

UNIVERSITY OF MINNESOTA

BOARD OF REGENTS

Friday, November 9, 2007

9:00 a.m. - 12:00 p.m.

600 McNamara Alumni Center, Boardroom

Board Members

Patricia Simmons, Chair
Clyde Allen, Vice Chair
Anthony Baraga
Dallas Bohnsack
Maureen Cisneros
Linda Cohen
John Frobenius
Venora Hung
Steven Hunter
Dean Johnson
David Larson
David Metzen

AGENDA

1. Recognitions - R. Bruininks (pp. 3-4)
 - A. Nobel Prize in Economic Sciences Recipient
 - B. Knight First Class of the Royal Norwegian Order of Merit Recipient
2. Introductions - R. Bruininks (pp. 5-6)
 - A. Vice President of Scholarly & Cultural Affairs
 - B. Associate Vice President & Dean, International Programs
3. Approval of Minutes - Action - P. Simmons
4. Report of the President - R. Bruininks
5. Report of the Chair - P. Simmons
6. Receive and File Reports (pp. 7-23)
 - A. Annual Eastcliff Report
7. Report of the All-University Honors Committee - Action - R. Bruininks (p. 24)
8. Collective Bargaining Agreement with AFSCME Locals 3800 & 3801 (Clerical Unit 6) - Review/Action - C. Carrier/P. Dion (pp. 25-27)
9. Collective Bargaining Agreement with AFSCME Local 3260 (Health Care Unit 4) - Review/Action - C. Carrier/P. Dion (pp. 28-30)
10. Collective Bargaining Agreement with AFSCME Locals 3937 & 3801 (Technical Unit 7) - Review/Action - C. Carrier/P. Dion (pp. 31-33)
11. Collective Bargaining Agreement with IBEW Local 292 (Radio & Broadcast Technicians, Unit 2) - Review/Action - C. Carrier/P. Dion (pp. 34-36)
12. Appointments: University Foundation Trustees - Review/Action - P. Simmons (pp. 37)
13. Gifts - Review/Action - G. Fischer (pp. 38-45)
14. Annual University of Minnesota Foundation Report - G. Fischer/J. Kirk/E. Kaplan (p. 46)

15. Report of the Faculty Consultative Committee - G. Balas (pp. 47-49)
16. *University Plan, Performance & Accountability Report* - Review/Action - R. Bruininks/
T. Sullivan (pp. 50-196)
17. Strategic Positioning Update - R. Bruininks/R. Kvavik (p. 197)
18. Report of the Faculty, Staff & Student Affairs Committee - J. Frobenius
19. Report of the Finance & Operations Committee - S. Hunter
20. Report of the Educational Planning & Policy Committee - D. Larson
21. Report of the Facilities Committee - D. Metzen
22. Report of the Audit Committee - L. Cohen
23. Report of the Litigation Review Committee - A. Baraga
24. Old Business
25. New Business
26. Adjournment

**UNIVERSITY OF MINNESOTA
BOARD OF REGENTS**

Board of Regents

November 9, 2007

Agenda Item: Recognitions: Nobel Prize in Economic Sciences Recipient

review review/action action discussion

Presenters: President Robert H. Bruininks

Purpose:

policy background/context oversight strategic positioning

To recognize Dr. Leonid Hurwicz, University of Minnesota Regents Professor Emeritus of Economics, for being awarded a Nobel Prize in Economic Sciences.

Outline of Key Points/Policy Issues:

Background Information:

On October 15, 2007, Dr. Leonid Hurwicz was awarded a Nobel Prize in Economic Sciences for theories that help set rules for transactions ranging from auctions to elections. Dr. Hurwicz has also received the National Medal of Science in 1990, and was graduate adviser to Daniel McFadden, who won the economics Nobel Prize in 2000. Dr. Hurwicz was trained as a lawyer, receiving a master of laws degree from Warsaw University in Poland, and is well known for his knowledge of fields ranging far beyond economics.

BOARD OF REGENTS**

Board of Regents

November 9, 2007

Agenda Item: Recognitions: Knight First Class of the Royal Norwegian Order of Merit Recipient

review review/action action discussion

Presenters: President Robert H. Bruininks

Purpose:

policy background/context oversight strategic positioning

To recognize Robert B. Kvavik, University of Minnesota Associate Vice President for Planning, for being appointed Knight First Class of the Royal Norwegian Order of Merit.

Outline of Key Points/Policy Issues:

Background Information:

His Majesty King Harald V of Norway appointed the University's Associate Vice President for Planning, Robert B. Kvavik, Knight First Class of the Royal Norwegian Order of Merit for his promotion of research and university collaboration between the United States and Norway. He was presented with this award by Øystein Braathen, the Royal Norwegian Order of Merit chief of chancellery, on Tuesday, September 11, 2007, at the offices of the U.S.-Norway Fulbright Foundation for Educational Exchange in Oslo, Norway.

**UNIVERSITY OF MINNESOTA
BOARD OF REGENTS**

Board of Regents

November 9, 2007

Agenda Item: Introductions: Vice President for Scholarly & Cultural Affairs

review review/action action discussion

Presenters: President Robert H. Bruininks

Purpose:

policy background/context oversight strategic positioning

To introduce Steven J. Rosenstone, newly appointed Vice President for Scholarly & Cultural Affairs, to the Board of Regents and University community.

Outline of Key Points/Policy Issues:

Background Information:

Steven J. Rosenstone served as dean of the University of Minnesota College of Liberal Arts for the past 11 years. Now as Vice President for Scholarly and Cultural Affairs, Vice President Rosenstone is responsible for the expansion and strengthened coordination and promotion of academic, artistic, cultural, and civic programs and events of the University of Minnesota, in consultation and collaboration with University leaders, academic colleges, centers and institutes, museums and galleries, coordinate campuses, and external cultural organizations. He is also responsible for implementing the new vision to transform Northrop, the University's historic auditorium, into a dynamic, state-of-the-art facility that is more fully integrated into the academic life of the campus and that serves as a forum for discussion, a portal to the University, and a center of distinction.

**UNIVERSITY OF MINNESOTA
BOARD OF REGENTS**

Board of Regents

November 9, 2007

Agenda Item: Introductions: Associate Vice President & Dean, International Programs

review review/action action discussion

Presenters: President Robert H. Bruininks

Purpose:

policy background/context oversight strategic positioning

To introduce Meredith McQuaid, newly appointed Associate Vice President & Dean of International Programs, to the Board of Regents and University community.

Outline of Key Points/Policy Issues:

Background Information:

Meredith McQuaid most recently served as the Associate Dean of Administration and International Programs at the University of Minnesota Law School. Now as Associate Vice President and Dean of International Programs, she is responsible for promoting the global dimensions of teaching, research, and engagement across all colleges and campuses of the University, and working with the President, Vice Presidents, Chancellors, Deans, faculty and staff to create global opportunities; expand international and interdisciplinary components of teaching, research and public engagement activities; recruit and support international students, faculty, and staff; and identify funding for and facilitate development of critical interdisciplinary and international partnerships important to the University's strategic plan.

INTRODUCTION TO EASTCLIFF

JULY 2006 – JUNE 2007 ANNUAL REPORT

In 1922 Mr. Edward Brooks, a local lumber baron, commissioned C.H. Johnston, Sr., an architect of record for the University, to create a home for his family. The resulting two-story, twenty-room manor reflects the Brooks' understated taste and love of assorted wood. Walnut, ash, cherry, cypress, knotty pine, and bleached oak were utilized in the construction and detailing; the unusually thick and wide, white clapboard siding was custom cut, and the home could be warmed with the nine fireplaces burning wood from the Brooks' lumberyards. Because of its perch atop the eastern cliffs of the Mississippi, the Brooks family began calling the home Eastcliff — a name still used to this day.

In 1958 the Brooks family graciously donated their majestic home to the University. Today, surrounded by a white, wooden fence, Eastcliff occupies approximately two acres and serves as a living laboratory for the University. Faculty and students in design and architecture assist with renovations and improvements for the home.

Artwork within the residence is on loan from University of Minnesota collections including the Frederick R. Weisman Art Museum, the Bell Museum of Natural History, the Goldstein Gallery, and the Tweed Museum of Art. In the gardens, sculpture from the Weisman Art Museum collection further accentuates the estate.

The Eastcliff Technical Advisory Committee (ETAC), which has main oversight responsibility for the house, and the Friends of Eastcliff Committee (FOE), which raises funds to provide enhancements, have continued their excellent guardianship of this valuable property, making it an outstanding venue for University events and a residence for the president and his family. These two committees have continued to ensure that Eastcliff presents an image worthy of the University's rich history and tradition. Through their efforts, Eastcliff was placed on the National Register of Historic Places in June 2000 as one of the finest examples of 1920's Colonial Revival architecture.

Since 1961, seven University of Minnesota presidents and their families have resided in Eastcliff. In addition to housing our current president, Robert H. Bruininks, and his wife, Dr. Susan Hagstrum, Eastcliff serves as a special gathering place for official University functions. Its gracious structure, dramatic river bluff views, and manicured grounds extend a warm welcome to friends of the University — students, faculty, staff, alumni, donors, community leaders and public officials, as well as dignitaries from around the world. A carriage house, summerhouse, pool, and terraces enrich the estate and extend the experience of visitors beyond the main residence. This past year approximately 8,000 people visited Eastcliff. Staff members from the Office of the President ensure the on-going management of the property as well as planning and coordinating more than 150 events each year.

Eastcliff was donated to the University and is only partially supported by University funds. While the University covers costs for maintenance of Eastcliff, such as painting and other basic

repair projects just as it does for other University buildings, private funding supports upkeep beyond basic maintenance as well as some renovations. Private gifts help fund special undertakings and ensure that Eastcliff continues to be a gracious venue for University meetings and receptions. The FOE Committee directs fund raising for all projects not funded by the University, and ETAC recommends capital improvements, maintenance, and repairs. Both committees oversee the maintenance and renovation projects and report directly to the Board of Regents. This document focuses on projects completed during the past fiscal year as well as projects to be completed in the future. It also includes a report on the oversight and management of the house and official Eastcliff activity during the past year.

CAPITAL AND MAINTENANCE PROJECTS COMPLETED FY 2006-2007

During FY 2006-07, exterior restoration was done on the house — painting of the main residence, repair of deteriorated siding and shutters, and installation of a new bathroom window. The cost for this capital project was \$116,574.

In addition, the carriage house was painted and the wood was repaired with operations funds. The cost for this project was \$13,779.50.

FUTURE CAPITAL AND MAINTENANCE PROJECTS

Major projects anticipated to be completed in the next six years:

EASTCLIFF 6-YEAR PLAN/PROJECT LIST

	PROJECT TITLE Capital Projects	Fiscal Year
1.	<u>Second Floor Mechanical Systems:</u> Modification and/or replacement of the 2 nd floor heating and cooling systems, including controls.	2008
2.	<u>Historic Summerhouse Restoration: ADA Accessibility</u> Interior restoration of the historic summerhouse includes accessible shower/dressing/restrooms, a seating area, and buffet.	2008 (Schematic design phase)
3.	<u>Security System Upgrade:</u> Replace the existing security systems including the interior glass breaks and motions sensors, as well as the exterior cameras.	2010
4.	<u>Basement Elevator Lobby Finish Out:</u> Complete the interior finishes of the basement level elevator lobby, which was deleted from the original elevator installation due to budget constraints.	2011

EASTCLIFF TECHNICAL ADVISORY COMMITTEE (ETAC)

The Eastcliff Technical Advisory Committee (ETAC) is chaired by Lyndel King, director of the Frederick R. Weisman Art Museum, and reports to the Board of Regents. This committee plans and oversees all Eastcliff renovation, maintenance, and enhancement projects. ETAC worked closely with the Friends of Eastcliff and the University to combine University funds with private donations to complete major projects, needed maintenance, and to provide enhancements for the house.

Eastcliff Technical Advisory Committee Roster

- Mike Berthelsen, associate vice president, Facilities Management
- Ann Cieslak, executive director and corporate secretary, Board of Regents
- Jill Christenson, Office of the President
- Robert J. Gunderson, assistant professor, Department of Landscape Architecture
- Susan A. Hagstrum, university associate
- Lynn K. Holleran, Office of the President
- Bob Janowski, program director, Campus Health and Safety
- Lyndel King, committee chair and director, Frederick R. Weisman Art Museum
- Carin Martin, assistant professor, Department of Design, Housing, and Apparel
- Kevin Ross, Capital Planning and Project Management
- Robert W. Tunell, interim facilities manager, Campus Zone
- J. Stephen Weeks, associate professor, Department of Architecture
- Dana Zniewski, house manager, Eastcliff

EASTCLIFF TECHNICAL ADVISORY COMMITTEE BYLAWS

Mission

Eastcliff has a unique role among University of Minnesota buildings in that it serves both as a public facility for events and meetings and as the private residence of the University president and family. The Eastcliff Technical Advisory Committee's mission is to guide the improvement, maintenance, operation, and use of Eastcliff to ensure that it projects an image worthy of the University's rich history and tradition. In doing so, the committee will appropriately separate, protect, and foster Eastcliff's unique public and private uses.

ETAC Membership

Chair:

- Selected by the Chair of the Board of Regents from the following member representatives

Members:

- Board of Regents Executive Director (1)
- Department of Design, Housing and Apparel (1)
- Department of Landscape Architecture (1)
- Department of Architecture (1)
- Facilities Management (2)
- President's Spouse (1)
- Weisman Art Museum (1)
- University Foundation (1)
- President's Office (1)

Advisory Members:

- University of Minnesota Campus Health and Safety (1)
- Facilities Management Owner's Representative (1)

Staff:

- Eastcliff House Manager

Responsibilities

1. Master Plans. Oversee the development and implementation of master plans that enhance the original integrity and design of Eastcliff and its grounds and promote it as an important institutional and residential University resource. The master plan will include information pertaining to landscaping, furnishing repair and renewal, as well as acquisitions.
2. Capital Improvement Projects. Consistent with the Eastcliff master plans and following the University's established capital planning process, recommend to the Vice President for University Services a prioritized list of future capital improvement projects, estimated project budgets, suggested funding sources, and project delivery methods and timing.
3. Operations and Maintenance Plan. Review annual facility operations and maintenance plan and budget for Eastcliff to be implemented by Facilities Management.
4. Quarterly Operating Reports. Review quarterly operating statements supplied by Facilities Management.
5. Operating Policies and Procedures. Advise the President's Office and Facilities Management on operating policies and procedures including staffing, general maintenance, purchasing, security, and the appropriate level of scheduling and use of Eastcliff.

6. Art Works and Furnishings. Make recommendations to the University museums for the provision, location, maintenance, insurance, and security of art works and furnishings to be shown or used in the public areas of Eastcliff.
7. Minutes. Distribute committee meeting minutes to members of the Eastcliff Technical Advisory Committee.
8. Annual Report. Review and submit to the Board of Regents an annual report on Eastcliff comprised of information about the previous fiscal year's financial, maintenance, and operational activity.

Approved September 2002

FRIENDS OF EASTCLIFF

The Friends of Eastcliff, established in 1993, is a group of University alumni, faculty, friends, and community leaders created to raise private support so this historic residence continues to be a gracious and welcoming home. During FY 2006-07, Friends of Eastcliff membership was strong at 293. Donations are managed by the University of Minnesota Foundation and are designated for enhancements to the house, not maintenance projects, which are covered by the University. The chair of the Friends of Eastcliff Committee is Dallas Bohnsack, a member of the University's Board of Regents.

Events Held at Eastcliff

More than 170 events were held at Eastcliff in FY 2006-07 involving 7,687 guests including University of Minnesota students, faculty, staff, alumni, and friends as well as community, national, and world leaders.

Fundraising and Projects Completed

In 2006-2007, the Friends of Eastcliff raised \$55,607 in gifts. Projects completed during this fiscal year include:

- Provided funding for installation of Biederman Sculpture on the grounds of Eastcliff
- Reupholstered living room chairs
- Purchased flatware and trays for events hosted by Eastcliff
- Hosted the annual Friends of Eastcliff Garden Party on June 24, 2007 (a donor event)
- Provided funding for maintenance of the 1922 Steinway baby grand piano at Eastcliff
- Provided support and funding for the Friends of Eastcliff Book club (Three meetings were held with approximately 25-50 members in attendance each time. The book club continues to focus on University of Minnesota authors and books published by the U of M Press.)

FRIENDS OF EASTCLIFF COMMITTEE

Friends of Eastcliff Committee Roster

- Dallas Bohnsack, committee chair and regent, University of Minnesota
- Jill Christenson, Office of the President
- Vickie R. Courtney, University Senate Office
- Susan A. Hagstrum, university associate
- Catherine Shea Hellervik, vice president, Personnel Decisions International
- Andrea Hjelm, friend of Eastcliff
- Lynn K. Holleran, Office of the President
- Zehra Keye, friend of Eastcliff
- Lyndel King, director, Weisman Art Museum
- Judy Kirk, University of Minnesota Foundation
- Katherine R. Lillehei, Eastcliff docent and trustee, School of Nursing Foundation
- Libby Lincoln, friend of Eastcliff
- Lois Maturi, friend of Eastcliff
- Sue Muscoplat, friend of Eastcliff
- Sue Nelson, friend of Eastcliff
- Peter J. Olin, director, Minnesota Landscape Arboretum
- Nancy Rosenberg, friend of Eastcliff
- Jolee Suskovic, friend of Eastcliff
- Gail Weinberg, friend of Eastcliff
- Dana Zniewski, house manager, Eastcliff

Friends of Eastcliff Committee Bylaws

Mission

Eastcliff has a unique role among University of Minnesota buildings in that it serves both as a public facility for events and meetings and as the private residence of the University president and family. The Friends of Eastcliff Committee's mission is to raise funds for financing projects associated with Eastcliff that are classified as enhancement projects intended to retain the architectural integrity of the house or to supplement the interior furnishings.

Membership

Chair

- Board of Regents Member (selected by the Chair of the Board of Regents)

Members:

- Board of Regents (1)
- Chair, Eastcliff Technical Advisory Committee (1)
- Citizens (5-10)
- Minnesota Landscape Arboretum (Director Designee) (1)
- President's Spouse (1)
- University Foundation (Foundation President Designee) (1)
- Office of the President (President Designee) (1)

Staff:

- Eastcliff House Manager

Responsibilities

1. Fundraising. Plan and assist in the solicitation of private resources toward the development of the endowment fund ("Legacy Fund") to support projects identified as "enhancements" by the Eastcliff Technical Advisory Committee.
2. Project Prioritization. Consistent with the master plan, review the enhancement recommendations of the Eastcliff Technical Advisory Committee and suggest a priority rank for private funding.
3. Public Support. Nurture continued public support of Eastcliff. Advise on issues of public relations, as well as on matters pertaining to donor appreciation and communications.
4. Archives. Oversee the development and maintenance of historical information pertaining to Eastcliff.

**UNIVERSITY OF MINNESOTA
BOARD OF REGENTS**

Board of Regents

November 9, 2007

Agenda Item: Report of the All-University Honors Committee

review review/action action discussion

Presenters: President Robert H. Bruininks

Purpose:

policy background/context oversight strategic positioning

To adopt the recommendation endorsed by President Robert H. Bruininks and the All-University Honors Committee.

Outline of Key Points/Policy Issues:

Background Information:

The recommendation was forwarded in a letter dated October 26, 2007, from President Robert H. Bruininks to members of the Board of Regents.

President's Recommendation for Action:

The President recommends that the Board of Regents adopt the report of the All-University Honors Committee.

**UNIVERSITY OF MINNESOTA
BOARD OF REGENTS**

Board of Regents

November 9, 2007

Agenda Item: Collective Bargaining Agreement with AFSCME Locals 3800 & 3801
(Clerical Unit 6)

review review/action action discussion

Presenters: Vice President Carol Carrier
Patti Dion, Director of Employee Relations

Purpose:

policy background/context oversight strategic positioning

Recommend approval of this collective bargaining agreement between the University of Minnesota and AFSCME Clerical Unit 6, Locals 3800 and 3801.

Outline of Key Points/Policy Issues:

This contract will provide the terms and conditions of employment for employees between the date of signing and June 30, 2009. A summary of the contract, the members covered, and the associated financial impact is attached.

Background Information:

Negotiations on this contract began in May, 2007, and concluded with a tentative agreement on September 20, 2007. The Union's contract ratification process was completed on October 15, 2007. Board approval is required before the contract can be implemented.

President's Recommendation for Action:

The President recommends that the Board approve this collective bargaining agreement between the University of Minnesota and AFSCME Clerical Unit 6, Locals 3800 and 3801.

REGENTS OF THE UNIVERSITY OF MINNESOTA
RESOLUTION RELATED TO
THE PROPOSED LABOR AGREEMENT WITH
AFSCME LOCALS 3800 AND 3801 EMPLOYEES

WHEREAS, the parties have met and negotiated over the course of the past several months and have reached agreement regarding terms and conditions of employment regarding the employees of this bargaining unit; and

WHEREAS, AFSCME Locals 3800 and 3801 have ratified acceptance of this agreement; and

WHEREAS, according to Board of Regents Policy: *Board Operations and Agenda Guidelines*, approval of labor agreements by the Board of Regents is required;

NOW, THEREFORE, BE IT RESOLVED that on the recommendation of the President, the Board of Regents approves this labor agreement as outlined in the docket for November 9, 2007.

**AFSCME LOCALS 3800 and 3801
PELRA UNIT 6**

This unit is composed of 8 separate classifications of Clerical workers including such classifications as Office Specialists, Executive Administrative Specialists, and Principal Accounts Specialists. The total number of employees in this unit is approximately 1978.

**UNIVERSITY OF MINNESOTA
BOARD OF REGENTS**

Board of Regents

November 9, 2007

Agenda Item: Annual University of Minnesota Foundation Report

review review/action action discussion

Presenters: Foundation President Gerald Fischer
Assistant Vice President Judy Y. Kirk
University of Minnesota Foundation Trustee and Board Vice-Chair, Elliot S. Kaplan

Purpose:

policy background/context oversight strategic positioning

To provide the Board of Regents with an annual review of fundraising highlights.

Outline of Key Points/Policy Issues:

- Gift production totaled \$250.5 million in FY 2007, compared with \$181.5 million the prior year.
- This annual report will include analyses of the donors, size of gifts, and the designated use of the gifts.
- Several benchmarks for measuring the performance of the development function will be presented.
- Other aspects of private giving to the University and its recognized foundations will be presented, including updates on the Promise of Tomorrow scholarship initiative and the TCF Bank Stadium fundraising campaign.

Background Information:

Each year, the Board receives an overview and analysis of private gifts that benefit the University.

BOARD OF REGENTS**

Board of Regents

November 9, 2007

Agenda Item: Report of the Faculty Consultative Committee

review review/action action discussion

Presenters: Professor Gary Balas

Purpose:

policy background/context oversight strategic positioning

To provide the Board of Regents with an update on the goals and accomplishments of the Faculty Consultative Committee throughout the year.

Outline of Key Points/Policy Issues:

Background Information:

It is customary for the chair of the Faculty Consultative Committee to provide quarterly updates to the Board of Regents.

REPORT TO THE BOARD OF REGENTS

23 October 2007

Madam Chair, Members of the Board, President Bruininks, Representatives to the Board, thank you for the opportunity to discuss a few items on the faculty agenda, and to comment on some of our activities since our last report in September.

The Faculty Consultative Committee (FCC) is interested in the metrics and measurements currently being used by the University to assess performance towards our aspirational goal of being a top public research university. The Board of Regents helped inform our conversations with your discussion of the University Plan, Performance, and Accountability Report at the Educational Planning and Policy Committee in September. We understand that the metrics being tracked are driving policy decisions, and we believe it is important that some of the metrics be associated with scholarship, teaching and public engagement which are key parts of faculty activities and critical aspects of excellence at the University. Therefore, a subcommittee of the FCC with Professor Jennifer Windsor as chair, has been charged to develop measures related to faculty work. The subcommittee will draw on faculty measurement experts and the newly-revised departmental tenure procedures to understand how excellence is assessed across the University. The Provost is very supportive of our initiative and is providing staff for the subcommittee. Vice President Mulcahy is partnering with the subcommittee to develop appropriate metrics. We look forward to sharing our finding with the University administration and the Board of Regents in the spring.

The proposed revision of the Regents Copyright Policy is of great interest to the faculty and it has been discussed in many faculty governance forums this fall. Faculty members have traditionally been accorded rights to the academic work they produce, to encourage maximum productivity and, most importantly, as a corollary to the principles of academic freedom. At the same time, we understand that the University has interests in retaining rights to teaching materials developed with substantial University investments of money and personnel. We have been working with the administration to ensure that faculty understand the proposed policy and have an opportunity to provide their own views about what is appropriate and workable. That is no easy task, as it requires some familiarity with copyright law and how the policy will apply in a variety of circumstances unique to particular disciplines and University units. The successful passage of the revised tenure code provides an excellent consultation model for the copyright policy, as it resulted in significant changes to a foundational policy being embraced by the faculty, administration and Board of Regents. Faculty are currently providing feedback on the policy to the copyright policy drafting committee. We look forward to continuing our work with the administration in crafting a copyright policy that protects faculty interest in their academic works and one that the Board of Regents can enthusiastically support. We think that discussion will need to continue even after the policy is adopted, because implementation in many instances will be done locally, unit by unit, and many questions will be answered only in practice, not by the broad statements that are appropriate to a Regents policy.

The Faculty Consultative Committee has hosted four meetings with department chairs and heads to discuss issues they are facing as they strive to move their departments forward. The topics discussed included: faculty morale; resources for department initiatives and faculty support; centralization/decentralization; burdens effecting faculty productivity; the impact of the budget model; and improving communications among faculty, departments, colleges, and central administration. We plan to distill the core issues facing departments across the University and work with the administration to address issues that are preventing individual units from achieving their full potential.

I look forward to the coming academic year working with faculty governance, the Administration, and the Board of Regents to achieve our goal of being one of the top public research universities in the world.

Respectfully submitted,

Gary J. Balas, Chair Faculty Consultative Committee
Distinguished University McKnight Professor
Professor and Head, Aerospace Engineering and Mechanics

UNIVERSITY OF MINNESOTA BOARD OF REGENTS

Board of Regents

November 9, 2007

Agenda Item: University Plan, Performance and Accountability Report

review review/action action discussion

Presenters: President Robert H. Bruininks
Senior Vice President/Provost E. Thomas Sullivan

Purpose:

policy background/context oversight strategic positioning

To inform the Board about the University's overall performance during the previous year relative to its competitors, past results, and strategic positioning goals as reported in the *2007 Accountable to U: University Plan, Performance, and Accountability Report*. To provide the Board an opportunity to discuss the major trends and implications for the University of the findings and conclusions in the report.

Outline of Key Points/Policy Issues:

Is the University meeting its accountability responsibilities through the *University Plan, Performance, and Accountability Report*?

Does the report provide the Board of Regents with adequate and timely information to fulfill its accountability role?

Does the report accurately reflect the University's aspirational goal, strategic positioning efforts, and measurements of progress?

Background Information:

In 2000, the Board approved the creation of the *University Plan, Performance, and Accountability Report*. In its resolution, the Board noted that it "...holds itself accountable to the public for accomplishing the mission of the University" and that the report was to become the principal annual documentation of that accountability. The first report was published in 2001. In December 2005, the Educational Planning and Policy Committee reviewed a revised outline and format for the report, which was intended to be aligned with the University's strategic positioning efforts. In May 2006, the Board revised the timetable for the production of the report to each September. The 2007 edition is the sixth edition produced for the Board of Regents.

President's Recommendation for Action:

The President recommends that the Board accept the 2007 University Plan, Performance, and Accountability Report.

REGENTS OF THE UNIVERSITY OF MINNESOTA
RESOLUTION RELATED TO
UNIVERSITY PLAN, PERFORMANCE, & ACCOUNTABILITY
REPORT

WHEREAS, the president of the University and the Board of Regents (Board) are entrusted with the responsibility in their oversight of the University to be good stewards of the public interest, resources, and facilities; and

WHEREAS, it is the responsibility of the Board, in cooperation with the president, to articulate the directions and priorities of the institution; identify and analyze the critical issues and challenges confronting the University; assess its operations; and evaluate the performance and success of its colleges and campuses; and

WHEREAS, it was resolved that the *University Plan, Performance, and Accountability Report* (Report) shall include the priorities of the institution; statistical profiles of the University at the campus level; selected statistics related to system trends; University-wide strategies to achieve goals; summaries of accomplishments and investments; progress in institutional performance measures; and summaries of special institutional studies and reports; and

WHEREAS, on the recommendation of the senior vice president for academic affairs and provost, the president of the University requests the Board accept the 2007 Report; and

NOW, THEREFORE, BE IT RESOLVED that the Board accepts the 2007 Report as submitted by the administration.

Introduction

The University of Minnesota’s vision is clear—to transform this great institution into one of the world’s top three public research universities within a decade.

“Top three” is audacious; its purpose is to urge us to live up to our proud heritage of achievement and public responsibility. We aspire, not to ranking, but to *stature* and *distinction*. Achieving this aspiration requires a deep, abiding cultural commitment to excellence in everything we do, from the education of our students to the advancement of knowledge for the public good.

The Board of Regents’ 2005 endorsement of this vision and the changes it calls for are based on enduring values that have guided the University since its founding:

- **Excellence and Innovation**—We are heirs to a legacy of innovation at the University, where people of average means but extraordinary imagination set world-class standards and achieved world-class results.
- **Discovery and the Search for Truth**—We must share knowledge to advance our quality of life and the economy of Minnesota, the nation, and the world.
- **Access and Diversity**—To ensure that talented people from every income level, every neighborhood, and every kind of background can find a place at the Uni-

versity and succeed here. The University is committed to access to success for all its students, faculty, and staff.

- **Academic Integrity**—To reconstruct a deeper sense of community and respect—across disciplines, across employee groups, and among students and teachers.
- **Results**—A commitment to student progress and learning; the enrollment of tens of thousands of diverse, talented students who seek their future here each year; strengthened academic leadership in areas of comparative advantage; strengthened faculty and staff culture, one premised on continuous improvement; and reduced operating costs.
- **Service and Stewardship**—We want this University to be known as much for how well it manages itself as it is for research breakthroughs or high-quality education programs.

Over the past three years, the University has undertaken a comprehensive strategic review of its mission, academic and administrative strengths and weaknesses, institutional culture, and core values; the state, national, and global competitive environment in which it operates; demographic trends affecting its students, faculty, and staff; and the myriad long-term financial issues affecting public research universities.

Introduction

Following this review, the Board of Regents affirmed that the University must strengthen its role as Minnesota's only major research university, as its land-grant institution, and as the state's primary magnet for students, faculty, professionals, entrepreneurs, and civic and artistic leaders.

The Four Pillars

Within this comprehensive strategic review, the University identified four "pillars" upon which its efforts to achieve the vision would be based:

- **Exceptional Students:** Recruit, educate, challenge, and graduate outstanding students who become highly motivated lifelong learners, leaders, and global citizens.

- **Exceptional Faculty and Staff:** Recruit, mentor, reward, and retain world-class faculty and staff who are innovative, energetic, and dedicated to the highest standards of excellence.
- **Exceptional Organization:** Be responsible stewards of resources, focused on service, driven by performance, and known as the best among our peers.
- **Exceptional Innovation:** Inspire exploration of new ideas and breakthrough discoveries that address the critical problems and needs of the University, state, nation, and the world.

The 2007 edition of the *University Plan, Performance, and Accountability Report* summarizes the major initiatives under way and the measures of progress within each of these four "pillar" areas.

University of Minnesota Mission

The University of Minnesota, founded in the belief that all people are enriched by understanding, is dedicated to the advancement of learning and the search for truth; to the sharing of this knowledge through education for a diverse community; and to the application of this knowledge to benefit the people of the state, the nation, and the world. The University's mission, carried out on multiple campuses and throughout the state, is threefold:

- **Research and Discovery:** Generate and preserve knowledge, understanding, and creativity by conducting high-quality research, scholarship, and artistic activity that benefit students, scholars, and communities across the state, the nation, and the world.
- **Teaching and Learning:** Share that knowledge, understanding, and creativity by providing a broad range of educational programs in a strong and diverse community of learners and teachers, and prepare graduate, professional, and undergraduate students, as well as non-degree-seeking students interested in continuing education and lifelong learning, for active roles in a multiracial and multicultural world.
- **Outreach and Public Service:** Extend, apply, and exchange knowledge between the University and society by applying scholarly expertise to community problems, by helping organizations and individuals respond to their changing environments, and by making the knowledge and resources created and preserved at the University accessible to the citizens of the state, the nation, and the world.

In all of its activities, the University strives to sustain an open exchange of ideas in an environment that embodies the values of academic freedom, responsibility, integrity, and cooperation; that provides an atmosphere of mutual respect, free from racism, sexism, and other forms of prejudice and intolerance; that assists individuals, institutions, and communities in responding to a continuously changing world; that is conscious of and responsive to the needs of the many communities it is committed to serving; that creates and supports partnerships within the University, with other educational systems and institutions, and with communities to achieve common goals; and that inspires, sets high expectations for, and empowers individuals within its community.

History

The University of Minnesota was founded as a preparatory school in 1851, seven years before the territory of Minnesota became a state. Financial problems forced the school to close during the Civil War, but with the help of Minneapolis entrepreneur John Sargent Pillsbury, it reopened in 1867. Known as the father of the University, Pillsbury, who was a University regent, state senator, and governor, used his influence to establish the school as the official recipient of public support from the Morrill Land-Grant Act, designating it as Minnesota's land-grant university.

William Watts Folwell was inaugurated as the first president of the University in 1869. In 1873, two students received the first bachelor of arts degrees. In 1888, the first doctor of philosophy degree was awarded. The Duluth campus joined the University in 1947; the Morris campus opened in 1960, and the Crookston campus in 1966. The Rochester campus, offering programs since 1966, was designated a coordinate campus in 2006.

Today the University is a statewide resource that makes a significant impact on Minnesota's economy, society, and culture. With more than 65,000 students enrolled in high-quality programs in the Twin Cities, Duluth, Crookston, Morris, Rochester, and around the globe, the University is a key educational asset for the state, the region, the nation, and the world.

The University is one of the state's most important assets and its economic and intellectual engine. As a top research institution, it serves as a magnet and a means of growth for talented people, a place where ideas and innovations flourish, and where discoveries and services advance Minnesota's economy and quality of life.

As a land-grant institution, the University is strongly connected to Minnesota's communities, large and small, partnering with the public to apply its research for the benefit of the state and its citizens through public engagement.

Enrollment: Total enrollment at the University's campuses for fall 2006 was 65,489. Sixty-two percent of registered students were undergraduates. Non-degree seeking students represented 10 percent of total enrollment.

Degrees Granted: University graduates play a unique role in keeping Minnesota competitive and connected in an increasingly knowledge-based economy and global society. The University awarded 13,283 degrees in 2006-07, including 10,817 total degrees and 6,319 bachelor's degrees on the Twin Cities campus and, on the Duluth campus, 1,841 total degrees and 1,627 bachelor's degrees.

Forty-one percent of the degrees awarded on the Twin Cities campus in 2006-07 were graduate and first-professional degrees (law, medicine, pharmacy, dentistry, veterinary medicine).

University of Minnesota degrees by campus, 2006-07.

<u>Degree</u>	<u>Twin Cities</u>	<u>Duluth</u>	<u>Morris</u>	<u>Crookston</u>	<u>Total</u>

Source: Office of Institutional Research, University of Minnesota

State’s Only Major Research Institution:

The University of Minnesota is the state’s only major research university. This sets Minnesota apart from the many states that have at least two major research institutions (e.g., Michigan and Michigan State; Iowa and Iowa State; Indiana and Purdue). Its research comprises 98.8 percent of sponsored academic research in Minnesota’s higher education institutions—more than one-half billion dollars each year—and creates an estimated 20,000 jobs in Minnesota’s private economy.

A National Public Research University: The Twin Cities campus ranks consistently within the top seven public research universities in the nation. It is also among the nation’s most comprehensive institutions, one of only a few campuses nationally that have agricultural programs as well as an academic health center with a major medical school.

The University prides itself on strong programs and departments—from theater and dance to chemical engineering and economics—and its breadth provides unique interdisciplinary strengths, particularly in the life sciences.

State’s Economic Driver: In economic terms, the University also provides significant return on the state’s investment. For FY 2006-07, for every dollar of state support, the University brought in \$3.42 of other revenues and generated millions of dollars in economic activity.

Importance of State Support: State appropriations, an essential and the most flexible source of funding, provided 25 percent of University of Minnesota revenue in FY 2006-07. Research grants and contracts provided another 24 percent of revenues while tuition and fees provided 20 percent. Private fundraising is an increasingly important source of funding within the University’s diverse revenue mix, but this source represents less than 8 percent of the annual operating budget. Most private

funds are dedicated to the support of specific activities and cannot be used for general budget needs. Earnings from endowments provide 2 percent of the University’s revenue.

Governance: The University’s founding, in 1851, predates statehood by seven years. It is governed by a 12-member Board of Regents elected by the legislature. Eight members are elected to represent Minnesota’s eight congressional districts and four are elected at large. (See Appendix B for current members.)

Distinct Mission: The statutory mission of the University of Minnesota is to “offer undergraduate, graduate, and professional instruction through the doctoral degree, and...be the primary state-supported academic agency for research and extension services.” (*Minnesota Statutes 135A.052*).

Accreditation: The University of Minnesota has been accredited continuously by the North Central Association of Colleges and Schools since 1913. The University is accredited to offer the bachelor’s, master’s, doctoral, and first-professional degrees. In addition to this institutional accreditation, the University holds professional and specialized accreditation in over 200 programs. Accreditation of the University’s Twin Cities campus was last recertified in 2005.

Economical Management: The University of Minnesota has no separate “system” office. This is an economical management structure, since the University’s senior officers double as the chief operating officers for the Twin Cities campus. The University’s auditor, Deloitte & Touche, commented in November 2004: “The University has really tightened itself up. It is an excellent example of an organization that is very focused and very efficient. I’d call it a model of fiscal responsibility.”

Statewide Presence: The University’s flagship campus in the Twin Cities is complemented by four coordinate campuses (Duluth,

Introduction

Morris, Crookston, and Rochester), six agricultural experiment stations, one forestry center, 18 regional extension offices, and extension personnel in counties throughout the state.

The University's public engagement programs (e.g., Extension; clinics in medicine, dentistry, veterinary medicine, and law; outreach to K-12 education; etc.) touch more than 1,000,000 people annually.

Organization of the 2007 Report

The 2007 accountability report is organized around the four pillars of the University's aspirational goal. The report provides a performance baseline for the University, an assessment of how well the University is doing in meeting

its goals, and where additional efforts are required when performance is not consistent with its aspirations.

The 2007 report provides an Executive Summary; an overview of the University of Minnesota (Introduction); a description of the University's approach to accountability reporting (Section 1); accountability measures for the Twin Cities campus (Section 2) and accountability measures for the University's coordinate campuses (Sections 3-6). The appendices include links to key data sources and additional information, the current Board of Regents roster, and a list of University administrative officers.

Introduction

1: Accountability

“...[The regents shall] make a report annually, to the Legislature...exhibiting the state and progress of the University...and such other information as they may deem proper, or may from time to time be required of them.”

– University charter, 1851 Territorial Laws, Chapter 3, Section 16

Since the University of Minnesota’s inception 156 years ago, citizens, the state legislature, the federal government, the Board of Regents, alumni, students, parents, employers, and many others have held it accountable for fulfilling its fundamental land-grant mission of teaching, research, and public engagement.

Over the years, the ways in which the University has demonstrated its accountability and its progress in meeting mission-related goals have been many. These include required reports, such as:

- Institutional accreditation of each campus by its regional accrediting agency (Higher Learning Commission of North Central Association of Schools and Colleges) and over 200 programs by specialized accrediting agencies, such as the American Medical Association, American Bar Association, Accreditation Board of Engineering and Technology, and National Council for Accreditation of Teacher Education.
- Monthly, quarterly, and annually mandated reports to the Board of Regents, such as student admissions and progress, faculty promotion and tenure, University operating and capital budgets, student tuition rates, independent auditors’ report, campus master plan, real estate

transactions, gifts report, asset management report, controller’s report, purchases of goods and services over \$250,000, new and changed academic programs, academic unit strategic plans, NCAA reports on student-athletes, and Presidential performance reviews.

- Compliance reports to such agencies as the U.S. Department of Education, National Science Foundation, National Institutes of Health, U.S. Department of Agriculture, HIPAA, Family Educational Rights and Privacy Act, University Institutional Review Board, City of Minneapolis, Hennepin County, and Minnesota Office of Higher Education.
- Public testimony to local, state, and federal units of government.
- Assessment and evaluation reports to philanthropic foundations.

In addition, the University produces regular reports on a voluntary basis, such as:

- *Annual University Plan, Performance, and Accountability Report.*
- Regular and frequent reports to the public on survey findings, including citizen, alumni, student, and employer satisfaction.

1: Accountability

- Regular reports to the public through the University’s participation in higher education consortia, such as the Committee for Institutional Cooperation, Association of American Universities, National Association of State Universities and Land Grant Colleges, and American Council on Education.

Origins of the Accountability Report

In 2000, the Regents asked the University’s administration to review three institutional reports—the institutional measures, the unit compact plans, and the annual academic plan and report—to determine the feasibility of providing a single, consolidated report each year rather than three individual reports.

In November 2000, the Board approved the creation of the *University Plan, Performance, and Accountability Report*. In its resolution, the Board noted that it “...holds itself accountable to the public for accomplishing the mission of the University” and that the report was to become the principal annual documentation of that accountability.

The first report was published in 2001. The 2007 edition of the *University Plan, Performance, and Accountability Report* is the sixth produced for the Board of Regents.

Measuring Our Progress

Within this framework, the University has created the Metrics Steering Committee to identify the right metrics and establish processes to best support and analyze the University’s progress toward its aspirational goal. In its work, the steering committee is being guided by these principles:

- Reflect the University’s aspirational goal.
- Be transparent regarding the methodology used for creating metrics.

- Rely on measures that are relevant, reliable, and valid.
- Measure outcomes rather than inputs, whenever possible.
- Contain benchmarks against which progress can be measured.
- Measure progress against an identified comparison group.
- Provide meaningful policy direction for improvement.
- Be able to be developed, revised, and updated regularly at reasonable cost.

Comparison Group Institutions

The Metrics Steering Committee has confirmed 10 public research university flagship campuses as the primary group for comparison with the Twin Cities campus:

Ohio State University—Columbus
Pennsylvania State University—University Park
University of California—Berkeley
University of California—Los Angeles
University of Florida
University of Illinois—Urbana-Champaign
University of Michigan—Ann Arbor
University of Texas—Austin
University of Washington—Seattle
University of Wisconsin—Madison

Similar comparison groups for the coordinate campuses are currently under development.

Performance Measures

The committee also has identified a limited number of measures to assess the University’s performance and progress toward achieving its aspirational goal within each of the four pillars (exceptional students, exceptional faculty and staff, exceptional innovation, and exceptional organization). In addition, the committee is reviewing other measures within each pillar

1: Accountability

area, on an ongoing basis, to determine their effectiveness in monitoring and improving the University's performance.

The performance measures appearing in this accountability report are categorized within the framework of *Transforming the U for the*

21st Century: President's Strategic Positioning Report to the Board of Regents (September 2007). For the Twin Cities campus, the performance measures, trends, analysis, and conclusions appear on the following pages:

1: Accountability

2: Twin Cities Campus

The University of Minnesota—Twin Cities is situated on the banks of the Mississippi River near downtown Minneapolis with an additional campus in the rolling hills of St. Paul. The Twin Cities campus has the most comprehensive academic programs of any institution

in Minnesota—encompassing agricultural and professional programs as well as an academic health center built around a major medical school. It is also the nation's second largest public university campus as measured by enrollment.

2: Twin Cities Campus

Exceptional Students

Recruit, educate, challenge, and graduate outstanding students who become highly motivated lifelong learners, leaders, and global citizens.

To achieve its “Exceptional Students” strategic goal, the University will invest \$20.8 million in FY 2007-08 towards achieving the following objectives:

- Make the University a destination of choice for students who reflect the diversity of our community and world, and are sought after because of their unique talents, skills, and experiences.
- Educate and support all students to assume positions of leadership in the community, state, nation, and the world.
- Provide students with the most advanced, sophisticated, and comprehensive technology tools to enhance their learning experience.
- Globalize students’ experience, recruit students from around the world, and provide an education to prepare students to become global citizens and leaders.

Undergraduate Education

At the undergraduate level, the University is focusing on strengthening the preparation of prospective students, ensuring that the best students are attracted to apply for admission, and ensuring affordable access for all admitted students. Once students are enrolled, the University is enhancing its efforts to ease their transition, providing strong academic and advising support, developing new programs to make their undergraduate experience distinctive, and specifying University-wide student learning outcomes and assessment, regardless of the student’s major and academic interests.

Strengthen Student Preparation: Ensuring that every citizen earns a postsecondary credential or degree is essential to keeping Minnesota’s workforce competitive in the 21st century. The University is developing a comprehensive strategy to help the state’s elementary and secondary schools reach that goal. Two key components of that strategy include:

The **Consortium for Postsecondary Academic Success** is helping to build and broaden the pipeline to higher education through partnerships with preK-12 schools and districts, higher education institutions, community organizations, government agencies, and businesses. In its first year of operation in 2006, the Consortium led the University’s successful launch of the Minnesota Principals Academy, an executive development program that helps school leaders across the state create and sustain high-performing schools that put every student on the path to post-secondary success.

The **Minnesota P-16 Partnership** brings together leaders of the state’s K-12 and higher education systems, governmental agencies, non-profits, and business organizations to create a seamless educational system that begins in early childhood and extends to the completion of postsecondary education. Over the next two years, President Bruininks will serve as chair of the Partnership. During that time, a major priority for the Partnership will be aligning Minnesota’s K-12 standards and assessments with the knowledge and skills needed to succeed in college.

Attract the Best Students: Top students are attracted to the University by unique educational opportunities and scholarships. To continue to attract such students, the University is

increasing the number of **National Merit Scholars** in the freshman class via newly created sponsored merit scholarships and discipline-specific awards and establishing special opportunities for top students, including the possibility of expanded **fast-track options for early admission** of qualified undergraduates to University graduate or professional programs. National Merit Scholars have increased in the freshmen class from 40 in 2003 to over 90 in 2007.

Ensure Affordable Access: Many talented and promising students need financial assistance to realize their goals. The University is working to ensure that all students who come to the University prepared to learn and succeed will be able to afford their college education.

Started in 2005, the **University of Minnesota Founders Free Tuition Program** guarantees grant and gift assistance at least equal to tuition and required fees for all incoming students who are Minnesota residents and eligible for federal Pell grants. (About two-thirds of students from families earning less than \$50,000 per year are eligible for a Pell grant.) When fully implemented in 2008, it is expected to benefit 10,000 students system-wide.

Financial support for students is also the centerpiece of the **Promise of Tomorrow Scholarship Drive**, the largest scholarship fundraising drive in the University's 156-year history. In the three years since the campaign began, more than \$175 million has been raised, and more than 1,200 new scholarships have been created. More than 6,700 students are now assisted with privately funded scholarships and fellowships—up 38 percent from three years ago.

Support New Students' Transition: Even the best students sometimes struggle to make the transition from high school to college or from home to campus life, and too often, academically successful students leave the University without completing their degrees. In

order to improve students' transition to college, foster greater success, and ensure timely graduation, the University has started a broad range of initiatives, including:

A new **Welcome Week Program**, starting in 2008, will complement the University's award-winning orientation program. Beginning prior to Labor Day, the five-day Welcome Week will be required for all Twin Cities campus freshmen and consists of academic support programs, community-building activities for residential and commuter students, and social events.

The **Bridge to Academic Excellence** is a new, year-long transitional program designed to prepare recent high-school graduates for the University's academic rigors. Admitted students who need additional support receive "high-touch" academic support and other programs that give them the opportunity to succeed.

A new **Summer Bridge Program** helps jump-start the academic careers of at-risk, under-prepared incoming students, with a particular emphasis on math and science courses, writing, and other "gateway courses." This program is designed to meet their academic needs while also helping the University contact these students, track their progress, and offer assistance along the way.

Provide Academic and Advising Support: Beyond these targeted efforts, the University continues to invest in technologies that support better student planning, community engagement, and timely graduation. Key efforts include the online **Graduation Planner**, **Student Engagement Planner**, **SMART Learning Commons**, and an improved MyU student portal.

The newly enhanced student portal helps students—at a single online location—register for classes, access course materials, contact faculty and advisors, access grades and student

2: Twin Cities Campus

accounts, chat with classmates, find journal articles in the library, learn about potential careers, and keep up with current news.

Provide A Distinctive Experience: The University is committed to providing students with a distinctive, world-class liberal arts education and strong work in a field of study. The University is focusing on a set of initiatives that enriches students' experience and equips them for a complex global society:

The new **Department of Writing Studies**, started in 2007, offers a comprehensive, integrated first-year writing program, houses an expanded center for writing, and will lead the transformation of the University's writing-intensive requirement into a pioneering **Writing-Enriched Curriculum** program.

A **University Honors Program** will integrate collegiate-based honors programs on the Twin Cities campus into an exciting, unified program that will welcome its first students in 2008. One-on-one faculty interactions will be a hallmark of this program, enabling the University to recruit a larger, more diverse pool of accomplished, talented students from across the state and throughout the world.

The **Undergraduate Research Opportunities Program (UROP)** is expanding to enrich the role research can play in undergraduate education at a major research university. The UROP expansion is a key element in a broader strategy to insure that all undergraduates have a mentored scholarly, creative, professional or research experience. The University's goal is to raise undergraduate participation in University research from 30 percent to 50 percent.

In addition, the University is expanding the number of **freshman seminars** in order to increase student participation from the current 40 percent to a goal of over 50 percent.

Set Student Learning and Development Outcomes: The University is ensuring that

graduates enter the world prepared to take their place as lifelong learners and global citizens. The development of campus-wide **student learning outcomes** helps faculty to develop curricula, plan individual courses, construct learning activities, and assess the learning that occurs in every aspect of the student experience: classes, service-learning, research opportunities, internships, and learning abroad.

In 2007, the University Senate endorsed the following learning outcomes, at the time of receiving a bachelor's degree, students:

- Can identify, define, and solve problems
- Can locate and evaluate information critically
- Have mastered a body of knowledge and a mode of inquiry
- Understand diverse philosophies and cultures within and among societies
- Are able to communicate effectively
- Understand the role of creativity, innovation, discovery, and expression across disciplines
- Have acquired skills for effective citizenship and life-long learning

Student development outcomes, also approved in 2007, help enable students to function as citizens of the University and of the broader community. These outcomes include: responsibility/accountability, independence/interdependence, goal orientation, self-confidence/humility, resilience, appreciation of differences, and tolerance of ambiguity.

These outcomes reinforce that learning takes place throughout a student's University experience and can be assessed in the context of student employment, undergraduate research experiences, service-learning opportunities, internships, learning abroad, and a variety of curricular and co-curricular activities.

2: Twin Cities Campus

Taken together, the student learning and development outcomes underscore the important partnership of students, faculty, and staff in supporting learning in the broadest sense.

These and other initiatives during the past decade have resulted in continuous improvement across the undergraduate experience, as shown in Table 2-1.

Table 2-1. The undergraduate experience at the University of Minnesota-Twin Cities, 1997 and 2007.

	1996-97	2006-07	Change
Undergraduate enrollment	23,689	28,645	+21%
Freshman class size (fall)	4,279	5,439	+27%
Applications for admission (freshman)	13,990	24,663	+76%
Percent of entering freshmen who are students of color	16%	20%	+4%
Percent of freshmen in the top 10% of their high school class	28%	39%	+11%
Percent of freshmen in the top 25% of their high school class	60%	78%	+18%
Percent of freshmen living on campus	71%	81%	+10%
Percent of undergraduates who identify themselves as commuter students (SIS) [‡]	47%	35%	-12%
Percent of undergraduates who participated in student organizations or activities (SIS) [‡]	50%	74%	+24%
Percent of students who are not working at a paid job while in school (SES)*	26%	26%	0%
Percent of students rating the overall quality of academic programs as excellent, very good, or good (SES)	78%	89%	+11%
Percent of students rating classroom quality as excellent, very good, or good (SES)	42%	82%	+40%
Percent satisfied (SES)	82%	91%	+9%
Four-year graduation rate	15%	41%	+26%
Five-year graduation rate**	37%	58%	+21%
Six-year graduation rate**	45%	61%	+16%

**Initial graduation rates are for the 1992 entering cohort.

Graduate Education

Graduate education of the highest quality is critical for any successful research university. Thus, the University is committed to recruiting the most promising and talented students from Minnesota and around the world, offering them an outstanding education, and insuring that they graduate prepared to succeed in their chosen fields. Examples of current strategic initiatives are described below.

Facilitate Interdisciplinary Research, Education, and Training:

Breakthroughs in knowledge increasingly require the ability to address problems that cannot always be solved by a single discipline. It is incumbent on the University, therefore, to engage graduate students in interdisciplinary inquiry and help them develop the capacity to work effectively on collaborative teams.

The Graduate School's **Office of Interdisciplinary Initiatives** provides seed grants and training grants for interdisciplinary and innovative graduate education, is organizing a national consortium for peer institutions focused on fostering interdisciplinary inquiry, and is establishing the University as a national leader in advancing policies and practices that facilitate and promote interdisciplinary inquiry.

Reform Doctoral Education: The Graduate School is leading an initiative to improve timely degree completion, spur innovation in curricula and pedagogy, and establish benchmarks for graduate student progress. Included in this initiative is participation in the national **Ph.D. Completion Project**, an in-depth study of doctoral education by the Council of Graduate Schools. This project aims to produce comprehensive data on attrition from doctoral study and completion of Ph.D. programs and to develop best practices.

Additionally, doctoral programs in history and neuroscience recently participated in a multi-year examination of doctoral education

through the **Carnegie Foundation's Initiative on the Doctorate**. This project is helping these programs restructure to more effectively prepare graduates for research and employment.

Support Professional Development: The Graduate School is offering professional development workshops for graduate students and postdoctoral fellows that enhance their preparation for careers in academe, industry, and other options. This initiative is supported by expanded career advising and placement assistance within each graduate program.

Provide Financial Support: Over the past two years, the University increased support by over \$5 million for Graduate School grants and fellowships to support students. The University is also enhancing block grants and fellowships in fields of excellence and in others with the demonstrated potential to become excellent.

In addition, the Graduate School is hiring a development officer to raise private funds to support graduate fellowships in conjunction with academic units and to support interdisciplinary initiatives. These include the Diversity of Views and Experiences (DOVE) fellowships awarded to first-year graduate students from underrepresented groups.

Enhance Graduate Program Quality: The Graduate School's well-established process of academic program review engages outside experts for periodic review of the quality of graduate programs. The University also participates in the National Research Council's assessment of doctoral programs, which is critical to measuring program quality from a national perspective.

Health Professional Education

The University graduates two-thirds of Minnesota's health professional workforce. This is an essential leadership responsibility of the

2: Twin Cities Campus

University in supporting Minnesota's future. As the University's Academic Health Center (AHC) looks to the future, it sees education of new health professionals as its mark of distinction.

The AHC seeks to be recognized for high-quality inter-professional education and care delivery, as well as for using contemporary educational models that are learner-centered and technology-rich, within an environment of learning and continuous improvement, and in facilities supportive of continuous learning. The AHC is educating students to be patient-centered, evidence- and best-practice based, team-trained, systems-oriented, civically engaged and capable with information systems.

To achieve this vision of transforming health professional education and meeting Minnesota's health professional workforce needs, the AHC has focused on the following initiatives:

Launch the Center for Inter-professional Education: Collaboration and teamwork across the health professions are keys to transforming the care delivery system and promoting better health. Inter-professional education brings together students from different programs to learn collaboratively and to function as health care teams. The Center promotes, implements, supports, and evaluates inter-professional education, including new courses, activities, and programs for all health professional students.

Implement Knowledge Management Systems: Health professional education and practice are undergoing profound transformations driven by the explosion of new information and demand for new knowledge. Educational models are becoming more learner-focused, students are becoming more diverse in background and experience, and technology innovations are creating entirely new environments and opportunities for learning.

The AHC is developing knowledge management systems to address this knowledge explosion while leveraging new opportunities and innovations to ensure that students, faculty, and staff are capable, life-long, continuous, and collaborative learners.

Support New Models of Education: The University is building a highly innovative and comprehensive learner-centered education platform to support life-long learning and progress towards core competencies in the health professions. Piloted first in the AHC's Center for Allied Health Programs, this initiative is leveraging the University's wide range of technology assets.

Concurrent with these efforts, the AHC is:

- Supporting **curricular innovation** in the schools and colleges of the AHC, such as the MED2010 Initiative in the Medical School, the establishment of the Doctorate of Nursing Practice in the School of Nursing, and the establishment of the Center for Allied Health Programs.
- Continuing to engage in thoughtful **workforce planning** with the University's many community partners.
- Seeking a stable, long-term **financial framework** that supports sustainable growth in health professional programs, acknowledging that they are expensive, that they currently rely on a fragile web of funding sources, and that demand for health professionals continues to grow.
- Creating awareness of **health careers**, acting creatively to populate the pipeline of students interested in the health sciences, reaching far back among K-12 students to stimulate and nurture interest in the health sciences, and making targeted efforts to work with the state's diverse populations to develop strategies

2: Twin Cities Campus

leading to a more diverse health professional workforce.

- Establishing the **AHC Academic Council**, comprised of AHC faculty, to review and provide counsel on new health professional academic programs

and contribute to strategic oversight of academic program development.

Performance Measures

Performance measures that support the goal of “Exceptional Students” are detailed on the following pages:

Student Quality	Pages 22-25
Student Diversity	Page 26
Student Outcomes	
Retention	Pages 27-28
Timely Graduation	Pages 29-32
Degrees Conferred	Pages 33-34
International Involvement	
Study Abroad	Pages 36-37
International Students	Pages 38-39
International Scholars	Pages 40-41
Student Satisfaction	Pages 42-45

Other Measures

The University’s Metrics Steering Committee is considering the addition of other measures under the “Exceptional Students” pillar. These include:

- Affordability

- Graduate education quality
- Student learning assessment
- Student public engagement activities
- Student awards

Student Quality

Students are admitted to the colleges of the University of Minnesota – Twin Cities on a competitive basis using a full range of qualitative and quantitative review factors. The University admits undergraduate students who have demonstrated the ability to complete a course of study and graduate, and who will be challenged by the rigor of instruction and research at the University.

Analysis: The profile of incoming undergraduate students at the Twin Cities campus has improved significantly over the past 10 years. (These improvements occurred at the same time as the number of new freshmen increased by 27 percent.) The class rank of entering freshmen and their average ACT score have increased steadily over the past decade. The proportion of students from the top 10 percent and the top 25 percent of their high school class has increased while the proportion of students from the bottom 50 percent is on a steady decline.

Table 2-2 and Figure 2-1 show the steady improvement in the percentage of entering students who graduated in the top 10, 25, and 50 percent of their high school class. Every year since 2001, over 90 percent of freshmen have come from the top half of their high school class. In 2006 the University enrolled a record percentage of students who graduated in the top 10 and top 25 percent of their high school class.

Figure 2-2 shows that the average high school rank percentile of incoming freshmen at the Twin Cities campus increased from just over 81 percent in 1997 to above the 83rd percentile

in 2006. Table 2-3 shows the percentage of freshmen in the top 10 percent of their high school class for the University's comparative group in 2006-07, the most recent year for which comparable data are available. However, even though the Twin Cities campus has increased this percentage over the past decade, it still ranks near the bottom within its comparative group on this measure.

Figure 2-3 shows that the average ACT score of entering students has increased slightly over the past decade—from 24.2 in 1997 to 25.2 in 2006. Table 2-4 shows the most recent ACT composite scores for the comparative group.

Conclusion: Over the past decade, the campus has made targeted investments in supporting students' academic success and improving retention, graduation, and student satisfaction rates. These efforts have focused on: 1) improving the first-year experience; 2) improving course access; 3) instituting a 13-credit minimum policy; 4) expanding opportunities for international experience and research; 5) fostering connections between curricular and co-curricular activities; 6) using technology such as Web-based student registration and course information systems to improve student support; and 7) creating a better environment for learning, including strengthened academic advising and student support services, as well as new and refurbished classrooms, labs, and student housing.

However, increased efforts will be required to move up in the rankings within the University's comparative group of public research universities.

10	University of Washington - Seattle	23 - 28	27%	1070 - 1310	95%	25.9

* The Calculated ACT Composite Score is calculated by averaging the ACT and converted SAT scores, weighted by the proportion of students reporting each score.

Source: Institutional reports to the Common Data Set

Student Diversity

The University is committed to achieving excellence through diversity and strives to foster a diverse, humane, and hospitable environment.

Analysis: In the past decade, the percentage of freshmen of color increased from 16.6 percent in 1997 to 20.2 percent in the fall of 2006, as shown in Figure 2-4.

Enrollment increases among students of color over the past decade have occurred primarily among Asian American and African American students, as shown in Table 2-5. From 1997-2006, the percentage of self-reported Caucasian students decreased from 77.9 percent to 73.0 percent; the percentage of students who

did not report a racial/ethnic group increased from 2.8 percent to 5.2 percent.

Conclusion: Thirty percent of Minnesota’s high school graduates by 2018 will be students of color, compared to 13 percent in 2004. The University will enroll an increasing number of students of color for whom English is not their first language and a larger number of international students. The University’s newly reconfigured Office for Access, Equity, and Multicultural Affairs is leading the effort to address the challenges of these changing demographics and to help improve the University’s performance.

Student Outcomes: Retention

Undergraduate Retention Rates (Five-Year Comparison)	1 st Year Retention	2 nd Year Retention
	86.3% (Up 3.1 points)	79.2% (Up 4.9 points)

The Twin Cities campus long has been at or near the bottom of its public research university comparative group in terms of undergraduate retention and graduation rates. In 2000-01, a campus-wide task force examined the reasons for these low rates and developed specific recommendations to enhance retention and graduation rates. These recommendations, along with previous efforts in the mid- to late-1990s, have led to substantial improvements.

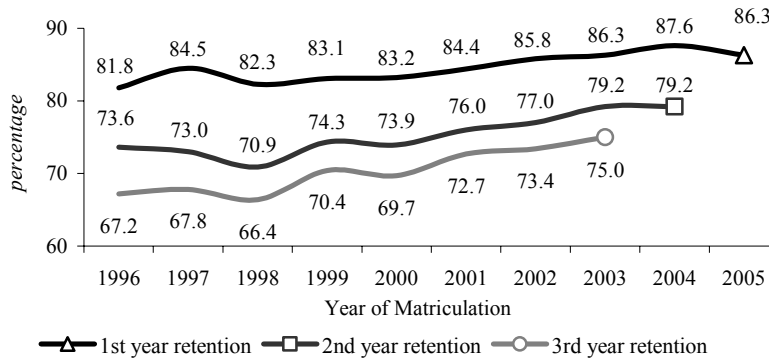

Analysis: Figure 2-5 shows first-, second-, and third-year retention rates for all students matriculating during 1996-2005. The most recent results show that all rates are at or near their highest levels in the past decade. The Twin Cities campus achieved a first-year retention rate of 87.6 percent, down from 86.3 percent the previous year. The second-year retention rate remained at 79.2 percent, while the third year retention rate increased from 73.4 to 75.0. Figure 2-6 shows first-, second-,

and third-year retention rates for students of color matriculating during 1996-2005. First-year retention fell to 81.3 percent down from 83.1 percent in 2004. Second-year retention fell to 71.1 percent while, third-year retention reached a new high of 69.0 percent.

Table 2-6 shows the University’s first- and second-year retention rates, although improving, continue to rank at the bottom of the comparative group.

Conclusion: Although significant progress has been made in improving retention rates, the University will need to increase its efforts in order to move up in the rankings within its comparative group. In 2006, the University set new graduation rate targets that support the University’s top-three aspirational goal. In order to achieve the new graduation-rate targets, retention rates will need to improve commensurately.

Student Outcomes: Timely Graduation

Undergraduate Graduation Rates (Five-Year Comparison)	4-Year Rate		5-Year Rate		6-Year Rate	
	Actual	2012 Goal	Actual	2012 Goal	Actual	2012 Goal
	40.7% (Up 12.9 points)	60%	57.9% (Up 10.3 points)	75%	60.8% (Up 9.2 points)	80%

In 2005, the University, including the Twin Cities campus, set specific goals to improve graduation rates from their historically low levels. In January 2007, the University raised the 2012 undergraduate goals for the Twin Cities campus as follows:

- four-year graduation rate of 60 percent,
- five-year rate of 75 percent,
- six-year rate of 80 percent.

Analysis: Current results show continued improvement in graduation rates; over the past decade improvements have ranged from over 12 to nearly 23 percentage points. Graduation rates for students of color also have improved significantly, particularly four- and five-year rates.

Figure 2-7 shows the four-, five-, and six-year graduation rates for students matriculating during 1993-2002. Since 1993, all rates have improved substantially over the last 10 years:

- four-year rates increased by 22.7 percentage points,

- five-year rates increased by 17.5 percentage points,
- six-year rates increased by 12.3 percentage points.

Students of color lagged behind these overall graduation rates, but still showed significant gains, as shown in Figure 2-8. During the 10-year period:

- four-year rates improved 5.8 percentage points,
- five-year rates by 14.3 percentage points,
- six-year rates by 11.5 percentage points.

Table 2-7 shows the most recent graduation rate data for the University’s comparative group institutions. Although it is making progress, the University of Minnesota – Twin Cities still ranks at the bottom of this group in graduation rates.

Conclusion: In order to reach its aspirational goal, the University will need to continue to improve graduation rates. Continued investments, such as those described earlier in this section, are focused on achieving this goal.

2: Twin Cities Campus

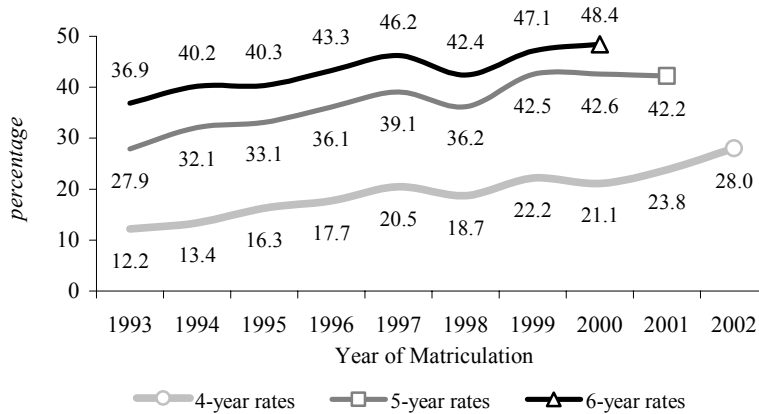

Student Outcomes: Timely Graduation

Figure 2-7. 4-, 5-, and 6-year graduation rates, University of Minnesota – Twin Cities, 2006 (Classes beginning in 1993-2002).

Source: University of Minnesota 2006 NHS Student Graduation/Retention Report
 Note: Rates include students who transferred from one University campus to another and graduated (e.g., a student who matriculated at Duluth and graduated from the Twin Cities is counted as a Duluth graduate). The University also reports graduation rates to a national database (IPEDS); it includes only students who matriculated at and graduated from the same campus; these rates are somewhat lower than those shown above.

Note: The rates shown above, which are slightly lower than those in Figure 2.7 are taken from the IPEDS national database, which includes only students who matriculated at and graduated from the same campus.

Student Outcomes: Timely Graduation

Graduate Students

The timely completion of degrees is as important at the graduate level as it is at the undergraduate level. The University tracks this measure as the “median elapsed time to degree,” which is calculated as the number of years from the start of a student’s first term in the Graduate School (regardless of subsequent changes of major or degree objective) until the degree is conferred.

Analysis: Table 2-8 shows this measure for the previous six academic years. The University’s performance is in line with other leading research universities. Among the more notable findings:

- At the master’s level, the median time to degree is 2.5 years, with students of color tending to complete their degrees more quickly than others.
- At the doctoral level, the median time-to-degree decreased slightly to 5.7 years, with international students tending to complete their degrees more quickly than others.

Conclusions: The University is participating in a national study by the Council of Graduate Schools to identify factors leading to these results. The project’s goal is to address the issues of completion and attrition in Ph.D. education and test those practices that the graduate community believes will result in higher completion rates.

The Graduate School is working with 15 graduate programs (eight in sciences, math, and engineering; seven in liberal arts and humanities) to gather and report data on completion and attrition, and to test intervention strategies (e.g., better orientation and mentoring, clearer program rules, exit interviews) that will improve completion. Results will be shared nationally among research and project partners, with the hope of developing a set of best practices. In addition, the University is undertaking research of its own on such factors as time-to-degree within specific programs, financial issues, graduate student advising, and housing.

Table 2-8. Median elapsed time to degree for University of Minnesota master’s and doctoral students, 2000-2006.

	2000-2001	2001-2002	2002-2003	2003-04	2004-05	2005-06

Student Outcomes: Degrees Conferred

U of M Rank Within Comparative Group				
	Doctoral	Master's	First-Professional	Bachelor's
This Year	4 th	3 rd	3 rd	9 th
Last Year	5 th	4 th	3 rd	10 th
5 Years Ago	5 th	5 th	2 nd	11 th

Analysis: Consistent with having the second-largest enrollment of any public university campus in the nation, the Twin Cities campus also ranks highly in the production of degrees at all levels. As shown in Tables 2-9 and 2-10, the Twin Cities campus ranks 4th within its comparative group for the number of doctoral degrees conferred, 3rd in master's degree, 3rd in first-professional degrees, and 9th in bachelor's degrees.

Conclusion: While it is important to track the number of degrees conferred, in terms of contributing to the state's educated work force, qualitative factors also need to be taken into

account. Accordingly, the University is focusing on producing degrees that reflect a balance of external demand, capacity, and resources to ensure that quality is maintained and enhanced.

In line with that approach, the Graduate School in 2005 initiated an annual review of graduate programs, which already has resulted in the discontinuation of programs and the re-packaging of others in order to ensure quality. In addition, the University is developing alternative measures of quality in addition to quantitative ones.

Table 2-9. Degrees conferred: U of M-Twin Cities and comparative group institutions, 2006.

Rank	Institution	Doctor's degree	Master's degree	First-prof. degree	Bachelor's degree

Global Engagement

Forging an international university is an integral component in the University's plan to become a top-ranked institution. Defining what that means and how it is accomplished presents the University with an exciting challenge; however, this University may be better poised than any other in the U.S. to take head-on the challenge of internationalization.

Having previously focused on increasing the number of study abroad opportunities and the number of students studying abroad, the University can now concentrate its efforts on two

other important areas: 1) becoming a center of excellence in the emerging global network of knowledge production and circulation, and 2) by providing international experiences here at home for those students and faculty who do not have an international experience abroad.

The following statistics relay the traditional measures of academic mobility. The University is working to define and measure internationalization through a more comprehensive set of indicators.

Involvement in Study Abroad

	U of M Rank Within Comparative Group
This Year	3rd
Last Year	3rd
5 Years Ago	6th

Analysis: The Twin Cities campus ranks 3rd among comparative group institutions in the number of students studying abroad, as shown in Table 2-11, a gain of three positions over the past five years. Figure 2-10 shows the increase in Twin Cities campus students' involvement in study abroad relative to its comparative group. As a percentage of undergraduate degrees granted, the Twin Cities campus has improved from 15.7 percent in

1998 to 30.0 percent in 2006, an improvement of 13.3 percentage points.

Conclusion: The University has adopted a goal that 50 percent of students who graduate will have an international experience. We are making great strides in this area with continual growth in study abroad participation. The Office of International Programs is analyzing the impact on policies, practices, curriculum, programs, and services that would result from reaching the 50 percent goal.

Table 2-11. Involvement in study abroad: U of M-Twin Cities vs. comparative institutions, 2005.

International Student Enrollment

U of M Rank Within Comparative Group	
This Year	7th
Last Year	8th
5 Years Ago	6th

Analysis: The number of international students enrolled in United States higher education institutions has stagnated over the past several years. This trend has been attributed to several factors: real and perceived difficulties in obtaining student visas since 9/11/01 (especially in technical fields); rising U.S. tuition costs; vigorous competition from other host countries; a wider range of educational opportunities in students' home countries; and perceptions abroad since 2001 that international students may no longer be welcome in the U.S.

Although the University of Minnesota moved up one place relative to the comparative group in the past year, it has lost ground over the past five years in terms of actual international student enrollment—most dramatically at the un-

dergraduate level, where the University now ranks at the bottom of Committee on Institutional Cooperation (CIC) institutions.

As Tables 2-13 and 2-14 and Figure 2-12 show, while the comparative group's average international student enrollment over the past five years increased by nearly 15 percent, the University's increase was only 0.8 percent.

Conclusion: The University has undertaken a variety of measures to ensure strong enrollments by international students, focusing on undergraduates. These measures include: increased recruitment efforts, creation of Global Excellence Scholarships, and improved programs and services to ensure retention of international students.

Table 2-13. International student enrollment: U of M-Twin Cities vs. comparative institutions, 2005.

International Scholars

U of M Rank <u>Within Comparative Group</u>	
This Year	8th
Last Year	7th
4 Years Ago	9th

Analysis: Although the University ranks 8th in this measure, it has lost ground within the comparative group. Tables 2-22 and 2-23 show that the University has declined by 5.4 percent over the past four years, while comparative group institutions have increased their

number of international scholars by an average of 9.8 percent.

Conclusion: The reputation and quality of the University’s research and academic programs continue to attract high-quality researchers, scholars, and post-doctoral appointees from around the world.

Table 2-15. International scholars: U of M-Twin Cities and comparative institutions, 2005.

Undergraduate Student Satisfaction

Over the past 10 years the University has placed an increasing emphasis on improving the student experience. To measure student satisfaction with these efforts, every other year since 1997 the University has administered the Student Experiences Survey (SES). The latest SES was administered to a random sample of students during spring semester 2007.

Analysis: The results of the 2007 SES show improvement in many satisfaction categories among undergraduate and graduate students and among students of color. As shown in Figures 2-14 and 2-15, gains were registered in overall satisfaction, quality of classrooms, availability of places to study (graduate students), and cost of attendance. Student satisfaction declined slightly in terms of ratings of academic program quality and overall physical environment.

Conclusion: With state funding improved over the historic reductions of three years ago, and an increased emphasis on affordability, principally through the Founders Opportunity Scholarships, the University anticipates continued improvement in student satisfaction with the cost of attendance. The \$175 million Founders Opportunity Scholarship program ensures that all undergraduate students from Minnesota—including transfer students as well as qualified incoming freshmen—who are eligible for a federal Pell Grant will be guaranteed scholarships and grants to cover 100 percent of their tuition and required fees. About two-thirds of students from families earning less than \$50,000 per year are eligible for a Pell grant.

Figures 2-14. Undergraduate student experiences survey results, University of Minnesota - Twin Cities, 1997-2007.

*Respondents in 1997 to 2005 were asked “In general, how satisfied are you now with your experiences at the University of Minnesota since fall semester started?”

Exceptional Faculty and Staff

Recruit, mentor, reward, and retain world-class faculty and staff who are innovative, energetic, and dedicated to the highest standards of excellence.

To achieve this strategic goal, the University will invest \$32.5 million in FY 2007-08 towards achieving the following objectives:

- Recruit identify, support, and reward stars on the rise.
- Create a robust culture of collaboration that encourages and rewards boldness, imagination, and innovation.
- Hire, develop, and place diverse faculty and staff in positions which match their skills and abilities with organizational needs.
- Strengthen the performance evaluation and reward systems to fully engage, motivate, and challenge faculty and staff.
- Significantly increase the number of faculty receiving awards of distinction.

The University's excellence stems from the quality of its human capital—exceptional faculty and staff. They are critical to recruiting and retaining the best and brightest students; attracting research funding to the University; garnering the attention of other world-class scholars; and strengthening the University's impact on society.

Faculty

The University of Minnesota has many outstanding faculty members. But the baby-boom generation will enter retirement age in the next decade, and the University will need to hire 1,000 faculty members (2/3 replacement, 1/3 new) in the next five years. To achieve excellence, the University will not only need to continue to recruit great faculty, but also provide

the environment, infrastructure, mentoring, inspiration, high standards, rewards, and recognition required to retain them. Strategies to address these challenges are already being implemented throughout the University.

Recruiting the Best and Brightest: Since selection of new faculty is the most important factor determining each academic department's research productivity, the University is raising recruitment standards across the institution. To that end, the University is promoting a culture across all colleges and departments to:

Hire for excellence, not simply to fill a slot for the long-term. To achieve this, search committee chairs are receiving in-depth training, and departments are required to define how the faculty position will advance the department. In addition, the University is identifying and proactively recruiting nationally and internationally recognized candidates whether they have applied for a position or not.

Ensure strategic hiring of faculty to strengthen areas of existing excellence, enhance areas on the verge of excellence, and target specific needs.

Establish strategic partnerships with institutions that have rich histories of educating scholars from under-represented groups and with individuals who have served as mentors for diverse scholars.

Hold departments and colleges accountable for excellence and diversity in hiring by asking for specific strategic plans and results from previous years during annual budget compact discussions.

2: Twin Cities Campus

Develop more competitive compensation and benefits packages through special merit increases and preventive retention packages for high-performing faculty.

Facilitate spousal and partner hires, implement family-friendly policies, and initiate a system-wide review of human resource policies and guidelines to ensure that existing rules advance the University's recruitment goals.

Enhancing the Research Environment: The University is striving to provide faculty with an environment in which to flourish. Major investments are being made in systems and processes that support faculty scholarship and optimize use of existing resources, including grants-in-aid programs, dedicated research time, and administrative services. An advisory committee of prominent researchers and scholars will inform decisions on collaborative research opportunities, infrastructure funding, and research space issues. Additional administrative service support for the development of large collaborative and interdisciplinary research proposals is being provided through the new Collaborative Research Services Office.

Providing Mentoring and Support: Mentoring and support are critical to the development and success of new faculty. All now receive a three-day **new faculty orientation program** to introduce them to the University's teaching, research, and public engagement mission; establish a sense of community across departmental and collegiate boundaries; and expose them to the breadth and culture of the University and the Twin Cities area.

Enhance existing training programs for department heads, chairs, and faculty members through the Provost's Department Chairs Leadership Program and other initiatives.

Strengthen opportunities for faculty interaction, including several new cross-collegiate interdisciplinary institutes and centers, to build

collegiality across campus, departmental, and collegiate boundaries.

In addition, the University's **Center for Teaching and Learning** is a key component in the ongoing support of teaching excellence for faculty at all stages of their careers. The Center offers a wide range of workshops, seminars, and online information and provides such services as observation of teaching, review of materials, student focus groups, private coaching, and consultation.

Rewarding Excellence: The University rewards excellence in teaching and research in part through collegiate awards and University-wide honors. In 2007, the University's academic leaders successfully strengthened and improved promotion and tenure policies, standards, and procedures to create a culture of rigorous peer review that recognizes the breadth and diversity of legitimate academic work at the University and establishes clearly articulated criteria and sufficient resources. In addition, the University has focused on the following initiatives:

Expand all-University chairs and professorships to strengthen recruitment and retention of outstanding faculty—the University has identified potential matching funds for as many as 25 new chairs or professorships (which have increased from 17 in 1985 to 386 in 2005).

Expand Regents Professor awards, both in number and amount, and continue to recognize scholarly excellence through internal awards including McKnight professorships, fellowships and chairs; the Scholar's Walk and Wall of Discovery; and teaching awards including Morse-Alumni, Graduate and Professional, and Tate Advising awards.

Facilitate national recognition by increasing faculty nominations for prestigious awards, honorary appointments, and professional academic recognition.

Compensate faculty for their performance by increasing the pool of funds available for merit pay and market-competitive merit increases. In the last three budget cycles, special compensation for exceptional faculty has increased over the general compensation rate by \$12 million.

Staff

Investing in the success of all University employees is key to achieving the institution's long-term objectives. The University is committed to creating an environment where every individual understands what is expected, is fully engaged in his or her work, is supported to innovate and continuously improve, understands how performance will be assessed and rewarded, and has confidence in leadership.

Engaging employees: Engaged employees are a high priority, with success marked by employees who feel they are an important, valued part of the institution, understand how their responsibilities contribute to the overall mission, and are proud of their identity as a University employee. This is being accomplished through focused efforts to:

Create a strong start for new employees, including orientation practices that provide a broad overview of the University's history, mission, values, organization, and leadership and that promote strong University citizenship.

Develop leadership capacity, knowledge, skills, and abilities that enhance position competence and University citizenship through initiatives such as the President's Emerging Leaders program, the Office of Service and Continuous Improvement's Transformational Leadership Program, and new faculty and new deans orientation programs.

Promote a healthy work environment that enhances productivity; supports individual and group success; is responsibly managed; and fosters inclusiveness, employee well being, and the assurance of safety.

Evaluating performance: Performance management is a shared process that includes assessing, managing, planning, and improving an employee's performance to promote development that serves the individual and the organization. To ensure effective institutional management, a strong performance management system for all types of employees is needed.

Effective performance management systems should serve the individual employee as well as the organization. The system must be holistic and supported by trained managers and supervisors who understand and can articulate the differences in performance levels.

Development of such a system at the University began with a new approach to reviews for deans and senior administrators that is comprehensive and streamlined. More timely feedback to leaders, along with thoughtful analysis, is helping them to make timely adjustments for success.

In addition, the University's position management system supports the recruitment, development, and performance management of employees by tracking the requirements of a position as individuals leave and others are hired. University pay systems also are being analyzed to ensure linkages with competencies and performance management systems as they are defined.

Performance Measures

Performance measures that support the goal of "Exceptional Faculty and Staff" are detailed on the following pages:

2: Twin Cities Campus

National Academy Members	Pages 50-51
Faculty Awards	Pages 52-53
Post-Doctoral Appointees	Pages 54-55
Faculty and Staff Diversity	Pages 56-57
Faculty Salary and Compensation	Pages 58-59
Faculty and Staff Satisfaction	Pages 60-61

Other Measures

The University's Metrics Steering Committee is considering the addition of other measures under the "Exceptional Faculty and Staff" pillar. These include:

- Staff Development
- Quality Professional Education

NRC Rankings: The federally chartered, non-profit National Research Council (NRC) is expected to disseminate the results of a national report on U.S. Ph.D. programs in early 2008. The report will offer assessments of three major aspects of doctoral education:

- Research Impact: Citations and publications per faculty member, honors and awards, etc.
- Student Support and Outcomes: Fraction of students with full support, time to degree, attrition rate, fraction with a position in a relevant field on graduation, etc.

- Diversity of Academic Environment: Fractions of students and faculty that are female and minority.

The new NRC rankings will differ significantly from the previous rankings (1995) in several important ways. First, a greater number of graduate fields will be evaluated. For example, the rankings will now include agricultural sciences, biomedical fields in medical schools, and some programs in professional schools. Second, the new rankings will be based on quantitative data and, unlike the 1995 rankings, will not be subjective or reputation-based. Third, greater attention will be paid to assessing the graduate student experience, not the scholarly reputation of program faculty.

Thus, it will be difficult to compare 1995 rankings (based on subjective reputational surveys) with the new rankings (based on quantitative data that attempt, imperfectly, to estimate scholarly performance and quality).

National Academy Members

University of Minnesota Rank			<i>These prestigious honors are granted by the National Academies of Sciences and Engineering and the Institute of Medicine, which serve as private, nonprofit organizations to the federal government on science, technology, and medicine.</i>
	<u>Within Comparative Group</u>	<u>Among All Publics</u>	
This Year	8th	11th	
Last Year	8th	11th	
5 Years Ago	8th	10th	

Analysis: The number of University faculty members who have been selected for National Academy membership has remained relatively constant over the past five years (Figure 2-15 and Table 2-18). While the University has maintained its rank within its comparative group, other institutions are adding National Academy members to their institutions. Furthermore, the highest ranked institutions on this measure have more than twice as many members as does the University (Table 2-17).

Conclusion: The University has many deserving faculty in a range of disciplines whose qualifications and contributions to their fields may not have been adequately brought forward. In 2006, the Provost appointed a full-time coordinator for faculty

awards to identify and facilitate the nomination of outstanding faculty. In addition, a working group of National Academies members has been formed to develop strategies for putting forth nominations.

In 2007, three University faculty were inducted into the American Academy of Arts and Sciences—the highest number in any year since 1993. One faculty member was inducted into the National Academy of Sciences, the first since 2002. With the continued efforts of the coordinator and the National Academies working group, the University expects the number of national and international faculty awards received by University faculty to continue to increase significantly in the coming years.

Table 2-17. National Academy members: U of M-Twin Cities and comparative group institutions, 2005.

Faculty Awards

<u>University of Minnesota Rank</u>			<i>Included in this measure are prominent grant and fellowship programs in the arts, humanities, science, engineering, and health fields, e.g., Fulbright, MacArthur, National Endowment for the Humanities, National Institutes of Health, Pew Charitable Trusts, etc.</i>
	<u>Within Comparative Group</u>	<u>Among All Publics</u>	
This Year	8 th	12 th	
Last Year	9 th	14 th	
5 Years Ago	6 th	6 th	

Analysis: The University currently ranks 8th within its comparative group on this measure, and 12th among all public research universities (Table 2-19). Although the number of external faculty awards fluctuates from year to year, the University’s ranking and its share of awards have declined compared to five years ago (Figure 2-16 and Table 2-20). However, in the past two years the University has shown modest gains in the number of awardees and in its ranking within the comparative group.

Conclusion: The University has many deserving faculty in a range of disciplines

whose qualifications and contributions to their fields may not have been adequately brought forward. In 2006, the Provost appointed a full-time coordinator for faculty awards to identify and facilitate the nomination of outstanding faculty.

Since the position was created, the coordinator has built a database of national and international faculty awards to track award opportunities, has established on-going relationships with key contacts in each collegiate unit to identify potential award nominees, and is working to increase publicity for national and international award winners.

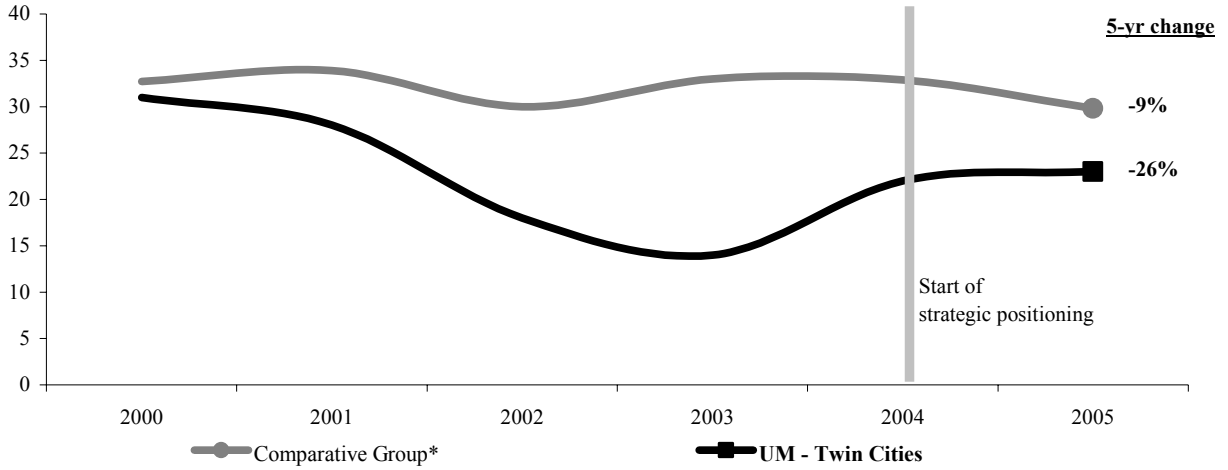

Table 2-19. Faculty awards: U of M-Twin Cities and comparative group institutions, 2005.

All Publics Rank	Comparative Group Rank	Institution	2005	1-Yr % Change	5-Yr % Change
1	1	University of Michigan - Ann Arbor	42	-10.6%	31.3%
1	1	University of Wisconsin - Madison	42	-2.3%	68.0%
3	3	University of California - Berkeley	40	-11.1%	-32.2%
5	4	University of California - Los Angeles	36	-2.7%	-29.4%
9	5	University of Washington - Seattle	29	-14.7%	-21.6%

Post-Doctoral Appointees

University of Minnesota Rank			<i>Post-doctoral appointees, who hold a science and engineering Ph.D., M.D., D.D.S., or D.V.M. degree (or foreign degrees equivalent to U.S. doctorates), devote their primary effort to additional training through research activities or study in an academic department under temporary appointments carrying no academic rank.</i>
	<u>Within Comparative Group</u>	<u>Among All Publics</u>	
This Year	5 th	9 th	
Last Year	5 th	9 th	
5 Years Ago	5 th	8 th	

Analysis: The University has maintained the number of post-doctoral appointees and its ranking within the comparative group over the past five years as shown in Figure 2-17. However, the University’s number of appointees is about 400 fewer than the top two institutions (Table 2-21).

Conclusion: The University’s ability to host post-doctoral appointees is, in part, determined by the resources available to the appointing department. The steady progress made in increasing the number of post-

doctoral appointees was thwarted in 2003 following the state’s budget reduction. This resulted in a decision by the University, collegiate units, and departments to reallocate funds to graduate student support. However, with the additional investments made by the Minnesota Legislature in the past two years, and with additional internal reallocation of funds, the number of appointees has increased and is expected to continue to do so in the coming years.

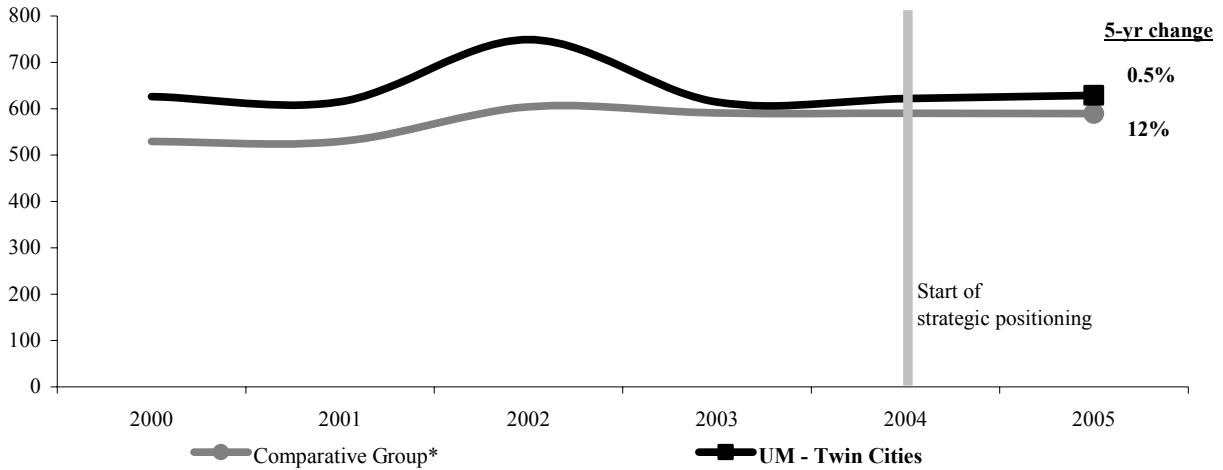

Table 2-21. Post-doctoral appointees: U of M-Twin Cities and comparative group institutions, 2005.

All Publics Rank	Comparative Group Rank	Institution	2005	1-Yr % Change	5-Yr % Change

Faculty and Staff Diversity

Analysis: The Twin Cities campus has made modest but steady progress in hiring and retaining faculty and staff of color and female faculty over the past 10 years (Figures 2-18, 2-19, and 2-22). Females are well represented among all staff categories (Figure 2-21). Among faculty of color, Asian Americans represent an increasing proportion, while other groups have maintained or increased slightly (Figure 2-20).

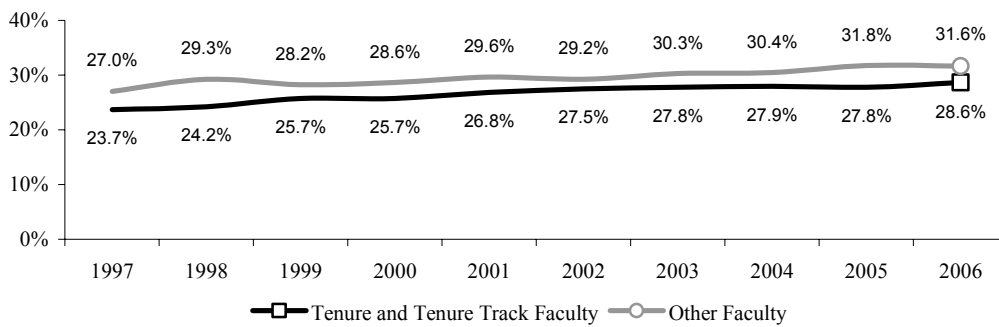

Conclusion: Recruiting and retaining a diverse faculty and staff is one of the University's highest priorities. The University is focusing on promoting and developing female faculty, particularly in fields where women have been underrepresented for some time. In addition, the University is working with academic departments to provide bridge funding in order to take advantage of opportunities

to hire exceptional diverse faculty, helping support faculty spousal hires, supporting graduate student admission strategies, and developing additional post-doctoral appointee opportunities. In addition to recruiting for faculty diversity, the University is focusing on promotion and retention strategies as well.

On the staff side, the University has initiated a variety of programs to support the development of civil service, bargaining unit, and professional and academic female staff and staff of color. These efforts include not only attempts to increase numbers, but also to identify and reduce institutional and cultural barriers.

All of these efforts are being supported and led by the newly created Office for Access, Equity, and Multicultural Affairs.

Faculty Salary and Compensation

	U of M Rank Within Comparative Group		
	Professor	Associate Professor	Assistant Professor
This Year	8 th	5 th	7 th
Last Year	8 th	8 th	10 th
5Years Ago	7 th	6 th	7 th

The American Association of University Professors (AAUP) conducts annual salary and compensation surveys of full-time instructional faculty (excluding medical school faculty). Comparisons across institutions and campuses, however, are imperfect because they differ by mission, public vs. private, size, mix of disciplines, etc. Cost-of-living, tax burden, and variations in fringe benefits only add to the imperfection. Also, changes in average salary reflect not only increases for continuing faculty but also are influenced by retirements, promotions, and new hires. Thus, percentage changes will differ from ones stipulated in annual salary plans. These differences will vary from year to year, and can be significant when the cohort sizes are relatively small.

Analysis: In 2003-04, the University lost ground to its comparative group due to the im-

pact of the state's budget reduction to the institution (Figure 2-23). In the last two years, however, the University has made significant progress, and over the five-year period the University outperformed the comparative group average. In 2005-06, the University ranked 8th at the full professor level, 5th at the associate professor level, and 7th at the assistant professor level. The University ranks near the top of its comparative group in total compensation (Table 2-24). Its total compensation ranks 4th at the professor, 3rd at the associate and 2nd at the assistant professor levels.

Conclusion: As part of its strategic positioning efforts, the University has added \$12 million to merit-based faculty salaries on top of a 3 percent increase to the base, but it will take a sustained effort to increase the University's standing within its peer group.

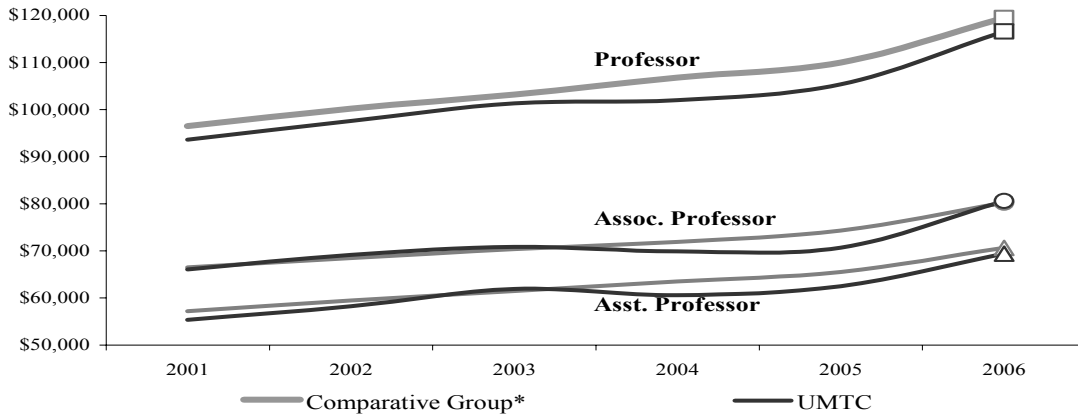

Table 2-23. Faculty salary: U of M-Twin Cities and comparative group institutions, 2006.

Rank	Institutions	Professor	5-Yr % Change	Associate Professor	5-Yr % Change	Assistant Professor	5-Yr % Change

Faculty and Staff Satisfaction

Large employers recognize the value of continuously monitoring employee attitudes and perspectives on the workplace. Level of satisfaction with compensation, benefits, supervisor behaviors, and work-life support play an important role in an individual's decision to stay or leave. With this monitoring goal in mind, the Pulse Survey was commissioned in 2004 by the University's central administration and conducted in partnership with the Human Resources Research Institute of the Carlson School of Management.

The second Pulse Survey was conducted in February 2006. Approximately 4,500 faculty and staff responded to the 2006 survey. The survey asked a variety of questions about employees' job experiences and attitudes about their jobs, departments, and the University. The survey examined the following areas:

- job satisfaction
- pay and benefits
- supervisor and departmental support
- University climate
- retention and considerations in leaving
- life outside of work
- characteristics of the respondents

Faculty Results: Across a number of indicators, results suggest that faculty respondents feel quite good about their jobs at the University (75 percent satisfied or above). Some of the most favorable results were in the following areas:

- overall job satisfaction and satisfaction with the University as an employer
- satisfaction with co-workers
- satisfaction with department chair or responsible administrator
- intentions to remain at the University
- general well-being outside of work

Faculty were more moderately favorable or neutral about:

- satisfaction with pay
- work family conflict
- support from department chair or responsible administrator

Staff Results: With respect to staff, some of the most favorable results were in the following areas:

- Overall job satisfaction and satisfaction with the University as an employer
- Satisfaction with coworkers
- Satisfaction with supervisors
- Satisfaction with benefits
- Intentions to remain at the University
- General well-being outside of work

Staff respondents were more moderately favorable or neutral about:

- satisfaction with promotion
- satisfaction with pay
- supervisor support for career development
- perceptions of job security

Conclusions: The results from these first two surveys suggest the University must continue to address the issue of salary levels. Retention of faculty and staff will depend on increasing the University's competitive position in this area. While University benefits programs are viewed as a positive feature of employment, good benefits cannot compensate for erosion of base salaries against comparative institutions.

Efforts to better prepare supervisors and managers appear to be paying off, as the survey indicates many employees feel positive about the quality of their supervisors and managers.

More attention to career development opportunities seems particularly important for staff employees, many of whom remain at the University for their careers.

2: Twin Cities Campus

The Pulse Survey will be an ongoing University-wide effort to “take the pulse” of University employees. In the years to come, similar

surveys will be administered to track changes in the satisfaction of University employees.

Source: Human Resources Research Institute, Carlson School of Management.

Exceptional Innovation

Inspire exploration of new ideas and breakthrough discoveries that address the critical problems and needs of the University, state, nation, and the world.

To achieve this strategic goal, the University will invest \$33.6 million in FY 2007-08 towards achieving the following objectives:

- Foster an environment of creativity that encourages evolution of dynamic fields of inquiry.
- Invest in strong core disciplines while supporting cross disciplinary, collaborative inquiry.
- Fully leverage academic, research, and community partnerships and alliances to provide leadership in a global context.
- Develop innovative strategies to accelerate the efficient, effective transfer and use of knowledge for the public good.

Exceptional innovation requires developing new models of collaboration that enable the University to engage partners in problem-solving, inspire new ideas and breakthrough discoveries, address critical problems, and serve Minnesota, the nation, and the world.

Creating Academic Synergies

The University's recent realignment of academic units advances interdisciplinary inquiry and research, enhances curricular choices and content for students, and provides more effective, efficient service. These changes brought initial savings of \$3-4 million, with more savings expected over the next five years, all of which will be reinvested in academic initiatives. These changes have also meant more tuition revenue for other units with enrollment growth. The realignment includes:

The **College of Design** encompasses all of the University's design disciplines—graphic, apparel, and interior design; retail merchandising; housing studies; architecture, and landscape architecture. It combines the former College of Human Ecology's Department of Design, Housing, and Apparel with the former College of Architecture and Landscape Architecture. The new college strengthens the University's leadership in academic research and education in design and establishes it as one of the nation's pre-eminent design colleges.

The **College of Education and Human Development** joins the former College of Education and Human Development with the former General College and the former College of Human Ecology's Department of Family Social Science and School of Social Work. The new college is poised to become a world leader in creating and advancing knowledge in education, family systems, human welfare, and human development across the lifespan.

The **College of Food, Agricultural and Natural Resource Sciences** joins the former College of Natural Resources, the former College of Human Ecology's Department of Food Science and Nutrition, and the former College of Agricultural, Food and Environmental Sciences to create a nationally distinctive college poised to enhance the University's biological and social science contributions to the environment, agriculture, human health, food systems, and natural resources.

Advancing Interdisciplinary Research and Education

The University is seeking to maintain and strengthen excellence not only in its traditional

2: Twin Cities Campus

academic programs but also by cultivating new programs that cross disciplinary boundaries. Fostering interdisciplinary activity is a critical institutional priority. With more than 350 interdisciplinary programs, centers, and majors, the University's commitment to interdisciplinary research, education, and public engagement is not new. The University is building on this tradition with focused investment in major interdisciplinary initiatives, including:

Incentives for **cross-college collaboration** as part of the budget compact process that guides central investments in the colleges.

Support for selected, newly formed **centers of interdisciplinary inquiry** that foster collaboration, such as the Institute for Advanced Study, the Institute on the Environment, the Institute for Translational Neuroscience, and the Institute for the Advancement of Science and Technology.

Continued investment in **interdisciplinary initiatives** in the Arts and Humanities; Biocatalysis; Brain Function Across the Lifespan; Children, Youth, and Families; Environment and Renewable Energy; Healthy Foods, Healthy Lives; Law and Values in Health, Environment, and the Life Sciences; and Translational Research in Human Health.

Changes in policies to ensure that interdisciplinary work is adequately valued in the tenure and promotion process, and changes in policies to allow for equitable distribution of indirect cost recovery for interdisciplinary grants.

Development of **leadership capacity** for interdisciplinary initiatives and of active networks of interdisciplinary scholars and artists. In addition, the University is providing faculty interdisciplinary teams technical and managerial assistance, including finding additional funding, developing staffing and leadership plans, and building community partnerships.

Interdisciplinary Education: The University's leadership in fostering inquiry across disciplinary boundaries extends to its education mission and the preparation of future faculty and leaders in other sectors.

The Graduate School is supporting the development of interdisciplinary education programs in areas of strength at the University and is providing matching funds for faculty training grants that support the implementation of best practices.

At the undergraduate level, the University is helping students explore a range of disciplines on the way to choosing a major or majors. The University is exploring new possibilities for undergraduate interdisciplinary research, seminars, and internship opportunities.

Cultural Support: Traditional academic culture can present barriers to interdisciplinary work. University faculty and administrators are working together to change institutional policies and practices to ensure that collaborative work is adequately valued, especially in the tenure and promotion process. In addition, the University is focusing on other recognition and incentive mechanisms for collaborative contributions to research and education.

Transforming Health Care Research, Education, and Service

The University's health-sciences disciplines focus on the movement of knowledge from discovery to its application and dissemination—bringing research to reality by developing new ways to prevent, diagnose, or treat disease and improve the health status of individuals and communities. This process, along with the education of future health professionals, is shaping the future of health care.

The University's ability to shape the future of health care relies on strong clinical sciences. Encompassing clinical research, clinical care and practice, and the experiential education of

future health professionals, the clinical sciences comprise the final stage of bringing new knowledge to the treatment and prevention of disease. Strong clinical sciences are essential for: training future health professionals; ensuring that discoveries come to fruition in new therapies, treatments, and cures; developing new models of care and prevention; improving the health of communities; and supporting the bioscience economy of Minnesota. Through clinical revenues, the clinical sciences also provide critical funding for the education and research missions of the University's Academic Health Center schools and colleges.

Creating Research Corridors of Discovery:

Research corridors are conceptual passageways for biomedical and health research, moving a new idea or new knowledge to its end either as a new way to prevent disease, a new treatment or a new product, or a new industry for Minnesota.

Developing these corridors requires new faculty and facilities and strengthened support and infrastructure for clinical and translational research. The University is combining the expertise of disciplines in the natural, physical, and social sciences with the health sciences as well as partnerships with the private sector and broader community.

The health sciences faculty is defining and developing the following initial research corridors: **heart and cardiovascular disease, cancer, diabetes, brain, nerve and muscle diseases, emerging infectious diseases, drug design and development, and health care evaluation and improvement.**

Recruiting Outstanding New Faculty:

Improving the University's competitive position in the health sciences requires hiring 500 new exceptional faculty over the next 10 years. New faculty are key to supporting the basic science engine of new discovery and to supporting the clinical sciences.

Strengthening Research Support and Infrastructure: The Academic Health Center is undertaking three initiatives to provide more efficient and effective support for clinical and translational research:

The **Institute for Clinical and Translational Research**, a highly visible and physical academic home, will support and reward clinical and translational research by coordinating and integrating several existing components of clinical and translational research across disciplines, institutions, and communities.

Informatics is an interdisciplinary and inter-professional field of scholarship that applies computer, information, and cognitive sciences to promote the effective, efficient use and analysis of information to improve health, clinical trials, and health care innovation.

The **Center for Translational Medicine** will support the efforts of University investigators to translate basic discoveries that hold promise for improved health care and clinical practice into clinical trials. The center will speed testing of new treatment strategies in human and animal patients by working with basic scientists and clinical investigators to provide needed scientific and administrative support.

Building New Research Facilities: The University has a severe shortage of bioscience research space for its current faculty and cannot hire additional faculty without new facilities. For Minnesota to remain strong and competitive in the biosciences and to support research that will connect basic discovery with application to health care and improved health status, major new state-of-the-art facilities are needed.

The Academic Health Center is taking the lead in developing a master plan encompassing all AHC schools. A key component of this initiative is the continuing request to the Minnesota Legislature to establish the **Minnesota Biomedical Sciences Research Facilities Au-**

thority. It would issue up to \$279 million in state general obligation bonds to support the construction or renovation of one biomedical sciences research building every other year for eight years.

Strengthening Clinical Practice: Clinical practice is essential to fulfilling the mission of health professional schools. Faculty must practice their disciplines in order to teach the next generation of health professionals and to engage in translating new knowledge to patient care and community health. Practice revenue also provides an important revenue stream for the health professional schools. To strengthen clinical practice, the University is:

Creating an environment that **values and rewards excellence**, innovation, and quality improvements in health care. The AHC schools and colleges are weaving this objective into integrated reviews of academic personnel plans, promotion and tenure procedures, unit constitutions, and annual faculty reviews.

Developing **inter-professional models of acute, chronic, and preventive care** that transform care delivery. New care models employ health professional teams and innovative care systems. This effort dovetails with the AHC's commitment to build and strengthen inter-professional education for all health professional students.

Creating **new facilities for care, research, and training.** University of Minnesota Physicians (UMP) Clinics are overcrowded, worn, inefficient, and difficult for patients to reach. The University will build a new UMP Clinic that meets patient needs, supports health professional education, clinical research, and inter-professional care teams, and enables UMP to be viable in Minnesota's health care market. The University also plans to replace Children's Hospital in partnership with Fairview Health System. These new and retrofitted facilities will provide state-of-the-art clinical care to

children and will consolidate programs in an optimal physical environment.

Supporting the Biosciences in Minnesota:

The University is partnering with Minnesota's bioscience community to leverage strengths and jointly develop and implement a plan for the future of biosciences in the state. Minnesota has long been a world leader in biosciences, primarily in medical devices and the health industry, and much of the technology that supports this sector has come from the University of Minnesota. Minnesota is now presented with new opportunities to become a world leader in industrial and agricultural applications, while further enhancing its world position in devices and health technology.

Engaging Government, Industry, and the Public

As a land-grant public research university, the University is committed to partnering with diverse external constituencies in order to: share knowledge and resources; enrich scholarship, research, and creative activity; enhance teaching and learning; prepare educated, engaged citizens; strengthen democratic values and civic responsibility; address critical societal issues; and contribute to the public good.

The University is advancing this commitment by aligning its academic programs and offerings to the needs of society, by reaching out to and partnering with the public to address issues of common concern, and by facilitating the transfer of knowledge.

The **Council on Public Engagement (COPE)** incorporates public engagement as a permanent and pervasive priority in teaching, learning, and research activities throughout the University. The Office of Public Engagement works with COPE to catalyze, facilitate, advocate, coordinate, connect, communicate, and align engaged initiatives across the University and with external constituencies.

2: Twin Cities Campus

The University has a special, highly visible relationship with the communities near the Twin Cities campus and other urban areas. The **University Northside Partnership (UNP)** is a pilot opportunity to develop sustainable engagement with multiple metro partners. The UNP is focusing initially on three broad initiatives that support the critical goals of building human capacity, strengthening communities, and promoting urban health.

The University's **Consortium for Metropolitan Studies** links the centers, programs, and faculty and staff engaged in teaching, research, and public engagement related to metropolitan change and development.

Often regarded as the University's public engagement arm for rural areas, many **University of Minnesota Extension** programs are now tailored specifically to urban participants as well, such as the Family Formation Project that serves urban, unmarried, new-parent couples seeking to form a stable family.

Community Partnerships for Health: The Academic Health Center and its schools and colleges have partnered with communities and regions to establish programs that meet regional and community needs while providing education and training opportunities for health professional students.

The four **Minnesota Area Health Education Centers (AHEC)** help Minnesota communities identify and address community health and health workforce needs, support community-based faculty and other health professionals through continuing education, support professional and inter-professional education for health professions students, and nurture an interest in health professions among youth.

Statewide Strategic Resource Development: The Office of the Vice President for Statewide Strategic Resource Development is anchored in the University's role in and responsibility for economic development. Its priorities in-

clude oversight and management of real estate assets, with emphasis on UMore Park, support of technology commercialization, and fostering of economic development opportunities and public engagement.

Research and Technology Commercialization: The University's role in generating new knowledge and innovation through basic and applied research is critical to economic development and quality of life. Not only do University researchers contribute useful discoveries and knowledge to society, they also help spark invention, establish start-up companies, foster growth, and create jobs. In addition, successful researchers attract additional revenue and talent to the University.

Commercialization of intellectual property is an essential element of the University's research and public engagement missions, and a requirement of the federal Bayh-Dole Act of 1980. Translation of the University's discovery economy to useful commercial products enhancing the quality of life of the public represents an important form of outreach and a tangible return on the public investment in research. In short, technology transfer represents a modern manifestation of one of the founding principles of land-grant universities.

Commercialization of University-based technologies, if done well, also can provide a flexible revenue stream to support the University's education, research, and public engagement mission. While the University boasts a strong technology transfer history, recent assessments suggest that new approaches to commercialization are necessary to remain competitive, enhance performance, and optimize return on investment.

After a comprehensive review and analysis, the University is launching a new commercialization program characterized by:

2: Twin Cities Campus

Identifying **the most promising research** to serve society, generate meaningful licenses, and spawn successful start-up companies.

Providing **business expertise** and **innovation grants** to nurture the most worthy projects into fundable business opportunities.

Providing **seed-stage venture capital** to launch these high-risk, high-reward start-ups.

Identifying and encouraging **technology development** in areas of high-impact, unmet needs.

Establishing **long-term research relationships** with strategic corporate partners in areas of economic importance to Minnesota.

The new **Academic and Corporate Relations Center** is charged with nurturing and managing effective partnerships with local industries; enhancing accessibility to University faculty, students, centers, institutes, and graduate interdisciplinary programs; and identifying opportunities for research collaborations.

Performance Measures

Performance measures that support the goal of “Exceptional Innovation” are detailed on the following pages:

Research Expenditures	
Total	Pages 68-69
Federal	Pages 70-71
Library Quality	Pages 72-73
Citizen Satisfaction	Pages 74-76

Other Measures

The University’s Metrics Steering Committee is considering the addition of other measures under the “Exceptional Innovation” pillar.

These include:

- Intellectual property commercialization
- Additional library measures

Total Research Expenditures

<u>University of Minnesota Rank</u>			<i>This measure includes "all activities specifically organized to produce research outcomes that are separately budgeted and accounted for." It is the most consistent measure of external research support.</i>
	<u>Within Comparative Group</u>	<u>Among All Publics</u>	
This Year	8th	10th	
Last Year	6th	10th	
5 Years Ago	6th	9th	

Analysis: The University ranks 8th in total research expenditures within its comparative group (Table 2-26), having fallen from 6th last year in relation to its comparative group. Its rate of increase over the five-year period (33 percent) is below the average increase (45 percent) for the comparative group (Table 2-27).

Conclusions: To strengthen its performance, the University is aggressively pursuing key opportunities for research support by targeting existing strengths and comparative advantages. While this is true across the entire research spectrum, it is critically important when very large grant opportunities are available. Large, complex, interdisciplinary (often inter-institutional) research initiatives are increasingly common. As part of

strategic planning, the newly established Office of Collaborative Research Services is supporting faculty efforts to develop and manage large, complex, interdisciplinary research programs. Confronted with a shrinking federal research budget, the University is redoubling its efforts to establish productive research collaborations with strategic corporate partners. It is also identifying and prioritizing increased unrestricted funding support of research to close the gap between the University and its national competition. The University is also implementing organizational, operational, policy, and cultural changes in response to recommendations from strategic positioning task forces to enable the University to more aggressively compete for research dollars.

Table 2-26. Total research expenditures: U of M and comparative group institutions, 2005 (in thousands of dollars).

All Publics Rank	Comparative Group Rank	Institution	2005	1-Yr % Change	5-Yr % Change
1	1	University of Michigan - Ann Arbor	\$808,887	5.2%	46.7%
2	2	University of Wisconsin - Madison	798,099	4.5%	44.0%
3	3	University of California - Los Angeles	785,625	1.7%	48.0%
6	4	University of Washington - Seattle	707,519	-0.9%	33.7%
7	5	Pennsylvania State University - Univ. Park	625,764	15.9%	68.2%
8	6	Ohio State University - Columbus	608,923	17.5%	68.5%
9	7	University of California - Berkeley	554,551	5.5%	7.0%
10	8	University of Minnesota	548,873	4.3%	33.4%
12	9	University of Florida	530,734	18.7%	69.2%
16	10	University of Illinois - Urbana-Champaign	499,711	-1.3%	34.0%
20	11	University of Texas - Austin	410,981	19.5%	50.6%

Note: Figures for University of Minnesota include all campuses.
Source: National Science Foundation

Total Research Expenditures

Figure 2-25. Total research expenditures: U of M vs. comparative group institutions, 2000-2005 (in thousands of dollars).

Source: National Science Foundation

Table 2-27. Total research expenditures: U of M vs. comparative group institutions, 2000-2005 (in thousands of dollars).

	2000	2001	2002	2003	2004	2005	5 Yr % Change
Comparative Group*	\$437,752	\$478,256	\$523,575	\$578,635	\$590,043	\$633,079	44.6%
% Change	-	9.3%	9.5%	10.5%	2.0%	7.3%	-
UM	411,380	462,011	494,265	508,557	526,270	548,873	33.4%
% Change	-	12.3%	7.0%	2.9%	3.5%	4.3%	-
UM Rank	6 th	5 th	5 th	5 th	6 th	8 th	-

* Excludes University of Minnesota

Note: Figures for University of Minnesota include all campuses.

Source: National Science Foundation

Federal Research Expenditures

University of Minnesota Rank			<i>Included in this measure are federally funded activities specifically organized to produce research outcomes, but excludes federally funded research labs.</i>
	<u>Within Comparative Group</u>	<u>Among All Publics</u>	
This Year	6 th	11 th	
Last Year	6 th	10 th	
5 Years Ago	5 th	8 th	

Analysis: The University has maintained a high ranking in federal research support over the past five years – ranking 5th or 6th within its comparative group since 2000. The University’s federal research expenditures increased 39 percent over the five-year period, while the comparative group average increased 64 percent (Figure 2-26). In 2005, the University’s federal research expenditures increase of 3.7 percent was below that of most comparative group institutions (Table 2-28).

Conclusions: Federal non-defense R&D declined during 2004-2006 after 10 years of continued growth. This trend will have a profound impact on the University’s ability to continue to grow its research portfolio

and will have significant implications for the approaches the University must take to achieve its research objectives.

Emphasizing the University's interdisciplinary strengths, working with colleges to develop strategic plans to enhance research productivity, and taking advantage of major opportunities for federal dollars that are aligned with University strengths will be necessary to help increase the share of federal research support. In addition, the University is implementing organizational, operational, policy, and cultural changes in response to recommendations from strategic positioning task forces to enable the University to more aggressively compete for federal research dollars.

Table 2-28. Federal research expenditures: U of M and comparative group institutions, 2005 (in thousands of dollars).

All Publics Rank	Comparative Group Rank	Institutions	2005	1-Yr % Change	5-Yr % Change
1	1	University of Washington - Seattle	\$606,317	-3.0%	55.6%
2	2	University of Michigan - Ann Arbor	554,516	6.4%	52.3%
3	3	University of Wisconsin - Madison	477,582	9.9%	71.4%

Library Resources

<u>University of Minnesota Rank</u>		
	<u>Within</u> <u>Comparative Group</u>	<u>Among</u> <u>All Publics</u>
This Year	8 th	8 th
Last Year	9 th	9 th
3 Years Ago	8 th	9 th

The University Libraries, comprising 14 locations on the Twin Cities campus, provide collections, access, and service to students, researchers, and citizens. As such, the Libraries are a key component in the educational and information infrastructure for Minnesota.

In addition, the Libraries provide service support to several independent libraries (e.g., Law, Journalism, and the coordinate campus libraries). Over 6.7 million volumes are held in five large facilities as well as specialized branch libraries. With nearly 2 million user visits to campus libraries annually, the Libraries remain a critical and heavily used resource for the University. In 2005-06, the Libraries website received 4 million virtual visits.

University Libraries Rankings: The Association of Research Libraries (ARL) has made significant changes in how it calculates rankings of academic member libraries. It is moving away from measures of collection size to a new index focused on expenditures (total library expenditures, salaries and wages for professional staff, expenditures for total library materials, and number of professional and support staff). ARL will also begin to develop a

services-based index that combines three factors: collections, services, and collaborative relationships. This is linked to an additional project to begin collecting more qualitative data. Comparative data from these initiatives may be available in the future.

According to the new ARL methodology, as shown in Table 2-30, the University of Minnesota currently ranks 8th within its public research university comparative group as well as all public universities, and 15th among the ARL's 113 members. In 2003, the University ranked 8th within its comparative group, 9th among all public universities, and 18th among the ARL's 113 members.

Online Library Resources: Digital collections have grown considerably in recent years and promote access for all University Libraries users. Table 2-31 shows the growth of online library resources during 2002-2006.

Substantial new investments have been made in the last three years to strengthen the University Libraries' support of the academic mission.

Library Resources

Table 2-30. U.S. public research university library rankings, 2006.

All Publics	Comp. Rank	Institutions	Index Score	Total Expenditures	Salaries & Wages Staff	Materials Expenditures	Prof & Support Staff
1	1	University of California - Berkeley	2.25	\$56,186,972	\$18,499,738	\$17,453,180	421
2	2	University of California - Los Angeles	1.77	50,919,689	11,778,277	15,158,149	471
3	3	University of Michigan - Ann Arbor	1.75	49,053,402	11,085,528	20,669,495	468
4	4	Pennsylvania State University - Univ. Park	1.63	48,580,052	8,812,659	18,088,877	536

InfoPoint electronic reference queries	3,829	5,443	5,679	6,134	6,275***

Source: University Libraries, University of Minnesota.

*Note: Category definitions have been adjusted to align with reporting categories for statistics submitted to the Association of Research Libraries. Prior to 2004, "Electronic reference sources" were reported as "On-line databases, indexing, and abstracting tools" and "Electronic books" were reported as "Catalogued full-text electronic resources."

** This is a comparable figure; the increase reflects the availability of images through the statewide program "Minnesota Reflections" hosted locally. A more inclusive definition of "locally created digital files" includes entries in the AgEcon Search full-text database maintained by the Libraries and entries in the UThink weblog system. Total with AgEcon Search: 79,652. Total with UThink: 118,070.

*** This figure is for electronic reference queries specifically through the InfoPoint virtual reference service. Throughout the library system, there more than 15,000 electronic reference transactions, including emails.

Citizen Satisfaction

Minnesotans' overall satisfaction with the University remains broad and is steady, according to a December 2006 telephone survey of 882 state residents conducted by the international research firm of KRC Research. Half of respondents report a personal connection with the University and believe that it offers a high-quality education and world-class medical school—two qualities they consistently rank as priorities.

In addition, while general awareness of the University's strategic positioning process is relatively low, once informed about it more than eight out of 10 support its goals.

At the same time, while overall satisfaction and favorability levels are broad and positive, intensity is low. The University's financial management and tuition affordability remain concerns of citizens.

A majority of respondents is favorable toward the University – 56 percent of adults, 65 percent of opinion leaders (college educated, news attentive, affluent, registered voters) and those who live in the metropolitan area and have a personal connection to the University. The intensity of those connections (those saying "very favorable") increased significantly since 2005 (25 percent from 20 percent).

Overall satisfaction levels with the University of Minnesota decreased to 50 percent in 2006 (Figure 2-27)—down from 54 percent in 2005 but slightly up from 49 percent in 2004.

Among the top-level findings:

- Opinion leaders reported a 61 percent satisfaction level with the University,

compared with 54 percent for the general public.

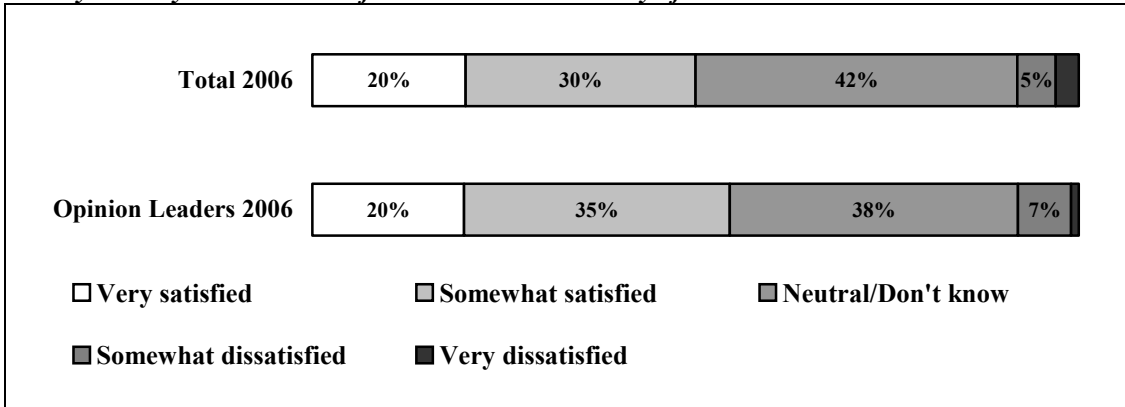

- Those living in the state's major metropolitan areas reported a 57 percent satisfaction level, compared with 52 percent outside the metro area.
- Those with a personal connection to the University reported a 61 percent satisfaction level, compared with 46 percent for those with no connection.
- More than two-thirds of Minnesotans say being one of the top three research universities in the world is important. Just under half, however, believe being a top three research university is currently descriptive of the University.
- Minnesotans place the highest priority for the University on good financial management (especially opinion leaders), quality education, and accessibility.

The survey also showed that the intensity of the overall favorable feelings and satisfaction with the University are low and that there is some uncertainty as to whether the University is headed in the right direction. In addition, there continues to be sensitivity over the University's financial management and the affordability of tuition.

Opinion leaders are more connected and in a wider variety of ways to the University than respondents overall, as shown in Figure 2-28. Sixty-seven percent of opinion leaders reported a University connection compared with 51 percent for those overall.

Source: KRC Research.

Figure 2-28. Minnesotans' personal connection to the University of Minnesota, Response to the question: "In which of the following ways are you connected with the University of Minnesota? Do you ...?"

Source: KRC Research.

Performance and Goals

Priorities for the University remain consistent with 2004, although "keeping tuition affordable" dropped five points in importance. Minnesotans place the highest priority for the University on good financial management (especially opinion leaders), quality education and accessibility.

Attributes considered both important and descriptive of the University include:

- Providing a high-quality education

- Having a world-class medical school
- Providing a good value for the tuition dollars
- Discovering cures for chronic diseases.
- Creating a well-trained workforce

Strategic Positioning

More than two-thirds of Minnesotans say being a top three research university is an important goal for the University. However, just un-

2: Twin Cities Campus

der half believe being a top three university is currently descriptive of the University.

Awareness of the University's strategic positioning initiative is low, but, when given a brief description, nearly eight in 10 Minnesotans favor the initiative—including half who strongly support the initiative.

Seventy-four percent of respondents said ensuring students have access to one of the best educations possible was a very or somewhat convincing reason for supporting strategic positioning.

Media Environment

The media environment for the University is fairly soft; half of Minnesotans recall seeing or hearing about the University in the news and the information they cite is predominantly about athletics—reinforcing the role athletics plays in building connections with the public. Local television (general public) and newspa-

pers (opinion leaders) tend to be the main sources for news about the University.

Conclusions

The University's strategic positioning process has created new opportunities and momentum to connect with Minnesotans and inform them about its unique role as the state's only public research university. That includes making a case for the importance of investing in the University to make it one of the best in the world so that it can continue to fulfill its role as the state's talent magnet and economic engine.

At the same time, a sustained, multi-pronged communications effort is needed to help Minnesotans better relate the impact of its research, education, and public engagement on their lives and communities. Another market survey in December 2007 will help assess the progress of that repositioning and communications initiative.

Exceptional Organization

Be responsible stewards of resources, focused on service, driven by performance, and known as the best among our peers.

To achieve the “Exceptional Organization” strategic goal, the University will invest \$20.7 million in FY 2007-08 towards achieving the following objectives:

- Adopt best practices and embrace enterprise-standard business practices, processes, and technology to achieve efficient, effective, and productive operations.
- Promote nimble decision-making using data, information, research, and analysis.
- Achieve a shared services administrative structure.
- Align resources to support strategic priorities.
- Commit to service and results that are best among peers.

“We must be as well known for our stewardship of public resources and the quality of our management,” says President Bruininks, “as we are for education, research and public engagement. This requires an exceptional organization working to support our academic responsibilities.”

The University’s goal is to be the best among peers, focused on service, and driven by performance. To achieve this goal, the University is creating a new model of administrative support that clearly defines the roles, responsibilities, and accountability of academic and administrative units; maximizes value and improves quality and efficiency; and responds more quickly to changing needs and dynamic external factors. Instilling a system-wide commitment to excellence requires moving beyond continuous improvement and into an

era of transformative change throughout the organization.

Enhancing Diversity

Faculty, staff, and students are helping to move the University’s equity and diversity work from the margins of the institution’s mission to its core. Nationally, since the implementation of affirmative action policies in the 1970s, “diversity” has primarily focused on race, and much of the work of the last 30 years has focused on making institutions and organizations look racially diverse. The University is expanding this definition by:

Helping colleges and units across the system to develop their own **strategic diversity plans**, including admissions policies and processes, faculty and staff recruitment, and curriculum and research redesign.

Exploring the creation of a **Diversity Research Institute** that would be the signature program of the University’s equity and diversity faculty initiatives and would produce and support scholarship by and about underrepresented groups and cultures.

Planning for the creation of an **Equity and Diversity Action Network**, a cohort of professionals from across the University whose primary job responsibilities are related to equity and diversity.

Sponsoring a year-long, campus-wide series of **open forums** on identity for faculty, staff, and students.

Improving internal and external **communications** related to diversity and identity issues.

Focus on Service

During their work and daily interactions, all members of the University community are service providers. Articulating the values expected of this community is an important step in creating a culture of service.

Service to students: In many cases, the keys to improving service to students are found in a common-sense approach to day-to-day activities, such as:

Enhancing the effectiveness of **student communications** to ensure that they receive, read, and act on information from the University.

Ensuring **optimal hours** of operation at University buildings including libraries, dining facilities, financial services, and health services.

Re-engineering **student service processes** as appropriate to maximize efficiency and convenience while minimizing financial costs, staff time, and frustrating delays.

Service to Faculty, Staff, and Units: To improve the level of service to faculty, staff, and units system-wide, the University is:

Re-engineering the **research proposal routing** process to gather necessary information more efficiently, streamline approvals even when multiple academic units are involved, improve accountability, eliminate redundancy, and implement business process improvements suggested by customers.

Improving centralized **course, classroom, research facilities, and technology scheduling.**

Implementing a new **capital project delivery** method in order to meet each project's scope, quality, schedule, and budget.

Enhancing Library Technology and Information Services: Renewed investment in University Libraries has enabled the simultaneous development of collections, technology

infrastructure, and new forms of service—all of which have contributed to interdisciplinary research and collaboration. The University Libraries also have launched numerous technological initiatives that impact the research process, including:

The **University Digital Conservancy**, which provides the infrastructure to preserve and make accessible the digital assets of the University.

OneSearch, a “meta-search” engine that enables scholars to search across multiple indexes and journal databases.

Subscription **news-feed services** for interdisciplinary fields that automatically deliver lists of new research publications to research communities via e-mail.

Customized views of library content and services based on an individual's affiliation, status, academic program, or courses.

UThink, the **University's blog service** hosted by the University Libraries, supports and catalyzes collaboration and exchange and is now thought to be the largest academic blog in North America.

Planning, Management, Tracking, and Measurement

The University is establishing uniform standards and systems in order to reduce duplicative processes that create high cost, consume unnecessary institutional energy, and produce inconsistent results. Where appropriate, effective single-enterprise solutions are reducing complexity, achieving cost savings, enhancing service and better outcomes, and allowing faculty, staff, and students to focus their energies on their primary activities rather than on navigating operational labyrinths.

Information-Based Decision-Making: Current priorities in this area include:

2: Twin Cities Campus

Improving the validity and availability of **management data** to address gaps, standardize definitions, and promote accessibility of information.

Strengthen the **compact process** by requiring alignment between unit plans and the University's top-three goal and requiring leaders to develop, assess, and respond to core performance measures of progress. The compact process provides a framework for University leaders, faculty, and staff to discuss past and future strategic goals, budget issues, and mutual responsibilities.

Financial Planning Systems, Budgeting, and

Accountability: Work is under way to replace the University's outmoded financial system with a new **financial enterprise system** that will provide better tools for financial management and better information for management decision-making; enhance data analysis capabilities; and provide greater support for organizational goals.

In addition, a new, transparent, and responsive **enterprise-wide budget model** supports the stated values of the institution, allows for long-term financial investments, and addresses the overhead needs of the University, while providing reliable, stable, and predictable incentives for sound financial planning and strong fiscal management.

Capital Planning: The University has embarked on a comprehensive review of its master plan and the capital planning process. This initiative includes:

Assessing the condition of facilities through a **comprehensive inspection** of the University's campus facilities and infrastructure portfolio.

Updating the University's **master plan** that will guide campus planning and development for the next 10 years.

Shared Services, Single-Enterprise Systems, and Best Practices: The University is a large,

complex organization—each academic unit has different needs, operates in different competitive environments, and responds to different external forces. At the same time, in order to compete with peer institutions, the University is working to provide shared or consolidated services where there are significant economies of scale or a critical mass of expertise required to provide effective services, or where emerging issues can be addressed effectively only by pooling resources across schools or units.

Managing Facilities: In 2006, the University completed focus group discussions with academic units, faculty, staff, and students and best-practice research in academic institutions, government agencies, and private enterprise. With that examination complete, the University is implementing critical changes to become a more customer-focused organization with a culture of accountability, delivering cost-effective, quality service to students, faculty, staff, and academic units.

Technology Planning: As one of the University's three most significant cost drivers (along with human resources and facilities), technology expenditures demand careful consideration and planning to enable the University to optimally position resources to take advantage of technological advances and meet evolving needs. Current efforts include:

The **OIT Pipeline**, a six-year information technology planning framework similar in scope and vision to the University's six-year capital plan. The goals of the plan include providing University leadership with the right information to make major information technology investment and prioritization decisions, aligning those decisions with University goals and strategies, leveraging existing technology more effectively, and delivering higher-quality solutions on time and more efficiently.

Sustainability and Environmental Impact: Sustainability efforts have been part of Uni-

2: Twin Cities Campus

versity planning for many years. Current commitments to building a sustainable institution include:

A **research and demonstration project** aimed at integrating sustainable practices and energy conservation across the full range of University activities.

Participation in the **Chicago Climate Exchange (CCX)**, a voluntary, legally binding multi-sector market for reducing and trading greenhouse gas emissions. The University is the fourth educational institution and the largest public research university to join CCX.

Participation of new construction and major building remodeling projects in **Xcel Energy's**

Energy Assets Program, which identifies energy efficiency opportunities.

Investigation of using oat hulls as **biomass fuel** at the Minneapolis campus heating plant.

Continued use of **E85** and **B20 fuels**. The University has become one of the largest users of E85 in the state and is now using B20 in its diesel vehicles.

Performance Measures

Performance measures that support the goal of "Exceptional Organization" are detailed on the following pages:

Financial Strength	
Endowment Assets	Pages 81-82
Annual Giving	Pages 83-84

Other Measures

The University's Metrics Steering Committee is considering the addition of other measures under the "Exceptional Organization" pillar. These include:

- Financial Resources
- Facilities Condition

- Service Quality
- Organizational Productivity
- Employee Engagement
- Improvement Processes
- Ethics and Compliance

Total Endowment Assets

<u>University of Minnesota Rank</u>			<i>This measure represents the market value of an institution's endowment assets as of June 30, including returns on investments but excluding investment fees and other withdrawals. Total endowment assets reported for the University of Minnesota include endowment assets of the University of Minnesota, University of Minnesota Foundation, and Minnesota Medical Foundation.</i>
	<u>Within Comparative Group</u>	<u>Among All Publics</u>	
This Year	2nd	4th	
Last Year	2nd	4th	
5 Years Ago	3rd	5th	

Analysis: The University maintained its 2nd place ranking within the comparative group on this measure, trailing only the University of Michigan. Among all public research universities, the University maintained its 4th place ranking (Table 2-32).

Over the past five years, while moving up one in the rankings, the University has been outpaced by the comparative group as a whole (Figures 2-29 and 2-30).

Conclusion: The University needs to place continued emphasis on increasing its endowment in order to support its aspirational goal. As a result of Board of Regents-approved changes in asset allocation guidelines and a new emphasis on alternative investment classes it is anticipated that the University's performance will continue to improve.

Table 2-32. Total endowment assets: U of M - Twin Cities and comparative group institutions (in thousands of dollars), 2006.

All Publics Rank	Comparative Group Rank	Institution	2006	1-Yr % Change	5-Yr % Change
1	1	University of Michigan - Ann Arbor	\$5,652,262	14.6%	62.9%
4	2	University of Minnesota - Twin Cities	2,224,308	13.0%	34.7%
5	3	Ohio State University - Columbus	1,996,839	15.7%	79.6%
7	4	University of Washington - Seattle	1,794,370	20.4%	93.4%

Annual Giving

University of Minnesota Rank		
	<u>Within Comparative Group</u>	<u>Among All Publics</u>
This Year	4 th	4 th
Last Year	3 rd	5 th
5 Years Ago	4 th	5 th

“Annual giving” includes contributions received during the fiscal year in cash, securities, company products, and other property from alumni, non-alumni, corporations, foundations, religious organizations, and other groups. Excluded are public funds, investment earnings held by the institution, and unfulfilled pledges.

Analysis: In 2006, the University ranked 4th within the comparative group on this measure and 4th among all public research universities.

The University’s annual giving has increased steadily since 2001 and has been on pace with the comparative group, as shown in Figure 2-30. Over the past five years, the University has increased its annual giving

totals by 16.6 percent, compared to the 19.4% increase of the comparative group (Table 2-35).

Conclusion: Continued emphasis on annual giving will provide the University with increased flexibility in funding its academic mission and making progress toward its aspirational goal.

Table 2-34. Annual giving: U of M - Twin Cities and comparative group institutions (in thousands of dollars), 2006.

All Publics Rank	Comparative Group Rank	Institution	2006	1-Yr % Change	5-Yr % Change
1	1	University of Wisconsin - Madison	\$326,000	-45.2%	11.5%
2	2	University of California - Los Angeles	320,000	13.7%	21.4%
3	3	University of Washington - Seattle	316,000	22.0%	36.3%
4	4	University of Minnesota - Twin Cities	267,000	0.6%	16.6%
5	5	University of Michigan - Ann Arbor	251,000	-0.1%	19.9%
7	6	University of California - Berkeley	246,000	23.7%	21.4%

University of Minnesota

Coordinate Campuses

Within the shared mission and values of the University of Minnesota are the distinctive contributions of the coordinate campuses in Duluth, Morris, Crookston, and Rochester. Each campus aims to pursue excellence while investing in well-differentiated strengths and strategic priorities that create unique added value for the University and the state.

Each campus in the University system has a responsibility, consistent with its history and mission, to move toward making the University one of the top three public research institutions in the world. The coordinate campuses are conducting a thorough evaluation of their missions, priorities, strengths, and future directions as part of this institutional commitment.

This evaluation is carefully examining the current status of the campus and its programs and determining where change is needed to address current trends and anticipate future needs.

Specifically, the coordinate campuses are:

- Evaluating background data about demographic, programmatic, and fiscal issues facing the campus.

- Addressing enrollment issues and associated financial considerations.
- Identifying ways to partner with the other campuses and with Twin Cities campus colleges and units to leverage complementary strengths and identify efficiencies.
- Establishing a financial and academic accountability framework under which the campus will operate.
- Developing operating assumptions that lead to successful implementation of goals.
- Developing measures by which progress toward goals will be assessed.

The coordinate campuses are in the process of developing these strategic plans for further review by the University and their various constituencies.

The sections which follow provide current overviews of the coordinate campuses and their performance on key measures.

3: University of Minnesota Duluth

The University of Minnesota Duluth (UMD) serves northeastern Minnesota, the state, and the nation as a medium-sized, broad-based university dedicated to excellence in all its programs and operations. As a university community in which knowledge is sought as well as taught, its faculty recognize the importance of scholarship and service, the intrinsic value of research, and the significance of a primary commitment to quality instruction.

Undergraduate students can choose from 12 bachelor's degrees in 75 majors. In addition to

a two-year program at the University's School of Medicine and a four-year College of Pharmacy program, UMD offers graduate programs in 19 fields and six cooperative programs offered through the Twin Cities campus. Providing an alternative to large research universities and small liberal arts colleges, UMD attracts students looking for a personalized learning experience on a medium-sized campus of a major university. The campus is set on 244 acres overlooking Lake Superior.

3: Duluth Campus

Central to UMD's mission is high-quality teaching nurtured by the research and artistic efforts of its faculty. This undergraduate focus is not at the exclusion of graduate programs, but with the keen expectation that UMD's selected graduate and professional programs will support its mission and the undergraduate learning experience. Further, UMD acknowledges its Sea Grant designation and obligations to the history of the land grant university. UMD values and provides an inclusive, diverse community, with special emphasis on American Indian education.

UMD's programmatic focus is on the core liberal arts and sciences, maintaining a strong commitment to professional programs in the sciences and engineering, the arts, business, education, and medicine. Future development includes strengthening the core liberal arts and sciences, K-12 professional development in education, and strengthened relationships with regional and Iron Range community colleges.

Ultimately, UMD's challenge is to provide innovative solutions to the issues challenging the future of northeastern Minnesota, to make a difference in the lives of people in the state and elsewhere, and to contribute meaningfully to quality of life through improving public policy and finding solutions to the problems that impact people's lives. To do these things, UMD is providing:

Exceptional undergraduate education by building on current academic program strengths and considering selected new programs. To improve the quality of the undergraduate experience and continue improved retention and graduation rates, UMD is:

- Continuing to assess strengths and weaknesses in academic advising programs in order to implement best practices leading to increased retention and student satisfaction.

- Nurturing quality teaching and continuing to emphasize undergraduate research and scholarly effort.
- Adding facilities for classrooms, laboratories, and offices to meet increased enrollment demand.
- Fully integrating ePortfolio and implementing the online Graduation Planner to assist students with degree planning.
- Strengthening faculty engagement with students by increasing funding for smaller freshman classes.
- Continuing efforts to recruit and retain more honors students.
- Increasing student participation in study abroad experiences and developing a plan for managed growth of study abroad programs.
- Engaging parents as partners in recruitment and retention efforts.
- Addressing the issue of under-prepared students in freshman-level courses.

Exceptional graduate education by taking steps to recruit excellent graduate students and to increase enrollment in under-enrolled graduate programs. These steps include:

- Establishing "best size" enrollment goals for each graduate program.
- Developing program-specific recruitment activities.
- Launching a campaign to publicize UMD graduate education in general.
- Increasing graduate teaching and research assistant stipends to be competitive with those at comparable institutions, and to develop new sources for external and private funding for scholarships and fellowships.

3: Duluth Campus

- Developing and supporting new graduate degrees, such as the Ed.D. and a multi-campus Ph.D. program in Integrated Biosciences.
- Increasing the number of University of Minnesota Graduate School faculty and increasing the number of UMD faculty serving as advisors to doctoral students.
- Recruiting and retaining more students, faculty, and staff from underrepresented groups, with special emphasis on Native American students, international students, and non-native English speakers.
- Developing colloquia that enhance cultural competence among students, faculty, and staff.
- Strengthening its relationships with the tribal colleges to facilitate partnerships and student recruitment and off-campus degree delivery. Finally, capital funding will be requested to create an American Indian Learning Resource Center.

An exceptional organization, including increased availability and use of technology to serve students and to support the research enterprise. Plans are in place to upgrade the campus data network and computer systems, and to develop high-technology classrooms in the Labovitz School of Business and Economics building. Faculty training in the use of technology in the classroom continues with the 10th round of Tech Camp, a week-long hands-on program designed to enhance the technology skills of faculty. To date, approximately 180 faculty have benefited from this experience. UMD proposes to enhance student learning, research, and writing by creating a state-of-the-art information commons to combine library resources, technology, and student services.

Exceptional innovation through research and partnerships. UMD will continue to focus on

those areas for which the campus holds a national reputation and/or satisfies regional need, while at the same time selectively developing new areas of research, scholarship, and artistic activity. Areas of research emphasis include:

- Water resources (Center for Water and Environment, the Large Lakes Observatory, physical and biological sciences in the College of Science and Engineering)
- American Indian research and education (College of Education and Human Service Professions, College of Liberal Arts)
- Interdisciplinary programs in biosciences (College of Science and Engineering along with Duluth Medical School and College of Pharmacy)

UMD will work to facilitate the active participation of UMD faculty and staff in presidential initiatives and other system programs. UMD faculty and research staff will also be encouraged to become part of a system-wide research expertise database and to serve on University research committees. UMD will also work to secure appropriate recognition for faculty achievements in research and scholarship and seek to host more national and international conferences, workshops, and seminars.

UMD will continue to service the region and the state in the area of economic development (Natural Resource Research Institute, Center for Economic Development and Bureau of Business and Economic Research). Faculty hiring will be encouraged in areas that overlap UMD strengths and additional resources should be provided to those productive areas. Faced with a decline in federal research dollars, UMD seeks to develop alternate funding sources for research and creative activities.

UMD has a long and rich history of partnering with public and private organizations to serve the campus and the state. One of the key part-

3: Duluth Campus

nerships is with school districts and other PreK-12 organizations and educators. The campus is currently collaborating with local school districts to enhance and coordinate professional development for teachers, and is evaluating and redesigning its teacher preparation programs. In partnership with tribal and community colleges UMD is expanding its Pre-K-12 initiatives by developing alternative teacher education models to serve Native American populations.

Students

Figure 3-1 and Table 3-1 provide trend data for average high school rank percentile and high school rank of new, entering freshmen for 1997-2006.

In 2006, the average high school rank percentile and the percentage of new entering freshmen at the top 10 percent of their high school class increased over the previous year. Both of these measures have remained relatively flat over the last decade. These data reflect UMD's efforts to maintain academic preparation standards of entering students while providing access in accordance with its public institution mission.

Figure 3-2 shows that the average ACT score of new, entering freshmen at UMD also has remained flat, decreasing slightly from 23.2 in 1997 to 23.1 in 2006.

During the same period, UMD has maintained consistent entrance requirements while gradually increasing new high school student enrollment from 1,794 in 1997 to 2,315 in 2006.

Figure 3-1. Average high school rank percentile of new, entering freshmen, University of Minnesota Duluth, 1997 – 2006.

Source: Office of Institutional Research, University of Minnesota.

Diversity

UMD has placed a high priority on diversity and creating an environment that is open, accepting, and just. To this end, one key strategy is to increase the diversity of the campus

community. Although 2005 and 2006 showed a decrease in the percentage of students of color, over the past decade the campus overall has gained in the number of students of color.

Figure 3-3. Percentage of entering freshmen of color, University of Minnesota Duluth, fall 1997-2006.

Retention and Graduation Rates

Retention Rates: Figure 3-4 shows first-, second- and third-year student retention rates for students matriculating during 1996-2005. All three rates improved over the decade, with second- and third-year rates reaching new highs in the last reporting period.

Figure 3-5 compares retention rates of students of color for 1996-2005. First- and second-year retention declined slightly over the previous

year, while third-year retention increased by 4.7 percentage points. However, all students-of-color retention rates are higher than they were for those who matriculated in 1996. Second-year rates for students of color showed the most improvement over the decade (15.0 percentage points) followed by third-year rates (13.5 percentage points), and first-year rates (5.6 percentage points).

Figure 3-4. First-, second-, and third-year retention rates (percentage) for first-time, full-time new entering students, by year of matriculation, University of Minnesota Duluth, 1996-2005.

Source: University of Minnesota 2007 NHS Student Graduation/Retention Report

3: Duluth Campus

Figure 3-5. University of Minnesota Duluth first-, second-, and third-year retention rates (percentage) for students of color, 1996 – 2005.

Source: University of Minnesota 2007 NHS Student Graduation/Retention Report

Graduation Rates: Figure 3-6 shows four-, five-, and six-year graduation rates for students matriculating in 1993-2002. While four- and five-year graduation rates declined slightly from the previous year, and six-year rate improved, all rates improved markedly over the decade. Four-year rates improved 4.1 percentage points, five-year rates improved 5.4 percentage points, and six-year rates improved 6.3 percentage points.

For students of color, four- and five-year graduation rates improved significantly from the previous year (3.1 percentage points and 11.8 percentage points, respectively), as shown in Figure 3-7, while the six-year rate stayed the same. Over the decade, four- and five-year rates improved, while the six-year graduation rate was slightly lower.

UMD has established four-, five-, and six-year graduation rate goals for 2012 of 40 percent, 60 percent, and 65 percent, respectively.

Figure 3-6. 4-, 5-, and 6-year graduation rates, University of Minnesota Duluth, 1993-2002.

Source: University of Minnesota 2007 NHS Student Graduation/Retention Report

Note: Rates include students who transferred from one University campus to another and graduated (e.g., a student who matriculated at Duluth and graduated from the Twin Cities is counted as a Duluth graduate). The University also reports graduation rates to a national database (IPEDS); it includes only students who matriculated at and graduated from the same campus; these rates are somewhat lower than those shown above.

3: Duluth Campus

 Note: See note for Figure 3-6 above.

Student Satisfaction

The University has placed increased emphasis on improving the student experience. The Student Experiences Survey has been administered every other year since 1997 to measure results.

Recent results reflect a number of UMD priorities. The campus’s attempt to diversify its community and provide support for students of color has been met with an increase of general satisfaction from students of color. The campus also has made substantial improvements in its physical environment with the addition of new buildings and upgraded classrooms.

While undergraduate and graduate students show increased satisfaction with the quality of

classrooms, the overall physical environment and the availability of places to study show modest declines. This may be due to the temporary disruption caused by construction.

Also, after a sharp dip in satisfaction regarding the cost of attendance in 2003 (due to significant budget cuts that year by the Minnesota Legislature), satisfaction has increased the past two years on this measure.

Figure 3-8 summarizes undergraduate student responses in the 10 survey areas. Figure 3-9 shows findings from the graduate student survey.

Faculty Salary and Compensation

The American Association of University Professors (AAUP) conducts annual salary and compensation nationwide surveys of full-time instructional faculty (excluding medical school faculty). UMD faculty salary and compensation data reported below do not reflect UEA bargaining unit settlement of July 2007. The data in Tables 3.3 and 3.4 are presented primarily to show changes in the comparative group data.

Comparing salaries and compensation across institutions and campuses, however, is inherently imperfect because they differ in many ways, e.g., mission, public vs. private, size, mix of disciplines, etc. Cost-of-living, tax burden, and variations in fringe benefits only add to the imperfection.

In addition, it is important to emphasize that changes in average salary reflect not only salary increases for continuing faculty but also are influenced by retirements, promotions, and new hires. Thus, percentage changes will be different than those stipulated in an annual salary plan. This is true for all campuses nationwide. These differences will vary from year to year, and they can be very significant when the cohort sizes are relatively small.

Average salary and compensation for UMD faculty are shown relative to the UMD comparative group institutions in Tables 3-3 – 3-7.

Medical School and College of Pharmacy faculty are excluded from Duluth salary and compensation figures.

Faculty Diversity

Figure 3-10 shows the percentage of female tenured/tenure track faculty and other faculty for the period 1997-2006. While the percentage of non-tenure track female faculty has remained relatively constant, the percentage of tenure and tenure-track faculty has increased

over 7 percent during the decade.

Figure 3-11 shows the percentage of tenured/tenure track faculty of color and other faculty of color for the same period. The number of faculty of color at UMD has more than doubled since 1997.

Figure 3-10. Percentage of female faculty at University of Minnesota Duluth, 1997-2006.

Source: Office of Institutional Research, University of Minnesota Planning Data.

Figure 3-11. Percentage of faculty of color at University of Minnesota Duluth, 1997-2006.

Source: Office of Institutional Research, University of Minnesota Planning Data.

3: Duluth Campus

Staff Diversity

In 2006, the University of Minnesota Duluth had 1,500 staff in the Administrative, Professional, and Civil Service/Bargaining Unit (CS/BU) classifications. Of these, 58.4 percent were female, approximately the same percentage as in 1996.

Figures 3-12 and 3-13 show the percentage of female staff and staff of color, respectively,

during the period 1997-2006 for each of the three staff classifications.

Between 1997 and 2006, the number of staff of color at UMD decreased from 45 (4.7 percent) to 43 (4.0 percent). In 2006, 2 percent of UMD's staff members were American Indian, the highest percentage of any University of Minnesota campus.

Figure 3-12. Percentage of female staff employees, University of Minnesota Duluth, 1997-2006.

4: University of Minnesota Morris

The mission of the University of Minnesota Morris is to provide an undergraduate liberal arts education of uncompromising rigor to students from around the region, the nation, and the world. This tightly focused mission as a public honors college has been at the core of the Morris campus since it opened its doors in 1960.

It is UMM's vision to be the best public liberal arts college in America. UMM values students who exhibit high academic potential and high motivation, and who are hard working and self-starters; faculty who excel as undergraduate teachers and successfully pursue a serious scholarly agenda, with measurable results; and staff who understand their important role in

the educational process and do their work with prideful excellence.

UMM's culture is characterized by an unwavering commitment to the liberal arts and to undergraduate learning and teaching, significant diversity (especially recognizing Native American heritage), the thoughtful integration of the curricular, co-curricular and extracurricular aspects of the student experience, and service to the community. The UMM experience requires a faculty dedicated to excellent classroom teaching and significant scholarship, and a curriculum traditional in its basic shape, but innovative in many of its particulars.

4: Morris Campus

As a public liberal arts college, UMM is committed to offering access to students from all economic, social, and cultural backgrounds. UMM is deeply connected to its region and its people. UMM's students, faculty, and staff must reflect the diversity of the public in its region, state, and nation. UMM will maintain and enhance its national status even as it strengthens its deep regional links.

UMM's strategic plan builds on its national reputation as a nationally ranked public liberal arts college and as a leader in environmental and sustainability issues. UMM provides an undergraduate liberal arts education of uncompromising rigor for a diverse student body. UMM is committed to outstanding teaching and learning, research, genuine outreach, engagement, and diversity. UMM's residential academic setting fosters authentic relationships, and the University serves as an educational and cultural resource for the region, nation, and world. A personalized educational experience prepares graduates to be global citizens who are inter-culturally competent, civically engaged, and effective stewards of their environments.

The student-centered goals of the UMM strategic plan build on the exceptionally high participation rates and success of students in: study abroad, research and creative activities (including publications and presentations), service learning, civic engagement, leadership experiences, co-curricular activities, and graduate and professional study.

UMM will build on the strengths articulated above and to position itself in the top tier of national liberal arts colleges. To be successful in reaching this vision and ensuring relevance in the 21st century, UMM will pursue:

Exceptional undergraduate education by enhancing academic programming and student support, as well as by investing in recruitment

and marketing, increased scholarship funding, and improved retention. UMM will:

- Develop a cohesive, yearlong First Year Experience.
- Create the Academic Center for Enrichment to better align services and provide opportunities for all students to participate in activities to enrich academics, research, and outreach in a personally engaging community environment.
- Increase our system-leading participation rates in study abroad and undergraduate research.
- Enhance and document participation in service learning and leadership opportunities.
- Expand the Undergraduate Research Symposium and the Undergraduate Research Opportunities Program and improve the Morris Academic Partner and Morris Student Administrative Fellowship program.
- Increase student participation and success in national scholarship competitions.
- Increase available scholarship and research funds to attract high-ability students through targeted fundraising efforts.
- Build upon its diverse student population and prepare for changing student demographics in Minnesota.
- Continue its legacy of high enrollment (highest in the system) of American Indian students and ensure adequate support to retain and graduate these students.
- Increase the percentage of students from outside Minnesota from 13 to 25 percent, including more international students.

4: Morris Campus

- Increase first-year retention from 86 to 90 percent, and second-year retention from 77 to 85 percent.
- Increase the four-year graduation rate from 40 to 60 percent, the five-year rate from 56 to 75 percent, and the six-year rate from 57 to 80 percent.

Exceptional faculty and staff. The Morris campus has extraordinarily gifted and dedicated faculty and staff. To build upon this tradition of excellence, UMM's goals are to:

- Provide competitive compensation.
- Increase support for faculty research and travel and encourage collaborative activity comparable to that of other top-tier liberal arts institutions.
- Enhance recruitment and retention efforts by exploring joint appointments and other creative approaches to attract the highest caliber faculty.
- Provide formal mentoring and professional development programs for all faculty and staff to enhance effectiveness and to help new faculty strengthen their teaching skills.

An exceptional organization that enhances the student experience and better aligns faculty and staff resources with student enrollment and program needs. This will result in better academic and student services and greater efficiency and resource utilization. UMM also is planning new investments in state-of-the-art, flexible-use facilities to enhance student recruitment, facilitate community building and co-curricular activities, and better connect the campus with the external community. To achieve these goals UMM will:

- Update the Campus Master Plan, including environmental and technological master plans.

- Update residential life facilities to meet student expectations.
- Place units that interact with external audiences in a renovated Community Services Building.
- Renovate facilities including the dining, conferencing, and library facilities to meet the needs of students and improve their experience.
- Offer facilities and grounds comparable to top-tier national liberal arts colleges.
- Complete the Humanities/Fine Arts complex to support our commitment as a regional cultural center.

Exceptional innovation, including the development of academic infrastructure to further advance the honors experience; increased support for faculty research, scholarship, and creative endeavor; and partnerships with other academic institutions, government and research organizations. Specifically, UMM will:

- Create the Academic Center for Enrichment to provide enhanced opportunities to build on UMM's core values and increase visibility, participation, and program coordination.
- Initiate an academic program to develop student leadership skills and formally recognize their accomplishments.
- Add a digital institutional repository to achieve greater visibility for and national recognition of faculty research efforts and successes.
- Encourage and facilitate greater faculty participation and success in external scholarly awards, honors, and grants.
- Leverage UMM's green campus initiatives and energy research platform to become a model energy-self-sufficient campus through wind generation, bio-

4: Morris Campus

mass heating and cooling, and expanded use of 'green' vehicles.

- Aggressively pursue nontraditional revenue sources such as the wind farm initiative to generate energy for resale.
- Provide innovative solutions to the economic, demographic, and energy challenges of West Central Minnesota.
- Build on relationships with universities in China, South Korea, Japan, and other nations.
- Develop and expand partnerships with other campuses in the University system and entities such as the West Central Research and Outreach Center and the Office of Public Engagement.
- Enhance summer and break programs such as Summer Scholars, Henjum Institute for Creative Study, and Symposium on Small Towns to increase facility use and serve the West Central Minnesota region.

- Incorporate civic engagement into teaching, learning, and research activities by providing opportunities for students to engage with regional communities through programs such as the existing K-12 Tutoring, Reading, Enabling Children (TREC) program.
- Enhance opportunities for lifelong learning for area residents.

Students

Figures 4-1, 4-2, and 4-3 and Tables 4-1 and 4-2 provide detailed information on the demographics of UMM students over the past decade. Recent declines in new entering student profiles are being addressed in UMM's new strategic planning efforts.

The college's commitment to diversity, recognizing its location in a rural, small town in a region of racial, ethnic, and religious homogeneity, is reflected in a student body that is 17 percent students of color. Over 21 percent of 2006 freshmen were students of color.

Retention and Graduation Rates

Figures 4-4 and 4-5 show UMM’s retention rates over the past decade. Second- and third-year retention rates at Morris rose to new highs (4 percentage points and 5.1 percentage points over the previous year, respectively) while first-year retention was down 3 percentage points. Retention rates for students of color continue to lag those of all students, although second- and third-year rates have shown marked improvement.

Figures 4-6 and 4-7 provide information on graduation rates for students matriculating dur-

ing 1993-2002. Four-, five-, and six-year graduation rates at UMM have traditionally been high on a national scale for public institutions. However, the trend over the past eight years has been generally flat, although showing slight improvement in the last several years. Graduation rates for students of color have declined during the period.

UMM has set four-, five-, and six-year graduation rate goals for 2012 of 60 percent, 75 percent, and 80 percent, respectively.

Figure 4-4. First-, second-, and third-year retention rates (percentage) for first-time, full-time new entering students, by year of matriculation, University of Minnesota Morris, 1996-2005.

Source: University of Minnesota 2007 NHS Student Graduation/Retention Report

Figure 4-5. University of Minnesota Morris first-, second-, and third-year retention rates (percentage) for students of color, 1996 – 2005.

4: Morris Campus

Figure 4-6. 4-, 5-, and 6-year graduation rates, University of Minnesota Morris, 1993-2002.

Source: University of Minnesota 2007 NHS Student Graduation/Retention Report
 Note: Rates include students who transferred from one University campus to another and graduated (e.g., a student who matriculated at Morris and graduated from the Twin Cities is counted as a Morris graduate). The University also reports graduation rates to a national database (IPEDS); it includes only students who matriculated at and graduated from the same campus; these rates are somewhat lower than those shown above.

Figure 4-7. 4-, 5-, and 6-year student of color graduation rates, University of Minnesota Morris, 1993-2002.

Source: University of Minnesota 2007 NHS Student Graduation/Retention Report

Student Satisfaction

Over the past 10 years the University has placed increased emphasis on improving the student experience. A variety of programs have been launched to achieve this objective, and the Student Experiences Survey has been administered periodically since 1997 to measure results. UMM students report the highest level of satisfaction of any within the University of Minnesota system.

Figure 4-8 summarizes the responses in 10 key areas at UMM. Major gains were achieved in overall satisfaction, classroom quality, availability of places to study, overall physical environment, and cost of attendance. The level of overall satisfaction among students of color was virtually unchanged as was all students' satisfaction with academic quality.

Faculty Salary and Compensation

The American Association of University Professors (AAUP) conducts annual salary and compensation nationwide surveys of full-time instructional faculty (excluding medical school faculty).

Comparing salaries and compensation across institutions and campuses, however, is inherently imperfect because they differ in many ways, e.g., mission, public vs. private, size, mix of disciplines, etc. Cost-of-living, tax burden, and variations in fringe benefits only add to the imperfection.

In addition, it is important to emphasize that changes in average salary reflect not only salary increases for continuing faculty but also are influenced by retirements, promotions, and

new hires. Thus, percentage changes will be different than those stipulated in an annual salary plan. This is true for all campuses nationwide. These differences will vary from year to year, and they can be very significant when the cohort sizes are relatively small.

UMM’s comparative group of 13 public and private institutions nationwide is representative of the kinds of campuses with which UMM competes in recruiting and retaining faculty.

As Tables 4-3 and 4-4 indicate, UMM faculty salaries at all levels are below the average of its comparative group, while compensation is above the comparative group average at all levels except full professor.

Table 4-3. Average faculty salary for University of Minnesota Morris and comparative group institutions, 2004-05 – 2006-07.

Average Salary

Faculty and Staff Diversity

Between 1997 and 2006, the total faculty at UMM increased by 14; 13 of these were female faculty positions, mostly in non-tenured positions. Figure 4-9 shows the percentage of female tenured/tenure track faculty and other faculty for the period 1997-2006.

Figure 4-10 shows the percentage of tenured/tenure track faculty of color and other faculty of color for the same period.

Figure 4-11 shows the ethnic and racial diversity of the UMM faculty.

Figures 4-12 and 4-13 show the percentage of female staff and staff of color, respectively,

during the period 1997-2006 for each of the three staff classifications.

In 2006, the University of Minnesota Morris had 179 staff in the Administrative, Professional, and Civil Service/Bargaining Unit (CS/BU) classifications. Of these, 60.3 percent were female, the highest percentage of any University of Minnesota campus. This percentage increased from 57.5 percent in 1997.

The number of staff of color was about the same in 2006 as in 1997, although the percentage dropped slightly.

5: University of Minnesota, Crookston

The University of Minnesota, Crookston (UMC), established in 1965 on the foundation of the Northwest School of Agriculture, provides its unique contribution through applied, career-oriented learning programs that combine theory, practice and experimentation in a technologically rich environment.

The Crookston campus delivers a personal and exceptional hands-on educational experience where students become leaders; innovate with technology; explore through learning and research and earn a University of Minnesota degree. Graduates secure a quality career and are successful in competing in the global marketplace. The campus provides 26 undergraduate degree programs and 50 concentrations, including new and enhanced programs in agronomy, biology, horticulture and equine science

and animal science with pre-veterinary options. Unique programs include aviation and natural resources law enforcement. The highly successful business program continues to be in demand. More than \$1 million in merit and competitive scholarships are awarded annually. New facilities include a new student center and modern apartment-style living and learning area named Centennial Hall.

NOTE: As part of its strategic planning process, UMC, in collaboration with the University's Office of Institutional Research, has identified a new group of peer institutions on which to benchmark its performance: the University of Wisconsin-Stout, Northern State University, Dakota State University, Delaware Valley College, Bemidji State University.

UMC has established a vision for its future as an innovative, competitive, and culturally transformed campus known for its exceptional undergraduate experience and for the unparalleled value it creates for the region. The campus strives to be distinctive, and at the same time, firmly aligned with the University's core purposes. UMC will be known for graduates that are known for superior technology and communication skills, strong leadership potential, and the ability not just to get a job, but to create jobs for the region and the state.

UMC will accomplish these goals through:

Exceptional undergraduate education.

UMC is working to calculate how many students its physical plant can accommodate and develop a time-certain plan to reach that capacity. Specific, program-by-program goals and strategies to increase new high school and advanced standing recruitment, year-to-year retention, and graduation rates will be developed.

UMC must expand its choice of degree programs to attract more students and retain them for four years. New programs should: be mission driven, meet demonstrable student and employer demand, leverage existing strengths and capacities, be based on solid cost-benefit estimates, and have an exit strategy.

Recruiting more international students presents an opportunity for the Crookston campus to simultaneously attract a larger and more diverse student body, and potentially contribute to the region's economic development by attracting talented students and faculty from around the world. UMC will also focus on preparing all students to succeed in a global marketplace.

A unique commitment to experiential learning differentiates UMC from its peers by adding quality to the curriculum and value to the un-

dergraduate experience. UMC students gain valuable real world experience to complement experiential learning opportunities embedded in the regular curriculum. Internship and service learning programs are strong and should remain so. A campus-wide emphasis on undergraduate research is consistent with the University's research goal and the campus commitment to experiential learning. It also underscores the need to increase support for faculty research. Interdisciplinary, collaborative research of the kind envisioned by the Center for Sustainable Development is a campus priority.

An exceptional organization. Moving forward requires strong and steady leadership, consistency in both message and action, and long-term commitment to core values. Broad dialogue is necessary to ensure a shared expectation for change. In its traditional service area of nearby counties, many perceive UMC as offering a limited portfolio of technical programs, consistent with the mission of the campus 20 years ago. Strategic positioning offers an ideal opportunity for UMC to define its identity and craft a message for the future that firmly aligns UMC with the University system brand, Driven to Discover™.

The University of Minnesota system is rightly known as the economic engine of the state, but personal income in northwestern counties lags behind the metro area and the gap is growing. As the system's most important and visible presence in the region, the Crookston campus should resolve to be and be seen as an economic engine for northwest Minnesota. UMC should strengthen its presence as the regional hub of activity for creative talent of all kinds—teachers and scientists, entrepreneurs and business builders, social service providers and community leaders.

5: Crookston Campus

The University of Minnesota, Crookston seeks to become northwestern Minnesota’s preferred provider of high-value, polytechnic undergraduate education that prepares diverse and deserving learners for rewarding careers and better lives.

UMC strives to enhance the well-being of the region by offering outcome-oriented, teaching-focused, polytechnic professional programs that prepare graduates for career success and for community leadership in a multi-racial and multicultural world; deploy innovative technology-based formats and delivery systems so all ambitious and intellectually curious students can acquire a University of Minnesota education; generate and preserve knowledge, understanding, and creativity by conducting high-quality applied research and scholarly work with an emphasis on the needs of northwestern Minnesota, but with potential application across the state, nation, and world; and

extend, exchange, and apply knowledge that enriches society and solves problems.

Students

Figures 5-1 – 5-3 and Tables 5-1 and 5-2 provide detailed information on UMC student demographics over the past decade.

The college has made progress in terms of the profile of new entering students in the past decade. The average high school class rank of new, entering freshmen of 56.9 percent in 2006 and average ACT composite score of 20.9, while lower than the previous year, are indicative of that improvement.

Progress in improving the diversity of the student population is also noteworthy. In fall 2006, 7.4 percent of new freshmen were students of color, down slightly from last year’s record high.

Retention and Graduation Rates

Figures 5-4 and 5-5 show UMC’s retention rates over the past decade. First-year retention rates increased nearly 4 percentage points from the previous year and second- and third-year rates improved slightly. Because of the small number of UMC students of color, retention rates fluctuate widely from year to year and meaningful comparisons cannot be made.

Figure 5-6 shows the graduation rate trends for Crookston students matriculating during 1994 to 2002. All rates declined over the period,

although four- and five-year graduation rates improved in the most recent reporting period.

UMC is focusing on addressing the underlying factors that will ultimately improve campus retention and graduation rates. As existing academic programs are strengthened, and student life programming and facilities are improved, both retention and graduation rates are expected to increase.

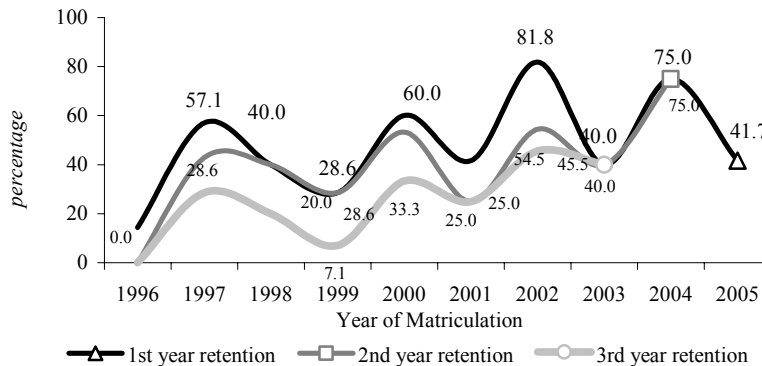

UMC has established four-, five-, and six-year graduation rate goals for 2012 of 40 percent, 50 percent, and 55 percent, respectively.

Figure 5-4. First-, second-, and third-year retention rates (percentage) for first-time, full-time new entering students, by year of matriculation, University of Minnesota, Crookston, 1996-2005.

5: Crookston Campus

Figure 5-6. 4-, 5-, and 6-year graduation rates, University of Minnesota, Crookston, 1994-2002.

Source: University of Minnesota 2007 NHS Student Graduation/Retention Report
 Note: Rates include students who transferred from one University campus to another and graduated (e.g., a student who matriculated at Crookston and graduated from Duluth is counted as a Crookston graduate). The University also reports graduation rates to a national database (IPEDS); it includes only students who matriculated at and graduated from the same campus; these rates are somewhat lower than those shown above.

Student Satisfaction

Over the past 10 years the University has placed increased emphasis on improving the student experience. A variety of programs have been launched to achieve this objective, and the Student Experiences Survey has been administered periodically since 1997 to measure results.

Figure 5-7 summarizes the responses in 10 key areas at UMC. In general, the ratings reflect a high degree of satisfaction by students with their educational experience. A general upward trend is observable with the exception of cost and physical environment.

Figure 5-7. Undergraduate student experiences survey results, University of Minnesota, Crookston, 1997-2007.

Faculty Salary and Compensation

Comparisons based on American Association of University Professors (AAUP) annual nationwide surveys cover full-time instructional faculty and exclude medical school faculty. The Crookston campus’s salary and compensation comparative group of 10 institutions nationwide (see Table 5-5) is representative of the kinds of campuses with which UMC competes in recruiting and retaining faculty.

However, comparing salaries and compensation across campuses is inherently imperfect because campuses differ in many ways, e.g., mission, public vs. private, size, mix of disciplines, etc. Cost-of-living, tax burden, and variations in fringe benefits only add to the imperfection.

In addition, it is important to emphasize that changes in average salary reflect not only salary increases for continuing faculty but also

are influenced by retirements, promotions, and new hires. Thus, percentage changes will be different than those stipulated in an annual salary plan. This is true for all campuses nationwide. These differences will vary from year to year, and they can be very significant when the cohort sizes are relatively small.

As shown in Tables 5-3 – 5-7, UMC outperformed its comparative group institutions in average salaries and compensation for faculty at the professor, associate professor, and assistant professor levels. For full professors, UMC faculty rank 1st in average salary and average compensation. At the associate professor level, UMC faculty rank 3rd in average salary and 1st in average compensation. At the assistant professor level, UMC faculty rank 2nd in average salary and 1st in average compensation.

Table 5-3. Average faculty salary for University of Minnesota, Crookston and comparative group institutions, 2004-05 to 2006-07.

Faculty and Staff Diversity

UMC aspires to enrich further the life of the campus by attracting and retaining a more diverse faculty and staff. The campus has made deliberate attempts to increase the number of faculty and staff of color, and continues to work to overcome potential barriers related to its rural geographic location.

Figure 5-8 shows the percentage of female tenured/tenure track faculty and other faculty for the period 1997-2006.

Figure 5-9 shows the percentage of tenured/tenure track faculty of color and other faculty of color for the same period.

Figures 5-10 and 5-11 show the percentage of female staff and staff of color, respectively, during the period 1997-2006 for each of the three staff classifications.

Note: The Crookston campus has only 54 faculty members, considerably fewer than other

5: Crookston Campus

University of Minnesota campuses. Adding or subtracting even one person among female faculty or faculty of color from year to year can cause wide year-to-year fluctuations.

6: University of Minnesota Rochester

The strategic direction for University of Minnesota Rochester (UMR) is to become a distinctive campus of the University system, providing quality academic programming, research, and public engagement with emphasis in health sciences, technology, and related fields. This future will be realized by focusing on the needs of southeastern Minnesota and the strengths of its resources, especially public-private partnerships and collaborations with the Mayo Clinic, IBM, and other health care and high technology industries.

UMR is uniquely positioned for expansion into a distinctive campus with its own facilities and faculty. Rochester is home to internationally recognized institutions including the Mayo Clinic, IBM, and more than 30 high technology businesses that contribute billions of dollars to the Minnesota economy in promising fields such as the biosciences and nanotechnology.

As the campus and academic programs are developed, public-private partnerships with these organizations will be sought to enhance opportunities for shared facilities and faculty. Innovative relationships of this type will enhance the depth and breadth of efforts to develop collaborative academic programming and leading-edge instructional delivery systems.

The strategic goals being undertaken by UMR support the University system's strategic goal, responding to regional and state constituent needs, developing strategic public-private education and research partnerships, effectively communicating the University's message, and accomplishing these outcomes in a financially responsible manner.

Exceptional undergraduate and graduate education, in part by selecting undergraduate, graduate, and professional academic degree

programs that closely match strengths and resources with the needs and resources of partners and students. Academic degree programs have been selected and are in various stages of development and implementation. For example, in fall 2006 the Master of Health Care Administration program was implemented, and in fall 2007 the Master of Occupational Therapy and Bachelor in Clinical Laboratory Science programs will be operational in Rochester.

The Center for Allied Health Programs has been established as a degree-granting unit of the University. This new unit is studying the potential for converting Bachelor of Applied Science programs in Respiratory Care and Radiation Therapy into Bachelor of Science degrees and has other innovative plans under development.

The Institute of Technology, and College of Biological Sciences on the Twin Cities campus, and UMR are considering proposing a similar, collaborative degree-granting unit for the areas of biomedical informatics and quantitative and computational studies in the life sciences, with a goal of establishing new academic programming in these areas by fall 2008.

These signature programs will rely heavily upon research and teaching partnerships with IBM, the Mayo Clinic, and the University's Hormel Institute. In addition, UMR is exploring academic partnerships, within and outside of the University system, that have the potential to provide liberal education electives at UMR.

Exceptional faculty, including both the faculty from the Twin Cities and Duluth campuses who have been and will continue to provide teaching and research services for UMR,

6: Rochester Campus

as well as joint resident faculty to be appointed from collaborating organizations. With system-level support from the University, plans are being developed for increasing the number of on-site faculty in Rochester as of fall 2007. It is expected that these faculty will serve in the health sciences and biotechnology areas. As additional academic programs and research initiatives are established, the number of Rochester-based faculty will also grow.

An exceptional organization including innovative organizational, financing, and administrative structures. A set of working principles describing the roles, responsibilities, and accountabilities of leaders, faculty, and staff from UMR, other University of Minnesota system campuses, and non-University partners has been developed and is under review by the UMR Executive Steering Committee.

It is also imperative to establish a financial model to support the growth of the campus. Thanks to collaborative initiatives, especially among the Greater Rochester Advocates for Universities and Colleges, community and political leaders, state legislative leaders, and the University, state funding has been secured to support initial growth in academic programs and facilities. UMR and system leaders will continue to review financial scenarios that reflect the direction of UMR growth, and develop comprehensive plans for obtaining additional short and long-term funding.

There are ongoing discussions with public and private organizations to explore opportunities for long-term shared space. As academic programming and research initiatives grow, UMR will continue to pursue opportunities for collaboration in the use of space for instruction and research.

The UMR Campus Master Plan Committee has begun discussions with community leaders representing the city, county, economic development board, Rochester Downtown Alliance, community action groups, and local busi-

nesses. Information from these discussions will help guide the development and selection of the permanent UMR campus site.

Exceptional innovation through research and partnerships. One of the most critical, powerful, and dramatic trends in southeastern Minnesota is the growth in investments in bioscience and technology collaborations. This growth represents a confluence of efforts, primarily among the University, Mayo Clinic, and IBM. Business leaders are working to define ways to capture and build upon state-of-the-art technologies in Rochester, and they envision the University having a major role to play in advancing the education, science, and application of these initiatives.

By its very nature, UMR will break new ground in establishing research, education, business, and technology transfer partnerships. To facilitate these relationships, the University's Rochester Academic and Corporate Relations Center (ACRC) has been established to identify high potential ventures and bring together action teams to focus on and accelerate efforts in a variety of technology and biosciences fields. By combining the Twin Cities campus and UMR units, the University is better able to provide coverage for the state with the Rochester-based relationship officer working primarily with businesses in southern Minnesota and the Twin Cities officers covering other parts of the state.

The University of Minnesota Rochester, through relationships with other universities and colleges, meets the higher education needs of southeastern Minnesota by providing and promoting academic programs, research, and outreach. In collaboration with the Minnesota State Colleges and Universities (MnSCU) system, UMR provides leadership for baccalaureate and graduate programs that reflect the University of Minnesota's tradition of excellence. UMR will be a distinctive University branch

6: Rochester Campus

known for programming in health sciences and technology.

As its mission, UMR provides a strong higher education foundation in health professions, technology, business, education, and social services; responds to the educational, economic, research, and cultural needs of southeastern Minnesota; and is establishing itself as the regional higher education institution of choice for students pursuing career preparation in selected health science and technology professions.

As a provision of the 2002 revised agreement between the University of Minnesota and MnSCU, UMR is responsible for providing academic leadership for all future upper-

division and post-baccalaureate graduate and professional degree programs in Rochester. New baccalaureate and graduate programs for the public higher education institutions are to be developed and operated by UMR or through contract with UMR.

UMR has built a well-defined scope of educational offerings at the baccalaureate and graduate levels, in response to the educational needs of southeastern Minnesota. Emphasis will continue to be given to development of programming in areas that relate directly to the region's economic vitality—health sciences and technology—including partnerships with the Mayo Clinic and IBM, and other area businesses and organizations.

UNIVERSITY OF MINNESOTA BOARD OF REGENTS

Board of Regents

November 9, 2007

Agenda Item: Strategic Positioning Update

review review/action action discussion

Presenters: President Robert H. Bruininks
Associate Vice President for Planning Robert B. Kvavik

Purpose:

policy background/context oversight strategic positioning

To provide the Board of Regents with an update on the University's efforts to develop a metrics and measurement framework in support of its strategic positioning goal to be one of the top three public research university systems.

Outline of Key Points/Policy Issues:

Background Information:

President Robert H. Bruininks initiated a comprehensive strategic positioning process in 2004. The President and Senior Vice President for Academic Affairs and Provost discussed University goals, vision, mission, and values related to strategic positioning with the Board of Regents in September, October, and November, 2004. On March 11, 2005, the Board unanimously endorsed the strategic positioning report, *University of Minnesota: Advancing the Public Good*, a report that articulated the goal of making the University one of the top three public research universities in the world within a decade. President Bruininks then presented his strategic positioning recommendations to the Board of Regents in a report titled, *Transforming the University of Minnesota*. These recommendations were endorsed by the Board in June, 2005, and provided a dynamic roadmap that was designed to lead the University of Minnesota into the future.

At their annual retreat that summer, the President presented the Board of Regents with a comprehensive implementation strategy, and presented "Strategic Positioning Implementation: Structure, Process, and Timetable" to the Board on September 9, 2005. Specific strategic positioning progress reports were then presented to the Board of Regents on the academic recommendations in March, 2006, and on the academic and administrative recommendations on July 12, 2006. Finally, the President presented a "Strategic Positioning Update" to the Board of Regents focused on progress made in each of the four pillars on March 9, 2007; the President also submitted a comprehensive strategic positioning report titled, "Transforming the U for the 21st Century," to the Board on September 7, 2007. 197
