DULUTH--A film-epic about primitive peoples will be shown at 8 p.m. Wednesday, Jan. 27 in the UMD Science Auditorium.

"The Hunters" released by Contemporary Films, involves four African Bushmen and the object of their hunt, a giraffe.

Voted one of the 10 best non-theatrical films in 1958, "The Hunters" was lauded for its "humanity and artistry;" acclaimed "unforgettable near-poetry," . . . "a blend of science, history and art."

The 73-minute color movie was produced at the Film Study Center of Harvard University. It is being sponsored here by the UMD Geology Club.

Admission is 50 cents. The public is invited.
