GENERAL INFORMATION

Courses in the Environment is intended to be a guide for faculty and students and is supplemental to official University bulletins of the various centers, colleges, and institutes of the University of Minnesota.

In the broadest sense, a very large number of courses and programs at the University have implications for environmental quality. It was necessary, however, to set some limits on what would be included in the student guide. There is no environmental studies department at the University and no formal undergraduate degree program in environmental studies. However, there are programs in the College of Liberal Arts and University College in which students can design their own environmental studies major. For information about CLA's special learning opportunities and individualized programs contact the Office for Special Learning Opportunities, 220 Johnston Hall (624-7577). For information about UC's degree programs contact the Inter-College Program, 212 Temporary North of Appleby (624-52004, or the University College Program for Individualized Learning (624-4020).

Part I of this guide provides a subject index which is designed to aid students interested in pursuing an interdisciplinary area of environmental study. While some courses are obviously found in a certain department, it is frequently difficult for students interested in a particular environmental problem to be aware of all the courses available throughout the various collegiate units which pertain to the particular area of interest. For example, courses dealing with various aspects of energy or land use are found in several departments and described in various University bulletins. The subject index identifies such topical areas and steers interested students to the appropriate courses in various colleges and departments. All courses listed in Part I are described in Part II.

Part II of this guide provides environmental course descriptions according to department headings and, in most instances, the name of an individual who is prepared to advise students desiring more information about environmental courses. Several collegiate units offer, through their departments, degree programs that include a primary concentration on environmental studies. Part II is designed to serve as a guide to students pursuing an environmental studies emphasis within a given

departmental major or minor. Students interested in exploring the full extent of degree programs and course offerings in a specific department should consult the appropriate college bulletin.

Part III of this guide provides a listing of special centers and services, and libraries. The special centers and services section lists organizations in the Twin Cities that participate in environmentally related activities and are frequently engaged in research and other projects in which interested students, faculty members, and others might become involved. Although these various centers do not offer classes, in some cases students may obtain credit for work completed in such outside activities. The libraries section lists Twin City libraries that have collections with an environmentally related emphasis.

CENTERS AND SERVICES

JAMES FORD BELL MUSEUM OF NATURAL HISTORY

Donald Gilbertson, Director, 10 Church Street S.E., University of Minnesota, Minneapolis, Minnesota 55455, phone (612) 624-4112.

The museum maintains exhibits and public education programs on natural history and supports research in ecology, systematics, paleontology, and behavior of vertebrates. The Natural History Library emphasizes collections in vertebrate zoology, behavior, and basic ecology and is located in the museum.

The museum also houses the Field Biology Program, administered by the College of Biological Sciences. The Cedar Creek Natural History Area (located at Bethel, Minnesota) is a field resource administered by the University with assistance from the Minnesota Academy of Sciences; it is open to qualified scientists for research purposes. CENTER FOR POPULATION STUDIES

James W. Vaupel, Director, 231 Humphrey Center, 301 19th Ave. S., University of Minnesota, Minneapolis, Minnesota 55455; phone (612) 625-9821.

The center coordinates graduate programs in family planning administration and in population studies.

CENTER FOR URBAN AND REGIONAL AFFAIRS (CURA)

Thomas M. Scott, Director, 330 Humphrey Center, 301 19th Ave. S., University of Minnesota, Minneapolis, Minnesota 55455; phone: (612) 625-1551.

The regents established the Center for Urban and Regional Affairs to help make the University more responsive to the needs of the larger

community and to increase the constructive interaction between faculty and students, on the one hand, and between the University and those dealing directly with major public problems, on the other hand.

The specific projects of the center are selected from several broad problem areas reflecting major concerns in this region; housing, human relations, environment, energy, transportation, land use management, local government organization, and the diffusion of information about these topics. These problems cut across a wide and changing array of disciplines.

CURA's role is to help coordinate and stimulate projects in these problem areas. It works with the faculty and students of all academic units of the University. All CURA programs are pilot, experimental, or short term projects. The goal is to probe and evaluate, complete short-term projects, discard unsuccessful ones, and help build successful ones into the appropriate part of the academic structure. CURA does not have a permanent faculty or research staff and does not offer degrees. It confines itself to projects for which there is currently no other practical administrative home.

The center also publishes a newsletter, the CURA Reporter. Information about both the newsletter and the center may be obtained from the CURA office.

DEPARTMENT OF PROFESSIONAL DEVELOPMENT

Steven Weiland, Director, 131 Nolte Center for Continuing Education, 315 Pillsbury Drive S.E. University of Minnesota, Minneapolis, Minnesota 55455; phone (612) 625-8040.

The Department of Conferences, with support from the University of Minnesota academic faculty, assists groups in developing and presenting continuing education programs.

The department has a professional staff to assist interested parties in planning, publicizing, administration, and evaluation of continuing education programs.

Continuing Education in Public Policy occasionally sponsors programs for the general public in the field of environment, urban problems, and planning. For further information, contact the director.

The Institute, administered by the College of Biological Sciences, has two major responsibilities: to conduct fundamental research on freshwater related systems and to train undergraduate students, graduate students and postdoctorals drawn from the various disciplines. The institute's core program emphasizes modern techniques of microbiology, biochemistry, molecular biology and molecular spectroscopy.

LIMNOLOGICAL RESEARCH CENTER

Herbert Wright, Director, 220 Pillsbury Hall, 310 Pillsbury Drive S.E. University of Minnesota, Minneapolis, Minnesota 55455; phone (612) 624-7005.

This center conducts research on the physical, chemical, biological, and geological aspects of lakes, especially those in Minnesota. Studies of lake history are made through analyses of microfossils and of the chemical and mineral components of sediments.

An evening seminar on current problems in limnological research is presented every winter quarter. Courses and degree programs in limnology are coordinated primarily through the Departments of Geology and Ecology and Behavioral Biology.

MINNESOTA GEOLOGICAL SURVEY

Priscilla Grew, Director, 2642 University Avenue, St. Paul, Minnesota 55114; phone (612) 373-3372

The Minnesota Geological Survey is engaged in a number of activities related to the environment and planning. These include developing a data base of waterwell logs and groundwater data for the state of Minnesota; compiling subsurface engineering geological maps for siting major structures and developing underground systems;

studying the geological environment of Minnesota's peat resources in connection with the state's peat inventory program; and preparing for selected county atlases containing geological, hydrogeological, physiographic, resource, land suitability and other maps and data useful for environmental planning and management.

Students are employed by the survey as aides and research assistants. Whenever possible their work forms part of the research for a master's thesis or PhD dissertation. Thus the Minnesota Geological Survey is a potential source of employment and research support in geologically related aspects of the environment and planning.

The Minnesota Geological Survey maintains a complete inventory of topographic and geologic maps of the state, as well as publications on the state's geology and resources. For further information, contact the director.

MINNESOTA PUBLIC INTEREST RESEARCH GROUP (MPIRG)

Kristan Blake, Executive Director, 2412 University Avenue S.E., Minneapolis, Minnesota 55414 (campus office in Coffman Union, Minneapolis Campus); phone (612) 627-4045.

MPIRG is a nonprofit, nonpartisan organization representing Minnesota college students and working for constructive social change to benefit all Minnesotans. MPIRG activities focus on such issues as environmental protection, consumer protection, health care delivery, housing, human rights, occupational safety, and similar matters in the public interest.

MPIRG is funded by nearly 55,000 students on 9 Minnesota college and university campuses who pay a special fee for its support.

MPIRG is directed by a board of elected student representatives from the participating institutions. The board holds open meetings at least once a month. All matters of organizational business—from hiring staff, to allocating \$200,000 annual budget, to selecting projects for the organization—are handled by the board. Any enrolled, fee-paying student may seek election to the board. Annual elections are held in the spring.

MPIRG employs full-time staff of fourteen people including attorneys, researchers, organizers and support staff.

MPIRG publishes a monthly newspaper, the Statewatch. MPIRG sponsors coursework on advocacy - on campus, in communities, and with the legislature. It also provides numerous interships.

After careful investigation of selected problem areas, the MPIRG professional staff members and student participants work together in coordinated programs that involve publication of research findings and recommendations for public action, active representation before government administrative and regulatory agencies, law reform through legislative action, and, where necessary, legal action through courts.

UNDERGROUND SPACE CENTER

Raymond L. Sterling, Director, 790 Civil and Mineral Engineering Building, 500 Pillsbury Drive S.E., University of Minnesota, Minneapolis, Minnesota 55455; phone (612) 624-0066.

The Underground Space Center is a division of the Department of Civil and Mineral Engineering. The center was founded in November 1977 by the Minnesota Legislature in response to the growing interest in many aspects of underground space utilization.

The goals of the center are to: serve as a focal point for planning and coordination of underground space use; carry out research in areas affecting underground space use; provide an information and referral service for all aspects of underground space utilization and serve as a focal point for international cooperation or research and information transfer.

One of the major activities of the center is conducting research and providing information on earth-sheltered housing; the first report

from the center was a book of guidelines for the design of such houses. Further information and a number of publications (including the guidelines) are available from the center.

The Underground Space Center offers two courses on earth-sheltered building design and underground construction engineering; these courses are listed under the Civil Engineering Department's fall and winter class schedule. Energy use, planning, security, environment, building design, landscaping, building codes, financing and psychological considerations are topics, studies and discussions in these courses.

WATER RESOURCES RESEARCH CENTER

Patrick Brezonik, Director, 866 Biological Sciences Center, 1445 Gortner Avenue, St. Paul, Minnesota 55108; phone (612) 624-9282.

The Water Resources Research Center was established in the Graduate School in 1964. The center has responsibility for stimulating water resources research at the University of Minnesota and at state and private colleges through administration of funds associated with the Federal Water Resources Research Act of 1964; coordinating the research with programs of local, state, and federal agencies and private organizations throughout the state, and assisting in training additional scientists for work in the field of water resources through research. The following state and private colleges participate or have participated in the center's programs: St. Mary's College, St. Cloud State University, Gustavus Adolphus College, Bemidji State University, Winona State University, Mankato State University, and Concordia College.

The center does not conduct research, nor does it have research facilities. The center supports water resource research activities of departments and schools and assists in expanding interdisciplinary research. It plans and arranges for divisions of the University of Minnesota and state universities and private colleges to conduct competent research of either a basic or practical nature in relation to the physical-biological-economic-social-political aspects of water resources.

One of the purposes of the center is to stimulate and review educational offerings that will prepare students for careers in the field of water resources. The center assists in recruiting students and

in guiding them into appropriate programs of study. The center has been helpful to the University in developing many new courses in the area of water resources, a new graduate option in hydrology, and a graduate program in water resources.

The center publishes and distributes quarterly newsletters and information circulars to people throughout the state. Research projects generate many technical reports and theses. Upon request, the center distributes copies of its publications to people throughout the state and nation. To provide an opportunity for professional people and students working in the field of water resources to meet and exchange information, the center also sponsors interdisciplinary seminars and short courses.
