

Errata:

Figure 9 Panel A (page 87), and Figure S3 Panel A (page 100)

The arrow representing gene model au5_g1089_t1 should point to the right side.
Restriction enzyme recognition sites are not affected.

Figure 9. λ phage clone containing a wild-type copy of gene model au5.g1088_t1 (*CHC1*) rescues the B6-F up-regulated transcript phenotype with *FDX5*, *CYC6* and *CPX1* genes, and partially with *HYDA1* and *HYDG* genes

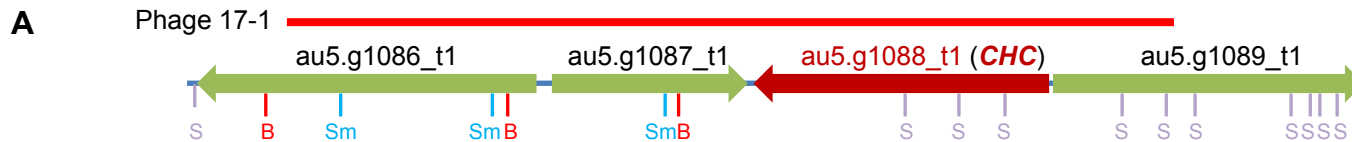

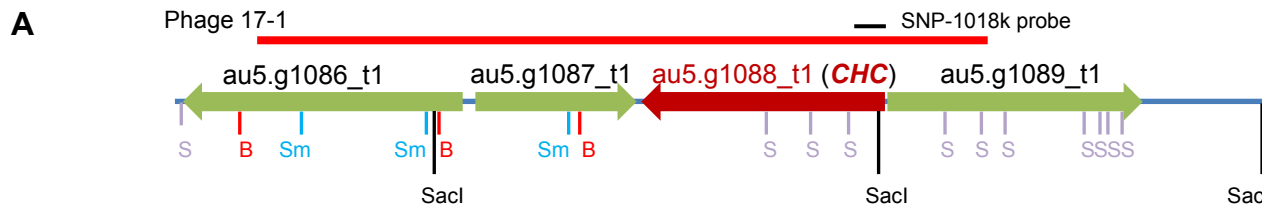

Figure S3. Confirmation of strain B6-F rescue transformation using λ phage DNA

Section 3-5-4 *Chlamydomonas* transformation (page 123) line 9

... and 1 μ g of pSI103 plasmid conferring resistance to paromomycin (Sizova *et al.* 2001) or pHyg3 plasmid conferring resistance to hygromycin (Berthold *et al.* 2002) were added to the tube...
