student or #)

Techniques may include purpose expansions, competitive/collaborative analysis methods, core/distinctive competency identification, portfolio methods, logic and business process models, scenario construction, balanced scorecards, and related strategy mapping tools.

PA 5255. Stakeholder Identification, Analysis, and Influence Techniques. (1.5 cr; A-F only. Prereq—Grad student or #)

Techniques include basic identification, power vs. interest grids, stakeholder influence diagrams, discerning the common good, support vs. opposition matrices, participation planning matrices, and ethical analysis.

PA 5261. Housing Policy. (3 cr; A-F only. \$DHA 5463. Prereq—Grad or #)

Institutional/environmental setting for housing policy in the United States. Competing views of solving housing problems through public intervention in the market. Federal/local public sector responses to housing problems.

PA 5271. Geographic Information Systems: Applications in Planning and Policy Analysis. (3 cr. Prereq—Grad student or #)

Introduction to GIS. Applications in public planning and policy analysis. Operational skills in GIS software. Mapping analysis of U.S. Census material. Local/state government management/planning. Spatial statistical analysis for policy/planning.

PA 5290. Topics in Planning. (1-3 cr [max 9 cr]. Prereq—Grad student or #)

Selected topics.

PA 5301. Population Methods and Issues for the United States and Third World. (3 cr. Prereq—Grad student or #)

Basic demographic measures/methodology. Demographic transition, mortality, fertility. Diverse perspectives on nonmarital fertility, marriage, divorce, and cohabitation. Cultural differences in family structure, aging, migration, refugee movements, population policies. Discussion of readings on population growth and environment.

PA 5311. Program Evaluation. (3 cr. Prereq—Grad student or #)

Principal methods, primary applications of evaluation research as applied to policies/programs in health/human services, education, or the environment. Conducting evaluations. Becoming a critical consumer of studies.

PA 5390. Topics in Advanced Policy Analysis Methods. (1-4 cr [max 9 cr]. Prereq—Grad student or #)

Topics in advanced policy analysis methods.

PA 5401. Poverty, Inequality, and Public Policy. (3 cr. Prereq—Grad or #)

Nature/extent of poverty/inequality in the United States, causes/consequences, impact of government programs/policies. Extent/causes of poverty/inequality in other developed/developing countries.

PA 5411. Child Welfare Policy. (3 cr. \$SW 5107. Prereq—Grad or publ hith or non-degree seeking student or #)

Intersection of conceptual orientations of developmental psychology with policies that affect children/families. Demographic, historical, social trends that underlie assumptions driving policies directed at women/children. Projections of future policies.

PA 5412. Aging and Disability Policy. (3 cr. Prereq—Grad or #)

Policy debates concerning populations that are aging or disabled. Students learn/practice analyses in context of important health, social, and economic policy debates. Readings on current theory/evidence.

PA 5421. Racial Inequality and Public Policy. (3 cr. Prereq—Grad or #)

Historical roots of racial inequality in American society. Contemporary economic consequences. Public policy responses to racial inequality. Emphasizes thinking/analysis that is critical of strategies offered for reducing racism and racial economic inequality.

PA 5431. Public Policies on Work and Pay. (3 cr. Prereq—[[PA 5031 or equiv], grad student] or #)

Public policies affecting employment, hours of work, and institutions in labor markets. Public programs impacting wages, unemployment, training, collective bargaining, job security, and workplace governance. Policy implications of the changing nature of work.

PA 5441. Education Policy and the State Legislature. (3 cr. Prereq—Grad or #)

How Minnesota legislature decides K-12 issues. Implications for higher education. How to increase one's influence in process. Discussions with persons who influence statewide educational policy. Presentations. Field trip to state legislature.

PA 5442. Policy Design for Education and Human Development. (3 cr. Prereq—Grad or #)

Designing effective educational policies. Using interdisciplinary approaches to identify/understand core variables (economic, psychological, etc). Work on policy design.

PA 5451. Immigrant Health Issues. (3-4 cr [max 4 cr]. \$PUBH 6281. Prereq—Grad student or #)

How to access demographic, health, background information on U.S. immigrants. Characteristics and health needs of immigrants. Designing culturally competent health programs. How to advocate for change to promote immigrant health. Community visits required. Online course.

PA 5452. Immigration and Public Policy. (3 cr. Prereq—Grad student or #)

How to employ an analytical framework to analyze a current immigration policy proposal. Topics vary (e.g., president's guest worker proposal, democratic alternative proposals).

PA 5480. Topics in Race, Ethnicity, and Public Policy. (1-3 cr [max 9 cr]. Prereq—Jr or sr or grad student or #)

Link between race/ethnicity and public policy. How to identify/measure racial/ethnic disparities and their historical/cultural origins and policy impacts and to craft politically feasible remedies. Topics may include criminal justice, housing, child welfare, and education.

PA 5490. Topics in Social Policy. (1-4 cr [max 9 cr]. Prereq—Grad student or #)

Selected topics.

PA 5501. Economic Development I. (2 cr. Prereq—Grad or #)

Economic development theories/strategies at national/regional levels in developing countries and the United States. Redistributive and basic needs strategies, institutional approaches, dependency/Neo-Marxist approaches, gender and development, sustainable development, effects of globalization on workers/communities, public policy responses.

PA 5502. Economic Development II. (2 cr. Prereq—Grad student or #)

Economic development from macroeconomic/open-economy perspective. Sources of economic growth. Agricultural development. Import-substitution industrialization. Endogenous growth models. Population, migration, and human development. Policy reform/adjustment.

PA 5511. Community Economic Development. (3 cr. Prereq—Grad or #)

Contexts/motivations behind community economic development activities. Alternative strategies for organizing/initiating economic development projects. Tools/techniques for economic development analysis/planning (market analysis, feasibility studies, development plans). Implementation at local level.

PA 5521. Development Planning and Policy Analysis. (4 cr. Prereq—[[5031 or equiv], [5501 or equiv], grad student] or #)

Techniques/assumptions of development planning and policy analysis at national, regional, and project levels. Direct/indirect effects of external shocks and government interventions on national/regional economies. Macroeconomic modeling, input-output analysis, social accounting matrices/multipliers, project appraisal/evaluation techniques.

PA 5522. Economic Development Policies in Latin America. (3 cr. Prereq—Grad student or #)

Evolution of economic development policies from import-substituting industrialization policies of 1950s/1960s through beginning of reform in 1970s, economic crisis of 1980s, and reform into 1990s. Emphasizes privatization, economic integration, exchange rate/trade, and domestic/adjustment policies.

PA 5531. Strategies for Sustainable Development: Theory and Practice. (2 cr. Prereq—[Microecon course, grad student] or #)

Economic, environmental, and social aspects of sustainable development. Strategies, methods of implementation, and applications of sustainable development in different economic systems of industrialized/developing countries. Special attention to countries in transition.

PA 5590. Topics in Economic and Community Development. (1-3 cr [max 9 cr]. Prereq—Grad student or #)

Selected topics.

PA 5601. Survey of Women, Law, and Public Policy in the United States. (3 cr. Prereq—Grad or #)

Gendered nature of public policy. Historical analysis of welfare, single motherhood, and protective legislation. How laws structure public policy. How courts are arenas for policy making. Emphasizes employment discrimination and reproductive rights. Differences among women. Intersection of oppression based on class/race/sexual orientation.

PA 5611. Feminist Economics. (2 cr. Prereq—[5021, grad student] or #)

Feminist philosophy, methodology, and economic practice. Feminist perspectives on development and the global economy, work/family. Heterodox traditions in economics.

PA 5690. Topics in Women and Public Policy. (1-3 cr [max 9 cr]. Prereq—Grad student or #)

Selected topics.

PA 5701. Science and State. (3 cr. Prereq—Grad or #)

Relationship between science and contemporary society. Nature of science: its values, processes, and ways of knowing. How science has influenced U.S. political institutions and political/judicial processes. Issues in current debate over U.S. science policy.

PA 5711. Science, Technology, and International Affairs. (3 cr. Prereq—Grad student or #)

Effect of science/technology on relations among nations in such matters as autonomy, national security, economic strength, environment, cultural identity, and international cooperation. Negotiating international agreements with S&T implications.

PA 5721. Energy and Environmental Policy. (3 cr. Prereq—Grad or #)

Impact of energy production/consumption choices on environmental quality, sustainable development, and other economic/social goals. Emphasizes public policy choices for energy/environment, linkages between them.

PA 5722. Environmental and Resource Economics Policy. (3 cr. Prereq—[Intermediate microeconomics, intermediate policy analysis, grad student] or #)

Public policy associated with natural resource use and environmental protection. Develops/applies economic concepts/methodologies/policy mechanisms. Principles of environmental/resource economics. Issues related to renewable/nonrenewable resources and environmental pollution. Focuses on scientific/political aspects of policy.

PA 5790. Topics in Science, Technology, and Environmental Policy. (1-3 cr [max 9 cr]. Prereq—Grad or #)

Selected topics.

PA 5801. Global Public Policy. (3 cr. Prereq—Grad student or #)

Creation of rules, norms, and institutions to regulate global activities. Policy making, from exclusive domain of state to including various nonstate actors. How global policy making regulates interstate, national, and transnational activities. Creation/enforcement of global rules. Applications to international security, political economy, and other topics.

PA 5812. Open Economy Models: An Assessment. (3 cr. Prereq—[Intermediate macroeconomics, trade theory, grad student] or #)

Open economics, implications for policy making/implementation. Issues at level of international/domestic economies.

PA 5890. Topics in Foreign Policy and International Affairs. (1-5 cr [max 9 cr]. Prereq—Grad student or #)

Selected topics.

PA 5900. Computer Applications in Public Affairs (Summer). (.5 cr [max 1 cr]; S-N only. Prereq—#)

Introduction to basic computer systems/applications in public affairs practice (e.g., MS Windows, MS Word). Offered summer.

PA 5901. Computer Applications in Public Affairs. (.5-3 cr [max 6 cr]; S-N only. Prereq—#)

Introduction to computer systems/applications in public affairs practice.

PA 5902. Computer Applications in Public Affairs. (.5-3 cr [max 6 cr]; S-N only)

Introduction to computer systems/applications in public affairs practice.

PA 5903. Introduction to Computers and Applications at the Humphrey Institute. (2 cr; S-N only. Prereq—International HHH fellow)

Computers/applications. Basic skills. Software such as MS Word, Excel, PowerPoint, Access. Using Internet, e-mail, search engines (for research), HTML (through Web page creation software).

PA 5910. Developing Your Public Service Career. (1 cr; S-N only. Prereq—Major in [public affairs or public policy or urban/regional planning or [science, technology/environmental policy]] or #)

Students investigate/analyze interests, skills, and abilities and combine them in a career plan. Students develop tools to demonstrate their abilities, document their experiences/knowledge, and explore public service career options.

PA 5912. Politics of Public Affairs and Civic Engagement. (3 cr. Prereq—Grad student or #)

Potential for public affairs professionals to be agents/architects of democracy in a radically changing, diverse, global landscape of governance.

PA 5920. Skills Workshop. (.5-3 cr [max 6 cr]. Prereq—Grad student or #)

Topics on various public policy/planning skills such as lobbying, grantwriting, and project management.

PA 5931. Role of the Media in Public Affairs. (3 cr. Prereq—Grad or #)

Historical/contemporary role of news media in defining/shaping public opinion/policy, primarily in the United States. Emphasizes critical research, professional skills in three forms of journalism: hard news coverage, investigative reporting, documentaries. Field experience, practice in governmental public relations.

PA 5941. Leadership for the Common Good. (4 cr. Prereq—Major in public affairs or #)

Personal, team, organizational, visionary, political, and ethical aspects of leadership. Emphasizes building/experiencing a learning community.

PA 5951. Global Commons Seminar. (3 cr [max 6 cr]; S-N only. Prereq—International Hubert H. Humphrey Fellows)

Meets specific needs of International Humphrey Fellows. Topics vary each year depending on the interests and needs of the fellows.

PA 5952. Global Commons Seminar II. (2 cr. Prereq—HHH International fellow)

Research/presentations related to professional development projects. Each week selected students assign readings, deliver a presentation on their professional development project, and distribute a summary of the talk. Presentations are developed in collaboration with at least one faculty specialist in the subject area.

PA 5990. Topics: Public Affairs—General Topics. (.5-3 cr [max 9 cr]. Prereq—Grad student or #)

General topics in public policy.

Public Health (PUBH)

School of Public Health

PUBH 1003. Alcohol and College Life. (1 cr. Prereq—Fr or soph or PSEO)

Facts about how alcohol affects college life. Personal prevention strategies. Maximizing student/campus safety. Web-based distance learning format starts before students arrive on campus.

PUBH 3000. Topics: Public Health. (.5-4 cr [max 80 cr])

New courses or topics of interest in public health.

PUBH 3001. Personal and Community Health. (2 cr)

Fundamental principles of health conservation and disease prevention.

PUBH 3003. Fundamentals of Alcohol and Drug Abuse.

(2 cr. \$PUBH 3004, PUBH 3005, PUBH 6003)

Scientific, sociocultural, and attitudinal aspects of alcohol and other drug abuse problems. Emphasizes incidence, high-risk populations, prevention, and intervention.

PUBH 3004. Basic Concepts in Personal and Community Health. (4 cr. \$PUBH 3003, PUBH 3005, PUBH 6003)

Scientific, sociocultural, and attitudinal aspects of communicable and degenerative diseases, environmental and occupational health hazards, and alcohol and drug problems. Role of education in health conservation, disease control, and drug abuse.

PUBH 3005. Fundamentals of Alcohol and Drug Abuse for Teacher Education. (1 cr. \$PUBH 3003, PUBH 3004, PUBH 6003. Prereq—Undergrad in agricultural educ or business/marketing educ or career/technical educ or foundations of educ or [kinesiology, pre-PE] or technology educ or music educ)

Scientific/socio-cultural aspects of alcohol/drug problems. Emphasizes role of education in health conservation and drug abuse prevention.

PUBH 3010. Public Health Approaches to HIV/AIDS. (2 cr. \$PUBH 6010. Prereq—College level biology course)

Primary, secondary, and tertiary prevention. Community responses to HIV/AIDS in Minnesota. Medical, social service, and political responses.

PUBH 3040. Dying and Death in Contemporary Society: Implications for Intervention. (2 cr [max 4 cr]. \$PUBH 6040. Prereq—Jr or sr or #)

Concepts, attitudes, ethics, and lifestyle management in relation to dying, death, grief, and bereavement. Emphasizes intervention/educational aspects for community health/helping professionals and educators.

PUBH 3050. Practicum in Peer Education I. (2 cr; A-F only. Prereq—[Upper div student, [demonstrated hth sci or hth ed interests], [3001 or \$3001 or 3004 or \$3004]], #)

Multiple factors that influence health. Through various health promotion strategies, students build upon or gain skills such as public speaking, needs assessments, program planning, interpersonal communication, and program evaluation.

PUBH 3052. Practicum in Peer Education II. (2 cr; A-F only. Prereq—[Upper div student, [demonstrated hth sci or hth ed interests], [3001 or \$3001 or 3004 or \$3004]], #)

Multiple factors that influence health. Through various health promotion strategies, students build upon or gain skills such as public speaking, needs assessments, program planning, interpersonal communication, and program evaluation.

PUBH 3093. Directed Study: Public Health. (1-4 cr [max 4 cr]. Prereq—#)

Directed study in selected public health problems or current issues.

PUBH 3102. Issues in Environmental and Occupational Health. (3 cr. \$PUBH 6102)

Scope of the field of environmental health. Concepts upon which environmental interventions are based. Consulting literature to identify appropriate interventions for community environmental health problems. Online course.

PUBH 3300. Topics: Clinical Research. (1-4 cr [max 8 cr]. Prereq—Jr or sr)

Topics regarding health research in humans.

PUBH 3390. Topics: Epidemiology. (1-4 cr [max 20 cr]. Prereq—Jr or sr)

New course offerings or topics.

PUBH 3639. Prevention: Theory, Practice, and Application in Public Health Services. (3 cr. Prereq—Jr or sr)

Current issues/controversies centered on prevention and health promotion. How they relate to health services and program implementation.

This is Public Health (PUBH) to Youth Development and Research (YoSt) of the Course Description section of the 2006-2008 Undergraduate Catalog for the University of Minnesota, Twin Cities campus.

Course Descriptions

Contents		
Academic Health Center Shared (AHS).....	358	
Accounting (ACCT).....	358	
Adult Education (ADED).....	358	
Aerospace Engineering and Mechanics (AEM).....	359	
Aerospace Studies (AIR).....	360	
Afro-American Studies (AFRO).....	361	
Agricultural Industries and Marketing (AIM).....	363	
Agricultural, Food, and Environmental Education (AFEE).....	363	
Agronomy and Plant Genetics (AGRO).....	364	
Akkadian (AKKA).....	365	
American Indian Studies (AMIN).....	365	
American Sign Language (ASL).....	367	
American Studies (AMST).....	367	
Anatomy (ANAT).....	368	
Animal Science (ANSC).....	368	
Anthropology (ANTH).....	369	
Applied Business (ABUS).....	372	
Applied Economics (APEC).....	373	
Arabic (ARAB).....	374	
Aramaic (ARM).....	375	
Architecture (ARCH).....	375	
Art (ARTS).....	378	
Art History (ARTH).....	381	
Asian American Studies (AAS).....	383	
Asian Languages and Literatures (ALL).....	383	
Astronomy (AST).....	385	
Bio-based Products (BP).....	385	
Biochemistry (BioC).....	387	
Bioinformatics (BINF).....	388	
Biology (BIOL).....	388	
Biomedical Engineering (BMEN).....	389	
Biosystems and Agricultural Engineering (BAE).....	390	
Business Administration (BA).....	391	
Business and Industry Education (BIE).....	391	
Business Law (BLAW).....	392	
Center for Spirituality and Healing (CSPH).....	392	
Central Asian Studies (CAS).....	394	
Chemical Engineering (CHEN).....	394	
Chemistry (CHEM).....	395	
Chicano Studies (CHIC).....	397	
Child Psychology (CPSY).....	398	
Chinese (CHN).....	399	
Civil Engineering (CE).....	400	
Classical and Near Eastern Studies (CNES).....	401	
Classical Civilization (CLCV).....	403	
Classics (CLAS).....	404	
Clinical Laboratory Science (CLS).....	404	
College of Food, Agricultural & Natural Resource Sciences (CFAN).....	404	
College of Liberal Arts (CLA).....	405	
Communication Studies (COMM).....	405	
Comparative Literature (CL).....	407	
Comparative Studies in Discourse and Society (CSDS).....	407	
Computer Science (CSCI).....	407	
Construction Management (CMGT).....	410	
Coptic (COPT).....	411	
Cultural Studies and Comparative Literature (CSCL).....	411	
Curriculum and Instruction (CI).....	412	
Dance (DNCE).....	412	
Danish (DAN).....	414	
Dental Hygiene (DH).....	414	
Design Institute (DESI).....	416	
Design, Housing, and Apparel (DHA).....	416	
Dutch (DTCH).....	418	
East Asian Studies (EAS).....	419	
Ecology, Evolution, and Behavior (EEB).....	419	
Economics (ECON).....	421	
Education and Human Development (EDHD).....	424	
Educational Policy and Administration (EDPA).....	424	
Educational Psychology (EPSY).....	427	
Electrical and Computer Engineering (EE).....	430	
Emergency Health Services (EHS).....	433	
English as a Second Language (ESL).....	434	
English: Composition (ENGC).....	436	
English: Creative Writing (ENGW).....	437	
English: Literature (ENGL).....	437	
Entomology (ENT).....	441	
Environmental Sciences, Policy, and Management (ESPM).....	442

Work and Human Resource Education (WHRE).....	563	
Youth Development and Research (YOST).....	564	

PA 5601. Survey of Women, Law, and Public Policy in the United States. (3 cr. Prereq—Grad or #)

Gendered nature of public policy. Historical analysis of welfare, single motherhood, and protective legislation. How laws structure public policy. How courts are arenas for policy making. Emphasizes employment discrimination and reproductive rights. Differences among women. Intersection of oppression based on class/race/sexual orientation.

PA 5611. Feminist Economics. (2 cr. Prereq—[5021, grad student] or #)

Feminist philosophy, methodology, and economic practice. Feminist perspectives on development and the global economy, work/family. Heterodox traditions in economics.

PA 5690. Topics in Women and Public Policy. (1-3 cr [max 9 cr]. Prereq—Grad student or #)

Selected topics.

PA 5701. Science and State. (3 cr. Prereq—Grad or #)

Relationship between science and contemporary society. Nature of science: its values, processes, and ways of knowing. How science has influenced U.S. political institutions and political/judicial processes. Issues in current debate over U.S. science policy.

PA 5711. Science, Technology, and International Affairs. (3 cr. Prereq—Grad student or #)

Effect of science/technology on relations among nations in such matters as autonomy, national security, economic strength, environment, cultural identity, and international cooperation. Negotiating international agreements with S&T implications.

PA 5721. Energy and Environmental Policy. (3 cr. Prereq—Grad or #)

Impact of energy production/consumption choices on environmental quality, sustainable development, and other economic/social goals. Emphasizes public policy choices for energy/environment, linkages between them.

PA 5722. Environmental and Resource Economics Policy. (3 cr. Prereq—[Intermediate microeconomics, intermediate policy analysis, grad student] or #)

Public policy associated with natural resource use and environmental protection. Develops/applies economic concepts/methodologies/policy mechanisms. Principles of environmental/resource economics. Issues related to renewable/nonrenewable resources and environmental pollution. Focuses on scientific/political aspects of policy.

PA 5790. Topics in Science, Technology, and Environmental Policy. (1-3 cr [max 9 cr]. Prereq—Grad or #)

Selected topics.

PA 5801. Global Public Policy. (3 cr. Prereq—Grad student or #)

Creation of rules, norms, and institutions to regulate global activities. Policy making, from exclusive domain of state to including various nonstate actors. How global policy making regulates interstate, national, and transnational activities. Creation/enforcement of global rules. Applications to international security, political economy, and other topics.

PA 5812. Open Economy Models: An Assessment. (3 cr. Prereq—[Intermediate macroeconomics, trade theory, grad student] or #)

Open economics, implications for policy making/implementation. Issues at level of international/domestic economies.

PA 5890. Topics in Foreign Policy and International Affairs. (1-5 cr [max 9 cr]. Prereq—Grad student or #)

Selected topics.

PA 5900. Computer Applications in Public Affairs (Summer). (.5 cr [max 1 cr]; S-N only. Prereq—#)

Introduction to basic computer systems/applications in public affairs practice (e.g., MS Windows, MS Word). Offered summer.

PA 5901. Computer Applications in Public Affairs. (.5-3 cr [max 6 cr]; S-N only. Prereq—#)

Introduction to computer systems/applications in public affairs practice.

PA 5902. Computer Applications in Public Affairs. (.5-3 cr [max 6 cr]; S-N only)

Introduction to computer systems/applications in public affairs practice.

PA 5903. Introduction to Computers and Applications at the Humphrey Institute. (2 cr; S-N only. Prereq—International HHH fellow)

Computers/applications. Basic skills. Software such as MS Word, Excel, PowerPoint, Access. Using Internet, e-mail, search engines (for research), HTML (through Web page creation software).

PA 5910. Developing Your Public Service Career. (1 cr; S-N only. Prereq—Major in [public affairs or public policy or urban/regional planning or [science, technology/environmental policy]] or #)

Students investigate/analyze interests, skills, and abilities and combine them in a career plan. Students develop tools to demonstrate their abilities, document their experiences/knowledge, and explore public service career options.

PA 5912. Politics of Public Affairs and Civic Engagement. (3 cr. Prereq—Grad student or #)

Potential for public affairs professionals to be agents/architects of democracy in a radically changing, diverse, global landscape of governance.

PA 5920. Skills Workshop. (.5-3 cr [max 6 cr]. Prereq—Grad student or #)

Topics on various public policy/planning skills such as lobbying, grantwriting, and project management.

PA 5931. Role of the Media in Public Affairs. (3 cr. Prereq—Grad or #)

Historical/contemporary role of news media in defining/shaping public opinion/policy, primarily in the United States. Emphasizes critical research, professional skills in three forms of journalism: hard news coverage, investigative reporting, documentaries. Field experience, practice in governmental public relations.

PA 5941. Leadership for the Common Good. (4 cr. Prereq—Major in public affairs or #)

Personal, team, organizational, visionary, political, and ethical aspects of leadership. Emphasizes building/experiencing a learning community.

PA 5951. Global Commons Seminar. (3 cr [max 6 cr]; S-N only. Prereq—International Hubert H. Humphrey Fellows)

Meets specific needs of International Humphrey Fellows. Topics vary each year depending on the interests and needs of the fellows.

PA 5952. Global Commons Seminar II. (2 cr. Prereq—HHH International fellow)

Research/presentations related to professional development projects. Each week selected students assign readings, deliver a presentation on their professional development project, and distribute a summary of the talk. Presentations are developed in collaboration with at least one faculty specialist in the subject area.

PA 5990. Topics: Public Affairs—General Topics. (.5-3 cr [max 9 cr]. Prereq—Grad student or #)

General topics in public policy.

Public Health (PUBH)

School of Public Health

PUBH 1003. Alcohol and College Life. (1 cr. Prereq—Fr or soph or PSEO)

Facts about how alcohol affects college life. Personal prevention strategies. Maximizing student/campus safety. Web-based distance learning format starts before students arrive on campus.

PUBH 3000. Topics: Public Health. (.5-4 cr [max 80 cr])

New courses or topics of interest in public health.

PUBH 3001. Personal and Community Health. (2 cr)

Fundamental principles of health conservation and disease prevention.

PUBH 3003. Fundamentals of Alcohol and Drug Abuse.

(2 cr. \$PUBH 3004, PUBH 3005, PUBH 6003)

Scientific, sociocultural, and attitudinal aspects of alcohol and other drug abuse problems. Emphasizes incidence, high-risk populations, prevention, and intervention.

PUBH 3004. Basic Concepts in Personal and Community Health. (4 cr. \$PUBH 3003, PUBH 3005, PUBH 6003)

Scientific, sociocultural, and attitudinal aspects of communicable and degenerative diseases, environmental and occupational health hazards, and alcohol and drug problems. Role of education in health conservation, disease control, and drug abuse.

PUBH 3005. Fundamentals of Alcohol and Drug Abuse for Teacher Education. (1 cr. \$PUBH 3003, PUBH 3004, PUBH 6003. Prereq—Undergrad in agricultural educ or business/marketing educ or career/technical educ or foundations of educ or [kinesiology, pre-PE] or technology educ or music educ)

Scientific/socio-cultural aspects of alcohol/drug problems. Emphasizes role of education in health conservation and drug abuse prevention.

PUBH 3010. Public Health Approaches to HIV/AIDS. (2 cr. \$PUBH 6010. Prereq—College level biology course)

Primary, secondary, and tertiary prevention. Community responses to HIV/AIDS in Minnesota. Medical, social service, and political responses.

PUBH 3040. Dying and Death in Contemporary Society: Implications for Intervention. (2 cr [max 4 cr]. \$PUBH 6040. Prereq—Jr or sr or #)

Concepts, attitudes, ethics, and lifestyle management in relation to dying, death, grief, and bereavement. Emphasizes intervention/educational aspects for community health/helping professionals and educators.

PUBH 3050. Practicum in Peer Education I. (2 cr; A-F only. Prereq—[Upper div student, [demonstrated hth sci or hth ed interests], [3001 or \$3001 or 3004 or \$3004]], #)

Multiple factors that influence health. Through various health promotion strategies, students build upon or gain skills such as public speaking, needs assessments, program planning, interpersonal communication, and program evaluation.

PUBH 3052. Practicum in Peer Education II. (2 cr; A-F only. Prereq—[Upper div student, [demonstrated hth sci or hth ed interests], [3001 or \$3001 or 3004 or \$3004]], #)

Multiple factors that influence health. Through various health promotion strategies, students build upon or gain skills such as public speaking, needs assessments, program planning, interpersonal communication, and program evaluation.

PUBH 3093. Directed Study: Public Health. (1-4 cr [max 4 cr]. Prereq—#)

Directed study in selected public health problems or current issues.

PUBH 3102. Issues in Environmental and Occupational Health. (3 cr. \$PUBH 6102)

Scope of the field of environmental health. Concepts upon which environmental interventions are based. Consulting literature to identify appropriate interventions for community environmental health problems. Online course.

PUBH 3300. Topics: Clinical Research. (1-4 cr [max 8 cr]. Prereq—Jr or sr)

Topics regarding health research in humans.

PUBH 3390. Topics: Epidemiology. (1-4 cr [max 20 cr]. Prereq—Jr or sr)

New course offerings or topics.

PUBH 3639. Prevention: Theory, Practice, and Application in Public Health Services. (3 cr. Prereq—Jr or sr)

Current issues/controversies centered on prevention and health promotion. How they relate to health services and program implementation.

PUBH 3801. Health Economics and Policy. (3 cr. SAPEC 3801. Prereq-[Principles of microeconomics [APEC 1101 or ECON 1101], knowledge of plane geometry] or #) Economics of health care markets. Problems faced by consumers and health care services. Builds on basic microeconomic principles of supply and demand for health, health care, health insurance, and role of government. Theoretical/empirical models/applications.

PUBH 3810. Math Review for Health Economics. (1 cr; S-N only. Prereq-[Jr or sr or grad student], basic calculus, linear algebra) Calculus, linear algebra. Health economic models, equilibriums, matrix algebra, general function models, exponentials/logarithms. Lecture, working mathematical problems, discussion.

PUBH 3893. Directed Study: Health Services Research and Policy. (1-4 cr [max 20 cr]. Prereq-#)

PUBH 3905. Human Nutrition and Health. (2 cr. \$PUBH 6905. Prereq-Jr or sr or #) Topics of contemporary interest. Concepts/facts about science of human nutrition discussed in relation to personal/community nutrition problems/concerns. Applied introductory course with labs.

PUBH 5060. Smoking Intervention. (2 cr. Prereq-[Che or MCH or epi MPH] or epi grad student or #) Impact of smoking on U.S. public health. Review of research on onset/prevention. Factors maintaining dependence, cessation/intervention strategies. Public health campaigns. Public policies, second-hand smoking controversies. International issues.

Radiation Therapy (RTT)

College of Continuing Education

RTT 2001. Radiation Therapy: Radiation Exposure, Imaging, Safety, and Basic Care. (1 cr; A-F only. Prereq-BAS student in radiation therapy program, Δ) Introduction to technical aspects of radiologic sciences, standard patient care issues, and radiation oncology issues. Structure/function of x-ray equipment. Fundamental concepts of x-ray production, interaction, imaging, and safety. Physical/psychological aspects of patient care. Legal/ethical values in health care environment.

RTT 2002. Radiation Therapy: Radiation Exposure, Imaging, Safety, and Basic Care Lab. (1 cr; A-F only. Prereq-2001, BAS student in radiation therapy program, Δ) Fundamental topics of x-ray imaging and patient-care skills in a hands-on environment. Focuses on simulation of procedures and of clinical projects.

RTT 2999. Radiography Certification Credit. (1-40 cr [max 40 cr]) Evaluation of credits earned for certification.

RTT 3001. Radiation Therapy: Introduction to Radiation Therapy. (1 cr; A-F only) Basic overview of radiation therapy and its role in medicine.

RTT 3100. Radiation Therapy: Mathematics. (2 cr; A-F only) Basic arithmetic, algebra, geometry, and trigonometry.

RTT 3110. Radiation Therapy: Basic Physics. (2 cr; A-F only) Basic physics.

RTT 3120. Radiation Physics I. (3 cr; A-F only. Prereq-BAS-RTT student (UMMC)) Physics principles of physics related to ionizing radiation. Production, interactions. Types of radiation, their application to patient treatment. Radiation protection. Technical aspects of RT technology. Treatment modalities, patient set-up. Application re clinical dosimetry and treatment planning. Machine calibration. Quality assurance.

RTT 3121. Radiation Physics II. (3 cr; A-F only. Prereq-BAS-RTT admitted (UMMC)) Electron beam therapy, radiation protection, quality assurance, 3D CRT, beam geometry, beam quality/characteristics, whole body irradiation, advanced concepts, nuclear transformations.

RTT 3122. Radiation Therapy: Advanced Dosimetry. (2 cr; A-F only. Prereq-Δ) Modern radiation oncology treatment planning. Cross-sectional anatomy.

RTT 3130. Radiation Therapy: Principles of Oncology I. (3 cr; A-F only) General principles of radiation oncology. Imaging procedures, concept of disease, disease factors, disease management, treatment results.

RTT 3131. Radiation Therapy: Principles of Oncology II. (3 cr; A-F only) General principles of radiation oncology. Imaging procedures, concept of disease, disease factors, disease management, treatment results.

RTT 3132. Radiation Therapy: Medical Oncology. (2 cr; A-F only. Prereq-3131, Δ) Medical oncology principles. Basis for classification/action of cytotoxic drugs. Chemotherapy regimens, strategies, side effects, effect on radiotherapy patient.

RTT 3140. Radiation Therapy: Radiobiology. (2 cr; A-F only) Principles of cell response to radiation/hyperthermia.

RTT 3150. Radiation Therapy: Brachytherapy. (1 cr; A-F only) Principles of radioactivity, its medical uses.

RTT 3160. Radiation Therapy: Methods of Patient Care. (1 cr; A-F only) Concepts of radiotherapy patient care/management. Physical/psychological concerns.

RTT 3171. Radiation Therapy: Clinical Radiation I. (6 cr [max 7 cr]; A-F only) Hands-on clinical experience in a working environment.

RTT 3172. Radiation Therapy: Clinical Radiation II. (5 cr; A-F only) Hands-on clinical experience in a working environment.

RTT 3173. Radiation Therapy: Clinical Radiation III. (9 cr; A-F only) Hands-on clinical experience in a working environment.

RTT 3174. Radiation Therapy: Clinical Radiation IV. (8 cr; A-F only. Prereq-3171, 3172, 3173, Δ) Hands-on clinical experience in working environment. Students operate state-of-the-art radiotherapy equipment. Treatment decision-making, procedures, planning.

RTT 3501. Introduction to Radiation Therapy. (2 cr; A-F only. Prereq-BAS-RTT student) Role of radiation therapy as major modality to treat cancer. Procedures/equipment: simulation, dosimetry, treatment units, charting radiation doses. Introduction to cancer data, epidemiology, spread, staging, treatment. Psychosocial aspects of cancer diagnosis and of patient care interactions. Preparation for clinical rotations.

RTT 3521. Patient Care in Radiation Oncology. (2 cr; A-F only. Prereq-BAS RTT student) Skills to assess/manage patient side effects and psychological conditions resulting from radiation therapy. Concepts of patient care: vital sign determination, emergency management and CPR, medical-surgical asepsis, infection control, nutrition, tube management, patient examinations. Safety considerations for patient/staff.

RTT 3541. Pathology. (1 cr; A-F only. Prereq-BAS RTT student) Normal/abnormal development of human cells/tissues. Focuses on cell structure, function, and kinetics. Cellular adaptation/injury. Inflammation/repair. Hemodynamics and inherited disorders. Types of growth. Causative factors. Biological behavior of neoplastic disease.

RTT 3551. Radiation Oncology Physics. (3 cr. Prereq-BAS RTT student) General physics principles. Radiation properties, production/control, measurement of emission, attenuation, transmission. Treatment units. Structure of matter. Principles of radioactivity/decay. Sealed sources to place/implant in tumor volume. Low vs high dose rate brachytherapy. Permanent implant techniques.

RTT 3561. Cross-Sectional Anatomy. (2 cr; A-F only. Prereq-BAS RTT student) Human anatomy via cross-section and in relationship to radiation oncology. Identifying anatomic structures/interrelationships on successive transverse planes via diagrams and CT scan images. Anatomy lab visits explore gross human anatomy, anatomic relationships of organs. Body structure/function.

RTT 3581. Principles and Practices of Radiation Therapy I. (4 cr; A-F only. Prereq-BAS RTT student) Introduction to management/treatment of oncology patient. Histology, etiology, anatomy, presenting symptoms, diagnosis, staging, treatment regimens. Simulation procedures, patient positioning/immobilization, planning requirements, treatment techniques, radiation record keeping, managing side effects. Labs in simulator.

RTT 3596. Clinical Practicum I. (3 cr; A-F only. Prereq-BAS RTT student) Introduction to clinical practice of a radiation therapist. Under direct supervision students observe/assist in patient radiation treatments and simulation procedures. Technical skills. Cancer care team.

RTT 3601. Clinical Quality Assurance and Computer Applications. (1 cr; A-F only. Prereq-BAS RTT student) Quality assurance/management principles. Methods/frequency/limits on patient treatment records, linear accelerators, simulator equipment. National/state regulations. Radiation oncology computer uses/applications such as digital imaging, tomography, picture archiving, portal/3-D imaging, treatment verification/planning.

RTT 3696. Clinical Practicum II. (3 cr; A-F only. Prereq-3596, RTT BAS student) Initial application/integration of principles of radiation therapy practice into clinical setting. Students participate in patient care procedures and perform simple/intermediate-level clinical competency exams.

RTT 3701. Advanced Radiobiology and Radiation Protection. (3 cr; A-F only. Prereq-RTT BAS student) Principles of radiobiology, radiation protection, and safety in radiation oncology. Physiological interactions: cellular, holistic. Tolerance dose, time-dose relationships, fractionation schemes re clinical practice. Radiation health/safety requirements of regulatory/accreditation agencies. Therapist responsibilities.

RTT 3996. Practicum. (1-2 cr [max 2 cr]; A-F only. Prereq-BAS RTT student, Δ) Supervised practicum work in radiation therapy setting.

RTT 3999. Radiation Therapy Certification Credit. (1-40 cr [max 40 cr]) Evaluation of credits earned for certification.

RTT 4511. Dosimetry and Treatment Planning. (4 cr; A-F only. Prereq-3551, RTT BAS student) Basic concepts, Isodose charts/distributions, treatment dose calculations, irregular fields, beam weighting, dose limiting structures, selection of optimal treatment field design and other pertinent dosimetry principles. Emerging technologies, their impact on treatment planning.

RTT 4581. Principles and Practices of Radiation Therapy II. (4 cr; A-F only. Prereq-3581, BAS RTT student) Advanced principles of applying virtual simulations, three dimensional planning, conformal treatments, including intensity modulated radiation therapy. Natural history, diagnosis/management of cancer disease sites. Technical issues relating to simulation, treatment techniques, electronic record keeping.

RTT 4596. Clinical Practicum III. (6 cr; A-F only. Prereq–3596, 3696)

Application/integration of principles of radiation therapy practice in clinical setting. Patient care procedures. Intermediate-level clinical competency exams: methodology behind treatment technique; critical thinking skills.

RTT 4601. Project. (1 cr; A-F only. Prereq–3696, BAS RTT student)

Guided independent study project. Students research a topic of their choice and present their paper to faculty/students. Students are encouraged to submit paper for publication. Faculty provide guidance/input into development of project.

RTT 4696. Clinical Practicum IV. (3 cr; A-F only. Prereq–3596, 3696, 4596)

Practice of clinical competencies, completion of required advanced level clinical competency exams: methodology behind treatment technique; critical thinking. Students rotate through dosimetry and participate in radiation treatment planning.

RTT 4796. Clinical Practicum V. (3 cr; A-F only. Prereq–3596, 3696, 4596, 4696, BAS RTT student)

Final rotation. Students demonstrate full comprehension of all radiation treatment/simulation procedures. Problem solving. Integration of dosimetric changes in a treatment. Participation in advanced level procedures. Completion of remaining clinical competency exams.

RTT 5281. Scientific Foundations. (3 cr; A-F only. \$PT 6281. Prereq–Registered rehab science or PT student)

Recreation Resource Management (RRM)

Department of Forest Resources

College of Food, Agricultural and Natural Resource Sciences

RRM 1001. Orientation and Information Systems. (1 cr; A-F only)

Course planning for RRM majors, careers, liberal education requirements, internships, summer jobs. Mentoring/utilizing alumni contacts. Technical tools in the workplace, lab equipment, software, getting around GUIs, navigating the Internet, preparing documents. Making spreadsheet calculations. Using Lumina and periodical indexes.

RRM 1901. Freshman Seminar. (1 cr. Prereq–Freshman)

In-depth study of issues/topics related to natural resources and the environment. Topics vary each semester.

RRM 1905. Freshman Seminar. (1–3 cr [max 3 cr]. Prereq–Freshman)

In-depth study of issues/topics related to natural resources and the environment. Topics vary each semester.

RRM 3101. Nature and Heritage Based Tourism. (3 cr; A-F only. \$RRM 5101)

Interaction of resource based tourism with cultural/natural environments. Impacts of tourism on environment.

RRM 3201. Introduction to Travel and Tourism. (3 cr. \$RRM 5201)

Travel/tourism is one of the world's largest industries. Course introduces the nature, structure and complexity of the industry. Begins with overview of travel/tourism definition, evolution of travel/tourism, and magnitude globally. Examine types and functions of various sectors, tourism distribution system and role of various stakeholders in creation/delivery of tourism. Explore motivations for travel as means of understanding demand for tourism.

RRM 4200H. Honors Seminar. (1 cr; A-F only. Prereq–RRM upper div honors, #)

Current topics presented by faculty/students. Lectures, discussions.

RRM 4232W. Managing Recreational Lands. (4 cr; A-F only. \$RRM 5232)

Recreation management tools from a public agency perspective. Social carrying capacity, recreation opportunity spectrum, limits of acceptable change, benefits based management, visitor experience/resource protection. Various projects. Group project to develop a management plan.

RRM 4293. Directed Study. (1–5 cr [max 12 cr]. Prereq–#)

Students select/conduct a study of or project on a topic of personal interest in consultation with faculty member. Documented by initial proposal and reports of accomplishment.

RRM 4801H. Honors Research. (2 cr; A-F only. Prereq–RRM upper div honors or #)

First semester of independent research project supervised by faculty member.

RRM 4802H. Honors Research. (2 cr; A-F only. Prereq–RRM upper div honors, #)

Honors thesis. Oral report.

RRM 5101. Nature and Heritage Based Tourism. (3 cr; A-F only. \$RRM 3101. Prereq–Grad student or #)

Interaction of resource based tourism with cultural/natural environments. Impacts of tourism on environment.

RRM 5201. Introduction to Travel and Tourism. (3 cr. \$RRM 3201. Prereq–Grad student or #)

Nature, structure and complexity of tourism industry. Overview of travel/tourism: definition, evolution, magnitude globally. Types/functions of various sectors, tourism distribution system, role of various stakeholders in creation/delivery of tourism. Motivations for travel as means of understanding demand for tourism.

RRM 5232. Managing Recreational Lands. (4 cr; A-F only. \$RRM 4232W. Prereq–Grad student or #)

Recreation management tools from a public agency perspective. Social carrying capacity, recreation opportunity spectrum, limits of acceptable change, benefits based management, visitor experience/resource protection. Various projects. Group project to develop a management plan.

RRM 5259. Visitor Behavior Analysis. (3 cr; A-F only. Prereq–RRM major or ENR major or grad student or #)

Application of social science theory/methods to recreation and resource-based tourism visitor behavior. Culture and cultural identity. Influences on behavior. Mitigating environmental impacts. Theory/analysis of surveys, observation, and content. Implications for sustainable resource management.

Recreation, Park, and Leisure Studies (REC)

School of Kinesiology

College of Education and Human Development

REC 1501. Orientation to Leisure and Recreation. (3 cr)

Introduction to the history and development of the parks and recreation movement; sociological, economical, psychological, and political considerations of leisure and recreation in contemporary society; interrelationship between professional and service organizations; orientation to the professional field.

REC 2151. Outdoor and Camp Leadership. (3 cr; A-F only)

Practical and theoretical study of leading groups in outdoor and camp settings. Outdoor leadership skills, expedition planning, emergency procedures and risk management, minimum impact approaches, and working with youth in a camp environment.

REC 3281. Research and Evaluation in Recreation, Park, and Leisure Studies. (4 cr; A-F only. Prereq–1501 or #)

Basic techniques; emphasis on social research and evaluation methodology; survey of present status of recreation and park research and evaluation.

REC 3541W. Recreation Programming. (3 cr; A-F only. Prereq–1501 or #, Rec major)

Various methods, skills, materials needed for planning, developing, implementing, evaluating professional recreation programs for diverse populations in various settings.

REC 3551. Administration and Finance of Leisure Services. (4 cr; A-F only. Prereq–3541 or #, Rec major)

Principles and practices of financing and managing leisure service agencies in the public and private sector.

REC 3601W. Leisure and Human Development. (3 cr)

Exploration of relevant issues concerning many roles of leisure in human development from influence on healthy fetal development to viability until death. Examination of diverse, multicultural perspectives on leisure, its centrality throughout history and influence on how civilizations define themselves.

REC 3796. Senior Internship in Recreation, Park, and Leisure Studies. (1–12 cr [max 15 cr]; S-N only. Prereq–Rec sr, #)

Supervised field experience for pre-professional students in selected agencies.

REC 3993. Directed Study in Recreation, Park, and Leisure Studies. (1–9 cr [max 24 cr]. Prereq–Rec major, #)

Scholarly projects (e.g., library or field research) or demonstration projects.

REC 5101. Foundations of Recreation. (3 cr; A-F only. Prereq–MEd or grad student or #)

Investigation of the rational, sociological, psychological, and philosophical foundations of the recreational use of leisure in contemporary society. Includes a survey of leisure services.

REC 5111. Sports Facilities. (3 cr; A-F only. \$KIN 5111. Prereq–Kin or Rec major or #)

Steps in planning and building facilities for athletics, physical education, and sport for college, professional, and public use.

REC 5115. Event Management in Sport. (3 cr; A-F only. Prereq–\$: KIN 5115; Grad student, #)

Techniques/principles of planning, funding, and managing sport events. Collegiate championships, non-profit events/benefits, professional events.

REC 5161. Recreation Land Policy. (3 cr; A-F only. Prereq–1501 or 5101 or #)

Historical development of recreational land policy in the United States and related contemporary issues in policy, management, interpretation, and research.

REC 5191. Commercial Recreation and Tourism. (3 cr; A-F only. Prereq–3551 or #)

Scope and development of profit-oriented recreation agencies, including an emphasis on the tourism industry.

REC 5211. Introduction to Therapeutic Recreation. (3 cr; A-F only. Prereq–1501 or ¶5101, rec major or #)

Purposeful intervention; roles of specialist/recreation therapists in meeting cognitive, physical, emotional, social needs of people with disabling conditions through recreation services; roles of specialist/recreation therapists changing societal attitudes toward illness and disability and the self-concepts of individuals with impairments.

REC 5215. Assess and Monitor Patient/Client Functioning in Recreation Therapy. (3 cr. Prereq–TR major or academic health professional or #; majors A-F only)

Selecting appropriate techniques/tools, analysis of individual p/c supports/deficits. Monitoring/recording progress in RT and in collaborative services: standard notes; team meetings; on-line reporting for quality assurance, referral, augmentation/termination of services.

REC 5221W. Comprehensive Therapeutic Recreation Services Development and Management. (4 cr. Prereq–5211 or #, rec major)

Guided development of written plans including development of protocols and critical pathways, intervention programs/activities, individual treatment plans and standards for appropriate placement of individuals in group intervention, and management of patient/client service delivery, record keeping, and administrative responsibilities.

REC 5231. Therapeutic Recreation and Diagnostic Groups. (3 cr; A-F only. Prereq–5211 or #)

Definitions, philosophies, methodologies regarding therapeutic recreation services for persons in diagnostic groups of cognitive, physical, sensory, communication, and psychiatric impairments/disabilities. Lectures, group discussion. Presentations by parents, professionals, and self-advocates. Clinical or community practicum assignment.

REC 5241. Functional Intervention: Recreation Therapy in Geriatric Care. (3 cr; A-F only. Prereq–3541 or 5111 or #)

Role of leisure in maintenance of mental, physical, social-emotional health/functioning. Issues relative to prevention of impairment/disability. Rehabilitation, support of vital life involvement, effect on design/delivery of recreation services.

REC 5271. Community Leisure Services for Persons with Disabilities. (3 cr; A-F only. Prereq–1501, Rec major or #)

Exploration and application of concepts and techniques of normalization and least restrictive environment strategies to leisure service delivery in inclusive community settings for a range of individuals with disabilities.

REC 5288. Grant Writing in Human Services. (3 cr; A-F only)

Identify, develop, and procure financial assistance for programs in human services, including education, recreation, and social programs. Skills and strategies for preparing and evaluating competitive proposals for grant support through federal agencies and private foundations or corporations.

REC 5301. Wilderness and Adventure Education. (4 cr; A-F only)

Rationale for, methods in applying wilderness/adventure education programs in education, recreation, corporate, human service settings. Emphasizes adventure/wilderness program management.

REC 5311. Programming Outdoor and Environmental Education. (3 cr; A-F only)

Methods, materials, and settings for developing and conducting environmental and outdoor education programs.

REC 5371. Sport and Society. (3 cr; A-F only. \$KIN 5371. Prereq–[3126, grad student] or #)

Sport, sporting processes, social influences, systems, and structures that have effected and exist within/among societies, nations, and cultures. Issues concerning social differentiation. Social concerns such as violence and honesty.

REC 5421. Sport Finance. (3 cr; A-F only. \$KIN 5421. Prereq–Grad student or #)

Introduction to financial analysis in sport. Cash flow statements, budgeting issues, traditional/innovative revenue producing strategies available to sport organizations. Discussion, practical analysis of current market.

REC 5461. Foundations of Sport Management. (3 cr; A-F only. Prereq–[Rec or Kin] student or #)

Theories/techniques in administering/managing sport enterprises. Organizational theory/policy. Practical examples of sport management skills/strategies.

REC 5511. Women in Sport and Leisure. (3 cr; A-F only. \$KIN 5511)

Critically examines women's involvement in/contributions to sport, physical activity, and leisure.

REC 5601. Sport Management Ethics and Policy. (3 cr; A-F only. \$KIN 5601. Prereq–Grad student or #)

Ethical concepts that underpin or inform sport policies. Evaluating sport policies from a normative point of view. Selected sport policy issues are used to illustrate relevance of ethical considerations in policy development, ethical implications of sport policy.

REC 5631. Programming and Promotion in Sport. (3 cr; A-F only. \$KIN 5631. Prereq–Kin or Rec grad student or #)

Introduction to marketing concepts as they apply to sport industry. Consumer behavior, market research, marketing mix, corporate sponsorship, licensing concepts. Discussion, practical application.

REC 5701. Positive Youth Development Programming. (3 cr. Prereq–Upper div undergrad or grad student or #)

Youth development programming for out-of-school time. Philosophy/purpose of youth development programs. Principles/procedures for developing out-of-school time programs.

REC 5801. Legal Aspects of Sport and Recreation. (4 cr; A-F only. Prereq–3551 or 5461 or #)

Legal issues related to recreation, park, and sport programs/facilities with public/private sectors.

REC 5900. Special Topics: Contemporary Issues in Leisure Services. (1-12 cr [max 12 cr])

Contemporary issues emphasizing administrative and supervisory functions for recreation and allied professionals; individual offerings, to be determined by faculty, focus on special issues and professional groups.

REC 5981. Research Methodology in Kinesiology, Recreation, and Sport. (3 cr; A-F only. \$KIN 5981. Prereq–MEd or grad student or #)

Defines/reviews various types of research in exercise and sport science, physical education, and recreation studies. Qualitative research, field studies, and introspective research strategies as alternatives to traditional scientific paradigm.

REC 5992. Readings: Recreation. (1-3 cr [max 9 cr]. Prereq–REC major, #)

Independent study under tutorial guidance by faculty member on particular topic(s) not covered in regular coursework.

REC 5995. Problems in Recreation, Park, and Leisure Studies. (1-12 cr [max 30 cr]. Prereq–[MEd or grad student], #)

Independent study of leisure service programs, systems, facilities, or policies. Focuses on conduct of recreation programs. Scholarly projects (e.g., library or field research) or demonstration projects.

Religions in Antiquity (RELA)

Department of Classical and Near Eastern Studies

College of Liberal Arts

RELA 1001. Introduction to the Religions of the World. (3 cr)

An introduction to the major religions of the world and the academic study of religion. Hinduism, Buddhism, Judaism, Christianity, Islam, and some pre-Christian religions of Antiquity.

RELA 1031. Introduction to the Religions of South Asia. (3 cr)

Historical study of the three traditional religions of India: Hinduism, Buddhism, and Jainism through literature, art, and film. General topics include myth, yoga, mysticism, and the religious order of society.

RELA 1034. Introduction to Jewish History and Civilization. (3 cr. \$JWST 1034, JWST 3034, RELA 3034)

Jewish history, society, and culture from Second Temple period (5th century BCE) to modern era as illuminated by literature, philosophy, art, film, music, religious law/custom, and artifacts of daily life. Emphasizes political, social, and cultural contexts that shaped development of Jewish ideas, practices, and institutions.

RELA 1035. Introduction to Christianity. (3 cr; A-F only. \$RELA 3035)

Christian traditions throughout history. Emphasizes recurrent themes: reform/renewal, relations between church/society, varieties of spiritual formation, elusive pursuit of Christian unity.

RELA 1082. Jesus in History. (3 cr. \$CNES 1082)

Jesus of Nazareth in his original setting. Modern approaches to the historical Jesus. Perspectives and needs of early gospel writers and effects of portrayals of Jesus. Shifting representations of Jesus in new historical and cultural situations. Meets with ReLA 1182.

RELA 1083. Jesus the Jew. (3 cr. \$CLAS 1083, JWST 1083, JWST 3083, RELA 3083)

Historic figure of Jesus within context of first century Palestinian Judaism. Main groups/institutions of Judaism at time of Jesus. Rabbinic literature/traditions. Works describing Jesus. Life/sayings (synoptic gospels). Jesus and the Law. Messianic ideals/expectations, problem of religious authority. Positions regarding Rome, its authority. James and the Jerusalem Church.

RELA 1905. Freshman Seminar. (3 cr)

Topics specified in *Class Schedule*.

RELA 3013W. Biblical Law and Jewish Ethics. (3 cr. \$JWST 3013W, JWST 5013, RELA 5013)

Significance of religious law in Judaism. Babylonian background of biblical law. Biblical creation of the person as a legal category. Rabbinic transformations of biblical norms. Covenant in Christianity/Islam. Contemporary Jewish literature/philosophy.

RELA 3034. Introduction to Jewish History and Civilization. (3 cr. \$JWST 1034, JWST 3034, RELA 1034)

Jewish history, society, and culture from Second Temple period (5th century BCE) to modern era as illuminated by literature, philosophy, art, film, music, religious law/custom, and artifacts of daily life. Emphasizes political, social, and cultural contexts that shaped development of Jewish ideas, practices, and institutions.

RELA 3035. Introduction to Christianity. (3 cr; A-F only. \$RELA 1035. Prereq–\$1035)

Christian traditions throughout history. Emphasizes recurrent themes: reform/renewal, relations between church/society, varieties of spiritual formation, elusive pursuit of Christian unity.

RELA 3036. Islam: Religion and Culture/Islam. (3 cr. \$ARAB 3036, HIST 3493, HUM 3036)

Religion of Islam, faith, practices, sectarian splintering, expansion outside original home to status of world religion, institutions, status in world societies - Asia, Europe, Americas.

RELA 3072. The New Testament. (3 cr. \$CNES 3072, CNES 5072, RELA 5072)

Early Jesus movement in its cultural and historical setting: origins in Judaism; traditions about Jesus; Paul, his controversies and interpreters; questions of authority, religious practice, and structure; emergence of the canon of scripture. Contemporary methods of New Testament study.

RELA 3072H. Honors Course: The New Testament. (4 cr. Prereq–Honors)

Early Jesus movement in its cultural/historical setting: origins in Judaism; traditions about Jesus; Paul, his controversies/interpreters; questions of authority, religious practice, structure; emergence of canon. Contemporary methods of New Testament study. Meets with 3072. Additional weekly recitation section.

RELA 3073. Roman Religion and Early Christianity. (3 cr)

Etruscan, Republican religion. Appeal of non-Roman cults. Ruler worship. Christians in Asia Minor, Egypt, and the West. Popular piety, Christian and non-Christian. Rabbinic Judaism. Varieties of Christianity in 2nd and 3rd centuries. Influence of Greco-Roman culture on emerging church. Constantine and Julian.

RELA 3083. Jesus the Jew. (3 cr. §CLAS 1083, JWST 1083, JWST 3083, RELA 1083)

Historic figure of Jesus within context of first century Palestinian Judaism. Main groups/institutions of Judaism at time of Jesus. Rabbinic literature/traditions. Works describing Jesus' life/sayings (synoptic gospels). Jesus and the Law, Messianic ideals/expectations, problem of religious authority. Positions regarding Rome, its authority. James and the Jerusalem Church.

RELA 3112. Jewish Mysticism, Magic, and Kabbalah. (3 cr; A-F only. §JWST 3112, JWST 5112, RELA 5112)

Mystical traditions from early rabbinic traditions to Zohar (Book of Splendor) in 13th century. Literature of heavenly ascent (Hekhalot, Merkavah), Book of Creation (Sefer Yetzirah), precursors of Zohar. the Bahir. Schools of Provence, Gerona, and Zohar. Tension between legal/mystical aspects, magical theurgic techniques, evolution of doctrine of Sefirot, mystical interpretation of Scripture, erotic dimension.

RELA 3115. Mishnah and Midrash in Translation. (3 cr. §JWST 3115, JWST 5115, RELA 5115)

Jewish law studied as a mirror of society and as a way to actualize its value. Consideration of original socioreligious contexts and current applications. Selections include biblical interpretations addressing moral, theological, legal, and literary problems.

RELA 3201. The Bible: Context and Interpretation. (3 cr. §CNES 1201, CNES 3201, JWST 1201, JWST 3201)

Survey of literary and historical narrative texts from the Pentateuch, Joshua, Judges, Samuel, Kings, Ruth. Study of the art of Biblical narrative and major themes of Biblical stories. Comparison with other Ancient Near Eastern Literatures. Literary conventions of the biblical writers.

RELA 3202. Prophecy in Ancient Israel. (3 cr. §ANE 1002, CNES 3202. Prereq—Knowledge of Hebrew not required)

Survey of Israelite prophets, with emphasis on Amos, Hosea, Isaiah, Jeremiah, Ezekiel and Second Isaiah. Prophetic contributions to Israelite religion. Personality of prophets. Politics and prophetic reaction. Textual analysis and Biblical scholarship. Prophecy viewed cross-culturally

RELA 3203. The Bible: Wisdom, Poetry, and Apocalyptic. (3 cr. §ANE 1003, CNES 3203. Prereq—Knowledge of Hebrew not required)

Survey of books of Psalms, Proverbs, Job, Song of Songs, Lamentations, Ecclesiastes (Qoheleth). Characteristics of biblical poetry. Conceptions of Israelite wisdom writing. Traits of early Jewish apocalyptic writing.

RELA 3251. Modern Study of the Old Testament. (3 cr. §ANE 3251. Prereq—No knowledge of Hebrew required)

Methods used in studying the Old Testament, including textual criticism, the anthropological approach, the sociological approach, the history of religion, and the use of archaeology in interpreting the text.

RELA 3501. Ancient Israel: The Origins of Israel in Biblical Traditions. (3 cr. §ANE 3501. Prereq—Hebrew not required)

Foundation of the Hebrew people. Traditions of patriarchal period, development of Israelite religious/legal institution. Ancient Near Eastern context of Israel's origins.

RELA 3502. Ancient Israel: From Conquest to Exile.

(3 cr. §CNES 3502, CNES 5502, HIST 3502. Prereq—Hebrew not required; 3501 recommended)

Israelite history in context of what is known from Egyptian, Canaanite, Mesopotamian sources. Focuses on issues raised by archaeological data related to Israelite conquest of Canaan.

RELA 3503. History and Development of Israelite Religion I. (3 cr. §ANE 3503, ANE 5503, CNES 3503, CNES 5503, RELA 5503. Prereq—No knowledge of Hebrew required)

Survey of the evolution of Israelite religion. Cultic practices, law and religion, prophecy, religion and historiography. Relationship to surrounding religious systems.

RELA 3504. Development of Israelite Religion II. (3 cr. §ANE 3504, ANE 5504, RELA 5504)

Ancient Judaism from the Persian restoration (520 BCE) to Roman times (second century CE). Religious, cultural, and historical developments are examined to understand Jewish life, work, and worship under a succession of foreign empires: Persian, Greek, and Roman.

RELA 3535. Death and the Afterlife in the Ancient World. (3 cr. §CNES 3535, CNES 5535, RELA 5535)

Beliefs, attitudes, and behaviors related to death and afterlife found in cultures of ancient Mediterranean and Near East. Literature, funerary art/epitaphs. Archaeological evidence for burial practices and care of dead.

RELA 3993. Directed Studies. (2-4 cr [max 10 cr])

Student works with faculty on a subject decided upon by both.

RELA 5013. Biblical Law and Jewish Ethics. (3 cr. §JWST 3013W, JWST 5013, RELA 3013W)

Significance of religious law in Judaism. Babylonian background of biblical law. Biblical creation of the person as a legal category. Rabbinic transformations of biblical norms. Covenant in Christianity/Islam. Contemporary Jewish literature/philosophy.

RELA 5070. Topics in Ancient Religion. (3 cr [max 18 cr]. §CNES 5070. Prereq—RELA 3071 or 3072 or 3073 or 5071 or 5073 or any RelS course or #)

Study of a specific aspect of religion in Classical and Near Eastern antiquity such as healing cults, magic and divination, Gnosticism, or prophecy and authority. Topics specified in *Class Schedule*.

RELA 5071. Greek and Hellenistic Religions. (3 cr. §CNES 3071, CNES 5071, RELA 3071. Prereq—#)

Greek religion from the Bronze Age to Hellenistic times. Sources include literature, art, and archaeology. Homer and Olympian deities; ritual performance; prayer and sacrifice; temple architecture; death and the afterlife; mystery cults; philosophical religion; Near Eastern salvation religions. Meets with 3071.

RELA 5072. The New Testament. (3 cr. §CNES 3072, CNES 5072, RELA 3072, RELA 5072)

Early Jesus movement in its cultural, historical setting. Origins in Judaism; Jesus traditions. Apostle Paul, his controversies and interpreters. Questions of authority, religious practice, structure; emergence of the canon. Contemporary methods of New Testament study; biblical writings as history and narrative. Meets with 3072.

RELA 5073. Roman Religion and Early Christianity. (3 cr. §CNES 5073)

Etruscan, Republican religion. Appeal of non-Roman cults. Ruler worship. Christians in Asia Minor, Egypt, and the West. Popular piety, Christian and non-Christian. Rabbinic Judaism. Varieties of Christianity in 2nd and 3rd centuries. Influence of Greco-Roman culture on emerging church. Constantine and Julian.

RELA 5080. New Testament Proseminar. (3 cr [max 18 cr]. §CNES 5080. Prereq—RELA 1082 or 3072 or equiv)

Discussion seminar. Study of some specific aspect of the New Testament and related literature. Topics specified in *Class Schedule*.

RELA 5112. Jewish Mysticism, Magic, and Kabbalah. (3 cr; A-F only. §JWST 3112, JWST 5112, RELA 3112)

Mystical traditions from early rabbinic traditions to Zohar (Book of Splendor) in 13th century. Literature of heavenly ascent (Hekhalot, Merkavah), Book of Creation (Sefer Yetzirah), precursors of Zohar. the Bahir. Schools of Provence, Gerona, and Zohar. Tension between legal/mystical aspects, magical theurgic techniques, evolution of doctrine of Sefirot, mystical interpretation of Scripture, erotic dimension.

RELA 5115. Mishnah and Midrash in Translation. (3 cr. §JWST 3115, JWST 5115, RELA 3115)

Jewish law studies as mirror of society and as way to actualize its value. Original socioreligious contexts, current applications. Selections include biblical interpretations addressing moral, theological, legal, and literary problems.

RELA 5251. Archaeology of Herodian Israel. (3 cr; A-F only. §CNES 5251, RELS 5251. Prereq—One course in [archaeology or ancient history] or grad student)

Archaeological sites in Israel dating to era of Herod the Great (37-4BC). Palaces, religious edifices, and remains from Jewish/gentile settlements throughout the kingdom. Course readings consist of contemporary literary sources and excavation reports.

RELA 5503. History and Development of Israelite Religion I. (3 cr. §ANE 3503, ANE 5503, CNES 3503, CNES 5503, RELA 3503)

Survey of the evolution of Israelite religion. Cultic practices, law and religion, prophecy, religion and historiography. Relationship to surrounding religious systems.

RELA 5504. Development of Israelite Religion II. (3 cr. §ANE 3504, ANE 5504, RELA 3504)

Ancient Judaism from the Persian restoration (520 B.C.E.) to Roman times (2nd century C.E.). Religious, cultural, and historical developments are examined to understand Jewish life, work, and worship under a succession of foreign empires: Persian, Greek, Roman.

RELA 5513. Scripture and Interpretation. (3 cr; A-F only. §JWST 5513)

Idea of divine revelation, its impact upon religion/literature. How history of Bible's creation, transmission, and interpretation helps us think critically about role of idea of revelation in history of religious traditions. What is revelation? How does belief that a text is revealed affect the way it is read within the community for which it constitutes revelation?

RELA 5521. Theory and Method in the Study of Religion. (3 cr. Prereq—Sr or grad student or #)

Fundamental theoretical/methodological issues pertaining to academic study of religion. Influential modern theories of origin, character, and function of religion as a human phenomenon, including psychological, sociological, anthropological, and phenomenological perspectives.

RELA 5535. Death and the Afterlife in the Ancient World. (3 cr. §CNES 3535, CNES 5535, RELA 3535)

Beliefs, attitudes, and behaviors related to death and afterlife found in cultures of ancient Mediterranean and Near East. Literature, funerary art/epitaphs. Archaeological evidence for burial practices and care of dead.

RELA 5993. Directed Studies. (2-4 cr [max 10 cr])
Guided individual reading or study.

Religious Studies (RELS)

Department of Classical and Near Eastern Studies

College of Liberal Arts

RELS 3070. Post-Holocaust Jewish and Christian Theology. (1-4 cr [max 4 cr]; A-F only)

Topics specified in *Class Schedule* and *Course Guide*.

RELS 3521W. History of the Holocaust. (3 cr. §HIST 3727W, JWST 3521W)

Study of the 1933-1945 extermination of six million Jews and others by Nazi Germany on the basis of race. European anti-Semitism, implications of social Darwinism and race theory, perpetrators, victims, onlookers, resistance, and theological responses of Jews and Christians.

RELS 5111. Problems in Historiography and Representation of the Holocaust. (3 cr; Prereq—3521 or 3541 or JWST 3521 or #)
Issues connected with Holocaust. Inclusiveness of other groups, Holocaust versus “Shoah,” historiographical conflicts about perpetrators. Problems of representation in literature/art. Problems of narrative theology after Auschwitz.

RELS 5251. Archaeology of Herodian Israel. (3 cr; A-F only. §CNES 5251, RELA 5251. Prereq—One course in [archaeology or ancient history] or grad student)
Archaeological sites in Israel dating to era of Herod the Great (37–4BC). Palaces, religious edifices, and remains from Jewish/gentile settlements throughout the kingdom. Course readings consist of contemporary literary sources and excavation reports.

REIS 5993. Directed Studies. (1–4 cr [max 24 cr])
Directed studies in religion. Credits may vary from term to term to a limit of nine.

Respiratory Care (RC)

College of Continuing Education

RC 2011. Foundations for Clinical Practice of Respiratory Care. (2 cr; A-F only. Prereq—BAS respiratory care major)
Respiratory care profession. Clinical roles, responsibilities, career options. Subspecialties, professional settings. Preparation for clinical practice in respiratory care within a hospital setting. Lab sessions, discussion, simulation, interviews, role-playing.

RC 2021. Patient Care Techniques. (2 cr; A-F only. Prereq—BAS respiratory care major)
Fundamental practice, attitudes, and competencies for all health care providers, including respiratory care. Communication skills, infection control, vital signs, patient assessment. General care techniques of respiratory/nursing personnel. Transfer of patients. Specialized care, including immobilized patients (e.g., mechanical ventilation).

RC 3101. Respiratory Care Modalities and Equipment I. (4 cr; A-F only. Prereq—2210 or equivalent, BAS RC student)
Perform non-invasive monitoring and therapeutic procedures. Medical gas therapy, humidity/aerosol therapy, bronchial drainage, volume expansion therapy. Common aerosol medications. Procedures in context of national practice guidelines: rationale, limitations, hazards/complications. Issues of asepsis and of adaptation to patient needs.

RC 3102. Respiratory Care Modalities and Equipment II. (4 cr; A-F only. Prereq—3101)
Implementation/operation of invasive monitoring and life-support technology for the critically ill. Airway management. Hemodynamic/respiratory monitoring. Mechanical ventilation. Completion of American Heart Association course in advanced cardiac life support (ACLS). Simulated patient care in emergency room or intensive care units.

RC 3201. Cardiopulmonary Patient Assessment. (4 cr; A-F only. Prereq—[2210 or equiv], BAS RC student)
Patient assessment skills to interpret patient data. Chart record, interview, physical exam, medical lab data, pulmonary function reports, electrocardiogram, hemodynamic record, ventilator flow sheet, radiographic imaging. Introduction to cardiopulmonary diseases. Lab emphasizes role playing, practice exams, and assessment.

RC 3301. Clinical Practice I. (3 cr; S-N only. Prereq—BAS respiratory care major)
Clinical rotations at Mayo Medical Center, Rochester. Nine intensive care units, operating room, emergency room, general floor care areas, pulmonary function labs, sleep disorders center, smoking cessation clinic, pulmonary rehabilitation program, home care, outpatient clinic. Supervised performance of procedures, diagnostic testing.

RC 3302. Clinical Practice II. (5 cr; S-N only. Prereq—3301, BAS respiratory care major)
Continued clinical rotations at Mayo Medical Center. Nine intensive care units, operating room, emergency room, general floor care areas, pulmonary function labs, sleep disorders center, smoking cessation clinic, pulmonary rehabilitation program, home care, outpatient clinic. Adult, perinatal, and pediatric critical resp care.

RC 3401. Seminar in Respiratory Care I: Case reports and Fundamentals of Research. (1 cr; A-F only. Prereq—2210)
Critical review of professional medical literature re scientific method and clear writing style. Patient cases for problem solving and critical thinking issues. Collaborative class research project leading to abstract submission. Weekly case conference (pulmonary/critical care medicine or combined critical care). Two-hour seminar.

RC 3402. Seminar in Respiratory Care II: Case reports and Fundamentals of Research. (1 cr; A-F only. Prereq—3401, BAS RC student)
Weekly conferences and seminar of significant respiratory care cases in professional medical literature. Case reviews from standpoint of scientific method and clear writing style. Problem solving, critical thinking strategies. Collaborative class research project leading to submission of abstract.

RC 3501. Advanced Cardiopulmonary Respiratory Physiology and Pathophysiology. (3 cr; A-F only. Prereq—3201, BAS RC student)
Physiology of cardiovascular/pulmonary systems. Adult, pediatric, and perinatal pulmonary and cardiac disorders. Emphasizes presenting assessment, lab evaluation, major pathology, pathophysiologic manifestations, and treatment. Lab observation/measurement of normal and simulated abnormal cardiopulmonary physiology.

RC 4111. Advanced Adult Respiratory Critical Care Techniques. (3 cr; A-F only. Prereq—3102, BAS RC student)
Providing respiratory care to critically ill adults. Emphasizes case examples of cardiopulmonary problems and therapeutic procedures using multi-organ system-wide patient approach. Advanced lab competencies in ventilator management. Critical care monitoring procedures, including hemodynamic monitoring.

RC 4201. Subspecialization in Respiratory Care: Advanced Perinatal and Pediatric Respiratory Care. (2 cr; A-F only. Prereq—3102, BAS RC student)
Role of perinatal/pediatrics specialist as defined by National Board for Respiratory Care (NBRC). Literature on mechanical ventilation, monitoring applied. Emphasizes evidence-based care. Case studies of strategies for extended mechanical ventilation or other forms of long-term support.

RC 4202. Subspecialization in Respiratory Care: Advanced Cardiopulmonary Diagnostics. (2 cr; A-F only. Prereq—3102, BAS RC student)
Preparation for role of advanced pulmonary function technologist and NBRC’s CPFT/PPFT board exams. Rationale and methods. Inert gas and body plethysmographic measurement of lung capacity. Diffusion studies. Bronchial provocation. Heart/lung function during maximal exercise. Cases/labs on interpreting results and quality control.

RC 4203. Subspecialization in Respiratory Care: Cardiopulmonary Rehabilitation, Disease Prevention, Case Mgmt. (2 cr; A-F only. Prereq—3102, BAS RC student)
Care for chronically ill patients with lung/heart disorders. Emphasizes respiratory care in the hospital, extended care, and the home. Clinical testing, exercise prescriptions, and practice guidelines for management. Case management and responsibilities unique to respiratory therapist. Preparation for role of certified asthma educator.

RC 4301. Seminar: Research Project and Publication. (2 cr; A-F only. Prereq—3102, BAS respiratory care major)
Students prepare a research project for submission, including assembling a poster, abstract, or manuscript of original research. Research mentors are assigned to allow guided independent study.

RC 4496. Subspecialty Clinical Practicum in Advanced Respiratory Care I. (3 cr; S-N only. Prereq—3302, BAS respiratory care major)
Competencies in areas of advanced-level respiratory care, including clinical subspecialties and related areas important to respiratory care practitioner. A rotation is eight weeks/120 hours of directed clinical experience at facilities within Mayo Health System and UM-affiliated institutions. Maximum two rotations per semester.

RC 4596. Subspecialty Clinical Practicum in Advanced Respiratory Care II. (3 cr; S-N only. Prereq—3302, BAS RC student)
Continued competencies in areas of advanced-level respiratory care, including clinical subspecialties and related areas important to respiratory care practitioner. A rotations is eight weeks/120 hours of directed clinical experience at facilities within Mayo Health System and UM-affiliated institutions. Maximum two rotations per semester.

RC 4993. Directed Study. (1–4 cr [max 4 cr]; A-F only. Prereq—Respiratory care major)
Independent project. Topic arranged with and supervised by respiratory care faculty.

Rhetoric (RHET)

Department of Rhetoric

College of Food, Agricultural and Natural Resource Sciences

RHET 1001. Introduction to Scientific and Technical Communication. (2 cr; A-F only)
Research origins/history. Defining technical communication in professional world. Focuses on audience, purpose, ethics, global communication, and collaboration. Journal articles, student/professional organizations, guest presentations, interviews. Career assessment inventories, in-class/electronic discussions, oral presentations, feasibility report.

RHET 1101. Writing to Inform, Convince, and Persuade. (4 cr; A-F only. §ENGC 1011, ENGC 1011H, ENGC 1012, ENGC 1012H, ENGC 1013, ENGC 1013H, ENGC 1014, ENGC 1014H, ENGC 1015, ENGC 1016, PSTL 1422, PSTL 1423, PSTL 1424)
Writing effectively in an academic setting. Emphasizes analyzing/creating logical arguments. Standards of clarity, cohesion, and correctness.

RHET 1152W. Writing on Issues of Science and Technology. (4 cr; A-F only. Prereq—Exemption from 1101 or equiv)
Ethical, social, and political challenges created by science/technology. Analyzes persuasion strategies through which experts, political decision-makers, and citizens meet these challenges. Bioscience controversies such as cloning, organ transplantation. Controversies over pollution, ozone depletion.

RHET 1223. Oral Presentations in Professional Settings. (3 cr; A-F only. §COMM 1101, COMM 1101H, PSTL 1461)
Techniques for analyzing an audience, determining a purpose, developing an argument, and delivering a presentation. Emphasizes using presentations, basic communication theories.

RHET 1311. The Family in American Experience. (3 cr)
The American family as portrayed in fiction, poetry, drama, and autobiography. Introduction to literature both as artistic and as ideological construct. Analysis of the social critique of American family life.

RHET 1315. The Land in American Experience. (3 cr)
Land in America as idea and as actual space. History of cultural values and the meanings land holds for us. Contrasting views of land, especially those of certain Native American peoples. Rise of the conservation movement and the urbanization of U.S. space.

RHET 1381W. Rhetorical Fictions and 20th Century Conflicts: West Africa, Vietnam, and the Middle East. (4 cr)
Analysis of selected 20th-century documentary novels. Nature of artistic truth in relation to historical truth. Cross-cultural comparisons of responses to impact of Anglo-American policies.

RHET 1910W. Topics: Freshman Seminar. (3 cr. Prereq–Fr) Topics vary.

RHET 3101. Functional Photography. (3 cr; A-F only) Basic photographic communication. Emphasizes techniques of producing 35mm color transparencies for use in presentations/publications. Students provide their own camera/film.

RHET 3102. Digital Photography. (2-3 cr [max 3 cr]; A-F only. Prereq–Digital or conventional camera) Introduction to digital photography. Selecting/using a digital camera. Going digital with a film camera. Editing digital images. Printing/publishing digital images.

RHET 3108. Gender and Ethnicity and the Rhetoric of Science and Technology. (3 cr. Prereq–1101) How cultural gender roles are affected by science/technology. Influence of gender roles on scientific/technological thinking (e.g., communication strategies, language, image). Values/goals of past/present scientific/technological communities.

RHET 3221W. Theories of Human Communication. (4 cr. Prereq–1101 or 1152 or ENGC 1011 or equiv) Through lecture, discussion, simulations, and small group work students become familiar with theories and practices of interpersonal, small group, organizational, and scientific, and technical communication.

RHET 3257. Scientific and Technical Presentations. (3 cr. Prereq–1223 or #) Oral presentation skills for scientific or technical topics. Visual communication, audience analysis, organizing a presentation, presenting complex material. Emphasizes use of computers.

RHET 3266. Group Process, Team Building, and Leadership. (3 cr. Prereq–1223 or equiv or #) Group processes, team building from perspective of managers/leaders. Communication techniques in small group decision making process. Theories of team/small-group communication. Case studies. Group project for each student.

RHET 3270. Special Topics. (1-3 cr [max 3 cr]) See *Class Schedule*.

RHET 3291. Independent Study. (1-3 cr [max 3 cr]. Prereq–#, Δ) Supervised reading and research on topics not covered in regularly scheduled offerings. Intended primarily for upper division undergraduate students.

RHET 3302. Science, Religion, and the Search for Human Nature. (3 cr) Relationship of religion and science as ways of explaining human nature and behavior. Focus on 19th century: impact of Darwin's theory and historical study of Biblical texts. Existentialism and political ecology as modern efforts that problematize "human nature."

RHET 3361. Literature of Social Movements in the United States: 1950 to 2000. (3 cr; A-F only) Analysis of literature (fictional, nonfictional) of social movements in the United States in last half of 20th century. Artistic truth in relation to historical truth. Roles/obligations of citizens to protest/change social structures.

RHET 3371. Technology, Self, and Society. (3 cr. Prereq–[Jr or sr]) Cultural history of American technology. Social values that technology represents in shifts from handicraft to mass production/consumption to modern transportation, communication, and bioengineering. Ethical issues involved in themes of power, work, identity, and our relation to nature. How technology conditions our way of thinking.

RHET 3376W. Terrorism. (3 cr) Terrorism is not only an ethical but an international problem. Different cultures have meant different historical trajectories for terrorism. To illustrate this, the course contrasts Algerian, Irish, and Arab terrorism.

RHET 3381. 20th-Century Culture. (3 cr) Culture represented in historical/political events and arts of the period. Emphasis on European and American painting with units on architecture, literature, film, and theater, as well as a consideration of philosophy and ethics in other disciplines.

RHET 3382W. War. (3 cr) Claim: If ethics (right/wrong) exist in war, then right/wrong exist everywhere. Students experience this claim through its expression in various arts/humanities media of history, memoir, philosophical meditation, and film.

RHET 3383. In Search of Nature. (3 cr) The human need for a relationship with nature and the ways we organize our environment to reflect this need. Various images such as the pastoral and wilderness are traced historically. Tensions between rural and urban views of nature.

RHET 3384. From Soil to Civilization: Agriculture and the Emergence of the Modern World. (3 cr; A-F only) Central importance of emergence of agriculture (i.e., domestication of plants/animals) in development of settled communities, cities, nations, and empires. How it happened, how we know. Differences among agricultural developments on different continents.

RHET 3401. Internet Communication: Tools and Issues. (3 cr. Prereq–Internet access including e-mail, [Netscape 3.0 or higher or equiv]) Current/developing tools/issues of internet-based communication. E-mail, e-commerce, social/cultural context of communication. Discussion topics vary, depending on current issues in existing or emerging technologies. Active online participation required.

RHET 3441. Essentials of Grammar, Punctuation, and Style. (2 cr) Progressive online instruction, examples of concepts taught, immediate feedback, continual tracking of progress.

RHET 3470. Special Topics in Communication Skills. (2 cr [max 6 cr]) Topics vary, see current *Class Schedule*.

RHET 3562W. Technical and Professional Writing. (4 cr; A-F only. Prereq–[1101 or 1152W or ENGC 1011 or equiv], [jr or sr]) Written/oral communication in professional settings. Gathering information, analyzing audience, assessing conventional formats. Drafting, testing, revising documents. Oral presentation of final reports.

RHET 3577W. Rhetoric, Technology, and the Internet. (3 cr; A-F only. Prereq–[1101 or equiv], [3401 or equiv]) The Internet from a rhetorical perspective. How the Internet is changing language, power to persuade, scientific/technical knowledge, and legal issues such as copyright, privacy, and free speech. Emphasizes how scientific/technical information is conveyed on the Internet. Ethical issues specific to use of computers.

RHET 3671. Visual Rhetoric. (3 cr; A-F only. Prereq–[3562, STC major] or #) Rhetorical principles applied to visual presentation of information/data in print documents. Students create examples of visual communication and design selected technical publications. Principles of technical writing.

RHET 3672. Project Design and Development. (3 cr; A-F only. Prereq–[3562W, STC major] or #) Students study, plan, research, design, and develop technical communication print documents, including documentation, brochures, and newsletters. Introduction to workplace project processes. Emphasizes developing production-quality documents.

RHET 3701W. Rhetorical Theory and Scientific and Technical Communication. (4 cr. Prereq–[1101 or 1152W or ENGC 1011 or equiv]) Principles/history of rhetorical theory/criticism. Emphasizes classical theories, especially "Aristotle's Rhetoric." Apply Aristotelian concepts to examples of contemporary communication. Relationship of classical theory to scientific discourse, technical communication.

RHET 4105W. Corporate Video for Technical Communicators. (4 cr; A-F only. Prereq–3562 or equiv or #) Introduction to products, professionals, and processes of corporate video. Students analyze corporate video; submit a proposal, treatment, and script; maintain a journal; complete an interactive unit on production; and conduct research on a video-related topic of their choice.

RHET 4165. Managerial and Organizational Communication, Planning, and Change. (3 cr; A-F only. Prereq–3266 or #) A study of organizational theory, communication processes, planning, and change with emphasis on action research in scientific and/or technical settings. Study of organization and management theory to develop organizational consultative skills.

RHET 4196. Internship in Scientific and Technical Communication. (1-3 cr [max 3 cr]; S-N only. Prereq–STC major, #) Internships sites may include the University, industry, or government agencies. An internship proposal, progress report, internship journal (optional), and final report with a letter from the internship supervisor is required.

RHET 4258. Information-Gathering Techniques in Scientific and Technical Communication. (3 cr; A-F only) Informational, employment-cycle, and problem-solving interviews. Emphasizes guides, schedules, questioning techniques, and communication theories. Descriptive statistics used to analyze data for various projects.

RHET 4431. Intersections of Scientific and Technical Communication and Law. (3 cr. Prereq–[3562W, [jr or sr or grad student]] or #) Areas of law relevant to work/interests of scientific/technical communicators. How emerging issues in science/technology are affecting 21st century practice of law. Ownership, access, ethics, information and technology used to frame major topics. Intellectual Property, privacy, health law, and research practice.

RHET 4501. Usability and Human Factors in Technical Communication. (3 cr. Prereq–Sr or grad student or #) Principles/concepts of human factors/usability testing. Developing objectives, criteria, and measures. Conducting tests in lab, field, and virtual environments. Using software programs to analyze qualitative/quantitative data. Lab fee of \$36 required for use of the Usability Services Laboratory to conduct usability projects.

RHET 4561. Editing and Style for Technical Communicators. (3 cr. Prereq–[3562, [STC major or grad student]] or #) Editorial process, style, and ethics for technical subjects. Practice editing skills, cohesion, clarity, coherence, organization, and target audiences for print and online documents. Learn about the writer-editor relationship, mark-up language, electronic editing methods, techniques for editing illustrations and Web content, and copyright issues.

RHET 4562. Theory and Practice in International Business Communication. (3 cr; A-F only. Prereq–3562W or equiv) Theories/practice in international/intercultural scientific, technical, and business communication. Cultural metaphors, research studies. Interviewing people from other cultures, including international business managers. Case studies.

RHET 4573W. Writing Proposals and Grant Management. (3 cr; A-F only. Prereq–3562W) Research funding sources. Interpreting an RFP or program announcement. Letters of intent. Grant preparation following guidelines of an RFP or program announcement. Proposals for nonprofits or research/business proposals. Using Microsoft Project.

RHET 4662W. Emerging Technologies in Scientific and Technical Communication. (4 cr; A-F only. Prereq–3562 or equiv)

Creating multimedia, hypertext, online help, and internet documents. Linear/nonlinear design, linking, reading/editing online. Principles of technical communication taught through projects: scripts, online support, mark-up language.

RHET 5001. Introduction to Graduate Studies in Scientific and Technical Communication. (3 cr. Prereq–Jr or sr or grad student)

History of technical communication. Different audiences, purposes, genres, and emerging trends. International/intercultural issues. Students participate within a community of technical communication professionals.

RHET 5111. Information Design: Theory and Practice I. (3 cr; A-F only. Prereq–Grad student or #)

Audience analysis, media selection, message design through various theoretical perspectives, including cognitive/schema, social construction, feminist, intercultural theories. Usability testing, contextual inquiry as means to study effectiveness of messages.

RHET 5112. Information Design: Theory and Practice II. (3 cr; A-F only. Prereq–Grad student or #)

Political, economic, social, and technical aspects of media selection and message design. Media analyses, scripts, budgets, treatments, project-design plans, interactive screens. Online design project.

RHET 5196. Internship in Scientific and Technical Communication. (3-6 cr [max 6 cr]; S-N only. Prereq–STC grad or #)

Internship sites may include the University, industry, or government agencies. An internship proposal, progress report, internship journal (optional), and final report with a letter from the internship supervisor are required.

RHET 5270. Special Topics. (1-3 cr [max 3 cr]; A-F only. Prereq–[STC or RSTC] [major or grad student]). # Topics specified in *Class Schedule*.

RHET 5291. Independent Study. (1-3 cr [max 3 cr]. Prereq–#, Δ)

Supervised reading/research on advanced projects not covered in regularly scheduled offerings.

RHET 5511. Research in Scientific and Technical Communication. (3 cr; A-F only)

Experimental/survey research techniques for quantitative/qualitative methodologies in scientific/technical communication. Face-to-face, phone, focus group interviewing. Questionnaire development, contextual inquiry. Using rating, ranking, q-sort methods. Ethics, experimental bias, inferential statistical analysis.

RHET 5531. Scientific and Technical Communication Course Development and Pedagogy I. (2 cr; A-F only. Prereq–Grad)

Pedagogical philosophy/methodology in beginning writing, speaking, and technical communication class. Introduction to theories underlying teaching/tutoring with technology.

RHET 5532. Scientific and Technical Communication Course Development and Pedagogy II. (1 cr; A-F only. Prereq–5531 or #)

Mentor with faculty, usually concurrently with student's first teaching assignment. Student shares observations, solves teaching problems in seminar setting. Issues facing new teachers. Developing a philosophy of teaching. Focuses on evaluating work in classroom.

RHET 5534. Designing Technical Training for Intercultural Audiences. (3 cr; A-F only)

Select and research a training topic, write learning objectives and outcomes, set the conditions for learning, complete a comprehensive course outline, and one training module.

RHET 5664. Science Writing for Popular Audiences. (3 cr; A-F only. Prereq–RHET 3562 or #)

How science is “translated” for popular audiences. Rhetorical theory used to critique popularized articles. Developing a heuristic for writing articles. Controversial issues surrounding movement from science as “science” to science as “popular.”

RHET 5671. Visual Rhetoric. (3 cr. Prereq–Jr or sr or grad student)

Range/development of visuals, especially those in science/technology. Vocabulary for commenting on, criticizing, and creating visuals.

RHET 5775. Major Figures in Rhetorical Tradition: Classical Period. (3 cr)

Classical theories of rhetoric. Epistemological status of rhetoric. Ethical implications of persuasion. Emphasizes “Aristotle’s Rhetoric” as founding document. Other figures (e.g., Plato, Isocrates, Cicero, Quintilian).

RHET 5776. Major Figures in Rhetorical Tradition: Modern Era. (3 cr; A-F only)

Aristotelian rhetoric in modern era. Francis Bacon, scientific revolution. George Campbell, rise of human sciences. Kenneth Burke, semiotics in twentieth century. Perelman/Olbrechts-Tyteca, reconciliation with philosophy.

Russian (RUSS)

Institute of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

RUSS 1101. Beginning Russian I. (5 cr)

Listening, speaking, reading, writing.

RUSS 1102. Beginning Russian II. (5 cr. Prereq–1101 or equiv)

Listening, speaking, reading, writing.

RUSS 1304W. Introduction to Russian Literature: 19th-Century Fiction. (3 cr)

Introduction to the study of literature illustrated by materials drawn from Russian literature of the 19th century.

RUSS 1905. Freshman Seminar. (3 cr [max 6 cr]; A-F only)

Topics specified in *Class Schedule*.

RUSS 3001. Intermediate Russian I. (5 cr. Prereq–1102 or equiv)

Conversation, composition, grammar review, translation, readings in literature.

RUSS 3002. Intermediate Russian II. (5 cr. Prereq–3001 or equiv)

Expansion of experience in speaking, reading, and understanding Russian. Reading contemporary texts.

RUSS 3101. Advanced Russian I. (4 cr. Prereq–3002 or equiv)

Advanced grammar, conversation, composition, and reading.

RUSS 3102. Advanced Russian II. (4 cr. Prereq–3101 or equiv)

Advanced grammar, conversation, composition, and reading.

RUSS 3104. Introduction to Literary Analysis. (3 cr. Prereq–3002 or equiv)

Reading and analysis of poetry and prose selections to understand rudiments of studying Russian literature. Readings are in Russian.

RUSS 3105. Russian Poetry and Prose. (3 cr. Prereq–3002)

Appreciation of literary values through stylistic analysis and literary interpretation; analysis of humanistic elements. Readings in Russian.

RUSS 3211. Modern Russian Literature in Translation. (3 cr. \$RUSS 5211)

Literary, cultural, and political significance of modern Russian literary works.

RUSS 3311. Russian Major Project. (3 cr; A-F only. Prereq–Advanced Russian major)

Directed research and writing in student’s chosen field.

RUSS 3311H. Honors Major Project in Russian. (3-4 cr [max 4 cr]; A-F only. Prereq–Credit will not be granted if credit has been received for RUSS 3311, RUSS 3312; Russ maj, #)

Directed research/writing in student’s chosen field.

RUSS 3404. Tolstoy in Translation. (3 cr. \$RUSS 5404)

Novels, stories, and philosophical writings of Leo Tolstoy.

RUSS 3407. Stories and Plays of Anton Chekhov in Translation. (3 cr. \$RUSS 5407)

Study of literary devices and themes in selected stories and major plays using the intrinsic approach.

RUSS 3409. 19th-Century Russian Novel. (3 cr. \$RUSS 5409)

The Russian realistic novel from origin to decline. Social, political, and intellectual circumstances that led to its emergence as the dominant genre of the “age of realism” in Russia.

RUSS 3411. Dostoevsky in Translation. (3 cr. \$RUSS 5411)

Novels, stories, and miscellaneous writings of Fyodor Dostoevsky.

RUSS 3421. Literature: Middle Ages to Dostoevsky in Translation. (3 cr. \$RUSS 5421)

Russian literature from about 1000 A.D. to mid-19th century; emphasizing writers of the first half of the 19th century.

RUSS 3422. Literature: Tolstoy to the Present in Translation. (3 cr. \$RUSS 5422)

Survey of Russian literature from mid-19th century to the present: realism, modernism, feminism and other trends.

RUSS 3512. Russian Art and Culture from Peter I to the Present. (3 cr)

Major trends in Russian visual arts discussed in the context of pertinent social, political, and ideological questions.

RUSS 3601. Methods of Translating Fiction from Russian to English. (3 cr. Prereq–\$: 5601; 3102 or equiv)

Learning to appreciate a variety of literary styles through the experience of translation.

RUSS 3900. Topics in Russian Language, Literature, and Culture. (1-4 cr [max 16 cr]. Prereq–1102 for language topics)

Variable topics in Russian language, literature and culture. Consult department for details.

RUSS 3993. Directed Studies. (1-4 cr [max 4 cr]. Prereq–#, Δ, □)

Guided individual study.

RUSS 5021. Russia Study Tour. (6-18 cr [max 18 cr]. Prereq–3002 or equiv)

Study of Russian language & culture in an accredited institution in Russia.

RUSS 5104. Introduction to Literary Analysis. (3 cr. Prereq–3002 or equiv)

Reading and analysis of poetry and prose selections to understand rudiments of studying Russian literature. Readings are in Russian.

RUSS 5105. Russian Poetry and Prose. (3 cr. Prereq–3002 or equiv)

Appreciation of literary values through stylistic analysis and literary interpretation; analysis of humanistic elements. Readings in Russian.

RUSS 5211. Modern Russian Literature in Translation. (3 cr. \$RUSS 3211)

Literary, cultural, and political significance of modern Russian literary works.

RUSS 5404. Tolstoy in Translation. (3 cr. \$RUSS 3404)

Novels, stories, and philosophical writings of Leo Tolstoy.

RUSS 5407. Stories and Plays of Anton Chekhov in Translation. (3 cr. \$RUSS 3407)

Study of literary devices and themes in selected stories and major plays using the intrinsic approach.

RUSS 5409. 19th-Century Russian Novel. (3 cr. §RUSS 3409)

The Russian realistic novel from origin to decline; social, political, and intellectual circumstances that led to its emergence as the dominant genre of the "age of realism" in Russia.

RUSS 5411. Dostoevsky in Translation. (3 cr. §RUSS 3411)
Novels, stories, and other writings of Fyodor Dostoevsky.

RUSS 5421. Literature: Middle Ages to Dostoevsky in Translation. (3 cr. §RUSS 3421)
Russian literature from about 1000 A.D. to mid-19th century; emphasizing writers of the first half of the 19th century.

RUSS 5422. Literature: Tolstoy to the Present in Translation. (3 cr. §RUSS 3422)
Survey of Russian literature from mid-19th century to the present: realism, modernism, feminism and other trends.

RUSS 5601. Methods of Translating Fiction from Russian to English. (3 cr. Prereq-§: 3601; 3102 or equiv)
Learning to appreciate a variety of literary styles through the experience of translation.

RUSS 5900. Topics in Russian Language, Literature, and Culture. (1-4 cr [max 3 cr]. Prereq-1102 for language topics)
Variable topics in Russian language, literature, and culture.

RUSS 5993. Directed Studies. (1-4 cr [max 16 cr]. Prereq-#, Δ, □)
Guided individual study.

Sanskrit (SKT)

Department of Classical and Near Eastern Studies

College of Liberal Arts

SKT 5001. Beginning Sanskrit. (3 cr)
Introduction to the classical language of ancient India.

SKT 5002. Beginning Sanskrit. (3 cr. Prereq-5001 or equiv)
Introduction to the classical language of ancient India.

SKT 5201. Intermediate Sanskrit. (3 cr. Prereq-5002 or equiv)
Readings in Sanskrit literature.

SKT 5202. Intermediate Sanskrit. (3 cr)
Readings in Sanskrit literature.

SKT 5710. Topics: Language and Literature. (3 cr)
Selected reading and/or study of linguistic problems in Sanskrit.

SKT 5992. Directed Readings. (3 cr. Prereq-5202 or equiv)
Guided individual reading or study.

Scandinavian (SCAN)

Department of German, Scandinavian, and Dutch

College of Liberal Arts

SCAN 1201. Introduction to Scandinavia. (3 cr)
Five Scandinavian countries introduced through literature, art, and film. Historical origins, nationalism, European Union, welfare state, environment, contemporary Scandinavian identity.

SCAN 1904. Topics: Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq-Freshman)
Topics specified in *Class Schedule*.

SCAN 1905. Topics: Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq-Fr)
Topics specified in *Class Schedule*.

SCAN 1909W. Topics: Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq-Freshman)
Topics specified in *Class Schedule*.

SCAN 3011. Readings in Scandinavian Languages. (4 cr. Prereq-[DAN or Nor or SWED][1004 or 4004] or #)
Reading/composition in Danish, Norwegian, and Swedish for advanced proficiency. Introduction to differences between the three languages.

SCAN 3501W. Scandinavian Culture Past and Present. (3 cr)
Cultural, social, and political developments; principal views and core values; major cultural figures; Scandinavian mentality. Readings in translation for nonmajors. Invited lectures on central topics within selected areas of study.

SCAN 3502. Scandinavian Myths. (3 cr)
Literary and cultural investigation of the popular beliefs, myths, and religion of the medieval Scandinavians; the interaction of paganism and Christianity; the reflection of myths in Old Scandinavian literature and art. All readings in English.

SCAN 3503. Scandinavian Folklore. (3 cr)
Literary and folkloric investigation of Scandinavian folktales and legends. Readings in translation for nonmajors.

SCAN 3504. The Immigrant Experience. (3 cr)
Issues of origin and language, immigration and settlement, traditions and values, culture and politics, and transgressions of boundaries from the old to the new studied through photos, diaries, letters, stories, and novels by Moberg, Rølvaag, Ager, and other pioneers. All readings in translation.

SCAN 3505. Scandinavian Fiction From 1890 to Present. (3 cr)
Modernity's search for new forms to represent changing historical situations. Ibsen, Strindberg, Hamsun, Selma Lagerlöf, Hjalmar Bergman, Pär Lagerkvist, Karen Blixen, Moa Martinson, Tarjei Vesaas, Edith Södergran, Ingmar Bergman, Lars Gustafsson. All readings in translation.

SCAN 3601. Great Literary Works of Scandinavia. (3 cr)
Major literary works from the Middle Ages to the present. Readings in translation.

SCAN 3602. The Literary Fairy Tale in Scandinavia. (3 cr)
Examples of literary fairytales from Scandinavia, especially Hans Christian Andersen. Readings in translation for non-majors.

SCAN 3605. The Scandinavian Short Story. (3 cr)
Short stories by important 19th- and 20th-century authors from all the five Scandinavian countries. Genre theory and practical criticism. Readings in English for non-majors.

SCAN 3612. Images of Scandinavia in Art, Film, and Literature. (3 cr)
Images of Scandinavia(ns) in art, film, and literature by both Scandinavians and foreigners. Images of self-knowledge, self-revelation, and otherness. Representative photos and videos of people, locations, and styles. Readings in English.

SCAN 3613. Children's Literature in Scandinavia. (3 cr)
Analysis and discussion of representative works in Scandinavian children's literature from picture books to young adult books using a variety of critical methods of interpretation. Taught in English.

SCAN 3618. Scandinavian Drama. (3 cr)
Study of representative plays by Henrik Ibsen, August Strindberg, Hjalmar Bergman, Pär Lagerkvist, Nordahl Grieg, Kjeld Abell, and Ingmar Bergman in the context of modern theater with emphasis on politics and society. All readings in translation.

SCAN 3619. Travel in Literature. (3 cr)
Experiences in literature of Scandinavians going abroad, foreigners coming to Scandinavia. Culture/travel as self-knowledge, self-revelation, otherness. Slides/videos of travel destinations from literature. Readings in English.

SCAN 3634. Scandinavian Women Writers. (3 cr)
Investigation of issues important to women as articulated by Scandinavian women writers. Historical overview of women's writing in Scandinavia and in-depth investigation of texts by contemporary women writers. All readings in translation.

SCAN 3670. Topics in Scandinavian Studies. (3 cr [max 9 cr])
Topic may focus on a specific author, group of authors, genre, period, or subject matter. Topics specified in *Class Schedule*. Readings in English for nonmajors. May meet with 5670.

SCAN 3993. Directed Studies. (1-4 cr [max 12 cr]. Prereq-#, Δ, □)
Guided individual reading and study.

SCAN 4602. Fiction and Film. (3 cr)
Examines film adaptations of classical Scandinavian literary texts and explores similarities and differences between the viewer's and reader's experiences in the media of film, drama and epic narration. Includes works by Blixen, Hamsun, Ibsen, Strindberg, Axel, Bergman, Dreyer and Losey.

SCAN 4614. Introduction to Kierkegaard. (3 cr)
The literary, philosophical, theological, and psychological dimensions of Kierkegaard's work. Kierkegaard's influence on 20th-century culture in general and existentialism in particular. Analysis and discussion of selections from Kierkegaard's entire oeuvre. Readings in English.

SCAN 5501. Scandinavian Mythology. (3 cr)
Study of Scandinavian mythology based on primary sources represented by Saxo Grammaticus, Snorri Sturluson's Edda and Ynglinga Saga, and the Poetic Edda. Myths are analyzed using contemporary critical approaches. All readings in translation.

SCAN 5502. The Icelandic Saga. (3 cr)
Study of the sagas written in 13th-century Iceland. Discussion includes cultural and historical information about medieval Iceland and analysis of a selection of saga texts using contemporary critical approaches. All readings in translation.

SCAN 5613. Contemporary Scandinavian Literature. (3 cr)
An investigation of issues which emerged as extremely important after 1945 in Scandinavia, as articulated by writers and analyzed by researchers in social sciences. All readings in translation.

SCAN 5615. Ibsen and the Beginnings of Modern Drama. (3 cr)
Close reading of Ibsen's modern tragedies, from *A Doll's House* (1879) to *When We Dead Awaken* (1899). Focus is on the dialectics between Ibsen and his society, and dramatic structure and staging conventions in the context of modern theater. Readings in English for nonmajors.

SCAN 5616. Strindberg and the Drama in Revolt and Change. (3 cr)
Strindberg as the master of naturalistic drama and the precursor of modernity in European and American theater. Close reading of plays with emphasis on dramatic structure and staging conventions in the context of modern theater. All readings in English for nonmajors.

SCAN 5670. Topics in Scandinavian Studies. (3 cr [max 9 cr])
Topic may focus on a specific author, group of authors, genre, period, or subject matter. Topics specified in *Class Schedule*. Readings in English for nonmajors. May meet with 3670.

SCAN 5701. Old Norse Language and Literature. (3 cr)
Acquisition of a reading knowledge of Old Norse; linguistic, philological and literary study of Old Norse language and literature.

SCAN 5704. History of the Scandinavian Languages. (3 cr)
Investigation of the development of the Scandinavian languages from the earliest periods to the present.

SCAN 5710. Topics in Old Norse Literature. (3 cr [max 9 cr]. Prereq=5701 or equiv)
Topic may focus on Old Norse prose or poetry. Primary texts read in Old Norse. Critical literature about texts, medieval Icelandic culture in English. Topics specified in *Class Schedule*.

SCAN 5993. Directed Studies. (1-4 cr [max 12 cr]. Prereq=#, A, □)
Guided individual reading and study.

Slavic (SLAV)

Institute of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

SLAV 5900. Topics in Slavic Languages and Literatures. (3 cr)
Topics specified in *Class Schedule*.

Social Work (SW)

School of Social Work

College of Education and Human Development

SW 1001. Introduction to the World of Social Work: A Global Perspective. (3 cr)
Varied dimensions of social work, locally, nationally, and internationally. Origins/emergence of social work as a profession. Effects of worldwide economic/social oppression. Human behavior and the social environment. Child/adult social welfare theories. Policies, programs. Health and mental health. Care at end of life cycle.

SW 1905. Freshman Seminar. (1-3 cr [max 6 cr]. Prereq=Fr)
Interdisciplinary seminar. Topics specified in *Class Schedule*.

SW 2501W. Introduction to Social Justice. (4 cr)
Meanings of social justice. Ways in which social justice advocates work for social change. Focuses on three areas: criminal justice, globalization, and social welfare. Students do service learning in a social justice organization.

SW 3051. Cultural Diversity and the Helping Process. (3 cr)
Ethno-cultural concepts relevant to service delivery. Cross-ethnic issues, practice considerations in human services, issues that produce barriers to services for diverse racial/cultural client groups.

SW 3101. Interventions in Community and Social Policy. (3 cr)
Applying social work skills and values to community organization, social action, and social problems using an ecological framework.

SW 3203. Interventions with Individuals and Groups. (3 cr)
Using an ecological framework, apply social work skills and values to work with individuals and small groups

SW 3301. GLBT Social Movements. (3 cr. §GLBT 3301)
Development of gay, lesbian, bisexual, and transgender (GLBT) social movement historically. Current state of GLBT movement. Readings draw on social movement theory, and GLBT Studies. Interdisciplinary course with classroom and community service learning.

SW 3402. Child Abuse and Neglect: Intervention and Prevention. (3 cr)
Interdisciplinary/comprehensive study of child maltreatment, family violence today. Prevalence, scope, dynamics. Response/preventative strategies for individual, familial, community analysis.

SW 3501. Theories and Practices of Social Change Organizing. (4 cr)
Concepts, theories, and practices of social change organizing. U.S. power relations. Focuses on how people organize to make a difference. Cross-class, multi-racial, and multi-issue organizing. Students do service learning in a social justice organization.

SW 3701. Introduction to Child Maltreatment and Family Violence. (3 cr)
Family violence across lifespan. History, current theories, research, and policies in child maltreatment and family violence. Theories, research, and policies on violence against women (battering, sexual assault, stalking), child maltreatment (physical/sexual abuse, emotional abuse, neglect), and abuse of vulnerable adults (elderly, non-elderly vulnerable populations).

SW 3705. Gender Violence in Global Perspective. (3 cr)
Theories/research on violence in intimate domestic relationships examined through multiple lenses. Overview of interventions in Minnesota, United States, and other societies.

SW 3810. Special Topics. (1-4 cr [max 10 cr]; A-F only)
Topics specified in *Class Schedule*.

SW 4001. Basic Counseling and Interviewing Skills in the Social Work Helping Process. (1 cr; A-F only)
Development/maintenance of a social worker-client helping relationship. Professional values and ethics. Interviewing skills of active listening, empathy, and authenticity. Identifying purpose, roles, and responsibilities through asking questions, reflecting, and clarifying.

SW 4002. Advanced Counseling and Interviewing Skills in the Social Work Helping Process. (1 cr; A-F only. Prereq=4001 or #)
Builds on 4001. Focuses on assessment and on developing reasonable, measurable, and attainable goals. Working with involuntary clients, goal attainment strategies, evaluating progress, and ending.

SW 4501. Senior Seminar in Social Justice. (4 cr. Prereq=2501, 3501)
Capstone course. Students complete a social justice portfolio, do service learning in a social justice organization.

SW 4693. Directed Studies. (1-10 cr [max 10 cr]. Prereq=#)
Guided individual reading or study related to social issues, social work methods, or social work history.

SW 4694. Directed Research. (1-10 cr [max 10 cr]. Prereq=#)
Guided research related to social issues, social work methods, or social work history.

SW 5051. Human Behavior and the Social Environment. (2-3 cr [max 3 cr]; A-F only. Prereq=Grad student or 8 cr social sciences or #)
Social, psychological, biological, and cultural factors of individual and group development as applied to social work practice. Behavior and life-cycle development focusing on diversity and each stage of life. Discuss development in terms of the individual, and in terms of overlapping social systems such as the multigenerational family, culture, community, and society.

SW 5052. Ecologies of Child Development Within Communities of Color. (3 cr. Prereq=Grad or #)
Examine social, affective, and cognitive development of children of color via a life course, ecological systems framework. Family, school, peers, and community are studied as ecological contexts which influence developmental trajectories for these children and youth. Attention is given to poverty, racism, and oppression.

SW 5101. Historical Origins and Contemporary Policies and Programs in Social Welfare. (3-4 cr [max 4 cr]; A-F only. Prereq=Grad or 8 sem cr of social sciences)
Contemporary policies and programs in social welfare are examined in light of their historical origins and evolution. A framework is then developed for analysis of concepts and principles in contemporary social policy for social welfare programs and services. The emergence of the profession of social work also examined.

SW 5105. Women and Public Policy. (3 cr)
Study of feminist organizations; issues and conflicts within organizations and movements; methods and sources for studying feminism.

SW 5107. Child Welfare Policy. (3 cr. \$PA 5411. Prereq=Grad or #)
Examine the intersection of conceptual orientations of developmental psychology with policies that affect children and families. Demographic, historic, and social trends underlying the assumptions that drive policies directed at women and children; projections of future policies.

SW 5309. Case Management with Special Populations. (3 cr. Prereq=Grad or non-degree-seeking student or #)
Examine concepts and principles of case management practice with special populations such as older adults, persons with developmental disabilities, and persons with serious and persistent mental illness. The core functions of case management practice in a range of settings are addressed in relationship to issues of diversity, vulnerability, and empowerment.

SW 5313. Social Work with Older Adults. (2 cr. Prereq=Grad or non-degree-seeking student or #)
The practice components of social work with older adults including assessment, intervention, and case management. Taught from the perspective of bio-psycho-social strengths and challenges and within the context of current social policy and delivery systems.

SW 5314. Social Work in the Schools. (2 cr. Prereq=Grad or non-degree-seeking student or #)
Application of social work methods in a school setting. Emphasizes assessment, diagnosis, consultation, advocacy, interdisciplinary team building, and crisis intervention.

SW 5315. Social Work Practice in Hospitals and Health Care Settings. (2 cr. Prereq=Grad or non-degree-seeking student or #)
Prepares students for social work practice in a hospital or health care setting. Focus on integration of conceptual and practice subject matter that covers differential assessment, clinical intervention models, impact of acute and chronic illness, special populations, managed care, legal and ethical issues, interdisciplinary team work, and transition planning in health care.

SW 5316. Brief Treatment and the Task-Centered Approach. (2 cr. \$SW 8303. Prereq=§: 8303; grad or non-degree-seeking student or #)
The advent and current prominence of brief treatment models in work with individuals, families, and groups including their theoretical and empirical bases. Practice with diverse populations in a context of managed care. Emphasis on the task-centered approach including skill training and supervised practice.

SW 5317. Social Work With Involuntary Clients. (2 cr. Prereq=Grad or non-degree-seeking student or #)
Includes theory, ethics, effectiveness, and intervention methods for work with client systems that experience involuntary contact with a social worker. Interventions at micro, mezzo, and macro levels are included. Practice in varied settings such as child welfare, mental health, corrections, and public schools as well as practice related to organizational responses to change.

SW 5318. Family Centered Home Based Services. (2 cr. \$SW 8314. Prereq=§: 8314; grad or non-degree-seeking student or #)
Ecological, multisystems approach focusing on the family system. Triadic theory, meta-neutrality, strengths-focus, case management and team treatment. Family-based services evaluated for high-risk, multi-problem families and as an alternative to foster placement.

SW 5319. Adolescents: Norms, Culture, and Health. (2 cr)
Relationships among familial, social, societal, political, economic, environmental, psychosocial, and cultural determinants of adolescent behavior that affect health; major public health issues and problems of adolescents.

SW 5481. Child Abuse Prevention I: Research and Theory. (3 cr. Prereq—Bachelor's degree or #)
Foundation of research/theory for level I child abuse prevention studies certificate.

SW 5482. Child Abuse Prevention II: Program Development, Evaluation, and Advocacy. (3 cr. Prereq—5481)
Design and evaluation of policies and programs of interventions to prevent child abuse. This is the second course in the Level I Child Abuse Certificate program.

SW 5483. Child Abuse Prevention III: Skill Building I— Cultural and Legal Issues. (3 cr. Prereq—Bachelor's degree or #)
Risk factors, protective factors, resilience in cultural settings. Identifying/designing strategies appropriate to cultural characteristics. First course for level II child abuse prevention certification.

SW 5484. Child Abuse Prevention IV: Skill Building II— Risk Assessment and Interviewing. (3 cr. Prereq—Bachelor's degree or #)
Designing instruments for child abuse risk assessment. Culturally/ethnically competent interviewing. Ethnographic interviewing. Strengths-based ecosystemic assessment. Strategies for evaluating interventions. Second course for level II child abuse prevention certification.

SW 5519. Mediation and Conflict Resolution. (3 cr. Prereq—\$8519)
Develop mediator skills for making informed decisions regarding the appropriateness of mediation for conflicts that frequently confront social worker practitioners such as divorce, neighborhood disputes, conflicts between parents and adolescents, conflicts between spouses, and conflicts between crime victims and offenders.

SW 5525. Global Perspectives on Social Welfare, Peace, and Justice. (3 cr. Prereq—2001 or #)
Role of international social welfare in meeting basic human needs and promoting human rights, social justice, and peace. Theories, models, and social policies in different economic and political systems with emphasis on Third World nations.

SW 5705. Violence in Families. (3 cr. Prereq—\$: 5707; grad student or adult special or#)
Prevention/intervention with perpetrators, survivors, and social institutions. Perpetration, effects on victims, social responses to family violence. Child abuse/neglect. Abuse of women/vulnerable adults. Roles of gender, race, culture, age, physical ability, and sexual orientation.

SW 5706. Issues and Interventions in Child Sexual Abuse. (2 cr. Prereq—Grad student or adult special or #)
Major issues/interventions in child sexual abuse. Working with sexually abused children and their families. Perceptions of victims, non-offending parents, perpetrators, and other family members. Interviewing. Justice system. Child protection.

SW 5707. Interventions with Battered Women and Their Families. (2 cr. Prereq—\$: 5705; grad or non-degree-seeking student or #)
Current theories, research, and evaluation of interventions with battered women and their families. Focus on practice, e.g., direct work with social institutions, victim-survivors, and assailants and their families.

SW 5708. Substance Abuse and Social Work. (3 cr. Prereq—Grad or non-degree seeking student or #)
Assessment and intervention in situations involving substance abuse with special emphasis on cross cultural practice. Relationships of substance abuse to areas such as child welfare, mental illness, and violence within families are examined.

SW 5709. Applied Psychopharmacology for Human Service Professionals. (2 cr; A-F only)
Categories of psychoactive drugs. Medications to treat mental disorders. Legal drugs such as alcohol, nicotine, cocaine, and marijuana. What is occurring physiologically when someone takes a psychoactive drug.

SW 5711. Co-Occurring Addictive and Mental Health Disorders. (2 cr; A-F only. Prereq—Cannot be taken for cr by MSW students)
Mentally ill, chemically abusive, or dependent clients. Intervention, advocacy, education, and support for client and those who are part of his or her environment. Social, environmental, and multicultural factors. Meets partial state requirements for becoming licensed as an alcohol/drug counselor.

SW 5810. Seminar: Special Topics. (1-4 cr [max 10 cr])
Topics specified in *Class Schedule*.

SW 5811. Social Work Ethics. (2 cr. Prereq—\$: 8801, grad student or non-degree seeking student or #)
Acquire knowledge base and develop skills required to identify ethical issues, resolve ethical dilemmas, and make ethical decisions within the context of the professional practice of social work. Values base and ethical standards of the profession and ethical decision-making models examined in-depth.

SW 5813. Child Welfare and the Law. (2 cr. Prereq—2nd yr MSW or advanced standing or #)
Social work practice in juvenile court. Child abuse/neglect reporting laws, risk assessment, reasonable efforts, case plan, custody proceedings, permanency planning, termination of parental rights, child testimony, social worker testimony, adoption laws.

SW 5991. Independent Study in Social Work. (1-4 cr [max 4 cr])
Independent study in areas of special interest to students and faculty.

Sociology (SOC)

Department of Sociology

College of Liberal Arts

SOC 1001. Introduction to Sociology. (4 cr. \$SOC 1011V, SOC 1012W)
Scientific study of human societies/behavior. Major theories, methods, concepts, research findings. Characteristics of basic social units, their patterns of interrelation, processes of change.

SOC 1011H. Honors: Introduction to Sociology. (4 cr. \$SOC 1001, SOC 1012W. Prereq—Honors)
Scientific study of human societies/behavior. Major theories, methods, concepts, research findings. Characteristics of basic social units, their patterns of interrelation, processes of change.

SOC 1905. Freshman Seminar. (3 cr. Prereq—Freshman or less than 30 credits)
Topics specified in *Class Schedule*.

SOC 3003. Social Problems. (3 cr; A-F only. Prereq—1001 or #)
Analysis of major social problems including, inequality, crime, drug abuse, pollution, racism, among others. Examination of proposed solutions and evaluation of policy consequences.

SOC 3090. Topics in Sociology. (3 cr. Prereq—[1001, soph or above] or #; Soc majors must register A-F)
Topics specified in *Class Schedule*.

SOC 3093. Directed Study. (1-4 cr [max 4 cr]. Prereq—1001, #, Δ, □)
Guided individual reading or study at the sophomore level.

SOC 3094. Directed Research. (1-4 cr [max 4 cr]. Prereq—1001, #)
Guided research experience at the sophomore level.

SOC 3101. Introduction to the American Criminal Justice System. (3 cr; A-F only. Prereq—\$SOC 3111)
Components, dynamics, and philosophical underpinnings of criminal justice and agencies (law enforcement, courts, corrections).

SOC 3102. Introduction to Criminal Behavior and Social Control. (3 cr. Prereq—Soc majors must register A-F)
Issues in science of crime as a social phenomenon. Creation/use of laws, patterns/causes of crime.

SOC 3201. Inequality: Introduction to Stratification. (3 cr. Prereq—[1001 or equiv], [soc majors must register A-F])
Causes, dimensions, and consequences of inequality in American society. Class, gender, race. Power/status differentials. Cross-national patterns of inequality. Social mobility. Educational/occupational influences. Status attainment. Social stratification and change. Social welfare. Public policies affecting inequality.

SOC 3211W. American Race Relations. (3 cr; A-F only)
Surveys conceptual and theoretical tools sociologists use to study race relations in the United States. Empirical focus on the historical experiences among different racial/ethnic groups in the United States including, American Indians, African-Americans, Latinos, Asian-Americans, and white ethnics.

SOC 3221. Sociology of Gender. (3 cr; A-F only. \$WOST 3201. Prereq—1001 or #)
Organization, culture, and dynamics of gender relations as major features of social life. Gender and racial inequalities in the workplace, relationships between gender and race, gender and culture, sexuality, gendered politics, and the women's movement.

SOC 3251W. Sociological Perspectives on Race, Class, and Gender. (3 cr; A-F only. \$AFRO 3251W)
Race, class, and gender as aspects of social identity and as features of social organization. Experiences of women of color in the United States; exploration of family life, work, violence, sexuality and reproduction, and the possibilities for social change.

SOC 3301W. Politics and Society. (3 cr; A-F only. Prereq—1001 or #)
Ideas of citizenship. Relationship between politics and society. Public sphere and civil society. Research practicum volunteering at a policy-relevant site using participant observation methods.

SOC 3322W. Social Movements, Protests, and Change. (3 cr. Prereq—1001 or #)
Origins, dynamics, and consequences of social movements. Challenges facing movement organizations. Relationship between movements and political institutions. Role of movements in bringing about social change. Theoretical issues, case studies.

SOC 3411W. Organizations and Society. (3 cr; A-F only. Prereq—1001 or #)
Formal organizations as major social influences in work lives, personality development, social change, and conflict. Life-course analysis of enterprises, bureaucracies, and voluntary organizations. Organizational control, conflict, coordination, and interorganizational sets/relationships.

SOC 3415. Sociology of Consumer Behavior. (3 cr; A-F only. Prereq—1001 or #)
Behaviors related to symbolic value of material goods: how symbols are created, acquired, diffused, and used for organizing personal identity and for maintaining group boundaries. Fashion. Socialization. Structure of retail trade. Role of mass media, advertising, marketing/production strategies. Implications of world-wide markets for manufacturing goods and selling them in retail stores. Readings, classroom discussions, lectures.

SOC 3421W. Sociology of Work. (3 cr; A-F only. Prereq—1001 or #)
Overview of sociological theories and empirical research in study of work. Focuses on work in contemporary American society. History, nature, and organization of work and the U.S. economy. Social aspects/consequences of work for individuals of various races, ethnicities, genders, and ages. Current topics.

Course Descriptions

SOC 3451W. Cities and Social Change. (3 cr. Prereq—1001 or #)

Survey of social, economic, and cultural foundations of modern city and its people, using theories/models of urbanism from Wirth to Sassen. Migration/ethnic enclaves. Racial segregation and social control. Urban social movements. Urban-suburban divide. Decline of urban liberalism. Contemporary “Brazilianization” of the American city.

SOC 3452. Education and Society. (3 cr. Prereq—Soc majors must register A-F)

Introduction to sociological theories/research about education in modern societies. Effects of education on beliefs/values. Effects of school characteristics on student achievement and educational attainment. Education and inequality. Cross-national differences in educational systems. Link between education and national economic performance. Organizational characteristics of schooling. Prospects for school reform.

SOC 3501. Sociology of Families. (3 cr. Prereq—1001 or #)

Families in contemporary American society. Historical/cross-cultural comparisons. Interrelationships of families with other social institutions. Race, class, and gender in shaping family experiences. Topics may include marriage, divorce, childbearing, parenthood, family violence, gay and lesbian families.

SOC 3511. World Population Problems. (3 cr. Prereq—1001 or #)

Population growth, natural resources, fertility/mortality in less developed nations, population dynamics/forecasts, policies to reduce fertility.

SOC 3613W. Food, Culture, and Society. (3 cr)

Food issues from a sociological perspective. Cross-cultural differences in how groups/societies think about and relate to food.

SOC 3661. Japan and the U.S.: Tides of Change in Race, Class, and Gender. (3 cr; A-F only. Prereq—1001 or courses on or exper in East Asia or #)

Forms of social relations and values, religion, childhood, family, community, education, work, business organization, politics, social classes, crime and deviance, police, popular culture, status of women and minorities, social protest movements, and international relations.

SOC 3701. Social Theory. (4 cr; A-F only. Prereq—1001 or #)

Traditions of social theory that have been basic to sociological knowledge, how they have expanded in contemporary theory, and their applications in selected areas of empirical research.

SOC 3711. Principles of Social Organization. (3 cr; A-F only. Prereq—1001 or equiv)

How and why social organization is possible. Concepts and theories of social structure, primary forms of social organization (groups, communities, networks, formal organizations), basic social processes (integration, differentiation, regulation, change), and how social organization evolves from individual decision making.

SOC 3721. Principles of Social Psychology. (3 cr. Prereq—1001 or #)

Impact of social location on individual attitudes and behaviors, dynamics of interpersonal relationships and small groups, and processes of social interaction.

SOC 3801W. Sociological Research Methods. (4 cr. Prereq—[1001 or 1011V] or #; soc majors must register A-F)

Principles/practice of research design, sampling, data collection including field observation/surveys. Data management, analysis, and reporting of quantitative/nonquantitative data. Ethics/administration in sociological research. Lab.

SOC 3811. Basic Social Statistics. (4 cr. Prereq—GC 0731 or intermediate algebra or #)

Descriptive statistics. Measures of central tendency, deviation, association. Inferential statistics focusing on probability and hypothesis testing. T-tests, Chi-square tests, variance analysis, bivariate regression. Statistical software used to analyze sociological data.

SOC 4090. Topics in Sociology. (3 cr. Prereq—[1001, soph or above] or #; Soc majors must register A-F)

Topics specified in *Class Schedule*.

SOC 4093. Directed Study. (1-4 cr [max 12 cr]. Prereq—#, Δ , \square)

Guided individual reading or study at junior or senior level.

SOC 4094W. Directed Research: Senior Project. (4 cr; A-F only)

Guided research experience at junior/senior level.

SOC 4101W. Sociology of Law. (3 cr; A-F only. Prereq—1001 or 3101 or 3102 or 3111 or #; 3701 recommended)

Sociological analysis of law/society. Why people obey the law, social forces involved in creating law (both civil and criminal), procedures of enforcement, impact of law on social change.

SOC 4102. Criminology. (3 cr; A-F only. \S SOC 4103.

Prereq—3101 or 3102 or 3111 or #)

Nature/types of crime. Problems in measuring incidence/trends. Review of sociological theories of crime causation. Implications for crime prevention/control.

SOC 4103. Service-Learning in Criminology. (4 cr. \S SOC 4102. Prereq—3102 or #; soc majors must register A-F)

Community-based work in areas of child/adolescent development. Interventions for “at-risk” children and for juvenile offenders with contemporary theory. Research on criminal careers and on offending over the life-course. Direct engagement with criminology and with public responses to crime.

SOC 4105. Sociology of Punishment and Corrections. (3 cr; A-F only. Prereq—3101 or 3102 or 3111 or #)

Advanced study of correctional strategies such as prison, probation, and parole. Theories/structures of diversion, probation, parole, and other community corrections programs. U.S. penal policies/practices compared with those in other countries.

SOC 4108. Current Issues in Crime Control. (3 cr)

Selected current criminal justice policies examined from perspective of courts, legislature, community, and interest groups. Impact of criminal justice policy changes on society and on social control agencies.

SOC 4109. Domestic Criminal Violence. (3 cr. Prereq—3101 or 3102 or 3111 or #)

Survey of research on family violence within criminological framework. Definition of domestic violence. Empirical/theoretical approaches. Response of social control agencies.

SOC 4111. Deviant Behavior. (3 cr; A-F only. Prereq—3101 or 3102 or 3111 or #)

Definition/nature of deviant behavior. Social processes associated with deviant careers and social reintegration. Relationship of deviant behavior to social control.

SOC 4114. Social Control of Women Offenders. (3 cr.

Prereq—3101 or 3102 or 3111 or #)

Historical/current explanations for female criminality. Current trends in women's participation in crime and their treatment in the legal system.

SOC 4125. Policing American Society. (3 cr; A-F

only. Prereq—3101 or 3102 or 3111 or #; [4161, 4162]

recommended)

Police organizations/operations from social science perspective. Formal/informal policing: role/functions, legal bases, accountability/restraints, community relations, use of force, illegal practices.

SOC 4135. Sociology of White-Collar Crime. (3 cr.

Prereq—3101 or 3102 or 3111 or #; Soc majors A-F only)

Causes/consequences of white-collar crime. Control issues, including public perception, legislation, criminal law responses (enforcement, sentencing, punishment), and alternative control mechanisms.

SOC 4141. Juvenile Delinquency. (3 cr; A-F only. Prereq—3101 or 3102 or 3111 or #)

Childhood and delinquency. Measuring extent/distribution of delinquent behavior. Applying theories to relationships within family, school, and peer group. Institutional responses to delinquency. Evaluating programs for treatment, prevention, and control.

SOC 4142. Juvenile Justice and Law. (3 cr. Prereq—[3101 or 3102 or 3111 or #], [jr or sr or grad student]; grad students may register S/N)

Evolution of juvenile court. Organizational relationships among court, police, and other agencies. Policies regarding serious/status offenders. Intake, diversion, pretrial detention, waiver to adult court, sentencing. Conflicts over due process and treatment objectives. Current movements to abolish juvenile justice system.

SOC 4147. Sociology of Mental Illness. (3 cr. Prereq—1001 or 3101 or 3102 or 3111 or #)

Sociological theory/research related to definitions/origins. Epidemiology, reaction patterns, use of mental health services.

SOC 4148. Criminal Psychopathology. (3 cr. Prereq—Sr or grad; grad students only may enroll S-N)

Psychiatric/psychological aspects of antisocial/criminal behavior as related to issues faced in courts and in criminal justice system.

SOC 4149. Killing. (3 cr. Prereq—Sr or grad; grad students only may enroll S-N)

Sociological, legal, and psychological aspects of diverse types of killing. The topic of .normal. killings is contrasted with various pathological types. Subtopics include: mentally disturbed killings, sexual killings, killings within families, gang killings, and terrorist killings.

SOC 4161. Criminal Law in American Society. (3 cr. Prereq—3101 or 3102 or 3111 or #)

Purposes of criminal law and of principles of criminal liability, justification, and excuse. Applications to law of criminal homicide, sexual assault, drugs, and crimes against property, public order, and morals.

SOC 4162. Criminal Procedure in American Society. (3 cr. Prereq—3101 or 3102 or 3111 or #)

How constitutional democracy balances need to enforce criminal law and rights of individuals to be free of unnecessary government intrusion.

SOC 4170. International Law and Cultural Change. (3 cr; A-F only. Prereq—1001 or 3101 or 3102 or 3111 or #)

In a globalized world, which cultural values/practices take precedence? Which are criticized, altered, eliminated? What role does international law play in these processes? Immigration, terrorism, Americanization, structure of international legal system.

SOC 4175. Law, Politics, and Inequality. (3 cr. Prereq—1001 or 3101 or 3102 or 3111 or #; soc major must register A-F)

Critically evaluates law as a resource that defines, reinforces, and alters social relationships. Connection between law and justice. Law seen from perspective of class, race, or gender.

SOC 4190. Topics in Sociology With Law/Criminology/Deviance Emphasis. (3 cr. Prereq—1001 or #)

Topics specified in *Class Schedule*.

SOC 4246. Sociology of Health and Illness. (3 cr; A-F only. Prereq—One sociology course or #)

Health/illness in context of social, political, economic, and cultural forces and of medical knowledge. Social meanings of illness. How people seek help for and manage their illnesses. How doctors, nurses, and patients interact. Social movements surrounding health.

SOC 4305. Society and the Environment: A Growing Conflict. (3 cr; A-F only. Prereq—1001 or environmental course or #)

Societal causes and cures of ecological problems such as global warming, species extinction, and resource exhaustion.

SOC 4309. Religion and Public Life in the United States.

(3 cr. Prereq=1001 or #)

How diversity/vitality of American religion shape public life. How religious groups engage in political action, foster understandings of democracy and styles of civic participation, influence volunteering/service activities, and form individuals' views on issues such as race, poverty, the family, and sexuality.

SOC 4311. Race, Class, and the Politics of Nature. (3 cr)

Global debates over how nature is produced, consumed, degraded, sustained, and defended. Analytics of race/class. Politics of North-South relations.

SOC 4321. Sociology of Globalization: Culture, Norms, and Organization. (3 cr; A-F only. \$GLOS 4221. Prereq=1001 or #)

Globalization of organizations, political relations, and culture. Dependency and world systems theories. Growth of international nongovernmental organizations and their impact on state policies and civil society. Expansion of international norms governing nation-state behavior. Globalization of popular culture (e.g., movies, computer games). Effects on societies/individuals.

SOC 4441. Work-Family Links. (3 cr. Prereq=1001 or #)

Effects of spouses' work experiences on the family, organization of household work, adolescent employment, occupational attainment; and changes in work organizations related to the increasing prevalence of female employment and dual-earner families.

SOC 4461. Sociology of Ethnic and Racial Conflict. (3 cr. Prereq=1001 or #)

Effects of ethnic migration and of social movements. Construction of ethnic/national identities. Questions of citizenship. Rise of transnational movements, how they help shape racial/ethnic conflicts.

SOC 4521. Love, Sex, and Marriage. (3 cr)

Sociological approaches to intimate human relationships. Love, romance, dating, and mate selection. Sexuality, cohabitation, marriage, and related public policy debates. Current U.S. practices in historical/cross-cultural context.

SOC 4551. Sociology of Sexualities. (3 cr. Prereq=1001 or #; soc majors must register A-F)

Social scientific approaches to sexual attitudes, behaviors and identities. Taken-for-granted beliefs about naturalness of various sexual phenomena. How social forces shape people's sexual lives. Focuses on diversity of thought, behavior, and lived experience of individuals with regard to sexuality.

SOC 4601. Comparative Social Structure. (3 cr; A-F only. Prereq=1001 or #)

Comparative analysis of selected societies. Application of comparative methods to explain differences, similarities in social structure, development, trends. Topics include, social class, status, political economy, policies, social movements, ethnic identities, multicultures, demography. Methods include network models, Boolean analysis.

SOC 4681. Sociology of German Society. (3 cr; A-F only. Prereq=1001 or #)

The making of German society; institutions in cross-national comparison (including family, education, welfare state, social movements, law); and current issues of German society.

SOC 4703. Contemporary American Culture. (3 cr. Prereq=1001 or #)

Key changes in cultural life in the United States and internationally. Theories that have been developed to understand them. Topics may include work, family, social movements, media and popular culture, and politics.

SOC 4966W. Major-Project Seminar. (4 cr; A-F only. Prereq=3701, 3801, 3811, 12 cr upper div sociology, Δ)

Defining research problem. Collecting/selecting data. Analyzing data. Writing report.

SOC 4967W. Advanced Senior Project Independent Study.

(1 cr; A-F only. Prereq=3701, 3801, 3811, 12 additional upper div sociology cr, Δ)

Guided individual research for the sociology major's senior project requirement, conducted in conjunction with enrollment in an upper division sociology course.

SOC 4977W. Senior Honors Proseminar I. (3 cr; A-F only. Prereq=3701, 3801, 3811, 9 additional upper div sociology cr, sr soc honors major, Δ)

Exploring contemporary research for senior thesis. Guidance in defining a problem and reviewing prior theory/research. Presentation/discussion with faculty researchers.

SOC 4978W. Senior Honors Proseminar II. (3 cr; A-F only. Prereq=[4977W or #], 3701, 3801, 3811, at least 9 additional upper div soc cr, sr soc honors major, Δ)

Developing the methodology of senior project, researching it, and writing the thesis. Students work individually or in small groups in consultation with seminar director and other faculty. Group discussion of individual projects.

SOC 5090. Topics in Sociology. (1-3 cr [max 9 cr]. Prereq=1001 or #)

Topics specified in *Class Schedule*.

SOC 5455. Sociology of Education. (3 cr. \$EDPA 5041. Prereq=1001 or equiv or #)

Structures and processes within educational institutions. Links between educational organizations and their social contexts, particularly as these relate to educational change.

SOC 5811. Intermediate Social Statistics. (4 cr. Prereq=3811 or equiv)

Measurement, theory of probability, and bivariate statistics. Focus on multiple regression analyses of sociological data. Primarily for first-year sociology graduate students who need preparation for advanced social statistics. Undergraduates preparing for graduate programs may register upon availability.

Soil, Water, and Climate (SOIL)

Department of Soil, Water, and Climate

College of Food, Agricultural and Natural Resource Sciences

SOIL 1125. The Soil Resource. (4 cr. \$SOIL 2125, SOIL 5125)

Basic physical, chemical, and biological properties of soil. Soil genesis classification and principles of soil fertility. Soil survey information used to make a land-use plan. WWW used for lab.

SOIL 2125. Basic Soil Science. (4 cr; A-F only. \$SOIL 1125, SOIL 5125. Prereq=CHEM 1011 or CHEM 1021 or equiv)

Basic physical, chemical, and biological properties of soil. Soil genesis classification, principles of soil fertility. Use of soil survey information to make a land-use plan. WWW used for lab preparation information.

SOIL 3416. Plant Nutrients in the Environment. (3 cr. Prereq=2125)

Fundamental concepts in soil fertility and plant nutrition. Discuss dynamics of mineral elements in soil, plants, and the environment. Evaluation, interpretation, and correction of plant nutrient problems.

SOIL 3521. Soil Judging. (1 cr [max 3 cr]; A-F only. Prereq=4511)

Learn about collegiate soil judging by participating in a regional or national soil judging contest.

SOIL 4005. Lab and Field Techniques in Soil Science. (2 cr \$SOIL 5005. Prereq=2125)

Field/lab experiences for analysis of soils/landscapes. Students describe soils along a hillslope sequence, take soil samples, and perform suite of chemical, biological, and physical soil analyses. Analytical techniques, safety, quality control issues.

SOIL 4093. Directed Study. (1-7 cr [max 20 cr]. Prereq=#)

Research, readings, and instruction.

SOIL 4094. Directed Research. (1-7 cr [max 7 cr]. Prereq=#)

Research under the direction of department faculty.

SOIL 4111. Introduction to Precision Agriculture. (3 cr; A-F only. Prereq=\$; MAST 2420; Basic sciences, statistics, soil, Agronomy)

Soil, landscape, and crop spatial variability. GIS, DEM, GPS technologies. Variable rate machinery, PA software, remote sensing. Geostatistics, sampling, experimental designs. Precision integrated crop management. Data acquisition, processing, and management. Socio-economical and e-marketing aspects.

SOIL 4505. Soil Geography: Soil Variability on Planet Earth. (2 cr. Prereq=1125 or 2125 or equiv)

Distribution/formation of soils on earth's surface. Soil variability/taxonomy. How various soils interact with water, plants, microorganisms, and pollutants. Use/management of land via appreciation of earth's varied soil resources.

SOIL 4511. Field Study of Soils. (2 cr; A-F only. Prereq=2125)

Learn to write soil profile descriptions in the field. Class requires hands-on experience to determine soil texture, color, and horizon designations in the field.

SOIL 5005. Lab and Field Techniques in Soil Science. (2 cr \$SOIL 4005. Prereq=2125)

Field/lab experiences for analysis of soils/landscapes. Students describe soils along a hillslope sequence, take soil samples, and perform a suite of chemical, biological, and physical soil analyses. Lab analytical techniques, safety, quality control issues.

SOIL 5111. Practicum Internship in Precision Agriculture.

(2-5 cr [max 5 cr]; S-N only)

Practical experience in precision agriculture in agri-industry/business. Content and extent of work at the internship site is jointly decided by the instructor, host business representative, and student's principal adviser.

SOIL 5125. Soil Science for Teachers. (3 cr. \$SOIL 1125, SOIL 2125)

Basic physical, chemical, and biological properties of soil. Soil genesis classification and principles of soil fertility. WWW used for lab. Soil survey information used to make a land-use plan. Similar to 2125 with less emphasis on chemistry.

SOIL 5232. Vadose Zone Hydrology. (3 cr. Prereq=[MATH 1271 or equiv], [PHYS 1042 or equiv])

Basic soil physical properties/processes governing transport of mass/energy in soils. Emphasizes water/solute transport through unsaturated root/vadose zones, their impact on subsurface hydrology and on water quality. Lectures, hands-on laboratory exercises, discussion of real world problems, problem solving.

SOIL 5311. Soil Chemistry and Mineralogy. (3 cr. Prereq=[CHEM 1022 or equiv], PHYS 1102, grad] or #)

Structural chemistry, origin/identification of crystalline soil clay minerals. Structure of soil organic matter. Chemical processes in soil: solubility, adsorption/desorption, ion exchange, oxidation/reduction, acidity, alkalinity. Solution of problems related to environmental degradation, plant nutrition, and soil genesis.

SOIL 5515. Soil Genesis and Landscape Relations. (3 cr; A-F only. Prereq=2125 or #)

Basic soil morphology and soil profile descriptions; pedogenic processes and models of soil development; soil geomorphology, hydrology, and hillslope processes; digital spatial analysis; soil classification; soil surveys and land use; soil geography.

SOIL 5555. Wetland Soils. (3 cr; A-F only. \$ESPM 5555. Prereq=1125 or 2125 or equiv or #; #4511 recommended)

Morphology, chemistry, hydrology, formation of mineral/organic soils in wet environments. Soil morphological indicators of wet conditions, field techniques of identifying hydric soils for wetland delineations. Peatlands. Wetland benefits, preservation, regulation, mitigation. Field trips, lab, field hydric soil delineation project.

SOIL 5611. Soil Biology and Fertility. (3 cr. Prereq—2125, BIOL 1009 or equiv, CHEM 1021 or equiv, sr or grad; BIOC 3xxx, MICB 3xxx recommended)

Soil microbial populations and biodiversity. Soil microorganisms. Biogeochemical cycles. Macro and micronutrient fertilization, and element function in plants and microbes. Composts, sludge and manures in fertilization. Plant microbe associations: nitrogen fixation, mycorrhizal fungi, and biological control of root pathogens. Pollution and bioremediation.

SOIL 5711. Forest Soils. (2 cr. Prereq—1125 or 2125) Factors affecting tree growth; estimation, modification, and management effects on site productivity; regeneration.

South Asian Languages and Cultures (SALC)

Department of Asian Languages and Literatures

College of Liberal Arts

SALC 1506. Introduction to Contemporary South Asia. (3 cr)

Land, people, modern historical development, contemporary problems, global setting, and future outlook of South Asia.

SALC 1607. Introduction to Indian Civilization. (3 cr)

Indian civilization in light of its development. Social, cultural, economic, and political life. Hindu, Muslim, and Buddhist contributions.

SALC 3201. Ancient Indian Literature in Translation. (3 cr) Literary achievements of Indian civilization from the ancient period.

SALC 3202. Modern Indian Literature in Translation. (3 cr) Literary achievements of Indian civilization from the modern period.

SALC 3204. Folklore of India. (3 cr)

A study of the main genres of Indian folklore: folk tales, folk songs, folk epics, folk dramas, proverbs, and riddles; their relationship to Indian society and inter-relationship with literary traditions, both great and small.

SALC 3411. Introduction to Indian Philosophy. (3 cr) Major concepts; principal schools of Indian philosophy; traditional and contemporary views.

SALC 3412. Hinduism. (3 cr)

Development of Hinduism focusing on sectarian trends, modern religious practices, myths and rituals, pilgrimage patterns and religious festivals, and the interrelationship between Indian social structure and Hinduism.

SALC 3413. Buddhism. (3 cr. §SALC 5413)

Historical account of Buddhist religion in terms of its rise, development, various schools, and common philosophical concept. Indian Buddhism, compared with Hinduism; Buddhism's demise and revival on the Indian subcontinent.

SALC 3414. Comparative Religions of South Asia. (3 cr. §SALC 5414)

Compares and contrasts basic philosophical concepts, literatures, ideologies, and ritualistic practices of Hinduism, Buddhism, and Jainism with those of Islam and Sikhism.

SALC 3456. The Cinema of India. (3 cr. §SALC 5456)

Survey of cinema of South Asia; aesthetic, social, economic, and political perspectives.

SALC 3506. Introduction to Contemporary South Asia. (3 cr)

Land, people, modern historical development, contemporary problems, global setting, and future outlook of South Asia.

SALC 3521. Gandhi and Non-Violent Revolution. (3 cr. §SALC 5521)

Character of Gandhi, his influence over contemporaries, and his hold on the world today.

SALC 3556. Women in India: Role and Repression. (3 cr. §SALC 5556)

Representation of Indian women studied through literature of contemporary Indian women and against background of traditional Indian values and roles.

SALC 3607. Introduction to Indian Civilization. (3 cr)

Indian civilization in light of its development. Social, cultural, economic, and political life. Hindu, Muslim, and Buddhist contributions.

SALC 3900. Topics in South Asian Literature. (1-4 cr [max 12 cr]. Prereq—Topics in South Asian literature)

Topics specified in *Class Schedule*.

SALC 5011. Indo-Aryan Linguistics. (3 cr)

Phonological, morphological, and syntactic developments; Indo-European, Old Indo-Aryan, Middle Indo-Aryan, Hindi, and other major modern Indo-Aryan languages.

SALC 5090. Instruction in South Asian Languages. (3-5 cr [max 5 cr])

Individualized instruction in one of the South Asian languages.

SALC 5201. Ancient Indian Literature in Translation. (3 cr) Literary achievements of Indian civilization from the ancient period.

SALC 5202. Modern Indian Literature in Translation. (3 cr) Literary achievements of Indian civilization from the modern period.

SALC 5204. Folklore of India. (3 cr)

A study of the main genres of Indian folklore—folk tales, folk songs, folk epics, folk dramas, proverbs, and riddles—their relationship to Indian society and inter-relationship with literary traditions, both great and small.

SALC 5411. Introduction to Indian Philosophy. (3 cr)

Major concepts; principal schools of Indian philosophy; traditional and contemporary views.

SALC 5412. Hinduism. (3 cr)

Development of Hinduism focusing on sectarian trends, modern religious practices, myths and rituals, pilgrimage patterns and religious festivals, and the interrelationship between Indian social structure and Hinduism.

SALC 5413. Buddhism. (3 cr. §SALC 3413)

Historical account of Buddhist religion in terms of its rise, development, various schools, and common philosophical concept. Indian Buddhism compared with Hinduism; Buddhism's demise and revival on the Indian subcontinent.

SALC 5414. Comparative Religions of South Asia. (3 cr. §SALC 3414)

Compares and contrasts basic philosophical concepts, literatures, ideologies, and ritualistic practices of Hinduism, Buddhism, and Jainism with those of Islam and Sikhism.

SALC 5456. The Cinema of India. (3 cr. §SALC 3456)

Survey of cinema of South Asia; aesthetic, social, economic, and political perspectives.

SALC 5500. Problems in Indian Philosophy. (3 cr. Prereq—3411 or 3412 or 3413 or 5411 or 5412 or 5413)

An introduction to Indian philosophy emphasizing analyses of mind and knowledge.

SALC 5521. Gandhi and Non-Violent Revolution. (3 cr. §SALC 3521)

Character of Gandhi, his influence over contemporaries, and his hold on the world today.

SALC 5556. Women in India: Role and Repression. (3 cr. §SALC 3556)

Representation of Indian women studied through literature of contemporary Indian women and against background of traditional Indian values and roles.

SALC 5710. Seminar in South Asian Languages. (4-5 cr [max 5 cr])

Selected topics on South Asian languages; no knowledge of South Asian languages required.

SALC 5720. Seminar in South Asian Literature. (3-4 cr [max 4 cr])

Selected topics on South Asian literature.

SALC 5730. Seminar in South Asian Culture. (4-5 cr [max 5 cr])

Selected topics on South Asian cultures.

SALC 5833. India's Gods and Goddesses. (3 cr)

Indian history examined by following development of the deities Krishna, Shiva, and Kali.

SALC 5993. Directed Studies. (1-5 cr [max 5 cr]. Prereq—#, Δ, □)

Guided individual reading and study of topics not covered in regular courses. Open to qualified students for one or more semesters.

SALC 5994. Directed Research. (1-5 cr [max 5 cr]. Prereq—#, Δ, □)

Directed research on topics of language, literature, or civilization selected by qualified students with consent of instructor and studied on tutorial basis.

Spanish (SPAN)

Department of Spanish and Portuguese Studies

College of Liberal Arts

SPAN 144. Intermediate Medical Spanish. (0 cr; S-N only. Prereq—[1st yr college-level Spanish or equiv], Δ)

Vocabulary of Spanish medical terms, skills in report writing, proper format for medical communications. Developing conversational fluency for medical-related topics.

SPAN 221. Reading Spanish. (0 cr; S-N only)

Intensive reading of a variety of texts to provide a basic reading knowledge of Spanish. At the end of the semester students may take the equivalent of the Spanish Graduate Reading Examination.

SPAN 344. Advanced Medical Spanish. (0 cr; S-N only. Prereq—Span 0144, 2 yrs. Spanish College Level or equiv, Δ)

0 cr. course designed to further develop and strengthen the language skills and cultural awareness students have been exposed to and acquired in Interm Med Span 0144, a course designed to help care professionals communicate with patients who speak Spanish.

SPAN 1001. Beginning Spanish. (5 cr. Prereq—Less than 2 yrs of high school Spanish, Δ, no college-level Spanish)

Listening, speaking, reading, writing. Emphasizes development of communicative competence. Cultural readings.

SPAN 1002. Beginning Spanish. (5 cr. Prereq—1001 completed at UMNTC, Δ)

Listening, speaking, reading, writing. Emphasizes development of communicative competence. Cultural readings.

SPAN 1003. Intermediate Spanish. (5 cr. Prereq—[1002 or 1022] or EPT placement)

Speaking/comprehension. Developing reading/writing skills based on materials from Spain/Spanish America. Grammar review. Compositions, oral presentations.

SPAN 1004. Intermediate Spanish. (5 cr. §SPAN 1014, SPAN 1044. Prereq—1003 or EPT placement)

Speaking/comprehension. Developing reading/writing skills based on materials from Spain/Spanish America. Grammar review. Compositions, oral presentations.

SPAN 1014. Business Spanish. (4 cr. §SPAN 1004, SPAN 1044. Prereq—1003 or Δ, #)

Vocabulary, report writing skills, proper format for business communications, conversational fluency on trade-related topics.

SPAN 1022. Alternate Second-Semester Spanish. (5 cr. Prereq—Placement above 1001)

For students who have studied Spanish in high school or at a community college, or who are transfer students. Begins with an accelerated review of 1001 followed by material covered in 1002.

- SPAN 1041. Beginning Medical Spanish.** (4 cr; A-F only)
Practical Spanish terminology, functional grammar, conversational fluency on medical-related topics.
- SPAN 1044. Intermediate Medical Spanish.** (5 cr. §SPAN 1004, SPAN 1014. Prereq–1003 or equiv)
Language needed by health-care workers who interact with Spanish-speaking patients. Basic medical vocabulary, questions/answers in common medical situations. Vocabulary/phrases to conduct patient interviews and physical exams. Readings on Latin American view of health and health care.
- SPAN 1054. Spanish for Heritage Students.** (5 cr. Prereq–#, LPE for diagnostic purposes)
Development of academic Spanish through reading/writing. Advanced grammar/orthography.
- SPAN 1905. Freshman Seminar.** (3 cr; A-F only. Prereq–Fr with no more than 29 cr)
Topic specified in *Class Schedule*.
- SPAN 1907W. Topics: Freshman Seminar.** (3 cr; A-F only. Prereq–Fr with no more than 29 cr)
Topics specified in *Class Schedule*.
- SPAN 1910W. Freshman Seminar.** (3 cr. Prereq–Fr)
Topics specified in Course Guide.
- SPAN 3015. Spanish Composition and Communication.** (4 cr. Prereq–[1004 or 1014 or 1044], LPE high pass)
Comprehending written/spoken texts. Speaking, reading, writing beyond intermediate level.
- SPAN 3021. Advanced Communication Skills.** (4 cr. Prereq–3015)
Improving language skills for fluency/accuracy in Spanish.
- SPAN 3022. Advanced Business Spanish.** (4 cr. Prereq–[[1014 or 1004 or 1044 or equiv], LPE in Spanish] or #)
Vocabulary of Spanish business terms. Skills in report writing, proper format for business/formal communications. Developing conversational fluency on trade-related topics.
- SPAN 3044. Advanced Medical Spanish.** (4 cr. Prereq–[[1004 or 1014 or 1044 or equiv], LPE in Span] or #)
How to communicate more effectively in linguistic/cultural terms with Spanish speaking patients. Students explore more advanced/specific medical vocabulary, communication strategies, and related cultural aspects. Conducting patient interviews and medical history. Using vocabulary/conversation to conduct physical exams. Latin American views on health and health care.
- SPAN 3104W. Introduction to the Study of Hispanic Literatures.** (3 cr; A-F only. §TLDO 3104. Prereq–[3015 with grade of at least B-], LPE high pass)
Various ways of understanding structure of diverse texts, interpreting their meaning.
- SPAN 3105W. Introduction to the Study of Hispanic Cultures.** (3 cr. Prereq–[3015 with grade of at least B-], LPE high pass)
Cultural issues generated by integration of Americas into emerging world system via Spanish/Portuguese empires.
- SPAN 3107W. Introduction to the Study of Hispanic Linguistics.** (3 cr. Prereq–[3015 with grade of at least B-], LPE high pass)
Phonology, morphology, syntax, semantics, lexicology, pragmatics, discourse analysis, sociolinguistics, history of Spanish language. Hispanic linguistics as theoretical discipline. Its relationships with social, cultural, literary studies.
- SPAN 3211. Discourses of Imperial Spain, 1492-1800.** (3 cr. §TLDO 3211. Prereq–3104)
Major literary genres of Spain (epic, lyric, narrative, dramas, novels, essays) from Middle Ages/Golden Age to Enlightenment. Representative works (ballads, picaresque “vidas,” tragedies, mystical verse, novellas) within historical/cultural contexts.
- SPAN 3212. Discourses of Modern and Contemporary Spain, 1800-Present.** (3 cr. Prereq–3104)
Representative works of fiction, drama, poetry, essay, and film of the past two centuries. Intellectual/literary movements, from romanticism to postmodernism.
- SPAN 3221. Latin American Colonial Discourses Since 1492.** (3 cr. Prereq–3104 or 3105)
Critical account of conquest, colonization, and resistance in Spanish America.
- SPAN 3222. Discourses of Modern and Contemporary Latin America.** (3 cr. §TLDO 3222. Prereq–3104 or 3105)
Development of Spanish American modernity, its literary expression since independence from colonial rule. Case studies (e.g., Cuba).
- SPAN 3401. Service Learning in the Chicano/Latino Community.** (3 cr. Prereq–[3015 with grade of at least B-], LPE high pass)
Students participate in Spanish-speaking community organizations; analyze academic materials dealing with race, class, gender, and current patterns of power in the United States; and relate their findings to their community experience.
- SPAN 3404. Medical Spanish and Community Health Service.** (3 cr. Prereq–3015 with grade of at least B- or [1044, high pass on at least three sections of LPE])
How to create materials for effective communication with Spanish-speaking patients. Students apply academic knowledge in work with community health care partners who serve Chicano/Latino population.
- SPAN 3501. Roots of Modern Spain and Latin America.** (3 cr. §SPAN 3501H. Prereq–3105W)
Cultural, political, and economic development of Spain and Latin America, from origins to beginning of 19th century. Hispania under Roman Empire. Coexistence of Jews, Christians, and Muslims in Medieval Spain. Mexican and indigenous pre-Hispanic cultures. Arrival of Europeans to New World. Culture in Golden Age. Crisis of Spanish Empire. Architecture, historic documents, music, and visual arts
- SPAN 3502. Modern Spain.** (3 cr. Prereq–3105)
Spanish culture, from beginning of 19th century to present. Cultural change and its conflicts as represented in Spanish art, literature, film, and Nationalisms.
- SPAN 3510. Issues in Hispanic Cultures.** (3 cr [max 9 cr]; A-F only. Prereq–3105W)
Practices that have shaped cultural identity of Spanish-/Portuguese-speaking areas. Folklore, religion, armed conflict, drug traffic, language/citizenship, political movements, commodification of national myths/icons. Topics vary.
- SPAN 3512. Modern Latin America.** (3 cr; A-F only. Prereq–3105W)
Impact of various forms of modernization on symbolic production in Latin American racial, ethnic, class relations, institutional, and ideological structures.
- SPAN 3612. The *Man of La Mancha* and Quixotic Discourse.** (3 cr)
Narrative techniques and points of view in *Don Quixote*; historical, cultural, and intellectual conditions under which the novel was read and debated. Taught in English.
- SPAN 3653. Contemporary Latino and Latin American Drama Written in English.** (3 cr. Prereq–1001 or equiv)
Established works and works-in-progress of the most active Latino playwrights in the United States and historical, political, and cultural developments that make them possible. Lectures, discussion, performances, and visual material. Taught in English.
- SPAN 3699. Study of Advanced Spanish Language Abroad.** (1-5 cr [max 5 cr]. Prereq–Two yrs college-level Spanish, Δ)
Study of advanced Spanish language in a Spanish-speaking country.
- SPAN 3701. Structure of Spanish: Phonology and Phonetics.** (3 cr. §SPAN 3701H. Prereq–3107)
Phonetics/phonology of modern Spanish. Regional/social variants of the language in Spain and Spanish America.
- SPAN 3702. Structure of Spanish: Morphology and Syntax.** (3 cr. §SPAN 3702H. Prereq–3107)
Derivational/inflectional morphology. Using linguistic concepts such as morpheme, flexional affix, noun phrase, subject, subordination, and coordination to identify different morphological/syntactic components of Spanish.
- SPAN 3703. Origins and History of Spanish and Portuguese.** (3 cr. §TLDO 3703. Prereq–3107 or #)
Relationships with Latin; intermediate stages of evolution not considered. Phonetic, morphological, syntactic, and sociolinguistic aspects of diachronic variation.
- SPAN 3704. Sociolinguistics of the Spanish-Speaking World.** (3 cr. §SPAN 3704H. Prereq–3107)
Social variants of Spanish dialects, Spanish in contact with other languages, bilingualism, language attitudes, pragmatic analysis of Spanish. Impact of recent cultural, political, and socioeconomic transformations on language.
- SPAN 3705. Semantics and Pragmatics of Spanish.** (3 cr. §SPAN 3705H. Prereq–3107)
Sense relations. Semantics and grammar. Theme, rhyme, and focus. Spanish lexicon. Context, style, culture. Communicative competence. Speech acts.
- SPAN 3706. Spanish Applied Linguistics.** (3 cr. Prereq–3107)
Introduction to main areas of Spanish applied linguistics. Second language acquisition processes, Spanish language from English-speaking learner’s point of view. Sociolinguistic aspects of language learning.
- SPAN 3707. Linguistic Accuracy Through Translation.** (3 cr. Prereq–3104 or 3105 or 3107)
Various texts in Spanish examined in terms of style/audience/lexicon (popular press, business, academic) as framework for training to communicate with accuracy in various contexts. Students apply lexical/grammatical choices in translating a text.
- SPAN 3730. Topics in Hispanic Linguistics.** (3 cr [max 9 cr]. Prereq–3107)
Topics specified in *Class Schedule*.
- SPAN 3800. Film Studies in Spanish.** (3 cr [max 9 cr]. Prereq–3104W or 3105W)
Films from Spanish-speaking worlds in their historical, (geo)political, and socio-economic contexts. Production/consumption, popular/high cultures, and national/trans-national identities within various theoretical backgrounds. Films from various countries analyzed under interdisciplinary framework noting cinematographical rhetorics.
- SPAN 3910. Topics in Spanish Peninsular Literature.** (3 cr [max 9 cr]; A-F only. Prereq–3104)
Focus on a central theme related to important groups of writers, literary movements, trends, critical approaches, and methods. Topics specified in *Class Schedule*.
- SPAN 3920. Topics in Spanish-American Literature.** (3 cr [max 9 cr] §SPAN 3920H. Prereq–3104)
Central theme related to important groups of writers, literary movements, trends, critical approaches, and methods. Topics specified in *Class Schedule*.
- SPAN 3950. Figures in Spanish American Literature.** (3 cr [max 9 cr]; A-F only. §SPAN 3950H. Prereq–3104)
One major writer or group of writers whose work has had an impact on thought, literature, or social problems. Figures are specified in *Class Schedule*.
- SPAN 3970. Directed Studies.** (1-4 cr [max 9 cr]. Prereq–#, Δ, □)
Guided individual reading or study in Hispanic linguistics, language acquisition, cultural studies, and peninsular, Latin American, and U.S. Latino theatre and literatures.

SPAN 3972V. Honors: Graduation Seminar. (3 cr; A-F only. §SPAN 3972W. Prereq-§: 3972W, 3974; 31 cr of 3xxx, honors, Δ)

Work on major project about Hispanic linguistics, language acquisition, or cultural studies, or about peninsular or Latin American or U.S. Latino theatre/literatures.

SPAN 3972W. Graduation Seminar. (3 cr; A-F only. §SPAN 3972V. Prereq-§: 3972V, 3974; 31 cr of 3xxx, #)

Work on major project about Hispanic linguistics. Language acquisition. Cultural studies. Peninsular, Latin American, U.S. Latino theatre/literatures.

SPAN 5106. The Literature of the Reconquest and Feudal Spain. (3 cr. Prereq-Three 3xxx or 5xxx literature courses in Spanish)

The major literary genres developed in Spain from the Reconquest to 1502, with reference to the crucial transformations of the Middle Ages, including primitive lyric, epic, clerical narrative, storytelling, debates, collections, chronicles, “exempla,” and the Celestina (1499-1502).

SPAN 5107. The Literature of the Spanish Empire and Its Decline. (3 cr. Prereq-Three 3xxx or 5xxx literature courses in Spanish or Portuguese)

Major Renaissance and Baroque works of the Spanish Golden Age (16th- and 17th-century poetry, nonfiction prose, novel, drama) examined against the historical background of internal economic decline, national crisis, and ideological apparatus developed by the modern state.

SPAN 5108. Don Quixote. (3 cr. Prereq-three 3xxx or 5xxx literature courses in Spanish or Portuguese)

Analysis of Cervantes’ *Don Quixote* in its sociohistorical context; focus on the novel’s reception from the romantic period to postmodern times.

SPAN 5109. The Crisis of the Old Regime: Spanish Literature of the Enlightenment and Romanticism. (3 cr. Prereq-Three 3xxx or 5xxx literature courses in Spanish or #)

Major literary works and intellectual movements and conflicts represented in written culture, of the 18th and early 19th centuries (1680-1845), examined as expressions of the long crisis of Spain’s Old Regime and the rise of bourgeois liberalism.

SPAN 5110. Discursive Formations at the Threshold of 20th-Century Spain. (3 cr. Prereq-Three 3xxx or 5xxx literature courses in Spanish or #)

Theory and representative examples of the realist/naturalist novel (Galdós, Pardo Bazán) in the context of its antecedents (“costumbrismo”), opposites (the idealist/sentimental novel), and turn-of-the-century innovations of modernism and the “generation of 1898.”

SPAN 5111. Contemporary Spanish Literature Since 1915. (3 cr. Prereq-Three 3xxx or 5xxx literature courses in Spanish or #)

Major literary works and movements in Spain from 1915 to 2000. Neomodernism; surrealism; social realism; literatures of dictatorship and exile; postmodernism. Poetry, novel, drama, essays, film, video/TV; problems of literary history.

SPAN 5221. Spanish Drama in Performance: 17th-Century Comedia. (3 cr. Prereq-Three 3xxx or 5xxx literature courses in Spanish or Portuguese)

Major dramatists of the Spanish comedia (e.g., Cervantes, Lope, Tirso, Calderón). Traditional genres such as tragedy, farce, interludes or auto sacramentales and problems of honor, blood purity, free will, city vs. country, and poetic justice examined against the background of cultural and social history.

SPAN 5234. Feminism and Literature in Spain. (3 cr. Prereq-Three 3xxx or 5xxx literature courses in Spanish or Portuguese or #)

Spanish feminist thought and practice; literature, cultural discourse, literary and critical theory.

SPAN 5316. Spanish Picaresque Narratives. (3 cr. Prereq-three 3xxx or 5xxx literature courses in Spanish or Portuguese) Major picaresque narratives—*Lazarillo, Guzmán, Buscón*.] Cervantes’ *Picaros, Estebanillo González*—in relation to Spanish ambience, Western tradition, European novel, realism. Literary autobiography, episodic structure, themes of roguery, delinquency, sin, marginality, social criticism, moral preoccupations. Comparison to European counterparts.

SPAN 5525. Caribbean Literature: An Integral Approach. (3 cr. Prereq-Three [3xxx or 5xxx] literature courses in Spanish or #)

Literature of Spanish-speaking Caribbean. Emphasizes historical legacy of slavery, African culture, and independence struggles.

SPAN 5526. Colonial Discourse in Spanish American Writing. (3 cr. Prereq-Three 3xxx or 5xxx literature courses in Spanish)

Discourse production in Spanish America between 1492 and 1700. Conquest and colonial writing/counterwriting. Historical origin, evolution, and impact of cultural, political, and socioeconomic factors.

SPAN 5528. Popular Literary Consciousness: 1900-1950. (3 cr. Prereq-Three 3xxx or 5xxx lit courses in Spanish or Portuguese or Δ)

Spanish-American literature between the eve and aftermath of the two world wars. Impact of modernization, industrialization, and nationalistic and populist thought on emergence of distinctive writing, thematic trends, and literary genre conventions.

SPAN 5529. National Affirmation and Transnationalization. (3 cr. Prereq-Three 3xxx or 5xxx literature courses in Spanish or #)

Literary trends of the contemporary period (1950 to present) as a reaction to internal social demands for development of independent national cultures and in response to international cultural pressures.

SPAN 5531. Hispanic Literature of the United States. (3 cr. Prereq-Three 3xxx or 5xxx Spanish or Portuguese literature courses or #)

Interdisciplinary approach providing a framework for deconstructing issues of national identity, marginalization, and gender. U.S. Hispanic theatre/literature and its ethnic diversity, regional variations, cultural links, and scope of its genres.

SPAN 5532. Literature and National Disintegration. (3 cr) Literary reaction to contemporary structural changes in world economic system (1970 to present).

Effects on literature as institution. Texts related to revolutionary trends and social movements (feminism, theology of liberation, defense of human rights).

SPAN 5701. History of Ibero-Romance. (3 cr. Prereq-3703, two other 3xxx or 5xxx Spanish linguistics courses or #)

Origins and developments of Ibero-Romance languages; evolution of Spanish, Portuguese, and Catalan.

SPAN 5711. The Structure of Modern Spanish: Phonology. (3 cr. Prereq-3701, two 3xxx or 5xxx linguistics courses in Spanish or #)

Formulating and evaluating a phonological description of Spanish. Approaches to problems in Spanish phonology within metrical, autosegmental, and lexical phonological theories.

SPAN 5713. The Structure of Modern Spanish: Syntax. (3 cr. Prereq-3702, two 3xxx or 5xxx Spanish linguistics courses or #)

Study and analysis of the principal constructions found in the syntax of Spanish.

SPAN 5714. Theoretical Foundations of Spanish Syntax. (3 cr. Prereq-5713 or #)

Linguistic types/processes that appear across languages. Grammatical relations, word order, transitivity, subordination, information structure, grammaticalization. How these are present in syntax of Spanish.

SPAN 5715. The Structure of Modern Spanish: Semantics. (3 cr)

Applying semantic theory to Spanish: conceptual organization and the structuring of experience; meaning and cultural values; semantic fields; categorization and prototypes; cognitive model theory; metaphor, metonymy, and mental imagery as source and change of meaning.

SPAN 5716. The Structure of Modern Spanish: Pragmatics. (3 cr. Prereq-#)

Concepts used in current literature in Spanish pragmatics, such as deixis, presupposition, conversational implicature, speech act theory, and conversational structure.

SPAN 5717. Spanish Sociolinguistics. (3 cr. Prereq-Two 3xxx or 5xxx linguistics courses in Spanish or #)

Sociolinguistic variation, cross-dialectal diversity in different varieties of Spanish in Latin America and Spain. Impact of recent cultural, political, and socioeconomic transformations on language.

SPAN 5718. Spanish Language Contact. (3 cr. Prereq-Two 3xxx or 5xxx linguistics courses in Spanish or #)

Analysis of different types/results of Spanish language contact globally, taking into account varying social conditions under which contact occurs.

SPAN 5721. Spanish Laboratory Phonology. (3 cr; A-F only. Prereq-[5711, honors] or grad student or #)

Core literature on Spanish laboratory phonology. Phonology from a laboratory perspective. Students evaluate laboratory research methodologies, perform basic acoustic analyses, and design laboratory phonology studies.

SPAN 5910. Topics in Spanish Peninsular Discourses. (3 cr [max 9 cr]. Prereq-Three 3xxx or 5xxx literature courses in Spanish or Portuguese)

Problems in Spanish cultural history and their applicability to studies of artistic movements, ideological trends, formal methods, or literary genres. Topics specified in *Class Schedule*.

SPAN 5920. Topics in Spanish-American Discourses. (3 cr [max 9 cr]. Prereq-3104 or Δ)

Spanish-American literature analyzed according to important groups, movements, trends, methods, and genres. Specific approaches depend on topic and instructor. Topics specified in *Class Schedule*.

SPAN 5930. Topics in Ibero-Romance Linguistics. (3 cr [max 9 cr])

Problems in Hispanic linguistics; a variety of approaches and methods.

SPAN 5970. Directed Readings. (1-4 cr [max 9 cr]. Prereq-MA or PhD candidate, #, Δ, □)

Students must submit reading plans for particular topics, figures, periods, or issues. Readings in Spanish and/or Spanish-American subjects.

SPAN 5985. Sociolinguistic Perspectives on Spanish in the United States. (3 cr. Prereq-Three 3xxx or 5xxx linguistics courses in Spanish or #)

Sociolinguistic analysis of issues such as language maintenance/shift in U.S. Latino communities, code switching, attitudes of Spanish speakers toward varieties of Spanish and English, language change in bilingual communities, and language policy issues.

SPAN 5990. Directed Research. (1-4 cr [max 9 cr]. Prereq-#, Δ, □)

SPAN 5991. The Acquisition of Spanish as a First and Second Language. (3 cr. Prereq-Three 3xxx or 5xxx linguistics courses in Spanish or #)

Analysis of issues such as the acquisition of Spanish and English by bilingual children; Spanish in immersion settings; developmental sequences in Spanish; classroom language learners’ attitudes, beliefs, and motivation; development of pragmatic competence.

Spanish and Portuguese (SPPT)

Department of Spanish and Portuguese Studies

College of Liberal Arts

SPPT 5930. Selected Topics in Hispanic and Lusophone Cultural Discourse. (3 cr [max 9 cr]; A-F only. Prereq—Reading knowledge of Span and Port)

Cultural discourses in Spanish- and Portuguese-speaking areas. Historical intersections/divergences. Taught in Spanish or Portuguese, and in English when cross-listed. Topics specified in *Class Schedule*.

SPPT 5999. The Teaching of College-Level Spanish: Theory and Practice. (3 cr. Prereq—Grad or #)

Theoretical grounding in the general principles of second language acquisition and guidance with their practical applications to the teaching of first- and second-year Spanish at the college-level.

Speech-Language-Hearing Sciences (SLHS)

Department of Speech-Language-Hearing Sciences (SLHS)

College of Liberal Arts

SLHS 1301V. Physics & Bio Honors. (4 cr; A-F only)

Physics/biology of spoken language, from talker's production of sounds/words, to transmission of sound, to listener's perception of what was said. Computer analysis/synthesis of speech.

SLHS 1301W. The Physics and Biology of Spoken Language. (4 cr)

Physics and biology of spoken language, from the talker's production of sounds and words, to the transmission of sound, to the listener's perception of what was said. Computer analysis and synthesis of speech.

SLHS 1302. Rate Your World: Quantifying Judgments of Human Behavior. (3 cr)

Basic quantitative methods as they apply to measuring human behavior. Mathematical principles applied to measuring behaviors such as rating personality/attention, evaluating infant speech perception, studying opinion polls, measuring voice/sound, quantifying speech recognition through cochlear implants. Lecture, hands-on activities.

SLHS 1401. Communication Differences and Disorders. (3 cr. §SLHS 3401)

Disorders of spoken communication, their functional effect on quality of life for individuals with communication disorders. Intervention techniques for specific disorders of speech, language/hearing in context of social, cultural, linguistic diversity.

SLHS 1402. The Talking Brain. (3 cr)

How brain produces/understands speech/language. Basic anatomy/physiology of parts of nervous system involved in producing/understanding speech/language. Differences in brain structure/function among normal individuals and people with brain injury. How brain and brain injuries are presented in mass media.

SLHS 1902. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics vary. See *Class Schedule*.

SLHS 1905. Freshman Seminar. (3 cr; A-F only)

SLHS 3301. Introduction to Acoustics. (3 cr)
Elements of acoustics necessary to understand quantitative aspects of speech and hearing science, speech-language pathology, and audiology. Nature of sound, sound transmission, simple harmonic motion, sound intensity and pressure, complex waves, resonance and filtering, and distortion.

SLHS 3302. Anatomy and Physiology of the Speech and Hearing Mechanisms. (3 cr)

Gross anatomy and basic physiology of the nervous, auditory, respiratory, laryngeal, velopharyngeal, and orofacial systems with emphasis on normal communication processes.

SLHS 3303. Language Acquisition and Science. (3 cr)

Survey of typical language development, major theoretical perspectives about development. Applications of current theory to analysis of children's language.

SLHS 3304. Phonetics. (3 cr. §SLHS 5304)

Phonetic analysis, transcription of speech. Articulatory correlates of speech sounds. Extensive practice transcribing. Emphasizes narrow transcription of normal adult English, special populations in Speech-Language Pathology. Non-English IPA sounds needed for special populations.

SLHS 3305W. Speech Science. (4 cr. Prereq—[3301, 3302, 5303] or [CDis 3301, CDIs 3302, CDIs 3304] or #)

A survey of theories, methods, and research in the discipline of speech science, including speech acoustics, speech perception, and speech production.

SLHS 3306. Hearing Science. (3 cr. Prereq—[3301, 3302] or [CDIs 3301, CDIs 3302] or #)

Theories, methods, and research in psychological/physiological acoustics. Emphasizes relation between physiological measures and perception. Cochlear mechanics, auditory nerve firing patterns, scaling, object perception.

SLHS 3401. Communication Differences and Disorders. (3 cr. §SLHS 1401)

Disorders of spoken communication, their functional effect on quality of life for individuals with communication disorders. Intervention techniques for specific disorders of speech/language/hearing in context of social, cultural, linguistic diversity.

SLHS 3402W. Major Project in Speech and Hearing Science. (3 cr; S-N only. Prereq—Jr or sr CDIs or SLHS major)

Seminar for completion of undergraduate major project.

SLHS 3555H. Honors Thesis. (1-2 cr [max 2 cr]; A-F only.

Prereq—See dir of undergrad studies for (thesis adviser, forms) Research/writing under direction of faculty member. Details of work are determined in consultation with faculty thesis adviser selected based on availability/topic.

SLHS 3900. Topics: Speech-Language-Hearing Sciences. (1-3 cr [max 3 cr])

SLHS 3994. Directed Research. (1-12 cr [max 24 cr]. Prereq—Undergrad doing Research)

SLHS 4301. Introduction to the Neuroscience of Human Communication. (3 cr)

Basic neuroanatomy and neurophysiology, especially as they relate to normal speech, language, and hearing processes.

SLHS 4502. Atypical Speech and Language. (3 cr)

Language conveyed through speech. Normal variation in speech/language that guides understanding of individual differences among speakers will be studied. Breakdowns in speech/language across lifespan in context of cultural/linguistic diversity.

SLHS 4602. Communication and Problem Behavior. (3 cr)

Social/environmental variables on young children's propensity for problem behavior. Communication strategies that have been validated as a component in reducing problem behavior.

SLHS 4801. Hearing Measurement and Disorders. (3 cr. Prereq—[3301, 3302] or [CDIs 3301, CDIs 3302] or #)

Introduction to theory, administration, and interpretation of behavioral/physiological hearing tests for all age groups. Immittance, pure tone, speech, otoacoustic emissions, evoked potential measures. Emphasizes hearing-screening protocols.

SLHS 4802. Rehabilitative Audiology. (3 cr. Prereq—[3305, 4801] or [CDIs 3305, CDIs 4801] or #)

Survey of sensory aids/methods used in rehabilitation across life span after diagnosis of hearing loss. Degree of hearing loss, developmental level, communication modalities, client/family choice, disability, cultural considerations.

SLHS 5304. Phonetics. (3 cr. §SLHS 3304)

Phonetic analysis, transcription of speech. Articulatory correlates of speech sounds. Extensive practice transcribing. Emphasizes narrow transcription of normal adult English, special populations in Speech-Language Pathology. Non-English IPA sounds needed for special populations.

SLHS 5401. Counseling and Professional Issues. (3 cr.

Prereq—[¶1 8720 or ¶18820], grad student] recommended) Basic counseling principles and current professional issues in communication disorders. Application of counseling theory to clinical practice. Analysis of regulation, practice, and future direction of communication disorders.

SLHS 5402. Assessment and Treatment in Speech-Language Pathology. (3 cr; A-F only. Prereq—Grad student or #)

Introduction to clinical methods/issues in communication disorders. Professional/legal mandates, collection/analysis of clinical data, principles/models of intervention with adults/children, clinical reporting.

SLHS 5501. Fluency and Phonological Disorders. (3 cr. Prereq—Grad student or #)

Description, nature, and treatment of fluency disorders in children/adults. Involvement in therapeutic/research activities.

SLHS 5502. Voice and Cleft Palate. (3 cr. Prereq—[3305, 4301] or [CDIs 3305, CDIs 4301] or #)

Normal/disordered aspects of voice and resonance. Organic/functional voice disorders, laryngectomy, cleft palate. Nature and clinical management of these disorders.

SLHS 5503. Dysphagia and Motor Speech Disorders. (3 cr. Prereq—[3305, 4301] or [CDIs 3305, CDIs 4301] or #)

Nature/management of motor speech disorders in adults/children. Dysarthria, apraxia.

SLHS 5603. Language and Cognitive Disorders in Children. (3 cr. Prereq—3303 or CDIs 3303 or equiv or grad student or #)

Language assessment, teaching procedures used with children/adolescents. Procedures apply to children who face language disabilities such as developmental delays, autism, learning disabilities.

SLHS 5605. Language and Cognitive Disorders in Adults. (3 cr. Prereq—[3302, 4301] or [CDIs 3302, CDIs 4301] or #)

Neurogenic communicative and cognitive disorders in adults, including aphasia, right-hemisphere syndrome, traumatic brain injury, and dementia. Consideration of neurologic substrates, assessment and diagnosis, and clinical intervention.

SLHS 5606. Introduction to Augmentative and Alternative Communication. (3 cr)

Description of the range of augmentative and alternative communication applications for persons with developmental and acquired disabilities.

SLHS 5607. Electronic Communication Aids. (3 cr. Prereq—5606 or #)

SLHS 5608. Clinical Issues in Bilingualism and Cultural Diversity. (3 cr. Prereq—3303 or equiv or #)

Topics in cultural diversity, bilingualism, and second language learning needed for clinical competency in speech-language pathology. Basic/applied issues across a broad range of culturally/linguistically diverse populations.

SLHS 5801. Audiologic Assessment I. (3 cr. Prereq—4801 or CDIs 4801 or #)

Basic audiometric battery, including pure tones, speech, masking, and immittance in adults. Industrial audiology, otoacoustic emissions.

SLHS 5802. Hearing Aids I. (3 cr. Prereq-[3305, 4801] or [CDIs 3305, CDIs 4801] or #)

Survey of modern hearing aids including history of development, electroacoustic functions, clinic and laboratory measurement techniques, sound field acoustics, techniques for selection.

SLHS 5803. Hearing Loss in Children: Diagnosis. (3 cr. Prereq-4801 or CDIs 4801 or #)

Behavioral, physiological approaches to assessment and identification, development of the auditory mechanism, etiologies of hearing losses in infants, children, selection of sensory aids, principles of case management with children and families.

SLHS 5804. Cochlear Implants. (3 cr; A-F only. Prereq-[4802, 5801, 5802] or [CDIs 4802, CDIs 5801, CDIs 5802] or #) Implantable auditory prostheses. History of device development, including cochlear implants and auditory brainstem implants. Signal processing. Techniques for selection, fitting, and rehabilitation. Behavioral/physiological changes across lifespan.

SLHS 5805. Advanced Rehabilitative Audiology. (3 cr. Prereq-4802 or [equiv, #]) Analysis of speech perception/production. Communication skills/strategies. Sensory modalities. Rehabilitative techniques in adults, children, and infants with hearing losses.

SLHS 5806. Auditory Processing Disorders. (2 cr; A-F only. Prereq-4802 or CDIs 4802)

Normal/disordered auditory processing abilities. Anatomy/physiology of central auditory pathway, assessments to evaluate auditory processing skills, techniques to address auditory processing weaknesses. Current/historical theories/controversies surrounding auditory processing assessment.

SLHS 5807. Noise and Hearing Conservation. (3 cr; A-F only. Prereq-[8801, 8802] or [CDIs 8801, CDIs 8802])

Formative Assessment in Hearing Conservation. Auditory/nonauditory effects of noise on humans. Designing a hearing conservation program. Measuring noise levels. Monitoring hearing. Measuring hearing protection devices. Developing educational materials Describe federal/state regulations on hearing conservation. Students work in groups to measure noise in campus settings, perform real-ear assessment of hearing protectors, and develop/pilot-test educational materials on effects of noise on hearing.

SLHS 5808. Hearing Disorders. (3 cr; A-F only. Prereq-[8801, 8802] or [CDIs 8801, CDIs 8802])

Disorders of auditory system, including anatomical, physiological, perceptual, and audiological manifestations of pathologies affecting hearing.

SLHS 5810. Laboratory Module in Audiology. (1-2 cr [max 3 cr]. Prereq-4801 or CDIs 4801 or #)

Intensive study of clinical methods in audiology. Supplements didactic courses in audiology curriculum. Laboratory study, individually or in small groups.

SLHS 5820. Clinical Research and Practice: Grand Rounds. (1-6 cr [max 6 cr]; S-N only. Prereq-4801 or CDIs 4801 or equiv or #)

Students participate in group discussions of current professional issues in audiology. Case presentations, guest presentations on current technology, clinical/research ethics. Group meet for an hour weekly with faculty coordinator who leads discussion. Integrates academic/clinical education.

SLHS 5900. Topics: Speech-Language-Hearing Sciences. (1-3 cr [max 6 cr])

Topics in Speech-Language-Hearing Sciences.

SLHS 5993. Directed Study. (1-12 cr [max 18 cr]. Prereq-#) Directed readings and preparation of reports on selected topics.

Sport Studies (SPST)

School of Kinesiology

College of Human Education and Development

SPST 1701. Introduction to Sport Studies. (2 cr; A-F only)

Scope/motive of the study of sport from a sociological, psychological, historical, economic, and scientific perspective. Issues in sport.

SPST 3111. Sports Facilities. (2 cr; A-F only. Prereq-SPST major only)

A general identification of sports facilities including the special features that make them unique. Emphasis on understanding the role and purpose of planning for such facilities.

SPST 3112. Applied Sport Science. (2 cr; A-F only. Prereq-SPST or Kin or Rec major or #)

Introduction to historical discovery, transitional development, and current application of scientific principles/technology to improvement of sport performance.

SPST 3143. Organization and Management of Sport. (3 cr; A-F only. §KIN 3143. Prereq-SPST major)

Principles, policies, and procedures involved in the administration and management of sports programs at the interscholastic and intercollegiate levels.

SPST 3301. Gender and Diversity in Sport. (2 cr; A-F only. Prereq-1701)

Development of women and girls in sport; minority involvement and influence in sport and legal mandates; sexuality issues; feminism and political issues in sport.

SPST 3421. Business of Sport. (2 cr; A-F only. Prereq-SPST or Kin or Rec major or #)

Economic/business aspects of professional, collegiate, school-based and amateur sport. Financing issues/methods. Economic impact of sport on communities, regions, and states. Sport/leisure market.

SPST 3501. Sport in a Diverse Society. (3 cr; A-F only. Prereq-SPST major only)

Relationship between sport and contemporary social institutions (politics, religion, economics, education, mass media). Emphasizes groups/individuals who have historically been marginalized or excluded from sport participation. Variables such as race, sex, social class, sexual orientation, physical (dis)abilities also emphasized.

SPST 3601. Ethics and Values in Sport. (2 cr; A-F only. Prereq-SPST major only; 3611 recommended)

The study of violence, demonstrative behavior, sportsmanship, and other ethical issues involved in the playing of sport, and in the management and governance of the sport industry.

SPST 3611. Sport Psychology. (2 cr; A-F only. Prereq-SPST major only)

Introduction to sport psychology. Examines people and their behavior in sport contexts.

SPST 3621. Applied Sport Psychology. (2 cr; A-F only. Prereq-SPST or Kin or Rec major or #)

Psychological theories/techniques as they apply to sport performance and personal growth of sport participants.

SPST 3631. Sport Promotion and Programming. (3 cr; A-F only. Prereq-SPST major or #)

Fundamental theories/issues in sport marketing, grounded within traditional marketing principles. Emphasizes unique application to sport business industry.

SPST 3641. Training and Conditioning for Sport. (2 cr; A-F only. Prereq-[Kin or SpSt] major)

Overview of history, development, current philosophies of physical training methods used in sport. Theory, scientific basis for training methods, methods for evaluation/prescription.

SPST 3861. Legal Aspects of Sport. (2 cr; A-F only.

Prereq-SPST major only)

Survey of legal issues in sport, including governance, contracts, civil rights, civil liberties, torts, due process, and employment and work-related legalities.

SPST 3881W. Senior Seminar in Sport Studies. (3 cr; A-F only. Prereq-SPST major, completion of major coursework, #)

Presentations/discussions on sport-related topics of interest.

SPST 3996. Practicum: The Sport Experience. (1-10 cr [max 10 cr]; S-N only. Prereq-3881, SPST major, #)

Practical experience in one or more sport settings.

Statistics (STAT)

School of Statistics

College of Liberal Arts

STAT 1001. Introduction to the Ideas of Statistics. (4 cr. Prereq-High school algebra)

Controlled vs. observational studies; presentation and description of data; chance variation; correlation and causality; confidence intervals; statistical tests.

STAT 1905. Freshman Seminar. (3 cr [max 6 cr]; A-F only) Topics specified in *Class Schedule*.

STAT 3011. Introduction to Statistical Analysis. (4 cr. §ANSC 2211, STAT 5021. Prereq-Two yrs high school math)

Describing data/relationships. Discrete/continuous random variables. Sampling distributions. Confidence intervals. 1-/2-sample significance tests. Simple linear regression.

STAT 3021. Introduction to Probability and Statistics. (3 cr. Prereq-MATH 1272)

Elementary probability, probability distributions. Sampling, elements of statistical inference. Regression.

STAT 3022. Data Analysis. (4 cr. Prereq-3011 or 3021)

Practical survey of applied statistical inference and computing covering widely used statistical tools: multiple regression, variance analysis, experiment design, nonparametric methods, model checking and selection, variable transformation, categorical data analysis, logistic regression.

STAT 4101. Theory of Statistics I. (4 cr. §STAT 5101. Prereq-MATH 1272)

Random variables/distributions. Generating functions. Standard distribution families. Data summaries. Sampling distributions. Likelihood/sufficiency.

STAT 4102. Theory of Statistics II. (4 cr. §STAT 5102. Prereq-4101)

Estimation. Significance tests. Distribution free methods. Power. Application to regression and to analysis of variance/count data.

STAT 4893W. Senior Paper. (1 cr. Prereq-Stat major)

Either (1) paper on specialized area or (2) consulting project or (3) original computer program. Directed study.

STAT 4931. Topics in Statistics. (3 cr)

Topics vary according to student needs and available staff.

STAT 4932. Topics in Statistics. (3 cr. Prereq-#)

Topics vary according to student needs and available staff.

STAT 5021. Statistical Analysis. (4 cr. §ANSC 2211, STAT 3011. Prereq-§: 3011; College algebra or #; Stat course recommended)

Intensive introduction to statistical methods for graduate students needing statistics as a research technique.

STAT 5031. Statistical Methods for Quality Improvement. (4 cr. Prereq-[3021 or 3022 or 4102 or 5021 or 5102 or 8102], MATH 1272)

Random variability/sampling. Controlling statistical process. Shewhart/accumulative charting. Analyzing plant data, trend surface, and variance/design of experiments.

STAT 5041. Bayesian Decision Making. (3 cr. Prereq—4101 or 5021 or 5101 or #)

Axioms for subjective probability/utility. Optimal statistical decision making. Sequential decisions/decision trees. Backward induction. Bayesian data analysis.

STAT 5101. Theory of Statistics I. (4 cr. §STAT 4101. Prereq—Math 2263)

Logical development of probability, basic issues in statistics. Probability spaces. Random variables, their distributions and expected values. Law of large numbers, central limit theorem, generating functions, multivariate normal distribution.

STAT 5102. Theory of Statistics II. (4 cr. §STAT 4102. Prereq—5101 or MATH 5651)

Sampling, sufficiency, estimation, test of hypotheses, size/power. Categorical data. Contingency tables. Linear models. Decision theory.

STAT 5201. Sampling Methodology in Finite Populations. (3 cr. Prereq—3011 or 3021 or 5021 or #)

Simple random, systematic, stratified, unequal probability sampling. Ratio, model based estimation. Single stage, multistage, adaptive cluster sampling. Spatial sampling.

STAT 5302. Applied Regression Analysis. (4 cr. Prereq—3022 or 4102 or 5021 or 5102 or #)

Simple, multiple, and polynomial regression. Estimation, testing, prediction. Use of graphics in regression. Stepwise and other numerical methods. Weighted least squares, nonlinear models, response surfaces. Experimental research/applications.

STAT 5303. Designing Experiments. (4 cr. Prereq—3022 or 4102 or 5021 or 5102 or #)

Analysis of variance. Multiple comparisons. Variance-stabilizing transformations. Contrasts. Construction/analysis of complete/incomplete block designs. Fractional factorial designs. Confounding split plots. Response surface design.

STAT 5401. Applied Multivariate Methods. (3 cr. Prereq—5302 or 8102 or #)

Bivariate and multivariate distributions. Multivariate normal distributions. Analysis of multivariate linear models. Repeated measures, growth curve and profile analysis. Canonical correlation analysis. Principle components and factor analysis. Discrimination, classification, and clustering.

STAT 5421. Analysis of Categorical Data. (3 cr. Prereq—5302 or #)

Varieties of categorical data, cross-classifications, contingency tables. Tests for independence. Combining 2x2 tables. Multidimensional tables/loglinear models. Maximum-likelihood estimation. Tests for goodness of fit. Logistic regression. Generalized linear/multinomial-response models.

STAT 5601. Nonparametric Methods. (3 cr. Prereq—3022 or 4102 or 5021 or 5102 or #)

Order statistics. Classical rank-based procedures (e.g., Wilcoxon, Kruskal-Wallis). Goodness of fit. Topics may include smoothing, bootstrap, and generalized linear models.

STAT 5931. Topics in Statistics. (3 cr)

Topics vary according to student needs and available staff.

STAT 5932. Topics in Statistics. (3 cr)

Topics vary according to students' needs and available staff.

STAT 5993. Tutorial. (1-6 cr [max 12 cr]. Prereq—#)

Directed study in areas not covered by regular offerings.

Studies in Cinema and Media Culture (SCMC)

Department of Cultural Studies and Comparative Literature

College of Liberal Arts

SCMC 1201. Introduction to Cinema and Media Culture. (4 cr. §CSCL 1201. Prereq—§: CSCL 1201)

Critical analysis of films, particularly as they emerge within context of mass culture. Determining discursive specificity of cinema, network of institutions that expose this discourse to other media discourses. Rudiments of film theory. Brief engagement with production.

SCMC 3001W. History of Cinema and Media Culture. (4 cr)

Genealogy of cinema in relation to other media, notably photography, radio, television/video and the Internet. Representative films from decisive moments in global development of cinema. Rise/fall of Hollywood studio system, establishment of different national cinemas, cinematic challenges to cultural imperialism, emergence of post-cinematic technologies.

SCMC 3201. Fundamentals of Digital Filmmaking. (4 cr. Prereq—ARTH 1921W or CSCL 1921 or equiv or #)

Practice of digital filmmaking. Emphasizes digital techniques and practical tools required to produce films. Students master optical/digital devices as artistic tools. Historical/theoretical issues of cinema, its relation to other art forms.

SCMC 3202. Intermediate Digital Filmmaking. (4 cr. Prereq—3201 or #)

Students complete a film of any length, 24 frames or feature-length. Emphasizes formal analysis of frames, shots, sequences, and relations of unit (frame or shot) to whole.

SCMC 3993. Directed Study. (1-3 cr [max 6 cr])

Guided individual reading or study.

SCMC 4993. Directed Study. (1-3 cr [max 6 cr])

Guided individual reading or study.

SCMC 5001. Critical Debates in the Study of Cinema and Media Culture. (4 cr)

Basic concepts in historical/international debates over production/reception of media culture. Emphasizes cinema. Advanced orientation toward intellectual traditions that inform contemporary scholarship.

SCMC 5993. Directed Study. (1-3 cr [max 6 cr])

Guided individual reading or study.

Sumerian (SUM)

Department of Classical and Near Eastern Studies

College of Liberal Arts

SUM 5011. Elementary Sumerian I. (3 cr. Prereq—Adv undergrads with 2 yrs of another foreign lang, grads)

Sumerian writing and grammar. Readings from classical Sumerian literary and historical texts.

SUM 5012. Elementary Sumerian II. (3 cr. Prereq—5011)

Reading from classical literary and historical texts.

Swedish (SWED)

German, Scandinavian, and Dutch

College of Liberal Arts

SWED 1001. Beginning Swedish. (5 cr. §SWED 4001)

Emphasis on working toward novice-intermediate low proficiency in all four language modalities (listening, reading, speaking, writing). Topics include everyday subjects (shopping, directions, family, food, housing, etc.).

SWED 1002. Beginning Swedish. (5 cr. §SWED 4002. Prereq—1001)

Continues the presentation of all four language modalities (listening, reading, speaking, writing), with a proficiency emphasis. Topics include free-time activities, careers, and the Swedish culture.

SWED 1003. Intermediate Swedish. (6 cr. §SWED 4003. Prereq—1002)

Emphasis on intermediate proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is combined with authentic readings and essay assignments.

SWED 1004. Intermediate Swedish. (5 cr. §SWED 4004. Prereq—1003)

Emphasis on developing intermediate mid-high proficiency in listening, reading, speaking, and writing. Contextualized work on grammar and vocabulary is supported by work with authentic readings and essay assignments.

SWED 3011. Advanced Swedish. (3 cr. Prereq—1004 or 4004)

Achieving advanced proficiency in Swedish. Fiction, film, journalistic, and professional prose. Grammar, vocabulary building exercises, review of oral/written modes of communication.

SWED 3012. Advanced Swedish. (3 cr. Prereq—1004 or 4004)

Novels, short stories, plays, articles. Structural, stylistic, vocabulary-building exercises.

SWED 4001. Beginning Swedish. (2 cr. §SWED 1001.

Prereq—1004 in another language or passing score on LPE or grad student)

Meets concurrently with 1001. See 1001 for description.

SWED 4002. Beginning Swedish. (2 cr. §SWED 1002.

Prereq—1004 in another language or passing score on LPE or grad student)

Meets concurrently with 1002. See 1002 for description.

SWED 4003. Intermediate Swedish. (2 cr. §SWED 1003.

Prereq—1004 in another language or passing score on LPE or grad student)

Meets concurrently with 1003. See 1003 for description.

SWED 4004. Intermediate Swedish. (2 cr. §SWED 1004.

Prereq—1004 in another language or passing score on LPE or grad student)

Meets concurrently with 1004. See 1004 for description.

Teaching English as a Second Language (TESL)

Institute of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

TESL 1904. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics vary. See *Class Schedule*.

TESL 1905. Freshman Seminar. (3 cr; A-F only. Prereq—Freshman)

Topics specified in *Class Schedule*.

TESL 3001. Basics in Teaching English as a Second Language. (4 cr. Prereq—Have studied another language, [native speaker or [C-TOEFL score of at least 213 or equiv])

Basic orientation to current theories/methods of English as a second language (ESL) instruction. Emphasizes methodologies for teaching/assessing listening, speaking, pronunciation, reading, writing skills. Contexts of teaching English to adults in the U.S. and abroad. Internship at school or agency teaching ESL.

TESL 3501. Practical Language Learning for International Communication. (3 cr)

Getting a handle on language learning. Having a sense of one's learning/language strategy preferences. Motivation to learn languages in general and a given language in particular. Motivation to do specific language tasks.

TESL 5101. Academic Writing in TESOL. (1 cr; S-N only. Prereq-[5721, grad ESL student] or #)

Research writing conventions in the profession. University rules on ethical use of human subjects, research paper rhetorical structure, literature sources/searches, literature review coherence, hedging markers, basic research methods, research result reporting, APA-formatted bibliographies, writing strategies.

TESL 5401. Language Analysis for Teachers of English as a Second Language. (4 cr. Prereq-LING 3001 or LING 5001 or #)

Overview of the structure of the English language geared to the needs of teachers of English to speakers of other languages. Study the structures of English from the point of view of second-language speakers as well as native speakers. Phonetics, phonology, morphology, and some aspects of the syntax of the English language. Part of a two-course sequence.

TESL 5402. Language Analysis for Teachers of English as a Second Language. (4 cr. Prereq-5401, LING 5001)

Overview of the structure of the English language geared to the needs of teachers of English to speakers of other languages. Study the structures of English from the point of view of second-language speakers as well as native speakers. More complex structures of English syntax, as well as English semantics, pragmatics, and discourse structures. Second in a two-course sequence.

TESL 5610. Research Methods in Applied Language Study. (3 cr [max 12 cr]. Prereq-LING 5505 or #)

Key issues in second language acquisition/learning research. Focuses on learning a second or foreign language in the classroom.

TESL 5721. Methods in Teaching English as a Second Language. (3 cr. Prereq-LING 3001 or 5001 or #)

Introduction to methods for teaching English as a second language to adults.

TESL 5722. Practicum in Teaching English as a Second Language. (6 cr [max 12 cr]; S-N only. Prereq-[[5401 or #]5401], [5402 or #]5402], 5721, ESL major or ESL minor) or #)

Observation of, and practice in, teaching English as a second language to adults at college or university level.

TESL 5723. Materials for Teaching English as a Second Language. (3 cr. Prereq-[5721, 5722] or #)

Principles for evaluating/preparing materials for teaching second languages as applied especially to English as a second language.

TESL 5724. Intro to Language Assessment. (3 cr; A-F only)

How to engage in meaningful, appropriate, and fair second-language assessment practices; interpret test results; and construct new forms of assessment.

TESL 5900. Topics in Second Language Learning and Teaching. (1-4 cr [max 16 cr])

Topics vary. See *Class Schedule*.

TESL 5910. Seminar in Teaching English as a Second Language. (3 cr [max 9 cr])

Topics related to second language learning/teaching. Focuses on learning/teaching English as a second language. Topics specified in *Class Schedule*.

TESL 5993. Directed Studies. (1-4 cr [max 9 cr]. Prereq-#, Δ, □)

Directed study for teaching English as a second language.

Theatre Arts (TH)

Department of Theatre Arts and Dance

College of Liberal Arts

TH 1101V. Honors Section: Introduction to the Theater. (4 cr. Prereq-Honors)

Introduction to art/craft of theater. Appreciation/critical analysis of plays/performance. Examples of theater's diverse interactions with society considered from various cultural perspectives.

TH 1101W. Introduction to the Theatre. (4 cr)

Introduction to art/craft of theatre. Appreciation/critical analysis of plays/performance. Examples of theatre's diverse interactions with society considered from various cultural perspectives.

TH 1102. Drama and the Media. (3 cr)

Drama and cultural values implicit in media. Study of primary texts (biography, history, the novel, plays), video clips, and complete films. How the film medium shapes cultural identity.

TH 1111. Introduction to the Theatre—Condensed

Version. (3 cr. Prereq-Theatre majors/premajors should not enroll)

Art/craft of theatre. Appreciation, critical analysis of plays/performance. Ways theatre interacts with society. Examples from diverse theatre over the ages and from various cultural perspectives. Seven weeks.

TH 1112. Drama and the Media—Condensed Version. (3 cr)

Drama/cultural values implicit in media. Study of primary texts (biography, history, the novel, plays); video clips; complete films. How film/television shape collective cultural identity. Seven weeks.

TH 1301. Acting/Non-Majors. (3 cr)

Background/techniques of acting as viewed/practiced in theatre, society, and student's own relationships.

TH 1321. Beginning Acting: Fundamentals of

Performance. (3 cr. Prereq-1101 or #1101)

Vocabulary/techniques of practical performance studies. Use/training of body/voice. Creation of choices and dramatic phrases. Storytelling. Training the will, the instrument, and the imagination.

TH 1322. Creating the Performance. (3 cr. Prereq-1321)

Responsibilities/techniques of modern stage director as creative/interpretive artist. Creation of directed performance of invented/pre-existing forms, from happenings to traditional psychological/poetic realism.

TH 1361. Singing for Musical Theatre. (3 cr; A-F only)

Beginning singing, interpretation, part singing, phonetics, audition techniques. Solo/ensemble presentations at final class performance.

TH 1362. Dance for Musical Theatre. (2 cr; A-F only. \$DNCE 1362)

Movement based lab. Dance skills in musical theatre performance. Focuses on various styles/disciplines of dance throughout its culturally diverse heritage. Character development necessary to execution of various dance styles.

TH 1391. BFA Acting I. (3 cr; A-F only. Prereq-Accepted into BFA acting program)

Acting.

TH 1392. BFA Voice and Speech I. (2 cr; A-F only. Prereq-Accepted into BFA acting prog)

Study/practice in breath centering/expansion; vocal resonance, musicality, placement; ear training; strengthening and making more flexible the muscles of speech.

TH 1393. BFA Movement I. (2 cr; A-F only. Prereq-BFA-acting major)

Focuses on building a foundation for further work in program.

TH 1395. BFA Acting II. (3 cr; A-F only. Prereq-1391)

Continuing the process of interpreting dramatic material.

TH 1396. BFA Voice and Speech II. (2 cr; A-F only. Prereq-1392)

Building a foundation for further work in the program. Emphasizes practicing the sounds of good American speech and of the written phonetic alphabet.

TH 1397. BFA Movement II. (2 cr; A-F only. Prereq-1393)

May include sections such as African dance, yoga, movement for actors, and circus techniques. Focuses on building a foundation for further work in the program.

TH 1904. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq-Freshman)

Topics specified in *Class Schedule*.

TH 1905. Freshman Seminar. (3 cr [max 6 cr]; A-F only. Prereq-Freshman)

Topics specified in *Class Schedule*.

TH 1909W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq-Freshman)

Topics specified in *Class Schedule*.

TH 1910W. Topics: Freshman Seminar. (3 cr; A-F only. Prereq-Freshman)

Topics specified in *Class Schedule*.

TH 1911W. Freshman Seminar: Theatre, Entertainment

With Attitude. (3 cr; A-F only. Prereq-Fr with no more than 30 cr)

Richness/diversity of live theatre as performance/text. Developing critical language/eye with which to think about live performance. Students attend performances at Twin Cities theatres. In-class discussions, talks with theatre/dance professionals.

TH 1950. Topics in Theater. (1-3 cr [max 6 cr])

Topics specified in *Class Schedule*.

TH 2391. BFA Acting III. (3 cr; A-F only. Prereq-BFA student in theatre arts)

Applying concepts of first year of training to an ensemble performance project. Beginning of Shakespeare foundation unit.

TH 2392. BFA Voice and Speech III. (2 cr; A-F only. Prereq-BFA student in theatre arts)

Continuing to build a strong, healthy voice. Mastering written phonetics, sounds of good American speech for stage. Students begin to explore speaking of heightened verse, particularly Shakespearean text.

TH 2393. BFA Movement III. (2 cr; A-F only. Prereq-BFA student in theatre arts)

Deepens/refines foundation laid in BFA Movement I/II.

TH 2395. BFA Acting IV. (3 cr; A-F only. Prereq-BFA-Acting sophomore)

Application of process towards performance. Emphasizes Shakespeare.

TH 2396. BFA Voice and Speech IV. (2 cr; A-F only. Prereq-BFA-acting, sophomore)

Continuing to build a strong, healthy voice. Mastering written phonetics and the sounds of good American speech for the stage. Students begin basic dialect acquisition work for the stage. Emphasizes English/Irish dialects.

TH 2397. BFA Movement IV. (2 cr; A-F only. Prereq-BFA-acting sophomore)

May include sections such as jazz dance, partner dances, and movement for actors.

TH 3100. Theatre Practicum. (1 cr [max 4 cr]; S-N only. Prereq-1101; only two enrollments as actor may count toward a major)

Participation in University Theatre main stage play as actor, construction/running crew personnel, or theatre management operations personnel.

TH 3115. Introduction to Playwriting. (3 cr)

Study of traditional play structure, characterization, dialogue, dramatic action, and theme. Final project is a one-act play.

TH 3120. Theatre: Theory and Practice. (3 cr [max 6 cr]. Prereq-1101)
Introduction to diverse ways of thinking about theatre and its representational practices. Students explore traditional/non-traditional modes of performance through readings, discussions, and hands-on performance projects. Seminar-style course.

TH 3171. History of the Theatre: Ancient Greece Through Neo-Classicism. (3 cr. Prereq-Th major or #)
History of Western theatre and drama; theatrical practices, staging conventions, and dramatic structure of plays. Ancient to mid-18th century.

TH 3172. History of the Theatre: Age of Enlightenment to Present. (3 cr. Prereq-Th major or #)
Theatrical practices, staging conventions, dramatic structure of plays.

TH 3261. Dramas of Culture: 20th-Century French and Francophone Theater. (3 cr [max 9 cr]. \$FREN 3260. Prereq-FREN 3101)
Key movements, dramatists, and contexts of 20th-century French and Francophone theatre. Naturalist and symbolist legacies as well as existentialist, avant-garde, and contemporary performance and drama.

TH 3314. Text and the Actor. (3 cr; A-F only. Prereq-1101, 1321, 1322)
Standard stage speech, international phonetic alphabet transcription, and textual analysis to perform heightened language texts such as Shakespearean/Shavian monologues, Chaucer's Canterbury Tales, and Beowulf. Videos viewed/discussed.

TH 3321. Stanislavski and Techniques for Characterization. (3 cr. Prereq-1322, [3314 or #3314], audition)
Analysis of text, character, and relationship in scenes/monologues from contemporary/modern psychologically-based drama, early 20th-century texts, and classical repertoire. Lecture, discussion, exercises, performance.

TH 3322. Advanced Techniques for Characterization. (3 cr. Prereq-3321)
Analysis of text, character, and relationship in scenes/monologues from contemporary/modern psychologically-based drama and from early 20th-century texts. Lecture, discussion, exercises, performance.

TH 3331. Physical Approaches to Acting. (3 cr. Prereq-1322, [3314 or #3314], audition)
Dynamic physical approach to acting. Expanding expressiveness/creativity. Strengthening connections between physical/vocal expression. Uniting instinct and intellectual analysis. Techniques as advanced by Delsarte, Meyerhold, Grotowski, Kantor, Suzuki, Barba, etc., and structured improvisation, are incorporated in solo/collaborative performance projects.

TH 3361. Introductory Musical Theatre. (3 cr; A-F only. Prereq-[1361 or 1362 or DNCE 1362] or #)
History of American musical theatre featuring videos/discussions, basic music theory, voice, dance, acting, audition techniques. Solo/ensemble presentations for public class performance.

TH 3365. Intermediate Musical Theatre. (3 cr; A-F only. Prereq-3361 or #)
American musical theatre history. Singing, interpretation, dance techniques. Culminates in solo/ensemble presentations in public class performance.

TH 3381. Theatre Storytelling and Solo Performance. (3 cr. Prereq-3314 or #3314)
Live storytelling and solo performance as theatrical art form. How to turn personal experiences into engaging stage stories. Guests perform, discuss their work, and critique student work. Students develop several short monologues/performance and conclude with original solo theatre performance/story.

TH 3391. BFA Acting V. (3 cr; A-F only)
Experiencing a foreign theater culture/history. Applying process of interpreting dramatic material to plays of that culture.

TH 3392. BFA Voice and Speech V. (2 cr; A-F only)
Experiencing a foreign theater culture/history. Applying voice training to dramatic material of that culture.

TH 3393. BFA Movement V. (2 cr; A-F only. Prereq-BFA student in theatre arts)
Experiencing a foreign theatre culture/history, applying training to dramatic material of that culture.

TH 3395. BFA Intensive I. (2 cr; A-F only. Prereq-BFA-acting jr)
Incorporating disciplines of acting/voice/movement.

TH 3398. BFA Rehearsal & Performance I. (2 cr; A-F only. Prereq-BFA-acting jr)
Continuing the application of process towards performance.

TH 3399. BFA Rehearsal and Performance II. (2 cr; A-F only. Prereq-BFA-acting jr)
Continuing the application of process towards performance.

TH 3503. Design and Technical Production I: BFA. (3 cr. Prereq-\$; 3513; BFA theatre arts student)
Theory, process, and execution of design/technology from script to production on stage. Scenery/lighting properties.

TH 3505. Design and Technical Production II: BFA. (3 cr. Prereq-3513, BFA theatre arts student)
Theory, process, and execution of design/technology from script to production on stage. Costumes/lighting.

TH 3513. Design and Technical Production I. (4 cr. Prereq-1101; BFA registration permitted)
Theory, process, and execution of design/technology from script to production on stage. Scenery/lighting properties.

TH 3515. Design and Technical Production II. (4 cr. Prereq-1101)
Theory, process, and execution of design/technology from script to production on stage. Costumes/lighting.

TH 3950. Topics in Theatre. (1-4 cr [max 8 cr]. Prereq-Varies by topic)
Topics specified in the *Class Schedule*.

TH 3993. Directed Study. (1-4 cr [max 12 cr]. Prereq-6 Th cr, #, Δ, □)
Guided individual reading or study.

TH 4115. Intermediate Playwriting. (3 cr. Prereq-3115 or [writing sample, #])
New methods of play construction. How characteristic plays from particular contemporary styles create original theatrical effects by using/breaking dramatic conventions. Writing exercises, workshoping of student plays.

TH 4131. Shakespeare: Comedies, Romances, and Problem Plays. (3 cr. Prereq-1101 or #)
Shakespeare's plays as live theatre, both for the stage and in various media. Work of actors, directors, and designers in Shakespearean plays.

TH 4132. Shakespeare: Histories and Tragedies. (3 cr. Prereq-1101 or #)
Shakespeare's plays as live theatre, both for the stage and in various media. Work of actors, directors, and designers in Shakespearean plays.

TH 4177W. Survey of Dramatic Literature I: Strategic Interpretation. (3 cr. Prereq-[[3171, 3172], [jr or sr]] or #)
Basic principles of script analysis as applied to stage practice from traditional/postmodern approaches. Students read plays, critical perspectives. Discussion, critical writing, performance.

TH 4178W. Survey of Dramatic Literature II: Representation and its Effects. (3 cr. Prereq-[[3171, 3172], [jr or sr]] or #)
In-depth look at how plays actively participate in production of social values and of society itself. Emphasizes consequences of choices theatre artists make.

TH 4321. Career Preparation for the Actor. (3 cr. Prereq-3322)
Information/techniques necessary for professional acting career.

TH 4322. Acting for the Camera. (3 cr. Prereq-3321)
Differences between stage acting and acting for camera. Hands-on experience with film equipment. Scenes/monologues rehearsed/performed for camera. Videotape playback for class critique.

TH 4380. Creative Collaboration. (1-3 cr [max 12 cr]. Prereq-Audition, interview, #)
Ensemble creation of a single theatre performance work. Creative/dramaturgical work. Public showing of work, completed or in-progress. Students work collaboratively with faculty or affiliate guest artists.

TH 4391. BFA Intensive II. (2 cr; A-F only. Prereq-BFA student in theatre arts)
Applying first three years of training toward performance. Seventh in sequence of eight. Acting, voice, and movement. Integrating the disciplines.

TH 4392. BFA Acting VIII. (7 cr; A-F only. Prereq-4391)
Application of first three years of training toward performance. Career preparation. Eighth in sequence of eight.

TH 4393. BFA Rehearsal and Performance III. (2 cr; A-F only. Prereq-BFA student in theatre arts)
Acting, voice, movement. Application of process toward performance.

TH 4394. BFA Rehearsal and Performance IV. (2 cr; A-F only. Prereq-BFA student in theatre arts)
Acting, voice and movement. Application of process toward performance.

TH 4395. BFA Intensive III. (2 cr; A-F only. Prereq-BFA-acting sr)
Incorporating the disciplines of acting/voice/movement.

TH 4398. BFA Rehearsal and Performance V. (2 cr; A-F only. Prereq-BFA-acting sr)
Acting, voice and movement. Continuing the application of process towards performance.

TH 4399. BFA Rehearsal and Performance VI. (2 cr; A-F only. Prereq-BFA-acting sr)
Acting, voice, and movement. Continuing the application of process towards performance.

TH 4532. Makeup for the Actor. (2 cr)
Topics vary. May include functions/aesthetics of stage makeup, application techniques, prosthetics, and facial hair.

TH 4550. Video Technology. (3 cr)
Lighting, camera operation, audio, and recording for video/film production, using the state-of-the-art equipment in Studio B. Hands-on training in tools of video technology. Students create a final group project.

TH 4554. Graphics and Animation for Video. (3 cr)
Students explore and experiment with graphic/animation software. Video production, live performance.

TH 4555. Audio Technology. (3 cr)
Sound as science. Technology to create/manipulate sound. Recording techniques. Effects/signal processing. Microphone/mixing techniques.

TH 4556. Digital Audio and MIDI for Performance. (3 cr)
Hands-on computer/CPU-generated audio technology. Use of MIDI language protocol for performance in all aspects of the arts.

TH 4557. Audio for Film and Video. (3 cr. Prereq-[4550, 4555] or #)
Processes/techniques used in capturing, manipulating, and producing audio for use in film/television production. Students experiment and create audio. Challenges in creating audio for various mediums.

TH 4560. Pre-Production and Planning for Video and Film. (3 cr. Prereq–4550, #)

Forum for pre-planning video projects. Students undertake pre-production planning for a specific video project, including script development, scheduling, location scouting, casting, fund-raising, equipment lists/rentals, and permits.

TH 4711. Intermediate Stage Direction. (3 cr. Prereq–1322 or #)

Coordinating/guiding collaborative artistic team. Script selection, textual analysis, concept development, space use, composition, movement, dialogue. Final presentation of scene. Intensive research, textual examination, journal.

TH 4901. Senior Seminar. (2 cr; S-N only. \$DNCE 4901. Prereq–Sr, [Th or DNCE major]; offered fall semester only)

Development of senior project, alone or in groups, under guidance of faculty members.

TH 4905H. Honors: Tutorial Seminar in Theatre Arts. (2–4 cr [max 4 cr] Prereq–\$4905; honors, theatre arts, A; limit [2 cr for [cum laude or magna cum laude], 4 cr for summa cum laude])

Independent reading/research in preparing honors thesis or selected creative project.

TH 5100. Theatre Practicum. (1–4 cr [max 20 cr]. Prereq–#, A; 4 cr of 3100 for undergrads)

Individual creative projects in production of approved plays as an actor, director, dramaturg, or playwright. (See 5500 for design practicums.)

TH 5103. The Theatre Dramaturg. (3 cr. Prereq–[4177 or 4178], [jr or sr], #)

Theoretical/practical aspects of dramaturgy in American theater. Historical perspectives. Research/production history of classics. Development of new scripts. Dramaturgical structure and interpretive choices. Dramaturgy as it relates to playwrights/directors. Preparing/editing the rehearsal script. Production dramaturgy.

TH 5117. Performance and Social Change. (3 cr; A-F only. Prereq–Jr or sr or grad student)

Reading, writing, research, presentations and workshops explore activist performance projects. Theories of social formation and ideology provide framework to discuss/animate theater's potential for social change.

TH 5178. History and Theory of Performance Conventions. (3 cr; A-F only. Prereq–[1322, [3171 or 3172]] or grad student)

Draws on visual materials, practical exercises, and theories of spatial representation in context of political/social function. Historical/cross-cultural overview of performance conventions and theatrical space from City of Dionysia to site-specific happenings of 20th century.

TH 5179. Text and Performance. (3 cr; A-F only. Prereq–[1322, [3171 or 3172]] or grad student)

How to read texts toward performance in various dramatic/nondramatic material. Method of unlocking metaphoric energy of texts. Vocabulary/techniques of analysis that transform text from page to stage.

TH 5181. Blacks in American Theatre. (3 cr. \$AFRO 5181)

Historical survey of significant events in the development of American Black theatrical tradition; essays, plays, playwrights, and theatres from early colonial references to Black Arts Movement.

TH 5182. Contemporary Black Theatre: 1960–Present. (3 cr. \$AFRO 5182)

Essays, plays, playwrights, and theatres that have contributed to contemporary Black theatre. From the beginning of the Black Arts Movement to the present.

TH 5355. Puppetry: Techniques and Practice in Contemporary Theater. (3 cr. Prereq–[[3513 or ¶3513], #] or grad student)

Fundamentals of puppet and object theater/performance are introduced through traditional/contemporary puppetry forms. Focuses on object theater, toy theater, hand puppets, and shadow/Bunraku-style puppets. Readings, in-class screenings of videos/slides. Students build/create series of short works for in-class performance.

TH 5500. Theatre Design Practicum. (1–3 cr [max 20 cr]. Prereq–3515, #, A)

Individual projects in production of approved plays as a designer of scenery/properties, costumes, lighting, or sound. (See 5100 for other creative practicums.)

TH 5510. Drawing, Rendering, and Painting for the Theatre Designer I. (3 cr. Prereq–3515 or grad or #)

Development of skills necessary for presentation of theatre scene/costume designs. Materials, layout, and techniques in scene painting. Basic drawing/graphic skills.

TH 5515. Design Composition and Collaboration. (3 cr. Prereq–Grad or 3515, 3711, #)

Classical composition of art and its application to stage design and directing through the collaborative process.

TH 5520. Scene Design. (3 cr [max 9 cr]. Prereq–3515 or grad or #)

Conceiving/communicating design ideas in both two-dimensional sketches and three-dimensional models for theatre and allied venues. Drafting.

TH 5530. Costume Design. (3 cr [max 9 cr]. Prereq–3515 or grad or #)

Theory and process of costume design for theatrical productions (e.g., dance, opera, film) through hypothetical productions.

TH 5540. Lighting Design for the Theatre. (3 cr [max 9 cr]. Prereq–3515 or grad or #)

Design aesthetics and exploration of design for various stage forms and venues. Development of the lighting plot and paperwork; use of the computer in lighting design.

TH 5545. Stage Lighting Technology. (3 cr. Prereq–3515 or grad or #)

The lighting technician's skills and crafts: equipment, techniques, control operation, wiring, and maintenance.

TH 5550. Video Project. (3 cr [max 6 cr]. Prereq–[4550 or 4560 [preferred]], #)

Students participate in a video-shoot project serving in various positions, including camera operator, gaffer, grip, audio engineer, cast, and possibly director and director of photography.

TH 5551. Editing and Post Production for Video and Film. (3 cr. Prereq–#)

Students manipulate software and other technologies used in post production. Editing, audio, image manipulation.

TH 5553. Video Production Design and Aesthetics. (3 cr. Prereq–4553 or #)

Use of technologies in video/film in making a statement or communicating an idea/emotion. Creativity, sensitivity to an audience. Students explore different creative uses of technologies/medium.

TH 5554. Multimedia Production for Live Performance. (3 cr. Prereq–5553 or #)

Use of multimedia production technologies in actual production. Students apply knowledge/skill in conjunction with an artistic team on a production and are an integral part of the development/realization of that production.

TH 5556. Audio Engineering. (3 cr. Prereq–4555 or #)

Miking/recording techniques specific to music and dramatic dialogue. Students explore recording different styles of music. Hands-on experience in recording bands and doing final mixes to a demo CD. Field trips to professional studios and club/concert recordings.

TH 5558. Audio Systems Analysis and Installation. (3 cr. Prereq–4555 or #)

Analyzing, designing, developing specifications, and installing sound systems. Students work from client program lists, with given resources and given spaces, to arrive at best possible audio system. Hands-on experience.

TH 5559. Sound Design for Performance. (3 cr. Prereq–4555 or #)

Audio technology/psychology, their impact on audience in a performance. Communication, design process, psychoacoustics, script analysis.

TH 5560. Drawing, Rendering, and Painting for the Theatre Designer II. (3 cr. Prereq–5510)

Development of skills necessary for presentation of theatre scene/costume designs. Materials, layout, and techniques in scene painting. Rendering and scene painting skills.

TH 5570. Properties/Scenery Technology. (1–3 cr [max 15 cr]. Prereq–3515 or grad or #)

Management, structures, upholstery, mask-making, furniture construction, stage mechanics, soft properties, faux finishes. Topics specified in *Class Schedule*.

TH 5580. Costume Technology. (3 cr [max 15 cr]. Prereq–3515 or grad or #)

Fabric enhancement techniques, masks, wig-making, millinery, makeup prosthetics, pattern drafting, and draping. Topics specified in *Class Schedule*.

TH 5590. Theatre Technology Practicum. (1–3 cr [max 15 cr]. Prereq–3515, #, A; 4 cr max for undergrads)

Individual creative project in technology/craft area of theatre. Practical work in costume, lighting, makeup, props, scenery, sound, or theatre management.

TH 5711. Advanced Stage Direction. (3 cr. Prereq–[4711, #] or grad student)

Realistic/nonrealistic dramatic forms. Theory/technique of rehearsal. Production problems. Includes directing of three one-act plays.

TH 5713. Theory and Practice of Performance. (3 cr; A-F only. Prereq–[3171, 3172, [4177 or 4178], 5711] or grad student)

Traditions of thinking about theatre, from ancient Greece to present, in practical applications. Focuses on epistemological significance of performance in current critical practices of postmodernism, psychoanalysis, and phenomenology.

TH 5714. The Drama of Myth. (3 cr. Prereq–[1322, 3171, 3172] or #)

Role of myth in performance. Students choose a myth and study its iconography, tracing its journey in painting, sculpture, music, and other texts that accumulated around it throughout history. Course culminates in creation of a non-traditional performance score that embodies/reveals energies of contemporary culture within ancient metaphor of a chosen myth.

TH 5715. Actor-Director Collaboration. (3 cr. Prereq–Grad or 3322, 3711)

Applying advanced acting and directing technique to an artistic, collaborative process that promotes flexibility and creativity. Actors and directors are exposed to a challenging range of roles, styles, and scenes.

TH 5716. Stage Management for the Theatre. (4 cr. Prereq–[1101, 1321, soph] or grad)

Theories, practicalities, and techniques for rehearsal/performance. Organizing/managing various types of performance venues.

Th 5718. Principles of Theatre Management. (3 cr. Prereq–#)

Nonprofit theatre structure: concept; mission; organization; financial, marketing, fund-raising, and grant-writing strategies. Discussion/guest professionals from Twin Cities' arts/funding communities.

TH 5725. The Alchemy of an Object. (3 cr. Prereq–[[1322, 3171, 3172] or #], grad student)

Stage object as vehicle for investigating role of drama in culture from Middle Ages to present. Object as first connection that dramatic text makes with material world. Object as culturally inscribed link between language of drama and world of action in a historically given moment. Object as metaphor of cultural praxis.

TH 5753. Text Analysis for Drama. (3 cr. Prereq=5711 or grad)
Tools for intensive textual analysis for advanced directors/designers. Traditional, Aristotelian analysis and contemporary approaches covered through theories/writings of Bertolt Brecht and Howard Barker.

TH 5760. Advanced Stage Management. (2-3 cr [max 3 cr]. Prereq=5716 or ¶5716, #; [4 cr max for undergrads])
Practical experience in stage management for specific productions of the University Theatre with emphasis on rehearsal and performance.

TH 5780. Advanced Topics in Theatre Management. (2-4 cr [max 8 cr]. Prereq=5718)

Study and apply theatre management theories and techniques learned in 5718. Marketing/audience development, fundraising and grant writing strategies, and financial management of a nonprofit theatre organization.

TH 5950. Topics in Theatre. (1-4 cr [max 20 cr])

Topics specified in *Class Schedule*.

TH 5993. Directed Study. (1-5 cr [max 20 cr]. Prereq=6 Th cr, #, Δ, □)

Guided individual reading or study.

Toxicology (TXCL)

Veterinary Diagnostic Medicine

College of Veterinary Medicine

TXCL 5000. Directed Research in Toxicology. (1-4 cr [max 16 cr]; A-F only. Prereq=#)

Special project that addresses specific issue in toxicology. Under guidance of faculty member.

TXCL 5011. Principles of Toxicology. (2 cr; A-F only. Prereq=Grad txcl major or #)

Introduction to fundamentals of poisoning in individuals and the environment, assessment of potential health hazards, and application of toxicology in various professional careers.

TXCL 5195. Veterinary Toxicology. (3 cr; A-F only. §CVM 6195. Prereq=Grad student or #)

Toxicology of minerals, pesticides, venoms, and various toxins. Identification of poisonous plants. Recognition, diagnosis, and treatment of animal poisons.

TXCL 5545. Introduction to Regulatory Medicine. (2 cr; A-F only. §CVM 6545. Prereq=Grad student or #)

Explanation of products requiring pre-market approval and those that may be marketed without approval. Post-market surveillance. Adverse reactions, removal of product from market.

Translation and Interpreting (TRIN)

College of Continuing Education

TRIN 1201. Fundamentals of Health Care for Interpreters. (3 cr; A-F only)

Technical vocabulary, oral discourse patterns used by healthcare providers in talking to patients, family members. Language of American health care interview.

TRIN 1301. American Law for Interpreters. (3 cr)

American legal system. Technical vocabulary used in courts and other legal settings. Oral legal discourse. Presentations by specialists, discussion, exercises for review/practice.

TRIN 3001. Introduction to Translation. (3 cr. Prereq=Bilingual proficiency in [English, second language of instruction], Δ)

Theory of and supervised practice in translation. Re-expressing meaning in a second language. Translation primarily of English language texts concerning public health/safety, legal/voting rights, regulations, and procedures.

TRIN 3002. Intermediate Translation. (3 cr. Prereq=3001)

Additional instruction and supervised practice in translation.

TRIN 3005. Principles of Translation. (3 cr. Prereq=Fluent in English, proficient in a second language, not in CCE certificate prog in interpreting; basic knowledge of English grammar recommended)

Key linguistic principles that help us understand how language makes meaning. Applying principles to translation.

TRIN 3101. Introduction to Interpreting. (3 cr. Prereq=high level of proficiency in spoken English and another language; 3001 recommended)

Practical and theoretical introduction to interpreting in health, human service, and legal settings. Emphasis on understanding the unique role of the interpreter, current models and modes of interpreting, ethical issues and professional standards of practice, and developing pre-interpreting skills.

TRIN 3102. Consecutive Interpreting. (3 cr. Prereq=3101, high level of proficiency in [spoken English, another language] as demonstrated by application, Δ)

Practice/theory at professional level in interpreting in health, human service, legal settings. Emphasizes professional/client dialogues. Consecutive interpreting skills, vocabulary research/storage, intercultural issues. Analyzing interpretive process. Performance assessment through audio/videotaping. Subject languages (e.g., Spanish, Russian, Somali) specified for each section.

TRIN 3900. Topics in Translation and Interpreting. (1-4 cr [max 16 cr])

Topics specified in *Class Schedule*.

TRIN 4201. Interpreting in Health Care Settings. (3 cr; A-F only. Prereq=1201, 3102)

Practice in interpreting simulated clinical encounters and monologues. Emphasizes fluency/accuracy in consecutive/simultaneous modes. Sight translation, medical vocabulary in two languages, ethical/situational considerations in health care interpreting. Coursework is done mainly in bilingual sections (English, another language).

TRIN 4301. Interpreting in Legal Settings. (3 cr; A-F only. Prereq=1301, 3102)

Principles/practice of interpreting in legal settings. Skill-building for fluency/accuracy in simultaneous/consecutive modes. Sight translation. Legal register in two languages. Ethical considerations, courtroom conduct. Observation of actual court proceedings. Coursework is done mainly in bilingual sections (English and another language).

TRIN 5900. Topics in Translation and Interpreting. (1-4 cr [max 16 cr])

Topics specified in *Class Schedule*.

TRIN 5993. Directed Study. (1-3 cr [max 3 cr]. Prereq=#, Δ, □)

Directed study in translation and interpretation.

Turkish (TURK)

Institute of Linguistics, ESL, and Slavic Languages and Literatures

College of Liberal Arts

TURK 1001. Beginning Turkish I. (5 cr. §TURK 4001)

Listening, speaking, reading, writing.

TURK 1002. Beginning Turkish II. (5 cr. §TURK 4002.

Prereq=1001)

Listening, speaking, reading, and writing.

TURK 1511. Introduction to Turkish and Ottoman Culture, History, and Society: Intersection of Europe and Asia. (4 cr)

Turkish/Ottoman culture, history, and society, and its pivotal placement between East and West, through popular media, film, literature, and the visual arts. Issues raised by primary source materials from multi-disciplinary perspectives. Modern urban/rural life, recent history, religion, terrorism/violence, migration, ethnicity, Turkic/non-Turkic peoples.

TURK 3001. Intermediate Turkish I. (5 cr. §TURK 4003.

Prereq=1002 or #)

Listening, speaking, reading, and writing skills in modern standard Turkish.

TURK 3002. Intermediate Turkish II. (5 cr. §TURK 4004.

Prereq=3001 or #)

Listening, speaking, reading, and writing skills in modern standard Turkish.

TURK 3900. Topics in Turkish Language, Literature, and Culture. (1-4 cr [max 12 cr])

Variable topics in Turkish language, literature and culture. Consult Institute for details.

TURK 4001. Beginning Turkish I. (3 cr. §TURK 1001.

Prereq=4th sem course in another language or grad student)

Listening, speaking, reading, writing.

TURK 4002. Beginning Turkish II. (3 cr. §TURK 1002.

Prereq=[4001, 4th sem course in another language] or grad student)

Listening, speaking, reading, writing.

TURK 4003. Intermediate Turkish I. (3 cr. §TURK 3001.

Prereq=[4002, 4th semester course in another language] or grad student)

Listening, speaking, reading, and writing skills in modern standard Turkish.

TURK 4004. Intermediate Turkish II. (3 cr. §TURK 3002.

Prereq=[4003, 4th semester course in another language] or grad student)

Listening, speaking, reading, and writing skills in Modern Standard Turkish.

TURK 5900. Topics in Turkish Language, Literature, and Culture. (1-4 cr [max 12 cr])

Variable topics in Turkish language, literature, and culture. Consult Institute for details.

University College (UC)

College of Continuing Education

UC 1000. Exploring Educational Options. (1 cr [max 20 cr]; S-N only. Prereq=Δ, #)

Clarifying expectations, resources, and challenges for transition into (back to) college. Students assess their interests and learning style as they relate to a college major. Internet as means of gaining options for education. Individualized degrees at the University, how to prepare an application for them. Campbell Skills and Interest Survey, Learning Styles Inventory, written assignments. Materials fee: \$25.

UC 3201. Web Designer Introduction. (4 cr; A-F only)

Web design process: plan, design, launch, and publish. Design principles, business practices, site analysis. Students use industry standard Web design software, including Adobe Photoshop, Macromedia Dreamweaver, and Flash, to build Web site. HTML, CSS. Lectures, exercises, lab.

UC 3202. Web Designer Introduction II. (4 cr; A-F only.

Prereq=3201 or #)

Designing with Adobe Photoshop vector tools, using batch processing. Macromedia Flash as an animation tool. Developing an environment through ActionScripts. DHTML Layers, HTML frames, form processing. Internet service providers, hosting, search engines, Web site marketing.

UC 3950. Special Topics. (1-4 cr [max 12 cr])

Special topics course.

UC 4001. Professional Practice of Addictions Counseling.

(4 cr. Prereq=Addis student, #)

Core addictions counseling functions including clinical assessment, case management, documentation treatment planning, and ethical issues. Students begin process of securing internship.

UC 4002. Internship in Substance Abuse Counseling I.

(2-8 cr [max 8 cr]; S-N only. Prereq=Addis 4001, Addis student, #)

Supervised field work experience. Practical application of substance abuse counseling skills such as assessment, treatment planning, and case management.

UC 4003. Internship in Substance Abuse Counseling II. (4 cr; S-N only. Prereq—Adds 4001, Adds 4002, Adds student, #) Students' knowledge, internship site functioning, and counseling skills are advanced through clinical experience/supervision.

UC 4301. Perspectives: Interrelationships of People and Animals in Society Today. (2 cr [max 3 cr]. §CVM 6050, VCS 3050)

Interrelationships of people and animals from several viewpoints. Social, economic, and health consequences of these relationships, including issues such as pets and people sharing an urban environment, animal rights, and the influence of differences in cultures on animal-human relationships.

UC 4525. Garbage and the Human Environment. (3 cr; A-F only)

Human development, use of natural resources, waste production, pollution of environment, waste management. Comparative look at issues/problems associated with rapid technological development. Laws to control waste production and manage accumulated waste.

UC 5075. Directed Study. (1-8 cr; A-F only)
Directed study.

UC 5950. Special Topics. (1-8 cr [max 16 cr])
Special topics.

Urban Studies (URBS)

Department of Geography

College of Liberal Arts

URBS 1001W. Introduction to Urban Studies: The Complexity of Metropolitan Life. (3 cr; A-F only)

Interdisciplinary course, ranging across spatial, historical, economic, political, and design perspectives, among many others.

URBS 3201. Urban Studies Colloquium. (1 cr [max 4 cr]; A-F only. Prereq—Δ)

Urban/metropolitan issues. Topics vary to reflect current concerns. In-depth reading, intensive group discussion.

URBS 3202. Urban Studies Colloquium. (1 cr [max 4 cr]; A-F only)

Urban/metropolitan issues. Topics vary to reflect current concerns. In-depth reading, intensive group discussion.

URBS 3301W. American Cities As Settings for Cultural Diversity. (3 cr)

Explores cultural diversity in American cities, considering patterns of and reasons for racial and class segregation and interaction. Its foci are the problems, conflicts, and successes of cultural diversity from a multidisciplinary perspective.

URBS 3500. Urban Studies Workshop. (3 cr [max 9 cr]; A-F only. Prereq—#)

Links academic learning to actual urban problems/issues. Focuses on specific topic using local community as laboratory. Field work, contact with local institutions/agencies.

URBS 3751. Understanding the Urban Environment. (3 cr; A-F only)

Examine links between cities and the environment with emphasis on air, soil, water, pollution, parks and green space, undesirable land uses, environmental justice, and the basic question of how to sustain urban development in an increasingly fragile global surrounding.

URBS 3771. Fundamentals of Transit. (3 cr)

Importance of transit to an urban area. Issues surrounding development/operation of transit. Defining various modes of transit, evaluating why/where each may be used. Making capital improvements to transit system. Finance, travel demand forecasting, environmental assessment, scheduling, evaluation of effectiveness/accessibility.

URBS 3800. Topics in Urban Studies. (3 cr [max 6 cr])
Topics specified in *Class Schedule*.

URBS 3900. Urban Studies Internship Seminar. (2 cr [max 4 cr]; A-F only. Prereq—Sr, internship placement, Δ, #)
Weekly seminar integrates internship experience with academic program.

URBS 3955W. Senior Paper Seminar. (2 cr; A-F only. Prereq—Δ)
Methods/resources for research. Substantial writing.

URBS 3993. Urban Studies Directed Study. (2-3 cr [max 6 cr]; A-F only. Prereq—URBS majors, #, Δ)
For students with a specific educational objective that cannot be satisfied through regular curriculum (e.g., foreign study) and for honors students to complete an honors opportunity.

URBS 5101. The City and the Metropolis: An Exploration. (3 cr. Prereq—Grad student or [adv URBS undergrad, #])
The City and the Metropolis as places that result from important acts of human creativity. Interdisciplinary/exploratory perspectives. Building/developing (North American) cities, Construction of "urban culture."

Urdu (URDU)

Asian Languages and Literatures

College of Liberal Arts

URDU 1001. Introduction to conversational Urdu. (3 cr)
Development of spoken Urdu. Fundamentals of composition.

URDU 1101. Beginning Urdu. (5 cr)
Basic listening, speaking, reading, and writing skills. Emphasizes development of communicative competence.

URDU 1102. Beginning Urdu. (5 cr. Prereq—1101 or #)
Basic listening, speaking, reading, and writing skills. Emphasizes development of communicative competence.

URDU 3131. Intermediate Urdu. (5 cr. Prereq—1102 or #)
Development of reading, writing, speaking, and listening skills. Grammar review, basic compositions, oral presentations.

URDU 3132. Intermediate Urdu. (5 cr. Prereq—3131 or #)
Development of reading, writing, speaking, and listening skills. Grammar review, basic compositions, oral presentations.

URDU 4001. Beginning Urdu. (3 cr. Prereq—Passing score on GPT in another language or grad student)
Listening, speaking, reading, writing. Emphasizes development of communicative competence.

URDU 4002. Beginning Urdu. (3 cr. Prereq—Passing score on GPT in another language or grad student)
Listening, speaking, reading, and writing skills. Emphasizes development of communicative competence.

Veterinary Medicine (CVM)

CVM 1000. Introduction to Veterinary Medicine. (1 cr; S-N only)
History of veterinary profession, careers within the profession, employment trends. Information about admission to DVM. Veterinary technology programs.

Vietnamese (VIET)

Asian Languages and Literatures

College of Liberal Arts

VIET 1015. Accelerated Beginning Vietnamese. (5 cr. Prereq—Ability in basic spoken Vietnamese)
Oral, reading, and writing skills. Grammar/usage, practice in reading/writing. Vietnamese literature, other formal writing. Vietnamese culture.

VIET 1016. Accelerated Intermediate Vietnamese. (5 cr. Prereq—1015 or #)
Oral, reading, and writing skills. Grammar/usage, practice in reading/writing. Vietnamese literature, other formal writing. Vietnamese culture.

Water Resources Science (WRS)

Water Resources Center

College of Food, Agricultural and Natural Resource Sciences

WRS 5001. Introduction to Field Research in Water Resources. (2 cr. Prereq—Grad WRS major or #)
Introduction to field research techniques and opportunities during two-week summer excursion to regional sites. Data acquisition in large/small lakes, streams, and wetlands for biota and chemical/physical water quality; surface and groundwater hydrologic measurements and sampling.

WRS 5101. Water Resources: Individuals and Institutions. (3 cr. Prereq—Grad student or #)
Socio-cultural, legal, and economic forces that affect use of water resources by individuals/institutions. Historical trends in water policy, resulting water laws in the United States. Institutional structures whereby water resources are managed at federal, state, and local levels.

WRS 5241. Ecological Risk Assessment. (3 cr. Prereq—#)
Evaluating current/potential impact of physical, chemical, and biological agents on ecosystems. Identifying ecological stressors, assessing level of exposure, measuring ecological responses, communicating/managing risks. Class participation, two reaction papers, final exam, small-group project.

Women's Studies (WOST)

Department of Women's Studies

College of Liberal Arts

WOST1001. Introduction to Women's Studies. (3-4 cr [max 4 cr]. §WOST 1051)
U.S. multi-/cross-cultural studies of contemporary social, cultural, and personal conditions of women's lives. Includes honors recitation.

WOST 1002. Politics of Sex. (3-4 cr [max 4 cr]. §WOST 1052)
Introductory survey of historical, cultural, psychological, and sociopolitical dimensions of analyzing gender/sexuality. Norms/deviances pertaining to gender/sexuality as differently enacted/understood by social groups in different time-/place-specific locations.

WOST 1003W. Women Write the World. (3-4 cr [max 4 cr])
Concepts in literary studies. Poems, plays, short stories, novels, essays, letters by women from different parts of world. Focuses on lives, experiences, and literary expression of women, including basic concepts of women's studies.

WOST 1902. Freshman Seminar. (3 cr; A-F only. Prereq—Fr with no more than 29 cr)
Topics/description vary. See *Class Schedule, Course Guide*.

- WOST 1904. Freshman Seminar.** (3 cr; A-F only. Prereq—Freshman)
Topics specified in *Class Schedule*.
- WOST 1905. Freshman Seminar.** (3 cr [max 4 cr]; A-F only. Prereq—Freshman)
Topics/description vary. See *Class Schedule, Course Guide*.
- WOST 3002. Gender, Race, and Class: Women's Lives in the United States.** (3-4 cr [max 4 cr]. \$WOST 3002H)
Comparative study of women/gender, race, class, and sexuality in two or more U.S. ethnic cultures. Includes honors recitation.
- WOST 3002H. Honors: Gender, Race, and Class: Women's Lives in the United States.** (3-4 cr [max 4 cr]. \$WOST 3002. Prereq—Honors)
Comparative study of women/gender, race, class, sexuality in two or more U.S. ethnic cultures. Honors recitation.
- WOST 3003. Gender and Global Politics.** (3-4 cr [max 4 cr]. \$WOST 3003H)
Similarities/differences in women's experiences throughout world, from cross-cultural/historical perspective. Uses range of reading materials/media (feminist scholarship, fiction, film, news media, oral history, autobiography).
- WOST 3003H. Honors: Gender and Global Politics.** (3-4 cr [max 4 cr]. \$WOST 3003. Prereq—honors)
Similarities/differences in women's experiences throughout world from cross-cultural/historical perspective. Uses range of reading materials/media (feminist scholarship, fiction, film, news media, oral history, autobiography). Includes honors recitation.
- WOST 3004V. Honors: Point/Counterpoint: Contemporary Feminist Debates.** (3-4 cr [max 4 cr]. \$WOST 3004W. Prereq—Honors)
Contemporary debates of concern to many women. Abortion, affirmative action, marriage rights, welfare rights, sex education, children's rights, date rape. In-depth study of several issues. Debate pros/cons of relevant perspectives. Includes honors recitation.
- WOST 3004W. Point/Counterpoint: Contemporary Feminist Debates.** (3-4 cr [max 4 cr]. \$WOST 3004V)
Contemporary debates of concern to many women. Abortion, affirmative action, marriage rights, welfare rights, sex education, children's rights, date rape. In-depth study of several issues. Debate pros/cons of relevant perspectives. Includes honors recitation.
- WOST 3102V. Honors: Feminist Thought and Theory.** (3-4 cr [max 4 cr]. \$WOST 3102W)
Feminist theoretical perspectives. How theory develops in response to traditions/forms of practice.
- WOST 3102W. Feminist Thought and Theory.** (3-4 cr [max 4 cr]. \$WOST 3102V)
Feminist theoretical perspectives. How theory develops in response to traditions/forms of practice.
- WOST 3190. Topics: Theory, Knowledge, and Power.** (3 cr [max 12 cr])
Topics specified in *Class Schedule*.
- WOST 3201. Sociology of Gender.** (3 cr; A-F only. \$SOC 3221. Prereq—1001 or 1002 or #)
Organization, culture, and dynamics of gender relations. Gender/racial inequalities in workplace. Relationships between gender/race, gender/culture. Sexuality, gendered politics, women's movement.
- WOST 3202. Biology of Women.** (4 cr)
Biological aspects of female life from early development to old age. Biology of sex differences/sexuality, menarche/menstrual cycles, gestation/parturition, female-specific diseases/conditions, menopause/aging. Ways of knowing biology of female body. Includes lab.
- WOST 3202H. Honors: Biology of Women.** (4 cr)
Biological aspects of female life from early development to old age. Biology of sex differences/sexuality, menarche, gestation/parturition, female-specific diseases/conditions, menopause. Ways of knowing biology of female body. Includes lab.
- WOST 3203W. Skin, Sex, and Genes.** (3 cr. Prereq—3202 or #)
Ways in which modern biology has been site of conflict about race/gender. Race/gender demographics of scientific professions.
- WOST 3204. Women's Psychologies: Feminist and Multicultural Perspectives.** (3 cr)
Examines culture, gender, ethnicity, class, sexual identity, and age as factors that influence women's diverse psychologies.
- WOST 3206. Women and Madness in History and Literature.** (3 cr. \$WOST 5203. Prereq—Jr)
The representation of madness and how it intersects with gender as well as class, race, sexual orientation, and nationality.
- WOST 3207. Gender and the Global Politics of Health.** (3 cr; A-F only. \$GLOS 3607)
Politics, global processes, and social relations that shape health/disease patterns world wide. Case studies, including HIV/AIDS in Africa, diabetes and health care in the U.S., new reproductive technologies, and access to food. How gender, poverty, geographic/social location, citizenship, sexuality, and other factors help determine degree of vulnerability to disease or right to health.
- WOST 3290. Topics: Biology, Health, and Environmental Studies.** (3 cr)
Topics specified in *Class Schedule*.
- WOST 3290H. Topics: Biology, Health, and Environmental Studies: Enviro/ Feminism.** (3 cr. Prereq—Honors)
Concepts of environmental biology, changing conditions of life on earth, creating a sustainable future. Connection between feminism and environmental justice. Disproportionate impact of environmental crises on women, children, and economically disadvantaged communities.
- WOST 3301W. Women Writers.** (3 cr. Prereq—Intro literature course)
Literature in various genres (e.g., novels, short stories, poems, essays, plays, autobiography) written by women of various racial/ethnic backgrounds.
- WOST 3302. Women and the Arts.** (3 cr)
Study of women in the arts, as represented and as participants (creators, audiences). Discussion of at least two different art forms and works from at least two different U.S. ethnic or cultural communities.
- WOST 3303W. Writing Differences: Literature by U.S. Women of Color.** (3 cr)
Interpret/analyze poetry, fiction, and drama of U.S. women minority writers. Relationship of writer's history, ethnicity, race, class, and gender to her writings.
- WOST 3305. Language and Gender.** (3 cr. \$COMM 3405)
Gender and communication with an emphasis on interdisciplinary theory. Role of communication in creating, maintaining, reinforcing, and sometimes changing gender relations in society.
- WOST 3306. Pop Culture Women.** (3 cr)
Contemporary U.S. feminism as political/intellectual movement. Ways in which movement has been represented in popular culture.
- WOST 3307. Feminist Film Studies.** (3 cr)
Construction of different notions of gender in film, social uses of these portrayals. Lectures on film criticism, film viewings, class discussions.
- WOST 3308W. Women's Contemporary Fiction.** (3 cr)
Themes and features of style and content related to changes in women's roles in novels and short stories by English-language women writers of the late 20th century. Significance of race, sexual orientation, class, and age in the conditions of women's lives and their portrayal in literature.
- WOST 3390. Topics: Visual, Cultural, and Literary Studies.** (3 cr)
Topics specified in *Class Schedule*.
- WOST 3403W. Jewish Women in the United States.** (3 cr. \$AMST 3632W, JWST 3632W)
Twentieth century American Jewish women—historically, sociologically, religiously, and culturally; key developments over the century.
- WOST 3404. International Lesbian and Queer Studies.** (3 cr. Prereq—1001 or 1002 or 3001 or #)
Lesbian/gay lives throughout world. Culturally-specific/transcultural aspects of lesbian/gay identity formation, political struggles, community involvement, and global networking. Lesbian/gay life in areas other than Europe and the United States.
- WOST 3405. Latin American Women's Lives.** (3 cr. \$LAS 3405. Prereq—1001, 1002 or 1003 or LAS 3131 or #)
An interdisciplinary approach to understanding women's lives in Latin America. Use of ethnography, history, poetry, fiction, and "testimonio" to understand the conditions of women's lives in Latin America.
- WOST 3406. Gender, Labor, and Politics.** (3 cr)
Historical changes in women's labor force participation in the United States from 1890 to present. Systematic/institutional processes that maintain/reproduce sex segregation. Women's efforts to change their work situations.
- WOST 3407. Women in Early and Victorian America: 1600-1890.** (3 cr. \$HIST 3347)
Varied experiences of women in American history from European settlement in North America to the end of the 19th century.
- WOST 3408. Women in Modern America.** (3-4 cr. \$HIST 3348. Prereq—3407)
History of women in the United States from 1890 to the present. Women's changing roles in politics, in the labor force, in the family, and in the popular culture. Themes include work, family, sexuality, gender ideologies, women's right struggles, and the different experiences of women based on race, class, religion, and region.
- WOST 3409W. Asian American Women's Cultural Production.** (3 cr)
Diversity of cultures designated "Asian American." Understanding women's lives in historical, cultural, economic, and racial contexts.
- WOST 3410. La Chicana.** (3 cr. \$CHIC 3212)
Focus on Chicanas or politically defined women of the Mexican-American community. Method is interdisciplinary emphasizing the importance of historical context and cultural process to any discussion of the Chicana experience.
- WOST 3411. Las Mujeres.** (3 cr. \$CHIC 3402)
Focus on Chicanas; women of the Mexican-American community. Exploration of racial, economic, political, and gender issues of concern to all Mexican Americans and diverse Latino cultures.
- WOST 3412. American Indian Women: Ethnographic and Ethnohistorical Perspectives.** (3 cr; A-F only. \$AMIN 3409, AMIN 5409)
Comparative survey of ethnographic/ethnohistorical writings by/about American Indian women.
- WOST 3413. Women and Gender in Latin American History.** (3 cr. \$HIST 3424)
Changing gender norms in Latin America over time as compared with lives of women/men of diverse classes, ethnic groups. How women responded to their position in society, on continuum from accommodation to resistance.
- WOST 3414. Women in Medieval Europe.** (3 cr; A-F only)
Women's role in family, politics, religion, work, and social movements. Representations of women in religious texts, art, literature, scientific studies, and law. Methods/approaches to study of women's history.
- WOST 3490. Topics: Political Economy and Global Studies.** (3 cr)
Topics specified in *Class Schedule*.

Course Descriptions

WOST 3503. Women and the Law. (3 cr)

Legal system as it relates to women: historical legal approach to issues related to constitutional rights of women.

WOST 3590. Topics: Social Change, Activism, Law, and Policy Studies. (3 cr)

Topics specified in *Class Schedule*.

WOST 3690. Topics: Women, Society, and Race in the United States. (3 cr)

Topics specified in *Class Schedule*.

WOST 3880H. Honors Directed instruction. (1-8 cr [max 12 cr]. Prereq–Honors)

Directed instruction.

WOST 3890H. Topics: Honors Seminar. (1-8 cr [max 12 cr]. Prereq–Honors)

Topics vary. Topics that students would like faculty to develop into a course or topics closely related to faculty research/scholarship or contemporary issues.

WOST 3893H. Honors Directed Study. (1-8 cr [max 12 cr]. Prereq–Honors)

Honors directed study.

WOST 3894H. Honors Directed Research. (1-8 cr [max 12 cr]. Prereq–Honors)

Honors directed research.

WOST 3980. Directed Instruction. (1-12 cr [max 12 cr]. Prereq–#, Δ, □)

Prereq–#, Δ, □

WOST 3993. Directed Study. (1-12 cr [max 12 cr]. Prereq–#, Δ, □)

Prereq–#, Δ, □

WOST 3994. Directed Research. (1-12 cr [max 12 cr]. Prereq–#, Δ, □)

Prereq–#, Δ, □

WOST 4102. Women, Gender, and Science. (3 cr. \$HSCI 4455. Prereq–1001 or 1002 or 3102 or #)

Three intersecting themes analyzed from 1700s to the present: women in science, sexual and gendered concepts in modern sciences, and impact of science on conceptions of sexuality and gender in society.

WOST 4103H. Honors: International Feminist Theories. (3 cr. \$WOST 5104. Prereq–[3102, 8 cr WoSt] or grad or #)

Western/nonwestern feminist theories in conversation. Historical, cultural, and political context. Relation of theory to activism.

WOST 4108W. Senior Seminar: Writing. (3 cr. Prereq–WoSt [jr or sr])

Writing seminar for senior project. Writing process. Project is completed under supervision of instructor and faculty adviser.

WOST 4109. Field Learning. (2 cr. Prereq–WoSt major)

Projects that involve an internship or learning practicum.

WOST 4122. Philosophy and Feminist Theory. (3 cr. \$PHIL 4622, PHIL 5622, WOST 5122. Prereq–8 crs in [philosophy or women's studies] or #)

Encounters between philosophy/feminism. Gender's influence in traditional philosophical problems/methods. Social role of theorist/theorizing as they relate to politics of feminism.

WOST 4190. Topics: Theory, Knowledge, and Power. (3 cr. Prereq–Sr or grad student or #)

Topics specified in *Class Schedule*.

WOST 4201. The Older Woman: A Feminist Perspective. (3 cr. Prereq–12 cr in WoSt or substantial work in psych or soc sci)

Myths and realities surrounding conceptualizations of older women in public, private, personal, social, sexual, professional, and community interactions.

WOST 4290. Topics: Biology, Health, and Environmental Studies. (3 cr. Prereq–Sr or grad student or #)

Topics specified in *Class Schedule*.

WOST 4302H. Honors: Women's Personal Narratives. (3 cr. Prereq–3301 or 3302 or 3 cr literary studies or 3 cr AFROAm or #)

Literary autobiography, journals, travel narratives, essays, slave narratives, and ethnographies used to consider content of and methodological, theoretical, and aesthetic issues in constructing/producing women's experience.

WOST 4390. Topics: Visual, Cultural, and Literary Studies. (3 cr. Prereq–Sr or grad student or #)

Topics specified in *Class Schedule*.

WOST 4401. Chicana/Latina Cultural Studies. (3 cr. \$CHIC 4401. Prereq–3002 or 3410 or 3411 or 3 cr Chicano studies or #)

Diversity of cultures called “Hispanic”; women in these cultures. Chicanas/Latinas living in United States or migrating from their home nations to United States.

WOST 4402. Rebels, Radicals, and Revolutionaries: History of Western Feminisms. (3 cr [max 4 cr])

Survey of main currents in history of western feminist thought, politics, and social movements from 1770s to present.

WOST 4403. Queering Theory. (3 cr. Prereq–1002 or 3102 or #)

Lesbianism and lesbian identities as products of cultural practices, relations, and meanings that are historically specific/changing.

WOST 4404. Gender, Nation, and Literature in Latin America. (3 cr. Prereq–[1001 or course on feminist theory], [jr or sr])

Latin American literature/film concerning gendered nature of Latin American politics, society, and history. Texts by (mostly) women writers/filmmakers. Texts are in English but available in Spanish or Portuguese.

WOST 4490. Topics: Political Economy and Global Studies. (3 cr. Prereq–Sr or grad student or #)

Topics specified in *Class Schedule*.

WOST 4502. Women and Public Policy. (3 cr. Prereq–[Jr or sr] WoSt major or 9 cr [WoSt or pol sci or sociology] or #)

Public policy issues, processes, and histories as these affect women-, children-, and gender-related issues.

WOST 4504. Women and the Legislative Process. (3 cr. Prereq–Jr or sr or grad student or #)

Current/historical roles, impacts, and interactions of women as legislators, constituents, and professional or citizen lobbyists in state/national legislatures. Unique contributions, issues, challenges of women. Ways in which gender is operative in legislative process.

WOST 4505. Honors: Legislative Internship. (3 cr. Prereq–4504 or equiv or grad, Δ)

Discussion group and learning community for students working as interns for a Minnesota legislator during the year's legislative session.

WOST 4590. Topics: Social Change, Activism, Law, and Policy Studies. (3 cr. Prereq–Jr or sr or grad student)

Topics specified in *Class Schedule*.

WOST 4690. Topics: Women, Society, and Race in the United States. (3 cr)

Topics specified in *Class Schedule*.

WOST 4790. Topics: Sexuality Studies. (3 cr)

Topics specified in *Class Schedule*.

WOST 4900W. Women's Studies Seminar. (3 cr [max 12 cr]; A-F only. Prereq–WoSt major, junior or senior standing, or #)

Includes a component on research methods/writing. Capstone experience. Culminates in a 20-25 page paper.

WOST 4980. Directed Instruction. (1-8 cr [max 12 cr])

WOST 4993. Directed Study. (1-8 cr [max 12 cr])

WOST 4994. Directed Research. (1-8 cr [max 12 cr])

Preparation for feminist ethnographic research in the social sciences. Using recent works by feminist ethnographers, focus is on the methods, politics, and ethics, as well as gender, race, class, and cross-cultural issues pertaining to fieldwork.

WOST 5102. Feminist Approaches to History. (3 cr. Prereq–8 cr WoSt or grad or #)

Analysis and practice of feminist history. Theories, methods, and sources that address the interrelationship of gender, race, class, and sexuality.

WOST 5103. Feminist Pedagogies. (3 cr. Prereq–Grad or #)

Theory and practice of feminist pedagogies by comparing and evaluating various multicultural feminist theories of education/teaching and the application of specific theories, techniques, and teaching strategies.

WOST 5104. International Feminist Theory. (3 cr. \$WOST 4103H)

Third World and transnational feminisms. Interrogating the categories of “women,” “feminism,” and “Third World.” Varieties of power/oppression that women have endured/resisted, including colonization, nationalism, globalization, and capitalism. Concentrates on postcolonial context.

WOST 5105W. Gendered Rhetoric of Science and Technology. (3 cr. Prereq–[SRHET 5108, \$Rhet 8530]; 8 cr WoSt or grad or #)

How cultural gender roles are affected by science and technology as well as influence scientific and technological thinking and communication strategies.

WOST 5107. Gender, Culture, and Science. (3 cr)

Critical study of some of the major papers concerning the relations of gender and scientific inquiry produced in the past 20 years.

WOST 5122. Philosophy and Feminist Theory. (3 cr. \$PHIL 4622, PHIL 5622, WOST 4122. Prereq–8 crs in [philosophy or women's studies] or #)

Encounters between philosophy/feminism. Gender's influence in traditional philosophical problems/methods. Social role of theorist/theorizing as they relate to politics of feminism.

WOST 5190. Topics: Theory, Knowledge, and Power. (3 cr)

Topics specified in *Class Schedule*.

WOST 5201. Global Processes and the Politics of Sexuality. (3 cr. Prereq–12 cr WoSt or feminist studies grad student or #)

Comparative examination of the social construction of sexuality. Formal/informal norms/regulations, categories of deviance, representation of sex in the media/arts, role of sexuality in relation to agency/subjectivity.

WOST 5203. Women and Madness in History and Literature. (3 cr. \$WOST 3206. Prereq–Jr, 4 cr WoSt or #)

The representation of madness and how it intersects with gender as well as class, race, sexual orientation, and nationality.

WOST 5290. Topics: Biology, Health, and Environmental Studies. (3 cr)

Topics specified in *Class Schedule*.

WOST 5300. Communication and Gender. (3 cr; A-F only. \$COMM 5406. Prereq–one women's studies course or #)

How gender affects verbal communication. Development of analytical skills through readings, exercises, research that raise awareness of the power of language and the influence of gender prescriptions.

WOST 5390. Topics: Visual, Cultural, and Literary Studies. (3 cr)

Topics specified in *Class Schedule*.

WOST 5403. Chicana/Latina Feminisms. (3 cr. Prereq–8 cr WoSt and/or Chic or grad or #)

The historical and social development of Chicana and Latina feminisms in general and their various specific types.

WOST 5404. Working Class Women's Cultures. (3 cr. Prereq–12 cr WoSt or #)

Myths and realities surrounding working class women and their cultures. Use sociological and literary material in an effort to learn about working class women and to hear their own voices.

WOST 5405. Chicanas: Women and Work. (3 cr. Prereq–#)

Chicanas, their various relationships to family/community. Local, national, and global work forces. Questions/issues related to growing integration of world's systems of production.

WOST 5490. Topics: Political Economy and Global Studies. (3 cr [max 12 cr])

Topics specified in *Class Schedule*.

WOST 5501. Women and the Law. (3 cr. Prereq–9 cr [WoSt or pre-law grad] or #)

Legal system as it relates to women: historical legal approach to issues related to constitutional rights of women.

WOST 5590. Topics: Social Change, Activism, Law, and Policy Studies. (3 cr [max 12 cr])

Topics specified in *Class Schedule*.

WOST 5690. Topics: Women, Society, and Race in the United States. (3 cr)

Topics specified in *Class Schedule*.

WOST 5790. Topics: Sexuality Studies. (3 cr)

Topics specified in *Class Schedule*.

WOST 5993. Directed Study. (1-12 cr [max 12 cr])

WOST 5994. Directed Instruction. (1-12 cr [max 36 cr])

WOST 5995. Directed Research. (1-8 cr [max 36 cr])

Work and Human Resource Education (WHRE)

Work and Human Resource Education

College of Education and Human Development

WHRE 1301. Introduction to Career and Technical Education Teaching. (2 cr; A-F only. Prereq–Occupationally certifiable individual)

Entry-level skills to function as a teacher. Philosophy of career/technical education, planning of instruction, instructional methods, student evaluation, working with students who have special needs, ancillary duties of career/technical education faculty. Emphasizes microteaching and feedback.

WHRE 3011W. Introduction to Technology and Public Ethics. (3 cr)

Nature of technology. Values, ethical issues related to technology. Technology and transformation of workplace, family, community life.

WHRE 3105. Introduction to Strategic Planning Through Human Resources. (3 cr; A-F only. Prereq–3001)

Processes organizations use when engaged in strategic planning. How to participate in planning, implementing, and evaluating strategic initiatives to improve performance.

WHRE 3121. Communication, Energy and Power, Transportation and Machinery Technologies. (3 cr; A-F only)

Instruction and laboratory experiences in communication, information, power, energy, and transportation technologies. Topics include power systems; transportation systems; information and communication systems; graphic communication and computer applications.

WHRE 3301. Foundations of Philosophy and Practice of Career and Technical Education. (2 cr; A-F only)

Introduction to contemporary career/technical education. Purposes/goals, governance structure, historical perspectives, industry-education relationship, current education practices. Possible future trends and their implications. Development of a personal philosophy of career/technical education.

WHRE 3601. Foundations of Student and Trainee Assessment. (2 cr; A-F only)

Developing tests of knowledge, affect, and processes for programs focused on instruction of skills associated with business/industry. Developing learning-progress reporting systems. Evaluating instructional effectiveness. Applying tests and other evaluation instruments to assess/report learning in business/industry and in career/technical education fields.

WHRE 3629. Foundations of Course Development for Business and Industry. (2 cr; A-F only)

Designing instructional programs/courses focused on helping learners develop desired competence. Designing instruction for performance-based training and vocational/technical education. Developing course syllabus components that clarify broad course expectations. Developing academic/community-based elements that complement course goals.

WHRE 3661. Foundations of Instructional Methods for Business and Industry. (2 cr; A-F only. \$HRD 3661)

Theory/practice in instructional methods/techniques for career/technical education (CTE) instructors and for human resources and development (HRD) professionals. How to deliver instruction using various teaching methodologies, select appropriate methodologies, and plan for their delivery.

WHRE 3990. Special Topics for Undergraduates in WHRE. (1-4 cr [max 12 cr])

Course content varies by offering.

WHRE 4990. Special Topics: Professional Issues in WHRE. (1-4 cr [max 12 cr])

Course content varies by offering.

WHRE 5001. Survey: Human Resource Development and Adult Education. (3 cr)

Overview of fields of human resource development and adult education. Includes societal context, theories, processes, definitions, philosophies, goals, sponsoring agencies, professional roles, participants, and resources. Focus on the unique characteristics and ways the fields overlap and enhance one another.

WHRE 5002. Thinking, Learning, and Teaching in Work and Human Resource Education. (3 cr; A-F only)

Nature of thinking/learning in everyday life contexts of work and human resource education. Theory/practice relevant to stimulating/supporting thinking/learning in/for these contexts.

WHRE 5011W. Technology and Public Ethics. (3 cr; A-F only)

Nature of technology. Values, ethical issues related to technology. Technology and transformation of workplace, family, community life. Critique of technology.

WHRE 5021. Learning Through Service. (3 cr)

Service as philosophy and as method of learning. Theory/practice of service in school-based, work-based, and community-based organizations.

WHRE 5031. Information Resources in Education. (3 cr; S-N only)

Sources of knowledge and search strategies for accessing library, electronic, institutional, and informal resources of interest to educators.

WHRE 5101. Introduction to Leadership and Administration of WHRE. (3 cr)

Finance, public relations, communications, legal aspects, leadership, personnel policies/management, program planning/development, evaluation. Inter-institutional collaboration of work and human resource education programs in school-based settings.

WHRE 5102. Leadership in WHRE. (2 cr)

Leadership, leadership roles/responsibilities. Application to work and human resource education.

WHRE 5121. Principles of Supervisory Management. (3 cr)

Introduction to the principles of supervision in education, business, industry, government, and service organizations.

WHRE 5131. Planning WHRE. (3 cr)

Educational planning. Evaluation of work and human resource education in formal/informal settings.

WHRE 5141. Evaluation of WHRE. (3 cr)

Designing/conducting project, program, and systems evaluations in work and human resource education contexts/settings.

WHRE 5201. Family and Work Relationships. (3 cr; A-F only)

Examination of the interactions of work and family to prepare professionals to improve work and family relationships.

WHRE 5301. Philosophy and Practice of Career and Technical Education. (2 cr; A-F only)

Purposes/goals of contemporary career/technical education. Governance structure, historical perspectives, industry-education relationship, current education practices. Possible future trends and their implications. Development of a personal philosophy of career/technical education.

WHRE 5331. Coordination Techniques for Work and Human Resource Education. (3 cr)

Purposes of cooperative work and community education. Responsibilities of instructor coordinator: guidance, selection, placement, supervision, and evaluation of students. Articulation of related instruction. Training sponsor identification, orientation, development, and evaluation. Program management.

WHRE 5341. Global Program Delivery Techniques and Technology of Extension. (2 cr; A-F only. \$AFEE 5341)

Special educational activities and teaching and communications methods and techniques for youth and adults, ranging from outreach to extension services, with an emphasis on youth and adult education programs in different global settings.

WHRE 5351. Methods for Change in Developing Countries. (3 cr; A-F only. \$AFEE 5351)

Sociological and cultural parameters as they pertain to promoting the adoption of improved practices in rural, community, and agricultural development, including formal and informal education institutions. Project planning, implementation, and evaluation related to actual change and development situations in developing countries.

WHRE 5401. Distance Learning in Adult Education and Training. (3 cr; A-F only)

Distance learning concepts, theory, history, present practice, delivery systems, course design, major issues, future directions.

WHRE 5501. Organizational Learning. (3 cr; A-F only)

Theoretical, empirical, and practical aspects of learning in organizations. Historical context. Definitions, theories, and applications of organizational learning. Learning organization, knowledge management, intellectual capital.

WHRE 5511. Education for Work. (3 cr)

Examination of contextual bases underlying education for work; implications for practice.

WHRE 5521. Work-Based Learning Policies. (2 cr)

Aims/purposes of federal, state, and local policies, related to work-based learning.

WHRE 5522. Work-Based Learning Practices. (3 cr)

Learning in context. Curricular integration. Educational systems articulation. Educational partnerships. Best practices in school-/work-/service-based learning/connecting activities. Building community support. Leadership relating to active, community-based learning.

WHRE 5601. Student and Trainee Assessment. (2 cr; A-F only. \$HRD 5601. Prereq–\$: BIE 5601)

Developing learning progress reporting systems and tests of knowledge, affect, and processes for programs focused on instruction of skills associated with business/industry. Evaluating instructional effectiveness. Applying tests and other evaluation instruments to assess/report learning in business/industry and career/technical education fields. Students develop each type of test and an overall evaluation plan for a course.

WHRE 5612. Managing and Consulting in Human Resource Development and Adult Education. (3 cr. Prereq–5001)

The theory of managing and consulting in human resource development and adult education. Includes a personal assessment of role requirements and experimentation with management and consultation processes and techniques.

WHRE 5628. Multimedia Presentations in Business. (3 cr. Prereq=5011 or equiv)
Designing, creating, and presenting information using multimedia resources in business settings.

WHRE 5629. Course Development for Business and Industry. (2 cr; A-F only. \$HRD 5629)
Designing instructional programs/courses that help learners develop desired competence. Designing instruction for performance based training and vocational/technical education. Developing course syllabus components that clarify course expectations. Developing academic/community-based elements that complement course goals. Reflect on and compare performance-based instruction with other curriculum models for the field.

WHRE 5661. Instructional Methods for Business and Industry. (2 cr. Prereq=HRD 5661 or BIE 5661)
Theory/practice in instructional methods for career/technical education (CTE) instructors and human resources/development (HRD) professionals. How to select various teaching methods and plan for their delivery. Preparing an instructional methods plan to clarify course content, teaching methods selected, rationale for their selection, and how a student organization might facilitate student learning.

WHRE 5696. Teaching Internship: Introduction. (1 cr. \$CI 5924. Prereq=Admission to initial licensure program)
Initial experiences in teaching profession. Observation of school organization/administration, seminars, relationship building with cooperating teachers, reflection on personal involvement as a beginning student teacher.

WHRE 5697. Teaching Internship: School and Classroom Settings. (2 cr. Prereq=5696 for initial licensure program)
Part-time supervised teaching experience in a school. Seminars on managing student's learning in context of work and human resource education programs in contemporary schools and on becoming a reflective educator.

WHRE 5698. Teaching Internship. (3-8 cr [max 8 cr]. Prereq=Admission to initial licensure program)
Teaching experience in a school system that provides programs for grades 5-12.

WHRE 5699. Teaching Internship: Extended. (1 cr. \$CI 5927. Prereq=5698)
Extended student teaching experience in a school system that provides programs for grades 5-12.

WHRE 5771. Teaching Entrepreneurship: Small Business Management. (3 cr)
Methods, organization, curriculum development and modification, and implementation of educational programs for entrepreneurs.

WHRE 5801. Educating Special Populations in Work and Human Resource Education Settings. (3 cr)
Identifying/accommodating in work and human resource education settings educational traits of students with disabilities and disadvantaging conditions.

WHRE 5802. Enhancing Work-based Learning Through Collaboration. (2 cr)
Interagency planning issues/practices relating to special populations for educational, business, and human service organization personnel, family members, and advocates.

WHRE 5803. Developmental Writing and the College Student: Theory and Practice. (3 cr. Prereq=Bachelor's degree)
Basic grounding in theory/practice of college-level developmental writing instruction. History of "basic writing," development of notions of "academic discourse," error/grammar in student writing, best classroom practices, current issues.

WHRE 5804. Research in Postsecondary Developmental Education. (3 cr. Prereq=Bachelor's degree, courses in [intro psychology, basic statistics])
Strategies for conducting three types of research that are central to developmental education: placement test validation, program evaluation, and classroom research. Students read examples and learn what constitutes best practices in each type.

WHRE 5821. Diversity Issues and Practices in Work and Human Resource Education Settings. (3 cr)
Nature of diverse populations, their unique learning/training needs. Exemplary programs. Collaborative efforts among persons representing work and human resource education settings.

WHRE 5822. Diversity and Organizational Transformation in Work and Human Resource Education. (3 cr)
Developing models for understanding impact of diversity on individual, organizational, and community outcomes. Discussing organizational change in relation to diversity.

WHRE 5823. Program Planning and Improvement for Special Populations in Work and Human Resource Education. (2 cr)
Concepts, issues, and practices related to the design, implementation, and evaluation of efforts focused on developing new programs or modifying existing programs, in work and human resource education settings, for individuals with special learning needs.

WHRE 5901. Using Research in Work and Human Resource Education. (3 cr)
Role of work and human resource education research in professional practice. Problems of practice for research. Alternative modes of research. Synthesis/application of results of research.

WHRE 5990. Special Topics in Work and Human Resource Education. (1-4 cr [max 4 cr])
Topics vary.

WHRE 5993. Directed Study in WHRE. (1-4 cr [max 4 cr])
Self-directed study, with faculty advice, in areas not covered by regular courses.

Youth Development and Research (YOST)

School of Social Work

College of Education and Human Development

YOST 1001. Seeing Youth, Thinking Youth: Media, Popular Media, and Scholarship. (3 cr)
Use of life-experience, news and popular media to explore everyday realities of being a young person, as it varies by age social class, race/ethnicity, geography, time period, sexual orientation, and capacity.

YOST 2001. The Everyday Lives of Youth. (4 cr)
Introduction to everyday lived experience of youth. Ways of knowing youth. Social/cultural foundations of youthwork. How to "read" life-worlds of young people. At least 15 hours of service learning required.

YOST 2002W. Introduction to Youth Studies: Understanding Youth, Young People, Youthhood, and Youth Work. (4 cr)
Introduces youth studies minor. Prepares students for more in-depth departmental offerings and for continued scholarship or later work with youth, directly or on their behalf.

YOST 2101. Urban Youth and Youth Issues. (4 cr. Prereq=1001 or #)
What it is like to be a young person in a city, in the United States and worldwide.

YOST 2241. Experiential Learning. (4 cr. \$YOST 5241. Prereq=[1001, 2001] or #)
History/theory of experiential learning, its application in youthwork. Observation, reflection, program design, and evaluation skills grounded in experiential learning theory. 15 hours of field observation required.

YOST 3001. Introduction to History and Philosophy of Youthwork. (4 cr. Prereq=2xxx or #)
Foundations of youthwork. Where contemporary American youthwork stands, particularly in comparison with international perspectives on youth/youthwork.

YOST 3002. Observation Lab: Youth, Youth Development, and Youth Work. (1 cr; A-F only. Prereq=SOC 1001, PSY 1001, 2001, #3001 and 3003)
Field observation of young people. Field visits to youth programs.

YOST 3003. Bridging Theories, Research, Practices, and Observations about Youth Development and Youth Work. (1 cr; A-F only. Prereq=PSY 1001, SOC 1001, 2001, #3001 and 3002)
Reflective seminar to carry out, at beginning level, guided reflection of one's/others' ideas, experiences, feelings about courses, self, youth work.

YOST 3004. Youth in Community Context: Home, School, Neighborhood, Geography, Programs, Policies. (2 cr; A-F only. Prereq=3001, #3005 and 3006)
Introduces community, sociocultural context of "growing up," "coming of age" as primary site for healthy youth development. Community introduced also as home to youth agencies/programs along intervention continuum. How community-based cultural identity, social expectations of young people frame young people's roles in school, work, neighborhoods.

YOST 3006. Fieldwork Seminar: Youth, Youthworker, Context, Programs, Organizations, Place. (1 cr; A-F only. Prereq=3001, current enrollment in 3004 and 3005)
Beginning youth work, youth agency, program, organization, service as found in students' youth work field experience.

YOST 3007. Integrative Seminar: Analysis, Experience, Reflection on Youth Studies and Youth Work. (2 cr; A-F only. Prereq=3001, 3006)
Students integrate their two years of observation, analysis, experiences, and reflections about youth, youth work, youth programs. Work/career paths for beginning/advanced youth workers.

YOST 3031. International Youthwork. (3 cr; S-N only. \$YOST 5031. Prereq=2xxx or #)
Lives of young people living outside the United States and of immigrants/refugees now resident in this country. Working with and on behalf of such groups. Socio-political analysis of globalization, its impact on young people, youthwork, and youth policy worldwide.

YOST 3032. Adolescent and Youth Development for Youthworkers. (4 cr. \$YOST 5032. Prereq=1001 or 2001 or 2002W or 2101, [any Psych or CPSY course])
Application of theory/research about children/adolescents. How findings can be used. How theories facilitate understanding of behavior.

YOST 3101. Introduction to Youthwork. (4 cr. Prereq=One gen psy course, one gen soc course)
Historical/contemporary approaches to youthwork, diverse settings in which it is done, importance of worker's life experience in crafting ethical, effective practice. At least 15 hours of field experience.

YOST 3234. Youth Agencies, Organizations, and Youth Service Systems. (3 cr. \$YOST 5234. Prereq=[Two soc/ANTH courses, work experience in youth [agency or org]] or #)
Communities/governmental responses to young people as potential problems through agencies, programs, and other organizational forms. Purpose, structure, and activities of such forms. How the forms are/are not integrated into youth service systems.

YOST 3235. Community Building, Civic Engagement, and Civic Youthwork. (4 cr. \$YOST 5235. Prereq=[2001, One basic course in Pol, one basic course in Soc] or #)
Reciprocities between youth development and community development brought about by young people's civic engagement. Individual, social, and political change by/for young people and their community.

YOST 3240. Special Topics in Youth Studies. (2-8 cr [max 10 cr]. \$YOST 5240. Prereq=[Two social sci courses, exp working with youth] or #)
In-depth investigation of one area of youth studies. Teaching procedure/approach determined by specific topic and student needs. Topic announced in advance.

YOST 3291. Independent Study in Youth Studies. (1-8 cr [max 8 cr]. Prereq-#)
Independent reading or research under faculty supervision.

YOST 4002W. Constructing Personal Models of Youth Scholarship and Youth Work. (4 cr. Prereq-2002)
Integrates/ends University-wide undergraduate youth studies minor. Students analyze/reflect on youth studies minor course content, especially those models, theories, and concepts presented in 2002. Youth, young people, youthhood, youth work. Models, personal responds to youth. Occupational/vocational callings. Class discussion, written assignments.

YOST 4160H. Honors Capstone Project. (2 cr [max 4 cr]. Prereq-YOST honors or #)
Individualizes the honors experience by connecting aspects of major program with special academic interests.

YOST 4301. Communicating With Adolescents About Sexuality. (3 cr. Prereq-1001 or 2002W or #)
How to communicate sensitively/effectively with adolescents and their concerned persons about sexuality in everyday life. Focuses on healthy sexual development (physical, emotional, ethical) and sexual diversities. Adolescent sexual issues: gender, body image, disease, sexual violence, intimacy, sex in cyberspace.

YOST 4315. Youthwork in Schools. (4 cr. YOST 5315. Prereq-Introductory course in education or #)
Craft of youthwork as a framework to understand life-worlds of young people and a practice to enhance healthy development. How young people often divide their lives into artificial/harmful divide: school and not school.

YOST 4319. Understanding Youth Subcultures. (3 cr. YOST 5319. Prereq-2001 or one course each in [anth, soc] or #)
Young people's participation in and understanding of subcultures, life-styles, and event cultures. Place of these in young people's identity, friendship, and life chances.

YOST 4321. Work with Youth: Individual. (2 cr. Prereq-1001 or 2101 or #)
Assumptions underlying individual work with youth. Issues/concerns of adolescents and of persons who work with them in one-to-one interactions.

YOST 4322. Work with Youth: Families. (2 cr. Prereq-1001 or 2002W or #)
Theories /techniques of working with youth and their families. Emphasizes practical methods of structural change, developing effective communication, decision-making and problem-solving systems, winning the family's cooperation. Role of professional in influencing healthy family development.

YOST 4323. Work with Youth: Groups. (2 cr. Prereq-[[1001 or 2002W], 4321] or #)
Social group work, adolescent group needs/associations. Group process. Working with diverse groups of youth in community, in group living situations, and in group therapy.

YOST 4401W. Young People's Spirituality and Youthwork: An Introduction. (4 cr. YOST 5401. Prereq-1001 or 2002W or #)
Adolescent spirituality, its relation to working with young people. Faith/spirituality as necessary for healthy youth development. Knowledge, attitudes, and skills to recognize spirituality in cultural, social, economic, and political worlds.

YOST 4402. Youth Policy: Enhancing Healthy Development in Everyday Life. (4 cr. YOST 5402. Prereq-[2001, one course each in [FSoS, PolSci, Soc]] or #)
Youth policy as formulated in response to youth issues, problems, and community/public concerns. Policy as a political response to youth panics, as indirect youthwork, and as a community's moral compact with its young people. Perspectives explored are specific to student interests.

YOST 5031. International Youthwork. (3 cr. YOST 3031. Prereq-2xxx or #)
Lives of young people living outside the United States and of immigrants/refugees now resident in this country. Working with and on behalf of such groups. Socio-political analysis of globalization. Its impact on young people, youthwork, and youth policy worldwide.

YOST 5032. Adolescent and Youth Development for Youthworkers. (4 cr. YOST 3032. Prereq-[1001 or 2001 or 2002W or 2101]. [any Psych or CPSY course])
Application of theory/research about children/adolescents. How findings/theories facilitate understanding of behavior.

YOST 5101. Youth Work Practice I: Internship. (3 cr. Prereq-3101, 5032 or equiv, ¶5111, #)
First course of a sequential internship that includes 15 hours per week working with youth in a community youth-serving organization. Develop and enhance competence and identity as a youth worker, and reflect on and integrate knowledge about youth with on-going experience in youth work.

YOST 5102. Youth Work Practice II: Internship. (3 cr. Prereq-5101, ¶5112, #)
Second course of a sequential internship that includes 15 hours per week of work with youth in a community youth-serving organization. Develop and enhance competence and identity as a youth worker, and reflect on and integrate knowledge about youth with ongoing experience in youth work.

YOST 5111. Youth Work Methods I: Seminar. (1 cr. Prereq-3101, 5032 or equiv, ¶5101, #)
Weekly discussion seminar taken concurrently with 5101 to integrate theory and praxis with youth work experience. Written and experiential assignments to increase knowledge, competency, and skills related to working with youth.

YOST 5112. Youth Work Methods II: Seminar. (1 cr. Prereq-5111, ¶5102, #)
Weekly discussion seminar taken concurrently with 5102 to integrate theory and praxis with youth work experience. Written and experiential assignments to increase knowledge, competency, and skills related to working with youth.

YOST 5234. Youth Agencies, Organizations, and Youth Service System. (3 cr. YOST 3234. Prereq-[Two soc/ANTH courses, work experience in [youth agency or org]] or #)
Communities/governmental responses to young people as potential problems through agencies/programs and other organizational forms. Purpose, structure, activities of such forms. How forms are/are not integrated into youth service systems.

YOST 5235. Community Building, Civic Engagement, and Civic Youthwork. (4 cr. YOST 3235. Prereq-[2001, one basic course in Pol, one basic course in Soc] or #)
Reciprocities between youth development and community development brought about by young people's civic engagement. Individual, social, and political change by/for young people and their community.

YOST 5240. Special Topics in Youth Studies. (2 cr [max 10 cr]. YOST 3240. Prereq-Two social sci courses, exper working with youth or #)
In-depth investigation of one area of youth studies. Teaching procedure and approach determined by specific topic and student needs. Topic announced in advance.

YOST 5241. Experiential Learning. (4 cr. YOST 2241. Prereq-[1001, 2001] or #)
History/theory of experiential learning, its application in youthwork. Observation, reflection, program design, and evaluation skills grounded in experiential learning theory. 15 hours of field observation required.

YOST 5291. Independent Study in Youth Studies. (1-8 cr [max 8 cr])
Independent reading and/or research under faculty supervision.

YOST 5301. Communicating With Adolescents About Sexuality. (3 cr. Prereq-[Upper div AdPy course, exper working with youth] or #)
How to communicate sensitively/effectively with adolescents and their concerned persons about sexuality in everyday life. Healthy sexual development (physical, emotional, ethical), sexual diversities. Gender/body image, disease, sexual violence, intimacy, sex in cyberspace.

YOST 5313. Direct Work with Adolescents. (2 cr. Prereq-Two social sci courses, exper working with youth or #)
Designed to give an understanding of direct work with troubled and at-risk adolescents in a wide range of settings where youth workers or social workers are typically involved. Emphasis on young people in groups in the "lifespace" in everyday life, rather than in one-to-one office-based interactions.

YOST 5315. Youthwork in Schools. (4 cr. YOST 4315. Prereq-Introductory course in education or #)
Craft of youthwork as a framework to understand life-worlds of young people and a practice to enhance healthy development. How young people often make artificially/harmfully divide their lives into school and not school.

YOST 5319. Understanding Youth Subcultures. (3 cr. YOST 4319. Prereq-2001 or one course each in [Anth, Soc] or #)
Young people's participation in and understanding of subcultures, life-styles, and event cultures. Place of these in young people's identity, friendship, and life chances.

YOST 5321. Work with Youth—Individual. (2 cr. Prereq-5032 or equiv or #)
Examination of basic assumptions underlying individual work with youth. Attention to special issues and concerns of adolescents and of persons who work with them, especially those who work with youth in one-to-one interactions.

YOST 5322. Work with Youth—Families. (2 cr. Prereq-5321 or upper div AdPy course, family theory course or #)
Theories and techniques of working with youth and their families. Emphasis on practical methods of structural change, developing effective communication, decision-making and problem-solving systems, winning the family's cooperation; the role of the professional to influence healthy family development.

YOST 5323. Work with Youth—Groups. (2 cr. Prereq-5321 or CPSY or EPSY course or #)
Adolescent group needs/associations. Group process. Working with groups of adolescents in the community, in group living situations, and in group therapy.

YOST 5401. Young People's Spirituality and Youthwork: an Introduction. (4 cr. A-F only. YOST 4401W. Prereq-[2001, one course each in [Anth, Soc, CPsy]] or #)
Adolescent spirituality, its relation to working with young people. Faith/spirituality as actual/necessary aspects of healthy youth development. Research, active community-based programs. Knowledge, attitudes, and skills to meet adolescent needs/wants.

YOST 5402. Youth Policy: Enhancing Healthy Development in Everyday Life. (4 cr. YOST 4402. Prereq-[2001, one course each in [FSoS, PolSci, Soc]] or #)
Youth policy as formulated in response to youth issues, problems, and community/public concerns. Policy as political response to youth panics, as indirect youthwork, and as a community's moral compact with its young people. Perspectives are explored specific to student interests.

Faculty and Administration
 This is the faculty section, index, maps, and academic calendar of the 2006-2008 Undergraduate Catalog for the University of Minnesota, Twin Cities campus.

Faculty and Administration

Contents

University Regents.....	568	Maps	
University Administrators.....	568	East Bank.....	611
Faculty		West Bank.....	612
College of Biological Sciences (CBS)	568	St. Paul.....	613
School of Dentistry and Division of Dental Hygiene.....	571	Academic Calendars 2006-2008	614
College of Design	572		
College of Education and Human Development (CEHD).....	573		
College of Food, Agricultural and Natural Resource Sciences.....	577		
College of Liberal Arts (CLA).....	583		
Carlson School of Management (CSOM)	593		
Medical Technology	595		
Mortuary Science.....	596		
Nursing	596		
Institute of Technology (IT).....	597		
Index	605		

Note: The information in this catalog is subject to change without notice. Many departments make changes in their degree requirements and course descriptions frequently. For the most current information, check with department offices.

* *Recipient of the Horace T. Morse-Minnesota Alumni Association Award for Outstanding Contributions to Undergraduate Education*
 § *Recipient of other teaching or advising award(s)*

University Regents

Anthony R. Baraga, Congressional District 8, Chair
 Patricia Simmons, Congressional District 1, Vice Chair
 Clyde Allen, Jr., Congressional District 7
 Peter Bell, Congressional District 5
 Frank R. Berman, At Large
 Dallas Bohnsack, Congressional District 2
 John Frobenius, Congressional District 6
 Steven D. Hunter, At Large
 David M. Larson, Congressional District 3
 Cynthia L. Leshner, At Large
 David R. Metzgen, Congressional District 4
 Lakeesha K. Ransom, At Large

University Administrators

Robert H. Bruininks, President
 E. Thomas Sullivan, Senior Vice President for Academic Affairs and Provost
 Frank B. Cerra, Senior Vice President for Health Sciences
 Robert J. Jones, Senior Vice President for System Administration
 Nancy Rusty Barceló, Vice President and Vice Provost for Equity and Diversity
 Kathryn F. Brown, Vice President and Chief of Staff
 Carol Carrier, Vice President for Human Resources
 R. Timothy Mulcahy, Vice President for Research
 Charles Muscoplat, Vice President for Statewide Strategic Resource Development
 Kathleen O'Brien, Vice President for University Services
 Richard Pflutzenreuter, Vice President and Chief Financial Officer
 Linda L. Thrane, Vice President for University Relations
 Mark B. Rotenberg, General Counsel

College of Biological Sciences (CBS)

Administration

Robert P. Elde, Dean
Huber R. Warner, Associate Dean for Research
Robin Wright, Associate Dean for Academic and Faculty Affairs
Elizabeth Wroblewski, Chief Administrative Officer
Jeff Thomas, Director of Finance
Barb Theno, Director of Human Resources
Fed Dulles, Director of Information Technology
Peggy Rinard, Director of Communications
Jean M. Underwood, Director of Student Services
Nikki Letawsky Shultz, Director of Student Life and Transitions

Faculty

Department of Biochemistry, Molecular Biology, and Biophysics

Adolph, Kenneth W., Associate Professor
 Ph.D., University of Chicago
 Gene structure and regulation, chromosome structure, non-histone proteins, virus assembly, biological assembly process

***§ Anderson, John S., Professor**
 Ph.D., University of Nebraska, Lincoln
 Structure and biosynthesis of bacterial cell walls and membranes

Armitage, Ian M., Professor
 Ph.D., University of British Columbia
 Multinuclear magnetic resonance, metal homeostasis and immunophilins

Banaszak, Len J., Professor and Dietrich Chair
 Ph.D., Loyola of Chicago
 Protein design, structure and function, X-ray crystallography

§ Bernlohr, David A., Distinguished McKnight University Professor and Department Head
 Ph.D., University of Illinois, Urbana-Champaign
 Mechanism of insulin action, regulation of gene expression by lipids

Bielinsky, Anja-Katrin, Assistant Professor
 Ph.D., Heinrich Heine University, Germany
 Regulation of DNA replication, cell cycle, cancer

Bloomfield, Victor A., Professor and Associate Vice President for Public Engagement
 Ph.D., University of Wisconsin, Madison
 Physical biochemistry of nucleic acids, polyelectrolytes, hydrodynamics laser light scattering, scanning tunneling microscopy

Conti-Fine, Bianca M., Distinguished McKnight University Professor
 M.D., University of Milan, Italy
 Structure and function of nicotinic receptors in brain and muscle, immunology of myasthenia gravis

Das, Anath, Professor
 Ph.D., University of Nebraska, Lincoln
 Molecular mechanisms of plant-pathogen interactions and plant gene expression

Flickinger, Michael C., Professor
 Ph.D., University of Wisconsin, Madison
 Fermentation, cell culture technology, cellular energetics, regulation of protein synthesis, protein separation

Fuchs, James A., Professor
 Ph.D., Texas A&M University, College Station
 Deoxynucleotide metabolism, DNA synthesis, regulation of metabolic pathways

Griffin, Timothy J., Assistant Professor
 Ph.D., University of Wisconsin
 Biological mass spectrometry, quantitative proteomics, protein and peptide chemistry

Harris, Reuben S., Assistant Professor
 Ph.D., University of Alberta, Edmonton
 The causes and consequences of mutation

Hendrickson, Eric A., Associate Professor
 Ph.D., Harvard Medical School
 Deoxynucleotide metabolism; DNA synthesis; regulation of metabolic pathways

Herrera, Julio E. Assistant Professor
 Ph.D., University of Mississippi Medical Center, Jackson
 Regulation of gene expression by chromatin structure and dynamics, modulation of chromatin structure by covalent modifications and non-histone chromosomal proteins

*** Hooper, Alan B., Professor**
 Ph.D., Johns Hopkins University
 Microbial biochemistry, redox proteins, N-oxidation, microbial detoxification

Kazlanskas, Romas J., Associate Professor
 Ph.D., Massachusetts Institute of Technology
 Enzyme selectivity, molecular biology, molecular modeling

Khodursky, Arkady B., Assistant Professor
 Ph.D., University of California, Berkeley
 Functional genomics, analysis of gene expression patterns, whole genome microarrays

Kim, Do-Hyung, Assistant Professor
 Ph.D., Pohang University of Science and Technology
 Biological networks that coordinate metabolism and growth

Lange, Alex J., Associate Professor
 Ph.D., Cornell University
 Therapeutic intervention in diabetes via manipulation of carbohydrate metabolism enzymes and their genes

LaPorte, David C., Professor
 Ph.D., University of Illinois
 Gene expression, protein phosphorylation cascades

Lipscomb, John D., Professor
 Ph.D., University of Illinois
 Oxygenase mechanisms, metalloproteins, magnetic resonance techniques, kinetics

Livingston, Dennis M., Professor
 Ph.D., Harvard University
 Mutation, DNA repair and genetic recombination

Matsuo, Hiroshi, Assistant Professor
 Ph.D., Osaka University, Japan
 Nuclear magnetic resonance, structure of protein-RNA complexes

Mayo, Kevin H., Professor
 Ph.D., University of Massachusetts
 Cell adhesion, protein-protein/carbohydrate interactions

Murphy, Sharon E., Associate Professor
 Ph.D., University of Colorado
 Carcinogen metabolism and exposure

Nelsetuen, Gary L., Professor
 Ph.D., University of Minnesota
 Protein-membrane interactions, blood coagulation, proteomics

Ohlendorf, Douglas H., Professor
 Ph.D., Washington University
 Protein engineering, structural biology, X-ray crystallography, molecular biology

Potter, Lincoln R., Assistant Professor
 Ph.D., Vanderbilt University
 Natriuretic peptide receptors, guanylyl cyclases and cGMP

Roon, Robert J., Associate Professor
 Ph.D., University of Michigan
 Mechanism and regulation of amino acid neurotransmission in mammalian brain, mechanism of amino acid transport in mammalian brain

Sanders, Michel M., Professor
 Ph.D., University of Michigan
 Eucaryotic molecular biology, hormone action, gene expression

Schmidt-Dannert, Claudia, Assistant Professor
 Ph.D., University of Braunschweig, Germany
 Directed evolution of emetabolic pathways, natural product biosynthesis, metabolic engineering

§ Schottel, Janet L., Professor
 Ph.D., Washington University, St. Louis
 Nucleic acid biochemistry, molecular biology, plant-pathogen interactions

Sheaff, Robert J., Assistant Professor
 Ph.D., University of Colorado, Boulder
 Cell cycle progression in mammalian cells, protein degradation, signal transduction

Siliciano, Paul G., Associate Professor and Associate Department Head
 Ph.D., University of Pennsylvania
 Nucleic acid biochemistry, molecular genetics

Thomas, David D., Professor
 Ph.D., Stanford University
 Molecular dynamics in muscle

Towle, Howard C., Professor and Associate Department Head
 Ph.D., Michigan State University
 Nutritional and hormonal regulation of mammalian gene expression

Van Ness, Brian G., Professor
 Ph.D., University of Minnesota
 Molecular immunology, gene expression, lymphoid cancers

Wackett, Lawrence P., Distinguished McKnight University Professor
 Ph.D., University of Texas, Austin
 Biodegradation, dehalogenases, industrial biotransformations, metalloenzymes

Walters, Kylie, Assistant Professor
 Ph.D., Harvard University
 Nuclear magnetic resonance, structure-based drug design

Wilmot, Caroline M., Assistant Professor
 Ph.D., Birkbeck College, University of London
 Structural enzymology, metal ions and organic co-factors

Department of Ecology, Evolution, and Behavior**Alstad, Donald N., Professor**

Ph.D., University of Utah
Population ecology and evolution of insects

***§ Barnwell, Franklin H., Professor**

Ph.D., Northwestern University
Invertebrate behavior and physiology, emphasizing ecological relationships

Bee, Mark, Assistant Professor

Ph.D., University of Missouri
Acoustic communication, auditory perception, neurophysiology, auditory scene analysis, honest signaling and vocally mediated social recognition

Borrello, Mark, Assistant Professor

Ph.D., Indiana University
History of biology, evolutionary theory, genetics and ecology, biology of behavior, biology and society

Cavender-Bares, Jeannine, Assistant Professor

Ph.D., Harvard University
Evolution of plant form and function, physiological mechanisms that plants use to survive in their environment

Corbin, Kendall W., Professor Emeritus

Ph.D., Cornell University
Evolutionary ecology and genetics, biochemical systematics

Cotner, James B., Associate Professor

Ph.D., University of Michigan
Biological limnology and oceanography, biogeochemistry, microbial ecology

Curtsinger, James W., Professor

Ph.D., Stanford University
Population/quantitative genetics—experimental and theoretical

Cushing, Edward J., Professor Emeritus

Ph.D., University of Minnesota
Paleoecology and ecology of plant communities

§Davis, Margaret B., Regents Professor Emeritus

Ph.D., Harvard University
Paleoecology, paleolimnology, forest community ecology

Finlay, Jacques C., Assistant Professor

Ph.D., University of California, Berkeley
Limnology, biogeochemistry, food web and ecosystem ecology, land-water interactions, stable isotope applications in ecological research

Gorham, Eville, Regents Professor Emeritus

Ph.D., University of London, England
Chemical aspects of ecology, limnology, and soil science

Hobbie, Sarah E., Assistant Professor

Ph.D., University of California, Berkeley
Ecosystem and community ecology

Jansa, Sharon A., Assistant Professor

Ph.D., University of Michigan
Mammalian systematics, biogeography, speciation, molecular evolution

Jones, Susan, Associate Professor

Ph.D., University of Pennsylvania
History of biomedical sciences, history of life sciences, historical ecology of disease, role of science in mediating human-animal interactions over time

King, Jennifer Y., Assistant Professor

Ph.D., University of California, Irvine
Ecosystem ecology, biogeochemistry and earth system science

Lanyon, Scott M., Professor and Director, Bell Museum of Natural History

Ph.D., Louisiana State University
Biochemical systematics and evolution of mating systems

Larson, Diane L., Adjunct Professor

Ph.D., University of Illinois, Chicago
Ecological effects of alien plants in grassland ecosystems

Lehman, Clarence L., Adjunct Professor

Ph.D., University of Minnesota
Theoretical ecology, computational biology

May, Georgiana, Associate Professor

Ph.D., University of California, Berkeley
Evolution of fungi, interactions with plants and their mating systems

McFadden, Joseph P., Assistant Professor

Ph.D., University of California, Berkeley
Global ecology, biosphere-atmosphere interactions

Muller-Landau, Helene, Assistant Professor

Ph.D., Princeton University
Plant community ecology, especially of tropical forests, ecological and evolutionary theory, anthropogenic influences on plant community structure and dynamics

McNaught, Donald, Professor Emeritus

Ph.D., University of Wisconsin
Zooplankton ecology, Great Lakes limnology, ecosystem contamination

Megard, Robert O., Professor Emeritus

Ph.D., Indiana University
Limnology

Merrell, David, Professor Emeritus

Ph.D., Harvard University
Genetics

Morrow, Patrice, Professor

Ph.D., Stanford University
Plant-insect interactions and community ecology

Neuhauser, Claudia M., Professor, Director of Graduate Studies, and Department Head

Ph.D., Cornell University
Theoretical ecology, role of space in community dynamics, theoretical population genetics, coalescent theory

Packer, Craig, Distinguished McKnight University Professor

Ph.D., University of Sussex, England
Behavioral ecology and sociobiology

Phillips, Richard E., Professor Emeritus

Ph.D., Cornell University
Animal behavior and physiology

Polasky, Stephen, Fesler-Lampert Professor of Ecological/Environmental Economics (Adjunct)

Ph.D., University of Michigan
Ecological/environmental economics

Pusey, Anne E., Distinguished McKnight University Professor

Ph.D., Stanford University
Animal behavior

Regal, Philip J., Professor

Ph.D., University of California, Los Angeles
Evolution, physiological ecology and behavior, herpetology

Schmid, William D., Professor Emeritus

Ph.D., University of Minnesota
Comparative physiology and ecology

Shaw, Ruth, Professor

Ph.D., Duke University
Ecological genetics

Siniff, Donald B., Professor Emeritus

Ph.D., University of Minnesota
Vertebrate ecology and population ecology of large mammals

§ Starfield, Anthony M., Professor Emeritus

Ph.D., University of Witwatersrand, South Africa
Ecological modeling

Stephens, David W., Associate Professor

Ph.D., The Queen's College, Oxford University, England
Experimental games, spatially explicit models of feeding behavior

Sturner, Robert W., Professor

Ph.D., University of Minnesota
Limnology: plankton ecology, food webs, and aquatic biogeochemistry

Sugita, Shinya, Assistant Professor

Ph.D., University of Washington
Paleoecology

Tester, John R., Professor Emeritus

Ph.D., University of Minnesota
Vertebrate ecology and ecosystem ecology

Tilman, G. David, McKnight Presidential Chair in Ecology

Ph.D., University of Michigan
Experimental and theoretical population, community ecology

Tordoff, Harrison B., Professor Emeritus

Ph.D., University of Michigan
Systematic and evolutionary biology, ornithology

Wright, Herbert E., Regents Professor Emeritus

Ph.D., Harvard University
Quaternary paleoecology and glacial geology

Zink, Robert M., Professor

Ph.D., University of California, Berkeley
Ornithology, systematics

Department of Genetics, Cell Biology, and Development**Bardwell, Vivian J., Associate Professor**

Ph.D., University of Wisconsin, Madison
Transcriptional regulation in cancer and development

Bauer, G. Eric, Professor

Ph.D., University of Minnesota
Pancreatic islet physiology and islet adhesion molecules

Berman, Judith G., Professor

Ph.D., Weizmann Institute of Science
Yeast morphogenesis, cell cycle and genome organization

Berry, Susan A., Professor

M.D., Kansas University
Growth hormone responsive gene expression

Blumenfeld, Martin, Associate Professor

Ph.D., Case Western Reserve University
Genomics

Brooker, Robert J., Professor

Ph.D., Yale University
Molecular biology of the lactose permease

Chen, Lihsia, Assistant Professor

Ph.D., Johns Hopkins University
Cell adhesion, signal transduction, cytoskeleton, *C. elegans*

Clarke, Duncan, Assistant Professor

Ph.D., University of Cambridge
Cell cycle checkpoint controls

Conklin, Kathleen F., Associate Professor

Ph.D., Tufts University
Virally- and non-virally-induced tumors

Conner, Sean, Assistant Professor

Ph.D., Brown University
Clathrin-mediated endocytic pathway, mammalian vesicular trafficking

Coucovanis, Electra, Assistant Professor

Ph.D., Stanford University
Cell death, differentiation, cell lineage specification

Cunningham, William P., Professor Emeritus

Ph.D., University of Texas, Austin
Conservation biology, land-use issues, environmental ethics

Ekker, Stephen C., Associate Professor

Ph.D., Johns Hopkins University
Embryonic patterning, zebrafish, transposons, gene discovery, gene therapy, angiogenesis

Fan, David P., Professor

Ph.D., Massachusetts Institute of Technology
Computer management of information, impact of information on society

Gale, Cheryl, Assistant Professor

M.D., University of Minnesota
C. albicans morphogenesis and hyphal guidance mechanisms

§ Goldstein, Stuart F., Professor

Ph.D., California Institute of Technology
Cell motility, especially spirochetes and eukaryotic flagella

Hackett, Perry B., Professor

Ph.D., University of Colorado Medical Center
Gene expression in Sleeping Beauty transposons, human gene therapy

Hamilton, David W., Professor

Ph.D., Cambridge University
The sperm plasma membrane

Hays, Thomas S., Professor

Ph.D., University of North Carolina
Cytoskeletal-based motility, functions of cytoplasmic dynein

Herman, Robert K., Professor

Ph.D., Yale University
Developmental genetics of *C. elegans*

Herman, William S., Professor

Ph.D., Northwestern University
Arthropod peptide hormones

Hirsch, Betsy A., Associate Professor

Ph.D., University of Minnesota
Chromosome abnormalities

Iwanji, Victoria, Associate Professor

Ph.D., Rockefeller University
Characterization of the glucagon receptor

Johnson, Ross G., Professor

Ph.D., Iowa State University
Cell communication mediated by gap junctions, junction assembly mechanisms and role in embryos

King, Richard A., Professor

Ph.D., University of Minnesota; M.D., Jefferson Medical
Genetic analysis of complex human disease

Kirkpatrick, Catherine, Assistant Professor

Ph.D., Massachusetts Institute of Technology
Cell-cell signaling during development, roles of proteoglycans in tissue patterning

Kirkpatrick, David T., Assistant Professor

Ph.D., Massachusetts Institute of Technology
DNA repair during meiosis in *S. cerevisiae*, DNA repair and antifungal drug resistance in *C. albicans*

Kuriyama, Ryoko, Professor

Ph.D., University of Tokyo
Cell division and cell-cycle control in animal cells

Largaespada, David A., Assistant Professor

Ph.D., University of Wisconsin, Madison
Identification and understanding of genes involved in myeloid leukemia development

LeRoy, Bonnie S., Program Director

M.S., Sarah Lawrence College
Education and clinical preparation of genetic counseling professionals, ethical and professional challenges to the practice of genetic counseling

Linck, Richard W., Professor

Ph.D., Brandeis University
Molecular assembly and function of the microtubule cytoskeleton

Magee, P. T., Professor

Ph.D., University of California, Berkeley
Analysis of the genome of *C. albicans*

Marker, Paul C., Assistant Professor

Ph.D., Stanford University
Molecular genetics of prostate development and prostate cancer

McIvor, R. Scott, Professor

Ph.D., University of Minnesota
Genes introduced into the hematopoietic cells in vivo

McKinnell, Robert, Professor Emeritus

Ph.D., University of Minnesota
Prevalence and distribution of pigment pattern variants of the Northern Leopard Frog

Miller, Jeffrey R., Assistant Professor

Ph.D., Drake University
Cell-cell signaling in vertebrate development, regulation of cell adhesion and migration during vertebrate development

Nakato, Hiroshi, Assistant Professor

Ph.D., Tokyo Metropolitan University
Proteoglycan functions in development, growth factor signaling, morphogen gradient formation

Neufeld, Thomas P., Assistant Professor

Ph.D., University of California, Berkeley
Developmental control of growth and cell proliferation in *Drosophila*

Norrander, Jan, Assistant Professor

Ph.D., University of Minnesota
Molecular assembly and function of the microtubule cytoskeleton

O'Connor, Michael B., Professor and Howard Hughes Associate Investigator

Ph.D., Tufts University
Cell-cell interactions in growth, differentiation, and development

Oetting, William, Assistant Professor

Ph.D., University of Nebraska
Molecular analysis of albinism, analysis of complex genetic disorders

Orr, Harry T., Professor

Ph.D., Washington University
Molecular genetics of brain development and neurodegeneration

Petryk, Anna, Assistant Professor

M.D., Medical University in Wroclaw, Poland
Craniofacial development, bone biology, mammalian embryogenesis, organogenesis, brain development

Porter, Mary E., Associate Professor

Ph.D., University of Pennsylvania
Regulation of dynein-based motility

Ranum, Laura P. W., Professor

Ph.D., University of Minnesota
Molecular genetics of neurodegenerative diseases

Rougvie, Ann E., Associate Professor

Ph.D., Cornell University
Developmental timing in *C. elegans*

Selleck, Scott, Professor and Harrison Chair

M.D., Ph.D., Washington University School of Medicine
Regulation of growth factor signaling, proteoglycan modulation of morphogen function, nervous system assembly and synapse development

Shaw, Jocelyn E., Associate Professor

Ph.D., University of Toronto
C. elegans embryonic development

Shawlot, William, Assistant Professor

Ph.D., Baylor College of Medicine
Genetic control of pattern formation during mouse embryogenesis

Sheridan, Judson, Professor

D.Phil. in Neurophysiology, Oxford University
Functional studies of gap junction communication, quantitative analysis of hemichannel and gap junction permeability

Shima, Naoko, Assistant Professor

Ph.D., Saitama University, Japan
Genomic instability and cancer, DNA replication, recombination and repair in mice

*** Simmons, Michael J., Professor**

Ph.D., University of Wisconsin, Madison
Transposable genetic elements in *Drosophila*

Simon, Jeffrey A., Associate Professor

Ph.D., Cornell University
Animal development, control of gene expression, chromatin mechanisms

Sinha, Akhouri A., Adjunct Professor

Ph.D., University of Missouri, Columbia
Stromal-epithelial interaction in tumors

Somia, Nikunj V., Assistant Professor

Ph.D., University of Edinburgh
Retrovirus biology, gene therapy and gene discovery

Sorenson, Robert L., Professor

Ph.D., University of Minnesota
Cell biology of insulin secretion and cell division in islets of Langerhans

Steer, Clifford, Professor

M.D., University of Minnesota
Membranes and receptors, cell interactions, gene expression, gene therapy, apoptosis

Tao, Wufan, Assistant Professor

Ph.D., Fudan University
Tumor suppressor, cancer biology

Titus, Margaret A., Associate Professor

Ph.D., Brandeis University
Molecular genetic analysis of unconventional myosin function

Van Ness, Brian G., Professor and Department Head

Ph.D., University of Minnesota
Molecular immunology

Wright, Robin, Professor and Associate Dean

Ph.D., Carnegie-Mellon University
Cell biology, with emphasis on regulation of organelle biogenesis, membrane structure and dynamics, sterol metabolism, protein targeting and localization, genetic and genomic approaches to organelle biogenesis, microscopic analysis of cell structure, undergraduate education

Zarkower, David A., Associate Professor

Ph.D., University of Wisconsin, Madison
Molecular genetics of sex determination and gene regulation

Department of Plant Biology

*** Biesboer, David D., Professor**

Ph.D., Indiana University
Ecophysiology and anatomy of angiosperms

Brambl, Robert M., Professor

Ph.D., University of Nebraska
Function of chaperone proteins and regulation of gene expression

***Š Charvat, Iris D., Professor**

Ph.D., University of California, Santa Barbara
Mycorrhizal associations, fungal development, seed bank dynamics in wetlands

Gantt, J. Stephen, Associate Professor

Ph.D., University of California, Irvine
Gene expression in plants

Gibson, Susan, Associate Professor

Ph.D., Cornell University
Plant genomics, sugar signaling in Arabidopsis

Glazebrook, Jane, Associate Professor

Ph.D., Massachusetts Institute of Technology
Mechanisms by which plants defend themselves from attack by microbial pathogens

Gleason, Florence K., Professor

Ph.D., University of Iowa
Physiological function of thioredoxin in cyanobacteria

Gray, William, Assistant Professor

Ph.D., University of Iowa
Molecular basis of auxin-regulated growth and development, ubiquitin-mediated proteolysis

Katagari, Fumi, Associate Professor

Ph.D., Rockefeller University
Plant genomics, disease resistance in plants

Lefebvre, Paul (Pete), Professor

Ph.D., Yale University
Chlamydomonas genomics, cytoskeleton and cell motility

Marks, M. David, Associate Professor

Ph.D., Purdue University
Control of cell fate and differentiation in plants

McLaughlin, David J., Professor

Ph.D., University of California, Berkeley
Evolution and systematics of fungi, especially basidiomycetes

Ni, Min, Assistant Professor

Ph.D., University of Oklahoma, Norman
Light signal transduction and photomorphogenesis

Olszewski, Neil E., Professor

Ph.D., University of Minnesota
Molecular mechanisms of hormone action, molecular genetics of DNA viruses

Sanderfoot, Anton, Assistant Professor

Ph.D., University of Illinois
Vesicle trafficking in Arabidopsis

Sillflow, Carolyn, Professor

Ph.D., University of Georgia
Chlamydomonas genomics, cytoskeleton and cell motility

***Š Snustad, Peter, Professor**

Ph.D., University of California, Davis
Cytoskeleton and cell motility, gene expression, developmental mechanisms

Soulen, Thomas K., Associate Professor Emeritus

Ph.D., University of Wisconsin
Plant metabolism and development

Springer, Nathan, Assistant Professor

Ph.D., University of Minnesota
Molecular basis of epigenetic phenomena

Tiffin, Peter, Assistant Professor

Ph.D., Duke University
Evolutionary and ecological genetics, molecular and phenotypic evolution of plant defenses

VandenBosch, Kathryn, Professor and Department Head

Ph.D., University of Massachusetts
Cell biology of plant/microbe symbioses, functional genomics of legumes

Ward, John, Assistant Professor

Ph.D., University of Maryland
Membrane proteins and transport physiology

Weiblen, George, Assistant Professor

Ph.D., Harvard University
Plant systematics, molecular phylogenetics, coevolution and plant/pollinator interactions

Weinig, Cynthia, Assistant Professor

Ph.D., Indiana University
Evolution of developmental plasticity in plants

Š Wick, Susan M., Professor

Ph.D., Stanford University
Cellular, molecular, and developmental biology of the cytoskeleton

General Biology Program and Instructional Laboratories

John S. Anderson, Director of General Biology

Sehoya Cotner, Teaching Assistant Professor

Mark Decker, Teaching Assistant Professor

Bruce Fall, Associate Education Specialist

Kathryn Hanna, Associate Professor

Richard Peifer, Education Specialist

Jane Phillips, Coordinator of CBS Instructional Labs

Contributing Faculty From Other University Units

Department of Microbiology—Medical School

Anderson, Dwight L., Professor

Ph.D., University of Minnesota
Bacillus subtilis bacteriophage Ø29 morphogenesis

Armstrong, Sandra, Associate Professor

Ph.D., University of Missouri, Columbia
Iron acquisition and iron-regulated gene expression in pathogenic bacteria

Judith Berman, Professor

Ph.D., Weizmann Institute of Science
Morphogenesis in *C. albicans*; Telomere function, aging and chromatin assembly in *Saccharomyces cerevisiae*

Bey, Russell, Associate Professor

Ph.D., University of Minnesota
Bovine mastitis

Bohjanen, Paul, Assistant Professor

M.D., Ph.D., University of Michigan
T lymphocyte mRNA stability

Bond, Daniel, Assistant Professor

Ph.D., Cornell University
Environmental microbiology, bioenergy from microbes

Bresnahan, Wade, Assistant Professor

Ph.D., University of Texas Medical Branch
Molecular mechanisms of human cytomegalovirus replication and pathogenesis

Cleary, P. Patrick, Professor

Ph.D., University of Rochester, New York
Molecular basis for streptococcal disease

Davis, Dana A., Assistant Professor

Ph.D., University of Arizona
C. albicans genetics and pathogenesis

Dunny, Gary, Professor

Ph.D., University of Michigan
Molecular biology of conjugative gene transfer in gram-positive bacteria

Dworkin, Martin, Professor Emeritus

Ph.D., University of Texas, Austin
Developmental biology, Myxobacteria

Faras, Anthony J., Professor Emeritus

Ph.D., University of Colorado
Tumor viruses, oncogenesis, gene transfer

Germaine, Gregory, Professor

Ph.D., University of Minnesota
Oral microbiology, microbial physiology

Gralnick, Jeffrey A., Assistant Professor

Ph.D., University of Wisconsin, Madison
Physiology of *Shewanella*, geomicrobiology

Haase, Ashley T., Regents Professor and Department Head

M.D., Columbia College of Physicians and Surgeons
Molecular mechanisms of HIV pathogenesis

Hanson, Richard S., Professor Emeritus

Ph.D., University of Illinois, Urbana-Champaign
Ecology, biochemistry, and genetics of methylotropic bacteria

Jemmerson, Ronald, Professor

Ph.D., Northwestern University
b-cell and antibody recognition of protein antigens, apoptosis and the fate of intracellular autoantigens

Jenkins, Marc K., Distinguished McKnight University Professor

Ph.D., Northwestern University
CD4 T cell biology

Johnson, Russell C., Professor

Ph.D., University of Wisconsin, Madison
Molecular pathogenesis, Lyme disease and human granulocytic ehrlichiosis

Kapur, Vivek, Professor

Ph.D., Pennsylvania State University
Molecular mechanisms of bacterial pathogenicity and evolution

Magee, Paul T., Professor

Ph.D., University of California, Berkeley
Genetics and molecular biology of *C. albicans*

Mansky, Louis M., Associate Professor

Ph.D., University of Iowa
Cell and molecular biology of HIV and HTLV, HIV drug resistance, HTLV particle assembly and release, evolution of emerging viruses

McKay, Larry L., Professor

Ph.D., Oregon State University
Plasmid biology, physiology and genetics of lactococci used in milk fermentations

Mohr, Christian, Assistant Professor

Ph.D., University of Texas, San Antonio
Molecular pathogenesis of Burkholderia cepacia

Plagemann, Peter G. W., Professor

Ph.D., Case Western Reserve University
Mechanisms of viral infections, and modulation by host immune responses

Rice, Stephan, Assistant Professor

Ph.D., University of Utah
Herpes simplex virus gene expression

Sadowsky, Michael, Professor

Ph.D., University of Hawaii
Soil microbiology, biodegradation, Rhizobium and Bradyrhizobium-host interactions

*** Schiff, Leslie A., Professor**

Ph.D., Tufts University
Virus-host cell interactions and viral protein structure-function

Schlievert, Patrick M., Professor

Ph.D., University of Iowa
Immunobiology, and genetic control of staphylococcal and streptococcal pyrogenic toxins

Southern, Peter J., Associate Professor

Ph.D., Edinburgh University
Molecular basis of persistent virus infection and virus-induced disease

Vernick, Kenneth, Associate Professor

Ph.D., University of Maryland
Malaria parasite interactions with the mosquito vector

**Department of Neuroscience—
Medical School****Amirikian, Bagrat, Assistant Professor**

Ph.D., Moscow State University
Neural networks and motion

Ashe, James, Professor

M.D., University College Dublin, Ireland
Neural control of movement

Branton, Dale, Associate Professor

Ph.D., University of California, San Francisco
Cellular and molecular aspects of physiological regulatory mechanisms

Chafee, Matthew, Assistant Professor

Ph.D., Yale University
Neural basis of spatial cognition and working memory, cortical system dysfunction in psychiatric disease

Dubinsky, Janet, Professor

Ph.D., University of North Carolina, Chapel Hill
Neurodegeneration as a result of glutamate toxicity

Ebner, Timothy J., Professor and Department Head

M.D., Ph.D., University of Minnesota
Neurophysiology of cerebellum and motor cortex

Elde, Robert P., Professor

Ph.D., University of Minnesota
Central and peripheral nervous systems

Engeland, William, Professor

Ph.D., University of California, San Francisco
Neuroendocrinology of stress

Flanders, Martha, Professor

Ph.D., Michigan State University
Neural control of movement

Georgopoulos, Apostolos P., Professor

M.D., Ph.D., University of Athens School of Medicine
Neurophysiology of motor function and cognition

Giesler, Glenn J., Jr., Professor

Ph.D., University of California, Los Angeles
Somatic sensory processing, pain

Ghose, Geoffry, Assistant Professor

Ph.D., University of California, Berkeley
Strategies in visual cortex

Honda, Christopher N., Professor

Ph.D., University of North Carolina, Chapel Hill
Anatomical and physiological bases of somesthesia, with emphasis on mechanisms of pain

Kofuji, Paulo, Assistant Professor

Ph.D., University of Maryland
Ion channels

Lanier, Lorene, Assistant Professor

Ph.D., University of California, Berkeley
Growth cone motility, axon guidance

Letourneau, Paul C., Professor

Ph.D., Stanford University
Developmental neurobiology

Leuthold, Arthur, Assistant Professor

Ph.D., University of Wisconsin, Madison
Magnetocardiography

Liao, Dezhi, Assistant Professor

Ph.D., University of Iowa
Molecular and cellular mechanisms of synaptic plasticity

McLoon, Steven C., Professor

Ph.D., University of Illinois, Chicago
Development and regeneration of axonal connections

Mermelstein, Paul, Assistant Professor

Ph.D., University of Michigan
Calcium signaling and cellular excitability

Miller, Robert F., Professor

M.D., University of Utah
Synaptic transmission in the retina and relationships of single, identified neurons and glial cells

Nakagawa, Yasushi, Assistant Professor

M.D., Ph.D., University of Tokyo
Cellular and molecular mechanisms of brain development and plasticity

Newman, Eric A., Professor

Ph.D., Massachusetts Institute of Technology
Physiology and functions of glial cells

Pellizzer, Giuseppe, Associate Professor

Ph.D., University of Geneva, Switzerland
Neural control of cognitive-motor behavior

Poppele, Richard E., Professor

Ph.D., University of Minnesota
Neurophysiology and motor control

Redish, A. David, Assistant Professor

Ph.D., Carnegie Mellon University
Spatial reasoning and navigation—from neurons to behavior

Seybold, Virginia S., Professor

Ph.D., University of Minnesota
Neuroanatomy, neuropharmacology, pain, autonomic nervous system, neuroendocrines

Soechting, John F., Professor

Ph.D., Cornell University
Motor control neurophysiology

Thomas, Mark, Assistant Professor

Ph.D., University of California, Los Angeles
Neurobiology of drug-induced plasticity and addiction, behavioral neuroscience

Wessendorf, Martin W., Associate Professor

Ph.D., University of Illinois, Chicago
Brainstem control of spinal function, methods in fluorescence microscopy

Wilcox, George L., Professor

Ph.D., University of Colorado, Boulder
Psychotherapeutic toxicity, pain transmission, drugs of abuse

Yuan, LiLian, Assistant Professor

Ph.D., University of Wisconsin-Madison
Dendritic function in neuronal information processing

Zirpel, Lance, Assistant Professor

Ph.D., University of Washington
Cellular and molecular mechanisms of activity-dependent neural development and survival

School of Dentistry and Division of Dental Hygiene

Administration

Patrick M. Lloyd, D.D.S., M.S., Dean, School of Dentistry

Kathleen J. Newell, R.D.H., Ph.D., Director, Division of Dental Hygiene

Faculty

§ Dittmar, Susan, R.D.H., Clinical Dental Specialist

B.S., University of Iowa, Iowa City
Preclinical/clinical dental hygiene, biomaterials, local anesthesia

Blue, Christine M., R.D.H., Clinical Dental Specialist

M.S., Old Dominion University
Head and neck anatomy, special needs patients, clinic, pre-clinic

Jacobsen, Steven, D.D.S., Associate Clinical Dental Specialist

D.D.S., University of Minnesota
Clinical dental hygiene, local anesthesia

Newell, Kathleen J., R.D.H., Associate Professor

Ph.D., University of Minnesota
Writing in the curriculum, ethics, diversity, domestic violence

§ Osborn, Joy B., R.D.H., Associate Professor

M.A., University of Minnesota
Periodontology, preclinic and advanced instrumentation, ergonomics

Stoltenberg, Jill L., R.D.H., Associate Professor

M.A., University of Minnesota
Periodontal diseases, dental caries, fluoride, clinical dental hygiene

Young, Lynda J., R.D.H., Associate Professor and Director, Continuing Dental Education
M.A., University of Minnesota
Continuing dental education

College of Design

Administration

Thomas Fisher, Dean

Lance Neckar, Associate Dean for Curriculum and Academic Affairs

Janet Abrams, Director, Design Institute

John Carmody, Director, Center for Sustainable Building Research

Ann Forsyth, Director, Design Center for American Urban Landscape

Faculty

In this faculty listing, R.A. designates licensure as a registered architect; R.L.A. designates licensure as a registered landscape architect; A.I.A. designates member, American Institute of Architects (a member of the A.I.A. must be a registered architect); F.A.I.A. designates fellow, American Institute of Architects; A.S.L.A. designates member, American Society of Landscape Architects; F.A.S.L.A. designates fellow, American Society of Landscape Architects; A.I.C.P. designates member by examination of the American Institute of Certified Planners; and P.E. designates licensure as a professional engineer.

Architecture

Anderson, Lee, Associate Professor
M.Arch., University of Minnesota
Computer aids to design conception and presentation

Bergert, Douglas, Adjunct Teaching Instructor
M.Arch., Harvard University
Design

Berkovskaya, Olga, Adjunct Teaching Instructor
M.Arch., University of Minnesota
Representation

Bhatt, Ritu, Assistant Professor
Ph.D., Massachusetts Institute of Technology
History, theory, and criticism

Bleyhl, Christine, Adjunct Teaching Instructor
M.Arch., University of Minnesota
Representation

Brigham, Jonee Kulman, Research Fellow
B.Arch., University of Minnesota
Energy, thermal, environmental technology

Buetow, Steve, Adjunct Assistant Professor (A.I.A.)
B.Arch., University of Minnesota
Residential and historical architecture

Carmody, John, Senior Research Associate and Director, Center for Sustainable Building Research
M.Arch., University of Minnesota
Environmental technology, sustainable design

Chen, Arthur, Associate Professor
Ph.D., Georgia Institute of Technology
Architectural thinking, drawing, urbanism, design, representation theory

Cheng, Renee, Associate Professor and Department Head
M.Arch., Harvard University
Design, technology

Christensen, Michael, Lecturer/Adjunct Assistant Professor
M.Arch., University of Minnesota
Digital technology

Clark, Daniel, Adjunct Assistant Professor
M.Arch., University of Minnesota
Design

Conway, William, Associate Professor (A.I.A.)
M.Arch., Yale University
Design, theory, practice

deLaitre, Mary, Adjunct Assistant Professor
M.Arch., University of Minnesota
Urban design, neighborhood development

Dimond, David, Adjunct Teaching Instructor (A.I.A.)
M.Arch., Virginia Polytechnic Institute and State University
Design, representation

Dittmar, Gunter, Associate Professor
M.Arch., Yale University
Architectural theory, design process, design

Dozier, James, Adjunct Assistant Professor
B.A., Rice University
Digital technology, electronic imaging

Ebbighausen, Nina, Adjunct Assistant Professor
B.Arch., Syracuse University
Design

El Hindi, Walid, Adjunct Assistant Professor
B.Arch., University of Minnesota
Design

Ferguson, Robert, Lecturer and Adjunct Assistant Professor
M.Phil., Pembroke College of Cambridge
History and philosophy, design

Fisher, Thomas, Professor and Dean
M.I.S., Case Western Reserve University
Architectural criticism, writing/communication, design theory

Franck, Bruno, Adjunct Associate Professor
Ph.D., University of Minnesota
Architectural structure

Fuller, Timothy, Adjunct Assistant Professor
M.Arch., University of Minnesota
Urban design, residential design and construction

Good, Robert, Adjunct Teaching Instructor
M.Arch., University of Minnesota
Design

Guzowski, Mary, Associate Professor
M.Arch., University of Washington
Sustainable design, daylighting, environmental technology

Isenberg, Jay, Adjunct Assistant Professor
M.Arch., University of Minnesota
Practice

Jacques, Tracey, Adjunct Teaching Instructor (A.I.A.)
B.Arch., University of Minnesota
Representation

Jara, Cynthia, Associate Professor (R.A.)
M.A., M.Arch., Columbia University
Design theory: historic reference

Johnson, Michael, Professor in Practice
B.Arch., University of Oregon
Design

LaVine, Lance, Professor (R.A.)
M.Arch., M.C.P., University of Pennsylvania
Technology and design, elemental form, philosophical premises

Lew, Douglas, Adjunct Associate Professor
M.F.A., Bradley University
Watercolor

Mack, Robert, Adjunct Professor (F.A.I.A.)
B.Arch., University of Minnesota
Historic preservation and rehabilitation

McQuade, Martha, Adjunct Assistant Professor
M.Arch., University of Minnesota
Design, representation

Miller, Nancy, Lecturer
Ph.D., Pennsylvania State University
Architecture history

Mulfinger, Dale, Professor in Practice (A.I.A.)
B.Arch., University of Minnesota
Architect Edwin Lundie, pattern language, design

Nelson, Ralph, Adjunct Associate Professor
M.Arch., Columbia University
Design

Olmstead, Kathryn, Adjunct Assistant Professor
M.Arch., University of Minnesota
Design

Orton, Charles, Adjunct Teaching Instructor
M.Arch., Yale University
Representation

Parker, B. Aaron, Adjunct Assistant Professor (A.I.A.)
M.S., Columbia University
Architectural design, urban design

Piotrowski, Andrzej, Associate Professor (R.A.)
M.I.Arch., Politechnika Warszawska, Poland
Visual studies, design, theory

Porycky, Anna, Lecturer
M.Arch., University of Minnesota
Representation

Quigley, Timothy, Adjunct Assistant Professor (A.I.A.)
M.Arch., University of Minnesota
19th- and 20th-century architecture, design

Rhoades, Todd, Professor in Practice (R.A.)
M.Arch., Cranbrook Academy of Art
Art, design

Robinson, Julia, Professor (A.I.A.)
M.A., University of Minnesota
Housing, culture and architecture, design methods, representation

Roe, Sharon, Senior Lecturer and Adjunct Assistant Professor
M.Arch., University of California, Berkeley
Design

Saloojee, Ozay, Assistant Professor
M.Arch., Carleton University, Ottawa, Ontario, Canada
Design, representation

Satkowski, Leon, Professor
Ph.D., Harvard University
Architectural history

Schulte, Marcy, Adjunct Assistant Professor (A.I.A.)
M.Arch., Syracuse University
Design

Singh, Virajita, Research Fellow
M.Arch., University of Minnesota
Sustainable design, design

Solomonson, Katherine, Associate Professor
Ph.D., Stanford University
American and contemporary architecture

Soranno, Joan, Professor in Practice
B.Arch., Notre Dame
Design

Springer, Mary, Lecturer
M.Arch., Rice University
Design, representation

Srivastava, Malini, Adjunct Assistant Professor
M.Arch., University of Minnesota
Design

Strothman, Susan, Adjunct Instructor
M.Arch., University of Minnesota
Structures, design

Swackhammer, Marc, Assistant Professor
M.Arch., Rice University
Design, representation, housing

Tambornino, Mark, Adjunct Teaching Instructor
M.Arch., University of Minnesota
Design

Thorbeck, Duane, Adjunct Professor (F.A.I.A.)
M.Arch., Yale University
Public buildings, interpretative architecture, urban/rural issues

§ Tollefson, Lee, Adjunct Associate Professor (A.I.A.)
M.Arch., University of Pennsylvania
Design practices, Native American architecture, monastic architecture

Valdes, Marcelo, Adjunct Assistant Professor
M.Arch., University of Minnesota
Design

Van Duzer, Leslie, Associate Professor and Director of Undergraduate Studies
M.Arch., University of California, Berkeley
Design fundamentals

Webber, William, Adjunct Assistant Professor
M.Arch., University of Minnesota
Environmental technology

§ Weeks, J. Stephen, Associate Professor and Director of Graduate Studies (R.A.)
B.Arch., University of Minnesota
Construction materials and methods, masonry design, design

Weinstein, Joshua, Adjunct Assistant Professor (R.A.)
B.Arch., Pratt Institute
Architectural and environmental design

Wentzell, Mark, Adjunct Assistant Professor (R.A.)
M.Arch., Syracuse University
Community, institutional, and educational design practice

Westbrook, Thomas, Adjunct Assistant Professor
M.Arch., University of Minnesota
Representation

Yoos, Jennifer, Professor in Practice
M.Arch., University of Minnesota
Urban revitalization, contemporary cities, design

College of Education and Human Development (CEHD)

Administration

Darlyne Bailey, Dean

Robert Serfass, Associate Dean for Academic Affairs

Frances Lawrenz, Associate Dean for Research

Mary Bents, Associate Dean for Undergraduate and Professional Programs

Faculty are listed below for the following CEHD departments:

- Curriculum and Instruction
- Educational Policy and Administration
- Educational Psychology
- Family Social Science
- Institute of Child Development
- Kinesiology, School of
- Music Education
- Postsecondary Teaching and Learning
- Social Work, School of
- Work and Human Resource Education

Curriculum and Instruction

Avery, Patricia, Professor

Ph.D., Emory University
Social studies education, history of American education, political education

§ Beach, Richard, Professor
Ph.D., University of Illinois
English education

Bequette, James, Assistant Professor
Ph.D., Stanford University
Art education

Bigelow, Martha, Assistant Professor
Ph.D., Georgetown University
Second languages and cultures

Clarkson, Lesa, Assistant Professor
Ph.D., University of Minnesota
Mathematics education

Clover, Faith, Lecturer
Ph.D., University of Arizona
Art education

Cramer, Kathleen, Associate Professor
Ph.D., University of Minnesota
Mathematics education

Dillon, Deborah, Professor

Ph.D., University of Georgia
Literary research and qualitative research methods

Doering, Aaron, Assistant Professor
Ph.D., University of Minnesota
Learning technologies

Finley, Fred, Associate Professor
Ph.D., Michigan State University
Science education, environmental education

§ Galda, Lee, Professor
Ph.D., New York University
Children's literature, response to literature

Graves, Michael, Professor
Ph.D., Stanford University
Reading and English education

Helman, Lori, Assistant Professor
Ph.D., University of Nevada
Literacy, teacher education, reading

Hooper, Simon, Associate Professor
Ph.D., Pennsylvania State University
Learning technologies

Design Center for American Urban Landscape

Ann Forsyth, Professor, Dayton-Hudson Chair in Urban Design (R.A.), and Director

Ph.D., Cornell University

City and regional planning

Design, Housing, and Apparel

Program Committee Chairpersons

Karen LaBat—Clothing Design

Carol Waldron—Graphic Design

Becky L. Yust—Housing Studies

Stephanie Watson Zollinger—Interior Design

Kim K. P. Johnson—Retail Merchandising

Angell, William J., Professor

M.S., Iowa State University

Indoor air quality in residential, school, and health care environments

Bruin, Marilyn J., Associate Professor

Ph.D., Iowa State University

Housing and neighborhood environments of low-income households

Boyd-Brent, James, Assistant Professor

M.F.A., University of Minnesota

Drawing, print making, alternative design technologies

Bye, Elizabeth, Assistant Professor

Ph.D., University of Minnesota

Apparel technology, textile product development, sizing/fit

Chu, Sauman S., Associate Professor

Ph.D., University of Minnesota
Multiculturalism/design education, cross-cultural differences in design

Crump, Jeffrey, Associate Professor

Ph.D., University of Nebraska, Lincoln
Urban and economic geography, housing policy

DeLong, Marilyn R., Professor

Ph.D., The Ohio State University
Aesthetics and historic aspects of clothing

Gahring, Sherri A., Associate Professor

M.S., Iowa State University
Small retailer survival in a Big Box world

***§ Guerin, Denise A., Professor**

Ph.D., Michigan State University
Sustainable interior design, relationship of culture and design

Hokanson, Brad, Associate Professor

Ph.D., University of Minnesota
Computer interface design, speech synthesis, generated poetry, imaging

Jasper, Daniel, Assistant Professor

M.F.A., Yale University
Contemporary criticism, design history, corporate/consumer branding

Johnson, Kim K. P., Professor

Ph.D., University of Wisconsin, Madison
Social psychology of dress, consumer behavior, and retailing

LaBat, Karen L., Professor

Ph.D., University of Minnesota
Textile product development, user group psychological/physical needs

Lee, Seung-Eun, Assistant Professor

Ph.D., Iowa State University
Consumer behavior, non-store retailing, textiles/apparel, international development

Martin, Caren, Assistant Professor

Ph.D., University of Minnesota
Interior design profession, public opinion, body of knowledge

*** Martinson, Barbara E., Associate Professor and Director of Graduate Studies**

Ph.D., University of Minnesota
Design education/design history/communication and perception

McCarthy, Steven, Associate Professor

M.F.A., Stanford University
Self-authored graphic design, artist's books, interactive design

Waldron, Carol C., Assistant Professor

M.A., University of Minnesota
Typography, books, material, color, legibility, and expression
Williams, Gloria M., Associate Professor
Ph.D., University of Minnesota
Knowledge of structures, ideologies appearance, textile/apparel labor issues

Yust, Becky Love, Professor and Department Head

Ph.D., The Ohio State University
Social and technological aspects of housing

Ziebarth, Ann C., Associate Professor

Ph.D., Louisiana State University
Housing policy, rural/small town housing, housing affordability/availability

Zollinger, Stephanie A. Watson, Associate Professor

Ed.D., University of Arkansas
Vernacular architecture, design education issues

The Goldstein Museum of Design

Lin Nelson-Mayson, Director

Marilyn DeLong, Costume Curator

Steven McCarthy, Graphic Design Curator

Rodney Allen Schwartz, Decorative Arts Curator

Gloria Williams, Textiles Curator

Landscape Architecture

Abbott, Dean, Senior Lecturer

M.L.A., Harvard University
Graphics, art of design

Agee, Bradley, Lecturer

B.L.A., University of Minnesota
Design

Clemence, Roger, Professor Emeritus

M.L.A., M.Arch., University of Pennsylvania
Art of design

Colberg, Donald, Adjunct Assistant Professor

M.L.A., University of Minnesota
Design technology

Favour, Joseph, Adjunct Assistant Professor

M.L.A., Harvard University
Construction technology

Grotta, Stephanie, Adjunct Assistant Professor

M.L.A., University of Minnesota
Design technology

Gunderson, Robert, Adjunct Assistant Professor (A.S.L.A., R.L.A.)

M.L.A., University of Pennsylvania
Construction technology

Hewitt, Clinton, Associate Professor

M.L.A., Michigan State
Campus planning

Koepke, John, Associate Professor and Department Head (R.L.A.)

M.L.A., University of Washington
Ecological design, Native American design issues

Krinke, Rebecca, Assistant Professor and Director of Graduate Studies

M.F.A., Massachusetts College of Art
Art of design, sculpture

MacDonagh, Peter, Adjunct Assistant Professor

B.L.A., University of Minnesota
Ecological design

§ Martin, Roger B., Professor Emeritus (F.A.S.L.A., R.L.A.)

M.L.A., Harvard University
Design research, design education

Miller, Kristine, Assistant Professor

Ph.D., Edinburgh University, M.L.A., Cornell University
Public space design issues

Murphy, Richard, Jr., Adjunct Assistant Professor

M.L.A., Harvard University
Professional practice

Musacchio, Laura, Assistant Professor

Ph.D., Texas A&M University; M.L.A., State University of New York
Landscape ecological planning and technology

§ Neckar, Lance, Professor and Associate Dean (R.L.A.)

M.A., University of Wisconsin; M.L.A., Harvard University
Landscape architecture history and theory, urban design practice

Nunnally, Patrick, Adjunct Assistant Professor

Ph.D., University of Iowa
Landscape architecture and urban and regional design

Olin, Peter, Associate Professor (A.S.L.A., R.L.A.)

M.L.A., Cornell University
Director, Minnesota Landscape Arboretum
Design, horticultural issues

Pitt, David G., Professor (A.I.C.P.)

Ph.D., University of Arizona
Landscape perception, regional landscape research, GIS assessment

Robin, James

B.L.A., University of Minnesota
Design and construction technology

Roos, Stephen, Adjunct Assistant Professor

M.L.A., University of Minnesota
GIS technology

Rozumalski, Fred, Adjunct Assistant Professor

M.L.A., University of Minnesota
Planting design and ecological restoration

Shaw, Daniel, Adjunct Assistant Professor

M.L.A., University of Minnesota
Horticultural design

Sykes, Robert D., Associate Professor (A.S.L.A., R.L.A.)

M.L.A., Harvard University
Surface water and transportation systems, design theory

Hughes, Joan, Assistant Professor
Ph.D., Michigan State University
Learning technologies

Jacobs, Benjamin, Assistant Professor
Ph.D., Columbia University
Social studies education

Johnson, Roger, Professor
Ed.D., University of California, Berkeley
Elementary and science education,
cooperative learning

Lensmire, Timothy, Associate Professor
Ph.D., Michigan State University
Literacy education, elementary school
writing instruction

Lewis, Cynthia, Professor
Ph.D., University of Iowa
Social, cultural, and critical dimensions of
literacy; literacy, identity, and discourse;
digital and new-media literacies; teacher
study groups

McClelland, Jerry, Associate Professor
Ph.D., Iowa State University
Family education, parent education

Ngo, Bic, Assistant Professor
Ph.D., University of Wisconsin
Social and cultural contexts of education,
refugee/immigrant education, urban and
multicultural education

O'Brien, David, Professor
Ph.D., University of Georgia
Literacy education, use of information
technologies

Plihal, Jane E., Associate Professor
Ph.D., University of Chicago
Research methodology, integration of
vocational and academic education,
international education

Post, Thomas, Professor
Ph.D., Indiana University
Elementary education, mathematics
education

Ranney, Susan, Lecturer
Ph.D., University of Minnesota
Second languages and cultures education

Roehrig, Gillian, Assistant Professor
Ph.D., University of Arizona
Supporting beginning teachers, science
education

Sato, Mistilina, Assistant Professor
Ph.D., Stanford University
Teacher development

§ Taylor, Barbara, Professor
Ed.D., Virginia Polytechnic Institute and
State University
Literacy education, reading difficulties

Tedick, Diane, Associate Professor
Ph.D., The Ohio State University
Second languages and cultures education

**§ Thomas, Ruth, Professor and Department
Head**
Ph.D., University of Minnesota
Thinking, learning, and teaching in
context of everyday life

Upadhyay, Bhaskar, Assistant Professor
Ph.D., University of Texas at Austin
Science teaching and learning; issues of
access, ethnicity, and race that surround
science education in urban schools

Walker, Constance, Associate Professor
Ph.D., University of Illinois, Urbana-
Champaign
Second languages and cultures, serving
bilingual populations

Wyberg, Terrence, Lecturer
Ph.D., University of Minnesota
Mathematics education

Educational Policy and Administration

Alexander, Nicola, Assistant Professor
Ph.D., State University of New York,
Albany
Public administration, school finance

Ammentorp, William, Professor
Ph.D., University of Chicago
Organizational systems and theory, higher
education administration and finance

§ Anderson, Melissa, Associate Professor
Ph.D., University of Minnesota
Higher education administration and
policy, equity and finance

Brunner, C. Cryss, Associate Professor
Ph.D., University of Kansas
Educational management and leadership

§ Chapman, David, Professor
Ph.D., Syracuse University
Educational development, program
evaluation, education policy

§ Cogan, John, Professor
Ph.D., The Ohio State University
Comparative and international
development education

DeJaeghere, Joan, Lecturer
Ph.D., University of Minnesota
Comparative and international
development education

§ Fry, Gerald, Professor
Ph.D., Stanford University
Southeast Asia, comparative education,
international education reform

§ Harkins, Arthur, Associate Professor
Ph.D., University of Kansas
Educational and workplace futures,
knowledge-based education, anticipatory
leadership

Hendel, Darwin, Associate Professor
Ph.D., University of Minnesota
Undergraduate education, evaluation of
teaching and learning, strategic planning

Johnson, David R., Professor
Ph.D., University of Minnesota
Special education administration,
evaluation studies, disability policy
analysis

§ King, Jean, Professor
Ph.D., Cornell University
School change, program evaluation, action
research

Lewis, Darrell, Professor
Ph.D., Louisiana State University
Economics of education, economic
evaluation, equity issues

Magnusson, Deanne, Lecturer
Ph.D., University of Minnesota
Comparative educational systems,
leadership and policy development in U.S.
and international schools

§ McLeod, Scott, Assistant Professor
J.D., Ph.D., University of Iowa
Educational leadership and information
technology, education law

Nickerson, Neal, Lecturer
Ph.D., Columbia University
School administrative leadership and
development

**§ Paige, R. Michael, Professor and
Department Head**
Ph.D., Stanford University
International development education,
intercultural education and training,
multicultural education

Searcy, Lynn, Lecturer
Ph.D., University of Minnesota
Middle school, retention of administrative
personnel

Schneider, Byron, Associate Professor
Ph.D., University of Chicago
Youth development leadership, youth
policy

Seashore, Karen, Professor
Ph.D., Columbia University
Organizational theory, planned change,
schools as workplaces, leadership

Wahlstrom, Kyla, Lecturer
Ph.D., University of Minnesota
School change, applied research

Werner, Ann, Lecturer
Ph.D., University of Minnesota
Principalship, competency-based licensure

**Wotipka, Christine Min, Assistant
Professor**
Ph.D., Stanford University
Women in higher education and
international human rights

Yeh, Stuart, Assistant Professor
Ph.D., Stanford University
Education program evaluation

§ York-Barr, Jennifer, Associate Professor
Ph.D., University of Wisconsin
Interprofessional collaboration, staff
development, school restructuring,
developmental disabilities

Zhang, Liang, Assistant Professor
Ph.D., University of Arizona
Ph.D., Cornell University
Economic issues in higher education

Educational Psychology

Counseling and Student Personnel Psychology

Goh, Michael, Assistant Professor
Ph.D., University of Minnesota
Counseling and student personnel
psychology

Hummel, Thomas, Professor
Ph.D., The Ohio State University
Computer applications, experimental
design as applied to counseling research

**Romano, John, Professor and Department
Head**
Ph.D., Arizona State University
Stress, coping, and wellness; college
student development; international
education

*** § Skovholt, Thomas, Professor**
Ph.D., University of Missouri
Professional psychology, counselor
training, sex roles

Turner, Sherri, Assistant Professor
Ph.D., University of Missouri, Columbia
Counseling and student personnel
psychology

§ Veach, Patricia McCarthy, Professor
Ph.D., The Ohio State University
Counseling process and self-disclosure
research; practica, supervision, and
counseling

Wahl, Kay Herting, Associate Professor
Ed.D., University of South Dakota
School psychology

Psychological Foundations

§ Bart, William, Professor
Ph.D., University of Chicago
Cognitive process in reasoning, cognitive
diagnostic testing and associated
psychometric models, educational reform
and improvement

§ Davenport, Ernest, Associate Professor
Ph.D., University of North Carolina at
Chapel Hill
Computers in social science research,
exploratory data analysis

Davison, Mark, Professor
Ph.D., University of Illinois, Urbana-
Champaign
Educational and psychological
measurement, psychological scaling,
statistics

*** § Garfield, Joan, Professor**
Ph.D., University of Minnesota
Applied statistics, survey design,
evaluation methods

Harwell, Michael, Professor
Ph.D., University of Wisconsin, Madison
Educational statistics

Johnson, David W., Professor
Ed.D., Columbia University
Cooperation and competition, conflict
resolution, social psychology of groups

§ Lawrenz, Frances, Professor
Ph.D., University of Minnesota
Science education, program and
evaluation studies

Long, Jeffrey, Associate Professor
Ph.D., University of Southern California
Educational statistics

Maruyama, Geoffrey, Professor
Ph.D., University of Southern California
Diversity in education, educational
applications of social psychology

Pellegrini, Anthony, Professor
Ph.D., The Ohio State University
Children's play, observational research
methods

Rapp, David, Assistant Professor
Ph.D., State University of New York at
Stony Brook
Reader-guided processes of multimedia
comprehension

Rodriguez, Michael, Associate Professor
Ph.D., Michigan State University
Measurement and evaluation

§ Samuels, S. Jay, Professor
Ed.D., University of California
Learning and cognition, psychology of
values, character education

Tennyson, Robert, Professor
Ph.D., Brigham Young University
Adult learning, instructional psychology
and technology, educational technology

§ van den Broek, Paulus, Professor
Doctorals, University of Leiden, The
Netherlands; Ph.D., University of Chicago
Performance of complex cognitive
tasks (learning, reading, remembering,
reasoning)

School Psychology

Burns, Matthew, Associate Professor
Ph.D., Andrews University
School psychology

Christ, Theodore, Assistant Professor
Ph.D., University of Massachusetts
Developing and evaluating alternative
academic assessments

Christenson, Sandra, Professor
Ph.D., University of Minnesota
Home-school-community collaboration,
ecological assessment

§ Ysseldyke, James, Professor
Ph.D., University of Illinois
Educational outcomes, assessment,
education of students with mild
disabilities

Special Education

Bruininks, Robert, Professor
Ph.D., Vanderbilt University
Developmental disabilities

Craig-Unkefer, Lesley, Assistant Professor
Ed.D., Vanderbilt University
Special education

Deno, Stanley, Professor
Ph.D., University of Minnesota
Mild disabilities

Espin, Christine, Professor
Ph.D., University of Minnesota
Learning disabilities

Hupp, Susan, Professor
Ph.D., University of Illinois
Moderate/severe disabilities

McComas, Jennifer, Associate Professor
Ph.D., University of Iowa
Emotional and behavioral disorders

McConnell, Scott, Professor
Ph.D., University of Oregon
Early childhood, prenatal exposure to
drugs and alcohol

McMaster, Kristen, Assistant Professor
Ph.D., Vanderbilt University
Special education

Rose, Susan, Associate Professor
Ph.D., The Ohio State University
Deaf/hard-of-hearing

Symons, Frank, Associate Professor
Ph.D., Vanderbilt University
Special education/social, emotional, and
behavioral difficulties

Family Social Science

**Program Committee Chairperson—William
Goodman**

Bauer, Jean, Professor
Ph.D., University of Illinois, Urbana-
Champaign
Family economic well-being, welfare
reform, family policy

Baughner, Shirley, Professor, Dean
Ph.D., University of Missouri, Columbia
Leadership, strategic planning, human
ecology

**Caron, Wayne, Senior Lecturer and
Assistant Teaching Professor**
Ph.D., University of Minnesota
Family gerontology, aging families,
family relationships

Danes, Sharon, Professor
Ph.D., Iowa State University
Family financial issues, family businesses,
work and family

Doherty, William, Professor
Ph.D., University of Connecticut
Family relationships, marriage and family
therapy, fatherhood, ethics

Dworkin, Jodi, Assistant Professor
Ph.D., University of Illinois, Urbana-
Champaign
Promoting positive family development,
strengthening families and communities,
normative adolescent development,
parenting adolescents

**Goodman, William J., Senior Lecturer and
Associate Teaching Professor**
Ph.D., Purdue University
Undergraduate education, field study
supervision, marriage and family therapy,
gay/lesbian families

§ Grotevant, Harold D., Professor
Ph.D., University of Minnesota
Adoptive families, adolescent
development, identity development,
family assessment

**McCulloch, B. Jan, Professor and
Department Head**
Ph.D., University of North Carolina-
Greensboro
Family gerontology, rural aging, older
women

Meyer, Cynthia, Lecturer
Ph.D., University of Minnesota
Sexuality and families; gay, lesbian, and
bisexual families; marriage and family
therapy

**Olson, Patricia, Area Program Leader—
Personal and Family Financial Education**
Ph.D., The Ohio State University
Limited income families, cultural
perspectives of resource management, and
policies impacting families

Rettig, Kathryn, Professor
Ph.D., Michigan State University
Justice issues, family decision-making,
legal-economic conflicts

§* Rosenblatt, Paul C., Professor
Ph.D., Northwestern University
Family loss, business families, family
diversity, family theory

Rueter, Martha, Associate Professor
Ph.D., Iowa State University
Rural families, developmental family
psychopathology, vulnerable rural youth

Solheim, Catherine, Associate Professor
Ph.D., University of Minnesota
Family resources, cultural diversity,
gender roles

Stum, Marlene, Associate Professor
Ph.D., University of Wisconsin, Madison
Aging families, long-term care,
intergenerational resource transfers

Turner, William L., Professor
Ph.D., Virginia Polytechnic Institute and
State University
Drug and alcohol abuse, marriage and
family therapy, African American families

Wieling, Elizabeth, Associate Professor
Ph.D., Iowa State University
Cross-cultural families, intercultural
marriages, marriage and family therapy,
Hispanic families

Zuiker, Virginia S., Associate Professor
Ph.D., The Ohio State University
Family resources, home-based
employment, Hispanic family economics

Institute of Child Development

Cicchetti, Dante, Professor
Ph.D., University of Minnesota
Developmental psychopathology

***§ Collins, W. Andrew, Professor**
Ph.D., Stanford University
Socialization, social cognition, family
relations

**Crick, Nicki, Distinguished McKnight
University Professor and Institute Director**
Ph.D., Vanderbilt University
Relational and overt aggression, peer
victimization, social information
processing, gender

§ Egeland, Byron, Professor
Ph.D., State University of Iowa
Developmental psychopathology, abuse and
maltreatment

§ Georgieff, Michael, Professor
M.D., Washington University
Neonatology, brain development,
cognitive neuroscience

**Gunnar, Megan, Distinguished McKnight
University Professor**
Ph.D., Stanford University
Social and biological aspects of
development

Karatekin, Canan, Associate Professor
Ph.D., University of California, Los
Angeles
Cognitive neuroscience, child clinical
neuropsychology, ADHD

Maratsos, Michael, Professor
Ph.D., Harvard University
Language development, psycholinguistics

***§ Masten, Ann, Distinguished McKnight
University Professor**
Ph.D., University of Minnesota
Developmental psychopathology, stress and
coping, humor

Pick, Herbert, Jr., Professor
Ph.D., Cornell University
Perceptual development, learning

Reynolds, Arthur, Professor
Ph.D., University of Illinois
Child development; preventive research
and program evaluation

Sera, Maria, Professor
Ph.D., Indiana University
Cognitive and linguistic development

§ Sroufe, L. Alan, Professor
Ph.D., University of Wisconsin
Socioemotional development,
developmental psychopathology

Thomas, Kathleen, Assistant Professor
Ph.D., University of Minnesota
Cognitive development, implicit learning,
pediatric neuroimaging, fMRI

§ Weinberg, Richard, Professor
Ph.D., University of Minnesota
Behavior genetics, assessment, preschool
education

Yonas, Albert, Professor
Ph.D., Cornell University
Perceptual development

Yussen, Steven, Professor
Ph.D., University of Minnesota
Children's learning and cognitive
development

Adjunct Faculty

Christenson, Sandra, Associate Professor
Ph.D., University of Minnesota
Family-school partnerships, family
learning environments

Grotevant, Harold, Professor
Ph.D., University of Minnesota
Adolescent development, family
relationships, adoptive families, family
assessment

Hupp, Susan, Professor
Ph.D., University of Illinois
Social behavior, personality development

Leon, Gloria, Professor
Ph.D., University of Maryland
Eating disorders, stress and coping health
psychology

McConnell, Scott, Professor
Ph.D., University of Oregon
Early childhood development

Oberg, Charles, Associate Professor
M.D., University of Minnesota
Child and family policy

Pellegrini, Anthony, Professor
Ph.D., The Ohio State University
Children's play, observational research
methods

Shapiro, Elsa, Associate Professor
Ph.D., University of Minnesota
Neurology

Tellegen, Auke, Professor
Ph.D., University of Minnesota
Personality assessment, personality
theory, hypnosis, behavior genetics

Temple, Judy, Associate Professor
Ph.D., Michigan State University
Public sector economics, economics of
education, policy evaluation, cost-benefit
analysis

Thomas, Ruth, Professor
Ph.D., University of Minnesota
Teaching and learning cognitive theory,
parent-child relations

§ van den Broek, Paulus, Professor
Doctorals, University of Leiden, The
Netherlands; Ph.D., University of Chicago
Learning, cognition

Warren, Susan, Assistant Professor
M.D., Brown University
Emotional development of young children

Williams, Carolyn, Associate Professor
Ph.D., University of Georgia
Health care psychology

Kinesiology, School of

Dengel, Donald, Associate Professor
Ph.D., University of Georgia
Exercise science, exercise physiology

Ingraham, Stacy, Lecturer
Ph.D., University of Minnesota
Exercise physiology, wellness and health
promotion, sport specific training and
conditioning, eating disorders in female
athletes, coaching

**Kane, Mary Jo, Professor and School
Director**
Ph.D., University of Illinois
Social-psychological parameters of sport/
physical activity, women in sport

Konczak, Jürgen, Associate Professor
Ph.D., University of Wisconsin
Neuromotor control, biomechanics
of coordination, pathokinesiology,
developmental kinesiology

Koscheyev, Victor, Senior Fellow
M.D., Ph.D., Institute of Biophysics,
Moscow
Human factors and exercise physiology,
human performance in extreme
environments

LaVoi, Nicole, Education Specialist
Ph.D., University of Minnesota
Sport psychology, sport sociology, moral
development and education

Leitschuh, Carol, Research Associate
Ph.D., Oregon State University
Developmental/adapted physical
education, early childhood special
education

Leon, Arthur, Professor
M.D., University of Wisconsin
Exercise physiology, physical activity's
role in chronic disease

Petit, Moira, Assistant Professor
Ph.D., University of British Columbia
Childhood and youth obesity prevention; interrelationships of physical activity, nutrition, and endocrine status on bone health and fracture prevention

Pickert, Robert, Assistant Professor
M.A., University of South Dakota
Physical activity programming, management, coaching, sport facilities, undergraduate advising

Rodgerson, Richard, Teaching Specialist
B.A., University of Minnesota
Motor development, behavioral biology

Serfass, Robert, Associate Professor
Ph.D., University of Minnesota
Exercise physiology, sport training, fitness, sport nutrition

Spletzer, Elizabeth, Education Specialist
M.S., Eastern Michigan University
Pedagogy, biomechanics

Stoffregen, Thomas, Professor
Ph.D., Cornell University
Human factors

Wade, Michael, Professor and Chair, Department of Work and Human Resource Education
Ph.D., University of Illinois
Motor skill development, human factors, developmental disabilities, aging

Wiese-Bjornstal, Diane, Associate Professor
Ph.D., University of Oregon
Sport psychology, youth sport, psychology of sport injury

Recreation and Sport Studies

Buysse, JoAnn, Education Specialist
Ph.D., University of Minnesota
Gender issues in sport, social psychology of sport, ethics, media

Feldman, Harvey, Teaching Specialist
M.Ed., University of Minnesota
Recreation and park administration

Kane, Mary Jo, Professor
Ph.D., University of Illinois
Social-psychological parameters of sport/physical activity, women in sport

Kihl, Lisa, Assistant Professor
Ph.D., University of British Columbia
Sport management studies

§ McAvoy, Leo, Professor
Ph.D., University of Minnesota
Outdoor recreation programs and resources, park planning and management

Outley, Corliss, Assistant Professor
Ph.D., Texas A&M University
Recreation, resources, and youth development in urban communities

Ross, Stephen, Assistant Professor
Ph.D., University of Illinois, Urbana-Champaign
Sport management studies

Russell, Keith, Associate Professor
Ph.D., University of Idaho
Adventure and wilderness therapy and education, program evaluation, recreation and park administration and management

§ Tabourne, Carla, Associate Professor
Ph.D., New York University
Recreation therapy, geriatrics, intergenerational programming, comprehensive program and patient management

Music Education

Addo, Akosua, Associate Professor
Ph.D., University of British Columbia
International issues in music education, multimedia ethnography

Haack, Paul, Professor
Ph.D., University of Wisconsin
Music education, psychology and sociology of music, aesthetics

Hamann, Keitha Lucas, Assistant Professor
Ph.D., University of Miami
Choral music education

Jackson, Elizabeth, Teaching Specialist
Ph.D., The Ohio State University
Music education

Zahler, Clara, Teaching Specialist
M.A., Connecticut College
Music education, string techniques

Postsecondary Teaching and Learning

Adamson, William Delancey (Del), Associate Professor
Ph.D., University of Minnesota
Literature, film and the arts

Arendale, David R., Assistant Professor
Ph.D., University of Missouri-Kansas City
Developmental education, world history

Barajas, Heidi L., Associate Professor
Ph.D., University of Minnesota
Sociology

***Barnum, Jill, Professor**
Ph.D., University of North Dakota
Literature, writing

*** Brothen, Thomas F., Professor**
Ph.D., University of Minnesota
Psychology

Bruch, Patrick L., Associate Professor
Ph.D., Wayne State University
Writing

*** Collins, Terence G., Professor**
Ph.D., University of Minnesota
Writing, literature

§ delMas, Robert C., Assistant Professor
Ph.D., University of Minnesota
Statistics, mathematics

Detzner, Daniel F., Professor
Ph.D., University of Minnesota
American studies, immigrant families

Duranczyk, Irene M., Assistant Professor
Ed.D., Grambling State University
Mathematics, developmental education

Fayon, Annia K., Assistant Professor
Ph.D., Arizona State University
Geology

Ghere, David L., Associate Professor
Ph.D., University of Maine
History

Gray Brown, Katy, Assistant Professor
Ph.D., University of Minnesota
Philosophy

Grier, Tabitha L., Assistant Professor
Ph.D., University of Minnesota
Educational psychology, career development

***§ Hatch, Jay T., Associate Professor**
Ph.D., University of Minnesota
Biology, environment

Higbee, Jeanne L., Professor
Ph.D., University of Wisconsin, Madison
Developmental education

Hsu, Leonardo, Assistant Professor
Ph.D., University of California, Berkeley
Physics, physical science

Jacobs III, Walter R., Associate Professor
Ph.D., Indiana University
Sociology

James, Patricia A., Associate Professor
Ph.D., University of Minnesota
Art, creativity

Jehangir, Rashné R., Assistant Professor
Ph.D., University of Minnesota
Educational policy and administration, international literature

*** Jensen, Murray S., Associate Professor**
Ph.D., University of Minnesota
Biology, anatomy, physiology

Kahn, Peter T., Assistant Professor
J.D., University of Minnesota
Law, social studies

*** Koch, Laura Coffin, Associate Professor**
Ph.D., University of Minnesota
Mathematics

*** Lee, Amy M., Associate Professor**
Ph.D., University of Massachusetts, Amherst
Writing

Madyun, Na'im, Assistant Professor
Ph.D., University of Minnesota
Psychology

Miksch, Karen L., Assistant Professor
J.D., University of California, Berkeley
Law, social sciences

Moore, Randy C., Professor
Ph.D., University California, Los Angeles
Biology, botany

Pedely, Mark H., Associate Professor
Ph.D., University of California, Berkeley
Social sciences, anthropology

Reynolds, Thomas J., Associate Professor
Ph.D., University of Minnesota
Writing

***§ Robertson, Douglas F., Professor**
Ph.D., University of Minnesota
Mathematics, computing

*** Sirc, Geoffrey M., Professor**
Ph.D., University of Minnesota
Writing

Staats, Susan K., Assistant Professor
Ph.D., Indiana University
Mathematics, anthropology

Uthe, Richard E. (Rick), Associate Professor
Ph.D., University of New Brunswick
General chemistry, geology, physical science

*** Wambach, Cathrine A., Associate Professor**
Ph.D., University of Minnesota
Psychology

Xiong, Zha Blong, Assistant Professor
Ph.D., University of Minnesota
Family social science, social science

Yahnke, Robert E., Professor
Ph.D., University of Wisconsin, Madison
Literature, film and the arts

School of Social Work

***Albrecht, Lisa, Associate Professor**
Ph.D., SUNY-Buffalo
Feminist alliance politics, social justice, working for racial justice

§Baizerman, Michael, Professor
Ph.D., University of Pittsburgh
Adolescent/youth studies and public policy, healthy youth development

§Bradshaw, William, Associate Professor
Ph.D., University of Southern California
Mental health services: research, development, evaluation

Davila-Williams, Sonia, Teaching Specialist
M.S.W., University of Pittsburgh
Service delivery strategies for Chicano/Latino and underprivileged families

Dimock, Peter, Teaching Specialist
M.S.W., University of Minnesota
Gender socialization, sexual abuse of males, restorative justice

Edleson, Jeffrey, Professor
Ph.D., University of Wisconsin, Madison
Research methods, family violence, domestic abuse, electronic information

Gibson, Priscilla, Associate Professor
Ph.D., University of Denver
African American grandmothers, kinship care, research methods

Gilgun, Jane F., Professor
Ph.D., Syracuse University
Child sexual abuse, development of violent behavior

§Hollister, C. David, Professor
Ph.D., University of Michigan
Program evaluation, organizational analysis, substance abuse, immigrant populations

Jones, Linda, Associate Professor
Ph.D., University of Wisconsin, Madison
Lesbian/gay families, women and social policy issues, ethics

Kivnick, Helen Q., Professor
Ph.D., University of Michigan
Life strengths, CitySongs, elder role models, life-cycle development

Lightfoot, Elizabeth, Assistant Professor
Ph.D., Indiana University at Bloomington
Social welfare policy, disability policy, strategic planning, community organizing

Lum, Terry, Associate Professor
Ph.D., Washington University
Public policy, social/economic/political environments, health care policy

Menanteau-Horta, Dario, Professor
Ph.D., University of Minnesota
Social organization, community change, rural development, Latin America

§Morrissey, Megan, Lecturer
Ph.D., University of Minnesota
Social welfare history/policy, community practice, historical research methods

Quam, Jean K., Professor and Director
Ph.D., University of Wisconsin, Madison
Aging, older women, chronically mentally ill, social work history

§Reinardy, James, Associate Professor
Ph.D., University of Minnesota
Long-term care, older adult assessments, social welfare policy

Rooney, Ronald, Professor
Ph.D., University of Chicago
Involuntary clients, time-limited practice, public social services, technology-enhanced learning

Taylor, Edward, Associate Professor
Ph.D., University of Southern California
Children/adolescents with mental disorders, mental illness and violence

Umbreit, Mark, Professor
Ph.D., University of Minnesota
Mediation/conflict resolution, victim issues, peacemaking and spirituality

Van Slyke, Victoria, Lecturer
Ph.D., University of Minnesota
Supervision models, interdisciplinary teams, practice with diverse populations

Wells, Susan, Gamble-Skogmo Professor
Ph.D., University of Southern California
Child welfare service evaluation and policy, risk assessment

Williams, Oliver, Professor
Ph.D., University of Pittsburgh
Domestic violence, homelessness, families/children, aging, ethno-cultural issues

Work and Human Resource Education

Bartlett, Kenneth, Associate Professor
Ph.D., University of Illinois, Urbana-Champaign
Human resource development, adult education

Brown, James, Professor
Ph.D., Bowling Green State University
Special learning needs, diversity in education and work settings

Greiman, Bradley, Assistant Professor
Ph.D., University of Missouri, Columbia
Agricultural education

Joerger, Richard, Associate Professor
Ph.D., University of Minnesota
Agricultural, food, and environmental education

Johansen, Barry-Craig, Assistant Professor
Ph.D., University of Minnesota
Human resource development, adult education

Jones, Stephen, Associate Professor
Ph.D., Iowa State University
Agricultural education and extension, extension education

Krueger, Richard, Professor
Ph.D., University of Minnesota
Program evaluation, focus group interviews

Lambrecht, Judith, Professor
Ph.D., University of Wisconsin
Business teacher education, instructional use of business software

Lewis, Theodore, Professor
Ph.D., The Ohio State University
Technology education curriculum, technology and work, workplace literacy

***§ McLean, Gary, Professor**
Ed.D., Columbia University
International management development, organizational quality and productivity, keyboarding

Park, Rosemarie, Associate Professor
Ed.D., Harvard University
Adult literacy education, workplace literacy, women's issues

Peterson, Shari, Assistant Professor
Ph.D., University of Minnesota
Adult education, human resource development, career decision-making

Pucel, David, Professor
Ph.D., University of Minnesota
Education and training systems

Stone, James, III, Associate Professor
Ed.D., Virginia Polytechnic Institute and State University
Education and work transitions for youth and adults, work-based learning

Yang, Baiyin, Associate Professor
Ph.D., University of Georgia
Adult education, human resource development

Youth Development Leadership Cooperating Faculty

Baizerman, Michael, Professor
Ph.D., University of Pittsburgh
Everyday lives of youth; comprehensive work, community, and family education

Kimball, Lisa, Teaching Specialist
M.Ed., University of Minnesota
Experiential learning, youth development, spirituality and youth

Outley, Corliss, Assistant Professor
Ph.D., Texas A&M University
Recreation, resources, and youth development in urban communities

Rodrigues, Leon, Professor
Ph.D., University of Minnesota
Multicultural education, youth development leadership

Schneider, Byron, Associate Professor
Ph.D., University of Chicago
Education and youth policy

Schumer, Rob, Lecturer
Ph.D., University of California, Los Angeles
Youth studies

Stein, Jerry, Senior Fellow
Ph.D., University of Minnesota
Community youth development, community building and education

Toole, James, Lecturer
Ph.D., University of Minnesota
Youth studies

Walker, Joyce, Professor
Ph.D., University of Minnesota
Community youth organizations, youth policy, youth development leadership

College of Food, Agricultural and Natural Resource Sciences

Administration

TBA, Dean
(At the time this catalog went to print, the University was conducting a national search for a new dean. See the CFANS Web site for updated information.)

Ann Hill Duin, Associate Dean for Faculty and Academic Affairs

Michael A. Schmitt, Associate Dean for Extension

Robert A. Stine, Associate Dean; Coordinator, Cloquet Forestry Center

Melvin J. Baughman, Associate Dean for Undergraduate Programs

F. Abel Ponce de León, Associate Dean for Research

Cynthia Cashman, Director of Development

TBA, Director of Information Services

Mary Buschette, Director of Alumni Relations

Marty Moen, Director of Communications

William K. Ganzlin, Director of Student Services

Deb Karner, Director of Human Resources

Milly Theis, Director of Budget and Finance

John Vreyens, Director of International Programs

Faculty

Agricultural, Food, and Environmental Education

Greiman, Bradley, Assistant Professor
Ph.D., University of Missouri
Reflective judgment, mentor-protégé relationships, effective teaching

Hartle, Darrell, Senior Fellow, Interim Division Coordinator
Teaching, leadership and agricultural industry

Joerger, Richard, Associate Professor
Ph.D., University of Minnesota
Teacher induction of career, technical, and management education teachers, leadership development strategies for career and technical education students, program planning and evaluation

Klingbeil, Larry, Lecturer
Ph.D., University of Minnesota
Teaching, student teacher supervision, farm business management education

Nordquist, Dale, Professor and Extension Educator
M.S., University of Minnesota
Agricultural finance, planning, farm business management education

Agronomy and Plant Genetics

Anderson, James A., Associate Professor
Ph.D., Cornell University
Plant breeding and genetics—wheat

Anderson, Robert N., Adjunct Professor Emeritus
Ph.D., University of Minnesota
Weed management

Barnes, Donald K., Adjunct Professor Emeritus
Ph.D., Pennsylvania State University
Plant breeding alfalfa

Becker, Roger L., Professor
Ph.D., Iowa State University
Weed control for forages, pastures, and non-cropland areas

Behrens, Richard, Professor Emeritus
Ph.D., University of Wisconsin
Weed management

Bernardo, Rex N., Professor
Ph.D., University of Illinois
Plant breeding and genetics, corn

Burnside, Orvin C., Professor Emeritus
Ph.D., University of Minnesota
Alternative weed management systems

Busch, Robert H., Adjunct Professor Emeritus
Ph.D., Purdue University
Wheat genetics and breeding methods

*** Cardwell, Vernon B., Professor**
Ph.D., Iowa State University
Undergraduate education and advising, crop management and physiology

Comstock, Vern E., Adjunct Professor Emeritus
Ph.D., University of Minnesota
Plant breeding and genetics, flax

Cuomo, Gregory J., Professor
Ph.D., University of Nebraska
Pasture management and ecology

Durgan, Beverly R., Professor
Ph.D., North Dakota State University
Weed management for small grains, sunflowers, minor crops

Ehlke, Nancy Jo, Professor
Ph.D., Pennsylvania State University
Forage, legumes and turf grasses, genetics, breeding methods, seed production

Forcella, Frank, Adjunct Associate Professor
Ph.D., University of Oklahoma
Integrated ecology and management of weeds

Garvin, David F., Adjunct Assistant Professor
Ph.D., Cornell University
Wheat genetics and germplasm improvement

Geadelmann, Jon Lee, Adjunct Professor
Ph.D., Iowa State University
Corn breeding and genetics

Gengenbach, Burle G., Professor
Ph.D., University of Illinois
Corn and soybeans molecular genetics

Gooding, John A., Professor Emeritus
Ph.D., Washington State University
Agronomy—range plant ecology

Gronwald, John W., Adjunct Professor
Ph.D., University of Illinois
Biological control of invasive weeds in legumes and wetlands

Gunsolus, Jeffrey L., Professor
Ph.D., North Carolina State University
Weed management in corn and soybeans

Haar, Milton J., Assistant Professor
Ph.D., Iowa State University
Education and research, crop/weed ecology

Hardman, Leland L., Professor Emeritus
Ph.D., University of Minnesota
Production and utilization of crops, including biotechnology issues

Hicks, Dale R., Professor
Ph.D., University of Illinois
Corn and sunflower management

Johnson, Gregg, Associate Professor
Ph.D., University of Nebraska
Integrated weed management

Johnson, Herbert W., Professor Emeritus
Ph.D., University of Nebraska
Agronomy—soybean variety development

Jones, Robert J., Professor
Ph.D., University of Missouri
Maize physiology

Joo, Pilju Kim, Adjunct Professor
Ph.D., Cornell University
Crop genetics and international development

Jordan, Nicholas R., Professor
Ph.D., Duke University
Application of plant population ecology to agricultural problems

Jung, Hans-Joachim G., Adjunct Professor
Ph.D., University of Illinois
Cell wall lignification of forages

Lamb, JoAnn F., Adjunct Associate Professor
Ph.D., University of Nebraska, Lincoln
Alfalfa breeding/genetics

Lueschen, William E., Professor
Ph.D., University of Illinois
Perennial native legumes and weed management in Canola

Marten, Gordon C., Adjunct Professor Emeritus

Ph.D., University of Minnesota
Forage production and management

Muehlbauer, Gary J., Associate Professor

Ph.D., University of Minnesota
Molecular genetics of wheat and barley

Naeve, Seth, Assistant Professor

Ph.D., Iowa State University
Soybean management

Oelke, Ervin, Professor Emeritus

Ph.D., University of Wisconsin, Madison
Small grains, wild rice and minor crops management

Orf, James H., Professor

Ph.D., University of Illinois
Soybean genetics and breeding

Peterson, Paul R., Assistant Professor

Ph.D., University of Minnesota
Forage management and utilization

Phillips, Ronald L., Regents Professor

Ph.D., University of Minnesota
Crop tissue culture, genomics and cytogenetics

Porter, Paul, Associate Professor

Ph.D., University of Illinois
Cropping systems

Rasmusson, Donald C., Professor Emeritus

Ph.D., University of California, Davis
Barley genetics and breeding

Rines, Howard W., Adjunct Professor

Ph.D., Yale University
Genetics and biotechnology investigations in oat

Scott, Lori K., Assistant Professor

Ph.D., University of Wisconsin
Education and research, soybean breeding

Sheaffer, Craig C., Professor

Ph.D., University of Maryland
Alfalfa and forage management, sustainable cropping systems

*** Simmons, Steve R., Professor**

Ph.D., University of Minnesota
Ecology of diversified cropping systems

Smith, Kevin P., Associate Professor

Ph.D., University of Wisconsin, Madison
Barley genetics and breeding

Smith, Lawrence H., Professor Emeritus

Ph.D., Michigan State University
Undergraduate education

Somers, David A., Adjunct Professor

Ph.D., Washington State University
Molecular genetics of soybean and oat

Stucker, Robert E., Professor Emeritus

Ph.D., North Carolina State University

Stuthman, Deon D., Professor

Ph.D., Purdue University
Durable pest resistance, oat genetics and breeding

Vance, Carroll P., Adjunct Professor

Ph.D., The Ohio State University
Physiology/molecular biology of nitrogen fixation in legumes

Wedin, Walter F., Adjunct Professor

Ph.D., University of Wisconsin, Madison
Forage management

Wiersma, Jochum J., Assistant Professor

Ph.D., University of Minnesota
Small grains production and management

Wyse, Donald L., Professor

Ph.D., Michigan State University
Perennial weed control for grass/legume seed production

Animal Science

Baidoo, Samuel L., Associate Professor

Ph.D., University of Alberta
Swine nutrition and management

Chester-Jones, Hugh, Associate Professor

Ph.D., Virginia Tech
Dairy and beef production systems

Crooker, Brian A., Professor

Ph.D., University of Illinois
Nutritional physiology of ruminants

Da, Yang, Associate Professor

Ph.D., University of Illinois, Urbana-Champaign
Quantitative and molecular genetics

Dayton, William R., Professor

Ph.D., Iowa State University
Animal growth biology

DiCostanzo, Alfredo, Associate Professor

Ph.D., University of Minnesota
Beef cattle nutrition and management

Donker, John D., Professor Emeritus

Ph.D.
Ruminant nutrition

El Halawani, M.E., Professor

Ph.D., University of California, Davis
Avian endocrinology

Endres, Marcia, Assistant Professor

Ph.D., University of Minnesota
Dairy management

Fahrenkrug, Scott, Associate Professor

Ph.D., University of Minnesota
Functional genomics

Foster, Douglas N., Professor

Ph.D., University of California
Molecular biology, avian endocrinology

*** Hansen, Leslie B., Professor**

Ph.D., Iowa State University
Dairy genetics

Hathaway, Marcia, Professor

Ph.D., University of Minnesota
Muscle biology

Hawton, Jerry D., Professor Emeritus

Ph.D., University of Minnesota
Swine nutrition

*** Hunter, Alan G., Professor Emeritus**

Ph.D., Michigan State University
Animal physiology

Jacob, Jacqueline, Assistant Professor

Ph.D., University of British Columbia
Poultry management

Johnson, Dennis G., Professor

Ph.D., University of Minnesota
Dairy production systems

Johnston, Lee J., Professor

Ph.D., Michigan State University
Swine nutrition and management

Lamb, G. Cliff, Associate Professor

Ph.D., Kansas State University
Reproductive physiology and beef cattle management

Li, Yuzhi, Assistant Professor

Ph.D., Hiroshima University, Japan
Animal behavior, alternative swine production

Linn, James Gary, Professor

Ph.D., University of Minnesota
Dairy nutrition

Marx, George D., Professor Emeritus

Ph.D., University of Minnesota
Dairy management

Mauro, Laura, Associate Professor

Ph.D. University of Minnesota
Animal physiology/neuroscience, cell signaling

Noll, Sally L., Professor

Ph.D., University of Minnesota
Poultry (turkeys) science

O'Grady, Scott M., Professor

Ph.D., University of Illinois
Electrolyte physiology

Otterby, Donald E., Professor Emeritus

Ph.D., North Carolina State University
Dairy cattle nutrition and management

Ponce de León, F. Abel, Professor

Ph.D., University of Massachusetts
Genome mapping, genetic markers

Reneau, Jeffrey K., Professor

D.V.M., University of Minnesota
Dairy management

Seykora, Anthony J., Professor

Ph.D., North Carolina State University
Dairy genetics

§Shurson, Gerald C., Professor

Ph.D., Michigan State University
Swine nutrition management

Stern, Marshall D., Professor

Ph.D., University of Maine
Ruminant nutrition

Walker, Roger D., Professor

Ph.D., University of Kentucky
Swine management systems and swine breeding and genetics

Wheaton, Jonathan E., Professor

Ph.D., Oregon State University
Reproductive endocrinology

***§ White, Michael E., Professor**

Ph.D., University of Minnesota
Muscle biology and growth

Applied Economics

Apland, Jeffrey D., Professor

Ph.D., Purdue University
Production economics, managerial economics and mathematics

Blank, O. Uel, Professor Emeritus

Ph.D., Michigan State University

Buhr, Brian L., Professor and E. Fred Koller Professor in Agricultural Management Information Systems

Ph.D., Iowa State University
Agricultural marketing and price analysis

Cochrane, Willard W., Professor Emeritus

Ph.D., Harvard University
Farm price analysis and policy

Coggins, Jay S., Associate Professor

Ph.D., University of Minnesota
Resource and environmental economics, political economy

Crowdson, Buddy G., Associate Professor Emeritus

M.S., University of Minnesota
Business development

Dahl, Dale C., Professor Emeritus

Ph.D., University of Minnesota
Agricultural marketing and price analysis, agricultural law

Dahl, Reynold P., Professor Emeritus

Ph.D., University of Minnesota
Agricultural marketing, futures markets and prices, agricultural cooperatives

§ Davis, Elizabeth E., Associate Professor

Ph.D., University of Michigan
Labor economics, public policy, poverty, rural economics

Easter, K. William, Professor

Ph.D., Michigan State University
Resource economics and development, environment/non-point pollution

Egertson, Kenneth, Professor Emeritus

M.S., University of Minnesota

Eidman, Vernon R., Professor

Ph.D., University of California, Berkeley
Production economics and agribusiness management

Fruin, Jeremiah E., Associate Professor

Ph.D., University of California, Berkeley
Transportation economics, agricultural marketing and logistics

Fuller, Earl I., Professor Emeritus

Ph.D., University of Minnesota
Farm management, production economics

Gartner, William, Professor

Ph.D., Michigan State University
Tourism development

Glewwe, Paul, Associate Professor

Ph.D., Stanford University
Development economics, applied microeconomics and econometrics

Hammond, Jerome W., Professor Emeritus

Ph.D., University of Wisconsin, Madison
Agricultural marketing and pricing

Hawkins, Richard O., Professor Emeritus

M.S., University of Minnesota
Production economics, farm management

§ Homans, Frances R., Associate Professor

Ph.D., University of California
Resource economics

Hoyt, John S., Professor Emeritus

Ph.D., American University of Washington

Hurley, Terrance M., Associate Professor

Ph.D., Iowa State University
Agricultural production and policy, environmental economics

Kalambokidis, Laura, Assistant Professor

Ph.D., University of Michigan
Community and regional development, public finance

§ King, Robert P., Professor

Ph.D., Michigan State University
Management information systems, managerial economics, agribusiness management

Kinsey, Jean D., Professor

Ph.D., University of California, Davis
Consumption economics, retail food distribution

Lazarus, William F., Professor

Ph.D., University of Illinois
Farm business and financial management

Levins, Richard A., Professor Emeritus

Ph.D., Mississippi State University
Farm management

§ Liu, Donald J., Associate Professor

Ph.D., University of Minnesota
Agricultural marketing and price analysis, futures and option

Maki, Wilbur R., Professor Emeritus

Ph.D., Iowa State University
Regional economics

Martin, Lee R., Professor Emeritus

Ph.D., Harvard University

McCullough, Gerard John, Associate Professor

Ph.D., Massachusetts Institute of Technology
Transportation economics and applied economics

Morse, George W., Professor

Ph.D., University of Wisconsin, Madison
Community and regional economics

Nefstead, Ward E., Associate Professor
M.S., University of Minnesota
Farm management and marketing

§ Olson, Kent D., Professor
Ph.D., Iowa State University
Production economics and farm management, agribusiness management

Pardey, Philip G., Professor
Ph.D., University of Minnesota
Agricultural research policy, economics of technical change

Parliament, Claudia D., Professor
Ph.D., University of California, Berkeley
Community economic development and economic education

Pederson, Glenn D., Professor
Ph.D., Michigan State University
Agricultural finance, international agricultural development

Polasky, Stephen, Fesler Lampert Professor of Ecological and Environmental Economics
Ph.D., University of Michigan
Environmental and resource economics, industrial organization

Raup, Philip M., Professor Emeritus
Ph.D., University of Wisconsin
Land economics, world agricultural development

Roe, Terry Lee, Professor
Ph.D., Purdue University
Economic development, trade, political economy, prices

Rose, Gordon D., Professor Emeritus
Ph.D., South Dakota State University

Runge, Carlisle Ford, Distinguished McKnight University Professor
Ph.D., University of Wisconsin, Madison
Agricultural and natural resources policy, welfare economics

Ruttan, Vernon, Regents Professor Emeritus
Ph.D., University of Chicago
Economic development, agricultural research policy and development

Schuh, G. Edward, Regents Professor
Ph.D., University of Chicago
Economic development, international trade and exchange rate policy

Senauer, Benjamin H., Professor
Ph.D., Stanford University
Consumption economics and food policy

Smith, Pamela, Associate Professor
Ph.D., University of Wisconsin, Madison
International trade, economics, econometrics

Smith, Rodney B., Associate Professor
Ph.D., University of Maryland
Government regulation, policy and prices, resource and environment

Snyder, Robert W., Professor Emeritus
Ph.D., Cornell University

Stevens, Stanley C., Associate Professor Emeritus
Ph.D., University of Illinois
Grain marketing

Stinson, Thomas F., Associate Professor
Ph.D., University of Minnesota
Public finance and regional economic development

Sundquist, Wesley B., Professor Emeritus
Ph.D., Michigan State University
Production economics, policy

Taff, Steven J., Associate Professor
Ph.D., University of Wisconsin, Madison
Agricultural policy, local public finance, environmental policy

Thomas, Kenneth H., Professor Emeritus
Ph.D., University of Minnesota
Farm management

§ Welsch, Delane E., Professor Emeritus
Ph.D., Michigan State University
International agriculture and rural development, natural resources

Yeap, Clarissa, Assistant Professor
Ph.D., Michigan State University
Industrial organization, applied microeconomics, food marketing

Yoho, Carole J. B., Associate Professor Emeritus
M.A., University of Minnesota
Public policy education, local government, public finance

Bio-based Products

*** Bowyer, James L., Professor**
Ph.D., University of Minnesota
Life cycle analysis, marketing

Bratkovich, Stephen M., Adjunct Faculty
Ph.D., The Ohio State University
Extension education

Erickson, Robert W., Professor Emeritus
Ph.D., University of Minnesota
Wood physics and moisture relations

Gertjeansen, Roland O., Professor Emeritus
Ph.D., University of Minnesota
Fiber and particle products technology

Grimsrud, David T., Associate Professor Emeritus
Ph.D., University of Minnesota
Indoor air quality and building energy efficiency

Hendricks, Lewis T., Professor Emeritus
Ph.D., Michigan State University
Forest products extension and training

Huelman, Patrick H., Associate Professor
M.S., Iowa State University
Energy-efficient buildings

Petersen, Harlan D., Assistant Professor
M.S., University of Minnesota
Wood moisture relations

Ramaswamy, Shri, Professor and Department Head
Ph.D., State University of New York
Paper science and engineering

Reichenbach, Michael R., Adjunct Faculty
M.S., University of Illinois
Extension educator

Ruan, Roger, Adjunct Faculty
Ph.D., University of Illinois
Bioprocessing

Sarkanen, Simo, Professor
Ph.D., University of Washington
Wood and lignin chemistry

Schmidt, Elmer L., Professor
Ph.D., University of Minnesota
Wood deterioration/protection

Seavey, Robert T., Research Associate
Ph.D., University of Minnesota
Wood physics

Severtson, Steven J., Associate Professor
Ph.D., Institute of Paper Science and Technology
Surface chemistry

Smith, Timothy M., Associate Professor
Ph.D., Pennsylvania State University
Forest products marketing

Suh, Sangwon, Assistant Professor
Ph.D., Leiden University, Netherlands
Life cycle analysis

Tschirner, Ulrike W., Associate Professor
Ph.D., University of Karlsruhe, Germany
Lignin chemistry

Tze, William Tai Yin, Assistant Professor
Ph.D., University of Maine
Wood science, composites

Yin, Kewen Karen, Professor
Ph.D., University of Maryland
Process monitoring and control

Biosystems and Agricultural Engineering

In the following list, P.E. designates licensure as a professional engineer in Minnesota, unless otherwise indicated. P.S.S. designates licensure as a professional soil scientist.

Bhattacharya, Mrinal, Professor
Ph.D., University of Nebraska
Biodegradable polymers, biomaterials, tissue engineering, biosensors

Boedicker, James, Adjunct Associate Professor
Ph.D., North Carolina State University
Machinery systems, machine safety, livestock environment

Chaplin, Jonathan, P.E., Associate Professor
Ph.D., Iowa State University
Engineering safety, machinery systems design, instrumentation and control, energy systems

Clanton, Charles, P.E., P.S.S., Professor
Ph.D., University of Minnesota
Agricultural waste management: water, air quality, odor, and storage

Goodrich, Philip, P.E., Associate Professor
Ph.D., Purdue University
Biomass, renewable energy systems, odor control

Iznuno, Forrest, Professor
Ph.D., Colorado State University
Water management, irrigation, drainage, water quality

Jacobson, Larry, P.E., Professor and Extension Engineer
Ph.D., University of Minnesota
Environmentally friendly and energy conserving animal housing systems; airborne emissions, odor control, and indoor air quality for agricultural, industrial, and residential buildings; waste management

Janni, Kevin, P.E., Professor, Extension Engineer, and Department Head
Ph.D., Purdue University
Animal housing systems, ventilation, odor control, air quality, biofiltration

Morey, R. Vance, Professor
Ph.D., Purdue University
Biomass densification, biomass for electricity and process heat at ethanol plants, post-harvest technology

Nieber, John, P.E., Professor
Ph.D., Cornell University
Watershed hydrology, biochemistry of watersheds, wetland hydrology, engineering of water resources quality and quantity, flow and transport in geological media and biological systems

Ruan, Roger, Professor
Ph.D., University of Illinois
Food engineering, value-added processing, biorefining, renewable energy, MRI (magnetic resonance imaging) and NMR (nuclear magnetic resonance) applications, non-thermal plasma

Sands, Gary, Associate Professor and Extension Engineer
Ph.D., Colorado State University
Hydrology, water quality, water resources conservation and management

Shutske, John, Professor and Extension Agricultural Safety Specialist
Ph.D., Purdue University
Safe design of products and production systems, homeland security risk assessment and communication, worker/public health impacts from technology/demographic change in biological industries

Wilcke, William, P.E. (Iowa), Professor and Extension Engineer
Ph.D., Iowa State University
Post-harvest technology, sustainable agriculture, agricultural energy sources

Wilson, Bruce, P.E. (Oklahoma), Professor
Ph.D., University of Kentucky
Hydrologic/water quality modeling, transport of surface water contaminants

Wright, Jerry, P.E., Associate Professor and Extension Engineer
M.S., North Dakota State University
Irrigation design, irrigation water management, drainage, ground water quality

Zhu, Jun, Associate Professor and Extension Engineer
Ph.D., University of Illinois
Animal waste management and treatment techniques, manure odor control, nutrient recycling, renewable energy

Entomology

Andow, David A., Professor
Ph.D., Cornell University
Insect ecology, evolution, conservation biology

Ascerno, Mark E., Professor and Department Head
Ph.D., Pennsylvania State University
Floricultural entomology, greenhouse biological control

Brooks-Wallace, Marion, Professor Emeritus
Ph.D., University of Minnesota
Insect physiology

Cutkomp, Laurence, K., Professor Emeritus
Ph.D., Cornell University
Insect toxicology

Fallon, Ann M., Professor
Ph.D., Queen's University
Molecular biology of insects, mosquito cell culture and reproduction

Ferrington, Leonard C., Professor
Ph.D., University of Pittsburgh
Aquatic entomology

Harein, Phillip K., Professor Emeritus
Ph.D., Kansas State University
Stored product entomology

Heimpel, George E., Associate Professor
Ph.D., University of California
Biological control, behavioral and evolutionary ecology

§ Holzenthal, Ralph W., Professor
Ph.D., Clemson University
Systematics, cladistics, Trichoptera

Hutchison, William D., Professor
Ph.D., University of Wisconsin, Madison
Integrated pest management for vegetable crops

Kells, Stephen A., Assistant Professor
Ph.D., Purdue University
Urban and industrial entomology

Krischik, Vera A., Associate Professor
Ph.D., University of Maryland
Integrated pest management, ornamentals, plant resistance, biological control

Kurtji, Timothy J., Professor
Ph.D., University of Minnesota
Insect microbiology and physiology

MacRae, Ian V., Associate Professor
Ph.D., Oregon State University
Integrated pest management (IPM) of field crops, site-specific IPM

Mesce, Karen A., Professor
Ph.D., University of Oregon
Neurobiology, behavior and neurohormones in arthropods and annelids

Moon, Roger D., Professor
Ph.D., University of California, Davis
Veterinary entomology, biological control, sampling

Ostlie, Kenneth R., Professor
Ph.D., Iowa State University
Corn and soybean integrated pest management

Peterson, Allan G., Professor Emeritus
Ph.D., University of Minnesota
Economic entomology

Price, Roger D., Professor Emeritus
Ph.D., University of Kansas
Systematics

Radcliffe, Edward B., Professor
Ph.D., University of Wisconsin, Madison
Integrated pest management: potato and alfalfa

Ragsdale, David W., Professor
Ph.D., Louisiana State University
Integrated pest management and biological control of insect

§ Spivak, Marla S., Associate Professor
Ph.D., University of Kansas
Apiculture and social insects

Weller, Susan J., Associate Professor
Ph.D., University of Texas
Systematics of Lepidoptera using molecular and morphological approaches

Fisheries, Wildlife, and Conservation Biology

Adelman, Ira R., Professor
Ph.D., University of Minnesota
Fisheries management, physiology, aquaculture

Andersen, David E., Associate Professor
Ph.D., University of Wisconsin, Madison
Avian ecology and conservation

Arnold, Todd W., Assistant Professor
Ph.D., University of Western Ontario
Ecology and management of prairie ducks, population modeling

Blair, Robert B., Assistant Professor
Ph.D., Stanford University
Peri-urban wildlife, avian conservation, land use, habitat fragmentation, environmental education

Cohen, Yosef, Professor
Ph.D., University of California, Berkeley
Populations, mathematical ecology, ecosystem conservation

Cooper, James A., Associate Professor Emeritus
Ph.D., University of Massachusetts
Waterfowl and wetland ecology

Cuthbert, Francesca J., Professor
Ph.D., University of Minnesota
Conservation and biology of birds, endangered species conservation

Fulton, David C., Assistant Professor
Ph.D., Colorado State University
Human dimensions of biological conservation

Gutierrez, R. J., Professor
Ph.D., University of California, Berkeley
Game bird ecology, endangered species conservation, habitat ecology, sustainable wildlife management strategies

Jordan, Peter A., Associate Professor Emeritus
Ph.D., University of California, Berkeley
Ecology and management of mammalian herbivores

Kapuscinski, Anne R., Professor
Ph.D., Oregon State University
Fisheries genetics, aquatic biotechnology assessment

Loegering, John, Associate Professor, Crookston
Ph.D., Oregon State University
Avian ecology, wildlife-habitat relationships, quantitative ecology

Nelson, Kristen C., Assistant Professor
Ph.D., University of Michigan
Human dimensions of natural resources, environmental management

Newman, Raymond M., Associate Professor
Ph.D., University of Minnesota
Aquatic ecology and fisheries management

Oberhauser, Karen S., Assistant Professor
Invertebrate conservation and ecology with particular interest in Monarch butterflies, citizen science and ecological monitoring

*** Perry, James, Professor**
Ph.D., Idaho State University
Water quality, applied aquatic ecology, environmental management

Simons, Andrew M., Assistant Professor
Ph.D., University of Alabama, Tuscaloosa
North American freshwater fish systematics

Smith, James L. D., Professor
Ph.D., University of Minnesota
Biology and conservation of Asian mammals

Sorensen, Peter W., Professor
Ph.D., University of Rhode Island
Fish behavior, physiology and chemoreception

Spangler, George R., Professor
Ph.D., University of Toronto
Population dynamics of fish, native American resource management

Vondracek, Bruce C., Adjunct Professor
Ph.D., University of California, Davis
Stream ecology and restoration

Food Science and Nutrition

Brady, Linda J., Professor
Ph.D., Michigan State University
Culture and health and cross-cultural engagement, role of culture in teaching and learning

Chen, Xiaoli, Assistant Professor and General Mills Chair in Genomics for Healthful Foods
Ph.D., University of Georgia
Obesity and insulin resistance and type 2 diabetes

Croll, Jillian, Lecturer and Adjunct Assistant Professor
Ph.D., University of Minnesota
Nutrition and eating disorders

Csallany, A. Saari, Professor
D.Sc., University of Technical Science; Budapest, Hungary
Lipid chemistry, nutritional biochemistry, free radicals, oxidative degradation

Diez-Gonzalez, Francisco, Associate Professor
Ph.D., Cornell University
Food safety, food-borne pathogens and bacterial detection methods

Earthman, Carrie P., Assistant Professor
Ph.D., University of Arizona
Clinical nutrition, medical nutrition therapy and energy metabolism and body composition

Feirtag, Joellen M., Associate Professor
Ph.D., University of Minnesota
Food safety education/HACCP, rapid assays detection development, prebiotic/probiotic physiology

Gallaher, Daniel D., Professor
Ph.D., University of California, Davis
Dietary influences (whole grains, cruciferous vegetables and fats) and colon cancer relationships, whole grains and diabetes

Hassel, Craig A., Associate Professor
Ph.D., University of Arizona
Cross cultural engagement with underserved audiences having their own knowledge of food and health that does not correspond to scientific understanding

§ Kurzer, Mindy S., Professor
Ph.D., University of California, Berkeley
Dietary regulation of sex hormones, plant estrogen (phytoestrogen) exposure and effects, diet and cancer

***§ Labuza, Theodore P. Professor**
Ph.D., Massachusetts Institute of Technology
Physical chemistry of foods as related to water activity, glass transition and stability, shelf life prediction models and kinetics of food deterioration

Marquart, Leonard F., Assistant Professor
Ph.D., University of North Carolina
Whole grains and health, consumer understanding and factors influencing dietary intake of whole grain foods

Mashek, Douglas G., Assistant Professor
Ph.D., University of Wisconsin-Madison
Fatty acid metabolism

*** McKay, Larry L., Professor**
Ph.D., Oregon State University
Food fermentations/genetics/biotechnology of lactic acid bacteria

Metzger, Lloyd E., Associate Professor and MN-SD Dairy Center and Pilot Plant Director
Ph.D., Cornell University
Evaluation of cheese functionality and manufacturing parameters

Orchard, Elizabeth, R.D., Assistant Program Director
M.A., University of St. Thomas
Dietetic education, nutrition, women's health

O'Sullivan, Daniel J., Associate Professor
Ph.D., University of College Cork, Ireland
Molecular fingerprinting and genetic characterization of lactic acid bacteria, expression and regulation of bacteriophage resistance

Peterson, Carolyn M., Assistant Clinical Specialist
M.S., University of Minnesota
Dietetic education, sports nutrition

Peterson, Kerry D., Lecturer
Ph.D., University of Minnesota
Lipid metabolism, energy balance and regulation of food intake

Peterson, Sabrina, Assistant Professor
Ph.D., University of Washington
Food and cancer, particularly related to cruciferous and apiaceous (carrot family) plants

Reicks, Marla M., Professor
Ph.D., Iowa State University
Nutrition education and programming for limited resource audiences, application of behavior change theory to improve eating patterns

Reineccius, Gary A., Professor
Ph.D., Pennsylvania State University
Food chemistry and food flavors, including analytical instrumentation and processing variables

Slavin, Joanne L., Professor
Ph.D., University of Wisconsin
Human feeding studies, including dietary fiber, carbohydrates, and whole grains; measurement of biological markers relevant to disease prevention; nutrition and exercise; diet and cancer

Smith, Chery F., Associate Professor
Ph.D., Indiana University
Domestic and international community nutrition, population biology issues

§ Smith, David E., Professor
Ph.D., University of Wisconsin
Dairy and food technology, effects of new technology/ingredients on dairy products

Splett, Patricia L., Lecturer
Ph.D., University of Minnesota
Nutrition education, program evaluation and outcomes

Vickers, Zata M., Professor
Ph.D., Cornell University
Food pleasantness and acceptability, factors influencing judgments of food acceptability, sensory specific satiety, odor mixture perception

Forest Resources

Alm, Alvin A., Professor Emeritus
Ph.D., University of Minnesota
Silviculture, reforestation

§ Anderson, Dorothy H., Professor
Ph.D., Colorado State University
Recreation resources management and policy analysis

Anderson, William H., Adjunct Faculty
Ph.D., University of Michigan
Remote sensing

Ascerno, Mark E., Jr., Adjunct Faculty
Ph.D., Pennsylvania State University
Forest entomology: forest and urban pest control

Bauer, Marvin E., Professor
Ph.D., University of Illinois
Remote sensing of soils, crops and forests

- Baughman, Melvin J., Professor and Assistant Dean**
Ph.D., University of Minnesota
Policy, taxation, economics and management
- Becker, Dennis R., Assistant Professor**
Ph.D., University of Idaho
Natural resources policy

Ph.D., University of Michigan
Silviculture and regeneration ecology
- Zenner, Eric K., Assistant Professor**
Ph.D., Oregon State University
Silviculture

Horticultural Science

- Anderson, Neil O., Associate Professor**
Ph.D., University of Minnesota
Floriculture breeding and genetics
- Ascher, Peter D., Professor Emeritus**
Ph.D., University of Wisconsin, Madison
Genetics/floriculture
- Brown, Deborah L., Professor Emeritus**
M.S., University of Minnesota
Consumer horticulture, communications
- Carter, John V., Professor Emeritus**
Ph.D., Purdue University
Environmental stress
- Cline, Van W., Adjunct Associate Professor**
Ph.D., University of Minnesota
Turfgrass science
- Cohen, Jerry D., Professor and Bailey Chair**
Ph.D., Michigan State University
Plant biochemistry, cellular and molecular biology
- Davis, David W., Professor Emeritus**
Ph.D., Oregon State University
Vegetable breeding
- Desborough, Sharon, Professor Emeritus**
Ph.D., University of Wisconsin
Genetics
- Eisel, Mervin, Associate Professor Emeritus**
M.Ed., University of Minnesota
Extension education—horticulture/oramentals
- Erwin, John E., Associate Professor**
Ph.D., Michigan State University
Floriculture
- Fritz, Vincent, Professor**
Ph.D., Michigan State University
Vegetable physiology
- § Galatowitsch, Susan M., Associate Professor**
Ph.D., Iowa State University
Landscape ecology

Gardner, Gary M., Professor

Ph.D., Harvard University
Growth regulation, plant hormones, photomorphogenesis

Gillman, Jeffrey H., Associate Professor

Ph.D., University of Georgia
Nursery management

Hackett, Wesley P., Professor Emeritus

Ph.D., University of California, Davis
Ornamental horticulture—plant physiology

Hertz, Leonard B., Professor Emeritus

Ph.D., University of Wisconsin
Weed control, vegetable and fruit crops

Hokanson, Stan C., Assistant Professor

Ph.D., Michigan State University
Woody landscape plant breeding, stress physiology

*** Hoover, Emily E., Professor**

Ph.D., University of Minnesota
Fruit science, director of educational programs, Minnesota Landscape Arboretum

Horgan, Brian, Assistant Professor

Ph.D., University of Illinois
Turf

Lauer, Florian, Professor Emeritus

Ph.D., University of Minnesota
Potato breeding and genetics

Li, Pen Hsiang, Professor Emeritus

Ph.D., Oregon State University
Environmental stress physiology and plant hardiness

Luby, James J., Professor

Ph.D., University of Minnesota
Fruit breeding and genetics

Markhart, Albert H., Professor

Ph.D., Duke University
Environmental physiology

McKinnon, Jane P., Professor Emeritus

M.S., University of Minnesota
Extension horticulture

Meyer, Mary Hockenberry, Associate Professor and Director, Master Gardener Program

Ph.D., University of Minnesota
Environmental horticulture

Michaels, Thomas E., Professor and Department Head

Ph.D., University of Wisconsin
Plant breeding, plant genetics

Mullin, Robert, Professor Emeritus

Ph.D., University of Minnesota
Ornamentals

Munson, Shirley T., Professor Emeritus

M.S., University of Minnesota
Horticultural food quality evaluation

Olin, Peter J., Professor

M.L.A., University of Massachusetts
Director of Minnesota Landscape Arboretum

§ Pedersen, Bradley W., Professor

M.Ed., University of Minnesota
Turf, landscape design

Pellett, Harold M., Professor Emeritus

Ph.D., Iowa State University
Woody landscape, plant breeding

Rosen, Carl J., Professor

Ph.D., University of California, Davis
Soil fertility, plant nutrition

Smith, Alan G., Associate Professor

Ph.D., University of Florida
Molecular biology of plant development

Sowokinos, Joseph R., Professor

Ph.D., University of North Dakota
Potato physiology, carbohydrate metabolism

Stadelmann, Edward J., Professor Emeritus

Ph.D., University of Innsbruck
Plant physiology

Swanson, Bert T., Professor Emeritus

Ph.D., University of Minnesota
Nursery management

Thill, Christian A., Associate Professor

Ph.D., University of Wisconsin, Madison
Potato breeding and genetics

Tong, Cindy B. S., Associate Professor

Ph.D., University of California
Postharvest physiology

Watkins, Eric, Assistant Professor

Ph.D., Rutgers University
Turfgrass breeding

White, Donald B., Professor Emeritus

Ph.D., Iowa State University
Turf breeding, physiology, hardiness, and nutrition

Wildung, David K., Professor

Ph.D., University of Minnesota
Physiology of fruits, vegetables, and potatoes

Wilkins, Harold F., Professor Emeritus

Ph.D., University of Illinois
Floriculture physiology

Zins, Michael E., Associate Professor Emeritus

M.S., University of Minnesota
Extension horticulture, woody landscape plants

Plant Pathology

Anderson, Neil A., Professor Emeritus

Ph.D., University of Minnesota
Genetics of plant pathogens

Bantari, Ernest E., Professor Emeritus

Ph.D., University of Minnesota
Virus, mycoplasma diseases: potato and small grain diseases

Blanchette, Robert A., Professor

Ph.D., Washington State University
Forest pathology, deterioration of wood products

Braden, James, Assistant Professor

Ph.D., University of Wisconsin, Madison
Potato diseases

Borlaug, Norman E., Professor Emeritus

Ph.D., University of Minnesota
1970 Nobel Peace Prize for the “Green Revolution”

Carson, Martin, Professor

Ph.D., University of Illinois
Cereal disease

Chen, Senyu, Associate Professor

Ph.D., University of Florida
Soybean cyst nematode control

Dill-Macky, Ruth, Associate Professor

Ph.D., University of Queensland
Small grains pathology

Herzfeld, Dean E., Associate Professor and Extension Educator

M.S., University of Minnesota
Chemical control, pesticide application training

Hollingsworth, Charla, Assistant Professor

Ph.D., University of Wyoming
Small grains plant pathology

Jin, Yue, Associate Professor

Ph.D., North Dakota State University
Soybean disease diagnosis and management

Juzwick, Jennifer, Assistant Professor

Ph.D., University of Minnesota
Oak wilt, forest tree nursery diseases

Kinkel, Linda L., Professor

Ph.D., University of Wisconsin, Madison
Epidemiology and microbial ecology

Kistler, H. Corby, Professor

Ph.D., Cornell University
Fungal pathogen genetics

Kolmer, James, Professor

Ph.D., University of North Carolina
Cereal rust fungi, genetics of rust resistance in cereals

Kommedahl, Thor, Professor Emeritus

Ph.D., University of Minnesota
Biological control of root diseases, diseases of maize

Krupa, Sagar V., Professor

Ph.D., Uppsala University
Effects of air pollutants and global climate change on plants

Kurle, James E., Assistant Professor

Ph.D., University of Minnesota
Fungal diseases of plants

Larsen, Philip O., Professor

Ph.D., University of Arizona
Research administration

Leonard, Kurt J., Professor Emeritus

Ph.D., Cornell University
Epidemiology of cereal rust diseases

Lockhart, Benham E., Professor

Ph.D., University of California
Virus diseases, diagnostic technology

MacDonald, David H., Professor

Ph.D., Cornell University
Plant parasitic nematodes

Malvick, Dean, Assistant Professor

Ph.D., University of Minnesota
Soybean pathology

Percich, James A., Professor

Ph.D., Michigan State University
Plant disease management: wild rice and vegetables

Roelfs, Alan P., Professor Emeritus

Ph.D., University of Minnesota
Rusts of cereals, physiologic specialization

Samac, Deborah A., Professor

Ph.D., University of Wisconsin, Madison
Molecular biology of host-parasite interactions

Steffenson, Brian, Professor

Ph.D., University of California, Davis
Cereal disease research

Szabo, Les J., Associate Professor

Ph.D., Oregon State University
Molecular genetics of rust fungi

Windels, Carol E., Professor

Ph.D., University of Minnesota
Field crop diseases

Young, Nevin Dale, Professor

Ph.D., Yale University
Molecular genetics of plant disease resistance

Zeyen, Richard J., Professor

Ph.D., University of Minnesota
Physiological and molecular control of disease resistance

Rhetoric

Becker, Sandra, Teaching Specialist

M.A., Pennsylvania State University
Workplace writing, corporate video

Berkenkotter, Carol A., Professor

Ph.D., University of Iowa
Genre theory, rhetoric of science, qualitative research methodology

Bennett, J. Michael, Professor Emeritus

M.A.E., University of Florida
Reading and communication

§ Breuch, Lee-Ann Kastman, Associate Professor

Ph.D., Iowa State University
Technical communication programs, computer pedagogy, writing instruction

Connolly, James E., Professor Emeritus

Ph.D., University of Minnesota
Speech and managerial communication

Dotts, Douglas P., Teaching Specialist

M.A., Colorado State; M.F.A., Hamline University

Duin, Ann Hill, Professor

Ph.D., University of Minnesota
Distance learning, partnerships

Ferguson, Richard W., Professor Emeritus

Ph.D., University of Minnesota
American studies, technical writing

Gore, Warren Y., Professor Emeritus

M.A., University of Iowa
Speech and small group decision making

Graff, Richard J., Associate Professor

Ph.D., Northwestern University
Rhetorical theory and practice, rhetorical criticism, classical rhetoric

Gross, Alan G., Professor

Ph.D., Princeton University
Rhetoric of science, scientific controversy, history of scientific article

Gurak, Laura J., Professor and Department Head

Ph.D., Rensselaer Polytechnic Institute
Rhetorics of science and technology, internet studies, intellectual property

Holloway, James R., Professor Emeritus

D.D., Sioux Falls College
Speech

Horberg, Richard O., Professor Emeritus

Ph.D., University of Minnesota
Creative writing

Horvath, Barb, Teaching Specialist and Assistant Director, Undergraduate Major

M.S., University of Minnesota
Instructional design and online course development

Logie, John, Assistant Professor

Ph.D., Pennsylvania State University
Rhetoric of electronic media, intellectual property, computer-mediated communication

Longo, Bernadette C., Associate Professor

Ph.D., Rensselaer Polytechnic Institute
Cultural histories of technical communication, computer-assisted pedagogy

§ Marchand, William M., Professor

Ph.D., University of Minnesota
History of ideas, conflict between science and religion

McDowell, Earl E., Professor

Ph.D., University of Nebraska, Lincoln
Technical communication apprehension, technical communication, employment cycle interviewing

Mikelonis Victoria M., Professor
Ph.D., Indiana University of Pennsylvania
Intercultural communication, design of intercultural training materials

Nichols, Capper E., Lecturer
Ph.D., University of Minnesota
Nature literature; representations of wildlife; environmental history; Western American literature and history; cultures of technology; postmodern literature; professional writing; creative nonfiction; travel writing

§ Pearsall, Thomas E., Professor Emeritus
Ph.D., University of Denver
Technical communication

§ Philippon, Daniel J., Associate Professor
Ph.D., University of Virginia
Environmental rhetoric, history and ethics, nature writing

Savage, Edward B., Professor Emeritus
Ph.D., University of Minnesota
Literature/English

*** § Scanlan, Thomas M., Associate Professor Emeritus**
Ph.D., University of Minnesota
Landscape as index to cultural values, the prairie in American life

Schuelke, L. David, Professor Emeritus
Ph.D., Purdue University
Organizational communication

Schuster, Mary Lay, Professor
Ph.D., University of New Mexico
Rhetoric of midwifery, gender and technical communication

Wahlstrom, Billie J., Professor
Ph.D., University of Michigan
Design of distance learning materials, media selection

§ Walzer, Arthur E., Professor
Ph.D., University of Minnesota
Rhetorical theory and criticism, 18th-century rhetorical theory

Wharton, W. Keith, Professor Emeritus
Ph.D., Colorado State University
Managerial communication

Wright, Eugene S., Professor Emeritus
Ph.D., University of Minnesota
Technical writing

Soil, Water, and Climate

Allan, Deborah L., Professor
Ph.D., University of California, Riverside
Soil organic matter, soil quality, roots and rhizosphere processes

Anderson, James L., Professor
Ph.D., University of Wisconsin, Madison
Sewage treatment, water quality, soil survey, soil classification

Baker, Donald G., Professor Emeritus
Ph.D., University of Minnesota
Climatology

§ Bell, James C., Professor
Ph.D., Pennsylvania State University
Soil classification/survey, landscape analysis, soil morphology/genesis

Bloom, Paul R., Professor
Ph.D., Cornell University
Soil chemistry, environmental chemistry

Cheng, H. H., Professor Emeritus
Ph.D., University of Illinois
Soil biochemistry

*** Cooper, Terence H., Professor**
Ph.D., Michigan State University
Soil classification, soil morphology, environmental education

Graham, Peter H., Professor
Ph.D., University of West Australia
Soil biology/microbiology, microbial ecology

Griffis, Timothy J., Assistant Professor
Ph.D., McMaster University, Canada
Land-atmosphere interactions via flux measurements and stable isotope techniques, atmospheric science/biometeorology

Grigal, David F., Professor Emeritus
Ph.D., University of Minnesota
Forest vegetation, air pollutants, forest ecosystems, nutrients

Gupta, Satish Chander, Professor
Ph.D., Utah State University
Soil physics and landscape hydrology, contaminant transport and water quality, antibiotics in the environment, soil structure and unsaturated soil mechanics, waste and manure management

Halbach, Thomas R., Professor
M.S., University of Wisconsin, Madison
Waste management, remediation and water quality

King, Jennifer, Assistant Professor
Ph.D., University of California, Irvine
Biogeochemistry, biosphere-atmosphere interactions, carbon cycling, earth system science

Lamb, John A., Professor
Ph.D., University of Nebraska, Lincoln
Agricultural production management systems, soil properties, soil fertility/management

Larson, William E., Professor Emeritus
Ph.D., Iowa State University

Malzer, Gary L., Professor
Ph.D., Purdue University
Nitrogen, precision agriculture, water quality, soil chemistry/fertility

Molina, Jean A., Professor
Ph.D., Cornell University
Carbon and nitrogen transformations in soil, soil microbiology

Moncrief, John F., Professor
Ph.D., University of Wisconsin, Madison
Soil management, water quality

Mulla, David J., Professor and Endowed Chair for Soil and Water Resources
Ph.D., Purdue University
Water quality, soil physics, watershed management, precision agriculture

Munter, Robert C., Associate Professor Emeritus
M.S., University of Minnesota

§ Nater, Edward A., Professor and Department Head
Ph.D., University of California, Davis
Soil genesis/clay mineralogy

Randall, Gyles, Professor
Ph.D., University of Wisconsin, Madison
Soil fertility/management, water quality

Rehm, George W., Professor
Ph.D., University of Minnesota
Soil fertility, fertilizer management, water quality

Rosen, Carl J., Professor
Ph.D., University of California
Soil fertility/plant nutrition, horticultural crops

Rust, Richard H., Professor Emeritus
Ph.D., University of Illinois

Sadowsky, Michael J., Professor
Ph.D., University of Hawaii, Manoa
Environmental microbiology, water quality, biodegradation, nitrogen fixation, molecular biology

Schmitt, Michael A., Professor
Ph.D., University of Illinois
Soil fertility management, crop production

Seeley, Mark W., Professor
Ph.D., University of Nebraska, Lincoln
Climatology

Sims, Albert L., Associate Professor
Ph.D., North Carolina State University
Soil management/fertility

Strock, Jeffrey S., Associate Professor
Ph.D., North Carolina State University
Soil and water management and conservation, water quality, nitrogen

Wang, Dong, Assistant Professor
Ph.D., University of Wisconsin, Madison
Soil environmental physics/biophysics

Zanner, C. William, Assistant Professor
Ph.D., University of Minnesota
Soil genesis, forest soils, soils geomorphology

College of Liberal Arts (CLA)

Administration

Political science

Mayes, Keith, Assistant Professor
Ph.D., Princeton University
African American history

Mohammed, Sidow, Lecturer
Ph.D., Omdurman Islamic University, Sudan
Arabic language

Pate, Alex, Visiting Assistant Professor
B.A., Temple University
Journalism, political science

Pike, Charles, Assistant Professor Emeritus
Ph.D., University of Wisconsin, Madison
African language and literature

Williams, Yolanda, Teaching Specialist
M.A. University of Minnesota
Music

Wright, John, Associate Professor
Ph.D., University of Minnesota
Afro-American literature

American Indian Studies

Albers, Patricia, Professor
Ph.D., University of Wisconsin
Anthropology, ethnohistory

Child, Brenda, Associate Professor
Ph.D., Iowa State University
History, American Indian boarding schools, multiculturalism

Martinez, David, Assistant Professor
Ph.D., SUNY at Stony Brook, New York
Philosophy and American Indian religions

*** Miller, Carol, Associate Professor**
Ph.D., University of Oklahoma
American Indian women's narratives, intercultural studies, American literatures

Nichols, John, Professor
Ph.D., Harvard University
American Indian language planning, oral literature and folklore, ethno history and traditional arts, anthropological linguistics, sociolinguistics, general linguistics, indigenous languages of North America

O'Brien-Kehoe, Jean, Associate Professor
Ph.D., University of Chicago
Indians of the Northeast, U.S. colonial history

Wilkins, David, Professor
Ph.D., University of North Carolina, Chapel Hill
American Indian sovereignty, tribal government, comparative politics

American Studies

Castellanos, Bianet, Assistant Professor
Ph.D., University of Michigan
Indigenous communities and cultures, migration, colonialization, Chicano/a studies, Latin America, global capitalism

§ Child, Brenda, Associate Professor
Ph.D., Iowa State University
American Indian history, history of Indian education, Great Lakes Indian communities

Delattre, Roland, Professor Emeritus

Ph.D., Yale University
Religion and ethics

Fajardo, Kale Bantigue, Assistant Professor

Ph.D., University of California, Santa Cruz
Globalization and Filipino/a diaspora, Filipino/a migration and immigration to the Americas, maritime cultures and history, Philippine nationalisms, colonialism

Ferguson, Roderick, Assistant Professor

Ph.D., University of California, San Diego
Social theory, race, sexuality, gender

Karjane, David, Visiting Assistant Professor

Ph.D., University of Michigan
Political economy, international labor migration, health inequalities, critical theory

§ May, Elaine Tyler, Professor

Ph.D., University of California, Los Angeles
History, women and family

*** May, Lary, Professor**

Ph.D., University of California, Los Angeles
Post-World War II American history, popular culture

§ * Miller, Carol, Associate Professor

Ph.D., University of Oklahoma
American literatures, American Indian women's narratives, intercultural studies

*** Noble, David, Professor**

Ph.D., University of Wisconsin, Madison
History, literature and language, philosophy and religion

Pierce, Jennifer, Associate Professor

Ph.D., University of California, Berkeley
Gender, contemporary labor studies

§ Prell, Riv-Ellen, Professor

Ph.D., University of Chicago
Anthropology of American Jews and Judaism, ethnicity and gender

Yates, Gayle Graham, Professor Emeritus

Ph.D., University of Minnesota
American women's literature and cultures of the 20th century; contemporary American religions

Anthropology

Berdahl, Daphne, Associate Professor

Ph.D., University of Chicago
Sociocultural anthropology, identity, consumption, memory, gender, Europe, United States

Dunnigan, Timothy, Associate Professor Emeritus

Ph.D., University of Arizona
Semantic anthropology, linguistic acculturation, Middle America, North America

Gerlach, Luther, Professor Emeritus

Ph.D., University of London
Natural resources, social movements, political ecology, Africa, United States

Gibbon, Guy, Professor

Ph.D., University of Wisconsin, Madison
North American archaeology, history and theory of archaeology, Midwest

Gudeman, Stephen, Professor

Ph.D., University of Cambridge, England
Social, structural, economic anthropology; Latin America

Ho, Karen, Assistant Professor

Ph.D., Princeton University
Cultural studies of late capitalism, globalization, anthropology of finance, comparative race/ethnicity, United States

Ingham, John M., Professor

Ph.D., University of California, Berkeley
Culture and personality, symbolic anthropology, Middle America

Laden, Greg, Assistant Professor

Ph.D., Harvard University
Human evolution and paleoanthropology, archaeology of Africa, North American prehistoric and historic archaeology

Langford, Jean, Associate Professor

Ph.D., University of Washington
Cultural anthropology, medical anthropology, postcolonial theory, politics of representation

Lipset, David M., Associate Professor

Ph.D., University of California, San Diego
Social and political anthropology, history of anthropology; Melanesia

McLean, Stuart, Assistant Professor

Ph.D., Columbia University
Social and cultural theory, anthropology of modernity, historical anthropology, anthropology of landscape; Ireland, European Union

Miller, Frank, Professor Emeritus

Ph.D., Harvard University
Change, development strategies, applied anthropology, Middle America, North America

***§ Penn, Mischa, Associate Professor**

B.A., University of Minnesota
Philosophical anthropology, culture theory, methodology, history of anthropology

Raheja, Gloria Goodwin, Professor

Ph.D., University of Chicago
Social, cultural; gender, caste; language; colonial discourses; India

Song, Hoon, Assistant Professor

Ph.D., University of Chicago
Biopolitics, convergence, cyberspace, capitalism, modernity, critical theory, psychoanalysis, United States, South Korea

Tappen, Martha, Associate Professor

Ph.D., Harvard University
Paleoanthropology, paleoenvironments, taphonomy and faunal analysis, ethnoarchaeology

Taussig, Karen-Sue, Assistant Professor

Ph.D., Johns Hopkins University
Social-cultural anthropology, science and technology (genetics, biotechnologies), medical anthropology, Europe, United States

Tostevin, Gilbert, Assistant Professor

Ph.D., Harvard University
Paleolithic archaeology, paleoanthropology, prehistoric technology, Old World prehistory, material-culture studies, culture-contact studies

Valentine, David, Assistant Professor

Cultural/linguistic anthropology, gender and sexuality, embodiment, transgenderism; urban United States

Wells, Peter S., Professor

Ph.D., Harvard University
Culture contact, economic behavior, signs and symbols, prehistoric and medieval Europe

Art History

Asher, Catherine, Associate Professor

Ph.D., University of Minnesota
Islamic and South Asian art and culture

Asher, Frederick, Professor

Ph.D., University of Chicago
South Asian sculpture and architecture

Blocker, Jane, Associate Professor

Ph.D., University of North Carolina at Chapel Hill
Contemporary art and theory

*** Cooper, Frederick, Professor**

Ph.D., University of Pennsylvania
Greek art and architecture

Gaudio, Michael, Assistant Professor

Ph.D., Stanford University
Early modern and trans-atlantic art

Marling, Karal Ann, Professor

Ph.D., Bryn Mawr College
American art and popular culture

McNally, Sheila, Professor

Ph.D., Harvard University
Greek and Roman art and archaeology

Poor, Robert, Professor

Ph.D., University of Chicago
East Asian art

Silberman, Robert, Associate Professor

Ph.D., Columbia University
Film studies, history of photography, 20th-century American art

Steyaert, John, Associate Professor

Ph.D., University of Michigan
Northern European art, 14th-16th centuries; late Gothic sculpture

Stoughton, Michael, Associate Professor Emeritus

Ph.D., University of Michigan
European painting, sculpture, and architecture, 17th-18th centuries

Weisberg, Gabriel, Professor

Ph.D., Johns Hopkins University
19th/early 20th-century art, decorative arts, graphic arts

Asian Languages and Literatures

Allen, Joseph, Professor

Ph.D., University of Washington
Chinese literature and culture, Taiwan studies

Anderson, Mark, Assistant Professor

Ph.D., Cornell University
Japanese literature, film studies, gender, postcolonialism, science and technology, Marxism

Marran, Christine L., Assistant Professor

Ph.D., University of Washington
Japanese literature and cultural studies, early Meiji writing, gender and representation in Japanese fiction, Asian film, Japanese popular culture from the 1870s to the present

McGrath, Jason, Assistant Professor

Ph.D., University of Chicago
Modern Chinese literature and film

Molasky, Michael, Associate Professor
Ph.D., University of Chicago
Modern Japanese literature, U.S. occupation era, Okinawa, race, gender, jazz

Morinaga, Maki Isaka, Assistant Professor
Ph.D., University of Pennsylvania
Japanese literature and theater, women's studies and gender studies

Rouzer, Paul, Associate Professor
Ph.D., Harvard University
Chinese literature

Sawhney, Simona, Assistant Professor
Ph.D., University of California, Irvine
South Asian literature, Sanskrit literature, postcolonial literature, critical and literary theory

Chicano Studies

Castellanos, Bianet, Assistant Professor
Ph.D., University of Michigan
Indigenous cultures of the Americas; Chicano/a and Latino/a studies; anthropology of gender, work, migration, consumption, and transnationalism

Martinez, Richard, Assistant Professor
Ph.D., University of California, Los Angeles
Urban planning, sociology, Chicano and Latino studies

Mendoza, Louis, Associate Professor
Ph.D., University of Texas, Austin
Chicano/a literary and cultural studies, U.S. ethnic studies, prison literature, U.S. immigration literature, language and identity, gender studies

Rojas, Guillermo, Associate Professor Emeritus
Ph.D., University of Illinois
Chicano literature

Torres, Eden, Associate Professor
Ph.D., University of Minnesota
Women's studies, Chicano literature, migrant issues, Chicana feminist studies

Classical and Near Eastern Studies

Belfiore, Elizabeth, Professor
Ph.D., University of California, Los Angeles
Greek literature, Greek tragedy, philosophy

Berlin, Andrea, Professor
Ph.D., University of Michigan
Greek, Roman, and Near Eastern archaeology; ancient ceramics

Boustan, Ra'anan, Assistant Professor
Ph.D., Princeton University
Early Jewish mysticism, Jewish-Christian relations in late antiquity

*** Cooper, Frederick, Professor (Department of Art History)**
Ph.D., University of Pennsylvania
Greek, Roman art and archaeology, architecture, folklore

Krevans, Nita, Associate Professor
Ph.D., Princeton University
Hellenistic and Roman literature

Levinson, Bernard, Associate Professor and Berman Family Chair in Jewish Studies and Hebrew Bible
Ph.D., Brandeis University
Bible, ancient Near Eastern law

McNally, Sheila, Professor (Department of Art History)
Ph.D., Harvard University
Greek and Roman art and archaeology

Monroe, Lauren, Assistant Professor
Ph.D., New York University
Hebrew bible, Syro-Palestinian archaeology, ancient Israelite religious and social history

Nappa, Christopher, Associate Professor
Ph.D., University of Virginia
Latin literature, Augustan Rome

§ Nicholson, Oliver, Associate Professor
D.Phil., Oxford University
Late antiquity, later Latin, church history, Byzantium

Olson, S. Douglas, Professor
Ph.D. Bryn Mawr College
Greek poetry

Roetzel, Calvin, Sundet Professor of New Testament and Christian Studies
Ph.D., Duke University
Paul, New Testament

Schneller, Renana S., Education Specialist and Hebrew Language Coordinator
A.B.D., Erlangen-Nuremberg University
Modern Hebrew language and literature, biblical Hebrew, Arabic

Sellew, Philip, Associate Professor
Th.D., Harvard University
New Testament, early church, Greco-Roman religions, Coptic

Sheets, George, Associate Professor
Ph.D., Duke University
Roman literature, historical linguistics, legal theory

Smith, Stephen C., Education Specialist and Latin Language Coordinator
Ph.D., University of Virginia
Latin language, language pedagogy, Augustan Latin literature

von Dassow, Eva, Assistant Professor
Ph.D., New York University
Bible and ancient Near East

Wilcox, Amanda, Assistant Professor
Ph.D., University of Pennsylvania
Roman prose of the late republic and early empire, epistolography, Roman philosophy

Communications Studies

Albert, Rosita, Associate Professor
Ph.D., University of Michigan
Intercultural communication, international relations, cross-cultural methods, health communication

Bormann, Ernest G., Professor Emeritus
Ph.D., University of Iowa
Rhetorical theory, American public address, small group communication

Browne, Donald, Professor
Ph.D., University of Michigan
Comparative international media, media and minorities, historical research methodology

Campbell, Karlyn Kohrs, Professor
Ph.D., University of Minnesota
Rhetorical theory/criticism, women in communication, presidential rhetoric

Greene, Ronald W., Associate Professor
Ph.D., University of Illinois
Rhetorical studies, cultural studies/policy, citizenship philosophy of communication

Hewes, Dean, Professor
Ph.D., Florida State University
Communication theory, small group and organization decision-making

Jensen, J. Vernon, Professor Emeritus
Ph.D., University of Minnesota
British public address, argumentation, ethics, rhetoric in Asia

Jones, Susanne, Assistant Professor
Ph.D., Arizona State University
Interpersonal communication, communication of emotions, communication of social support and comforting

Koerner, Ascan, Associate Professor
Ph.D., University of Wisconsin
Cognitive processes in interpersonal communication, marital and family communication, persuasion

Ouellette, Laurie, Assistant Professor
Ph.D., University of Massachusetts
Media theory, media history, television studies, cultural studies

Rarick, David, Associate Professor Emeritus
Ph.D., The Ohio State University
Communication theory, media ethics, audience analysis, telecommunications media

Rodman, Gilbert B., Associate Professor
Ph.D., University of Illinois
Critical media studies, cultural studies, race and ethnicity, popular culture, communication technologies

Schiappa, Edward, Professor
Ph.D., Northwestern University
Contemporary rhetorical theory, classical rhetoric, public address, argumentation

§ Scott, Robert, Professor Emeritus
Ph.D., University of Illinois
Rhetorical theory, public address criticism, value implications in research

Shapiro, George L., Professor Emeritus
Ph.D., University of Minnesota
Leadership, organizational and interpersonal communication, communication between subcultures

Sheldon, Amy, Professor
Ph.D., University of Texas
First- and second-language acquisition, discourse analysis, gender

Vavrus, Mary, Associate Professor
Ph.D., University of Illinois
Media studies, feminist theory, cultural studies, critical theory

§ Wilson, Kirt, Associate Professor
Ph.D., Northwestern University
Rhetorical theory, rhetoric, U.S. public address, political persuasion

Cultural Studies and Comparative Literature

§ Archer, John, Associate Professor
Ph.D., Harvard University
Architecture, space, cities and suburbia

Bizri, Hisham, Assistant Professor
M.F.A., University of Illinois, Chicago
Filmmaking; modernist cinema, literature, and music; avant-garde cinema; Arabic thought and poetry

Brennan, Timothy, Professor
Ph.D., Columbia University
19th- and 20th-century comparative literature, postcolonial theory, cultural theory, globalization, music

***§ Brown, Robert, Associate Professor**
Ph.D., University of Michigan
Rhetoric, discourse theory, pedagogy, language/culture relations

Casarino, Cesare, Associate Professor
Ph.D., Duke University
Philosophy, queer theory, cinema, literature

Chen, Leo, Instructor
Ph.D., University of California, Los Angeles
Film, television and digital media, comparative cinemas, aesthetics and visual theory

Ganguly, Keya, Associate Professor
Ph.D., University of Illinois, Urbana-Champaign
Critical theory, film, politics and practice of ethnography, sociology of culture

Kotz, Liz, Assistant Professor
Ph.D., Columbia University
Media theory, visual culture, psychoanalysis, modernism and technology

*** Leppert, Richard, Professor**
Ph.D., Indiana University
Music, visual culture, critical theory, aesthetics, history of modernity

Mowitt, John, Professor
Ph.D., University of Wisconsin
History and politics of critical theory, cinema and media studies, music

Pepper, Thomas, Associate Professor
Ph.D., Yale University
Psychoanalytic theory, gender, textual theory, philosophy of language

§ Sarles, Harvey, Professor
Ph.D., University of Chicago
Pragmatism, cultural critique, human nature and experience

Schulte-Sasse, Jochen, Professor
Dr. ph. habil., Ruhr University, Bochum, Germany
Intellectual and cultural history, literary and aesthetic theory, European Romanticism, popular culture, German literature after 1700

Tageldin, Shaden, Assistant Professor
Ph.D., University of California, Berkeley
Comparative literatures in English/Arabic/French, empire and postcolonial studies, translation theory, language politics, ideologies of genre

*** Thomas, Gary, Associate Professor**
Ph.D., Harvard University
Cultural theory, music, gender-sexuality, comic theory, German literature

Economics

Allen, Beth, Professor
Ph.D., University of California, Berkeley
Game theory, economics of information and uncertainty

Arellano, Cristina, Assistant Professor
Ph.D., Duke University
Business cycles in emerging economies

Bassetto, Marco, Assistant Professor
Ph.D., University of Chicago
Macroeconomic theory, applications of game theory to macroeconomics, design and consistency of macroeconomic policy

Boldrin, Michele, Professor
Ph.D., University of Rochester
Development and use of dynamic general equilibrium models

Chari, V. V., Professor and Paul Frenzel Land Grant Chair in Economics
Ph.D., Carnegie Mellon University
Public economics, macroeconomics, industrial organization

Chipman, John S., Regents Professor
Ph.D., Johns Hopkins University
Econometrics, international trade, measurement of economic welfare

De Nardi, Cristina, Assistant Professor
Ph.D., University of Chicago
Macroeconomics, wealth distribution, social security

Eckstein, Zvi, Professor

Ph.D., University of Minnesota
Immigration and transition of immigrants to a new labor market, labor search models, labor market discrimination

Feldman, Roger D., Professor

Ph.D., University of Rochester
Health economics, labor economics, human capital, human resources

Foster, Edward, Professor

Ph.D., Massachusetts Institute of Technology
Public finance, microeconomic theory

Holmes, Tom, Professor and Carlson Chair

Ph.D., Northwestern University
Applied microeconomics, industrial organization

Hurwicz, Leonid, Regents Professor Emeritus

LL.M., Warsaw University
Mathematical economics, economic organization, welfare economics, social choice

Jones, Larry, Professor

Ph.D., University of California, Berkeley
Macroeconomic theory with emphasis on development and growth and public finance

Kehoe, Patrick, Professor

Ph.D., Harvard University
International trade and finance, macroeconomics

Kehoe, Timothy, Distinguished McKnight University Professor

Ph.D., Yale University
Applied general equilibrium modeling, trade theory, public finance

Kocherlakota, Narayana, Professor

Ph.D., University of Chicago
Financial economics, public finance and monetary economics

Kortum, Sam, Professor

Ph.D., Yale University
Industrial organization, international trade, economic growth

Luttmer, Erzo, Associate Professor

Ph.D., University of Chicago
Financial economics, macroeconomics

McLennan, Andrew, Professor

Ph.D., Princeton University
Game theory, mathematical economics, microeconomics

Mohring, Herbert, Professor Emeritus

Ph.D., Massachusetts Institute of Technology
Industrial organization and antitrust, urban economics, resource economics

Richter, Marcel K., Professor

Ph.D., Massachusetts Institute of Technology
Mathematical economics, rational choice theory, general equilibrium theory

Rustichini, Aldo, Professor

Ph.D., University of Minnesota
Decision theory, microeconomic theory, models of bounded rationality, economic dynamics and microeconomic theory

Ruttan, Vernon, Regents Professor Emeritus

Ph.D., University of Chicago
Economics of agricultural development, technical change, research policy

Sahi, Simran, Assistant Professor

Ph.D., University of Pittsburgh
International trade and finance

Schuh, G. Edward, Regents Professor

Ph.D., University of Chicago
Agricultural and food policy, economic development, international trade and exchange rate policy, international financial markets, family policy and population, poverty

Smith, Harlan, Professor Emeritus

Ph.D., University of Chicago
Economic philosophy, economic problems, world order studies

Swan, Craig, Professor

Ph.D., Yale University
Macroeconomics, econometrics, money, banking, housing policy, mortgage markets

Thomas, Julia, Assistant Professor

Ph.D., University of Virginia
Aggregate implications of discrete individual choices, quantitative macroeconomics, stochastic dynamic general equilibrium models

Werner, Jan, Professor

Ph.D., University of Bonn, West Germany
Microeconomic theory, mathematical economics, general equilibrium, financial markets

English

Anderson, Chester, Professor Emeritus

Ph.D., Columbia University
Modern literature in English, Irish literature, literary criticism

Augst, Thomas, Assistant Professor

Ph.D., Harvard University
American literature/culture, history and theory of reading

Bales, Kent, Professor

Ph.D., University of California, Berkeley
American literature, romanticism, literature and the other arts

Brennan, Timothy, Professor

Ph.D., Columbia University
Atlantic cultures, American ethnic literatures, 20th-century literary/cultural theory

Brown, Tony C., Assistant Professor

Ph.D., University of Chicago
18th-century British literature, colonial and postcolonial literature, theory of the novel

§ Browne, Michael Dennis, Professor

M.A., University of Iowa
Creative writing, modern and contemporary poetry and poetics

Ch'ien, Evelyn, Assistant Professor

Ph.D., University of Virginia
Literature after 1945, minority literature, postcolonial theory, English vernaculars

***§ Clayton, Thomas, Professor**

D.Phil., Oxford University
Shakespeare, 17th-century English literature, classical literature, literary criticism

Craig, Siobhan S., Assistant Professor

Ph.D., University of Massachusetts, Amherst
Film spectatorship, feminist theory, queer cinema, fascism and film

Cucullu, Lois, Assistant Professor

Ph.D., Brown University
British modernism, Victorian literature, popular culture and media

Damon, Maria, Associate Professor

Ph.D., Stanford University
Modern poetry, poetics

Elfenbein, Andrew, Professor

Ph.D., Yale University
Romanticism, Victorian literature, intertextuality and influence, gender

Escure, Genevieve, Professor

Ph.D., Indiana University
Sociolinguistics, language universals, linguistic theory, phonology, syntax

Farber, Lianna Hope, Assistant Professor

Ph.D., Harvard University
Medieval literature and culture

Firchow, Peter, Professor

Ph.D., University of Wisconsin
Modern British, American literature; comparative literature; utopian literature

Fitzgerald, M. J., Associate Professor

M.A., York University
Fiction writing, contemporary fiction

Fruman, Norman, Professor Emeritus

Ph.D., New York University
The Romantics, 18th century, literary criticism (antiquity to present)

*** Garner, Shirley, Professor**

Ph.D., Stanford University
Renaissance literature, 16th-century poetry, Shakespeare, autobiography, feminist criticism

§ Geffen, Arthur, Associate Professor Emeritus

Ph.D., University of Chicago
American literature, fiction, poetry, drama, humor, Jewish-American literature

Goldberg, Brian, Assistant Professor

Ph.D., Indiana University
British Romantic literature, 18th-century literature

Gonzalez, Ray, Professor

M.F.A., Southwest Texas State University
Creative writing, Latin American studies, poetry, creative nonfiction

§ Griffin, Edward, Professor

Ph.D., Stanford University
American literature, American studies, American religion, teaching

Haley, David, Professor

Ph.D., Harvard University
Renaissance and Enlightenment poetry, philosophy, drama, politics; the Bible

§ Hampl, Patricia, Professor

M.F.A., University of Iowa
Creative writing, autobiographical writing, contemporary American poetry, fiction

Hancher, Michael, Professor

Ph.D., Yale University
Victorian literature, pragmatics and literature, literary illustration, book history

*** Hirsch, Gordon, Professor**

Ph.D., University of California, Berkeley
Victorian literature, English novel, psychological approaches, critical theory

Ismail, Qadri, Associate Professor

Ph.D., Columbia University
Marxism, nationalism, feminist theory, postcolonial studies, literary theory

*** Kendall, Calvin, Professor Emeritus**

Ph.D., University of California, Berkeley
Old English literature, Middle English literature, medieval Latin

Lee, Josephine, Associate Professor

Ph.D., Princeton University
Modern British, American, world drama; performance theory; Asian-American studies

***§ Leyasmeyer, Archibald, Associate Professor Emeritus**

Ph.D., Princeton University
Drama (especially modern), 18th-century literature, verbal and visual satire

Luke, David, Assistant Professor

Ph.D., State University of New York—Buffalo
Romantic literature (especially Keats), Victorian literature (especially Arnold)

***§ McNaron, Toni, Professor Emeritus**

Ph.D., University of Wisconsin
Shakespeare, Woolf, Dickinson, lesbian poetry, feminist criticism/pedagogy, Milton

Messer-Davidow, Ellen, Professor

Ph.D., University of Cincinnati
Literary/cultural theory, feminist studies, 18th-century literature, academic knowledge-production

Miner, Valerie, Professor

M.J., University of California, Berkeley
Fiction writing, contemporary fiction

Mowitz, John, Professor

Ph.D., University of Wisconsin
Metacriticism, cultural studies and popular practices (film, music, and literature)

Rabinowitz, Paula, Professor

Ph.D., University of Michigan
20th-century American writers, women, minorities, Marxist criticism, feminist criticism

§ Reed, Peter, Professor Emeritus

Ph.D., University of Washington
20th-century British novel, poetry, and drama

Ross, Donald, Professor

Ph.D., University of Michigan
American "Renaissance," theory of novel, computers in writing instruction

Roth, Marty, Professor Emeritus

Ph.D., University of Chicago
19th-century American fiction, popular culture, film, culture and addiction

Scandura, Jani, Associate Professor

Ph.D., University of Michigan
American, British literature; cultural studies; literary, architectural, feminist theory

Scheil, Andrew, Assistant Professor

Ph.D., University of Toronto
Medieval literature and culture

Schumacher, Julie, Associate Professor

M.F.A., Cornell University
Fiction writing, contemporary fiction, novels, short stories

Solotaroff, Robert, Professor Emeritus

Ph.D., University of Chicago
American literature, theory of fiction, modernism

Sprengnether, Madelon, Professor

Ph.D., Yale University
Feminist criticism, Renaissance literature, women writers, creative writing

Stekert, Ellen, Professor Emeritus

Ph.D., University of Pennsylvania
American folksong, lesbian folklore, "disability" folklore, horror genres

***§ Sugnet, Charles, Associate Professor**

Ph.D., University of Virginia
Shakespeare, novels, feminist criticism, American nature writing, Romantic period

Tinsley, Natasha, Assistant Professor
Ph.D., University of California—Berkeley
African diaspora literature and theory,
Caribbean literature and theory, poetry
and poetics

Treuer, David, Assistant Professor
Ph.D., University of Michigan
Native American literature, creative
writing, 20th-century novel

Watkins, John, Professor
Ph.D., Yale University
Medieval and Renaissance literature,
poetics

* **Weinsheimer, Joel, Professor**
Ph.D., Ohio University
Late 18th-century literature (especially
Johnson, Austen), literary theory

* **Wright, John, Associate Professor**
Ph.D., University of Minnesota
American and Afro-American literature,
intellectual history, folklore, orality,
sociology of literature

Wright, Michelle M., Associate Professor
Ph.D., University of Michigan
African diaspora studies, African
American literature and theory

English as a Second Language

Cohen, Andrew, Professor
Ph.D., Stanford University
Applied linguistics, second-language
acquisition

Lazaraton, Anne, Associate Professor
Ph.D., University of California, Los
Angeles
Applied linguistics, discourse analysis

* **§ Tarone, Elaine, Professor**
Ph.D., University of Washington
Applied linguistics, second-language
acquisition

French and Italian

Akehurst, F. R. P., Professor
Ph.D., University of Colorado
Old French language, law, and literature

Brewer, Daniel, Associate Professor
Ph.D., Johns Hopkins University
Early modern French literature and
culture, literary theory

Brewer, Mária, Associate Professor
Ph.D., Yale University
20th-century literature; theater; literary,
cultural theory; gender

Chaouat, Bruno, Associate Professor
Ph.D., Emory University
20th-century French thought and literature

Cherbuliez, Juliette, Associate Professor
Ph.D., University of Pennsylvania,
Philadelphia
17th-century literature and culture

Ferlito, Susanna, Associate Professor
Ph.D., University of California, Los
Angeles
19th-20th century Italian literature and
culture

Kerr, Betsy, Associate Professor
Ph.D., Indiana University
French linguistics, applied linguistics,
pragmatics

Noakes, Susan, Professor
Ph.D., Yale University
Late medieval/early Renaissance French
and Italian literature

Paganini, Maria, Professor
Ph.D., Zurich University, Switzerland
20th-century novel

Preckshot, Judith, Associate Professor
Ph.D., University of California, Irvine
Francophone and 20th-century literature

Robinson, Peter, Associate Professor
Ph.D., University of Pennsylvania
19th-century poetry

Sivert, Eileen, Associate Professor
Ph.D., University of California, Riverside
19th-century narrative, literature of
Quebec, women's studies

Smith, Alan, Assistant Professor
Ph.D., Cornell University
Early modern French and Italian literature

Geography

Adams, John S., Professor Emeritus
Ph.D., University of Minnesota
American cities, regional analysis, Russia
and environs

Barrett, Ward, Professor Emeritus
Ph.D., University of California, Berkeley
Middle America, Oceania, historical
geography

Braun, Bruce W., Associate Professor
Ph.D., University of British Columbia
Society-environment relations; political
ecology; social, cultural theory

Brown, Dwight, Professor
Ph.D., University of Kansas
Physical geography, cartography,
paleoenvironments, water resources,
geographic information science and
systems

§ Gersmehl, Philip, Professor
Ph.D., University of Georgia
Physical geography, education, North
America, geographic information science
and systems

Gidwani, Vinay, Assistant Professor
Ph.D., University of California, Berkeley
Labor geographies, agrarian change,
nature-society relations, politics of
globalization and development

Hart, John, Professor
Ph.D., Northwestern University
Regional geography, North America

Harvey, Francis, Associate Professor
Ph.D., University of Washington
Geographic information science and
systems, GIS implementation in local
government, geographic information
overlay

Henderson, George, Associate Professor
Ph.D., University of California, Berkeley
Social and cultural geography, political
economy of nature, culture and society,
geography and ethics, U.S. geography

Hsu, Mei Ling, Professor Emeritus
Ph.D., University of Wisconsin
East Asia, cartography (design and
automation)

Kipfmüller, Kurt, Assistant Professor
Ph.D., University of Arizona
Physical geography, biogeography, tree-
ring analysis

Klink, Katherine, Associate Professor
Ph.D., University of Delaware
Climate-biosphere interaction, climate
dynamics, quantitative methods

Leitner, Helga, Professor
Ph.D., University of Vienna
Urban and regional development,
international labor migration, Europe

Lukermann, Fred, Professor Emeritus
Ph.D., University of Minnesota
Historical-geographical thought

McMaster, Robert B., Professor
Ph.D., University of Kansas
Cartography and geovisualization,
geographic information science and
systems, quantitative and spatial analysis,
geographic methods

Manson, Steven, Assistant Professor
Ph.D., Clark University
Environmental science, socio-theoretic
frameworks, computational modeling,
geographic information science and
systems

* **Martin, Judith A., Professor**
Ph.D., University of Minnesota
Urban planning, environmental perception

* **Miller, Roger, Associate Professor**
Ph.D., University of California, Berkeley
Urban and historical geography,
geographical methodology and theory

Porter, Philip, Professor Emeritus
Ph.D., University of London
Cartography, Africa, tropical
agrimeteorology and development

Rice, John, Professor Emeritus
Fil. lic., University of Uppsala
Historical geography, Europe (especially
Scandinavian states and Finland)

Saldanha, Arun, Assistant Professor
Ph.D., Open University
Cultural and social geography, the
geography of music

Samatar, Abdi, Professor
Ph.D., University of California, Berkeley
Third World development and regional
planning, East Africa

Schwartzberg, Joseph, Professor Emeritus
Ph.D., University of Wisconsin
South and Southeast Asia, political
geography, historical cartography

Scott, Earl, Professor Emeritus
Ph.D., University of Michigan
Cultural and economic geography, Africa

Sheppard, Eric, Professor
Ph.D., University of Toronto
Economic geography, political economy,
quantitative methods, philosophical
foundations

Shuman, Bryan, Assistant Professor
Ph.D., Brown University
Climatic change and associated
biogeographical dynamics, quaternary
paleoclimates and paleoecology, global
change

Skaggs, Richard, Professor
Ph.D., University of Kansas
Climatology, physical geography, long-
term temperature trends, drought

Squires, Roderick, Associate Professor
Ph.D., University of Durham, England
Public land policy

Till, Karen E., Associate Professor
Ph.D., University of Wisconsin, Madison
Urban, social theory, historic landscapes,
Europe, North America

* **Weil, Connie, Associate Professor**
Ph.D., Columbia University
Medical geography, Latin America

Ziegler, Susy, Assistant Professor
Ph.D., University of Wisconsin, Madison
Biogeography, forest dynamics, human
impacts on vegetation, forest decline in
Central Europe, environmental change,
dendrochronology

German, Scandinavian, and Dutch

Baker, Eric, Assistant Professor
Ph.D., Johns Hopkins University
German enlightenment to romanticism,
aesthetic theory and literature of the
sublime and the comic sublime, theory
of rhetoric

Duroche, Leonard, Associate Professor
Ph.D., Stanford University
Men's studies, literary theory,
phenomenology, children's literature,
romanticism

Firchow, Evelyn Scherabon, Professor
Ph.D., Harvard University
Germanic philology and medieval German
literature

Fullerton, Gerald Lee, Associate Professor
Ph.D., University of Michigan
German and Germanic linguistics

Gailus, Andreas, Associate Professor
Ph.D., Columbia University
18th- to 20th-century literature and
philosophy, psychoanalysis, textual theory

Grimstad, Kaaren, Associate Professor
Ph.D., Harvard University
Old Norse languages/literatures, Icelandic
sagas, Scandinavian mythology, Swedish

Houe, Poul, Professor
Ph.D., Aarhus University, Denmark
Modern Danish and Swedish literature,
European humanism, travel and exile
literature

Hüeser, Rembert, Assistant Professor
Dr. phil., University of Bielefeld
Cultural studies, film studies, literary
criticism

Joeres, Ruth-Ellen Boetcher, Professor
Ph.D., Johns Hopkins University
18th- to 20th-century literature,
comparative feminist theories, women's
history and literature

Liberman, Anatoly, Professor
Dr. phil., University of Leningrad
General linguistics, Germanic philology,
folklore, poetic translation, medieval
literature

**McBride, Patrizia Carollo, Associate
Professor**
Ph.D., Indiana University
20th-century literature, Austrian literature,
literature and philosophy

McCormick, Richard, Professor
Ph.D., University of California, Berkeley
Film studies, 20th-century literature and
culture, feminism and gender studies

Melin, Charlotte, Associate Professor
Ph.D., University of Michigan
Postwar German poetry, German-
American literary relations, second-
language acquisition

Morris, Leslie, Associate Professor
Ph.D., University of Massachusetts,
Amherst
20th-century German and Austrian
literature, poetry, Jewish studies

Parente, James A., Jr., Professor
Ph.D., Yale University
Medieval and early modern German,
Netherlandic and Scandinavian literature
and culture

Schulte-Sasse, Jochen, Professor
Dr. phil., Ruhr University, Bochum,
Germany
Literature 1700-1820, 1885-present;
theory of literature, popular literature

Faculty and Administration

Stockenström, Göran, Professor
Ph.D., Uppsala University, Sweden
Swedish language/literature, modern drama, Scandinavian immigrant culture

Teraoka, Arlene A., Professor
Ph.D., Stanford University
20th-century and minority literature, intellectual history, cultural criticism

Wakefield, Ray, Associate Professor
Ph.D., Indiana University
Second-language acquisition, medieval literature, Dutch

***Ş Weiss, Gerhard, Professor Emeritus**
Ph.D., University of Wisconsin, Madison
17th-, 19th-, and 20th-century literature, German studies

Zagar, Monika, Associate Professor
Ph.D., University of California, Berkeley
Norwegian language and literature, modernism, Scandinavian women writers

Zipes, Jack, Professor
Ph.D., Columbia University
Fairy tales, 20th-century literature; German, women's and Jewish studies

Global Studies

Berdahl, Daphne, Associate Professor
Ph.D., University of Chicago
Anthropology, sociocultural anthropology, identity, consumption, memory, gender, Europe

Boyle, Elizabeth, Associate Professor
Ph.D., Stanford University
Sociology of law, comparative sociology, political sociology, sociology of gender

Broadbent, Jeffrey, Associate Professor
Ph.D., Harvard University
Comparative, political, cultural, and environmental sociologies, social movements, network analysis, macro-meso-micro links, power structures, change processes, complexity, Japan, East Asia

Craddock, Susan, Associate Professor
Ph.D., University of California, Berkeley
Women's studies, geography, critical health geography, political ecologies of disease, medical practices in global perspective

Gidwani, Vinay, Assistant Professor
Ph.D., University of California, Berkeley
Labor geographies, agrarian change, nature-society relations, politics of globalization and development

Goldman, Michael, Associate Professor
Ph.D., University of California, Santa Cruz
Transnational, environmental, development, and political sociology; sociology of knowledge and power; transnational institutions; World Bank; NGO networks

Kaminsky, Amy, Professor
Ph.D., Pennsylvania State University
Women's studies, feminist theory, Latin American literature, gender and nation

Leitner, Helga, Professor
Ph.D., University of Vienna
Geography, urban and regional development, international labor migration, Europe

McLean, Stuart, Assistant Professor
Ph.D., Columbia University
Social and cultural theory, anthropology of modernity, historical anthropology, anthropology of landscape; Ireland, European Union

Raheja, Gloria, Professor
Ph.D., University of Chicago
Anthropology, politics of cultural production, India

Skaria, Ajay, Associate Professor
Ph.D., Trinity College and Gonville and Caius College, Cambridge, U.K.
History, colonialism, nationalism, South Asia

Wolfe, Thomas, Associate Professor
Ph.D., University of Michigan
History, anthropology, Europe/Soviet Union/Russia, 20th century, media, communications, culture

History

Bachrach, Bernard, Professor
Ph.D., University of California, Berkeley
Europe before 1200, medieval military history

Bamford, Paul, Professor Emeritus
Ph.D., Columbia University
Oceanic history, expansion of Europe

Berman, Hyman, Professor Emeritus
Ph.D., Columbia University
American labor and radicalism, 20th century, Minnesota history

Casale, Giancarlo, Assistant Professor
Ph.D., Harvard University
Islamic world, Ottoman Empire

*** Chambers, Clarke, Professor Emeritus**
Ph.D., University of California, Berkeley
American social history, social welfare history

Chambers, Sarah, Associate Professor
Ph.D., University of Wisconsin, Madison
Colonial Latin America, women

Chang, David, Assistant Professor
Ph.D., University of Wisconsin, Madison
Colonial Latin America, women

Clark, Anna, Professor
Ph.D., Rutgers University
Modern European history, British/Irish history, women's history, history of sexuality

Cohen, Gary B., Professor
Ph.D., Princeton University
Austrian studies, Eastern Europe, modern European social history

Deutsch, Tracey, Assistant Professor
Ph.D., University of Wisconsin, Madison
20th-century U.S. political, business, and social history

Evans, John, Professor
Ph.D., McMaster University, Canada
Roman history

Evans, Sara, Regents Professor
Ph.D., University of North Carolina, Chapel Hill
American women's history, family history, social movements

Farah, Caesar, Professor
Ph.D., Princeton University
Modern Near East, Arabic, Islamic history

*** Farmer, Edward, Professor**
Ph.D., Harvard University
Modern Chinese history, comparative early modern history

Fischer, Kirsten, Associate Professor
Ph.D., Duke University
Colonial/revolutionary America, U.S. social and intellectual history

Gabaccia, Donna, Professor
Ph.D., University of Michigan
Italian, American and migration history

Gallia, Andrew, Assistant Professor
Ph.D., University of Pennsylvania
Rome and ancient Mediterranean

Giles-Vernick, Tamara, Associate Professor
Ph.D., Johns Hopkins University
African history, ethno- and environmental history, history of public health

Good, David F., Professor
Ph.D., University of Pennsylvania
European economic history, Hapsburg Empire

*** Green, George, Associate Professor**
Ph.D., Stanford University
American economic and business history, historiography, historical methods

Hakim, Carol, Assistant Professor
D. Phil, Oxford University
Modern Middle East history

Howe, John, Professor Emeritus
Ph.D., Yale University
18th- and 19th-century American political history

§ Isaacman, Allen, Regents Professor
Ph.D., University of Wisconsin
Southern Africa, peasant studies, historical methodology

Isett, Christopher, Associate Professor
Ph.D., University of Los Angeles
Modern Chinese social, economic history

Karras, Ruth, Professor
Ph.D., Yale University
Medieval history, early modern Britain, Viking age

Kelly, Thomas, Professor Emeritus
Ph.D., University of Illinois
Ancient Greece

*** Kieft, David, Associate Professor Emeritus**
Ph.D., University of California, Berkeley
European diplomatic history, German history

Kopf, David, Professor Emeritus
Ph.D., University of Chicago
South and Southeast Asian cultural history, comparative world history

Lee, Erika, Associate Professor
Ph.D., University of California, Berkeley
20th-century United States, Asian-American history, immigration history

§ Lehmberg, Stanford, Professor Emeritus
Ph.D., Cambridge University
Tudor-Stuart England

Lindquist, Malinda Alaine, Assistant Professor
Ph.D., Princeton University
Post-1865 U.S. history, African American history, gender history

Lorcin, Patricia, Associate Professor
Ph.D., Columbia University
Modern Europe

Lower, Michael, Assistant Professor
Ph.D., Cambridge University
Medieval Europe, the crusades, popular religion, the papacy

Marshall, Byron K., Professor Emeritus
Ph.D., Stanford University
Asian history, 19th- and 20th-century Japanese history

***§ May, Elaine Tyler, Professor**
Ph.D., University of California, Los Angeles
American history, American studies, women

*** May, Lary, Professor**
Ph.D., University of California, Los Angeles
American history, American studies

Maynes, Mary Jo, Professor
Ph.D., University of Michigan
Modern European social history, family, women, education, Germany

McCaa, Robert, Professor
Ph.D., University of California, Los Angeles
Modern Latin America, demographic history, quantitative methods

McNamara, Patrick, Assistant Professor
Ph.D., University of Wisconsin, Madison
Colonial/modern Latin America, history of Mexico

Menard, Russell, Professor
Ph.D., University of Iowa
Early American history

Mizuno, Hiromi, Assistant Professor
Ph.D., University of California, Los Angeles
Modern Japan, gender, cultural science and technology

§ Munholland, Kim, Professor Emeritus
Ph.D., Princeton University
Contemporary French social and political history, French imperialism

Murphy, Kevin, Assistant Professor
Ph.D., New York University
U.S. urban, political, intellectual, and cultural history; sexuality; masculinity

Norling, Lisa, Associate Professor
Ph.D., Rutgers University
American social and cultural history, gender, maritime history

O'Brien-Kehoe, Jean M., Associate Professor
Ph.D., University of Chicago
Indians of the Northeast (17th and 18th centuries), colonial America

Phillips, Carla Rahn, Professor
Ph.D., New York University
Early modern Europe (1450–1750), economy and society, Spain

Phillips, William, Professor
Ph.D., New York University
Medieval and early modern Europe, Spain, European expansion

Pilcher, Jeffery, Associate Professor
Ph.D., Texas Christian University
Latin American history, world and food history

Reyerson, Kathryn, Professor
Ph.D., Yale University; Doctorat d'Etat, Montpellier Law School
Medieval Europe; social, economic, and legal history; France

Rudolph, Richard, Professor Emeritus
Ph.D., University of Wisconsin
Russia, central and Eastern Europe

Ruggles, Steven, Professor
Ph.D., University of Pennsylvania
Historical demography, history of family, U.S. social history

§ Samaha, Joel, Professor
Ph.D., Northwestern University
Criminal justice history, criminal law and criminal procedure

Shank, J. B., Assistant Professor
Ph.D., Stanford University
Early modern Europe, France, European intellectual history of science

Skaria, Ajay, Associate Professor
Ph.D., Trinity College, University of
Cambridge
19th- and 20th-century South Asian
history, environmental history

Spear, Allan, Associate Professor Emeritus
Ph.D., Yale University
20th-century U.S. history

***Ş Stavrou, Theofanis, Professor**
Ph.D., Indiana University
Russia, modern Greece, Eastern
Orthodoxy

Taylor, Romeyn, Professor Emeritus
Ph.D., University of Chicago
History of Chinese society, late imperial
Chinese history

Thayer, John, Professor Emeritus
Ph.D., University of Wisconsin
Modern European political-cultural
history, historiography and method

Tracy, James, Professor
Ph.D., Princeton University
Early modern Europe, 16th century, the
Low Countries

Vecoli, Rudolph, Professor Emeritus
Ph.D., University of Wisconsin, Madison
History of American immigration,
ethnicity and pluralism

Wagner, Michele, Assistant Professor
Ph.D., University of Wisconsin, Madison
African history, Great Lakes Africa, East
Africa, human rights, oral history

Waltner, Ann, Professor
Ph.D., University of California, Berkeley
Chinese social history, religion, gender,
fiction, ritual, law

Wang, Liping, Associate Professor
Ph.D., University of California, San Diego
Social and cultural history of nationalist/
communist period in modern China

Weitz, Eric, Professor
Ph.D., Boston University
Early modern and modern Germany,
social/intellectual history, modern Russia/
Soviet Union

Welke, Barbara, Associate Professor
Ph.D., University of Chicago
19th- and 20th-century U.S. legal,
constitutional, and women's history

Wolfe, Thomas, Associate Professor
Ph.D., University of Michigan
Contemporary Russia, history of media,
modernity/postmodernity, anthropology of
complex societies

Wright, William, Professor Emeritus
Ph.D., University of Colorado
Austrian history

Humanities

Kliger, George, Assistant Professor
Ph.D., University of Minnesota
Modern European philosophy,
psychology, literature, art; pre-Muslim
India

Norwood, James, Senior Lecturer
Ph.D., University of California, Berkeley
Generalist in the western humanities
(art, literature, philosophy, history),
French drama, Shakespeare authorship
controversy

Journalism and Mass Communication

Abraham, Linus, Assistant Professor
Ph.D., University of Pennsylvania
Visual media studies; structure,
interpretation, and social functions of
visual media

Brazeal, Donald, Assistant Professor
Ph.D., University of Maryland
News reporting and writing, publications
editing, media development

Carter, Roy, Professor Emeritus
Ph.D., Stanford University
International mass communication, theory
and methodology

Chang, Tsan-Kuo, Associate Professor
Ph.D., University of Texas at Austin
International communication, theory
and methodology, mass communication
diplomacy

Ş Dicken-Garcia, Hazel, Professor
Ph.D., University of Wisconsin, Madison
Mass communication history, news-
editorial

Doyle, Kenneth, Associate Professor
Ph.D., University of Minnesota
Quantitative and qualitative research
methodology, financial psychology, cross-
cultural studies

Eighmey, John, Professor
Ph.D., University of Iowa
Advertising and consumer research,
management and public policy

Faber, Ronald, Professor
Ph.D., University of Wisconsin, Madison
Advertising, mass media effects, political
communication

Fang, Irving, Professor Emeritus
Ph.D., University of California, Los
Angeles
Broadcast journalism, communication
technology, history of photography,
motion pictures

Forde, Kathy, Assistant Professor
Ph.D. University of North Carolina at
Chapel Hill
Media law, journalism history of the
American press, literary or narrative
journalism

*** Gillmor, Donald, Professor Emeritus**
Ph.D., University of Minnesota
Media and constitutional law,
communication agencies as social
institutions

Hansen, Kathleen, Professor
M.A., M.L.S., University of Wisconsin,
Madison
Information access/communication,
sociology of news, bibliographic retrieval

Huh, Jisu, Assistant Professor
Ph.D., University of Georgia, Athens
Advertising effects research, advertising
campaigns, new media advertising and
graphic communication

Jones, Robert, Professor Emeritus
Ph.D., University of Minnesota
Advertising

Kirtley, Jane, Professor
J.D., Vanderbilt University
Media law and ethics, international
communication, constitutional and
administrative law

Lee, Chin Chuan, Professor Emeritus
Ph.D., University of Michigan
International mass communication,
theory and methodology, political
communication

Schwartz, Dona, Associate Professor
Ph.D., University of Pennsylvania
Visual communication, photography,
qualitative approaches to mass
communication

Schwitzer, Gary, Assistant Professor
B.A., Marquette University
Health journalism, health care consumer
decision making, television and radio
news

Southwell, Brian, Assistant Professor
Ph.D., University of Pennsylvania
Strategic communication research,
advertising, health journalism

Sullivan, Daniel, Professor
Ph.D., Yale University
Media strategy, future of media, new
media

Tichenor, Phillip, Professor Emeritus
Ph.D., Stanford University
Theory and methodology, science
journalism, public opinion

**Tims, Albert, Associate Professor and
Director**
Ph.D., University of Wisconsin, Madison
Communication theory/methodology,
public opinion and political
communication

Wackman, Daniel, Professor
Ph.D., University of Wisconsin, Madison
Media management, advertising, theory
and methodology

***Ward, Jean, Professor Emeritus**
Ph.D., University of Minnesota
Sociology of news, neighborhood press,
language and communication

Wells, William, Professor Emeritus
Ph.D., Stanford University
Advertising/marketing, information
management, statistics, consumer
behavior/attitudes

Yzer, Marco, Assistant Professor
Ph.D. University of Groningen,
Netherlands
Behavioral theory, health
communications, evaluation of mass
media communications campaigns
Japanese Language and Linguistics

Szatrowski, Polly, Professor
Ph.D., Cornell University
Ph.D., University of Tsukuba
Japanese language and linguistics

Linguistics

Downing, Bruce, Associate Professor
Ph.D., University of Texas
Syntax, English linguistics, bilingualism

Gundel, Jeanette, Professor
Ph.D., University of Texas
Syntax, semantics, pragmatics, discourse
analysis, language processing

Soh, Hooi Ling, Assistant Professor
Ph.D., Massachusetts Institute of
Technology
Syntactic theory, phonology-syntax
interface, syntax-semantics interface

Stenson, Nancy, Professor
Ph.D., University of California, San Diego
Syntax; Irish, Celtic, and American Indian
languages; applied linguistics

Music

Addo, Akosua, Associate Professor
Ph.D., University of British Columbia
Music education

Anderson, John, Professor
Ed.D., Columbia University
Woodwind coordinator, clarinet, pedagogy
and literature, woodwind ensembles

**Argento, Dominick, Regents Professor
Emeritus**
Ph.D., Eastman School of Music
Composition, orchestration

Artymiw, Lydia, Professor
B.A., Philadelphia College of Performing
Arts
Piano

Ashworth, Thomas, Professor
M.M., North Texas State University
Trombone, euphonium

Baldwin, David, Professor
D.M.A., Yale University
Brass coordinator, trumpet, trumpet
pedagogy, transcription for winds

Billmeyer, Dean, Associate Professor
D.M.A., Eastman School of Music
Organ literature and pedagogy, church
music, advanced keyboard harmony

Bjork, Mark, Associate Professor
B.M., Indiana University
Violin, Suzuki pedagogy

Braginsky, Alex, Professor
D.M.A. (equiv.), Moscow Conservatory
Piano, chamber music

**Bribitzer-Stull, Matthew, Assistant
Professor**
Ph.D., Eastman School of Music
Tonal theory and analysis

Cherlin, Michael, Professor
Ph.D., Yale University
Tonal and post-tonal theory, analysis; text
and music

Damschroder, David, Associate Professor
Ph.D., Yale University
Tonal theory and analysis, history of
music theory

Davis, Immanuel, Assistant Professor
M.M., The Julliard School
Flute, pedagogy and literature, woodwind
ensembles

De Haan, John, Assistant Professor
M.M., University of Nebraska
Voice (tenor), diction

del Santo, Jean, Associate Professor
M.M., Indiana University
Voice (soprano), vocal literature, diction

Diem, Timothy, Assistant Professor
M.M., University of Northern Colorado
Band

Furman, Charles, Associate Professor
Ph.D., Florida State University
Music therapy, music education,
psychology of music

Gast, Michael, Instructor
B.M., The Curtis Institute
Horn

Geers, Douglas, Assistant Professor
D.M.A., Columbia University
Composition, electronic music

Gopinath, Sumanth, Assistant Professor
Ph.D., Yale University
Music theory, music and globalization,
sound art

Grayson, David, Professor
Ph.D., Harvard University
Historical musicology, 19th and 20th
centuries, Debussy studies

Haack, Paul, Professor
Ph.D., University of Wisconsin
Music education, psychology of music

Hamann, Keitha, Associate Professor
Ph.D., University of Miami
Music education

Harness, Kelley, Associate Professor
Ph.D., University of Illinois, Urbana-Champaign
Musicology

Jackson, Donna, Professor
Ph.D., Harvard University
Historical musicology, medieval and Renaissance

Kim, Young Nam, Associate Professor
M.M., Syracuse University
Violin, chamber music, string orchestra

Kirchhoff, Craig, Professor
M.M., University of Wisconsin
Director of bands, conducting

Konkol, Korey, Professor
M.M., New England Conservatory
Viola

Lancaster, Thomas, Professor Emeritus
D.M., Indiana University
Choral conducting

Lausevic, Mirjana, Assistant Professor
Ph.D., Wesleyan University
Ethnomusicology

Lovelace, Timothy, Assistant Professor
D.M.A., SUNY at Stony Brook, New York
Accompanying and coaching

***§ Lubet, Alex, Professor**
Ph.D., University of Iowa
Composition, 20th-century theory, theory pedagogy

Luckhardt, Jerry, Assistant Professor
M.M., University of Michigan
Band, conducting methods

Maurice, Glenda, Professor
M.M., Manhattan School of Music
Voice (mezzo-soprano), vocal literature

Mehaffey, Matthew, Assistant Professor
D.M.A., University of Arizona, Tucson
Choral conducting

Mercer-Taylor, Peter, Assistant Professor
Ph.D., University of California, Berkeley
Musicology

Meza, Fernando, Associate Professor
M.M., University of Michigan
Percussion, percussion literature/techniques/pedagogy

O'Reilly, Sally, Professor
M.M., Indiana University
Violin

Remenikova, Tanya, Professor
D.M.A. (equiv.), Moscow Conservatory
Cello, cello pedagogy, string techniques, chamber ensembles

Romey, Kathy Saltzman, Assistant Professor
D.M.A. (equiv.), Hochschule für Musik (Frankfurt, Germany)
Choral conducting

Rousseau, Eugene, Instructor
Ph.D., University of Iowa
Saxophone

Shaw, Paul, Associate Professor
D.M.A., The Julliard School
Piano, piano ensemble

Shockley, Rebecca, Professor
D.M.A., University of Colorado
Piano, class piano, pedagogy, piano ensembles

Snow, John, Instructor
M.M., Yale University
Oboe

Sorenson, Dean, Instructor and Interim

Director of Jazz Studies
M.M., Eastman School of Music
Jazz combo and ensemble, jazz theory, jazz history

Sutton, Everett, Professor Emeritus
Ph.D., University of Minnesota
Opera theater/workshop

Van, Jeffrey, Instructor
M.F.A., University of Minnesota
Guitar

Walsh, David, Assistant Professor
Performer's Certificate in Theatre Science, University of Toronto
Opera theatre/workshop

Ware, D. Clifton, Professor
D.M., Northwestern University
Voice (tenor), pedagogy

Weller, Lawrence, Associate Professor
M.M., University of Illinois
Voice (baritone), diction, vocal literature

Zahler, Noel, Professor and Director
D.M.A., Columbia University
Composition, electronic music

Zaimont, Judith, Professor Emeritus
M.A., Columbia University
Composition, theory

Philosophy

Bix, Brian, Professor
D.Phil., Oxford University
Legal philosophy, philosophy of language, moral philosophy, political philosophy

Dahl, Norman, Professor Emeritus
Ph.D., University of California, Berkeley
Moral philosophy, ancient philosophy

Eaton, Marcia M., Professor Emeritus
Ph.D., Stanford University
Aesthetics

Giere, Ronald, Professor Emeritus
Ph.D., Cornell University
Philosophy of science

Gunderson, Keith, Professor
Ph.D., Princeton University
Philosophy of mind, aesthetics

Hanks, Peter, Assistant Professor
Ph.D., University of California
Philosophy of language, philosophy of mind

*** Hanson, William, Professor**
Ph.D., Yale University
Logic, philosophy of logic

Hellman, Geoffrey, Professor
Ph.D., Harvard University
Philosophy of natural science, mathematics and logic, aesthetics

Holtman, Sarah, Associate Professor
Ph.D., University of North Carolina at Chapel Hill
Ethics, political philosophy, philosophy of law

Hopkins, Jasper, Professor
Ph.D., Harvard University
Ancient and medieval philosophy, philosophy of religion, medical ethics

Kac, Michael, Professor
Ph.D., University of California, Los Angeles
Linguistics, cognitive science

§ Lewis, Douglas, Professor
Ph.D., University of Iowa
17th- and 18th-century philosophy, metaphysics

Mason, Michelle, Assistant Professor
Ph.D., University of Chicago
Ethics, moral psychology and practical rationality, aesthetics

Nounou, Antigone, Assistant Professor
Ph.D., London School of Economics
Philosophy of physics

§ Owens, Joseph, Professor
Ph.D., University of California, Los Angeles
Philosophy of mind, language, metaphysics

§ Peterson, Sandra, Professor
Ph.D., Princeton University
Ancient philosophy, moral philosophy

§ Root, Michael, Associate Professor
Ph.D., University of Illinois, Urbana-Champaign
Philosophy of language, philosophy of social science

Savage, C. Wade, Professor Emeritus
Ph.D., Cornell University
Philosophy of science, epistemology, philosophy of psychology

§ Scheman, Naomi, Professor
Ph.D., Harvard University
Feminist theory, epistemology, Wittgenstein

Tiberius, Valerie, Associate Professor
Ph.D., University of North Carolina at Chapel Hill
Value theory, practical reason, metaethics

§ Wallace, John, Professor
Ph.D., Stanford University
Philosophy of language political philosophy, philosophy of education

Waters, C. Kenneth, Associate Professor
Ph.D., Indiana University
Philosophy of science, philosophy of biology, epistemology, history of biology

Political Science

Abernathy, Scott, Assistant Professor
Ph.D., Princeton University
American politics, education policy

Ansell, Ben, Assistant Professor
Ph.D. (expected 2006), Harvard University
Comparative politics, democratization

Beaumont, Elizabeth, Assistant Professor
Ph.D., Stanford University
Political theory, public law

Caraway, Terri, Assistant Professor
Ph.D., Northwestern University
Comparative politics, Southeast Asia

Collins, Kathleen, Assistant Professor
Ph.D., Stanford University
Comparative politics, democratization

§ Dietz, Mary, Professor
Ph.D., University of California, Berkeley
Development of political thought

Disch, Lisa, Professor
Ph.D., Rutgers University
Political theory

***§ Duvall, Raymond, Professor**
Ph.D., Northwestern University
International relations, comparative political economy

Fang, Songying, Assistant Professor
Ph.D., University of Rochester
Methodology, international relations

***§ Farr, James, Professor**
Ph.D., University of Minnesota
Political theory

Federico, Christopher, Assistant Professor
Ph.D., University of California, Los Angeles
Political psychology

***§ Freeman, John, Distinguished McKnight University Professor**
Ph.D., University of Minnesota
Political economy, methodology

Gingrich, Jane, Assistant Professor
Ph.D. (expected 2006), University of California, Berkeley
Comparative politics, Western Europe

Goren, Paul, Assistant Professor
Ph.D., University of Pittsburgh
American politics, political behavior

Hilbink, Elisabeth, Assistant Professor
Ph.D., University of California, San Diego
Comparative judicial politics, democratization, transitional justice

Jacobs, Lawrence, Professor
Ph.D., Columbia University
American public policy, American politics

Johnson, Timothy, Assistant Professor
Ph.D., Washington University
American politics, judicial process

Kahl, Colin, Assistant Professor
Ph.D., Columbia University
International relations

***§ Kelliher, Daniel, Associate Professor**
Ph.D., Yale University
Comparative politics, China

Krebs, Ronald, Assistant Professor
Ph.D., Columbia University
International relations

Kvavik, Robert, Professor
Ph.D., Stanford University
Political organizations, Scandinavia

Lomonaco, Jeffrey, Assistant Professor
Ph.D., Johns Hopkins University
Political theory

Miller, Joanne, Assistant Professor
Ph.D., The Ohio State University
Political psychology

§ Nimitz, August, Professor
Ph.D., Indiana University
Africa, comparative and community politics

Pearson, Kathryn, Assistant Professor
Ph.D., University of California, Berkeley
American politics, Congress

Rahn, Wendy, Associate Professor
Ph.D., University of Minnesota
American politics, political psychology

Roberts, Jason, Assistant Professor
Ph.D., Washington University
American politics, Congress

Rosenstone, Steven, Professor
Ph.D., University of California, Berkeley
American politics, methodology

*** Sampson, Martin, Associate Professor**
Ph.D., Indiana University
International relations, foreign policy

Samuels, David, Associate Professor
Ph.D., University of California, San Diego
Comparative politics, Latin American politics

Scott, Thomas, Professor
Ph.D., Northwestern University
Urban government and politics, American politics

*** Shively, W. Phillips, Professor**
Ph.D., University of North Carolina
Comparative politics, Western Europe

Sikkink, Kathryn, Arleen Carlson Professor
Ph.D., Columbia University
Comparative politics, Latin America

Soper, Paul, Lecturer
Ph.D., University of Minnesota
American politics, political theory

* **Strolovitch, Dara, Assistant Professor**
Ph.D., Yale University
American politics

* **Sullivan, John, Regents Professor and Arleen Carlson Professor**
Ph.D., University of North Carolina
Methodology, political psychology

Treier, Shawn, Assistant Professor
Ph.D., Stanford University
Methodology, American politics

Psychology

Berscheid, Ellen, Regents Professor
Ph.D., University of Minnesota
Interpersonal attraction, close relationships, emotion, social perception/cognition

Bono, Joyce E., Assistant Professor
Ph.D., University of Iowa
Leadership, personality, emotions, motivation

*§ **Borgida, Eugene, Professor**
Ph.D., University of Michigan
Social cognition, attitude theory, psychology and law, psychology and politics

Bouchard, Thomas, Professor
Ph.D., University of California, Berkeley
Twins, adoptees, mental ability, behavior genetics, personality interests

Burkhardt, Dwight, Professor
Ph.D., Brown University
Sensory psychobiology: vision, retinal neuron function, human psychophysics

Butcher, James, Professor Emeritus
Ph.D., University of North Carolina
Personality assessment, cross-cultural psychology

Campbell, John, Professor
Ph.D., University of Minnesota
Personnel selection, performance modeling and assessment, occupational structures

Cuthbert, Bruce, Professor
Ph.D., University of Wisconsin, Madison
Psychophysiology, emotion, temperament, mood and anxiety disorders, personality disorders, diagnostic issues

Dawis, René, Professor Emeritus
Ph.D., University of Minnesota
Vocational psychology, individual differences, psychological measurement, industrial/organizational psychology

Dunnette, Marvin, Professor Emeritus
Ph.D., University of Minnesota
Personnel selection, performance appraisal, task and job analysis

Federico, Christopher, Assistant Professor
Ph.D., University of California, Los Angeles
Political psychology, intergroup relations, and racial attitudes; psychology of legitimacy; political enterprise

Fletcher, Charles, Associate Professor
Ph.D., University of Colorado, Boulder
Cognitive science, discourse comprehension, memory

Frazier, Patricia, Professor
Ph.D., University of Minnesota
Counseling and social psychology, coping with stressful life events

Garnezy, Norman, Professor Emeritus
Ph.D., Iowa State University
Clinical psychology, personality, developmental psychopathology, childhood stressors, resistance and resilience

Gewirtz, Jonathon, Assistant Professor
Ph.D., Yale University
Biological bases of learning, memory, mental illness, and the startle reflex

*§ **Gonzales, Marti, Associate Professor**
Ph.D., University of California, Santa Cruz
Accountability, applied social psychology, impression management, interpersonal conflict, political socialization

Grove, William, Associate Professor
Ph.D., University of Minnesota
Mood disorders, schizophrenia, behavior genetics, assessment, classification methodology

Hansen, Jo-Ida, Professor
Ph.D., University of Minnesota
Vocational interest measurement, inventory construction, career development, vocational psychology

He, Sheng, Associate Professor
Ph.D., University of California, San Diego
Human vision and attention, visual awareness, cognitive neuroscience

Iacono, William, Professor
Ph.D., University of Minnesota
Schizophrenia, substance abuse, psychophysiology, detection of deception

Kersten, Daniel, Professor
Ph.D., University of Minnesota
Perception, computational vision, neural networks, brain imaging

Koutstaal, Wilma, Assistant Professor
Ph.D., Harvard University
Human memory and judgment, cognitive neuroscience, neuropsychology, aging

Krueger, Robert, Associate Professor
Ph.D., University of Wisconsin, Madison
Clinical, personality, individual differences, assessment, behavior genetics

Kuncel, Nathan, Assistant Professor
Ph.D., University of Minnesota
Structure and prediction of performance in academic and work settings

Lee, Richard, Associate Professor
Ph.D., Virginia Commonwealth University
Ethnic minority mental health and counseling, ethnic identity and family, personality and adjustment

Legge, Gordon, Professor
Ph.D., Harvard University
Visual perception

Leon, Gloria, Professor
Ph.D., University of Maryland
Stress and coping in extreme situations, eating disorders

Luciana, Monica, Associate Professor
Ph.D., University of Minnesota
Neurotransmitters and behavior, prefrontal development, neuropsychology, biology and psychopathology

Lykken, David, Professor Emeritus
Ph.D., University of Minnesota
Personality, psychophysiology, behavior genetics, forensic psychology

MacDonald, Angus, III, Assistant Professor
Ph.D., University of Pittsburgh
Basic cognitive and affective neuroscience using fMRI, neural and genetic bases of schizophrenia and other mental illnesses, psychometrics of measuring group differences

Marsolek, Chad, Associate Professor

Ph.D., Harvard University
Human memory, vision, and learning; cognitive neuroscience

McGue, Matthew, Professor
Ph.D., University of Minnesota
Behavior genetics, individual differences, substance abuse, aging

Olman, Cheryl, Assistant Professor
Ph.D., University of Minnesota
Biological basis of functional magnetic resonance imaging, modulation of low-level visual responses by scene perception

Ones, Deniz, Associate Professor
Ph.D., University of Iowa
Ability and personality assessment, personnel selection and classification

Overmier, J. Bruce, Professor
Ph.D., University of Pennsylvania
Learning, memory, stress and its psychosomatic consequences

Oxenham, Andrew, Assistant Professor
Ph.D., University of Cambridge, England
Auditory perception and cognition, computational models of perception, hearing impairment and cochlear implants

Patrick, Christopher, Professor
Ph.D., University of British Columbia
Emotion, psychopathy and criminal behavior, substance abuse, psychophysiology

§ **Peterson, Gail, Associate Professor**
Ph.D., Indiana University
Behavior change: basic theory and applications

Rothman, Alexander, Associate Professor
Ph.D., Yale University
Social cognition, health beliefs and behavior, persuasion, stereotyping

Sackett, Paul, Professor
Ph.D., The Ohio State University
Personnel selection, employment testing, workplace deviance, performance measurement

Schrater, Paul, Assistant Professor
Ph.D., University of Pennsylvania
Computational cognitive science, human and computer vision and motor control, statistical pattern recognition

Simpson, Jeffrey, Professor
Ph.D., University of Minnesota
Social, interpersonal relationships, attachment, evolution and social behavior, personality and social behavior, social influence

Snyder, Mark, Professor
Ph.D., Stanford University
Social perception and interpersonal behavior, personality and social interaction

Tellegen, Auke, Professor Emeritus
Ph.D., University of Minnesota
Personality assessment and research, clinical psychology

Thomas, Mark, Assistant Professor
Ph.D., University of California, Los Angeles
Neurobiology of drug-induced plasticity and addiction, behavioral neuroscience, transgenic mice, cellular electrophysiology

Viemeister, Neal, Professor
Ph.D., Indiana University
Auditory perception, psychophysics, models of perceptual processes

Waller, Niels, Professor

Ph.D., University of Minnesota
Quantitative models of individual differences, psychometrics, factor analysis, taxometrics, item response theory

Weiss, David, Professor
Ph.D., University of Minnesota
Psychometric methods, computerized adaptive testing, item response theory

Slavic and Central Asian Languages and Literatures

§ **Bashiri, Iraj, Professor**
Ph.D., University of Michigan
Iranian linguistics and literature, Central Asian studies

Corten, Irina, Associate Professor Emeritus
Ph.D., University of California, Berkeley
Modern Russian and Soviet literature, Soviet culture

Jahn, Gary, Professor
Ph.D., University of Wisconsin
19th-century Russian literature, Tolstoy

*§ **Polakiewicz, Leonard, Associate Professor**
Ph.D., University of Wisconsin
19th-century Russian literature, Chekhov, Polish language and literature

Sociology

§ **Aminzade, Ronald, Professor**
Ph.D., University of Michigan
Historical and comparative sociology, political sociology, social movements, democratic theory, sociology of higher education, sociology of development, race relations

Anderson, Ronald, Professor Emeritus
Ph.D., Stanford University
Methodology, technology, education, gender, organizations, computer simulations

Boyle, Elizabeth, Associate Professor
Ph.D., Stanford University
Sociology of law, comparative sociology, political sociology, sociology of gender

Broadbent, Jeffrey, Associate Professor
Ph.D., Harvard University
Comparative, political, cultural, and environmental sociologies; social movements; network analysis; macro-meso-micro links; power structures; change processes; complexity; Japan; East Asia

Donohue, George, Professor Emeritus
Ph.D., Washington State University
Rural sociology, theory

Edgell, Penny, Associate Professor
Ph.D., University of Chicago
Sociology of religion, sociology of culture, qualitative methods, work and family, organizations

Eliason, Scott, Associate Professor
Ph.D., Pennsylvania State University
Quantitative methodology, work, occupations, and labor markets, stratification, life course

Ellenbogen, B. L., Professor Emeritus
Ph.D., University of Wisconsin
Social organization, developmental change, Latin America

Fulton, Robert, Professor Emeritus
Ph.D., Wayne State University
Sociology of death, AIDS, social stratification

Gerteis, Joseph, Assistant Professor

Ph.D., University of North Carolina, Chapel Hill
Social theory, historical sociology, politics and social movements, social class and race

Goldman, Michael, Associate Professor
Ph.D., University of California, Santa Cruz

Transnational, environmental, development, and political sociology, sociology of knowledge and power, transnational institutions (World Bank, NGO networks)

Gowan, Tere, Assistant Professor
Ph.D., University of California, Berkeley
Urban sociology, ethnography, poverty and inequality, comparative welfare states, deviance and social control

Hartmann, Douglas, Associate Professor
Ph.D., University of California, San Diego
Race and ethnicity, culture (including popular culture, sport, and religion), social movements and social change, American society, field methods, contemporary theory

Hironaka, Ann, Assistant Professor
Ph.D., Stanford University
Political sociology, comparative and historical sociology, globalization, quantitative research methods, environmental sociology, race and ethnicity

Hull, Kathleen, Assistant Professor
Ph.D., Northwestern University
Culture, law, social movements, family, gender and sexuality, qualitative methods

Johnson, Arthur, Professor Emeritus
Ph.D., University of Minnesota
Religion, applied sociology/evaluation research

Kelly, Erin, Assistant Professor
Ph.D., Princeton University
Organizations and work, gender, family and life course, law and social policy

Kennedy, Robert, Associate Professor Emeritus
Ph.D., University of California, Berkeley
Demography, medical sociology

Knoke, David, Professor
Ph.D., University of Michigan
Organizations and work, social networks, methods and statistics

Kruttschnitt, Candace, Professor
Ph.D., Yale University
Law and criminology and deviance, gender, life course

Laslett, Barbara, Professor Emeritus
Ph.D., University of Chicago
Historical sociology, family, gender, sociology of knowledge, social theory

Leik, Robert, Professor Emeritus
Ph.D., University of Wisconsin, Madison
Mathematical models, methods and statistics, family, social psychology, Nordic health care

Liebler, Carolyn, Assistant Professor
Ph.D., University of Wisconsin, Madison
Mathematical models, methods and statistics, family, social psychology, Nordic health care

Logan, Enid, Assistant Professor
Ph.D., University of Michigan
Race and ethnicity, family, marriage and gender, sociology of Afro-Latin populations, historical and comparative methods, religion and Catholic Church history

Macmillan, I. Ross, Associate Professor

Ph.D., University of Toronto
Life course studies; law, crime, and deviance; research methodology and social statistics

Malmquist, Carl, Professor
M.D., University of Minnesota
Juvenile justice, homicide, adolescence, law, mental health system

Meier, Ann, Assistant Professor
Ph.D., University of Wisconsin, Madison
Family and life course, adolescent and young adult development, stratification, methods and statistics

Moen, Phyllis, Professor
Ph.D., University of Minnesota
Gender, careers and life course dynamics, sociology of work and family, aging, medical sociology, social policy

Mortimer, Jeylan, Professor
Ph.D., University of Michigan
Life course, social psychology, work

Nelson, Joel, Professor
Ph.D., Yale University
Sociology of consumer behavior, organizations and occupations, stratification

Reiss, Ira L., Professor Emeritus
Ph.D., Pennsylvania State University
Human sexuality, gender roles, family, theory construction

Savelsberg, Joachim, Professor
Dr. rer. pol., University of Trier, Germany
Sociology of law, criminology, theory, comparative

Schofer, Evan, Assistant Professor
Ph.D., Stanford University
Comparative political sociology, sociology of education, quantitative methods and statistics, globalization, sociology of science, environmental sociology, organizations

Schurman, Rachel, Associate Professor
Ph.D., University of Wisconsin, Madison
Sociology of food and agriculture, development sociology with a focus on Latin America, sociology of the environment, political economy, neoliberalism

Spitzer, Stephan, Associate Professor Emeritus
Ph.D., University of Washington
Social psychology, visual sociology, microcomputing

Robin Stryker, Professor
Ph.D., University of Wisconsin, Madison
Law and society, political sociology, economic sociology, theory, stratification, historical methods, culture

Swartz, Teresa, Assistant Professor
Ph.D., University of California, San Diego
Families, race, class and gender, Asian American studies, care work, qualitative research methods, foster care

Uggen, Christopher, Professor
Ph.D., University of Wisconsin, Madison
Crime, law, and deviance; life course; work and occupations; methods and statistics

Warren, John Robert, Assistant Professor
Ph.D., University of Wisconsin, Madison
Social stratification, sociology of education

Ward, David, Professor Emeritus
Ph.D., University of Illinois
Criminology, penology

South Asian Languages and Cultures

§ Junghare, Indira, Professor
Ph.D., University of Texas
South Asian languages and cultures
Spanish and Portuguese Studies

Arenas, Fernando, Associate Professor
Ph.D., University of California, Berkeley
Luso-Afro-Brazilian studies, critical theory

Egea, Alberto, Assistant Professor
Ph.D., Emory University
Modern Spanish literature and culture, literary theory

Face, Timothy, Assistant Professor
Ph.D., The Ohio State University
Hispanic linguistics, phonology and phonetics

Ferrán, Ofelia, Assistant Professor
Ph.D., Cornell University
Modern peninsular literature and literary theory

Ferreira, Ana Paula, Professor
Ph.D., New York University
Portuguese and Brazilian literatures, women's studies, critical theory

Jara, René, Professor
Ph.D., Arizona State University
Spanish-American literature: narrative, poetry, essay, literary theory, semiotics

Klee, Carol, Associate Professor
Ph.D., University of Texas, Austin
Hispanic linguistics, applied linguistics and sociolinguistics

Machin, Horacio, Assistant Professor
Ph.D., Stanford University
Contemporary Latin American literature, cultural criticism, cultural studies

O'Connell, Joanna, Associate Professor
Ph.D., University of California, Berkeley
Spanish-American literature: Mexico, Caribbean, Central America; feminism

Ocampo, Francisco, Associate Professor
Ph.D., University of Southern California
Hispanic linguistics, syntax and pragmatics

Ramos-Garcia, Luis, Associate Professor
Ph.D., University of Texas at Austin
U.S. Latino/Latin American theater, literature, cultural studies

Ramos-Gascon, Antonio, Professor Emeritus
Ph.D., University of California, San Diego
Spanish literature: 18th-20th-century prose and poetry

Spadaccini, Nicholas, Professor
Ph.D., New York University
Spanish Golden Age/colonial literature and culture, comparative literature

Sullivan, Constance, Associate Professor
Ph.D., University of Illinois
18th-20th-century Spanish literature, Spanish feminism

Vidal, Hernán, Professor Emeritus
Ph.D., University of Iowa
Latin American literature and cultural studies

Weissberger, Barbara, Associate Professor
Ph.D., Harvard University
Medieval and early modern literature

Zahareas, Anthony, Professor Emeritus
Ph.D., The Ohio State University
History of Spanish literature: early to modern times

Speech-Language-Hearing Sciences

Angerman, Sarah, Assistant Clinical Specialist
Ph.D., University of Minnesota
Clinical audiology

Avery, Jack, Assistant Clinical Specialist
M.A., University of Minnesota
Adult speech and language disorders, traumatic brain injury, alaryngeal speech

Broen, Patricia, Professor Emeritus
Ph.D., University of Minnesota
Language acquisition, phonological development

Carlstrom, Jane, Clinical Specialist
M.A., University of Iowa
Clinical audiology

Carney, Arlene, Professor
Ph.D., University of Minnesota
Rehabilitative audiology, speech perception

Davis, Julia, Professor Emeritus
Ph.D., University of Southern Mississippi
Rehabilitative audiology

DeRuiter, Mark, Associate Clinical Specialist
Ph.D., University of Minnesota
Auditory and language processing in children and adults

Fabry, David A., Adjunct Associate Professor
Ph.D., University of Minnesota
Audiology

Glaze, Leslie, Adjunct Assistant Professor
Ph.D., University of Wisconsin
Voice and resonance disorders, alaryngeal speech

Haroldson, Samuel, Professor Emeritus
M.A., University of Minnesota
Stuttering, laryngectomy

Hinderscheit, Linda, Clinical Specialist
M.A., University of Minnesota
Speech and language disorders

Kennedy, Mary, Associate Professor
Ph.D., University of Washington
Neurological disorders of communication

Kohnert, Kathryn, Associate Professor
Ph.D., University of California, San Diego
Language acquisition and disorders in bilingual and monolingual populations

McDermott, Richard, Professor Emeritus
Ph.D., University of Iowa
Phonological disorders

Moller, Karlind, Adjunct Professor
Ph.D., University of Minnesota
Craniofacial anomalies

Munson, Benjamin, Assistant Professor
Ph.D., The Ohio State University
Phonological development and disorders in children, language disorders in children

Nelson, Peggy, Associate Professor
Ph.D., University of Kansas
Psychoacoustics and speech perception, signal processing in hearing aids, pediatric audiology

Reichle, Joe, Professor
Ph.D., University of Wisconsin
Preschool language, augmentative communication

Schlauch, Robert, Associate Professor
Ph.D., University of Washington
Diagnostic audiology, cognitive influences on hearing

§ Siegel, Gerald, Professor Emeritus
Ph.D., University of Iowa
Stuttering, ethnographic approaches to communication disorders

***§ Speaks, Charles, Professor**
Ph.D., University of Michigan
Speech perception

Trine, Timothy D., Adjunct Assistant Professor
Ph.D., University of Minnesota
Hearing aids

Van Tasell, Dianne J., Adjunct Professor
Ph.D., Northwestern University
Hearing aids

Viemeister, Neal, Adjunct Professor
Ph.D., Indiana University
Auditory psychophysics and perceptions

Watson, Peter, Assistant Professor
Ph.D., University of Arizona, Tucson
Normal and disordered aspects of motor speech control, voice production

Windsor, Jennifer, Professor
Ph.D., Purdue University
Language acquisition and disorders, cognitive-linguistic processing

Wojtczak, Magdalena, Adjunct Assistant Professor
Ph.D., Adam Mickiewicz University, Poland
Auditory psychophysics

Zang, Yang, Assistant Professor
Ph.D., Yale University
Directional data analysis, time series analysis, chronobiometry

Statistics

Bingham, Christopher, Professor
Ph.D., Yale University
Directional data analysis, time series analysis, chronobiometry

Chatterjee, Singdhansu, Assistant Professor
Ph.D., Indian Statistical Institute
Resampling techniques, small area estimation, curve estimation, stochastic processes

Cook, R. Dennis, Professor
Ph.D., Kansas State University
Linear and nonlinear models, regression diagnostics, graphical methods

Dickey, James, Professor
Ph.D., University of Michigan
Bayesian statistics, expert opinion modeling, smoothing analysis, foundations of inference

Eaton, Morris, Professor Emeritus
Ph.D., Stanford University
Multivariate analysis, probability inequalities, decision theory, Bayesian analysis

Geyer, Charles, Professor
Ph.D., University of Washington
Markov chain Monte Carlo, constrained maximum likelihood, statistical genetics

Grund, Birgit, Associate Professor
Ph.D., Humboldt-Universität, Berlin
Curve estimation, kernel smoothing, AIDS research

Hawkins, Douglas, Professor
Ph.D., University of the Witwatersrand, Johannesburg, South Africa
Quality improvement, case diagnostics, geostatistics

Jiang, Tiefeng, Associate Professor
Ph.D., Stanford University
Mathematical biology, pattern recognition, large deviations, Chen-Stein method

Jones, Galin, Assistant Professor
Ph.D., University of Florida
Convergence of Markov chains, generalized linear mixed models

Lindgren, Bernard, Professor Emeritus
Ph.D., University of Minnesota
Statistical education, general theory

Martin, Frank, Associate Professor
Ph.D., Iowa State University
Experimental design, analysis of variance procedures, population sampling

Meeden, Glen, Professor
Ph.D., University of Illinois
Decision theory, Bayesian inference, finite population sampling

Oehlert, Gary, Professor
Ph.D., Yale University
Data analysis, environmental trend analysis, nonparametric regression

Qiu, Peihua, Associate Professor
Ph.D., University of Wisconsin, Madison
Nonparametric regression, curve/surface fitting, image processing, calibration

Shen, Xiaotong, Professor
Ph.D., University of Chicago
Likelihood methods, semi/nonparametric models, classification, applications in health engineering and health sciences

Sudderth, William, Professor
Ph.D., University of California, Berkeley
Probability theory, stochastic games, foundations of statistics

Wang, Lan, Assistant Professor
Ph.D., Pennsylvania State University
Model with large number of parameters, nonparametric ANCOVA, lack-of-fit test in nonparametric regression

Weisberg, Sanford, Professor
Ph.D., Harvard University
Regression and modeling, diagnostics, graphical methods, computing

Theatre Arts and Dance

Bartl, Judy, Associate Program Director and Director, B.F.A.-Guthrie Acting Program
B.A., Mankato State University

Bellamy, Louis, Associate Professor
M.A., University of Minnesota
Directing, acting

Bernstein, David, Associate Development Officer
A.B., University of Rochester, New York
Theatre critique

Binder, Susan, Lecturer
M.F.A., Temple University, Philadelphia
Costume technology

Brockman, C. Lance, Professor
M.S., Kansas State Teachers College
Scene design, scene painting

Carlson, Elisa, Teaching Specialist
M.F.A., University of Wisconsin
Voice and speech training

Chatterjee, Ananya, Associate Professor
Ed.D., Temple University
Dance history and theory

Flink, Carl, Associate Professor
J.D., Stanford Law School
Modern dance technique and dance composition

Geier, Heidi, Lecturer
Dance history

Grotting, Karla, Teaching Specialist
Jazz dance technique and tap

Gwinup, Martin, Associate Professor
M.F.A., Yale University
Technical production, digital audio, computer control and visual systems

Henry, Brent, Associate Educational Specialist
M.F.A., University of Arizona
Design and technical production

Holshue, Lucinda, Lecturer
M.F.A., University of California, San Diego
Voice and speech training

Jakovljevic, Branislav, Assistant Professor
Ph.D., City University of New York
Theatre history, introduction to theatre

Kobialka, Michal, Associate Professor
Ph.D., City University of New York
Theatre history/theory; medieval, avant-garde, postmodern theatre, historiography

Kuftinec, Sonja, Associate Professor
Ph.D., Stanford University
Theatre history, performance art and theory, American theatre

LeFebvre, Matthew, Associate Professor
Ph.D., University of Minnesota
Costume design, drawing and rendering

Maddux, Margaret L., Associate Professor
M.A., Sarah Lawrence College
Modern dance, choreography, ethnic and theory

Mann, Paula, Lecturer
Modern dance technique, improvisation and dance composition

Margolis, Kari, Teaching Specialist
Acting, movement

Montgomery, Jean, Associate Professor
M.F.A., University of Minnesota
Lighting design, stage management

Nash, Elizabeth, Associate Professor
Ph.D., Indiana University
Voice, speech, singing

Pierce-Sands, Toni, Teaching Specialist
Modern dance technique and performance training

Smith, Joan Anne, Associate Professor
M.A., University of California, Los Angeles

Modern dance, choreography
Sommers, Michael, Teaching Specialist
Puppetry

Stephens, Kent, Teaching Specialist
B.A., Yale University
Stanislavski and characterization techniques

Venard Dierks, Shirley, Teaching Specialist
B.A., University of Minnesota
Career preparation for the actor

Wagner, Matthew, Assistant Professor
Ph.D., University of Minnesota
Theatre history and theory

Wagner-Henry, Sherry, Teaching Specialist
M.B.A., Illinois State University
Theatre management

Werry, Margaret, Assistant Professor
Ph.D., Northwestern University
Theatre history and theory, drama and the media

Wolska, Aleksandra, Assistant Professor
Ph.D., Stanford University
Directing

Women's Studies

Craddock, Susan, Associate Professor
Ph.D., University of California, Berkeley
Health and medicine; gender, race, and social equity

Desai, Jigna, Associate Professor
Ph.D., University of Minnesota
Postcolonialism, Asian-American, South Asian diaspora, globalization, transnational cultural studies

Kaminsky, Amy, Professor
Ph.D., Pennsylvania State University
Feminist literary theory, Latin American women writers, exile

Nagar, Richa, Associate Professor
Ph.D., University of Minnesota
Feminist ethnography, cultural geography, international feminisms, development theory

§ Scheman, Naomi, Professor
Ph.D., Harvard University
Feminist epistemology, theories of individual and collective identity

Torres, Eden, Associate Professor
Ph.D., University of Minnesota
Chicana feminist/cultural theory, race, class, gender, ethnicity

***§ Zita, Jacquelyn, Associate Professor**
Ph.D., Washington University
Feminist theory and philosophy, gender, lesbian/gay studies

Carlson School of Management (CSOM)

Administration

Alison Davis-Blake, Dean

John Fossum, Associate Dean of Faculty and Research

Robert W. Ruekert, Associate Dean of Undergraduate Programs

Michael Houston, Associate Dean of International Programs

Ed Joyce, Associate Dean of MBA Programs

Deb Cundy, Assistant Dean of External Relations

Carolyn Chase, Assistant Dean of Operations

Michelle Wills, Chief Financial Officer

Mahmood Zaidi, Director of International Program Development

Kathryn Johnson, Director of Diversity
Doug Lund, Director of the Office of Information Technology

Lori Kocer, Director of Alumni Relations

Chris Mayr, Chief Development Officer

Louise Muldoon, Director of Marketing Services

William T. Scheurer, Director of Executive Development Center

Paul Johnson, Director of Graduate Studies, Ph.D. Program in Business Administration

Kathryn Carlson, Assistant Dean and Director of Part-time M.B.A. and Executive M.B.A. Programs

Carleen Kerttula, Assistant Dean and Director of Full-time M.B.A. Programs

Mary Maus Kosir, Assistant Dean and Director of Undergraduate Programs

Frederick R. Jacobs, Director of Graduate Studies, M.B.T. Program

Laurence Kallio, Director of MAcc Program

Avner Ben-Ner, Director of Ph.D. Programs in Industrial Relations

John Budd, Director of M.A. Program in Industrial Relations

Connie Wanberg, Director of Industrial Relations Center

Howard Kling, Director of Labor Education Service

Clare Foley, Director, Graduate Business Career Center

Morgan Kinross-Wright, Director of Undergraduate Business Career Center

Faculty

Accounting

Beil, Frank, Senior Lecturer
A.B.D., Webster University

Biondich, Nick, Senior Lecturer
M.S., University of North Dakota

Caliendo, Charles, Senior Lecturer
M.B.A., University of Minnesota

Carter, Gary, Senior Lecturer
Ph.D., University of Texas, Austin

Dickhaut, John W., Professor and Curtis L. Carlson Chair in Accounting
Ph.D., The Ohio State University
Economic and psychological determinants of accounting phenomena

Duke, Gordon L., Associate Professor
Ph.D., University of Georgia
Accounting systems, statistics, quantitative methods

Gigler, Frank, Associate Professor and Honeywell Professor in Accounting
Ph.D., University of Minnesota
Financial disclosure theory, industrial organization of audit markets

§ Gutterman, Paul, Senior Lecturer
L.L.M. in Taxation, New York University

Felton, Mark, Senior Lecturer
M.B.A., University of Minnesota

Jacobs, Fred, Senior Lecturer and Director of M.B.T.
Ph.D., University of Wisconsin, Madison

Joyce, Edward J., Professor
Ph.D., University of Illinois
Behavioral decision-making

Kallio, Larry, Senior Lecturer
M.B.A., University of Minnesota Duluth

Kanodia, Chandra, Professor and Arthur Andersen & Co/Duane R Kullberg Chair in Accounting and Information Systems
Ph.D., Carnegie Mellon University
Auditor liability and audit pricing

Rayburn, Judy D., Professor, and Department Chair
Ph.D., University of Iowa
Capital markets

Shroff, Pervin, Associate Professor
Ph.D., Columbia University
Capital market based accounting

Tranter, Terry, Senior Lecturer
Ph.D., University of Washington

Venkataraman, Ramgopal, Assistant Professor
Ph.D., Penn State University

Financial accounting, disclosure
White, Paul, Teaching Specialist
B.S.B., University of Wisconsin, Eau Claire

Zhang, Ivy, Assistant Professor
A.B.D., University of Rochester
Financial Accounting

Business Law

Andrews, Albert, Jr., Senior Lecturer
L.L.B., University of Minnesota
Finance

Alexander, Gordon J., Professor, John Spooner Chair in Investment Management, and Department Chair
Ph.D., University of Michigan
Investments, portfolio theory and management

Aggarwal, Rajesh, Associate Professor
Ph.D., Harvard
Corporate finance, economics of organizations, optimal capital structure, executive compensation

Benzoni, Luca, Assistant Professor
Ph.D., Northwestern University
Asset pricing, time series econometrics, empirical finance

Boyd, John H., Professor and Frederick R. Kappel Chair in Business and Government Relations
Ph.D., University of Pennsylvania
Finance and development, financial intermediation, banking, contract theory

Carkovic, Maria, Senior Fellow
Ph.D., University of California, Los Angeles
International economics, development economics, macroeconomics

Chang, Chun, Professor and Minnesota Banking & Finance Term Professor
Ph.D., Northwestern University
Economics of incentives and information, comparative economic institutions

Frank, Murray, Professor, Piper Jaffrey Chair in Finance
Ph.D., Queens University
Corporate finance

Gahlon, James, Senior Lecturer
Ph.D. University of Illinois

Goldstein, Robert, Associate Professor
Ph.D., University of California at Berkeley
Term structure of interest rates, credit risk, capital structure theory, general equilibrium

Levine, Ross, Professor, Curtis L. Carlson Professor of Finance
Ph.D., University of California, Los Angeles
International finance, financial regulations and policies, economic development

Meschke, Felix, Assistant Professor
A.B.D., Arizona State University
Corporate finance, corporate governance, mutual funds, international finance

Nantell, Timothy J., Professor
Ph.D., University of Wisconsin
Corporate finance, corporate restructuring

Nelson, Richard, Senior Lecturer
M.B.A., University of Minnesota

Parente, Stephen, Assistant Professor
Ph.D., Johns Hopkins University
Managed care, health information technology, health economics

Polkovnichenko, Valery, Assistant Professor
Ph.D., Northwestern University
Asset pricing, incomplete markets, portfolio choice

Povel, Paul, Assistant Professor
Ph.D., London School of Economics
Financial contracting, corporate finance, corporate restructuring

Singh, Rajdeep, Associate Professor and Minnesota Banking & Finance Term Professor
Ph.D., Carnegie Mellon University
Corporate finance, auction theory, agency models, mergers and acquisitions, market microstructure

Wang, Tracy Yue, Assistant Professor
Ph.D., University of Maryland, College Park
Corporate finance, corporate governance, behavioral finance

Whitman, Andrew, Professor
Ph.D., University of Wisconsin, Madison
Insurance law, coverage, and claims; corporate risk management

Winton, Andrew, Professor and Minnesota Banking Chair
Ph.D., Wharton School, University of Pennsylvania
Financial contracting, corporate finance

Yu, Frank, Senior Lecturer
A.B.D., University of Chicago
Human Resources and Industrial Relations

Arvey, Richard D., Professor and Industrial Relations Land-Grant Chair
Ph.D., University of Minnesota
Staffing, training, and development

Azevedo, Ross E., Associate Professor
Ph.D., Cornell University
Compensation systems, human resource planning and skills inventories

Ben-Ner, Avner, Professor and Department Chair
Ph.D., State University of New York, Stony Brook
Theory of organization, employee ownership, nonprofit organizations

§ Bognanno, Mario F., Professor
Ph.D., University of Iowa
Labor markets, collective bargaining, arbitration

§ Budd, John, Professor and Industrial Relations Land-Grant Professor
Ph.D., Princeton University
Collective bargaining and industrial relations, labor policy

§ Fossum, John A., Professor and Acting Associate Dean of Faculty and Research
Ph.D., Michigan State University
Compensation

Glomb, Theresa, Associate Professor and Carlson School Professor Human Resources & Industrial Relations
Ph.D., University of Illinois
Workplace aggression and violence, sexual harassment

Lluis, Stephanie, Assistant Professor
Ph.D., University of Montreal
Labor economics, applied economics

§ McCall, Brian, Professor
Ph.D., Princeton University
Applied econometrics, econometric theory, economics of information

Remington, John, Professor
Ph.D., University of Michigan
Collective bargaining and industrial relations, labor arbitration

Scoville, James G., Professor
Ph.D., Harvard University
International and comparative industrial relations

Wanberg, Connie, Professor and Curtis L. Carlson Professor of Industrial Relations
Ph.D., Iowa State University
Psychological experience of unemployment, job-seeking behavior

Wang, Yijiang, Professor
Ph.D., Harvard University
Organization theory, theory of the firm, monetary economics

Zaidi, Mahmood A., Professor
Ph.D., University of California, Berkeley
International labor market analysis, human capital and multinationals
Information and Decision Sciences

Adams, Carl R., Professor
Ph.D., Purdue University
Problem-solving methodology

Adomavicius, Gediminas, Assistant Professor
Ph.D., New York University
Personalization technologies and customer relationship management, knowledge discovery and data mining

Chervany, Norman L., Professor and Carlson School Professor of Information and Decision Sciences
Ph.D., Indiana University
Management of technology-based change

Curley, Shawn P., Professor
Ph.D., University of Michigan
Decision and judgment processes, belief processing

Gupta, Alok, Professor and Carlson School Professor of Information and Decision Sciences
Ph.D., University of Texas
Electronic commerce, data communication

Johnson, Paul E., Professor and Curtis L. Carlson Chair in Decision Sciences
Ph.D., Johns Hopkins University
Decision making, intelligent systems, knowledge work

Kauffman, Robert J., Professor and Department Chair
Ph.D., Carnegie Mellon University
Information technology and financial services

Naumann, David J., Associate Professor
Ph.D., University of Minnesota
Telecommunications, information systems analysis and design programming, systems development

Riggins, Frederick J., Assistant Professor
Ph.D., Carnegie Mellon University
Business models for internet-based commerce, e-business strategy

Subramani, Mani, Associate Professor
D.B.A., Boston University
Management of effective IS-user relationships, determinants of governance in IT mediated interorganizational relationships

Xia, Weidong, Assistant Professor
Ph.D., University of Pittsburgh
Organizational impact of information technology, IT infrastructure management, adoption/usage of IT

Marketing and Logistics Management

Ahluwalia, Rohini, Associate Professor
Ph.D., The Ohio State University
Consumer processing of negative and counter-attitudinal information in the marketplace, branding/information processing perspective

§ Bergen, Mark, Professor and Carolyn I. Anderson Professor in Business Education Excellence
Ph.D., University of Minnesota
Channels of distribution, pricing

Chandy, Rajesh, Associate Professor and Carlson School Professor of Marketing
Ph.D., University of Southern California
Radical innovation, technology management

Cui, Tony, Assistant Professor
Ph.D., University of Pennsylvania
Behavioral economics, pricing, trade promotions, competitive strategies with limited supply, game theory

Dong, Yan, Assistant Professor
Ph.D., University of Maryland
Supply chain management and optimization

Ebert, Jane, Assistant Professor
Ph.D., Harvard University
Consumer behavior, information processing

Hansen, Robert A., Associate Professor
Ph.D., University of Wisconsin
Developing marketing strategies for public sector services

Houston, Michael J., Professor, Interim Co-Dean, and Ecolab-Grievé Chair in International Marketing
Ph.D., University of Illinois
Consumer behavior and culture, international marketing

John, Deborah Roedder, Professor and Curtis L. Carlson Chair in Marketing
Ph.D., Northwestern University
Children's consumer behavior, consumer information processing

John, George, Professor and Pillsbury/Gerot Chair in Marketing
Ph.D., Northwestern University
Marketing channels, industrial marketing, high technology markets

Loken, Barbara J., Professor
Ph.D., University of Illinois
Consumer behavior: brand equity, attitude measurement, categorization

Meyers-Levy, Joan, Professor
Ph.D., Northwestern University
Consumer information processing and psychology, gender differences in information processing

Mueller, Wayne, Senior Lecturer
M.B.A., University of Saint Thomas

Mukherji, Prokriti, Assistant Professor
Ph. D., University of Southern California
Structured econometric modeling with emphasis on models of quality learning

Narasimhan, Om, Assistant Professor
Ph.D., University of Southern California
Inter-organizational arrangements, competitive advantage

Rao, Akshay, Professor, General Mills Professor of Marketing, and Department Chair
Ph.D., Virginia Polytechnic Institute and State University
Pricing

§ Roering, Kenneth J., Professor
Ph.D., University of Iowa
Marketing planning and corporate strategy, market-driven new product development

Ruekert, Robert W., Professor and Acting Associate Dean of Programs
Ph.D., University of Wisconsin
Marketing strategy, marketing organization and implementation

Upton, Kevin, Senior Lecturer
M.B.A., University of Minnesota

Vohs, Kathleen, Assistant Professor
Ph.D., Dartmouth College
Consumer psychology
Operations and Management Science

Anderson, John C., Professor
Ph.D., University of Minnesota
Quality management, operations strategy, operations analysis

Connor, Robert, Associate Professor
Ph.D., Wharton School, University of Pennsylvania
Market structure and access to service in the health sector

Donohue, Karen, Associate Professor
Ph.D., Northwestern University
Supply chain management, design and analysis of manufacturing systems

Hill, Arthur V., Professor and John and Nancy Lindahl Professorship for Excellence in Business Education
Ph.D., Purdue University
Operations management, production and inventory management, international operations management

Huchendorf, Steve, Senior Lecturer
Ph.D., Illinois State University

Li, William, Associate Professor
Ph.D., University of Waterloo
Experimental design, optimal design, robust design

Linderman, Kevin, Associate Professor
Ph.D., Case Western Reserve University
Statistical quality control, quality management, manufacturing planning and control systems, six sigma

Mallick, Debasish, Assistant Professor
Ph.D., University of Texas, Austin
Management of technology, new product development

Meyer Goldstein, Susan, Associate Professor
Ph.D., The Ohio State University
Quality management in health care, service process management, operations strategy

Nachtsheim, Christopher J., Professor, Curtis L. Carlson Professor of Operations and Management Science, and Department Chair
Ph.D., University of Minnesota
Experimental design, regression and analysis of variance

*** Schroeder, Roger G., Professor, Frank A. Donaldson Chair in Operations Management**

Ph.D., Northwestern University
Operations strategy, quality management, process and product innovation

Sinha, Kingshuk, Professor and Curtis L. Carlson Family Foundation Professor of Management Science
Ph.D., University of Texas, Austin
Management of technology, operations strategy

Shah, Rachna, Assistant Professor
Ph. D., The Ohio State University
Lean manufacturing systems, supply chain management

Strategic Management and Organization

Abrams, Lori, Senior Lecturer
Ph.D., University of Minnesota

Albert, Stuart, Associate Professor
Ph.D., The Ohio State University
Organizational change, metaphor and organizational change

Benraouane, Sid, Senior Lecturer
Ph.D., University of Minnesota

Bowie, Norman E., Professor and Elmer Andersen Chair in Corporate Responsibility
Ph.D., University of Rochester, New York
Corporate responsibility, international business ethics, leadership

Bromiley, Philip, Professor, Curtis L. Carlson Chair in Strategic Management
Ph.D., Carnegie Mellon University
Risk-taking in organizations, strategic decision processes

DeVaughn, Michael, Assistant Professor
Ph. D., University of Wisconsin, Madison
Organizational learning

Erickson, W. Bruce, Professor
Ph.D., Michigan State University
Antitrust economics, venture capital, Minnesota small businesses

Forbes, Daniel, Assistant Professor
Ph.D., New York University
Strategic decision making, venture creation in internet-related industries

Fox, Isaac, Senior Lecturer
Ph.D., University of Minnesota

Maitland, Ian, Professor
Ph.D., Columbia University
Business ethics, ethics and markets, international business

Marcus, Alfred A., Professor
Ph.D., Harvard University
Acquisition of competence and organizational learning

Murtha, Thomas, Associate Professor
Ph.D., New York University
Global sourcing strategy and management, industrial policy

Nichols, Mary L., Professor
Ph.D., University of Kansas
Individual and organizational decision making, organizational design

Rao, Dileep, Senior Lecturer
Ph.D., University of Minnesota

Sapienza, Harry, Professor and Curtis L. Carlson Chair in Entrepreneurial Studies
Ph.D., University of Maryland
Inter-organizational relationships, strategic decision making

Schnatterly, Karen, Assistant Professor
Ph.D., University of Michigan
Internal and external governance, white collar crime

Shah, Priti P., Associate Professor
Ph.D., Northwestern University
Social networks, group goal setting, negotiation

Shaver, J. Myles, Professor and Carlson School Professor of Strategic Management and Organization
Ph.D., University of Michigan
Firm exporting strategies, investment location choice

Spruth, Steve, Senior Lecturer
M.B.A., Yale School of Management

Van de Ven, Andrew H., Professor and Vernon H. Heath Chair of Organizational Innovation and Change
Ph.D., University of Wisconsin
Organization and management theory, management of innovation and change

Zaheer, Aks, Professor and Curtis L. Carlson Professor of Strategic Management and Organization
Ph.D., Massachusetts Institute of Technology
Competitive advantage for inter-firm relationships

Zaheer, Srilata, Professor and Curtis L. Carlson Professor of Strategic Management and Organization, and Department Chair
Ph.D., Massachusetts Institute of Technology
Dynamic competitive advantage, the process of globalization

Zahra, Shaker, Professor and Robert E. Buuck Chair in Entrepreneurship
Ph.D., University of Mississippi
Corporate entrepreneurship, internationalization of entrepreneurial firms, learning/dynamic capability development in technology-based new firms

Zellmer-Bruhn, Mary, Assistant Professor
Ph.D., University of Wisconsin
Class cultural issues in teamwork, time related effects in organizational behavior

Zhao, Minyuan, Assistant Professor
Ph.D., New York University
International R&D strategy, international management and innovation

Medical Technology Administration

Spannaus-Martin Donna, Yvonne C. Cooke Professor and Director
Ph.D., Iowa State University
Clinical chemistry, distance education

Solberg, Patricia, Administrative Associate
B.A., Gustavus Adolphus College
Education, student recruitment and retention, clinical chemistry

Faculty

Gleason, William, Associate Professor
Ph.D., University of Minnesota
Clinical chemistry, biomaterials, biomolecular recognition

Hanson, Naomi, Assistant Professor
M.S., University of Minnesota
Clinical chemistry, molecular biology

Swinehart, Cheryl, Assistant Professor
M.S., University of Minnesota
Hemostasis, hematology

Tsai, Michael, Professor
Ph.D., Medical College of Wisconsin
Biochemical/molecular genetics, cardiovascular disease, clinical chemistry

Tudor, Kim-Sue, Assistant Professor
Ph.D., University of Cincinnati
Regulation of B-lymphopoiesis in mice and humans

Wells, Carol, Mildred King Rohwer Professor
Ph.D., University of Wisconsin, Madison
Diagnostic microbiology and microbial pathogenesis

Teaching Specialists

Clysdale, Sarah, Teaching Specialist
B.S., University of Minnesota
Clinical chemistry

Coley, Nancy, Teaching Specialist
B.S., University of Minnesota
Immunohematology

George, Joanna, Manager, Teaching Laboratories
B.S., Minot State University, S.B.B.,
Tidewater Red Cross, Norfolk, Virginia
Immunohematology, microbiology,
laboratory safety

Lorenz, Janet, Teaching Specialist
B.S., Moorhead State University
Hematology

King, Lynn, Teaching Specialist
B.S., University of Minnesota
Clinical chemistry

Porisch, Katherine, Teaching Specialist
B.S., University of Minnesota
Clinical chemistry

Ramey, Mary, Teaching Specialist
B.S., University of North Dakota
Hematology

Yue, Mary Jane, Teaching Specialist
M.S., Northeastern University
Hematology

Mortuary Science

Faculty and Staff

LuBrant, Michael P., Assistant Professor and Director
M.A., St. Bernard's Institute
Embalming, restorative art

Amatuzio, Janis, Teaching Specialist
M.D., University of Minnesota
Forensic pathology

Burger, Earl, Assistant Professor
M.A., University of St. Thomas
Restorative art

Dougherty, Michael, Instructor
B.S., University of Minnesota
Embalming, restorative art

Grayson, Peter, Teaching Specialist
J.D., William Mitchell College of Law
Business law, funeral service law

LaCourt, Jody, Instructor
B.S., University of Minnesota
Embalming

Mathews, Michael C., Assistant Professor
M.A., University of St. Thomas
History, embalming chemistry,
microbiology, embalming theory, funeral
practice

McArthur, Angela, Instructor
B.S., University of Minnesota
Human anatomy, embalming

Roach Thomas, Gloria, Teaching Specialist
M.Ed., Winthrop University
Cultural diversity, religion

Tibbetts, Steven P., Assistant Professor
M.A., University of Minnesota Duluth
Funeral psychology and counseling

Nursing

Administration

Connie W. Delaney, Ph.D., Dean

Ruth Lindquist, Ph.D., Senior Associate Dean for Academic Affairs

Donna Bliss, Ph.D., Interim Associate Dean for Research

Ann Garwick, Ph.D., Interim Associate Dean for Research

Kathleen Krichbaum, Ph.D., Division I Head

Marsha Lewis, Ph.D., Director of Graduate Studies

Mary Rowan, Ph.D., Director, Post-Baccalaureate Certificate Program

Ann Jones, D.N.Sc., Director of Undergraduate Studies and Interim Director of Student Services

Linda Herrick, Ph.D., Coordinator UMR

Paul Sodergren, B.S., Administrative Director

Kim Zemke, M.S., Director of Faculty Practice

Mary Pattock, B.A., Communications Director

Laurel Mallon, B.S., Development Officer

Faculty

Avery, Melissa, Associate Professor
Ph.D., University of Minnesota
Exercise in pregnancy, exercise and gestational diabetes

Bearinger, Linda, Professor
Ph.D., University of Minnesota
Multiethnic issues in adolescent health

Bliss, Donna, Interim Associate Dean for Research and Professor
Ph.D., University of Pennsylvania
Managing fecal incontinence with dietary fiber

Carney Anderson, Lisa, Lecturer
Ph.D., University of Minnesota
Anesthesia management for Parkinson's patients

Chlan, Linda L., Associate Professor
Ph.D., University of Minnesota
Outcomes and effectiveness of nursing interventions

Delaney, Connie, Dean and Professor
Ph.D., University of Iowa
Health informatics

Disch, Joanne, Professor
Ph.D., University of Michigan
Nursing leadership and management

*** Duckett, Laura, Associate Professor**
Ph.D., University of Minnesota
Breastfeeding behaviors, parent-infant attachment

Edwardson, Sandra, Professor
Ph.D., University of Minnesota
Administrative and health care policy issues related to outcomes

Fagerlund, Kathy, Assistant Professor
Ph.D.
Nurse anesthesia

Fulkerson, Jayne, Associate Professor
Ph.D., University of Minnesota
Risk and protective factors in the development of eating disorders, obesity, substance use, and mental health among children and adolescents

Garwick, Ann, Interim Associate Dean for Research and Professor
Ph.D., University of Minnesota
Family health and care-giving, family stress and coping

Gaugler, Joseph, Assistant Professor
Ph.D., Pennsylvania State University
Longitudinal implications of family care for chronically disabled adults

Gerdner, Linda, Assistant Professor
Ph.D., University of Iowa
Management of agitation in Alzheimer's disease and related disorders (ARD), culturally sensitive care for persons with ARD and their family caregivers

Gross, Cynthia, Professor
Ph.D., Yale University
Quality of life after transplantation

Gulzar, Laila, Assistant Professor
Ph.D., University of Illinois, Chicago
International and inter-organizational collaboration, cross-cultural health and cultural competence

Gustafson, Marilyn R., Associate Professor Emeritus
Ph.D., Walden University
Education, international nursing

Halcón, Linda, Associate Professor
Ph.D., University of Minnesota
Complementary therapies and infectious diseases

Hansen, Helen, Associate Professor
Ph.D., University of Kansas, Lawrence
Leadership, collaboration, and systems management

Henly, Susan J., Professor
Ph.D., University of Minnesota
Psychometric methods for health sciences research

Herrick, Linda, Assistant Professor
Ph.D., University of Minnesota
Postoperative pain management, patient satisfaction, nursing management, research utilization

Ann Jones, Director of Undergraduate Studies and Assistant Professor
D.N.Sc., Rush University
Transition experiences of new graduate nurses

Josten, LaVohn, Associate Professor Emeritus
Ph.D., University of Minnesota
Effectiveness of interventions with high-risk families

§ Kaas, Merrie, Associate Professor
D.N.Sc., University of California, San Francisco
Nursing interventions: women with late life depression

Kerr, Madeline, Associate Professor
Ph.D., University of Michigan
Preventing occupational hearing loss

Kreitzer, Mary Jo, Associate Professor and Director, Center for Spirituality and Healing
Ph.D., University of Minnesota
Prayer/spirituality for MS and transplant patients

Krichbaum, Kathleen, Associate Professor and Division I Head
Ph.D., University of Minnesota
Developing healthy self-care abilities in elders

Kubik, Marti, Assistant Professor
Ph.D., University of Minnesota
School and community-based intervention research

Leonard, Barbara, Professor and Director, Center for Children With Special Health Care Needs
Ph.D., University of Minnesota
Children and adolescents with type I diabetes

Lewis, Marsha, Associate Professor and Director of Graduate Studies
Ph.D., University of Minnesota
Decision making training: dementia patient caregivers

Liaschenko, Joan, Associate Professor
Ph.D., University of California, San Francisco
Nursing ethics, study of nursing practice

Lichtblau, Len, Lecturer
Ph.D., University of Minnesota
Pharmacology

Lindeke, Linda, Associate Professor
Ph.D., University of Minnesota
Health care issues of children and families

Lindquist, Ruth, Senior Associate Dean for Academic Affairs and Professor
Ph.D., University of Minnesota
Quality of life and adjustment to cardiovascular and neurological diseases, behavior change adherence

Looman, Wendy, Assistant Professor
Ph.D., University of Michigan
Social capital, family-community interactions: special needs children

Moss, Margaret, Assistant Professor
D.S.N., University of Texas, Houston
Making medical anthropology clinically relevant for urban and reservation-based American Indians

Mueller, Christine, Associate Professor
Ph.D., University of Maryland, Baltimore
Quality of care in nursing homes

O'Boyle, Carol, Assistant Professor
Ph.D., University of Minnesota
International health, nursing theory, infectious disease, infection control, nursing leadership

O'Connor-Von, Susan, Assistant Professor
D.N.Sc., Rush University
Pediatric pain, nonpharmacologic interventions, child stress and coping

Peden-McAlpine, Cynthia, Associate Professor
Ph.D., Adelphi University, Garden City, New York
Hermeneutic and phenomenological methods

Plumbo, Margaret, Instructor
M.S., C.N.M., University of Minnesota
Nurse midwifery, women's health, depression and the family

Robertson, Cheryl, Assistant Professor
Ph.D., University of Minnesota
Refugee health, war trauma and torture

Sieving, Renee, Associate Professor
Ph.D., University of Minnesota
Youth-health promotion

Snyder, Mariah, Professor Emeritus
Ph.D., University of Minnesota
Nursing interventions, identification and determining efficacy

Treat-Jacobson, Diane, Assistant Professor
Ph.D., University of Minnesota
Outcomes of exercise training in patients with claudication from peripheral arterial disease (PAD)

Urueta, Romana, Assistant Professor
M.S., University of California, Los Angeles
Pediatric nursing

Weisensee, Mary G., Assistant Professor Emeritus
Ph.D., Michigan State University
Caregivers' perceptions

Westra, Bonnie, Assistant Professor
Ph.D., University of Wisconsin, Milwaukee
Informatics, business process improvement, systems analysis, quality improvement, public policy, health policy

Wyman, Jean, Professor
Ph.D., University of Washington
Urinary incontinence, outcomes and measurement

Zunkel, Gretchen, Assistant Professor
Ph.D., University of Washington
Women's mental health; self regulation
Teaching Specialists

Alaniz, Karin
Ph.D., University of Minnesota
Asthma self-management in children, chronic illness in children

Anderson, Joyce
M.S., F.N.P., University of Minnesota

Aspen, Fern
M.S., C.N.M., University of Minnesota

Bata-Jones, Bonnie
M.S., F.N.P., University of North Dakota, Grand Forks
Diabetes education

Benbenek, Mary
M.S., F.N.P., P.N.P., University of Minnesota
Primary care, pharmacology, pediatrics

Bernardy, David
Ph.D.

Beyer, Nancy
M.S., University of Minnesota

Botz, Dana
M.S.N., University of Minnesota

Boyer, Cindy
Ph.D., Case Western Reserve University

Caines, Karen
M.S.N., Vanderbilt University

Carey, Kris
M.S.N., University of Minnesota
Oncology, diabetes, renal-adult medical/surgical

Coates, Jennifer
M.S.N., Emory University

Daniels, Jessie
M.A., University of Iowa
Medical surgical nursing

Dean, Patrick
M.S., Winona State University

Dierich, Mary
M.S.N., University of Minnesota
Urinary incontinence disorders

Eichten, Ellen
M.S.N., University of Minnesota

Eschle, Roseanne
M.A.

Fjone, Andra
M.N.

Flaten, Carol
M.S., University of Minnesota

Friedrich, Cheri
M.S., P.N.P., University of Minnesota

Frisvold, Melissa
M.S.N., C.N.M., University of Minnesota

Goering, Mary
M.S., University of Minnesota

Grimsrud, Nancy
M.A., P.N.P.

Hanninen, Linda
M.S., University of Minnesota
Maternal child health

Harpin, Scott
M.S., M.P.H., University of Minnesota

Hinck, Pat
M.S.

Juve, Cathy
Ph.D., University of Minnesota
Substance abuse in pregnancy

Kessler, Penny
M.N.

Larson, Karin
M.S., C.N.M., University of Utah

Larson, Karina
M.S., University of Minnesota

Leaman, Karen
M.S., University of Cincinnati

Moreland, Dee
M.S.N., University of Minnesota

Nuxoll, Kim
M.S.N.

Nygaard, Georgia
M.A., A.N.P., College of St. Catherine, St. Paul
Primary care of adults

Pfeiffer, Jeanne
M.P.H., University of Minnesota

Poe, Christine
M.P.H., P.N.P., University of Minnesota
Pediatric nurse practitioner

Pollard, Mary
M.Ed.

Quast, Sharon
M.P.H., University of Minnesota
Education/mental health and pediatrics, role modeling

Ringdahl, Deborah
M.S., C.N.M., University of Minnesota
Nurse midwifery

Rossi, Mary
M.S., C.N.M., University of Minnesota

§ Rowan, Mary, Director, Post-Baccalaureate Certificate Program
Ph.D., University of Minnesota
Maternal-child health/childbearing families

Schadewald, Diane
M.S.N., University of North Carolina, Chapel Hill

Smith, Kevin
M.S.N., F.N.P., University of Kentucky
Family nurse practitioner, advanced nurse assessment

Steffes, Mary
M.S., University of Minnesota
Adult health, critical care

Wachdorf, Cecilia
Ph.D.

Wilking, Judy
M.S., University of Minnesota

Zaccagnini, Mary
M.S., University of Minnesota

Institute of Technology (IT)

Administration

Steven Crouch, Professor and Dean

Mos Kaveh, Associate Dean, Research and Planning

Peter Hudleston, Associate Dean, Student Affairs

Roberta Humphreys, Associate Dean, Academic Affairs

Sara Beyer, , Director, Alumni Relations

Mark Sorenson-Wagner, Director, Career Center for Science and Engineering

James Leger, Director, Lower Division Programs

Madonna Monette, Director, Finance

TBA, Director, Development

Robert Pepin, Director, Honors

Benjamin G. Sharpe, Director, Admissions

Frank Snowden, Director, Academic Program for Excellence in Engineering and Science

Rhonda Zurn, Director, Communications

Karen Wolterstorff, Associate to the Dean

Faculty

In the following list, P.E. designates licensure as a professional engineer in Minnesota, unless otherwise indicated.

Aerospace Engineering and Mechanics

Balas, Gary J., Professor

Ph.D., California Institute of Technology
Aerospace control systems: experimental and theoretical

§ Beavers, Gordon S., Professor Emeritus
Ph.D., Cambridge University
Experimental fluid mechanics, rheological fluid mechanics

Candler, Graham V., Distinguished McKnight Industry Professor

Ph.D., Stanford University
Hypersonic aerodynamics, computational fluid dynamics, high-temperature gas physics thermochemical non-equilibrium flows

Elliott, Ryan, Assistant Professor

Ph.D., University of Michigan
Martensitic phase transformations; shape memory alloys; atomistic materials simulation; stability and bifurcation.

Enns, Dale F., Adjunct Associate Professor

Ph.D., Stanford University
Controls, dynamics, aeroelasticity, flight mechanics, dynamical systems

Fosdick, Roger L., Professor

Ph.D., Brown University
Thermodynamics and continuum mechanics at the applied and foundation levels, non-linear material behavior using the methods of applied mathematics

Garrard, William L., Professor

Ph.D., University of Texas at Austin
Dynamics and control of aerospace vehicles, parachute flight dynamics

Gebre-Egziabher, Demoz, P.E., Assistant Professor

Ph.D., Stanford University
Sensor fusion, design of multi-sensor systems for navigation, guidance and control of aerospace vehicles, global position system (GPS), inertial navigation, GPS-based precision landing systems

Hammer, Jeff, P.E., Industrial Professor of Design

B.A.E., University of Minnesota
Systems engineering, design, design analysis by simulation and experimental means; extensive industrial experience in systems simulation, control, design, and marketing

James, Ashley, Assistant Professor

Ph.D., Georgia Institute of Technology
Fluid dynamics, interfacial fluid flow and computational fluid dynamics

James, Richard D., Russell J. Penrose Professor and Distinguished McKnight University Professor

Ph.D., Johns Hopkins University
Thermodynamics of solids, phase transformations, micromagnetics; active materials, multiscale mathematical methods

Joseph, Daniel D., Regents Professor

Ph.D., Illinois Institute of Technology
Two phase flow, rheology, fluid mechanics, stability bifurcation

Ketema, Yohannes, Associate Professor

Ph.D., Royal Institute of Technology
Dynamics: stability and control of formations, astrodynamics

Leo, Perry H., Professor

Ph.D., Carnegie Mellon University
Phase transformations, micromechanics of defects in solids, biological materials, composites

Longmire, Ellen K., Professor

Ph.D., Stanford University
Experimental fluid mechanics, particle-laden and multiphase flow, turbulence, vortex dynamics microscale flows

Lundgren, Thomas S., Professor Emeritus

Ph.D., University of Minnesota
Fluid mechanics of vorticity as applied to turbulence structure, rotating flows and numerical analysis

Mahesh, Krishnan, Associate Professor

Ph.D., Stanford University
Numerical simulation and modeling of fluid flows

Marusic, Ivan, Associate Professor

Ph.D. University of Melbourne, Australia
Experimental and theoretical fluid mechanics, turbulent shear flows

Mettler, Bernard, Assistant Professor

Ph.D., Carnegie Mellon University
Autonomous guidance and control, trajectory planning, automated maneuvering, environment and task representation, system identification modeling

Shield, Thomas W., Professor

Ph.D., University of California, Berkeley
Experimental solid mechanics, mechanics of materials, elasticity, single crystal plasticity, shape-memory and magnetostrictive materials, fracture mechanics

Warner, William H., Professor Emeritus

Ph.D., Carnegie Institute of Technology
Optimal design problems for elastic bodies and structural elements using energy methods, biorthogonal series solutions of polyharmonic equations with application to thick plate and shell problems

Wilson, Theodore A., Professor Emeritus
Ph.D., Cornell University
Respiratory mechanics: modeling lung structure and deformation, respiratory flow, chest wall mechanics

§ Zhao, Yiyuan, Professor
Ph.D., Stanford University
Guidance/control, optimization, dynamics, air-traffic management, rotocraft flight trajectories

Astronomy

Davidson, Kris, Professor
Ph.D., Cornell University
Theoretical astrophysics, luminous stars, primordial element abundances

§ Gehrz, Robert, Professor and Director, Mt. Lemmon and O'Brien observatories
Ph.D., University of Minnesota
Infrared astronomy, novae, comets

§ Humphreys, Roberta, Professor
Ph.D., University of Michigan
Luminous stars, stellar evolution, optical spectroscopy, galactic structure

§ Jones, Terry, Professor and Assistant Director, Mt. Lemmon and O'Brien observatories
Ph.D., University of Hawaii
Infrared astronomy, late type stars, polarimetry

Jones, Thomas, Professor
Ph.D., University of Minnesota
Computational astrophysics, cosmic ray production, supernovae remnants, shocks

***§ Rudnick, Lawrence, Professor**
Ph.D., Princeton University
Galactic and extragalactic radio astronomy, supernova remnants

§ Skillman, Evan, Professor
Ph.D., University of Washington
Extragalactic observational astronomy, cosmic elemental abundances, dwarf galaxies

Williams, Liliya, Associate Professor
Ph.D., University of Washington
Cosmology, gravitational lensing

Woodward, Charles, Professor
Ph.D., University of Rochester, New York
Infrared astronomy, novae, comets

Woodward, Paul, Professor and Director of Laboratory for Computational Science and Engineering
Ph.D., University of California, Berkeley
Computational astrophysics, numerical techniques

Bio-based Products Engineering

Bowyer, James L., Professor
Ph.D., University of Minnesota
Applied wood science, life cycle analysis, environmental and forest policy

Bratkovich, Stephen M., Adjunct Associate Professor
Ph.D., Ohio State University
Extension education

Cheple, Marilou, Extension Educator and Instructor
M.S., University of Minnesota
Moisture in new construction

Erickson, Robert W., Professor Emeritus
Ph.D., University of Minnesota
Wood physics and moisture relations

Gertjeansen, Roland O., Professor Emeritus
Ph.D., University of Minnesota
Fiber and particle products technology

Grimsrud, David T., Professor Emeritus
Ph.D., University of Minnesota
Indoor air quality and building energy efficiency

Hendricks, Lewis T., Professor Emeritus
Ph.D., Michigan State University
Energy efficient buildings

Huelman, Patrick, Associate Professor and Extension Educator
M.S., Iowa State University
Energy efficient buildings

Petersen, Harlan D., Assistant Professor and Extension Educator
M.S., University of Minnesota
Wood drying and moisture relations

Ramaswamy, Shri, Professor and Department Head
Ph.D., State University of New York
Paper science and engineering

Sarkanen, Simo, Professor
Ph.D., University of Washington
Wood and lignin chemistry

Schmidt, Elmer L., Professor
Ph.D., University of Minnesota
Wood deterioration/protection

Seavey, Robert, Research Associate and Instructor
Ph.D., University of Minnesota
Wood physics

Severtson, Steven J., Associate Professor
Ph.D., Institute of Paper Science and Technology

Smith, Timothy M., Associate Professor
Ph.D., Penn State University
Environmental communications, integrated marketing communications, new product development

Sangwon Suh, Assistant Professor
Ph.D., Leiden University (Netherlands)
Corporate environmental management, life cycle assessment, industrial ecology

Ulrike Tschirner, Associate Professor
Ph.D., University of Karlsruhe, Germany
Lignin chemistry

Tze, William T. Y., Assistant Professor
Ph.D., University of Maine
Bio-composites, adhesion interphase, and micro-analyses

Jerrold Winandy, Adjunct Faculty
Ph.D., Oregon State University
Engineered biocomposites engineering properties of wood

Dr. K. Karen Yin, Professor
Ph.D., U of Maryland
Signal processing, industrial process simulation, design, optimization and control

Biomedical Engineering

Akkin, Taner, Assistant Professor
Ph.D., University of Texas, Austin
Biomedical optics and imaging

Barocas, Victor H., Assistant Professor and Director of Graduate Studies
Ph.D., University of Minnesota
Tissue engineering, ocular biomechanics, microfluidics, computer modeling

Bischof, John C., Professor
Ph.D., University of California, Berkeley
Experimental techniques to measure biophysics in cells and tissues during freezing, improved cryopreservation of sperm and tissue systems, characterization of cell injury

He, Bin, Professor and Director of Undergraduate Studies
Ph.D., Tokyo Institute of Technology
Functional biomedical imaging, electrophysiological neuroimaging, electrocardiographic tomography

Odde, David J., Associate Professor
Ph.D., Rutgers University
Cytoskeletal basis of cell growth and division

Sachs, Jonathan N., Assistant Professor
Ph.D., Johns Hopkins University
Molecular-level membrane interactions

Shen, Wei, Assistant Professor
Ph.D., California Institute of Technology
Biomaterials, tissue engineering, biomolecular engineering, cell-material interactions

Siegel, Ronald A., Professor and Department Head of Pharmaceutics
Sc.D., Massachusetts Institute of Technology
Drug/delivery, hydrogels, microfabrication, pharmacodynamics

Tranquillo, Robert T., Professor and Department Head
Ph.D., University of Pennsylvania
Cardiovascular and neural tissue engineering, cell

Wang, Chun, Assistant Professor
Ph.D., University of Utah
Biomaterials for drug and gene delivery and tissue engineering

Biosystems and Agricultural Engineering

Bhattacharya, Mrinal, Professor
Ph.D., University of Nebraska
Biodegradable polymers, biomaterials, tissue engineering, biosensors

Boedicker, James, Adjunct Associate Professor
Ph.D., North Carolina State University
Machinery systems, machine safety, livestock environment

Chaplin, Jonathan, P.E., Associate Professor
Ph.D., Iowa State University
Engineering safety, machinery systems design, instrumentation and control, energy systems

Clanton, Charles, P.E., Professor
Ph.D., University of Minnesota
Manure management: water and air quality, odor, manure storage, land application, and nutrient management

Goodrich, Philip, P.E., Associate Professor
Ph.D., Purdue University
Biomass renewable energy systems, odor control

Izuno, Forrest, Professor
Ph.D., Colorado State University
Water management, irrigation, drainage, water quality

Jacobson, Larry, P.E., Professor, and Extension Engineer
Ph.D., University of Minnesota
Environmentally friendly and energy conserving animal housing systems, airborne emissions, odor control, indoor air quality for agricultural, industrial, and residential buildings, waste management

Janni, Kevin, P.E., Professor, Extension Engineer, and Department Head
Ph.D., Purdue University
Animal housing systems, ventilation, odor control, air quality, biofiltration

Morey, R. Vance, Professor
Ph.D., Purdue University
Biomass densification, biomass for electricity and process heat at ethanol plants, post-harvest technology

Nieber, John, P.E., Professor
Ph.D., Cornell University
Watershed hydrology, biogeochemistry of watersheds, wetland hydrology, engineering of water resources quantity and quality, flow and transport in geological media and biological systems

Ruan, Roger, Professor
Ph.D., University of Illinois
Food engineering, value-added processing, biorefining, renewable energy, MRI and NMR applications, non-thermal plasma

Sands, Gary, Associate Professor and Extension Engineer
Ph.D., Colorado State University
Hydrology, water quality, water resources conservation and management

Shutske, John, Professor and Extension Agricultural Safety and Health Specialist
Ph.D., Purdue University
Safe design of products and production systems, homeland security risk assessment and communication, worker/public health impacts from technology/demographic change in biological industries

Wilcke, William, P.E. (Iowa), Professor and Extension Engineer
Ph.D., Iowa State University
Post-harvest technology, sustainable agriculture, agricultural energy sources

Wilson, Bruce, P.E. (Oklahoma), Professor
Ph.D., University of Kentucky
Hydrologic/water quality modeling, transport of surface water contaminants

Wright, Jerry, P.E., Associate Professor and Extension Engineer
M.S., North Dakota State University
Irrigation design, irrigation water management, drainage design, ground water quality

Zhu, Jun, Associate Professor and Extension Engineer
Ph.D., University of Illinois
Animal waste management and treatment techniques, manure odor control, nutrient recycling, renewable energy

Chemical Engineering and Materials Science

Bates, Frank S., Distinguished McKnight Professor
Sc.D., Massachusetts Institute of Technology
Thermodynamics and dynamics of polymers and polymer mixtures

Caretta, Raul, Professor
Ph.D., University of Minnesota
Unit operations, safety, surface characterization

§ Carter, C. Barry, Professor
D.Phil., Oxford University
Electron microscopy of semiconductors and ceramics, solid-state reaction and growth of thin films

§ Shelikowsky, James R., Professor
Ph.D., University of California, Berkeley
Structural/electronic properties of solids

Cococcioni, Matteo, Assistant Professor
Ph.D., International School for Advances Studies (SISSA)
Electronic conduction, cathode materials, electron transfer reactions

- Cook, Robert F., Associate Professor**
Ph.D., University of New South Wales
Fracture and deformation of materials and thin films
- § Cussler, Edward L., Professor**
Ph.D., University of Wisconsin
Mass transfer, novel separation processes
- Dahler, John S., Professor Emeritus**
Ph.D., University of Illinois
Nonequilibrium statistical mechanics, atomic collision theory
- Daoutidis, Prodromos, Professor**
Ph.D., University of Michigan
Nonlinear process control, process analysis and design
- Davis, H. Ted, Regents Professor**
Ph.D., University of Chicago
Colloid and interface science, statistical mechanics
- Derby, Jeffrey J., Professor**
Ph.D., Massachusetts Institute of Technology
Process modeling, materials processing, high-performance computing
- Dorfman, Kevin, Assistant Professor**
Ph.D., Massachusetts Institute of Technology
Transport phenomena, microfluidics, electrophoresis, biophysics
- Francis, Lorraine Falter, Professor**
Ph.D., University of Illinois at Urbana-Champaign
Ceramics processing, electrical and mechanical properties of ceramics
- Fredrickson, Arnold G., Professor Emeritus**
Ph.D., University of Wisconsin
Biochemical engineering, microbial populations
- Frisbie, C. Daniel, Associate Professor**
Ph.D., Massachusetts Institute of Technology
Organic electronic materials, materials chemistry
- Geankoplis, Christie J., Professor**
Ph.D., University of Pennsylvania
Biochemical engineering, reactors and mass transport
- Gerberich, William W., Professor**
Ph.D., University of California, Berkeley
Fracture micromechanics, interfacial defects
- Hu, Wei-Shou, Professor**
Ph.D., Massachusetts Institute of Technology
Biochemical engineering, mammalian cell cultures
- Kaznessis, Yiannis, Assistant Professor**
Ph.D., University of Notre Dame
Computer modeling of biological systems, bioinformatics
- Keller, Kenneth H., Professor**
Ph.D., Johns Hopkins University
Transport in biological systems, biomedical engineering
- Kokkoli, Erosini, Assistant Professor**
Ph.D., University of Illinois, Urbana-Champaign
Biomimetic surface science, bioengineering, biomaterials, colloidal interactions
- Kumar, Satish, Assistant Professor**
Ph.D., Stanford University
Transport processes, interfacial phenomena, microfluidics
- Leighton, Christopher, Assistant Professor**
Ph.D., University of Durham, England
Magnetic and electronic properties of thin film, magnetic materials
- Lodge, Timothy P., Professor**
Ph.D., University of Wisconsin
Polymer structure and dynamics, polymer characterization
- Macosko, Christopher W., Professor**
Ph.D., Princeton University
Polymer processing, rheology, polymer networks and blends
- Maynard, Jennifer, Assistant Professor**
Ph.D., University of Texas
Biotechnology, protein engineering, infectious diseases
- McClurg, Richard B., Assistant Professor**
Ph.D., California Institute of Technology
Thermodynamics and kinetics of phase changes
- McCormick, Alon V., Professor**
Ph.D., University of California, Berkeley
Ceramic synthesis, adsorption and diffusion, polymerization kinetics
- Morse, David C., Associate Professor**
Ph.D., University of Pennsylvania
Macromolecular and complex fluids, statistical mechanics and dynamics
- Norris, David J., Associate Professor**
Ph.D., Massachusetts Institute of Technology
Photonic crystals, nanomaterials, molecular spintronics
- Palmstrom, Chris J., Professor**
Ph.D., University of Leeds
Epitaxial growth processes and heterostructure formation, properties of thin films
- Schmidt, Lanny D., Regents Professor**
Ph.D., University of Chicago
Surface chemistry, catalysis and reactor modeling
- Scriven, L. E., Regents Professor**
Ph.D., University of Delaware
Flow processing solidification, porous media, microstructured liquids
- Shores, David A., Professor**
Ph.D., Pennsylvania State University
High temperature corrosion, fuel cells
- Smyrl, William H., Professor**
Ph.D., University of California, Berkeley
Electrochemical engineering, modeling electrochemical systems
- Snowden, Frank W., Professor**
Ph.D., University of New Orleans
Intraocular lens design and performance, cooperative education
- Srienc, Friedrich, Professor**
Ph.D., Technical University of Graz
Biochemical engineering, cell cycle kinetics
- Tsapatsis, Michael, Professor**
Ph.D., California Institute of Technology
Materials, separations, catalysis
- Tranquillo, Robert T., Professor**
Ph.D., University of Pennsylvania
Cell and tissue engineering
- Ward, Michael D., Distinguished McKnight Professor**
Ph.D., Princeton University
Molecular materials, piezoelectric transducers
- Wentzcovitch, Renata M. M., Associate Professor**
Ph.D., University of California, Berkeley
Electronic and structural properties of solids, ab initio molecular dynamics
- Chemistry**
- Arriaga, Edgar, Associate Professor**
Ph.D., Dalhousie University in Nova Scotia
Analytical chemistry
- Barany, George, Distinguished McKnight University Professor**
Ph.D., Rockefeller University
Organic and biological chemistry
- Blank, David, Assistant Professor**
Ph.D., University of California, Berkeley
Experimental physical chemistry
- Bowser, Michael, Assistant Professor**
Ph.D., University of British Columbia
Bioanalytical chemistry
- Buhlmann, Philippe, Assistant Professor**
Ph.D., Swiss Federal Institute of Technology
Analytical chemistry and materials
- Carr, Peter, Professor**
Ph.D., Pennsylvania State University
Analytical chemistry
- Cramer, Christopher, Associate Professor**
Ph.D., University of Illinois, Urbana-Champaign
Organic, physical, and computational chemistry
- Dahler, John, Professor Emeritus**
Ph.D., University of Wisconsin
Physical chemistry
- Davis, H. Ted, Regents Professor**
Ph.D., University of Chicago
Chemical engineering
- Distefano, Mark, Associate Professor**
Ph.D., Massachusetts Institute of Technology
Biological chemistry
- Ellis, John, Professor**
Ph.D., Massachusetts Institute of Technology
Inorganic chemistry
- Forsyth, Craig, Professor**
Ph.D., Cornell University
Organic and biological chemistry
- Gao, Jiali, Professor**
Ph.D., Purdue University
Biological and computational chemistry
- Gentry, W. Ronald, Professor Emeritus**
Ph.D., University of California, Berkeley
Physical chemistry
- Gladfelter, Wayne, Professor**
Ph.D., Pennsylvania State University
Inorganic, materials, and organic chemistry
- § Gray, Gary, Professor**
Ph.D., University of Iowa
Biological and organic chemistry
- Haynes, Christy, Assistant Professor**
Ph.D., Northwestern University
Physical chemistry, analytical chemistry, materials science
- Hillmyer, Marc, Associate Professor**
Ph.D., California Institute of Technology
Organic chemistry
- Hoye, Thomas, Professor**
Ph.D., Harvard University
Organic chemistry
- Kass, Steven, Professor**
Ph.D., Yale University
Organic and physical chemistry
- Leopold, Doreen, Associate Professor**
Ph.D., Harvard University
Physical chemistry
- Leopold, Ken, Professor**
Ph.D., Harvard University
Physical chemistry
- Lipsky, Sanford, Professor**
Ph.D., University of Chicago
Physical chemistry
- Lodge, Timothy, Professor**
Ph.D., University of Wisconsin
Analytical, materials, and physical chemistry
- § Mann, Kent, Professor**
Ph.D., California Institute of Technology
Inorganic chemistry
- McNeill, Kristopher, Assistant Professor**
Ph.D., University of California, Berkeley
Environmental chemistry
- § Miller, Larry, Professor Emeritus**
Ph.D., University of Illinois, Urbana-Champaign
Organic and materials chemistry
- Miller, Wilmer, Professor Emeritus**
Ph.D., University of Wisconsin
Physical chemistry
- Musier-Forsyth, Karin, Professor**
Ph.D., Cornell University
Biological and physical chemistry
- Noland, Wayland, Professor**
Ph.D., Harvard University
Organic chemistry
- Penn, R. Lee, Assistant Professor**
Ph.D., University of Wisconsin, Madison
Environmental, materials, and physical chemistry
- *§ Pignolet, Louis, Professor**
Ph.D., Princeton University
Inorganic and materials chemistry
- Que, Larry, Professor**
Ph.D., University of Minnesota
Inorganic and biological chemistry
- Roberts, Jeffrey, Professor**
Ph.D., Harvard University
Physical, inorganic, and materials chemistry
- Siepmann, J. Ilja, Professor**
Ph.D., University of Cambridge
Physical, materials, and computational chemistry
- Stankovich, Marian, Professor**
Ph.D., University of Texas
Analytical and biological chemistry
- Stein, Andreas, Professor**
Ph.D., University of Toronto
Inorganic, physical, and materials chemistry
- Taton, T. Andrew, Assistant Professor**
Ph.D., Harvard University
Organic and materials chemistry
- § Tolman, William, Professor**
Ph.D., University of California, Berkeley
Inorganic, organic, and biological chemistry
- § Truhlar, Donald, Professor**
Ph.D., California Institute of Technology
Physical and theoretical chemistry
- Veglia, Gianluigi, Assistant Professor**
Ph.D., University of Rome
Physical chemistry

York, Darrin, Associate Professor
Ph.D., University of North Carolina,
Chapel Hill
Physical, theoretical, and computational
chemistry

Zhu, Xiaoyang, Professor
Ph.D., University of Texas at Austin
Materials, physical, and analytical
chemistry

Civil Engineering

Arndt, Roger E. A., Professor
Ph.D., Massachusetts Institute of
Technology
Cavitation and bubble dynamics,
hydropower, noise generated by fluid flow

Arnold, William A., Associate Professor
Ph.D., Johns Hopkins University
Transformations of anthropogenic
chemicals aquatic systems, partitioning
and fate of organic chemicals

Barnes, Randal J., Associate Professor
Ph.D., Colorado School of Mines
Applied statistics, mathematical modeling,
groundwater mechanics

Brezonik, Patrick L., Professor
Ph.D., University of Wisconsin
Impacts of human activity on water
quality/chemistry

Capel, Paul D., Adjunct Professor
Ph.D., University of Minnesota
Environmental water chemistry,
chemodynamics, fate and transport

Crouch, Steven L., Professor
Ph.D., University of Minnesota
Boundary element methods applied to
rock mechanics problems

Davis, Gary A., Professor
Ph.D., University of Washington
Statistics in transportation planning, traffic
control, traffic safety

Detournay, Emmanuel, Professor
Ph.D., University of Minnesota
Mathematical modeling of geomechanical
processes, poroelasticity

§ Drescher, Andrew, Professor
Dr. Inz., Institute of Fundamental
Technological Research, Poland
Testing and modeling mechanical
behavior of geomaterials

Foufoula-Georgiou, Efi, Professor
Ph.D., University of Florida
Stochastic hydrology, multiscale
processes, landform morphology, climate
modeling

§ French, Catherine E., Professor
Ph.D., University of Illinois
Concrete behavior, materials/structural
systems, earthquake engineering,
durability

Galambos, Theodore V., Professor Emeritus
Ph.D., Lehigh University
Structural stability, behavior and design

Gulliver, John S., Professor
Ph.D., University of Minnesota
Environmental fluid mechanics, chemical
fate and transport

Guzina, Bojan B., Associate Professor
Ph.D., University of Colorado
Mathematical modeling of wave
propagation, seismic site characterization

Hill, Kimberly, Assistant Professor
Ph.D., University of Minnesota
Granular flows and segregation, non-
Newtonian fluids

Hondzo, Miki, Associate Professor
Ph.D., University of Minnesota
Experimental work and numerical
prediction techniques in environmental
fluid dynamics

Hozalski, Raymond M., Associate Professor
Ph.D., Johns Hopkins University
Water/wastewater treatment, biofilms,
natural organic matter characterization

§ Johnson, Gerald W., Associate Professor
Ph.D., University of Wisconsin
Applications of surveying and mapping

Khazanovich, Lev, Associate Professor
Ph.D., University of Illinois, Urbana-
Champaign
Concrete and asphalt pavements, finite
element analysis of soil-structure
interaction

§ Labuz, Joseph F., Professor
Ph.D., Northwestern University
Experimental geomechanics, fracture of
quasi-brittle materials

LaPara, Timothy, Assistant Professor
Ph.D., Purdue University
Biological wastewater treatment,
wastewater microbiology, environmental
microbiology, structure-function
relationships in mixed microbial
communities, microbial ecology,
microbial evolution

Levinson, David M., Associate Professor
Ph.D. University of California, Berkeley
Transportation economics and financing,
network deployment, integrated
transportation and land use planning

Liu, Henry, Assistant Professor
Ph.D., University of Wisconsin
Traffic controlled operations,
transportation network modeling

Marasteanu, Mihai, Assistant Professor
Ph.D., Pennsylvania State University
Applications of fundamental theories to
bituminous materials characterization,
modeling, and experimental testing

Michalopoulos, Panos G., Professor
Ph.D., University of Florida
Traffic engineering operations and
control, traffic flow theory

Novak, Paige J., Associate Professor
Ph.D., University of Iowa
Toxic compound biodegradation,
interactions between anaerobes and metals

Okazaki, Taichiro, Assistant Professor
Ph.D., University of Texas at Austin
Steel structures, welded connections

Porte-Agel, Fernando, Associate Professor
Ph.D., Johns Hopkins University
Fluid mechanics in the environment,
hydrology, micrometeorology, atmospheric
boundary layer

Schultz, Arturo E., Associate Professor
Ph.D., University of Illinois, Urbana-
Champaign
Concrete behavior, masonry systems,
steel-concrete construction, earthquake
engineering

Semmens, Michael J., Professor
Ph.D., University College London
Physical-chemical processes in
environmental science and engineering

Shield, Carol K., Associate Professor
Ph.D., University of Illinois, Urbana-
Champaign
Solid mechanics modeling, composite
materials

*** Smith, Karl A., Professor**
Ph.D., University of Minnesota
Project management, modeling systems,
engineering education

Stefan, Heinz G., Professor
Ph.D., University Paul Sabatier, Toulouse,
France
Water quality modeling, environmental
fluid mechanics, hydraulic structures

§ Stolarski, Henryk K., Professor
Ph.D., Institute of Fundamental
Technological Research, Warsaw, Poland
Nonlinear structural mechanics, plates and
shells, computational mechanics

Strack, Otto D. L., Professor
Dr. Ir., Delft University of Technology,
The Netherlands
Computer and mathematical modeling of
groundwater and transport

Voller, Vaughan R., Professor
Ph.D., Sunderland Polytechnic, UK
Numerical modeling of free and moving
boundary problems

Wojtkiewicz, Steven F., Assistant Professor
Ph.D., University of Illinois, Urbana-
Champaign
Stochastic modeling, control of structural
systems

Computer Science

Boley, Daniel, Professor
Ph.D., Stanford University
Numerical analysis, linear algebra, control
theory

Carlis, John, Professor
Ph.D., University of Minnesota
Database systems

Chen, Baoquan, Assistant Professor
Ph.D., SUNY, Stony Brook, New York
Computer graphics, visualization

Du, David Hung-Chuang, Professor
Ph.D., University of Washington, Seattle
High-speed networking, multimedia
applications, high-performance computing

Fox, David W., Professor Emeritus
Ph.D., University of Maryland
Applied mathematics, eigenvalue
problems

Gini, Maria, Professor
Doctor of Physics, University of Milan
Artificial intelligence, robotics

Heimdahl, Mats, Associate Professor
Ph.D., University of California, Irvine
Software engineering, safety critical
systems

Hsu, Wei, Associate Professor
Ph.D., University of Wisconsin, Madison
Compiler optimization, run-time
optimization systems, system architectures

Interrante, Victoria, Associate Professor
Ph.D., North Carolina at Chapel Hill
Visualization, visual perception, computer
graphics, image processing, virtual reality

Janardan, Ravi, Professor
Ph.D., Purdue University
Computational geometry, algorithm and
data structure design, computer graphics

Karypis, George, Associate Professor
Ph.D., University of Minnesota
Data mining, bioinformatics, information
retrieval, e-commerce, parallel processing

Kim, Yongdae, Assistant Professor
Ph.D., University of Southern California
Group security, network security

Konstan, Joseph, Professor
Ph.D., University of California, Berkeley
Human-computer interaction,
collaborative filtering, multimedia
systems, hypermedia

Kumar, Vipin, Professor
Ph.D., University of Maryland
Parallel processing, data mining

Liang, Donglin, Assistant Professor
Ph.D., Georgia Institute of Technology
Software engineering, software
visualization, program testing and analysis

Meyer, Gary, Associate Professor
Ph.D., Cornell University
Computer graphics, color synthesis and
reproduction

Nadathur, Gopalan, Associate Professor
Ph.D., Pennsylvania State University
Computational logic, programming
language design and implementation

Norberg, Arthur, Professor Emeritus
Ph.D., University of Wisconsin
History of science and technology

Papanikolopoulos, Nikolaos, Professor
Ph.D., Carnegie Mellon University
Robotics, computer vision, sensors for
transportation applications

Riedl, John, Professor
Ph.D., Purdue University
Collaborative systems, database systems,
fault tolerance, computer networks,
object-oriented systems

Roumeliotis, Stergios, Assistant Professor
Ph.D., University of Southern California
Robotics, autonomous vehicle navigation,
distributed robotics

Rosen, J. Ben, Professor Emeritus
Ph.D., Columbia University
Numerical optimization, parallel
computing

Saad, Yousef, Professor
Doctorat, University of Grenoble, France
Sparse matrix computations, parallel
computation, eigenvalue problems,
nonlinear equations

Schrater, Paul, Assistant Professor
Ph.D., California State University, Long
Beach
Human and computer vision, motor
control and haptics, statistical inference,
pattern recognition

Schuler, William, Assistant Professor
Ph.D., University of Pennsylvania
Speech and natural language processing
systems

Shekhar, Shashi, Professor
Ph.D., University of California, Berkeley
Data and knowledge engineering, spatial
database, geographic information systems

Shragowitz, Eugene, Professor
Ph.D., National Science Research
Laboratory, Moscow
Computer aided design (CAD) of
electronic systems, soft computing,
combinatorial optimization

Slagle, James R., Professor Emeritus
Ph.D., Massachusetts Institute of
Technology
Artificial intelligence (expert systems,
neural networks, automated temporal
logic)

Srivastava, Jaideep, Professor
Ph.D., University of California, Berkeley
Databases, multimedia systems, data
mining

Stein, Marvin, Professor Emeritus
Ph.D., UCLA
Machine arithmetic, organization of programming systems

Terveen, Loren, Associate Professor
Ph.D., University of Texas at Austin
Human-computer interaction, computer-supported cooperative work

Tripathi, Anand, Professor
Ph.D., University of Texas at Austin
Distributed and network computing systems, object-oriented programming

Van Wyk, Erik, Assistant Professor
Ph.D., University of Iowa
Programming languages

Voyles, Richard, Associate Professor
Ph.D., Carnegie Mellon University
Real-time systems, robotics, multiagent systems, teletaction

Weissman, Jon, Associate Professor
Ph.D., University of Virginia
Distributed systems, metacomputing, cluster computing

Yew, Pen-Chung, Professor
Ph.D., University of Illinois, Urbana-Champaign
Computer architecture, parallel machine design, parallelizing compilers

Zhang, Zhi-Li, Associate Professor
Ph.D., University of Massachusetts
Computer networking and multimedia systems

Electrical Engineering

Albertson, Vernon D., P.E., Professor Emeritus
Ph.D., University of Wisconsin, Madison
Electric power analysis and transients, geomagnetic pulse effects

Amin, Massoud, Professor and Director for the Development of Technological Leadership
D.Sc., Washington University
Reconfigurable and self-repairing controls, infrastructure security

Bailey, Fredric N., Professor Emeritus
Ph.D., University of Michigan
Control systems, integrating new semiconductor technology

Bazargan, Kiarash, Assistant Professor
Ph.D., Northwestern University
Computer-aided design of VLSI

§ Campbell, Stephen A., Professor
Ph.D., Northwestern University
Materials and fabrication processes for silicon-based structures

Champlin, Keith S., Professor Emeritus
Ph.D., University of Minnesota
New devices for fabricating monolithic microwave integrated circuits

Cherkassky, Vladimir S., Professor
Ph.D., University of Texas at Austin
Parallel processing, computer networks, fault-tolerant computing

Cohen, Philip I., Professor
Ph.D., University of Wisconsin, Madison
Microelectronics materials, crystal growth

Drayton, Rhonda Franklin, Assistant Professor
Ph.D., University of Michigan
High-frequency and microwave circuits

Ebbini, Emal S., Associate Professor
Ph.D., University of Illinois, Urbana
Digital signal processing and biomedical engineering

Ernie, Douglas W., Associate Professor
Ph.D., University of Minnesota
Gaseous electronics and plasma engineering

Georgiou, Tryphon T., Professor
Ph.D., University of Florida
Control and systems theory, recursive modeling and identification

Giannakis, Georgios B., Professor
Ph.D., University of Southern California
Statistical signal processing and its application to wired and wireless communications

§ Gopinath, Anand, Professor
Ph.D., University of Sheffield
Microelectronics, microwaves, optics, optoelectronic devices

Harjani, Ramesh, Associate Professor
Ph.D., Carnegie Mellon University
Computer-aided design of analog circuits

Higman, Ted K., Associate Professor
Ph.D., University of Illinois
Electron device fabrication

Holte, James E., Associate Professor
Ph.D., University of Minnesota
Bioelectrical sciences and biomedical engineering

Jacobs, Heiko, Associate Professor
Ph.D., ETH in Zurich
Micro- and nanotechnology

Jindal, Nihar, Assistant Professor
Ph.D., Stanford University
Information theory, communication theory

Jovanovic, Mihaile, Assistant Professor
Ph.D., University of California, Santa Barbara
Distributed control systems

Judy, Jack H., Professor Emeritus
Ph.D., University of Minnesota
Magnetics and magnetic recording, multilayer thin film materials

Kain, Richard Y., Professor Emeritus
Sc.D., Massachusetts Institute of Technology
Computer system architecture

§ Kaveh, Mostafa, Professor and Associate Dean for Research and Planning
Ph.D., Purdue University
Statistical signal processing, communications, and image processing

Kieffer, John, Professor
Ph.D., University of Illinois, Urbana-Champaign
Information theory, communications, digital signal processing

Kiehl, Richard A., Professor
Ph.D., Purdue University
Microelectronics and nanoelectronics

Kim, Hyung-il, (Chris) Assistant Professor
Ph.D., Purdue University
High performance, low power VLSI design

Kinney, Larry L., Professor
Ph.D., University of Iowa
Digital system and digital computer design

Kumar, K. S. P., Professor Emeritus
Ph.D., Purdue University
Adaptive control, self-tuning regulators, and system identification

Lambert, Robert F., Professor Emeritus
Ph.D., University of Minnesota
Acoustics, computer-controlled automatic measurement of sound

Lee, Thomas (Shao-Chung) S., Professor Emeritus
Ph.D., University of Minnesota
Waves and fluids

§ Leger, James R., Professor
Ph.D., University of California, San Diego
Micro-optics, Fourier optics and holography

§ Lijja, David, Professor and Department Head
Ph.D., University of Illinois, Urbana-Champaign
High-performance computer architecture, parallel processing, supercomputing

Luo, Zhi-Quan (Tom), Professor
Ph.D., Massachusetts Institute of Technology
Optimization, communication, signal processing

§ Mohan, Ned, Professor
Ph.D., University of Wisconsin, Madison
Power electronics and electromechanics for motion control

Moon, Jaekyun, Professor
Ph.D., Carnegie Mellon University
Communications and signal processing

Nathan, Marshall I., Professor Emeritus
Ph.D., Harvard University
High speed III-V semiconductor device physics

Oh, Sang-Hyun, Assistant Professor
Ph.D., Stanford University
Microsystems, biotechnology

Parhi, Keshab K., Professor
Ph.D., University of California, Berkeley
VLSI signal and image processing

§ Peria, William T., Professor Emeritus
Ph.D., University of British Columbia
Physical electronics, fabrication of integrated circuits

§ Polla, Dennis L., Professor
Ph.D., University of California, Berkeley
Design and fabrication of integrated microsensors and microactuators

Riedel, Marc, Assistant Professor
Ph.D., California Institute of Technology
Digital circuits, data structures and algorithms, computational biology

Riaz, Mahmoud, Professor Emeritus
Sc.D., Massachusetts Institute of Technology
Electrical energy conversion, control, and processing

Robbins, William P., Professor
Ph.D., University of Washington
Sonics and ultrasonics, sensors and microactuators

Roychowdhury, Jaijeet, Associate Professor
Ph.D., University of California, Berkeley
Computer-aided verification of analog circuits

Ruden, P. Paul, Professor
Ph.D., University of Stuttgart, FRG
Theory of novel semiconductor devices

Sapatnekar, Sachin, Professor
Ph.D., University of Illinois at Urbana-Champaign
Computer aided design of VLSI systems

Sapiro, Guillermo, Professor
D.Sc., Technion University, Israel
Computer vision systems

Sobelman, Gerald E., Associate Professor
Ph.D., Harvard University
VLSI design

Stadler, Bethanie, Assistant Professor
Ph.D., Massachusetts Institute of Technology
Advanced materials for devices and systems

Talghader, Joseph, Associate Professor
Ph.D., University of California, Berkeley
Microelectronics, optoelectronics

Tewfik, Achmed H., Professor
Sc.D., Massachusetts Institute of Technology
Signal processing for multimedia

Victoria, Randall, Professor
Ph.D., University of California, Berkeley
Magnetics

Wang, Jian Ping, Associate Professor
Ph.D., Chinese Academy of Science
Magnetics, storage technology

Warner, R. M., Jr., Professor Emeritus
Ph.D., Case Institute of Technology
Electronic device and circuit development

Wollenberg, Bruce F., Professor
Ph.D., University of Pennsylvania
Power systems engineering

Yoon, Guisik, Associate Professor
Ph.D., University of Michigan
Integrated MEMS, VLSI circuit and system design

Geological Engineering

Faculty listed under Civil Engineering

Geology and Geophysics

* **Alexander, E. Calvin, Jr., Professor**
Ph.D., University of Missouri, Rolla
Hydrogeology, karst hydrogeology and geomorphology, isotope geochemistry, groundwater pollution

Almendinger, James, Adjunct Faculty
Ph.D., University of Minnesota
Quaternary paleoecology

Banerjee, Subir K., Professor
Ph.D., Sc.D., Cambridge University
Paleomagnetism, geomagnetism, climate change

Chandler, Val W., Adjunct Faculty
Ph.D., Purdue University
Gravity and magnetic exploration, Precambrian geology

Edlund, Mark, Adjunct Faculty
Ph.D., University of Michigan
Quaternary paleoecology

Edwards, R. Lawrence, Professor
Ph.D., California Institute of Technology
Isotope geochemistry, climatic and oceanographic changes

Engstrom, Daniel R., Adjunct Faculty
Ph.D., University of Minnesota
Paleolimnology, limnology, geochemistry

Fox, David L., Assistant Professor
Ph.D., University of Michigan
Paleobiology, paleoclimatology, stable isotope ecology

Hirschmann, Marc M., Associate Professor
Ph.D., University of Washington
Geochemistry and experimental petrology, igneous petrogenesis, mantle melting

Hudleston, Peter J., Professor
Ph.D., Imperial College
Structural geology, deformation, faults and folds, tectonic history

Ito, Emi, Professor
Ph.D., University of Chicago
Stable isotope geochemistry and paleoclimatology

Jackson, Michael, Adjunct Faculty

Ph.D., University of Michigan
Rock magnetism

Jennings, Carrie J., Adjunct Faculty

Ph.D., University of Minnesota
Glacial processes, Minnesota glacial history, ice sheet dynamics

Johnson, Robert, Adjunct Faculty

Ph.D., Iowa State University
Mechanisms of climate change

Kirkby, Kent C., Adjunct Faculty

Ph.D., University of Wisconsin, Madison
Sedimentary geology, petroleum geology

Kleinspehn, Karen L., Associate Professor

Ph.D., Princeton University
Tectonics and basin analysis, neotectonics, sedimentary basins

Kohlstedt, David L., Professor

Ph.D., University of Illinois
Earth and planetary materials, mechanical properties of rocks, geodynamics and geochemistry

Matsumoto, Katsumi, Assistant Professor

Ph.D., Columbia University
Geochemistry and oceanography

Miller, James D., Jr., Adjunct Faculty

Ph.D., University of Minnesota
Geologic mapping, petrology, metallogeny

Moskowitz, Bruce M., Professor

Ph.D., University of Minnesota
Rock magnetism, paleomagnetism, biogeomagnetism

*** Paola, Christopher, Professor**

Sc.D., Massachusetts Institute of Technology/Woods Hole Oceanographic Institution
Sedimentology, fluvial processes and morphology, stratigraphy

Perg, Leslie, Assistant Professor

Ph.D., University of California, Santa Cruz
Surface processes, geochronology

Pfannkuch, Hans-Olaf, Professor

Dr. Ing., Paris University
Hydrogeology, groundwater-surface interactions, hydrocarbon contamination of shallow aquifers

Revenaugh, Justin, Professor

Ph.D., Massachusetts Institute of Technology
Seismology, geostatistics

Runkel, Anthony C., Adjunct Faculty

Ph.D., University of Texas at Austin
Stratigraphic and sedimentologic attributes of Paleozoic strata

Saar, Martin, Assistant Professor

Ph.D., University of California, Berkeley
Hydrogeology and geofluids

Seyfried, William E., Jr., Professor

Ph.D., University of Southern California
Aqueous geochemistry, experimental and theoretical modeling of hydrothermal systems

Stout, James H., Professor

Ph.D., Harvard University
Petrology, geochemistry, materials science, igneous and metamorphic petrology

Thorleifson, Harvey, Professor

Ph.D., University of Colorado
Quaternary geology

Weiblen, Paul W., Professor Emeritus

Ph.D., University of Minnesota
Precambrian geology of Minnesota, crustal evolution and mineralization

Whitney, Donna L., Professor

Ph.D., University of Washington
Metamorphic geology and tectonics, petrology and geochemistry of mountain belts

Wright, Herbert E., Jr., Regents Professor Emeritus

Ph.D., Harvard University
Quaternary paleoecology, paleolimnology, paleoclimatology, glacial geomorphology

Yuen, David A., Professor

Ph.D., University of California, Los Angeles
Numerical modeling of geophysical and geological phenomena, mantle convection

Mathematics

Adams, Scot, Professor

Ph.D., University of Chicago
Dynamical systems, foliations, ergodic theory

Aeppli, Alfred, Professor Emeritus

Ph.D., ETH, Zurich, Switzerland
Topology and geometry

Agard, Stephen, Professor

Ph.D., University of Michigan
Actuarial mathematics, complex variables

Anderson, Greg, Professor

Ph.D., Princeton University
Algebraic number theory, algebraic geometry

Aronson, Donald, Professor Emeritus

Ph.D., Massachusetts Institute of Technology
Partial differential equations, applied mathematics

Baxter, John R., Professor

Ph.D., University of Toronto
Probability

Bobkov, Sergey, Professor

Ph.D., Steklov Institute
Partial differential equations

Bramson, Maury, Professor

Ph.D., Cornell University
Probability

Calderer, Maria Carme, Professor

Ph.D., Heriot-Watt University
Applied mathematics, partial differential equations

Ciocan-Fontanine, Ionut, Associate Professor

Ph.D., University of Utah
Algebraic geometry

Cockburn, Bernardo, Associate Professor

Ph.D., University of Chicago
Numerical analysis

Conn, Jack, Associate Professor

Ph.D., Princeton University
Mathematical physics, differential geometry

Diaconu, Adrian, Assistant Professor

Ph.D., Brown University
Number theory

Eagon, John A., Professor Emeritus

Ph.D., University of Chicago
Commutative algebra

Feshbach, Mark, Professor

Ph.D., Stanford University
Topology

§ Frank, David, Associate Professor

Ph.D., University of California, Berkeley
Topology

Fristedt, Bert, Professor

Ph.D., Massachusetts Institute of Technology
Probability

Fuhrken, E. Gebhard, Associate Professor Emeritus

Ph.D., University of California, Berkeley
Logic

Garrett, Paul, Professor

Ph.D., Princeton University
Number theory

Gershenson, Hillel, Associate Professor Emeritus

Ph.D., University of Chicago
Topology

Goldman, Jay, Professor Emeritus

Ph.D., Princeton University
Combinatorics and knots

Gray, Lawrence, Professor

Ph.D., Cornell University
Probability

Gulliver, Robert, Professor

Ph.D., Stanford University
Partial differential equations, differential geometry

Harris, Morton, Professor Emeritus

Ph.D., Harvard University
Group theory

Hejhal, Dennis, Professor

Ph.D., Stanford University
Analysis, number theory

Jain, Naresh, Professor

Ph.D., Stanford University
Probability

Jiang, Dihua, Professor

Ph.D., The Ohio State University
Group representation theory, number theory, harmonic analysis

Jodeit, Max A., Jr., Professor

Ph.D., Rice University
Harmonic analysis

Kahn, Donald, Professor

Ph.D., Yale University
Topology

Keel, Markus, Assistant Professor

Ph.D., Princeton University
Partial differential equations, harmonic analysis

Keynes, Harvey B., Professor

Ph.D., Wesleyan University
Topological dynamics, ergodic theory

§ Krylov, N. V., Professor

D.Sc., Moscow State University
Probability and partial differential equations

Lerman, Gilad, Assistant Professor

Ph.D., Yale University
Computational harmonic analysis

Li, Tian-Jun, Associate Professor

Ph.D., Brandeis University
Differential geometry, symplectic topology

Littman, Walter, Professor

Ph.D., New York University
Partial differential equations

Luskin, Mitchell, Professor

Ph.D., University of Chicago
Numerical analysis

Lyubeznik, Gennady, Professor

Ph.D., Columbia University
Commutative algebra, algebraic geometry

Marden, Albert, Professor

Ph.D., Harvard University
Complex dynamics

McCarthy, Charles, Professor Emeritus

Ph.D., Yale University
Functional analysis

McGehee, Richard, Professor

Ph.D., University of Wisconsin
Dynamical systems, visualization

Messing, William, Professor

Ph.D., Princeton University
Algebraic geometry

Meyers, Norman, Professor

Ph.D., Indiana University
Partial differential equations

Miller, Ezra, Assistant Professor

Ph.D., University of California, Berkeley
Algebraic geometry, combinatorics, commutative algebra, discrete geometry

Miller, Willard, Professor

Ph.D., University of California, Berkeley
Applied mathematics

Miracle, Chester, Associate Professor

Ph.D., University of Kentucky
Math education, harmonic analysis

Moeckel, Richard, Professor

Ph.D., University of Wisconsin
Dynamical systems, celestial mechanics

Neuhauser, Claudia, Adjunct Associate Professor

Ph.D., Cornell University
Probability

Ni, Wei-Ming, Professor

Ph.D., New York University
Partial differential equations, nonlinear functional analysis

Nitsche, Johannes, Professor Emeritus

Dr. Phil., University of Göttingen, Germany
Partial differential equations, minimal surfaces

Nykamp, Duane, Assistant Professor

Ph.D., New York University
Analysis

Odlyzko, Andrew, Professor

Ph.D., Massachusetts Institute of Technology
Computational complexity

Olver, Peter, Professor

Ph.D., Harvard University
Mathematical physics

Othmer, Hans, Professor

Ph.D. University of Minnesota
Bio-mathematics

Polacik, Peter, Professor

Ph.D., Comenius University
Partial differential equations, dynamics systems

Pour-Ei, Marian B., Professor Emeritus

Ph.D., Harvard University
Mathematical logic

Prikry, Karel, Professor

Ph.D., University of California, Berkeley
Logic and set theory

Reich, Edgar, Professor Emeritus

Ph.D., University of California, Los Angeles
Complex variables

Reiner, Victor, Professor and McKnight Land-Grant Professor

Ph.D., Massachusetts Institute of Technology
Combinatorics

Reitich, Fernando, Associate Professor

Ph.D., University of Minnesota
Applied mathematics

Rejto, Peter, Professor

Ph.D., New York University
Functional analysis

Richter, Wayne, Associate Professor

Ph.D., Princeton University
Logic and set theory

Roberts, Joel, Professor

Ph.D., Harvard University
Commutative algebra

Safonov, Mikhail, Professor

Ph.D., Moscow State University
Probability and partial differential equations

Santosa, Fadil, Professor

Ph.D., University of Illinois
Applied mathematics

Scheel, Arnd, Professor

Ph.D., Free University of Berlin
Partial differential equations

Sell, George R., Professor

Ph.D., University of Michigan
Differential equations

Shen, Jianhong, Assistant Professor

Ph.D., Massachusetts Institute of Technology
Image and vision analysis

Sibuya, Yasutaka, Professor Emeritus

D.Sc., Tokyo University
Ordinary differential equations

Sperber, Steven I., Professor

Ph.D., University of Pennsylvania
Algebraic number theory and geometry

Stanton, Dennis, Professor

Ph.D., University of Wisconsin
Combinatorics

Storvick, David, Professor Emeritus

Ph.D., University of Michigan
Complex variables

Sverak, Vladimir, Professor

Ph.D., Charles University, Prague, Czech Republic
Calculus of variations, nonlinear elasticity

Voronov, Alexander, Associate Professor

Ph.D., Moscow State University
Mathematical physics, algebra

Wang, Jiaping, Associate Professor

Ph.D., Cornell University
Differential geometry

Webb, Peter, Professor

Ph.D., University of London
Group theory

Weinberger, Hans, Professor Emeritus

Ph.D., Carnegie Institute of Technology
Applied mathematics, fluid analysis

White, Dennis, Professor

Ph.D., University of California, San Diego
Combinatorics

Zeitouni, Ofer, Professor

Ph.D., Technion, Haifa, Israel
Probability theory, random matrices, communication and information theories

Mechanical Engineering**Aksan, Alptekin, Assistant Professor**

Ph.D., Michigan State University
Biopreservation/biothermodynamics, desiccation/vitrification phenomena, applications of MEMS in bioengineering and bioheat and mass transfer

Alexander, Jennifer K., Assistant Professor

Ph.D., University of Washington, Seattle
Comparative history of industrial culture

§ Arora, Sant Ram, Professor

Ph.D., Johns Hopkins University
Optimization concepts, resource allocation, capacity sizing, production facilities

§ Benjaafar, Saifallah, Professor

Ph.D., Purdue University
Modeling, design and control of automated manufacturing of production systems

§ Bischof, John C., Professor

Ph.D., University of California, Berkeley
Bioengineering, bioheat and mass transfer, cryobiology, hyperthermia

§ Blackshear, Perry L., Jr., Professor Emeritus

Ph.D., Case Institute of Technology
Bioengineering, combustion, applied thermodynamics

§ Chase, Thomas R., Professor

Ph.D., University of Minnesota
Computer-aided design, mechanical engineering database, kinematics, machine design

Cooper, William L., Associate Professor

Ph.D., Georgia Institute of Technology
Stochastic models, revenue management, queuing theory

Cui, Tianhong, Associate Professor

Ph.D., Chinese Academy of Sciences
Micro/nanomanufacturing, MEMS/NEMS (micro/nano electro mechanical systems), polymer/organic microelectronics

§ Davidson, Jane H., Professor

Ph.D., Duke University
Fluid mechanics, solar energy, environmental engineering

§ Donath, Max, Professor

Ph.D., Massachusetts Institute of Technology
Sensors and control systems as applied to robotics and vehicles

Dumitrica, Traian, Assistant Professor

Ph.D., Texas A & M
Theoretical and computational aspects of materials science, mechanical properties, stability and behavior of distinct nanoscale objects

§ Durfee, William K., Professor

Ph.D., Massachusetts Institute of Technology
Product design, real-time control, biomechanics, rehabilitation engineering

***§ Erdman, Arthur G., P.E., Professor**

Ph.D., Rensselaer Polytechnic Institute
Computer-aided design, kinematics, biomechanics, microelectromechanical systems

§ Fletcher, Edward A., Professor Emeritus

Ph.D., Purdue University
Applied thermodynamics, very high temperature solar processes and thermochemistry

§ Frohrib, Darrell A., Professor Emeritus

Ph.D., University of Minnesota
Engineering design, vibration

Garrick, Sean, Associate Professor

Ph.D., State University of New York at Buffalo
Heat and mass transfer, fluid mechanics, numerical methods

§ Girshick, Steven L., Professor

Ph.D., Stanford University
Plasma technology, materials synthesis, nucleation theory

§ Goldstein, Richard J., Regents Professor

Ph.D., University of Minnesota
Heat transfer, thermodynamics, fluid mechanics

Gupta, Diwakar, Professor

Ph.D., University of Waterloo
Stochastic processes and queuing systems

Hayes, Caroline C., Professor

Ph.D., Carnegie Mellon University
Manufacturing planning and feature extraction, artificial intelligence

Hubel, Allison, Associate Professor

Ph.D., Massachusetts Institute of Technology
Bioengineering, preservation of engineered cells and tissues, biotransport

§ Heberlein, Joachim V.R., Professor

Ph.D., University of Minnesota
Plasma technology, electrode effects, plasma coating and waste-treatment processes

***§ Ibele, Warren E., Professor Emeritus**

Ph.D., University of Minnesota
Heat transfer, thermodynamics, power

§ Kittelson, David B., Professor

Ph.D., University of Cambridge, England
Energy conversion, particle technology, combustion and propulsion

§ Klamecki, Barney E., Professor

Ph.D., University of Illinois, Urbana-Champaign
Manufacturing process modeling and control theory

§ Kortshagen, Uwe, Professor

Dr. rer. nat., University of Bochum, Germany
Low-pressure processing plasmas, plasma contamination control, plasma modeling

§ Kuehn, Thomas H., P.E., Professor

Ph.D., University of Minnesota
HVAC and refrigeration, heat and mass transfer, filtration

§ Kulacki, Francis A., Professor

Ph.D., University of Minnesota
Convective transfer in porous and fractured media

§ Kvalseth, Tarald O., Professor Emeritus

Ph.D., University of California, Berkeley
Human factors and ergonomics

§ Lewis, Jack L., Professor

Ph.D., University of California, Berkeley
Biomechanics

§ Li, Perry Y., Associate Professor

Ph.D., University of California, Berkeley
Nonlinear and intelligent control, biomechanics, rehabilitation engineering, transportation systems, manufacturing

§ Liu, Benjamin Y. H., Regents Professor Emeritus

Ph.D., University of Minnesota
Particle technology, environmental control, solar energy

§ Mantell, Susan C., Professor

Ph.D., Stanford University
Manufacturing and design with composite materials

§ Marple, Virgil A., Professor

Ph.D., University of Minnesota
Particle technology and aerosol science, environmental engineering

McMurry, Peter H., Professor

Ph.D., California Institute of Technology
Aerosol science and engineering, environmental engineering

Miller, Lisa, Assistant Professor

Ph.D., Georgia Institute of Technology
Integer programming and combinatorial optimization and transportation and logistics planning

Ogata, Katsuhiko, Professor Emeritus

Ph.D., University of California, Berkeley
Control systems, optimization techniques
Patankar, Suhas V., Professor Emeritus
Ph.D., University of London, England
Heat and mass transfer, fluid

§ Pfender, Emil, Professor Emeritus

Dr. Ing., University of Stuttgart, Germany
Arc technology, plasma heat transfer and plasma processing

§ Pui, David Y. H., Professor

Ph.D., University of Minnesota
Particle technology, environmental engineering

Rajamani, Rajesh, Associate Professor

Ph.D., University of California, Berkeley
Control design and state estimation for nonlinear systems, fault diagnostics

§ Ramalingam, Subbiah, Professor

Ph.D., University of Illinois, Urbana-Champaign
Manufacturing sciences, machining, metalworking, tribology, arc technology, coating technology

§ Ramsey, James W., Professor

Ph.D., University of Minnesota
Heat and mass transfer, thermal environmental engineering

Rangarajan, Bharath K., Assistant Professor

Ph.D., Cornell University
Optimization algorithms and applications, nonlinear programming, linear and semidefinite programming with applications to control theory, engineering design, cooperative game theory

§ Shulman, Yechiel, Professor Emeritus

Sc.D., Massachusetts Institute of Technology
Management of technology

§ Simon, Terrence W., P.E. (Colorado), Professor

Ph.D., Stanford University
Heat transfer, fluid mechanics, thermodynamics

***§ Sparrow, Ephraim M., Professor**

Ph.D., Harvard University
Heat and mass transfer, fluid mechanics, thermal issues in biomedical engineering

***§ Starr, Patrick J., Professor**

Ph.D., University of Minnesota
Modeling and simulation as applied to manufacturing systems and vehicle dynamics

§ Stelson, Kim A., Professor

Sc.D., Massachusetts Institute of Technology
Manufacturing, system dynamics and controls

§ Strykowski, Paul J., Professor

Ph.D., Yale University
Fluid mechanics, stability, mixing, turbulence control

§ Tamma, Kumar K., Professor

Ph.D., Old Dominion University
Finite elements, computational mechanics, structural dynamics
Physics

§ Bayman, Benjamin F., Professor Emeritus

Ph.D., University of Edinburgh
Research in theoretical nuclear physics

Broadhurst, John H., Professor

Ph.D., University of Birmingham
Experimental astrophysics, biophysics and nuclear physics

§ Campbell, Charles E., Professor

Ph.D., Washington University, St. Louis
Theoretical condensed matter physics

Gattell, Cynthia, Professor

Ph.D., University of California, Berkeley
Particle acceleration in astrophysical plasmas, aurora, space physics

Courant, Hans W. J., Professor Emeritus
Ph.D., Massachusetts Institute of Technology
Experimental high-energy physics

Cronin-Hennessy, Dan, Assistant Professor
Ph.D., Duke University
Experimental particle physics

§ Crowell, Paul, Associate Professor
Ph.D., Cornell University
Experimental condensed matter physics

Cushman, Priscilla, Professor
Ph.D., Rutgers University
Experimental particle physics, particle astrophysics

§ Dahlberg, E. Dan, Professor
Ph.D., University of California at Los Angeles
Magnetism in films, electrical conduction and magnetic microscopy

Dehnhard, Dietrich K., Professor Emeritus
Ph.D., University of Marburg
Experimental physics, interaction between mesons, nucleons, and nuclei

DuVernois, Michael, Assistant Professor
Ph.D., University of Chicago
Experimental astrophysics, high-energy physics

Ganz, Eric, Associate Professor
Ph.D., University of California, Berkeley
Experimental condensed matter physics

Gasiorowicz, Stephen, Professor Emeritus
Ph.D., University of California at Los Angeles
Theoretical particle physics, field theory, quantum chromodynamics

Gherghetta, Tony, Assistant Professor
Ph.D., University of Chicago
Theoretical high-energy physics

Giese, Clayton F., Professor Emeritus
Ph.D., University of Minnesota
Chemical physics, superfluid helium, optics

§ Glazman, Leonid, Professor
Ph.D., Institute of Low Temperature Physics, Ukraine Academy of Sciences, U.S.S.R.
Condensed matter theory, mesoscopic correlated electron systems

§ Goldman, Allen M., Professor
Ph.D., Stanford University
Experimental condensed matter physics, superconductivity, disordered and dimensionally constrained materials

Greenlees, George W., Professor Emeritus
Ph.D., Cambridge University
Experimental nuclear physics, laser spectroscopy, quantum optics

Grosberg, Alexander, Professor
Ph.D., Moscow State University
Theoretical physics of polymers and biopolymers, theoretical biophysics

Halley, J. Woods, Professor
Ph.D., University of California, Berkeley
Theoretical condensed matter physics

§ Hanany, Shaul, Associate Professor
Ph.D., Columbia University
Experimental/observational astrophysics and cosmology

***§ Heller, Kenneth, Professor**
Ph.D., University of Washington
Undergraduate problem-solving, especially neutrinos

Hintz, Norton M., Professor Emeritus
Ph.D., Harvard University
Experimental nuclear physics

§ Hobbie, Russell K., Professor Emeritus
Ph.D., Harvard University
Medical physics

Huang, Cheng-Cher, Professor
Ph.D., University of Pennsylvania
Experimental condensed matter physics—liquid crystals

§ Johnson, Walter H., Professor Emeritus
Ph.D., University of Minnesota
Experimental physics, mass spectrometers

***§ Jones, Roger S., Professor Emeritus**
Ph.D., University of Illinois
Physics philosophy, humanistic physics, physics education

§ Kakalios, James, Professor
Ph.D., University of Chicago
Experimental condensed matter physics—amorphous semiconductors and granular media

§ Kamenev, Alex, Associate Professor
Ph.D., Weizmann Institute of Science, Israel
Theoretical condensed matter physics

§ Kapusta, Joseph, Professor
Ph.D., University of California, Berkeley
Theoretical high-energy nuclear physics

Kellogg, Paul J., Professor Emeritus
Ph.D., Cornell University
Physics of plasmas, generation of plasma waves

§ Kubota, Yuichi, Professor
Ph.D., Tokyo University
Heavy flavor physics in experimental particle physics

§ Lysak, Robert, Professor
Ph.D., University of California, Berkeley
Theoretical space physics

Mans, Jeremiah, Assistant Professor
Ph.D., Princeton University
Elementary particle physics

Mantis, Homer T., Professor Emeritus
Ph.D., New York University
Atmospheric physics

Marquit, Erwin, Professor Emeritus
Ph.D., University of Warsaw
Philosophy of science

***§ Marshak, Marvin L., Professor**
Ph.D., University of Michigan
Experimental high-energy physics

§ Mueller, Joachim, Associate Professor
Ph.D., Technical University of Munich
Experimental biophysics

Noireaux, Vincent, Assistant Professor
Ph.D., University of Paris XI
Biological physics

***§ Olive, Keith A., Professor**
Ph.D., University of Chicago
Early universe cosmology, high energy physics

Peloso, Marco, Assistant Professor
Ph.D., SISSA Trieste, Italy
Particle physics and cosmology

*** Pepin, Robert, Professor**
Ph.D., University of California, Berkeley
Origin and evolution of the solar system

Peterson, Earl A., Professor
Ph.D., Stanford University
High energy physics: proton decay and neutrino oscillations

§ Poling, Ronald A., Professor
Ph.D., University of Rochester
Experimental elementary particle physics, specializing in b quarks

§ Qian, Yong-Zhong, Associate Professor
Ph.D., University of California, San Diego
Theoretical nuclear astrophysics

§ Rudaz, Serge, Professor
Ph.D., Cornell University
Theoretical high-energy physics, supersymmetry, astroparticle physics

Ruddick, Keith, Professor
Ph.D., University of Birmingham
Experimental high-energy physics

Rusack, Roger, Professor
Ph.D., Imperial College, U.K.
Experimental high-energy physics

Shapiro, Alan E., Professor
Ph.D., Yale University
History of science, Newton, optics, Scientific Revolution

Shifman, Mikhail, Professor
Ph.D., University of Moscow
Theoretical high-energy physics

§ Shklovskii, Boris, Professor
Ph.D., University of Leningrad
Theoretical condensed matter physics

Stuewer, Roger H., Professor Emeritus
Ph.D., University of Wisconsin, Madison
History of nuclear and quantum physics

Tang, Yau-Chien, Professor Emeritus
Ph.D., University of Illinois
Theoretical nuclear physics

§ Vainshtein, Arkady, Professor
Ph.D., University of Novosibirsk
Theoretical high-energy physics

Valls, Oriol T., Professor
Ph.D., Brown University
Theoretical condensed matter physics

Voloshin, Mikhail, Professor
Ph.D., Institute of Theoretical and Experimental Physics, Moscow
Theoretical physics of elementary particles, quantum field theory

Waddington, Cecil J., Professor Emeritus
Ph.D., University of Bristol
Experimental astrophysics, cosmic ray physics

§ Walsh, Thomas F., Professor
Ph.D., University of California, Berkeley
Theoretical high-energy physics

Wygant, John, Associate Professor
Ph.D., University of California, Berkeley
Space plasma physics

Zimmermann, William, Jr., Professor Emeritus
Ph.D., California Institute of Technology
Physics of superfluid liquid helium

Zudov, Michael, Assistant Professor
Ph.D., University of Utah
Condensed matter physics

Statistics

Bingham, Christopher, Professor
Ph.D., Yale University
Directional data analysis, time series analysis, multivariate analysis, chronobiometry, statistical computing

Chatterjee, Singdhansu, Assistant Professor
Ph.D., Indian Statistical Institute
Resampling techniques, non-parametric and semi-parametric curve estimation, generalized linear mixed models, probability theory

Cook, R. Dennis, Professor
Ph.D., Kansas State University
Experimental design, linear and nonlinear models, regression diagnostics, graphical methods, dimension reduction, population genetics

Dickey, James M., Professor
Ph.D., University of Michigan
Bayesian statistics, coherent probability assessment, smoothing analysis, foundations of inference

Eaton, Morris L., Professor
Ph.D., Stanford University
Multivariate analysis, probability inequalities, decision theory, Bayesian inference, prediction, invariance

Geyer, Charles J., Professor
Ph.D., University of Washington
Constrained maximum likelihood, Monte Carlo likelihood, Markov chain Monte Carlo, statistical genetics

Grund, Birgit, Associate Professor
Ph.D., Humboldt-Universität, Berlin
Kernel smoothing, non-parametric curve estimation, AIDS clinical trials

Hawkins, Douglas M., Professor
Ph.D., Witwatersrand, Johannesburg, South Africa
Quality improvement, case diagnostics, chemometrics

Jiang, Tiefeng, Assistant Professor
Ph.D., Stanford University
Large deviations, extreme value theory, random matrices

Jones, Galin, Assistant Professor
Ph.D., University of Florida
Computationally intensive statistical methods, Markov chain Monte Carlo, applications in biological and environmental settings

Martin, Frank B., Associate Professor
Ph.D., Iowa State University
Experimental design, analysis of variance procedures, finite population sampling

Meeden, Glen D., Professor
Ph.D., University of Illinois
Bayesian inference, decision theory, finite population sampling

Oehlert, Gary W., Professor
Ph.D., Yale University
Environmental statistics, medical imaging, experimental design

Qiu, Peihua, Associate Professor
Ph.D., The Ohio State University
Nonparametric curve/surface fitting, image processing, statistical process control, statistical applications

Shen, Xiatong, Professor
Ph.D., University of Chicago
Likelihood methods, semi/nonparametric models, classification, model assessment, frequency properties of Bayes procedures, applications in engineering, medicine, and biological systems

§ Sudderth, William D., Professor
Ph.D., University of California, Berkeley
Probability theory, stochastic games, foundations of statistics

Wang, Lan, Assistant Professor
Ph.D., Pennsylvania State University
Model with large number of parameters, nonparametric ANCOVA, lack-of-fit test in nonparametric regression models

Weisberg, Sanford, Professor
Ph.D., Harvard University
Regression and modeling, diagnostics, graphical methods, computing

East Bank

Academic Calendars 2006-2008

2006-2007

Fall Semester 2006 (70 class days)

September 4	Labor Day
September 5	Classes begin
November 23-24	Thanksgiving holiday
December 13	Last day of instruction
December 14-16, 18-20	Final examinations
December 17	Study day

Spring Semester 2007 (74 class days)

January 15	Martin Luther King holiday
January 16	Classes begin
March 12-16	Spring break
May 4	Last day of instruction
May 5-6	Study days
May 7-12	Final examinations

May Session 2007 (14 class days)

May 21	3-week session begins
May 28	Memorial Day holiday
June 8	3-week session ends

2007-2008

Fall Semester 2007 (70 class days)

September 3	Labor Day
September 4	Classes begin
November 22-23	Thanksgiving holiday
December 12	Last day of instruction
December 13, 16	Study days
December 14, 15, 17-20	Final examinations

Spring Semester 2008 (74 class days)

January 21	Martin Luther King holiday
January 22	Classes begin
March 17-21	Spring break
May 9	Last day of instruction
May 10-11	Study days
May 12-17	Final examinations

May Session 2008 (14 class days)

May 26	Memorial Day holiday
May 27	3-week session begins
June 13	3-week session ends
