Duluth --- Dr. William E. Parham, professor and chief of organic chemistry, University of Minnesota, Minneapolis will discuss "Carbenes" at a UMD faculty-student chemistry seminar at 3:30 p.m. Friday (Jan. 31) in Science 251.

Dr. Parham is a native of Texas and did his undergraduate studies at Southern Methodist University, Dallas. He received his Ph.D. degree in organic chemistry at the University of Illinois, Urbana.

His research interests have included the organic chemistry of sulfur compounds, heteracyclics, pharmaceuticals, and the mechanism of organic reactions.
