

PGE Potential of Intrusions Outside the Duluth  
Complex  
June 27, 2003

The products for Phase 1 of this project entitled: PGE  
Potential of Intrusions Outside the Duluth Complex, are  
included as part of the zip file ph1\_pgmrpt.zip

1) PGE Report-Document that includes an  
inventory of intrusions, associated figures, and  
summaries of geochemical, geophysical, and  
petrographic work; in paper and digital formats.  
This is a Microsoft Word document with  
accompanying figures as PDF and JPG files. There is  
also an Microsoft Excel table.

2) APPENDICES A-F

Excel files cover many pages and are not formatted  
into a print document.

A. Inventory of Intrusions-Excel table containing  
details of more than 150 intrusions and detailing  
work done for this project on each.

B. Geochemical Results of Varied Intrusions-whole-  
rock and select assays from varied intrusions

C. Petrography of Varied Intrusions

D. Geochronologic Results of Varied Intrusions

E. Report on Layered Mafic Complexes-conducted by  
Natural Resources Research Institute (unedited)

F. Arcview project (pgm1.apr)-a queryable map image  
that shows the location of intrusions, outcrop  
samples, and drill cores; together with all  
geophysical and geologic imagery that was utilized in  
its creation.
