— LEADERSHIP LETTER —

From the Chancellor

I guess I should not have said anything about the nice winter. Sorry, --I will never write about our weather the rest of the season. It certainly is a little chilly in northwest Minnesota now.

Lunar New Year

12. As a campus, our International Programs will be having a Zoom social from 8-10 a.m. and an art installation in the leadership room from 10-11 a.m. both on Friday. We are excited to celebrate the tradition of many of our students.

Family Jokes

The last several years my kids, their spouses and my husband and I have shared a family "What's App." In the daily conversations there are usually some math quizzes (as a bunch of them are engineers) or who can find the misuse of the word, what is going on in the family, interesting news articles, trends, etc. Sometimes we get philosophical and for a while it was political commentary. Although we had to call that one out of bounds after our family became about as divided as the nation. Everyday there are usually some "bad Dad jokes," someone has seen or gleaned or even thought up. Sometimes the jokes are such groaners they just need to be shared some more. Here are a few that have been circulating among our family.

Be careful what you eat at Sam & Ella's diner.

Lego store re-opens after lockdown. Folks lined up for blocks.

I am reading a book called "Quick Money for Dummies," by Robin Banks

When you teach a wolf to meditate he becomes aware wolf.

If you have to wear both a mask and glasses, you may be entitled to condensation.

My son wants to study burrowing rodents. I told him to gopher it.

Ghosts like to ride in elevators because it lifts their spirits

I pulled a muscle digging for gold. Just a miner injury.

Other times we make them up. For instance my son-in-law said they had a serious leek under their sink. He is British and sometimes they spell things differently, so immediately I went into the empathy mode...until I saw what he shared. He got me on this one,

Sometimes it is whimsical and just plain silly, such as what greeted me the other morning when I got back from the gym. This was on my made-up bed. Ma and Pa pillow ready for the cold weather.

Life is too short to not smile, laugh and have fun. I invite you to build upon the positive in these difficult times. As our recently retired Tim Menard said, "Go get your joy."

Best,

Chancellor Mary

EVENTS

Multicultural Education Presents: Conversations about Race over Coffee

To celebrate Black History Month, join us on Zoom as we continue our conversations about race in America. Each week, we'll talk about race, allyship, and ways we can all work toward understanding one another.

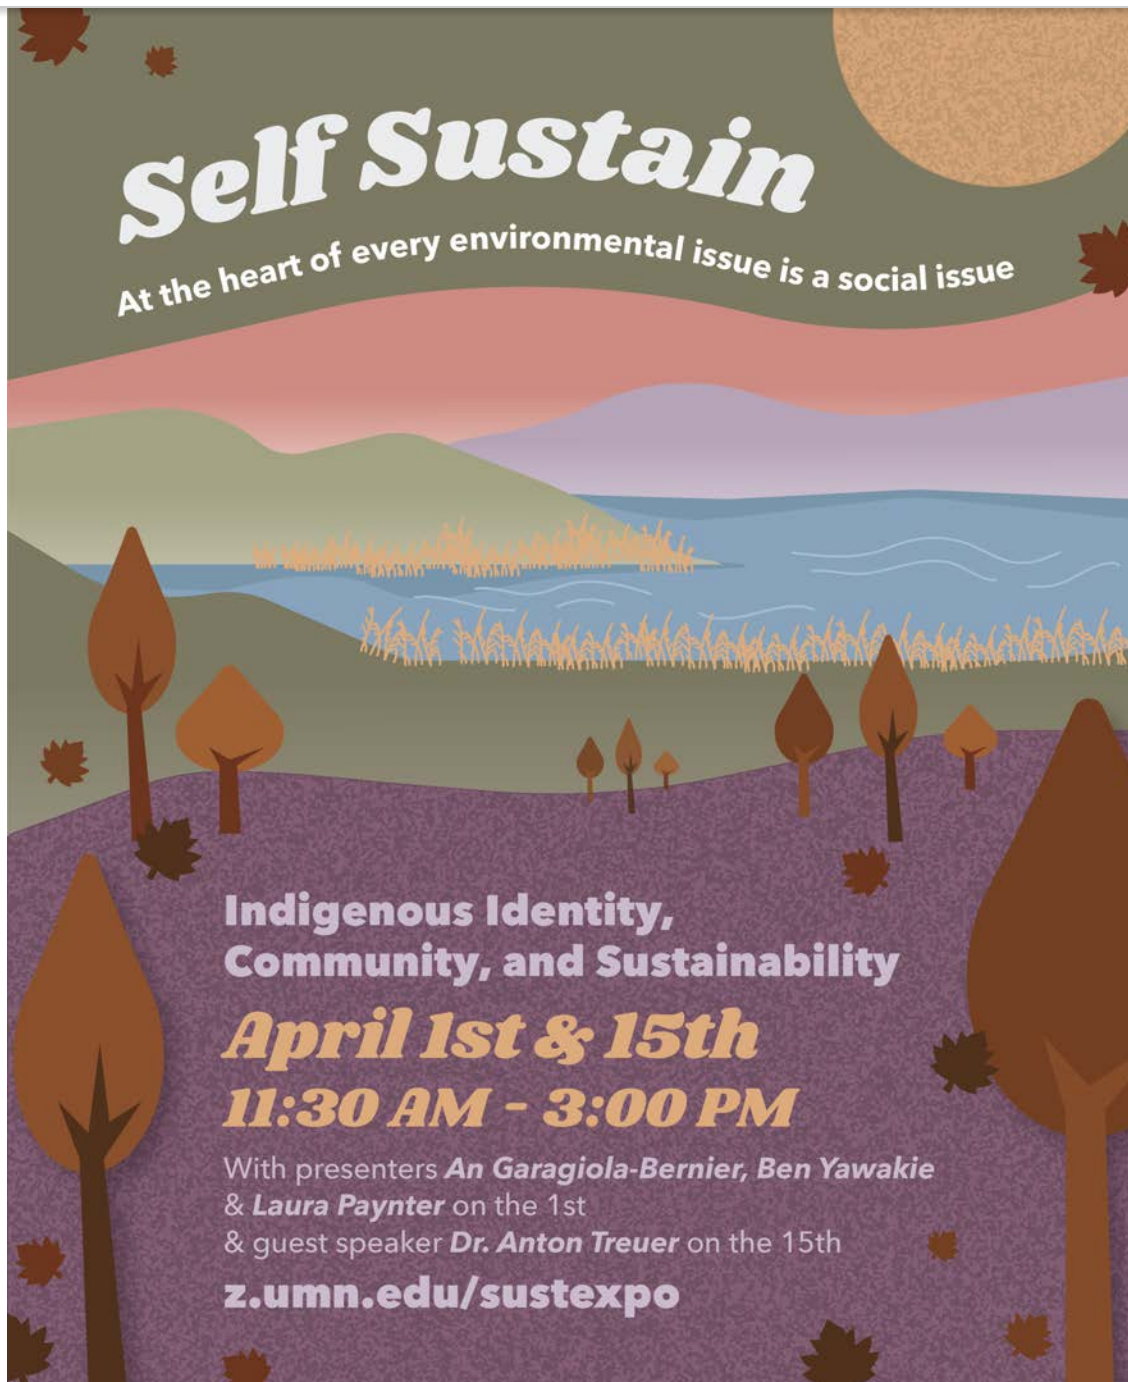

February 3: Freedom for All- To understand the present, we need to understand the past. 12pm- 1 pm

February 9: Sparks of Change- This country has come a long way, but we still have a long way to go. 12pm-1pm

February 17: Dismantling Racism- Where do we go from here, and how can we work together as allies for a better future? 12pm-1pm

Zoom ID: 910 2803 9693 Passcode: QhyG49

Zoom Link: https://umn.zoom.us/j/91028039693?pwd=ck9iL0VLUzJaUVZ6QnhvR1hHY3dPQT09

Self Sustain

At the heart of every environmental issue is a social issue

Indigenous Identity, Community, and Sustainability

April 1st & 15th

11:30 AM - 3:00 PM

With presenters *An Garagiola-Bernier, Ben Yawakie*
& *Laura Paynter* on the 1st
& guest speaker *Dr. Anton Treuer* on the 15th

Lunar New Year Celebration

Join us in ushering in the Year of the Ox! The Lunar New Year falls on Friday, February 12, this year and spans a total of 15 days. It is also called Chinese New Year, Korean New Year, Spring Festival, or Tet. Customs differ slightly in each Asian country, but the basic

receive lucky money in red envelopes from their parents.

International Programs will celebrate this day with an art installation in the Leadership Room between 10-11 a.m. on Friday, February 12. You will learn about the traditions of the festival, watch a fireworks display on virtual reality, discover what feng shui masters predict for you in the Year of the Ox, tie an auspicious knot, pick up an ox character carved on soapstone and printed on rice paper, get your name written in on rice paper, taste a pineapple shortcake, and bring home a red lucky envelope!

In addition, we will have a zoom social from 8-10 a.m. on Friday, February 12, where we hope to meet our alumni, online students, and partner institutions. If you are able to join us, here is the zoom link: <https://umn.zoom.us/j/99603294363>

<https://z.umn.edu/springfestival>

Watch this slideshow for more information regarding the spring Festival.

From Technology Support Services

Last spring, the Office of Information Technology (OIT) began rolling out a systemwide outgoing email security requirement (DMARC). OIT is continuing this implementation and starting February 11 all emails that are not DMARC compliant, those that are currently displaying [UNVERIFIED] in the subject line will be moved to the receiver's spam folder.

Note: monthly OIT reporting demonstrated that only a small number (about 10-12) of Crookston emails were identified as not compliant with DMARC standards.

If you have questions, contact the UMN Crookston Computer Help Desk, umchelp@crk.umn.edu or (218) 281-8000.

Athletics Update

The Golden Eagle women's basketball team played a close game Saturday against No. 6 University of Minnesota Duluth. UMN Crookston cut the lead down to two points with 1:26 left in the game. The Golden Eagles ultimately lost 72-64 on Saturday and 67-45 on Friday to the Bulldogs. Minnesota Crookston will hit the road for the last time this season to take on St. Cloud State University Friday, February 12 at 6 p.m., and Saturday, February 13 at 4 p.m. The Golden Eagles are currently 3-9 on the season. Freshman Jes Mertens (Devils Lake, N.D.) ranks ninth in NCAA Division II in steals and sixth for steals per game.

The Minnesota Crookston men's basketball team lost two games at University of Minnesota Duluth last weekend. The Golden Eagles return home for a final time this season to take on St. Cloud State University Friday, February 12 at 5:30 p.m., and Saturday, February 13 at 1:30 p.m. Saturday's game will be the final home game for senior Ibu Jasey-Demba. You can follow the basketball games this weekend for both the men and women on the NSIC Network.

The Golden Eagle hockey team is ranked 18th out of nearly 200 ACHA Division II teams. UMN Crookston is 2-5 on the season. Minnesota Crookston fell 5-2 to No. 1 UMary Saturday and 9-1 on Sunday. The Golden Eagles will hit the road to take on Williston State College in Williston, N.D., Friday and Saturday.

The Golden Eagle tennis team competes against University of Mary and Minnesota State University Moorhead Saturday and Sunday in Virginia, Minn.

UMN Crookston's softball team will lift the lid on the 2021 season on Wednesday, February 10. The Golden Eagles will take on University of Jamestown and Bemidji State University

The Minnesota Crookston equestrian team opens up the 2021 season this weekend. The Golden Eagle hunt seat equestrian squad will compete at an NCEA meet at the University of Tennessee at Martin Friday, February 12.

From Office of Public Engagement

2021 Dr. Martin Luther King, Jr. Community Service Pledge Drive

In recognition of Dr. Martin Luther King, Jr.'s legacy of service and the University of Minnesota's mission of public engagement to advance the common good, the Office for Public Engagement is hosting the 2021 University of Minnesota Martin Luther King, Jr. Community Service Pledge Drive. Inspired by the National Day of Service, this system-wide community service campaign promotes opportunities for faculty, staff, students, alumni, and retirees to conduct virtual and remote activities that serve and benefit our neighbors and communities. In addition to their pledge drive contributions, staff and faculty who participate in the University's Wellbeing Program can earn up to 150 Wellbeing Points through volunteering. [Learn more.](#)

HIGHLIGHTS

Kylene (Odegaard) Lehmann 2001 (right) and Cindy Bigger 1979 (left)

Alumni Profile: Kylene (Odegaard) Lehmann

Growing up in Crookston, Minn., she knew she wanted to work in the field of agriculture. Kylene (Odegaard) Lehmann, daughter of Roger and Gail Odegaard, graduated from UMN Crookston in 2001 with a bachelor of science degree in plant industries management with

"I previously worked for both the Minnesota and the South Dakota Cooperative Extension Services as an extension educator and spent the bulk of my professional career at RiverView Health in Crookston as their volunteer coordinator," says Lehmann. While living in Crookston she worked with healthcare volunteers and facilitated RiverView Health Auxiliary, a group dedicated to fundraising for projects that would enhance patient care experiences.

Lehmann and her husband, Darin, live in Staples, Minn., with their four children, Otto, 13; Sena, 11; Hank, 8; and Tryg, 5. "I stayed at home raising our kids while they were little and once our youngest started pre-school I started working for the Verndale Public School System as a substitute teacher (Go Pirates!)," she stated. "I've kept pretty close ties to the agriculture industry and ag education through my volunteer work," she says. Currently she is the secretary of the Wadena County Ag Society/Wadena County Fair Board. "I'm so excited to be involved in a project building an FFA barnyard on the grounds to add another layer of ag education into our County Fair. My husband and I are also the adult leaders of our kids 4-H club". Lehmann loves rural living and farm life and is very passionate about volunteerism and philanthropy stating, "helping my community not only to succeed, but to prosper."

Lehmann's niece, Karlie Brekken, is the fourth generation in her family to attend the Crookston campus, with her dad, Roger Odegaard, graduating from the Northwest School of Agriculture in 1960 and his uncles, Wilbur and Harold Peterson, attended the NWSA in the 1930s. "It's possible we may be genetically predisposed to love this campus," Lehmann enthusiastically states.

While in high school, I was familiar with UMN Crookston. As a Crookston native she knew Dave Hoff and Professor Marv Mattson. She entered her freshman year as an ag business major and enjoyed the soils and agronomy classes so much that somewhere along the way, she switched her major to plant industries management with an emphasis in agronomy

Lehmann interned with the Minnesota Association of Wheat Growers and the University of Minnesota Extension Service in Red Lake Falls, Minn. It was a joint internship where she worked with both agricultural research and public relations. "I found that I preferred working with people much more than working with data, and that helped to direct the remainder of my education, leading me to a master's degree at Oklahoma State University," she says.

"UMN Crookston faculty and staff were so supportive of students and always helped to find a solution to any problem, she said, whether it was academic or personal." Richard Nelson, Ph.D., Michelle Christopherson, and Sharon Neet, Ph.D., encouraged her daily, let her vent when needed without judgment, "and were not afraid to give an attitude adjustment when I needed it." It was that encouragement and strong advising foundation which helped her realize a graduate degree was indeed possible to attain. "If you look closely, you will find their names engraved in a brick in the wall by the Memorial Gardens

“When I moved back to Crookston and worked at RiverView Health, I joined Michelle Christopherson to start Maroon & Gold Friday’s. We spent many Fridays driving around Crookston with Regal Eagle, ambushing local businesses who promoted and celebrated UMN Crookston’s spirit by wearing maroon and gold.” she said. Lehmann noted it was a fun project and when she sees people, and yes, even strangers out in public wearing maroon and gold, she always gives them thumbs up. “If they are wearing UMC apparel, I usually stop them and ask if and when they went to UMC! It’s like an instant bond that we already share.”

At UMN Crookston, there are many clubs and organizations. While Lehmann was not involved in sports, she was involved with the Dairy Club, Ag-Arama Club, Agronomy Club, and SPACE (Student Programming and Activities for Campus Entertainment) committee. “I still have my ‘Ask me about tonight’s event’ shirt. I wear it to the annual funny t-shirt night our square dance club has, yes that’s right, I said square dance club.” Lehmann worked for the Northwest Research and Outreach Center in the dairy barn and helped with the INFOCON program that took place on campus teaching technology skills to area public school teachers through the former Center for Adult Learning Office under the direction of Jane Sims. As an alum, she served on the UMN Crookston Alumni Association Board.

When asked why UMN Crookston, Lehmann said, “I tell them UMC is a great choice because class sizes are small, there are many opportunities to get involved on campus, and Crookston is a safe and friendly community.” Lehmann continues to share there are a multitude of scholarship opportunities. “You get a University of Minnesota degree without the headache of getting lost on a huge campus or dealing with rush hour traffic.” Lehmann shares the faculty and staff work hard to build relationships with students and care about them excelling in everything they do and as well as the lifelong mentorships she has from her time at the University of Minnesota Crookston. “When I talk to high school seniors who plan to attend UMC, I give them my brothers’ numbers in case they get a flat tire or dead car battery and my parent’s and sister’s numbers in case they are feeling homesick and want to connect with people over a family meal,” she said. “I just can’t tell them enough good things about UMC!”

1. What were previous roles that you had held before coming to UMN Crookston?

I spent the last 8.5 years working at the UND Counseling Center. I began my time there working with students who were sanctioned for substance use violations. I transitioned into a substance use prevention coordinator through their Wellness and Health Promotion department. My last years there were focused on providing mental health counseling with specialties in stress management and trauma treatment.

2. Being from Crookston and a graduate of UMN Crookston how excited are you to be back on campus?

It has been almost two decades since I graduated from UMN Crookston and there are still staff and faculty who remember me as a student! I have always loved the friendly, helpful, and welcoming energy at UMN Crookston. I see so many friendly faces and can tell that people are smiling behind their face masks. Even though I am working remotely this semester, I have received a warm virtual welcome from so many people.

3. How did your experience as a student impact your desire to work in the field of counseling services?

I am a first generation college student and was not college-bound during high school. I decided to enroll at UMN Crookston for a semester or two because I had an Americorps scholarship. I have tremendous gratitude for the friendly, helpful, and patient staff at UMN Crookston helped me navigate hurdles that ultimately enabled me to get my bachelor's degree. College was a transformative time for me and it is transformative for our students as well. That's what makes counseling college students such a rewarding experience is that they are in a natural stage of transformation and development.

4. What are you most excited about in your new role at UMN Crookston?

There are two programs that I put a lot of effort into at UND that I'm excited to eventually recreate here at UMN Crookston. The first is a multi-issue Bystander Intervention program. The beauty of a multi-issue program is that we need to overcome the same hurdles and apply the same skills to intervene in all sorts of situations, whether that's to interrupt suicidal behavior, an alcohol overdose, a sexual assault, a bias incident, or any number of other situations. As students hear and practice the same skills for all these different situations, they will be easier to remember and easier to apply.

The other program I hope to recreate is a Managing Stress workshop series. We all need effective ways of releasing stress from our own bodies. Managing Stress allows people the opportunity to learn and practice ten different methods for reducing and releasing the physical stress, allowing us to more effectively deal with the actual stressors.

5. How do you look to impact student lives through your role?

In addition to being excited to work with students who come in for counseling, I look forward to bringing the counseling skills out to the students. So many of the skills that I work with students to develop can be learned outside of the traditional therapy session.

through our online Cognitive Behavioral Therapy platform, through outreach events, and more.

Student Profile: Nick Grams

When Minnesota Crookston announced the addition of trap shooting as a club sport in the spring of 2019, it seemed like a perfect fit. The sport of trap shooting was taking off at the high school level in Minnesota and the Golden Eagles already had many people interested in the sport right on campus.

For Nick Grams, who was a senior at Belle Plaine High School, it was the ideal match.

UMN Crookston Graduate Making History

Wemimo Abbey 2013, was featured in the New York Times for the work he is doing to help provide pandemic relief. His company, Esusu Financial, created an app Esusu Rent used by renters in affordable housing units that boosts credit scores when rent is paid on time. The firm distributed \$250,000 in interest-free loans last year to New Yorkers who couldn't make their rent. Learn more about what Abbey is doing [here](#).

Ag-Arama Follow-Up

Jess Bengston 2010, Assistant Editor Crookston Times, recaps the 46th annual Ag-Arama held last Saturday at UTOC.
