1996

These enthusiastic and motivated students entered UMD last fall. All received scholarships from the chemistry department. Pictured, from left to right, are Shannon Fix, Jessica Berthiaume, Chad Olsen, Kathy Brandli, Chris Gillespie, and Cary Scheiderer.

UMD All-Class Reunion Information

Undergraduate researchers tackle tough problems

By Mary Morse

In most universities, research remains the territory of graduate students. But at UMD, both graduate and undergraduate students find numerous opportunities to initiate and develop research projects related to their specific interests and fields of study.

Jason Bolz co-authored four papers published in international chemistry journals as a result of his 21-month undergraduate research project. Three biology undergraduate students have identified a herpes suppressor. Debi Wilson has been examining censorship of Mark Twain's *The Adventures of Huckleberry Finn*, a book which has been called "the greatest American novel."

During the past several years, UMD has gained national recognition for undergraduate research programs in the sciences, humanities, and education. This year, 11 UMD undergraduate students have been invited to present their research at the prestigious National Council on Undergraduate Research conference in Asheville, N.C. in April. The students' varied research projects have been supervised by faculty members in chemistry, English, psychology, and biology.

One of the major sources of funding for undergraduate research at UMD is the UM Undergraduate Research Opportunity Program (UROP). But faculty who receive other external funding from the National Science Foundation, from state and national grants, and from industry and commerce organizations, often request undergraduate research funding in their grant proposals.

The UMD chemistry department runs a summer-long undergraduate research program which is open to UMD students and visiting students. Last summer, 19 undergraduates participated in

Tricia Tomlinson, a senior chemistry major, has been working with high performance liquid chromatography. Her project is funded by the Petroleum Research Fund.

the program.

UMD's commitment to undergraduate research has evolved steadily during the past decade. Its success can be attributed to faculty members who insist undergraduate students are just as capable and creative as graduate students when given opportunities to solve problems. In addition, UMD's educational philosophy values and nurtures undergraduate responses to complex cultural and scientific issues.

"Research gives you that thrilling sense of being someone who pushes back the boundaries in a knowledge field," says Eve Browning-Cole, associate dean of the College of Liberal Arts and an associate professor of philosophy. "Our undergraduates get that. Since coming here, I've

worked with many more undergraduate students on research projects outside the classroom than I did at other institutions. It's part of the culture at UMD."

"Undergraduate research gives many students the chance to work with individual faculty members on a one-on-one basis. This adds a richness to our curriculum and shows undergraduates that the learning process does not just occur in the classroom," says Steve Hedman, UMD associate vice chancellor for academic administration and associate dean of the graduate school. "They discover that they can learn from themselves."

Concentrated research experience also proves advantageous when students enter graduate programs or the job

market. "Students who have worked on one of these projects have an increased understanding of the process of science," says Don Christian, professor and head of the biology department at UMD. "They have the crucial components of problem-solving skills and hands-on experience that increase their competitiveness for employment or graduate work."

Bolz, whose perfluoroalkyl organic chemistry won him the Minnesota Academy of Science's 1995 Winchell Award, graduated from UMD with a major in chemistry in 1995. His advisor on the project was Viktor Zhdankin. Bolz received offers from several graduate programs but decided to take a few years off from school when he was offered a position as a

long-range formulation chemist at Valspar Corp., an industrial and consumer coatings manufacturer.

"One of the most valuable things I learned at UMD was how to think and solve problems, and undergraduate research had a lot to do with that," Bolz says. "Undergraduate research is an arena where you can apply what you've learned and work with your own ability to solve a real-life problem that hasn't been solved yet. It's essentially up to you to decide what is the best method to use to go about solving it."

Bolz believes the UMD emphasis on undergraduate research attracts students in the sciences because they recognize the considerable advantage they have when it comes to employment and graduate school. "Great grades aren't always enough. But great grades and a great research background increases your opportunities," he says.

Tricia Tomlinson, a senior majoring in chemistry, has been working with Professor Don Poe for the past year on a project involving high performance liquid chromatography. Chromatographic equipment is used by the Environmental Protection Agency to study environmental contamination. Tomlinson will present her research at the North Carolina conference.

Tomlinson's project has been funded by the Petroleum Research Fund. As with most basic research, she is finding answers for just one portion of a larger problem. "My approach is that undergraduate research projects are meant to be a learning period for students," says Poe. "Students learn how to use new techniques, how to plan experiments and how to keep records. Everything is designed to address the larger question at stake."

Undergraduate research in biology at UMD

Keeping Up • The Spring 1996 Bridge

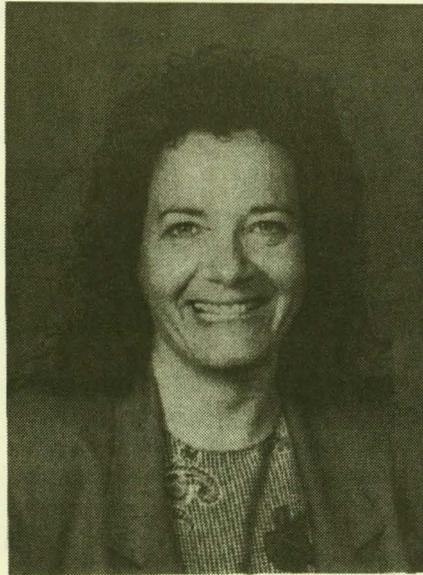

All-Class Reunion Committee invites you to attend

Dear UMD Alumni and Friends,

We want to see you in July! That's the message from members of the All-Class Reunion Committee, who have been working the last year on planning a gala celebration July 26-27 to highlight the first 100 years of Duluth Normal School, Duluth State Teachers College, and UMD.

The special reunion insert in this issue of *Bridge* highlights the dozens of activities that are planned July 26-27. For those of you planning to make a week of it in the Duluth area, several pre-reunion workshops are also scheduled.

Hats off to Vicki Beaupre and Cliff Sjolund, co-chairs, and the rest of the committee members for planning a reunion we'll be talking about for the next 100 years. The other committee members are Julene Boe, Beth Brown, Jon Carver Carlson, Jack Ezell, Carol Gallinger, Charlie Glazman, June Hendrickson, John Kessler, Sue Knill, Duane

Kragness

Long, Cindy Finch, Janet Petersen, Helen Smith Prekker, Diane Rauschenfels, Kathy Roach, Annette Sjolund, Diane Skomars, Barb Steger-Kollath, Mary Brophy Wicklund and Bob Williams.

To help the reunion committee

plan, we're asking you to please return your registration form, which is on the back page of the reunion insert. You can mail your registration to the Alumni Office at 10 University Drive, Duluth, MN 55812 or fax credit card orders to 218-726-6186. It's never too early to make summer plans.

If your alumni group is planning an activity in conjunction with the reunion, don't forget to send information to the UMD Alumni Office. We'll make sure to include information about your group's activities in future mailings.

A more detailed look at our institution's proud past is included in the book, *UMD Comes of Age: The First One Hundred Years*, by Neil Storch with photographs by Ken Moran. You can reserve your copy when you send in the All-Class Reunion registration form.

I also want to thank the alumni and friends who continue to support *Bridge* through gener-

ous financial contributions. Your donations and kind words mean a lot.

Alumni and friends who recently sent us tax-deductible contributions include Haakon Andreasen, '54 & '60; John and Dolores Brust, '57 & '52; Earl Cook, '50; Dorothy DeMore, '41; Shawn Foy, '88; David Gustafson; Dennis Horrigan, '61; Ladonnah Graham Ivarinen, '37; Elaine Kipp, '59; Westley Olson, '50; Larry Radloff, '90; Lois Rynning, '43; Cliff Sjolund, '74; Claudia Soderstrom, '89; Jon Paul Towers, '79; Betty Jo Weichselbaum, '43; and Ruth Widstrom, '42. If you would like to make a contribution in support of *Bridge*, please return the form on page 3 to the Alumni Office.

I also want to share that in March I accepted a one-year appointment as Executive Assistant to Chancellor Kathryn A. Martin. It's an exciting opportunity for me to continue to spread the word about UMD and its proud past — and keep working with you and other alumni.

Enjoy the warm spring weather, and remember to keep bragging about UMD with your friends! See you soon.

Nominations sought for:

1996-97 UMD Alumni Association Board of Directors

Nominations are currently being accepted for the UMD Alumni Association Board of Directors, which is responsible for overseeing the centralized services and direction of the UMD Alumni Office. Board members serve three-year terms and are responsible for attending quarterly board meetings and helping promote the goals of the Alumni Association through various activities. Alumni are encouraged to nominate themselves for a term on the board. An Advisory Committee of current and past board officers will review the nominations, which are due in the UMD Alumni Office by April 15, 1996.

Women's basketball ends outstanding season with heartbreak loss to NDSU

Kris Mielke, a junior from Monticello, helped lead the Bulldogs to a 12-0 record in the NSIC North Central Conference. The Bulldogs lost just five games overall.

The UMD Women's Basketball team ended a stellar season when they fell to defeat against North Dakota State University (NDSU) Friday, March 8 at Romano Gymnasium.

NDSU, the #1 seed, went on to win the Northern Sun Intercollegiate Conference (NSIC) championships that weekend.

NDSU was out to avenge a December loss to the Bulldogs. It was that defeat which put the brakes on a 49-game NDSU winning streak, the longest in history of NCAA Division II women's basketball.

"I think that was what they (the NDSU players) were remembering, along with the fact that we were the team that stood in the way of becoming the national champion," said Linda Larson, UMD women's athletics coordinator. "We've been in that position for the past couple of years. I think we've got the toughest route to the national championships," she added.

UMD will graduate three seniors, Jodi Ierino, a center from Duluth, Sara Belanger, guard from Elk River (the 'Dogs two leading scorers) and Wendy Hansen, a forward from Arden Hills. Among the returning players, the Bulldogs have a strong

group of sophomores and juniors.

In addition, Gina Perich from Esko has signed a letter of intent to play Bulldogs basketball next year. Perich is a star on the track in addition to her talents on the court. "She will be a great addition," Larson said. "She's just an outstanding athlete."

Spring will be a busy season for athletics. UMD will host conference championships in tennis, softball, and track in April and May.

Kragness takes new position

Chancellor Kathryn A. Martin has announced the one-year appointment of Lucy Kragness to the position of Executive Assistant to the Chancellor.

Lucy will serve as the primary support person for the Office of the Chancellor and assist the Chancellor in off-campus outreach, development efforts, grant writing, preparation of the annual report, and various other assigned responsibilities.

"Personally, I am very grateful to Lucy for her willingness to accept this challenge and to assist me in meeting the obligations of the Chancellor's Office," Chancellor Martin said.

Kragness has worked in University Relations for more than 11 years, serving most recently as UMD's Alumni Director.

Glensheen launches 'Raise the Roof' campaign

Buy a roof tile from Glensheen for \$20 and receive an "Honorary Tile Title" announcing your partnership with Glensheen. You'll also receive a one-year membership in "Friends of Glensheen."

UMD and Glensheen have launched the "Raise the Roof" campaign to help pay for an estimated \$450,000 in repairs needed for the 90-year-old roof. The existing roof has severe leakage which will damage the mansion's interior and the antique treasures it houses. Without a new roof, Minnesotans will lose Glensheen.

Already, donors have pledged \$100,000 to the campaign. Even small-scale efforts, such as the lunch hour pledge campaign hosted by Wayzata Minn.) Junior High School students, count in this race against time. For more information or to buy your tile, contact "Raise the Roof," Glensheen, 3300 London Road, Duluth, MN 55804 or phone (218) 724-8864.

Celebrating 100 Years
UMD
DULUTH

New book celebrates those who made UMD

UMD Comes of Age: The First 100 Years relives the sometimes tumultuous history of Duluth Normal School, Duluth State Teachers College and the University of Minnesota Duluth. The author-photographer team who created this wonderful book, Neil Storch and Ken Moran, chose events and photographs that eloquently retell the story of the people who made UMD what it is today.

Drawing on his training as a historian, Neil Storch, professor of history at UMD, has written a story that vividly portrays the presidents, provosts, chancellors, faculty, staff, and community members who treasure UMD and the values it has established for Northland education.

Ken Moran, campus photographer at UMD since the early 1950s, researched archives containing thousands of photographs from Duluth Normal School's beginnings to the present. The more than 400 UMD pictures finally selected for the book prove that

photographs truly can recreate a sense of the past.

The book evokes the spirit of those many risktakers who turned DSTC into UMD, who fought for the School of Medicine and the Natural Resources Research Institute, and who fervently believed that UMD could become a cultural resource for the community. In both words and photographs, it honors UMD's "Bulldog" spirit.

UMD Comes of Age: The First 100 Years can be ordered separately (order form on page 5) or as part of the All-Class Reunion package (see special insert for the order form). The volume costs \$31.95 plus \$5 for shipping and handling. Supplies are limited, so reserve your copy now.

The photographs at the right and below are a sampling of the thousands of photos contained in the UMD archives. You'll see many more wonderful photos in *UMD Comes of Age: The First 100 Years*.

The May Festival was celebrated at Duluth Normal.

Students take a study break in front of Old Main.

UMD students joined nationwide protests in the '70s.

"Scotch on the Rocks" was the homecoming theme in 1964.

A student entertains her friends.

NASULGC grants UMD membership

The University of Minnesota Duluth has been granted membership into the National Association of State Universities and Land Grant Colleges (NASULGC). The only other Minnesota member is University of Minnesota Twin Cities.

Founded in 1887, NASULGC is the oldest higher education association in the nation. Its 182 members represent all 50 states, plus the U.S. territories and the District of Columbia. Membership gives UMD greater visibility and influence in all circles of importance to higher education.

NASULGC is a voluntary organization, with a mission to enhance the capacity of member institutions to perform their traditional teaching, research and public service roles. As a member, UMD will share in the NASULGC agenda to: maintain the university academic base and activities (which includes fostering partnerships between all levels of government, the member institutions and industry); preserve student access and opportunity by protecting student financial assistance programs; reduce excessive, burdensome and costly federal regulations; and focus on state issues (where federal and state issues intersect, such as accountability, accreditation and student financial assistance).

NASULGC has adopted four major goals for the '90s: first, to show the linkages between public higher education and the nation's economic and societal interests; second, to affirm that the nation must provide access and opportunity for a college education to all who can benefit from the experience; third, to help strengthen the credibility of public higher education where its credibility has been threatened; and fourth, to make the case that the nation must invest in higher education at federal and state levels.

UMD chemistry professor named vice chancellor

Chancellor Kathryn A. Martin named Vince Magnuson Vice Chancellor for Academic Administration. "Vince's dedication to UMD and to the community of Duluth, his strong belief in the quality of our faculty, and his

have been chosen for this position," Magnuson said. "My goals are to provide students with an affordable education in a comprehensive university that focuses on an exemplary undergraduate learning experience," he added.

In addition, Magnuson hopes to increase opportunities for students to be involved in active learning experiences and to promote and support faculty creativity and research.

Magnuson also will concentrate on strengthening academic ties with the community colleges of northern Minnesota. These outreach efforts include increasing transfer agreements and joint admissions, providing for more distance education, and increased cooperation in terms of sharing resources.

Magnuson received his

Ph.D. in inorganic chemistry from the University of Illinois, Urbana in 1968. He received his M.S. in chemistry from the University of Wisconsin, Madison in 1965, and his B.S. from the University of Nebraska, Lincoln in 1963.

He is a past Chair of the UMD chemistry department, past American Chemical Society National Councilor and past chair of the UMD Campus Assembly. He is also active in a research program involving both graduate and undergraduate students in molecular structure determination by x-ray diffraction.

During his term as interim vice chancellor, Magnuson served as co-chair of the Chancellor Transition Committee for then Chancellor-designate Martin.

Vince Magnuson leaves the chemistry classroom to become the new Vice Chancellor for Academic Administration at UMD.

UMD Profile

willingness to continue to pursue excellence in all areas on campus were the determining factors in my selection," said UMD Chancellor Martin.

Magnuson, who has been a chemistry professor at UMD since 1973, has been interim vice chancellor since July. He replaced Sandra Featherman, who became President of the University of New England in Maine. "I am very honored to

Remember when

JFK

was here?

You didn't have to be a UMD student to remember the events that touched our lives, and you don't have to be an alumnus to be touched by the faces, personalities and events that are UMD.

Order your own *UMD Comes of Age: Celebrating the First 100 Years*. Relive the days when classes on the upper campus meant walking the "last mile" and when first year students wore beanies. More than 400 photos recount UMD's history, *your history*.

Goldfine scholarship recognizes academic achievement

In 1987, the family, friends and business associates of Beverly and Erwin Goldfine established the Beverly and Erwin Goldfine Scholarship for Excellence at UMD. Erwin Goldfine served as a University of Minnesota Regent from 1975 to 1987.

Beverly Goldfine has been active in the Duluth community for years and has served as an officer of the UMD Tweed Museum of Art Associates. Goldfine scholarships have been awarded to 31 students in recognition of and as a challenge to continue their academic achievements.

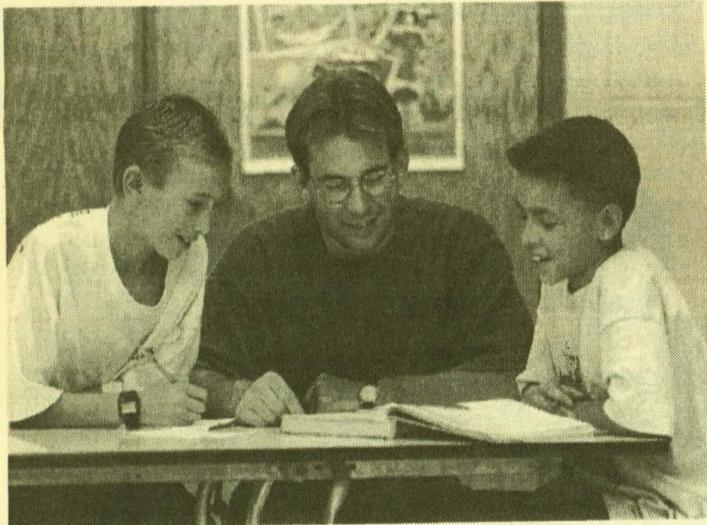

Most students have received the scholarship twice, and all have been at UMD throughout their first and second years.

Each scholarship recipient receives \$1,000 for the academic year.

This year's Goldfine Scholars are Jon Findley, a junior from Mankato, Minn., majoring in computer engineering; Jeff Kienholz, a junior from Hector, Minn., majoring in accounting; Sandy Fritzlar, a junior from Belgrade, Minn., majoring in psychology; Angela Simonsen, a senior from Two Harbors, Minn., majoring in chemistry; Julie Runquist, a senior from Mora, Minn., majoring in elementary education; Mandy Cornick, a junior from Duluth, majoring in computer science; Mark Van Hornweder, a senior from South Range, Wisc., majoring in business; and Mike Roberts, a senior from Hayfield, Minn., chemical engineering.

The 1995-96 Goldfine Scholars were honored at a September luncheon. Pictured (left to right) are Jon Findley, Jeff Kienholz, Sandy Fritzlar, Angela Simonsen, Beverly Goldfine, Julie Runquist, Mandy Cornick, and Mark Van Hornweder. Erwin Goldfine is seated in front. (Missing is Mike Roberts.)

Jamie Harker, UMD pre-med major and volunteer with the Darland Intergenerational Program, works with two sixth-grade students from Duluth's Lowell Elementary School.

Darland Intergenerational Program seeks community support

Many readers will remember R. J. Falk, Armas Tamminen, Donna Wolean, Jean (Livingston) Harries, Janine Watts, Eleanor Collins, and Dean Kjolhaug as classmates or UMD professors. Along with Art Barschdorf, Jan Bower, CEHSP Dean Mitizi Doane and student volunteer representatives Kim Tarvestad and Mike Reckard, these committed individuals comprise the governing body of the Darland Intergenerational Program.

The program, formerly known as the Darland

Center, connects caring adults with area kindergarten through twelfth-grade students who are having difficulty with their school work. UMD students, retired UMD staff, and older community members work as tutors and mentors with the children. In most instances, sessions result in increased self-esteem and motivation and improved academic performance for the student.

Like the students they serve, program volunteers also benefit. UMD students gain valuable

experience for future years. Most importantly, both senior and student volunteers have opportunities to participate actively and meaningfully in community life, sharing their experience, knowledge, and caring to enhance the life of others. Volunteers have said they derive a great sense of satisfaction from witnessing changes in the children they assist.

The Darland Intergenerational Program is possibly the only local program totally focused on providing tutoring and mentoring services to children in their own school at the request of the student's teacher or parent. Program volunteers have been assisting students individually and in small groups since 1990. During the fall quarter of 1995, more than 40 volunteers provided direct assistance to

190 students at 14 area schools and contributed more than 1,000 hours of service. Presently, 90 student volunteers are placed in 19 area schools.

The Darland Intergenerational Program depends on the financial support of area foundations, businesses, and individuals. Because requests for the services of trained volunteers are expected to increase, the program has embarked on a funding campaign. If you wish to help support the program, please send your gifts to Darland Intergenerational Program, 236 Montague Hall, UMD, Duluth, MN 55812-2496.

For more information about the program or to learn how to become a volunteer tutor/mentor, write to Darland Intergenerational Program at the above address or phone (219) 726-7125.

Ilkka scholarship

Erica Danielson, a UMD sophomore majoring in elementary education, is the first recipient of the James Ilkka Scholarship. James Ilkka, class of '58, mathematics, died in 1992. A memorial scholarship was endowed by Mrs. Richard (Sylvia) Hockel, Ilkka's aunt. Special considerations are that recipients be high-ability students who are graduates of Chisholm High School. Erica received \$500.

Endow a scholarship for \$10,000

Establish a named, endowed scholarship at UMD by making a gift of \$10,000. A scholarship can be named in memory of someone dear to your heart. An endowed scholarship can be funded over one or two years and can be designated to academic scholarships, a specific collegiate unit, or to students in need of financial assistance. In some cases, donors prefer remembering UMD by including a gift in their wills. For more information, please call the UMD Development Office at (218) 726-7989.

Holocaust memorial lectures established

Dying in an American field hospital, after being starved and tortured by the Nazis, Walter Baeumler's grandfather told him, "It is better to have tyranny end with terror than to have terror without end," and admonished him to better the future.

On March 5, UMD announced the establishment of the Baeumler-Kaplan Holocaust Memorial Lecture Series. The series is established by the families of Walter Baeumler (1928-1993), 28-year professor of sociology at UMD, and Mortrud Kaplan (1908-1986), founder of the Community Council of Duluth, now the Twin Ports Jewish Federation.

"Unfortunately, ignorance about the Holocaust is widespread in America, especially among young people," said Harry Hellenbrand, Dean, UMD College of Liberal Arts. "Consequently if the Holocaust indeed is not to

happen again — to Jews or other people — it is essential that the young in college, high school and even earlier, be educated about forces and attitudes which lead to dehumanizing others," he added.

Baeumler, who was born in Nuremberg, Germany, dedicated his teachings to insure that the lessons of the Holocaust would neither be forgotten nor swallowed by a fascination with the horrible. Thus, in his honor, this Memorial Lecture Series has been established to remember, with dignity, the lives and sufferings of the victims and to encourage change through the dissemination of truth, justice and peace.

Kaplan, lifelong Duluth resident and registered pharmacist, was the son of Lithuanian immigrants who worked hard to send their children to college. Honoring Kaplan's, spirit, his sister, Mrs. Ida

Grubnick, instructed her attorney, Robert Karon, to give her funds to an organization that would explore the plight of Jews and Judaism in honor of her brother.

Their gifts to the Baeumler-Kaplan Holocaust Memorial Lecture Series are an effort to combat ignorance about the past, perpetuate the memory of Jews and Jewish traditions, and exhort people (especially youth) to live without bigotry, racism, and violence.

Bob Karon, trustee for the Mortrud Kaplan estate (left); Chancellor Kathryn A. Martin; Abbot Apter, president of the Twin Ports Jewish Federation; and Leonore Baeumler, widow of Walter Baeumler, establish the Baeumler-Kaplan Holocaust Memorial Lecture Series at UMD.

The first of the newly endowed lectures, "50 Years After Nuremberg: Promises Realized and Unfulfilled," is scheduled for April 17 at 3 p.m. in the Ballroom of Kirby Student Center.

Gifts to the lecture series are welcome. To contribute contact the UMD Development Office, 315 Darland Administration Building, 10 University Drive, Duluth, MN, 55812, (218) 726-7989.

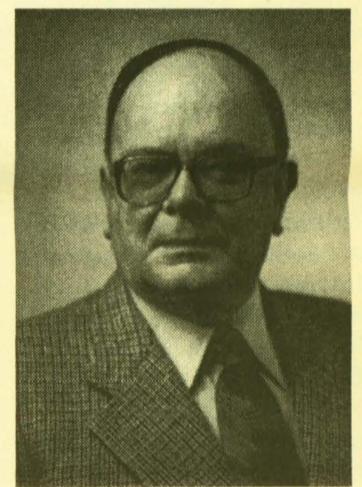

Alumnus honors professor with Von Glahn Scholarship

UMD awarded the first Gerhard E. von Glahn Scholarship to Jennifer Davis, Woodbury, Minn., a sophomore in political science. The scholarship, in honor of UMD professor emeritus von Glahn was endowed by Jim Corson, class of '49. Corson, a retired managing editor of West Publishing Co. and former student of von Glahn, hopes his gift will encourage other students of von Glahn to join him in honoring their beloved professor.

The German-born von Glahn taught political science and economics at Duluth State Teachers College and political science at UMD. He began teaching in 1941, but left to join the military services when the U.S. entered World War II. Von Glahn returned to UMD in 1946, where he served as head of political science for more than 30 years. He retired in 1979.

"Gerhard was simply amazing," said Craig Grau, associate professor of political science. "He was an academic 'role model' before the term was invented. On a personal level, he was a very proud father and had a great sense of humor, even when the joke was on him," Grau added.

Von Glahn's political

Von Glahn

science research resulted in two well-known books, *The Occupation of Enemy Territory* (Minnesota Press, 1957) and the best-selling international law textbook *Law Among Nations*, first published by Macmillan in 1965 and published in a seventh edition in 1995.

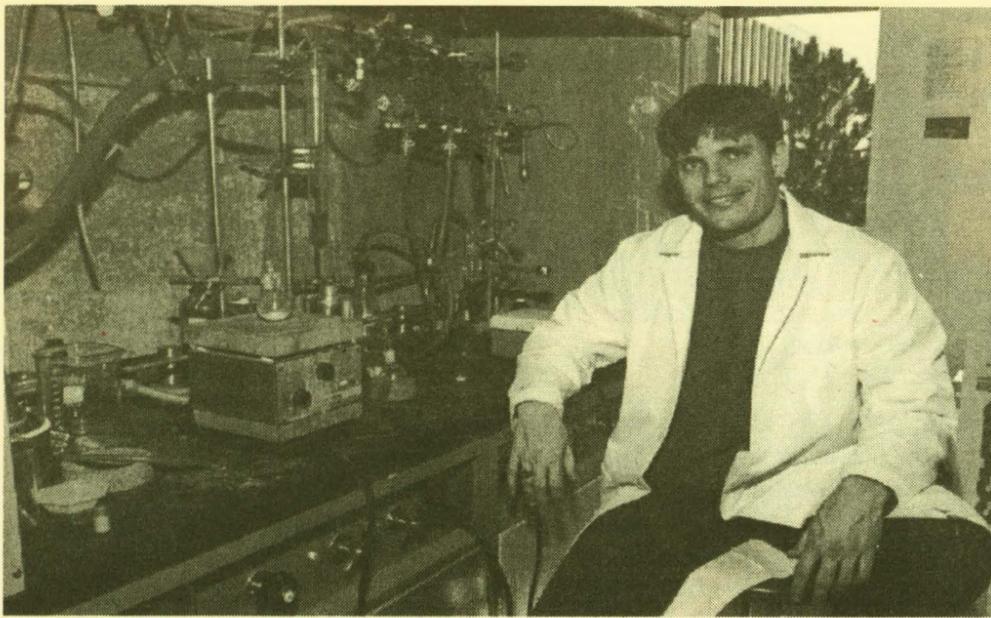

For more information about the Gerhard E. von Glahn Scholarship, contact Grau at (218) 726-8281 or Maryann Soleim at (218) 726-8993. If you wish to contribute to the scholarship fund, please make checks payable to the von Glahn Scholarship and mail them to UMD Development, 315 Darland Administration Building, 10 University Drive, Duluth, MN 55812-2496.

FinnFest USA scholars announced

FinnFest scholars for 1995-96 are (l to r): Joleen Kantola, junior, computer science major, Bovey, MN; Lisa Pohjonen, senior biology major, Superior, WI; Rebecca Niemi, senior, psychology major, Britt, MN; Terri Jackson, graduate student, Master of Social Work, Cloquet, MN; and Hanna Erpestad, junior, English major, Duluth, MN. Missing from the photo is Varpu Ojanne, senior, pre med/biochemistry major, Cromwell, MN. Pohjonen and Ojanne are recipients of the Arne Santa Memorial Scholarship.

Applications for the 1996-97 academic year can be obtained by calling Maryann Soleim at UMD Development at 218-726-8993. Awards are a minimum of \$ 500. Twelve awards have been made since the inception of this scholarship in 1993. Applicants must be of Finnish ancestry, preferably from northeastern Minnesota or northwestern Wisconsin, and have fulltime junior, senior, or graduate student status at UMD. Gifts to this scholarship continue to be accepted. For more information, contact Maryann Soleim, development officer, at 218-726-8993.

Jason Bolz' research in organic chemistry resulted in co-authoring four journal articles and the 1995 Winchell Award.

Research from page 1

tends to focus on ecological biology and cellular biology. Junior Ashley Moerke, another North Carolina presenter, has been working with Professor Anne Hershey on a stream ecology project. Her research has been funded by the Undergraduate Research Opportunity Program (UROP) as well as Research Experiences for Undergraduates (REU) funds from NSF.

Another biology project which now involves at least one undergraduate student and will likely involve several more is a study examining the feasibility of harvesting brush as a biomass fuel source. A portion of the study relates to how such brushland management would affect the habitat of sharp-tailed grouse, a species now on the decline in Minnesota. "The way we present it to students is to say 'here's a problem that we're trying to address — and here's a piece of the problem,'" explains Christian, who received funding for the brushland management project from the Minnesota Forest Bird Diversity Initiative.

Three undergraduate students have been working with M. Raj Karim, professor of biology, to probe more deeply into a chance discovery made by a group of German doctors. The doctors found that a drug used to treat depression was also clearing up herpes infections in their patients. The drug's ingredients were extracted from a combination of plants which included the common rose, but the Germans could not iden-

tify the specific herpes suppressor.

The UMD students discovered the specific combination which suppressed the herpes. "It's what you would call a 'good' side-effect," said Aaron Johnson, who conducted the research in association with fellow students Matt Thompson and Satoshi Takida. Johnson will present his team's findings in North Carolina. In addition, Karim has been invited to present the students' results to the International Congress of Virology meeting in Jerusalem next August.

"Undergraduate research is a major contributing factor in helping our undergraduates make the transition from student in the classroom or instructional laboratory to independent and mature scientist," says Bilin Tsai, professor and head of chemistry. "They experience the challenge and excitement — as well as frustration — of scientific inquiry."

One seldom talked-about aspect of undergraduate research is the possibility of failure. "In research, you never know what's going to happen," Tsai says "In classroom labs, the experiments are designed around fairly well-known and consistent results. But here, researching on your own, you're going to experience failure some of the time."

Most researchers face failure at least once in their careers, Tsai points out. Students who encounter this scientific truth early in their education begin to understand that a research failure is

not necessarily viewed as a black mark but instead, as a signal to the researcher to try another research approach.

While scientific research often seems more visible to the public than research in other fields, students in the humanities feel equally challenged by the projects they have developed. English major Debi Wilson received a UROP grant to study recent

criticism of Huck Finn, a novel often attacked as racist. In developing her response to the issue, she has had to contrast her own understanding of Twain's satirical intentions against the idea that stereotypes, even when used ironically, can create prejudice. She is working under the supervision of Steve Adams, associate professor of English.

"I am motivated because I am interested in the topic, and I am being challenged to think critically and to produce a valid and thorough thesis and argument about the subject," Wilson says. "I'd encourage all students to take advantage of this kind of opportunity."

Former UMD student Jennifer Ouellette, who graduated from UM Twin Cities in 1995, researched her UROP project while studying in England in 1992. Professor Klaus Jankofsky, English, supervised her research on Margaret of Anjou, a major character in Shakespeare's *King Henry the Sixth* trilogy.

Her project, which emphasized primary source research, examined the character of

Margaret within its textual, historical, and theatrical dimensions. One of the high points of her research, says Ouellette, was interviewing Cherry Morris, an English actress who played Margaret in a Royal Shakespeare Company production of the trilogy.

"I really don't think undergraduate research in the sciences and humanities is that different," says Browning-Cole. "Humanities students still have to figure out how to formulate a research plan and implement it. It teaches them a lot about time management and organizational skills."

"The research isn't that different either," she adds. "When you look at research topics, no matter where they are, they tend to look really micro-level and tiny. But that's what research is — coming at big subjects with small steps."

More importantly, Browning-Cole insists, even seemingly small research eventually leads students to "a better global vision of where we are and where we've been as a species."

The Master of Liberal Studies

Timeless education, timely learning

Offered jointly through the University of Minnesota Duluth

- Department of Interdisciplinary Programs, College of Liberal Arts
- The Graduate School
- Continuing Education & Extension

The University of Minnesota is an equal opportunity educator and employer.

The Master of Liberal Studies degree (M.L.S.) from the University of Minnesota Duluth is everything your graduate degree needs to be.

- **A solid background** — required interdisciplinary courses critically examine how we learn, the methodology of inquiry that scholars apply, the analysis and assimilation of information.
- **Your opportunity to personalize your education** — design an interdisciplinary program that allows you to study in depth a topic important to your career or your academic interests and then apply it in your life.
- **Especially intended for adult and part-time students** — you bring a lifetime of experience to class that influences your learning and that you will share with other M.L.S. students.
- **Realistically scheduled** — it is possible to complete the M.L.S. in three years taking one evening class a quarter (including summers).
- **All the services you need** — professional program advising, mail, FAX and phone registration, priority placement in classes, textbook delivery by UPS, credit card payment options . . . and more from Continuing Education and Extension/University College, a proven national leader in lifelong education.

Continuing Education & Extension/University College

UNIVERSITY OF MINNESOTA DULUTH

CLASSNOTES

'52

Robert E. Reed is the owner of Reed and Assoc. In the past year, he and his wife Louise, have opened Reed's Cuisine, so retirement is not in the picture for either. They live in Crystal Lake, Ill.

'54

Reunion registration form on back page

YOU SHOULD SEE US NOW, UMD DULUTH A CENTURY OF CHANGE

All-Class Reunion July 26-27, 1996

Celebrating 100 Years
UMD
DULUTH

We want to see you!

Members of the UMD All-Class Reunion Committee urge you to register now. The committee has been working hard for the last year to plan a two-day extravaganza of exciting events on July 26-27. Look inside for a schedule of events — and return the registration form on the back page. Attending the last committee meeting were, seated from the left, reunion co-chairs Cliff Sjolund and Vicki Beaupre. Standing, from the left, are Sue Knill, Teri Johnson, Kathy Roach, Carol Gallinger, Lucy Kragness, Barb Steger-Kollath, Jack Ezell, Julene Boe and Duane Long. See you in July!

Here's where to stay

On-campus

Relive your days on campus by staying in a residence hall for \$34 a night plus tax (two twin beds, small refrigerator, linen provided, bathrooms & showers shared). A limited number of suites for groups of four or less are also available for \$50 a night plus tax (two bedrooms with two single beds in each bedroom, a living room, one private bath, small refrigerator). To reserve UMD housing, call: 218-726-7390.

Off-campus

Ask for the UMD Reunion block of rooms at these hotels/motels:
Radisson Hotel Duluth-Harborview: 1-800-333-3333
Holiday Inn Hotel & Suites: 1-800-477-7089
Best Western Edgewater: 1-800-777-7925
Fitger's Inn: 1-800-726-2982
Duluth Super 8: 1-218-628-2241
Duluth Comfort Inn: 1-218-628-1464
Comfort Suites of Canal Park: 1-218-727-1378

Look for this logo inside:

Activities of special interest to all alumni are highlighted by the 100-year celebration logo. Look for these main activities:

- ✓ Campus Tours
- ✓ Faculty Reception in Tweed Museum of Art
- ✓ Duluth State Teachers College Reunion at Glensheen
- ✓ All-Class Reunion Barbecue
- ✓ Super Extravaganza featuring Carole Achterhof, Joseph Maiolo, Michael Pagan and Thomas Wegren
- ✓ Dance the Night Away
- ✓ Fireworks Display
- ✓ 5K Fun Run
- ✓ Luncheon/Awards Program

UMD All-Class Reunion:

There's something for everyone ... with more to come

The following activities have currently been planned for this summer's All-Class Reunion. If you have questions, please call the UMD Alumni Office at 218-726-7110.

* Included in Reunion Registration Fee.

Thursday, July 25, 1996: Pre-Reunion Workshops

Department of Biology Workshop

8 a.m. to 4 p.m.
Workshop on forest ecology and management, continuing education credit available. UMD campus and field trips to nearby areas. An overview of current issues and approaches to forest management in Minnesota, within a broad context of forest ecology. Tuition to be determined. For more information, call Donald Christian at 218-726-6262.

Department of Industrial Engineering Workshop

1-4 p.m., 280 Engineering Building
This workshop on "Process Mapping" provides a useful tool to analyze operations for value-added and cost-added steps. It is an important tool for process improvement. This hands-on workshop will cover the basics of process mapping and provide the participant with a "real world" process to analyze. The workshop is intended for anyone who is involved with process improvements or re-engineering. Cost: \$20. For more information, call David Wyrick at 218-726-6161.

Friday, July 26, 1996

Reunion Registration*

8:30 a.m. to 7 p.m., Kirby Lounge

Campus Tours*

9:30 a.m. to 11:30 a.m., meet in Kirby Lounge.

KUMD Open House*

9 a.m. to 3 p.m., 130 Humanities
KUMD will be 40 in 1996! Anyone who ever volunteered, worked at, or just was a fan of KUMD is invited to the Open House for refreshments and studio tours. KUMD is also asking anyone who worked at KUMD since it signed on the air on Nov. 19, 1956, to contact the station to help create a commemorative booklet. Stories are welcome, plus we want to keep you informed on other 40-year celebration activities. Write KUMD 103.3 fm, 130 Humanities, 10 University Drive, Duluth, MN 55812, call 1-800-566-KUMD, fax 218-726-6571 or email: kumd@d.umn.edu

Department of Mathematics & Statistics Events*

9:30-11:30 a.m., Campus Center
There will be a reception, refreshments, tour of the department's facilities, and demonstration of computer/software facilities in the department labs.
1:30-3:30 p.m., Campus Center
There will be three 15-minute presentations by students and/or faculty on current research projects, followed by a general colloquium talk.

School of Business & Economics Events*

9:30-11:30 a.m.; 1:30-3:30 p.m.
Alumni from the School of Business & Economics are invited to an open house reception with refreshments, facilities tours and presentations including program discussions and displays, seminars and discussions. And don't miss the alumni registry!

Archaeometry Laboratory Tours*

9:30-11:30 a.m.; 1:30-3:30 p.m.
Alumni are invited to tour ArchLab facilities in 214 Research Laboratory Building (Old Lab School). Participants will see an archaeology research center with projects currently in Greece, Turkey, Cyprus, Egypt, China and Minnesota.

Department of History Lectures*

9:30-10:10 a.m.: "The Current Situation in Russia," Alexis Pogorelskin, ABAH 225.
10:30-11:10 a.m.: "UMD Comes of Age: The First One Hundred Years," Neil Storch, history professor and author of the UMD history book, ABAH 225.

Department of Computer Science Internet Session*

Searching the Internet: 9:30-11:30 a.m., 209 Montague Hall
It's been said that the Internet is the "world's best study aid." The Computer Science faculty will teach participants how to locate the best sites on the Internet to get the information they or members of their family may need.

Glensheen Discount*

UMD alumni wearing the official reunion name badge will receive \$1 off on a Friday, Saturday or Sunday tour of Glensheen, the former Congdon mansion on London Road.

Department of Biology Events*

9:30 a.m. to 11:30 a.m.; 1:30-3:30 p.m., Life Science Building
Enjoy the department open house, poster exhibits, tours and alumni reception. Tours, exhibits and reception to highlight current programs and initiatives in research, teaching and outreach. An exhibit is also planned on departmental history.

Department of Chemistry Events*

9:30-11:30 a.m.; 1:30-3:30 p.m., Chemistry Building
Chemistry faculty will welcome alumni at a reception and make a short presentation. Students will assist with tours and present their summer projects at an Undergraduate Research Poster Session. There will be a glassblowing demonstration especially for families.

Department of Electrical and Computer Engineering Events

Department Tours: 9:30 a.m. to 11:30 a.m.*
Department Reception: 2:30-4 p.m.*
Short Course #1: Microprocessor/Microcontroller Update: 9:30-11:30 a.m.
Microprocessors and microcontrollers continue to evolve with advancing technology. This course will update participants on both the Motorola 68HC11 microcontroller and its descendants as examples of low-level systems that are embedded in all sorts of consumer applications, and also the AMD 29205 microprocessor and other members of its family as examples of advanced systems that incorporate many state-of-the-art features. Both processors are currently used in ECE labs, and experience with hardware will be included in the course. Instructor: Christopher Carroll, associate professor. Cost: \$100 (subject to change)
Short Course #2: Modern Electronic Design & Automation Tools: 12-2 p.m.
This course will overview modern tools used to design electronic hardware in the semiconductor industry. These tools will be based on the Mentor Graphics Systems available in ECE. A lab session is included. Instructor: Marek Patyra, associate professor. Cost: \$100 (subject to change)

Large Lakes Observatory Open House*

9 a.m. to noon, Research Laboratory Building, Room 213 (Old Lab School)
Enjoy posters, laboratory tours, informal discussions with faculty and students, refreshments and snacks on the portico.

Meal in Residence Hall Dining Center (RHDC)

11:30 a.m. to 1:30 p.m., Residence Hall Dining Center

Home Economics Reunion

A luncheon gathering for Home Economics alumni is planned at the Duluth Women's Club located at 2400 E. Superior Street. Punch and conversation at 11:30 a.m. and lunch will be served at 12:30 p.m. Visiting, conversation and browsing through memorabilia at 1:30 p.m. Contact Eleanor Kraker at 218-728-3016 or 218-724-5929 with any questions. To register, send check for \$12 payable to District C-MAFCS, with memo noting "reunion" to: Eleanor Kraker, 115 St. Paul Ave., Duluth, MN 55803.

International Education/Study Abroad Open House*

1-4 p.m., 108 Cina Hall
Meet the faculty and staff of the International Education office and reminisce with old friends who have studied abroad.

Campus Tours*

1:30-3:30 p.m., meet in Kirby Lounge.

Air Force ROTC Events*

1:30-3:30 p.m., ROTC Building
Celebrate the 48-year partnership between UMD and the Air Force. Events include a ceremony to formally "name" the ROTC Building and a flagpole dedication. Come and reminisce with old friends (first ROTC class members will be our honored guests), view scrapbooks, see our newly renovated facility and enjoy refreshments.

Department of English Presentation*

1:30 p.m., location to be determined.
English Professor Joseph Maiolo will read from his fiction.

American Indian Learning Resource Center Events*

- Art Fair July 26-27. American Indian and Alaskan Native alumni will display and sell their work.
- American Indian Poetry Reading on July 26.
- American Indian Learning Resource Center Open House: July 26-27.

Natural Resources Research Institute Open House*

1:30-3:30 p.m., 5013 Miller Trunk Highway
Come take a self-guided tour of the Natural Resources Research Institute (NRRI). See research exhibits that foster economic development of Minnesota's natural resources in an environmentally sound manner to promote private sector employment.

Navigating the World Wide Web*

1:30-3:30 p.m., 209 Montague Hall
Information Services staff members will assist alumni in browsing the World Wide Web using the Netscape Web navigator. Special attention will be paid to the UMD Web Pages and the Alumni section of the UMD Web Pages. Come and see what the Internet is all about.

Department of Physics Events*

1:30-3:30 p.m., MWAH 241
The Physics Department will host an informal reception with current and former faculty and tours of research laboratories and other facilities.

Department of Chemical Engineering Open House*

1:30-3:30 p.m., 207 Engineering Building
Chemical Engineering will sponsor an open house and laboratory tours. The tours will highlight recent senior design activity including participation in the 1996 National Environmental Design Contest in Las Cruces, New Mexico.

Department of Education Open House*

1:30-3:30 p.m., patio between Montague and Bohannon halls
Graduates from all areas of education are invited to meet old friends and current and retired faculty and staff. Activities include a series of short presentations by faculty and short video clips. If interested in a 1-credit course in Using the Internet and the World Wide Web, or a 1-credit course in Current Issues in Education or a 1-credit course in Multicultural Issues, call 218-726-6349.

Department of Health, Physical Education and Recreation Open House*

1:30-3:30 p.m., 110 Sports and Health Center
The open house will include a building tour and a presentation on the current mission and programs of the department.

Department of Social Work Open House*

Alumni are invited to stop by and visit with social work faculty and tour office space. Refreshments will be served.

College of Liberal Arts Web Presentation*

2:30 p.m.
Faculty from the College of Liberal Arts will demonstrate the World Wide Web in Humanities 480, with refreshments in Humanities 470.

Exhibit Preview: Tweed Museum of Art*

2-4 p.m., Tweed Museum
See the Glenn C. Nelson International Ceramics Collection and selections from the museum's Student Alumni Collection.

Reception with Retired and Current Faculty*

3-4 p.m., Tweed Museum of Art

Duluth State Teachers College Reunion

4-6 p.m., Glensheen
Alumni from the Duluth State Teachers College will hold a special reunion at Glensheen. The \$12 fee includes food and a tour. See registration form on back page.

All-Class Reunion Barbecue

6-10 p.m.
Enjoy an a-la-carte selection of barbecue food in the special All-Class Reunion Barbecue concessions area in Ordean Court and the Kirby Terrace.

Super Extravaganza*

7:30-9 p.m., Marshall Performing Arts Center
Humor Author Carole Achterhof, who graduated from UMD in 1965, will share her wit during the special reunion extravaganza celebration. She will be joined by Joseph Maiolo, UMD professor of English, who will read from his popular "The Error of the Rings." Michael Pagan, jazz pianist, and Thomas Wegren, classical pianist, will also perform.

School of Fine Arts Alumni "Afterglow" Reception*

9-10 p.m., Tweed Museum of Art
Join music, art, and theater alums and faculty for a wine and cheese reception. View art exhibits and renew friendships as you view art exhibits and listen to music performed by music faculty and students.

Dance the Night Away*

9-11 p.m., Campus Locations
Rock to the sounds of Mynx, swing to the beat of The Uncola's and dance to the North Shore Big Band.

Reunion Fireworks Display*

10 p.m., UMD Softball Fields

Saturday, July 27, 1996

Glensheen Reunion for Former Student Employees, 8:30 a.m.

A "Breakfast on the Beach" is planned for all former student employees of Glensheen. Enjoy a light breakfast, meet new staff and share experiences. Breakfast is free, but registration is required. Call Glensheen at 218-724-1107, write 3300 London Rd., Duluth, MN, 55804 or email glen@ub.d.umn.edu

Department of Art Demonstration of Graphics Software & Internet

9 a.m. to noon; Campus Center 25
Graphics design faculty will demonstrate graphics software and how to access the internet.

Campus Tours*

9:30 a.m. to 11:30 a.m., meet in Kirby Lounge.

School of Business & Economics Events*

9 a.m. to noon
Alumni from the School of Business & Economics are invited to an open house reception with refreshments, facilities tours and presentations including program discussions and displays, seminars and discussions. And don't miss the alumni registry!

Department of Biology Events*

9 a.m. to noon, Life Science Building
Enjoy department open house, poster exhibits, tours and alumni reception. Tours, exhibits and reception to highlight current programs and initiatives in research, teaching and outreach in the department. An exhibit is also planned on departmental history.

All-Class Reunion Fun Run

9 a.m.
Strut your stuff at the 5K All-Class Reunion Fun Run around campus. Runners and walkers will take off from the Sports and Health Center. The \$15 registration fee includes a t-shirt. Registration is available on the reunion form.

Bulldog Shop Alumni Discount*

9 a.m. to 1 p.m.
To celebrate the reunion, the UMD Bulldog Shop would like to pass on a special discount to UMD alumni on any one clothing item in the Bulldog Shop. The discount will be determined by the number of years ago that the alumnus graduated. A 50-year alumnus would receive a 50 percent discount on any one clothing item, a 25-year alumnus would receive a 25 percent discount, and so on. Alumni must present their official reunion name badge to receive this special discount.

UMD #1 Pin in Main Street Store*

9 a.m. to 1 p.m.
Stop in the UMD Main Street Store on Saturday between 9 a.m. and 1 p.m. and receive a "UMD #1" pin. Alumni must present their official reunion name badge to receive the pin. Supplies limited.

Department of Chemistry Events*

9 a.m. to noon
Chemistry faculty will welcome alumni at a reception. There will be a panel discussion on "Chemistry — Past, Present and Future" and an opportunity to tour the Chemistry Building. Faculty will present slides combining chemistry and international travel.

Department of Chemical Engineering Open House*

9 a.m. to noon, 207 Engineering Building
Chemical Engineering will sponsor an open house and laboratory tours. The tours will highlight recent senior design activity including participation in the 1996 National Environmental Design Contest in Las Cruces, New Mexico.

Department of Intercollegiate Athletics*

9 a.m. to noon

Former athletes and coaches can visit with coaches, staff and athletes in the Hall of Fame Room, 101 Multi-purpose Building, and tour the facilities.

Archaeometry Laboratory Tours*

9 a.m. to noon

Alumni are invited to tour ArchLab facilities in 214 Research Laboratory Building. Participants will see an archaeology research center with projects currently in Greece, Turkey, Cyprus, Egypt, China and Minnesota.

Department of Geology Events

Open House: 9 a.m. to noon, 229 Heller Hall*

Come to the Geology Department's open house and tour the facilities. Most of the faculty will be there to reminisce and to show you the expanded computer lab, new x-ray machine, analytical capabilities and plans for a hydro lab.

Field Trip: 2 p.m.

Geology faculty members will lead a field trip for alumni and their families to local points of interest.

Picnic: 5:30 p.m.

The Geology Department will also host a picnic at Lester Park starting at 5:30 p.m. For planning and budget purposes, please contact the Geology Department if you are interested in the field trip and/or the picnic at 218-726-7238 or email geol@d.umn.edu

Department of Mathematics & Statistics*

9 a.m. to noon, Campus Center

See presentations by students and/or faculty on current research projects.

Department of Electrical & Computer Engineering Harbor Cruise

9 a.m. to noon

A Harbor Cruise with continental breakfast is being planned. For more information, call Carol Skoglund at 218-726-6147.

Department of Communication Reception*

9:30 a.m. to 11 a.m., Garden Room

Meet the current Communication faculty and reminisce with old friends.

Department of Industrial Engineering Events*

9:30-11:30 a.m.; noon to 4 p.m., Engineering Building

Industrial Engineering will host an open house in the morning focusing on the development of new laboratories and semester curriculum in the Engineering Building and Voss-Kovach Hall. Network, picnic and play in the sun on the shore of Lake Superior at an afternoon picnic at Alden Kendall's Park Point home. Details will be sent in special mailing to alums.

Department of Computer Science Reception*

10 a.m. to noon, 320 Heller Hall

The Computer Science faculty will host a reception for its alumni.

Department of History Lectures*

10-10:40 a.m. : "The Current Situation in Africa," Nkasa Yelengi, ABAH 225.

11 a.m. to noon: "New Perspectives on Lincoln," William Miller, ABAH 225.

Department of Sociology-Anthropology Reunion*

9:30-11:30 a.m., Ballroom A

Enjoy a light breakfast at a "get together" with alumni, faculty and internship supervisors. We will be inviting supervisors of criminology and sociology internships to join us. Invite your intern supervisor and let us know who you have contacted for the guest list. Contact Darlene Lind at 218-726-7551; email: socanth@d.umn.edu or Bill Fleischman at 218-726-7557; email: wfleisch@d.umn.edu

College of Liberal Arts*

11 a.m.

An Ethics and Public Policy Lecture/Roundtable is being organized by Dennis Cole in the College of Liberal Arts. Location to be determined.

All-Class Reunion Luncheon/Awards Program*

Noon, Kirby Ballroom

Meet UMD Chancellor Kathryn A. Martin at the special All-Class Reunion Lunch.

After the lunch, the UMD Alumni Association Awards will be presented.

College of Liberal Arts Reunion*

2 p.m., location to be determined.

Displays and updates will highlight the College of Liberal Arts Reunion.

Alumni Night with the Duluth Dukes

7 p.m., Wade Stadium in West Duluth

It's UMD Alumni Night when the Duluth Dukes take on Winnipeg. Special discount tickets of \$4.50 each are available on the reunion registration form.

Sunday, July 28, 1996

Lutheran Campus Ministry Worship Service*

10:30 a.m., Kirby Rafters

All are welcome at this gathering of alumni and friends of Lutheran Campus Ministry and the Lutheran Student Association.

* Included in Reunion Registration Fee

The University of Minnesota is an equal opportunity educator and employer.
