

HEALTHY FOOD ACCESS

Southeast Minnesota Food Access Profile

Introduction

The Food Access Profile for Southeast Minnesota was conducted in December 2012 and was updated in March 2013. Similar datasets were compiled for five other regions in Minnesota by University of Minnesota Extension Educators as part of the statewide Community Transformation initiative for Healthy Eating. For more information on the Food Access Profiles and for the other regions' profiles, visit our website at z.umn.edu/rfap.

For more information, including school-and district-level data and copies of the Food Access Profile, contact Extension Educator Kelly Kunkel (kunke003@umn.edu, 507-389-6721).

Data Overview

Data were collected at the county level. Data sources are outlined in "Introduction to Regional Food Access Profiles," available at z.umn.edu/rfap. Definitions and explanations of individual variables are provided in this document. When available or calculable, state and regional totals or averages are included in each table.

Data are color-coded to provide a visual representation of the variation in food access across the region. This was done by dividing the 20 counties into 5 groups:

Group 1: The 4 highest values

Group 2: The next 4 highest values

Group 3: The next 4 highest values

Group 4: The next 4 highest values

Group 5: The 4 lowest values

Updated March 2013, revised August 2013. The Food Access Profile for Southeast Minnesota is supported by the Statewide Health Improvement Program, Minnesota Department of Health, and University of Minnesota Extension, and made possible with funding from the Centers for Disease Control and Prevention.

1. Socio-Demographic Data for Counties in Southeast Minnesota (2010)

County	Population	Population Density (people/sq mile)	% White	% Black/ African-American	% American Indian	% Asian/ Pacific Islander	% Two or More Races	% Hispanic / Latino	% Foreign Born
Blue Earth	64,013	85.6	92.8	2.7	0.3	2.0	1.6	2.5	3.7

Minnesota	6.1% (2011)	25.7% (2011)		245.0	48.2 (2007-09)

Notes and definitions

Adults are defined in this data as ≥ 20 years old

Obesity: An adult who has a body mass index of 30 or higher is considered obese

Diabetes and Obesity rates are *age-adjusted* percentages. According to the data source, “The age-adjusted percentage is an artificial estimate that minimizes the effects of different age distributions and allows comparisons between different populations. It represents what the crude percentage would have been in the study population if that population had the same age distribution as a standard population. For example, that is a population in which the age composition is known precisely as a result of a census.”

Low-Income Preschool Obesity: “Prevalence of obesity among children 2-4 years of age in households with income up to 200% of the poverty threshold based on family size. For children 2-4 years of age, obesity is defined as BMI-for-age > 95th percentile based on the 2000 Centers for Disease Control and Prevention’s (CDC) sex-specific growth charts.”

4. Food Access Data for Counties in Southeast Minnesota (2010)

	<i>% People with Low Access to Stores</i>	<i>% Low Income and Low Access to Stores</i>	<i>% Children (<18) with Low Access to Stores</i>	<i>% Seniors (65+) with Low Access to Stores</i>	<i>% Households with No Car and Low Access to Stores</i>
Blue Earth	34.9	16.4	5.8	2.9	2.0

Winona	15.2	3.6	3.2	2.2	1.5
Southeast Region	22.5%	6.1%			2.0%

Notes and definitions

Low Access to Stores: “Number of people in a county living more than 1 mile from a supermarket or large grocery store if in an urban area, or more than 10 miles from a supermarket or large grocery store if in a rural area.... Stores met the definition of a supermarket or large grocery store if they reported at least \$2 million in annual sales and contained all the major food departments found in a traditional supermarket, including fresh meat and poultry, dairy, dry and packaged foods, and frozen foods.”

Low Income: Up to 200% of the poverty threshold based on family size

No Car & Low Access to Stores: Percent of housing units in a county without a car and more than 1 mile from a supermarket or large grocery store.

5. Food Security and Assistance for Counties in Southeast Minnesota

	<i>% Food Insecurity (2010)</i>	<i>% Child Food Insecurity (2010)</i>	<i>% Students Eligible for Free or Reduced Lunch (2009)</i>
Blue Earth	11.8	15.3	35.0
Brown	9.7	16.7	32.9
Dodge	8.5	14.1	24.5
Faribault	10.7	18	42.4
Fillmore	10.8	17.4	35.9

Sibley	9.6	16.9	43.1
Steele	9.7	15	34.4
Wabasha	9.0	13.5	27.2
Waseca	9.6	15.2	33.5
Watsonwan	10.1	19.8	51.6
Winona	11.3	15.3	34.9
Minnesota	11.5%		

Notes and definitions

Food Insecurity: “Food-insecure households were unable, at times during the year, to provide adequate food for one or more household members because the household lacked money and other resources for food. For most food-insecure households, inadequacy was in quality and variety of foods; for about a third, amounts were also inadequate.”

6. Activity and Fitness for Counties in Southeast Minnesota

	% Adults Not Meeting Activity Guidelines (2009)	% Physically Inactive Adults (Age-Adjusted) (2009)	Recreation & Fitness Facilities (per 10,000 people) (2009)	ERS Natural Amenity Index (1999)
Blue Earth	23.7	22.1	0.8	2
Brown	24.7	25.0	3.1	2
Dodge	20.0	19.6	0.5	1
Faribault	25.2	22.8	0.7	2
Fillmore	23.2	21.7	0.0	2
Freeborn	23.3	21.5	0.6	2
Goodhue	19.1	18.1	1.5	3
Houston	20.5	19.1	1.1	3
Le Sueur	21.7	21.0	2.5	3
Martin	22.4	20.4	1.0	2
Mower	23.0	21.8	1.0	1
Nicollet	17.2	17.0	0.9	2
Olmsted	17.5	17.4	0.8	2
Rice	17.4	17.2	0.8	3
Sibley	24.3	23.1	1.3	2
Steele	21.8	21.2	0.8	2
Wabasha	23.8	22.3	2.3	3
Waseca	23.9	23.0	2.1	2
Watonwan	23.5	21.7	1.8	2
Winona	19.8	19.5	1.4	3

Notes and definitions

Activity Guidelines: “At least 150 minutes of moderate physical activity per week, or 75 minutes of vigorous activity per week, or an equivalent combination of moderate and vigorous physical activity.”

Physically Inactive: “A person is considered physically inactive if during the past month, other than a regular job, he or she did not participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise.”

Recreation & Fitness Facilities: “Establishments primarily engaged in operating fitness and recreational sports facilities featuring exercise and other active physical fitness conditioning or recreational sports activities, such as swimming, skating, or racquet sports.”

ERS Natural Amenity Index: “Index of natural amenities constructed by USDA’s Economic Research Service, ranging from 1 to 6, where 1=lowest amenity score and 6=highest amenity score. It is based on the premise that people are drawn to areas with varied topography; lakes, ponds, or oceanfront; warm, sunny winters; and temperate, low-humidity summers. The index measures a county’s natural amenities score as a standard deviation from the all-county mean value.”
