Lancaster, Wis.,

September 8 '41

Prof. Fred Haroldson
Excelsior, Minn.

Dear Mr. Haroldson: I am sending the
Minor Plum scions I promised.

The Minor is the very finest native plum
we know. Seems immune to ~~brown rot~~
brown rot and ripens late enough that
any circular infected fruit has dropped.
Its weakness is that it does not set fruit
regularly.

I am trying to find a fertilizer that
will help it to bear regularly

Yours Truly

Ralph A. Irwin

N4168

May 4, 1939

Mr. W. H. Alderman
Chief, Division of Horticulture
University Farm
St. Paul, Minnesota

Dear Mr. Alderman:

The following material has been sent by express to Mr. Fred Haralson at the Minnesota Fruit Breeding Farm:

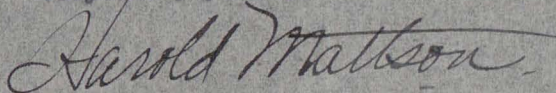

Apricot selections
F₂ (Moorpark x Siberian)

N.D. No.	trees
6	1
9	1
13	1
15	1
16	1
Red River crabapples (ND No. 5)	2
100 plants Dryweather strawberry	

A small amount of information about these selections is found in the notes of Table 2 of the accompanying comments on apricot work.

Four to six young plants from each of 24 selections made last year in a planting of wild strawberry material are being mailed to Mr. Haralson. Brief notes of these selections will be sent later.

Very truly yours,

Harold Mattson, Head
Department of Horticulture

HM:N

P.S. The same apricot and apple material, and also two trees of ND No. 6 (Early Yellow sweet apple, Patten seedling) have been sent to Mr. Haralson at Crookston.

cc
