1902.

UNIVERSITY OF MINNESOTA,  
OFFICE OF THE BOARD OF REGENTS,  
Minneapolis, Dec. 9, 1902.

*To His Excellency Samuel R. Van Sant, Governor of Minnesota,*

SIR: I have the honor, in behalf of the Board of Regents, to submit herewith the twelfth biennial report of the Board of Regents of the University of Minnesota, for the two years ending July 31, 1902.

Very respectfully, your obedient servant,  
GREENLEAF CLARK,  
*President.*

TWELFTH BIENNIAL REPORT  
OF THE  
BOARD OF REGENTS  
OF THE  
UNIVERSITY OF MINNESOTA.

---

The report of the Board of Regents of the University of Minnesota for the last biennial period differs but little from former reports in its most prominent feature, viz.: the constantly increasing and accelerated growth of the institution. It is a source of great satisfaction to the board, and solace for its labors, and ground for earnest and sincere congratulation to the state, that so many of its youth are availing themselves of its privileges and the preparation thus afforded them for more useful and influential lives. Reference to the table hereinafter contained shows the total attendance for the last three academic years, ending respectively July 31, 1900, 1901 and 1902, to be as follows: for the year ending July 31, 1900, 2,329 men and 907 women, total 3,236; for the year ending July 31, 1901, 2,417 men and 996 women, total 3,413, an increase over the last preceding year of  $5\frac{1}{2}$  per cent; for the year ending July 31, 1902, 2,614 men and 1,042 women, total 3,656, an increase over the last preceding year of 7 per cent. It may be safely estimated that the attendance in the current year will be at least 5 per cent over the last preceding year, which would make the attendance for the current year 3,838. The increase in attendance from the year 1901, when the last legislative appropriations were made, to the estimated attendance for the current year is about  $11\frac{1}{4}$  per cent. It is quite apparent from this statement that the duty is laid upon the management of representing to you, and through you to the legis-

lature, the need of additional means in order that the University may go on with its work and mission without serious impairment. The rapid increase in attendance necessitates more room, more laboratories, more equipment, more professors and instructors, and, in a word, more provision for its support and maintenance. If the number of the youths who present themselves at the University and the Agricultural School for their benefits still goes on increasing, which is probable, and the State desires that the youths who so present themselves shall be properly cared for and instructed, which is more than probable, then the need that increasing means be provided for the purpose is imperative. There is but little room for any attempt by the management to introduce any further economies. The greater part of the expenditures for current expenses is for salaries, and the Board is thoroughly convinced that no reduction in the scale of salaries is practicable. Indeed it is becoming more and more apparent that, if the institution is to be kept up to its present standard of strength and usefulness, there is likelihood of the necessity of an increase of salaries in some cases, to prevent the institution being deprived of its most accomplished and useful men by their call, at higher salaries, to other institutions. And in this connection it is pertinent to add that it is believed that the University of Minnesota is conducted for a less amount of money than any of the other large institutions of the country in proportion to the number of students, and for very much less than many of them. Attention is called to some comparisons with other institutions in this respect in the report of the President of the University to the Board of Regents.

The following pages will, in compliance with the law, show the administrative and executive officers, the faculty instructors and aids, the attendance in each department for the last three years, the receipts into and disbursements from the current expense account in the last two years, the expenditure of the special appropriations, and will, in obedience to law, lay before you the condition and needs of the University and its several departments.

**EXPENDITURE OF SPECIAL APPROPRIATIONS AT THE AGRICULTURAL SCHOOL.**

**VETERINARY AND LIVE STOCK BUILDING.**

Appropriation .....	\$25,000
---------------------	----------

The veterinary and live stock building has been completed and equipped within the appropriation of \$25,000.

There were five bids for the erection of the building, of which Mr. C. N. Lovene's was the lowest, and the contract was let to him for \$11,630.

There were three bids on the construction of the tunnel to the veterinary hospital. Mr. Lovene's bid in this case was also the lowest, and the contract was let to him for \$2,244.

Five contractors bid on the heating of the building, and the job was let to C. N. Wentworth & Co., whose bid of \$1,090 was the lowest, amount of radiation considered.

The plumbing contract was let to Holt & Dahlby, the lowest of five bidders, for \$228 plus \$50 for sewer.

Following is a list of expenditures:

C. N. Lovene, contract for building .....	\$11,630.00
C. N. Lovene, contract for tunnel .....	2,244.00
C. N. Lovene, contract for stalls and equipment.....	2,564.00
C. N. Lovene, labor and material for shelving in office and pharmacy, extra wainscoting and windows, museum cases and tables, floor in attic, skylight, grading, etc.....	1,303.63
Advertising for bids.....	8.40
Heating, including part payment for boiler.....	1,090.00
Plumbing contract and extras.....	437.39
Steam fitting, labor and material.....	795.33
Electric wiring.....	265.00
Extra carpenter work.....	42.20
Lumber .....	20.15
Apparatus .....	498.85 ✓
Architect's fees.....	650.00
Gas plant.....	318.00
Signs .....	40.00
Grading, planting and seeding.....	745.07
Furniture .....	641.18
Sidewalks .....	181.04
Hardware .....	69.79
Balance for microscopes and other scientific apparatus for which requisitions have been granted.....	1,445.97
<b>Total .....</b>	<b>\$25,000.00</b>

## CHEMICAL LABORATORY.

Appropriation ..... \$25,000 ✓

The contract for the laboratory for agricultural chemistry was let to Mr. C. N. Lovene, the lowest bidder, for \$17,932. An additional contract was also made for Kasota stone in the basement amounting to \$280, making his total contract \$18,212.

The steam heating contract was let to Hurley & Company, of St. Paul, for \$1,348. The rough plumbing was also let to the same firm, for \$641, making their total contract, \$1,989.

The following is a statement of the expenditures:

Building .....	\$18,212.00
Heating and rough plumbing.....	1,989.00
Desks and furniture.....	1,999.00
Shades .....	70.85
Ventilating system and power.....	333.75

## IMPROVEMENTS AND EQUIPMENT OF DAIRY HALL.

Appropriation .....	\$3,000
---------------------	---------

Improvements and equipment to the Dairy Hall have been added at a cost of \$3,000.

The following is a list of expenditures:

Machinery and utensils.....	\$1,453.20
Lumber .....	173.57
Carpenter work.....	283.36
Steam fitting.....	267.11
Paints and glass.....	64.93
Hardware .....	146.72
Furniture .....	30.50
Labor .....	38.87
Cement floor.....	252.15
 Total .....	 \$2,710.41

The balance of the appropriation, \$289.59, is to be used for sidewalks about the building, and some other items for which requisitions have been granted.

## ADDITION TO BLACKSMITH SHOP.

Appropriation .....	\$3,000
---------------------	---------

At a meeting of the Building Committee of the Board of Regents of the University, held at the office of the architect, 607 Lumber Exchange, Aug. 5, 1901, proposals were received for the erection of addition to blacksmith shop, as follows:

C. N. Lovene, plan No. 1.....	\$2,296.00
C. N. Lovene, plan No. 2.....	1,447.00
August Cederstrand, plan No. 1.....	2,600.00

## GIRLS' DORMITORY.

Appropriation .....	\$12,000	✓
---------------------	----------	---

An addition in the form of a wing has been built to the girls' dormitory and equipped within the appropriation of \$12,000.

There were three bids offered of which Mr. C. N. Lovene's was the lowest, namely, \$8,850.

The following is a statement of the expenditures:

C. N. Lovene, contract for building.....	\$8,850.00
Heating contract, \$590; boiler, \$720.....	1,310.00
Electric wiring.....	275.77
Architect's fees.....	350.00

Total .....	\$12,000.00

Requisitions have been granted for a part of this balance.

## MEAT HOUSE.

Appropriation .....	\$7,500
---------------------	---------

The new meat house has been completed and equipped within the appropriation of \$7,500. There were three bids for the erection of the building, of which that of C. N. Lovene was the lowest, \$4,666.

The following is a list of the expenditures:

C. N. Lovene, contract for building .....	\$4,666.00
C. N. Lovene, contract for extra insulation and for foundation for compressor .....	322.50
A. H. Barber & Co., Chicago, refrigerating machinery.....	1,476.16

 Total .....	  \$7,500.00

## BUILDING FOR SWINE BREEDING.

Appropriation .....	\$3,000
---------------------	---------

In the spring of 1902, a building, composed of two wings 28x60 ft., and joined by a main part 28x42 ft., was planned. Owing to the advance in material and labor it was found impossible to get bids low enough to permit of the erection of the entire building within the appropriation. One wing was consequently dropped and a contract for the remaining portion awarded to P. Benson of Minneapolis for a brick walled building with cement floors and shingled roof. The contract price was \$2,300. In addition to this amount there has been expended to date, \$22.63 for water pipe, \$79.80 for scales, \$80.50 for architect's fees, and \$4.86 for sewer pipe. The balance of \$512.21 will be needed for electric lights, paving, and fencing the adjacent yards and in grading about the building. It is estimated also that there will be sufficient money to conduct heat to the building from the veterinary hospital, and for troughs and other fixtures in the feed rooms.

## SUB-STATIONS.

## GRAND RAPIDS STATION.

A very complete basement barn has been constructed out of the appropriation of \$1,200 for that purpose.

The account for maintenance stands as follows:

Balance August 1, 1900.....	\$70.56
Appropriation for year ending July 31, 1901.....	3,250.00
Cash receipts.....	967.14
 Total .....	  \$4,287.70
To expenses paid.....	4,269.21
 Balance for year ending July 31, 1901.....	  \$18.49
Appropriation for year ending July 31, 1902.....	4,000.00
Cash receipts.....	1,562.27
 Total .....	  \$5,580.76

	Dr.
By expense.....	\$4,939.50
Balance cancelled by state auditor.....	18.49
Balance .....	<u>622.77</u>
<b>Total .....</b>	<b>\$5,580.76</b>

## CROOKSTON STATION.

An appropriation was made of \$6,500, available in the year ending July 31, 1902, for constructing a barn for the care of live stock. From this appropriation \$863.79 has been expended in building an addition to the original barn. The balance of \$5,636.62 remains unexpended for the reason that we were not able, on account of the high prices of material and scarcity of labor, to construct the barn as planned within the appropriation. The plans will be revised and the barn constructed in the spring of 1903. An appropriation of \$2,500 was made for the purchase of improved live stock. Only \$35 has been expended for the reason that it was deemed best to wait until the barn was constructed.

Of the appropriation of \$1,000 for fencing and drainage, \$882.02 has been expended. The balance will be required to complete the fence.

The current expense account stands as follows:

Annual appropriation for year ending July 31, 1901.....	\$5,250.00
Cash receipts from farm.....	<u>880.83</u>

Total .....	\$6,130.83
To expenses paid.....	<u>5,900.58</u>

Balance from the year ending July 31, 1901.....	\$230.25
By appropriation for the year ending July 31, 1902.....	6,000.00
Cash receipts.....	<u>1,147.94</u>

Total .....	\$7,378.19
-------------	------------

	Dr.
To expenses paid.....	\$7,377.49
Balance cancelled by state auditor.....	<u>.70</u>
<b>Total .....</b>	<b>\$7,378.19</b>

A continuance of the present appropriations for maintenance, i. e., \$4,000 per year for the Grand Rapids station and \$6,000 per year for the Crookston station, will probably be adequate.

## AGRICULTURE IN THE RURAL SCHOOLS.

The Board of Regents placed in the hands of Dean Liggett of the Department of Agriculture the work of devising and carrying out a plan for the profitable expenditure of the appropriation of \$4,000 made by the 123rd subdivision of Sec. 2 of Ch. 381 of the Laws of 1901. A bulletin is now in the hands of the printer, prepared under the superintendence of Professor Hays, who was placed in charge, assisted by Mr. F. J. Wajta, B. Agr. Wisconsin University, and Professor William Robertson. It contains 230 exercises prepared by the editors and the faculty on topics of general interest and utility. It will be distributed to all the schools, and we venture to predict will be found interesting, instructive and useful. The preparation, printing and distribution of this book will about exhaust the appropriation.

## EXPENDITURE OF SPECIAL APPROPRIATIONS AT THE UNIVERSITY.

Rearrangement of chemical building.....	\$20,000.00
Enlargement of mechanic arts building.....	20,000.00
Total .....	\$40,000.00

Appropriated at the session of 1899, available in fiscal year ending July 31, 1901.

After careful inspection of the plans and specifications it became apparent that the purpose of the enlargement of the Mechanic Arts Building would be more economically and better accomplished by putting up detached shops. Bids were first received for this improvement and the rearrangement of the chemical building separately, and were all rejected because it became apparent that a contract for both could be let cheaper on account of the opportunity thus offered, the contractor to use the old material in the one in the construction of the other. Accordingly the improvements were advertised together and the contract let to F. G. McMillan for \$29,846.

**ERECTION AND EQUIPMENT OF BUILDING FOR DEPARTMENT OF  
ENGINEERING AND MECHANIC ARTS.**

<b>Appropriation .....</b>	<b>\$60,000.00</b>
----------------------------	--------------------

This appropriation was expended according to its plan and purpose in the erection of a front part to the shops for mechanical engineering built under the appropriation of 1899, and an adjacent building for the electrical engineering department. The contract for the building was let to R. McMillan & Co., the lowest of six bidders, at \$26,731. Extras brought this amount up to \$27,324.76.

**EXPENDITURES.**

## CURRENT EXPENSE.

The balance of \$24,291.15 appearing to the credit of the current expense account at the close of the year ending July 31, 1902, is in one sense unreal, for the reason that in June and July the receipts are unusually large, coming from the June settlement of taxes, the interest on the University fund, and the Federal treasury. If the funds available for the support of the University were received in equal monthly amounts, the above balance would entirely disappear. Indeed this inequality in the monthly receipts sometimes produces financial stringency, which is somewhat alleviated by the course of business long in practice, which is as follows: By a rule adopted by the Board of Regents, long ago, no officer, professor, agent or other person is authorized to incur any indebtedness in behalf of the University without a requisition previously granted by the board or its executive committee. Under this rule whenever anything is wanted the head of the department in which the need arises makes requisition in writing, upon forms provided for the purpose, stating what is wanted and the estimated cost. The Executive Committee considers the application, obtains such additional information as is necessary, if any, to determine the necessity and cost of the thing asked for, and refuses, grants or modifies the requisition. If granted in whole or in part the committee give such directions as they may deem necessary for the economical procurement of the thing needed, which quite often is of such a char-

acter as to require skilled agents. After the articles mentioned in the requisition are purchased, or the work specified therein is done, bills therefor are presented to the executive committee by those who have furnished the things or done the work, which, if found correct, are approved. The receipt of payment of these bills is then procured by the accountant in duplicate, and expense lists, to which are attached one of the series of duplicate receipts, are then forwarded to the state auditor, who draws his warrant on the state treasurer for the amount in favor of the treasurer of the University, and checks are then sent out for the payment of the bills signed by the accountant and countersigned by the president of the University. A delay, often of two or three months, in going through this process, helps to relieve somewhat the stringency arising from the irregularity of the income receipts. In consequence of the greatly increased attendance, which, as is previously stated, is  $11\frac{1}{4}$  per cent greater than the enrollment in 1901, when the last appropriations were made, and after a careful consideration of present conditions, not overlooking the fact that the increase in the valuation of the taxable property of the state will, in due time, increase the income derived from the University special tax (which increment, however, judging from the past, will be fully offset before the close of the current biennial period, by the additional expenses entailed by increased attendance) the board are of the opinion that there is an imperative necessity for an appropriation of \$50,000, for current expenses for each of the years ending July 31, 1904, and July 31, 1905, being \$15,000 per year more than heretofore granted.

#### COLLEGE OF SCIENCE, LITERATURE AND THE ARTS.

The college of letters should be enlarged in the scope of its instruction, especially on the lines of political economy and sociology, if it is to meet modern requirements. But it is deficient in room even for its present curriculum. The president of the University in his report to the board says that "the departments of political economy, history, English literature and others have only one lecture room each, while they have from three to seven instructors, and that one lecture room for each department is not enough."

Dr. Northrop adds that he knows of no way to provide what is needed except to erect a building large enough to provide for all the needs of the department of philosophy, to furnish at least four

general lecture rooms, and provide for the needs of one or two language departments. The board earnestly concur with the president and beg to represent that the need of such a building is very great.

It would cost at least, \$100,000, and we recommend that that amount be appropriated for the construction of a building for language and literature.

#### THE COLLEGE OF ENGINEERING AND MECHANIC ARTS.

The work in this college has been carried on with marked success. The demand for its graduates is so great by business concerns that it is difficult to keep abreast of it. Professor Shepardson of the electrical department reports that during the last six months calls have been made for nearly five times as many as are in the graduating class.

The physics building is now completed and occupied. It was carefully planned for its uses, and well constructed. The planning and construction of it have had the intelligent, persistent and faithful attention of Professor Frederick S. Jones, now the Dean of the College.

The new buildings, one for mechanical engineering, and one for electrical engineering, have added greatly to the efficiency of the departments, and rendered instruction therein more productive and satisfactory. These buildings are as large and well constructed as the amounts appropriated therefor would allow. It is hoped the college is now supplied with room for years to come.

Present conditions require the repair and partial rearrangement of the old Mechanic Arts building. Additional equipment for the new buildings of the mechanical and engineering departments is necessary to produce the best results, especially for the partially equipped electric light and power plant, which is expected to show marked economy over buying electric light and power from the local company.

For these purposes we respectfully ask an appropriation of \$30,000.

#### THE SCHOOL OF MINES.

The school of mines was established as a new department of the University in 1891, with an appropriation of \$6,000 for opening it and furnishing it with suitable apparatus. It was deemed prob-

lemetrical whether such a school was needed. The result has fully justified its establishment, and it meets an important demand for specialists in the development and carrying on of the important mining interests of the state. The school registered in the last year 109 students. Two separate buildings have been provided for its accommodation. One of them, the ore-testing building, was damaged by fire last summer, presumably the result of lighting, and its machinery and contents injured or destroyed. The property was fully covered by insurance. The loss on the building was settled with the insurance companies by their paying the contract price, under a contract entered into with R. McMillan & Co., for its restoration, viz., \$2,300, and the damage to the machinery and other contents was adjusted at an amount deemed adequate to restore and replace them, viz., \$3,842.34. The other building, for which there was appropriated by the last legislature \$47,500, is now in process of construction, and it is hoped that it will soon be ready for occupancy. It was found that the building as originally planned could not be built and equipped within the appropriation; and it was reduced in size to the final limit of adequacy, and still on account of the increased cost of building the bids were still not within the appropriation. Rather than delay a building for which there was an immediate and imperative necessity, and rather than build an inadequate and unsatisfactory one, the board took the responsibility of letting the contract leaving the third floor unfinished. This building and the ore-testing building when restored and completed with their machinery and other equipment are deemed adequate to meet the public demands for years to come. We venture to hope that the course of the Regents in these matters will meet the approval of the legislature, and that an appropriation of \$25,000 will be made to complete the construction and equipment of the new building.

#### DEPARTMENT OF AGRICULTURE.

The agricultural department, which includes the college of agriculture, the school of agriculture, the dairy school, the farmers' short course and the experiment station, has continued to grow in efficiency and usefulness during the two years just past. The prospect is for a largely increased attendance the current year.

There have been in all 397 graduates from the regular school course and about 900 from the dairy school. Of the graduates

from the regular school course 82 per cent are engaged in farming, or teaching, or experimentation in agriculture.

The new departure in agricultural education, first inaugurated in this state, and designed to carry forward such education upon two separate lines, viz., the college scientific course of four years leading up to the degree of Bachelor of Agriculture, and the school course of two years conducted mainly on practical and utilitarian lines, has continued to demonstrate its value and to call forth encomiums not only from our own people, but from other agricultural institutions of the country. Indeed agricultural education as carried on in the University is assigned a front rank by the highest authorities on the subject. The success of the system and the great benefits flowing from it are matters of sincere congratulation to our people. The enrollment of 21 last year in the college course is not so large as present conditions would justify. There is a demand for thoroughly educated men in the science of agriculture, for the work of investigation and research, and for professors, instructors, guides and leaders in the agricultural institutions.

The new buildings erected and equipped during the biennial period have added much to the efficiency and usefulness of the school and station.

The new chemical building will not be ready for occupancy before the opening of the winter term. This building furnishes much needed accommodation for both school and station work in agricultural chemistry. Owing to the material increase in the cost of building materials and labor, the appropriation granted permitted only the construction of the building, and left no funds for equipment. The building itself will be completed without deficit. The laboratory tables and fixtures from the old laboratory will be removed and used in the new building.

In this division the work of investigation has been largely along food and soil lines. Free analyses of materials sent in by the farmers and citizens of the state are made whenever the results are of public value.

The course in the dairy school, which is believed to be of great benefit to the dairy interests of the state, will hereafter be given in November, instead of January.

The vacancy in the teaching force and in the experiment station caused by the death of Dr. Lugger has been filled by the election of Prof. F. L. Washburn, who began work June 1, 1902.

Prof. Thomas Shaw resigned his position as Professor of Animal Husbandry, in April, 1902. His resignation was accepted by the Board of Regents, and Mr. Andrew Boss, associate professor of agriculture, was placed in charge of animal husbandry. Professor Shaw has been employed as instructor in live stock in the school of agriculture to give one-half his time to the work during the six months of the school year.

The experiment station has continued, during the biennial period, to conduct investigations and experiments along lines most useful to the farmers of the state. The two new varieties of wheat known as Minnesota No. 163 and Minnesota No. 169, which were originated at the station, and which have been distributed to the farmers of the state, give promise of being of great value. The method of distributing these new varieties of grains is worthy of mention. Instead of distributing gratuitously and indiscriminately small quantities of seeds to all who apply for them, as is done in the government distribution, lots of four bushels each are sold at a fair price to careful and painstaking farmers in the different sections of the state, who in turn raise crops from this seed and sell to their neighbors at a fair advance over market prices.

During the two years the experiment station has issued six bulletins for general distribution, two class bulletins and six press bulletins.

No pains have been spared to make the work of the substations at Crookston and Grand Rapids as useful as possible to their respective sections of the state. The work of Mr. Chapman, at Grand Rapids, in reforesting cut over timber lands, and in issuing short bulletins on timely topics to the farmers is worthy of special mention.

The school of agriculture is in pressing need of more dormitory room. For several years the dormitories for boys have been inadequate, and many students have been obliged to find rooms in St. Anthony Park, and the two cities. It is thought that the boarding facilities are sufficient to accommodate the occupants of an additional dormitory, the cost of which would be about \$40,000. The erection of a large main building, the need of which was set forth in our last report, cannot profitably, in our opinion, be postponed any longer. Natural and rapid development has made a larger foundation necessary. The room now used for a chapel will no longer accommodate the students of the regular course, and there is no room large enough to contain the students when called upon to assemble. It is respectfully suggested that true econ-

omy requires that such building be substantially constructed, without expense for ornament, be made fireproof, at least in parts, and be large enough to meet not only the needs of the present but the requirements of the future. It is anticipated that in the not far distant future one thousand boys and girls will present themselves for the benefits of the regular course. The agricultural division requires the entire basement of such a building, so that farm laboratory work and demonstration may be carried on in the winter when out door work with soils and machinery is impossible. A portion of the second and third stories would be required for an assembly hall, and the remainder thereof for executive officers, now in temporary quarters in the dairy building; for class rooms of sufficient size to accommodate classes which have outgrown their present quarters, and so rendered division of classes necessary at increased cost for teaching; for permanent quarters for the division of entomology; for the safe-keeping and comfortable use of the library, records of experiments, collections for an agricultural museum, records and publications of the experiment station, now stored in the dairy building, and for rooms for editing and mailing the station bulletins and other publications. The use of such a building for the purposes indicated would relieve the congestion in the other buildings by leaving additional space to meet the requirements of the divisions that remain in them. It is estimated that the cost of the construction and equipment of a building to meet these requirements at the present advanced price of labor and materials would not be less than \$225,000.

Good husbandry requires that farming implements, carriages and tools shall be housed, and the school should most certainly have the benefit of, and illustrate, this rule. There is now no storage room. It is thought that a barn can be constructed, suitable and adequate for this purpose, for \$5,000.

We respectfully recommend that an appropriation of \$270,000 be made for the construction and equipment of such main building and for an additional dormitory for boys, and for a barn for storage purposes.

#### THE COLLEGE OF LAW.

An addition to the law building is needed. The library rooms in the present building are taxed to their utmost capacity, and new books cannot be added and leave adequate room for the use

of the library. The department also needs more and larger rooms for classes, moot courts and lectures, and smaller private rooms for its officers. It has been necessary the last two years to hire a hall in a private building. The law library numbers 13,500 volumes of books and pamphlets, which have been most economically collected together largely through a system of exchanges. A collection, in 510 volumes, of the paper books and briefs in the cases argued in the Supreme Court from 1888 to 1900 was donated to it in the year last past by Mr. Justice Collins, of the Supreme Court, and the Hon. H. W. Childs, lately Attorney General, a valuable acquisition for a law library. The dean estimates the value of the library at \$35,000. A fire proof addition to the present building, such as was contemplated when it was built, is necessary to relieve its congestion.

Its estimated cost is \$30,000, and we respectfully recommend that that amount be appropriated for the purpose.

#### THE COLLEGE OF MEDICINE AND SURGERY.

This college registered in the year 1900-01 330 students; in the year 1901-2 362 students; and it has entered for the current year up to date of this report about 300. Dr. Beard, the secretary of the faculty, expresses, in its behalf, the opinion, which is no doubt correct, that the increased attendance of last year and the decreased registration in this are due to a common cause, the one in anticipation, the other in consequence, of the higher requirements for entrance, which took effect at the opening of the current year. The advanced requirements for admission are the same as for admission to the sophomore class in the college of science, literature and the arts. The requirement of the college course, or a part of it, as intermediary between the high school and the professional school must be deemed in some degree experimental. Two of the leading medical colleges now require the full degree. The faculty are satisfied that the admission of a class of 50 in the first year of these advanced requirements justifies the progressive step, which has for its object the turning out of men better fitted for professional work, even if the number be reduced, and of thus better conserving the public health, and keeping the college now well established on its merits in the medical world in line with the best of them in progressive spirit and accomplishment.

The department of medicine is deficient in facilities for laboratory work. Laboratories are absolutely essential for research and investigation, and the trend of medical education is in the direction of more individual work and illustration in laboratories, due, no doubt, to the theories now well advanced of the germ origin of disease. In their work of research and investigation the State Board of Health and the division of pathology and bacteriology of the University, of which the accomplished Dr. Wesbrook is the head, have heretofore been helpful, and can be made more helpful, to each other, and helpful and instructive to our students. Both are cramped for room to meet modern requirements. To meet these requirements it has been proposed that a new building be erected on the campus to accommodate both the work of the State Board of Health and the work of pathology and bacteriology of the medical department of the University, in which proposition this board heartily concurs for reasons already appearing. This will relieve the crowded medical science building and afford better accommodations therein for the chairs of histology and embryology, and for the college of pharmacy, which is sadly in need of more commodious quarters. It is suggested that in order to fore stall any future question as to division of occupancy the State Board of Health be assigned the use of a designated part of the building and the University the use of the remainder, to be adjusted, perhaps, by the authorities of the two institutions by agreement between them, when the plans are settled upon. The cost of the construction and equipment of a building adequate to meet present and prospective requirements is estimated at \$125,000.

In March, 1902, the anatomical building was damaged, and part of its contents destroyed by fire. The loss on both building and contents was fully covered by insurance. The building was fully restored by the insurance companies at an expense of \$4,898.95. The loss on the contents was adjusted at \$2,500, with which the damaged and destroyed articles were replaced as far as they could be. The museum suffered the incidental loss of pathological specimens which could not be replaced, and embarrassment would have followed but for the fact that fortunately a portion of such specimens were in another building and available for use in the classes.

The clinical building is inadequate for the uses demanded of it, and we respectfully ask for an appropriation of \$25,000 for its enlargement.

## COLLEGE OF DENTISTRY.

The work in this college is of a high order, and its graduates find ready appreciation and employment. The college has outgrown its quarters, in one end of the old medical building, and its students can no longer be fitly accommodated and instructed therein.

We beg to suggest that it would be true economy to give this college a permanent home adequate for the present and the future. This would require a building that would accommodate, say, 300 students, containing an amphitheatre large enough to hold them, four laboratories, two other lecture rooms, an infirmary to accommodate 80 students, a room for the library, and business offices. Such a building would provide permanently for present and future wants, for it is thought that a school much larger than 300 is undesirable on account of the difficulty of maintaining the desirable contact between teacher and pupil. The tuition is \$100 per year, and it is thought that supplied with these facilities the college would soon become self-supporting.

A substantial, plain building furnishing the accommodation above indicated would cost \$70,000, and we respectfully recommend that that amount be appropriated for the construction and equipment of such a building.

## COLLEGE OF PHARMACY.

Proper accommodation has never been provided for this college, but it is thought that enough space may be found in the portion of old buildings to be vacated, if the foregoing recommendations are carried out, to meet present requirements.

## GEOLOGICAL AND NATURAL HISTORY SURVEY.

The survey has been prosecuted the last two years on the natural history lines.

The fund for prosecuting the survey arises from the proceeds of the sale of the Salt Spring lands, so called, the trust of disposing of which and applying the proceeds to the expenses of the survey having been reposed, by law, in the Board of Regents.

The balance to the credit of this fund August 1, 1900, was.....	\$17,082.23
The receipts from land and stumpage sales in the year ending July 31, 1901, were.....	54,339.09
Total .....	\$71,421.32
The expenditures the same year were.....	21,703.90
Balance August 1, 1901.....	\$49,717.42
The receipts from land and stumpage sales in the year ending July 31, 1902, were.....	16,757.39
Total .....	\$66,474.81
The disbursements the same year were.....	18,682.97
Balance August 1, 1902.....	\$47,791.84

Land contracts are now outstanding to the amount of \$13,578.06.

Only two tracts of agricultural land amounting to 240 acres remain unsold, the estimated value of which is about \$10 per acre.

The title also still remains in the state of 4,620 acres in Itasca county, granted as indemnity lands, the stumpage upon which has been sold and paid for, but the timber has not yet been all removed.

It is evident from this statement that the fund at the disposal of the board will not be adequate for a thorough natural history survey, but the policy will be continued of expending what there is, with the purpose of producing the best economic and utilitarian results. The cost of publishing and disseminating the reports of the survey takes from the fund a large amount of money which might otherwise be used in field work and investigation. Reports will be ready for the printer during the current biennial period to publish and disseminate which will require an expenditure of \$10,000.

A great and rare mass of material has been collected as the results of the survey, and the time has come when provision must be made for the safe-keeping, exhibition and convenient and practical use for instruction of this valuable property. The work done in the past two years and the condition and needs of the departments of botany and zoology follow.

#### BOTANICAL DEPARTMENT.

The work of this department has continued to be vigorously prosecuted during the last two years, under the direction of the accomplished state botanist, Professor MacMillan.

Field work was prosecuted during the summer of 1901, in the Red River Valley, along the international boundary, in the valley of the Minnesota river, in St. Louis and Cook counties, in southeastern Minnesota, and in the twin city district; during the summer of 1902, in Itasca and Jackson counties, in southeastern Minnesota, in the extreme northeast corner of the state and in the twin city district, reports of the results of which will appear in the publications of the survey.

The accessions to the library of the department during the biennium amount to 558 bound volumes, and about 1,800 pamphlets; making a total library at the date of this report of 3,916 bound volumes, and about 15,000 pamphlets.

During the last two years covered by this report 34,089 specimens of plants have been added to the herbarium, exclusive of the collections made by the field staff during 1902. Fifty-two new cases of specimens have been added, bringing the total number up to 201. Some 30,000 specimens have been incorporated by the herbarium staff, and the whole collection is in better shape than ever before. Exchanges outstanding will net the collection some 15,000 additional specimens. The photographic survey has been extended during the two years from 873 to 3,735 negatives.

Since the last report there have been discovered 228 varieties of plants not previously known to exist in Minnesota, some of which are new to science.

During the period covered by this report, Professor MacMillan has issued two additional parts of his "Minnesota Botanical Studies," comprising 244 octavo pages, and 21 plates, and vol. 2 of this valuable series has been brought to a close; and various contributions have been made to botanical journals by the chief and his assistants.

Owing to lack of space the additions to the museum cannot be displayed. There have, however, been added some 3,000 jars of material, much of it of great importance.

The need of a fire proof building to accommodate and safeguard this vast collection, the library, the museum and the laboratories, and for class rooms, is imperative. The botanical collection is very valuable and useful, and is probably the most important scientific asset of the state. When it is considered that the science of botany, the science which deals with plant life, plant breeding, plant diseases and their prevention and cure, is the foundation of the science of agriculture, the most important interest of the state,

it would seem that suitable accommodations for the safe-keeping and use of the property of this department, now, and in the future, should no longer be delayed.

The cost of a building which would meet the requirements of the situation, at the increased cost of labor and material, would not be less than \$100,000, and we beg leave to suggest that no economic advantage would be answered by a lesser appropriation. The erection of inadequate, contracted and unsuitable buildings leads to waste, for they are not enduring, and do not well meet the requirements of the present and still less the demands of the future.

We respectfully recommend a legislative appropriation of \$100,000 for this purpose.

#### ZOOLOGICAL DEPARTMENT.

Field work has been confined during the last two seasons to collecting data and material on the birds and fishes, under the superintendence of Professor Nachtrieb, the head of the department, in the Lake Vermillion region, in the western and southern counties, at the head of Lake Pepin, and in and about the state park, and the head of the Mississippi river. The material collected has been stored in Pillsbury Hall and private quarters, at great risk of injury from evaporation and other causes, and is not, at present, accessible to students and scientists. It is hoped that if a new building is speedily provided for the botanical department temporary accommodation may be found for this department in the part of Pillsbury Hall vacated by the botanical department and the school of mines; but a building for the uses of this department will be required in the near future. Progress has been made in the preparation of the material for the final reports.

#### LIBRARY.

The library has no subject catalogue, an indispensable adjunct to the comfortable and convenient use of any considerable collection of books. It now contains about 110,000 volumes, 290,000 pamphlets, and 1,000 periodicals. We earnestly recommend that an appropriation of \$2,500 for each of the next two years be made for supplying such catalogue. The library is weak in the lines of history and political science, and the expenditure of \$16,000

would be necessary to bring it up to modern requirements on these subjects. Considerable expenditure is necessary for the binding and rebinding of books. We strongly recommend that there be appropriated for the library, in addition to the appropriation for a subject catalogue, \$7,500 for each of the next two years.

#### MILITARY SCIENCE.

Work in this department has made good progress, both at the University and the agricultural school, under the instruction of First Lieutenant Haydn S. Cole, an accomplished officer of the United States army.

Two full years of military work is required both of University students and students of the agricultural college, and voluntary work is done by students of advanced classes. Military drill has been carried through the school of the battalion, and instruction has been given in guard mounting, review, inspection and escort of colors, advance and rear guard work, aiming and sighting, and in extended order and battle exercises, and theoretical instruction in the class room in the elements of military science to the officers and non-commissioned officers. Lieutenant Cole reports that the progress made in the two years is very satisfactory.

It is believed that the education in military matters at the University and school will furnish to the state, and nation, men well fitted for command, if their services should be required. Two of our cadet captains have been lately appointed by President Roosevelt to the regular army and duly commissioned as officers therein.

#### ENDOWMENTS.

#### THE GILFILLAN TRUST.

On the 6th of June, 1901, the Hon. John B. Gilfillan, of Minneapolis, donated to the University of Minnesota \$50,000 in the form of 50 bonds, for \$1,000 each, of the Minneapolis, St. Paul & Sault Ste. Marie Railway Company payable January 1, 1949, with interest at four per cent per annum, payable semi-annually on January 1st, and July 1st, according to coupons annexed, in trust to receive and apply the income of such fund, by its Board of Regents, "in aid of such deserving youths of our state as might be found struggling

for an education beyond their means of obtaining," the benefaction to be bestowed in the form of either loans or gifts upon students of either sex, in any of the departments of the University, or in schools preparatory thereto. The Board of Regents adopted carefully prepared rules for the administration of the trust, which met the approval of the benevolent donor, under which it is now being administered, several students having already been recipients of the benefaction.

#### THE LUDDEN TRUST.

The Hon. John D. Ludden, of St. Paul, endowed the University of Minnesota in the current year with a permanent fund of \$5,000 to be held, invested and re-invested by the University through its Board of Regents, and the income thereof to be collected, received and applied by said Board of Regents to the financial assistance of students of either sex in the school of agriculture. Mr. Ludden delivered into the hands of the regents for the principal sum, one Northern Pacific registered prior lien railway and land grant gold bond of the denomination of \$5,000, payable to the University of Minnesota and its assigns in gold coin, on the first day of January, 1997, with interest at four per cent per annum, payable quarterly in like gold coin, the fund to remain so invested until the bond matures, unless by reason of changed conditions a re-investment shall be sooner deemed judicious by the Board of Regents for the safety, conservation or continued productiveness of the fund. The premium on the purchase of this first grade security was \$212.50, and was paid by Mr. Ludden, thus enlarging his donation by that amount.

#### MRS. ELLIOT'S SCHOLARSHIP.

At the annual meeting of the board in 1901, Mrs. Mary H. Elliot, widow of Dr. A. F. Elliot, of Minneapolis, donated to the University of Minnesota, in fulfillment of the wishes of her late husband, \$250 a year, "to be used as a scholarship loan fund for assisting young men in the school of mines."

#### DONATION OF DRINKING FOUNTAIN.

In the summer of 1902, Mr. Caleb Door, of Minneapolis, erected on the campus a granite drinking fountain at an expense of several thousand dollars, his generous gift to the University.

**MEMORIAL FENCE.**

At the meeting of the Board in June, 1902, Mrs. Sarah Pillsbury Gale presented a communication expressive of her wish to construct a fence of stone and iron of artistic design along the front of the campus on University avenue, as a gift in memory of her father, the late John S. Pillsbury. The proposition was gratefully accepted, and the fence has been constructed at an expense to Mrs. Gale of \$8,000, and ornaments as well as protects the campus.

**ENLARGEMENT OF THE CAMPUS.**

The constantly increasing necessity for additional parade ground for military and athletic exercises induced the late Governor Pillsbury, shortly before his death, with his usual thoughtfulness, foresight and benevolence, to purchase in his own name six lots, in a block of ten, adjoining the campus in the only direction in which its extension is practicable, at an expense to him of \$7,300, with a view of donating the same to the University. His heirs now express their desire to convey these lots to the University in fulfillment of such intention. The Board of Regents, realizing the importance of the addition of this block of land to the campus, rendered all the more imperative by the present and prospective encroachment of new buildings on the old parade ground, and of prompt action, has ascertained that the other four lots, without which the six so proposed to be donated would not be available for the purpose intended, upon two of which are improvements, can be secured for \$8,921. The street between this block and the old campus has been vacated, thus adding to the ground made available by the purchase. Grading to a considerable extent will be necessary to put the new grounds in condition for use. It is thought that \$11,000 will be required for the cost of these four lots and the grading of the whole block, and the board confidently hopes that an appropriation of that amount will be made for the purpose, available at once.

**IMPROVEMENT OF THE CAMPUS.**

The campus is not in as good or attractive a condition as it should be, due partly to the constructions which have been going on upon it. It needs new walks, the setting out of shade trees, and

putting in order generally. The board recommends that an appropriation of \$5,000 for each of two years be made for the purpose.

#### EXTRAORDINARY REPAIRS.

It has developed that the earlier constructed tunnels to contain pipes for the transmission of heat, light and power from their source of production to the various buildings were deficient in size, and defective in construction, in respect that they are not adequately protected from moisture by concrete and cement bottoms and linings. The result is that the asbestos covering of the steam pipes disintegrates and falls off, and much heat is wasted. There is no doubt that true economy requires the immediate reconstruction and enlargement of these tunnels. It is estimated that the expense of such repairs and enlargement will be \$20,500, and we respectfully ask, in the interests of economy, that that amount be appropriated therefor, to be immediately available.

#### ORDINARY REPAIRS.

The foundation both on the campus and at the school of agriculture has become so large that the customary appropriation for ordinary repairs must needs be increased to \$10,000 per year, to meet the demands upon it, and we respectfully recommend that \$10,000 per year be appropriated for this purpose.

#### CARE OF CRIPPLED AND DEFORMED CHILDREN.

Prior to 1897, no attempt had been made by any state in the Union to relieve crippled children from their deformities at the public expense. Many institutions had been established for their benefit in the east, but these were all supported by private charity. To our own state was reserved the honorable distinction of being the first to carry on this work under its own auspices and at its own expense. It is gratifying to notice that the great state of New York, from which we have borrowed so much in legislative enactment and state policy, has followed our example in this matter.

The work was entrusted to the Board of Regents by the provision of chapter 289, laws of 1897. It was promptly taken up and

has been carried on without interruption down to the present time. We have earnestly endeavored to carry out the provisions of the law and to give the children coming within its terms the benefits and advantages contemplated by it.

We have entered into a contract with the Board of Control of the city and county hospital, in St. Paul, by the terms of which provision is made for the care of the children at that institution. A two-story brick building entirely detached from the other hospital building has been set apart for the exclusive use of the children in our charge. This building is well lighted and heated and is kept in a thoroughly sanitary condition. Under our contract the city hospital is to care for the children as patients are cared for in first class hospitals, including attendance of trained nurses day and night, food, washing, bandages and medicines; in fact everything that the children need except physicians' attendance and braces or mechanical appliances. The Board of Regents pays the Board of Control of the hospital, for the services above mentioned, \$3.75 per week for children under twelve years of age, and \$4.50 per week for children between twelve and sixteen years, the latter being the maximum age at which any are received.

This contract has been renewed from time to time for periods of two years each, as the work has been continued in our hands by the legislature and new appropriations made. The current period will expire May 1, 1903. We have found our arrangements with the city hospital very satisfactory. The children have received most excellent care from Dr. Ancker, superintendent, and all of his assistants.

The work was commenced in October, 1897. Since that date and up to December 1, 1902, 160 patients have been received into the hospital and six have been treated outside, making 166 in all. During the two years which have elapsed since the making of our last report, seventy-one patients have been received and one has been treated outside. For a full statement as to what has been accomplished in the medical and surgical treatment of these children during the past two years reference is made to the report of Dr. A. J. Gillette, surgeon in chief. Dr. Gillette receives no compensation for his services. They are entirely voluntary. He does a large amount of work for these children and he does it in a most conscientious and careful manner. To his efforts more than to those of any other person the success of the work is due. He has for his consultant, Dr. J. E. Moore, of Minneapolis, who also renders his services gratuitously.

Inasmuch as some of the children remain in the hospital two or three years, and most of them at least six months, we have deemed it advisable to employ a teacher who can give them such instruction as they are capable of receiving. Miss Frances Boardman, of St. Paul, has been employed for this purpose at a salary of \$35 per month. She has done excellent work among the children. She not only gives practical and useful instruction, but with the aid of a piano she does much to enable the children to pass pleasantly what might otherwise be dreary days of confinement in the hospital.

The expenditures for the fiscal year ending July 31, 1901, were \$9,458.59. Of this amount \$8,365.24 was paid to the city and county hospital for the care and nursing of the children under the special contract above mentioned; \$420 was paid for kindergarten teacher's services; \$300 was paid for clerk hire and superintendence; \$152 was paid for braces and mechanical devices. The balance was for books, rent of piano, postage, printing, etc.

The legislature at its session in 1901 appropriated for this work \$10,000 per year for the two years then ensuing. During the first of these two years (July 31, 1901 to July 31, 1902) we have expended \$9,397.31. Of this amount \$8,437.09 was paid to the city and county hospital for the care and nursing of the children, under the special contract above mentioned; \$332.50 was paid for kindergarten teacher's services; \$300 was paid for clerk hire and superintendence; \$140.58 was for braces, mechanical devices and books. Further small expenditures were made for rent of piano, postage and incidentals.

Though there is a small balance from the appropriation of the past year unexpended it must be remembered that on grounds of economy we did not publish any annual report and did not receive any children who were not strictly entitled to, and much in need of, treatment. With the publication of a new report January 1st, calling the attention of the physicians throughout the state to this work, it is quite probable that the number of patients will increase to such an extent that they cannot be cared for under the present appropriation. If the legislature continues the work in the hands of the Board of Regents during the next two years an appropriation of \$12,500 per annum for that period ought to be made.

What is the future of this work? Ought it to be continued and permanently established or ought it to be abandoned? After a trial covering a period of five years the policy of the state toward

this work ought to be settled. Our views on the subject are not changed since our report of two years ago was presented. On the contrary in the light of two years additional experience we are more convinced of the truth of what we then said and we repeat it here.

"As to the future of this work, we would say that, in our judgment, it ought to be continued by the state through some agency. There are, no doubt, many hundreds of indigent children in Minnesota suffering from various deformities, such as club feet, hip disease, spinal disease and dislocation of joints, most of which cannot only be remedied, but entirely cured, under the care of a competent orthopedic surgeon having at his command suitable hospital facilities, braces, mechanical appliances, etc. Few people appreciate what modern science has been able to accomplish in this direction. And this can be done without any considerable pain or suffering to the child. On the contrary, the child is, in most instances, relieved from pain as soon as the treatment commences. If these children are taken while young they may be saved from the terrible misfortune of going through life as cripples and hunchbacks, and instead of being helpless paupers and beggars they may become respectable, self-supporting citizens. It is difficult to imagine a more humane or a more profitable work in which the state could engage or to which it could devote a small part of its revenue."

The work of carrying out the provisions of the law above mentioned is entirely foreign to the duties of the Board of Regents in the management of the University. The legislature saw fit to assign to the board the duty of inaugurating the work in the first instance and has ever since continued to invoke its services in carrying it on. The work itself was, no doubt, regarded as an experiment, and the placing of it in our hands as a temporary arrangement. We have made an earnest effort to give it a fair trial and to expend the money placed at our disposal economically and solely for the purpose for which it was intended. If the legislature at its coming session shall be able to find some other agency through which the state can carry on this work we shall be much pleased.

#### THE BOARD OF CONTROL.

Some conferences were had between a committee of this board and the gentlemen composing the Board of Control, with a view

of rendering available the aid and co-operation of the latter in the management of the University under the law of the last session of the legislature; but the financial affairs of the University are so manifold and varied, and of such special nature, and so interwoven with its general administration, that it was found by the Board of Control, as stated in their report, that such a division of management was impracticable, and they therefore abstained from any further attempt to put it in operation, from the high motive that it would be injurious to the University. We concur with the Board of Control on both points, and beg leave to give earnest and respectful expression to the conviction that a divided management of the affairs of an institution so complicated, vast and varied, is impracticable, and that an attempt to put it in operation could not fail to be disastrous to the University, and a public misfortune; and we beg leave further to give most respectful expression to the earnest hope that the legislative action of the last session on this subject may be reconsidered at the coming session. We add the expression of an earnest conviction that the high honor of a great trust worthily performed is a stronger incentive to, and surer safeguard for, the thoughtful, intelligent, judicious and wise administration of a great and multiform seat of learning than the discharge of the duties of an office sought or held, in whole or in part, for the emoluments attached to it. The springing up and development of all the colleges and universities of the country, whose beneficent work and accomplishment are a part of the history, and whose renown is a part of the adornment, of our civilization, fully attest and illustrate the effectiveness and wisdom of the old method of administration, and point to the risk and danger of departing from it.

#### OBITUARY.

No formal announcement of the death of John S. Pillsbury is necessary. The sorrow has extended throughout the state and beyond its limits. There is perhaps no place outside of the homes of his family and relatives where he will be more missed than in this board. His love and devotion to the University, and his powerful aid in its development have been the theme of many memorials in many places, and it is unnecessary to enlarge upon them here. We desire to express a final word of love, respect and esteem for John S. Pillsbury, widely and justly honored and distinguished as citizen, statesman and philanthropist.

The foregoing review shows that the pressing needs of the University are great, and it cannot be concealed that the provision made for it heretofore has not fully kept pace with its development. This does not arise from any want of interest or pride in the University, or lack of appreciation of its great and increasing influence and importance; but it is rather because its development has been rapid beyond all anticipation and all precedent. From small beginnings it has already grown to a great beneficent and honored seat of learning a credit to the state. It would be most disastrous if it should retrograde, and most unfortunate if it should remain stationary or fail to meet the demands upon it. No doubt is entertained that it will receive the watchful care and solicitude of the people and the legislature in the future, as it has in the past, and that it will go on, in the plenitude of strength, to perform its full share in the future, as it has in the past, in developing the material resources and promoting the prosperity and happiness of our beloved commonwealth, a fitting head and crown of our splendid educational system. We have placed its needs

frankly and faithfully before you, and through you before the legislature, and it must be left to the wisdom of the legislature to deal with them.

All of which is respectfully submitted in behalf of the Board of Regents.

University, Dec. 9, 1902.

GREENLEAF CLARK,  
President.
