- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 21
- This program does not require summer semesters for timely completion.
- Degree: Appl Developmental Psychology PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate in applied developmental psychology allows graduate students to study and experience applications of developmental science issues, policies, and problems concerning children and child development at the local, state, and national level. Through the combination of theory and field experience, students learn how to help solve pressing real-life problems and to improve the lives of children. The 21-credit program explores such topics as ethical issues in applied developmental psychology; media and children's programming; nutrition and hunger; accidents and safety issues; children in the judicial system; the design and role of children's museums; and the development of children's toys, games, and recreational activities. Professionals in this field need to develop an in-depth understanding of how public policy affects children's lives, how to make pure research comprehensible and practical without losing its complexity, and how to work in interdisciplinary teams.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission to this program is currently suspended.

Special Application Requirements:
Admission is based primarily on the applicant's academic record, GRE scores, and research experience.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

CPSY 8360 Section 7 (2 cr) gives an overview of applied developmental science problems and provides a framework for the second two components of the program. CPSY 8301 (4 cr) and 8302 (4 cr) are the core courses in developmental psychology covering biological, cognitive, and social aspects of development. They are fundamental to understanding the developmental perspective. CPSY 8996 (5 cr) integrates and applies information learned in coursework. The course is individually designed based on each student's prior experience and interests. Students focus on practical and/or public policy applications of developmental research in settings such as the Search Institute, the Minnesota Children's Museum, the guardian ad litem program in the local courts, the Center for 4-H Youth Development, and the National Institute on Media and the Family. This field experience may be taken in one to three semesters or a summer session, but must be at least 5 credits and total 188 hours. A major paper describing the field experience and integrating relevant basic research literature with practical availability taking place in the field setting is expected. Electives (6 cr) may include 5xxx or 8xxx courses approved by the training directors and chosen to complement the student's area of interest.

Required Courses
Students must take CPSY 8360 for 2Cr. and CPSY 8996 for 5 Cr.
CPSY 8360 - Special Topics in Developmental Psychology (1.0 - 3.0 cr)
CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
CPSY 8996 - Directed Field Experiences in Child Psychology (1.0 - 6.0 cr)
Electives (6 cr) may include 5xxx or 8xxx courses approved by the training directors and chosen to complement the student's area of interest.
Twin Cities Campus

Applied Kinesiology M.Ed.

Kinesiology, School of

College of Education and Human Development

Link to a list of faculty for this program.

Contact Information:
School of Kinesiology, 220 Cooke Hall, 1900 University Avenue S.E., Minneapolis, MN 55455 (612-625-5300; fax: 612-626-7700)
Email: kin@umn.edu
Website: http://cehd.umn.edu/kin

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of education (M.Ed.) professional studies degree programs are designed to meet the needs of practicing professionals in education and human development fields. Students admitted typically have interests in improving their current professional practice and applying their education in their current work responsibilities. The M.Ed. in applied kinesiology examines human movement, physical performance, and organizational structures of sport, exercise and movement science, sport and recreation management, and physical activities for persons with disabilities. The subplans in K-12 physical education, health education, and developmental and adapted physical education prepare future educators to assume leadership roles in K-12 schools.

With guidance from faculty advisers, students choose at least 30 semester credits, which may include coursework, independent study, internships, workshops, and professional, site-based experiences. Five program options are available:
1. Sport and exercise science: general preparation in a variety of areas or in-depth preparation in one area of applied kinesiology
2. Sport management: a primary focus on the management of sport and physical activity settings
3. Developmental and adapted physical education (DAPE): prepares students for Minnesota teaching licensure in DAPE for grades preK-12
4. Physical education: designed to help students become inquiring, analytical, and reflective professional educators knowledgeable about the science of movement who are prepared for leadership roles in the schools.
5. Health education: designed to prepare students in important aspects of health and well-being and who are enthusiastic and prepared for leadership roles in the schools.

Note: Candidates for the DAPE M.Ed./additional license must hold a current Minnesota teaching license in physical education.

Accreditation
This program is accredited by National Association for Colleges of Teacher Education (NCATE).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.50.

A bachelor's degree, preferably in physical education or kinesiology.

Special Application Requirements:
Each Track has a different application due date, please see web site: http://www.cehd.umn.edu/kin/programs.asp

All applicants must submit the following items:
- Official transcripts from all postsecondary institutions the student has attended or is currently attending, except the University of Minnesota. Transcripts must be received from the issuing school in a sealed and stamped envelope, and mailed to School of Kinesiology, Cooke Hall, 1900 University Ave. Se., Minneapolis, MN 55455.
- Any student with a U.S. bachelor's degree or a comparable foreign degree from an accredited college or university may apply to
CEHD. Official transcripts of all previous post-secondary academic study must be submitted. Transcripts from coursework completed at a university outside of the United States must be evaluated by a professional credential evaluation center.

- Developmental and adapted physical education (DAPE) subplan applicants must submit a copy of current K-12 physical education license(s).

All applicants must upload or submit the following items with their online applications:
- A résumé
- A personal statement describing the applicant's career goals and rationale for interest in the M.Ed. program (limit two pages)

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan C:** Plan C requires 20 to 30 major credits and 0 to 10 credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Developmental and Adapted Physical Education**

The M.Ed. in Applied Kinesiology-Developmental and Adapted Physical Education (DAPE) subplan is designed for students who currently hold a Minnesota teaching license in physical education and who wish to expand their knowledge and experience to teaching developmental and adapted physical education.

The M.Ed. in Applied Kinesiology -- DAPE subplan requires a minimum of 30 graduate-level credits. Students who currently have their Minnesota teaching license in physical education generally obtain their additional license in DAPE in the School of Kinesiology and take an additional 7 course credits to earn the M.Ed. Students must maintain a 3.0 GPA.

**DAPE Required Courses**

The M.Ed. requires 16 credits of Kinesiology courses, 13 credits of Educational Psychology courses, and 1 elective credit. Students register for 4 credits of KIN 5196 and 3 credits of KIN 5995.

**Required Kinesiology Courses**

- **KIN 5103** - Developmental/Adapted Physical Education (3.0 cr)
- **KIN 5104** - Physical Activities for Persons with Disabilities (3.0 cr)
- **KIN 5196** - Practicum: Developmental/Adapted Physical Education (1.0 - 4.0 cr)
- **KIN 5995** - Research Problems in Applied Kinesiology (1.0 - 6.0 cr)

Take either KIN 4981 or KIN 5981 in consultation with adviser.
- **KIN 4981** - Understanding Kinesiology Research (3.0 cr)
- or **KIN 5981** - Research Methodology in Kinesiology, Recreation, and Sport (3.0 cr)

**Required Educational Psychology Courses**

- **EPSY 5613** - Foundations of Special Education I (3.0 cr)
- **EPSY 5614** - Assessment and Due Process in Special Education (4.0 cr)
EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)

Elective courses
Students must take a minimum of 1 additional course credit in Kinesiology in consultation with adviser. An elective course taken outside Kinesiology must be approved by the adviser.

Physical Education
The physical education initial licensure program at the University of Minnesota is designed to help students become inquiring, analytical, and reflective educators with a strong experiential base on which to apply the principles and methods learned in their University courses. This program has a subset of prerequisite courses. Contact the School of Kinesiology for more information.

The Master of education (M.Ed.)/initial licensure program is for individuals with bachelor's degrees who wish to become licensed teachers. This graduate-level program provides rigorous, professional teacher preparation in accordance with the Minnesota Standards for Effective Practice for Teachers and the Physical Education Content Standards adopted by the Minnesota Board of Teaching.

Required Core Coursework
Students take 21 credits of kinesiology courses in pedagogical and theoretical foundations of education, curriculum, and clinical experience. Courses required are listed below and should be taken in consultation with the adviser. Students must register for 4 credits of KIN 6598 and 2 credits of KIN 5995.

KIN 6151 - Theoretical Foundations of Curriculum and Instruction in Physical Education (2.0 cr)
KIN 6521 - Pedagogy I: Elementary Physical Education (4.0 cr)
KIN 6522 - Pedagogy II: Secondary Physical Education (4.0 cr)
KIN 6598 - Clinical Experience III: Physical Education (2.0 - 6.0 cr)
KIN 5152 - Curriculum Development in Physical Education (2.0 cr)
KIN 5995 - Research Problems in Applied Kinesiology (1.0 - 6.0 cr)
Take either KIN 4981 or KIN 5981 in consultation with adviser.

KIN 4981 - Understanding Kinesiology Research (3.0 cr)
or KIN 5981 - Research Methodology in Kinesiology, Recreation, and Sport (3.0 cr)

Elective Courses
Students take 9 credits of elective coursework in consultation with the adviser.

Health Education
The health education initial licensure program is designed to help students become inquiring, analytical, and reflective professional educators in health and health-related issues. The program seeks to develop thoughtful practitioners who can respond to the latest developments related to health and well-being and who are enthusiastic and prepared for leadership roles in the schools.

Master of education (M.Ed.)/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with the Minnesota Standards for Effective Practice for Teachers and the Physical Education Content Standards adopted by the Minnesota Board of Teaching.

Teachers who are currently licensed by the state of Minnesota may obtain a Health Education Additional License offered by the School of Kinesiology.

The M.Ed. in Applied Kinesiology -- Health Education subplan requires a minimum of 30 graduate-level credits. Students must maintain a 3.0 GPA. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education. For more information on the initial licensure program, go to the School of Kinesiology website.

Required Core Courses
Students take 22 credits of kinesiology courses in theoretical foundations of health education, curriculum, and clinical experience. Courses required are listed below and should be taken in consultation with the adviser. Students must register for 4 credits of KIN 6202 and 2 credits of KIN 5995.

KIN 5201 - Health Education Foundations (3.0 cr)
KIN 5202 - Current Issues in Health (2.0 cr)
KIN 5203 - Health Media, Consumerism, and Communication (2.0 cr)
KIN 5204 - Methods in Health Education (3.0 cr)
KIN 5205 - Health Education Curriculum (3.0 cr)
KIN 6202 - Clinical Experience II: Health Education (2.0 - 6.0 cr)
KIN 5995 - Research Problems in Applied Kinesiology (1.0 - 6.0 cr)
Take either KIN 4981 or KIN 5981 in consultation with adviser.
KIN 4981 - Understanding Kinesiology Research (3.0 cr)
or KIN 5981 - Research Methodology in Kinesiology, Recreation, and Sport (3.0 cr)

Elective Courses
Students take 8 credits of elective coursework in consultation with the adviser.

Sport and Exercise Science: Professional Studies
Students will complete a total of 30 course credits, including a minimum of 20 kinesiology course credits and a maximum of 10 credits of non-KIN electives. This emphasis has three concentrations: Sport Performance, Athletic Training, and Health Promotion. A maximum total of 9 credits of 4xxx-level courses are allowed with adviser's consent. Students must maintain a minimum 3.0 GPA.

Required Courses
Students must consult with their adviser to determine their appropriate concentration and coursework. All concentrations require the following courses. Students register for 4 credits of KIN 5995.
KIN 4981 - Understanding Kinesiology Research (3.0 cr)
KIN 5995 - Research Problems in Applied Kinesiology (1.0 - 6.0 cr)

Recommended KIN Elective Courses
A minimum of 13 credits should be chosen from the following list with adviser consultation. KIN 5720, KIN 5992 and KIN 5696 are limited to 3-4 credits.
KIN 4385 - Exercise Physiology (4.0 cr)
or KIN 4641 - Training and Conditioning for Sport (3.0 cr)
or KIN 4520 - Current Topics in Kinesiology (2.0 - 4.0 cr)
or KIN 4741 - Strength and Power Development and Program Design (3.0 cr)
or KIN 4841 - Athletic Performance and Environmental Considerations (3.0 cr)
or KIN 4941 - Applied Sport Science (3.0 cr)
or KIN 5122 - Applied Exercise Physiology (3.0 cr)
or KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
or KIN 5136 - Psychology of Coaching (3.0 cr)
or KIN 5142 - Applied Sport Nutrition for Athletic Performance (3.0 cr)
or KIN 5202 - Current Issues in Health (2.0 cr)
or KIN 5203 - Health Media, Consumerism, and Communication (2.0 cr)
or KIN 5371 - Sport and Society (3.0 cr)
or KIN 5375 - Competitive Sport for Children and Youth (3.0 cr)
or KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
or KIN 5641 - Scientific Theory and Application of Training and Conditioning in Sport (3.0 cr)
or KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
or KIN 5723 - Psychology of Sport Injury (3.0 cr)
or KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)
or KIN 5992 - Readings in Kinesiology (1.0 - 9.0 cr)
or KIN 5696 - Practicum in Kinesiology (1.0 - 6.0 cr)

Recommended non-KIN electives
A maximum of 10 credits of non-KIN courses may be taken. Students should consult with their adviser to determine the most appropriate courses based on academic background and future career goals.
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PHSL 5444 - Muscle (3.0 cr)
or PHAR 5201 - Applied Health Sciences Terminology (2.0 cr)
or PHAR 5205 - Obesity: Issues, Interventions, Innovations (2.0 cr)
or PHAR 5206 - Applied Health Literacy and Communication (3.0 cr)

Sport Management: Professional Studies
Students will complete a total of 30 credits, including 22 core course requirements and a minimum of 8 electives. Required courses will provide students with a well-balanced perspective of the industry; multiple options in elective courses allow students to focus on topics they find applicable and interesting in relation to the sport and physical activity industry. Students must maintain a minimum 3.0 GPA.

Required Courses
Students must register for 3 credits of KIN 5995, which must be taken in the last semester of study.
KIN 5421 - Sport Finance (3.0 cr)
KIN 5601 - Sport Management Ethics and Policy (3.0 cr)
KIN 5631 - Programming and Promotion in Sport (3.0 cr)
KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)
KIN 5801 - Legal Aspects of Sport and Recreation (4.0 cr)
KIN 5995 - Research Problems in Applied Kinesiology (1.0 - 6.0 cr)
Must be taken prior to KIN 5995:
KIN 4981 - Understanding Kinesiology Research (3.0 cr)
or KIN 5981 - Research Methodology in Kinesiology, Recreation, and Sport (3.0 cr)

Elective Courses
Students choose a minimum of 8 elective credits in consultation with adviser. Recommended electives are listed, however one (1) course may be selected from outside Kinesiology, such as in the Department of Organizational Leadership, Policy and Development or Carlson School of Management. KIN 5461 is required for students without baseline knowledge of sport management. KIN 5720 is limited to 3-4 credits.
KIN 5111 - Sports Facilities (3.0 cr)
KIN 5115 - Event Management in Sport (3.0 cr)
KIN 5371 - Sport and Society (3.0 cr)
KIN 5461 - Issues in the Sport Industry (3.0 cr)
KIN 5511 - Sport and Gender (3.0 cr)
KIN 5804 - National Collegiate Athletic Association (NCAA) Compliance (2.0 cr)
KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
**Twin Cities Campus**

Autism Spectrum Disorders Postbaccalaureate Certificate

*Educational Psychology*

College of Education and Human Development

Link to a list of faculty for this program.

**Contact Information:**
Department of Educational Psychology, 250 Educational Science Building, 56 East River Road, Minneapolis, MN 55455 (612-624-6083; fax: 612-624-8241).
Email: sped-adm@umn.edu
Website: [http://www.cehd.umn.edu/edpsych/Programs/SpecialEd/certificate/Autism.html](http://www.cehd.umn.edu/edpsych/Programs/SpecialEd/certificate/Autism.html)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 13
- This program does not require summer semesters for timely completion.
- Degree: Autism Spectrum Disorder Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate program in autism spectrum disorders (ASD) is designed to prepare teachers and related service personnel to design and deliver services to children and youth with ASD and their families.

ASD are developmental disorders of neurobiological origin that can affect intellectual functioning, social abilities, and language and communication skills.

This 13-credit program offers specialized training in methods of assessment, intervention, and treatment evaluation. This program offers professional development opportunities for autism resource specialists, public and private social service agency staff, personnel at public and private schools, treatment facility personnel, and psychology and education professionals.

**Program Delivery**

This program is available:

- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 2.80.

Other requirements to be completed before admission:

International students wishing to complete the certificate must be admitted to a degree program at the University of Minnesota Twin Cities campus. Graduate applicants must have a minimum 2.80 GPA in an undergraduate degree and 3.00 in graduate coursework from accredited institutions.

**Special Application Requirements:**
All applicants must submit the following materials:
- Two letters of recommendation on letterhead stationery from individuals who can address the applicant's abilities to work in a professional context with this population
- Typed goal statement (no more than one page)
- Completed application
- Transcripts from all postsecondary institutions attended or currently attending, except the University of Minnesota. For students not currently in a University of Minnesota program, transcripts must be received from the issuing school in a sealed and stamped envelope.
- Foreign transcript evaluation (if applicable) from an accredited reviewer (ECS [http://www.ece.org/](http://www.ece.org/) or WES [http://www.wes.org/students/index.asp](http://www.wes.org/students/index.asp)).

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
IELTS
- Total Score: 6.5
MELAB
- Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

All coursework must be completed for the certificate. Students will have a maximum of four years to do so from the moment of admission. Students must maintain a minimum 3.00 GPA in certificate coursework to remain in the program.

Required Coursework
Students must complete the following coursework (13 credits).

EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
EPSY 5632 - Module 2: Evidence-based Methods for AAC Assessment and Intervention (2.0 cr)
EPSY 5633 - Module 3: Speech-generating Devices and High-Tech AAC (1.0 cr)
EPSY 5661 - Introduction to Autism Spectrum Disorder (3.0 cr)
EPSY 5663 - Assessment and Intervention for Individuals with Autism Spectrum Disorders (3.0 cr)

• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
This program no longer accepts new students

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 14 to 30 major credits and 0 to 16 credits outside the major. The is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Required Coursework
NOTE: 6 credits of other program related courses must be taken if these requirements have already been completed. An additional course option (OLPD 5425) in lieu of OLPD 5475 used to be available but is no longer offered by OLPD. Number of credits of OLPD 5476 determined by adviser. Related coursework and elective options determined in consultation with adviser and based on student's subplan where applicable.

OLPD 5405 - Critical Issues in Business and Industry (3.0 cr)
OLPD 5475 - Curriculum Development for Business and Marketing Education (3.0 cr)
OLPD 5476 - Field Based Projects in Business and Industry (1.0 - 4.0 cr)
OLPD 5496 - Occupational Experience in Business and Industry (1.0 - 10.0 cr)
OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)
10 credits of 5xxx courses consistent with the student's focus area to be chosen in consultation with an adviser.
Electives as needed to reach 30 credits total with adviser approval
Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Business and Marketing Education
Sub-plan used to help adviser and student determine courses taken to meet the 10 credits of 5xxx-level coursework and elective requirements.

Industrial Education
Sub-plan used to help adviser and student determine courses taken to meet the 10 credits of 5xxx-level coursework and elective requirements.

Postbaccalaureate B.M.E.
Sub-plan used to help adviser and student determine courses taken to meet the 10 credits of 5xxx-level coursework and elective requirements.

Postbaccalaureate Ind
Sub-plan used to help adviser and student determine courses taken to meet the 10 credits of 5xxx-level coursework and elective requirements.

- This program does not require summer semesters for timely completion.
- Degree: Technical Education PBacc Certificate Grad

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This certificate is designed for current instructors and those preparing to instruct in technical and community college settings, or individuals seeking a credential for workplace advancement.

Completion of Teacher Education Series (TES) requirements for this certificate program prepares students for state teaching licensure in secondary and postsecondary career and technical education. Licensure is granted by the Minnesota State Colleges and Universities (MnSCU) system and the Minnesota Department of Education (MDE).

Seventy-five percent of the certificate coursework must be completed at the University of Minnesota. Most courses will be offered on the University's Twin Cities campus, but additional courses may be offered elsewhere.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Applications are reviewed on an ongoing basis and may be submitted at any time.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

A 12-credit Regents-approved career and technical education certificate is available to students who wish to obtain a credential after completing the Teacher Education Series (TES) and approved electives.

Required courses
Minimum 8-10 credits
Students must complete the four required TES courses, listed below. For participants with no previous pedagogy courses, an additional 2 credit graduate level course related to pedagogy determined in consultation with the adviser will be required, but can be waived for those with previous pedagogy training or experience.
OLPD 5806 - Philosophy and Practice of Career and Technical Education (2.0 cr)
OLPD 5808 - Student and Trainee Assessment (2.0 cr)
OLPD 5829 - Course Development for Business and Industry (2.0 cr)
OLPD 5861 - Instructional Methods for Business and Industry (2.0 cr)

Students are encouraged to consult faculty adviser about appropriate elective course(s) to complete the program's 12-credit requirement. Elective courses must be approved by a faculty adviser.

Contact Information:
Institute of Child Development, 154 Child Development Building, 51 East River Parkway, Minneapolis, MN 55455 (612-624-0526; fax: 612-624-6373)
Website: http://www.cehd.umn.edu/icd

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The Institute of Child Development does not offer admission for this master's degree. Students may choose to complete this master's degree (typically Plan B) during their progress toward the Ph.D. See the Child Psychology Ph.D. for more information.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 16 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 16 major credits and up to null credits outside the major. The final exam is written. A capstone project is required.
Capstone Project: The Plan B project is written.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Plan A requires a minimum of 20 course credits (a minimum of 16 in the child psychology major and 4 additional credits chosen with the adviser) and 10 thesis credits. Plan B requires 30 course credits (a minimum of 16 credits in the child psychology major, 6 additional credits chosen with the adviser, and 8 credits of CPSY 8994 for the plan B project). A plan B project equivalent to 120 hours of work is required.

Major Courses
- CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
- CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
- CPSY 8311 - Landmark Issues and Great Controversies in Child Development (2.0 cr)
- EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
- EPSY 8252 - Methods in Data Analysis for Educational Research II (3.0 cr)

Additional Credits As Needed, Selected with Adviser
Plan A
Take 10 or more credit(s) from the following:
• CPSY 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B
Take 8 or more credit(s) from the following:
• CPSY 8994 - Research Problems in Child Psychology (1.0 - 6.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.
Twin Cities Campus
Child Psychology Minor
Institute of Child Development
College of Education and Human Development

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students majoring in other fields may complete a doctoral minor in child psychology. Contact the Institute of Child Development for more information.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Please contact the child psychology director of graduate studies prior to declaring this minor.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctoral
Required Courses
- CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
- CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
- CPSY 8996 - Directed Field Experiences in Child Psychology (1.0 - 6.0 cr)

Remaining credits can be taken from CPSY 4xxx (subject to their major program's approval) or CPSY 8xxx courses.
Twin Cities Campus
Child Psychology Ph.D.
Institute of Child Development
College of Education and Human Development

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 68
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Ph.D. in child psychology focuses primarily on training for research in normal human development, and most students take positions in academic or research settings. The goal of the program is to train all students for careers in research and college teaching in child psychology, and to prepare students in the collaborative program options for careers in applied areas of child psychology, as well. General program students may choose to specialize in an area such as cognitive neuroscience, language, learning, personality, memory, perception, psychobiology, or social development. Students interested in clinical research may specialize in developmental psychopathology and clinical science through participation in the developmental psychopathology and clinical science (DPCS) training program. DPCS training is a cooperative effort between the Institute of Child Development and the Department of Psychology to instruct leaders in research and teaching. DPCS training draws on the unique strengths of each program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
The equivalent of three semester (or four quarter) courses in psychology and one course in statistics are required.

New students are normally admitted in fall semester. Application deadline is December 1st of the preceding year. Applicants must submit, via the online application system, a departmental application for graduate work, scores from the General Test of the GRE that are less than five years old, three letters of recommendation from persons familiar with their scholarship and research potential, a complete set of unofficial transcripts, and a clearly written statement of career interests, goals, and objectives. The three letters of recommendation also must be received by the deadline. The TOEFL should be submitted when applicable. Official transcripts are only required if an offer of admission is made. For full application instructions see: http://www.cehd.umn.edu/icd/FutureStudents/CPSY/Graduate/.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
44 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The Ph.D. degree usually requires five years of graduate work. Major program components include coursework, research activities, and teaching experience. Coursework requirements are specialization specific, but all students are required to take 44 credits in the major and 24 thesis credits.

Each student specializes in an area such as social and personality development, learning, cognitive development, cognitive neuroscience, language development, psychobiology, or perceptual development.

Major Program Coursework
CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
CPSY 8311 - Landmark Issues and Great Controversies in Child Development (2.0 cr)
CPSY 8321 - Seminar in Teaching Developmental Psychology (1.0 cr)
CPSY 8322 - Apprenticeship in Teaching Developmental Psychology (1.0 - 3.0 cr)

Special Topics and Advanced Seminars (5 credits minimum)
Take 5 or more credit(s) from the following:
• CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
• CPSY 8660 - Advanced Developmental Psychology (1.0 - 4.0 cr)

Statistical Analysis
EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
EPSY 8252 - Methods in Data Analysis for Educational Research II (3.0 cr)

Research Credits (14 credits minimum)
Take 14 or more credit(s) from the following:
• CPSY 8994 - Research Problems in Child Psychology (1.0 - 6.0 cr)

Additional Credits as Needed, Selected with Adviser

Thesis Credits
Take exactly 24 credit(s) from the following:
• CPSY 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Clinical Physiology and Movement Science Minor
Kinesiology, School of
College of Education and Human Development

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master's or doctoral minor in clinical physiology and movement science is an innovative free-standing graduate minor that is available to University of Minnesota graduate students. Offering a uniquely interdisciplinary program in a new, emerging field of study, the minor is designed for graduate students in clinical, engineering, nursing, public health, and medical fields who are interested in the clinical aspects of physiology and movement science. The interdisciplinary coursework combines physiology and movement science with clinical skills for research and the diagnosis and assessment of disease conditions. Developed by faculty with rich collective expertise from across the University, the minor offers students a choice of two tracks: clinical physiology or clinical movement science.

The minor is attractive to graduate students seeking a Ph.D. or master's degree in kinesiology, rehabilitation sciences, and the speech and hearing sciences; in biomedical or mechanical engineering; in the School of Nursing; in the School of Public Health; or seeking a combined M.D./Ph.D. who have an interest in a variety of medical fields such as neurology, neurosurgery, otolaryngology, orthopedics, and pediatrics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Students wishing to pursue this graduate minor must be currently enrolled in a graduate degree program at the University of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

CPMS 5101 Introduction to Clinical Physiology and Movement Science is a required core course for all students seeking the minor. KIN 5987 Professional Skills and Grant Writing for Health Sciences, 2 credits, is also required for a Ph.D. minor, unless an equivalent course has been taken or the student can document previous grant writing experience.

Additional elective courses are selected in consultation with the faculty adviser and approved by the director of graduate studies (DGS), in order to satisfy the requirements for the minor. Courses chosen will depend on the background and goals of the student. Students can select one of two tracks: clinical physiology or clinical movement science.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Doctoral**

**Required Courses for Clinical Movement Science/Clinical Physiology Ph.D. Minor**
- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)
- KIN 5987 - Professional Skills and Grant Writing for Health Sciences (2.0 cr)

**Electives**
Electives are chosen in consultation with the adviser. NURS 8173 and SAPH 8173 are cross-listed.
- BMEN 5201 - Advanced Biomechanics (3.0 cr)
  or CPMS 5201 - Colloquium in Clinical Physiology and Movement Science (1.0 cr)
  or CPMS 8201 - Seminar in Clinical Physiology and Movement Science (1.0 cr)
- KIN 5122 - Applied Exercise Physiology (3.0 cr)
  or KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
  or KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
  or KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
  or KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
  or KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
  or KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
- KIN 8122 - Seminar: Exercise Physiology (2.0 cr)
- KIN 8132 - Seminar: Motor Development (3.0 cr)
- KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
- KIN 8211 - Seminar: Perception and Action (3.0 cr)
- NURS 5222 - Advanced Physiology (3.0 cr)
  or NURS 8173 - Principles and Methods of Implementing Research (3.0 cr)
  or NURS 8175 - Quantitative Research Design and Methods (3.0 cr)
- NURS 8171 - Qualitative Research Design and Methods (3.0 cr)
- SAPH 8173 - Principles and Methods of Implementing Research (3.0 cr)
- NURS 8175 - Quantitative Research Design and Methods (3.0 cr)
- OT 5393 - Functional Anatomy and Kinesiology (4.0 cr)
- OTOL 5993 - Directed Studies (1.0 - 12.0 cr)
- OTOL 8239 - Otoneurology (1.0 - 2.0 cr)
- OTOL 8244 - Seminar: Current Literature (1.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
  or PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- RSC 5814 - Age, Exercise, and Rehabilitation (2.0 cr)
- RSC 5841 - Rehabilitation Science Instrumentation and Methodology (4.0 cr)
- RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)
- RSC 8135 - Advanced Kinesiology (3.0 cr)
- RSC 8170 - Special Topics in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 8282 - Problems in Human Movement (4.0 cr)

**Master's**

**Required Courses for Clinical Movement Science/Clinical Physiology Master's Minor**
- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)

**Electives**
Electives are chosen in consultation with the adviser. NURS 8173 and SAPH 8173 are cross-listed.
- BMEN 5201 - Advanced Biomechanics (3.0 cr)
- CPMS 5201 - Colloquium in Clinical Physiology and Movement Science (1.0 cr)
- CPMS 8201 - Seminar in Clinical Physiology and Movement Science (1.0 cr)
- KIN 5122 - Applied Exercise Physiology (3.0 cr)
- KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
- KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
- KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
- KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
- KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
- KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
- KIN 8122 - Seminar: Exercise Physiology (2.0 cr)
- KIN 8132 - Seminar: Motor Development (3.0 cr)
- KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
- NURS 5222 - Advanced Physiology (3.0 cr)
  or NURS 8173 - Principles and Methods of Implementing Research (3.0 cr)
  or NURS 8175 - Quantitative Research Design and Methods (3.0 cr)
- NURS 8171 - Qualitative Research Design and Methods (3.0 cr)
- SAPH 8173 - Principles and Methods of Implementing Research (3.0 cr)
- NURS 8175 - Quantitative Research Design and Methods (3.0 cr)
- OT 5393 - Functional Anatomy and Kinesiology (4.0 cr)
- OTOL 5993 - Directed Studies (1.0 - 12.0 cr)
- OTOL 8239 - Otoneurology (1.0 - 2.0 cr)
- OTOL 8244 - Seminar: Current Literature (1.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
  or PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)

Website: http://ccms.umn.edu/Programs.html

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Clinical Physiology & Movement Science PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The clinical physiology and movement science postbaccalaureate certificate program is aimed at D.N.P. and M.D. fellows in nursing and medicine, as well as professionals in clinical fields, such as physical, occupational, and speech therapy. In addition, engineers working in the area of medical technology or medical device development are potential candidates. The interdisciplinary coursework combines physiology and movement science with clinical skills for research and the diagnosis and assessment of disease conditions. Students have the option to tailor the program to their individual needs and interest. They may select from a list of more than 30 courses. Developed by faculty with a rich collective expertise from across the University, the programs offer students a choice of two tracks: clinical physiology and clinical movement science.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Students wishing to pursue the certificate program must have completed a bachelor's degree, preferably in an allied health sciences or natural science field.

Special Application Requirements:
If the individual is applying for a certificate and is not currently enrolled in a graduate program at the University of Minnesota, two letters of support will be requested and a GPA of 3.0 or greater (or equivalent if there were a different student evaluation system) from a previous graduate program will be required. Submission package includes: clinical physiology and movement science application form, resume or curriculum vitae, transcripts, two letters of support, and documented language proficiency. Deadline for Fall semester admission is July 15; deadline for Spring semester admission is November 15.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Paper Based - Total Score: 550

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

**Required Course**
This course is required for both the Clinical Movement Science track and the Clinical Physiology track:
CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)

**Elective Courses**
The following courses are offered by a number of graduate programs and can be used as course electives for the certificate program in consultation with the adviser. NURS 8173 and SAPH 8173 are cross-listed.

BMEN 5201 - Advanced Biomechanics (3.0 cr)

*or* CPMS 5201 - Colloquium in Clinical Physiology and Movement Science (1.0 cr)

*or* CPMS 8201 - Seminar in Clinical Physiology and Movement Science (1.0 cr)

*or* KIN 5122 - Applied Exercise Physiology (3.0 cr)

*or* KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)

*or* KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)

*or* KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)

*or* KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)

*or* KIN 5585 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)

*or* KIN 5941 - Clinical Movement Neuroscience (3.0 cr)

*or* KIN 8172 - Seminar: Exercise Physiology (2.0 cr)

*or* KIN 8132 - Seminar: Motor Development (3.0 cr)

*or* KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)

*or* NURS 5222 - Advanced Physiology (3.0 cr)

*or* NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)

*or* NURS 8173 - Principles and Methods of Implementing Research (3.0 cr)

*or* SAPH 8173 - Principles and Methods of Implementing Research (3.0 cr)

*or* NURS 8175 - Quantitative Research Design and Methods (3.0 cr)

*or* OT 5393 - Functional Anatomy and Kinesiology (4.0 cr)

*or* OTOL 5993 - Directed Studies (1.0 - 12.0 cr)

*or* OTOL 8239 - Otoneurology (1.0 - 2.0 cr)

*or* OTOL 8244 - Seminar: Current Literature (1.0 cr)

*or* PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)

*or* PUBH 6341 - Epidemiologic Methods I (3.0 cr)

*or* PUBH 6342 - Epidemiologic Methods II (3.0 cr)

*or* PUBH 7415 - Introduction to Clinical Trials (3.0 cr)

*or* PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)

*or* RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)

*or* RSC 5814 - Age, Exercise, and Rehabilitation (2.0 cr)

*or* RSC 5841 - Rehabilitation Science Instrumentation and Methodology (4.0 cr)

*or* RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)

*or* RSC 8135 - Advanced Kinesiology (3.0 cr)

*or* RSC 8170 - Special Topics in Rehabilitation Science (1.0 - 3.0 cr)

*or* RSC 8282 - Problems in Human Movement (4.0 cr)

**Program Sub-plans**
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Clinical Movement Science**
Clinical movement science is a new, interdisciplinary field of study focusing on human movement dysfunctions due to neurological or orthopedic diseases or diminished physical activity. This new field bridges the gap between basic and clinical sciences by crossing the boundaries of traditional disciplines of neurology, neurophysiology, kinesiology, and physical and occupational therapy. The curriculum includes a required core course that covers the theory and application of clinical physiology and movement science. Elective courses are chosen from a broad list of offerings in departments such as kinesiology, public health, rehabilitation science, and otolaryngology.

The postbaccalaureate certificate requires a minimum of 12 semester credits. CPMS 5101 serves as a required core course for all students seeking a certificate. Electives are selected in consultation with the faculty adviser and approved by the director of graduate studies (DGS), in order to satisfy the requirements for the certificate. The specific courses chosen will depend on the background and goals of the individual student.
Sample Program for Clinical Movement Science Track

Required
- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)

Electives
- Students should register for 2 credits of OTOL 8239.
- RSC 5841 - Rehabilitation Science Instrumentation and Methodology (4.0 cr)
- OTOL 8239 - Otoneurology (1.0 - 2.0 cr)
- KIN 5941 - Clinical Movement Neuroscience (3.0 cr)

Clinical Physiology
This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

Clinical physiology is a branch of physiology that bridges basic physiology and clinical medicine. It joins the gap between basic and clinical sciences by crossing the boundaries of traditional disciplines of neurology, neurophysiology, kinesiology, and physical and occupational therapy. The curriculum includes a required core course that covers the theory and application of clinical physiology and movement science. Elective courses are chosen from a broad list of offerings in departments such as kinesiology, public health, rehabilitation science, and otolaryngology.

The postbaccalaureate certificate requires a minimum of 12 semester credits. CPMS 5101 is required for all students seeking a certificate. Electives are selected in consultation with the faculty adviser and approved by the director of graduate studies (DGS) in order to satisfy the requirements for the certificate. The specific courses chosen will depend on the background and goals of the individual student.

Sample Program for Clinical Physiology Track

Required
- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)

Electives
- KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)
- KIN 8122 - Seminar: Exercise Physiology (2.0 cr)

• Program Type: Post-baccalaureate credit certificate/licensure/endorsement
• Requirements for this program are current for Fall 2014
• Length of program in credits: 15
• This program does not require summer semesters for timely completion.
• Degree: Community and Learning Postbaccalaureate Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The community and learning certificate is designed to prepare individuals who work in community-based organizations and programs for the informal educational responsibilities that often accompany their roles.

This 15-credit certificate program prepares students to foster learning outside of the classroom and in their communities. Students will develop informal teaching and learning skills based on engagement and collaboration, and building trust and respect among participants.

The program is designed for individuals involved in community life. Examples include public health worker, youth worker, youth program leader, youth program evaluator, community program developer, community activist, community organizer, community educator, community program evaluator, environmental educator, civic engagement educator, political organizer, and teacher.

Certificate goals include providing students with:
- broad understanding of the history of democratic educational traditions and practices in community settings;
- greater knowledge of and experience with the pedagogy of teaching and learning in informal learning and everyday life situations; and
- leadership abilities that support individual and group learning, civic engagement, and empowerment.

The program is offered by the Department of Curriculum and Instruction (C&I). The certificate can also provide a portal to additional study, since courses may be applied toward a graduate-level program.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Applicants must hold a bachelor's degree from an accredited college or university.

Special Application Requirements:
This program is not recommended for international students because required courses and electives may not be offered frequently enough to meet visa requirements for courses taken each semester, unless the student is also enrolled in another degree-granting program and is completing this certificate in conjunction with it.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Note: Certificate coursework completed with undergraduate student status cannot be applied to graduate-level degree programs.

Required Courses

The certificate requires students to complete 15 credits from the following courses.

Students must complete required courses totaling 6 credits:
YOST 5972 - Education in the Community (3.0 cr)
YOST 5974 - The Democratic Learning Community (3.0 cr)

Elective Credits

In addition, students must complete at least 9 credits from the following courses (and may not include more than one 4xxx course). Note: Students seeking graduate credit for PHIL 4324, PHIL 4325, or PHIL 4326 must also register concurrently for PHIL 8300.

To enroll in SW 8505 - Advanced Community Organization and Advocacy, students must be doctoral students in social work, or receive the approval of their adviser and the course instructor.

YOST 5952 - Everyday Lives of Youth (3.0 cr)
YOST 5954 - Experiential Learning: Pedagogy for Community and Classroom (3.0 cr)
YOST 5958 - Community: Context for Youth Development Leadership (3.0 cr)
PHIL 4324 [Inactive] (3.0 cr)
PHIL 4325 - Education and Social Change [AH, CIV] (4.0 cr)
PHIL 4326 - Lives Worth Living: Questions of Self, Vocation, and Community [CIV, AH] (4.0 cr)
PHIL 8300 - Workshop in Moral and Political Philosophy (1.0 cr)
PA 5012 - The Politics of Public Affairs (3.0 cr)
SW 8505 - Advanced Community Organization and Advocacy (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Master of Education (M.Ed.)/professional studies degree programs are designed to meet the needs of practicing professionals in education and human development fields. Students admitted typically have interests in improving their current professional practice and applying their education to their present work responsibilities.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A bachelor's degree from an accredited college or university.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a clearly written statement of career interests, goals, and objectives. Master's applications are reviewed by department faculty three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan C: Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

Art Education

This sub-plan is limited to students completing the program under Plan C.

The M.Ed./professional studies program in Art Education is designed for experienced art teachers and others who want to acquire advanced knowledge and leadership skills in the field of art education. The program is flexible and can be tailored to accommodate individual needs. Final project requirements include a school-based project examining a problem, issue, or topic identified by the student.

The M.Ed./professional studies - Art Education sub-plan requires 12 credits of core coursework, 12 credits of Art Education coursework and 6 credits of electives for a total of 30 credits.

Core Coursework (12 credits)

CI 5186 should be taken for 3 credits.
CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
CI 5177 - Practical Research (3.0 cr)
CI 5186 - School-Related Projects (1.0 - 4.0 cr)
CI 5351 - Technology Tools for Educators (3.0 cr)

Art Education Requirements (12 credits)

CI 5075 and CI 5078 are required; CI 5075 can be taken for 1-3 credits. Other courses listed can be taken for desired amount of variable credits provided 12 total credits between required and elective courses for Art Education are completed.
CI 5075 - The Social and Historical Foundations of Art Education (1.0 - 3.0 cr)
CI 5078 - Application of Aesthetic Theory in Education (2.0 cr)

Art Education Electives

CI 5049 and CI 5050 can be taken for 1-4 credits.
Take 7 - 9 credit(s) from the following:
• CI 5049 - Art Media Techniques (1.0 - 4.0 cr)
• CI 5050 - Issues in Art Education (1.0 - 4.0 cr)
• CI 5069 - Curriculum Innovations in Art Education (3.0 cr)

Electives (6 credits)

Courses will be selected in consultation with faculty adviser.

Elementary Education

This sub-plan is limited to students completing the program under Plan C.

ALERT: the M.Ed./professional studies degree program in Elementary Education is currently suspended. We are not accepting applications at this time.

The M.Ed./professional studies program in Elementary Education is designed for elementary teachers who want to improve their instructional, decision-making, evaluation, and leadership skills. The program is flexible and can be tailored to accommodate individual needs.

The M.Ed./professional studies - Elementary Education sub-plan requires 3 credits of core coursework, 15 credits of Elementary Education coursework and 12 credits of electives for a total of 30 credits.

Core Coursework (3 credits)

CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)

Elementary Education Requirements (15 credits)
Courses will be selected in consultation with faculty adviser.

**Electives (12 credits)**
Courses will be selected in consultation with faculty adviser.

**English Education**
This sub-plan is limited to students completing the program under Plan C.

The M.Ed./professional studies program in English Education addresses the needs and interests of middle school, high school, and community-college English teachers. The English education program provides instruction on current developments in English/language arts curriculum theory and research, as well as methods for teaching literature, reading, composition, media, drama, and journalism. The program is flexible and can be tailored to accommodate individual needs.

The M.Ed./professional studies - English Education sub-plan requires 6 credits of core coursework, 18 credits of English Education coursework and 6 credits of electives for a total of 30 credits.

**Core Coursework (6 credits)**
- CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
- CI 5351 - Technology Tools for Educators (3.0 cr)

**English Education Requirements (18 credits)**
Take 18 or more credit(s) from the following:
- CI 5404 - Culturally Diverse Books for Children and Adolescents (3.0 cr)
- CI 5410 - Special Topics in the Teaching of Literacy (1.0 - 3.0 cr)
- CI 5417 - Elementary literacy Instruction for ESL Students (3.0 cr)
- CI 5422 - Teaching Writing in Schools (3.0 cr)
- CI 5442 - Literature for Adolescents (3.0 cr)
- CI 5451 - Teaching Reading in Middle and Secondary Grades (3.0 cr)
- CI 5462 - Evaluating and Assessing Writing (3.0 cr)
- CI 5472 - Teaching Film, Television, and Media Studies (3.0 cr)
- CI 5475 - Teaching Digital Writing: Blogs, Wikis, Online Talk, Podcasting, and E-Portfolios to Teach Writing (3.0 cr)
- CI 5641 - Language, Culture, and Education (3.0 cr)
- CI 5647 - Teaching Middle and Secondary Immigrant and Refugee Students With Limited Formal Schooling (3.0 cr)

**Electives (6 credits)**
Courses will be selected in consultation with faculty adviser.

**Environmental Education**
This sub-plan is limited to students completing the program under Plan C.

**Environmental Education**
This sub-plan is limited to students completing the program under Plan C.

ALERT: the M.Ed./professional studies degree program in Environmental Education is currently suspended. We are not accepting applications at this time.

The M.Ed./professional studies degree program in Environmental Education is designed to develop leaders in environmental education through integrated research, outreach, and teaching. This program of at least 30 semester credits offers an interdisciplinary, integrated approach to environmental learning and leadership for school teachers, extension service educators, and environmental educators in formal and informal settings. Learning experiences allow students to integrate their work experience and academic study. Field work, evaluation methods, internships, and other practical applications of theory and method are integral parts of the program.

The M.Ed./professional studies - Environmental Education sub-plan requires 13 credits of core coursework, 3 credits of coursework related to research methods/evaluation/statistics, and 14 credits of electives for a total of 30 credits.

**Core Coursework (13 credits)**
- CI 5186 and CI 5190 must each be taken for a minimum of 2 credits
- ESPM 5202 - Environmental Conflict Management, Leadership, and Planning (3.0 cr)
- CI 5186 - School-Related Projects (1.0 - 4.0 cr)
- CI 5190 - Directed Individual Study in Curriculum and Instruction (1.0 - 6.0 cr)
- CI 5537 - Principles of Environmental Education (3.0 cr)
- CI 5747 - Global and Environmental Education: Content and Practice (3.0 cr)

**Research Methods, Evaluation, or Statistics (3 credits)**
A minimum of three credits, chosen in consultation with the faculty adviser, intended to provide skills or knowledge essential to the required research project.

**Electives (14 credits)**
A minimum of 14 credits of graduate-level coursework (5xxx and above) selected in consultation with faculty adviser from the following fields: natural sciences, social sciences, humanities, education, natural resources, and agriculture.
Interdisciplinary Studies
This sub-plan is limited to students completing the program under Plan C.

The M.Ed./professional studies program in Interdisciplinary Studies is a graduate-level, practitioner-based, coursework-only program designed for cohorts of experienced K-12 teachers of different subjects. It integrates coursework representing a number of academic disciplines as defined in K-12 contexts with coursework emphasizing particular areas of interest. Practicing teachers complete 30 semester credits of work in two areas: a core academic program with courses representing a range of K-12 disciplines and elective courses related to a specific focus area. The program may be combined with a certificate program offered in the Department of Curriculum and Instruction. Depending upon the cohort for which the program is designed, the program may be completed entirely online, entirely face-to-face (F2F), or as a hybrid, with a combination of F2F and online coursework.

The M.Ed./professional studies - Interdisciplinary Studies sub-plan requires a minimum of 15 credits of Interdisciplinary Studies coursework and 15 credits of electives for a total of 30 credits.

Interdisciplinary Studies Requirements (15 credits)
Students will take CI 5150 twice - once under the "Educational Inequities: Race, Class & Gender" topic and the second under the "Teaching for Civic Engagement" topic.
Take 5 or more course(s) totaling 15 or more credit(s) from the following:
• CI 5361 - Teaching and Learning with the Internet (3.0 cr)
• CI 5540 - Special Topics: Science Education (1.0 - 8.0 cr)
• CI 5150 - Curriculum Topics (1.0 - 6.0 cr)
• CI 5474 - New Literacies Frameworks and Instruction: Digital Texts and Digital Reading (3.0 cr)

Electives (15 credits)
Elective credits around a specific focus area will be identified for specific cohorts based on their expressed interests. Elective credits may be comprised of courses leading to a particular certificate.

Learning Technologies
This sub-plan is limited to students completing the program under Plan C.

The M.Ed./professional studies program in Learning Technologies is designed for professionals interested in using technology in their organizations (especially K-12 and college educators, new media designers, and corporate trainers). This program also serves students interested in using technology to develop instructional materials for a wide range of settings. Because TEL certificate requirements are incorporated into the M.Ed. program, students may earn a certificate while earning the M.Ed. degree.

The M.Ed./professional studies - Learning Technologies sub-plan (option 1, with Online Distance Learning or Multimedia Design and Development certificate) requires 9 credits of core coursework, 12 credits of Learning Technologies coursework and 9 credits of electives for a total of 30 credits.

The M.Ed./professional studies - Learning Technologies sub-plan (option 2, with K-12 Technology Integration certificate) requires 9 credits of core coursework, 16 credits of Learning Technologies coursework and 5 credits of electives for a total of 30 credits.

M.Ed.-LT: Options 1 or 2

M.Ed. - LT w/ Online Distance Learning or Multimedia Design & Development certificate
Core Coursework (9 credits)
CI 5190 should be taken for 3 credits
CI 5331 - Introduction to Learning Technologies (3.0 cr)
CI 5177 - Practical Research (3.0 cr)
CI 5190 - Directed Individual Study in Curriculum and Instruction (1.0 - 6.0 cr)

LT Requirements (12 credits)
Take 4 or more course(s) totaling 12 or more credit(s) from the following:
• CI 5321 - Foundations of Distance Education (3.0 cr)
• CI 5323 - Online Learning Communities (3.0 cr)
• CI 5325 - Designing and Developing Online Distance Learning (3.0 cr)
• CI 5327 - Designing Online Adventure Learning (3.0 cr)
• CI 5336 - Planning for Multimedia Design and Development (3.0 cr)
• CI 5362 - Foundations of Interactive Design for Web-based Learning (3.0 cr)
• CI 5363 - New Media and Interaction Design for Online and Mobile Learning (3.0 cr)
• CI 5367 - Interactive Multimedia Instruction (3.0 cr)

Electives (9 credits)
3 credits under EPSY-designation; 6 credits related to technology use or education for a total of 9 credits.
-OR-

M.Ed. - LT w/ K-12 Technology Integration certificate
Core Coursework (9 credits)
CI 5190 should be taken for 3 credits
CI 5331 - Introduction to Learning Technologies (3.0 cr)
CI 5177 - Practical Research (3.0 cr)
CI 5190 - Directed Individual Study in Curriculum and Instruction (1.0 - 6.0 cr)

LT Requirements (16 credits)
Required courses are listed; additional 3 credits will be selected with faculty adviser for a total of 16 credits. CI 5330 should be taken for 3 credits.
OLPD 5310 - Data-Driven Decision Making I (1.0 cr)
CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
CI 5330 - Special Topics in Learning Technologies (1.0 - 3.0 cr)
CI 5351 - Technology Tools for Educators (3.0 cr)
CI 5361 - Teaching and Learning with the Internet (3.0 cr)

Electives (5 credits)
Courses must be related to technology use or education.

Mathematics Education
This sub-plan is limited to students completing the program under Plan C.

The M.Ed./professional studies program in Mathematics Education is designed for experienced mathematics teachers who want to acquire advanced knowledge and leadership skills in the field of mathematics education. The program is flexible and can be tailored to accommodate individual needs. Final project requirements include a school-based project examining a problem, issue, or topic identified by the student.

The M.Ed./professional studies - Mathematics Education sub-plan requires 6 credits of core coursework, 14 credits of Mathematics Education coursework and 10 credits of electives for a total of 30 credits.

Core Coursework (6 credits)
CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
CI 5177 - Practical Research (3.0 cr)

Mathematics Education Requirements (14 credits)
MTHE 5314 - Teaching and Learning Mathematics (3.0 cr)
MTHE 5366 - Technology-Assisted Mathematics Instruction (3.0 cr)
MTHE 5993 - Directed Studies in Mathematics Education (2.0 cr)

Mathematics Education Electives
Take 2 or more course(s) totaling 6 or more credit(s) from the following:
• MTHE 5155 - Rational Number Concepts and Proportionality (3.0 cr)
• MTHE 5170 - Historical Topics in the Mathematics Classroom (1.0 - 3.0 cr)
• MTHE 5171 - Teaching Problem Solving (3.0 cr)
• MTHE 5172 - Teaching Probability and Statistics (3.0 cr)
• MTHE 5355 - Mathematics for Diverse Learners (3.0 cr)

Electives (10 credits)
Courses will be selected in consultation with faculty adviser. Students choose electives from MATH-designated courses (minimum 7 credits); one MTHE-designated course may be included (maximum 3 credits).

Science Education
This sub-plan is limited to students completing the program under Plan C.

The M.Ed./professional studies program in Science Education is designed for experienced science teachers who want to acquire advanced knowledge and leadership skills in the field of science education. The program is flexible and can be tailored to accommodate individual needs. Final project requirements include a school-based project examining a problem, issue, or topic identified by the student.

The M.Ed./professional studies - Science Education sub-plan requires 9 credits of core coursework, 12 credits of Science Education coursework and 9 credits of electives for a total of 30 credits.

Core Coursework (9 credits)
CI 5186 should be taken for 3 credits
CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
CI 5351 - Technology Tools for Educators (3.0 cr)
CI 5186 - School-Related Projects (1.0 - 4.0 cr)

Science Education Requirements (12 credits)
CI 5533 - Current Developments in Science Teaching (3.0 cr)
CI 5534 - Studies in Science Education (3.0 cr)
CI 5535 - Foundations of Science Education (3.0 cr)
CI 5536 - Equity, Policy, and Assessment in Science Education (3.0 cr)

Electives (9 credits)
Courses will be selected in consultation with faculty adviser.

Social Studies
This sub-plan is limited to students completing the program under Plan C.

ALERT: the M.Ed./professional studies degree program in Social Studies Education is currently suspended. We are not accepting applications at this time.

The M.Ed./professional studies program in Social Studies Education is designed for experienced social studies teachers who want to acquire advanced knowledge and leadership skills in the field of social studies education. This program is flexible and can be tailored to accommodate individual needs.

The M.Ed./professional studies - Social Studies Education sub-plan requires 3 credits of core coursework, 15 credits of Social Studies Education coursework and 12 credits of electives for a total of 30 credits.

Core Coursework (3 credits)
CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)

Social Studies Requirements (15 credits)
Courses will be selected in consultation with faculty adviser.

Electives (12 credits)
Courses will be selected in consultation with faculty adviser.

Second Languages and Cultures
This sub-plan is limited to students completing the program under Plan C.

The M.Ed./professional studies program in Second Languages and Cultures (SLC) is designed for experienced second language teachers who want to acquire advanced knowledge of research, best practices, and effective policies in the field of second languages and cultures education. The SLC program addresses the needs and interests of second language educators in a variety of teaching contexts, including world languages, English as a second/foreign language (ESL/EFL), bilingual, and immersion settings. While the program emphasizes instructional issues related to K-12 education, it is also relevant to teachers working with university-level or adult learners. The program is flexible and can be tailored to accommodate individual needs.

Three M.Ed.- SLC options are offered. Option 1 requires a final project. Option 2 combines the M.Ed. with the certificate program in Dual Language and Immersion Education and requires a final project. Option 3 combines the M.Ed. with the certificate program in Advanced Practices in Second Language Teaching and does not require a final project.

The M.Ed./professional studies - Second Languages and Cultures sub-plan (option 1) requires 12 credits of core coursework, 12 credits of Second Languages and Cultures coursework and 6 credits of electives for a total of 30 credits.

The M.Ed./professional studies - Second Languages and Cultures sub-plan (option 2, with Dual Language & Immersion Education certificate) requires 12 credits of core coursework, 16 credits of Second Languages and Cultures coursework and 2 credits of electives for a total of 30 credits.

The M.Ed./professional studies - Second Languages and Cultures sub-plan (option 3, with Advanced Practices in Second Language Teaching certificate) requires 8 credits of core coursework and 22 credits of Second Languages and Cultures coursework for a total of 30 credits.

M.Ed.-SLC: Options 1, 2, or 3

M.Ed. - SLC
Core Coursework (12 credits)
CI 5186 should be taken for 3 credits
CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
CI 5177 - Practical Research (3.0 cr)
CI 5186 - School-Related Projects (1.0 - 4.0 cr)
CI 5351 - Technology Tools for Educators (3.0 cr)
   or LGTT 5101 - Applications of Technology in Language Teaching (3.0 cr)

SLC Requirements (12 credits)
CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
CI 5662 - Second Language Curriculum Design (3.0 cr)
CI 5642 - Assessing English Learners (3.0 cr)
   or CI 5658 - Foreign Language Testing and Assessment (3.0 cr)

Electives (6 credits)
Courses will be selected in consultation with faculty adviser

-OR-

M.Ed. - SLC w/ Dual Language & Immersion Education certificate
Core Coursework (12 credits)
CI 5660 should be taken for 2 credits
CI 5186 should be taken for 3 credits
CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
CI 5177 - Practical Research (3.0 cr)
CI 5186 - School-Related Projects (1.0 - 4.0 cr)
CI 5351 - Technology Tools for Educators (3.0 cr)
   or LGTT 5101 - Applications of Technology in Language Teaching (3.0 cr)

SLC Requirements (16 credits)
CI 5660 should be taken for 2 credits
CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
CI 5660 - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)
CI 5670 - Foundations of Dual Language and Immersion Education (3.0 cr)
CI 5671 - Curriculum Development and Assessment in Dual Language/Immersion Classrooms (3.0 cr)
CI 5672 - Language-Focused Instructional Practices and Strategies for Dual Language/Immersion Classrooms (3.0 cr)
CI 5673 - Immersion 101: An Introduction to Immersion Teaching (2.0 cr)
   or CI 5674 - Immersion 101: An Introduction to Immersion Teaching in Character-based Languages (2.0 cr)

Electives (2 credits)
Course will be selected in consultation with faculty adviser

-OR-

M.Ed. - SLC w/ Advanced Practices in Second Language Teaching certificate
Core Coursework (8 credits)
CI 5655 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
CI 5657 - Practical Research (3.0 cr)
LGTT 5110 - Technology in the Second Language Classroom (2.0 cr)

SLC Requirements (22 credits)
CI 5621 - Culture as the Core in the Second Language Classroom (2.0 cr)
CI 5622 - Second Language Acquisition Basics for Teachers (2.0 cr)
CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
CI 5662 - Second Language Curriculum Design (3.0 cr)
CI 5642 - Assessing English Learners (3.0 cr)
   or CI 5658 - Foreign Language Testing and Assessment (3.0 cr)
Take 3 or more course(s) totaling 6 or more credit(s) from the following:
• CI 5623 - Improving Language Learning: A Practical Course in Styles- and Strategies-based Instruction (2.0 cr)
• CI 5624 - Content-based Language Instruction and Curriculum Development (2.0 cr)
• CI 5625 - Developing Assessments for the Second Language Classroom (2.0 cr)
• CI 5626 - Developing Learners’ Sociocultural Competence (2.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Disability Policy and Services PBacc Cert Grad

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate in disability policy and services is designed to allow graduate as well as community professionals, to study policies and services that affect the lives of children, youth, and adults with disabilities. The 12-credit program surveys the spectrum of education, health, and social services available to individuals with disabilities and their families, and examines the public and private networks of disability services from an interdisciplinary perspective. While the program addresses the needs of people with all types of disabilities, it emphasizes developmental disabilities across the lifespan. The program's individualized learning experience (ILE) requires students to integrate theory with practice by completing a disability-related research project or working directly with people with disabilities in settings such as schools, recreation centers, or human-service agencies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.50.

Other requirements to be completed before admission:
Applicants must have completed an undergraduate degree by the time they start the program. Students must have completed a four-year college degree or equivalent coursework. Applications are reviewed on a rolling basis and may be submitted at any time.

Special Application Requirements:
Please address the following five questions below. Please answer each question listed and limit your response to 2 typed or word-processed pages, size-12 font. Upload your responses to the ApplyYourself online application in the "Program Specific Questions" upload area.

- What are your major areas of interest in the field of disability services or related to individuals with disabilities?
- What have been your past experiences in the area of disability services or related to individuals with disabilities?
- What is your current involvement in the field of disability services or related to individuals with disabilities?
- What is your anticipated or desired career interest?
- Why are you interested in the Disability Policy and Services Certificate Program?

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.
A minimum GPA of 2.80 is required for students to remain in good standing.

In addition to coursework, students must participate in at least six, one-hour interdisciplinary reflection groups to discuss relevant topics and ways to integrate field experiences with coursework. Reflection groups are offered throughout the year, including the summer session.

**Required Course**

**OLPD 5356 - Disability Policy and Services (3.0 cr)**

**Specialized Coursework**

This component broadens the student's level of knowledge in disability policies and services. Students must choose from courses offered across the University focusing on disability policy, disability services, and/or interdisciplinary teaming, such as communication disorders, family social science, kinesiology, nursing, public affairs, or social work. The ICI Certificate Coordinator can provide students with a list of acceptable courses meeting this requirement.

6 cr to be taken with approval from the ICI Certificate Coordinator

**Individualized learning experience & Interdisciplinary reflection groups**

This component allows students to integrate and apply the information they have learned in coursework. Students work with the ICI certificate coordinator to design an individualized learning experience (ILE) in which they work with persons who have disabilities in settings like schools, recreation centers, health clinics, or human-service agencies. The ILE can be completed in one or two semesters, but must total at least 3 credits and at least 200 hours.

Department of Curriculum and Instruction, 125 Peik Hall, 159 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-625-4006; fax: 612-624-8277)
Email: CIinfo@umn.edu
Website: http://cehd.umn.edu/ci

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 15
- This program does not require summer semesters for timely completion.
- Degree: Language Immersion Education PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This graduate-level certificate program gives students an opportunity to complete a coordinated series of courses in the area of dual language and immersion education. The program does not lead to a state teaching certificate or licensure (note that a university certificate program or certificate is distinct from a state certificate or certification).

In Minnesota and other states in the U.S., dual language/immersion teachers at the elementary level are required to hold a teaching license in elementary education and at the secondary level a license in the subject matter they teach (e.g., science, social studies, math). The University of Minnesota offers initial teacher licensure programs for individuals not yet licensed and additional teacher licensure programs for those individuals who already hold a MN teaching license and wish to add another.

The dual language and immersion education certificate program is designed for preK-12 teachers and other professionals to work effectively in the following school-based program models:
- "One-way" foreign language immersion programs designed for native English-speaking students
- "Two-way" bilingual immersion programs designed for native English-speaking students and native speakers of the program's partner language, such as Spanish
- Developmental bilingual programs designed for minority language learners, such as native Spanish speakers
- Indigenous language immersion programs designed for Native American children in indigenous communities with the goal of revitalizing an endangered language and culture

In dual language and immersion programs, second/foreign/minority language that students are acquiring is a vehicle to teach school subjects. In order to be considered a dual language or immersion program, the immersion language must be used for at least 50 percent of subject matter instruction during the elementary school years. In a middle/secondary continuation program, at least two year-long content courses must be taught in the immersion language.

These programs aim for "additive bilingualism and biliteracy," or the acquisition of another language at no expense to the first, native language. Research shows that well-implemented programs allow students to develop higher levels of language proficiency in the immersion language than in any other type of language program model.

This unique University certificate program is the first in the United States to incorporate a coherent set of courses designed specifically for dual language and immersion teachers and other professionals. Offered by the college's Department of Curriculum and Instruction (C&I), the program was designed jointly by the college's second languages and cultures (SLC) education faculty and representatives of dual language and immersion programs in the Twin Cities metropolitan area.

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.
A completed bachelor's degree is required for admission.

Students currently enrolled in a University of Minnesota graduate-level degree program may also apply.

Other requirements to be completed before admission:
Applicants should either be currently practicing as dual language or immersion educators, or provide evidence of the necessary background and interest (based on a goal statement).

This certificate program is available to graduate-level students only. Coursework taken before completion of the bachelor's degree cannot be applied to the certificate program.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a goal statement (only if applicant is not a practicing dual language or immersion educator). Certificate applications are reviewed by the department three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:

• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

Core Courses (9 credits)

CI 5670 - Foundations of Dual Language and Immersion Education (3.0 cr)
CI 5671 - Curriculum Development and Assessment in Dual Language/Immersion Classrooms (3.0 cr)
CI 5672 - Language-Focused Instructional Practices and Strategies for Dual Language/Immersion Classrooms (3.0 cr)

Elective Courses (6 credits)

Courses will be selected in consultation with the faculty adviser for a total of 6 credits.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 52 to 56
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The early childhood education initial licensure/master of education (M.Ed.) program is offered through the Institute of Child Development in collaboration with the department of Curriculum and Instruction. The program is designed to prepare outstanding teachers of young children who will have a strong foundation in child development theory and research and developmentally appropriate methodology for teaching the different ages within the early childhood years (birth to age 8). Clinical experiences in the Shirley G. Moore Laboratory School and in local urban/suburban public schools create a strong experiential base in which to apply the principles and methods learned in University courses. Emphasis is placed on understanding individual learners, working with diverse learners, using a variety of instructional strategies, providing inclusive programming for children with and without special needs, working closely with families, creating positive classroom communities, all forms of professional writing and lesson planning, authentic assessment, documentation of student learning, reflective practice, professional development, and ethics.

Master of education/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with the Standards of Effective Practice for Teachers (SEPT) and content standards adopted in fall 2010 by the Minnesota Board of Teaching.

This program includes two components: initial licensure and the M.Ed. degree. After successfully completing initial licensure requirements, students are recommended for state licensure in Minnesota to teach early childhood education (birth-third grade). After completing all M.Ed. degree requirements, including a master's paper, students are awarded the M.Ed. degree. Students have five years from initial enrollment in the program to complete their M.Ed. degree, and must maintain a 2.80 GPA to be eligible for the M.Ed.

Two groups of students typically apply to this M.Ed./initial licensure program.
1. Early Childhood Education: Foundations graduates--These applicants have completed or are completing the separate CEHD undergraduate Early Childhood Education Foundations program. Upon admission to the graduate program, this group typically completes the licensure portion in two semesters plus one summer, with an additional semester to complete the master's degree.
2. All other applicants--These applicants have not completed the undergraduate Early Childhood Education: Foundations program. This group typically completes the licensure portion of the program in five semesters, with an additional semester to complete the master's degree. Students who wish to take coursework part-time may do so, which will extend the time needed to complete the program. Required coursework is scheduled throughout the day, as well as in the evening.

Accreditation
This program is accredited by National Association for Colleges of Teacher Education (NCATE).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.
A bachelor's degree must be completed at the time of matriculation. The preferred bachelor's degree is Early Childhood Education: Foundations.

Required prerequisites

Prerequisite Coursework
Prerequisite coursework is required to meet the Standards of Effective Practice for Teachers (SEPT) and content standards adopted in fall 2010 by the Minnesota Board of Teaching: "The teacher understands the central concepts, tools of inquiry, and structures of the discipline s/he teaches." Prerequisites may be completed after admission to the program.

- CPSY 2301 - Introductory Child Psychology (4.0 cr)
- CPSY 4331 - Social and Personality Development (3.0 cr)
- CPSY 4343 - Cognitive Development (3.0 cr)
- CPSY 4993 - Directed Experiences in Early Childhood Education (3.0 cr)
- CI 3401W - Diversity in Children's Literature [WI] (3.0 cr)
- CI 5414 - Practicum: Working With Developing Readers (2.0 cr)
- CI 5413 - Foundations of Reading (3.0 cr)
- EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
- ED 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- CI 3610 - Linguistics for Teachers [SOCS] (3.0 cr)
  or LING 3001 - Introduction to Linguistics [SOCS] (4.0 cr)
  or ENGL 3601 - Analysis of the English Language (4.0 cr)
- PUBH 3005 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)
  or PUBH 6003 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)

Other requirements to be completed before admission:
Applicants are strongly encouraged to obtain paid or unpaid classroom experience with young children, ages birth to third grade, with multicultural and diverse populations.

Students with an undergraduate degree unrelated to early childhood education are eligible to apply with the understanding that they will take approximately 30 additional credits to meet state licensure standards.

Special Application Requirements:
All applicants must submit the following five required application materials through the online application system:

1. Transcripts - Unofficial transcripts or academic records should be uploaded directly to the online application. International students should also upload an English translation if the transcript is not in English. If you are admitted, the University will then request official copies of this material. If you completed coursework at a university outside of the United States, your transcripts must be evaluated by a professional credential evaluation center by requesting a course-by-course evaluation. This transcript evaluation does not need to be submitted when you apply, but it is needed by the end of the first term to meet state licensing requirements.

2. Resume

3. Three Admission Statements

4. Two Letters of Recommendation - These letters should be written by someone who is knowledgeable about your education-related experiences, work with young children, work style, and personal attributes.

5. Application fee - This fee is charged when you submit your application and is required for each application you submit. Fees must be paid online with a credit card.

Nonnative English speakers and/or international students should also submit an official score report from the Test of English as a Foreign Language (TOEFL).

All applicants must take the Minnesota Teacher Licensure Basic Skills Test [Reading (test code 001), Writing (test code 002), and Mathematics (test code 003)] prior to beginning the program.

See full application instructions at: http://www.cehd.umn.edu/icd/futurestudents/ece/graduate/

Application Deadlines:
December 15 for summer or fall enrollment
September 15 for spring enrollment

Applicants must submit their test score(s) from the following:
• Minnesota Teacher Licensure Exam
• MTLE Basic Skills Tests
International applicants must submit score(s) from one of the following tests:
  • TOEFL
    - Internet Based - Total Score: 100
    - Paper Based - Total Score: 650

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 52 to 56 major credits and up to null credits outside the major. The is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Students complete foundations, methods, and student teaching coursework for licensure. Some of the coursework may be taken for undergraduate credit, before admission into the program. A minimum of 30 graduate-level credits are required for the M.Ed. degree.

M.Ed. Required Coursework

Major Courses

CPSY 5251 - Social and Philosophical Foundations of Early Childhood Education (2.0 cr)
EPSY 5625 - Education of Infants, Toddlers, and Preschool Children with Disabilities: Introduction (2.0 cr)
EPSY 5681 - Education of Preschool Children With Disabilities: Methods and Materials (3.0 cr)
EPSY 5801 - Assessment and Decision Making in School and Community Settings (3.0 cr)

CPSY Methods Courses

CPSY 5252W - Facilitating Social and Emotional Learning in Early Childhood Education [WI] (3.0 cr)
CPSY 5253 - Facilitating Cognitive and Language Learning in Early Childhood Education (3.0 cr)
CPSY 5254 - Facilitating Creative and Motor Learning in Early Childhood Education (2.0 cr)

CI Methods Courses

CI 5425 - Reading Instruction in the Elementary Grades (3.0 cr)
CI 5426 - Language Arts Instruction in the Elementary Grades (3.0 cr)
CI 5502 - Science Instruction in the Elementary Grades (3.0 cr)
CI 5645 - Teaching English Learners in the Elementary Classroom (3.0 cr)
CI 5702 - Social Studies Instruction in the Elementary Grades (3.0 cr)
CI 5822 - Mathematics Instruction in the Elementary Grades (3.0 cr)

Student Teaching

Take exactly 10 credit(s) from the following:
  • CI 5181 - Clinical Experience in Elementary School Teaching (2.0 - 10.0 cr)
Take 4 - 6 credit(s) from the following:
  • CPSY 5281 - Student Teaching in Early Childhood Education (1.0 - 6.0 cr)

M.Ed. Completion

CPSY 5187 - Master's Paper in Early Childhood Education (2.0 - 4.0 cr)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 19
- Length of program in credits (Doctorate): 19
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The education sciences minor reflects an interdisciplinary effort that combines research in education with research in the basic arts and sciences to address problems of education. The minor draws on coursework from education, educational psychology, cognitive neuroscience, child development, psychology, and public policy. Coursework includes professional socialization courses presenting a general introduction to educational research and experimental methods; two advanced courses in research methods and statistics; and two advanced courses in cognition and learning.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Coursework includes a total of 19 credits: four courses of required coursework (13 credits), a 3-credit cognition & learning elective, and a 3-credit research methods and statistics elective.

Note: Students may not use course credits to satisfy requirements for both a graduate major and for the education sciences minor.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Doctoral
Coursework includes a total of 19 credits: four courses of required coursework (13 credits), a 3-credit cognition & learning elective, and a 3-credit research methods and statistics elective.

Note: Students may not use course credits to satisfy requirements for both a graduate major and for the education sciences minor.

Required Coursework
EPSY 8311 must be taken 3 semesters for a total of 3 credits.
Take 13 or more credit(s) from the following:
- EPSY 8117 - Writing Empirical Paper and Research/Grant Proposals in Education and Psychology (3.0 cr)
- EPSY 8311 - Education Sciences Proseminar (1.0 cr)
- EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
- EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)

Cognition & Learning Elective
Take 3 or more credit(s) from the following:
- CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
- PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
- PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
- PSY 5054 - Psychology of Language (3.0 cr)
- PSY 8056 - Seminar: Psychology of Language (3.0 cr)

Research Methods and Statistics Elective
Take 3 or more credit(s) from the following:
- EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)
- PSY 5065 - Functional Imaging: Hands-on Training (3.0 cr)
- PSY 5960 - Topics in Psychology (1.0 - 4.0 cr)
- SOC 8801 - Sociological Research Methods (4.0 cr)

Master's
Coursework includes a total of 19 credits: four courses of required coursework (13 credits), a 3-credit cognition & learning elective, and a 3-credit research methods and statistics elective.

Note: Students may not use course credits to satisfy requirements for both a graduate major and for the education sciences minor.

Required coursework
EPSY 8311 must be taken 3 semesters for a total of 3 credits.
Take 13 or more credit(s) from the following:
- EPSY 8117 - Writing Empirical Paper and Research/Grant Proposals in Education and Psychology (3.0 cr)
- EPSY 8311 - Education Sciences Proseminar (1.0 cr)
- EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
- EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)

Cognition & Learning Elective
Take 3 or more credit(s) from the following:
- CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
- PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
- PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
- PSY 5054 - Psychology of Language (3.0 cr)
- PSY 8056 - Seminar: Psychology of Language (3.0 cr)

Research Methods and Statistics Elective
Take 3 or more credit(s) from the following:
- EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)
- PSY 5065 - Functional Imaging: Hands-on Training (3.0 cr)
- PSY 5960 - Topics in Psychology (1.0 - 4.0 cr)
- SOC 8801 - Sociological Research Methods (4.0 cr)
**Twin Cities Campus**

**Education, Curriculum, and Instruction M.A.**

*Curriculum & Instruction*

**College of Education and Human Development**

Link to a list of faculty for this program.

**Contact Information:**
Department of Curriculum and Instruction, 125 Peik Hall, 159 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-625-2545; fax: 612-624-8277).
Email: cigs@umn.edu
Website: [http://cehd.umn.edu/ci](http://cehd.umn.edu/ci)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 42
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

By focusing on the curricular and instructional processes central to all educational endeavors, graduate programs within the Department of Curriculum and Instruction prepare students for professional roles in K-12 education, postsecondary and research settings, educational service agencies, and business and industry.

The M.A. degree includes formal tracks in art education; elementary education; learning technologies; literacy education; mathematics education; science education; second languages and cultures education; and social studies education.

Students must have an interest in research in education or a related field; students plan a program of coursework that prepares them to conduct scholarly research in an area of expertise related to a track or tracks listed above.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Generally a bachelor's degree with licensure and/or teaching experience fulfills the requirement. For some areas, however, there is no equivalent undergraduate program. In that case, 15 to 20 credits of undergraduate coursework determined acceptable by advisers and the Director of Graduate Studies is adequate.

**Special Application Requirements:**
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the GRE, scores from the TOEFL/IELTS/MELAB (if applicable), three letters of recommendation from individuals familiar with their scholarship and research potential, a resume, a clearly written statement of career interests, goals, and objectives, and a diversity statement. Some program tracks require an example of academic writing. Master's applications are reviewed by department faculty once per academic year, with December 1 as the deadline.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 15 to 26 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 to 26 major credits and 6 to 9 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: All M.A. students must demonstrate familiarity with the tools of research or scholarship in their major track, the ability to work independently, and the ability to present their work effectively.

Plan B paper(s) are less formal than the Plan A thesis and may build more directly from coursework; papers should involve deep engagement of the research literature. A paper done for a course may serve as one of the Plan B papers, with the understanding that it would be extended and revised under the adviser's supervision.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: For SLC track only

A minimum GPA of 3.00 is required for students to remain in good standing.

In Education, Curriculum & Instruction, students may pursue Plan A (with thesis) or Plan B (with one or two papers). Core and research course requirements are specified for Plan A and Plan B in accord with each track and are chosen in consultation with the adviser.

Plan A requires 15-26 credits in the major, depending upon the formal track chosen, and a minimum of 6 credits in one or more related fields outside the major. Plan A also requires 10 thesis credits.

Plan B requires 24-26 credits in the major and 6-9 credits in one or more related fields outside the major, depending upon formal track chosen.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

Art Education

The M.A. program's art education track presents opportunities for students with experience in schools or other educational settings to develop their ability to work at the intersection of theory and practice. Gaining the knowledge and skills necessary to be reflective and well-informed art educators, graduates become educational leaders in many contexts—school districts, museums, community arts organizations, government agencies—or often pursue further graduate study. Students are encouraged to take courses both across the College of Education and Human Development and the University at large and typically fulfill program requirements by exploring issues of teaching, learning, curriculum, teacher education, and school reform in urban and suburban schools, several renowned art museums in the greater Minneapolis area, and within the initial teacher licensure program at the University. The course of study is planned in consultation with the adviser to meet the academic interests and background of the students; those needs are balanced with the expected foundations in research and scholarship. Independent scholarship is encouraged and typically comes in the form of a final project (Plan B) or a more formal thesis (Plan A).

Program faculty exhibit a strong commitment to curriculum innovation, issues of social justice and diversity, and life-long aesthetic and artistic development.
The Art Education track (Plan A) requires 10 credits of required major coursework plus an additional 5 credits of coursework to be selected in consultation with faculty adviser, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 31 credits.

The Art Education track (Plan B) requires 4 credits of required major coursework plus an additional 14 credits of coursework selected in consultation with faculty adviser, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

Art Ed - Plan A
Total: 31 credits
Major Coursework
Required courses are listed; others selected in consultation with faculty adviser for a total of 15 credits
CI 5078 - Application of Aesthetic Theory in Education (2.0 cr)
CI 8075 - Seminar: Art Education (2.0 cr)
CI 8079 - Research in Art Education (3.0 cr)
CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits
Thesis Credits
A minimum of 10 credits are required
CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Art Ed - Plan B
Total: 30 credits
Major Coursework
Required courses are listed; others selected in consultation with faculty adviser for a total of 18 credits
CI 5078 - Application of Aesthetic Theory in Education (2.0 cr)
CI 8075 - Seminar: Art Education (2.0 cr)
Research Coursework
CI 8095 is required and should be taken for 3 credits; other courses selected in consultation with faculty adviser for a total of 6 credits
CI 8095 - Problems: Art Education (1.0 - 12.0 cr)
Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits

Elementary Education
The M.A. program's elementary education track is designed to help professionals acquire and contribute to the advancement of knowledge and leadership so necessary to address the dynamic challenges of contemporary education at the elementary level. Emphasized within the track are, for example, the following: a focus on interdisciplinary approaches to curriculum development, the use of inquiry as a key pedagogical approach, the importance of a strong understanding of diversity and its social and educational implications, and child development and learning theories as the foundation for research and teaching elementary settings.

The Elementary Education track (Plan A) requires 3 credits of required major coursework plus an additional 12 credits of coursework to be selected in consultation with faculty adviser, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 31 credits.

The Elementary Education track (Plan B) requires 18 credits of coursework selected in consultation with faculty adviser, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

Elem Ed - Plan A
Total: 31 credits
Major Coursework
Required courses are listed; others selected in consultation with faculty adviser for a total of 15 credits
CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits
Thesis Credits
A minimum of 10 credits are required
CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-
Elem Ed - Plan B
Total: 30 credits

Major Coursework
Courses will be selected in consultation with faculty adviser for a total of 18 credits

Research Coursework
A problems course (CI 8x95) is required and should be taken for 3 credits; other courses selected in consultation with faculty adviser for a total of 6 credits

Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits

Learning Technologies
The learning technologies (LT) M.A. track prepares people for research and practice related to multimedia, design, K-12 technology integration, and online distance learning. M.A. graduates often conduct research and engage in LT-related practice in K-12, higher education, or business or industry, such as software companies. LT coursework includes hands-on learning and use of current technologies, development of technological solutions, consideration of theory and research, and conducting educational research.

The M.A.'s LT track is targeted at students interested in a stronger research orientation than those who pursue the master of education degree. M.A. students, who often continue to a Ph.D. program, are required to take courses in research methodology and to write a Plan A thesis or Plan B paper to complete their degree. Master's degrees extend the content in the certificate programs and include various courses taken from inside and outside the program. Students may engage in advanced media and software design and development or develop plans for technology integration for diverse educational settings.

The Learning Technologies track (Plan A) requires 6 credits of required major coursework plus an additional 12 credits of coursework to be selected in consultation with faculty adviser, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 34 credits.

The Learning Technologies track (Plan B) requires 6 credits of required major coursework plus an additional 12 credits of coursework to be selected in consultation with faculty adviser, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

LT - Plan A
Total: 34 credits

Major Coursework
18 credits are required. 6 credits of required courses are listed; 12 remaining credits must be taken in a technology certificate area.
CI 5331 - Introduction to Learning Technologies (3.0 cr)
CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)

Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits

Thesis Credits
A minimum of 10 credits are required
CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

LT - Plan B
Total: 30 credits

Major Coursework
18 credits are required. 6 credits of required courses are listed; 12 remaining credits must be taken in a technology certificate area.
CI 5331 - Introduction to Learning Technologies (3.0 cr)
CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)

Research Coursework
CI 8395 is required and should be taken for 3 credits; other courses selected in consultation with faculty adviser for a total of 6 credits
CI 8395 - Directed Study: Learning Technologies (1.0 - 6.0 cr)

Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits

Literacy Education
The M.A. program's literacy track is thoughtfully designed to balance theory with practical application in a variety of educational settings. There is a deep foundation in evaluating current research and students are encouraged to contribute meaningfully to research in the field of literacy. Faculty members and students work together to study at the intersection of the strands of literacy: children's and adolescent literature, critical literacies, English education, language arts, and reading. Literacy research related to diverse learners in urban, multilingual settings is a central focus of the program. The course of study is planned in consultation with the adviser to meet the academic interests and background of the students; those needs are balanced with the expected foundations in research and scholarship. Independent scholarship is encouraged and typically comes in the form of a final project (Plan B) or a more formal thesis.
The Literacy Education track (Plan A) requires 3 credits of required major coursework plus an additional 12 credits of coursework to be selected in consultation with faculty adviser, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 31 credits.

The Literacy Education track (Plan B) requires 18 credits of coursework selected in consultation with faculty adviser, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

Lit Ed - Plan A
Total: 31 credits
Major Coursework
Required courses are listed; others selected in consultation with faculty adviser for a total of 15 credits
  CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits
Thesis Credits
A minimum of 10 credits are required
  CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
-OR-
Lit Ed - Plan B
Total: 30 credits
Major Coursework
Courses will be selected in consultation with faculty adviser for a total of 18 credits
Research Coursework
  CI 8495 is required and should be taken for 3 credits; other courses selected in consultation with faculty adviser for a total of 6 credits
  CI 8495 - Problems: Teaching English and Reading (1.0 - 6.0 cr)
Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits

Mathematics Education
The M.A. program's mathematics education track prepares students for research and practice related to K-12 mathematics and engineering education. The M.A. is targeted at students interested in a stronger research orientation than those who pursue the master of education (M.Ed.) degree. M.A. students, who often continue on to a Ph.D. program, are required to take courses in research methodology and to write a Plan A or Plan B paper to complete their degree. Graduate students participate in this work as teaching assistants, research assistants in externally funded projects, and as instructors.

The Mathematics Education track (Plan A) requires 9 credits of required major coursework plus an additional 6 credits of coursework to be selected in consultation with faculty adviser, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 31 credits.

The Mathematics Education track (Plan B) requires 3 credits of required major coursework plus an additional 12 credits of coursework selected in consultation with faculty adviser, 6 credits of required research coursework plus an additional 3 credits of research coursework selected in consultation with faculty adviser, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

Math Ed - Plan A
Total: 31 credits
Major Coursework
Required courses are listed
  CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
  MTHE 5314 - Teaching and Learning Mathematics (3.0 cr)
  CI 8572 - Learning Theory and Classical Research in STEM Education (3.0 cr)
Major Coursework - Additional Choices
Choose any two of the following for a total of 6 credits. Any variable credit courses should be taken for 3 credits.
  MTHE 5170 - Historical Topics in the Mathematics Classroom (1.0 - 3.0 cr)
  or MTHE 5171 - Teaching Problem Solving (3.0 cr)
  or MTHE 5172 - Teaching Probability and Statistics (3.0 cr)
  or MTHE 5366 - Technology-Assisted Mathematics Instruction (3.0 cr)
or MTHE 8591 - Seminar: Mathematics Education (1.0 - 3.0 cr)

Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits

Thesis Credits
A minimum of 10 credits are required
CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Math Ed - Plan B
Total: 30 credits

Major Coursework
Required courses are listed; others selected in consultation with faculty adviser for a total of 15 credits
MTHE 5314 - Teaching and Learning Mathematics (3.0 cr)

Research Coursework
Required courses are listed and MTHE 8995 should be taken for 3 credits; other courses selected in consultation with faculty adviser for a total of 9 credits
MTHE 8571 - Research in Mathematics Education (3.0 cr)
MTHE 8995 - Problems: Mathematics Education (1.0 - 6.0 cr)

Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits

Science Education
The M.A. program's science education track is designed to prepare scholars to conduct thoughtful research in order to assume roles as university faculty members, educational leaders, policy makers, and researchers and to contribute meaningfully to the field. The field of science education is a broad one and includes science and environmental education at the K-12 levels, the college level, in informal and adult settings, and in early childhood. Focus areas of research within the science education area are the preparation of pre-service science teachers (K-12), induction and mentoring of beginning science teachers, design and implementation of curricula across the K-college spectrum, environmental education, cooperative learning, and social justice.

The Science Education track (Plan A) requires 12 credits of required major coursework plus an additional 3 credits of coursework to be selected in consultation with faculty adviser, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 31 credits.

The Science Education track (Plan B) requires 15 credits of required major coursework plus an additional 3 credits of coursework to be selected in consultation with faculty adviser, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

Plan A or Plan B

Sci Ed - Plan A
Total: 31 credits

Major Coursework
Required courses are listed; others selected in consultation with faculty adviser for a total of 15 credits. CI 8570 should be taken for 3 credits.
CI 5535 - Foundations of Science Education (3.0 cr)
CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
CI 8570 - Advanced Topics in Science Education (1.0 - 4.0 cr)
CI 8571 - Equity, Policy, and Social Justice in Science Education (3.0 cr)

Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits

Thesis Credits
A minimum of 10 credits are required
CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Sci Ed - Plan B
Total: 30 credits

Major Coursework
Required courses are listed; others selected in consultation with faculty adviser for a total of 18 credits. CI 8570 should be taken twice for a total of 6 credits.
CI 5534 - Studies in Science Education (3.0 cr)
CI 5535 - Foundations of Science Education (3.0 cr)
CI 8570 - Advanced Topics in Science Education (1.0 - 4.0 cr)
CI 8571 - Equity, Policy, and Social Justice in Science Education (3.0 cr)

Research Coursework
CI 8595 is required and should be taken for 3 credits; other courses selected in consultation with faculty adviser for a total of 6 credits.

**Minor or Related Field**

Selected in consultation with faculty adviser for a total of 6 credits.

---

### Second Languages and Cultures Education

The second languages and cultures (SLC) education track is nationally and internationally known for its programs, which focus on English as a second language (ESL) for K-12, postsecondary, and adult classrooms; bilingual and immersion education; and traditional foreign language education in both K-12 and postsecondary settings. The program's perspective on language learning and teaching is markedly pedagogical and informed by an awareness of the role social context plays in the process of language learning and teaching. Master's students in the SLC track engage in coursework and projects that balance theory and research with practical application. In addition to the regular curriculum, the second languages and cultures education track offers a specialization in English as a Second Language for Higher Education. This program focuses on the broad field of applied linguistics uniting research, teaching and service in addressing the second language learning needs of adult learners in the university and the wider community, both in the U.S. and abroad.

In addition to the regular curriculum, the second languages and cultures education track offers a specialization in English as a Second Language for Higher Education. This program focuses on the broad field of applied linguistics uniting research, teaching and service in addressing the second language learning needs of adult learners in the university and the wider community, both in the U.S. and abroad.

The SLC track (Plan A) requires 15 credits of required major coursework, which includes 3 credits of coursework dependent upon focus area (ESL or non-ESL), plus an additional 3 credits of research methodology coursework to be selected in consultation with faculty adviser, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 34 credits.

The SLC track (Plan B) requires 15 credits of required major coursework, plus an additional 3 credits of coursework depending upon focus area (ESL or non-ESL), 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

The SLC track, specialization in ESL for Higher Education (Plan A) requires 23 credits of required major coursework, plus an additional 3 credits of coursework selected in consultation with faculty adviser, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 42 credits.

The SLC track, specialization in ESL for Higher Education (Plan B) requires 23 credits of required major coursework, plus an additional 3 credits of coursework selected in consultation with faculty adviser, and 9 credits in a minor/related field for a total of 35 credits.

CI 5628 - Analyzing Learner Language in Second Language Acquisition (3.0 cr)
CI 5660 - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)
CI 5654 - Practicum in Teaching English as a Second Language (ESL) in Higher Education (6.0 cr)

**Minor or Related Field**
Selected in consultation with faculty adviser for a total of 9 credits

**Social Studies Education**
The M.A.'s social studies education track focuses on issues related to curriculum, instruction and assessment in K-12 social studies. Graduate students are strongly encouraged to present research papers at professional conferences, specifically the National Council for the Social Studies and the American Educational Research Association.

Faculty maintain active research agendas with several research centers at the University including the Center for Applied Research and Educational Improvement, housed within the College of Education and Human Development, and two research centers housed outside the College: the Center for Environmental Learning and Leadership and the Center for the Study of Political Psychology. Social studies faculty research interests include the areas of political socialization, political tolerance, authentic assessment, citizenship and civics education, and democratic thought. In addition, faculty members engage in research centered on the history of curricula, multicultural and gender studies, and social justice.

The Social Studies Education track (Plan A) requires 10 credits of required major coursework plus an additional 6 credits of coursework to be selected in consultation with faculty adviser, 6 credits in a minor/related field, and 10 masters thesis credits for a total of 32 credits.

The Social Studies Education track (Plan B) requires 3 credits of required major coursework plus an additional 15 credits of coursework to be selected in consultation with faculty adviser, 6 credits of research coursework which includes 3 credits for the Plan B paper, and 6 credits in a minor/related field for a total of 30 credits.

**Plan A or Plan B**
Soc Stud Ed - Plan A
Total: 32 credits

Major Coursework
Required courses are listed; others selected in consultation with faculty adviser for a total of 16 credits. CI 8796 has to be taken for a minimum of 1 credit.
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- CI 5762 - Developing Civic Discourse in the Social Studies (3.0 cr)
- CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
- CI 8796 - Research Internship in Social Studies Education (1.0 - 6.0 cr)

Minor or Related Field
Selected in consultation with faculty adviser for a total of 6 credits

Thesis Credits
A minimum of 10 credits are required
- CI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

By focusing on the curricular and instructional processes central to all educational endeavors, graduate programs within the Department of Curriculum and Instruction prepare students for professional roles in preK-12 education, postsecondary and research settings, educational service agencies, and business and industry.

The minor in education, curriculum and instruction may include a focus in any one of the available tracks: art education; culture and teaching (at the doctoral level); elementary education; learning technologies; literacy education; mathematics education; science education; second languages and cultures education; and social studies education.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

**Special Application Requirements:**

Students must consult with the Director of Graduate Studies in the Department of Curriculum & Instruction regarding specific coursework and committee involvement for the minor. The Director of Graduate Studies gives final approval for the minor coursework submitted on the Graduate Degree Plan.

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

A minor at the master's level requires a minimum of 6 credits of CI-designated coursework selected in consultation with the Director of Graduate Studies.

**Program Sub-plans**

Students are required to complete one of the following sub-plans.

Students may not complete the program with more than one sub-plan.

*Master's*
A minor at the master's level requires a minimum of 6 credits of CI-designated coursework selected in consultation with the Director of Graduate Studies.

**Doctoral**

**Doctoral (12 Credits)**

- **CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)**
- **CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)**

**Electives (6 Credits)**

Courses will be selected in consultation with the Director of Graduate Studies.

Email: cigs@umn.edu
Website: http://cehd.umn.edu/ci

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 78
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

By focusing on the curricular and instructional processes central to all educational endeavors, graduate programs within the Department of Curriculum and Instruction prepare students for academic and professional roles in K-12 education, postsecondary, and research settings, educational service agencies, and business and industry.

The Ph.D. degree includes formal tracks in the following: art education; culture and teaching; elementary education; learning technologies; literacy education; science, technology, engineering and mathematics (stem) education; second languages and cultures education; and social studies education.

Students must have an interest in research in education or a related field; students plan a program of coursework that prepares them to conduct scholarly research in an area of expertise related to a track listed above.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A master's degree is preferred for admission to some of the tracks within the Ph.D. program, but it is not always required.

Other requirements to be completed before admission:
Generally a bachelor's degree with licensure and/or teaching experience fulfills the requirement. For some areas, however, there is no equivalent undergraduate program. In that case, 15 to 20 credits of undergraduate coursework determined acceptable by faculty is adequate.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the GRE, scores from the TOEFL/IELTS/MELAB (if applicable), three letters of recommendation from individuals familiar with their scholarship and research potential, a clearly written statement of career interests, goals, and objectives, a diversity statement, and a resume. Some program tracks require an example of academic writing. Doctoral applications are reviewed by department faculty once per academic year, with December 1 as the deadline.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
Program Requirements
42 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

A total of 78 credits is required for the Education, Curriculum and Instruction Ph.D. program. Requirements include core coursework required by all students, major coursework in the student’s selected track, research methodology coursework, and a minimum of 12 credits in a minor or supporting program. All Ph.D. students must also complete 24 doctoral thesis credits. Specific courses and additional work vary depending upon the track and are planned in consultation with the faculty adviser.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

Art Education
The Ph.D. program's art education track presents opportunities for students with experience in schools or other informal educational settings to develop necessary philosophical, theoretical, and methodological competence to make scholarly contributions to the field. Working as researchers, scholars, policy makers, and practitioners, graduates become educational leaders in universities, colleges, K-12 school districts, museums, community arts organizations, and government agencies.

Students typically carry out dissertation inquiry in local urban and suburban schools, several renowned art museums in the Minneapolis-St. Paul area, and within the initial teacher licensure program at the University. Both qualitative and quantitative research methods have guided Ph.D. candidates’ inquiry on the following: rightness of aesthetic-based problem solving, design thinking, and media arts theory and practice in arts classrooms; teaching critical literacy in and through the arts; innovation in culture-based arts education; and other knowledge building questions specific to art teacher development and retention.

Faculty and students are committed to understanding equity and social justice in both research and teaching. Graduate students often work closely with faculty in the development, implementation, and evaluation of national, state, and local arts education initiatives.

15 credits of core coursework are required. 39 additional course credits will need to be selected in consultation with the student's faculty adviser, which includes 12 credits outside the track. 24 doctoral thesis credits are also required.

Core Coursework
CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)
CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
CI 8148 - Conducting Qualitative Studies in Educational Contexts (3.0 cr)
OLPD 8812 - Quantitative Research in Education (3.0 cr)

Culture and Teaching
The culture and teaching (CaT) track engages the study of education as a cultural phenomenon. Students in CaT study a range of educational processes that take place both in and beyond the borders of schools, and explore alternative epistemologies and pedagogies. Faculty and students are dedicated to seeking better understandings of issues pertaining to equity and social justice in
both research and teaching. The track is interdisciplinary and collaborative, so students' work will encompass many different approaches, methods, and perspectives.

Some of CaT's courses focus on the ways in which teachers are prepared to teach; engage in ongoing professional development; and develop their own personal and professional identities within collegial communities. Other courses examine the salience of understanding white racial identity for pedagogy and social change; as well as the implications of globalization and immigration for teaching, learning, and curriculum. Still other courses explore popular culture and media in relation to contemporary critical theory and teaching practices. "Culture" in CaT includes thinking about "high" and "popular" cultures, the cultures of teaching and the cultures of learning, and how our responses to all influence and are influenced by everyday meanings and practices.

15 credits of core coursework are required, plus an additional 6 credits of track specific coursework. 33 additional course credits will need to be selected in consultation with the student's faculty adviser, which includes 12 credits outside the track. 24 doctoral thesis credits are also required.

**Core Coursework**
- CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
- CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)
- CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
- CI 8148 - Conducting Qualitative Studies in Educational Contexts (3.0 cr)
- OLPD 8812 - Quantitative Research in Education (3.0 cr)

**CaT Specific Courses**
- CI 8159 will be taken twice for a total of 6 credits.
- CI 8159 - Culture and Teaching Colloquium (3.0 cr)

**Elementary Education**
This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

The PhD program's elementary education track is designed to help professionals acquire and contribute to the advancement of knowledge and leadership necessary to address the dynamic challenges of contemporary education at the elementary level. Emphasized within the track are, for example, the following: a focus on interdisciplinary approaches to curriculum development, the use of inquiry as a key pedagogical approach, the importance of a strong understanding of diversity and its social and educational implications, and child development and learning theories as the foundation for research and teaching in elementary settings.

15 credits of core coursework are required. 39 additional course credits will need to be selected in consultation with the student's faculty adviser, which includes 12 credits outside the track. 24 doctoral thesis credits are also required.

**Core Coursework**
- CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
- CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)
- CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
- CI 8148 - Conducting Qualitative Studies in Educational Contexts (3.0 cr)
- OLPD 8812 - Quantitative Research in Education (3.0 cr)

**Learning Technologies**
The Ph.D.'s learning technologies (LT) track prepares students for research and practice related to multimedia, design, K-12 technology integration, and online distance learning. Ph.D. graduates often earn academic positions in higher education or become directors and leaders of development or research within business and industry. Coursework in LT includes hands-on learning and use of current technologies, development of technological solutions, research methods, and theory of curriculum, instruction, and learning.

The Ph.D. degree is targeted primarily at students interested in pursuing research careers. Student research, culminating in a dissertation, typically evaluates various learning technologies issues and interventions. Common areas of study include conditions affecting educational technology use in schools, higher education, and business settings, and tend to focus on psychological, sociological, and philosophical factors. For example, recent graduates have studied the impact of technology on learning and cognition, variables that mediate effective technology use in education, and issues related to ethical technology use.

15 credits of core coursework are required. 39 additional course credits will need to be selected in consultation with the student's faculty adviser, which includes 12 credits outside the track. 24 doctoral thesis credits are also required.

**Core Coursework**
- CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
- CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)
- CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
- CI 8148 - Conducting Qualitative Studies in Educational Contexts (3.0 cr)
- OLPD 8812 - Quantitative Research in Education (3.0 cr)
**Literacy Education**

Within the literacy education track there are three specializations: (1) children's and adolescent literature, (2) critical literacy and English education, and (3) reading education. Students who have an interest in literacy outside of these specialization areas are able to work with faculty and advisers to develop a program that builds on their interests. Although faculty members work within these distinct specializations, they also enjoy collaborating on teaching, research, and writing projects across the areas embedded within literacy education. Together, faculty and graduate students in the program investigate a host of issues in the field of literacy.

The literacy education track has four overarching goals. They are:
- to apply multiple theoretical and research perspectives to problems and questions central to the field;
- to engage in research, teaching, and outreach that supports culturally and linguistically diverse literacy learners;
- to develop literacy teachers and leaders for diverse schools; and
- to influence literacy policies that address inequities and benefit all learners.

15 credits of core coursework are required. 39 additional course credits will need to be selected in consultation with the student's faculty adviser, which includes 12 credits outside the track. 24 doctoral thesis credits are also required.

**Science, Technology, Engineering, and Mathematics Education**

The doctoral program's STEM education track at the University of Minnesota is interdisciplinary, focusing on science education, mathematics education, and engineering education. Students pursuing this track will choose an area of emphasis in one of the three specializations, while simultaneously participating in scholarly work that spans all areas of STEM education. This integrated-style is one of the first in the nation, and is designed to prepare scholars to conduct thoughtful disciplinary and interdisciplinary research in STEM education in order to assume roles as university faculty members, educational leaders, policy makers, and researchers.

12 credits of core coursework are required, plus an additional 6 credits of research coursework and 9 credits of track specific coursework. 27 additional course credits will need to be selected in consultation with the student's faculty adviser, which includes 12 credits outside the track. 24 doctoral thesis credits are also required.

**Second Languages and Cultures Education**

The Ph.D. track in second languages and cultures (SLC) focuses on the study of language use, teaching, learning, and policy across a range of educational and community settings, including programs that serve language minority and language majority learners: ESL/EFL, foreign language education, and bilingual and immersion education. The Ph.D. track is designed to assume roles as university faculty members, researchers, policy makers, and educational leaders. Independent scholarship is the cornerstone of the Ph.D.

The SLC Ph.D. track has four specializations that correspond to the program's primary focus areas and faculty expertise.

1) Second language acquisition and classroom discourse research examines language learning processes and the way language is used by learners and their interlocutors in or out of school.
2) Second language pedagogy and teacher development research examines teachers’ classroom practices and strategies as well as professional identities, experiences and attitudes.
3) Language policy research involves analysis of the formation, implementation, and negotiation of language policy in national, school, community, and private spheres.
4) Languages and cultures across schools and communities research examines connections across homes, schools, and communities with an emphasis on the experience.
15 credits of core coursework are required. 39 additional course credits will need to be selected in consultation with the student's faculty adviser, which includes 12 credits outside the track. 24 doctoral thesis credits are also required.

**Core Coursework**
- CI 8131 - Curriculum and Instruction Core: Critical Examination of Curriculum in Context (3.0 cr)
- CI 8132 - Curriculum and Instruction Core: Teaching Theory and Research (3.0 cr)
- CI 8133 - Research Methods in Curriculum and Instruction (3.0 cr)
- CI 8148 - Conducting Qualitative Studies in Educational Contexts (3.0 cr)
- OLPD 8812 - Quantitative Research in Education (3.0 cr)

**Social Studies Education**
The PhD program's social studies education track focuses on issues related to curriculum, instruction, and assessment in K-12 social studies. Full-time graduate students generally have opportunities to supervise student teachers, teach introductory social studies classes, and conduct and publish research with one or more faculty members. Doctoral students are required to complete a research internship with one or more of the faculty as part of their study for the degree. Graduate students are strongly encouraged to present research papers at professional conferences, specifically the National Council for the Social Studies and the American Educational Research Association. Recent Ph.D. graduates have conducted research in the areas of intercultural relations, moral development, multicultural gender-fair curriculum, social studies instructional issues, and the standards movement as it relates to social studies education. Graduates have assumed positions as instructional leaders in the public schools, curriculum development specialists, social studies assessment specialists, and college/university faculty.

15 credits of core coursework are required. 39 additional course credits will need to be selected in consultation with the student's faculty adviser, which includes 12 credits outside the track. 24 doctoral thesis credits are also required.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 50
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The educational psychology program has five tracks: counseling and student personnel psychology (CSPP); school psychology; special education; psychological foundations of education (learning and cognition/educational technology, social psychological and social developmental processes in educational psychology including human relations); and quantitative methods in education (including measurement, evaluation, statistics, and statistics education).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants must apply online submitting a department application, three letters of recommendation, and a statement of goals and interests. Official transcripts from all colleges and universities attended should accompany the application. The GRE is required for all tracks. Applications to CSPP (deadline January 15), and special education (deadline December 1) are accepted for fall admission only. Applications to psychological foundations and quantitative methods in education are accepted for fall admission (deadlines December 1 and March 1) as well as summer admission (deadline March 1) and spring admission (deadline October 15). School psychology does not offer the MA as a terminal degree.

Applicants must submit the following test score(s):
GRE General Test
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 20 to 40 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 to 50 major credits and 0 credits outside the major. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students must complete credits in EPSY core courses (3 credits in statistics, 3 credits in measurement/evaluation, 3 credits in learning/cognition or social/personality). EPSY core courses must be taken on an A-F grade basis. Plan A students must take 10 thesis credits; Plan B registration varies by track. Students must have a minimum of 14 credits in EPSY. Further required credits are detailed within subplan requirements.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Counseling and Student Personnel Psychology
This sub-plan is limited to students completing the program under Plan B.

The counseling and student personnel psychology (CSPP) track subscribes to the scientist/practitioner model, which assumes that scholarly inquiry and counseling practice are interdependent and complementary. The track's primary mission is to prepare counseling psychologists to bring a well-trained professional's attitude and interest to bear on the application of psychological and educational knowledge. In addition to becoming skilled clinicians, students learn to be critical consumers and producers of both quantitative and qualitative research. Emphasis areas: community counseling, school counseling, and student personnel psychology/higher education.

Students take 48-50 credits distributed as follows: 9 credits EPSY core courses, 25 credits in counseling theory and practice and 14-16 credits in the area of emphasis. All courses must be taken on an A-F grade basis. The final exam is written; students must also submit a portfolio.

Ed Psych Core Course Requirements
Students must take 3 credits in statistics, 3 credits in measurement/evaluation and 3 credits in learning/cognition or social/personality.

- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 8132 - Personality Development and Socialization (3.0 cr)

Counseling Theory & Practice Requirements

- EPSY 8402 - Individual Counseling: Theory and Applications (3.0 cr)
- EPSY 8403 - Social/Cultural Contexts: Counseling and Skills (3.0 cr)
- EPSY 8404 - Group Counseling: Theory, Applications, and Skills (3.0 cr)
- EPSY 8405 - Career Development: Theory, Skills, and Counseling Applications (3.0 cr)
- EPSY 8406 - Professional Ethics for Counselors and Psychologists (3.0 cr)
- EPSY 8407 - Assessing and Counseling Clients With Psychological Disorders (4.0 cr)
- EPSY 8501 - Counseling Pre-Practicum (3.0 cr)
- EPSY 8431 - Master's Research Seminar: CSPP (3.0 cr)

Courses in Area of Emphasis
Students must take additional courses (14-16 credits) in their area of emphasis.

Community Emphasis
Students must take 4 credits of EPSY 8503, 4 credits of EPSY 8504, 2 credits electives (in consultation with adviser), and either EPSY 5415 or EPSY 5400 twice for 2 credits each.

- EPSY 8503 - Counseling Practicum I (1.0 - 4.0 cr)
- EPSY 8504 - Counseling Practicum II (1.0 - 4.0 cr)

Elective course (minimum 2 cr.) in consultation with adviser
Take either EPSY 5415 or EPSY 5400 Child/Adol Thry & Issues (2 cr.) and EPSY 5400 Child/Adol Dev & Family Issues (2 cr.).
EPSY 5415 - Child and Adolescent Development and Counseling (4.0 cr)
or EPSY 5400 - Special Topics in Counseling Psychology (1.0 - 4.0 cr)

-OR-

Student Personnel/Higher Ed Emphasis
Students must take 4 credits of EPSY 8503 and 4 credits of EPSY 8504. EPSY 5421/OLPD5724 and EPSY 5451/OLPD5704 are recommended, but not required.
EPSY 5415 - Child and Adolescent Development and Counseling (4.0 cr)
EPSY 8503 - Counseling Practicum I (1.0 - 4.0 cr)
EPSY 8504 - Counseling Practicum II (1.0 - 4.0 cr)
Elective course (minimum 2 cr.) in consultation with adviser

-OR-

School Counseling Emphasis
Students must take 3 credits of EPSY 5435, 3 credits of EPSY 8503, and 3 credits of EPSY 8504.
EPSY 5415 - Child and Adolescent Development and Counseling (4.0 cr)
EPSY 5435 - Introduction to School Counseling (3.0 - 6.0 cr)
EPSY 5436 - Crisis Management and Consulting in Schools (3.0 cr)
EPSY 8503 - Counseling Practicum I (1.0 - 4.0 cr)
EPSY 8504 - Counseling Practicum II (1.0 - 4.0 cr)

Psychological Foundations
Graduate study in psychological foundations of education prepares students for research and teaching positions in colleges and universities. Students have also gone on to positions in professional settings such as schools, private industry, human service organizations, health science units, and government agencies. The goal of the track is to apply and generate knowledge of psychological processes and methodological procedures involved in learning and teaching.

The Psychological Foundations track offers emphases in learning and cognition/educational technology or social psychological and social developmental (including human relations) processes in educational psychology. Students typically choose one of these areas in addition to achieving broad competence in all aspects of the curriculum.

Students take 33-34 credits distributed as follows: 9 credits EPSY core requirements, 3 credits research methodology, and 12 credits in an area of emphasis. Plan A students take 10 thesis credits; Plan B students take 6 research credits and 3 additional credits.

Ed Psych Core Course Requirements
Psychological Foundations students must take 9 credits (3 credits in learning/cognition or social/personality depending on area of emphasis, 3 credits in statistics and 3 credits in measurement/evaluation. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

Learning/Cognition or Social/Personality
learning/cognition
Students in the Social area of emphasis must take one of these courses.
Take 3 or more credit(s) from the following:
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)

or social/personality
Students in the Learning area of emphasis must take one of these courses.
Take 3 or more credit(s) from the following:
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)

Statistics
Take 3 or more credit(s) from the following:
• EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
• EPSY 8252 - Methods in Data Analysis for Educational Research II (3.0 cr)
• EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
• EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)

Measurement/Evaluation
Take 3 or more credit(s) from the following:
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)

Research Methodology

EPSY 5216 - Introduction to Research in Educational Psychology and Human Development (3.0 cr)

Plan B Paper

For students completing the M.A. under Plan B.

Take 6 or more credit(s) from the following:

- EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)
- EPSY 8994 - Research Problems: Educational Psychology (1.0 - 6.0 cr)

Additional 3 credits

3 additional credits are required for Plan B, preferably in either learning/cognition or social psychology/social development, but may also include other areas of Educational Psychology. Consult with adviser.

Psychological Foundations Emphases

Learning/Cognition Emphasis

Required Learning and Cognition Courses

Take 6 or more credit(s) from the following:

- EPSY 5101 - Intelligence and Creativity (3.0 cr)
- EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
- EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
- EPSY 5119 - Mind, Brain, and Education (3.0 cr)
- EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
- EPSY 5200 - Special Topics: Psychological Foundations (1.0 - 4.0 cr)

Specialization Courses in Learning and Cognition

Take 6 or more credit(s) from the following:

- EPSY 8112 - Mathematical Cognition (3.0 cr)
- EPSY 8113 - The Psychology of Scientific Reasoning (3.0 cr)
- EPSY 8114 - Seminar: Cognition and Learning (3.0 cr)
- EPSY 8115 - Psychology of Instruction and Technology (3.0 cr)
- EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)

- OR -

Social Emphasis

Required social psychology course

EPSY 5157 - Social Psychology of Education (3.0 cr)

Additional social psychology or social developmental courses

Take 6 or more credit(s) from the following:

- EPSY 5151 - Cooperative Learning (3.0 cr)
- EPSY 5200 - Special Topics: Psychological Foundations (1.0 - 4.0 cr)
- EPSY 8290 - Special Topics: Seminar in Psychological Foundations (1.0 - 6.0 cr)
- PSY 5202 - Attitudes and Social Behavior (3.0 cr)
- PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
- PSY 5205 - Applied Social Psychology (3.0 cr)
- PSY 5207 - Personality and Social Behavior (3.0 cr)
- PSY 8201 - Social Cognition (3.0 cr)
- PSY 8202 - Close Relationships (3.0 cr)
- PSY 8208 - Social Psychology: The Self (3.0 cr)
- CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)

Additional 3 credits - Plan A only

3 additional credits are required for Plan A, preferably in either social psychology/social development or learning/cognition, but may also include other areas of Educational Psychology.

Quantitative Methods in Education

This sub-plan is limited to students completing the program under Plan B.

Graduate study in quantitative methods in education (QME) prepares students for a wide variety of careers, including positions in college and university teaching and research, research and evaluation centers, testing publishing firms, public school systems, state departments of instruction, and private industry. The goal of the QME track is to provide students with broad but rigorous methodological skills so that they may conduct research on methodologies, may help to train others in methodology, or will have the skills necessary to conduct research in related fields.

The QME track offers emphases in measurement, evaluation, statistics, and statistics education. Students typically choose one of these areas in addition to achieving competence in all aspects of the curriculum.
Students take 30 credits distributed as follows: 9 credits EPSY core requirements, 18 credits QME core requirements (6 credits can be used to satisfy EPSY core requirements, and 3 research credits (EPSY 5991) for the Plan B paper. 2 additional courses (minimum 6 credits) in the area of emphasis are determined in consultation with adviser.

**Ed Psych Core Course Requirements**

Students must take 3 credits in statistics, 3 credits in measurement/evaluation and 3 credits in learning/cognition or social/personality. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

**Statistics**

QME core courses EPSY 8251 or 8252 will satisfy this requirement.

**Measurement/Evaluation**

QME core courses EPSY 5221, 5243, 5244 or 5247 will satisfy this requirement.

**Learning/Cognition or Social/Personality**

3 credits required from learning/cognition or social/personality.

**Learning/cognition**

Take 3 or more credit(s) from the following:

- EPSY 5101 - Intelligence and Creativity (3.0 cr)
- EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
- EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
- EPSY 5119 - Mind, Brain, and Education (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 8112 - Mathematical Cognition (3.0 cr)
- EPSY 8115 - Psychology of Instruction and Technology (3.0 cr)
- EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
- PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
- PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
- CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)

**or social/personality**

Take 3 or more credit(s) from the following:

- EPSY 5135 - Human Relations Workshop (4.0 cr)
- EPSY 5151 - Cooperative Learning (3.0 cr)
- EPSY 5157 - Social Psychology of Education (3.0 cr)
- EPSY 8132 - Personality Development and Socialization (3.0 cr)
- PSY 5101 - Personality Psychology (3.0 cr)
- PSY 5135 - Psychology of Individual Differences (3.0 cr)
- PSY 5202 - Attitudes and Social Behavior (3.0 cr)
- PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
- PSY 5205 - Applied Social Psychology (3.0 cr)
- PSY 5207 - Personality and Social Behavior (3.0 cr)
- PSY 8201 - Social Cognition (3.0 cr)
- PSY 8202 - Close Relationships (3.0 cr)
- PSY 8208 - Social Psychology: The Self (3.0 cr)
- CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
- CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
- SOC 8721 - Theories of Social Psychology (3.0 cr)

**Plan B Paper**

Students take 3 credits for their Plan B paper.

EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

**QME Core Course Requirements**

EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
- EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
- EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
- EPSY 8252 - Methods in Data Analysis for Educational Research II (3.0 cr)

**Courses in area of emphasis**

Students must take two additional courses (minimum 6 credits) in their area of emphasis.

**Evaluation Emphasis**

OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

QME course in consultation with adviser (3 credits)
-OR-

Measurement Emphasis
Students must take one 8xxx level measurement course (3 credits)
QME course in consultation with adviser (3 credits)

-OR-

Statistics Emphasis
EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
QME course in consultation with adviser (3 credits)

-OR-

Statistics Education Emphasis
EPSY 5271 - Becoming a Teacher of Statistics (3.0 cr)
MathEd (MTHE) course in consultation with adviser (3 credits)

School Psychology
School psychology does not offer the M.A. as a terminal degree; rather, the M.A. is required to obtain the Specialist Certificate or Ph.D. in educational psychology.

Students take 30 credits distributed as follows: 9 credits EPSY core requirements and 11-19 credits School Psychology course requirements. Plan A students must take 10 thesis credits; Plan B students take 2 research credits (EPSY 8994).

EPSY Core Course Requirements
Students must take 3 credits in statistics, 3 credits in measurement/evaluation and 3 credits in learning/cognition or social/personality. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

Statistics
EPSY 5261 - Introductory Statistical Methods (3.0 cr)
or EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)

Measurement/Evaluation
EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)

Learning/Cognition or Social/Personality
EPSY 8114 - Seminar: Cognition and Learning (3.0 cr)
or EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)

Plan B Paper
For students completing the M.A. program under Plan B.
Take 2 or more credit(s) from the following:
• EPSY 8994 - Research Problems: Educational Psychology (1.0 - 6.0 cr)

School Psychology Course Requirements
Plan A students choose 11 credits and Plan B students choose 19 credits from the list below.
Take 11 - 19 credit(s) from the following:
• EPSY 5216 - Introduction to Research in Educational Psychology and Human Development (3.0 cr)
• EPSY 5802 - Foundations of Developmental Psychology Across the Lifespan (3.0 cr)
• EPSY 5851 - Engaging Diverse Students and Families (3.0 cr)
• EPSY 8811 - Assessment in School Psychology I: Foundations of Academic Assessment (3.0 cr)
• EPSY 8812 - Assessment in School Psychology II: Intellectual and Social-Emotional Domains (3.0 cr)
• EPSY 8813 - Assessment Practicum in School Psychology (2.0 cr)
• EPSY 8815 - Individual and System Socio-Emotional Interventions (3.0 cr)
• EPSY 8816 - Individual and Systems Academic Interventions (3.0 cr)
• EPSY 8817 - School Psychological Consultation (3.0 cr)
• EPSY 8818 - Intervention Practicum in School Psychology (1.0 cr)
• EPSY 8821 - Issues in School Psychology (3.0 cr)
• EPSY 8822 - Research in School Psychology (1.0 - 3.0 cr)
• EPSY 8823 - Ethics and Professional Standards in School Psychology (3.0 cr)
• EPSY 8849 - Assessment in Early Childhood (3.0 cr)
• EPSY 8800 Special Topic: Emotion and Psychopathology (3 cr.)

Special Education
The special education track offers opportunities for research and specializations in autism spectrum disorders, deaf/hard-of-hearing, emotional behavior disorders, early childhood special education, specific learning disabilities, developmental disabilities, and self-injurious behaviors and applied behavior analysis. Early involvement in research projects and the development of original research programs in areas such as academic instructional strategies, social and cognitive development, behavioral/psychological management, child development, and technology are encouraged.

The special education track focuses on the attainment of core competencies required for special education professionals as well as interdisciplinary skills and goals. A complementary emphasis is placed on problem solving that is influential in the social and cultural...
perceptions, care, education, intervention, and support of persons with disabilities.

Students may emphasize consulting, college teaching, or research in one or more of the specializations.

Students take 32 credits distributed as follows: 9 credits EPSY core courses, 10 credits Special Ed course requirements, 3 elective credits (in consultation with adviser). Plan A students must take 10 thesis credits; Plan B students take 8 credits in Research Problems (EPSY 8994) and 4 additional credits (in consultation with adviser).

EPSY Core Course Requirements
Students must take 3 credits in statistics, 3 credits in measurement/evaluation and 3 credits in learning/cognition or social/personality. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

Statistics
Take 3 or more credit(s) from the following:
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
- EPSY 8252 - Methods in Data Analysis for Educational Research II (3.0 cr)
- EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
- EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)
- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
- EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)

Measurement/Evaluation
3 credits required in measurement or evaluation

measurement
Take 3 or more credit(s) from the following:
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)
- EPSY 8221 - Psychological Scaling (3.0 cr)
- EPSY 8822 - Advanced Measurement: Theory and Application (4.0 cr)
- EPSY 8825 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
- EPSY 8826 - Item Response Models: Theory and Applications (3.0 cr)
- EPSY 8826 - Factor Analysis (3.0 cr)
- EPSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
- PSY 5865 - Advanced Psychological and Educational Measurement (4.0 cr)

evaluation
Take 3 or more credit(s) from the following:
- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
- EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
- EPSY 8247 - Advanced Interviewing and NVIVO (3.0 cr)
- OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)

Learning/Cognition or Social/Personality
3 credits required in learning/cognition or social/personality

learning/cognition
Take 3 or more credit(s) from the following:
- EPSY 5101 - Intelligence and Creativity (3.0 cr)
- EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
- EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
- EPSY 5119 - Mind, Brain, and Education (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 8112 - Mathematical Cognition (3.0 cr)
- EPSY 8115 - Psychology of Instruction and Technology (3.0 cr)
- EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
- PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
- PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
- CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)

social/personality
Take 3 or more credit(s) from the following:
- EPSY 5135 - Human Relations Workshop (4.0 cr)
- EPSY 5151 - Cooperative Learning (3.0 cr)
- EPSY 5157 - Social Psychology of Education (3.0 cr)
• EPSY 8132 - Personality Development and Socialization (3.0 cr)
• PSY 5101 - Personality Psychology (3.0 cr)
• PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8208 - Social Psychology: The Self (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
• CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
• SOC 8721 - Theories of Social Psychology (3.0 cr)

**Plan B**

For students completing the M.A. under Plan B.

Take 6 or more credit(s) from the following:

- EPSY 8994 - Research Problems: Educational Psychology (1.0 - 6.0 cr)

Electives selected in consultation with adviser (4 credits)

**Special Ed Course Requirements**

Students take 7 credits in Special Ed Foundations courses, 3 credits Special Ed elective course, and 3 additional elective credits (consult with adviser).

**special ed foundations courses**

Students must take these two courses.

- EPSY 5613 - Foundations of Special Education I (3.0 cr)
- EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)

**special ed elective course**

Take 3 or more credit(s) from the following:

- EPSY 5615 - Advanced Academic Interventions (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5621 - Assessment and Instructional Design for Students with Developmental Disabilities (3.0 cr)
- EPSY 5624 - Biomedical and Physical Impairments of Students with Developmental Disabilities (2.0 cr)
- EPSY 5625 - Education of Infants, Toddlers, and Preschool Children with Disabilities: Introduction (2.0 cr)

**additional elective course**

Elective course in consultation with adviser (minimum 3 credits)
**Twin Cities Campus**

**Educational Psychology Minor**

**Educational Psychology**

**College of Education and Human Development**

Department of Educational Psychology, 250 Educational Science Building, 56 East River Road, Minneapolis, MN 55455; (612-624-6083; fax: 612-624-8241)
Email: epsy-adm@umn.edu
Website: http://www.cehd.umn.edu/edpsych

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The educational psychology program has five tracks: counseling and student personnel psychology (CSPP); school psychology; special education; psychological foundations of education (learning and cognition/educational technology, social psychological and social developmental processes in educational psychology including human relations); and quantitative methods in education (including measurement, evaluation, statistics, and statistics education).

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**
Use of 4xxx courses towards program requirements is not permitted.

A master's minor requires at least 6 credits of graduate-level EPSY courses. A doctoral minor requires at least 15 credits of graduate-level EPSY courses, of which at least 9 credits must be in 8xxx courses. Course selection is determined in consultation with the educational psychology committee member. Courses must be taken on an A-F grade basis.

**Program Sub-plans**
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Master's**
A master's minor requires at least 6 credits of graduate-level EPSY courses. Course selection is determined in consultation with the educational psychology committee member. Courses must be taken on an A-F grade basis.

**Doctoral**
A doctoral minor requires at least 15 credits of graduate-level EPSY courses, of which at least 9 credits must be in 8xxx courses. Course selection is determined in consultation with the educational psychology committee member. Courses must be taken on an A-F grade basis.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 69 to 102
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The educational psychology program has five tracks: counseling and student personnel psychology (CSPP); school psychology; special education; psychological foundations of education (learning and cognition/educational technology, social psychological and social developmental processes in educational psychology including human relations); and quantitative methods in education (including measurement, evaluation, statistics, and statistics education).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
For the CSPP track, students are required to have completed a 450 hour supervised practicum at the MA level. They must also complete the following courses or the equivalent.
- EPsy 5261 Introductory Statistical Methods
- EPsy 5415 Child and Adolescent Development and Counseling
- EPsy 8132 Personality Development and Socialization
- EPsy 8406 Professional Ethics for Counselors and Psychologists
- EPsy 8402 Individual Counseling: Theory and Applications
- EPsy 8403 Social/Cultural Contexts: Counseling and Skills
- EPsy 8405 Career Development: Theory, Skills, and Counseling Applications
- EPsy 8431 M.A. Research Seminar
- EPsy 8501 Counseling Pre-Practicum
- EPsy 8503 Counseling Practicum I
- EPsy 8504 Counseling Practicum II
- EPsy 8407 Assessing and Counseling Clients with Psychological Disorders
- ALSO: Learning/Cognition

Special Application Requirements:
Applicants must apply online submitting a department application, three letters of recommendation, and a statement of goals and interests. In addition, school psychology applicants must also submit a critical issue essay, answering the following questions: Identify a critical problem facing contemporary schools in America or another country. What do you think are the social, political, and/or economic factors that are contributing to this problem? What specific solutions might you propose to tackle the problem?

Applications should be accompanied by official transcripts from all colleges and universities attended. The GRE is required for all tracks. An interview is required for those who make the initial cut in school psychology.
Applications to school psychology (deadline November 15), CSPP (deadline December 1), special education (deadline December 1) and psychological foundations (deadlines December 1 and March 1) are accepted for fall admission only. Applications to quantitative methods in education are accepted for fall admission (deadlines December 1 and March 1) as well as summer admission (deadline March 1) and spring admission (deadline October 15).

Applicants must submit the following test score(s):
- GRE General Test

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
45 to 78 credits are required in the major.
0 to 9 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students must complete credits in EPSY core courses (6 credits in statistics, 3 credits in measurement/evaluation, 6 credits in research methods, 9 credits from at least two areas: learning/cognition, social/personality, history/systems), 9 credits EPSY electives and 24 thesis credits. Further required credits are detailed within subplan requirements.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Counseling and Student Personnel Psychology
The counseling and student personnel psychology (CSPP) track subscribes to the scientist/practitioner model, which assumes that scholarly inquiry and counseling practice are interdependent and complementary. The CSPP track's primary mission is to prepare counseling psychologists to bring a well-trained professional's attitude and interest to bear on the application of psychological and educational knowledge. In addition to becoming skilled clinicians, students learn to be critical consumers and producers of both quantitative and qualitative research.

Students take 81 credits distributed as follows: 24 EPSY core requirements (2 credits can be satisfied by MA research course), 9 credits EPSY electives, 35 credits CSPP course requirements in counseling theory and practice, practica, and internships (9 credits can satisfy EPSY elective requirement), and 24 thesis credits.

Ed Psych Core Course Requirements
Students must take 3 credits in history/systems, 6 credits in learning/social/personality, 6 credits in statistics, 3 credits in measurement/evaluation, 6 credits in research methods, and 9 credits EPSY electives. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

History/Systems
EPSY 8905 - History and Systems of Psychology: Landmark Issues in Educational Psychology (3.0 cr)
Learning/Social/Personality
Take 6 or more credit(s) from the following:

learning
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
• EPSY 8115 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
• EPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)

social/personality
• EPSY 5135 - Human Relations Workshop (4.0 cr)
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• EPSY 8132 - Personality Development and Socialization (3.0 cr)
• EPSY 8290 Special Topic: Key Issues in Social Psychology and Education (3 credits)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
• EPSY 5202 - Attitudes and Social Behavior (3.0 cr)
• EPSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• EPSY 5205 - Applied Social Psychology (3.0 cr)
• EPSY 5207 - Personality and Social Behavior (3.0 cr)
• EPSY 8201 - Social Cognition (3.0 cr)
• EPSY 8202 - Close Relationships (3.0 cr)
• EPSY 8208 - Social Psychology: The Self (3.0 cr)
• SOC 8721 - Theories of Social Psychology (3.0 cr)

Statistics
Take 6 or more credit(s) from the following:
• EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
• EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)

Measurement/Evaluation
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)

Research Methods
6 credits required (2 credits can be satisfied by MA research course.)
• EPSY 8411 - Advanced Counseling Research (4.0 cr)

EPSY Electives
9 credits of EPSY electives can be satisfied by CSPP course requirements.

CSPP Course Requirements
Students must take EPSY 8509 three times for a total of 5 credits, EPSY 8512 for a total of 12 credits, EPSY 8522 two times for a total of 6 credits and EPSY 8994 for 2 credits. EPSY courses will satisfy 9 credits Ed Psych elective core requirement.
• EPSY 8412 - Seminar: Advanced Counseling Theory and Ethics (4.0 cr)
• EPSY 8413 - Personality Assessment of Adolescents and Adults (3.0 cr)
• EPSY 8452 - Psychological Aspects of Counseling Supervision (3.0 cr)
• EPSY 8509 - Supervision Practicum: CSPP (1.0 - 2.0 cr)
• EPSY 8512 - Internship: CSPP (1.0 - 12.0 cr)
• EPSY 8522 - Counseling Practicum: Advanced (3.0 cr)
• EPSY 8994 - Research Problems: Educational Psychology (1.0 - 6.0 cr)

Psychological Foundations
The psychological foundations of education track prepares students for research and teaching positions in colleges and universities.

Students have also gone on to positions in professional settings such as schools, private industry, human service organizations, health science units, and government agencies. The goal of the psychological foundations track is to apply and generate knowledge of psychological processes and methodological procedures involved in learning and teaching.

The track offers emphases in learning and cognition/educational technology or social psychological and social developmental (including human relations) processes in educational psychology. Students typically choose one of these areas in addition to achieving broad competence in all aspects of the curriculum.

Students take 72 credits distributed as follows: 24 credits EPSY core requirements, 9 credits EPSY electives, 18 credits in the area of emphasis in PsyF (12 PsyF credits can be used to satisfy EPSY core and elective requirements), 9 credits of coursework outside of Ed Psych, and 24 thesis credits.
Ed Psych Core Course Requirements

Psychological Foundations students must take 9 credits (3 in history/systems, 3 in learning/cognition, 3 in social/personality); 6 credits in research methods; 6 credits in statistics and 3 credits in measurement/evaluation. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

History/Systems
PsyF students must take EPSY 8905.
EPSY 8905 - History and Systems of Psychology: Landmark Issues in Educational Psychology (3.0 cr)

Learning/Cognition
Students in the learning area of PsyF can satisfy this requirement with required learning courses.
Take 3 or more credit(s) from the following:
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
• EPSY 5200 - Special Topics: Psychological Foundations (1.0 - 4.0 cr)

Social/Personality
Students in the social area of PsyF can satisfy this requirement with required social/personality courses.
Take 3 or more credit(s) from the following:
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• EPSY 5135 - Human Relations Workshop (4.0 cr)
• PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)

Research Methods
EPSY 5216 - Introduction to Research in Educational Psychology and Human Development (3.0 cr)
EPSY 8216 - Seminar: Research Processes in Psychological Foundations of Education (3.0 cr)

Statistics
6 credits required
EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
EPSY 8252 - Methods in Data Analysis for Educational Research II (3.0 cr)
or
EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)

Measurement/Evaluation
Take 3 or more credit(s) from the following:
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
• PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)

EPSY Electives
9 credits of EPSY electives can be satisfied by additional courses in the area of emphasis.

External Courses
Psych Foundations students must take a minimum of 9 credits of coursework outside of Educational Psychology in consultation with adviser.

Courses in Area of Emphasis
Students must take additional courses in their area of emphasis in consultation with adviser. EPSY courses will satisfy 3 credits Ed Psych learning or social core requirement and 9 credits EPSY electives.

Learning/Cognition Emphasis

Required Learning and Cognition Courses
Take 6 or more credit(s) from the following:
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
• EPSY 5200 - Special Topics: Psychological Foundations (1.0 - 4.0 cr)
Specialization Courses in Learning and Cognition
Take 12 or more credit(s) from the following:
• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8113 - The Psychology of Scientific Reasoning (3.0 cr)
• EPSY 8114 - Seminar: Cognition and Learning (3.0 cr)
• EPSY 8115 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8117 - Writing Empirical Paper and Research/Grant Proposals in Education and Psychology (3.0 cr)
• EPSY 8290 - Special Topics: Seminar in Psychological Foundations (1.0 - 6.0 cr)

- OR -

Social Emphasis
Required Social Psychology or Social Development Courses
Take 6 or more credit(s) from the following:
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)

Specialization Courses in Social Psychology or Social Development
Take 12 or more credit(s) from the following:
• EPSY 8117 - Writing Empirical Paper and Research/Grant Proposals in Education and Psychology (3.0 cr)
• EPSY 8290 - Special Topics: Seminar in Psychological Foundations (1.0 - 6.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8208 - Social Psychology: The Self (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)

Quantitative Methods in Education
The quantitative methods in education (QME) track prepares students for a wide variety of careers, including positions in college and university teaching and research, research and evaluation centers, test publishing firms, public school systems, state departments of assessment, and private industry. The goal of the QME track is to provide students with broad but rigorous methodological skills so that they may conduct research on methodologies, may help to train others in methodology, or will have the skills necessary to conduct research in related fields.

The QME track offers emphases in measurement, evaluation, statistics, and statistics education. Students typically choose one of these areas in addition to achieving competence in all aspects of the curriculum.

Students take 72 credits distributed as follows: 27 credits EPSY core requirements, 9 credits EPSY electives, 18 credits QME core requirements, 12 additional courses in the area of emphasis in QME (18 QME credits can be used to satisfy EPSY core and elective requirements), and 24 thesis credits.

Ed Psych Core Course Requirements
Students must take 9 credits in at least two of these areas: learning/cognition, social/personality or history/systems; and 9 credits in research methods. (QME core and additional courses will satisfy EPSY core requirements for 6 credits in statistics, 3 credits in measurement/evaluation and 9 credits EPSY electives.) Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

Learning/Cognition, Social/Personality, History/Systems
Take 9 or more credit(s) including 2 or more sub-requirements(s) from the following:
learning/cognition
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8115 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
• CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)

• social/personality
Take 0 or more course(s) from the following:
• EPSY 5135 - Human Relations Workshop (4.0 cr)
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• EPSY 8132 - Personality Development and Socialization (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
• CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
• PSY 5101 - Personality Psychology (3.0 cr)
• PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8208 - Social Psychology: The Self (3.0 cr)
• SOC 8721 - Theories of Social Psychology (3.0 cr)

• history/systems
Take 0 or more course(s) from the following:
• EPSY 8905 - History and Systems of Psychology: Landmark Issues in Educational Psychology (3.0 cr)

Research Methods
QME students must take these 3 research methods courses.
EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)

Statistics
6 credits of statistics will be satisfied by QME core course requirements.

Measurement/Evaluation
3 credits of measurement or evaluation will be satisfied by QME core course requirements.

EPSY Electives
9 credits of EPSY electives can be satisfied by additional courses in the area of emphasis.

QME Core Course Requirements
Students must take these courses, including an 8xxx level measurement course selected in consultation with adviser (minimum 18 credits total).
EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
EPSY 8252 - Methods in Data Analysis for Educational Research II (3.0 cr)
EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
EPSY 8xxx measurement course (minimum 3 credits)

Courses in Area of Emphasis
Students must take minimum 12 credits in their area of emphasis (in consultation with adviser). EPSY courses will satisfy 9 credits Ed Psych elective core requirement.

Evaluation Emphasis
Take 12 or more credit(s) from the following:
• EPSY 5246 - Evaluation Colloquium: Psychological Foundations (1.0 cr)
• EPSY 8221 - Psychological Scaling (3.0 cr)
• EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
• EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
• EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
• EPSY 8247 - Advanced Interviewing and NVIVO (3.0 cr)
• EPSY 8265 - Factor Analysis (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• EPSY 8272 - Nonparametric Statistics in Education (3.0 cr)
• EPSY 8281 - Advanced Statistical Computing and Data Analysis (3.0 cr)
• EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
• OLPD 5056 - Case Studies for Policy Research (3.0 cr)
• OLPD 5061 - Ethnographic Research Methods (3.0 cr)
• OLPD 5521 - Cost and Economic Analysis in Educational Evaluation (3.0 cr)

School Psychology
School psychology is fully accredited by the American Psychological Association, the Minnesota Board of Teaching, and the National Association of School Psychologists. Through coursework and practica/internships, students develop competencies in assessment, consultation, intervention and program development, research, and evaluation. Graduates are employed as psychologists in local schools, university clinics and hospitals, community mental health centers, and as trainers/researchers in universities. Since 1988, training has focused on the delivery of psychological services in schools and school communities to promote children's and adolescent's academic, social, and behavioral success.

The school psychology track integrates didactic and experiential components of training and applied research. Students develop specific competencies through a broad range of applied experiences, including field placements, practica assignments, and a full-year internship.

Students take 102 credits distributed as follows: 24 credits EPSY core requirements, 9 credits EPSY electives, 54 credits School Psychology required courses(9 credits can be used to satisfy EPSY elective requirement), and 24 thesis credits.

Ed Psych Core Course Requirements
Students must take 3 credits in history/systems, 3 credits in learning/cognition, 3 credits in social/personality, 6 credits in research methods, 6 credits in statistics, 3 credits in measurement/evaluation and 9 credits EPSY electives. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.
History/Systems
- EPSY 8905 - History and Systems of Psychology: Landmark Issues in Educational Psychology (3.0 cr)

Learning/Cognition
- EPSY 8114 - Seminar: Cognition and Learning (3.0 cr)

Social/Personality
- EPSY 8800 Special Topic: Emotion and Psychopathology (3 cr.)

Statistics
- EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
- EPSY 8252 - Methods in Data Analysis for Educational Research II (3.0 cr)

Measurement/Evaluation
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)

Research Methods
Students must take EPSY 8822 for a total of 3 credits.
- EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)
- EPSY 8822 - Research in School Psychology (1.0 - 3.0 cr)

EPSY Electives
- 9 credits of EPSY electives can be satisfied by school psychology course requirements.

School Psychology Course Requirements
Students must take EPSY 8813 twice for a total of 4 credits, EPSY 8818 twice for a total of 2 credits, EPSY 8831 for 3 credits, EPSY 8832 for 3 credits and EPSY 8842 for 6 credits. EPSY courses will satisfy 9 credits Ed Psych elective core requirement.
- EPSY 5802 - Foundations of Developmental Psychology Across the Lifespan (3.0 cr)
- EPSY 5851 - Engaging Diverse Students and Families (3.0 cr)
- EPSY 5853 - Biological Bases of Behavior (3.0 cr)
- EPSY 8811 - Assessment in School Psychology I: Foundations of Academic Assessment (3.0 cr)
- EPSY 8812 - Assessment in School Psychology II: Intellectual and Social-Emotional Domains (3.0 cr)
- EPSY 8813 - Assessment Practicum in School Psychology (2.0 cr)
- EPSY 8815 - Individual and System Socio-Emotional Interventions (3.0 cr)
- EPSY 8816 - Individual and Systems Academic Interventions (3.0 cr)
- EPSY 8817 - School Psychological Consultation (3.0 cr)
- EPSY 8818 - Intervention Practicum in School Psychology (1.0 cr)
- EPSY 8821 - Issues in School Psychology (3.0 cr)
- EPSY 8823 - Ethics and Professional Standards in School Psychology (3.0 cr)
- EPSY 8831 - Practicum: School Psychological Services (1.0 - 3.0 cr)
- EPSY 8832 - Clinical/Community Practice in School Psychology (1.0 - 3.0 cr)
- EPSY 8842 - Internship: School Psychological Services (1.0 - 10.0 cr)
- EPSY 8849 - Assessment in Early Childhood (3.0 cr)
- EPSY 88290 Special Topic: Key Issues in Social Psychology and Education (3 credits)

Special Education
The special education track offers specializations in deaf/hard-of-hearing, emotional behavior disorders, early childhood special education, learning disabilities, autism, and developmental disabilities. Early involvement in research projects and the development of original research programs in such areas as instructional strategies, social and cognitive development, behavioral and psychological management, child development, and technology are encouraged. Special projects and training programs supplement academic studies.

The special education track focuses on the attainment of core competencies and related skills, since special education professionals share many common concerns and goals. A complementary emphasis is placed on problems unique to or extremely influential in the field, including social and cultural perceptions about disabilities; and federal, state, and local legislation regarding prevention and the care, treatment, education, training, and support of persons with disabilities.

Students take 69 credits distributed as follows: 24 credits EPSY core requirements, 9 credits EPSY electives, 21 credits Special Ed course requirements (9 credits can be used to satisfy EPSY elective requirement), and 24 thesis credits.

Ed Psych Core Course Requirements
Students must take 9 credits in at least two of these areas: learning/cognition, social/personality or history/systems; 6 credits in research methods; 6 credits in statistics; 3 credits in measurement/evaluation and 9 credits EPSY electives. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

- Learning/Cognition, Social/Personality, History/Systems
- Take 9 or more credit(s) including 2 or more sub-requirements(s) from the following:
  - learning/cognition
    - Take 0 or more course(s) from the following:
      - EPSY 5101 - Intelligence and Creativity (3.0 cr)
      - EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
      - EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
• EPSY 5119 - Mind, Brain, and Education (3.0 cr)
• EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
• EPSY 8112 - Mathematical Cognition (3.0 cr)
• EPSY 8115 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
• CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)

• social/personality

Take 0 or more course(s) from the following:
• EPSY 5135 - Human Relations Workshop (4.0 cr)
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• EPSY 5132 - Personality Development and Socialization (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
• CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
• PSY 5101 - Personality Psychology (3.0 cr)
• PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8208 - Social Psychology: The Self (3.0 cr)
• SOC 8721 - Theories of Social Psychology (3.0 cr)

• history/systems

Take 0 or more course(s) from the following:
• EPSY 8805 - History and Systems of Psychology: Landmark Issues in Educational Psychology (3.0 cr)

Research Methods
EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)
EPSY 8706 - Single Case Designs in Intervention Research (3.0 cr)

Statistics
EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
EPSY 8252 - Methods in Data Analysis for Educational Research II (3.0 cr)
or
EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)

Measurement/Evaluation
Take 3 or more credit(s) from the following:
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
• EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
• EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
• EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)
• EPSY 8221 - Psychological Scaling (3.0 cr)
• EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
• EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
• EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
• EPSY 8247 - Advanced Interviewing and NVIVO (3.0 cr)
• EPSY 8265 - Factor Analysis (3.0 cr)
• PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
• PSY 5865 - Advanced Psychological and Educational Measurement (4.0 cr)

EPSY Electives
9 credits of EPSY electives can be satisfied by special ed course requirements.

Special Ed Course Requirements
Students take 21 Special Ed credits in consultation with adviser. EPSY courses will satisfy 9 credits Ed Psych elective core requirement.
EPSY 8600 Special Topics: Special Education Issues - Grant Writing Seminar (3 credits)
EPSY 8694 - Research in Special Education (3.0 cr)
EPSY 8701 - Doctoral Core Seminar: Special Education I (3.0 cr)
EPSY 8702 - Doctoral Core Seminar: Special Education II (3.0 cr)
EPSY 8xxx - Special Ed elective in consultation with adviser, 3 cr. (EPSY 8707 recommended, but not required)
EPSY 8xxx - Special Ed elective in consultation with adviser, 3 cr. (EPSY 8708 recommended, but not required)
EPSY 8xxx - Special Ed elective in consultation with adviser, 3 cr.

• Program Type: Post-baccalaureate credit certificate/licensure/endorsement
• Requirements for this program are current for Fall 2014
• Length of program in credits: 60
• This program does not require summer semesters for timely completion.
• Degree: Certificate of Specialist in Educ/Sch Psych Svc

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

School psychology is fully accredited by the American Psychological Association, the Minnesota Board of Teaching, and the National Association of School Psychologists. Through coursework and practica/internships, students develop competencies in assessment, consultation, intervention and program development, research, and evaluation. Graduates are employed as psychologists in local schools, university clinics and hospitals, community mental health centers, and as trainers/researchers in universities. Since 1988, training has focused on the delivery of psychological services in schools and school communities to promote children's and adolescent's academic, social, and behavioral success.

The specialist certificate integrates didactic and experiential components of training and applied research. Students develop specific competencies through a broad range of applied experiences, including field placements, practica assignments, and a full-year internship.

The specialist certificate is designed for students who want to become practitioners. It meets the Minnesota certification requirements for school psychologists.

Accreditation
This program is accredited by National Association of School Psychologists (NASP).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants must apply online submitting a department application, three letters of recommendation, and a statement of goals and interests. Applicants must also submit a critical issue essay, answering the following questions: Identify a critical problem facing contemporary schools in America or another country. What do you think are the social, political, and/or economic factors that are contributing to this problem? What specific solutions might you propose to tackle the problem?

Applications should be accompanied by official transcripts from all colleges and universities attended. The GRE General Test is required; an interview is also required for those who make the initial cut.

Applications are accepted for fall admission only (deadline November 15).

Applicants must submit their test score(s) from the following:
International applicants must submit score(s) from one of the following tests:

- GRE
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students take 60 credits distributed as follows: 15 credits EPSY core courses, 6 credits EPSY electives, 2 credits Research Problems and 43 credits school psychology course requirements (6 credits can satisfy EPSY elective requirement). There is a written final exam.

Ed Psych Core Course Requirements
Students must take 3 credits in statistics, 3 credits in measurement/evaluation, 3 credits learning/cognition, 3 credits social/personality, 3 credits in research methods and 6 credits EPSY electives. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

Statistics
Take 3 or more credit(s) from the following:
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)

Measurement/Evaluation
EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)

Learning/Cognition
Take 3 or more credit(s) from the following:
- EPSY 8114 - Seminar: Cognition and Learning (3.0 cr)
- EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)

Social/Personality
Special Topic: Emotion and Psychopathology (3 cr.)
EPSY 8800 - Special Topics in School Psychology (1.0 - 4.0 cr)

Research Methods
Take 3 or more credit(s) from the following:
- EPSY 5216 - Introduction to Research in Educational Psychology and Human Development (3.0 cr)
- EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)

EPSY Electives
6 credits of EPSY electives can be satisfied by school psychology course requirements.

School Psychology Course Requirements
Students must take 38 credits required courses, 2 credits research problems and 5 credits electives.

Required Courses
Students must take EPSY 8813 twice for 4 credits total, EPSY 8818 twice for 2 credit total, EPSY 8822 twice for 1 credit each, and EPSY 8842 for 6 credits. EPSY courses will satisfy 6 credits Ed Psych elective core requirement.

EPSY 5851 - Engaging Diverse Students and Families (3.0 cr)
EPSY 8811 - Assessment in School Psychology I: Foundations of Academic Assessment (3.0 cr)
EPSY 8812 - Assessment in School Psychology II: Intellectual and Social-Emotional Domains (3.0 cr)
EPSY 8813 - Assessment Practicum in School Psychology (2.0 cr)
EPSY 8815 - Individual and System Socio-Emotional Interventions (3.0 cr)
EPSY 8816 - Individual and Systems Academic Interventions (3.0 cr)
EPSY 8817 - School Psychological Consultation (3.0 cr)
EPSY 8818 - Intervention Practicum in School Psychology (1.0 cr)
EPSY 8821 - Issues in School Psychology (3.0 cr)
EPSY 8822 - Research in School Psychology (1.0 - 3.0 cr)
EPSY 8823 - Ethics and Professional Standards in School Psychology (3.0 cr)
EPSY 8842 - Internship: School Psychological Services (1.0 - 10.0 cr)

Research Problems
2 credits are required
EPSY 8994 - Research Problems: Educational Psychology (1.0 - 6.0 cr)

Students must take 5 credits electives from the following list (1-2 credit registration for EPSY 8831 and EPSY 8832. Other courses may be taken with permission of adviser.
Take 5 or more credit(s) from the following:
• EPSY 5802 - Foundations of Developmental Psychology Across the Lifespan (3.0 cr)
• EPSY 8831 - Practicum: School Psychological Services (1.0 - 3.0 cr)
• EPSY 8832 - Clinical/Community Practice in School Psychology (1.0 - 3.0 cr)
• EPSY 8849 - Assessment in Early Childhood (3.0 cr)

**Program Requirements**

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students take 60 credits distributed as follows: 15 credits EPSY core courses, 6 credits EPSY electives and 45 credits of coursework in special education (6 credits can satisfy EPSY elective requirement).

**Ed Psych Core Course Requirements**

Students must take 3 credits in statistics, 3 credits in measurement/evaluation, 3 credits learning/cognition, 3 credits social/personality, 3 credits in research methods and 6 credits EPSY electives. Courses taken to satisfy EPSY core requirements must be taken on an A-F grade basis.

**Statistics**

Take 3 or more credit(s) from the following:

- EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
- EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)

**Measurement/Evaluation**

3 credits required from measurement or evaluation

*measurement*

Take 3 or more credit(s) from the following:

- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)
- EPSY 8221 - Psychological Scaling (3.0 cr)
- EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
- EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
- EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
- EPSY 8265 - Factor Analysis (3.0 cr)

*or evaluation*

Take 3 or more credit(s) from the following:

- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
- EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
- EPSY 8247 - Advanced Interviewing and NVIVO (3.0 cr)
- OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)

**Learning/Cognition**

Take 3 or more credit(s) from the following:

- EPSY 5101 - Intelligence and Creativity (3.0 cr)
- EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
- EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5115 - Psychology of Adult Learning and Instruction (3.0 cr)
- EPSY 5119 - Mind, Brain, and Education (3.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 8112 - Mathematical Cognition (3.0 cr)
- EPSY 8115 - Psychology of Instruction and Technology (3.0 cr)
- EPSY 8707 - Principles of Behavior Analysis and Learning (3.0 cr)
- PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
- PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
- CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)

**Social/Personality**

Take 3 or more credit(s) from the following:

- EPSY 5135 - Human Relations Workshop (4.0 cr)
- EPSY 5151 - Cooperative Learning (3.0 cr)
- EPSY 5157 - Social Psychology of Education (3.0 cr)
- EPSY 8132 - Personality Development and Socialization (3.0 cr)
- PSY 5101 - Personality Psychology (3.0 cr)
• PSY 5135 - Psychology of Individual Differences (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5207 - Personality and Social Behavior (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8202 - Close Relationships (3.0 cr)
• PSY 8208 - Social Psychology: The Self (3.0 cr)
• CPSY 8302 - Developmental Psychology: Social and Emotional Processes (4.0 cr)
• CPSY 8606 - Advanced Developmental Psychopathology (3.0 cr)
• SOC 8721 - Theories of Social Psychology (3.0 cr)

Research Methods
• EPSY 8215 - Advanced Research Methodologies in Education (3.0 cr)

EPSY Electives
6 credits of EPSY electives can be satisfied by special education course requirements.

Special Education Course Requirements
EPSY courses will satisfy 6 credits Ed Psych elective core requirement.
• EPSY 8694 - Research in Special Education (3.0 cr)
• EPSY 8701 - Doctoral Core Seminar: Special Education I (3.0 cr)
• EPSY 8702 - Doctoral Core Seminar: Special Education II (3.0 cr)
• EPSY 8706 - Single Case Designs in Intervention Research (3.0 cr)
• EPSY 8600 Special Topics: Grant Writing (3 cr.)
• EPSY 8600 Special Topics: Math Res: Sts with Math Diff (3 cr.)
• EPSY 8600 Special Topics: Reading Disabilities Research (3 cr.)

Electives
Students must take 15 credits electives from the following list. Other courses may be taken with permission of adviser.
Take 15 or more credit(s) from the following:
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5851 - Engaging Diverse Students and Families (3.0 cr)
• EPSY 8600 - Special Topics: Special Education Issues (1.0 - 3.0 cr)
• OLPD 5344 - School Law (3.0 cr)

Specialist Project
Take 9 or more credit(s) from the following:
• EPSY 8993 - Directed Study: Educational Psychology (1.0 - 10.0 cr)
• EPSY 8994 - Research Problems: Educational Psychology (1.0 - 6.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- For now the courses will be based on the UM Twin Cities campus.
- Degree: Emerging Leaders in Independent Colleges PBacc Cer

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Created for professionals who are in faculty positions or beginning levels of college administration, this graduate-level certificate offers specific knowledge and skills related to organizational development, leadership, entrepreneurship, and decision-making necessary for leading independent colleges. The Emerging Leaders in Independent Colleges curriculum is designed for individuals who seek to move into leadership positions but do not have formal training related to leadership and management of independent colleges.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree from an accredited institution.

Other requirements to be completed before admission:
Two years of experience in a professional position in higher education.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

Course List
Take exactly 4 course(s) totaling exactly 12 credit(s) from the following:
- OLPD 5002 - Independent Colleges as Formal Organizations (3.0 cr)
- OLPD 5332 - Personal Leadership and the Independent College (3.0 cr)
- OLPD 5845 - The Entrepreneurial Independent College (3.0 cr)
- OLPD 5902 - Leading Change in Independent Colleges (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of education (M.Ed.) Plan C in family education develops and strengthens professionals' competencies to work with individuals and families to enhance family life. This graduate-level, practitioner-based program is offered by the Department of Family Social Science (FSoS). The program prepares licensed teachers to further develop their knowledge and skills in the family education field or non-licensed professionals to work with adults, youth, or children in a variety of settings. This program prepares parent educators for positions in an early childhood family education (ECFE) program in Minnesota, as well as for positions in health care, social service agencies, and religious settings in Minnesota and in other states and countries. Diversity and cultural responsiveness is integrated throughout coursework, student teaching, and observation experiences. Students may fulfill requirements for a parent educator license, parent education certificate, or community and learning certificate as part of this degree. With guidance from faculty advisers, students choose at least 30 semester credits of work that may include courses, independent study, internships, and workshops.

Program Delivery
This program is available:
• primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
A bachelor's degree from an accredited institution in family studies, child psychology, early childhood education, nutrition, or related fields. A 2.80 overall GPA in undergraduate work.

Special Application Requirements:
Application deadlines are March 1 and October 1. Apply Online at https://app.applyyourself.com/?id=umtc-cehd.

For program specific application details see http://www.cehd.umn.edu/fsos/prospective/famed.asp

International Students: Please note, this program is not offered full-time and therefore is not intended for international students needing a visa to study in the US.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Family Education M.Ed. requires 30 credits in consultation with the adviser.

Students complete: 15 credits in family education, including FSOS 5902 Family Education Perspectives (3 cr); 5-6 credits in coursework with a focus on educational processes that are not limited to a specific subject matter (family ed courses do not count for this e.g. FSOS 5949); 9-10 credits in coursework with a supporting focus on family, children, and/or youth issues; a degree completion interview/examination.

**Required Coursework**
FSOS 5902 - Family Education Perspectives (3.0 cr)

**Major Coursework**
Additional courses offered that fulfill the major area of family education are within the department and include:
FSOS 5900 - Special Topics in Family, Youth, and Community (1.0 - 4.0 cr)
FSOS 5906 - Program Planning in Family Education (3.0 cr)
FSOS 5932 - Introduction to Parent Education (1.0 cr)
FSOS 5937 - Parent-Child Interaction (3.0 cr)
FSOS 5942 - Everyday Experiences of Families (2.0 cr)
FSOS 5943 - Parent Learning and Development: Implications for Parent Education (2.0 cr)
FSOS 5944 - Parent Education Curriculum (2.0 cr)
FSOS 5945 - Teaching and Learning in Parent Education (2.0 cr)
FSOS 5946 - Assessment and Evaluation in Parent Education (2.0 cr)
FSOS 5949 - Student Teaching in Parent Education (2.0 cr)

**Program Sub-plans**
A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

**Parent Education Specialty Teaching License**
This sub-plan is limited to students completing the program under Plan C.

A teacher of parent and family education is authorized to instruct parents in an early childhood family education (ECFE) program. A parent educator plans, coordinates, and teaches in an instructional program that addresses the intellectual, emotional, cultural, social, and physical needs of both parents and children. Parent education seeks to support reciprocal interactions between parents and their children.

In Minnesota, a parent educator license is required for employment in an ECFE program. The purpose of the license is to ensure, through scholarly preparation, that parent educators are well-prepared professionals who are qualified to deliver educational programs for parents.

This program also prepares parent educators for parent education positions that do not require a Minnesota parent and family education license. For example, parent educators may find positions in health care and social service agencies and institutions and religious settings in Minnesota and in other states and countries.

Students may include licensure credits toward the M.Ed. degree.
For more information on Licensure please see the FSOS web site: http://www.cehd.umn.edu/fsos/programs/ParentEd/pfe-license.asp

**Parent Ed Teaching License Core Coursework**
- FSOS 5902 - Family Education Perspectives (3.0 cr)
- FSOS 5932 - Introduction to Parent Education (1.0 cr)
- FSOS 5937 - Parent-Child Interaction (3.0 cr)
- FSOS 5942 - Everyday Experiences of Families (2.0 cr)
- FSOS 5943 - Parent Learning and Development: Implications for Parent Education (2.0 cr)
- FSOS 5944 - Parent Education Curriculum (2.0 cr)
- FSOS 5945 - Teaching and Learning in Parent Education (2.0 cr)
- FSOS 5946 - Assessment and Evaluation in Parent Education (2.0 cr)
- FSOS 5949 - Student Teaching in Parent Education (2.0 cr)

**Additional Courses**
Students seeking the M.Ed. and the Parent Ed teaching license are encouraged to take EDHD 5007 Technology for Teaching and Learning in the educational processes area, in addition to other course requirements.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program of study uses methods of social science to examine family systems and their interactions with various environments. The curriculum supports study in several broad theme areas: family economic well-being, families and mental health, family diversity, and relationships and development across the life span.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Three overall criteria guide admissions decisions: 1) evidence of strong academic preparation and the ability and desire to perform graduate level scholarship, including research; 2) fit of the applicant's professional goals with family social science (FSoS) faculty scholarship and with the overall FSoS mission, that is, enhancing the well-being of diverse families in a changing world; and 3) unique contributions applicant would make to FSoS values, including social relevance, collaboration, inclusiveness, excellence, innovation, and diversity.

Special Application Requirements:
For more information about application requirements and procedures, consult the Family Social Science web page at http://www.cehd.umn.edu/fsos/default.asp.

Applicants for the master's program are reviewed only once per year. The application deadline is December 1 for admission fall semester of the following year.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 20 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Students must demonstrate familiarity with the tools of research or scholarship in the field of family social science, the ability to work independently, and the ability to present the results of their investigation effectively, by completing at least one Plan B project.

The project should involve a combined total of approximately 120 hours (the equivalent of three full-time weeks) of work. The graduate faculty specifies both the nature and extent of the options available to satisfy this requirement, and whether the requirement is to be satisfied in conjunction with, or independent of, the courses in the student’s program.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.50 is required for students to remain in good standing.

The M.A. program is offered under Plan A and Plan B. Plan A requires at least 30 credits, including at least 20 course credits, of which 6 credits are outside the department in a related field, and 10 thesis credits. The Plan A master’s is recommended for students who intend to pursue a Ph.D. degree.

Plan B requires at least 30 credits, including at least 26 course credits, of which 6 credits are outside the department in a related field, and at least 4 credits for a Plan B project. The Plan B master’s is for students who wish to further their education so that they may hold positions of responsibility serving families. Although the instruction is based on research, the Plan B degree is not intended to provide intensive research training. The Plan B program is understood to be a terminal degree and is not recommended for students who intend to pursue the Ph.D. degree. Consult the department for the most current information.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program of study for the Family Social Science graduate minor uses methods of social science to examine family systems and their interactions with various environments. The curriculum supports study in core family social science coursework including family theories, family research methods, and core family content.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Master’s students must complete at least 6 credits of 5xxx or 8xxx coursework in Family Social Science.

Doctoral students must complete at least 12 credits of 5xxx or 8xxx coursework in Family Social Science.

All courses for the minor must be taken A-F and completed with a GPA of at least 3.00.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctoral Required
Take 12 or more credit(s) from the following:
- FSOS 8001 - Conceptual Frameworks in the Family (3.0 cr)
- FSOS 8101 - Family Stress, Coping, and Adaptation (3.0 cr)
- FSOS 8013 - Qualitative Family Research Methods (3.0 cr)
- FSOS 8014 - Quantitative Family Research Methods II (3.0 cr)
- Family Research Methods & Lab
  - FSOS 5014 - Quantitative Family Research Methods I (3.0 cr)
FSOS 5015 - Family Research Laboratory (1.0 cr)

Elective

3 credits to any FSOS 8xxx course.

**Master's**

**Required**

Take 6 or more credit(s) from the following:

- FSOS 8001 - Conceptual Frameworks in the Family (3.0 cr)
- FSOS 8101 - Family Stress, Coping, and Adaptation (3.0 cr)
- FSOS 8013 - Qualitative Family Research Methods (3.0 cr)
- FSOS 8014 - Quantitative Family Research Methods II (3.0 cr)

**Family Research Methods & Lab**

- FSOS 5014 - Quantitative Family Research Methods I (3.0 cr)
- FSOS 5015 - Family Research Laboratory (1.0 cr)

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 72
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program of study for the Ph.D. in family social science uses methods of social science to examine family systems and their interactions with various environments. The curriculum supports study in several broad theme areas: family economic well-being, families and mental health, family diversity, and relationships and development across the life span.

Accreditation
This program is accredited by Commission on Accreditation for Marriage and Family Therapy Education.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Three overall criteria guide admissions decisions: 1) evidence of strong academic preparation and the ability and desire to perform graduate level scholarship, including research; 2) fit of the applicant's professional goals with family social science (FSoS) faculty scholarship and with the overall FSoS mission, that is, enhancing the well-being of diverse families in a changing world; and 3) unique contributions the applicant would make to FSoS values, including social relevance, collaboration, inclusiveness, excellence, innovation, and diversity.

Special Application Requirements:
Students may apply for admission to the Ph.D. program, family science specialization, after completing either a bachelor's degree or a master's degree. Students who enter the Ph.D. program with a bachelor's degree are expected to fulfill the requirements for an M.A. degree in the process of working toward the Ph.D. Students applying for the specialization in Couple and Family Therapy must have a clinical master's degree or have achieved equivalent clinical experience as determined by the Couple Family Therapy faculty. Students cannot earn a clinical master's degree in the Department of Family Social Science.

For more information about application requirements and procedures, consult the Family Social Science Prospective Students web page at http://www.cehd.umn.edu/fsos/prospective/default.asp.

Applicants for the doctoral program are reviewed only once per year. The application deadline is December 1, for admission to fall semester of the following year.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
48 to 51 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.5 is required for students to remain in good standing.

Courses in the Ph.D. degree program must contribute to an organized program of study and research. The program includes at least 72 credits including 48 course credits and 24 dissertation credits. Coursework includes at least 20 credits in core family theory and research methods, 9 credits in statistics, and 19-22 credits in one of the two designated specializations of Family Science or Couple and Family Therapy. An optional teaching internship program is recommended for students who are planning for careers in higher education.

Major Field Credits--Depending on previous preparation and the nature of the research undertaken, the number of credits required for individual students, even within the same major field, may vary considerably.

Required Courses
  FSOS 8200 - Orientation for Family Social Science (1.0 cr)
  FSOS 8001 - Conceptual Frameworks in the Family (3.0 cr)
  FSOS 8002 - Advanced Family Conceptual Frameworks (3.0 cr)
  FSOS 8013 - Qualitative Family Research Methods (3.0 cr)
  FSOS 8015 - Advanced Qualitative Family Research Methods (3.0 cr)
  FSOS 5014 - Quantitative Family Research Methods I (3.0 cr)
  FSOS 5015 - Family Research Laboratory (1.0 cr)
  FSOS 8014 - Quantitative Family Research Methods II (3.0 cr)
  FSOS 8101 - Family Stress, Coping, and Adaptation (3.0 cr)

Statistics Requirement 1
  EPSY 8251 - Methods in Data Analysis for Educational Research I (3.0 cr)
  or EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)

Statistics Requirement 2
  EPSY 8252 - Methods in Data Analysis for Educational Research II (3.0 cr)
  or EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)

Additional Specialization Coursework

Family Science Coursework
  * Advanced Statistics or Methods (3 credits)
  * FSOS electives (6 credits)
  * Community/Engagement/Internship Experience (3 credits)
  FSOS 8794 - Directed Research in Family Social Science (1.0 - 6.0 cr)

-OR-
Couple Family Therapy Coursework
FSOS 8036 - Couple/Marriage and Family Therapy Research (3.0 cr)
FSOS 8034 - Marriage and Family Therapy Supervision (3.0 cr)
FSOS 8295 - Couple/Marriage Family Therapy Practicum (1.0 - 12.0 cr)
FSOS 8296 - Couple/ Marriage Family Therapy Internship (1.0 - 12.0 cr)
FSOS 8794 - Directed Research in Family Social Science (1.0 - 6.0 cr)

- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of education (M.Ed.)/professional studies program in human resource development (HRD) focuses on training of human resources and organizational change issues. This graduate-level, practitioner-based program can be tailored to meet the needs of individual students. The HRD program is offered by the Department of Organizational Leadership, Policy, and Development (OLPD) in the College of Education and Human Development (CEHD). Courses at the University of Minnesota campus are offered at a variety of times, including late afternoons and evenings. Students may also enroll in courses offered during the summer and at off-campus sites.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Special Application Requirements:
In addition to Statements #1 & 2, applicants must upload or submit a résumé and personal statement describing their career goals and rationale for interest in the M.Ed. program (limit two pages) along with the application. Two letters of recommendation must also be submitted. Applications are accepted on a rolling basis with semester deadlines of March 1 (Summer), July 1 (Fall) and November 1 (Spring).

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 22 major credits and 12 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

Core Course Requirements
Students not holding an undergraduate degree in HRD must complete at least 34 credits, including the following courses listed below.

Note: For OLPD 5696 at least 4 credits are required and no more than 6 credits will count toward the program.
OLPD 5201 - Strategies for Teaching Adults (3.0 cr)
OLPD 5605 - Strategic Planning through Human Resources (3.0 cr)
OLPD 5607 - Organization Development (3.0 cr)
OLPD 5615 - Training and Development of Human Resources (3.0 cr)
OLPD 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)
OLPD 5801 - Survey: Human Resource Development and Adult Education (3.0 cr)
OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)
Twelve (12) elective credits approved by a faculty adviser.

U of M HRD UG Degree Continuing Students
Students holding an undergraduate HRD degree from the University of Minnesota will not be required to retake courses completed during the undergraduate program. Students must still take a total of 34 credits of graduate coursework in the program. Of this, students must complete at least 19 credits in HRD-designated courses as described below.
OLPD 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)
OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)

Required
OLPD 5605 - Strategic Planning through Human Resources (3.0 cr)
OLPD 5607 - Organization Development (3.0 cr)
OLPD 8602 - Advanced Organization Development (3.0 cr)
or OLPD 5615 - Training and Development of Human Resources (3.0 cr)
OLPD 8601 - Advanced Training and Development of Human Resources (3.0 cr)

Electives
Twelve (12) elective credits approved by a faculty adviser.

Additional HRD coursework
Six additional HRD credits approved by faculty adviser

Program Sub-plans
A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

Rochester
Requirements for the Rochester sub-plan are the same as those listed in general description. Students may take courses on Twin Cities or Rochester campuses.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate program in human resource development (HRD) focuses on training of human resources and organizational change issues. The HRD program is offered by the Organizational Leadership, Policy, and Development (OLPD) in the College of Education and Human Development (CEHD). Courses at the University of Minnesota campus are offered at a variety of times, including late afternoons and evenings.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Admission is open to degree-seeking or non-degree seeking students who possess a U.S. bachelor's degree (or international equivalent). Applications are reviewed on an ongoing basis and may be submitted at any time.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Certificate coursework completed with undergraduate student status cannot be applied to graduate-level degree programs.

Required Courses
OLPD 5801 - Survey: Human Resource Development and Adult Education (3.0 cr)
OLPD 5615 - Training and Development of Human Resources (3.0 cr)
OLPD 5607 - Organization Development (3.0 cr)

Internship or Field Experience
4 credits is recommended for either option below
Take exactly 1 course(s), totaling 3 - 6 credit(s) from the following:
• OLDP 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)
• OLDP 5296 - Field Experience in Adult Education (1.0 - 6.0 cr)

Electives
The remaining credits can be selected from the following:
OLPD 5201 - Strategies for Teaching Adults (3.0 cr)
or Additional OLPD courses with adviser approval to make total credits earned equal at least 14 credits.

- Degree: Infant & Early Childhood Mental Health PBac Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The University of Minnesota Infant and Early Childhood Mental Health (IECMH) Certificate Program is an intensive, interdisciplinary postbaccalaureate training program for students and professionals in domains of mental health, health and early care and education.

The program serves to deepen the knowledge and skills of individuals working in birth-to-five prevention, intervention, program administration, and policy development, and to prepare individuals to provide leadership in expanding the breadth and depth of relationship-based services and policies.

The IECMH certificate program is founded on a core set of principles of infant and early childhood mental health practice, asserting that services to families should be relationship-based, culturally sensitive, grounded in an understanding of developmental theory and research with special attention to the effects of trauma, and supported by reflective practice.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission to this program is currently suspended.

Applicants must hold at least a baccalaureate degree from an accredited college or university in a related area (e.g., child development, social work, child psychology) or document at least two years of work experience in a related field.

The admissions model is cohort-based, with new cohorts usually admitted every other year. Admission to this program is currently suspended, but may be opened for fall 2015 at a future time. Please see our website for more details: http://www.cehd.umn.edu/CEED/certificateprograms/iecmh/admissionprocess.html

Special Application Requirements:
Applicants must have at least two years of documented experience in early childhood research or practice.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Course requirements
- CPSY 5501 - Foundations in Infant and Early Childhood Mental Health I (3.0 cr)
- CPSY 5503 - Foundations in Infant and Early Childhood Mental Health II (3.0 cr)
- CPSY 5506 - Infant Observation Seminar I (1.0 cr)
- CPSY 5508 - Infant Observation Seminar II (1.0 cr)
- CPSY 5511 - Infant Observation Seminar III (1.0 cr)
- CPSY 5513 - Assessment in Infant and Early Childhood Mental Health: DC 0-3R (2.0 cr)
- CPSY 5515 - Assessment in Infant and Early Childhood Mental Health: NCAST (2.0 cr)
- CPSY 5518 - Prevention and Intervention in Infant and Early Childhood Mental Health I (3.0 cr)
- CPSY 5521 - Prevention and Intervention in Infant and Early Childhood Mental Health II (3.0 cr)
- CPSY 5523 - Reflective Supervision in Infant and Early Childhood Mental Health: Community-based (1.0 cr)
- CPSY 5525 - Reflective Supervision in Infant and Early Childhood Mental Health: Clinical (1.0 cr)

Integrative Leadership Minor
Organizational Leadership, Policy and Development
College of Education and Human Development

Link to a list of faculty for this program.

Contact Information:
Organizational Leadership, Policy, and Development, 330 Wulling Hall, 86 Pleasant Street SE, Minneapolis, MN 55455 (612-624-1006)
Email: olpd@umn.edu
Website: http://www.cehd.umn.edu/olpd/grad-programs/ILM/default.html

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate-level academic minor in integrative leadership (ILM) will enhance the preparation of graduate students to lead and foster collective actions across boundaries of individuals, groups, organizations, sectors, and nations to solve some of the world’s most pressing and complex problems.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Prior admission into an established master’s, doctoral, or graduate professional degree program is required. Students interested in admission to the minor should contact the ILM Director of Graduate Studies. Admission requires the addition of the required minor coursework to the student’s graduate degree program form and the ILM Director of Graduate Studies’s signature on the form. Students must demonstrate relevant academic background and experience.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Any student in any University of Minnesota graduate or professional program, regardless of college or enrollment, is encouraged to apply for this minor. Students must already be admitted to a master’s, doctoral, or professional degree program at the University of Minnesota.

Doctoral students will need to take an additional course from either the Overview of Leadership Theory or Leading Engagement Processes Subgroups to total the 12 credits required of the doctoral minor.

If taking PA 5190, only the special topic in Leading Engagement Processes can count towards the minor without advance approval by the DGS of the minor.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctoral
Overview of Leadership Theory
Take 3 - 6 credit(s) from the following:
- OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
- OLPD 8020 - Leadership: From Theory to Reflective Practice (3.0 cr)
- PA 5941 - Leadership for the Common Good (3.0 cr)
- PUBH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)

Courses on overview of leadership theory and development from other colleges may be substituted for this core course subject to approval by the Director of Graduate Studies for the Integrative Leadership Minor.

Leading Engagement Processes
Take 3 - 6 credit(s) from the following:
- OLPD 5736 - Public Engagement and Higher Education (3.0 cr)
- OLPD 6490 - Managing Civic Engagement (3.0 cr)
- PA 5190 - Topics in Public and Nonprofit Leadership and Management (1.0 - 3.0 cr)

Courses on overview of leadership theory and development from other colleges may be substituted for this core course subject to approval by the Director of Graduate Studies for the Integrative Leadership Minor.

Required Final Course
All students must take one of the following:
- OLPD 6402 - Integrative Leadership Seminar (3.0 cr)
- MGMT 6402 - Integrative Leadership: From Theory to Practice (3.0 cr)
- PA 5105 - Integrative Leadership Seminar (3.0 cr)

Master's

Overview of Leadership Theory
Take 3 or more credit(s) from the following:
- OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
- OLPD 8020 - Leadership: From Theory to Reflective Practice (3.0 cr)
- PA 5941 - Leadership for the Common Good (3.0 cr)
- PUBH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)

Courses on overview of leadership theory and development from other colleges may be substituted for this core course subject to approval by the Director of Graduate Studies for the Integrative Leadership Minor.

Leading Engagement Processes
Take 3 or more credit(s) from the following:
- OLPD 5736 - Public Engagement and Higher Education (3.0 cr)
- OLPD 6490 - Managing Civic Engagement (3.0 cr)
- PA 5190 - Topics in Public and Nonprofit Leadership and Management (1.0 - 3.0 cr)

Courses on overview of leadership theory and development from other colleges may be substituted for this core course subject to approval by the Director of Graduate Studies for the Integrative Leadership Minor.

Required Final Course
All students must take one course from the following:
- OLPD 6402 - Integrative Leadership Seminar (3.0 cr)
- MGMT 6402 - Integrative Leadership: From Theory to Practice (3.0 cr)
- PA 5105 - Integrative Leadership Seminar (3.0 cr)

Along with the program-specific requirements listed below, please read the [General Information](http://www.cehd.umn.edu/olpd/grad-programs/CIDE/gradminor.html) section of the catalog website for requirements that apply to all major fields.

The interdisciplinary minor in international education is for students enrolled in any masters or doctoral program who wish to enter careers in research, consulting, administration, and teaching in an international context. The minor offers a coordinated set of courses from the Departments of Curriculum and Instruction; Educational Psychology; Organizational Leadership, Policy, and Development; the School of Kinesiology; and the Institute of Child Development.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

**Special Application Requirements:**
Admission is contingent upon being admitted to a master's or a doctoral degree-granting program at the University of Minnesota. For an application form visit the international education minor website ([http://www.cehd.umn.edu/olpd/grad-programs/CIDE/gradminor.html](http://www.cehd.umn.edu/olpd/grad-programs/CIDE/gradminor.html)) or consult with the director of graduate studies for more information.

For an online application or for more information about graduate education admissions, see the [General Information](http://www.cehd.umn.edu/olpd/grad-programs/CIDE/gradminor.html) section of the catalog website.

**Program Requirements**
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Each program is developed in consultation with the student, the student's adviser, major director of graduate studies, and director of graduate studies for international education. Requirements include courses listed below. Electives from the University may be added with the adviser's consent and director of graduate studies approval.

**Program Sub-plans**
Students are required to complete one of the following sub-plans.  
Students may not complete the program with more than one sub-plan.

**Doctoral**

**Core Courses**
Take 2 or more course(s) from the following:
- OLPD 5103 - Comparative Education (3.0 cr)  
- OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)  
- OLPD 5121 - Educational Reform in International Context (3.0 cr)
• OLPD 5124 - Critical Issues in International Education and Educational Exchange (3.0 cr)
• OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
• OLPD 8101 - International Education and Development (3.0 cr)
• OLPD 8103 - Comparative Education (3.0 cr)

**Area specific coursework**

Students interested in OLPD 5080 should consult minor adviser prior to registration as special topics can vary and may or may not be appropriate for this minor.

Take 6 or more credit(s) from the following:

• AFEE 5361 - World Development Problems (3.0 cr)
• CI 8150 - Research Topics Curr & Instruc (1.0 - 6.0 cr)
• CI 8650 - Seminar: Special Topics in Second Languages and Cultures Research (1.0 - 3.0 cr)
• EPSY 8403 - Social/Cultural Contexts: Counseling and Skills (3.0 cr)
• OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
• OLPD 5121 - Educational Reform in International Context (3.0 cr)
• OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
• OLPD 5612 - International Human Resource Development (3.0 cr)
• OLPD 5825 *(Inactive)* (3.0 cr)
• OLPD 8087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
• OLPD 8101 - International Education and Development (3.0 cr)
• OLPD 8842 - Comparative Systems in Organizational Leadership, Policy, and Development (3.0 cr)
• PA 5414 - Child Human Rights: Work and Education (3.0 cr)

**Master's Core Courses**

Take 1 or more course(s) from the following:

• OLPD 5103 - Comparative Education (3.0 cr)
• OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)
• OLPD 5121 - Educational Reform in International Context (3.0 cr)
• OLPD 5124 - Critical Issues in International Education and Educational Exchange (3.0 cr)
• OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
• OLPD 8101 - International Education and Development (3.0 cr)
• OLPD 8103 - Comparative Education (3.0 cr)

**Area Specific Coursework**

Students interested in OLPD 5080 should consult minor adviser prior to registration as special topics can vary and may or may not be appropriate for this minor.

Take 6 or more credit(s) from the following:

• AFEE 5361 - World Development Problems (3.0 cr)
• CI 8150 - Research Topics Curr & Instruc (1.0 - 6.0 cr)
• CI 8650 - Seminar: Special Topics in Second Languages and Cultures Research (1.0 - 3.0 cr)
• EPSY 8403 - Social/Cultural Contexts: Counseling and Skills (3.0 cr)
• OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
• OLPD 5121 - Educational Reform in International Context (3.0 cr)
• OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
• OLPD 5612 - International Human Resource Development (3.0 cr)

Interpersonal Relationships Research Minor
Institute of Child Development
College of Education and Human Development

Link to a list of faculty for this program.

Contact Information:
Department of Psychology, University of Minnesota, S354 Elliott Hall, 75 East River Parkway, Minneapolis, MN 55455 (612-626-0025)
Email: simps108@umn.edu
Website: http://www.cehd.umn.edu/icd/Programs/IrelMinor/

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Doctorate): 14
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor in interpersonal relationships research provides doctoral students with a broad theoretical and methodological foundation for research on behavioral interaction patterns between two persons and the impact of these interactions.

A recently recognized and rapidly advancing interdisciplinary field of scientific inquiry, interpersonal relationships research has its roots in psychology, sociology, family studies, communication, and nursing. The program brings together faculty and students from eight University departments and schools.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission to the interpersonal relationships research graduate minor is contingent upon prior admission to a doctoral program in a degree-granting department. Admission to the minor program is limited and only by permission of the director of graduate studies in interpersonal relationships research.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctoral
Required Coursework
IREL 8001 - Proseminar in Interpersonal Relationships Research (2.0 cr)
IREL 8021 - Seminar: Statistical and Methodological Issues in Research on Dyadic Relationships (3.0 cr)
PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
or PSY 8202 - Close Relationships (3.0 cr)
6 additional credits selected in consultation with minor adviser.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: T E L: K-12 Technology Integration PBacc Cert Grad

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The K-12 Technology Integration certificate program prepares students to use technology (computers and the web) to develop instructional materials for use in a wide range of educational contexts (note that a university certificate program or certificate is distinct from a state certificate or certification).

The program is designed for K-12 teachers or administrators interested in using technology in the classroom.

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A completed bachelor's degree is required for admission.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a one page goal statement. Certificate applications are reviewed by the department three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Website: http://cehd.umn.edu/kin

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Kinesiology spans a wide range of inquiry connected by the common thread of the study of human movement. Graduate programs reflect a broad study of physical activity ranging from exercise science, movement science and human performance, to social and behavioral science and sport management. Much of the research conducted in the school is interdisciplinary in nature and involves collaborative partnerships with life science disciplines such as medicine, neuroscience, and epidemiology and fosters links with business, education, and social sciences. M.S. students pursue an individualized program with an emphasis in one of the following areas: biomechanics and neuromotor control; exercise physiology; perceptual-motor control and learning; physical activity and sport science with concentrations in behavioral aspects of physical activity, sport and exercise psychology, or sport sociology.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Although prospective masters students generally have an undergraduate degree in kinesiology or the health sciences, others with a baccalaureate degree who have related preparation and a significant background and interest in the scientific study of physical activity may be admitted.

Special Application Requirements:
Applicants must submit a University of Minnesota Graduate Admissions application which includes a written statement of academic interests, goals, and objectives; scores from the General Test of the GRE (verbal, quantitative, and analytical writing) that are less than five years old; three letters of recommendation from persons familiar with their scholarship and research potential; a scholarly writing sample; and transcripts. Deadline for submission of all application materials is December 15 for the following fall admission. Students generally are admitted for the fall semester only.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 153
  - General Test - Analytical Writing: 4.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  • IELTS
    - Total Score: 6.5
  • MELAB
    - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 18 major credits and 12 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is an independent research project with the adviser that meets the following guidelines: Involves a total of approximately 120 hours of work; demonstrates familiarity with the tools of research and scholarship in the field of kinesiology; demonstrates the ability to work independently; and demonstrates the ability to effectively present the results of the investigation.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.S. is offered under Plan A and Plan B. Plan A requires 30 credits, including at least 14 course credits in kinesiology, 6 course credits in a minor or related field (including a minimum of 3 credits in statistics as determined by emphasis area) and 10 thesis credits (8777). Plan B also requires 30 credits, including at least 14 major course credits in kinesiology, a capstone project of 4 credits in KIN 8995, at least 6 course credits in a minor or related field (including a minimum of 3 credits in statistics as determined by emphasis area), and 6 additional credits in any of these areas. A maximum of 9 credits of 4xxx-level courses are allowed at the discretion of the adviser.

For both Plan A and Plan B, students must take KIN 5981 (3 cr), KIN 8980 (1 cr), and in the related field or minor, at least 3 credits of statistics or equivalent as defined by the emphasis area. A GPA of at least 3.00 is required to maintain good standing and to graduate.

Required courses

The M.S. in Kinesiology has the following requirements. In addition, Plan A students must take 10 credits of KIN 8777; and Plan B students must take 4 credits of KIN 8995.

KIN 5981 - Research Methodology in Kinesiology, Recreation, and Sport (3.0 cr)
KIN 8980 - Graduate Research Seminar in Kinesiology (1.0 cr)

Minor or related field

At least 6 credits in a related field are required, including a minimum of 3 credits in statistics as required by the emphasis area.

Emphasis Areas

Kinesiology M.S. students concentrate their studies in one of the following areas: behavioral aspects of physical activity, biomechanics and neuromotor control, exercise physiology, perceptual-motor control and learning, sport and exercise psychology, or sport sociology.

Behavioral Aspects of Physical Activity

This emphasis examines behavioral interventions for physical activity adoption and maintenance; the epidemiology of physical activity; psychosocial theories related to physical activity promotion; understanding sedentary behavior; and the objective and subjective assessment of physical activity. In addition to the M.S. requirements, students choose courses from the following lists with adviser consultation.

Recommended courses

Plan A and Plan B students take a minimum of 10 major course credits chosen from the following list. Registration for KIN 5720 is limited to 3 credits.

KIN 5122 - Applied Exercise Physiology (3.0 cr)
KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
KIN 5126 - Social Psychology of Sport & Physical Activity (3.0 cr)
or KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
or KIN 5375 - Competitive Sport for Children and Youth (3.0 cr)
or KIN 5511 - Sport and Gender (3.0 cr)
or KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
or KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
or KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
or KIN 8126 - Sports Medicine Psychology (3.0 cr)
or KIN 8136 - Developmental Sport and Exercise Psychology (3.0 cr)

Minor or Related Field
Plan A and Plan B students take 3 credits of statistics (EPSY 5261 or EPSY 8261). Plan A students take an additional 3 related-field credits and Plan B students take an additional 9 related-field credits in consultation with the adviser. Recommended courses for related fields are listed below. Possible minors include Public Health (8 credits) or Prevention Science (9 credits).

EPSY 5261 - Introductory Statistical Methods (3.0 cr)
or EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
or EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or PUBH 6451 - Biostatistics II (4.0 cr)
or PUBH 6902 - Maternal, Infant, and Preschool Nutrition (2.0 cr)
or PUBH 6914 - Community Nutrition Intervention (3.0 cr)

-OR-

Biomechanics and Neuromotor Control
Only Plan A students are accepted in this emphasis. The study of the mechanical and electromyographic analysis of human motion is combined with neurophysiological knowledge about the various neuronal subsystems to provide a basis for understanding how the brain controls bodily and limb motion. KIN 8995 (3 cr) must be taken with the adviser to develop the thesis.

Recommended Courses
A minimum of 10 major course credits (not including KIN 8777) are needed outside of the requirements and may be chosen from the following list.
KIN 4441 - Movement Neuroscience (3.0 cr)
or RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
or KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
or RSC 5841 - Rehabilitation Science Instrumentation and Methodology (4.0 cr)
or KIN 8132 - Seminar: Motor Development (3.0 cr)
or KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
or KIN 8211 - Seminar: Perception and Action (3.0 cr)
or KIN 8995 - Research Problems in Kinesiology (1.0 - 12.0 cr)

Minor or related field
A minimum of 6 semester credits are required in one or more related fields (not KIN prefix). One statistics course and an additional course are required, chosen from the following list. Minor option: Clinical Physiology and Movement Science.

EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
or EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or NSC 5561 - Systems Neuroscience (4.0 cr)

-OR-

Exercise Physiology
Exercise physiology is the study of issues related to acute and chronic effects of physical activity on human physiological systems and health, and how fundamental concepts of human energetics and mechanics apply to exercise, sport, physical exertion, and health promotion. In addition to the M.S. requirements, students choose courses from the following lists with adviser consultation.
Plan A and Plan B students take a minimum of 10 major course credits chosen from the following list.
KIN 5122 - Applied Exercise Physiology (3.0 cr)
or KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
or KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
or KIN 5435 - Advanced Theory and Techniques of Exercise Science (3.0 cr)
or KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
or KIN 8122 - Seminar: Exercise Physiology (2.0 cr)

Minor or related field
For Plan A and Plan B, a minimum of 6 course credits in statistics are required and may be chosen from the following list. Plan B students will choose an additional minimum of 6 credits in any related field with guidance from the adviser.
EPSY 5261 - Introductory Statistical Methods (3.0 cr)
or EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
or EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or PUBH 6451 - Biostatistics II (4.0 cr)
Perceptual-Motor Control and Learning
Students study the learning of movement skills and the factors that mediate learning as well as the changes in movement behavior over the life span and the processes or factors underlying these changes. In addition to the M.S. requirements, students choose courses from the following lists with adviser consultation. Registration for KIN 5992 is limited to 3 credits.

Recommended courses
Plan A and Plan B students take a minimum of 10 major course credits chosen from the following list.
- KIN 4133 - Perceptual-Motor Control and Learning (3.0 cr)
- or KIN 4136 - Embodied Cognition (3.0 cr)
- or KIN 4441 - Movement Neuroscience (3.0 cr)
- or HUMF 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)
- or HUMF 5722 - Human Factors Psychology (3.0 cr)
- or RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- or KIN 5992 - Readings in Kinesiology (1.0 - 9.0 cr)

Minor or related field
Plan A and Plan B students take one statistics course from the following list. In addition, Plan A students take a minimum of 3 credits and Plan B students take a minimum of 9 credits in any related field in consultation with the adviser.
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- or EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)

Sport and Exercise Psychology
Students will examine the thoughts, feelings and actions of participants in physical activity contexts such as sport, exercise, physical education, health and wellness and sports medicine. Multidisciplinary research and outreach are conducted through the Tucker Center for Research on Girls & Women in Sport and other entities. In addition to the M.S. requirements, students choose courses from the following lists with adviser consultation.

Recommended Courses
For Plan A and Plan B, a minimum of 10 major course credits are needed outside the requirements and may be chosen from the following list:
- KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
- or KIN 5126 - Social Psychology of Sport & Physical Activity (3.0 cr)
- or KIN 5136 - Psychology of Coaching (3.0 cr)
- or KIN 5371 - Sport and Society (3.0 cr)
- or KIN 5375 - Competitive Sport for Children and Youth (3.0 cr)
- or KIN 5511 - Sport and Gender (3.0 cr)
- or KIN 5723 - Psychology of Sport Injury (3.0 cr)
- or KIN 8126 - Sports Medicine Psychology (3.0 cr)
- or KIN 8136 - Developmental Sport and Exercise Psychology (3.0 cr)

Minor or related field
Plan A and Plan B students take 3 credits of statistics (EPSY 5261 or EPSY 8261). Plan A students take an additional 3 related-field credits and Plan B students take an additional 9 related-field credits in consultation with the adviser. Recommended courses for related fields are listed below. Recommended minors include Prevention Science (9 credits); Educational Psychological Foundations (6 credits).
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- or EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
- or EPSY 5401 - Counseling Procedures (3.0 cr)
- or PSY 5206 (Inactive) (3.0 cr)
- or PSY 5207 - Personality and Social Behavior (3.0 cr)

Sport Sociology
Sport sociology is the scientific study of human behavior and social organization in the sport context, focusing on behavior patterns and social processes that occur in the organizational and management systems in which sport exists. The program is housed in the Tucker Center for Research on Girls & Women in Sport, an interdisciplinary research institute. In addition to the M.S. requirements, students choose courses from the following lists with adviser consultation.

Recommended Courses
For Plan A and Plan B, a minimum of 10 major course credits are needed outside the requirements and may be chosen from the following list:
- KIN 5136 - Psychology of Coaching (3.0 cr)
- or KIN 5371 - Sport and Society (3.0 cr)
- or KIN 5511 - Sport and Gender (3.0 cr)
- or KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)
- or KIN 5801 - Legal Aspects of Sport and Recreation (4.0 cr)

Minor or related field

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
Plan A and Plan B students take 3 credits of statistics (EPSY 5261 or EPSY 8261). Plan A students take an additional 3 related-field course credits and Plan B students take an additional 9 related-field course credits in consultation with the adviser.

- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- or EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Master's students can choose a kinesiology minor in the following emphasis areas: behavioral aspects of physical activity, biomechanics and neuromotor control, exercise physiology, perceptual-motor control and learning, sport and exercise psychology, and sport sociology. Doctoral students can pursue a kinesiology minor in these same emphasis areas, with the addition of the sport management emphasis.

Program Delivery
This program is available:
  • via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A master's minor requires at least 6 credits of graduate-level kinesiology courses. A doctoral minor requires at least 12 credits of graduate-level kinesiology courses. Courses should be chosen in consultation with the student's major adviser and the School of Kinesiology's director of graduate studies.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Master's
Minor Courses
Minor requires at least 6 credits of graduate-level kinesiology courses. Courses should be chosen in consultation with the student's major adviser and the School of Kinesiology's director of graduate studies.

Doctoral
Minor Courses
Minor requires at least 12 credits of graduate-level kinesiology courses. Courses should be chosen in consultation with the student's major adviser and the School of Kinesiology's director of graduate studies.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 60 to 72
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Ph.D. students pursue an individualized program with an emphasis in biomechanics and neuromotor control, exercise physiology, perceptual-motor control and learning, physical activity and sport science, or sport management.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

It is preferred that applicants have completed a master's degree in the field of kinesiology or a related field and achieved an overall minimum GPA of 3.50.

Other requirements to be completed before admission:
Applicants must have completed a baccalaureate degree, generally in the following areas: kinesiology; exercise science; sport management; sport psychology/sociology; movement science; or related preparation and significant background and interest in the scientific study of physical activity.

Special Application Requirements:
Applicants must submit a University of Minnesota application which includes a written statement of academic interests, goals, and objectives; scores from the General Test of the GRE (verbal, quantitative, and analytical writing) that are less than five years old; three recommendations from persons familiar with their scholarship and research potential; a scholarly writing sample; and transcripts. Submission of all application materials by December 15 ensures priority consideration for admission and for teaching and research assistantships awarded for the next academic year. Students are admitted for the fall semester.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 153
  - General Test - Analytical Writing: 4.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Listening Score: 14
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Internet Based - Speaking Score: 23
The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 to 29 credits are required in the major.
12 to 19 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The Ph.D. requires 36 to 48 course credits and 24 thesis credits. The total course credits include a 12-credit core, at least 12 credits specific to the chosen area of emphasis, at least 6 research credits, and at least 6 supporting program credits. Students who choose to complete a formal minor must complete at least 12 minor-field credits. A GPA of at least 3.00 is required to maintain good standing and to graduate.

Required Kinesiology Courses
A minimum of 3 credits of KIN 8980 and a minimum of 9 credits of KIN 8995 are required over the course of the program. A total of 24 thesis credits are required.

KIN 8980 - Graduate Research Seminar in Kinesiology (1.0 cr)
KIN 8995 - Research Problems in Kinesiology (1.0 - 12.0 cr)
KIN 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Emphasis Areas
Kinesiology Ph.D. students pursue an individualized program with an emphasis in biomechanics and neuromotor control, exercise physiology, perceptual-motor control and learning, physical activity and sport science, or sport management.

Biomechanics and Neuromotor Control
The study of the mechanical and electromyographic analysis of human motion is combined with neurophysiological knowledge about the various neuronal subsystems to provide a basis for understanding how the brain controls bodily and limb motion.

Emphasis courses
A minimum of 12 course credits must be selected from the following list. At least 6 credits must be KIN 8xxx.

KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
KIN 8211 - Seminar: Perception and Action (3.0 cr)
KIN 8132 - Seminar: Motor Development (3.0 cr)
KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
RSC 5841 - Rehabilitation Science Instrumentation and Methodology (4.0 cr)

Research skills courses
A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the adviser.

EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)
EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 7405 - Biostatistics: Regression (4.0 cr)
PUBH 7406 - Advanced Regression and Design (4.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or STAT 5302 - Applied Regression Analysis (4.0 cr)
or STAT 5303 - Designing Experiments (4.0 cr)
or STAT 5601 - Nonparametric Methods (3.0 cr)

Minor
Choose either minor or supporting program. A minimum of 12 course credits are required for a University of Minnesota doctoral minor. Recommended minors include: CGSC, CPMS, GERO, HUMF, NSC, or PREV.

Supporting program
Any combination of at least 6 KIN or non-KIN course credits may be used for the supporting program and must be approved by the adviser. Recommended Kinesiology emphasis areas for supporting courses include Exercise Science, Perceptual-Motor Control and Learning, Physical Activity and Sport Science, or Sport Management. Recommended program areas for supporting courses include: BMEN, ME, NURS, OT, OTOL, PubH, NSC and RSC.

-OR-

Exercise Physiology
Exercise physiology is the study of issues related to acute and chronic effects of physical activity on human physiological systems and health, and how fundamental concepts of human energetics and mechanics apply to exercise, sport, physical exertion, and health promotion. Doctoral students learn to apply principles of physiology to solving problems related to functional responses and adaptations involved in human skeletal muscular activity.

Emphasis courses
A minimum of 12 course credits must be selected from the following list. At least 6 credits must be KIN 8xxx. KIN 8122 may be taken multiple times.

KIN 5122 - Applied Exercise Physiology (3.0 cr)
or KIN 5141 - Nutrition and Exercise for Health Promotion and Disease Prevention (3.0 cr)
or KIN 5142 - Applied Sport Nutrition for Athletic Performance (3.0 cr)
or KIN 5385 - Exercise for Healthy Aging & Disease Prevention and Management (3.0 cr)
or KIN 5435 - Advanced Theory and Techniques of Exercise Science (3.0 cr)
or KIN 5485 - Advanced Electrocardiogram Interpretation (3.0 cr)
or KIN 5485 - Pediatric Physiology and Health: Concepts and Applications (2.0 cr)
or KIN 5641 - Scientific Theory and Application of Training and Conditioning in Sport (3.0 cr)
or KIN 8122 - Seminar: Exercise Physiology (2.0 cr)

Research skills courses
A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the adviser. It is recommended to take a statistical sequence in either EPSY, STAT, or PubH. It is not recommended to switch courses between departments unless agreed to by the adviser.

EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
or EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)
or EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
or EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or PUBH 6451 - Biostatistics II (4.0 cr)
or PUBH 7405 - Biostatistics: Regression (4.0 cr)
or PUBH 7406 - Advanced Regression and Design (4.0 cr)
or PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
or PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or STAT 5302 - Applied Regression Analysis (4.0 cr)
or STAT 5303 - Designing Experiments (4.0 cr)
or STAT 5601 - Nonparametric Methods (3.0 cr)

Minor
Choose either a minor or supporting program. A minimum of 12 course credits are required for a University of Minnesota doctoral minor. Recommended minors include: CGSC, CPMS, GERO, HUMF, NSC, or PREV.

-OR-

Perceptual-Motor Control and Learning
Perceptual-motor control and learning includes related areas of movement behavior inquiry. Motor learning is the study of the learning of movement skills and the factors that mediate learning, such as practice, perceptual guidance, or knowledge of results. Although a lifespan approach is emphasized, students may focus on one or more specific age periods, such as infancy, early childhood, adolescence, or later adulthood.

Emphasis courses
A minimum of 12 course credits must be selected from the following list. At least 6 credits must be KIN 8xxx.

KIN 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
or KIN 5941 - Clinical Movement Neuroscience (3.0 cr)
or KIN 8211 - Seminar: Perception and Action (3.0 cr)
or KIN 8132 - Seminar: Motor Development (3.0 cr)
or KIN 8135 - Seminar: Motor Control and Learning (3.0 cr)
or RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
or RSC 5841 - Rehabilitation Science Instrumentation and Methodology (4.0 cr)

Research skills courses
A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the adviser. It is recommended to take a statistical sequence in either EPSY, STAT, or PubH. It is not recommended to switch courses between departments unless agreed to by the adviser.

EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
or EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
or EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
or EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or PUBH 6451 - Biostatistics II (4.0 cr)
or PUBH 7405 - Biostatistics: Regression (4.0 cr)
or PUBH 7406 - Advanced Regression and Design (4.0 cr)
or STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
or STAT 5302 - Applied Regression Analysis (4.0 cr)
or STAT 5303 - Designing Experiments (4.0 cr)
or STAT 5601 - Nonparametric Methods (3.0 cr)

Minor
Choose either a minor or supporting program. All University of Minnesota doctoral minors require a minimum of 12 credits.

Recommended minors include CGSC, CPMS, GERO, HUMF, NSC, or PREV.

Supporting program
Any combination of at least 6 KIN or non-KIN course credits may be used for the supporting program and must be approved by the adviser. Recommended Kinesiology emphasis areas for supporting courses include Biomechanics and Neuromotor Control, Exercise Science, Physical Activity and Sport Science, or Sport Management. Recommended programs for supporting courses include: BMEN, ME, NURS, OT, OTOL, PubH, NSC, and RSC. Specific KIN course recommendations include:

KIN 5981 - Research Methodology in Kinesiology, Recreation, and Sport (3.0 cr)
or KIN 5987 - Professional Skills and Grant Writing for Health Sciences (2.0 cr)

OR

Physical Activity and Sport Science
This emphasis centers on the broad context of human physical activity in areas such as competitive sport, fitness programs, lifestyle exercise, physical education, sports medicine and physical rehabilitation. Students can choose from three concentrations: behavioral aspects of physical activity, sport and exercise psychology, and sport sociology.

Emphasis courses
A minimum of 12 course credits must be selected from the following list. At least 6 credits must be KIN 8xxx. KIN 5720 is limited to 3 credits. Course credits for KIN 8696 determined in consultation with adviser.

KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)
or KIN 5126 - Social Psychology of Sport & Physical Activity (3.0 cr)
or KIN 5136 - Psychology of Coaching (3.0 cr)
or KIN 5371 - Sport and Society (3.0 cr)
or KIN 5375 - Competitive Sport for Children and Youth (3.0 cr)
or KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)
or KIN 5511 - Sport and Gender (3.0 cr)
or KIN 5723 - Psychology of Sport Injury (3.0 cr)
or KIN 8126 - Sports Medicine Psychology (3.0 cr)
or KIN 8136 - Developmental Sport and Exercise Psychology (3.0 cr)
or KIN 8696 - Internship: Applied Sport Psychology (3.0 - 6.0 cr)

Research skills course credits
A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the adviser.

KIN 5981 - Research Methodology in Kinesiology, Recreation, and Sport (3.0 cr)
or EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
or EPSY 8247 - Advanced Interviewing and NVIVO (3.0 cr)
or EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
or EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)
or EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
or EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
or EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
or EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
or PSY 8209 - Research Methods in Social Psychology (3.0 cr)
or PUBH 6810 - Survey Research Methods (3.0 cr)
or PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
or PUBH 7405 - Biostatistics: Regression (4.0 cr)
or PUBH 7406 - Advanced Regression and Design (4.0 cr)

Minor
Choose either a minor or supporting program. A minimum of 12 course credits are required for a University of Minnesota doctoral minor. Recommended minors include: EPSY, PREV, PSY, PUBH, SOC, or Integrative Therapies and Healing Practices offered by the Center for Spirituality and Healing.

Supporting program
Any combination of at least 6 KIN or non-KIN course credits may be used for the supporting program and must be approved by the adviser. Recommended concentrations for supporting courses include Behavioral Aspects of Physical Activity, Sport and Exercise Psychology, or Sport Sociology. Students should consult with their adviser for program guidance. Specific KIN course recommendations include:

KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)
or KIN 5801 - Legal Aspects of Sport and Recreation (4.0 cr)

-OR-

Sport Management
This emphasis concentrates on the theoretical and practical dimensions of the management of athletic events, sports teams and facilities, and the sporting process. The management areas studied include those in the public sector (interscholastic and intercollegiate sport) as well as fitness and facility management. Sport management policy and ethics are also a focus of this emphasis area and research agenda.

Required courses
The following courses are required for a total of 6 credits. Students will take three registrations of KIN 8980 for 1 credit each.
KIN 8980 - Graduate Research Seminar in Kinesiology (1.0 cr)
KIN 8128 - Doctoral Sport Management Seminar (3.0 cr)

Program courses
A minimum of 9 credits must be selected from the following list:
KIN 5111 - Sports Facilities (3.0 cr)
or KIN 5375 - Competitive Sport for Children and Youth (3.0 cr)
or KIN 5511 - Sport and Gender (3.0 cr)
or KIN 5371 - Sport and Society (3.0 cr)
or KIN 5421 - Sport Finance (3.0 cr)
or KIN 5461 - Issues in the Sport Industry (3.0 cr)
or KIN 5601 - Sport Management Ethics and Policy (3.0 cr)
or KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)
or KIN 5801 - Legal Aspects of Sport and Recreation (4.0 cr)

Research skills course credits
A minimum of 6-9 research skills course credits are required, selected from the following list or in consultation with the adviser.
KIN 5981 - Research Methodology in Kinesiology, Recreation, and Sport (3.0 cr)
or OLPD 6056 - Case Studies for Policy Research (3.0 cr)
or OLPD 5601 - Ethnographic Research Methods (3.0 cr)
or OLPD 5528 - Focus Group Interviewing Research Methods (3.0 cr)
or EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
or EPSY 8247 - Advanced Interviewing and NVIVO (3.0 cr)
or EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
or EPSY 8265 - Factor Analysis (3.0 cr)
or EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
or EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
or FSOS 8013 - Qualitative Family Research Methods (3.0 cr)

Minor
Choose either a minor or supporting program. A minimum of 12 course credits are required for a University of Minnesota doctoral minor. Recommended minors include: Public Policy, COMM, EPSY, BA, or CI.

Supporting program
Any combination of at least 6 KIN or non-KIN course credits may be used for the supporting program and must be approved by the adviser. Recommended Kinesiology emphasis areas for supporting courses include Biomechanics and Neuromotor Control, Exercise Physiology, Physical Activity and Sport Science, and Perceptual- Motor Control and Learning. Recommended program areas for supporting program courses include: OLPD, PA, COMM, Marketing, and Management.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of education (M.Ed.)/professional studies program in leadership in education, offered jointly by the Department of Organizational Leadership, Policy, and Development (OLPD) and the Department of Curriculum and Instruction (C&I) in the College of Education and Human Development (CEHD), builds leadership skills and facilitates analysis of K-12 school culture, policies, and practice.

This program develops educational leaders who can serve in schools that foster continuous learning and improvement. Program participants are prepared to advance team, school-wide, and district-wide reform initiatives for coherent educational systems and programs. This program addresses formal and informal leadership methods, emphasizing the roles and contributions of teachers as leaders of instructional improvement, including ways that teachers and principals work together to promote collaborative school cultures.

This 30-semester credit program emphasizes the essential components of leadership, including collaboration, group dynamics, continuous professional learning, school policy, school culture, design and facilitation of improvement initiatives, innovations in teaching and assessment practice, creation of coherent learning experiences, cross-cultural education, and technology.

Students are encouraged to begin the program with other educators from the same school or district. Most students complete the degree in two to three years while continuing to teach full time. Some degree coursework is offered at convenient, off-campus sites in the Twin Cities area.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have teaching experience.

**Special Application Requirements:**
Applications are reviewed on an ongoing basis, but students are advised to submit application materials by the following preferred dates: November 1 (Spring), March 1 (Summer), July 1 (Fall). International students must apply six weeks earlier than those dates listed.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
Program Requirements

Plan C: Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

Course Requirements

OLPD 5364 - Context and Practice of Educational Leadership (3.0 cr)
OLPD 5374 - Leadership for Professional Development (4.0 cr)
OLPD 5387 - Leadership for Teaching and Learning (3.0 cr)
  or CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
  or CI 5177 - Practical Research (3.0 cr)
OLPD 5361 - Project in Teacher Leadership (3.0 cr)
  or CI 5178 (inactive) (3.0 - 6.0 cr)

Electives

14 or more credits of elective courses with adviser approval. Students often choose elective credits aligned with certificates in staff development, school technology, reading, and school administration.

Program Sub-plans

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

Rochester

This sub-plan is not accepting new students at this time. Course requirements are the same as the Twin Cities program.

Singapore

Course requirements are the same as the Twin Cities program.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the **General Information** section of the catalog website for requirements that apply to all major fields.

The Master of Education (M.Ed.)/professional studies program in Literacy Education is designed to improve the quality of literacy education in K-12 schools. The program aims to address the growing state and national emphasis on pupils' reading skills and achievement.

The literacy education program provides instruction on current developments in literacy theory and research, as well as teaching methods for reading, writing, language, speech, and media studies. Students will learn to develop instructional units, evaluate and assess K-12 pupils' literacy skills, and develop technology tools to teach them. The program also encourages students to become "literacy leaders" in their schools and school systems.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 2.80.

A bachelor's degree from an accredited college or university.

**Special Application Requirements:**
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a clearly written statement of career interests, goals, and objectives. Master's applications are reviewed by department faculty three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- **IELTS**
  - Total Score: 6.5
- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Core Coursework (6 credits)

- CI 5155 - Contemporary Approaches to Curriculum: Instruction and Assessment (3.0 cr)
- CI 5351 - Technology Tools for Educators (3.0 cr)

Literacy Education Requirements (18 credits)

- Take 18 or more credit(s) from the following:
  - CI 5401 - Literature for the Elementary School (3.0 cr)
  - CI 5402 - Introduction to Special Collections (3.0 cr)
  - CI 5403 - Writing For and By Children (3.0 cr)
  - CI 5404 - Culturally Diverse Books for Children and Adolescents (3.0 cr)
  - CI 5410 - Special Topics in the Teaching of Literacy (1.0 - 3.0 cr)
  - CI 5411 - Teaching Reading in the Elementary School (3.0 cr)
  - CI 5412 - Reading Difficulties: Instruction and Assessment (3.0 cr)
  - CI 5415 - Literacy Development in the Primary Grades (3.0 cr)
  - CI 5417 - Elementary Literacy Instruction for ESL Students (3.0 cr)
  - CI 5422 - Teaching Writing in Schools (3.0 cr)
  - CI 5431 - Introduction to Instructional Leadership in K-12 Reading (3.0 cr)
  - CI 5432 - Instructional Leadership in Reading in Kindergarten and the Elementary Grades (3.0 cr)
  - CI 5433 - Instructional Leadership in Reading for the Middle and Secondary Grades (3.0 cr)
  - CI 5434 - Professional Development and Evolving Practice in K-12 Reading (3.0 cr)
  - CI 5435 - Instructional Leadership in Preventing Reading Difficulties (3.0 cr)
  - CI 5441 - Teaching Literature in the Secondary School (2.0 - 3.0 cr)
  - CI 5442 - Literature for Adolescents (3.0 cr)
  - CI 5451 - Teaching Reading in Middle and Secondary Grades (3.0 cr)
  - CI 5461 - Teaching Composition in the Secondary School (2.0 cr)
  - CI 5462 - Evaluating and Assessing Writing (3.0 cr)
  - CI 5472 - Teaching Film, Television, and Media Studies (3.0 cr)
  - CI 5475 - Teaching Digital Writing: Blogs, Wikis, Online Talk, Podcasting, and E-Portfolios to Teach Writing (3.0 cr)

Electives (6 credits)

Courses will be selected in consultation with faculty adviser. Students are advised to select courses that reflect learning issues faced in their classroom, including special education, secondary language, or cultural diversity issues.

- Take 6 or more credit(s) from the following:
  - CI 5331 - Introduction to Learning Technologies (3.0 cr)
  - CI 5337 (Inactive) (3.0 cr)
  - CI 5344 (Inactive) (1.0 cr)
  - CI 5361 - Teaching and Learning with the Internet (3.0 cr)
  - CI 5619 - Teaching World Languages and Cultures in Elementary Settings (3.0 cr)
  - CI 5641 - Language, Culture, and Education (3.0 cr)
  - CI 5642 - Assessing English Learners (3.0 cr)
  - CI 5647 - Teaching Middle and Secondary Immigrant and Refugee Students With Limited Formal Schooling (3.0 cr)
  - CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
  - CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
  - CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)
  - YOST 5852 - Everyday Lives of Youth (3.0 cr)
  - YOST 5854 - Experiential Learning: Pedagogy for Community and Classroom (3.0 cr)
  - COMM 5404 - Language and Culture (3.0 cr)
  - COMM 5406 - Communication and Gender (3.0 cr)
  - OLPD 5372 (Inactive) (3.0 cr)
  - ENGL 5090 - Readings in Special Subjects (1.0 - 4.0 cr)
• ENGL 5200  \textit{Inactive} (3.0 cr)
• ENGL 5300  \textit{Inactive} (3.0 cr)
• EPSY 5112 - Knowing, Learning, and Thinking (4.0 cr)
• EPSY 5113 - Psychology of Instruction and Technology (3.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5151 - Cooperative Learning (3.0 cr)
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5612 - Understanding of Academic Disabilities (3.0 cr)
• EPSY 5613 - Foundations of Special Education I (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of arts in multicultural college teaching and learning offered by the Department of Postsecondary Teaching and Learning (PsTL) provides an opportunity for intensive study of a transformative approach to teaching and learning to promote access to and success for traditionally underserved students. The program is multidisciplinary and a broad understanding of multiculturalism is employed that includes race, ethnicity, class, gender, sexual orientation, disability, age, and religion, so as to acknowledge that personal identity is complex and intersectional. Students engage in a critical examination of contemporary frameworks in educational theory, as well as the study of best practices for addressing them, such as multicultural education, critical pedagogy, assessment, and classroom research. Students are required to complete a semester-long supervised practicum and a two-semester supervised internship.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
In addition to the online application, students will also need to upload the following documents as part of their application: two letters of recommendation from persons familiar with the applicant's scholarship and research potential; and a current resume. In addition, the most important part of the application is a personal statement describing the applicant's interest in the program, professional/academic and/or community qualifications, what the applicant will bring to the diversity of the cohort and the profession, and how completion of the M.A. will build on the applicant's capacity to improve and transform teaching and learning at the postsecondary level. Complete applications received by December 1 will be considered for priority admission. Complete applications must be received by May 1 to be considered for Fall admission.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 18 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 21 major credits and 9 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The Plan B master's degree requires students to complete a capstone project. Students must demonstrate familiarity with the tools of research or scholarship in multicultural college teaching and learning, the ability to work independently, and the ability to present the results of their investigation effectively. The Plan B capstone project will involve a combined total of approximately 120 hours (the equivalent of three full-time weeks) of work. The PsTL graduate faculty will specify the nature and extent of the options available to satisfy this requirement. In conjunction with the capstone project, students must enroll in the 3 credit PsTL 8315 Plan B Capstone Seminar.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The Plan A master's requires a minimum of 34 credits. Students must complete a minimum of 18 credits in the major field (including practicum and internship) and a minimum of 6 elective credits including one research methods course, as well as 10 thesis credits and a master's thesis. The Plan B master's degree requires a minimum of 30 credits. Students must complete 21 credits in the major field including two semesters of internship (6 credits), the 3 credit Plan B Capstone Seminar and a capstone project, as well as a minimum of 9 elective credits.

Required core courses

The following courses are required for both the Plan A and the Plan B.

- PSTL 5106 - Multicultural Teaching and Learning in Diverse College Contexts (3.0 cr)
- PSTL 5196 - Supervised Practicum in Multicultural Postsecondary Teaching and Learning (3.0 cr)
- PSTL 5206 - Action Research Methods to Improve College Teaching and Learning (3.0 cr)
- PSTL 5212 - Multicultural Theories of College Student Development Applied to Teaching and Learning (3.0 cr)
- PSTL 8296 - Supervised Internship in Postsecondary Teaching and Learning (3.0 - 6.0 cr)

Plan A and Plan B requirements

Plan A

All Plan A students must take 10 thesis credits and 6 elective credits including one research methods course to be selected in consultation with adviser.

- PSTL 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B

All Plan B students must take the Plan B Capstone Seminar and elective credits to be selected in consultation with adviser to reach required total of 30 credits.

- PSTL 8315 - Plan B Capstone Seminar (3.0 cr)
Multicultural College Teaching and Learning Minor
Postsecondary Teaching and Learning
College of Education and Human Development

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Postsecondary Teaching and Learning’s (PsTL) graduate minors in multicultural college teaching and learning are designed for current University of Minnesota graduate students who want to study innovative strategies to increase access and success of diverse undergraduate students.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
To obtain a minor, graduate students should work with the PsTL director of graduate studies (DGS) to map out coursework that will enhance their ability to teach in diverse postsecondary contexts.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Coursework planned with PsTL Director of Graduate Studies. Typically students select from:
PsTL 5105 Increasing Access and Success in Undergraduate Classrooms (3 cr)
PsTL 5106 Multicultural Teaching and Learning in Diverse Post-secondary Contexts (3 cr)
PsTL 5206 Action Research Methods to Improve Post-secondary Teaching and Learning (3 cr)
PsTL 5212 Multicultural Theories of College Student Development Applied to Teaching and Learning (3 cr)
PsTL 8010 Special Topics: Postsecondary Teaching and Learning (1-3 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Master's
Coursework planned with PsTL Director of Graduate Studies to total 6 credits. Typically students select from:
PsTL 5105 Increasing Access and Success in Undergraduate Classrooms (3 credits)
PsTL 5106 Multicultural Teaching and Learning in Diverse Post-secondary Contexts (3 credits)

© 2005 by the Regents of the University of Minnesota

• Requirements for this program are current for Fall 2014
• Length of program in credits: 12
• This program does not require summer semesters for timely completion.
• Degree: T E L: Multimedia Design & Dev PBacc Cert Grad

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This certificate program in multimedia design and development prepares students to use technology (computers and the Internet) to develop instructional materials for use in a wide range of educational and training contexts (note that a university certificate program or certificate is distinct from a state certificate or certification).

The program is designed for K-12 teachers, higher education instructors, corporate trainers, and other professionals interested in using technology to support instruction.

Program Delivery
This program is available:
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A completed bachelor's degree is required for admission.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a one page goal statement. Certificate applications are reviewed by the department three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Online Distance Learning Postbaccalaureate Cert.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The online distance learning certificate is designed to prepare educators and other professionals to design and deliver distance learning opportunities in academic or business settings (note that a university certificate program or certificate is distinct from a state certificate or certification). Technology experience is not required, and courses are designed for learners with a wide range of experience.

This 12-credit certificate program will prepare students to successfully design, develop, and deliver curriculum on the Internet; use interactive online media; and create online learning communities for business and K-12 and postsecondary schools. As schools and businesses embrace online education, a variety of instructional design guidelines and pedagogical approaches have been developed to effectively guide online education and enhance learning.

Goals of the distance learning certificate include:
- Developing knowledge and skills in the best practices for designing and delivering online distance learning
- Engaging with current research about distance learning, current practices, and learning theory
- Providing opportunities to practice designing, developing, and delivering online distance learning
- Creating learning communities where students can reflect on their own teaching, reading, designing, and writing
- Allowing students to learn from each other

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A completed bachelor's degree is required for admission.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, and a one page goal statement. - Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 58 to 72
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Organizational Leadership, Policy, and Development is a leader in advancing knowledge about educational and organizational change in local, national, and international contexts. Its research, teaching, and outreach reflect a commitment to interdisciplinary and intercultural engagement with educators, scholars, and policy makers seeking to enhance leadership, policy, and development around the globe. Students in the Ed.D. programs choose from one of three complementary but distinct program tracks: education policy and leadership (EPL), higher education (HiEd), and human resource development (HRD). The department offers M.A. and Ph.D. degrees in the tracks mentioned above, as well as comparative and international development education (CIDE) and evaluation studies. Undergraduate programs focus on human resource development and business and marketing education. In addition, the department offers a variety of programs for practicing professionals and various licensure programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A master's degree is required. The preferred graduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
Applicants must submit scores from the General Test of the GRE, two letters of recommendation from persons familiar with their scholarship and research potential, a complete set of academic transcripts, and a current résumé, as well as answer required essay questions via the University's online application system. International students must also submit a TOEFL or IELTS score. Unofficial GRE scores, transcripts, and TOEFL/IELTS score may be submitted via the online application for admission review purposes only. Admitted students must submit official GRE scores (as applicable), transcripts (sent directly from institution[s]), and TOEFL/IELTS scores (as applicable) to the University as a condition of any admission offer. Applicants to the international cohorts should have at least three years of experience in international education.

Special Application Requirements:
Admission to the Education Policy and Leadership track and the Higher Education tracks of the EdD are currently suspended.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
34 credits are required in the major.
12 to 14 credits are required outside the major.
12 to 24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The doctor of education (Ed.D.) is a professionally oriented degree program for those who will provide leadership in educational institutions and work and community education environments. Students combine study and related experiences to develop, apply, analyze, synthesize, and evaluate knowledge of the purposes, practices, issues, and problems of their program area. The Ed.D. is offered in 3 OLPD tracks: EPL (pre-K-12 schools), higher education and HRD. Cohorts for the EPL and higher education tracks include those in the metropolitan area, out state Minnesota, and international schools. Those two Ed.D. degree tracks are offered only in the context of cohort programs of 20-30 students each. All Ed.D. cohort programs include department core courses, program core courses, inquiry and research courses, supporting program or minor, and field research project credits. Through courses, seminars, and independent study, students learn to apply the products of disciplined inquiry to educational policy issues and practical situations in various educational environments and conduct types of research that contribute and/or apply that knowledge to the specialization. Within the overall framework (some credits may be brought in from previous graduate work), specific course requirements are developed for each program area and cohort when applicable. See the department website for requirements in specific cohorts. Preliminary written and oral exams are required. Students must complete a professional field project that contributes to the improvement of policy or practice.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Education Policy and Leadership
The EPL Ed.D. track is not accepting new students at this time.
Information about degree requirements for current students can be found at http://www.cehd.umn.edu/olpd/grad-programs/.

Higher Education
The higher education Ed.D. track is not accepting new students at this time.
Information about degree requirements for current students can be found at http://www.cehd.umn.edu/olpd/grad-programs/.

Human Resource Development
Current students in this Ed.D. track are required to take 47 course credits and 24 field study credits (thesis credits).

Research Courses
- Students should consult with advisers about the appropriate time to register for each course.
  - OLPD 8015 - Research Design and Educational Policy (3 cr)
  - a 3 credit statistics course to be determined by student and adviser (3 cr inside or outside department)
  - a qualitative course to be determined by student and adviser (3 cr; inside or outside department)
  - a quantitative course to be determined by student and adviser (3 cr inside or outside department)
  - OLPD 8890 - Research Seminar (1.0 cr)
Additional Rsch Course
  a 3 credits qualitative course taken with adviser approval
  or OLPD 8812 - Quantitative Research in Education (3.0 cr)

Skills and Special Topics
  19 credits minimum. OLPD 8011 must be taken during the first year of the program.
  OLPD 8011 - Doctoral Research Seminar I (1.0 cr)
  18 credits of HRD elective coursework jointly determined by student and adviser based around the student's professional role

Specialization
  Must total 12 credits
  A 3 credit OLPD 8xxx level theory seminar course as determined by the adviser
  9 additional credits of appropriate coursework as determined by the faculty adviser

Rochester
This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

Same as general program description.

This sub-plan is not accepting new students.

The Department of Organizational Leadership, Policy, and Development is a leader in advancing knowledge about educational and organizational change in local, national, and international contexts. Our research, teaching, and outreach reflect a commitment to interdisciplinary and intercultural engagement with educators, scholars, and policy makers seeking to enhance leadership, policy, and development around the globe. Students in the M.A. and Ph.D. programs choose from one of five complementary but distinct program tracks: education policy and leadership (EPL), evaluation studies (ES), higher education (HE), comparative and international development education (CIDE), and human resource development (HRD). Our undergraduate programs focus on human resource development and business and marketing education. In addition, the department offers a variety of programs for practicing professionals and various licensure programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE, two letters of recommendation from persons familiar with their scholarship and research potential, transcripts, a current résumé, and answer to two essay questions found within the University's online application. The GRE is not required for EPL M.A. applicants but is required for application to other M.A. program tracks (CIDE, ES, HE, and HRD). International students must also submit a TOEFL or IELTS score, but international applicants to the M.A. program are exempt from the GRE. All applications for admission are reviewed once a year. All new students begin in fall semester unless permission to start earlier is granted by the track coordinator. The annual deadline is March 1.

Letters of recommendation, résumé, essays, and other department application materials are submitted via the University online application system. Unofficial GRE scores, transcripts, and TOEFL/IELTS score may also be submitted via the online application for admission review purposes only. Admitted students must submit official GRE scores (as applicable), transcripts (sent directly from institution[s]), and TOEFL/IELTS scores (as applicable) to the University as a condition of any admission offer.

Applicants must have completed appropriate undergraduate and graduate study. In some cases, where previous coursework or degrees are marginally related, otherwise qualified applicants will be asked to complete additional background courses after admission. Applications are encouraged from individuals who may have completed undergraduate and/or master's programs in social science, liberal arts, public affairs, and business fields. The department offers study opportunities for professionals who are employed full time as well as for those who wish to pursue graduate studies full time.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
Program Requirements

Plan A: Plan A requires 16 to 18 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 to 28 major credits and 6 credits outside the major. The final exam is written.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Comparative and International Development Education

Plan A
Total Plan A CIDE Credits: 34 credits

Plan A or Plan B

Program Core
Offered only in the fall term and normally taken during the year in which the student is writing the master's thesis. Student must take 3 credits of OLPD 5087
OLPD 5087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

Program Specialization
Select one of the specializations below and choose two of its three core courses. Note: The Global Youth Policy and Leadership specialization is not being offered currently although individual courses may appear on occasion.

Comparative and International development education
OLPD 5103 - Comparative Education (3.0 cr)
OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)
OLPD 5121 - Educational Reform in International Context (3.0 cr)

or Intercultural/international education
OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
OLPD 5124 - Critical Issues in International Education and Educational Exchange (3.0 cr)
OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)

or Global youth policy and leadership
OLPD 5141 - Global Youth Policy and Leadership: Comparative Youth Policy and Leadership (3.0 cr)
OLPD 5142 - Youth Futures in International and Global Contexts (3.0 cr)
OLPD 5381 - The Search for Children and Youth Policy in the U.S. (3.0 cr)

Research Design and Methods
3 credits to be selected in consultation with adviser.

Related Fields
The master's degree requires 6 semester credits taken outside the CIDE program track that directly relate to the student's area of study. Courses totaling 6 or more credits should be selected in consultation with the adviser and should constitute a solid coursework
foundation for the student's thesis. These courses may include additional methods courses taught outside the department.

**Electives**
Take 6 or more credit(s) from the following list with adviser approval:
- OLPD 5044 - Introduction to the Economics of Education (3.0 cr)
- OLPD 5056 - Case Studies for Policy Research (3.0 cr)
- OLPD 5061 - Ethnographic Research Methods (3.0 cr)
- OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
- OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
- OLPD 5102 - Knowledge Constructions and Applications in International Development Contexts (3.0 cr)
- OLPD 5144 [Inactive](3.0 cr)
- OLPD 8087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
- OLPD 8101 - International Education and Development (3.0 cr)
- OLPD 8103 - Comparative Education (3.0 cr)
- OLPD 8104 - Innovative Systems Thinking in Education and Culture (3.0 cr)

**Thesis Credits**
Take 10 or more credit(s) from the following:
- OLPD 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

**Plan B**
Total Plan B CIDE Credits: 30 credits

**Program Core**
This is an independent study with adviser to prepare Plan B paper. Student must take at least 3 credits of OLPD 5095.
- OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

**Program Specializations**
Select one of the specializations below and choose two of its three core courses. Note: The Global Youth Policy and Leadership specialization is not being offered currently although individual courses may appear on occasion.

**Comparative and international development education**
- OLPD 5103 - Comparative Education (3.0 cr)
- OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)
- OLPD 5121 - Educational Reform in International Context (3.0 cr)

**Intercultural/international education**
- OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
- OLPD 5124 - Critical Issues in International Education and Educational Exchange (3.0 cr)
- OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)

**Global youth policy and leadership**
- OLPD 5141 - Global Youth Policy and Leadership: Comparative Youth Policy and Leadership (3.0 cr)
- OLPD 5142 - Youth Futures in International and Global Contexts (3.0 cr)
- OLPD 5381 - The Search for Children and Youth Policy in the U.S. (3.0 cr)

**Research Design and Methods**
3 credits to be selected in consultation with adviser.

**Electives**
Take 12 or more credit(s) from the following list:

Notes: 8xxx courses should be taken only with the consent of the instructor.

The following course sections are also available for elective options:
- OLPD 5080 - Special Topics: Gender, Education, & International Development (3 cr)
- OLPD 8087 - Seminar: Educational Policy & Administration (1-2 cr) [Advanced Seminar in International Development Education: Care Gender Project]
- OLPD 5044 - Introduction to the Economics of Education (3.0 cr)
- OLPD 5056 - Case Studies for Policy Research (3.0 cr)
- OLPD 5061 - Ethnographic Research Methods (3.0 cr)
- OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
- OLPD 5102 - Knowledge Constructions and Applications in International Development Contexts (3.0 cr)
- OLPD 5144 [Inactive](3.0 cr)
- OLPD 5302 - Educational Policy: Context, Inquiry, and Issues (3.0 cr)
- OLPD 8087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
- OLPD 8101 - International Education and Development (3.0 cr)
- OLPD 8103 - Comparative Education (3.0 cr)
- OLPD 8104 - Innovative Systems Thinking in Education and Culture (3.0 cr)

**Related Fields (6 additional credits outside department)**
The master's degree requires 6 semester credits taken outside the CIDE program track that directly relate to the student's area of study. These courses should be selected in consultation with the adviser and should constitute a solid coursework foundation for the student’s thesis. These courses may include additional methods courses taught outside the department.
Plan A or Plan B

Plan A

Program Core
Take 6 or more credit(s) from the following:
OLPD 5001 - Formal Organizations in Education (3.0 cr)
or OLPD 5041 - Sociology of Education (3.0 cr)
or OLPD 5044 - Introduction to the Economics of Education (3.0 cr)
or OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
or OLPD 5302 - Educational Policy: Context, Inquiry, and Issues (3.0 cr)
or OLPD 5344 - School Law (3.0 cr)
or OLPD 5364 - Context and Practice of Educational Leadership (3.0 cr)

Research Design and Methods
Take 6 or more credits selected in consultation with adviser.

Related Fields (6 additional credits outside department)
The master's degree requires 6 credits taken outside of the EPL program track that directly relate to the student's area of study. These courses should be selected in consultation with the adviser.

Electives
2-8 credits selected in consultation with adviser.

Thesis Credits
Take 10 or more credit(s) from the following:
OLPD 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Research Project
Plan A students will develop and carry out an empirical research project under the supervision of their adviser.

-OR-

Plan B

Require Coursework
OLPD 5001 - Formal Organizations in Education (3.0 cr)
OLPD 5302 - Educational Policy: Context, Inquiry, and Issues (3.0 cr)

Program Core
Take 6 credits total from the following two areas:

Leadership courses
Choose one of the following:
OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
or OLPD 5364 - Context and Practice of Educational Leadership (3.0 cr)

Other Coursework
Choose one of the following:
OLPD 5041 - Sociology of Education (3.0 cr)
or OLPD 5044 - Introduction to the Economics of Education (3.0 cr)
or OLPD 5128 - Anthropology of Education (3.0 cr)
or OLPD 5324 - Strategic Financial Planning and Policy for Educational Leaders (3.0 cr)
or OLPD 5344 - School Law (3.0 cr)
or OLPD 5346 - Politics of Education (3.0 cr)

Research Design and Methods
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)

Related Fields
6 additional credits outside of the EPL program track, selected in consultation with adviser. These usually include additional courses from the program core or other OLPD courses.

Electives
6-8 cr selected in consultation with adviser

Colloquium Paper
Students prepare a paper on an issue of relevance in school administration or revise and expand three course papers. Total of 120 hours of work required.

Take 3 or more credit(s) from the following:
OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

Evaluation Studies
Plan A
Total Plan A ES Credits: 31 credits minimum

Program Core (6 credits)
- OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
- OLPD 5502 - Theory and Models of Evaluation (3.0 cr)
  or OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

Research Design and Methods
Two qualitative methods courses selected in consultation with adviser for a minimum of 6 credits.

Related Fields/Electives (9-10 credits)
The master's degree requires 6 semester credits taken outside the ES program track that directly relate to the student's area of study. These courses should be selected in consultation with the adviser and should constitute a solid coursework foundation for the student's thesis.

Thesis Credits
Take 10 or more credit(s) from the following:
- OLPD 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B
Total Plan B ES Credits: 31 credits minimum

Program Core (10 credits)
- OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
- OLPD 5521 - Cost and Economic Analysis in Educational Evaluation (3.0 cr)
- OLPD 5524 - Evaluation Colloquium (1.0 cr)
- OLPD 5502 - Theory and Models of Evaluation (3.0 cr)
  or OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

Research Design and Methods
Two qualitative methods courses selected in consultation with adviser for a minimum of 6 credits.

Related Fields
The master's degree requires 6 semester credits taken outside the ES program track that directly relate to the student's area of study. These courses should be selected in consultation with the adviser and should constitute a solid coursework foundation for the student's thesis.

Other Electives
Coursework related to the student's specialization, selected in consultation with the adviser, and totaling a minimum of 6 credits. These may be OLPD or outside courses.

Colloquium Paper
The Plan B paper is prepared under the guidance of the adviser and committee. The final paper must represent no fewer than 120 hours of work.

Take 3 or more credit(s) from the following:
- OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)

Higher Education

Plan A or Plan B

Plan A
Total Plan A HiEd Credits: 34 credits

Required Coursework
- OLPD 5701 - U.S. Higher Education (3.0 cr)
- OLPD 5709 - Critical Issues in Higher Education (3.0 cr)

Program Area
Take 9 or more credit(s) from the following with adviser consultation and approval. Other courses as offered by higher ed program track faculty may also meet this requirement.

Only the topics listed below may be used for this requirement if taking OLPD 5080:
- Diversity & Equity in Higher Education (3 cr)
- Public Engagement in Higher Education (3 cr)
- External Relations in Higher Education (3 cr)
- Perspectives on Leadership (3 cr)
- Any taught by higher ed program faculty (3 cr)
- OLPD 5001 - Formal Organizations in Education (3.0 cr)
  or OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
  or OLPD 5704 - College Students Today (3.0 cr)
or OLPD 5721 - Race and Ethnicity in Higher Education (3.0 cr)
or OLPD 5724 - Leadership and Administration of Student Affairs (2.0 - 3.0 cr)
or OLPD 5734 - Institutional Research in Postsecondary Education (2.0 - 3.0 cr)
or OLPD 8703 - Public Policy in Higher Education (3.0 cr)

Related Fields
The master's degree requires 6 semester credits taken outside the higher ed program track that directly relate to the student's area of study. These courses should be selected in consultation with the adviser and should constitute a solid coursework foundation for the student's thesis. These courses may include additional methods courses taught outside the department.

Research Design and Methods
Students select courses in consultation with their adviser totaling a minimum of 3 credits.

Thesis Credits
Take 10 or more credit(s) from the following:
OLPD 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B

Total Plan B HiEd Credits: 30 credits

Required Coursework
6 credits
OLPD 5701 - U.S. Higher Education (3.0 cr)
OLPD 5709 - Critical Issues in Higher Education (3.0 cr)

Program Area
Take 12 or more credit(s) from the following with adviser consultation and approval. Other courses as offered by higher ed program track faculty may also meet this requirement.

Only the topics listed below may be used for this requirement if taking OLPD 5080:
Diversity & Equity in Higher Education (3 cr)
Public Engagement in Higher Education (3 cr)
External Relations in Higher Education (3 cr)
Perspectives on Leadership (3 cr)
Any taught by higher ed program faculty (3 cr)
OLPD 5001 - Formal Organizations in Education (3.0 cr)
OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)
OLPD 5704 - College Students Today (3.0 cr)
OLPD 5721 - Race and Ethnicity in Higher Education (3.0 cr)
OLPD 5724 - Leadership and Administration of Student Affairs (2.0 - 3.0 cr)
OLPD 5734 - Institutional Research in Postsecondary Education (2.0 - 3.0 cr)
OLPD 8703 - Public Policy in Higher Education (3.0 cr)

Related Fields
The master's degree requires 6 semester credits taken outside the higher ed track that directly relate to the student's area of study. These courses should be selected in consultation with the adviser and should constitute a solid coursework foundation for the student's thesis. These courses may include additional methods courses taught outside the department.

Methods Course
Select courses in consultation with adviser for a minimum of 3 credits.

Colloquium Paper
Plan B paper is prepared under the guidance of adviser and committee. The final paper must represent no fewer than 120 hours of work.

Take 3 or more credit(s) from the following:
OLPD 5795 - Plan B Research Design (3.0 cr)

Human Resource Development

Plan A or Plan B

Human Resource Development

Plan A

General Aspects
OLPD 5801 - Survey: Human Resource Development and Adult Education (3.0 cr)

Research
OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)
OLPD 8815 - Ethics and Responsible Research (1.0 cr)
an 8xxx qualitative or quantitative research course (3 cr)

Program Core
OLPD 5605 - Strategic Planning through Human Resources (3.0 cr)
OLPD 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)
OLPD 5615 - Training and Development of Human Resources (3.0 cr)
OLPD 5607 - Organization Development (3.0 cr)
OLPD 5201 - Strategies for Teaching Adults (3.0 cr)

Thesis Credits and Elective
Student must take 10 credits of OLPD 8777. Student must also take electives as needed to reach required grand total of 34 graduate-level coursework credits.

OLPD 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B

General Aspects
OLPD 5801 - Survey: Human Resource Development and Adult Education (3.0 cr)

Research
OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)
OLPD 8815 - Ethics and Responsible Research (1.0 cr)
an 8xxx qualitative or quantitative research course (3 cr)

Program Core
OLPD 5605 - Strategic Planning through Human Resources (3.0 cr)
OLPD 5696 - Internship: Human Resource Development (1.0 - 10.0 cr)
OLPD 5615 - Training and Development of Human Resources (3.0 cr)
OLPD 5607 - Organization Development (3.0 cr)
OLPD 5201 - Strategies for Teaching Adults (3.0 cr)

Plan B Project Paper
Plan B project/paper is prepared under the guidance of adviser and committee - must represent no fewer than 120 hours of work.
Students should register for between 3-6 credits

OLPD 5893 - Directed Study in OLPD (1.0 - 4.0 cr)

Electives
With approval of adviser as needed to total a minimum of 34 graduate-level coursework credits overall for this plan.

• Program Type: Doctorate
• Requirements for this program are current for Fall 2014
• Length of program in credits: 70 to 72
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Organizational Leadership, Policy, and Development is a leader in advancing knowledge about educational and organizational change in local, national, and international contexts. Its research, teaching, and outreach reflect a commitment to interdisciplinary and intercultural engagement with educators, scholars, and policy makers seeking to enhance leadership, policy, and development around the globe. Students in the M.A. and Ph.D. programs choose from one of five complementary but distinct program tracks: education policy and leadership (EPL), evaluation studies (ES), higher education (HiED), comparative and international development education (CIDE), and human resource development (HRD). Undergraduate programs focus on human resource development and business and marketing education. In addition, the department offers a variety of programs for practicing professionals and various licensure programs.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have completed appropriate undergraduate and graduate study. In some cases, where previous coursework or degrees are marginally related, otherwise qualified applicants will be asked to complete additional background courses after admission. Applications are encouraged from individuals who may have completed undergraduate and/or master's programs in social science, liberal arts, business, and education fields. The department offers study opportunities for professionals who are employed full time, as well as for those who wish to pursue graduate studies full time.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE, two letters of recommendation from persons familiar with their scholarship and research potential, a complete set of academic transcripts, and a current résumé; as well as answer required essay questions via the University online application system. Unofficial GRE scores, transcripts, and TOEFL/IELTS score may be submitted via the online application for admission review purposes only. Admitted students must submit official GRE scores (as applicable), transcripts (sent directly from institution[s]), and TOEFL/IELTS scores (as applicable) to the University as a condition of any admission offer.

The GRE is required for all tracks in the doctoral degree programs (Ed.D. and Ph.D.). International students must also submit a TOEFL or IELTS score. All applications for admission are reviewed once per year for Fall admission. Submission of all application materials for all tracks by December 1 is strongly encouraged to ensure priority consideration for assistantships awarded for the next academic year. All new students begin in fall semester unless special permission to start earlier is granted by the program coordinator.

International applicants must submit score(s) from one of the following tests:
• TOEFL
Program Requirements
30 to 48 credits are required in the major.
0 to 18 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Credits required by the major vary by track. The Ph.D. is available in five program tracks: education policy and leadership, evaluation studies, higher education, comparative and international development education or human resource development. All Ph.D. programs include 16 credits in department core courses (which include 15 credits of research methodology courses), 18 or more credits in program core courses, 12-14 credits program approved electives, and 24 thesis credits. The minimum total of course credits varies by track (see Student Handbook on the department website for details). Preliminary written and oral exams are required. Students must complete a dissertation. Within the general framework for Ph.D. requirements, the degree program is developed by the student and his or her adviser and is subject to approval by the department's director of graduate studies and the University.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Comparative and International Development Education
The doctor of philosophy (Ph.D.) degree with a program emphasis in comparative and international development education (CIDE) is offered by the Department of Organizational Leadership, Policy, and Development (OLPD). CIDE uses an interdisciplinary approach to the study of education's role in economic, political, and sociocultural development; international educational exchange; and the internationalization of education. The three specializations within CIDE are comparative and international development education; intercultural/international education; and global youth policy and leadership.

Department Core
16 credits

Professional socialization seminar
Taken fall term of first year.
OLPD 8011 - Doctoral Research Seminar I (1.0 cr)

Research courses
OLPD 8015 - Research Design and Educational Policy (3.0 cr)
Quantitative course to be determined by student and adviser (3 cr in or outside of department)
Qualitative course to be determined by student and adviser (3 cr in or outside of department)
8 credits of additional methods courses to be determined by student and adviser (in or outside of department)

Doctoral Seminars in CIDE
Students take 6 credits; 2 credits in each of 3 semesters starting in the spring term of the first year in the program; course numbers are listed as OLPD 8121, section 002; OLPD 8121, section 003; and OLPD 8121, section 004.

Specialization Courses
Students choose two courses, with a minimum of one 8xxx course for specializations with 8xxx courses. Any specialization core course not being used as core class can become a CIDE elective. Note: The Global Youth Policy and Leadership specialization is not being offered currently although individual courses may appear on occasion.

Comparative and international development education
Take 6 or more credit(s) from the following:
OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)  
or  
OLPD 5121 - Educational Reform in International Context (3.0 cr)  
or  
OLPD 8101 - International Education and Development (3.0 cr)  
or  
OLPD 8103 - Comparative Education (3.0 cr)

Intercultural/international education
Take 6 or more credit(s) from the following:
OLPD 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)  
OLPD 5124 - Critical Issues in International Education and Educational Exchange (3.0 cr)  
OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)

Global Youth Policy and Leadership
Take 6 or more credit(s) from the following:
OLPD 5141 - Global Youth Policy and Leadership: Comparative Youth Policy and Leadership (3.0 cr)  
OLPD 5142 - Youth Futures in International and Global Contexts (3.0 cr)  
OLPD 5381 - The Search for Children and Youth Policy in the U.S. (3.0 cr)

CIDE Elective Courses
Take exactly 8 credit(s) from the following:
OLPD 5044 - Introduction to the Economics of Education (3.0 cr)  
or  
OLPD 5056 - Case Studies for Policy Research (3.0 cr)  
or  
OLPD 5061 - Ethnographic Research Methods (3.0 cr)  
or  
OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)  
or  
OLPD 5102 - Knowledge Constructions and Applications in International Development Contexts (3.0 cr)  
or  
OLPD 5144  (Inactive) (3.0 cr)  
or  
OLPD 5381 - The Search for Children and Youth Policy in the U.S. (3.0 cr)  
or  
OLPD 8104 - Innovative Systems Thinking in Education and Culture (3.0 cr)

Special topics/Seminar elective options
OLPD 8087 - Seminar in OLPD Advanced Seminar in International Development Education: Care Gender Project OR Professional Seminar in CIDE

OLPD 5080 - Special Topics in OLPD Special Topics: Gender, Education, and International Development (3 cr) OR Special Topics: Human Rights Education (3 cr)

Additional Coursework
To meet requirement that 12 credits be taken outside the CIDE program track or for a graduate minor.

Education Policy and Leadership
The doctor of philosophy (Ph.D.) degree with a program emphasis in education policy and leadership (EPL) provides an opportunity for intensive study of the field of education. It is especially suitable for students who wish to pursue careers in policy, research, or college and university teaching. It is also available to students who are interested in careers in school, district, and statewide administration, though it is more theory and research-oriented than the doctorate of education (Ed.D.) degree, which is also offered by OLPD. Educational administration offers coursework and research opportunities for those interested in making a difference in educational systems and settings that involve PreK-12 children and youth. The program is committed to supporting the development of leaders and scholars who work to continuously improve educational quality and effectiveness so that young people graduate from secondary education well prepared to continue their learning and to contribute to their communities. The program promotes understanding of schools as organizations and emphasizes application of knowledge and research to varied contexts of educational practice.

Department Core
16 credits
Professional socialization seminar  
Taken fall term of first year
OLPD 8011 - Doctoral Research Seminar I (1.0 cr)
Research courses
OLPD 8015 - Research Design and Educational Policy (3.0 cr)
3 credit quantitative course (in or outside of department) in consultation with adviser
3 credit qualitative course (in or outside of department) in consultation with adviser
6 credits of additional methods courses in consultation with adviser

Program Core: Education Policy and Leadership
18 credits
OLPD 5001 - Formal Organizations in Education (3.0 cr)  
OLPD 5346 - Politics of Education (3.0 cr)  
OLPD 8020 - Leadership: From Theory to Reflective Practice (3.0 cr)  
OLPD 8302 - Educational Policy Perspectives (3.0 cr)

OLPD Electives
6 or more credits of electives selected with approval of adviser.

Additional Coursework
To meet requirement that 12 credits be taken outside the EPL program track or for a graduate minor. Courses not specifically listed should have adviser approval.

**Evaluation Studies**
The doctor of philosophy (Ph.D.) degree with a program emphasis in evaluation studies (ES) provides an opportunity for intensive study of the techniques and process of evaluation and policy research and of the social and political context within which program evaluation occurs. Graduates leave with a portfolio filled with evidence of their expertise with the tools of the evaluation trade—qualitative and quantitative inquiry methods, communication skills, and computer database analysis experience. Evaluation knowledge and skills are gleaned not only from time in the classroom but also from internships and collaboration with evaluation professionals in real-world settings. Evaluation studies students have access to some of the best evaluators in the field.

**Department Core**
16 credits
Taken fall term of first year
- OLPD 8011 - Doctoral Research Seminar I (1.0 cr)

**Research Courses**
- OLPD 8015 - Research Design and Educational Policy (3.0 cr)
- 3 credit quantitative course (in or outside of department) in consultation with adviser
- 3 credit qualitative course (in or outside of department) in consultation with adviser
- 6 credits of additional methods courses in consultation with adviser

**Program Core: Evaluation Studies**
20 credits. Student must take OLPD 8596 twice, in two different semesters.
- OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
- OLPD 5521 - Cost and Economic Analysis in Educational Evaluation (3.0 cr)
- OLPD 5524 - Evaluation Colloquium (1.0 cr)
- OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)
- OLPD 8595 - Evaluation Problems (1.0 - 6.0 cr)
- OLPD 8596 - Evaluation Internship (1.0 - 9.0 cr)

**Additional Coursework**
To meet requirement that 12 credits be taken outside the ES program track or for a graduate minor. Courses not specifically listed should have adviser approval.

**Higher Education**
The doctor of philosophy (Ph.D.) degree with a program emphasis in higher education (HIED) provides an opportunity for intensive study of the policies and organizational issues in higher education institutions and systems. HIED focuses on the experiences, practices, and decisions of those involved in postsecondary education, as well as on the sociopolitical contexts in which higher education exists. Areas of specialization include administration and organization, policy, college students, external relations, equity-oriented change, and research integrity.

**Department Core**
16 credits
- Professional socialization seminar
  Taken fall term of first year
  - OLPD 8011 - Doctoral Research Seminar I (1.0 cr)

**Research Design and Methods**
- OLPD 8015 - Research Design and Educational Policy (3.0 cr)
- 3 credit quantitative course (in or outside of department) in consultation with adviser
- 3 credit qualitative course (in or outside of department) in consultation with adviser
- 6 credits of additional methods courses in consultation with adviser

**Program Core: Higher Education**
21 credits
- OLPD 5701 - U.S. Higher Education (3.0 cr)
- OLPD 5704 - College Students Today (3.0 cr)
- OLPD 8702 - Administration and Leadership in Higher Education (3.0 cr)
- OLPD 8703 - Public Policy in Higher Education (3.0 cr)

**Higher Ed Electives**
9 credits focused on issues relevant to the Higher Education track with adviser approval

**Additional Coursework**
Minimum of 11 credits. To meet department requirement that at least 11 credits be taken outside the HE program track or for a graduate minor.

**Human Resource Development**
The doctor of philosophy (Ph.D.) degree with a program emphasis in human resource development (HRD) is offered by the Department of Organizational Leadership, Policy, and Development (OLPD). Students in HRD combine study and related experiences to develop, apply, analyze, synthesize, and evaluate knowledge of the purposes, practices, issues, and problems of work and community education; social, economic, historical, political, cultural, educational, technological, and psychological contexts within which work and
community education exist; and types of research that contribute to or apply that knowledge to the specialization.

**Department Core**

**Professional socialization seminar**
- Taken fall term of first year

**OLPD 8011 - Doctoral Research Seminar I (1.0 cr)**

**Dept Research Courses**

- **OLPD 8015 - Research Design and Educational Policy (3.0 cr)**
- 3 credit quantitative foundations course (in or outside of department) in consultation with adviser
- 3 credit qualitative foundations course (in or outside of department) in consultation with adviser
- 6 credits of additional methods courses in consultation with adviser

**Additional Research Courses**

In addition to the research/methodology courses mentioned in the department core the following are required for students in the HRD track.

- 3 credit statistics course selected in consultation with adviser
- 5 credits of a capstone year-long research course selected in consultation with adviser

**Specialization**

- One 8000 level theory seminar (3 cr)
- 2 or 3 8xxx level Special Topics seminars offered by various HRD faculty (2-3 credits each for a total of 6 cr)

**Skills and Special Topics Electives**

- 15 credits of electives in consultation with one's adviser
Twin Cities Campus
Parent Education Postbaccalaureate Certificate
Family Social Science
College of Education and Human Development

Link to a list of faculty for this program.

Contact Information:
Department of Family Social Science, 290 McNeal Hall, 1985 Buford Avenue, St Paul MN 55108 (612-625-3116; fax: 612-625-4227)
Email: famed@umn.edu
Website: http://www.cehd.umn.edu/fsos/

• Program Type: Post-baccalaureate credit certificate/licensure/endorsement
• Requirements for this program are current for Fall 2014
• Length of program in credits: 16
• This program requires summer semesters for timely completion.
• Degree: Parent Education PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The parent education certificate program is designed to prepare professionals to plan, coordinate, and teach parent education programs and services for families with children from early childhood through adolescence.

The 16-credit program prepares professionals who are well qualified to deliver programs designed to address the intellectual, emotional, cultural, social, and physical needs of parents and children. In addition to educational settings that may include public-school parent education programs, preschools, child care centers, and Head Start programs, parent educators may also work in health care and social-service agencies and institutions, and faith-based settings.

Certificate courses are offered online. Online coursework is designed to meet the needs of local and distance learners in Minnesota, around the country and the world.

Students participate in live online chat sessions and weekly reflections with their course instructors. They interview parents, read the latest research, and view presentations by University of Minnesota faculty and noted experts in the field.

The capstone course (FSOS 5949 - Student Teaching in Parent Education) allows students to teach and interact with parents in a parent education setting under the supervision of a licensed or highly qualified parent educator approved by core faculty. This individualized student teaching allows each program participant to integrate and apply what they have learned to parent education experiences, preparing them for professional work in the field.

Program Delivery
This program is available:
• completely online (all program coursework can be completed online)

Prerequisites for Admission
Special Application Requirements:
Complete the equivalent of six semester undergraduate or graduate credits in child development courses before entering the parent education certificate program, completed within 10 years of admission to the certificate program. If these credits have not been completed at the time of application, the applicant may be admitted conditionally until they are completed and recorded on a transcript. The following CEHD courses are examples of child development courses that may meet this requirement:

CPSY 4302 - Infant Development
CPSY 4331 - Social and Personality Development
CPSY 4343 - Cognitive Development

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

**Required Courses**

Note: FSOS 5943 through FSOS 5949 must be taken in the sequence listed. FSOS 5932, FSOS 5937, and FSOS 5942 can be taken in any sequence.

- **FSOS 5932** - Introduction to Parent Education (1.0 cr)
- **FSOS 5937** - Parent-Child Interaction (3.0 cr)
- **FSOS 5942** - Everyday Experiences of Families (2.0 cr)
- **FSOS 5943** - Parent Learning and Development: Implications for Parent Education (2.0 cr)
- **FSOS 5944** - Parent Education Curriculum (2.0 cr)
- **FSOS 5945** - Teaching and Learning in Parent Education (2.0 cr)
- **FSOS 5946** - Assessment and Evaluation in Parent Education (2.0 cr)
- **FSOS 5949** - Student Teaching in Parent Education (2.0 cr)

Email: licensure@umn.edu
Website: http://www.cehd.umn.edu/olpd/grad-programs/Adm-Licensure/default.html

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 22 to 25
- This program requires summer semesters for timely completion.
- Degree: PK-12 Administration PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Housed within the University of Minnesota’s Department of Organizational Leadership, Policy, and Development (OLPD), the PK-12 Administration certificate offers aspiring educational administrators an individualized program to prepare them for the following licenses:
- K-12 principal
- Superintendent
- Director of special education
- Director of community education

The PK-12 Administration certificate program offers a variety of courses specifically designed to address the competencies required by the state for the various licenses.

Accreditation
This program is accredited by Minnesota Board of School Administrators and the NCATE.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applications are reviewed on a rolling basis.

Please visit http://www.cehd.umn.edu/olpd/grad-programs/Adm-Licensure/apply.html for information about application process and related fees.

Applications to the doctoral and licensure programs are separate processes. Only three-credit licensure courses that have been approved by the candidate’s adviser may be counted toward an Ed.D. or Ph.D. If you are considering doing both the certificate and a doctoral program, contact our program office.

Please note: This program is not offered full-time and therefore is not intended for international students needing a visa to study in the United States.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  - IELTS
    - Total Score: 6.5
  - MELAB
    - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

Further requirements: K-12 principal, superintendent, and director of special education
- Possess or complete three years of teaching experience
- 60 credits beyond a bachelor's degree to include a graduate degree
- 320 hours of field experience

Further requirements: director of community education
- A bachelor's degree plus 24 credits
- 320 hours of field experience

Exit requirements
An electronic portfolio presented to a review panel made up of representatives from the University and licensed practitioners is required as the last step to earning licensure.

**Required for All Licenses**

Note: OLPD 5391 is not required for the director of special education license. OLPD 5387 and 5391 are not required for the director of community education license.

- **OLPD 5324** - Strategic Financial Planning and Policy for Educational Leaders (3.0 cr)
- **OLPD 5344** - School Law (3.0 cr)
- **OLPD 5348** - Leaders of Human Resources Administration (3.0 cr)
- **OLPD 5385** - Licensure Seminar: Program Policies and Inclusionary Leadership (1.0 cr)
- **OLPD 5386** - Leadership Portfolio Seminar (1.0 cr)
- **OLPD 5387** - Leadership for Teaching and Learning (3.0 cr)
- **OLPD 5391** - Special Education Law for Leaders (1.0 cr)
- **OLPD 5396** - Field Experience in PK-12 Administration: Authentic Practice in Leadership (3.0 cr)

**Licensure-Specific Course Requirements**

**K-12 principal**

- **OLPD 5321** - The Principal as Leader of High-Performing Schools (3.0 cr)
- **OLPD 5388** - Leadership for Master(ful) Scheduling (2.0 cr)
  - OR-

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 13
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Prevention science is defined for the purposes of this program as the scientific study of systematic efforts to reduce the incidence of unhealthy or maladaptive behavior, and to promote health and adaptive behavior in populations across the life span through designing and evaluating interventions, and utilizing knowledge about them more strategically.

The fundamental assumption of this free-standing minor is that future researchers and scholars will be most able to meet the challenges and changes occurring in society and in their chosen professions and disciplines if their training is comprehensive and transdisciplinary.

Prevention science is a rapidly expanding interdisciplinary field and this program will increase opportunities for the University's academic researchers to partner with communities to address the complex issues facing society.

Six areas of concentration will be offered. Students will be expected to select one as a major emphasis. Areas of concentration are: 1) promotion of mental health and well being across the life span; 2) interventions in education, health, and social services; 3) social policy; 4) family and community studies (early stage research, needs assessments, action research); 5) methodology; 6) individualized concentration.

For more information about these areas of concentration, visit www.cehd.umn.edu/icd/PrevSci/concentrations.html.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students must have gained admission to a master's or doctoral degree-granting program, and have prepared a minor program of coursework approved by the director of graduate studies in prevention science. Students are required to make formal application to the program. Doctoral students must apply prior to submitting their graduate degree plan for approval. Instructions and forms can be found at www.cehd.umn.edu/icd/PrevSci/admission.html

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.
The master's and doctoral minors are developed in consultation with, and should be approved in advance by, the director of graduate studies for prevention science.

The purpose of the minor is to provide students with interdisciplinary training in prevention science; therefore, all students will be required to fulfill the elective requirements for the minor by taking courses outside their major. Courses counting toward a student's major may not be counted toward the minor.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Master's
Required Courses
PREV 8001 - Prevention Science Core (3.0 cr)
Students should choose 6 additional credits of elective courses primarily from the student's area of concentration in consultation with the director of graduate studies.

Doctoral
Required Courses
PREV 8001 - Prevention Science Core (3.0 cr)
PREV 8005 - Prevention Science Capstone Course (1.0 cr)
Students should choose 9 additional credits of elective courses primarily from the student's area of concentration in consultation with the director of graduate studies.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12 to 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate in professional development is designed to prepare leaders in designing, implementing, and evaluating learning opportunities for preK-12 educators and related staff.

This 12- to 15-credit graduate-level program offers professional development opportunities for teachers, administrators, and others involved in school improvement initiatives. Throughout the program, students are required to reflect on their learning, make explicit connections between theory and practice, and design staff development processes and materials for use in their own work contexts.

Through the program, participants will:
- Learn to apply research-based standards for staff development
- Be prepared for the multifaceted roles and competencies of staff developers
- Identify organizational and leadership capacities for effective staff development policies and practices
- Be able to articulate effective staff learning principles, designs, and strategies
- Evaluate staff development, including its effects on students, staff, and systems
- Learn to work effectively with groups, including both facilitation and training models of learning
- Identify and access staff development resources, including current research and best practices literature
- Gain awareness of individual strengths and areas for continuous improvement as a professional educator and leader of staff learning.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Special Application Requirements:
Admission to the professional development certificate is open to both degree-seeking or non-degree seeking students. Students may pursue the certificate alone or concurrently with a UM masters or doctoral degree. Applicants must have at least three years of experience working as education or related professionals in preK-12 education. Please note that this program is not offered full-time and therefore is not intended for international students needing a visa to study in the United States. Admission for this program is done on a rolling basis.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.
Required Courses

OLPD 5364 - Context and Practice of Educational Leadership (3.0 cr)
OLPD 5374 - Leadership for Professional Development (4.0 cr)
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)

Additional Coursework

With certificate program faculty approval, students choose and complete 2-5 credits of coursework focusing on a topic that interests them. Students can complete this requirement in one of two ways.

Take 2 - 5 credit(s) from the following:

• OLPD 5095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
  or focused elective coursework chosen with program faculty approval.
Twin Cities Campus
Program Evaluation Minor

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Program evaluation is an area of inquiry that uses both quantitative and qualitative methods to address questions of concern to policy makers, administrators, managers, and, in some cases, program participants. In this era of competing developments--increased accountability and the democratization of research activity--knowledge of program evaluation is a useful and valuable commodity. The program evaluation minor is an interdisciplinary effort providing intensive study of the techniques and process of evaluation and policy research, in addition to the social and political context within which program evaluation occurs. The graduate minor in program evaluation offers a coordinated set of courses designed for students who wish to have the knowledge and skills necessary to conduct evaluations combined with their graduate majors or professional fields of study. Courses include readings, discussions, and assignments designed to develop the skills essential to professionals intending to use or conduct evaluation in non-profit and for-profit organizations.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Prior admission into an established master's or doctoral program is required. Admission to the minor, therefore, will be contingent upon enrollment in good standing within a recognized University degree-granting program.

Special Application Requirements:
Students apply for admission through the minor's director of graduate studies and faculty. Students must demonstrate relevant academic background, including research methodology, and experience in a field in which program evaluation is practiced (e.g., public health, social work, and education). Students from existing evaluation programs in OLPD and educational psychology are not eligible for the minor.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Students need a minimum of 15 credits for the doctoral minor and a minimum of 9 credits for the master's minor. Individual programs are designed through consultation by the student, the major adviser, and the director of graduate studies of the program evaluation minor.
Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Master's
Minor requirements
The program for an individual student will be developed by the student, the major adviser, and the director of graduate studies (DGS) of the program evaluation minor. With permission of the program evaluation minor DGS, students with sufficient background and previous course experience equivalent to one or more courses within the curriculum may apply for waiver of appropriate requirements and replace waived courses with additional electives to meet the 9 credit minimum.

OLPD 8596 - Evaluation Internship (1.0 - 9.0 cr)
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
  or An alternative course approved by program evaluation steering committee.
OLPD 5502 - Theory and Models of Evaluation (3.0 cr)
  or OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

Doctoral
Minor Requirements
The program for an individual student will be developed in consultation among the student, the major adviser, and the director of graduate studies (DGS) of the program evaluation minor. With the permission from the program evaluation minor DGS, students with sufficient background and previous course experience equivalent to one or more courses within the curriculum may apply for waiver of appropriate requirements and replace waived courses with additional electives to meet the 15 credit minimum.

OLPD 5521 - Cost and Economic Analysis in Educational Evaluation (3.0 cr)
OLPD 8502 - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)
OLPD 8596 - Evaluation Internship (1.0 - 9.0 cr)
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
  or An alternative course approved by program evaluation steering committee.

Additional coursework
Additional coursework must be taken in courses selected in conjunction with, and approved by, the minor adviser.

- Requirements for this program are current for Fall 2014
- Length of program in credits: 12 to 13
- This program does not require summer semesters for timely completion.
- Degree: Program Evaluation Postbaccalaureate Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program evaluation certificate program offers intensive study of applied methods of evaluating programs and services in school, health, government, nonprofit agencies and market research settings. This interdisciplinary program surveys program evaluation techniques and processes, and examines the social and political contexts of the studies. The program allows working professionals from a variety of disciplines to formalize their training in program evaluation by earning a certificate in this area. Demand for trained professionals in program evaluation has increased steadily to meet the reporting needs of funding agencies, policy makers, and program managers in the public and private sectors. Graduates of evaluation studies programs have found employment in county government, social service agencies, state departments, and research consulting firms and businesses.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A completed graduate-level degree, master of education (M.Ed.) or master of arts (M.A.), in an appropriate content area, including education, social work, public health, or public policy.

Other requirements to be completed before admission:
Students must demonstrate relevant academic background, including research methodology and experience in a field in which program evaluation is practiced (e.g., public health, social work, or education). Admission will be based on an assessment of the applicant’s advanced knowledge and level of professional experience in the field of program evaluation. Applications are reviewed on a rolling basis.

Special Application Requirements:
Enrollment in the certificate program will be limited to a maximum of 10 students per calendar year.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Certificate coursework completed with undergraduate student status cannot be applied to graduate-level degree programs.

Required Coursework
8-9 credits required. The following courses (or equivalents approved by the program coordinator of evaluation studies) are required
## Foundations of evaluation
Take 1 or more course(s) from the following:

- **OLPD 5501** - Principles and Methods of Evaluation (3.0 cr)
- **PA 5311** - Program Evaluation (3.0 cr)
- **PUBH 6852** - Program Evaluation in Health and Mental Health Settings (2.0 cr)
- **SW 8603** - Program Evaluation (2.0 cr)

## Evaluation theory
**OLPD 8502** - Program Evaluation Theory and Models: Qualitative and Quantitative Alternatives (3.0 cr)

## Internship in evaluation
**OLPD 8596** - Evaluation Internship (1.0 - 9.0 cr)

### Elective Coursework
Students may choose 3-4 credits of elective coursework from the following list to meet the overall program minimum of 12 credits). Additional courses may be approved by the program coordinator of evaluation studies.

Take 3 or more credit(s) from the following:

- **CI 8115** - Curriculum and Achievement Outcomes in a Diverse Society (3.0 cr)
- **CI 8148** - Conducting Qualitative Studies in Educational Contexts (3.0 cr)
- **CI 8914** - Critical Science Research (3.0 cr)
- **OLPD 5056** - Case Studies for Policy Research (3.0 cr)
- **OLPD 5061** - Ethnographic Research Methods (3.0 cr)
- **OLPD 5841** *(inactive)* (3.0 cr)
- **OLPD 5524** - Evaluation Colloquium (1.0 cr)
- **OLPD 8595** - Evaluation Problems (1.0 - 6.0 cr)
- **EPSY 5221** - Principles of Educational and Psychological Measurement (3.0 cr)
- **EPSY 5244** - Survey Design, Sampling, and Implementation (3.0 cr)
- **FSOS 8013** - Qualitative Family Research Methods (3.0 cr)
- **PUBH 6724** - The Health Care System and Public Health (3.0 cr)
- **SW 8602** - Direct Practice Evaluation (2.0 cr)

• Program Type: Master's
• Requirements for this program are current for Fall 2014
• Length of program in credits: 34 to 53
• This program does not require summer semesters for timely completion.
• Degree: Master of Social Work

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.S.W. prepares students for advanced social work practice. A 53-credit program and a 34-credit advanced standing program are available. The curriculum offers concentrations in Clinical Mental Health, Families and Children, Health, Disabilities and Aging or Community Practice.

Accreditation
This program is accredited by Council on Social Work Education.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

An undergraduate degree in a related discipline is not required, however, students with a bachelor's degree in social work from an accredited program are eligible for advanced standing.

Other requirements to be completed before admission:
A foundation in the liberal arts and one year of work experience in human services is preferred. Work experience may include paid, volunteer, and intern positions.

Special Application Requirements:
In order to apply, applicants are required to submit a specified personal statement, writing sample, resume, transcripts, and three letters of recommendation. All application instructions are posted on the School of Social Work website.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan C:** Plan C requires 34 to 53 major credits and up to null credits outside the major. The is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The M.S.W. requires 53 credits; a 34-credit advanced standing program is available to graduates of undergraduate social work programs accredited by the Council on Social Work Education. All credits for the M.S.W. can be completed in two years of full-time study, or three years to four years of part-time study, and must be completed within five years of the date of the earliest coursework taken for the degree.

The 53-credit program includes a set of required foundation courses (19 cr), courses from a selected concentration, two field internships, and social work electives.

A maximum of 26 credits may be transferred from the following sources with School of Social Work approval: up to 8 credits as a non-degree-seeking student registered for social work graduate credit at the University of Minnesota; up to 26 credits from another regionally and professionally accredited school of social work if the student was registered as a graduate student in the program.

The 34-credit advanced standing program includes courses from a selected concentration, one field internship, and social work electives. A maximum of 16 credits may be transferred from the following sources with School of Social Work approval: 16 credits completed as a graduate student in another accredited M.S.W. program; up to 6 credits as a non-degree-seeking student registered for social work graduate credit at the University of Minnesota.

Foundations Curriculum- Full Program (53 credit) Students

The 19-credit foundation curriculum is required for full program (53 credit) students. The foundation curriculum is waived for advanced standing students, unless required in a student's conditions of admission. Advanced standing students who receive a grade of B- or less in a BSW class that is comparable to one of our foundation classes may be asked to repeat that content in our MSW program. Students should take 5051 for 2 cr; 5101 for 3 cr; 8010 for 3 cr in fall; 3 cr in spring or 6 cr in summer.

Take exactly 19 credit(s) from the following:

- SW 5051 - Human Behavior and the Social Environment (2.0 - 3.0 cr)
- SW 5101 - Historical Origins and Contemporary Policies and Programs in Social Welfare (3.0 - 4.0 cr)
- SW 8151 - Social Work Methods: Practice With Individuals and Systems (2.0 cr)
- SW 8152 - Social Work Practice Methods: Families and Groups (2.0 cr)
- SW 8153 - Models of Community Intervention (1.0 cr)
- SW 8154 - Organizations and Policy Advocacy (1.0 cr)
- SW 8841 - Social Work Research Methods (2.0 cr)
- SW 8010 - Seminar: Field Practicum I (1.0 - 8.0 cr)

Concentrations

Clinical Mental Health Concentration

Prepares students for advanced clinical social work practice with children, adults and families across diverse settings and populations. Students learn contextually based approaches to mental health diagnostic assessment, treatment and practice evaluation, with a strong focus on client systems experiencing significant mental health risk. In addition to the following requirements, students must complete 5 cr of electives at a minimum of 5-000 level.

**Anchor and Boost**

- SW 8451 - Assessment and Engagement in Clinical Social Work Practice (3.0 cr)
- SW 8452 - Core Concepts in Clinical Social Work Practice (3.0 cr)

**Concentration Electives**

Students must take two courses/6 cr of concentration electives.

- SW 8352 - Advanced Practice II: Families and Children (3.0 cr)
- SW 8461 - Advanced Clinical Social Work Practice with Adults (3.0 cr)
or SW 8462 - Advanced Clinical Practice With Children and Adolescents (3.0 cr)
or SW 8463 - Social Work Practice With Severe and Persistent Mental Illness and Severe Emotional Disturbance (3.0 cr)

**Diversity**

SW 8821 - Social Work and Difference, Diversity and Privilege (2.0 cr)

**Field Practicum and Advanced Evaluation**

SW 8020, Field Practicum II (6 cr) and SW 8842, Advanced Social Work Evaluation (3 cr) must be taken concurrently. SW 8842 must be taken for a total of 3 cr. The credits are split between fall and spring semesters. If a student registers for 2 cr in the fall, they must register for 1 cr in the spring and vice versa. Students taking 8842 in the summer register for 3 cr.

Advanced Standing students will take SW 8030 concurrently with SW 8842.

**SW 8020 - Field Practicum II (1.0 - 6.0 cr)**

**with SW 8842 - Advanced Social Work Evaluation (1.0 - 3.0 cr)**

**Advanced Policy**

SW 8806 - Health and Mental Health Policy (3.0 cr)
or SW 8807 - International and Comparative Social Welfare Policy (3.0 cr)

**2nd Focus Anchor**

Students must choose one course.

SW 8251 - Social Work Practice in Health, Disabilities, and Aging (3.0 cr)
or SW 8351 - Advanced Practice I: Families and Children (3.0 cr)
or SW 8551 - Advanced Community Practice: Assessment, Organizing, and Advocacy (3.0 cr)

-OR-

**Community Practice Concentration**

Concentration prepares students to improve the effectiveness and responsiveness of human service systems to mobilize groups for social change, and to serve as catalysts for sustainable development and social justice. Students are prepared to fill a variety of community practice roles—leaders, planners, policy advocates, community organizers, mediators, evaluators, and agency administrators in a range of settings. In addition to the following requirements, students must complete 5 cr of electives.

**Anchor and Boost**

SW 8551 - Advanced Community Practice: Assessment, Organizing, and Advocacy (3.0 cr)

**SW 8552 - Advanced Community Practice: Leadership, Planning, and Program Development (3.0 cr)**

**Concentration Electives**

Students must take two courses/6 cr of concentration electives.

SW 5562 - Global Social Work and Social Development (3.0 cr)
or SW 8561 - Human Resources Management in Human Services Agencies (3.0 cr)
or SW 8563 - Advanced Policy Advocacy (3.0 cr)

**Diversity**

SW 8821 - Social Work and Difference, Diversity and Privilege (2.0 cr)

**Field Practicum and Advanced Evaluation**

SW 8020, Field Practicum II (6 cr) and SW 8842, Advanced Social Work Evaluation (3 cr) must be taken concurrently. SW 8842 must be taken for a total of 3 cr. The credits are split between fall and spring semesters. If a student registers for 2 cr in the fall, they must register for 1 cr in the spring and vice versa. Students taking 8842 in the summer register for 3 cr.

Advanced Standing students will take SW 8030 concurrently with SW 8842.

**SW 8020 - Field Practicum II (1.0 - 6.0 cr)**

**with SW 8842 - Advanced Social Work Evaluation (1.0 - 3.0 cr)**

**Advanced Policy**

SW 8804 - Child Welfare Policy (3.0 cr)
or SW 8805 - Aging and Disability Policy (3.0 cr)
or SW 8806 - Health and Mental Health Policy (3.0 cr)
or SW 8807 - International and Comparative Social Welfare Policy (3.0 cr)

**2nd Focus Anchor**

SW 8251 - Social Work Practice in Health, Disabilities, and Aging (3.0 cr)
or SW 8351 - Advanced Practice I: Families and Children (3.0 cr)
or SW 8451 - Assessment and Engagement in Clinical Social Work Practice (3.0 cr)

-OR-

**Families and Children Concentration**

Prepares students to work with families and children in a range of settings and organizations, as well as influence relevant organizational structures and policies. Students will be able to identify protective supports and develop interventions that mediate risk and promote resilience. In addition to the following requirements, students must complete 5 cr of electives at a minimum of 5-000 level.

**Anchor and Boost**

SW 8351 - Advanced Practice I: Families and Children (3.0 cr)

**SW 8352 - Advanced Practice II: Families and Children (3.0 cr)**

**Concentration Electives**

Students must take two courses/6 cr of concentration electives.
SW 8361 - Identification and Assessment of Family Violence (3.0 cr)
or SW 8363 - Social Work in Child Welfare (3.0 cr)
or SW 8462 - Advanced Clinical Practice With Children and Adolescents (3.0 cr)

Diversity
SW 8821 - Social Work and Difference, Diversity and Privilege (2.0 cr)

Field Practicum and Advanced Evaluation
SW 8020, Field Practicum II (6 cr) and SW 8842, Advanced Social Work Evaluation (3 cr) must be taken concurrently. SW 8842 must be taken for a total of 3 cr. The credits are split between fall and spring semesters. If a student registers for 2 cr in the fall, they must register for 1 cr in the spring and vice versa. Students taking 8842 in the summer register for 3 cr.

Advanced Standing students will take SW 8030 concurrently with SW 8842.
SW 8020 - Field Practicum II (1.0 - 6.0 cr)
with SW 8842 - Advanced Social Work Evaluation (1.0 - 3.0 cr)

Advanced Policy
SW 8804 - Child Welfare Policy (3.0 cr)
or SW 8805 - Aging and Disability Policy (3.0 cr)
or SW 8806 - Health and Mental Health Policy (3.0 cr)
or SW 8807 - International and Comparative Social Welfare Policy (3.0 cr)

2nd Focus Anchor
SW 8251 - Social Work Practice in Health, Disabilities, and Aging (3.0 cr)
or SW 8451 - Assessment and Engagement in Clinical Social Work Practice (3.0 cr)
or SW 8551 - Advanced Community Practice: Assessment, Organizing, and Advocacy (3.0 cr)

-OR-

Health, Disability and Aging Concentration
Prepares students to work with people affected by distince and interconnected issues related to health, disability and aging. Students are prepared to work in a variety of settings such as hospitals, primary care clinics, residential care facilities, hospice, community-based programs, and in policy and advocacy organizations. In addition to the following requirements, students must complete 5 cr of electives at a minimum of 5-000 level.

Anchor and Boost
SW 8251 - Social Work Practice in Health, Disabilities, and Aging (3.0 cr)
SW 8252 - Advanced Interventions and Issues in Health, Disabilities, and Aging (HDA) (3.0 cr)

Concentration Electives
Students must take two courses/6 cr of concentration electives.
SW 8261 - Advanced Social Work Practice in Health Care (3.0 cr)
or SW 8262 - Empowerment Practice With Persons With Disabilities (3.0 cr)
or SW 8263 - Advanced Direct Practice and Community-Based Interventions in Gerontology (3.0 cr)

Diversity
SW 8821 - Social Work and Difference, Diversity and Privilege (2.0 cr)

Field Practicum and Advanced Evaluation
SW 8020, Field Practicum II (6 cr) and SW 8842, Advanced Social Work Evaluation (3 cr) must be taken concurrently. SW 8842 must be taken for a total of 3 cr. The credits are split between fall and spring semesters. If a student registers for 2 cr in the fall, they must register for 1 cr in the spring and vice versa. Students taking 8842 in the summer register for 3 cr.

Advanced Standing students will take SW 8030 concurrently with SW 8842.
SW 8020 - Field Practicum II (1.0 - 6.0 cr)
with SW 8842 - Advanced Social Work Evaluation (1.0 - 3.0 cr)

Advanced Policy
SW 8805 - Aging and Disability Policy (3.0 cr)
or SW 8806 - Health and Mental Health Policy (3.0 cr)

2nd Focus Anchor
SW 8351 - Advanced Practice I: Families and Children (3.0 cr)
or SW 8451 - Assessment and Engagement in Clinical Social Work Practice (3.0 cr)
or SW 8551 - Advanced Community Practice: Assessment, Organizing, and Advocacy (3.0 cr)

Joint- or Dual-degree Coursework: MSW/MPH, MSW/MPP, and MSW/MURP
Student may take a total of 22 credits in common among the academic programs.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 64
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Ph.D. program in social work prepares students to provide intellectual leadership for the social work profession through advanced levels of scholarship, research, theory development, and policy analysis. Students are expected to acquire skill in research design and statistics and to develop a comprehensive knowledge of social work and social welfare history, theory, and policy.

The Ph.D. program does not focus on the development of advanced skills for clinical practice. However, students gain knowledge of practice theory and research related to social work practice. Many graduates assume positions as university faculty. Consequently, the program offers opportunities for students to acquire skills in teaching and curriculum development.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A master's degree is required.

Special Application Requirements:
Priority application deadline is Friday, January 2, 2015. Final deadline is Friday, March 6, 2015. Applications received by second deadline will be reviewed and applicants accepted on a space-available basis.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
28 to 32 credits are required in the major.
8 to 12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The Ph.D. program emphasizes mastery of student and program determined objectives rather than an accumulation of course credits. Degree requirements vary according to the student's background and educational goals. A minimum of 40 credits plus 24 required thesis credits beyond the M.S.W. are required. Required courses include core seminars in social work research, social welfare history, social welfare policy, and theory and model development; a teaching course; a supervised research practicum and practicum seminar (two-semester sequence); supporting program courses (12 credits of supporting program course work is required - eight credits must be taken outside of social work while four credits may be taken in social work); statistics courses (most students take EPSY 8261 and EPSY 8262 but other sequences may be approved by the PhD Committee). Students must also have teaching experience in the School of Social Work while in the program. Students are expected to attend PhD Colloquia and Research Colloquia for at least the first two years of their participation in the program.

Required Courses
SW 8875, Research Practicum, must be taken two semesters for a total of four credits.
SW 8871 - Social Work Research Seminar I (3.0 cr)
SW 8872 - Social Work Research Seminar II (3.0 cr)
SW 8875 - Research Practicum (2.0 cr)
SW 8861 - Theory and Model Development in Social Work (3.0 cr)
SW 8855 - Social Policy Formulation and Analysis (3.0 cr)
SW 8851 - Social Welfare History and Historical Research Methods (3.0 cr)
GRAD 8101 - Teaching in Higher Education (3.0 cr)
EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)
EPSY 8262 - Statistical Methods II: Regression and the General Linear Model (3.0 cr)

Other sequence of statistics courses may be approved by the PHD Committee.

Supporting Program Coursework
Students must take 12 credits of supporting course work in consultation with their adviser. Eight credits must be taken outside of social work while four credits may be taken in social work.

- Program Type: Graduate free-standing minor  
- Requirements for this program are current for Fall 2014  
- Length of program in credits (Masters): 9  
- Length of program in credits (Doctorate): 12  
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Sociocultural Studies in Education (SCSE) Minor (previously known as the Social and Philosophic Studies of Education Minor) provides a multidisciplinary foundation for the study of social and cultural phenomena that shape educational ideologies and practices. The Minor enables students to take courses from a variety of social science, humanities, and interdisciplinary fields in order to generate a particular perspective, lens, or optic that can illuminate problems or processes of interest to them.

The SCSE Minor program is shaped to suit the particular needs and interests of the student at either the master's or doctoral level. Courses at either the 5xxx or 8xxx level are selected in consultation with an SCSE faculty member and approved by the SCSE DGS. Courses are generally of two types: those that explicitly draw upon a disciplinary or interdisciplinary perspective to examine educational processes (e.g. Economics of Education); and those that provide an in-depth exploration of a disciplinary or interdisciplinary perspective itself (e.g. Contemporary Political Thought).

**Program Delivery**

This program is available:  
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

Other requirements to be completed before admission:  
Admission to the SCSE Minor is contingent upon prior admission to a University of Minnesota master's or doctoral degree-granting program. Interested students should consult with a SCSE faculty member to develop a proposed course of study, complete the SCSE application form, and submit it to the SCSE DGS. The SCSE DGS reviews applications in consultation with SCSE faculty and notifies applicants of their admission. Students who are admitted into the minor program are required to enlist a member of the SCSE faculty on their master's or doctoral committee. Students may apply to this minor year round.

**Special Application Requirements:**  
The director of graduate studies (DGS) of the SCSE minor must approve the applicant's proposed course of study by signing the student's degree program form in addition to the student's major DGS.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

**Master's or Doctoral**

**Masters Degree Students**
Master's students complete at least 9 graduate credits from the list of approved courses below. These must include a minimum of 3 OLPD course credits and 3 credits from courses outside of OLPD (these courses may be within CEHD). Additional courses may be approved by SCSE faculty in consultation with the SCSE minor DGS.

**OLPD Courses**
Must take at least 3 cr from the list below
Take 1 - 2 course(s) from the following:
- OLPD 5041 - Sociology of Education (3.0 cr)
- OLPD 5044 - Introduction to the Economics of Education (3.0 cr)
- OLPD 5103 - Comparative Education (3.0 cr)
- OLPD 5107 - Gender, Education, and International Development (3.0 cr)
- OLPD 5323 - Women in Leadership (3.0 cr)
- OLPD 5128 - Anthropology of Education (3.0 cr)
- OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
- OLPD 5346 - Politics of Education (3.0 cr)
- OLPD 5721 - Race and Ethnicity in Higher Education (3.0 cr)
- OLPD 8022 - Education and Globalization: Anthropological Perspectives (3.0 cr)
- OLPD 8103 - Comparative Education (3.0 cr)

**Non-OLPD Courses**
Must take at least 3 cr from the list below
Take 1 - 2 course(s) from the following:
- CI 5136 - History of the American Curriculum (3.0 cr)
- CI 5137 - Multicultural Gender-Fair Curriculum (3.0 cr)
- CI 5156 - Popular Culture, Teaching, and Learning (3.0 cr)
- CI 5641 - Language, Culture, and Education (3.0 cr)
- CI 8111 - Representations of Knowledge in Curriculum and Culture (1.0 - 3.0 cr)
- CI 8461 - Sociocultural Theory, Education, and Literacy (3.0 cr)
- EPSY 5157 - Social Psychology of Education (3.0 cr)
- CPSY 5251 - Social and Philosophical Foundations of Early Childhood Education (2.0 cr)
- KIN 5371 - Sport and Society (3.0 cr)
- SW 5101 - Historical Origins and Contemporary Policies and Programs in Social Welfare (3.0 - 4.0 cr)
- SW 5802 - Social Welfare History (1.0 cr)
- AFRO 5103 - World History and Africa (3.0 cr)
- AFRO 5120 - Social and Intellectual Movements in the African Diaspora (3.0 cr)
- AFRO 5551 - Methods: Use of Oral Traditions as Resources for History (3.0 cr)
- AFRO 8554 - Seminar: Gender, Race, Nation, and Policy--Perspectives from Within the African Diaspora (3.0 cr)
- AMIN 5890 - Problems in American Indian History (3.0 cr)
- AMDP 8288 - Working in the Global Economy: Readings (3.0 cr)
- ANTH 5033 - Feminist Anthropology (3.0 cr)
- ANTH 8001 - Ethnography, Theory, History (3.0 cr)
- ANTH 8002 - Ethnography: Contemporary Theory and Practice (3.0 cr)
- ANTH 8207 - Political and Social Anthropology (3.0 cr)
- ANTH 8215 - Anthropology of Gender (3.0 cr)
- COMM 5404 - Language and Culture (3.0 cr)
- COMM 5451W - Intercultural Communication Processes [WI] (3.0 cr)
- CSDS 8001 - Basic Research Seminar: Comparative Studies in Discourse and Society I (3.0 cr)
- CSDS 8002 - Basic Research Seminar in Comparative Studies in Discourse and Society II (3.0 cr)
- CSDS 8910 - Advanced Topics in Comparative Studies in Discourse and Society (3.0 cr)
- CSDS 8920 - Advanced Topics in Comparative Studies in Discourse and Society (3.0 cr)
- CL 8362 - Modernity and Its Others (4.0 cr)
- CSCL 5555 - Introduction to Semiotics (3.0 cr)
- CSCL 5833 - Marx, Freud, Nietzsche: Intellectual Foundations (3.0 cr)
- DSSC 8111 - Approaches to Knowledge and Truth: Ways of Knowing in Development Studies and Social Change (2.0 cr)
- DSSC 8310 - Topics in Development Studies and Social Change (1.0 cr)
- GWSS 5102 - Feminist Approaches to History (3.0 cr)
- GWSS 5103 - Feminist Pedagogies (3.0 cr)
- GWSS 5190 - Topics: Theory, Knowledge, and Power (3.0 cr)
- GWSS 8101 - Intellectual History of Feminism (3.0 cr)
- GWSS 8103 - Feminist Theories of Knowledge (3.0 cr)
- GWSS 8107 - Feminist Pedagogies (3.0 cr)
- GWSS 8109 - Feminist Knowledge Production (3.0 cr)
- GWSS 8201 - Feminist Theory and Methods in the Social Sciences (3.0 cr)

• POL 8275 - Contemporary Political Thought (3.0 cr)
• SOC 8211 - Race Relations Theory (3.0 cr)
• SOC 8731 - Sociology of Knowledge (3.0 cr)
• SOC 8735 - Sociology of Culture (3.0 cr)
• PA 5001 - Intellectual Foundations of Public Action (1.5 cr)
• PA 5414 - Child Human Rights: Work and Education (3.0 cr)

-OR-

Doctoral Students
Doctoral students complete at least 12 graduate credits from the list of approved courses below. These must include a minimum of 6 OLPD course credits and 3 credits from courses outside of OLPD (these courses may be within CEHD).

OLPD Courses
Must take at least 6 cr from list below
Take 2 - 3 course(s) from the following:
• OLPD 5041 - Sociology of Education (3.0 cr)
• OLPD 5044 - Introduction to the Economics of Education (3.0 cr)
• OLPD 5103 - Comparative Education (3.0 cr)
• OLPD 5107 - Gender, Education, and International Development (3.0 cr)
• OLPD 5323 - Women in Leadership (3.0 cr)
• OLPD 5128 - Anthropology of Education (3.0 cr)
• OLPD 5132 - Intercultural Education and Training: Theory and Application (3.0 cr)
• OLPD 5346 - Politics of Education (3.0 cr)
• OLPD 5721 - Race and Ethnicity in Higher Education (3.0 cr)
• OLPD 8022 - Education and Globalization: Anthropological Perspectives (3.0 cr)
• OLPD 8103 - Comparative Education (3.0 cr)

Non-OLPD Courses
Must take at least 3 cr from list below
Take 1 - 2 course(s) from the following:
• CI 5136 - History of the American Curriculum (3.0 cr)
• CI 5137 - Multicultural Gender-Fair Curriculum (3.0 cr)
• CI 5156 - Popular Culture, Teaching, and Learning (3.0 cr)
• CI 5641 - Language, Culture, and Education (3.0 cr)
• CI 8111 - Representations of Knowledge in Curriculum and Culture (1.0 - 3.0 cr)
• CI 8461 - Sociocultural Theory, Education, and Literacy (3.0 cr)
• EPSY 5157 - Social Psychology of Education (3.0 cr)
• CPSY 5251 - Social and Philosophical Foundations of Early Childhood Education (2.0 cr)
• KIN 5371 - Sport and Society (3.0 cr)
• SW 5101 - Historical Origins and Contemporary Policies and Programs in Social Welfare (3.0 - 4.0 cr)
• SW 5802 - Social Welfare History (1.0 cr)
• AFRO 5103 - World History and Africa (3.0 cr)
• AFRO 5120 - Social and Intellectual Movements in the African Diaspora (3.0 cr)
• AFRO 5551 - Methods: Use of Oral Traditions as Resources for History (3.0 cr)
• AFRO 8554 - Seminar: Gender, Race, Nation, and Policy--Perspectives from Within the African Diaspora (3.0 cr)
• AMIN 5890 - Problems in American Indian History (3.0 cr)
• AMST 8288 - Working in the Global Economy: Readings (3.0 cr)
• ANTH 5033 - Feminist Anthropology (3.0 cr)
• ANTH 8001 - Ethnography, Theory, History (3.0 cr)
• ANTH 8002 - Ethnography: Contemporary Theory and Practice (3.0 cr)
• ANTH 8207 - Political and Social Anthropology (3.0 cr)
• ANTH 8215 - Anthropology of Gender (3.0 cr)
• COMM 5404 - Language and Culture (3.0 cr)
• COMM 5451W - Intercultural Communication Processes [WI] (3.0 cr)
• CSDS 8001 - Basic Research Seminar: Comparative Studies in Discourse and Society I (3.0 cr)
• CSDS 8002 - Basic Research Seminar in Comparative Studies in Discourse and Society II (3.0 cr)
• CSDS 8010 - Advanced Topics in Comparative Studies in Discourse and Society (3.0 cr)
• CSDS 8920 - Advanced Topics in Comparative Studies in Discourse and Society (3.0 cr)
• CL 8362 - Modernity and Its Others (4.0 cr)
• CSCL 5555 - Introduction to Semiotics (3.0 cr)
• CSCL 5833 - Marx, Freud, Nietzsche: Intellectual Foundations (3.0 cr)
• DSSC 8111 - Approaches to Knowledge and Truth: Ways of Knowing in Development Studies and Social Change (2.0 cr)
• DSSC 8310 - Topics in Development Studies and Social Change (1.0 cr)
• GWSS 5102 - Feminist Approaches to History (3.0 cr)
• GWSS 5103 - Feminist Pedagogies (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 51
- This program requires summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Graduates of the University of Minnesota special education teacher licensure programs are student-centered, collaborative professionals who deliver robust, high-quality, and specialized educational services, adding value to the learning and development of infants, children, and adults with disabilities from diverse cultural backgrounds.

Program graduates are knowledgeable in the following areas:
- Engaging in collaborative problem solving with families and professionals to meet the academic, social, behavioral, and life skills needs of individuals with disabilities;
- Implementing—and supporting others' implementation of—evidence-based instruction and intervention with fidelity to improve student outcomes;
- Using reliable and valid assessment data to make individualized educational decisions;
- Systematically selecting and adapting instructional supports to meet individual needs, based on data and knowledge of individual learning, developmental, cultural differences;
- Maximizing expectations and learning opportunities for individuals with disabilities in the Least Restrictive using the full continuum of services; and
- Upholding principles of professionalism and ethics in their practice.

Accreditation
This program is accredited by NCATE/BOT, Council of Exceptional Children (CEC) and Council on Education of the Deaf (CED).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Other requirements to be completed before admission:
Experience in working with children and/or people with disabilities is preferred.

Special Application Requirements:
The application deadline is March 1 for summer or fall admission.

Upload the following additional materials into the appropriate areas of the online application:
- One to two page applicant statement outlining goals, interests, experiences, etc.
- Résumé
- Two letters of recommendation [.pdf], preferably from individuals in the education field (for the online application, applicant's will be asked to enter recommenders' information into the online application; a message will be automatically sent to those recommenders with further instructions on how to submit their letters)
- MLTE Basic Skills Tests

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
- Unofficial transcripts from all collegiate institutions attended (Students who are accepted will need to send official transcripts in a sealed envelope. University of Minnesota graduates need not submit University of Minnesota transcripts to Student Services.)
- International applicants should submit a foreign transcript evaluation from an accredited reviewer (ECS http://www.ece.org/ or WES http://www.wes.org/students/index.asp)

International applicants must submit score(s) from one of the following tests:
  • TOEFL
    - Internet Based - Total Score: 79
    - Internet Based - Writing Score: 21
    - Internet Based - Reading Score: 19
    - Paper Based - Total Score: 550
  • IELTS
    - Total Score: 6.5
  • MELAB
    - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 30 to 51 major credits and 0 credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: A portfolio and integrated paper/mini research project/comprehensive exam is required in conjunction with registration for EPSY 5690. The student and adviser will develop the individual's M.Ed. graduate plan.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

Academic Behavioral Strategist

Professional development in special education offers a program of study that leads to K-12 licensure as an Academic Behavior Strategist (ABS) and an M.Ed. degree. This degree is designed to prepare teachers to work in a variety of educational settings with students who have mild to moderate disabilities. Graduates of the program are student-centered, collaborative professionals who implement evidence-based instructional interventions with fidelity to improve learner outcomes. The program incorporates maximizing learner expectations and learning opportunities including cultural and social diversity. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with disabilities and their families.

Students complete 30-31 credits: 19 credits required courses and 11-12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses

- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
- EPSY 5613 - Foundations of Special Education I (3.0 cr)
- EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities In Reading & Written Language (3.0 cr)
- EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives

Take 11 - 12 credit(s) from the following:
- EDHD 5005 - School and Society (2.0 cr)
- EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
- EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
Autism Spectrum Disorder

Professional development in special education offers a program in Autism Spectrum Disorders (ASD) that leads to Birth-12 licensure and an M.Ed. degree. This degree is designed to prepare teachers to work in a variety of educational settings including home and school based programs with children who have been identified with ASD and their families. Graduates are prepared to assess, analyze, and provide intervention and remediation of academic, social and communicative challenges for students with ASD. This program focuses on the implementation of evidence-based practices, specialized educational services, and outcomes that add value to the learning and development of infants, children and adults with ASD from diverse cultural backgrounds.

Students complete 30-31 credits: 19 credits required courses and 11-12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses

- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
- EPSY 5613 - Foundations of Special Education I (3.0 cr)
- EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives

Take 11 - 12 credit(s) from the following:

- EDHD 5005 - School and Society (2.0 cr)
- EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
- EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
- EPSY 5611W - Research-based Practices in Academic and Behavior Disabilities [WI] (3.0 cr)
- EPSY 5619 - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities (3.0 cr)
- EPSY 5632 - Module 2: Evidence-based Methods for AAC Assessment and Intervention (2.0 cr)
- EPSY 5633 - Module 3: Speech-generating Devices and High-Tech AAC (1.0 cr)
- EPSY 5661 - Introduction to Autism Spectrum Disorder (3.0 cr)
- EPSY 5663 - Assessment and Intervention for Individuals with Autism Spectrum Disorders (3.0 cr)
- EPSY 5681 - Education of Preschool Children With Disabilities: Methods and Materials (3.0 cr)
- EPSY 5701 - Practicum: Field Experience in Special Education (2.0 cr)
- EPSY 5704 - Practicum in Middle/Secondary Settings (1.0 cr)
- EPSY 5705 - Practicum in ECSE/Elementary Settings (1.0 cr)
- EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
- EPSY 5742 - Student Teaching: Autism Spectrum Disorders (6.0 cr)
- EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

Deaf and Hard of Hearing

The professional development program in special education specializing in deaf/hard of hearing leads to Birth-12 classroom licensure and a M.Ed. degree and is designed to prepare teachers to work in a variety of educational settings.

The program philosophy focuses on cultural and social diversity and meeting the needs of individual students who are deaf or hard of hearing. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for deaf or hard of hearing students and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

Students complete 30-31 credits: 19 credits required courses and 11-12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses

- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
EPSY 5613 - Foundations of Special Education I (3.0 cr)
EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)
EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives
Take 11 - 12 credit(s) from the following:
- EDHD 5005 - School and Society (2.0 cr)
- EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
- EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
- EPSY 5611W - Research-based Practices in Academic and Behavior Disabilities [WI] (3.0 cr)
- EPSY 5619 - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities (3.0 cr)
- EPSY 5621 - Assessment and Instructional Design for Students with Developmental Disabilities (3.0 cr)
- EPSY 5622 - Programs and Curricula for Students with Developmental Disabilities (3.0 cr)
- EPSY 5624 - Biomedical and Physical Impairments of Students with Developmental Disabilities (2.0 cr)
- EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Developmental Disabilities
The professional development program in special education specializing in developmental disabilities leads to K-12 classroom licensure and a M.Ed. degree and is designed to prepare teachers to work in a variety of educational settings.

The program philosophy focuses on cultural and social diversity and meeting the needs of individual students who have developmental disabilities. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with developmental disabilities and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

Students complete 30-31 credits: 19 credits required courses and 11-12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses
EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
EPSY 5613 - Foundations of Special Education I (3.0 cr)
EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)
EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives
Take 11 - 12 credit(s) from the following:
- EDHD 5005 - School and Society (2.0 cr)
- EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
- EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
- EPSY 5611W - Research-based Practices in Academic and Behavior Disabilities [WI] (3.0 cr)
- EPSY 5619 - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities (3.0 cr)
- EPSY 5622 - Programs and Curricula for Students with Developmental Disabilities (3.0 cr)
- EPSY 5624 - Biomedical and Physical Impairments of Students with Developmental Disabilities (2.0 cr)
- EPSY 5632 - Module 2: Evidence-based Methods for AAC Assessment and Intervention (2.0 cr)
- EPSY 5633 - Module 3: Speech-generating Devices and High-Tech AAC (1.0 cr)
- EPSY 5636 - Sensory Impairments of Students With Developmental Disabilities (2.0 cr)
- EPSY 5701 - Practicum: Field Experience in Special Education (2.0 cr)
- EPSY 5705 - Practicum in ECSE/Elementary Settings (1.0 cr)
• EPSY 5706 - Practicum in Moderate to Severe Developmental Disabilities (2.0 cr)
• EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
• EPSY 5755 - Student Teaching: Developmental Disabilities, Mild/Moderate (1.0 - 6.0 cr)
• EPSY 5756 - Student Teaching: Developmental Disabilities, Moderate/Severe (1.0 - 6.0 cr)
• EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

Early Childhood Special Education

The professional development program in special education specializing in early childhood special education (ECSE) leads to teaching licensure for work with children from birth through age five as well as a M.Ed. This program is designed to prepare teachers to work in a variety of educational settings, including home and school, with children who have a variety of developmental delays and disabilities.

The ECSE program philosophy focuses on cultural and social diversity and meeting the needs of individual children who have disabilities. Further, the ECSE program emphasizes the delivery of evidence-based practices within the natural routines of families and preschools when addressing the individualized needs of children. Graduates are prepared to assess, analyze, monitor, and problem solve the developmental and educational needs of young children and their families. With that, graduates of the ECSE program are prepared to be leaders in the field for the identification early intervention needs, provision of research-based services, and facilitation of successful transitions to kindergarten.

Students complete 30-31 credits: 18 credits required courses and 12-13 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses

EPSY 5609 - Family-centered Services (2.0 cr)
EPSY 5613 - Foundations of Special Education I (3.0 cr)
EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)
EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives

Take 12 - 13 credit(s) from the following:
• CPSY 5252W - Facilitating Social and Emotional Learning in Early Childhood Education [WI] (3.0 cr)
• CPSY 5253 - Facilitating Cognitive and Language Learning in Early Childhood Education (3.0 cr)
• CPSY 5254 - Facilitating Creative and Motor Learning in Early Childhood Education (2.0 cr)
• EDHD 5005 - School and Society (2.0 cr)
• EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
• EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
• EPSY 5114 - Psychology of Student Learning (3.0 cr)
• EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
• EPSY 5619 - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities (3.0 cr)
• EPSY 5625 - Education of Infants, Toddlers, and Preschool Children with Disabilities: Introduction (2.0 cr)
• EPSY 5681 - Education of Preschool Children With Disabilities: Methods and Materials (3.0 cr)
• EPSY 5682 - Education of Infants and Toddlers with Disabilities: Methods and Materials (3.0 cr)
• EPSY 5701 - Practicum: Field Experience in Special Education (2.0 cr)
• EPSY 5704 - Practicum in Middle/Secondary Settings (1.0 cr)
• EPSY 5705 - Practicum in ECSE/Elementary Settings (1.0 cr)
• EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
• EPSY 5761 - Student Teaching in Early Childhood Special Education Settings for Children Aged Three to Five Years (3.0 cr)
• EPSY 5762 - Student Teaching in Early Childhood Special Education for Children Aged Birth to Three Years (3.0 cr)
• EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

Emotional and Behavioral Disabilities

The professional development program in special education specializing in emotional and behavioral disorders leads to K-12 classroom licensure and a M.Ed. degree and is designed to prepare teachers to work in a variety of educational settings.

The program philosophy focuses on cultural and social diversity and meeting the needs of individual students who have emotional and behavioral disorders. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with emotional and behavioral disorders and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

Students complete 30-31 credits: 19 credits required courses and 11-12 credits electives. Additional credits (25-30) are required for adding licensure to degree.
Required Courses
- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
- EPSY 5613 - Foundations of Special Education I (3.0 cr)
- EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives
Take 11 - 12 credit(s) from the following:
- EDHD 5005 - School and Society (2.0 cr)
- EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
- EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
- EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
- EPSY 5611W - Research-based Practices in Academic and Behavior Disabilities [WI] (3.0 cr)
- EPSY 5612 - Understanding of Academic Disabilities (3.0 cr)
- EPSY 5615 - Advanced Academic Interventions (3.0 cr)
- EPSY 5617 - Academic and Social Interventions for Students with Mild to Moderate Disabilities (3.0 cr)
- EPSY 5619 - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities (3.0 cr)
- EPSY 5629 - Strategic Instructional Methods for Students Academically At-Risk (3.0 cr)
- EPSY 5656 - Advanced Issues in Emotional Behavior Disorders (3.0 cr)
- EPSY 5657 - Interventions for Behavioral Problems in School Settings (3.0 cr)
- EPSY 5658 - Characteristics of Moderate to Severe Emotional/Behavioral Disorders (3.0 cr)
- EPSY 5701 - Practicum: Field Experience in Special Education (2.0 cr)
- EPSY 5704 - Practicum in Middle/Secondary Settings (1.0 cr)
- EPSY 5705 - Practicum in ECSE/Elementary Settings (1.0 cr)
- EPSY 5708 - Practicum in Moderate to Severe Emotional/Behavioral Disorders (3.0 cr)
- EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
- EPSY 5754 - Student Teaching: Social and Emotional Disabilities (1.0 - 6.0 cr)
- EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

Learning Disabilities
The professional development program in special education specializing in learning disabilities leads to K-12 classroom licensure and a M.Ed. degree. It is designed to prepare teachers to work in a variety of educational settings.

The program philosophy focuses on cultural and social diversity, and meeting the needs of individual students who have learning disabilities. Graduates are prepared to assess, analyze, and problem solve the challenges of learning for students with learning disabilities and their families, focusing on the objective of providing effective teaching practices and instructional strategies.

Students complete 30-31 credits: 19 credits required courses and 11-12 credits electives. Additional credits (25-30) are required for adding licensure to degree.

Required Courses
- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)
- EPSY 5613 - Foundations of Special Education I (3.0 cr)
- EPSY 5614 - Assessment and Due Process in Special Education (4.0 cr)
- EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5631 - Module 1: Introduction to Augmentative and Alternative Communication (1.0 cr)
- EPSY 5690 - Experimental Teaching Seminar: MEd Culminating Project (2.0 cr)

Electives
Take 11 - 12 credit(s) from the following:
- EDHD 5005 - School and Society (2.0 cr)
- EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
- EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
-EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
- EPSY 5611W - Research-based Practices in Academic and Behavior Disabilities [WI] (3.0 cr)
- EPSY 5612 - Understanding of Academic Disabilities (3.0 cr)
- EPSY 5615 - Advanced Academic Interventions (3.0 cr)
- EPSY 5617 - Academic and Social Interventions for Students with Mild to Moderate Disabilities (3.0 cr)
- EPSY 5619 - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities (3.0 cr)
- EPSY 5627 - Seminar: Advanced issues in Learning Disabilities (3.0 cr)

The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
- EPSY 5628 - Characteristics of Moderate to Severe Learning Disabilities (3.0 cr)
- EPSY 5629 - Strategic Instructional Methods for Students Academically At-Risk (3.0 cr)
- EPSY 5656 - Advanced Issues in Emotional Behavior Disorders (3.0 cr)
- EPSY 5657 - Interventions for Behavioral Problems in School Settings (3.0 cr)
- EPSY 5701 - Practicum: Field Experience in Special Education (2.0 cr)
- EPSY 5704 - Practicum in Middle/Secondary Settings (1.0 cr)
- EPSY 5705 - Practicum in ECSE/Elementary Settings (1.0 cr)
- EPSY 5707 - Practicum in Moderate to Severe Learning Disabilities (3.0 cr)
- EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
- EPSY 5752 - Student Teaching: Learning Disabilities (1.0 - 6.0 cr)
- EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)

Teacher Licensure Exempt
This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

Students in the M.Ed. program in special education who do not hold a valid Minnesota elementary, secondary, or K-12 classroom teaching license must complete additional foundational education coursework to be eligible for a license to teach in their specialization area. This is called the classroom teaching license exemption (TLE), and the coursework is in compliance with the exemption requirements of the Minnesota Board of Teaching.

Students take 21.5 - 30.5 credits depending on which M.Ed. subplan they are concurrently enrolled in. Students will take 30-31 credits for the concurrent subplan with 10.5 required credits also satisfying TLE required coursework.

Required Courses
Students must take these courses. Students must take CPSY 2301 if they have no previous child psychology or individual differences coursework.
- EDHD 5005 - School and Society (2.0 cr)
- EDH 5007 - Technology for Teaching and Learning (1.5 cr)
- EDHD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
- PUBH 6003 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)
- EPSY 5114 - Psychology of Student Learning (3.0 cr)
  or EDHD 5001 - Learning, Cognition, and Assessment (3.0 cr)
- EPSY 5619 - Specialized Interventions in Mathematics for Students with Mild to Moderate Disabilities (3.0 cr)
  or MTHE 5355 - Mathematics for Diverse Learners (3.0 cr)

General Ed Practicum
- CPSY 5281 must be taken for 3 credits. Consult with adviser.
- EPSY 5701 - Practicum: Field Experience in Special Education (2.0 cr)
  or EPSY 5705 - Practicum in ECSE/Elementary Settings (1.0 cr)
  or CPSY 5281 - Student Teaching in Early Childhood Education (1.0 - 6.0 cr)

Student Teaching
Students take 3-6 credits; course(s) depend on M.Ed. subplan (consult with adviser).
- EPSY 5741 - Student Teaching: Academic and Behavioral Strategist (6.0 cr)
  or EPSY 5742 - Student Teaching: Autism Spectrum Disorders (6.0 cr)
  or EPSY 5751 - Student Teaching: Deaf and Hard of Hearing (1.0 - 6.0 cr)
  or EPSY 5752 - Student Teaching: Learning Disabilities (1.0 - 6.0 cr)
  or EPSY 5754 - Student Teaching: Social and Emotional Disabilities (1.0 - 6.0 cr)
  or EPSY 5755 - Student Teaching: Developmental Disabilities, Mild/Moderate (1.0 - 6.0 cr)
  or EPSY 5756 - Student Teaching: Developmental Disabilities, Moderate/Severe (1.0 - 6.0 cr)
  or EPSY 5761 - Student Teaching in Early Childhood Special Education Settings for Children Aged Three to Five Years (3.0 cr)
  or EPSY 5762 - Student Teaching in Early Childhood Special Education for Children Aged Birth to Three Years (3.0 cr)

K-12 Requirements
Students in all M.Ed. subplans (except ECSE) must take these courses.
- EPSY 5604 - Transition From School to Work and Community Living for Persons With Special Needs (3.0 cr)
- EPSY 5605 - Collaborative Practices for the Special Educator (3.0 cr)

ECSE Requirements
Students in the ECSE subplan must take these courses.
- EPSY 5609 - Family-centered Services (2.0 cr)
- CPSY 5262W - Facilitating Social and Emotional Learning in Early Childhood Education [WI] (3.0 cr)
- CPSY 5253 - Facilitating Cognitive and Language Learning in Early Childhood Education (3.0 cr)
- CPSY 5254 - Facilitating Creative and Motor Learning in Early Childhood Education (2.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Certificate of Specialist in Educ/Genl Educ/Admin

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Organizational Leadership, Policy, and Development is a leader in advancing knowledge about educational and organizational change in local, national, and international contexts. Our research, teaching, and outreach reflect a commitment to interdisciplinary and intercultural engagement with educators, scholars, and policy makers seeking to enhance leadership, policy, and development around the globe. Students in the M.A. and Ph.D. programs choose from one of five complementary but distinct program tracks: education policy and leadership (EPL), evaluation studies (ES), higher education (HE), comparative and international development education (CIDE), and Human Resource Development (HRD). Our undergraduate programs focus on human resource development and business and marketing education. In addition, the department offers a variety of programs for practicing professionals and various licensure programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Note: Applications to this certificate currently are not being accepted.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

This program's structure is currently under review. In the past, it has been customized based on the student's prior coursework. A final paper is required for completion.

This program is not accepting new students.

The Department of Organizational Leadership, Policy, and Development prepares administrators, scholars, and analysts for leadership roles in education. The department is committed to the preparation of leaders who can act effectively and ethically within the structures, processes, and cultural contexts of organized education.

The department also offers various certificate programs (including program evaluation, staff development, disability policy and services, and preK-12 administration), an individualized concentration in youth leadership development, and minors in international education, social and philosophic studies of education, and program evaluation. See the department website for details on minors and certificate programs.

These graduate programs incorporate relevant knowledge from the behavioral and social sciences and the humanities, with primary reliance on sociology, management science, political science, psychology, public affairs, economics, philosophy, history, and anthropology.

- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The master of arts in sport management provides academic excellence by combining theoretical instruction and practical experience to prepare tomorrow's leaders for success in the sports industry and marketplace. Students develop the tools of research and learn core concepts through an interdisciplinary curriculum with an emphasis on cultivating new ideas and improving operations in the sport industry.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

**Special Application Requirements:**

Applicants must submit a University of Minnesota application which includes a written statement of academic interests, goals, and objectives; scores from the General Test of the GRE (verbal, quantitative, and analytical writing) or the GMAT (verbal, quantitative, and analytical writing) that are less than five years old; three letters of recommendation from persons familiar with their scholarship and research potential; a scholarly writing sample; and transcripts. Submission of all application materials by December 15 is strongly encouraged to ensure priority consideration for admission and for teaching and research assistantships awarded for the next academic year. Students are admitted for the fall semester.

Applicants must submit their test score(s) from the following:

- **GRE**
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 153
  - General Test - Analytical Writing: 4.5

- **GMAT**
  - Verbal section score: 33
  - Quantitative section score: 44
  - Analytical writing assessment score: 5

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Listening Score: 14
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Internet Based - Speaking Score: 23
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5
• MELAB  
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, GMAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 16 major credits, 10 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 20 major credits and 16 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is an independent research project with the adviser that meets the following guidelines: involves a total of approximately 120 hours of work; demonstrates familiarity with the tools of research and scholarship in the field of sport management; demonstrates the ability to work independently; demonstrates the ability to effectively present the results of the investigation.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.A. is offered under Plan A and Plan B. Plan A requires 36 credits, including 16 core course credits, 6 research core course credits, 4 elective credits, and 10 thesis credits (8777). The program must include 6 course credits in a minor or related field. Plan B also requires 36 credits, including 16 core course credits, 6 research core course credits, 10 elective credits, and 4 credits of a research project (8995). The program must include 6 course credits in a minor or related field (non-KIN courses). A GPA of at least 3.00 is required to maintain good standing and to graduate. A maximum of 9 credits of 4xxx-level courses are allowed at the discretion of the adviser.

Required core courses in sport management

KIN 5801 - Legal Aspects of Sport and Recreation (4.0 cr)  
KIN 5631 - Programming and Promotion in Sport (3.0 cr)  
KIN 5421 - Sport Finance (3.0 cr)  
KIN 5601 - Sport Management Ethics and Policy (3.0 cr)  
KIN 5725 - Organization and Management of Physical Education and Sport (3.0 cr)

Required research core courses

KIN 5981 - Research Methodology in Kinesiology, Recreation, and Sport (3.0 cr)  
One additional research analysis course can be taken from the following list (or consult with adviser):
  Take 3 or more credit(s) from the following:
  • EPSY 5261 - Introductory Statistical Methods (3.0 cr)  
  • EPSY 8261 - Statistical Methods I: Probability and Inference (3.0 cr)  
  • FSOS 8013 - Qualitative Family Research Methods (3.0 cr)

Electives

For Plan A, a minimum of 4 credits are required and may from chosen from the following list. For Plan B, a minimum of 10 credits are required and may be chosen from the following list. Students must consult with the adviser on selection of courses. Registration for KIN 5992, KIN 5995, and KIN 5720 is limited to 3 credits.

KIN 5111 - Sports Facilities (3.0 cr)  
or KIN 5115 - Event Management in Sport (3.0 cr)  
or KIN 5461 - Issues in the Sport Industry (3.0 cr)  
or KIN 5371 - Sport and Society (3.0 cr)  
or KIN 5511 - Sport and Gender (3.0 cr)  
or KIN 5720 - Special Topics in Kinesiology (2.0 - 4.0 cr)  
or KIN 5992 - Readings in Kinesiology (1.0 - 9.0 cr)  
or KIN 5995 - Research Problems in Applied Kinesiology (1.0 - 6.0 cr)  
or REC 5701 [Inactive] (3.0 cr)  
or ABUS 4104 - Management and Human Resource Practices (3.0 cr)
Minor or related field
For Plan A and Plan B, a minimum of 6 semester credits in one or more related fields (not KIN prefix) is required. The KIN sport management courses are cross-listed with REC. Courses in the minor or supporting program may be chosen from any field selected by the student and the adviser according to the student’s prior academic background and career goals, and are subject to the adviser’s approval.

Thesis Credits: Master’s

Plan A
Take 10 or more credit(s) from the following:

• KIN 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B
Take 4 or more credit(s) from the following:

• KIN 8995 - Research Problems in Kinesiology (1.0 - 12.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Sport management is an interdisciplinary field that provides students with academic training and field experience for careers in sport and fitness management professions. The sport management program encompasses many different subjects, including sociology, business, marketing, communications, and psychology.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A sport management master's minor requires at least 6 credits of graduate-level sport management courses chosen in consultation with the student's major adviser and the School of Kinesiology's director of graduate studies.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Master's
A sport management master's minor requires at least 6 credits of graduate-level sport management courses chosen in consultation with the student's major adviser and the School of Kinesiology's director of graduate studies.

Minor Requirements
A sport management master's minor requires at least 6 credits of graduate-level sport management courses chosen in consultation with the student's major adviser and the School of Kinesiology's director of graduate studies.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Talent Development/Gifted Education PBac Cert Grad

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This 12-credit certificate program is intended to give teachers, administrators, education professionals, and other individuals with an interest in the education of gifted and talented students the opportunity to obtain the knowledge and skills necessary to develop, implement, and supervise programs in the education of gifted and talented students.

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission

Special Application Requirements:
Applicants to this post-baccalaureate certificate must have completed a bachelor's degree from an accredited institution. Student applications will be reviewed by a committee of individuals affiliated with the program. Detailed application instructions are available at the Educational Psychology website under the certificates link. Applications are accepted year-round.

Applicants must submit the following application materials:
- Unofficial transcripts from all post-secondary institutions attended or currently attending, including the University of Minnesota.
- Transcripts can be uploaded directly into the Apply Yourself online application system (see Educational Psychology's program website)
- For coursework completed outside of the United States, transcripts must be evaluated by a professional credential evaluation center. Request a 'course-by-course' evaluation. This process can take 4-6 weeks; please plan accordingly. Students can use any provider that is an accredited member of the National Association of Credential Evaluation Services (NACES). A suggested provider is Educational Credential Evaluators (ECE), P.O. Box 514070, Milwaukee, WI 53203-3470 (414-289-3400, fax: 414-289-3411).
- Answer the following certificate-specific questions on a separate sheet of paper and upload into the online application system: 1) Why are you interested in the talent development and gifted education certificate program? 2) What are your primary areas of interest related to talent development and gifted education?

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Required Courses
EPSY 5991 should be taken for 3 credits.
EPSY 5101 - Intelligence and Creativity (3.0 cr)
EPSY 5191 - Education of the Gifted and Talented (3.0 cr)
EPSY 5991 - Independent Study in Educational Psychology (1.0 - 8.0 cr)
Elective course
One course (minimum 3 credits) selected with the approval of the certificate program director. Examples include coursework in learning and cognition, social psychology of education, measurement, or coursework in another discipline such as curriculum and instruction, educational administration, child development, or psychology.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 33 to 52
- This program requires summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of education (M.Ed.)/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with the Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

Accreditation
This program is accredited by Minnesota Board of Teaching and the NCATE (National Council for Accreditation of Teacher Education).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Each program area has a subset of prerequisite courses. A transcript review is recommended to be completed before applying in order to determine if an applicant is ready to apply or should continue to work on additional prerequisite coursework. Unofficial transcript(s) can be submitted for evaluation to the attention of the appropriate C&I M.Ed. adviser. Students with international coursework must arrange for a transcript evaluation from a foreign transcript evaluation service.

When ready to apply, applicants must submit the following materials in the online application system:
- Upload unofficial transcripts from all schools attended, even if a degree was not earned.
- Classroom experience with appropriate grade levels (100 paid or unpaid hours) - reported in the online application
- Additional related hours and experience - reported in the online application
- Upload personal statements
- Two letters of recommendation
- Upload TOEFL/IELTS/MELAB score (if applicable)

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80
The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan C:** Plan C requires 33 to 52 major credits and up to null credits outside the major. The is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: For language specific sub-plans only

A minimum GPA of 2.80 is required for students to remain in good standing.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

**Arabic**

This sub-plan is limited to students completing the program under Plan C.

The second languages and cultures education (SLC) initial licensure program at the University of Minnesota is designed to help enrolled students become accomplished professional second language educators for grades K-12. The program integrates the fields of world languages and English as a Second Language (ESL), enabling teachers from both fields to learn from each other. Theory and practice are also linked through concurrent coursework and student teaching, a nationally recognized approach to teacher education.

Native speakers of English who are seeking licensure in a world language must demonstrate proficiency in that language. The following licensure options are available: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Latin, Norwegian, Ojibwe, Polish, Russian, Spanish, and Swedish. Candidates must have advanced proficiency in the language and an understanding of the formal aspects of the language, such as grammar and writing. Nonnative speakers of Arabic, Mandarin Chinese, French, German, Hebrew, Italian, Japanese, Norwegian, Polish, Russian, Spanish, or Swedish who are seeking a K-12 license in any of these languages must obtain a score of at least “advanced low” on the Oral Proficiency Interview (OPI).

The Teaching M.Ed. - Arabic sub-plan requires a minimum of 41.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

**M.Ed. Required Coursework**

EDHD 5008 should be taken for 1 credit. CI 5696 should be taken for 3 credits.

EDHD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
EDHD 5008 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
EDHD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)
EDHD 5013 - Child and Adolescent Development for Teaching and Learning (1.0 cr)
EDHD 5014 - Child and Adolescent Development for Teaching and Learning (2.0 cr)
EDHD 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
EDHD 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
EDHD 5017 - Academic Language and English Learners (1.0 cr)
EDHD 5018 - Academic Language and English Learners (1.0 cr)
EDHD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
CI 5620 - Introduction to Second Language Acquisition for Language Teachers (3.0 cr)
CI 5631 - Second Language Curriculum Development and Assessment (3.0 cr)
CI 5632 - Literacy and Language Development in Second Language Classrooms (3.0 cr)
CI 5634 - Content-Based Instruction in Second Language Settings (3.0 cr)
CI 5635 - Culture and Diversity in Second Language Classrooms (3.0 cr)
CI 5646 - English Grammar for ESL Teachers (3.0 cr)
CI 5696 - Practicum: Teaching World Languages and Cultures in Elementary Schools (2.0 - 6.0 cr)
LING 5001 - Introduction to Linguistics (4.0 cr)

Electives
A minimum of three credits is required. If student chooses to complete CI 5660, it should be taken for 3 credits.
CI 5619 - Teaching World Languages and Cultures in Elementary Settings (3.0 cr)
or CI 5641 - Language, Culture, and Education (3.0 cr)
or CI 5647 - Teaching Middle and Secondary Immigrant and Refugee Students With Limited Formal Schooling (3.0 cr)
or CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)
or CI 5658 - Foreign Language Testing and Assessment (3.0 cr)
or CI 5660 - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)

Art
This sub-plan is limited to students completing the program under Plan C.

The art education initial licensure program at the University of Minnesota is designed to help students become inquiring, analytical, and reflective professional educators who can help all students understand and appreciate art. The program seeks to develop thoughtful practitioners who are enthusiastic about and prepared for leadership roles in the schools.

Master of education (M.Ed./initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

The Teaching M.Ed. - Art sub-plan requires a minimum of 32.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

M.Ed. Required Coursework
EDHD 5008 should be taken for 1 credit. CI 5008 should be taken for 2 credits. CI 5049 and CI 5075 should each be taken for 3
credits.
EDHD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
EDHD 5008 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
EDHD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)
EDHD 5013 - Child and Adolescent Development for Teaching and Learning (1.0 cr)
EDHD 5014 - Child and Adolescent Development for Teaching and Learning (2.0 cr)
EDHD 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
EDHD 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
EDHD 5017 - Academic Language and English Learners (1.0 cr)
EDHD 5018 - Academic Language and English Learners (1.0 cr)
EDHD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
CI 5008 - Theory and Practice of Teaching Art in Elementary Schools (1.0 - 2.0 cr)
CI 5049 - Art Media Techniques (1.0 - 4.0 cr)
CI 5065 - Improving Art Programs in the Schools (3.0 cr)
CI 5069 - Curriculum Innovations in Art Education (3.0 cr)
CI 5075 - The Social and Historical Foundations of Art Education (1.0 - 3.0 cr)
CI 5078 - Application of Aesthetic Theory in Education (2.0 cr)

Electives
A minimum of three credits taken in consultation with your faculty adviser.

Chemistry
This sub-plan is limited to students completing the program under Plan C.

Science teachers are in high demand, and this program will prepare students to step into the classroom with confidence. The college offers a solid mix of theory and practice, as well as all of the resources that come with studying at a top research institution.

M.Ed./initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

The Teaching M.Ed. - Chemistry sub-plan requires a minimum of 39.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

M.Ed. Required Coursework

The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
EDHD 5008 and EPSY 5720 should each be taken for 2 credits.
EDHD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
EDHD 5001 - Learning, Cognition, and Assessment (3.0 cr)
EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
EDHD 5008 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
EDHD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)
EDHD 5017 - Academic Language and English Learners (1.0 cr)
EDHD 5018 - Academic Language and English Learners (1.0 cr)
EDHD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
CI 5530 - Secondary Science Teaching: Laboratory-based Instruction (3.0 cr)
CI 5531 - Teaching Middle School Science (3.0 cr)
CI 5532 - Teaching Secondary School Science (3.0 cr)
CI 5541 - Teaching History and Nature of Science (3.0 cr)
CI 5596 - Clinical Experience in Middle School Science (4.0 cr)

Electives
A minimum of nine credits is required. If student chooses to complete CI 5540, it should be taken for 3 credits one time only.
CI 5535 - Foundations of Science Education (3.0 cr)
CI 5536 - Equity, Policy, and Assessment in Science Education (3.0 cr)
CI 5539 - Improving Secondary Science Instruction: Surviving the First Two Years (3.0 cr)
CI 5540 - Special Topics: Science Education (1.0 - 8.0 cr)

Chinese
This sub-plan is limited to students completing the program under Plan C.

The second languages and cultures education (SLC) initial licensure program at the University of Minnesota is designed to help enrolled students become accomplished professional second language educators for grades K-12. The program integrates the fields of world languages and English as a Second Language (ESL), enabling teachers from both fields to learn from each other. Theory and practice are also linked through concurrent coursework and student teaching, a nationally recognized approach to teacher education.

The Teaching M.Ed. - Chinese sub-plan requires a minimum of 41.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

M.Ed. Required Coursework
EDHD 5008 should be taken for 1 credit. CI 5696 should be taken for 3 credits.
EDHD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
EDHD 5008 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)

- or CI 5540 - Special Topics: Science Education (1.0 - 8.0 cr)

**Elementary**

This sub-plan is limited to students completing the program under Plan C.

The elementary education initial licensure program is designed to help students become inquiring, analytical, and reflective professional educators who can help students succeed in school. The program also seeks to develop thoughtful practitioners who are enthusiastic about and prepared for leadership roles in the schools.

The M.Ed./initial licensure programs are for individuals with bachelor’s degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with the Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

The Teaching M.Ed. - Elementary sub-plan requires a minimum of 51.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

The Teaching M.Ed. - Elementary sub-plan for transitioners from the U of MN B.S. Elementary Education Foundations degree requires a minimum of 39 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

or CI 5660 - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)

French
This sub-plan is limited to students completing the program under Plan C.

The second languages and cultures education (SLC) initial licensure program at the University of Minnesota is designed to help enrolled students become accomplished professional second language educators for grades K-12. The program integrates the fields of world languages and English as a Second Language (ESL), enabling teachers from both fields to learn from each other. Theory and practice are also linked through concurrent coursework and student teaching–a nationally recognized approach to teacher education.

Native speakers of English who are seeking licensure in a world language must demonstrate proficiency in that language. The following licensure options are available: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Latin, Norwegian, Ojibwe, Polish, Russian, Spanish, and Swedish. Candidates must have advanced proficiency in the language and an understanding of the formal aspects of the language, such as grammar and writing. Nonnative speakers of Arabic, Mandarin Chinese, French, German, Hebrew, Italian, Japanese, Norwegian, Polish, Russian, Spanish, or Swedish who are seeking a K-12 license in any of these languages must obtain a score of at least “advanced low” on the Oral Proficiency Interview (OPI).
The Teaching M.Ed. - French sub-plan requires a minimum of 41.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

**M.Ed. Required Coursework**

EDHD 5008 should be taken for 1 credit. CI 5696 should be taken for 3 credits.

EDHD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)

licensure options are available: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Latin, Norwegian, Ojibwe, Polish, Russian, Spanish, and Swedish. Candidates must have advanced proficiency in the language and an understanding of the formal aspects of the language, such as grammar and writing. Nonnative speakers of Arabic, Mandarin Chinese, French, German, Hebrew, Italian, Japanese, Norwegian, Polish, Russian, Spanish, or Swedish who are seeking a K-12 license in any of these languages must obtain a score of at least "advanced low" on the Oral Proficiency Interview (OPI).

The Teaching M.Ed. - Hebrew sub-plan requires a minimum of 41.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

**M.Ed. Required Coursework**

EDHD 5008 should be taken for 1 credit. CI 5696 should be taken for 3 credits.

- **EDHD 5000** - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
- **EDHD 5007** - Technology for Teaching and Learning (1.5 cr)
- **EDHD 5008** - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
- **EDHD 5010** - Cultures, Schools, and Communities (Human Relations) (2.0 cr)
- **EDHD 5013** - Child and Adolescent Development for Teaching and Learning (1.0 cr)
- **EDHD 5014** - Child and Adolescent Development for Teaching and Learning (2.0 cr)
- **EDHD 5015** - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
- **EDHD 5016** - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
- **EDHD 5017** - Academic Language and English Learners (1.0 cr)
- **EDHD 5018** - Academic Language and English Learners (1.0 cr)
- **EDHD 5020** - Cultures, Schools, and Communities (Human Relations) (1.0 cr)

CI 5620 - Introduction to Second Language Acquisition for Language Teachers (3.0 cr)

CI 5631 - Second Language Curriculum Development and Assessment (3.0 cr)

CI 5632 - Literacy and Language Development in Second Language Classrooms (3.0 cr)

CI 5634 - Content-Based Instruction in Second Language Settings (3.0 cr)

CI 5635 - Culture and Diversity in Second Language Classrooms (3.0 cr)

CI 5646 - English Grammar for ESL Teachers (3.0 cr)

CI 5696 - Practicum: Teaching World Languages and Cultures in Elementary Schools (2.0 - 6.0 cr)

LING 5001 - Introduction to Linguistics (4.0 cr)

**Electives**

A minimum of three credits is required. If student chooses to complete CI 5660, it should be taken for 3 credits.

- **CI 5619** - Teaching World Languages and Cultures in Elementary Settings (3.0 cr)

  or **CI 5641** - Language, Culture, and Education (3.0 cr)

  or **CI 5647** - Teaching Middle and Secondary Immigrant and Refugee Students With Limited Formal Schooling (3.0 cr)

  or **CI 5657** - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)

  or **CI 5658** - Foreign Language Testing and Assessment (3.0 cr)

  or **CI 5660** - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)

**Japanese**

This sub-plan is limited to students completing the program under Plan C.

The second languages and cultures education (SLC) initial licensure program at the University of Minnesota is designed to help enrolled students become accomplished professional second language educators for grades K-12. The program integrates the fields of world languages and English as a Second Language (ESL), enabling teachers from both fields to learn from each other. Theory and practice are also linked through concurrent coursework and student teaching, a nationally recognized approach to teacher education.

Native speakers of English who are seeking licensure in a world language must demonstrate proficiency in that language. The following licensure options are available: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Latin, Norwegian, Ojibwe, Polish, Russian, Spanish, and Swedish. Candidates must have advanced proficiency in the language and an understanding of the formal aspects of the language, such as grammar and writing. Nonnative speakers of Arabic, Mandarin Chinese, French, German, Hebrew, Italian, Japanese, Norwegian, Polish, Russian, Spanish, or Swedish who are seeking a K-12 license in any of these languages must obtain a score of at least "advanced low" on the Oral Proficiency Interview (OPI).

The Teaching M.Ed. - Japanese sub-plan requires a minimum of 41.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

**M.Ed. Required Coursework**

EDHD 5008 should be taken for 1 credit. CI 5696 should be taken for 3 credits.

Life Science
This sub-plan is limited to students completing the program under Plan C.

Science teachers are in high demand, and this program will prepare students to step into the classroom with confidence, taking advantage of the college's solid mix of theory and practice, as well as all the resources that come with studying at a top research institution.

M.Ed./initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers.
(SEPT) and content standards adopted by the Minnesota Board of Teaching.

The Teaching M.Ed. - Life Science sub-plan requires a minimum of 39.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

**M.Ed. Required Coursework**

EDHD 5008 and EPSY 5720 should each be taken for 2 credits.

- **EDHD 5000** - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
- **EDHD 5001** - Learning, Cognition, and Assessment (3.0 cr)
- **EDHD 5007** - Technology for Teaching and Learning (1.5 cr)
- **EDHD 5008** - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
- **EDHD 5010** - Cultures, Schools, and Communities (Human Relations) (2.0 cr)
- **EDHD 5017** - Academic Language and English Learners (1.0 cr)
- **EDHD 5018** - Academic Language and English Learners (1.0 cr)
- **EDHD 5020** - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
- **EPSY 5720** - Special Topics: Special Education (1.0 - 4.0 cr)
- **CI 5530** - Secondary Science Teaching: Laboratory-based Instruction (3.0 cr)
- **CI 5531** - Teaching Middle School Science (3.0 cr)
- **CI 5532** - Teaching Secondary School Science (3.0 cr)
- **CI 5541** - Teaching History and Nature of Science (3.0 cr)
- **CI 5596** - Clinical Experience in Middle School Science (4.0 cr)

**Electives**

A minimum of nine credits is required. If student chooses to complete CI 5540, it should be taken for 3 credits one time only.

- **CI 5535** - Foundations of Science Education (3.0 cr)
- **or CI 5536** - Equity, Policy, and Assessment in Science Education (3.0 cr)
- **or CI 5539** - Improving Secondary Science Instruction: Surviving the First Two Years (3.0 cr)
- **or CI 5540** - Special Topics: Science Education (1.0 - 8.0 cr)

**Mathematics**

This sub-plan is limited to students completing the program under Plan C.

The mathematics education initial licensure program at the University of Minnesota is designed to help students become accomplished professional mathematics educators, and inquiring, analytical, and reflective professional educators prepared to teach in the classroom and lead in the schools.

M.Ed./initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

The Teaching M.Ed. - Mathematics sub-plan requires a minimum of 34.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

**M.Ed. Required Coursework**

EDHD 5008 and EPSY 5720 should each be taken for 2 credits.

- **EDHD 5000** - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
- **EDHD 5001** - Learning, Cognition, and Assessment (3.0 cr)
- **EDHD 5007** - Technology for Teaching and Learning (1.5 cr)
- **EDHD 5008** - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
- **EDHD 5010** - Cultures, Schools, and Communities (Human Relations) (2.0 cr)
- **EDHD 5017** - Academic Language and English Learners (1.0 cr)
- **EDHD 5018** - Academic Language and English Learners (1.0 cr)
- **EDHD 5020** - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
- **MTHE 5011** - Arithmetic Structures in School Mathematics (3.0 cr)
- **MTHE 5021** - Algebraic Structures in School Mathematics (3.0 cr)
- **MTHE 5031** - Geometric Structures in School Mathematics (3.0 cr)
- **MTHE 5314** - Teaching and Learning Mathematics (3.0 cr)
- **MTHE 5366** - Technology-Assisted Mathematics Instruction (3.0 cr)
- **MTHE 5993** - Directed Studies in Mathematics Education (2.0 cr)

**Electives**

A minimum of three credits is required. If student chooses to complete MTHE 5100, it should be taken for 3 credits.

- **MTHE 5100** - Topics in Mathematics Education (1.0 - 6.0 cr)
- **or MTHE 5155** - Rational Number Concepts and Proportionality (3.0 cr)
- **or MTHE 5171** - Teaching Problem Solving (3.0 cr)

Information current as of September 19, 2014
The second languages and cultures education (SLC) initial licensure program at the University of Minnesota is designed to help enrolled students become accomplished professional second language educators for grades K-12. The program integrates the fields of world languages and English as a Second Language (ESL), enabling teachers from both fields to learn from each other. Theory and practice are also linked through concurrent coursework and student teaching, a nationally recognized approach to teacher education.

Native speakers of English who are seeking licensure in a world language must demonstrate proficiency in that language. The following licensure options are available: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Latin, Norwegian, Ojibwe, Polish, Russian, Spanish, and Swedish. Candidates must have advanced proficiency in the language and an understanding of the formal aspects of the language, such as grammar and writing. Nonnative speakers of Arabic, Mandarin Chinese, French, German, Hebrew, Italian, Japanese, Norwegian, Polish, Russian, Spanish, or Swedish who are seeking a K-12 license in any of these languages must obtain a score of at least “advanced low” on the Oral Proficiency Interview (OPI).

The Teaching M.Ed. - Norwegian sub-plan requires a minimum of 41.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

**M.Ed. Required Coursework**

- EDHD 5008 should be taken for 1 credit. CI 5696 should be taken for 3 credits.
- EDHD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
- EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
- EDHD 5008 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
- EDHD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)
- EDHD 5013 - Child and Adolescent Development for Teaching and Learning (1.0 cr)

- EDHD 5018 - Academic Language and English Learners (1.0 cr)
- EDHD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
- EPSY 5720 - Special Topics: Special Education (1.0 - 4.0 cr)
- CI 5530 - Secondary Science Teaching: Laboratory-based Instruction (3.0 cr)
- CI 5531 - Teaching Middle School Science (3.0 cr)
- CI 5532 - Teaching Secondary School Science (3.0 cr)
- CI 5541 - Teaching History and Nature of Science (3.0 cr)
CI 5596 - Clinical Experience in Middle School Science (4.0 cr)

Electives
A minimum of nine credits is required. If student chooses to complete CI 5540, it should be taken for 3 credits one time only.

CI 5535 - Foundations of Science Education (3.0 cr)
CI 5536 - Equity, Policy, and Assessment in Science Education (3.0 cr)
CI 5539 - Improving Secondary Science Instruction: Surviving the First Two Years (3.0 cr)
CI 5540 - Special Topics: Science Education (1.0 - 8.0 cr)

Polish
This sub-plan is limited to students completing the program under Plan C.

The second languages and cultures education (SLC) initial licensure program at the University of Minnesota is designed to help enrolled students become accomplished professional second language educators for grades K-12. The program integrates the fields of world languages and English as a Second Language (ESL), enabling teachers from both fields to learn from each other. Theory and practice are also linked through concurrent coursework and student teaching, a nationally recognized approach to teacher education.

Native speakers of English who are seeking licensure in a world language must demonstrate proficiency in that language. The following licensure options are available: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Latin, Norwegian, Ojibwe, Polish, Russian, Spanish, and Swedish. Candidates must have advanced proficiency in the language and an understanding of the formal aspects of the language, such as grammar and writing. Nonnative speakers of Arabic, Mandarin Chinese, French, German, Hebrew, Italian, Japanese, Norwegian, Polish, Russian, Spanish, or Swedish who are seeking a K-12 license in any of these languages must obtain a score of at least "advanced low" on the Oral Proficiency Interview (OPI).

The Teaching M.Ed. - Polish sub-plan requires a minimum of 41.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

M.Ed. Required Coursework
EDHD 5008 should be taken for 1 credit. CI 5696 should be taken for 3 credits.
EDHD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
EDHD 5008 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
EDHD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)
EDHD 5013 - Child and Adolescent Development for Teaching and Learning (1.0 cr)
EDHD 5014 - Child and Adolescent Development for Teaching and Learning (2.0 cr)
EDHD 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
EDHD 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
EDHD 5017 - Academic Language and English Learners (1.0 cr)
EDHD 5018 - Academic Language and English Learners (1.0 cr)
EDHD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
CI 5620 - Introduction to Second Language Acquisition for Language Teachers (3.0 cr)
CI 5631 - Second Language Curriculum Development and Assessment (3.0 cr)
CI 5632 - Literacy and Language Development in Second Language Classrooms (3.0 cr)
CI 5634 - Content-Based Instruction in Second Language Settings (3.0 cr)
CI 5635 - Culture and Diversity in Second Language Classrooms (3.0 cr)
CI 5646 - English Grammar for ESL Teachers (3.0 cr)
CI 5666 - Practicum: Teaching World Languages and Cultures in Elementary Schools (2.0 - 6.0 cr)
LING 5001 - Introduction to Linguistics (4.0 cr)

Electives
A minimum of three credits is required. If student chooses to complete CI 5660, it should be taken for 3 credits.
CI 5619 - Teaching World Languages and Cultures in Elementary Settings (3.0 cr)
CI 5641 - Language, Culture, and Education (3.0 cr)
CI 5647 - Teaching Middle and Secondary Immigrant and Refugee Students With Limited Formal Schooling (3.0 cr)
CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)
CI 5658 - Foreign Language Testing and Assessment (3.0 cr)
CI 5660 - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)

Russian
This sub-plan is limited to students completing the program under Plan C.

The second languages and cultures education (SLC) initial licensure program at the University of Minnesota is designed to help enrolled students become accomplished professional second language educators for grades K-12. The program integrates the fields of world languages and English as a Second Language (ESL), enabling teachers from both fields to learn from each other. Theory and practice are also linked through concurrent coursework and student teaching, a nationally recognized approach to teacher education.
Native speakers of English who are seeking licensure in a world language must demonstrate proficiency in that language. The following licensure options are available: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Latin, Norwegian, Ojibwe, Polish, Russian, Spanish, and Swedish. Candidates must have advanced proficiency in the language and an understanding of the formal aspects of the language, such as grammar and writing. Nonnative speakers of Arabic, Mandarin Chinese, French, German, Hebrew, Italian, Japanese, Norwegian, Polish, Russian, Spanish, or Swedish who are seeking a K-12 license in any of these languages must obtain a score of at least “advanced low” on the Oral Proficiency Interview (OPI).

The Teaching M.Ed. - Russian sub-plan requires a minimum of 41.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

M.Ed. Required Coursework

EDHD 5008 should be taken for 1 credit. CI 5696 should be taken for 3 credits.
EDHD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
EDHD 5008 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
EDHD 5010 - Teaching, Speaking and Listening in Second Language Classrooms (2.0 cr)
EDH 5013 - Child and Adolescent Development for Teaching and Learning (1.0 cr)
EDHD 5014 - Child and Adolescent Development for Teaching and Learning (2.0 cr)
EDHD 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
EDHD 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
EDHD 5017 - Academic Language and English Learners (1.0 cr)
EDHD 5018 - Academic Language and English Learners (1.0 cr)
EDHD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
CI 5620 - Introduction to Second Language Acquisition for Language Teachers (3.0 cr)
CI 5631 - Language Curriculum Development and Assessment (3.0 cr)
CI 5632 - Literacy and Language Development in Second Language Classrooms (3.0 cr)
CI 5634 - Content-Based Instruction in Second Language Settings (3.0 cr)

CI 5646 - English Grammar for ESL Teachers (3.0 cr)
CI 5696 - Practicum: Teaching World Languages and Cultures in Elementary Schools (2.0 - 6.0 cr)
LING 5001 - Introduction to Linguistics (4.0 cr)

Electives

A minimum of three credits is required. If student chooses to complete CI 5660, it should be taken for 3 credits.
CI 5619 - Teaching World Languages and Cultures in Elementary Settings (3.0 cr)
or CI 5641 - Language, Culture, and Education (3.0 cr)
or CI 5647 - Teaching Middle and Secondary Immigrant and Refugee Students With Limited Formal Schooling (3.0 cr)
or CI 5650 - English Language Testing and Assessment (3.0 cr)
or CI 5658 - Foreign Language Testing and Assessment (3.0 cr)
or CI 5660 - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)

Social Studies

This sub-plan is limited to students completing the program under Plan C.

The social studies education initial licensure program is designed to help students become an inquiring, analytical, and reflective professional educators prepared to teach in grades 5-12 classrooms and lead in the schools. The program seeks to develop educators who are advocates for young people and the social studies, and can help youth to become thoughtful and active citizens in a culturally diverse, democratic society.

The M.Ed./initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

The Teaching M.Ed. - Social Studies sub-plan requires a minimum of 32.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

M.Ed. Required Coursework

EDHD 5008 should be taken for 2 credits.
EDHD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
EDHD 5007 - Technology for Teaching and Learning (1.5 cr)
EDHD 5008 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
EDHD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)
EDHD 5013 - Child and Adolescent Development for Teaching and Learning (1.0 cr)
EDHD 5014 - Child and Adolescent Development for Teaching and Learning (2.0 cr)
EDHD 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
EDHD 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
EDHD 5017 - Academic Language and English Learners (1.0 cr)
EDHD 5018 - Academic Language and English Learners (1.0 cr)
EDHD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
CI 5741 - Introduction to Social Studies Education (3.0 cr)
CI 5742 - Advanced Methods of Teaching the Social Studies (3.0 cr)
CI 5743 - The Social Sciences and the Social Studies (3.0 cr)
CI 5744 - Seminar: Reflecting on Professional Development in Social Studies Education (3.0 cr)
CI 5745 - Engaging Youth With Social Studies Texts (3.0 cr)

Electives
A minimum of three credits is required, chosen from the list below.
CI 5746 - Global and Multicultural Education in the Secondary Classroom (3.0 cr)
or CI 5762 - Developing Civic Discourse in the Social Studies (3.0 cr)

Spanish
This sub-plan is limited to students completing the program under Plan C.

The second languages and cultures education (SLC) initial licensure program at the University of Minnesota is designed to help enrolled students become accomplished professional second language educators for grades K-12. The program integrates the fields of world languages and English as a Second Language (ESL), enabling teachers from both fields to learn from each other. Theory and practice are also linked through concurrent coursework and student teaching, a nationally recognized approach to teacher education.

Native speakers of English who are seeking licensure in a world language must demonstrate proficiency in that language. The following licensure options are available: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Latin, Norwegian, Ojibwe, Polish, Russian, Spanish, and Swedish. Candidates must have advanced proficiency in the language and an understanding of the formal aspects of the language, such as grammar and writing. Non-native speakers of Arabic, Mandarin Chinese, French, German, Hebrew, Italian, Japanese, Norwegian, Polish, Russian, Spanish, or Swedish who are seeking a K-12 license in any of these languages must obtain a score of at least “advanced low” on the Oral Proficiency Interview (OPI).

The Teaching M.Ed. - Spanish sub-plan requires a minimum of 41.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

M.Ed. Required Coursework
EDHD 5008 should be taken for 1 credit. CI 5696 should be taken for 3 credits.
EDHD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
EDHD 5007 - Technology for Teaching and Learning (1.5 cr)

**Alternative Pathway: Elementary Education**
This sub-plan is limited to students completing the program under Plan C.

The Alternative Pathway elementary education initial licensure program is designed to help students become inquiring, analytical, and reflective professional educators who can help students succeed in school. The program also seeks to develop thoughtful practitioners who are enthusiastic about and prepared for leadership roles in the schools. Alternative Pathway M.Ed./initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with the Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching. This Alternative Pathway to Teaching program is for designated cohorts with department approval.

Students must maintain a 2.8 GPA throughout their M.Ed program in addition to earning a C- or higher in each individual course. 36 credits are required to complete this sub-plan. Required coursework includes 15 credits in Common Content area, 15 credits in Elementary Education track, and 6 elective credits selected in consultation with faculty adviser.

**Common Content Coursework**
The Alternative Pathway mathematics education initial licensure program at the University of Minnesota is designed to help students become accomplished professional mathematics educators, and inquiring, analytical, and reflective professional educators prepared to teach in the classroom and lead in the schools. **Elective Coursework**

A minimum of six credits is required, selected in consultation with faculty adviser.

**Alternative Pathway: Secondary Science**

This sub-plan is limited to students completing the program under Plan C.

Science teachers are in high demand, and this program will prepare students to step into the classroom with confidence, taking advantage of the college's solid mix of theory and practice, as well as all the resources that come with studying at a top research institution. Alternative Pathway M.Ed./initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching. This Alternative Pathway to Teaching program is for designated cohorts with department approval.
Students must maintain a 2.8 GPA throughout their M.Ed program in addition to earning a C- or higher in each individual course. 36 credits are required to complete this sub-plan. Required coursework includes 15 credits in Common Content area, 15 credits in Secondary Science track, and 6 elective credits selected in consultation with faculty adviser.

**Common Content Coursework**
- CI 5980 will be taken a total of four semesters; 1 credit each semester. EDHD 5008 should be taken for 1 credit.
- CI 5981 - Introduction to Equity-Based Pedagogy (1.0 cr)
- CI 5982 - Enacting Equity-Based Pedagogy (2.0 cr)
- CI 5983 - Equity-Based Pedagogy/Advocacy (1.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 15
- This program requires summer semesters for timely completion.
- Degree: Teaching, Writing & Critical Literacy PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate in teaching writing and critical literacy prepares preK-college educators to strengthen their skills and knowledge of current practice and research in the teaching of critical reading and writing (note that a university certificate program or certificate is distinct from a state certificate or certification).

Writing and reading complement one another, and their interconnectedness is critical to literacy instruction. This certificate will offer advanced knowledge of the teaching of literacy through a focused, rigorous program while developing practicing educators' skills as teachers and writers in a supportive learning community.

Changing literacy needs of students from all socioeconomic and educational backgrounds demand highly qualified teachers of reading and writing at the K-12 and postsecondary levels. Educators must prepare K-12 students to meet testing requirements at the state and national levels. In addition, teachers must meet the increasing literacy needs that accompany Minnesota's changing demographics of growing immigrant and English language learner (ELL) populations. Educators also must prepare students to communicate effectively by using new technologies.

The certificate program seeks to accomplish the following goals:
- Develop effective strategies for teaching the writing process to English-language learners and diverse populations, as well as reading and writing across the curriculum
- Engage educators in current research about composition, reading, and learning theory
- Create learning communities where educators reflect on their own teaching, reading, and writing
- Give educators opportunities to learn from other practicing educators

This program begins with a three-week, three-credit Minnesota Writing Project (MWP) Invitational Institute and then extends to allow educators to choose from a wider range of courses from multiple University departments throughout the academic year.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A completed bachelor's degree is required for admission.

Applicants must be licensed teachers or administrators. Non-licensed teachers may be admitted with faculty letters of recommendation if program space is available.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn't earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, a goal statement that explains the relationship of courses and research to your professional goals, and two letters of recommendation addressing your teaching accomplishments and potential for further study.
Certificate applications are reviewed by the department three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5

- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

### Program Requirements

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

#### Core Courses (9 credits)
- CI 5469 should be taken for 3 credits
- CI 5463 - Minnesota Writing Project Annual Invitational Summer Institute (3.0 cr)
- CI 5469 - Minnesota Writing Project Directed Studies (1.0 - 3.0 cr)

#### Teaching Core

Students must complete one of the following courses in the teaching of reading and/or writing.
- CI 5422 - Teaching Writing in Schools (3.0 cr)
- or CI 5451 - Teaching Reading in Middle and Secondary Grades (3.0 cr)
- or CI 5462 - Evaluating and Assessing Writing (3.0 cr)

#### Elective Courses (6 credits)

Take 2 or more course(s) totaling 6 or more credit(s) from the following:
- CI 5145 - Critical Pedagogy (3.0 cr)
- CI 5177 - Practical Research (3.0 cr)
- CI 5404 - Culturally Diverse Books for Children and Adolescents (3.0 cr)
- CI 5410 - Special Topics in the Teaching of Literacy (1.0 - 3.0 cr)
- CI 5411 - Teaching Reading in the Elementary School (3.0 cr)
- CI 5417 - Elementary literacy Instruction for ESL Students (3.0 cr)
- CI 5442 - Literature for Adolescents (3.0 cr)
- CI 5462 - Evaluating and Assessing Writing (3.0 cr)
- CI 5475 - Teaching Digital Writing: Blogs, Wikis, Online Talk, Podcasting, and E-Portfolios to Teach Writing (3.0 cr)
- CI 5641 - Language, Culture, and Education (3.0 cr)
- CI 5647 - Teaching Middle and Secondary Immigrant and Refugee Students With Limited Formal Schooling (3.0 cr)
- CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
- CI 5660 - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)
- LGTT 5101 - Applications of Technology in Language Teaching (3.0 cr)
- ENGL 5630 [Inactive] (3.0 cr)
- ENGL 5790 - Topics in Rhetoric, Composition, and Language (3.0 cr)
- LING 5001 - Introduction to Linguistics (4.0 cr)
- LING 5461 - Conversation Analysis (3.0 cr)
- LING 5900 - Topics in Linguistics (1.0 - 4.0 cr)
- WRIT 5531 - Introduction to Writing Theory and Pedagogy (3.0 cr)
- EPSY 5612 - Understanding of Academic Disabilities (3.0 cr)
- EPSY 5615 - Advanced Academic Interventions (3.0 cr)
- EPSY 5618 - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- EPSY 5644 - Language Development and Programming for Deaf/Hard of Hearing Children (3.0 cr)
- EPSY 5646 - Reading and Writing Practices with Deaf/Hard of Hearing Children (2.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8117 - Writing Empirical Paper and Research/Grant Proposals in Education and Psychology (3.0 cr)
• SLS 5101 (Inactive) (1.0 cr)
• SLS 5401 (Inactive) (4.0 cr)
• SLS 5721 (Inactive) (3.0 cr)
• OLPD 5814 (Inactive) (3.0 cr)

Undergraduate Multicultural Teaching and Learning Postbaccalaureate Certificate

Postsecondary Teaching and Learning

College of Education and Human Development

Link to a list of faculty for this program.

Contact Information:
Department of Postsecondary Teaching and Learning, 206 Burton Hall, 178 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-626-8705; fax: 612-625-0709)
Email: pstlinfo@umn.edu

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Ugrd Multicultural Tchng & Lrng PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The post baccalaureate certificate in undergraduate multicultural teaching and learning aims to improve the quality of instruction and academic support for all undergraduates, particularly those who traditionally have been underprepared for and underserved in higher education. The required core courses are designed to provide opportunities to apply multicultural theory to practice and engage as reflective practitioners.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission

Special Application Requirements:
Students may apply to the undergraduate multicultural teaching and learning graduate certificate any time; there is no set application deadline. All applicants must complete the ApplyYourself online application and submit a personal statement. The personal statement should address: interest in the program; professional/academic or community qualifications; what the student will bring to the program, and; how completion of the certificate will build on the applicant's capacity to transform postsecondary teaching and learning. Visit http://www.cehd.umn.edu/PsTL/Certificate/apply.asp for more information about how to apply.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

To obtain the undergraduate multicultural teaching and learning graduate certificate, students must take 3 core courses (9 credits) and 1 elective course (3 credits) for a minimum of 12 course credits. The 3 core courses are listed below. Contact the DGS for information regarding the 3-credit elective requirement.

Core Courses
- PSTL 5105 - Increasing Access and Success in Undergraduate Classrooms (3.0 cr)
- PSTL 5106 - Multicultural Teaching and Learning in Diverse College Contexts (3.0 cr)
- PSTL 5212 - Multicultural Theories of College Student Development Applied to Teaching and Learning (3.0 cr)
Twin Cities Campus

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Organizational Leadership, Policy, and Development is a leader in advancing knowledge about educational and organizational change in local, national, and international contexts. The department's research, teaching, and outreach reflect a commitment to interdisciplinary and intercultural engagement with educators, scholars, and policy makers seeking to enhance leadership, policy, and development around the globe. Students in the M.A. and Ph.D. programs choose from one of five complementary but distinct program tracks: education policy and leadership (EPL), evaluation studies (ES), higher education (HE), comparative and international development education (CIDE), and human resource development (HRD). Undergraduate programs focus on human resource development and business and marketing education. In addition, the department offers a variety of programs for practicing professionals and various licensure programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Other requirements to be completed before admission:
Professional experience in a work and human resource education field or an undergraduate major in education with an appropriate content field.

Special Application Requirements:
When applying online, applicants should complete Statements #1 & 2. Filling out statement #3 optional. Applicants must also submit a résumé and personal statement (limit two pages) describing career goals and rationale for interest in the Work and Human Resource Education M.Ed. program. Two letters of recommendation from individuals who can attest to the applicant's potential are also required. Admissions are done on a rolling basis with the following semester deadlines: March 1 (Summer), July 1 (Fall), November 1 (Spring).

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
Program Requirements

Plan C: Plan C requires 17 to 21 major credits and 9 to 13 credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Coursework

Two plans are offered:

Plan I is for licensed educators planning to pursue advanced professional study and requires a minimum of 17 semester credits of OLPD courses.

Plan II is for professionals seeking additional education & requires a minimum of 21 semester credits. Students must complete all Plan I requirements. However, the Plan II specialization area must include at least one methods of instruction course.

General Aspects

OLPD 5806 - Philosophy and Practice of Career and Technical Education (2.0 cr)

or OLPD 5811 - Education for Work (3.0 cr)

or OLPD 5813 - Enhancing Work-based Learning Through Collaboration (2.0 cr)

or OLPD 5823 - Work-Based Learning Policies (2.0 cr)

Specialization

8-12 credits of OLPD courses with adviser approval depending if Plan I or Plan II

Research

OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)

Students electing Plan II must take an adviser approved methods of instruction course

Electives

Up to 13 credits with adviser approval, a minimum of 6 credits must come from outside the OLPD department

Integrating Project

Students work with their faculty adviser to select specialization courses consistent with their professional goals, select the course(s) to meet the general aspects requirement, and design and complete the integrating project. The proposed program must be reviewed and approved by departmental faculty.

OLPD 5893 - Directed Study in OLPD (1.0 - 4.0 cr)

Program Sub-plans

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

Comprehensive Work and Human Resource Education

This sub-plan is limited to students completing the program under Plan C.

All subplans in this major use same curriculum

Rochester

This sub-plan is limited to students completing the program under Plan C.

Requirements for this sub-plan are the same as those listed in general description. Students may take courses on the Twin Cities or Rochester campuses.
Youth Development Leadership M.Ed.

College of Education and Human Development

Youth Development Leadership (YDL) is a graduate degree offered for people who work with youth in traditional and nontraditional settings, and who are committed to the healthy development of young people. Effectiveness depends upon keeping up with the challenges facing today’s youth, which requires continual learning and professional growth. This degree is an excellent career opportunity for anyone working with youth, regardless of his or her previous academic background.

The M.Ed. in youth development leadership emphasizes:
- a community-based model of positive youth development;
- experiential learning models;
- leadership and community building by encouraging consultation among faculty, professional youth workers, fellow students, and young people;
- diverse, flexible, and interdisciplinary faculty and curriculum that provide an informed understanding of practices, policies, and ethics of youth development work;
- positive professional development;
- collaborative approach to learning;
- interdisciplinary curriculum;
- cohort of other youth work professionals, for supportive learning environment;
- diverse faculty dedicated to healthy youth development and committed to helping students develop a course of study that meets their professional and personal needs and interests.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A bachelor's degree from an accredited institution.

Other requirements to be completed before admission:
At least two years of experience working with youth.

Special Application Requirements:
All applicants must upload the following items to their online application in Apply Yourself:
- Résumé
- Personal statement describing career goals and rationale for interest in the M.Ed. program (limit two pages)
- Unofficial transcripts from all post-secondary institutions you have attended or are currently attending, including the University of Minnesota
- Letters of recommendation from at least two persons (e.g., administrators, colleagues, instructors) familiar with the applicant's performance who can attest to his or her capacity for youth development leadership
- Application fee, charged when the online application is submitted. Fee must be paid with a credit card.
Applications are accepted on a year-round basis.
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5

- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 20 major credits and 10 credits outside the major. There is no final exam. A capstone project is required.

**Capstone Project:** The portfolio is a demonstration and personal assessment of individual learning and leadership in youth development work and in the YDL program. Successful completion of the portfolio presentation to the student’s faculty committee of two or more faculty is the final requirement of the YDL program.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

**Required Coursework**

Students must take a total four credits of YOST 5960, in one credit increments, during their time in the program.

- **YOST 5952** - Everyday Lives of Youth (3.0 cr)
- **YOST 5954** - Experiential Learning: Pedagogy for Community and Classroom (3.0 cr)
- **YOST 5956** - Organizational Approaches to Youth Development (3.0 cr)
- **YOST 5958** - Community: Context for Youth Development Leadership (3.0 cr)
- **YOST 5960** - Seminar in Youth Development Leadership (1.0 - 4.0 cr)
- **YOST 5962** - Leadership Field Experience: Youth Development (4.0 cr)

**Elective Credits**

10 or more elective credits must be selected with approval of faculty adviser.

Animal Sciences M.S.
Animal Science
College of Food, Agricultural and Natural Resource Sciences

Link to a list of faculty for this program.

Contact Information:
Department of Animal Science, 305 Haecker Hall, 1364 Eckles Avenue, Saint Paul, MN 55108 (612-624-3491; fax: 612-625-5789)
Email: ansci@umn.edu
Website: http://www.anisci.umn.edu/GraduateProgram/index.htm

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students in the animal sciences M.S. concentrate on one of the animal sciences subdisciplines: genetics, growth biology, nutrition, physiology, or production systems. Students have the option of tailoring their individual programs to include study in more than one subdiscipline and to emphasize basic or applied science.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The Plan B project requires approximately 120 hours to complete. The nature and extent of the project is agreed upon in advance by the student and faculty adviser.
This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Plan A requires a minimum of 14 semester credits in the major and 6 credits in a designated minor or related field outside the major. Selection of courses to fulfill this requirement and development of the thesis project are primarily the responsibility of the student and faculty adviser. Students also must register for a minimum of 10 thesis credits.

Plan B requires a minimum of 30 credits, which must include 14 or more credits in the major area and at least 6 credits in one or more related fields outside the major. The balance of credits is chosen by agreement between the adviser and student. In addition to coursework, students must complete the Plan B Capstone Project, which requires approximately 120 hours. The nature and extent of the project is agreed upon in advance by the student and faculty adviser.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 72
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students in the Ph.D. program concentrate on one of the animal sciences subdisciplines: genetics, growth biology, nutrition, physiology, or production systems. Students have the option of tailoring their program to include study in more than one subdiscipline and to emphasize basic or applied science.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in agriculture or a biological field with training in biology, chemistry, physics, and mathematics is required.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
40 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.
This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The Ph.D. degree is granted chiefly in recognition of the candidate's achievements and knowledge in a specific field. Students must register for a minimum of 24 thesis credits. Appropriate graduate level courses taken at another university may be approved for transfer. Coursework completed under an M.S. program can be counted towards the Ph.D. degree. The student is expected to maintain a B average or better in all coursework.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.S. degree in applied economics prepares students for employment opportunities in the public and private sector and for further graduate study. This rigorous but flexible program includes core coursework in economic theory and quantitative methods and offers opportunities for specialized coursework and research in all the fields of study offered by the program.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
The following coursework is considered the minimum preparation for the M.S. program: micro and macroeconomic theory at the intermediate undergraduate level, statistics, two semesters of calculus, and introductory linear algebra. Additional coursework in economics, statistics, and math is highly desirable and recommended, especially for students who intend to apply for the doctoral program after completion of the M.S. degree.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE, three letters of recommendation from persons familiar with the applicant's scholarship and research potential, a complete set of college or university transcripts, and a clearly written statement of academic and career interests, goals, and objectives. For complete application instructions, visit the website: http://www.apecgrad.umn.edu/Admissions/index.htm. Students should apply by the December deadline to ensure priority consideration for admissions and funding.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language.
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A:** Plan A requires 14 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 14 major credits and 0 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** A project that demonstrates familiarity with the theoretical and empirical tools of economics. The Plan B project requires between 4 and 6 project credits (APEC 8793).

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

M.S. students are required to complete graduate-level courses in microeconomic theory, macroeconomic theory, and econometrics or statistics. Students are also required to participate in two 1-credit M.S. seminars. Both Plan A and Plan B require at least 30 credits, of which at least 14 credits must be in the major field. The major field must include a minimum of 9 credits in applied economics (excluding thesis and special topics, independent study, and the M.S. seminar). Plan A requires 10 thesis credits. Plan B requires a 4- to 6-credit project.

For more information about program requirements, refer to the department's Graduate Program Student Handbook: http://www.apecgrad.umn.edu/ prod/groups/ cfans/@pub/@ cfans/@ apec/documents/ asset/ cfans_asset_352638.pdf.

Email: apecdgs@umn.edu
Website: http://www.catalogs.umn.edu/grad/programs/g004.html

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 48
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Ph.D. degree program in applied economics prepares students for careers in academia, government, and the private sector. This rigorous program includes core coursework in economic theory, quantitative methods, and two fields of specialization selected from the following: consumer behavior and household economics; production and marketing economics; trade and development economics; natural resource and environmental economics; health economics; labor economics; and policy analysis.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The minimum preferred undergraduate GPA for admittance to the program is a B average (3.00/4.00). Most admitted students will have a higher GPA.

Other requirements to be completed before admission:
Applicants for the Ph.D. degree should have completed an M.S. degree in economics, agricultural economics, or a related field; or have equivalent coursework and research experience. Applicants without a master's degree are, except in a few special cases, considered for admission into the M.S. program.

Prior training should include micro- and macro-economic theory at the master's level, multivariate calculus, differential equations and linear algebra, and mathematical statistics. Students lacking background in economics or quantitative methods may be required to complete additional coursework before entering the program.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE, three letters of recommendation from persons familiar with the applicant's scholarship and research potential, a complete set of college or university transcripts, and a clearly written statement of academic and career interests, goals, and objectives. For complete application instructions, visit the website: http://www.apecgrad.umn.edu/Admissions/index.htm. Students should apply by the December deadline to ensure priority consideration for admissions and funding.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  • IELTS
    - Total Score: 6.5
  • MELAB
    - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Most students take at least 40 credits of coursework and must take 24 thesis credits. Required courses in microeconomic theory, macroeconomic theory and applied econometrics and at least two-thirds of the remaining credits included in the PhD degree program are to be completed on the A-F grade basis. The student must pass a written preliminary exam in microeconomic theory and at least one field examination in one of the seven Ph.D. fields offered by the Applied Economics Graduate Program. In addition, there is a requirement for a qualifying paper written in the second year of the program.

After passing the written preliminary examinations, the student must take a preliminary oral exam. This exam can be on coursework, a thesis prospectus, or some combination. It is administered by a committee of four persons, to include three from the Applied Economics Graduate Program and one other graduate faculty from outside the program. At the conclusion of the thesis research, students complete a final oral examination, which consists of a public seminar (in which the candidate presents the thesis) and a closed meeting between the candidate and the appointed examining committee.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Applied plant sciences is an interdisciplinary program for educating students to become professional scientists well grounded in the applied disciplines of agronomy/agroecology, horticulture, and plant breeding/molecular genetics. Graduates of the program are able to provide innovative leadership and contribute to problem solving within their disciplines in the public or private sector and within society at large. The program develops the quantitative and qualitative research skills necessary to conduct high quality research and scholarship. Students gain broad familiarity with all of the disciplines within the program and gain in-depth knowledge within their area of expertise. The program's graduate faculty is drawn primarily from the Department of Agronomy and Plant Genetics and the Department of Horticultural Science; but also from the Departments of Plant Biology; Plant Pathology; Soil, Water, and Climate; Landscape Architecture; and related departments. Students choose from among four specialization tracks: agronomy/agroecology, applied plant sciences, horticulture, or plant breeding/plant molecular genetics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students entering the program should have a foundation in the physical and biological sciences, preferably with some emphasis in plant science. A minimum of 10 credits of math and physics, 12 credits of chemistry and biochemistry, and 15 credits of biological and/or agricultural sciences are recommended for admission. In addition, students should have completed a B.S. or B.A. degree in agriculture, biology, or other related life science. Students with a B.S. or B.A. degree outside these areas may be admitted with the requirement that they take the prerequisite courses noted above at the undergraduate level in addition to their graduate coursework.

Special Application Requirements:
Applicants must submit scores from the General (Aptitude) Test of the GRE; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of transcripts; and a clearly written personal statement of career interests, goals, and objectives as part of the online application. Students should apply by December 5 for admission into fall semester of the following year. Students should apply by October 1 for admission into spring semester of the following year.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
IELTS  
- Total Score: 6.5

MELAB  
- Final score: 550

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: Determined in consultation with advisor.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The M.S. is offered under Plan A (with thesis) and Plan B (with project). Plan A requires a minimum of 20 course credits and 10 thesis credits; Plan B requires a minimum of 30 course credits. Students are required to complete the courses in the common curriculum and the requirements for their specialization, and to present one graduate seminar. Additional course requirements are flexible and are determined in consultation with the student's adviser(s) and advisory committee. Required core courses are counted toward the required credits.

Required courses

All APS graduate students are required to take a group of core courses
- AGRO 5311 - Research Methods in Crop Improvement and Production (1.0 cr)
- AGRO 8270 - Graduate Seminar (1.0 cr)
- APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)

Program Sub-plans

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

Agronomy and Agroecology

Students conduct research to increase their knowledge of cropping systems and weed science, including alternative approaches and management strategies. Emphasis is on improving production efficiency and profitability in an environmentally sound approach that benefits society. Mechanisms of crop physiology and ecology underlying plant responses to the environment are a particular emphasis of this track.

M.S. Plan A degree: In addition to the 6.5 credits in program-wide required courses, students must complete two agroecology/agronomy courses:
- AGRO 4005 - Applied Crop Physiology and Development (4 cr)
- AGRO 4505 - Integrated Weed Management (3 cr)
- AGRO 4401 - Plant Genetics and Breeding (4 cr)
- SAGR 8010 - Sustainable Agriculture Colloquium (2 cr)
- AGRO 5321 - Ecology of Agricultural Systems (3 cr)
- AGRO 5999 - Special Topics: Agro-ecosystems Analysis Summer Field Course (3 cr);

A course in plant biology such as:
- PBIO 5516 - Plant Cell Biology (3 cr)
- PBIO 5412 - Plant Physiology (3 cr)
At least one other course from the following suggested courses:

BIOL 5407 - Ecology (3 cr)
EEB 4068 - Plant Physiological Ecology (3 cr)
EEB 4609 - Ecosystem Ecology (3 cr)
EEB 5053 - Ecology: Theory and Concepts (4 cr)
HORT 5071 - Restoration and Reclamation Ecology (3 cr)
ESPM 5108 - Ecology of Managed Systems (4 cr)
ESPM 5345 - Sustainable Land Use Planning and Policy (3 cr)

Courses listed within the agroecology/agronomy, plant biology, and ecology groups are provided as a guide for students and faculty. Other courses can be substituted with agreement of the adviser, advisory committee, and DGS.

**Required courses**

AGRO 5311 - Research Methods in Crop Improvement and Production (1.0 cr)
AGRO 8270 - Graduate Seminar (1.0 cr)
APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
STAT 5021 - Statistical Analysis (4.0 cr)

**Horticulture**

Students conduct research related to fruits, vegetables, potatoes, flowers, ornamental trees and shrubs, or turf; on the physiology, production, environmental impact of cropping systems; and use of horticultural crops. Research areas include the effect of horticultural commodities on human health, hormonal, and stress physiology; flower development and flowering physiology; integrated pest management; post harvest physiology; and cropping system strategies. Students get a broad range of experiences in the field, greenhouse, and/or laboratory using genetic, molecular, biochemical, and ecological tools to answer research questions.

In addition to the 6.5 credits in program-wide required courses, students must complete at least 14 course credits from the following courses:

**Area 1 - Cross Commodity Horticulture**

HORT 4071W - Applications of Biotechnology to Plant Improvement (4 cr)
AGRO 4505 - Integrated Weed Management (4 cr)
HORT 4461 - Horticultural Marketing
HORT 5007 - Advanced Plant Propagation (3 cr) (Sp even yrs)
HORT 5023 - Public Garden Management (2 cr)
STAT 5302 - Applied Regression Analysis (4 cr)
AGRO 5221 - Ecology of Agricultural Systems (3 cr)
MKTG 6051 - Marketing Research (4 cr)
MKTG 6055 - Buyer Behavior (4 cr)
MBA 6210 - Marketing Management (3 cr)
SAGR 8010 - Colloquium in Sustainable Agriculture (2 cr)
HORT 8044 - Manipulation of Plant Growth and Reproduction (2 cr), Spring (even yrs)

**Area 2 - Commodity-based Horticulture**

HORT 4061 - Turfgrass Management (4 cr)
HORT 4062 - Turfgrass Weed and Disease Science (3 cr), Fall (odd yrs)
HORT 4063 - Turfgrass Science (3 cr)
HORT 4141W - Plant Production I (4 cr)
HORT 5031 - Organic Viticulture and Fruit Production (3 cr), Fall (odd yrs)
HORT 5032 - Organic Vegetable Production (3 cr), Spring (odd yrs)
HORT 5051 - Plant Production II (4 cr)
HORT 5071 - Restoration and Reclamation Ecology (3 cr)

**Required Courses**

AGRO 5311 - Research Methods in Crop Improvement and Production (1.0 cr)
AGRO 8270 - Graduate Seminar (1.0 cr)
APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
STAT 5021 - Statistical Analysis (4.0 cr)

**Plant Breeding and Plant Molecular Genetics**

This track allows students to select from genetic research projects ranging from applied plant breeding projects emphasizing breeding procedures and methodologies to molecular genetic projects doing biotechnology, genetic engineering, and genomic research in agronomic and horticultural crops. These research projects give students the opportunity to integrate the latest developments in the laboratory with applied applications in the field to reach the overarching goal of developing new germplasm that will improve the sustainability of our food/feed/fiber/fuel systems.
In addition to the 6.5 credits in program-wide required courses, students must complete at least 14 course credits from the following courses:

- AGRO/HORT 8280 - Current Topics in Applied Plant Sciences (1 cr)
- or AGRO 8010 - Colloquium in Sustainable Agriculture (2 cr)
- Molecular Genetics Area (3 cr)
- Genetics Area (3 cr)
- Plant Breeding Area (3 cr)
- Additional courses determined by student/committee (6 cr).

**Required courses**

- AGRO 5311 - Research Methods in Crop Improvement and Production (1.0 cr)
- AGRO 8270 - Graduate Seminar (1.0 cr)
- APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)

Program Requirements
30 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semester must be completed before filing a Degree Program Form.

Ph.D. students are required to complete the courses in the common curriculum, the requirements for their respective specialization, and present one graduate seminar; 24 thesis credits are also required. Additional course requirements are flexible and are determined in consultation with the student's adviser(s) and advisory committee.

Required core courses are counted toward the required 30 credits.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Agronomy and Agroecology
Students conduct research to increase their knowledge of cropping systems and weed science, including alternative approaches and management strategies. Emphasis is on improving production efficiency and profitability in an environmentally sound approach that benefits society. Mechanisms of crop physiology and ecology underlying plant responses to the environment are a particular emphasis of this track.

Two agroecology/agronomy courses:
AGRO 4005 - Applied Crop Physiology and Development (4 cr)
AGRO 4401 - Plant Genetics and Breeding (4 cr)
AGRO 4505 - Integrated Weed Management (3 cr)
SAGR 8010 - Sustainable Agriculture Colloquium (2 cr)
AGRO 5521 - Ecology of Agricultural Systems (3 cr)
AGRO 5999 - Special Topics: Agro-ecosystem Analysis Summer Field Course (3 cr)

A course in plant biology such as:
PBIO 5412 - Plant Physiology (3 cr)
PBIO 5416 - Plant Morphology, Development, and Evolution (4 cr)

Ecology courses such as the following:
BIOL 5407 - Ecology (3 cr)
EEB 4068 - Plant Physiological Ecology (3 cr)
EEB 4609 - Ecosystem Ecology (3 cr)
EEB 5053 - Ecology: Theory and Concepts (4 cr)
HORT 5071 - Restoration and Reclamation Ecology (3 cr)
ESPM 5108 - Ecology of Managed Systems (4 cr)
ESPM 5245 - Sustainable Land Use Planning and Policy (3 cr)

Required courses
AGRO 5311 - Research Methods in Crop Improvement and Production (1.0 cr)
AGRO 8270 - Graduate Seminar (1.0 cr)
APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
GRAD 8101 - Teaching in Higher Education (3.0 cr)
SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)
STAT 5021 - Statistical Analysis (4.0 cr)

Horticulture
Students conduct research related to fruits, vegetables, potatoes, flowers, ornamental trees and shrubs, or turf; and on the physiology, production, environmental impact of cropping systems, and use of horticultural crops. Research areas include the effect of horticultural commodities on human health, hormonal, and stress physiology; flower development and flowering physiology; integrated pest management; post harvest physiology; and cropping system strategies. Students get a broad range of experiences in the field, greenhouse, and/or laboratory using genetic, molecular, biochemical, and ecological tools to answer research questions.

Specialization courses:
Area 1 - Cross Commodity Horticulture
HORT 4071W - Applications of Biotechnology to Plant Improvement (4 cr)
AGRO 4505 - Integrated Weed Management (4 cr)
HORT 4461 - Horticultural Marketing
HORT 5007 - Advanced Plant Propagation (3 cr), Spring (even yrs)
AGRO 5021 - Introduction to Plant Breeding (3 cr)
HORT 5023 - Public Garden Management (2 cr)
STAT 5302 - Applied Regression Analysis (4 cr)
AGRO 5321 - Ecology of Agricultural Systems (3 cr)
MKTG 6051 - Marketing Research (4 cr)
MKTG 6055 - Buyer Behavior (4 cr)
MBA 6210 - Marketing Management (3 cr)
SAGR 8010 - Colloquium in Sustainable Agriculture (2 cr)
HORT 8023 - Evolution of Crop Plants (3 cr)
HORT 8044 - Manipulation of Plant Growth and Reproduction (2 cr), Spring (even yrs)
AGRO 8305 - Physiological Ecology of Plants in Natural and Managed Ecosystems (4 cr)
AGRO 8605 - Advanced Management of Agroecosystems (3 cr)

Area 2 - Commodity-based Horticulture
HORT 4061 - Turfgrass Management (4 cr)
HORT 4062 - Turfgrass Weed and Disease Science (3 cr), Fall (odd yrs)
HORT 4063 - Turfgrass Science (3 cr)
HORT 4141W - Plant Production I (4 cr)
HORT 5031 - Organic Viticulture and Fruit Production (3 cr), Fall (odd yrs)
HORT 5032 - Organic Vegetable Production (3 cr) Spring (odd yrs)
HORT 5051 - Plant Production II (4 cr)
HORT 5071 - Restoration and Reclamation Ecology (3 cr)

Required courses
AGRO 5311 - Research Methods in Crop Improvement and Production (1.0 cr)
APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
GRAD 8101 - Teaching in Higher Education (3.0 cr)
HORT 8270 - Graduate Seminar (1.0 cr)
SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)

Plant Breeding and Plant Molecular Genetics
This track allows students to select from genetic research projects ranging from applied plant breeding projects emphasizing breeding procedures and methodologies to molecular genetic projects doing biotechnology, genetic engineering, and genomic research in agronomic and horticultural crops. These research projects give students the opportunity to integrate the latest developments in the laboratory with applied applications in the field to reach the overarching goal of developing new germplasm that will improve the sustainability of our food/feed/fiber/fuel systems.

Molecular Genetics Area (3 cr)
Genetics Area (3 cr)
Plant Breeding Area (3 cr)
Additional courses determined by student/advisory committee (12 credits) from these suggested areas and course:

Genetics area:
EEB 5042 - Quantitative Genetics (3 cr), Fall
GCD 8131 - Advanced Genetics and Genomics (3 cr), Spring
Molecular Genetics area:
GCD 4034 - Molecular Genetics, (3 cr), Spring
AGRO 8241 - Chromosomal and Molecular Genetics of Plant Improvement (3 cr), Spring (odd years)

Plant Breeding area:
AGRO/HORT 8201 - Advanced Plant Breeding (3 cr), Fall (odd years)
AGRO 8202 - Breeding for Quantitative Traits in Plants (3 cr), Spring (even years)

Required courses
AGRO 5311 - Research Methods in Crop Improvement and Production (1.0 cr)
AGRO 8270 - Graduate Seminar (1.0 cr)
APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
GRAD 8101 - Teaching in Higher Education (3.0 cr)
SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)
STAT 5021 - Statistical Analysis (4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of science degree in the bioproducts and biosystems science engineering and management (BBSEM) graduate program provides a strong foundation in the basic sciences, engineering, and management in support of the renewable bio-resources utilization, environmental quality, and national security while improving our global competitiveness. The areas of specialization include bioproducts science and engineering, biosystems science and engineering, and bioproducts marketing and management.

Bioproducts science and engineering specialization focuses on the fundamental science and engineering of the various manufacturing processes used in sustainable conversion of biomass into bio-based industrial and consumer products and their effective end-use applications. Bioproducts include "green" materials, chemicals and energy derived from bio-resources including biofuels, bioenergy, biocomposites, bio-based plastics, adhesives, pulp and paper, building materials, and more.

Biosystems science and engineering specialization is designed for students who seek to develop a strong foundation in physical sciences and engineering principles which are applied to important problems involving biological systems. Potential areas of interest include water and soil management and protection; livestock environment; food engineering and value-added processing; machinery systems design; grain quality; safety, health, and risk management; renewable energy systems; and waste management.

Bioproducts marketing and management specialization is designed for graduate students who seek to build on a strong diverse background encompassing liberal arts, basic sciences, communications and product development, and marketing and management of bioproducts.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students seeking a master's degree should have a bachelor's degree in engineering, mathematics, the physical or biological sciences, or a related field from a recognized U.S or international university. Applicants should have a performance level on previous academic work required for a degree of at least a 3.0 GPA (on a 4.0 grading scale).

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  • IELTS
    - Total Score: 6.5
  • MELAB
    - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 20 major credits and 10 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Students complete a smaller project or projects that involve a total of about 120 hours of work, and write a Plan B paper on their project.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

All master's level students must take BBE 8001 - Seminar I (1 cr) and BBE 8002 - Seminar II (1 cr). All master's level students must take BBE 8013 - Parameter Estimation (3 cr) unless they can demonstrate to the BBE 8013 instructor that they have already mastered the course material or have justified the selection of a suitable alternative.

Degree programs are expected to include mostly 5xxx and 8xxx courses. The graduate degree program may contain no more than 9 credits of 4xxx level coursework. If a master's degree program includes more than 4 credits of special problems or advanced problems courses, students and their advisers are asked to include a letter of explanation when the degree program is submitted for approval.

Website: http://www.bbe.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The bioproducts and biosystems science engineering and management (BBSEM) graduate program provides a strong foundation in the basic sciences, engineering, and management in support of the renewable bio-resources utilization, environmental quality, and national security while improving our global competitiveness. The areas of specialization include bioproducts science and engineering, biosystems science and engineering, and bioproducts marketing and management.

Bioproducts science and engineering specialization focuses on the fundamental science and engineering of the various manufacturing processes used in the sustainable conversion of biomass into bio-based industrial and consumer products and their effective end-use applications. Bioproducts include "green" materials, chemicals and energy derived from bio-resources including biofuels, bioenergy, biocomposites, bio-based plastics, adhesives, pulp and paper, building materials, and more. Biosystems science and engineering specialization is designed for students who seek to develop a strong foundation in physical sciences and engineering principles which are applied to important problems involving biological systems. Potential areas of interest include water and soil management and protection; livestock environment; food engineering and value-added processing; machinery systems design; grain quality; safety, health, and risk management; renewable energy systems; and waste management. Bioproducts marketing and management specialization is designed for graduate students who seek to build on a strong diverse background encompassing liberal arts, basic sciences, communications and product development, and marketing and management of bioproducts.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
The student must be in good standing in their degree program to apply for this minor.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

For master's students, a minor consists of at least 6 credits of BBE courses numbered 4xxx or higher. For doctoral students, a minor consists of at least 12 credits of BBE courses numbered 4xxx or higher.
Twin Cities Campus

Bioproducts and Biosystems Science, Engineering and Management Ph.D.

Contact Information:
Department of Bioproducts and Biosystems Engineering, Biosystems and Agricultural Engineering Building, 1390 Eckles Avenue, St. Paul, MN  55108 (612-625-7733; fax: 612-624-3005)
Email: bbe@umn.edu
Website: http://www.bbe.umn.edu

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Ph.D. degree offered by the bioproducts and biosystems science engineering and management (BBSEM) graduate program provides a strong foundation in the basic sciences, engineering, and management in support of the renewable bio-resources utilization, environmental quality, and national security while improving our global competitiveness. The areas of specialization include bioproducts science and engineering, biosystems science and engineering, and bioproducts marketing and management.

Bioproducts science and engineering specialization focuses on the fundamental science and engineering of the various manufacturing processes used in the sustainable conversion of biomass into bio-based industrial and consumer products and their effective end-use applications. Bioproducts include "green" materials, chemicals and energy derived from bio-resources including biofuels, bioenergy, biocomposites, bio-based plastics, adhesives, pulp and paper, building materials, and more.

Biosystems science and engineering specialization is designed for students who seek to develop a strong foundation in physical sciences and engineering principles which are applied to important problems involving biological systems. Potential areas of interest include water and soil management and protection; livestock environment; food engineering and value-added processing; machinery systems design; grain quality; safety, health, and risk management; renewable energy systems; and waste management.

Bioproducts marketing and management specialization is designed for graduate students who seek to build on a strong diverse background encompassing liberal arts, basic sciences, communications and product development, and marketing and management of bioproducts.

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

Students seeking the Ph.D. should have a bachelor's degree in engineering, mathematics, the physical or biological sciences, or a related field from a recognized U.S. or international university.

Students seeking the Ph.D. should have a master's degree in engineering, mathematics, the physical or biological sciences, or a related field from a recognized U.S. or international university.

Special Application Requirements:
Students seeking the Ph.D. should also have a master's degree in engineering, mathematics, the physical or biological sciences, or a related field from a recognized U.S. or international university. Applicants should have a performance level on previous academic work required for a degree of at least a 3.2 GPA (on a 4.0 grading scale). Students expecting to pursue a Ph.D. normally complete a master of science Plan A degree before starting their Ph.D. programs. Exceptional students who want to go straight to the Ph.D. from the bachelor's level may be admitted subject to conditions agreed upon by the adviser, the director of graduate studies, and the graduate program coordinator.
Applicants must submit their test score(s) from the following:

- GRE

International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

33 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

All Ph.D. degree programs must include BBE 8001 - Seminar I (1 cr), BBE 8002 - Seminar II (1 cr). Any of these courses taken at the master’s level count toward the Ph.D. and do not have to be retaken.

The Ph.D. in bioproducts and biosystems science engineering and management requires extended study and intense intellectual effort conducting cutting-edge research and advancing the forefront of knowledge in the subject matter area. Students develop skills that enable them to define problems or research questions, plan research, conduct independent research and/or lead research efforts, analyze data, and effectively communicate research results to a variety of audiences. All Ph.D. degree programs must include a minimum of 45 graduate course credits beyond the B.S. degree and a minimum of 24 doctoral thesis credits (BBE 8888). A minimum of 12 course credits must be in a minor field or in a supporting program. Ph.D. degree programs should contain a minimum of 9 course credits in a concentrated area of scientific or mathematical theoretical development that is related to the student’s research, and may contain up to 3 credits of enrichment courses.

Website: http://www.consbio.umn.edu

• Program Type: Master's
• Requirements for this program are current for Fall 2014
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Conservation Biology (CB) Program has two complementary objectives leading to a unique multidisciplinary program. The first is to provide students with sound graduate training in the biological sciences relevant to the global conservation of plants, animals, and ecosystems. The second objective promotes the study of social, political, and economic sciences that relate to recognition and solution of conservation problems. Students may select a named track, fisheries and aquatic biology, which offers an aquatic specialization. Students may also pursue a joint degree in law and conservation biology through the joint law degree program. The overall goal of the program is to prepare students to develop solutions or approaches to address problems that are scientifically and environmentally sound and likely to be acted upon or implemented within their social and political context.

Program Delivery
This program is available: • via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A B.S./B.A. degree in biology or a closely related field is preferred. Applicants with a baccalaureate degree in another field are accepted, but may be required to take selected courses in biology.

Special Application Requirements:
A statement of career goals and three letters of recommendation evaluating the applicant's potential for graduate study are required. Scores less than five years old from the General Test of the GRE are required. TOEFL is required for applicants who speak English as a second language. Applicants to the joint law degree program must also apply to the Law School. Application deadline is December 15. Typically, students only are admitted for fall semester.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 14 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Plan B master's students must demonstrate familiarity with the tools of research or scholarship in their major field, the ability to work independently, and the ability to present the results of their investigation effectively, by completing at least one Plan B project. The Plan B project should involve a combined total of approximately 120 hours (the equivalent of three full-time weeks) of work. The advisory committee specifies both the nature and extent of the options available to satisfy this requirement, subject to approval by the DGS. The Plan B project must be satisfied independent of the courses in the student's program.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

Students must complete a minimum of 30 credits in the biological and social aspects of conservation biology. For Plan A students, 10 of these credits are thesis credits; for Plan B students, 10 of these credits are for electives.

**Joint- or Dual-degree Coursework:** Joint Degree in Conservation Biology and Law

Student may take a total of 12 credits in common among the academic programs.

**Program Sub-plans**

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

**Fisheries and Aquatic Biology**

Three-quarters of the global ecosystem is water and most is a global commons. Many biologists and economists argue that freshwater is one of the most critical global resources and that the functional integrity and biodiversity within freshwater and marine ecosystems are highly threatened. The Fisheries and Aquatic Biology (FAB) track is available for M.S., Ph.D., and joint degree students wishing to emphasize this concentration within a CB major. The track name can be indicated on the student's transcript (this is optional) and may be useful to the graduate for obtaining jobs with many federal and state agencies where such expertise is specified in job announcements or hiring criteria. The track designation clearly indicates that the student has specialized coursework and research or project experience leading to expertise in fisheries or aquatic biology. Combined with a typical undergraduate degree in biology or natural resource science, careful selection of courses in the graduate program will satisfy the educational requirements for professional certification by the American Fisheries Society.

Students in the track must be advised or co-advised by a faculty member affiliated with the track. Requests for admission to the track may be made during the application process or at any time after the student is admitted to the CB graduate program. Students in the track must meet all requirements for the M.S. in CB.

Students who designate this track will be expected to work closely with their Student Advisory Committee (SAC) to develop an appropriate course of study. The track coordinator will review each student's academic program to examine how track expectations are met and forward it with a recommendation to the DGS for approval.

In addition to course requirements for the conservation biology major, students in the FAB track will take at least two 3 cr courses from the following list:

- EEB 5601 - Limnology (3 cr)
- ENT 5361 - Aquatic Insects (3 cr)
- FW 4136 - Ichthyology (4 cr)
- FW 4401 - Fish Physiology and Behavior (4 cr)
- FW 5003 - Human Dimensions of Biological Conservation (3 cr)
- FW 5601 - Fisheries Population Analysis (3 cr)
- OR FW 5051 Analysis of Populations - (4 cr)
- FW 5604 - Fisheries Ecology and Management (3 cr)
- FW 8448 - Fishery Science (3 cr)
- FW 8459 - Stream and River Ecology (3 cr)
FW 8465 - Fish Habitats and Restoration (3 cr)
ESPM 5061 - Water Quality and Natural Resource (3 cr)
ESPM 5575 - Wetlands Conservation (3 cr)
EPSP 5111 Hydrology and Water Quality Field Methods (3 cr)
EEB 5605 Limnology Laboratory (2 cr)
EEB 8601 Introduction to Stream Restoration (3 cr)
EEB 8602 Stream Restoration Practice (2 cr)
FR 5114 Hydrology and Watershed Management (3 cr)
FR 5153 Forest and Wetland Hydrology (3 cr)

Other advanced courses or colloquia on fisheries or aquatic biology that are not listed here may also satisfy needs of students in the track. In addition, master’s students are required to enroll for at least one semester of FW 8200 - Seminar for 1 credit.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
A B.S./B.A. degree in biology or a closely related field is preferred. Applicants with a baccalaureate degree in another field are accepted, but these individuals may be required to take selected courses in biology. In general, Ph.D. applicants holding a baccalaureate degree are first expected to complete a master's degree.

Special Application Requirements:
A statement of career goals and three letters of recommendation evaluating the applicant's potential for graduate study are required. Letters of recommendation should be sent directly to the Conservation Biology Program Office. Scores less than five years old from the General Test of the GRE are required. TOEFL is required for applicants who speak English as a second language. Applicants to the joint law degree program must also apply to the Law School. Application deadline is January 1. Typically, students are admitted only for fall semester.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
Program Requirements
12 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Ph.D. students complete 48 credits, 24 credits in courses and 24 thesis credits. Students are expected to show competency in both the biological and social sciences. With their advisory committee, students develop a program that emphasizes the ecological and social aspects of conservation biology. Dissertation research may require proficiency in supporting areas (e.g., statistics, computing, communications).

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Fisheries and Aquatic Biology
Three-quarters of the global ecosystem is water and most is a global commons. Many biologists and economists argue that freshwater is one of the most critical global resources and that the functional integrity and biodiversity within freshwater and marine ecosystems are highly threatened. The Fisheries and Aquatic Biology (FAB) track is available for M.S., Ph.D., and joint degree students wishing to emphasize this concentration within a CB major. The track name can be indicated on the student's transcript (this is optional) and may be useful to the graduate for obtaining jobs with many federal and state agencies where such expertise is specified in job announcements or hiring criteria. The track designation clearly indicates that the student has specialized coursework and research or project experience leading to expertise in fisheries or aquatic biology. Combined with a typical undergraduate degree in biology or natural resource science, careful selection of courses in the graduate program will satisfy the educational requirements for professional certification by the American Fisheries Society.

Students in the track must be advised or co-advised by a faculty member affiliated with the track. Request for admission to the track may be made during the application process or any time after the student is admitted to the CB graduate program. Students in the track must meet all requirements for the Ph.D. in CB.

Students who designate this track will be expected to work closely with their Student Advisory Committee (SAC) to develop an appropriate course of study. The track coordinator will review each student's academic program to examine how track expectations are met and forward it with a recommendation to the DGS for approval.

In addition to course requirements for the conservation biology major, students in the FAB track must take at least three courses from the following list:
EEB 5601 - Limnology (3 cr)
ENT 5361 - Aquatic Insects (3 cr)
FW 4136 - Ichthyology (4 cr)
FW 4401 - Fish Physiology and Behavior (4 cr)
FW 5003 - Human Dimensions of Biological Conservation (3 cr)
FW 5601 - Fisheries Population Analysis (3 cr)
OR FW 5051 Analysis of Populations - (4 cr)
FW 5604 - Fisheries Ecology and Management (3 cr)
FW 8448 - Fishery Science (3 cr)
FW 8459 - Stream and River Ecology (3 cr)
FW 8465 - Fish Habitats and Restoration (3 cr)
ESPM 5061 - Water Quality and Natural Resource (3 cr)
ESPM 5575 - Wetlands Conservation (3 cr)
EPMS 5111 Hydrology and Water Quality Field Methods (3 cr)
EEB 5605 Limnology Laboratory (2 cr)
EEB 8601 Introduction to Stream Restoration (3 cr)
EEB 8602 Stream Restoration Practice (2 cr)
FR 5114 Hydrology and Watershed Management (3 cr)
FR 5153 Forest and Wetland Hydrology (3 cr)

Other advanced courses or colloquia on fisheries or aquatic biology that are not listed here may also satisfy needs of students in the track. In addition, doctoral students are required to enroll for at least two semesters of FW 8200 - Seminar for 1 credit per semester.

- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Entomology centers on the study of insects and includes specializations in ecology, behavior, molecular biology, microbiology, neurobiology, physiology, population dynamics, systematics, and taxonomy. Specialized or applied areas include apiculture, biological control, cell culture, insect conservation, insect-vector relations, integrated pest management, and modeling. Research programs are active in aquatic systems, forest systems, crop and animal agriculture, human health, and natural and urban environments.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
A bachelor's degree with a major in a biological science is a prerequisite. Preference is given to students with a broad background in the basic sciences. Admission depends primarily on applicant's undergraduate record, letters of recommendation, and the statement of interest from the applicant.

Special Application Requirements:
Applicants must submit a complete set of official transcripts and a clearly written statement of career interests, goals, and objectives. Three letters of recommendation are required from persons well acquainted with the student's academic record, and should be either uploaded or sent directly to the department.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students must present one graduate seminar (ENT 8300) and must take Scientific Communication and Ethics (ENT 8061). Students must also pass two written examination questions. The core curriculum courses are: ENT 5021 - Insect Taxonomy and Phylogeny, ENT 5011 - Insect Structure and Function, and either ENT 5042 - Insect Ecology or ENT 5045 - Insect Population Dynamics.

Plan B students must take 6 credits of ENT 5910 - Special Problems in Entomology as part of the 20 credits of required entomology courses. For both plans: All courses are flexible and are determined in consultation with the adviser and other members of the student's advisory committee. Plan A is recommended for students contemplating a career in entomological research.

Requirements for the M.S., supplemental to general Graduate Education requirements, include a minimum of 14 course credits in entomology including a core curriculum of fundamental entomology courses and 1 credit of graduate seminar. Additional requirements include 6 credits from other programs to make a total of at least 20 course credits for Plan A or at least 30 course credits for Plan B students (must take 6 credits of ENT 5910). These courses are flexible and are determined in consultation with the adviser and other members of the student's advisory committee. Plan A is recommended for students contemplating a career in entomological research.

**Course Group 0**

• Program Type: Doctorate
• Requirements for this program are current for Fall 2014
• Length of program in credits: 51
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Entomology centers on the study of insects and includes specializations in ecology, behavior, molecular biology, microbiology, neurobiology, physiology, population dynamics, systematics, and taxonomy. Specialized or applied areas include apiculture, biological control, cell culture, insect conservation, insect-vector relations, integrated pest management, and modeling. Research programs are active in aquatic systems, forest systems, crop and animal agriculture, human health, and natural and urban environments.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A 3.50 GPA (on a 4.00 scale) for prior graduate work is preferred for admission.

Other requirements to be completed before admission:
A bachelor's degree with a major in a biological science is a prerequisite. Preference is given to students with a broad background in the basic sciences. Admission depends primarily on applicant's undergraduate record, letters of recommendation, and the statement of interest from the applicant.

Special Application Requirements:
Applicants must submit a complete set of official transcripts and a clearly written statement of career interests, goals, and objectives. Three letters of recommendation are required from persons well acquainted with the student's academic record, and should be either uploaded or sent directly to the department.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based – Reading Score: 19
  - Paper Based - Total Score: 550

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
15 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

Students must present two graduate seminars (ENT 8300) and must take Scientific Communication and Ethics (ENT 8061). Students also must pass three written examination questions (or a total of four if the student has received an M.S. degree in entomology from the U of MN). The core curriculum courses are: ENT 5021 - Insect Taxonomy and Phylogeny, ENT 5011 - Insect Structure and Function, and either ENT 5042 - Insect Ecology or ENT 5045 - Insect Population Dynamics.

Ph.D. requirements include a minimum of 15 course credits in entomology, including a core curriculum of fundamental entomology courses and 2 credits of graduate seminar. Additional requirements include 12 credits from other programs, and are determined in consultation with the adviser and other members of the student's advisory committee.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Food science applies scientific principles to the manufacture, distribution, marketing, and consumer aspects of food. Food scientists apply the basic principles and techniques of many disciplines, including chemistry, physics, microbiology, and nutrition, to food processing and preservation, new product development, and food marketing. Food scientists are concerned with the theoretical and practical aspects of the food chain, from the production of raw materials to the use of food products by consumers. Students may emphasize the chemistry, engineering, microbiology, nutrition, or technology of food products.

Students may spend a maximum of five (5) years in this degree program.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants to the program need a bachelor's degree, or its international equivalent, in any field.

Other requirements to be completed before admission:
The minimum requirements are general chemistry with laboratory, organic chemistry with laboratory, physics with laboratory, biology with laboratory, and calculus. If preparation appears inadequate, certain additional courses may be required after admission.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

**Plan A:** Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 major credits and 0 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** The Plan B project is equivalent to 120 hours of work or three full weeks of research and writing. It should consist of one of the following options, which are intended to familiarize the candidate with the tools of research or scholarship in the field and serve to demonstrate the ability to work independently: 1) The candidate may prepare one paper equivalent to 120 hours of work in one advanced course, over and above the normal course requirement as approved by the instructor in consultation with the adviser. This course must be from the major field of interest. 2) The candidate may prepare one paper equivalent to the requirement of 120 hours in some related field or course as approved in consultation with the instructor and the adviser. 3) The student may do an equivalent amount of library or laboratory research and write a research report to satisfy the requirement as approved by the adviser. This may take the form of a research proposal.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The M.S. offers both Plan A (with thesis) and Plan B (without thesis) options. Both options require at least 20 course credits in the major. Plan A also requires at least 10 thesis credits. Plan B also requires at least an additional 10 graduate credits in approved courses and a Plan B paper. The minor may be chosen from fields such as biochemistry, chemistry, chemical engineering, microbiology, nutrition, and statistics. All students also are expected to participate as teaching assistants during their graduate careers.

• Program Type: Master's
• Requirements for this program are current for Fall 2014
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Land and Atmospheric Science (LAAS) is a science-based interdisciplinary program focused on the fundamentals of Earth system processes related to land and atmosphere and their coupled interactions. Students have the option to develop a program based on one of the more traditional areas in atmospheric science or soil science or to design their own interdisciplinary course of study bridging the two disciplines. The Land and Atmospheric Science Graduate Program has no formal tracks or emphasis areas, but instead allows students to design a curriculum that addresses their interests within the scope of the program. This multidisciplinary program encompasses aspects of chemistry, physics, biology, atmospheric sciences, and geology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

B.S. degree in a related field of science, or a graduate or professional degree.

Required prerequisites
Basic Sciences
Students are expected to have taken a minimum of four of the following courses (or their equivalent).
MATH 1271 - Calculus I [MATH] (4.0 cr)
  or MATH 1142 - Short Calculus [MATH] (4.0 cr)
  or MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
PHYS 1101W - Introductory College Physics I [PHYS, WI] (4.0 cr)
  or ESPM 3131 - Environmental Physics (3.0 cr)
PHYS 1102W - Introductory College Physics II [PHYS, WI] (4.0 cr)
  or STAT 3011 - Introduction to Statistical Analysis [MATH] (4.0 cr)
  or BIOL 1009 - General Biology [BIOL] (4.0 cr)
  or CHEM 1061 - Chemical Principles I [PHYS] (3.0 cr)
CHEM 1065 - Chemical Principles I Laboratory [PHYS] (1.0 cr)
CHEM 1062 - Chemical Principles II [PHYS] (3.0 cr)
CHEM 1066 - Chemical Principles II Laboratory [PHYS] (1.0 cr)
  or STAT 3011 - Introduction to Statistical Analysis [MATH] (4.0 cr)

Environmental Sciences
Students are expected to have taken a minimum of two of the following (or similar) courses:
Take 2 - 6 course(s) from the following:
• ESPM 1011 - Issues in the Environment [ENV] (3.0 cr)
• ESPM 1425 - The Atmosphere [PHYS, ENV] (4.0 cr)
• SOIL 2125 - Basic Soil Science [PHYS, ENV] (4.0 cr)
• ESCI 1001 - Earth and Its Environments [PHYS, ENV] (4.0 cr)
Other requirements to be completed before admission:
Student course admission prerequisites are as shown below. Students who are admitted with deficiencies would be provided with a list of courses they are required to take before the completion of their degree. This list would be developed by the directors of graduate studies in consultation with the student's faculty adviser.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 20 major credits and 10 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project typically consists of a technical paper of a topic and length acceptable to the student's advisory committee.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

All M.S. students must complete a minimum of 30 credits: 14 credits in the major area (which includes one seminar - 1 cr, and teaching experience), and a minimum of 6 credits in a minor or related field.

Plan A students: all must take a minimum of 10 thesis credits. Plan A students in the soil science concentration must take three out of the four core courses in soil science. Plan A students in the climatology concentration must take two or more courses in climatology or atmospheric sciences (approved by the student's advisory committee) and two of the four core courses in soil science.

Plan B students: all must complete 20 major and 10 outside coursework credits. Students must complete a Plan B paper and fulfill the 30-credit minimum by taking 10 credits of coursework or a special project to replace the 10 thesis credits. Plan B students in the soil science concentration must take all four core courses in soil science. Plan B students in the climatology concentration must take three or more courses in climatology or atmospheric sciences (approved by the student's advisory committee) and two of the four core courses in soil science.

Core Courses
Take exactly 3 course(s) totaling exactly 5 credit(s) from the following:
- LAAS 5050 - Integrated Topics in Land & Atmospheric Science (3.0 cr)
- LAAS 8128 - Land and Atmospheric Science Seminar (1.5 cr)
- SOIL 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
Major credits
Choose at least 9 additional credits within the LAAS major. (You will need 15 for Plan B).

Outside the major
Choose at least 6 credits from outside the major. These can be courses for a minor or from a related field. (You will need 10 credits for Plan B).

Thesis credits
Register for at least 10 credits of LAAS 8777 for Plan A.

This multidisciplinary program encompasses aspects of chemistry, physics, biology, atmospheric sciences, and geology.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

B.S. degree in a related science field.

Special Application Requirements:
All courses for use in the minor must be taken using the A-F grading system, unless approved by the Graduate Advisory Committee, or if they are offered on an S-N basis only. Courses for use in the minor must be selected with the consultation of the land and atmospheric science graduate faculty member serving as the minor adviser and approved by the director of graduate studies.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The minor in LAAS for doctoral students requires a minimum of 12 graduate-level credits of regular coursework (not special problems) in land and atmospheric science. The minor in LAAS for master’s students requires a minimum of 9 graduate-level credits in LAAS.

All students seeking a minor in LAAS must take LAAS 5050 - Integrated Topics in Land and Atmospheric Science (3 cr). The remaining 9 or 6 credits for the doctoral or master’s minor, respectively, must come from other graduate-level LAAS courses.

Integrated Topics
All students are required to take the following course.
Take 1 or more course(s) totaling exactly 3 credit(s) from the following:
- LAAS 5050 - Integrated Topics in Land & Atmospheric Science (3.0 cr)

Other LAAS courses
Take 6 credits for M.S. minor or 9 credits for Ph.D. minor from the following options, or others approved by the DGS and the LAAS graduate faculty member serving as the minor adviser.
- LAAS 5426 - Atmospheric Processes II: Radiation, Composition, and Climate (3.0 cr)
- or LAAS 5515 - Soil Formation: Earth Surface Processes and Biogeochemistry (3.0 cr)
- or LAAS 8128 - Land and Atmospheric Science Seminar (1.5 cr)
- or LAAS 5051 - Thesis Proposal Writing for Land & Atmospheric Science (2.0 cr)
- or LAAS 5425 - Atmospheric Processes I: Thermodynamics and Dynamics of the Atmosphere (3.0 cr)
Twin Cities Campus

This interdisciplinary program encompasses aspects of chemistry, physics, biology, atmospheric sciences, and geology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

Applicants to the LAAS Ph.D. program are expected to have an M.S. degree or equivalent in a related field of science.

Required prerequisites
Basic Sciences
Students are expected to have taken a minimum of four of the following courses (or their equivalent):
MATH 1271 - Calculus I [MATH] (4.0 cr)
or MATH 1142 - Short Calculus [MATH] (4.0 cr)
or MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
PHYS 1101W - Introductory College Physics I [PHYS, WI] (4.0 cr)
or PHYS 1102W - Introductory College Physics II [PHYS, WI] (4.0 cr)
or ESPM 3131 - Environmental Physics (3.0 cr)
or BIOL 1009 - General Biology [BIOL] (4.0 cr)
or CHEM 1061 - Chemical Principles I [PHYS] (3.0 cr)
CHEM 1065 - Chemical Principles I Laboratory [PHYS] (1.0 cr)
CHEM 1062 - Chemical Principles II [PHYS] (3.0 cr)
CHEM 1066 - Chemical Principles II Laboratory [PHYS] (1.0 cr)
or STAT 3011 - Introduction to Statistical Analysis [MATH] (4.0 cr)

Environmental Sciences
Students are expected to have taken a minimum of two of the following (or similar) courses:
Take 2 - 6 course(s) from the following:
• ESPM 1011 - Issues in the Environment [ENV] (3.0 cr)
• ESPM 1425 - The Atmosphere [PHYS, ENV] (4.0 cr)
• SOIL 2125 - Basic Soil Science [PHYS, ENV] (4.0 cr)
• ESCI 1001 - Earth and Its Environments [PHYS, ENV] (4.0 cr)
- ESPM 3612W - Soil and Environmental Biology [WI] (3.0 cr)
  or MICB 3301 - Biology of Microorganisms (5.0 cr)
- BIOL 3407 - Ecology (3.0 cr)

Other requirements to be completed before admission:
Students with a B.S. degree and outstanding scholarship can request direct admission to the LAAS Ph.D. program. Each request will be considered on a case-by-case basis by the Graduate Advisory Committee. Evidence of outstanding scholarship may include: peer-reviewed publications, a pre-doctoral fellowship, a National Science Foundation Ph.D. Fellowship, high GPA/GRE scores, or strong previous research experience. Current M.S. candidates who exhibit outstanding scholarship may request transfer to a Ph.D. degree program after completion of their first two semesters of coursework.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
26 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students must take two seminars (1 credit each), 2 credits of teaching experience, a minimum of 12 credits in a minor or supporting program, and 24 thesis credits. Students in the soil science concentration must take all four core area courses in soil science. Students in the climatology concentration must take a minimum of two courses in climatology or atmospheric sciences (approved by the student's advisory committee) and two of the four core area course in soil science.

Core Courses
Take exactly 5 course(s) totaling exactly 10 credit(s) from the following:
- LAAS 5050 - Integrated Topics in Land & Atmospheric Science (3.0 cr)
- LAAS 8128 - Land and Atmospheric Science Seminar (1.5 cr)
- SOIL 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
- LAAS 5051 - Thesis Proposal Writing for Land & Atmospheric Science (2.0 cr)
- GRAD 8101 - Teaching in Higher Education (3.0 cr)

LAAS and Related Courses
Choose courses relevant to particular area of research with consent of adviser.
Take 4 or more course(s) totaling 16 or more credit(s) from the following:
- LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
  or LAAS 5425 - Atmospheric Processes I: Thermodynamics and Dynamics of the Atmosphere (3.0 cr)
  or AGRO 5121 - Applied Experimental Design (4.0 cr)
  or AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
Outside the major
Choose 12 credits of minor or related field coursework.

Thesis credits
10 completions allowed; no grade associated; maximum 18 credits per semester or summer; 24 credits required.
Take 24 or more credit(s) from the following:

• LAAS 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus

Website: http://www.nrsm.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Most admitted students have earned degrees in natural resource-related majors. Applicants with exceptional academic records but no related background are eligible; if admitted, they may complete the prerequisites for advanced courses during the early stages of their graduate program. These prerequisites will vary depending upon the student’s track and major adviser.

Applicants will not be admitted unless a member of the program faculty agrees to advise them ahead of time. This decision depends on admissibility (the applicant's overall credentials), mutual research interests, and the faculty member's ability to take on a new student. Some faculty members will not advise students unless they have funding for the student. Applicants are encouraged to review faculty profiles on the program website and begin making contacts prior to and during the application process.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Plan B project(s) is(are) designed in consultation with the student's adviser and committee. It(They) must develop and demonstrate competence in the student's track.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.S. is offered under Plan A (with thesis) and Plan B (without thesis). Plan A requires at least 20 coursework credits and Plan B requires at least 30 coursework credits. Plan A students must also register for 10 thesis credits. Plan A students usually design a program to support their specific thesis project. In consultation with faculty members, Plan B students design a program that develops competence in at least one track. Students present a seminar on the thesis or the Plan B project. Specific requirements vary by track and research project; prospective students should contact the director of graduate studies or a prospective faculty advisor for specific information. Students must also receive training in the ethical conduct of research and present a formal seminar to faculty and peers. This presentation is separate from the final exam seminar.

**Joint- or Dual-degree Coursework:** Law, Health and the Life Sciences

Student may take a total of 12 credits in common among the academic programs.

**Program Sub-plans**

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

**Assessment, Monitoring, and Geospatial Analysis**

Addresses measurements and related technology applications and resource analysis. Graduate students in this track may choose to specialize in topics such as: geographic information systems (GIS); remote sensing; geospatial analysis; survey design (including forest inventory and monitoring), measurement, modeling; and biometrics. Studies typically focus on landscape, region, or global levels.

**Economics, Policy, Management, and Society**

For students interested in focusing on how society values and makes decisions about the use, management, and protection of natural and environmental resources. Graduate students in this track can specialize in areas such as: economics, policy, administration and management, planning, operations research, conflict resolution, human dimensions, and land use planning. Studies might consider choices, impacts, and tradeoffs in protecting, restoring, developing, and allocating natural and environmental resources. The research conducted by students in this track may address a wide range of issues and problems from local to international in scope.

**Forest Hydrology and Watershed Management**

Brings together the integrally related areas of earth sciences, soils, and water resources management with an applied focus on wildland ecosystems, which may include the interface of forests with grasslands, wetlands, and agriculture. Graduate students in this track may specialize in areas such as: forest hydrology, water quality, and watershed management. Research would focus on forest, riparian, and wetland ecosystems.

**Forest Products**

For students who wish to specialize in areas such as: wood and fiber as raw materials; deterioration of wood; wood mechanics and structural design; wood moisture interactions and drying; processing and performance of composites; economics of manufacturing systems; technology and processing of solid wood products; marketing, design and production of housing components; and energy-efficient building construction.

**Forests: Biology, Ecology, Conservation, and Management**
Focuses on forest resources and allows students to choose from specializations in the following areas: forest biology, ecology, ecophysiology; genetics and tree improvement; tree physiology; reproductive biology and forest regeneration; forest growth and vegetation dynamics; timber harvesting, silviculture, and sustainable forest management; landscape ecology, restoration, and management; conservation of biodiversity and wildlife habitat management; forest health; disturbance (including fire) ecology; urban and community forestry; and agroforestry. Research normally focuses on forest and related ecosystems.

**Paper Science and Engineering**
Specializes in areas such as: the chemistry and biotechnology of lignocellulosic materials; material science of paper and fiber products; paper recycling; energy and manufacturing efficiency in the pulp and paper-making process; novel and environmentally friendly pulping and bleaching, transport processes through porous media, surface and colloid science of papermaking; chemical engineering applications in pulp and paper processes; and statistical process control.

**Recreation Resources, Tourism, and Environmental Education**
Focuses on the use and management of natural resources for recreation and tourism. Graduate students in this track may specialize in areas such recreational land management, resource-based tourism, planning for recreation and tourism, and the human dimensions of natural resource uses. Additionally, students may focus on environmental education and leadership for effective communication with diverse publics about natural resources.

**Wildlife Ecology and Management**
For students interested in working with leaders in ecology, physiology, evolution, genetics, statistics, computer science, forestry, natural resource policy, and the social sciences as they relate to wildlife; ecology and management; and conservation biology.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 8
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Students majoring in other programs who wish to declare a minor in Natural Resources Science and Management must file a proposal with the NRSM program office. Master's students must complete a minimum of eight credits of NRSM-related coursework. Doctoral students must complete a minimum of twelve credits of NRSM-related coursework.

Because the NRSM program is multidisciplinary, we do not require specific courses for completion of the minor. Rather, the student should work in consultation with his or her major advisor(s) and with the NRSM faculty member who will serve on the student's examination committee as the representative of the program minor. (It is a University of MN requirement that students declaring a minor have a representative of the minor program on the committee.) The proposed coursework will then be reviewed by NRSM's director of graduate studies, and must be approved before the student can submit the degree program for approval. It is expected that courses students take to fulfill the NRSM minor are taught by NRSM faculty members. The minor proposal form is available on the NRSM website.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
Program Requirements
35 to 48 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

Plan A: Plan A requires up to null major credits, up to null credits outside the major, and up to null thesis credits. The final exam is oral.

Plan B: Plan B requires up to null major credits and up to null credits outside the major. The final exam is oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The University of Minnesota requires at least 48 credits for a doctoral degree, 24 of which must be thesis credits. The NRSM graduate program will typically expect to see 40 to 48 course credits. If a student enters the program with a relevant master's degree, relevant credits from the prior degree can be transferred in to apply toward the doctoral degree pending advisor, committee, graduate program, and college approval. Normally, a student who enters the doctoral program with a master's degree will complete 30-40 additional credits in the major program. There are no minor courses required, but students have the option of formally declaring a minor.

Course selection and thesis proposals are developed by each student in consultation with the faculty adviser and are approved by the Natural Resources Science and Management Graduate Studies Committee. Students must also receive training in the ethical conduct of research and present a formal seminar to faculty and peers. This presentation is separate from the final exam seminar.

Joint- or Dual-degree Coursework: Law, Health and the Life Sciences
Student may take a total of 12 credits in common among the academic programs.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Assessment, Monitoring, and Geospatial Analysis
Addresses measurements and related technology applications and resource analysis. Graduate students in this track may choose to specialize in topics such as: geographic information systems (GIS); remote sensing; geospatial analysis; survey design (including forest inventory and monitoring), measurement, modeling; and biometrics. Studies typically focus on landscape, region, or global levels.

Economics, Policy, Management, and Society
For students interested in focusing on how society values and makes decisions about the use, management, and protection of natural and environmental resources. Graduate students in this track can specialize in areas such as: economics, policy, administration and management, planning, operations research, conflict resolution, human dimensions, and land use planning. Studies might consider choices, impacts, and tradeoffs in protecting, restoring, developing, and allocating natural and environmental resources. The research conducted by students in this track may address a wide range of issues and problems from local to international in scope.

Forest Hydrology and Watershed Management
Brings together the integrally related areas of earth sciences, soils, and water resources management with an applied focus on wildland ecosystems, which may include the interface of forests with grasslands, wetlands, and agriculture. Graduate students in this track may specialize in areas such as: forest hydrology, water quality, and watershed management. Research would focus on forest, riparian, and wetland ecosystems.

Forest Products
For students who wish to specialize in areas such as: wood and fiber as raw materials; deterioration of wood; wood mechanics and structural design; wood moisture interactions and drying; processing and performance of composites; economics of manufacturing systems; technology and processing of solid wood products; marketing, design and production of housing components; and energy-efficient building construction.
Forests: Biology, Ecology, Conservation, and Management
Focuses on forest resources and allows students to choose from specializations in the following areas: forest biology, ecology, ecophysiology; genetics and tree improvement; tree physiology; reproductive biology and forest regeneration; forest growth and vegetation dynamics; timber harvesting, silviculture, and sustainable forest management; landscape ecology, restoration, and management; conservation of biodiversity and wildlife habitat management; forest health; disturbance (including fire) ecology; urban and community forestry; and agroforestry. Research normally focuses on forest and related ecosystems.

Paper Science and Engineering
Specializes in areas such as: the chemistry and biotechnology of lignocellulosic materials; material science of paper and fiber products; paper recycling; energy and manufacturing efficiency in the pulp and paper-making process; novel and environmentally friendly pulping and bleaching, transport processes through porous media, surface and colloid science of papermaking; chemical engineering applications in pulp and paper processes; and statistical process control.

Recreation Resources, Tourism, and Environmental Education
Focuses on the use and management of natural resources for recreation and tourism. Graduate students in this track may specialize in areas such recreational land management, resource-based tourism, planning for recreation and tourism, and the human dimensions of natural resource uses. Additionally, students may focus on environmental education and leadership for effective communication with diverse publics about natural resources.

Wildlife Ecology and Management
For students interested in working with leaders in ecology, physiology, evolution, genetics, statistics, computer science, forestry, natural resource policy, and the social sciences as they relate to wildlife, ecology and management, and conservation biology.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Nutrition is the study of how nutrients, both essential and nonessential, affect health and all life processes. Consequently, nutrition is an extremely broad field that encompasses physiology, biochemistry, education, public health, and public policy. The nutrition graduate program is interdisciplinary. Advisers and financial support may come from any of the departments or schools in which nutrition graduate faculty reside, including the Department of Food Science and Nutrition (College of Food, Agricultural and Natural Resource Sciences); Division of Epidemiology (School of Public Health); Departments of Medicine, Surgery, Psychiatry, Lab Medicine and Pathology, and Family Medicine and Community Health (Medical School); Department of Kinesiology and Leisure Studies (College of Education and Human Development); Department of Biochemistry and Molecular Biology (University of Minnesota Duluth); University of Minnesota Extension; Hormel Institute (Austin, Minn.); and V.A. Medical Center and Park Nicollet Institute (Minneapolis, Minn.).

Three subspecialty areas are offered in the program: human nutrition, nutritional biochemistry, and public health nutrition. Thesis work can be conducted locally or internationally in the laboratory, clinic, or field.

Students are allowed a maximum of 5 years in the program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants to the program need a bachelor's degree in any field or its international equivalent.

Other requirements to be completed before admission:
A strong foundation in the biological and physical sciences is required. This background includes college mathematics, the equivalent of one semester of general chemistry, organic chemistry, general biology, biochemistry, physiology, and statistics. For the doctoral program, additional prerequisite courses include calculus and physics. If there is evidence that the applicant has a good background in the sciences, some of the prerequisites can be met after admission. The M.S. program also requires the following nutrition courses, or equivalent, which may be completed after the student's admission to the program: Principles of Nutrition (FSCN 1112), Life Cycle Nutrition (FSCN 3612), and Human Nutrition (FSCN 4612).

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  • IELTS
    - Total Score: 6.5
  • MELAB
    - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is a combined total of approximately 120 hours (the equivalent of three full-time weeks) of work. The graduate faculty, including the student's adviser and DGS, specify both the nature and extent of the course and project work necessary to satisfy this requirement.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The M.S. is offered under both Plan A (thesis) and Plan B (non-thesis). Plan A requires a minimum of 20 course credits and 10 thesis credits; Plan B requires a minimum of 30 course credits, including a Plan B project.

General requirements include the graduate nutrition core series (four courses), an orientation and presentation skills class, graduate courses statistics, an advanced topics course, and presentation of the thesis or project work. All students also are expected to obtain teaching experience, subject to the policies of the adviser's department or division.

Program Sub-plans

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Plant pathology focuses on the biology of plant-microbe interactions, and incorporates research involving biochemical, molecular, genetic, physiological, whole organism, population, and community levels of biological organization. Plant pathology interfaces with all plant science disciplines, and with many other fields including food sciences, veterinary medicine, biobased products, and ecology. Areas of concentration include molecular plant pathology (offered as a special emphasis), plant disease management, biological control of plant disease, forest pathology and microbial degradation of wood, microbial ecology, population biology, plant-microbe interactions, disease resistance, host-parasite coevolution, plant microbe mutualisms, and virology. Students have opportunities for laboratory and field research locally, as well as nationally and internationally. The course of study varies with the requirements for the area of concentration and interests of the student. Students who choose the emphasis in molecular plant pathology enhance their ability to design and use molecular approaches to investigate plant disease, increase basic knowledge, and develop new strategies for disease control.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Master's degree applicants must have a sound college background in the basic biological and physical sciences and mathematics.

Other requirements to be completed before admission:
Applicants must have completed 35 semester credits in biology with at least one course in each of the following areas: botany, zoology, genetics, plant physiology, and microbiology. Applicants must also have completed at least one course each in inorganic chemistry, organic chemistry, biochemistry, and physics. If deficiencies exist in the prerequisites, students must correct them during the first year of the graduate program. These courses cannot be counted as part of the degree program. All students accepted into the department with a B.S. degree are admitted into the M.S. program. After a minimum of two semesters, students who qualify may elect to change their degree status to the Ph.D. program. Criteria for the change include scholastic standing, potential for success in completing a Ph.D., and writing competency.

Special Application Requirements:
GRE scores are required for all students and TOEFL or IELTS scores are required for international students. A clearly written statement of career interests as well as three letters of recommendation are required of all students. Students may apply at any time; however, submission of all application materials by December 10 will ensure priority consideration for fellowships and research assistantships for the next academic year. Students can be admitted any semester.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 148
  - General Test - Analytical Writing: 4.5
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- **IELTS**
  - Total Score: 6.5

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 14 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** The Plan B option also requires one to three projects totaling ca. 120 hours. The content and procedures for completing the project(s) are to be determined and approved by the student's major adviser and the director of graduate studies.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Regular attendance at weekly plant pathology seminars is expected. Internships are encouraged as part of the graduate experience and financial support is available on a competitive basis for international or domestic internships.

**Required Coursework**

- **PLPA 5480:** Principles of Plant Disease (3 cr) must be completed if student lacks an introductory Plant Pathology course.
- **PLPA 8104:** Plant Virology (2.0 cr)
- **PLPA 8105:** Plant Bacteriology (2.0 cr)
- **PLPA 8123:** Research Ethics in Plant and Environmental Sciences (0.5 cr)
- **PLPA 8200:** Seminar (1.0 cr)

Students must enroll for 1 credit in PLPA 8090 Advanced Procedures and Research in Plant Pathology, Topic: Teaching Experience. Students must enroll in a seminar or workshop on teaching methods.

All students are required to enroll in a minimum of four of the following courses, chosen in consultation with the director of graduate studies, adviser, and graduate advisory committee.

Take 4 or more course(s) from the following:

- **PLPA 5003:** Diseases of Forest and Shade Trees (3.0 cr)
- **PLPA 5202:** Field Plant Pathology (2.0 cr)
- **PLPA 5203:** Introduction to Fungal Biology (3.0 cr)
- **PLPA 5300:** Current Topics in Molecular Plant Pathology (1.0 - 2.0 cr)
- **PLPA 5301:** Plant Genomics (3.0 cr)
- **PLPA 5444:** Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
- **PLPA 5660:** Plant Disease Resistance and Applications (3.0 cr)
- **PLPA 8103:** Plant-Microbe Interactions (3.0 cr)

**M.S. in Plant Pathology, Molecular Option (Plan A only)**

**Molecular Option Requirements**

M.S. students wishing to emphasize molecular plant pathology must complete the following course requirements in addition to the Plan A master’s program requirements:

- **BIOC 4125:** Laboratory in Molecular Biology and Biotechnology, or equivalent.
PLPA 8103 - Plant-Microbe Interactions (3.0 cr)

Suggested courses for the 6 supporting field credits

Note: Students who wish to complete a designated minor (which is certified on the transcript, unlike the related-fields option, which is not) must complete 6 or more credits in a single field. A designated minor must be approved by the director of graduate studies in the minor field.

Take 6 or more credit(s) from the following:

• AGRO 8241 - Chromosomal and Molecular Genetics of Plant Improvement (3.0 cr)
• BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
• EEB 5221 - Molecular Evolution (3.0 cr)
• GCD 5036 - Molecular Cell Biology (3.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Plant pathology focuses on the biology of plant-microbe interactions, and incorporates research involving biochemical, molecular, genetic, physiological, whole organism, population, and community levels of biological organization. Plant pathology interfaces with all plant science disciplines, and with many other fields including food sciences, veterinary medicine, biobased products, and ecology. Areas of concentration include molecular plant pathology (offered as a special emphasis), plant disease management, biological control of plant disease, forest pathology and microbial degradation of wood, microbial ecology, population biology, plant-microbe interactions, disease resistance, host-parasite coevolution, plant microbe mutualisms, and virology. Students have opportunities for laboratory and field research locally as well as nationally and internationally. The course of study varies with the requirements for the area of concentration and interests of the student. Students who choose the emphasis in molecular plant pathology enhance their ability to design and use molecular approaches to investigate plant disease, increase basic knowledge, and develop new strategies for disease control.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.50.

Applicants must have a sound college background in the basic biological and physical sciences and mathematics.

Ph.D. applicants must satisfy all the prerequisites for the master's degree program in plant pathology or have a master's degree in plant pathology or in a field of natural science.

Other requirements to be completed before admission:
Applicants must have completed 35 semester credits in biology with at least one course in each of the following areas: botany, zoology, genetics, plant physiology, and microbiology. Applicants must also have completed at least one course each in inorganic chemistry, organic chemistry, biochemistry, and physics. If deficiencies exist in the prerequisites, they must be corrected during the first year of the graduate program. Applicants should note that these courses cannot be counted as part of the degree program. All students accepted into the department with only a B.S. degree are admitted into the M.S. degree program. After a minimum of two semesters, students who qualify may elect to change their degree status to the Ph.D. program. Criteria for the change include scholastic standing, potential for success in completing a Ph.D., and writing competency.

**Special Application Requirements:**
GRE scores are required for all students and TOEFL or IELTS scores are required for international students. A clearly written statement of career interests as well as three letters of recommendation are required of all students. Students may apply at any time; however, submission of all application materials by December 10 will ensure priority consideration for fellowships and research assistantships for the next academic year. Students can be admitted any semester.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- **IELTS**
  - Total Score: 6.5

The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

17 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Course requirements include enrollment in a supervised teaching or extension teaching experience. Degree programs are determined by the student and the student's advisory committee, with approval of the director of graduate studies. Regular attendance at weekly plant pathology seminars is expected. Internships are encouraged as part of the graduate experience and financial support is available on a competitive basis for international or domestic internships.

A detailed overview of course offerings and requirements, including additional details on the molecular plant pathology emphasis, is available on the plant pathology program website.

**Required Coursework**

All Ph.D. students must take the following courses (if not taken previously):

- PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
- PLPA 5480 - Principles of Plant Pathology (3.0 cr)
- PLPA 8103 - Plant-Microbe Interactions (3.0 cr)
- PLPA 8123 - Research Ethics in Plant and Environmental Sciences (0.5 cr)
- two semesters of PLPA 8200 - Plant Pathology Seminar (2 credits total, including credits taken during a PLPA M.S. program at the University of Minnesota)
- one full semester in-classroom teaching experience
  - PLPA 8005 - Supervised Classroom or Extension Teaching Experience (2.0 cr)
  - or GRAD 8101 - Teaching in Higher Education (3.0 cr)
- PLPA 8104 - Plant Virology (2.0 cr)
- or PLPA 8105 - Plant Bacteriology (2.0 cr)

**Ph.D. in Plant Pathology, Molecular Option**

**Molecular Option Requirements**

Ph.D. students wishing to emphasize molecular plant pathology must complete the following course requirements in addition to the standard Ph.D. program requirements.

- BIOC 4125 - Laboratory in Molecular Biology and Biotechnology or equivalent
- PLPA 5301 - Plant Genomics (3.0 cr)
- PLPA 5300 - Current Topics in Molecular Plant Pathology (two semesters required) 2 credits total
Suggested courses for the 12 supporting field credits:
Take 12 or more credit(s) from the following:

• AGRO 8241 - Chromosomal and Molecular Genetics of Plant Improvement (3.0 cr)
• ANSC 5200 - Statistical Genetics and Genomics (4.0 cr)
• BIOM 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
• CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
• EEB 5221 - Molecular Evolution (3.0 cr)
• GCD 5036 - Molecular Cell Biology (3.0 cr)
• GCD 8131 - Advanced Genetics and Genomics (3.0 cr)
• MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 13
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor in risk analysis for introduced species and genotypes is available to master's (M.A. and M.S.) and doctoral students. The minor provides an interdisciplinary curriculum that addresses all phases of risk analysis pertaining to the introduction of exotic species and novel genotypes. The curriculum is based on collaborative learning and includes a survey course, discussions, a problem solving practicum, and a cooperative learning practicum. The minor complements major programs in applied economics; applied plant sciences; conservation biology; ecology, evolution, and behavior; entomology; natural resources science and management; plant biological sciences; and water resources science.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The master's minor requires 6 graduate credits from the core curriculum; the doctoral minor requires 13 graduate credits. Master's students must take ISG 5010 (3 credits), ISG 5020 (1 credit), and ISG 8001 (1 credit; taken twice for credit).

The doctoral minor requires at least 13 credits, including the master's courses, plus ISG 8021 (3 credits), ISG 8031 (1 credit), and a 3-credit course in quantitative modeling or a decision analysis course offered by another program.

- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The minor in sustainable agriculture systems offers master's (M.A. and M.S.) and doctoral students an interdisciplinary curriculum that considers the biological, sociological, and economic aspects of agriculture. The minor emphasizes a holistic perspective to designing farming and food systems and solving problems in agriculture. The importance of yield and profitability are balanced by considerations of the environment and the health and social well-being of producers, consumers, and communities. The minor complements major programs in ecology, conservation biology, forestry, sociology, geography, political science, and public affairs, as well as majors in the College of Food, Agricultural and Natural Resource Sciences.

**Program Delivery**  
This program is available:  
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**  
Other requirements to be completed before admission:  
Admission is contingent upon prior admission to a master's or doctoral degree-granting program.

**Special Application Requirements:**  
Contact the director of graduate studies in sustainable agriculture systems for an Intent to Enroll Form. Students are admitted each semester.

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**  
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The master's minor requires 6 graduate credits from the core curriculum; the doctoral minor requires 12 graduate credits. All students must take SAGR 8010 and 8020. The other core course is AGRO 5321 - Ecology of Agricultural Systems (cross listed with ENT 5321). A unique component of the minor is an on-site internship with growers, grassroots organizations, or public agencies working in sustainable agriculture.

American Studies M.A.
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of American Studies, 104 Scott Hall, 72 Pleasant Street S.E., Minneapolis, MN 55455 (612-624-4190; fax: 612-624-3858)
Email: amstdy@umn.edu
Website: http://americanstudies.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The master's degree in American studies is not designed as a terminal degree; therefore, students are not admitted directly to the M.A. program. Students may apply for graduate study at the Ph.D. level only. A Ph.D. student may elect to pursue the M.A. All Ph.D. coursework is applicable. Current graduate students seeking to obtain the M.A. should review the information in the current Graduate Handbook on the website at http://americanstudies.umn.edu/grad/handbook.html.

American studies is an interdisciplinary, interdepartmental program. The American studies graduate faculty consists of American studies core faculty members and graduate faculty members drawn from a wide number of departments. Students develop subfields (understood as a more specific focus of research and teaching) and also pursue broad training in analyzing the development of cultural and historical processes that shaped the nation and its diverse cultures, as well as analyzing contemporary practices.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
An undergraduate major in a field related to American studies or other preparation acceptable to the Admissions Committee for American studies is required.

Special Application Requirements:
American studies admits for graduate study at the Ph.D. level only. Ph.D. students may obtain a M.A. during the course of their studies; however no students are admitted for a terminal M.A. Students entering the Ph.D. program must hold at least a bachelor's level degree from a recognized institution of higher education. The deadline for application to the Department of American Studies is December 1 of the year prior to intended entry. Refer to the department website for application procedures and additional information.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 14 major credits and 6 credits outside the major. The final exam is written and oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading knowledge of one foreign language

A minimum GPA of 3.50 is required for students to remain in good standing.

The master's degree is not designed as a terminal degree; therefore, students are not admitted directly to the M.A. program. A Ph.D. student may elect to pursue the M.A. All Ph.D. coursework is applicable. Current graduate students seeking to obtain the M.A. should review the information in the current Graduate Handbook on the program website at http://americanstudies.umn.edu/grad/handbook.html.

Program Requirements
36 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading knowledge of one foreign language.

A minimum GPA of 3.50 is required for students to remain in good standing.

Ph.D. students must complete the following course distributions: four core American studies courses (Introductory Seminars AMST 8201 and AMST 8202; AMST 8401 - Practicum in American Studies; and AMST 8801 - Dissertation Seminar); a minimum of three seminars, one of which must require original research; one comparative culture course covering international or non-U.S. topics; and seven adviser-approved courses, at least one of which must focus on American cultural diversity. With adviser approval, any or all of the above listed seminars (except the required core courses) may count toward these seven courses. Twenty-four thesis credits are also required. Ph.D. students may register for 0999 no more than two semesters total without approval from their adviser and the director of graduate studies.
Twin Cities Campus
Anthropology M.A.
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of Anthropology, 395 Hubert H. Humphrey Center, 301 19th Avenue South, Minneapolis, MN 55455 (612-625-3400; fax: 612-625-3095).
Email: anthgrad@umn.edu
Website: http://anthropology.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Anthropology MA degree is offered with a focus on Cultural Heritage Management (CHM). It is a two-year program, which can be completed with or without a thesis, designed for students who wish to pursue a career in heritage management archaeology in non-academic settings. Our aim is to train students in anthropological perspectives on the issues of heritage management, broadly defining heritage as materials and practices remaining from the past. This perspective ranges from the abstract understanding of how heritage is construed, valued and used, to the more concrete methods for archaeological analysis, site protection (especially in the legal framework), outreach and education in concert with stakeholder communities and the wider public.

This program draws additional strength from a wide variety of heritage-related departments and programs that students may work with, including Architecture, Public History, Museum Studies, Landscape Architecture, Geography, the Tourism Center, the River Life program, and many more. Both on-campus and in the greater Twin Cities area, there are a tremendous number of museums, archives, history centers and sites, heritage preservation non-profits and agencies where students may gain practical experiences and contacts in the professional worlds.

Note: The Department of Anthropology admits students for the master's degree only in cultural heritage management, although in some cases students admitted to the Ph.D. program complete a master's degree as they work toward the Ph.D.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
For the Cultural Heritage Management focus of the Anthropology MA program, students with a background in anthropology or archaeology are preferred because of the two-year nature of the program and the demanding final oral examination. Likewise, students with field and/or laboratory experience are preferred because of the nature of the competencies that structure the program. Nonetheless, all applicants to the cultural heritage management program are considered and students with little or no background in anthropology or archaeology are accepted depending on interest and training. These students may be required to make up specified deficiencies during their program.

Special Application Requirements:
Three letters of recommendation and scores from the General test of the GRE should be sent to the director of graduate studies. Students are admitted for fall semester only; the deadline for all materials is February 15.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is a demonstration of familiarity with the tools of research or scholarship in the graduate student's area of study, the ability to work independently, and the ability to present the results of their investigation effectively, by completing at least one Plan B project, though advisers may require as many as three such projects. The norm in anthropology is two to three projects. Master's-level projects are often the result of work carried out in a seminar or course (e.g., a paper), and are generally polished in a directed reading or research course. Plan B project(s) should involve a combined total of approximately 120 hours of work. With the approval of their advisers, graduate students have considerable flexibility in defining the nature of their Plan B project(s).

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Students should consult the Graduate Student Handbook for special requirements for sociocultural anthropology, linguistic anthropology, archaeology, and biological anthropology.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Anthropology offers graduate education in sociocultural and linguistic anthropology, archaeology, and biological anthropology. With the exception of the master’s degree with an emphasis on cultural heritage management, the program admits students only for the Ph.D., although some students do earn a master’s degree as part of their Ph.D. program. Major areas of faculty research and graduate student training in sociocultural and linguistic anthropology include colonial and post-colonial studies, cultures of capitalism, cultural studies of science, the anthropology of death and dying, analysis of discourse and social interaction, economic anthropology, ethnographies of the state, gender/sexuality, globalization, human/nonhuman relations, language politics, medical anthropology, philosophical anthropology, semiotic anthropology, temporality and futurity, and urban anthropology, among other specialties. Regional specializations include Europe, the Pacific, the Middle East, North America, Russia, Southern Africa, East Asia, and South Asia. The program in biological anthropology offers training and research opportunities in two main areas: paleoanthropology and behavioral biology. The paleoanthropology specialty combines biological anthropology and Paleolithic archaeology in the reconstruction of the evolution and behavior of primates, including hominins, through the application of evolutionary theory to the analysis of skeletal morphology, faunal remains, site taphonomy, and lithic technology. The behavioral ecology specialty involves the study of the behavior and ecology of living primate species, including humans, through field studies and the analysis of long-term data. Regional specializations include Africa, Southwest Asia, Central Asia, and Europe. The program in archaeology offers training and research opportunities in the use of anthropological theories and interpretive strategies in the reconstruction of historic and prehistoric pasts based on material culture, the application of faunal and lithic analysis to questions in paleoecology and evolutionary theory, and the application of archaeological science to the reconstruction of site formation. Regional specializations include Europe, Southwest Asia, Central Asia, and North America.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A B.A. degree or equivalent is required for admission.

Other requirements to be completed before admission:
Graduate students who enter the Ph.D. program with a M.A. degree in anthropology or a closely related field from another institution will generally enter the program at the second-year level. Should second-year requirements (e.g., the research paper, preparation for the bibliography) prove overly challenging for the graduate student, in most cases the student will be required to continue their second year activities into their third year. In addition, they may be asked to take courses in areas of perceived weakness.

Special Application Requirements:
Three letters of recommendation and scores from the General test of the GRE should be sent to the director of graduate studies. Admission is for fall semester only; the deadline for all materials is December 1.

Applicants must submit their test score(s) from the following:
- GRE
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 600

- **IELTS**
  - Total Score: 7

- **MELAB**
  - Final score: 84

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

### Program Requirements

24 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

During the first year, students are required to take at least one graduate-level (8xxx) seminar in the Ph.D. program each semester. Students should consult the Graduate Student Handbook for special requirements for sociocultural anthropology, linguistic anthropology, archaeology, and biological anthropology. Language requirements depend upon student's special area of research.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Areas of specialization in the art history master's degree program include: American art and material culture; early modern and Baroque art; East Asian art and archaeology; art and archaeology of ancient Iran, Hellenistic Asia, and the late Roman empire; modern and contemporary art and theory, including film and photography studies as well as 19th- through 21st-century art; pre-Columbian and colonial art of the Americas; and South Asian art and architecture.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For the M.A. program, a bachelor's degree is required, preferably in art history or a closely related field. Ability and scholarly promise must be demonstrated by a past record of academic excellence.

Special Application Requirements:
For the M.A. program, results from the GRE General Test, at least one substantial research paper preferably in art history, and three letters of recommendation from persons well acquainted with the applicant's research and writing skills are required. In addition, M.A. applicants must provide a detailed statement describing previous experience and academic training as related to the projected course of study and academic goals.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations: GRE, TOEFL, IELTS, MELAB.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

**Plan B:** Plan B requires 21 major credits and 6 credits outside the major. The final exam is written. A capstone project is required.

**Capstone Project:** The Plan B capstone project requires two Plan B papers demonstrating the student's mastery of the essential skills of scholarship. One paper is written on a subject in the area of the student's primary concentration. This paper is supervised by the student's academic adviser. The second paper is written on a subject in the area of the student's secondary concentration and is supervised by someone other than the academic adviser. Term papers or seminar reports may serve as the basis for the Plan B papers, or the topic may be the result of independent study. The student and the project supervisor should decide upon a suitable length for an adequate treatment of the chosen topic. The projects will be evaluated and approved by two art history graduate faculty, one of whom is the project supervisor. Both are required to sign the title page of the paper. Upon completion of the Plan B papers, they should be submitted to the graduate studies secretary.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: Reading proficiency in a second language.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

A minimum of 36 course credits (about 12 courses) is required, including at least two 8xxx seminars in art history (in addition to ARTH 8001, and excluding ARTH 8975). A minimum of 21 credits must be comprised of art history in content and be drawn from courses in at least three of the following areas: North American, ancient Mediterranean, ancient western Asia, early modern, East Asian, Islamic, medieval, modern, contemporary, film/photography, Latin American, or South Asian. Of these, three courses must be in an area of primary concentration, two courses in an area of secondary concentration, and one course in a third area. Students concentrating in Western art or art of the Global North must take one course in Eastern art or art of the Global South. Students concentrating in Eastern art or art of the Global South must take one course in Western art or art of the Global North. In addition, students must take 6 credits in courses that do not focus on art history in content. The remaining 9 credits may be either in art history or outside the discipline; these are chosen in consultation with the adviser and the director of graduate studies.

- Requirements for this program are current for Fall 2014
- Length of program in credits: 54
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The art history program does not admit students directly to the Ph.D. All art history graduate students begin in the M.A. program and are expected to continue on toward the Ph.D. Areas of specialization in the art history program include: American art and material culture; early modern and Baroque art; art and archaeology of ancient Iran, Hellenistic Asia, and the late Roman empire; modern and contemporary art and theory, including film and photography studies as well as 19th through 21st century art; pre-Columbian and colonial art of the Americas, South Asian art and architecture, East Asian art and archaeology.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Note: The program does not admit students directly to the Ph.D. All graduate students in art history begin in the M.A. program and are expected to continue on toward the Ph.D. Graduate students who join the program already having completed a master's degree or graduate-level coursework at another institution may be allowed to transfer credits. See the department website for more information or contact the director of graduate studies.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
18 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading proficiency in two foreign languages.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

A minimum of 54 course credits (about 18 courses), inclusive of credits earned for the M.A. degree, is required. At least 18 credits (about 6 courses) must be in an area of primary concentration within art history, while a minimum of 9 credits (about 3 courses) must be in an area of secondary concentration in art history. In addition, at least 6 credits (about 2 courses) must be outside the field of art history in the minor or supporting program beyond work done at the M.A. level. These outside courses count towards the minimum of 12 credits required in a minor or supporting field.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Master of Fine Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of fine arts program places major emphasis on creative artistic work of high quality. It promotes not only the conceptual and technical education of the professional artist in their artistic practice, encouraging critical inquiry, excellence, and an understanding of the history of art, but also an experimental approach toward each media. The following areas of concentration are available: ceramics, drawing and painting, photography, printmaking, sculpture, and experimental and media arts. The M.F.A. is considered the terminal degree in the field of fine arts and is typically the degree required to teach at the college or university level.

Program Delivery
This program is available:
  - via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Admission to the M.F.A. program is highly competitive. In addition to meeting the University's application requirements, students applying to the program must demonstrate a high degree of capability and commitment in their artistic portfolio and in their statements of artistic and academic intent. Applicants must submit a portfolio electronically with documentation of artwork completed in the three years prior to admission. Instructions for submitting the portfolio and supplemental materials including three letters of recommendation may be found at the department's website: www.art.umn.edu

Students are admitted for fall semester only.

International applicants must submit score(s) from one of the following tests:
  - TOEFL
    - Internet Based - Total Score: 79
    - Internet Based - Writing Score: 21
    - Internet Based - Reading Score: 19
    - Paper Based - Total Score: 550
  - IELTS
    - Total Score: 6.5
  - MELAB
    - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

**Plan B:** Plan B requires 51 major credits and 9 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Candidates demonstrate their visual research accomplishments through participation in the MFA Thesis Exhibition in the Katherine E. Nash Gallery and a supporting paper and a final oral examination.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The M.F.A. program requires a total of 60 credits. It is typically a three-year program and studio space is provided for a maximum of three consecutive years for the pursuit of appropriate artistic research. MFA candidates plan programs with their advisers with approval of the DGS. The program requires all course work be completed by the end of the second year of the program. Required courses include ARTS 8400 (fall semester of the first term), ARTS 8410 (taken in the first or second year), ARTS 8X00 (Area) Practice and Critique course taken each of the four semesters of years one and two, and 9 credits of Related Field courses including a minimum of one course in the history of art and two courses from other academic departments pertinent to the student's program. Students who will teach during their time in the MFA program will be required to register for the 1 credit MFA Teaching Colloquium prior to a graduate teaching appointment. In the third year of the MFA program candidates are required to register for 9 ARTS 8990 credits per semester and a one credit writing workshop in the fall. Candidates must be reviewed annually for progress through the program. At the end of the final year, candidates demonstrate their artistic research accomplishments through participation in the MFA Thesis Exhibition held in the Katherine E. Nash Gallery, a supporting paper, and a final oral examination.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The Asian Languages and Literatures Department does not admit students directly to the M.A. degree. It considers applications only from students seeking the Ph.D. degree. The M.A. is offered only as an exit degree or interim credential.

The Asian literatures, cultures, and media (ALCM) program enables students to pursue the study of Asian texts and media, broadly understood. The program encourages work that questions the boundaries of traditional area studies, demands proficiency in the language(s) of concentration, and provides opportunities for students to design a flexible program of study. Students must designate a language of concentration on their ALCM program application form. Currently, students may select Chinese, Japanese, Korean, or Hindi/Urdu for their language of concentration. However, it is possible to select another South Asian language with permission of the director of graduate studies. For details, see the graduate program website at www.all.umn.edu.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Only applications from students seeking the Ph.D. degree are considered, although applicants are not required to have taken graduate coursework before entering the program. The M.A. is offered as an exit degree or interim credential. A bachelor's degree from an accredited U.S. institution (or its foreign equivalent) is required for admission. Students entering with an M.A. in a related field will have the appropriate number of credits and courses applied to their program of study (as determined by the director of graduate studies). Applicants are expected to have a strong academic record from a relevant humanities or social science discipline and at least three years of college-level study in the proposed language of concentration, or a demonstration of comparable linguistic proficiency.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan B:** Plan B requires 14 major credits and 6 credits outside the major. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Advanced knowledge in the chosen language.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The M.A. is offered only under Plan B, which requires 30 credits. A Ph.D. qualifying exam, normally given at the end of the student's second year in the program, also serves as the M.A. exam. Students entering the program with an M.A. in a related field can take this qualifying exam after one year of study, with approval of the director of graduate studies.

The final exam consists of the following: 1) written language exam(s), typically an in-room reading/translation exam on materials directly related to study and research interests; 2) oral presentation and interview (conducted in the language of concentration) discussing the materials that were part of the written exam; 3) submission of two Plan B research papers for evaluation (normally papers from two different classes, revised for submission); and 4) oral exam (in English) by the above committee, based on the submitted papers.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The emphases in the Au.D. program focus on meeting the standards for licensure as an audiologist. The program emphasizes outcome-based learning activities that prepare graduates to interpret research findings and incorporate them into clinical practice. Coursework and clinical education focus on diagnostic, rehabilitative techniques, technology counseling approaches, and human development. Note that all offers of admission for the Au.D. program are contingent upon the results of a criminal background check administered by the Minnesota Department of Human Services which will be conducted during the upcoming fall semester.

Accreditation
This program is accredited by the American Speech-Language-Hearing Association (ASHA).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Prerequisite coursework for the Au.D. program includes transcript credit in statistics, social science, and scientific method/inquiry.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
94 credits are required in the major.
8 credits are required outside the major.
This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The Au.D. is a four-year plan of study for students entering with a background in speech-language-hearing sciences. Students without such a background should expect an additional year of study. In addition to study in the major field, the degree requires 8 related-fields credits. With adviser approval, up to 6 of these outside-major credits may be completed within the department. During the final year, students complete a clinical externship. Summative evaluations will include a written comprehensive examination followed by an oral exam, and a written capstone project that includes an oral presentation and an oral defense of the project.

Joint- or Dual-degree Coursework: Au.D. and Ph.D. in Speech-Language-Hearing Sciences Student may take a total of 9 credits in common among the academic programs.
Classical and Near Eastern Studies M.A.
Classical & Near Eastern Studies
College of Liberal Arts

Contact Information:
Department of Classical and Near Eastern Studies, 245 Nicholson Hall, 216 Pillsbury Dr. S.E., Minneapolis, MN 55455 (612-625-5353; fax: 612-624-4894)
Email: cnes@umn.edu
Website: http://cnes.cla.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 34 to 47
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Classical and Near Eastern Studies (CNES) is an interdisciplinary department that brings together faculty and graduate students who might in other settings be dispersed among a wide range of programs. CNES is dedicated to rigorous philological and literary training and to the conviction that the ancient Mediterranean world is best studied as a diverse but richly integrated cultural whole. The various master's and Ph.D. tracks allow students to concentrate in the area and period that most appeal to them, but students are strongly encouraged to take courses across the entire range of the department's offerings and to develop a broad, multidisciplinary approach to research and teaching. Related special facilities include the Center for Medieval Studies, the Center for Jewish Studies, and the Center for Modern Greek Studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

For the major track in classics, students should have sufficient knowledge to begin graduate reading courses in either Greek or Latin and at least intermediate ability in the other language.

Other requirements to be completed before admission:
In addition to the online University application, applicants must complete the Department of Classical and Near Eastern Studies application on the ApplyYourself site (also available for download on the department website); other supporting materials, including recommendations and a writing sample, can be uploaded directly into the University's online application. For non-native speakers of English, a copy of TOEFL results is required. Students may be admitted in any academic term, but financial assistance is normally available only to applicants admitted for fall semester.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 28 to 31 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 28 to 31 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: A capstone project is required. Two research papers from departmental seminars (numbered 8190 or 8910), as long as the paper receives a grade of B+ or higher and makes substantive use of at least one modern scholarly language other than English.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Translation proficiency exams offered 1x semester.

A minimum GPA of 3.25 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Ancient and Medieval Art and Archaeology

Note: This sub-plan is inactive. CNES is currently not accepting applications for this program.

This sub-plan allows concentrations ranging broadly over the ancient and medieval periods, with an emphasis on art historical and archaeological approaches. Work in an appropriate ancient language is encouraged.

Language Requirements: Reading knowledge of one modern foreign language appropriate to the student's program is required (normally German, French, or Italian).

Final Exam: The final exams are written and oral.

Classics

This sub-plan provides broad training in the literature of ancient Greece and Rome in its cultural context. Work in Greek and Latin is supplemented by courses in a related field or area of interest. The program requires nearly equal emphasis on courses and seminars in Greek and in Latin, as well as supporting work in a related field or area of interest. The minimum requirement for Plan A is 44 credits (including 10 thesis credits), and for Plan B, 34 credits. Language Requirements: One modern research language as appropriate (normally French, German, or Italian) and reading proficiency in both Greek and Latin as certified by a department exam based on a set reading list is required. Final Exam: The final exams are written (Greek and Latin reading proficiency) and oral (general).

Greek

A core of advanced work in Greek is supplemented by a minor or supporting program in a related field or area of interest. The minimum requirement for Plan A is 47 credits (including 10 thesis credits), and for Plan B, 37 credits.

Language Requirements: One modern research language as appropriate, preferably French, German, or Italian, and reading proficiency in Greek as demonstrated by a department exam based on a set reading list is required.

Final Exam: The final exams are written (Greek reading proficiency) and oral (general).

Latin

A core of advanced work in Latin is supplemented by a minor or supporting program in a related field or area of interest. The minimum requirement for Plan A is 47 credits (including 10 thesis credits), and for Plan B, 37 credits.

Language Requirements: One modern research language as appropriate, preferably German, French, or Italian, and reading proficiency in Latin as demonstrated by a department exam based on a set reading list is required.
Final Exam: The final exams are written (Latin reading proficiency) and oral (general).

Religions in Antiquity
The religions in antiquity track is comparative in both method and content. Although students may focus on a particular religious tradition, they will nonetheless study several ancient religions. Plan A requires 47 credits, including 31 graduate course credits, plus 6 credits in a related field, plus 10 thesis credits. Plan B requires 37 credits, including 31 graduate course credits, plus 6 credits in a related field.

Language Requirements: Proficiency in one modern language (normally German) and master's-level proficiency in classical Hebrew, Greek, or Latin as demonstrated by a department exam based on a set reading list is required.

Final Exam: The final exams are written (ancient language reading proficiency) and oral (general).

  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
34 to 35 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: German and a second modern research language.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Ancient and Medieval Art and Archaeology
Note: This sub-plan is currently inactive. CNES is currently not accepting applications for this program.

This sub-plan allows concentrations ranging broadly over the ancient and medieval periods, with an emphasis on art historical and archaeological approaches. Graduate-level ability in an appropriate ancient language is required for graduation.

Students who continue from the M.A. program may apply those credits toward the Ph.D., with the exception of Plan A thesis credits or Plan B paper credits. A typical Ph.D. program is at least 60 credits, including at least 21 credits in the major, 12 in a supporting program, and 24 thesis credits.

Language Requirements: Reading proficiency in German and in a second modern research language as appropriate (usually French), and research knowledge of an ancient language are required.

Classics
This sup-plan requires extensive advanced work in both Latin and Greek, together with some study in a related field or area of interest.

The program requires nearly equal emphasis on courses and seminars in Greek and in Latin. Students must take at least three seminars in the major, a graduate level course in archaeology, and a two-semester sequence in ancient history, in addition to fulfilling all course requirements specified for the M.A. Students who continue from the M.A. program may apply those credits toward the degree, with the exception of Plan A thesis credits or Plan B paper credits. A typical Ph.D. program is at least 71 credits, including at least 35 credits in the major, 12 in the supporting program, and 24 thesis credits.

Language Requirements: German, plus another modern language, preferably French or Italian, and reading proficiency in Greek and Latin as demonstrated by a department exam based on a set reading list is required.

Greek
A core of advanced work in Greek is supplemented by a minor or a supporting program in a related field or area of interest. Students must take at least three seminars in the major, a graduate level course in archaeology, and a two-semester sequence of ancient history in addition to completing all courses required for the M.A. Students who continue from the M.A. program may apply those credits toward the degree, with the exception of Plan A thesis credits or Plan B paper credits. A typical Ph.D. program is at least 70 credits, including at least 15 credits in Greek, 15 credits in the supporting program, and 24 thesis credits.

Language Requirements: German and a second modern language, preferably French or Italian, and reading proficiency in ancient Greek as demonstrated by a department exam based on a set reading list is required.
Latin
A core of advanced work in Latin is supplemented by a minor or supporting program in a related field or area of interest. Students must take at least three seminars in the major, a graduate-level course in archaeology, and a two-semester sequence in ancient history, in addition to completing all M.A. course requirements. Students who continue from the M.A. program may apply those credits towards the degree, with the exception of Plan A thesis credits or Plan B paper credits. A typical Ph.D. program is at least 70 credits, including at least 15 credits in Latin, 15 credits in the supporting program, and 24 thesis credits.

Language Requirements: German and a second modern research language, normally French or Italian, and reading proficiency in Latin as demonstrated by a department exam based on a set reading list is required.

Email: cogsci@umn.edu
Website: http://www.cogsci.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 11
- Length of program in credits (Doctorate): 23
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Cognitive science is broadly concerned with integrating contemporary approaches to the study of mind/brain, and with the systems and processes underlying the acquisition and use of knowledge. The coherence of the program lies in its intellectual focus on cognition. This program spans cellular, behavioral, and psychological levels of scientific analysis in the study of cognition in a single unified graduate program. It integrates the diverse content, methods, and perspectives of a number of different disciplines (e.g., anthropology, biology, artificial intelligence, linguistics, neuroscience, philosophy, and psychology), which are concerned with or in some sense inform our understanding of cognition.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Minor Requirements for Students Majoring in Other Fields: The minor in cognitive science is available to master's (M.A. and M.S.) and doctoral students. Both master's and doctoral minors require the following courses outside the student's major department: CGSC 8001 Proseminar in Cognitive Science and a broad introduction to cognitive sciences, such as one of the following: IDSC 8711 - Cognitive Science; CGSC 8000 - Philosophy of Cognitive Science; PSY 5015 - Cognition, Computation, and Brain; CGSC 8040 - Cognitive Neuroscience.

The master's minor requires a minimum of 8 graduate credits (including the required courses listed above) and 3 credits of additional relevant elective courses.

The doctoral minor requires a minimum of 14 graduate credits (including the required courses listed above) and 9 credits of additional relevant elective courses. Substitutions for required courses are permitted only with prior permission from the director of graduate studies for cognitive science. Elected courses must be taught by faculty in the minor program or be approved in advance by the director of graduate studies for cognitive science. Courses in the student's major department do not count toward the minor.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 70
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Cognitive science is broadly concerned with integrating contemporary approaches to the study of mind/brain, and with the systems and processes underlying the acquisition and use of knowledge. The coherence of the program lies in its intellectual focus on cognition. This program spans cellular, behavioral, and psychological levels of scientific analysis in the study of cognition in a single unified graduate program. It integrates the diverse content, methods, and perspectives of a number of different disciplines (e.g., anthropology, biology, artificial intelligence, linguistics, neuroscience, philosophy, and psychology), which are concerned with or in some sense inform our understanding of cognition. The Ph.D. program trains cognitive scientists to conduct research integrating methodologies and content knowledge from a variety of approaches. In order to ensure an interdisciplinary approach, each student has two coadvisers from the cognitive science graduate faculty, each representing a different discipline from within the cognitive sciences.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Applicants must apply through the Graduate School's Apply Now interface. They must submit a completed Graduate School Application, scores from the GRE, and three letters of recommendation. Applicants wishing to be considered for financial support should apply no later than January 1 of the preceding academic year. Entry is usually in fall semester but may be permitted in other semesters in exceptional cases.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

34 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The Ph.D. program requires a minimum of 46 credits, in addition to 24 thesis credits. Students are required to take two core courses with a CGSC designator, as well as 9 credits of independent study related to research. Responsible Conduct of Research training is required and is integrated into the two core courses taken by all students. Other course requirements are distributed among component disciplines and fields. Courses are intended to provide a foundation for the student's research program. Students are expected to conduct two research projects prior to taking their preliminary written exams. A report on the first-year research project should be concluded by the first term of the second year. A report on the second-year research project should be completed by the second term of the third year. The preliminary written exams will typically be (but are not necessarily) expansions of the first- and second-year research projects. The two Ph.D. written preliminary projects are expected to be of near publishable quality. As entry into the Ph.D. program assumes no previous graduate work, students who enter the program with an M.A. or other graduate coursework in a cognitive science-related discipline may apply credits from their previous graduate work towards the required 46 credits.

Communication Studies M.A.
Communication Studies
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of Communication Studies, 225 Ford Hall, 224 Church Street S.E., Minneapolis, MN 55455 (612-624-5800; fax: 612-624-6544). Website: http://www.comm.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 31 to 33
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Communication studies focuses on the study of communicative dimensions of human experience using humanistic and social scientific methods. This program prepares students to become researchers and teachers, offering three concentrations: interpersonal communication, rhetorical studies, and critical media studies. Coursework in rhetoric and public discourse studies emphasizes humanistic methods and includes argumentation and persuasion, ethics, rhetorical theory and criticism, and political rhetoric. Students may also pursue special interests in rhetorical philosophies, movements and campaigns, or popular culture and critical theory. The program should be supplemented by coursework outside the department. An understanding of history, political science, sociology, or cultural studies is recommended. Coursework in interpersonal communication has a social scientific orientation. Most students focus on a subarea such as small group, intercultural, interpersonal communication, or problems (e.g., decision making, conflict resolution). Coursework outside the department is usually concentrated in one or more of the behavioral sciences. Students are expected to develop a command of research techniques and a thorough knowledge of statistics. Coursework in critical media studies emphasizes qualitative, historical, critical, and empirical methods and includes television studies, feminist media studies, ethnic and racial minorities in media, critical media literacy, political economy of media, popular culture, environmental communication, and music. Coursework outside the department is usually in the fields of American studies, political science, cultural studies, mass communication, or women's studies.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
All applicants must have completed at least 15 undergraduate credits in speech or communication courses related to their proposed area of emphasis in the department. A brochure detailing prerequisite requirements is available from the department or from the department website. All prerequisites must be completed before admission.

Special Application Requirements:
Applicants must submit scores from the GRE General Test, transcripts of all post-secondary academic work, and a written statement of academic and occupational objectives. Three letters of recommendation and a writing sample are required of all applicants for assistantships or fellowships.

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 144
  - General Test - Analytical Writing: 5

International applicants must submit score(s) from one of the following tests:
• TOEFL
- Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 15 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 21 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** A publishable, article-length paper consisting of the student's original research.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.50 is required for students to remain in good standing.

Inclusion of 4xxx courses on Graduate Degree Plan Forms is subject to adviser and director of graduate studies approval. Such courses must be taught by graduate faculty and usually no more than one 4xxx course is allowed on a Degree Program Form. The degree is offered under Plan A (thesis) and Plan B (without thesis). Plan A requires a minimum of 15 course credits in communication studies, including 3 course credits from a 5xxx or 8xxx course in one of the concentrations other than the student's own, a minimum of 6 course credits in a minor or related fields, and 10 thesis credits. Plan B requires a minimum of 21 course credits in communication studies, including 3 course credits from a 5xxx or 8xxx course in one of the concentrations other than the student's own, a minimum of 6 course credits in a minor or related field, an additional 6 credits in the field of student's choice, and a paper.

Coursework outside the department is usually concentrated in one or more of the behavioral sciences. Students are expected to develop a command of research techniques and a thorough knowledge of statistics. Coursework in critical media studies emphasizes qualitative, historical, critical, and empirical methods and includes television studies, feminist media studies, ethnic and racial minorities in media, critical media literacy, political economy of media, popular culture, environmental communication, and music. Coursework outside the department is usually in the fields of American studies, political science, cultural studies, mass communication, or women's studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The master's minor requires 6 credits. The doctoral minor requires 12 credits.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 66
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Communication studies focuses on the study of communicative dimensions of human experience using humanistic and social scientific methods. This program prepares students to become researchers and teachers, offering three concentrations: interpersonal communication, rhetorical studies, and critical media studies. Coursework in rhetoric and public discourse studies emphasizes humanistic methods and includes argumentation and persuasion, ethics, rhetorical theory and criticism, and political rhetoric. Students may also pursue special interests in rhetorical philosophies, movements and campaigns, or popular culture and critical theory. The program should be supplemented by coursework outside the department. An understanding of history, political science, sociology, or cultural studies is recommended. Coursework in interpersonal communication has a social scientific orientation. Most students focus on a subarea such as small group, intercultural, interpersonal communication, or problems (e.g., decision making, conflict resolution). Coursework outside the department is usually concentrated in one or more of the behavioral sciences. Students are expected to develop a command of research techniques and a thorough knowledge of statistics. Coursework in critical media studies emphasizes qualitative, historical, critical, and empirical methods and includes television studies, feminist media studies, ethnic and racial minorities in media, critical media literacy, political economy of media, popular culture, environmental communication, and music. Coursework outside the department is usually in the fields of American studies, political science, cultural studies, mass communication, or women's studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
All applicants must have completed at least 15 undergraduate credits in speech or communication courses related to their proposed area of emphasis in the department. A brochure detailing prerequisite requirements is available from the department or from the department website. All prerequisites must be completed before admission.

Applicants must submit scores from the GRE General Test, transcripts of all postsecondary academic work, and a written statement of academic and occupational objectives. Three letters of recommendation and a writing sample are required of all applicants for assistantships or fellowships.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 144
  - General Test - Analytical Writing: 5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

**IELTS**
- Total Score: 6.5

**MELAB**
- Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

30 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.50 is required for students to remain in good standing.

Students must submit programs consisting of at least 42 course credits (which may include 12 credits from the M.A. and an additional 30 credits of doctoral coursework; at least 12 credits must be obtained from a supporting program or official graduate minor; 6 course credits from a 5xxx or 8xxx course from each of the other concentrations other than the student’s own); 24 thesis credits are required. The program should include 12 credits in research methods relevant for completing the degree and continuing a scholarly career. Under certain circumstances, foreign language courses may be used to satisfy this requirement.

- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are not admitted to work toward the M.A. degree. In the event that a Ph.D. student decides not to finish the Ph.D. and is in good standing, that student may apply for a terminal M.A. Comparative literature is the oldest field of literary criticism, dating back to the seventeenth century. Among the wide range of studies currently conducted in comparative literature nationally and internationally, this program focuses on theories of literary criticism and its explanatory bases; indeed the program is seen as one of the principal initiators of such fields of study. This program is likewise engaged in pushing the bounds of critical inquiry in related domains of literary studies, directing much of its energies toward the intersection of literature with other media (in various constellations of word, sound, and image) and of literatures of the global North with those of the global South, engaging problems ranging from narrative to post-colonial studies. The curriculum emphasizes seminars and directed research. The core requirement is a two-semester Basic Research Seminar (CL 8001-8002) that develops critical and analytic skills and introduces current theoretical perspectives with the study of historical problems. Each entering graduate student also enrolls in courses that focus on developing skills and experience in teaching and other professional domains. Apart from core courses, many courses are nonrecurring and closely relate to current faculty research. A major portion of coursework for degrees in Comparative Literature is cross-listed with the literature and language departments.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Applicants must submit their test score(s) from the following:

- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students normally are not admitted to work toward the M.A. degree. In the event that a Ph.D. student decides not to finish the Ph.D. and is in good standing, that student may apply for a terminal M.A. While most traditional humanistic disciplines tend to focus either on a given mode of discourse (e.g., art history, musicology) or a specific cultural context (e.g., American studies, European languages and literatures), this program engages a broader problematic--how discourse and cultural production both shape and are shaped by life in time, space, matter, and society. Drawing on a variety of theoretical positions, close attention is paid to various types of discourse, such as music, film, myth, ritual, architecture, landscape and urban design, painting, sculpture, and literature in elite, popular, folk, and mass culture, understanding these as both a site and an instrument of contestation and negotiation among social forces. More generally, the program seeks to re-associate intellectual and cultural history with social and political history, to set discourse of various sorts within a social context, and to consider specific social formations within the ongoing historical process. In all this, the program encourages work that is interdisciplinary (at times, even anti-disciplinary) as well as cross-cultural. The curriculum emphasizes seminars and directed research. The core requirement is a two-semester Basic Research Seminar (CSDS 8001-8002) that develops critical and analytic skills and introduces current theoretical perspectives with the study of historical problems. Each entering graduate student also enrolls in courses that focus on developing skills and experience in teaching and other professional domains. - Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 45
- This program does not require summer semesters for timely completion.
- Degree: Master of Fine Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Creative Writing Program in the Department of English offers the Master of Fine Arts (MFA) degree for students committed to pursuing the writing life. This three-year degree provides advanced, graduate-level coursework in writing, language, and literature, as well as study in a related field. The third year of the program focuses on the final development of a book-length manuscript suitable for publication. At the heart of the program are writing workshops in poetry, fiction, and literary nonfiction, and courses in the "Reading as Writers" and "Topics in Advanced Writing" series, which enable writers to explore a variety of issues relating to contemporary themes in American and world literature. The program encourages experimentation across genres, fostering the discovery of new and varied forms for a developing voice. Students also have the opportunity to work editorially on "Dislocate", the graduate literary magazine.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The program does not require a graduate degree for admission.

Special Application Requirements:
The M.F.A. in Creative Writing does not require undergraduate work in English literature or an undergraduate degree in literature. Students come from a variety of educational backgrounds and life experiences. Applicants should be aware, however, that graduate coursework in literature and language is required once admitted to the program.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan C: Plan C requires 42 major credits and 3 credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: The capstone project is a publishable thesis manuscript of poetry, fiction, or creative nonfiction. The final exam is an oral defense of the thesis manuscript and literary essay.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The M.F.A. requires 45 credits distributed over a three-year period, culminating in a book-length manuscript, M.F.A. literary essay, and an M.F.A. defense. Required coursework includes ENGW 8101 (4 cr), ENGW 8180 (4 cr); three writing workshops (12 cr), one of which must be outside the student's primary genre; one 8xxx seminar (4 cr); language and literature courses (10 cr); coursework in a related field (3 cr); an additional creative writing class of the student's choosing (4 cr); thesis credits (4 cr); and a creative project in the form of a book-length manuscript suitable for publication.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This structured interdisciplinary doctoral minor is offered in conjunction with the Interdisciplinary Center for the Study of Global Change (ICGC). By focusing on the social bases of change in the global south, the program engages a wide range of academic disciplines, including the social sciences, humanities, and biological sciences. The minor focuses on three areas: 1) the relationships between macroscopic processes of political, economic, and social change, and the microscopic conditions of lived experience in the global south; 2) specifically interdisciplinary perspectives (encompassing the social sciences, the biological sciences, and the humanities) on this general thematic concern; and 3) preparation of doctoral students for research on the global south.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission is contingent upon prior admission to a doctoral degree-granting program at the University and upon affiliation with ICGC.

Special Application Requirements:
Students enrolled in a doctoral degree-granting program may apply for the minor at any time during the academic year; acceptance will take effect the following term. Students must be officially in the minor prior to taking their preliminary oral examination.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The doctoral minor requires a sequence of four core seminars (DSSC 8111, 8112, 8211-8212 and 8310) for 9 credits total (8310 is taken twice). Students also take one or two courses (minimum 3 credits total) chosen from an approved list of courses from across the graduate education curriculum that are relevant to the field of development studies and social change.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 7
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The early modern studies (EMS) minor is available to master's and doctoral students. The program encourages inquiry into the early modern period, roughly 1300 to 1800 A.C.E., using insights and perspectives from multiple disciplines. The minor provides graduate students with solid grounding in the theories and multi-disciplinary methods used by scholars studying the early modern period, particularly through the required core seminar (EMS 8250 - Seminar in EMS: Current Research and Methodologies), which is co-taught by professors from two distinct departments.

The minor also offers an opportunity to interact with the current research of visiting scholars and University of Minnesota faculty and graduate students through EMS 8100 - Workshop in EMS: Workshop in Early Modern Studies, in which students share written responses to workshops and lectures on campus. Finally, the minor draws electives from existing courses in departments across the College of Liberal Arts, as well as those in the History of Science, Technology, and Medicine. The University of Minnesota has numerous library collections and research centers which include a focus on the early modern period. For more information on the minor, visit www.cemh.umn.edu/minor.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Admission to the early modern studies graduate minor is contingent upon prior admission to a master's or doctoral degree-granting program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The master's minor requires 7 graduate credits: EMS 8520 - Seminar in EMS: Current Research and Methodologies (3 cr), EMS 8100 - Workshop in EMS: Workshop in Early Modern Studies (1 cr), and one graduate-level elective course (3 cr) outside of the student's major department.

The doctoral minor requires 12 graduate credits: Including EMS 8520 - Seminar in EMS: Current Research and Methodologies (3 cr), EMS 8100 - Workshop in EMS: Workshop in Early Modern Studies (1 cr), and eight (8)graduate-level elective credits outside of the student's major department.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are admitted only for the Ph.D. in economics; the M.A. is an optional part of the Ph.D. program.

The economics graduate program offers degree work in both theoretical and applied fields of economics. It is possible to pursue thesis research in microeconomic or macroeconomic theory. In addition, the following fields of specialization are offered: econometrics, economic growth and development, financial economics, game theory, industrial organization, international economics, labor economics, mathematical economics, monetary economics, and public economics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 major credits and 6 credits outside the major. The final exam is written. A capstone project is required.

Capstone Project: Two Plan B projects consisting of research papers or literature reviews are required; the Ph.D. written preliminary exams required in two fields outside of economic theory ("field exams") may be used to satisfy either or both of the Plan B projects. Because the standards used to judge whether a preliminary exam has satisfied the requirement for the M.A. are less rigorous than those for the Ph.D., students may qualify for the master's Plan B without having satisfied all requirements for the Ph.D. written preliminary exams.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.20 is required for students to remain in good standing.

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A master's minor consists of 6 credits in 4xxx, 5xxx, or 8xxx economics courses, all taken A-F and completed with grades of B or better (one 8xxx course may carry a grade of C). The 6 credits must include two courses in either the 4161-4164 sequence or the 4165-4168 sequence, or more advanced courses in economic theory.

The economic theory requirement may be waived if, in the judgment of the director of graduate studies, the student's previous work in economics has included courses equivalent to 4xxx economic theory courses, though the requirement to complete 6 credits would still stand.

Requirements for a doctoral minor include five or more from among the following courses: ECON 8001-8004 or 8101-8104, and 8105-8108; plus completion of at least two 8xxx courses in economics other than those listed above. All courses must be taken A-F, with no grade lower than C and no more than two course grades of C.

In addition, students must pass the microeconomics preliminary exam for minors or majors and either the macroeconomics preliminary exam for minors or majors, or a preliminary exam for majors in one of the fields listed under the program description above.

In addition, the following fields of specialization are offered: econometrics, economic growth and development, financial economics, game theory, industrial organization, international economics, labor economics, mathematical economics, monetary economics, and public economics.

Students are admitted only for the Ph.D.; the M.A. is an optional part of the Ph.D. program.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.50.

**Special Application Requirements:**
Coursework in linear algebra and multivariate calculus is required for admission to the Ph.D. program.

Applicants must submit their test score(s) from the following:
- **GRE**
  - General Test - Quantitative Reasoning: 158

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 600
- **IELTS**
  - Total Score: 7
- **MELAB**
  - Final score: 84

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the [General Information](http://www.econ.umn.edu/graduate/index.html) section of the catalog website.
Program Requirements
12 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.20 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Emphasis in all aspects of the program is on careful development of the theoretical basis for the work, whether the work is theoretical or applied, and whether the relevant theory is drawn from economics, econometrics, mathematics, statistics, or other related disciplines.

Before undertaking research for a doctoral thesis, the student must pass written preliminary exams in micro- and macroeconomic theory, plus in two of the fields listed under the curriculum section above. The number of courses taken to help students prepare for the preliminary examinations is determined through consultation with the student's adviser, although at least 12 credits in the major are required. In addition, students must complete 12 credits outside the major for a supporting program, which may include economics courses not included in the major.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 32
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Admission to the M.A. program in English as a Second Language (ESL) has been suspended and the program is in the process of being discontinued.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Speaking Score: 25

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 23 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 23 major credits and 9 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is a paper of publishable quality based on ESL master's coursework, coursework in another program, or personal interest. Two Plan B papers are required; one may be a Teaching Portfolio, prepared according to specific program guidelines.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: Proficiency in one language not native to student.

A minimum GPA of 3.20 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.
The M.A. program in ESL typically takes two years to complete. Plan A requires a thesis demonstrating original work in areas related to the field, familiarity with research methodology, and knowledge of the effective presentation of investigative study results. Plan B requires two qualifying papers, usually consisting of course papers that have been revised under the supervision of a faculty member.

Plan A and Plan B students must complete 23 credits in required coursework (SLS 5401, 5402, 5721, 5722, 5724, 5805) and 6 credits of elective coursework in related fields. Plan A students must complete an additional 10 thesis credits for a total of 39 credits and Plan B students must complete an additional 3 credits in elective coursework for a total of 32 credits. Elective and related field courses must be chosen with the help of an adviser to ensure the relevance of courses to students’ goals.

- **Degree:** Master of Arts

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

Over the past 20 years, the field of English studies has changed dramatically from a discipline concerned with studying the literary works produced by English speakers in Britain and the United States to encompass writings in English from around the globe. The concerns of literary scholars have broadened to include not only textual analyses but also cultural, social, political, and economic contexts. The field of literature itself now encompasses not only the traditional genres of poetry, prose (fiction and belles-lettres), and drama, but also extra-literary discourses: popular culture, film, television, legal documents, conduct books, and manifestos. The Department of English has been in the forefront of interdisciplinary projects, thanks to the efforts of a faculty committed to research in American studies, medieval studies, feminist studies, film studies, and cultural studies. At the same time, the department maintains the core concerns of the discipline--the traditional study of the literatures and languages in English--as well as develops writers for the present and future through the master of fine arts in creative writing degree. The department is engaged in two simultaneous projects: to preserve the core curriculum and to re-imagine its future shape.

The department offers a master of arts in English language and literature. The M.A. offers training in the areas of literary history, literary theory and interpretation, language, linguistics, rhetoric, and composition. Students in the M.A. can develop specific concentrations through consultation with the director of graduate studies.

Course requirements for the M.A. program are broadly defined, allowing the student to shape a personal program of study. The English program encourages and supports interdisciplinary work.

**Program Delivery**

This program is available:

- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:

A minimum of four courses in English, three of which must be at the upper-division level, is required for degree program admission. The courses should be widely distributed.

**Special Application Requirements:**

Required admission materials include three letters of recommendation; scores from the General Test of the GRE; a short essay explaining scholarly, professional, and personal goals and reason(s) for choosing the University of Minnesota; and a writing sample, such as a course paper. Candidates for all degrees are admitted fall semester only; all materials must be received by December 15th.

Applicants must submit their test score(s) from the following:

- **GRE**
  - General Test - Verbal Reasoning: 164

International applicants must submit score(s) from one of the following tests:
TOEFL
  - Internet Based - Total Score: 105
  - Paper Based - Total Score: 620
IELTS
  - Total Score: 7.5
MELAB
  - Final score: 88

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan B: Plan B requires 21 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is made up of three Plan B papers. Each is a tightly argued essay of about 5,000 words, usually a reworking of a paper done originally for a course.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: A reading knowledge of one language.

A minimum GPA of 3.00 is required for students to remain in good standing.

The minimum requirement for the M.A. is 30 credits. Coursework must include at least 21 credits in English and 6 credits in related fields outside of English or in a minor field. All M.A. students must complete the introductory course ENGL 5001, introduction to literary theory and literary study, and three Plan B papers.

The graduate minor program in feminist and critical sexuality studies is located in the Department of Gender, Women, and Sexuality Studies (GWSS). The feminist and critical sexuality studies minor is a supplementary program for graduate students already admitted to the University of Minnesota and enrolled in another graduate program. The minor is designed for students with widely flexible interests and academic aims looking for advanced graduate academic training in feminist and critical sexuality studies. The program is also designed to provide an interdisciplinary graduate program in GLBTQ studies. Students must apply for special admission through the feminist studies director of graduate studies.

Program Delivery

Prerequisites for Admission
Special Application Requirements:
In a letter of interest to the director of graduate studies, applicants must demonstrate a clear relationship between the focus and objectives of their doctoral research and the goals, curriculum, and scholarly resources of the feminist and critical sexuality graduate minor program. Since the emphasis of the graduate minor is interdisciplinary, a focus or strong interest in such work is preferred. A prerequisite undergraduate major or minor in gender, women and/or GLBTQ/sexuality studies is not required for admission, but preferable. Applicants are expected to demonstrate general knowledge of this relevant scholarship in some combination of previous coursework, research and writing, and/or organizational activity/experience.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

To complete a Ph.D. minor, students must complete GWSS 8108 and 8109 and three graduate-level electives (9 cr), including at least one 5xxx or 8xxx course in feminist studies (GWSS 8xxx or GWSS 5xxx) and, at most, one feminist studies-approved graduate course from their home department. Students must apply for admission into the graduate minor program.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The M.A. is available only to students admitted to the feminist studies Ph.D. program who wish to secure a Plan B M.A. along the way to obtaining a Ph.D. This credential is helpful for ABD employment purposes or for students who must exit the program. It is similar to the Ph.D. milestones but does not require a dissertation.

The Ph.D. program in feminist studies is designed to help students develop a high level of competence in feminist theories, research methods, interdisciplinarity, and pedagogies. The program is especially strong on feminist theory and issues related to women's diversity, nationally and globally. To guarantee a high level of interdisciplinary exchange, the program is designed to bring feminist studies doctoral students together with graduate minor students who are pursuing a disciplinary specialty in their own home department. The program's interdisciplinary curriculum emphasizes the interaction of social conditions such as class, ethnicity, race, sexualities, and national identity with gender. These interactions and their effects are examined in cultural productions such as media representations or colonialist paradigms in social systems and relations of power; in aspects of science such as genetics and new technologies; in epistemologies and philosophy; in professional areas such as health care to public policy; and in social, political, and environmental justice studies.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 28 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The Plan B project is made available to students who file a separate Program of Study form in addition to a Ph.D. Program of Study form. The program of study is the same for both degrees. A Plan B M.A. is conferred upon successful completion of the written and oral preliminary exams.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

A M.A. in gender, women, and/or sexuality studies or a related field will be considered important, but is not required.

Other requirements to be completed before admission:
Preference is given to students with academic training or an undergraduate degree in gender, women, and/or sexuality studies or a related field. Extensive political work in these areas will also be considered important but not required.

Special Application Requirements:
Applicants for the Ph.D. program must submit scores from the General (Aptitude) Test of the GRE, three letters of recommendation, a writing sample, a current curriculum vitae, and a clearly written statement of career interests, goals, and objectives by electronic application through the Graduate Office (Apply Yourself). Graduate study in the program begins in the fall semester following admission. The application deadline is December 1; all applications are evaluated once each year in December.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
- Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
28 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

The course and credit requirements for the Ph.D. fall into roughly two categories: interdisciplinary courses satisfying core requirements, and courses constituting or enhancing a concentration. Students take 28 credits in required courses, including two elective courses that satisfy core requirements in cultural diversity and two courses that satisfy core requirements in research tools and methods. The remaining coursework includes 12 credits in an area of concentration and 12 credits in the minor field or supporting program (related to the concentration). Students are also expected to register for 1 credit of GWSS 8996 for each of 4 semesters and to participate in the department colloquium series of faculty, student, and guest lecturer presentations. In addition, students are expected to register for 24 thesis credits while writing the dissertation.

Because some courses may fall into more than one category (e.g., courses in the concentration may also satisfy core course requirements), students are permitted to double count credits in the major program in consultation with the director of graduate studies. This means that a student can graduate with fewer than 52 credits when double counting is approved. Students entering the Ph.D. program with a master's degree may transfer credits from that degree and apply them to the Ph.D. requirements in consultation with the director of graduate studies. All students, however, must take GWSS 8108 and 8109.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The French program, which offers M.A. and Ph.D. degrees, covers all areas of French literature and culture from the Middle Ages to the present. Traditional areas of study and scholarship are inflected by the faculty's interests, expertise, and research in areas that are shaping the discipline of French studies. The program, which fosters interdisciplinary research, has particular strengths in literary and cultural studies, critical theory, feminist studies, medieval studies, cinema studies, and francophone studies.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Applicants must submit three letters of recommendation from persons familiar with their scholarship and research potential, a complete set of official transcripts, a sample of their academic writing, evidence of spoken French proficiency (audio sample or phone interview), and a written statement of research interests and goals. International student applicants should also submit scores for the TOEFL or equivalent English proficiency testing program. The program offers funding packages of five years for those admitted at the M.A. level. Submission of all application materials by January 10 ensures consideration for fellowships and graduate instructorships for the next academic year. New teaching assistants and fellowship recipients are only admitted for fall semester; others may be admitted in mid-year.

Special Application Requirements:
A B.A. in French (or equivalent), with a literary emphasis, is required for the M.A. programs. Applicants have generally completed at least 18 credits in French literature and culture. Prospective students whose undergraduate degree is in another field, but who have taken substantial coursework in French and are strongly motivated to pursue literary studies, are invited to contact the director of graduate studies in French.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 15
- This program does not require summer semesters for timely completion.
- Degree: French Studies PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This 15-credit graduate program is primarily for secondary teachers of French, but welcomes any prospective students wishing to enhance their knowledge of diverse areas of French and francophone studies, including linguistics, culture, literature, and film. Consisting of coursework only, the certificate provides the opportunity to explore in depth aspects of French and Francophone literature, culture, and language while also sharpening language skills. An additional benefit is the potential for professional advancement.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have a B.A. in French or equivalent (B.A./B.S. in another field, but relevant professional experience or academic preparation in French language and culture) with a preferred GPA of 3.0.

Special Application Requirements:
Applicants must submit the following materials: transcripts, a personal statement (in English) explaining how this certificate meets their personal or professional goals, a writing sample in French (a 500-1,000 word essay on applicant's topic of choice), and two letters of recommendation from individuals who can comment knowledgeably on applicant's interest and abilities in French studies. Applications must be received by April 15 for fall semester and by October 15 for spring semester.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The certificate consists of five courses (15 cr) selected according to the following formula: one course (3 cr) in French linguistics, one course (3 cr) in French or francophone literature or culture, and three elective courses (9 cr) in French/francophone language, linguistics, literature, or culture. One of the three electives may be taken in a related area outside French studies, subject to approval by the student's adviser. At least 60 percent of credits must from 5xxx and 8xxx courses; no more than two courses (6 cr) may be 4xxx courses. No courses taken as part of an undergraduate program may be applied, but up to 40 percent of the work on the certificate program can be transfer credits, consistent with the Graduate School's transfer policy. Program must be completed within four years of the date of admission.

- This program does not require summer semesters for timely completion.
- Degree: Master of Geographic Information Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The professional master of geographic information science (M.G.I.S.), administered by the Department of Geography, provides graduate-level work in the theory, applications, and technology of geographic information science (GIS). Courses for the program are divided into three broad categories. Core courses provide the conceptual and theoretical underpinnings for a comprehensive, well-rounded knowledge of GIS, including an introductory seminar for entering students (GIS 8501). A set of technology courses focuses on specific software and techniques of GIS. Elective courses provide additional breadth to the program by allowing students to take courses related to their area of interest.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

Special Application Requirements:
Applicants must submit an application form; a M.G.I.S. supplemental application form; transcripts; a clearly written personal statement of career interests and goals; and three letters of recommendation from persons familiar with their academic and/or employment background. The GRE is not required. All materials must be submitted by January 30 for fall semester entrance and by September 1 for spring semester entrance.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 22
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7.5
- MELAB
  - Final score: 84

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan C: Plan C requires 29 major credits and 6 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The degree is offered under Plan C (coursework only) and requires 35 credits of coursework. All students must have at least 35 credits, with a minimum of 18 credits in core and technology courses (12 credits of core courses and 6 credits of technology courses). All students are required to take GEOG 5561 or FR 5131, an approved 5000-level course with an advanced GIS focus, GIS 5571, GIS 5572, an approved 8000-level course with an advanced GIS focus, and GIS 8501. At least 6 credits of the 35 required must be taken outside of the geography department (GEOG and GIS designators) but may include core GIS courses (e.g. FR and ESPM designators). Students must also complete a professional portfolio, and a set of concluding experiences including a public presentation, an exit survey, and a final meeting with an adviser.

- Length of program in credits: 30 to 31
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The geography graduate program at the University of Minnesota reflects the intellectual breadth of the discipline by maintaining strengths in the broad areas of human geography, physical geography, nature-society relationships, and geographic information science. Faculty and students are engaged in teaching and research both within and across these broad areas as evidenced by prominent research themes within the program: culture, place, and flow; environmental change; geographies of the information society; geovisualization; globalization and uneven development; governance, citizenship, and justice; metropolis and world; and nature and society. To support students in gaining both depth and breadth within the discipline, the program is highly individualized with a limited number of requirements. Students work with their advisers to design individual programs suited to their educational and professional goals.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Undergraduate degrees need not be from a program in geography. However, students whose previous work is not in geography may be asked to complete specific courses that do not provide graduate credit.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 600
  - General Test - Quantitative Reasoning: 600
  - General Test - Analytical Writing: 4.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 22
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 84

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 25 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Three Plan B papers are required. These papers have the quality but not the scope of a master's thesis, and usually are enhanced versions of research papers done in connection with coursework and seminars.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Competency in a foreign language.

A minimum GPA of 2.80 is required for students to remain in good standing.

Each student is required to take GEOG 8001 and 8405, plus two additional GEOG 81xx and/or GEOG 82xx courses and one methods course. GEOG 8970 and 8980 may be used for GEOG 81xx or 82xx coursework with permission of the adviser.

- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The geography graduate program at Minnesota reflects the intellectual breadth of the discipline by maintaining strengths in the broad areas of human geography, physical geography, nature-society relationships, and geographic information science. Faculty and students are engaged in teaching and research both within and across these broad areas as evidenced by prominent research themes within the program: culture, place, and flow; environmental change; geographies of the information society; geovisualization; globalization and uneven development; governance, citizenship, and justice; metropolis and world; and nature and society. To support students in gaining both depth and breadth within the discipline, the program is highly individualized with a limited number of requirements. Students work with their advisers to design individual programs suited to their educational and professional goals.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minor must be developed in consultation with a faculty adviser. Consult the director of graduate studies about selecting an adviser.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.50.

Undergraduate degrees need not be from a program in geography. However, students whose previous work is not in geography may be asked to complete specific courses that do not provide graduate credit.

Graduate degrees need not be from a program in geography. However, students whose previous work is not in geography may be asked to complete specific courses that do not provide graduate credit.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 600
  - General Test - Quantitative Reasoning: 600
  - General Test - Analytical Writing: 4.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 22
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 84

The preferred English language test is Test of English as Foreign Language.
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
16 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students must receive certification of expertise in the language(s) or techniques(s) or both as necessary for the proposed program. The advising committee sets the requirements, and certifies that they are met before the final Ph.D. examination is scheduled.

Each student is required to take GEOG 8001 and 8405, preferably within the first year. Students must also complete two additional GEOG 81xx and/or GEOG 82xx courses, with at least one of the three a GEOG 82xx course. In addition, students must take one methods course and one proposal-writing course. The choice of courses should be made in consultation with the student's adviser. GEOG 8970 and GEOG 8980 courses may be used for GEOG 81xx or GEOG 82xx coursework with permission of the adviser. Students must prepare a Research dossier and pass preliminary exams. These usually focus on areas closest to a student's current research interests. They also may cover broader knowledge of the discipline and of minor or supporting fields, as the Examining Committee chooses. They must also complete dissertation proposal then complete their PhD dissertation and pass the final oral examination.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 33
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Germanic Studies program in the Department of German, Scandinavian, and Dutch (GSD) is distinguished for its interdisciplinary approach to the study of literature and culture. The program equips students to be creative scholars and skillful teachers through research and teaching programs covering the literature and culture of German-speaking and Nordic countries. Students work closely with faculty dedicated to scholarly innovation, teaching excellence, and interdisciplinary collaboration.

The Germanic Studies program offers both M.A. and Ph.D. degrees and allows students to tailor their programs to their individual needs and interdisciplinary interests. Students have the option to pursue a track in German (M.A., Ph.D.), Germanic Medieval Studies (M.A., Ph.D.) or Scandinavian Studies (M.A.) by completing a specified number of courses in one of those areas.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
B.A. or equivalent in German, Scandinavian, or related field. Students are usually admitted to the Ph.D. program, but the M.A. must be completed first. Applicants must have fluency in German or a Scandinavian language.

Special Application Requirements:
In addition to the University's application requirements, the department requires the following: the department's Supplemental Application Information form (download from the department's website); a copy of one or more papers representative of the applicant's level of scholarly development (not to exceed 25 total pages); three letters of recommendation; the General (Aptitude) Test of the GRE (required for master's program applicants, but optional for those whose native language is not English). Students are admitted for fall semester only. All application materials may be uploaded into the online application and must be submitted by December 15.

For an online application or for more information about graduate education admissions, see the General Information section of this website.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Internet Based - Speaking Score: 27
- Paper Based - Total Score: 550

- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan B: Plan B requires 27 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The Plan B paper is usually an improved, reworked seminar paper written for a specific course in the major.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The Germanic Studies M.A. includes the following: one introductory course; six electives in German and/or Scandinavian literature/culture; one Germanic medieval studies course; a pedagogy seminar; two courses outside the major; and demonstration of oral and written proficiency in German or one Scandinavian language.

Program Sub-plans

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

German
Students may choose an track in German which will be noted on their transcript.

Five of the six elective courses must be from those specified as applicable for the German track, and the Plan B paper must reflect the track.

Germanic Medieval Studies
Students may choose an track in Germanic Medieval Studies which will be noted on their transcript.

Five of the six elective courses must be from those specified as applicable for the German Medieval Studies track, and the Plan B paper must reflect the track.

Scandinavian Studies
Students may choose an track in Scandinavian Studies which will be noted on their transcript.

Five of the six elective courses must be from those specified as applicable for the Scandinavian Studies track, and the Plan B paper must reflect the track.

Spanish & Portuguese
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of Spanish and Portuguese Studies, 214 Folwell Hall, 9 Pleasant Street S.E., Minneapolis, Minnesota, 55455 (612-625-5858; fax: 612-625-3549)
Email: spanportgrad@umn.edu
Website: http://spanport.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 33 to 37
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master's degree in Hispanic and Lusophone Literatures, Cultures, and Linguistics is a free-standing, two-year degree with three formal tracks: Hispanic Literatures and Cultures, Lusophone Literatures and Cultures, and Hispanic Linguistics. The M.A. is designed as a preparatory degree for students planning to obtain a Ph.D. in the field. The M.A. program is built around 11 core classes taught by graduate faculty and designed to give the student a solid intellectual and professional preparation upon which they can build further in a Ph.D. program in the field or in a related career. The M.A. program also features professional training in the field, including a methodology class that focuses on the teaching of foreign languages and cultures. Students are encouraged to pursue deeper knowledge of related fields through courses taken with graduate faculty outside of the department. In addition to the 11 core courses, 2 courses in a field outside of the major program are required.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Prospective students generally have completed an undergraduate degree or substantial coursework in the fields of Hispanic literatures and cultures, Lusophone literatures and cultures, or Hispanic linguistics, although individuals with other backgrounds may be admitted.

Students admitted to the program are required to be fluent in Spanish or Portuguese. The Graduate Studies Committee may require completion of background coursework, without graduate degree credit, for admitted students with insufficient preparation.

Special Application Requirements:
All application materials must be submitted electronically through the ApplyYourself application system by December 15. Applicants are accepted for admission for fall semester only. Please refer to the Application Checklist for important details. The following is required for the application: the Departmental Application; a personal statement; a writing sample representative of the applicant's level of scholarly development; three letters of recommendation; five-minute voice sample; a Curriculum Vitae; GRE or TOEFL (or MELAB or IELTS) test scores; and transcripts. For more information, see the Department of Spanish & Portuguese Studies Applying page:
http://spanport.umn.edu/grad/applying.html

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
Program Requirements

Plan A: Plan A requires 21 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 27 major credits and 6 credits outside the major. The final exam is written and oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading knowledge of a foreign language.

A minimum GPA of 3.50 is required for students to remain in good standing.

For the master's degree, students must have a reading knowledge of a foreign language outside of their principal area of study. Competence in both Spanish and Portuguese satisfies this requirement. Students who wish to continue to the Ph.D. after the M.A. are strongly encouraged to begin their study of Portuguese immediately so as to be prepared for the Ph.D. requirement of two Portuguese courses.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Hispanic Linguistics
This track is centered on the relation between language and its context of use, encompassing social, pragmatic, and discourse factors. It provides students with a strong background in the following areas of Hispanic linguistics: phonetics, phonology, syntax, pragmatics and discourse, historical linguistics, language variation, and second language acquisition.

Hispanic Literature and Cultures
Students receive a solid intellectual and professional preparation in Iberian and Latin American literatures and cultures. Works and intellectual movements are studied in their historical, social, and cultural contexts, combining the approaches of literary and cultural criticism with those of intellectual history, sociology, gender and sexuality studies, among others.

Lusophone Literatures and Cultures
This track prepares students in Portuguese studies, understood as an interdisciplinary critical formation through which the cultures and literatures of Portugal, Brazil, and Lusophone Africa are approached. Students are trained in the main historical periods, cultural movements, and social issues pertaining to the Portuguese-speaking world, both nationally and transnationally, within relevant comparative frameworks.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 75
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Ph.D. program in Hispanic and Lusophone Literatures, Cultures, and Linguistics is a four-year program (post M.A.) that provides students with a focused and rigorous formation in the literatures, languages, and cultures of Spain and Latin America. Ph.D. students choose one of four areas of emphasis: Iberian (peninsular), Latin America, Lusophone Literatures and Cultures, and Hispanic Linguistics. In addition to establishing a specialization in one or more areas of Hispanic studies, the program allows and encourages students to pursue comparative or interdisciplinary work. Students complement their work in the department with coursework in other disciplines such as history; cultural studies and comparative literature; gender, women, and sexuality studies; medieval and early modern studies; and linguistics, among others. In addition to the requirements for the M.A. degree, Ph.D. students must complete additional coursework. For students in the literature and culture tracks, six additional 5xxx and 8xxx courses in related or major fields are required in order to strengthen and further define the student's area of concentration. The final make-up of the program is decided by the student with the consent of his/her academic adviser. Ph.D. students in Hispanic linguistics are required to take three courses outside the department relating to linguistics, and three 5xxx or 8xxx courses in order to strengthen and further define the student's area of concentration. The department's faculty is committed to preparing students and giving them the tools to become scholars and teachers of the highest quality. The department has a strong tradition of fostering socio-historical perspectives on literatures, languages, and cultures. The graduate faculty is committed to comparative and interdisciplinary research and engages a variety of contemporary theoretical approaches, with strengths in postcolonial theory, social justice and human rights, memory studies, critical race theory, diasporic studies, and gender and sexuality studies. Members of the Hispanic linguistics faculty are specialists in the fields of sociolinguistics, second language acquisition, syntax, pragmatics, and phonology. The department offers students in the program faculty mentoring, a seminar, and workshops on professional development, including publishing, teaching, and interviewing. In addition, graduate student workshops in both literatures and cultures and in linguistics foster student-faculty relations and allow graduate students to ready themselves for conference participation. Travel funds are available through the department to allow students to present their papers at conferences in the U.S. or abroad.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must first apply to, or hold, a master of arts degree (or its equivalent) before applying to the Ph.D. program. A graduate GPA of 3.50 is preferred.

Other requirements to be completed before admission:
Prospective students generally have completed an undergraduate degree or substantial coursework in the fields of Hispanic literatures and cultures, Lusophone literatures and cultures, or Hispanic linguistics, although individuals with other backgrounds may be admitted.

The Graduate Studies Committee may require completion of background coursework, without graduate degree credit, for admitted students with insufficient preparation.
**Special Application Requirements:**
Students admitted to the program are required to be fluent in Spanish or Portuguese. The Graduate Studies Committee may require completion of background coursework, without graduate degree credit, for admitted students with insufficient preparation.

All application materials must be submitted electronically through the ApplyYourself application system by December 15. Applicants are accepted for admission for fall semester only. Please refer to the Application Checklist for important details. The following is required for the application: the Departmental Application; a personal statement; a writing sample representative of the applicant's level of scholarly development; three letters of recommendation; a five-minute voice sample; a Curriculum Vitae; GRE or TOEFL test scores; and transcripts. **Plan A:** Plan A requires 15 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** The Plan B project requires students to substitute three expanded seminar papers for the thesis.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading knowledge in one foreign language

A minimum GPA of 3.00 is required for students to remain in good standing.

Students are only admitted to the Ph.D. program. They may complete an M.A. while studying for the Ph.D. The M.A. is offered under Plan A and Plan B.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Areas of concentration in the history minor include Africa; ancient history; East and South Asia; comparative women’s history; medieval, early modern, and modern Europe; the early modern world; Middle East; Latin America; and the United States and its colonial background. Scholarly resources include Center for Austrian Studies, Center for German and European Studies, Center for Medieval Studies, Immigration History Research Center, Minnesota Population Center, Modern Greek Studies, Center for Early Modern History, and Institute for Advanced Study.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The Master’s minor requires a minimum of two related courses in history (at least 6 credits) determined in consultation with the History DGS.

The Doctoral minor requires a minimum of 4 history courses (at least 12 credits) determined in consultation with the History DGS, and HIST 8015.

The Master’s minor in history typically involves a concentration in a single sub-area of history and the completion of a minimum of three graduate courses in history (6-credit minimum). The Doctoral minor in history typically involves four to five history courses (including HIST 8015). For additional information consult with the History graduate program.

Areas of concentration in the history Ph.D. program include Africa; ancient history; East and South Asia; comparative women's history; medieval, early modern, and modern Europe; the early modern world; Middle East; Latin America; and the United States and its colonial background. Scholarly resources include Center for Austrian Studies, Center for German and European Studies, Center for Medieval Studies, Immigration History Research Center, Minnesota Population Center, Modern Greek Studies, Center for Early Modern History, and Institute for Advanced Study.

**Program Delivery**
This program is available:
• via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
About half of incoming students have master's degrees.

**Special Application Requirements:**
The average GPA of incoming students is approximately A-/B+, with more weight placed on history classes, where students are expected to have earned mostly A or A- grades.

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 600

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language.

Key to [test abbreviations](#) (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
Program Requirements
30 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.
This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading proficiency in two non-English languages

A minimum GPA of 3.50 is required for students to remain in good standing.

Ph.D. candidates are required to complete 10 history courses (30 cr); HIST 8015 - Scope and Methods of Historical Studies; 9 additional courses in history, which must include 2 courses in a comparative area; 4 supporting program courses (12 cr); and 24 thesis credits. The language requirement of reading knowledge in 2 foreign languages is required before admission to the preliminary oral examination. Some concentration areas may require additional foreign languages. In some cases, competence in quantitative methods may replace one of the foreign languages.

Courses used to satisfy M.A. requirements can be counted in these totals. After completion of the preliminary oral examinations, the student focuses on writing the Ph.D. thesis. Upon completion of the thesis, a final oral defense is scheduled.

Contact Information:
Institute for Global Studies, 232 Social Sciences Building, 267 19th Avenue South, Minneapolis, MN 55455 (612-626-1879; fax: 612-626-2242)
Email: hrminor@umn.edu
Website: http://www.hrp.cla.umn.edu

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The human rights minor, available to master's, doctoral and law students, provides an interdisciplinary foundation in human rights studies and practical experience in human rights work. To satisfy the core requirements, students must complete two of the three core courses, each of which is 3 credits (LAW 6886 - International Human Rights Law, SOC 8090 Topics in Sociology: Cross-Disciplinary Approaches to Human Rights, and GLOS 5403/LAW 6058: Human Rights Advocacy), and one 200-hour internship (no coursework associated with the internship). Masters students must complete one additional elective course (3 cr), while doctoral and law students select at least two additional electives (totaling 6 cr) outside their major field from a designated course list. Other courses may be taken with the approval of the program director. Qualifying courses taken prior to approval of the minor will be applied retroactively.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Admission to the minor is limited to enrolled graduate or professional students with a minimum GPA of 3.0. Doctoral students must declare their minor before taking their preliminary oral examination.

Other requirements to be completed before admission:
Students should submit a letter of application describing their background and motivation for applying to the minor program to the director of graduate studies. The director may request further information.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A master's minor in human rights requires 9 credits: two core courses, at least one elective course taken from a designated course list, and one six-week internship approved by the program director.

A law/doctoral minor requires 12 credits: two core courses, at least two elective courses, and one six-week internship approved by the program director.

Contact Information:
Department of French and Italian, 260 Folwell Hall, 9 Pleasant Street S.E., Minneapolis, MN 55455 (612-624-4308; fax: 612-624-6021)
Website: http://frit.umn.edu/grad/italianminor.php

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

A minor in Italian studies is available for Graduate School students enrolled in master's and doctoral programs in such relevant fields as art history, architecture, French, comparative literature, history, English, and music. The graduate minor in Italian studies is under the general direction of the graduate faculty in Italian studies, all of whom hold membership in other fields of study within the University of Minnesota Graduate School. The minor program is shaped to suit the particular research needs and interests of the student. Courses are selected in consultation with the director of graduate studies from a list of existing 4xxx and 5xxx courses, as well as appropriate 8xxx courses. Students may also elect to do a directed readings course with faculty affiliated with Italian studies to satisfy minor program requirements.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Other requirements to be completed before admission:
Admission to the Italian studies graduate minor is contingent on enrollment in good standing in a relevant master's or doctoral degree granting program within the Graduate School. Interested students should consult with the director of graduate studies.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

M.A. students must complete at least 6 graduate credits in approved courses or directed readings. Ph.D. students must complete at least 12 graduate credits in approved courses or directed readings. One of these may be a 4xxx course with the approval of the director of graduate studies; one may be a directed readings course. Coursework from the major field may not be applied to satisfy minor field requirements.

Certification of proficiency in Italian language is required. Proficiency can be demonstrated in one of the following ways: by successfully completing an undergraduate literature/culture course in Italian, by having an undergraduate major or minor in Italian, or through a translation examination devised, administered, and assessed by the director of graduate studies. The proficiency requirement will be monitored by the director of graduate studies.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 32 to 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Linguistics is the scientific study of human language. Investigation in phonology, syntax, and semantics/pragmatics seeks to determine general principles governing the structure and use of human language and the parameters that determine degree and manner of variation across languages. These core areas constitute the foundation for other subfields of linguistics, including psycholinguistics, sociolinguistics, historical linguistics, computational linguistics, and neurolinguistics.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
There are no specific prerequisites for admission. Students admitted normally have a broad undergraduate background that includes some linguistics courses.

Special Application Requirements:
Applicants must submit the following application materials by December 15 of the preceding academic year:

(i) University of Minnesota Application form;
(ii) a statement of purpose;
(iii) a writing sample;
(iv) three letters of recommendation;
(v) a supplementary questionnaire;
(vi) transcripts from each college or university attended;
(vii) GRE scores;
(viii) English Language Proficiency Scores (TOEFL, MELAB or IELTS) are required of international applicants.

Entry is for fall semester but may be permitted in other semesters in exceptional cases.

International applicants must submit score(s) from one of the following tests:
• TOEFL
• IELTS
• MELAB

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

**Plan A:** Plan A requires 20 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 26 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** The Plan B project is an original paper usually a revision of a course project.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Plan A: Plan A requires 20 major credits, 10 MA thesis credits and 6 credits outside the major. The total number of credits is 36. An Oral Final Exam and an MA thesis are also required. Students have to demonstrate competence (the equivalent of two or more years of study) in one language other than their native language. The major courses include five courses covering core areas of language structure (phonology, syntax, semantics) and one course in field methods.

Plan B: Plan B requires 26 major credits, 6 credits outside the major. The total number of credits is 32. An Oral Final Exam and a Plan B paper are also required. Students have to demonstrate competence (the equivalent of two or more years of study) in one language other than their native language. The major courses include five courses covering core areas of language structure (phonology, syntax, semantics); one course in field methods; one research paper course; and one elective.

Use of 4xxx courses toward program requirements is permitted under certain conditions with the approval of the Director of Graduate Studies.

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
19 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Knowledge of two languages not native to student.

A minimum GPA of 3.00 is required for students to remain in good standing.

The Ph.D program requires 19 major credits, 24 thesis credits, and 12 credits outside the major. The total number of credits is 55. All Ph.D. students are expected to have completed M.A. course requirements (23 credits or less, depending on prior coursework in linguistics). The Ph.D major courses include advanced level courses covering core areas of language structure (phonology, syntax) (6 credits), a second semester course in field methods (4 credits), three 8xxx level Topics or Seminar courses (9 credits). Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Upon completion of required coursework, students must pass a preliminary written exam. To pass the preliminary written exam, a student must complete (i) a paper judged to be of near publishable quality by the student's committee in the student's primary area of specialization; (ii) a paper judged to be of near publishable quality by the student's committee in the student's chosen secondary area of specialization.

Students are required to pass the preliminary oral exam. The preliminary oral exam is a presentation and defense of a research-paper-length dissertation prospectus, which introduces and motivates the student's dissertation topic and provides a detailed plan for completion of the dissertation.

Students are required to complete a dissertation and pass the Final Oral Exam, which is a defense of the completed dissertation.

Language Requirement: Students must demonstrate competence (the equivalent of two or more years of study) in two languages.

Website: http://www.writing.umn.edu/lrs/index.htm

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The goal of the Literacy and Rhetorical Studies (LRS) Minor is to encourage students to contribute to interdisciplinary activity and to create a forum for them and several dozen faculty members at the University whose research and teaching emphasize various facets of writing and communication. By crafting an individualized program of study with the LRS Director of Graduate Studies, including theory, pedagogy, and research, often in a historical context, students can complement their disciplinary degree, and thereby open up new perspectives for their scholarship and teaching.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
For specific information about applying for the LRS minor, see: http://writing.umn.edu/lrs/admission.html

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The Master's and Doctoral minor requirements are listed under each individual sub-plan.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Master's
A Master's minor requires three graduate courses or seminars (9 credits minimum), one from each of the following categories: 1) literacy theory or practice, including pedagogy; 2) research methods and practices in one of the areas of the minor; and 3) a historical topic (e.g., history of the book), of rhetoric or of literacy. Students must also write a substantial paper that emerges from one of the three courses. In order to make the minor interdisciplinary, no more than one of the three courses at the Master's level may be from the student's home department.

Doctoral
A doctoral minor requires four graduate courses or seminars (12 credits minimum). Three courses must be in each of the categories enumerated above. The fourth course must be a capstone writing seminar specifically offered for the minor or a seminar that involves a substantial term paper or a completed dissertation chapter on a topic related to the minor. In order to make the minor interdisciplinary, no more than two of the four courses at the doctoral level may be from the student's home department. To complete the doctoral minor, students submit a capstone writing project emerging from their studies in literacy and/or rhetoric, such as a seminar paper or a completed dissertation chapter.

Mass Communication M.A.
School of Journalism & Mass Communication
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of School of Journalism and Mass Communication, 111 Murphy Hall, 206 Church Street S.E., Minneapolis, MN  55455  
(612-625-9824; fax: 612-625-9525)  
Email: sjmcgrad@umn.edu  
Website: http://sjmc.umn.edu/grad

- Program Type: Master's  
- Requirements for this program are current for Fall 2014  
- Length of program in credits: 35  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Master's degree in mass communication emphasizes the theoretical study of mass communication and analysis of media systems and effects. The degree is intended for those who wish to pursue Ph.D. degrees or teaching and research careers, as well as those who seek communication-related positions. The general Master's program is not designed to provide professional skills training in journalism. Individuals with a bachelor's degree in journalism and mass communication or with strong social science or liberal arts backgrounds in areas such as political science, psychology, sociology, history, and English are encouraged to apply. Individuals with extensive professional experience in mass communication are also welcome. The program is suffused with the study of new communication technologies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Students whose native language is not English are required to submit scores from the TOEFL or IELTS (academic). In addition, such students seeking teaching assistantships are required to pass the SPEAK test of spoken-English proficiency prior to appointment. Admission is considered for fall semester only; the application deadline is December 15.

The mass communication M.A. and Ph.D. programs offer a joint degree with the Law School. Applicants to either joint degree--either the M.A./J.D. or the Ph.D./J.D.--are reviewed separately by the Law School and the mass communication programs for admission, but are asked to identify themselves as seeking the joint degree option in their statement of intent for the mass communication application. For more information, contact sjmcgrad@umn.edu.

Special Application Requirements:
Applicants must submit a department application; a clearly written statement of career interests, goals, and objectives; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of transcripts; academic work samples in English; a resume or curriculum vita; and scores from the General Test of the GRE.

Applicants must submit their test score(s) from the following:
- GRE  
  - General Test - Verbal Reasoning: 158  
  - General Test - Analytical Writing: 4.5

International applicants must submit score(s) from one of the following tests:
- TOEFL  
  - Internet Based - Total Score: 94  
  - Internet Based - Listening Score: 22  
  - Internet Based - Writing Score: 24
- Internet Based - Reading Score: 22
- Internet Based - Speaking Score: 26
- Paper Based - Total Score: 550

• IELTS
  - Total Score: 7
  - Listening Score: 7
  - Reading Score: 7
  - Writing Score: 7
  - Speaking Score: 7

• MELAB
  - Final score: 83

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 19 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semester must be completed before filing a Degree Program Form.

A minimum of 25 course credits and 10 thesis credits are required. Coursework must include 13 credits in required core courses and 12 other credits (6 credits in other journalism and mass communication seminars or courses, and 6 credits in other departments). All coursework must be taken A-F.

Joint- or Dual-degree Coursework: M.A. in Mass Communication and J.D. in Law (dual degree). Student may take a total of 12 credits in common among the academic programs.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 70
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The Ph.D. offers training for academic careers primarily in communication instruction, research, or policy. Areas of specialization include media processes, influences, and effects (including health communication, advertising, and political communication); media law, ethics, history; and media management. The program is suffused with the study of new communication technologies.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

Other requirements to be completed before admission:
Students whose native language is not English are required to submit scores from the TOEFL or IELTS (academic). In addition, such students seeking teaching assistantships are required to pass the SPEAK test of spoken-English proficiency prior to appointment. Admission is considered for fall semester only; the application deadline is December 15.

The mass communication M.A. and Ph.D. programs offer a joint degree with the Law School. Applicants to either joint degree--either the M.A./J.D. or the Ph.D./J.D.--are reviewed separately by the Law School and the mass communication programs for admission, but are asked to identify themselves as seeking the joint degree option in their statement of intent for the mass communication application. For more information, contact sjmcgrad@umn.edu.

**Special Application Requirements:**

Applicants must submit a department application; a clearly written statement of career interests, goals, and objectives; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of transcripts; academic work samples in English; a resume or curriculum vita; and scores from the General Test of the GRE.

Applicants must submit their test score(s) from the following:
- **GRE**
  - General Test - Verbal Reasoning: 158
  - General Test - Quantitative Reasoning: 158
  - General Test - Analytical Writing: 4.5

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 94
  - Internet Based - Listening Score: 22
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 22
  - Internet Based - Speaking Score: 26
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 7
  - Listening Score: 7
  - Reading Score: 7
  - Writing Score: 7
  - Speaking Score: 7

• MELAB
  - Final score: 83

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
34 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

A minimum of 46 course credits and 24 thesis credits are required. Coursework must include 16 credits in required core courses, and at least 30 other graduate credits. Of these credits, at least 18 credits must come from SJMC courses and at least 12 credits from outside the SJMC. All courses included on the Ph.D. Degree Program Form must be graduate level (5xxx or 8xxx, or 4xxx with the approval of both adviser and director of graduate studies) and taken A-F.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The medieval studies minor is available to master's and doctoral students. The Center for Medieval Studies (CMS) encourages collegial interaction and scholarly collaboration among faculty and students in all areas of medieval studies. CMS seeks to provide an opportunity for scholars of all disciplines and at all levels to focus intensively on historical, literary, anthropological, social, economic, religious, artistic, cultural, and methodological inquiries into the medieval period, which may fall within the chronology of roughly 300 to 1,500 A.D. The program emphasizes an interdisciplinary and cross-cultural approach to medieval culture including the study of medieval texts in original languages. Departments associated with the minor include: history; art history; theatre arts; music; English; French and Italian; German, Scandinavian, and Dutch; Spanish and Portuguese studies; Classical and Near Eastern studies; Asian languages and literatures; and others.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The master's minor requires 6 graduate credits: two courses in medieval studies outside the student's major department, including a course which demonstrates command of Latin texts, normally LATN 51xx or higher or other Latin course by permission of the DGS, and one additional course in MEST or on a medieval topic.

The doctoral minor requires 12 graduate credits: four courses in medieval studies outside the student's major department, including a course which demonstrates command of Latin texts, normally LATN 51xx or higher or other Latin course by permission of the DGS; a second Latin course 51xx or above, or a course 5xxx or above in Arabic, Greek, Hebrew, classical Chinese, or a medieval vernacular; and two additional courses in MEST or on medieval topics.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The moving image increasingly permeates the fabric of contemporary culture and society. From cinema theaters and home televisions to installation art, portable electronic devices, medical technologies, and science laboratories, and in public spaces from airport terminals to building façades, the moving image is nearly ubiquitous.

The graduate minor in moving image studies trains students from a variety of disciplinary fields in the critical analysis of the moving image in its disparate yet interrelated forms. Drawing from the faculty’s extensive research interests and expertise, the curriculum brings together discourses ranging from film theory to media studies, from the philosophy of the image to the history of technology, and beyond.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Admission to the minor is by request, with the approval of the student’s adviser and the DGS of the minor.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The Ph.D. minor (minimum 15 credits) requires three core courses (9 credits): MIMS 8001 - Theories of the Moving Image (3 credits), MIMS 8003 - Historiography of the Moving Image (3 credits), and MIMS/SCMC 5002 - Advanced Film Analysis (3 credits). The Ph.D. minor also requires two electives (minimum 6 credits): one 8xxx Topics Course (3 credits) chosen from a list of courses offered in a given year by film/media faculty in various departments and one additional 5xxx or 8xxx course (3 credits) chosen from a list of courses offered in a given year by film/media faculty in various departments, including, as a recommended option, a production-based course.

The master’s minor (minimum 9 credits) requires three core courses (9 credits): MIMS 8001 - Theories of the Moving Image (3 credits), MIMS 8003 - Historiography of the Moving Image (3 credits), and MIMS/SCMC 5002 - Advanced Film Analysis (3 credits).

Students are advised to check the program website indicated above for updated information.

• Program Type: Doctorate
• Requirements for this program are current for Fall 2014
• Length of program in credits: 85 to 90
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Musical Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Music offers the degrees of master of arts (M.A.), master of music (M.M.), doctor of musical arts (D.M.A.), and doctor of philosophy (Ph.D.). Specific degree plans and emphases are listed in each degree’s program requirements.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants interested in doctoral level study must hold a master’s degree in an appropriate field of study.

Other requirements to be completed before admission:
Applicants must hold a bachelor’s degree or its equivalent with a major emphasis in one of the following areas of music: musicology/ethnomusicology, theory and/or composition, performance, or music education/therapy.

The performance degree (D.M.A.) requires an audition for admission.

The conducting degree (D.M.A.) requires a preliminary DVD, an audition, and interview for admission.

Special Application Requirements:
For some areas of performance, a preliminary DVD may be required prior to scheduling an audition.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 21
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

- Program Type: Master's  
- Requirements for this program are current for Fall 2014  
- Length of program in credits: 30 to 35  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The School of Music offers the degrees of master of arts (M.A.) with an emphasis in Composition, Music Therapy, Musicology (Ethnomusicology), and Theory.

**Program Delivery**

This program is available:  
* via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

Other requirements to be completed before admission:

Applicants must hold a bachelor's degree or its equivalent with a major emphasis in one of the following areas of music: musicology/ethnomusicology, theory and/or composition, performance, or music therapy.

**Special Application Requirements:**

The M.A.'s theory emphasis requires submission of original papers (one tonal and one post-tonal analysis) for admission.  
The composition emphasis requires submissions of original scores and recordings (2-4 scores of varying genres) for admission.  
The musicology/ethnomusicology emphasis requires the submission of original papers for admission.  
The music therapy emphasis requires documentation of at least 3,500 hours of clinical experience. An interview is also required.

International applicants must submit score(s) from one of the following tests:

- **TOEFL**  
  - Internet Based - Total Score: 79  
  - Internet Based - Writing Score: 21  
  - Internet Based - Reading Score: 19  
  - Paper Based - Total Score: 550

- **IELTS**  
  - Total Score: 6.5

- **MELAB**  
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 19 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 24 major credits and 6 credits outside the major. The final exam is written and oral.
This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Varies according to field.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Language requirements: A reading knowledge of French, German, or Italian is required for all M.A. degree emphases except therapy. For the emphasis in composition, reading knowledge of a foreign language or, with approval, an equivalent research tool.

The master of arts in music offers emphases in musicology/ethnomusicology (Plan A and Plan B), theory (Plan B only), composition (Plan B only).

The M.A. in music with emphasis in musicology/ethnomusicology requires 35 credits (25 course credits and 10 thesis credits) for Plan A and 31 course credits for Plan B; the emphasis in composition (Plan B only) requires 35 course credits, and the emphasis in music theory (Plan B only) requires 30 course credits. The credit totals for these emphases include 6 credits required for courses outside the major field. Final Exams: For the emphasis in musicology/ethnomusicology, the final exams are written and oral. For the emphases in theory and composition, the final exams are oral.

**Program Sub-plans**

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

**Music Education**

This sub-plan is limited to students completing the program under Plan B.

The Music Education sub-plan is no longer accepting applications. Please refer to the School of Music's website at http://www.music.umn.edu for other options.

Program Requirements

Plan C: Plan C requires 30 major credits and up to null credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The master of music degree offers emphases in piano, organ, voice, violin, viola, cello, double bass, violin performance and Suzuki pedagogy, flute, oboe, clarinet, saxophone, bassoon, French horn, trumpet, trombone, euphonium, tuba, percussion, harp, guitar, collaborative piano/coaching, orchestral conducting, wind ensemble/band conducting, and choral conducting.

The M.M. requires credit distribution among the following for each emphasis: applied music, study directly related to the emphasis (literature, pedagogy, performance practice, conducting, secondary instrument, chamber music, etc.), ensemble, and musicology/ethnomusicology and theory/composition. One recital is required for all emphases except collaborative piano/coaching, which requires two.

The minimum credit requirement for each emphasis is as follows: 30 credits are required for piano, instrumental performance, guitar, piano pedagogy, orchestral conducting, wind ensemble/band conducting, and choral conducting; 33 credits for organ and voice; 37 credits for violin performance and Suzuki pedagogy; 39 credits for collaborative piano/coaching.

The M.M. in both Research requires 33 credits and the M.M. in Pedagogy requires 30 credits.

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2014
• Length of program in credits (Masters): 12
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The music minor is open to non-music major graduate students.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Applicants must be actively pursuing a graduate degree in a non-music field at the University of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The minor in music studies for students in the Graduate School will consist of 12 credits as follows: four, three-credit-minimum courses in musicology/ethnomusicology or theory at the 8000-level, with the possible substitution of one or more of these courses at the 5000-level only with the approval of the student’s advisor and the Director of Graduate Studies in the School of Music. In the case of 5000-level substitutions, we strongly encourage the professor(s) of the course(s) in question, the graduate student, the graduate student’s advisor, and the School of Music DGS to communicate in advance of course registration, so as to ensure that the course will in fact count towards the minor.

Graduate students seeking to enroll in a 5000- or 8000-level School of Music course requiring prior coursework or its equivalent in background knowledge will need to have completed all course prerequisites or secured instructor approval in order to register for that course.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 87 to 92
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Music offers the degrees of master of arts (M.A.), master of music (M.M.), doctor of musical arts (D.M.A.), and doctor of philosophy (Ph.D.). Specific degree plans and emphases are listed in each degree’s program requirements.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants interested in doctoral level study must hold a master's degree in an appropriate field of study. For the Ph.D. in music education/therapy, applicants must also have documentation of at least 3 years of teaching experience or at least 3,500 hours of clinical experience.

Special Application Requirements:
The theory Ph.D. requires original papers (one tonal and one post-tonal analysis) for admission.
The composition Ph.D. requires original scores and recordings (2-4 scores of varying genre) for admission.
The musicology/ethnomusicology Ph.D. requires original papers for admission.
The music education/music therapy Ph.D. requires original papers (e.g. research or professional papers) and documentation of at least 3 years of teaching experience or at least 3,500 hours of clinical experience. An interview is also required.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
51 to 56 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: Varies according to field.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The language requirement for musicology and ethnomusicology includes two languages chosen from French, German, and Italian. Substitution may be made when a different language is needed for the thesis.

For composition, the language requirement includes reading knowledge of two foreign languages; with approval, an equivalent research tool may be substituted for a foreign language.

For theory, the language requirement includes German and either French or Italian. Substitution may be made when a different language is needed for the thesis; with approval, the second language may also be replaced by a collateral field of knowledge or a special research technique.

There is no language requirement for the education/therapy degree.

- Program Type: Master's  
- Requirements for this program are current for Fall 2014  
- Length of program in credits: 30  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students are primarily admitted to the Ph.D. program, while admission to the M.A. is intended for those with professional goals in other fields, and is limited (0-2 candidates per year).

Philosophy is noteworthy for its emphasis on the individual student’s research interests. With the help of an adviser, students design their own program of study, which consists of the philosophy major and either a supporting program or a minor. The minor or supporting program, drawn at least in part from a department or departments other than philosophy, complements the student’s research focus. Students gain a broad base of knowledge through required coursework. Terminal M.A. students are required to take two history courses; one in ancient philosophy and one in modern.

**Program Delivery**  
This program is available:  
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**  
Other requirements to be completed before admission:  
Recognizing that evidence of ability to pursue graduate study in philosophy is diverse, the department does not specify prerequisites for admission. Normally, those admitted have a broad undergraduate background that includes some courses in philosophy.

**Special Application Requirements:**  
Students must apply to both the University and the Department of Philosophy. The department application for admission and aid is available from the Admissions and Aid Committee at the address listed above, or may be downloaded from the philosophy website at [www.philosophy.umn.edu](http://www.philosophy.umn.edu). All application materials may be uploaded to Apply Yourself. Department materials required include a completed application form, personal statement, transcripts, scores from the GRE General Test, three letters of recommendation, and a writing sample. Students interested in DOVE or MacArthur Fellowships should include a statement expressing their interest. Students interested in the MacArthur Fellowship should also contact the MacArthur Program, through the Interdisciplinary Center for the Study of Global Change. Applications, together with all supporting materials, must be received by December 31. The philosophy department reviews applications once a year, and admits students for entry in the fall semester only.

Applicants must submit their test score(s) from the following:  
- GRE

International applicants must submit score(s) from one of the following tests:  
- TOEFL  
  - Internet Based - Total Score: 79  
  - Internet Based - Writing Score: 21  
  - Internet Based - Reading Score: 19  
  - Paper Based - Total Score: 550  
- IELTS

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The project is three Plan B papers. For details see Philosophy Department Degree Program: M.A., available as a PDF on the philosophy website at www.philosophy.umn.edu.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Use of 4xxx courses requires program approval.

Department of Philosophy, 271 19th Avenue South, 831 Heller Hall, Minneapolis, MN 55455-0310 (612-625-6563; fax: 612-626-8380)
Email: umphil@umn.edu
Website: http://www.philosophy.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

A master's minor requires 6 course credits in philosophy approved by the Director of Graduate Studies in Philosophy. Programs are tailored to meet the interests and needs of the student. A doctoral minor requires 12 course credits in philosophy approved by the Director of Graduate Studies in Philosophy. Programs are tailored to meet the interests and needs of the student.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Students majoring in other fields who wish to pursue a Master's or Doctoral minor in philosophy should contact the Director of Graduate Studies to set up an appointment to discuss their goals and objectives.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A master's minor requires 6 course credits in philosophy approved by the Director of Graduate Studies in Philosophy. Programs are tailored to meet the interests and needs of the student. A doctoral minor requires 12 course credits in philosophy approved by the Director of Graduate Studies in Philosophy. Programs are tailored to meet the interests and needs of the student. For graduate-level credit, use of 4xxx courses requires program approval.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 62 to 68
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Philosophy offers both Ph.D. and M.A. degrees. Students are primarily admitted to the Ph.D. program, while admission to the M.A. is intended for those with professional goals in other fields and disciplines. The stand-alone M.A. program is not considered a laddering program into the Ph.D. program at the University of Minnesota or any other institution. Students admitted to the Ph.D. program usually choose to complete an M.A. Plan B en route to the Ph.D. unless they already hold a master's degree in philosophy from another institution.

Philosophy is noteworthy for its emphasis on the individual student's research interests. With the help of an adviser, students design their own program of study, which consists of the philosophy major and either a supporting program or a minor. The minor or supporting program, drawn at least in part from a department or departments other than philosophy, complements the student's research focus. Students gain a broad base of knowledge through required coursework. Ph.D. students take courses in four main areas: history of philosophy, logic, ELMS (epistemology, philosophy of language, metaphysics, philosophy of science), and value theory. These areas provide a firm foundation for research and teaching beyond the Ph.D. program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Recognizing that evidence of ability to pursue graduate study in philosophy is diverse, the department does not specify prerequisites for admission. Normally, those admitted have a broad undergraduate background that includes some courses in philosophy.

Special Application Requirements:
Students must apply to both the University and the Department of Philosophy. The department application for admissions and aid is available from the Admissions and Aid Committee at the address listed above or may be downloaded from the philosophy website at www.philosophy.umn.edu. All application materials may be uploaded to Apply Yourself. Department materials required include a completed application form, personal statement, transcripts, scores from the GRE general test, three academic letters of recommendation, and a philosophical writing sample that does not exceed 25 pages. Students interested in DOVE or MacArthur Fellowships should include a statement expressing their interest. Students interested in the MacArthur Fellowship should also contact the MacArthur Program, through the Interdisciplinary Center for the Study of Global Change. Applications, together with all supporting materials, must be received by December 31 for full consideration. The philosophy department reviews applications once a year, and only admits students for fall semester.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  • IELTS
    - Total Score: 6.5
  • MELAB

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**
26 to 28 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

Successful second-year department review includes completion of coursework with specified requirements which constitutes passing the preliminary written examination. Successful third-year department review includes passing a three-paper examination, Stage 1 and Stage 2 review constitutes passing the preliminary oral examination. Students then write and defend a dissertation proposal and later defend a dissertation at the final oral examination. For details see the Philosophy Department Degree Program Policy, which is available as a PDF on the philosophy website: www.philosophy.umn.edu. Use of 4xxx courses toward program requirements requires program permission.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Doctorate): 22
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: This minor is available to doctoral students only.

Political psychology is a rapidly advancing field of scientific inquiry concerned with psychological aspects of political behavior. It encompasses a variety of interdisciplinary research perspectives, drawing on the theories and methods of core disciplines such as psychology, political science, law, and sociology, as well as interdisciplinary fields such as mass communication and decision sciences. The minor's structured curriculum provides a foundation in basic areas of political psychology: social attitudes and cognition, judgment and decision making, group relations, personality and leadership, mass communication, public opinion, mass political behavior, and political socialization. In addition to providing a background in political psychology, the program trains students in the theory and methods useful to this field, such as content analysis, survey analysis, and experimental design. The faculty is drawn from across the University.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Applicants to the minor must be enrolled in a University doctoral program and be in good academic standing. Admission is limited only by permission of the director of graduate studies (DGS) in political psychology. To receive a minor in political psychology, a student must satisfy the following five requirements:

1) Enrollment in and completion of a minimum of two semesters of the political psychology proseminar (POL 8307/8308 or PSY 8211/8212). Students are encouraged to participate in the seminar beyond this requirement.
2) Completion of the Political Science Department's graduate class on Political Psychology (POL 8311).
3) Completion of the Psychology Department's graduate class on Social Cognition (PSY 8201).
4) Completion of two or more methodology courses. Examples include EPSY 5621, 5262; POL 8106, 8123; PSY 8814, 8815; STAT 5021, 5302. Courses from political science or other departments may be acceptable; students should consult with the DGS prior to enrolling in a course to confirm it satisfied this requirement. (Note that it is acceptable to use these courses to fulfill other requirements in one's degree program, if allowed by the student's department.)
5) Completion of two or more elective courses (equal to 6 credits) in a department other than one's own. The classes may be from the same department (e.g. two electives from the mass communication department for a psychology student).

Course Group 0
Contact the DGS for a list of previously approved elective courses.
** Students with sufficient background and previous courses experience equivalent to one or more courses within the curriculum may apply for a waiver of the appropriate requirements and replace waived courses with additional electives to meet the 6-credit minimum.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The political science program only admits students into the Ph.D. program. However, students admitted to the Ph.D. program may earn a master's degree (Plan B) while pursuing their doctorate.

The political science curriculum is divided into five subfields: formal models and methodology, political theory, American politics, international relations, and comparative politics.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 28 major credits and 6 credits outside the major. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The M.A. degree, Plan B (without thesis), requires 34 credits, distributed between major courses and minor or related field courses; three research papers, usually written in connection with coursework, are also required.

- Requirements for this program are current for Fall 2014
- Length of program in credits: 66
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The political science curriculum is divided into five subfields: formal models and methodology, political theory, American politics, international relations, and comparative politics.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

**Special Application Requirements:**
All students are admitted directly into the Ph.D. program. To apply, submit the following through the University's online application (Apply Yourself): The following should be sent directly to the department: unofficial transcripts; applicant statement department application form; GRE scores; a complete set of transcripts in addition to that required by the University; a brief statement expressing the applicant's indicating purpose and goals in pursuing graduate work and outlining research interests; GRE scores; TOEFL or IELTS scores for international students; three letters of recommendation from professors who know the applicant's academic work, particularly in political science; department form; writing sample(s) of the applicant's written work (preferably papers written for political science courses preferred); and a curriculum vitae. If you believe you qualify for the DOVE (Diversity of Views and Experiences) Fellowship or one of the ICGC (Interdisciplinary Center for Global Change) Fellowships and would like to be considered for nomination, submit a statement explaining your candidacy. Send photocopies of written work; the department cannot guarantee that materials will be returned. Graduate study in the Ph.D. program begins in fall semester; the application deadline is December 15.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**
30 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Varies. See research methodologies requirement

A minimum GPA of 3.00 is required for students to remain in good standing.
Research methodology requirement - Students must demonstrate one of the following: a) high proficiency in one foreign language; b) high proficiency in research methodology; c) low proficiency in two foreign languages; d) low proficiency in one foreign language and low proficiency in research methodology.

Email: popstudies@pop.umn.edu
Website: http://www.pop.umn.edu/training/population-minor

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Population studies is a multidisciplinary research area at the intersection of the mathematical sciences, the health and social sciences, and public policy. The curriculum provides solid grounding in the theories and methods of demography, with additional specialized training across five interdisciplinary subject areas: historical demography, population geography, economic demography, public health demography, and family and life course demography.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**
Use of 4xxx courses towards program requirements is not permitted.

The minor in population studies is available to master's and doctoral students. Both a master's and doctoral minor require the core course, PA 5301 - Population Methods and Issues for the United States and Third World or SOC 5090 - World Population Issues. In addition to the core course, master's students take at least three credits and doctoral students take at least 9 credits from the list of approved courses at www.pop.umn.edu/training/population-minor/curriculum. All courses should be from the same subject area and may not be in the student's major field. A total of 6 credits at the master's level and 12 credits at the doctoral level is required for the minor. Students must register for all courses A-F; courses taken on a pass/fail basis may not count toward the minor (with the exception of PUBH 5628, which is currently offered only S-N).

• Program Type: Master’s
• Requirements for this program are current for Fall 2014
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are admitted only for the Ph.D. degree.

Doctoral program specialties are offered in biological psychopathology; clinical science and psychopathology research; cognitive and brain sciences; counseling psychology; industrial/organizational psychology; personality, individual differences, and behavior genetics; quantitative/psychometric methods; school psychology; and social psychology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: Plan B requires one to three review papers in lieu of a thesis, and a minimum of 30 course credits, of which 14 credits must be in psychology and 6 credits in one or more related fields.

This program may be completed with a minor.
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

If the student and adviser elect to satisfy the requirements for the master's degree, each student's program is planned in consultation with an adviser. Plan A requires a minimum of 14 credits in psychology and 6 credits in a minor/related field, a minimum of 10 thesis credits, and a research thesis. Plan B requires one to three review papers in lieu of a thesis, and a minimum of 30 course credits, of which 14 credits must be in psychology and 6 credits in one or more related fields. For Plan A, the final exam is oral.

**Program Sub-plans**

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 60 to 72
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students are admitted only for the Ph.D. degree. Doctoral program specialties are offered in biological psychopathology; clinical science and psychopathology research; cognitive and brain sciences; counseling psychology; industrial/organizational psychology; personality, individual differences, and behavior genetics; quantitative/psychometric methods; school psychology; and social psychology.

Accreditation
This program is accredited by Committee on Accreditation of the Amer. Psychological Assoc (for Clinical & Counseling specialities)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Although there are no specific minimums for GPA and GRE scores, previous admissions statistics are available from the psychology website at psych.umn.edu.

Other requirements to be completed before admission:
Recommended academic preparation includes a minimum of 12 credits (three to four courses) of psychology coursework beyond introductory psychology, including one course in statistics or psychological measurement. Applicants to the clinical science program must have completed a course in abnormal psychology. An undergraduate major in psychology is desirable, but not required.

Special Application Requirements:
Applications are accepted for fall admission only; the deadline is December 1. A department application; a statement of career interests, goals, and objectives; three letters of recommendation from persons familiar with the applicant's scholarship and research potential; and scores from the GRE General Test are required. The GRE Subject Test in psychology is not required, but highly recommended. Applicants whose native language is not English must submit the results of the TOEFL iBT. Applications are submitted electronically through the ApplyYourself application system. For more information about the application procedures, see the psychology website at psych.umn.edu.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Internet Based - Speaking Score: 23
- IELTS
  - Total Score: 6.5
- MELAB
  - Speaking test score: 8
The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 to 36 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

Students must satisfy the general area distribution requirement using selected courses in four areas outside their specialization. There are no other general departmental course requirements. Each student's program is individually planned in consultation with an adviser to meet both the individual's goals and the specialty requirements. The specializations in clinical psychology and counseling psychology include specific requirements for applied coursework and practicum and internship experience. Each specialization also requires completion of a series of Ph.D. seminars covering scholarship and research skills. Students also complete a minimum of 12 credits in a minor or supporting program. Students are admitted into one specialty area when they apply. Please go to the Psychology website at www.psych.umn.edu to learn more about our specialty areas. Applicants are allowed to apply to only one specialty area.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Public Art Minor

Art

College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Public Art Program, Weisman Art Museum, University of Minnesota, 333 East River Road, Minneapolis, MN 55455 (612-625-9686; fax: 612-625-9630)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Public Art minor is inactive at this time. The graduate minor in public art (PArt) is an interdisciplinary program designed to expose students to the history of public art, contemporary issues, and current practices. The minor provides students the opportunity to work with instructors and other students with backgrounds in studio arts, design, architecture, landscape architecture, urban design, and public policy to learn collaborative methods essential to public art making and public art administration. Specifically, the minor provides students with a theoretical basis to both understand and produce public art projects. The minor includes a set of core courses in public art history, current issues and criticisms, and public engagement.

Program Delivery

This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

Other requirements to be completed before admission:
This graduate minor is available to master's and doctoral students. Preference will be given to students with backgrounds in art, architecture, landscape architecture, urban design, and public policy. The PArt Admissions Committee screens applications and determines admission. Admission is limited to 25 students annually.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Use of 4xxx courses towards program requirements is not permitted.

Master's and doctoral students take Issues and Ideas in Contemporary Public Art and History of Public Art as well as a practicum in Public Engagement. Doctoral students must also complete an internship.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.A. in rhetoric and scientific and technical communication prepares students to address complex issues in language, science, and technology. This program prepares students for doctoral-level research through courses and seminars in research methods, rhetoric, writing studies, pedagogy, and technical communication, technology and culture. Those are complemented with other courses so that you develop expertise in a specialty area as well as a related field of courses outside the department. In addition, you will write a research paper on a limited topic and present it at an oral examination.

Required courses include classical and modern rhetoric, research methods, and courses in writing studies and pedagogy, technical communication, and technology and culture. Students take at least 6 credits outside the department as a masters minor or supporting field. They also write a plan "B" paper in the context of a Directed Research course.

All M.A. applicants must meet the admission requirements of the University. M.A. applicants should have a strong interest in language and rhetorical theory or communication theory. A background in a science, Internet studies, environmental studies, or pedagogy and technology is helpful.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Undergraduate degree in a related discipline.

Special Application Requirements:
Scores from the General Test of the GRE that are less than five years old are required of students with baccalaureate degrees from U.S. institutions. International students are encouraged to take the General Test of the GRE. Nonnative speakers of English are required to take an appropriate test with satisfactory scores. All applicants must submit three letters of recommendation, two writing samples, and a professional objective statement. All M.A. and Ph.D. applicants begin in the fall semester and should apply by the January 1 application deadline.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Graduate minor in Rhetoric and Scientific and Technical Communication

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Students must be admitted into a master's or doctoral program at the University of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

For master's degree students, the minor requires 6 credits in 5xxx and 8xxx WRIT courses. The minor for Ph.D. students requires 12 credits of 5xxx and 8xxx WRIT courses with one course being in rhetorical theory and criticism. Students may choose the remaining courses from any of writing studies graduate courses.

• Program Type: Doctorate
• Requirements for this program are current for Fall 2014
• Length of program in credits: 66
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Applicants for the Ph.D. must have a master's degree either completed, or in progress with plans to complete it before the start of the Ph.D. program. As part of their application, graduate students are asked to discuss their interests and explain their master's program and how the Ph.D. will build upon it.

The primary purpose of the Ph.D. program is to prepare graduate students to do research in areas related writing, broadly construed, and to publish the results of that research.

Working in collaboration with faculty mentors, other students, and material resources, such as the library and the internet, graduate students will become expert in a specialized field of knowledge, developing the scholarly and research skills needed to make a new and original contribution to research in rhetoric, composition, writing studies, literacy, or technical/scientific communication. Graduate students build their expertise and skills in the core areas of rhetoric, theory and history, writing studies and pedagogy, and technical communication and technology and culture. They also develop and refine knowledge and skills through departmental seminars and a supporting program of courses outside the department. The dissertation—an original, systematic, and significant program of research—will allow graduate students to join scholarly conversations and contribute to knowledge and theory within the field. This project, and the mentoring students receive as they complete the project, will stand students in good stead to continue to make important research contributions in their academic careers as they unfold.

Preparing graduate students to teach first-year writing, scientific and technical communication, and other courses related to their expertise is an important part of the program because the expectation is that graduates will teach at the college level. While most of graduate students have entered college teaching, a few have preferred to work in industry in scientific and technical communication.

Graduate student faculty advisers help graduate students with all parts of the degree, by articulating a coherent plan of coursework, leading a preliminary examination committee, and guiding them in developing a dissertation project.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Masters in a related discipline, e.g., rhetoric, technical and professional communication, English, communication studies.

Special Application Requirements:
Scores from the General Test of the GRE that are less than five years old are required of students with baccalaureate degrees from U.S. institutions. International students are encouraged to take the General Test of the GRE and to have those results forwarded to the University. Nonnative speakers of English are required to take an appropriate test with satisfactory scores. All applicants must submit three letters of recommendation, two writing samples, and a professional objective statement. All M.A. and Ph.D. applicants begin in the fall semester and should apply by the January 5th application deadline.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
42 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Ph.D. students in rhetoric and scientific and technical communication are required to earn a minimum of 42 credits in seminars and courses. The requirement includes a research core, five courses in three core areas, and at least three in a specialty area (a concentration). The first is two courses in research methods in writing studies and technical communication (WRIT 8011 and 8012, 6 cr). Students take one Writing Studies course or seminar in each of the core areas: rhetoric theory and history, writing studies and pedagogy, and technical communication and technology and culture, as well as two others from any of the three (15 cr).

Examples of specialty areas include digital literacies, internet studies, professional and technical communication, theories of writing, writing pedagogies, rhetorics of science, medicine, or law, and rhetorical theory (9 cr). Elective courses or a formal doctoral minor from another program are needed in order to fulfill the supporting field requirement. The written preliminary examination covers three areas: one in rhetoric, one of the other core areas, and the specialty. The first two are based partly on fixed reading lists and coursework in the areas. The preliminary oral examination is built around the written examinations. Twenty-four thesis credits are also required.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.S. in Scientific and Technical Communication focuses on applying basic theory and research to the practice of scientific and technical communication in the workplace.

**Program Delivery**

This program is available:

- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

**Prerequisites for Admission**

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- **IELTS**
  - Total Score: 6.5
- **MELAB**
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

**Capstone Project:** WRIT 8505 - Design Project. Also known as a capstone course, this is the final course necessary to complete the degree requirements. It is usually offered in the summer. The course is primarily for students seeking the M.S. in scientific and technical communication, but is also suitable for graduate students in any program who want structured support to write an extended project report. Classes are conducted in a "writers' workshop" format, during which each student receives feedback and support for his or her individual research report writing.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Note: Students are never admitted to the sociology graduate program solely to pursue the M.A.; the M.A. is only an optional degree for students already enrolled in the doctoral program. See the Ph.D. for admissions information.

Sociology is concerned with the study of human societies, groups, and social life. The program offers substantive training in nine areas of specialization:
- Crime, Punishment, and Social Control
- Demography and Population Studies
- Inequalities and Identities
- Law, Rights, and Change
- The Life Course: Family, Education, Work, and Well-being
- Global, Transnational, and Comparative Sociology
- Organizations, Networks, and Markets
- Politics, Knowledge, and Cultures
- Sociology of the Environment and Food Systems

Methodological training is available in historical and comparative research, survey research, network analysis, advanced statistical analysis, and qualitative research.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:

- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Sociology is concerned with the study of human societies, groups, and social life. The program offers substantive training in nine areas of specialization: Crime and Punishment, and Social Control; Demography and Population Studies; Inequalities and Identities; Law, Rights, and Change; The Life Course: Family, Education, Work and Well-being; Global, Transnational, and Comparative Sociology; Organizations, Networks, and Markets; Politics, Knowledge, and Cultures; Sociology of the Environment and Food Systems. Methodological training is available in historical and comparative research, survey research, network analysis, advanced statistical analysis, and qualitative research. Training for students interested in either academic or applied employment is generally available. The doctoral program is for students planning to do research or teach.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students are not required to have earned a graduate or professional degree prior to entering the program.

It is recommended that applicants have a background in basic sociology, usually consisting of the equivalent of 18 credits in undergraduate work (including 9 credits of social science statistical methods), or an M.A. degree in sociology or a closely related field. Individuals without sociology coursework are generally required to complete background coursework in theory and statistics during their first year of residence.

Special Application Requirements:
Applicants are evaluated on their academic potential, commitment to the field, creativity, and potential for contribution to the field. In addition to the University application form, and its required documents, applicants must submit the following: GRE scores; a sample of written work, usually a term paper, written in English; three letters of recommendation; and a personal statement of professional objectives. Non-native English speakers are required to take the TOEFL test, this includes students who have studied in the U.S. The department accepts new students for fall admission only. The application deadline for admittance is December 1.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 22
Internet Based - Speaking Score: 27
Paper Based - Total Score: 550

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
29 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

Students are required to take 14 credits of core courses, 12 additional credits of coursework in Sociology, 12 credits outside of Sociology as a minor or supporting program, 3 credits of training in advanced methods, and 24 thesis credits. A reading list is prepared which defines the scope of the Preliminary Written and Oral Examination. The preliminary exam also covers all coursework in the major field and may include any work fundamental to the field. After passing the Written and Oral exams, a Dissertation Prospectus hearing is then held with the committee in order for the student to explain and elaborate the dissertation problem, sources of data and methods to be used. Students who enter the program with an M.A. in sociology must earn a minimum of 18 credits in the department regardless of the number of courses the department approves eligible for transfer credit from other institutions.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 54 to 64
- This program requires summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Emphasis in the master's program is speech-language pathology focusing on meeting the standards for certification as a speech-language pathologist by the American Speech-Language-Hearing Association. The program emphasizes outcome-based learning activities that prepare graduates to interpret research findings and incorporate them into clinical practice. Coursework and clinical education focus on diagnostic, rehabilitative techniques, technology counseling approaches, and human development.

Accreditation
This program is accredited by American Speech-Language-Hearing Association (ASHA).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Prerequisite coursework includes undergraduate transcript credit in physical science, biological science, social/behavioral science, and mathematics.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

**Plan A:** Plan A requires 47 major credits, 3 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 48 major credits and 6 credits outside the major. The final exam is written and oral.

**Plan C:** Plan C requires 51 major credits and 3 credits outside the major. The final exam is written.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students may choose to complete the MA without a track (54 credits; Plan B option, a comprehensive written examination including an oral examination); with an Audiology track (54 credits; Plan B option, a comprehensive final written examination including final oral examination), or with a Speech-Language Pathology track (60 credits; Plan A, a thesis including a final oral examination; or 54 credits; Plan C option, a comprehensive final written examination).

**Program Sub-plans**

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

**Audiology**
This sub-plan is limited to students completing the program under Plan B.

The audiology program emphasizes outcome-based learning activities that prepare graduates to interpret research findings and incorporate them into clinical practice. Coursework and clinical education focus on diagnostic, rehabilitative techniques, technology counseling approaches, and human development.

The audiology sub-plan requires a total of 54 credits, and a Plan B comprehensive written exam and a final oral examination.

**Speech-Language Pathology**
This sub-plan is limited to students completing the program under Plan A or Plan C.

The speech-language pathology program emphasizes outcome-based learning activities that prepare graduates to interpret research findings and incorporate them into clinical practice. Coursework and clinical education focus on diagnostic, rehabilitative techniques, technology counseling approaches, and human development. This sub-plan is accredited by the American Speech-Language-Hearing Association for certification in speech-language pathology.

Sub-plan includes an average of 54 credits. Credits include clinical education in speech-language-pathology. Students in this sub-plan may elect a Plan A thesis or a Plan C option.

- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
29 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.
A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The Ph.D. degree usually requires three years of work beyond the master's degree. In general, a student's program is designed by the student in consultation with the adviser to satisfy the particular objectives of the student, but there are also some department and University requirements that must be satisfied. These include coursework, research activities, teaching experience, and preliminary and final exams.

A minimum of 12 course credits in a minor or supporting program and registration for 24 thesis credits are required. Also required is a statistics sequence, for which students typically register during their first two years. The written and oral preliminary exams are taken at the end of the second year.

Each student completes a seminar (SLHS 8430) and a minimum of 4 credits of teaching experience that provide an opportunity for the student to develop and teach sections of department courses. Students also complete a seminar (SLHS 8410) and a minimum of 4 credits of research under the direction of one or more faculty members in the department other than the adviser.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Statistics is the primary venue at the University for research, teaching, and dissemination of the theory, methodology, and applications of statistical procedures. Students may specialize in any area of statistics. The core program for all students has strong components of both theoretical and applied statistics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 28 major credits and 6 credits outside the major. The final exam is written.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The program prepares students for jobs in industry and the public sector and also for study at the doctoral level.
During the first year, students take a two-semester theory sequence (STAT 8101-8102) and a two-semester methods sequence (STAT 8051-8052). In addition, they usually take two supporting field courses (at least 6 cr) from other departments.

During the second year, students take two courses (at least 6 cr) of approved 5xxx or 8xxx statistics courses; some of this requirement can be satisfied by taking approved courses with heavy statistical content from other departments. Students also take a 3 credit statistical consulting course (STAT 8801), a 3 credit statistical computing course (STAT 5701) and complete their Plan B project. A total of at least 34 course credits is required.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 33
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.A. in strategic communication is designed to serve working communications professionals in advertising, public relations, corporate communications, nonprofit organizations, and government. The 33-credit program is conceptually and structurally distinct from the existing academic master's degree in mass communication in that it focuses on advanced professional study of communications strategy, planning, evaluation, and creative management.

The University of Minnesota is one of only a handful of institutions to offer a professional master's program in strategic communication designed for the busy working professional.

The M.A. in strategic communication curriculum is tailored to provide the best foundation for future communications leaders, recognizing that the communication industry is changing rapidly and is more volatile than ever. With Internet use moving well beyond its infancy, and massive organizational and global forces reshaping the U.S. economy, communications leaders face significant challenges and can prepare themselves through in-depth study of strategic process management.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

Special Application Requirements:
The minimum requirement for admission is a B.A. or equivalent. Professionals in strategic communication--currently employed in advertising, public relations, or marketing firms, or in a communications function within a corporation or nonprofit organization--must have a baccalaureate degree from an accredited U.S. institution or its foreign equivalent and at least two years professional experience. This professional experience should be in any of the following areas: account planning, account management, advertising management, media planning or buying, media sales, promotion marketing, corporate communications, public affairs, public relations, investor relations, direct marketing, sales management, marketing management, brand management, market research, or event management.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 33 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The M.A. in strategic communication requires 33 credits to be completed within 24 calendar months. All students must take the same 18 course credits in communication, and complete the 6-credit individual project. In addition, 9 credits of graduate-level elective studies (at least 6 outside the School of Journalism and Mass Communication) must be completed.

Students must maintain a GPA of at least 3.00 and achieve a grade of B or better on their final 6-credit project. Student progress is evaluated by the academic director, program coordinator, and program faculty. Students must progress each semester to continue in the program, though a student who unexpectedly must temporarily leave the program can return to the program at a later date and resume their studies at the point of departure. All coursework must be taken A-F.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This interdisciplinary graduate minor is administered through the Department of African American & African Studies. The minor program gives students from a variety of disciplines a structured graduate curriculum that offers a systematic understanding of the contemporary and historical experiences of peoples of Africa and of the African diaspora. It is organized around a group of core seminars and focuses on two broad areas: the humanities and the arts, and the social and behavioral sciences.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Admission is contingent upon prior admission to a master's or doctoral degree-granting program.

Special Application Requirements:
Students must complete an application form by the end of spring semester to be considered for acceptance for the following academic year. It is expected that no more than 15 students will be admitted to this minor each year. An undergraduate major or minor in African American and/or African studies is not required for admission to the program, but students are expected to have had sufficient background to begin graduate level study.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Students develop their program in consultation with the director of graduate studies in studies in Africa and the African diaspora and in their major. All courses must be outside the student's major field of study.

The master's minor requires a minimum of 9 graduate credits, including the seminar AFRO 5101 - Studies in Africa and the African Diaspora. Remaining courses are selected from one of the following two areas: humanities and the arts or behavioral and social sciences.

The doctoral minor requires a minimum of 15 graduate credits, including the seminar AFRO 5101 - Studies in Africa and the African Diaspora. Students take one additional seminar that focuses on the study of Africa and peoples of African descent. Remaining courses are selected from one of the two areas listed above.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 7
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Studies of science and technology (SST) deals with a rapidly expanding field that seeks to understand the conceptual foundations, historical development, and social dimensions and context of science and technology. SST faculty are drawn from a number of research and teaching units dedicated in whole or in part to the history, philosophy, and social studies of science and technology.

The graduate SST minor is for students from any major who want to gain a deeper understanding of the nature and development of science and technology. It can be particularly valuable for students who are planning teaching careers in science or engineering, or those majoring in philosophy or history of science and technology. Students admitted to the SST minor will develop individual programs of study in consultation with the faculty and the director of graduate studies. Adjustments in program requirements can be made for students with relevant previous course experience.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Admission is contingent upon prior admission to a University of Minnesota master's or doctoral degree-granting program and is by permission of the director of graduate studies in SST.

Special Application Requirements:
Prospective students should contact director of graduate studies, Studies of Science and Technology.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A master's minor requires 7 graduate credits; the doctoral minor requires 12 graduate credits. Both minors must include HSCI 8112 or HMED 8112; one of either PHIL 8601, 8602, or 8605; and SST 8000 - Colloquium (one semester for master's, two for doctoral students). Doctoral students must also take one of the SST seminars (SST 8100, 8200, 8300, 8400, or 8420) in an area primarily outside the student's major.

Technical Communication Postbaccalaureate Certificate

Writing Studies
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of Writing Studies, 215 Nolte Center, 315 Pillsbury Drive S.E., Minneapolis, MN 55455; (612-624-3445; fax: 612-624-3617)
Email: WRIT@umn.edu
Website: http://www.writingstudies.umn.edu

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 15
- This program requires summer semesters for timely completion.
- Degree: Technical Communication PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

In collaboration with your academic adviser, you will create a program that matches the knowledge and skills you value to the experience required by industry. Certificate students may choose five courses from these Writing Studies options, with a maximum of two at the 4xxx level:

WRIT 4431  Intersections of Scientific & Technical Communication and Law
WRIT 4501  Usability and Human Factors in Technical Communication
WRIT 4562  International Professional Communication
WRIT 4573W Writing Proposals and Grant Management
WRIT 4662W Writing with Digital Technologies
WRIT 4664W Science Writing for Popular Audiences
WRIT 5001  Introduction to Graduate Studies in Scientific & Technical Communication
WRIT 5112  Information Design: Theory & Practice
WRIT 5270  Writing for Publication
WRIT 5561  Editing and Style for Technical Communicators
WRIT 5671  Visual Rhetoric

Certificate courses are taught by graduate faculty who themselves have active research agendas. The program, whenever possible, provides opportunities for students to apply knowledge to solve community and industry problems within the field of technical communication through authentic learning opportunities in the program's courses. Several courses require students to engage in projects for clients that in the past have included such organizations as ISEEK (Minnesota Internet System for Education and Employment Knowledge), the YWCA, Hennepin County Libraries, the American Community Gardening Association, and the U.S. Forest Service North Central Research Station.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

**IELTS**
- Total Score: 6.5

**MELAB**
- Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Certificate students may take up to 2 courses at the 4xxx level.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 40
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The University of Minnesota offers a unique graduate program drawing from the varied research expertise of its core faculty. Together, the faculty is committed to the study of theatre and performance as practices of social, cultural, and political consequence. The department's work in theatre historiography and performance criticism examines the stakes of acts of representation, movement, and meaning-production both within and without the discipline of theatre. The curriculum of this program trains students to be rigorous scholars and expert teachers of theatre and performance studies at the college level.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- Length of program in credits: 66
- This program does not require summer semesters for timely completion.
- Degree: Master of Fine Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.F.A. in Theatre Arts, which specialized in Design and Technical Production, is awarded to students who, through the three-year course of study, explore challenges in the areas of scenery/properties, costuming, lighting, sound design, multimedia and technology with an emphasis in at least one of these areas. It is a rigorous program based on the belief that good designers must have a solid understanding of each area of design in order to be able to communicate and collaborate well with the other designers, technicians, and directors. Good designers must also have strong craft skills in order to understand how the design functions in execution. The department believes that technology is an integral tool of design and seeks to balance the education of the student in both areas.

Accreditation
This program is accredited by National Association of Schools of Theatre (NAST)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Admission into the M.F.A. Theatre Arts program is dependent on a portfolio review by the Theatre Arts design/technology faculty.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 60 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: A realized design and technology project.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

The three-year, performance-oriented M.F.A. degree specializes in design and technical production. All areas of design are studied to increase understanding in specialization areas, and technology is studied as an essential part of design. Students are expected to achieve proficiency in at least two areas of any combination of design and technology (scenery/properties, costuming, lighting, sound) and a level of expertise in at least one of these areas. Program faculty work with students to identify the final areas for the degree. The M.F.A. degree is considered a terminal degree in these areas of theatre arts.

The M.F.A. requires 66 graduate credits. The degree requires 6 credits of dramatic literature or theatre history, which may be fulfilled by TH 4177 and 4178; and a minimum of 6 credits from outside the department (at least 3 credits of which must be a University course that contributes substantially to the degree program). Each program requires a final performance practicum and written record of it. For specific program requirements, contact the director of graduate studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
In order to be admitted to the M.A./Ph.D. program, you must have a working knowledge/reading proficiency of at least one foreign language (or a sign language).

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
18 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: Proficiency in one foreign language.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The M.A./Ph.D. core curriculum includes three categories of 8xxx courses. Students are required to take a minimum of two courses each from category A and category B, and both courses in category C.

A: Signature Seminars
Each member of the M.A./Ph.D. faculty will offer a "signature seminar" on a two-year rotation. These seminars focus on the faculty member's current primary area of research interest, with an emphasis on articulating the distinct research methodology that the faculty member brings to bear on his/her field.

B: Field Seminars
Each member of the M.A./Ph.D. faculty will offer a "field seminar" on a two-year rotation. These seminars are designed to give students a level of field expertise that will enable them to teach in the history, literature, and criticism of theatre studies, and each focuses on a distinct period, problematic, or performance tradition. The emphasis here is on mastery of a body of literature and theory pertaining to a specific field.

C: Pedagogy and Professionalization
This seminar is taught every second year, over an entire year (meeting every second week, 3 cr). It introduces students to the academic profession through a series of focused workshops on pedagogy (ethics, politics, and practice), professional protocols (publishing, job search, conferences), and forms of professional writing (grants, abstracts, statements of teaching philosophy, etc.).

Historiography Seminar
This seminar is taught every second year (3 cr). It focuses on the contested nature of historical (theatre/performance) knowledge, and introduces students to idea of historiography defined as an ethical exploration of the encounter with the Other (the past, the writing of history, the archive, the event, the fact, the object) that questions relations of knowledge and power, as well as the current apparatus of inquiry and interpretation.

Website: http://www.aem.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Aerospace Engineering and Mechanics offers M.S. and Ph.D. degrees. The graduate programs emphasize engineering sciences that are basic to fluid mechanics, aerospace systems, and solid mechanics. Theoretical, analytical, experimental, and computational aspects of these fields are covered by the courses and research opportunities offered by the department.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

A four-year B.S. degree in an engineering, basic science, or mathematics program is required. Admission depends primarily on the applicant's undergraduate record and letters of recommendation.

Special Application Requirements:
GRE scores are not required but are strongly recommended for students applying for graduate fellowships. In all cases, these test scores are taken into account if provided. Students are admitted fall semester only. Only under unusual circumstances are students allowed to begin their studies at another time during the academic year.

International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 to 24 major credits and 6 to 16 credits outside the major. The final exam is oral.

Plan C: Plan C requires 14 to 24 major credits and 6 to 16 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

This program emphasizes coursework in engineering sciences that are basic to this field: fluid mechanics, aerospace systems, and solid mechanics. Options include coursework in aerodynamics and aerospace systems, dynamical systems, material properties, and fluid and solid behavior.

The M.S. in Aerospace Engineering and Mechanics requires 30 credits and is offered under three plans. Plan A (thesis) requires 14 major credits, 6 credits outside the major, and 10 thesis credits. Plan B (project) and Plan C (coursework) require a minimum of 14 major credits and a minimum of 6 credits outside the major. The Plan B option requires completion of the 3-credit project course, AEM 8880. The remaining course credits may be taken in the major field or any supporting field.

For all plans, at least 12 of the major field credits must be at the 5xxx or 8xxx level. Degree plans must include at least one sequence of 5xxx or 8xxx courses in aerospace engineering and mechanics, and no more than 8 credits of 4xxx courses. If seminar credits are used to meet the 30-credit requirement, they must be in 1-credit modules and AEM 8000 may only be used once.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Aerospace Engineering and Mechanics offers M.S. and Ph.D. degrees in aerospace engineering and mechanics. The graduate programs emphasize engineering sciences that are basic to fluid mechanics, aerospace systems, and solid mechanics. Theoretical, analytical, experimental, and computational aspects of these fields are covered by the courses and research opportunities offered by the department.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A four-year B.S. degree in an engineering, basic science, or mathematics program is required. Admission depends primarily on the applicant's undergraduate record and letters of recommendation.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Minor Requirements for Ph.D. Degree Students Majoring in Other Fields: At least 12 credits in aerospace engineering and mechanics are required, including at least one sequence of two 5xxx or 8xxx courses.

Minor Requirements for Master's Degree Students Majoring in Other Fields: At least 6 credits in aerospace engineering and mechanics are required, including one sequence of two 5xxx or 8xxx courses.

The two-course sequence must be in one of the following research areas: fluids, solids, dynamics, controls, or computational fluid dynamics.

Courses cross listed with AEM courses must be registered for under the AEM course designation to be counted towards a minor.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 66
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Aerospace Engineering and Mechanics offers a Ph.D. degree in aerospace engineering and mechanics. The Ph.D. program emphasizes engineering sciences that are basic to fluid mechanics, aerospace systems, and solid mechanics. Theoretical, analytical, experimental, and computational aspects of these fields are covered by the courses and research opportunities offered by the department.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

A four-year B.S. degree in an engineering, basic science, or mathematics program is required.

Other requirements to be completed before admission:
Admission depends primarily on the applicant's undergraduate record, personal statement, and letters of recommendation.

Special Application Requirements:
GRE scores are not required but are strongly recommended for students applying for graduate fellowships. In all cases, these test scores are taken into account if provided. Students are admitted fall semester only. Only under unusual circumstances are students allowed to begin their studies at another time during the academic year.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
12 to 30 credits are required in the major.
12 to 30 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The Ph.D. program emphasizes coursework and research in engineering sciences that are basic to this field. Options include coursework and research in aerodynamics and aerospace systems, dynamical systems, material properties, and fluid and solid behavior.

The Ph.D. requires about two years of coursework, but the heart of the program is the student's thesis research. The program must include a minimum of 42 credits of approved courses and four semesters of colloquium attendance. Of the 42 credits, a minimum of 12 credits must be in AEM courses at the 5xxx or 8xxx level, and a minimum of 12 credits outside the major are required. The remaining 18 course credits may be taken in the major or in any supporting field. Degree plans must include at least one sequence of 5xxx or 8xxx level courses in aerospace engineering and mechanics. No more than 8 credits of 4xxx level courses and no more than 13 credits taken as S/N are allowed. If seminar credits are used to meet the 42-credit requirement, they must be in 1-credit modules and AEM 8000 may only be used once.

The first year of the Ph.D. program is similar to the master's program and most Ph.D. students receive the master's degree. The second year is devoted to more advanced courses and beginning research. Subsequent years include some coursework with increased focus on research. The time required to complete a research project varies, but most students finish the Ph.D. within five years after the bachelor's degree.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Astrophysics is the study of the universe and its constituent parts. The department conducts research in observational, theoretical, and computational astrophysics, as well as instrument development. The main research areas include minor planetary bodies, solar system properties, dynamics of normal and active galaxies, stellar evolution, interaction of stars with their environments, the interstellar medium, astrophysical magnetohydrodynamics, and galactic and cosmological structure. Observational research includes activities that cover X-ray, ultraviolet, optical, infrared, and radio wavelengths. Extensive research programs in space physics, nucleosynthesis, and the elementary particle-cosmology interface are also carried out in interdisciplinary connections with the graduate program in physics.

Program Delivery
This program is available:
  - via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For major work, an undergraduate degree in astronomy or physics or the equivalent is required. Contact the Graduate Studies Committee for exceptions.

Other requirements to be completed before admission:
A statement of career goals, scores from the GRE General (Aptitude) Test and Subject (Advanced) Test in physics, and three letters of recommendation are required. Applications for financial aid are due January 10. Students are admitted fall semester only.

Applicants must submit their test score(s) from the following:
  - GRE

International applicants must submit score(s) from one of the following tests:
  - TOEFL
    - Internet Based - Total Score: 79
    - Internet Based - Writing Score: 21
    - Internet Based - Reading Score: 19
    - Paper Based - Total Score: 550
  - IELTS

Program Requirements

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 14 to 24 major credits and 6 to 16 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The master's degree requires a minimum of 30 credits, including one semester of classical physics (PHYS 5011-5012). Plan A (thesis) requires 14 credits in astrophysics, 6 credits outside the major, and 10 thesis credits. Plan B (project) requires a minimum of 14 credits in astrophysics, and a minimum of 6 credits outside the major. The remaining 10 credits may be taken in the major field or any supporting field. The Plan B also requires the completion of 1-3 papers written in connection with three courses taken in the program. Completion of the degree normally takes two years.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 31
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Biomedical engineering is the application of engineering principles and methods to problems in biology and medicine. The discipline includes the study of fundamental processes in biology and physiology, the study of the diagnosis and treatment of disease and injury, and the design and development of medical devices and techniques. Students take courses in mathematics, biology, biomedical engineering, and areas of science and engineering that are relevant for the degree objectives.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

Other requirements to be completed before admission:
A baccalaureate degree in engineering or in a physical or biological science is required. Successful applicants without an engineering degree are required to complete appropriate coursework (including linear algebra and differential equations) before being admitted as a candidate for the degree. In most cases, this coursework is not considered part of the degree program.

All application materials must be submitted online through the ApplyYourself application system. See http://bme.umn.edu/grad/appinfo.html for detailed instructions.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Speaking Score: 23
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 84

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 8 to 20 major credits, 0 to 12 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 10 to 31 major credits and 0 to 21 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B Project (BMEn 8820, minimum of 2 credits) should entail approximately 50-75 hours of work per credit, performed in collaboration with a faculty adviser. Students must submit a written report of approximately 10 double-spaced pages per credit to the adviser, who will assign a letter grade for BMEn 8820 based on the report. The report must then be defended before the student's committee.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The M.S. program requires courses in mathematics, biology, biomedical engineering, and relevant areas of science and engineering.

Plan A (with thesis) requires a minimum of 8 credits of BME courses, including 6 in BME core courses and 2 seminar credits, plus 10 thesis credits. The remaining 12 credits are taken from the list of approved electives, either in the major field or any supporting field.

The Plan B (with project) requires a minimum of 10 credits of BME courses, including 6 in BME core courses, 2 seminar credits, and at least 2 Plan B project credits. The remaining 21 credits are taken from the list of approved electives, either in the major field or any supporting field.

BMEn Core
Take at least 6 credits of BMEn Core courses at the 5xxx-level (http://bme.umn.edu/grad/courses/core-5000.html) and/or 8xxx-level (http://bme.umn.edu/grad/courses/core-8000.html). BMEn courses not listed on those pages do NOT satisfy the Core requirement.

BME Seminar
Take at least 2 credits of the BME Graduate Seminar. Other department/program seminars CANNOT be substituted for this requirement.

Take 2 or more credit(s) from the following:
- BMEN 8601 - Biomedical Engineering Seminar (1.0 cr)
- BMEN 8602 - Biomedical Engineering Seminar (1.0 cr)

Biology Electives
Take at least 6 credits of Biology Electives. Approved courses for this requirement are listed at http://bme.umn.edu/grad/courses/bio.html. Additional courses may be approved by the Director of Graduate Studies.

Technical Electives
Plan A students must take at least 6 credits of Technical Electives, including at least 3 credits that are Math- or Statistics-Intensive. Plan B students must take at least 9 credits of Technical Electives, including at least 3 credits that are Math- or Statistics-Intensive. Approved courses for these requirements are listed at http://bme.umn.edu/grad/courses/tech.html and http://bme.umn.edu/grad/courses/math.html. Additional courses may be approved by the Director of Graduate Studies.

Free Electives (Plan B only)
Plan B students must take at least 6 credits. Free Electives are graduate-level courses in a field of science or engineering. See http://bme.umn.edu/grad/courses/free.html. Plan A students are not required to take any Free Elective credits.

• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
A baccalaureate degree in engineering or in a physical or biological science is required. Successful applicants without an engineering degree are required to complete appropriate coursework (including linear algebra and differential equations) before being admitted as a candidate for the degree. In most cases, this coursework is not considered part of the degree program.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Speaking Score: 23
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7
• MELAB
  - Final score: 84

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
9 to 30 credits are required in the major.
0 to 21 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The Ph.D. program requires coursework in mathematics, biology, biomedical engineering, and relevant areas of science and engineering, a written preliminary exam, an oral preliminary exam, a dissertation, and a final oral exam.

A minimum of 9 credits of BME courses are required, including 6 in BME core courses and 3 seminar credits. The remaining 21 credits are taken from the list of approved electives, either in the major or in any supporting field.

**BME 8xxx Core**
Take at least 6 credits of BME Core courses at the 8xxx-level (http://bme.umn.edu/grad/courses/core-8000.html). BME courses not listed on that page do NOT satisfy the 8xxx Core requirement.

**BME Seminar**
Take at least 3 credits of the BME Graduate Seminar. Another department/program graduate seminar may be substituted for 1 credit of this requirement, with prior approval from the Director of Graduate Studies.

Take 3 or more credit(s) from the following:
- **BME 8601** - Biomedical Engineering Seminar (1.0 cr)
- **BME 8602** - Biomedical Engineering Seminar (1.0 cr)

**Biology Electives**
Take at least 6 credits of Biology Electives. Approved courses for this requirement are listed at http://bme.umn.edu/grad/courses/bio.html. Additional courses may be approved by the Director of Graduate Studies.

**Technical Electives**
Take at least 9 credits of Technical Electives, including at least 6 credits that are Math- or Statistics-Intensive. Approved courses for these requirements are listed at http://bme.umn.edu/grad/courses/tech.html and http://bme.umn.edu/grad/courses/math.html. Additional courses may be approved by the Director of Graduate Studies.

**Free Electives**
Take at least 6 credits of Free Electives. Free Electives are graduate-level courses in a field of science or engineering. See http://bme.umn.edu/grad/courses/free.html. Up to three credits of coursework relevant to science and technology (e.g., public policy, ethical/historical aspects, etc.) may be counted toward this requirement with prior approval from the Director of Graduate Studies.

Email: cemsgrad@umn.edu
Website: http://www.cems.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Chemical Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Research activities in the Chemical Engineering and Materials Science (CEMS) Department focus on the development of renewable energy technologies, the solution of important medical and biological engineering challenges, the development of advanced materials, and the application of sophisticated mathematical and theoretical models.

Graduate courses offered cover core areas of chemical engineering (fluid mechanics, applied mathematics: linear and nonlinear analysis, transport, chemical thermodynamics, statistical thermodynamics and kinetics, and analysis of chemical reactors) and core areas of materials science (structure and symmetry of materials, thermodynamics and kinetics, electronic properties of materials, and mechanical properties of materials). In addition, several specialized topics are offered, including biochemical engineering, biological transport processes, food processing technology, colloids, principles of mass transfer in engineering and biological engineering, rheology, coating process fundamentals, process control, finite elements methods of computer-aided analysis, ceramics, polymers, materials design and performance, materials processing, corrosion, introduction to polymer chemistry, polymer laboratory, contact and fracture properties of materials, electron microscopy, thin films and interfaces, composites, electrochemical engineering, physical chemistry of polymers, solid state reaction kinetics, electronic structure of materials, electronic properties and applications of organic materials, electronic ceramics, dislocations and interfaces, epitaxial thin film growth, and science of porous media.

The master of chemical engineering (M.Ch.E.), also known as the professional master's, is designed for working professionals who are interested in obtaining a master's degree part time. This degree requires a design project. Part-time students may also choose the M.S.Ch.E. Plan C, which is coursework only.

The CEMS department focuses on the Ph.D. and does not generally admit students directly to the M.S.Ch.E. Plan A degree, which is a thesis based master's and is intended for current graduate students who choose not to seek a Ph.D.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in chemical engineering or other related field.

Other requirements to be completed before admission:
This professional master of engineering degree (M.Ch.E.) is designed for employees of local industries who wish to pursue their studies part time. No financial support is available. Applicants should contact the program before applying for admission.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 560
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

All master's students must complete at least four core courses chosen from CHEN 8101, 8201, 8301, 8401, 8402, and 8501. In addition, master's students must complete a total of 30 credits, including 14 from the major program (this includes the four required courses), 6 from the minor or related program, and 10 thesis credits (for the M.Ch.E., thesis credits are used for the design project). Precise coursework plans are approved by the director of graduate studies. The minimum required GPA for completion is 2.80.

In addition to the coursework, M.Ch.E. students are required to complete a design project. The work-related M.Ch.E design project consists of an in-depth study of an engineering design. It need not represent a publishable research project. While the amount of work should be the same as for a master's thesis, the project can contain elements that the thesis would not, such as economic considerations, design consultation, and social relevance. The written design report must be approved by a three-person faculty committee. The final exam consists of the written design report and an oral presentation to the faculty committee.

- Program Type: Master's
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science in Chemical Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The CEMS Department offers two types of master's degrees: the M.S.Ch.E. (Plan A or C) and the M.Ch.E. degree, also known as the professional master's. The M.S.Ch.E. Plan A degree is a thesis-based master's and is generally reserved only for current graduate students who choose not to seek a Ph.D. Working professionals who are interested in obtaining a master's degree part time should follow the requirements for the M.Ch.E. degree, which requires a design project, or the M.S.Ch.E. Plan C, which is coursework only.

Research activities in CEMS focus on the development of renewable energy technologies, the solution of important medical and biological engineering challenges, the development of advanced materials, and the application of sophisticated mathematical and theoretical models.

Graduate courses offered cover core areas of chemical engineering (fluid mechanics, applied mathematics: linear and nonlinear analysis, transport, chemical thermodynamics, statistical thermodynamics and kinetics, and analysis of chemical reactors) and core areas of materials science (structure and symmetry of materials, thermodynamics and kinetics, electronic properties of materials, and mechanical properties of materials). In addition, several specialized topics are offered, including biochemical engineering, biological transport processes, food processing technology, colloids, principles of mass transfer in engineering and biological engineering, rheology, coating process fundamentals, process control, finite elements methods of computer-aided analysis, ceramics, polymers, materials design and performance, materials processing, corrosion, introduction to polymer chemistry, polymer laboratory, contact and fracture properties of materials, electron microscopy, thin films and interfaces, composites, electrochemical engineering, physical chemistry of polymers, solid state reaction kinetics, electronic structure of materials, electronic properties and applications of organic materials, electronic ceramics, dislocations and interfaces, epitaxial thin film growth, and science of porous media.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in chemical engineering or other related field.

Special Application Requirements:
Note: With the exception of the professional master's degree (the M.Ch.E.) and the M.S.Ch.E. Plan C, the CEMS Department focuses on the Ph.D. and does not generally admit students directly to the M.S.Ch.E. Plan A degree.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 560
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A**: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan C**: Plan C requires 18 major credits and 12 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The M.S.Ch.E. is offered under Plan A (with thesis) or Plan C (coursework only); both require 30 credits.

All master's students must complete four core courses, chosen from CHEN 8101, 8201, 8301, 8401, 8402, and 8501. Plan A master's students complete 14 credits from the major program (this includes the 4 required courses), 6 from the minor or related program and 10 thesis credits. Plan C master's students complete 18 credits from the major program (this includes the 4 required courses) and 12 credits in one or more related fields.

Precise coursework plans are approved by the director of graduate studies. The minimum required GPA for completion is 2.80.

- This program does not require summer semesters for timely completion.  
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

While modern research in chemistry is very interdisciplinary, graduate work in the Department of Chemistry falls broadly into the focus areas of analytical chemistry, chemical biology, environmental chemistry, inorganic chemistry, materials chemistry, organic chemistry, polymer chemistry, experimental physical chemistry, and computational chemistry.

Program Delivery

This program is available:  
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

The preferred undergraduate GPA for admittance to the program is 3.20.

An undergraduate degree in chemistry or a related field is required for admission.

Other requirements to be completed before admission:  
Applicants must offer the substantial equivalent of the courses in analytical, inorganic, organic, and physical chemistry that are required of undergraduate majors in the University of Minnesota chemistry curriculum. They must also have at least one year of college physics, plus college mathematics through calculus.

Three letters of recommendation are required for all applications. Scores from General (Aptitude) and Subject (Advanced) Tests of the GRE are required for all applicants. International applicants are expected to provide scores of at least 550 (paper), 213 (computer), or 85 (Internet) on the TOEFL, as well as GRE scores.

Applicants must submit their test score(s) from the following:  
- GRE

International applicants must submit score(s) from one of the following tests:  
- TOEFL  
  - Internet Based - Total Score: 85  
  - Internet Based - Writing Score: 21  
  - Internet Based - Reading Score: 19  
  - Internet Based - Speaking Score: 23  
  - Paper Based - Total Score: 550  
- IELTS  
  - Total Score: 6.5  
- MELAB  
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is written. A capstone project is required.

Capstone Project: Each Plan B project should involve a combined total of approximately 160 hours (the equivalent of four full-time weeks) of library research, reading, and/or writing resulting in the preparation of a significant written document. Students who plan to work on Plan B projects independent of the Preliminary Examination should present a plan, after consultation with the chosen instructor for the Plan B project, outlining the number and content of their projects to the DGS. Projects should be completed to the satisfaction of the instructor; the final grade is determined by the instructor.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

M.S. students are expected to pass a proficiency exam during their first academic year in residence. Plan A requires 20 course credits and 10 thesis credits; Plan B requires 30 course credits, which include 8 credits for the two Plan B project courses.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

While modern research in chemistry is very interdisciplinary, graduate work in the Department of Chemistry falls broadly into the focus areas of analytical chemistry, chemical biology, environmental chemistry, inorganic chemistry, materials chemistry, organic chemistry, polymer chemistry, experimental physical chemistry, and computational chemistry.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Six course credits from graduate-level chemistry courses are required for a master's minor. Twelve course credits from graduate-level chemistry courses are required for a Ph.D. minor.

• Program Type: Doctorate
• Requirements for this program are current for Fall 2014
• Length of program in credits: 48
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

While modern research in chemistry is very interdisciplinary, graduate work in the Department of Chemistry falls broadly into the focus areas of analytical chemistry, chemical biology, environmental chemistry, inorganic chemistry, materials chemistry, organic chemistry, polymer chemistry, experimental physical chemistry, and computational chemistry.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

An undergraduate degree in chemistry or a related field is required for admission.

Other requirements to be completed before admission:
Applicants must offer the substantial equivalent of the courses in analytical, inorganic, organic, and physical chemistry that are required of undergraduate majors in the University of Minnesota chemistry curriculum. They must also have at least one year of college physics, plus college mathematics through calculus.

Special Application Requirements:
Three letters of recommendation are required for all applications. Scores from General (Aptitude) and Subject (Advanced) Tests of the GRE are required for all applicants. International applicants are expected to provide scores of at least 550 (paper), 213 (computer), or 85 (Internet) on the TOEFL, as well as GRE scores.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 85
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Internet Based - Speaking Score: 23
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The Ph.D. program requires 24 course credits and 24 thesis credits. The course credits must include 1 credit of seminar (CHEM 8601) and 1 credit for the ethics course (CHEM 8066).

Students in the Ph.D. program are expected to pass four of five proficiency examinations during their first year in residence. The exams, which are at the level of an advanced undergraduate course, are in analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. The exams are given during the chemistry first-year orientation program in August. In the event that a student does not pass the first exam, the exams are offered two more times during the academic year.

A minimum GPA of 3.00, 18 credits of coursework with a grade of B- or better, and passing grades on all four proficiency exams are required for students to remain in good standing.
Twin Cities Campus
Civil Engineering M.C.E.

Contact Information:
Department of Civil, Environmental, and Geo-Engineering, University of Minnesota, 122 Civil Engineering Building, 500 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-625-5522; fax: 612-626-7750)
Email: civesgs@umn.edu
Website: http://www.ce.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Civil Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Civil engineering emphases are available in environmental engineering (e.g., pollutant fate and transport, process modeling, soil and groundwater remediation, water and wastewater treatment), geomechanics (e.g., fracture and localization, groundwater flow, stability and liquefaction, wave and shock propagation), structural engineering (e.g., computational and structural mechanics, earthquake engineering, infrastructure performance and durability, new systems and materials), transportation engineering (e.g., intelligent transportation systems, pavement design and materials, transportation economics, traffic safety), and water resources engineering (e.g., earthscape processes, environmental and biological systems, hydrologic and climate dynamics, hydrodynamics, and turbulence).

The master of civil engineering (M.C.E.) degree is designed for the practicing engineer who would like to obtain an advanced degree on a part-time or full-time basis. Students who intend to proceed to the Ph.D. program or who think they may later wish to be admitted to the Ph.D. program should apply for the master of science program. Students are expected to follow a coherent program of coursework in one of the following subareas of civil engineering: environmental, geomechanics, structural, transportation, or water resources engineering. The program is selected with the help of a faculty adviser and approved by the director of graduate studies. In addition to completing graduate-level courses, students must demonstrate professional competence either by carrying out and defending a design project or by taking a coursework-related final oral exam (without a project).

The degree typically takes 2-3 semesters (12-18 months) to complete on a full-time basis or 6-8 semesters on a part-time basis.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

An ABET-accredited, four-year bachelor's degree in engineering is required for admission.

Other requirements to be completed before admission:
Applicants are required to submit results of the GRE in support of their applications. The TOEFL is required of foreign applicants from non-English-speaking countries, with a score of at least 550 (paper), 213 (computer), or 79 (Internet). Admission requirements also include three letters of recommendation and a statement of purpose that outlines the prospective student's research interests, reasons for pursuing graduate studies, and career plans after graduation. Students are admitted each semester, but applicants are encouraged to begin fall semester and to submit their applications by December 3 before the year their studies are expected to begin.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.C.E. degree requires 30 credits and is offered under two plans. Plan A requires a minimum of 20 course credits and preparation of a thesis/design project (10 cr). The thesis/design project must be carried out by the student in consultation with a faculty adviser. Plan C is a coursework-only degree program and requires 30 course credits.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Civil engineering emphases are available in environmental engineering (e.g., pollutant fate and transport, process modeling, soil and groundwater remediation, water and wastewater treatment), geomechanics (e.g., fracture and localization, groundwater flow, stability and liquefaction, wave and shock propagation), structural engineering (e.g., computational and structural mechanics, earthquake engineering, infrastructure performance and durability, new systems and materials), transportation engineering (e.g., intelligent transportation systems, pavement design and materials, transportation economics, traffic safety), and water resources engineering (e.g., earthscape processes, environmental and biological systems, hydrologic and climate dynamics, hydrodynamics, and turbulence).

The master of science (M.S.) degree balances education in engineering fundamentals and design, and provides preparation for students wishing to pursue a career in industry, as well as those wanting to continue studies toward a Ph.D. degree. Programs range from the Plan C, which is a coursework-only program, to the Plan A, which balances coursework with research and development. The Plan C program is intended for practicing engineers who want to pursue a degree on a part-time basis, self-funded full-time students, as well as students who plan to continue on for a Ph.D. degree.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in an engineering, basic science, or mathematics program is preferred.

Other requirements to be completed before admission:
Applicants are required to submit results of the GRE in support of their applications. A preferred TOEFL score of 550 (paper), 213 (computer), or 79 (Internet) is required of foreign applicants from non-English-speaking countries. Admission requirements also include three letters of recommendation and a statement of purpose that outlines the prospective student's research interests, reasons for pursuing graduate studies, and career plans after graduation. Students are admitted each semester, but applicants are strongly encouraged to submit their applications by December 3 in order to begin the following fall semester.

Special Application Requirements:
Admission depends primarily on the applicant's academic record and letters of recommendation. Applicants who lack civil engineering training are often required to complete one or more appropriate courses from the undergraduate civil engineering program. Graduate credit is not awarded for such preparatory work.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of January 21, 2015
- Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

**IELTS**
- Total Score: 6.5

**MELAB**
- Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

### Program Requirements

**Plan A:** Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral.

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.S. requires at least 30 credits and is offered under three plans. Plan A emphasizes research and preparation of a thesis; Plan B emphasizes coursework and a project; Plan C is coursework only. The thesis is written on a research project carried out in consultation with a faculty adviser. Under Plan B, students complete one to three Plan B papers as determined by the faculty adviser. Plan B papers can include computer programs, annotated bibliographies, field investigations, and analysis/design of special engineering problems. Plan A requires at least 20 course credits and 10 thesis credits. Plan B requires a minimum of 30 credits, which includes at least 27 course credits, and may include a maximum of 3 credits of CE 8094 for the Plan B project. Plan C requires 30 course credits and must include at least 2 courses at the 8xxx-level. A program typically takes 18 to 24 months to complete.

**Joint- or Dual-degree Coursework:** Dual Master's Degree in Civil Engineering and Industrial and Systems Engineering (Transportation Engineering Focus): Student may take a total of 15 credits in common among the academic programs. Dual Master's Degree in Civil Engineering and Urban and Regional Planning (Transportation or Environmental Engineering Focus): Student may take a total of 18 credits in common among the academic programs.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Civil engineering emphases are available in environmental engineering (e.g., pollutant fate and transport, process modeling, soil and groundwater remediation, water and wastewater treatment), geomechanics (e.g., fracture and localization, groundwater flow, stability and liquefaction, wave and shock propagation), structural engineering (e.g., computational and structural mechanics, earthquake engineering, infrastructure performance and durability, new systems and materials), transportation engineering (e.g., intelligent transportation systems, pavement design and materials, transportation economics, traffic safety), and water resources engineering (e.g., earthscape processes, environmental and biological systems, hydrologic and climate dynamics, hydrodynamics, and turbulence).

The Ph.D. degree couples independent research with coursework in a comprehensive program for those wishing to attain mastery of their field. The Ph.D. degree demands the ability and desire to pursue independent and original studies and can be earned with emphasis in environmental, geomechanics, structural, transportation, or water resources engineering. Research performance, as judged by preparation of a dissertation on an independently pursued research topic, is the primary requirement for the Ph.D. degree.

Students enter the Ph.D. program two to four years following the bachelor's degree, normally after completing the M.S. degree. The Ph.D. program is typically completed in four to six years following the bachelor's degree. Each program of study is designed in consultation with a faculty adviser to meet the special needs of the student, although programs must be approved by the director of graduate studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in an engineering, basic science, or mathematics program is preferred.

Other requirements to be completed before admission:
Applicants are required to submit results of the GRE in support of their applications. A preferred TOEFL score of 550 (paper), 213 (computer), or 79 (Internet) is required of foreign applicants from non-English-speaking countries. Program Requirements

- 36 credits are required in the major.
- 24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

A typical program consists of 36 credits of coursework beyond the bachelor's degree, plus 24 thesis credits. Credits earned in a M.S. program may be presented in partial fulfillment of the Ph.D. requirements. Rigid requirements for the number of 8xxx courses appropriate for Ph.D. programs have not been set; nonetheless, the Ph.D. represents the highest level of scholarly achievement and coursework should be selected accordingly.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 31
- This program does not require summer semesters for timely completion.
- Degree: Master of Computer Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in computer science offers coursework from across a broad spectrum of theoretical and applied computer science, combined with research opportunities in nearly all areas of the field. Faculty members advise students in such areas as algorithms and theoretical computer science; numerical, parallel, and high-performance computing; distributed computing and systems; artificial intelligence, robotics, and computer vision; databases and data mining; human-computer interaction and information systems; graphics and visualization; software engineering and programming languages; computer architecture and compilers; networking; bioinformatics and computational biology; and computer security. In addition, students may choose a course of study that integrates research in computer science with applications in other fields.

Computer science degrees include the M.C.S., a coursework-only degree that is intended to be a terminal degree.

The department also offers the M.S. (Plan A with thesis, Plan B with project, or coursework-only Plan C with coursework-based projects) and the Ph.D. In addition, the department supports a master of science in software engineering (M.S.S.E.) degree.

Faculty from the Department of Computer Science and Engineering also participate in a variety of other graduate programs, including BioInformatics and Computational Biology, Health Informatics, Cognitive Science, Scientific Computation, and Human Factors and Ergonomics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
The program requires all applicants to complete the department's online application as well as the University's online application. The names and email addresses of three recommenders are required; they will be asked to upload their letters of recommendation to the CS&E online application only. The department only accepts students for fall admission; the application deadline is April 1.

Special Application Requirements:
A degree in any major with a substantial background in computer science is required; a computer science major is preferred. Applicants with an inadequate background must resolve any deficiencies before applying to the program.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 31 major credits and 0 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.C.S. is a coursework-only degree requiring 31 credits of graduate work. At least 16 credits must be in computer science courses, including one course from each of the 3 breadth areas: theory, systems, and applications; and 1 credit of colloquium (CSCI 8970). At least 6 credits must be in computer science 8xxx-level courses. The remaining 15 course credits may be taken in the major field or any supporting field. Students must maintain a GPA above 3.00 after completing 8 credits.

Program Sub-plans

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

Rochester

University of Minnesota Rochester (UMR) offers the M.C.S. degree. Students may complete all degree requirements in Rochester by combining courses taught via streaming video using the UNITE (University-Industry Television for Education) instructional television system. Students are able to watch class live via the internet or pick up class on a special server at a later time.

Program Requirements

Plan A: Plan A requires 21 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 31 major credits and 0 credits outside the major. The final exam is oral.

Plan C: Plan C requires 31 major credits and 0 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

The M.S. requires a minimum of 31 credits and is offered under three plans. All plans require students to take one course from each of the 3 breadth areas in computer science: theory, systems, and applications; and 1 credit of colloquium (CSCI 8970). At least 3 credits must be in a computer science 8xxx-level course.

Plan A requires 13 credits in computer science coursework and 10 thesis credits. The remaining 8 credits may be taken in the major field or any supporting field.

Plan B and Plan C require 16 credits in computer science coursework. The remaining 15 credits may be taken in the major field or any supporting field.

Plan B requires 3 credits of the Plan B project course, CSCI 8760, which is in addition to the required 3 credit 8xxx-level CSCI course. The Plan B project is a significant project demonstrating the student's familiarity with the tools of research, the capability to work independently, and the ability to effectively relate their results to their committee.

Plan C is a coursework only degree. Students must take an additional 8xxx CSCI course and also complete a minimum of 100 hours of course-based project work, a written research report, and an oral presentation within CSCI courses taken for graduate credit.

Program Sub-plans

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

Rochester

University of Minnesota Rochester (UMR) offers the M.S. in computer science. Students may complete all degree requirements in Rochester via streaming video using the UNITE (University-Industry Television for Education) instructional television system. Students are able to watch class live via the internet or pick up class on a special server at a later time.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 13
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in computer science offers coursework from across a broad spectrum of theoretical and applied computer science, combined with research opportunities in nearly all areas of the field. Faculty members advise students in such areas as algorithms and theoretical computer science; numerical, parallel, and high-performance computing; distributed computing and systems; artificial intelligence, robotics, and computer vision; databases and data mining; human-computer interaction and information systems; graphics and visualization; software engineering and programming languages; computer architecture and compilers; networking; bioinformatics and computational biology; and computer security. In addition, students may choose a course of study that integrates research in computer science with applications in other fields.

Computer science degrees include the M.C.S., the M.S. (Plan A with thesis, Plan B with project, or coursework-only Plan C with coursework-based projects), and the Ph.D. The department also supports a master of science in software engineering (M.S.S.E.) degree.

Faculty from the Department of Computer Science and Engineering also participate in a variety of other graduate programs, including BioInformatics and Computational Biology, Health Informatics, Cognitive Science, Scientific Computation and Human Factors and Ergonomics.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minor in computer science for master's students majoring in other fields must include 9 credits of graduate courses in CSCI. The colloquium credit may not be included. There is a limit of one 4xxx course and a requirement of at least one 8xxx course or a 5xxx course that has a prerequisite of a 5xxx course. These courses must be taken on the A/F grading scale and a minimum GPA of 3.00 is expected.

A minor in computer science for Ph.D. students majoring in other fields must include 13 credits of graduate courses in CSCI, and should include the colloquium credit. There is a limit of one 4xxx course and a requirement of at least one 8xxx course or a 5xxx course that has a prerequisite of a 5xxx course. These courses must be taken on the A/F grading scale and a minimum GPA of 3.25 is expected.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 55
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in computer science offers coursework from across a broad spectrum of theoretical and applied computer science, combined with research opportunities in nearly all areas of the field. Faculty members advise students in such areas as algorithms and theoretical computer science; numerical, parallel, and high-performance computing; distributed computing and systems; artificial intelligence, robotics, and computer vision; databases and data mining; human-computer interaction and information systems; graphics and visualization; software engineering and programming languages; computer architecture and compilers; networking; bio-informatics and computational biology; and computer security. In addition, students may choose a course of study that integrates research in computer science with applications in other fields.

Computer science degrees include the Ph.D., as well as the M.C.S. (a terminal, coursework-only degree), and the M.S. (offered Plan A with a thesis, Plan B with project, or coursework-only Plan C with coursework-based projects). The department also supports a master of science in software engineering (M.S.S.E.) degree.

Faculty from the Department of Computer Science and Engineering also participate in a variety of other graduate programs, including BioInformatics and Computational Biology, Health Informatics, Cognitive Science, Scientific Computation and Human Factors and Ergonomics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.45.

A degree in any major with a substantial background in computer science is required; a computer science major is preferred.

Other requirements to be completed before admission:
The program requires all applicants to complete the department's online application, as well as the University's online application. The names and email addresses of three recommenders are required; they will be asked to upload their letters of recommendation to the CS&E online application only. Scores from the General (Aptitude) Test of the GRE are required for Ph.D. program applicants. Ph.D. students are accepted for fall admission only. The application deadline is April 1. Students seeking financial aid must apply by December 5.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of January 21, 2015
**Key to test abbreviations** (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

16 to 25 credits are required in the major.
6 to 15 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.45 is required for students to remain in good standing.

The Ph.D. requires a total of 55 credits consisting of 31 course credits and 24 thesis credits. Of the 31 course credits, 16 must be in computer science courses and at least 6 from outside the major. The 16 major credits must include five 3-credit courses that fulfill the breadth requirement in three different areas: theory, systems, and applications; plus 1 credit of colloquium (CSCI 8970). The remaining 9 credits may be taken as additional graduate-level courses, including as part of a designated minor.

Students are expected to complete all courses in their degree program with a GPA of at least 3.45.

All doctoral students must demonstrate background knowledge in computer science as explained in the program requirements at http://www.cs.umn.edu/academics/graduate/index.php

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 31
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.S. in Data Science program provides a strong foundation in the science of Big Data and its analysis by gathering in a single program the knowledge, expertise, and educational assets in data collection and management, data analytics, scalable data-driven pattern discovery, and the fundamental concepts behind these methods.

Students who graduate from this regular 2 year master's program will learn the state-of-the-art methods for treating Big Data, be exposed to the cutting edge methods and theory forming the basis for the next generation of Big Data technology, and will complete a project demonstrating that they can use the fundamental concepts to design innovative methods for new application areas arising from business, government, security, medicine, biology, physical sciences, and the environment.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree from an accredited college or university in computer science, math, statistics, engineering, natural sciences, or a related field.

Other requirements to be completed before admission:
The undergraduate degree must include multivariable calculus, linear algebra, and mathematical software environments such as Matlab or R or the equivalent. Also required is programming experience including basic algorithms and data structures normally taught in beginning computer science courses either as part of the undergraduate degree or subsequent work experience.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Part 1 (Composition) score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

**Plan B:** Plan B requires 31 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Students must complete a capstone project supervised by a faculty member.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The program requires a total of 31 credits consisting of 6 credits each from the three emphasis areas: statistics, algorithms, and infrastructure and large scale computing; 6 credits in approved electives; 1 credit of research colloquium; and 6 credits for the capstone project.

- Program Type: Master's  
- Requirements for this program are current for Fall 2014  
- Length of program in credits: 30  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The modern earth sciences are a remarkable synthesis of the physical and biological sciences. They are at the forefront of inquiry into and solutions of most of the major issues involving the global environment: climate, oceans, freshwater in all its forms, natural resources, and natural disasters. Like no other field, they integrate all the systems, from surface to great depth, from physics to chemistry to biology, and over all of geologic time and all geographic scales. The program includes the fields of structural geology, tectonics, petrology, hydrogeology, geomorphology, sedimentology, surface processes, geochemistry, biogeochemistry, biogeology, chemical oceanography, mineralogy, mineral and rock magnetism, rock and mineral physics, geodynamics, seismology, geostatistics, planetary geology, and geophysics and applied geophysics.

Students may accommodate other areas of interest such as engineering geology, environmental geology, materials science, soil science, and paleoecology by choosing a minor or supporting field from outside the program.

**Program Delivery**

This program is available:  
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

Other requirements to be completed before admission:  
Materials required for a complete application file include the student's statement of purpose, three letters of recommendation, transcripts, official GRE scores, and the Application for Admission. Applications are considered at any time; however, to be considered for financial aid, all materials must be submitted by January 8. Studies may begin in any semester or summer session, although fall semester is preferable. IMPORTANT: Refer to the Graduate Programs section of the department website (http://www.esci.umn.edu/programs/gradprospective) for a listing of all required application materials and preferred method of submission.

**Special Application Requirements:**

Most candidates for advanced degrees have completed a bachelor's degree in geology, geophysics, or the broad field of earth and material sciences. However, the department encourages applications from students in fields such as chemistry, physics, or biology.

At least one year each of study in calculus, chemistry, and physics is required. In general, an outstanding academic record is expected.

Applicants must submit their test score(s) from the following:  
- **GRE**

International applicants must submit score(s) from one of the following tests:  
- **TOEFL**  
  - Internet Based - Total Score: 79  
  - Internet Based - Writing Score: 21
Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 to 22 major credits and 8 to 16 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: Students must demonstrate familiarity with the tools of research or scholarship in their track, the ability to work independently, and the ability to present the results of their investigation effectively, by completing one or more projects, which may take the form of a research paper, presentation of research results, or completion of a faculty-supervised research experience. The Plan B project(s) should involve a minimum combined total of approximately 120 hours (the equivalent of three full-time weeks) of work.

Plan C: Plan C requires 14 to 21 major credits and 9 to 16 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

At the onset of studies, a coursework "compact" will be developed with the student, his/her adviser, and the graduate studies committee. The compact will be reviewed annually to assure timely progress and revise as needed.

For Plan A and Plan B, students must choose one of five tracks in the Earth Sciences program (Geology, Geophysics, Biogeology, Hydrogeology, or Earth Sciences). Tracks carry coursework requirements that are part of the student's course compact.

Plan A (thesis) requires 14 credits in the major, 6 outside the major, and 10 thesis credits. Plan B (project) requires a minimum of 14 credits in the major and a minimum of 8 credits outside the major. The remaining 8 credits can be taken in the major or in any supporting field.

Plan C is a coursework only option with an emphasis in hydrogeology and environmental science. A minimum of 14 credits are required in the major and a minimum of 9 credits outside the major. The remaining 7 credits can be taken in the major or in any supporting field.

All students must complete ESCI 8001 (Introductory Graduate Seminar), preferably in the first year.

With approval of the DGS, credits for ESCI 5093 (Directed Studies in Earth Sciences) may be applied to track requirements.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Biogeology

Biogeology represents a rapidly growing area at the intersection between Earth and the life sciences. It includes research in microbial evolution and biochemistry, microbe/mineral chemical interactions, the role of organisms in basic geological processes, the principles through which organisms or organic compounds can be used to reconstruct surface conditions, biogeochemical cycling, pollution control and remediation, the origin of life on Earth, and astrobiology. This is a broad field that is moving in new and exciting directions, and witnessing explosive growth in understanding the variety of ways biology mediates geology and vice versa. Many of the most basic earth surface processes are now seen as intimately biological with rates and pathways dictated by organic processes. Understanding...
the importance of these processes, quantifying them through time and place, and learning to utilize and/or control them will be major
components of earth Sciences research in the 21st century.

[ESCI 8402 - Biogeochemical Cycles in the Ocean (3 cr); ESCI 4801 - Geomicrobiology (3 cr)]

Earth Sciences
This generalist track exists for students whose curriculum and/or thesis (paper or project for M.S. Plan B) do not fit any of the other four
tacks. Because it is not specific to a discipline, there are no mandatory courses in the major apart from the introductory graduate
seminar, a minimum of 6 additional graduate-level credits in the major program, 12 supporting program credits or completion of all
requirements for a minor, and thesis credits. A curriculum specific to the student will be set through the compact process.

6-credit minimum; courses determined on an individual basis.

Geology
Geology uses field observation, laboratory work, analog and computer modeling, chemical and biological probes and assays to
understand Earth's coupled rock, water and biological systems, the underlying processes, and their history of interaction as evidenced
in the rock record.

6-credit minimum from any two of the following courses: ESCI 5302 - Isotope Geology; ESCI 5351 - Geochemical Modeling of Aqueous
Systems; ESCI 5353 - Electron Microprobe Theory and Practice; ESCI 5502 - Advanced Structural Geology; ESCI 5503 - Advanced
Petrology; ESCI 5601 - Advanced Sedimentology; ESCI 5602 - Depositional Mechanics; ESCI 5705 - Limnogeology and
Paleoenvironment.

Geophysics
Geophysics uses remote sensing probes (seismic waves, potential fields, etc.), laboratory simulation of deep earth conditions and
computer modeling of fluid and continuum mechanical dynamics to investigate the structure, composition, history and dynamics of solid
Earth and other planets.

6-credit minimum including ESCI 4211 - Solid Earth Geophysics I; plus at least one of the following courses: ESCI 4203 - Principles of
Geophysical Exploration; ESCI 8243 - Geomagnetism and Paleomagnetism; ESCI 4212 - Solid Earth Geophysics II; ESCI 5201 - Time-
Series Analysis of Geological Phenomena; ESCI 5203 - Rock and Mineral Physics; ESCI 5204 - Geostatistics and Inverse Theory.

Hydrogeology
Hydrogeology uses direct observation and remote sensing, computer modeling and laboratory simulation to constrain the interaction
of water and rock in Earth's shallow subsurface. Freshwater is Earth's most precious and increasingly overexploited resource.
Hydrogeology is a key discipline in the effective shepherding of this important reserve. This track establishes a baseline curriculum for
hydrogeology at the graduate level. The compact process will identify additional coursework appropriate to the student's prior training
and research directions.

6-credit minimum including ESCI 4702 - General Hydrogeology; plus at least one of the following courses: ESCI 5108 - Principles of
Environmental Geology; ESCI 5205 - Fluid Mechanics in Earth and Environmental Sciences; ESCI 5713 - Tracers and Karst
Hydrogeology; ESCI 5971 - Field Hydrogeology; ESCI 8712 - Transport Phenomena and Analytical Geohydrology; ESCI 8718 -
Numerical Methods in Hydrogeology.

This track establishes a baseline curriculum for hydrogeology at the graduate level. The compact process will identify additional coursework appropriate to the student's prior training and research directions.

6-credit minimum including ESCI 4702 - General Hydrogeology; plus at least one of the following courses: ESCI 5108 - Principles of Environmental Geology; ESCI 5205 - Fluid Mechanics in Earth and Environmental Sciences; ESCI 5713 - Tracers and Karst Hydrogeology; ESCI 5971 - Field Hydrogeology; ESCI 8712 - Transport Phenomena and Analytical Geohydrology; 8718 - Numerical Methods in Hydrogeology.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science in Electrical Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Electrical and Computer Engineering offers diverse educational programs that encompass nearly all aspects of modern electrical and computer engineering, ranging from the very theoretical system and information theory to highly experimental work in novel device research and microelectronics. Emphases in the major are solid state and physical electronics, surface physics, thin films, sputtering, noise and fluctuation phenomena, quantum electronics, plasma physics, automation, power systems and power electronics theory, wave propagation, communication systems and theory, optics, lasers, fiber optics, magnetism, semiconductor properties and devices, VLSI and WSI engineering in theory and practice, network theory, signal and image processing, and computer and systems engineering. Interdisciplinary work is also available in bioelectrical sciences, control sciences, computer sciences, solar energy, applications of systems theory to urban transportation and economic planning, and biological modeling.

Students are considered for admission beginning fall semester only (except for part-time students living in Minnesota who work in industry and who may apply for other terms). The deadline for applying for fall semester is December 1.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.40.

Other requirements to be completed before admission:
All documents must be submitted electronically. No documents should be mailed to the department or the Graduate Admissions Office.

Every applicant must submit the University of Minnesota application for graduate admission and the Electrical Engineering Department Application (this is part of the application for graduate admission).

The department requires three letters of recommendation. Letters of recommendation must be written on university stationery and include the recommender's signature. Recommenders will be emailed a link where they can submit their letters of recommendation electronically.

Every applicant must upload a resume to the online department application.

Every applicant must submit the General Test of the GRE (except University of Minnesota Bachelor of Electrical Engineering graduates who have a GPA of 3.40 or better). The GRE Subject Test is not required for admission.

Special Application Requirements:
Consideration is given to students who have completed another curriculum in engineering, science, physics, or mathematics that includes sufficient preparation to pursue a graduate program in electrical engineering. In some instances, additional preparatory studies may be required after admission.
M.S. students who want to continue on to the Ph.D. must pass the Ph.D. Preliminary Written Examination by the end of their second year in residence. Students have two chances to pass the exam. The Ph.D. Preliminary Written Examination is typically held in November and in April.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan C:** Plan C requires 18 to 24 major credits and 6 to 12 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The M.S. requires a minimum of 30 credits. Plan A requires 14 credits from EE courses 5xxx and above, 6 credits from related fields outside of the department but within CSE, and 10 thesis credits. Plan C requires 18 credits from EE courses 5xxx and above, 6 credits from related fields within CSE, and an additional 6 credits, which can be either major or related field credits.

Plan C students must satisfy a paper and a project requirement, which may be fulfilled either in approved EE coursework or by registering for the Plan C Project. Students choosing to pursue a minor must satisfy both EE and the outside minor department requirements. Courses that are cross-listed with EE must be counted for major field credit. Part-time students must choose Plan C; full-time students may choose either Plan A or Plan C. The student's Graduate Degree Plan, listing all courses to be included toward the degree, should be submitted no later than the end of the first year of the program. The department limits project, seminar, special investigation, directed study credits, and GRAD 0999 registrations.

Use of 4xxx courses toward program requirements is permitted, limited to 9 credits. 4xxx courses may not be counted toward the major field requirement. Only 4xxx credits from the approved list may be counted toward degree requirements.

All coursework must be taken A-F, unless only offered S-N, to be counted toward degree requirements.

A 5-year combined bachelor's/master's degree is available for select U of M undergraduates.

**Program Sub-plans**

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

**Rochester**

The University of Minnesota Rochester (UMR) offers the M.S. degree in electrical engineering. Students may complete all degree requirements in Rochester by combining courses taught by College of Science and Engineering faculty in person (face-to-face), or via
streaming video using the UNITE (University-Industry Television for Education) instructional television system. UNITE enables students to watch class live via the internet or pick up class on a special server at a later time.

Program Requirements

14 to 28 credits are required in the major.
12 to 26 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.30 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The Ph.D. degree requires a minimum of 40 course credits and 24 thesis credits. The program must include 14 credits of EE courses 5xxx and above and 12 credits from the supporting field outside of EE but within the College of Science and Engineering. The remaining 14 credits may be taken in the major field or in any supporting field within the College of Science and Engineering.

Ph.D. students who enter the department with a M.S. degree in Electrical Engineering must pass the Ph.D. Preliminary Written Examination by the end of their third semester in residence. Ph.D. students who enter with an M.S. in another field have until the end of their second year in residence to pass the exam. Students who enter with a bachelor’s degree have until the end of their second year in residence to pass the exam. Students have two chances to pass the exam. The exam is typically held in November and in April.

Students choosing to minor must satisfy both EE and the outside minor department requirements.

Courses that are cross-listed with EE must be counted for major field credit.

The department limits seminar, special investigation, and GRAD 0999 registrations.

Use of 4xxx courses toward program requirements is permitted, but limited to 9 credits. 4xxx courses may not be counted toward the major field requirement. Only 4xxx credits from the approved list may be counted toward degree requirements.

All coursework must be taken A-F unless only offered S-N to be counted toward degree requirements.

Ph.D. students may obtain a M.S. degree as part of their Ph.D. degree.

Environmental Restoration Engineering and Science Graduate Program, 122 Civil Engineering, 500 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-625-5522; fax: 612-626-7750)
Email: volle001@umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program is not yet admitting students.

The goal of the master of science in environmental restoration engineering and science is to produce graduates who will understand how to combine engineering with physical, biological, and social sciences in order to contribute to the process of prioritizing, designing, implementing, evaluating, and setting policy for environmental restoration projects. In short, the program aims to generate future leaders who will both succeed in practice and set the national agenda for restoring, maintaining, and sustaining the Earth-surface environment.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A baccalaureate degree in a field related to ecology, civil engineering, or environmental and earth sciences. Other degrees will be accepted based on relevant experience at the discretion of the DGS.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 16
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 30 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.
Capstone Project: Students complete the capstone project either by undertaking a field research internship offered as CE 8603 - Environmental Restoration Field Research for 6 credits, or by taking one additional course from the Restoration Methods and Practice
theme area and conducting an independent research course. In both routes, students will be required to document 100 hours of project-based work. Students will complement this work with a required 10-minute oral presentation on the required Restoration Practice and Tools course.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

Completion of the program requires a minimum of 30 credits. Three required core classes (Introduction to Stream Restoration, Ecological Restoration, and Stream Restoration Practice) account for 9 credits. An additional 15 credits are made up of approved electives chosen from four theme areas: Restoration Environmental Policy and Management; Restoration Physical Science and Engineering; Restoration Ecology, Biology, and Chemistry; and Restoration Methods and Practice. The remaining 6 credits are met by undertaking a field-based internship or additional coursework with a documented research/practice component.

The following courses are required:

CE 8601 (EEB 8601, ESCI 8601) - Introduction to Stream Restoration (3 cr)
HORT 5071 - Ecological Restoration (4 cr)
CE 8602 (EEB 8602, ESCI 8602) - Stream Restoration Practice (2 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 32
- This program does not require summer semesters for timely completion.
- Degree: Master of Financial Mathematics

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of financial mathematics degree program helps students understand the underlying mathematics of quantitative finance. The program offers a range of courses, from theoretical to practical, including a mathematical course on stochastic processes, a practitioner's course offering hands-on application of financial software tools, and a programming course focusing on C# and MATLAB.

Courses are offered in the evenings to accommodate working professionals. The program is designed with the possibility for full-time students to complete all requirements in one year.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree from an accredited U.S. university or foreign equivalent.

Other requirements to be completed before admission:
At least one year of college freshman calculus with a grade of B or better.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Internet Based - Speaking Score: 23

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 32 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.
A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The M.F.M. requires 32 credits, consisting of four year-long course sequences. Each sequence has a fall term course and a spring term course, which must be taken in sequence. All courses are 4 credits. The course sequences are: FM 5011/5012 - Mathematical Background for Finance; FM 5021/5022 - Mathematical Theory Applied to Finance; FM 5031/5032 - A Practitioner's Course in Finance; and FM 5091/5092 - Computation, Algorithms, and Coding in Finance. In addition to the 32 required credits, students who either do not have a strong mathematics background or who need a refresher may be asked to take FM 5001/5002 - Preparation for Financial Mathematics.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 14
- This program does not require summer semesters for timely completion.
- Degree: Fundamentals of Quantitative Finance PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postbaccalaureate certificate in fundamentals of quantitative finance (FQF) is a 14-credit certificate with four required courses. The certificate is good preparation for the master of financial mathematics (M.F.M.) degree program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree from an accredited U.S. university or foreign equivalent.

Other requirements to be completed before admission:
Applicants should have a good background in mathematics, but not necessarily at the level of mathematics major. In particular, all applicants must have taken at least three semesters of college calculus, covering two semesters of single variable calculus and an additional semester of either multivariable calculus or linear algebra.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Internet Based - Speaking Score: 23

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.
Students must complete the following four required courses for 14 credits:

FM 5001 - Preparation for Financial Mathematics I (3 cr)
FM 5002 - Preparation for Financial Mathematics II (3 cr)
FM 5091 - Computation, Algorithms, and Coding in Finance I (4 cr)
FM 5092 - Computation, Algorithms, and Coding in Finance II (4 cr)

Email: civesgs@umn.edu
Website: http://www.ce.umn.edu

Program Type: Master's
Requirements for this program are current for Fall 2014
Length of program in credits: 30
This program does not require summer semesters for timely completion.
Degree: Master of Geoengineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Emphases are in fundamental aspects of geomechanics and its applications. Research focuses on the use and development of discrete and continuum theories such as elasticity, plasticity, fracture mechanics, and poroelasticity for solving engineering problems. Numerical methods are being developed for obtaining solutions; experimental methods and novel apparatus are being developed for gathering physical evidence. Applications include processes of comminution, flow of granular materials, hydraulic fracturing, and nondestructive testing.

The master of geoengineering (M.GeoE.) degree is for the practicing engineer who would like to obtain an advanced degree enrolling part-time or full-time. Students who intend to proceed to the Ph.D. program, or who think they may later wish to be admitted to the Ph.D. program, should apply for the master of science program. Students are expected to follow a coherent program of coursework selected with the help of a faculty adviser and approved by the director of graduate studies. Students also must demonstrate professional competence by carrying out and defending a design project or by taking a coursework-related final oral exam (without a project).

The degree typically takes 2-3 semesters (12-18 months) to complete on a full-time basis or 6-8 semesters on a part-time basis. Students interested in pursuing doctoral studies should see the Ph.D. program in civil engineering.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

An ABET-accredited, four-year bachelor's degree in engineering is required for admission.

Other requirements to be completed before admission:
Applicants are required to submit results of the GRE in support of their applications. The TOEFL is required of foreign applicants from non-English-speaking countries. A TOEFL score of at least 550 (paper), 213 (computer), or 79 (Internet) is required for admission. Admission requirements also include three letters of recommendation and a statement of purpose that outlines the prospective student's research interests, reasons for pursuing graduate studies, and career plans after graduation. Students are admitted each semester, but applicants are encouraged to begin fall semester and to submit their applications by December 3 before the year their studies are expected to begin.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.GeoE. requires at least 30 credits and is offered under two plans. Plan A requires at least 20 course credits and preparation of a thesis/design project (10 cr). The thesis/design project must be carried out by the student in consultation with a faculty adviser. Plan C is a coursework-only degree program and requires at least 30 course credits.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Emphases are in fundamental aspects of geomechanics and its applications. Research focuses on the use and development of discrete and continuum theories such as elasticity, plasticity, fracture mechanics, and poroelasticity for solving engineering problems. Numerical methods are being developed for obtaining solutions; experimental methods and novel apparatus are being developed for gathering physical evidence. Applications include processes of communication, flow of granular materials, hydraulic fracturing, and nondestructive testing.

The master of science (M.S.) degree balances education in engineering fundamentals and design with research and development. It is designed for students wishing to pursue a career in industry or to continue toward a Ph.D. degree.

Students interested in pursuing doctoral studies should see the Ph.D. program in civil engineering.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in engineering, basic science, or mathematics is preferred.

Other requirements to be completed before admission:
Applicants are required to submit results of the GRE in support of their applications. A preferred TOEFL score of 550 (paper), 213 (computer), or 79 (Internet) is required of foreign applicants from non-English-speaking countries. Admission requirements also include three letters of recommendation and a statement of purpose that outlines the prospective student's research interests, reasons for pursuing graduate studies, and career plans after graduation. Students are admitted each semester, but applicants are strongly encouraged to submit their applications by December 3 in order to begin the following fall semester.

Special Application Requirements:
Admission depends primarily on the applicant's academic record and letters of recommendation. Applicants who lack geoengineering training are often required to complete at least one appropriate course from the undergraduate program. Graduate degree credit is not awarded for such preparatory work.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral.

Plan C: Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.S. requires at least 30 credits and is offered under three plans. Plan A emphasizes research and preparation of a thesis; Plan B emphasizes coursework and a project; Plan C is coursework only. The thesis is written on a research project carried out in consultation with a faculty adviser. Under Plan B, students complete one to three Plan B papers as determined by the faculty adviser. Plan B papers can include computer programs, annotated bibliographies, field investigations, and analysis/design of special engineering problems. Plan A requires at least 20 course credits and 10 thesis credits. Plan B requires a minimum of 30 credits, which includes at least 27 course credits, and may include a maximum of 3 credits of CE 8094 for the Plan B project. Plan C requires 30 course credits and must include at least 2 courses at the 8xxx-level. A program typically takes 18 to 24 months to complete.

- Program Type: Master’s
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 32
- This program does not require summer semesters for timely completion.
- Degree: Master of Science in Industrial & Systems Engr

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The industrial and systems engineering (ISyE) program offers coursework and research in industrial and systems engineering, operations research, and human factors. Special emphasis is on methodologies for design, planning, and management of service and manufacturing systems. Examples of research applications include logistics, transportation, healthcare delivery systems, revenue management, and supply chain management.

The Department of Industrial & Systems Engineering (ISyE) offers an MS degree with two tracks; the Industrial Engineering (IE) track and the Systems Engineering (SE) track, as well as a PhD degree. MS degree applicants must indicate which track they are applying for on the application form. Note that the admission requirements for the two tracks are different. In addition, the ISyE program also offers a dual MS in ISyE and Civil Engineering (Transportation Engineering focus).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A baccalaureate degree in engineering or a closely related field is required.

Other requirements to be completed before admission:
For applicants to the SE Track, at least two years of professional work experience in a technical field are required. Promising candidates with less experience will be considered under exceptional circumstances. Applicants must submit three letters of recommendation and a personal statement. In addition to the academic record, the professional record of the applicant and the letters of recommendation carry weight in admission decisions. A GRE score is not required.

Special Application Requirements:
All application materials should be submitted electronically through the ApplyYourself application system.

Applicants to the IE Track must submit a GRE score. Letters of recommendation are not required, but are highly recommended if you want to be considered for financial aid.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
The Master of Science in Industrial and Systems Engineering (M.S.I.Sy.E.) is offered with two tracks. The industrial engineering (IE) track has three options: Plan A (thesis), Plan B (project), or Plan C (coursework). Plans A and B require 30 credits and Plan C requires 32 credits. At least 14 course credits are required in the major if Plan A is chosen; and 16 course credits in the major if Plan B or Plan C is chosen. For all plans, at least 6 course credits in a minor or related field and at least 1 credit of graduate seminar must be included. The remaining credits may be taken in the major field or any supporting field.

The systems engineering (SE) track is a coursework-only option (Plan C) requiring 30 credits. It requires at least 17 course credits in the major field, and 6 course credits in a minor or related field. The remaining 7 credits may be taken in the major or in any supporting field.

All M.S.I.Sy.E. students must complete a zero-credit Research Ethics and Professional Conduct course offered by the Department of Mechanical Engineering.

Joint- or Dual-degree Coursework: Dual M.S. in ISyE and Civil Engineering (Transportation Engineering Focus): Student may take a total of 15 credits in common among the academic programs.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Industrial Engineering
Plan A (thesis) Option: Required courses include IE 5531, IE 8532, and one of the following courses--IE 5545, 5551, or 8541. Students may replace a required course with a qualifying replacement course if they have taken the equivalent of the required course elsewhere. A list of qualifying replacements is available on the ISyE program web page. Students must also take 10 thesis credits.

Plan B (non-thesis) Option: Required courses include IE 5531, IE 8532, and two of the following courses--IE 5545, 5551, or 8541. Students may replace a required course with a qualifying replacement course if they have taken the equivalent of the required course elsewhere. A list of qualifying replacements is available on the ISyE program web page. Students must either take the Plan B course IE 8951/8953, or complete one to three Plan B papers, determined in consultation with the adviser.

Plan C (coursework) Option: Required courses include IE 5531, IE 8532, and two of the following courses--IE 5545, 5551, or 8541. Students may replace a required course with a qualifying replacement course if they have taken the equivalent of the required course elsewhere. A list of qualifying replacements is available on the ISyE program web page.
Systems Engineering
Required courses are IE 5111, 5112, 5113, 5541, and 5553.

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A baccalaureate degree in engineering or a closely related field is required.

Special Application Requirements:
All application materials should be submitted electronically through the ApplyYourself application system. Students whose native language is not English are required to submit scores from one of the following English proficiency examinations: TOEFL, MELAB, or IELTS. The GRE General Test is required for students applying to the PhD program.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
32 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

At least 2 semesters must be completed before filing a Degree Program Form.

The Ph.D. degree requires at least 44 course credits, including at least 12 course credits in a minor field or supporting program, and at least 2 credits of graduate seminar; 24 thesis credits are also required. Required courses include IE 5531, IE 8532, and two of the following courses: IE5545, 5551, or 8541. Students may replace a required course with a qualifying replacement course if they have taken the equivalent of the required course elsewhere. A list of qualifying replacements is available on the ISyE program web page.

All Ph.D. students must complete a zero-credit Research Ethics and Professional Conduct course offered by the Department of Mechanical Engineering.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science in Infrastructure Sys Mgmt & Eng

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students are no longer being accepted into this program. Program requirements below are for current students only.

The master of science in infrastructure systems management and engineering (M.S.I.S.M.E.) focuses on developing management and engineering tools that address issues in local, county, and state infrastructure. It is an interdisciplinary program offered through the College of Science and Engineering's Technological Leadership Institute. The two-year, professional-format program focuses on key knowledge areas of engineering, technology, and science; management of personnel, projects, and programs; communications; governance; and synthesis. Fields of application include transportation engineering/pavement management; water resources/environmental engineering; municipal engineering; construction and maintenance; computer applications/asset management; parks, recreation and open space. The degree is offered in a hybrid online format, with in-person residencies scheduled over the course of the program.

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students are no longer being accepted into this program.

A B.S. degree in engineering, plus a minimum of one year of professional work experience in an infrastructure area, or a B.S. degree in a related science or technology field and a minimum of two years professional work experience in an infrastructure area are required.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The capstone integrates knowledge from courses in the master's program with job experience. Students will prepare a proposal, conduct the project and report the results in written and oral form. The project will involve some aspect of the design, management, and operation of some feature of infrastructure. Students must register for the capstone course ISME 8105(3 credits).

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

The M.S.I.S.M.E. requires 30 credits. In addition, students must complete a capstone project to address an on-the-job issue or problem.

Email: MOT@umn.edu
Website: http://www.tli.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Science in Management of Technology

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of science in the management of technology (M.S.MOT.) program is administered by the College of Sciences and Engineering's Technological Leadership Institute (TLI). The two-year, executive-format program integrates the fields of technology and management and provides working engineers and scientists with management knowledge and skills needed to assume a technical leadership role within their organizations. The program focuses on management in technology-based environments in traditional and emerging industries. The curriculum includes technical and advanced management courses, such as pivotal technologies, technology forecasting, project management, management of innovation, intellectual property management, and strategic management of technology. The core management curriculum includes areas such as finance, marketing, accounting, strategic planning and decision making, and conflict management. Students proceed through the program and advance as a cohort, taking a prescribed sequence of courses together. Case studies, class discussions, and study-group interaction stimulate the learning process. Students also participate in off-campus residencies, including an international residency; complete individual and team projects; and develop final projects as part of a capstone course. Most students receive corporate financial support.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in an engineering, science, or other technology-related field from an accredited program.

Other requirements to be completed before admission:
Applicants should have completed coursework (or show proficiency) in economics, mathematical modeling, statistics, and computer literacy.

Special Application Requirements:
At least 5 years of professional experience in the applicant's technical field. (In exceptional circumstances, promising candidates with less experience may be considered.) Applicants must submit three letters of recommendation, a resume, and a statement of purpose.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan B:** Plan B requires 36 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.  
**Capstone Project:** The capstone project consists of an independent, original investigation requiring between 110 and 130 hours of effort. Students use concepts and methods learned in the MOT program to research and develop an industry-based product, project, process, or venture. The capstone project enables students to directly apply their MOT education at work.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

The M.S.MOT. requires 36 credits. In addition to course requirements, students must complete an oral exam and a written report for the capstone project (MOT 8234).

- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The management of technology program is administered by the Technological Leadership Institute (TLI) in the College of Science and Engineering. The program integrates the fields of technology and management, to provide engineers and scientists preparing for a career in industry with the business knowledge and interpersonal skills needed to assume a leadership role within their organizations. The program focuses on leadership in technology-based environments in traditional and emerging industries. The curriculum includes the basics of business, such as finance, marketing, operations, managerial decision-making and strategic planning. It also covers technology forecasting, project management, new product management processes, leading innovation, intellectual property, and strategic management of technology. Each class will include exercises that inform students on those business topics, and give them an opportunity to practice the fundamental skills of communications, teamwork, and project management.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in an engineering, science, or other technology-related field from an accredited program.

Special Application Requirements:
Applicants for the minor must be enrolled in a graduate-level degree program at the University of Minnesota and have director of graduate studies approval.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The following courses are required for the minor: MOT 5001 Technological Business Fundamentals (2 credits) and MOT 5002 Creating Technological Innovation (2 credits). The remaining credits can be taken from the list of approved electives.

MOT minor courses cannot be counted towards the Master of Science in Management of Technology degree requirements.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Materials Science And Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Graduate courses offered by the Chemical Engineering and Materials Science (CEMS) Department cover core areas of materials science and engineering (structure and symmetry of materials; thermodynamics and kinetics; electronic, optical, and magnetic properties of materials; and mechanical properties of materials). In addition, several specialized topics are offered, including rheology, coating process fundamentals, process control, finite element methods of computer-aided analysis, ceramics, polymers, materials design and performance, materials processing, corrosion, contact and fracture properties of materials, electron microscopy, thin films and interfaces, composites, electrochemical engineering, solid state reaction kinetics, electronic structure of materials, organic semiconductors, electronic ceramics, dislocations and interfaces, epitaxial thin film growth, and the science of porous media.

The master of materials science and engineering (M.Mat.S.E.), also known as the professional master's, is designed for working professionals who are interested in obtaining a master's degree part time. This degree requires a design project. Part-time students may also choose the M.S.Mat.S.E. Plan C, which is coursework only.

The CEMS department focuses on the Ph.D. and does not generally admit students directly to the M.S.Mat.S.E. Plan A degree, which is a thesis based master's and is intended for current graduate students who choose not to seek a Ph.D.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in materials science or other related field.

Other requirements to be completed before admission:
The professional master's in engineering degree is designed for employees of local industries who wish to pursue their studies part-time. No financial support is available. Applicants should contact the program before applying for admission.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 560
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

All master's students must complete the four required core courses, MATS 8001, 8002, 8003, and 8004. In addition, master's students must complete a total of 30 credits, including 14 from the major program (this includes the 4 required courses), 6 from the minor or related program, and 10 thesis credits (for the M.Mat.S.E., thesis credits are used for the design project). Precise coursework plans are approved by the director of graduate studies. The minimum required GPA for completion is 2.80.

In addition to their coursework, M.Mat.S.E. students are required to complete a design project. This work-related design project consists of an in-depth study of an engineering design. It need not represent a publishable research project. While the amount of work should be the same as that required for an M.S. thesis, the project can contain elements that the thesis would not, such as economic considerations, design consultation, and social relevance. The written design report must be approved by a three-person faculty committee. The final exam consists of the written design report and an oral presentation to the faculty committee.

- Degree: Master of Science Materials Science And Engr

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The CEMS Department offers two types of master's degrees: the M.S.Mat.S.E. (Plan A or C) and the M.Mat.S.E. degree, also known as the professional master's. The M.S.Mat.S.E. Plan A degree is a thesis-based master's and is generally reserved only for current graduate students who choose not to seek a Ph.D. Working professionals who are interested in obtaining a master's degree part time should follow the requirements for the M.Mat.S.E. degree, which requires a design project, or the M.S.Mat.S.E. Plan C, which is coursework only.

Graduate courses offered by CEMS cover core areas of materials science and engineering (structure and symmetry of materials; thermodynamics and kinetics; electronic, optical, and magnetic properties of materials; and mechanical properties of materials). In addition, several specialized topics are offered, including rheology, coating process fundamentals, process control, finite element methods of computer-aided analysis, ceramics, polymers, materials design and performance, materials processing, corrosion, contact and fracture properties of materials, electron microscopy, thin films and interfaces, composites, electrochemical engineering, solid state reaction kinetics, electronic structure of materials, organic semiconductors, electronic ceramics, dislocations and interfaces, epitaxial thin film growth, and the science of porous media.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in materials science or other related field.

Special Application Requirements:
Note: With the exception of the professional master's degree (the M.Mat.S.E.) and the M.S.Mat.S.E. Plan C, the CEMS Department focuses on the Ph.D. and does not generally admit students directly to the M.S.Mat.S.E. Plan A degree.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 560
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan C:** Plan C requires 18 major credits and 12 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The M.S. Mat.S.E. is offered under Plan A (with thesis) or Plan C (coursework only); both require 30 credits.

All master's students must complete four required core courses: MATS 8001, 8002, 8003, and 8004. Plan A master's students complete 14 credits from the major program (this includes the 4 required courses), 6 from the minor or related program and 10 thesis credits. Plan C master's students complete 18 credits from the major program (this includes the 4 required courses) and 12 credits in one or more related fields.

Precise coursework plans are approved by the director of graduate studies. The minimum required GPA for completion is 2.80.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in materials science or other related field.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE, three letters of recommendation from persons familiar with their scholarship and research potential, a complete set of official transcripts, and a clearly written statement of career interests, goals, and objectives. International students are required to provide TOEFL results. Submission of all application materials by January 1 is strongly encouraged to ensure priority consideration for fellowships and assistantships; late applications are considered if space is available.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 560
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
21 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

All Ph.D. students must complete the four required core courses, MATS 8001, 8002, 8003, and 8004. In addition, Ph.D. students must complete a total of 57 credits, including 21 from the major program (this includes the 4 required courses), 12 from the minor or related program, and 24 thesis credits. Precise coursework plans are approved by the director of graduate studies. The minimum required GPA for completion is 3.00.

Website: http://www.math.umn.edu

• Program Type: Master's
• Requirements for this program are current for Fall 2014
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Mathematics offers a master of science (M.S.) in mathematics. Students may also earn the M.S. degree with emphasis in applied and industrial mathematics or with emphasis in mathematics education.

Special areas of research include ordinary and partial differential equations; probability; real, complex, harmonic, functional, and numerical analysis; differential and algebraic geometry; topology; number theory; commutative algebra; group theory; logic; combinatorics; mathematical physics; and applied and industrial mathematics, mathematical biology, and dynamical systems.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Undergraduate degree in mathematics or equivalent.

Other requirements to be completed before admission:
Applicants should have the prerequisite material of linear algebra, advanced calculus and differential equations, and should be ready for higher level courses in analysis and algebra. The GRE Math Subject test is strongly recommended.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 15 to 30 major credits and 0 to 15 credits outside the major. The final exam is oral.

This program may be completed with a minor.
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.S. is offered under Plan A and Plan B. Plan A requires 14 credits in Mathematics, including one sequence of two 8xxx-level courses in the student's concentration area, 6 credits outside the major, and 10 thesis credits.

Plan B allows more breadth; students complete at least 30 credits, half of which may be in a related area outside of Mathematics. Two sequences of year-long 8xxx-level courses, one in the student's concentration area, must be included.

- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Mathematics offers a minor for both the master's and the Ph.D.

Special areas of research include ordinary and partial differential equations; probability; real, complex, harmonic, functional, and numerical analysis; differential and algebraic geometry; topology; number theory; commutative algebra; group theory; logic; combinatorics; mathematical physics; and applied and industrial mathematics, mathematical biology, and dynamical systems.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The master's minor requires a minimum of 6 credits, consisting of two 5xxx or 8xxx level courses.

The Ph.D. minor requires a minimum of 12 credits, consisting of four 5xxx or 8xxx level courses.

Courses must be completed with a grade higher than B- to satisfy the requirements.
We recommend that you consult the director of graduate studies in Mathematics in advance for course approval.

• Program Type: Doctorate
• Requirements for this program are current for Fall 2014
• Length of program in credits: 60
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Mathematics offers a Ph.D. in mathematics, and a Ph.D. in mathematics with emphasis in applied and industrial mathematics.

Special areas of research include ordinary and partial differential equations; probability; real, complex, harmonic, functional, and numerical analysis; differential and algebraic geometry; topology; number theory; commutative algebra; group theory; logic; combinatorics; mathematical physics; and applied and industrial mathematics, mathematical biology, and dynamical systems.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Undergraduate degree in mathematics or equivalent.

Other requirements to be completed before admission:
Applicants should have the prerequisite material of abstract algebra and real analysis, and should be ready for graduate level courses in Mathematics. The GRE Math Subject test is strongly recommended.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Speaking Score: 23

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: French, German, Italian, or Russian
A minimum GPA of 3.00 is required for students to remain in good standing.

The Ph.D. requires 24 credits in mathematics core courses, 12 credits in a minor or supporting field, and 24 thesis credits. If a supporting program is chosen, it may consist partly or entirely of mathematics courses outside the student's major research area. Mathematics core courses can be passed by examination; however, students who test out are still required to complete 12 course credits in mathematics and 12 credits in a supporting program to earn a Ph.D.

The Ph.D. preliminary written examination, given twice each year, covers real analysis, complex analysis, algebra, and manifolds and topology. Students are expected to pass the exam by the end of their second year. After passing the exam and completing required coursework, students may take the preliminary oral exam, which they are expected to pass by the end of their fourth year.

Reading proficiency is required in one of the following: French, German, Italian, or Russian

- Degree: Master of Science in Mechanical Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Coursework and research for all graduate degrees are offered in bioengineering; biomechanics; combustion; computer-aided design; computer-aided manufacturing; computer graphics; control systems; design; energy conservation; environmental control; environmental engineering; fluid mechanics; heat and mass transfer; history of science and technology; human factors engineering; industrial engineering; innovative methodologies; integration of structural and environmental systems; lubrication; manufacturing engineering; particle technology; plasma chemistry; plasma heat transfer; power, propulsion, and applied thermodynamics; socioeconomic systems; solar energy; solar processing and thermochemistry; statistics; structures; systems dynamics; technology assessment; thermal energy storage; thermal environmental engineering; thermodynamics; transportation; tribology; vibration; and interdisciplinary finite element methodology. Additional instructional and research programs can be formulated.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- IELTS
  - Total Score: 6.5

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 major credits and 16 credits outside the major. The final exam is oral.

Plan C: Plan C requires 24 major credits and 6 credits outside the major. The is no final exam.
This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The M.S.M.E. requires at least 30 credits and is offered under three plans. Plan A (thesis) requires 14 credits in the major, 6 additional graduate level credits, and 10 thesis credits. Plan B (project) requires 14 credits in the major, 16 additional graduate level credits, plus completion of a project or 1-3 Plan B papers, determined in consultation with the adviser. Plan C (coursework) requires 24 credits in the major and 6 additional graduate level credits. All three plans require completion of 1-2 graduate seminar credits and one research and professional ethics course (3 credit max), which are included in the 30 credit total.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 34
- This program requires summer semesters for timely completion.
- No
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Master of Science in Medical Device Innovation (MDI) program is an interdisciplinary program administered by the College of Science and Engineering's Technological Leadership Institute (TLI). The program is comprised of courses in the core areas of Technology Innovation Management and Medical Technology Macro Environment, and enhanced with hands-on innovation experience through practicums at the Medical Device Center. Elective courses from the College of Science and Engineering and Carlson School of Management will further develop depth in technical and medical industry concentration areas. The 14-month program will specifically draw upon the fields of technology innovation, product development, project management, business management, life-cycle management, intellectual property, regulatory affairs, clinical needs, entrepreneurship, human factors, emerging trends, globalization, reimbursement, and public policy to teach and investigate medical devices and the rapidly growing global medical technology industry. This program will provide students with a systemic understanding of end-to-end medical device innovation dynamics that includes but goes well beyond the traditional technology focus.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in a related field, such as biological or physical sciences, engineering, computer science, mathematics, or statistics.

Other requirements to be completed before admission:
Applicants must have undergraduate degree in science and engineering, with at least 2-5 years of work experience.

Minimum requirements include one year of calculus, probability/statistics, and two science or engineering courses.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language.
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan B:** Plan B requires 25 major credits and 9 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** The capstone project is an independent, original, and applied investigation on a relevant subject, problem or issue in the area of Medical Device Development. An integrative applied project to provide students the opportunity to expand their ability to enact the knowledge and technical learning acquired in the courses leading up to the capstone. The capstone integrative experience and the material in other MDI courses, taken together, will provide students with the motivation and skills to perform their professional roles in new ways, ways that will initiate and sustain change even at the level of the broader institutional context of governance in which they must function. The culmination of the program will be submission of a capstone project.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

All students will be required to complete 34 credits consisting of 11 credits in TLI designed Technology Innovation Management courses, 6 credits in the Medical Device Innovation Practicum, 6 credits in Medical Technology Macro Environments, 2 credits through the Capstone course and project, and 9 credits in Medical-Technical subject-specific electives outside the major field.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Integrative Graduate Education and Research Traineeship Program offers a minor in nanoparticle science and engineering for M.S. and Ph.D. students. The curriculum is designed to allow completion of the minor without an increase in overall course load. The minor requires one or two core courses and electives relevant to nanoparticle research. The program of courses is tailored in advance consultation between the student and director of graduate studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission to a master's or doctoral degree-granting program in the College of Science and Engineering and preparation of a minor program of coursework approved by the director of graduate studies is required. Students in programs outside the College of Science and Engineering must be approved by the director of graduate studies.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

M.S. students must complete NPSE 8001 - Introduction to Nanoparticle Science and Engineering (3 cr) and 3 elective credits. Ph.D. students must complete NPSE 8001 and 8002 - Nanoparticle Science and Engineering Laboratory (3 cr) and 6 elective credits.

Electives must be chosen from existing courses relevant to nanoparticle research. Examples include CHEM 8021 - Computational Chemistry, EE 5624 - Optical Electronics, ME 8361 - Introduction to Plasma Technology, PHYS 5701 - Solid State Physics for Engineers and Scientists, CHEN 8301 - Physical Rate Processes I: Transport, and MATS 8212 - Solid State Reaction Kinetics.

Contact Information:
Graduate Minor in Neuroengineering, 7-105 Nils Hasselmo Hall, 312 Church Street S.E., Minneapolis, MN 55455 (612-624-8396; fax 612-626-6583)
Email: igert-ne@umn.edu
Website: http://neuroengineering.umn.edu/

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Graduate Minor in Neuroengineering (NE) is motivated by the notion that future breakthroughs in this rapidly-growing area of research will be made by engineers who understand the fundamental issues and principles of neuroscience that occur during neural interventions, and by neuroscientists who are truly competent in engineering concepts and tools. The minor trains doctoral students to develop the skills to revolutionize technologies for interfacing with the brain and to advance our understanding of the neuroscience processes that arise when we interface with and modulate the brain.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Enrollment in the Neuroengineering Minor is open to all currently enrolled Ph.D. students who have the necessary science background to complete the coursework and who are in good standing in their major program.

Special Application Requirements:
Ph.D. students majoring in programs other than Biomedical Engineering, Electrical Engineering, Mechanical Engineering, and Neuroscience must have approval from the Neuroengineering Director of Graduate Studies (DGS) to participate in the minor program. Students will declare the minor by including it on the Graduate Degree Plan, following consultation with the DGS.

Students must officially declare the minor before taking the Oral Preliminary Examination (OPE).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The minor course selection must be approved by the Neuroengineering Director of Graduate Studies (DGS) who can be found here:
http://neuroengineering.umn.edu/faculty.html.

For any course listed in multiple categories, students must choose which requirement that course will fulfill. A single course cannot be counted simultaneously toward multiple categories.

Students may not use any of their minor courses to satisfy the core course requirements for their major program (i.e., a Neuroscience student cannot count NSCI 5101 as both a Neuroengineering Minor course and a core Neuroscience course).

Introduction Course
Take 1 or more course(s) from the following:
- BMEN 5411 - Neural Engineering (3.0 cr)
- NSCI 5101 - Introduction to Neuroscience for Graduate Students (3.0 cr)
- NSC 5561 - Systems Neuroscience (4.0 cr)

**Neuroengineering Core Courses**
At least one course from the following must be taken: BMEN 5412, BMEN 5413.
Take 2 or more course(s) from the following:
- BMEN 5411 - Neural Engineering (3.0 cr)
- BMEN 5412 - Neuromodulation (3.0 cr)
- BMEN 5413 - Neural Decoding and Interfacing (3.0 cr)
- BMEN 8335 - Neuroengineering Practicum (3.0 cr)

**Elective Course**
One additional course from either an engineering or neuroscience discipline. The following is not an exhaustive list but merely a representative sample of courses that would be appropriate to satisfy this requirement. Additional courses may be approved as electives by the Neuroengineering DGS.
Take 1 or more course(s) from the following:
- BMEN 5411 - Neural Engineering (3.0 cr)
- BMEN 5412 - Neuromodulation (3.0 cr)
- BMEN 5413 - Neural Decoding and Interfacing (3.0 cr)
- BMEN 8335 - Neuroengineering Practicum (3.0 cr)
- EE 5231 - Linear Systems and Optimal Control (3.0 cr)
- EE 5239 - Introduction to Nonlinear Optimization (3.0 cr)
- EE 5542 - Adaptive Digital Signal Processing (3.0 cr)
- ME 5281 - Analog and Digital Control (4.0 cr)
- ME 5286 - Robotics (4.0 cr)
- NSC 5202 - Theoretical Neuroscience: Systems and Information Processing (3.0 cr)
- NSC 8217 - Systems and Computational Neuroscience (2.0 cr)

Email: grad@physics.umn.edu
Website: http://www.physics.umn.edu/grad

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students applying for a terminal M.S. degree are not admitted, unless they arrange for their own financial support. Students admitted to the Ph.D. program are automatically eligible for the M.S. program.

Physics is the study of the fundamental structure and interactions of matter. Research areas in the program include experimental and theoretical studies in astrophysics and cosmology, biological physics, condensed matter physics, elementary particle physics, nuclear physics, space and planetary physics, and physics education research. Interdisciplinary study is also available with the programs in astrophysics, biological sciences, chemistry, chemical engineering and materials science, electrical and computer engineering, mechanical engineering, and the history of science and technology.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
Upper-division courses in the core areas of classical mechanics, electricity and magnetism, quantum mechanics, and statistical and thermal physics are required. It is advisable to have taken an upper-division course in experimental methods in physics.

Special Application Requirements:
Students admitted to the Ph.D. program are automatically eligible for the M.S. program. Students applying for a terminal M.S. degree are not admitted unless they arrange for their own financial support.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 major credits and 0 credits outside the major. The final exam is oral. A capstone project is required.  

**Capstone Project:** The Plan B project is a self-contained research problem performed in conjunction with the student's adviser. Students register for 4 credits of Physics 8500: Plan B Project, which count toward the program requirement of 30 credits. The project is described in a written paper. Examples of Plan B projects include carrying out a specific calculation, writing and documenting a computer program, analyzing a set of experimental data, designing and/or constructing experimental instrumentation, and designing and/or constructing an undergraduate laboratory experiment. The alternative to the Plan B project is writing 1-3 Plan B papers. The Plan B papers are related to three courses that the student has taken and do not require original research. It's expected that completion of either the project or the Plan B papers require a nominal three weeks of full-time effort.

**Plan C:** Plan C requires 30 major credits and 0 credits outside the major. The is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

At least 2 semesters must be completed before filing a Degree Program Form.

All courses must be at the 4xxx, 5xxx or 8xxx level. Physics 4001, 4002, 4101, 4201, and 4303 cannot be used to satisfy the requirements.

A minimum GPA of 2.80 is required for Plans A and B and a minimum GPA of 3.30 is required for Plan C for students to remain in good standing.

The M.S. requires a minimum of 30 credits and is offered under three plans. Plan A (thesis) requires 20 course credits and 10 thesis credits. Plan B (project) requires 30 course credits plus completion of a project or 1-3 Plan B papers. For both Plan A and Plan B, Physics 5001/2 or Physics 5011/12 must be included in the degree coursework.

Plan C requires 30 course credits including completion of Physics 5001/2, 5011/12, and 5201. Students in the Plan C program must also pass the Physics Graduate Written Exam and maintain a 3.30 GPA.

Interdisciplinary study is also available with the programs in astrophysics, biological sciences, chemistry, chemical engineering and materials science, electrical and computer engineering, mechanical engineering, and the history of science and technology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
A physics minor requires a background in differential and integral calculus and one year of calculus-level college physics.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

For the master's minor, students must complete a minimum of 6 credits in physics including either Physics 5001 or 5011.

For the doctoral minor, students must complete a minimum of 12 credits in physics, including either the classical physics sequence (PHYS 5011-5012) or the quantum mechanics sequence (PHYS 5001-5002).

Use of certain 4xxx courses toward degree requirements is permitted under certain conditions with director of graduate studies approval. Physics 4001, 4002, 4101, 4201, and 4303 cannot be used to satisfy the requirements.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
Teaching assistantships and a few fellowships are available upon admittance to the School of Physics and Astronomy.

Applicants are required to submit three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of transcripts; and a clearly written statement of career interests, goals, and objectives. Submission of GRE scores is strongly recommended. Fall semester entry is strongly recommended for all students. Application by December 15 is strongly encouraged to ensure priority consideration for fellowships awarded for the next academic year.

Special Application Requirements:
Courses at the upper division level in the core areas of classical mechanics, electricity and magnetism, quantum mechanics, and statistical and thermal physics are required. It is advisable to have taken an upper division course in experimental methods in physics.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 55
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

40 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.30 is required for students to remain in good standing.

All courses must be at the 4xxx, 5xxx or 8xxx level. Physics 4001, 4002, 4101, 4201, and 4303 cannot be used to satisfy the requirements.

The Ph.D. requires 40 course credits including classical physics (PHYS 5011-5012), quantum mechanics (PHYS 5001-5002), thermal and statistical physics (PHYS 5201) and two semesters of seminar, plus 24 thesis credits.

Required Orientation: During the two weeks before the beginning of fall semester, new graduate students are expected to participate in the department orientation program. This includes TA orientation sessions, which are required if a student's financial support comes from TA assignments.

Requirement for International Students: International students who want to teach as TAs must take CSE TALK, a workshop on American teaching culture and language skills, prior to the department orientation described above and achieve an ELP (English Language Proficiency) rating of 1. This includes passing an English test, which is given in late July and August. Students who do not achieve an ELP of 1 must take an English training course geared to their level of skills, such as GRAD 5105, GRAD 5102, or Foundations. These courses are given during the academic year and are required until the student achieves an ELP of 1.

Contact Information:
Director of Graduate Studies, Quaternary Paleoecology Graduate Program, University of Minnesota, 108 Pillsbury Hall, 310 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-624-7881; fax: 612-625-3819)
Email: qpminor@umn.edu
Website: http://lrc.geo.umn.edu/qpminor/index.html

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The faculty of the graduate minor in quaternary paleoecology (QP) hold appointments in several departments. Students in this unique program benefit from the broad range of expertise and experience available at a large research university. From their coursework in the minor, graduate students learn techniques and approaches from other areas that can be applied to their own research.

The minor is available to master's (M.A. and M.S.) and doctoral students.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Students must be enrolled in a graduate program (Master's or Ph.D.) at the University of Minnesota.

Special Application Requirements:
Students apply by sending a letter of application to the director of graduate studies (qpminor@umn.edu) as well as a letter of endorsement from their major adviser. Application may be made at any time.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Students develop their curricula in consultation with their major advisers and the director of graduate studies in the quaternary paleoecology program. Students choose courses from relevant fields outside their major field. A list of courses that fulfill the QP requirement can be obtained from the program web page (updated periodically). Master's students must take a total of 6 credits. Ph.D. students take a total of 12 credits (one course may be in the major field). Some requirements may be waived depending on the student's background.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

The program is offered under Plan A (thesis), which includes a minimum of 20 course credits and 10 thesis credits. The course credits must include at least 6 credits from the scientific computation core and at least 6 credits in a minor. Only 3 credits from courses offered in a student's minor may be counted toward the core requirements in scientific computation. A course listed in both the core requirements of scientific computation and a student's minor may not be counted under both.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 32
- This program requires summer semesters for timely completion.
- Degree: Master of Science in Security Technologies

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of science in security technologies (M.S.S.T.) shapes tomorrow's analytical and risk management policymakers and innovators through a multi-disciplinary graduate program developed in response to growing demand in many levels of industry and government. During the 14-month program and through a multidisciplinary systems approach, the program synthesizes core learning in four areas: security methods and foundations; application expertise (including cyber, bio, food, infrastructure, global supply chains); systems science (interdependency among critical networks, components, human capital, organizational dimensions); and social and policy dimensions. Through elective courses, students also choose a learning track in either security systems technologies or security risk management. Students can further specialize through a range of elective courses. This program bridges disciplines to address local, regional, national, and global areas of need, seeding innovative capabilities while enabling interdisciplinary connections through direct links to industry, business, and government partners.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in a related field, e.g. in biological or physical sciences, engineering, computer science, mathematics, statistics, social sciences, or public policy.

Other requirements to be completed before admission:
Minimum requirements include one year of calculus, probability/statistics, and two science or engineering courses.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan B: Plan B requires 25 major credits and 7 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The Plan B project is an independent applied investigation on a relevant issue in security technologies or homeland security. Students must register for the capstone course ST 8620 (2 credits).

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

The M.S.S.T. program requires 32 credits in the fields of systems risk analysis, engineering (hardware and software), emerging technologies, economics, human factors, law, food and bio safety, and public policy to teach and investigate security technologies and address pertinent issues. The 32 credits consist of 25 credits in MSST core courses, including 2 credits for the capstone course, and 7 credits in electives outside the major.

The curriculum comprises a balance of courses from the following core areas:

* Foundations of security science and technology, methods, and algorithms
* Application areas, including critical infrastructures (e.g., communications/IT/cyber, power/energy, water, and transportation; food/infectious diseases, financial networks, supply chain management, etc.)
* Coupled dynamic systems infrastructure interdependencies and dynamics of coupled infrastructures, system-wide risk/threat management, and complex interactive networks (including finance and economics, policy and regulation)
* Management and leadership development (including communication skills, change management, ethics, project management, and conflict management)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 7
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Security Technologies Graduate Program shapes tomorrow’s analytical and risk management policymakers and innovators through a multi-disciplinary graduate program developed in response to growing demand in many levels of industry and government. Through a multidisciplinary systems approach, the program synthesizes core learning in four areas: security methods and foundations; application expertise (including cyber, bio, food, infrastructure, global supply chains); systems science (interdependency among critical networks, components, human capital, organizational dimensions); and social and policy dimensions. Through elective courses, students choose a learning track in either security systems technologies or security risk management. Students can further specialize through a range of elective courses. This program bridges disciplines to address local, regional, national, and global areas of need, seeding innovative capabilities while enabling interdisciplinary connections through direct links to industry, business, and government partners.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants for the M.S. minor must be enrolled in a master's degree program at the University of Minnesota and must be interviewed for admission (in person or by telephone) by the DGS or designate, except in rare circumstances where this requirement may be waived.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science in Software Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of science in software engineering (M.S.S.E.) program provides a thorough understanding of the fundamental issues related to software development and the software development process. It fosters an awareness of the problems and opportunities associated with software-intensive systems and explains the methods for quickly evaluating, adopting, and taking advantage of emerging technologies. This program introduces emerging technologies and their applications and lays the foundation for lifelong learning and professional development in a rapidly changing field. The M.S.S.E. program is an interdisciplinary program administered by the College of Science and Engineering's Department of Computer Science and Engineering.

The program is offered in a format designed for full-time working professionals. Students take courses one day per week (alternating Fridays and Saturdays) and move through the curriculum as a cohort, taking all classes together for four semesters.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Prospective students should have an undergraduate degree in computer science or a closely related field and a minimum of one year of professional experience working in the software industry. Students with degrees in other fields may be considered for admission based on extensive industrial experience.

Special Application Requirements:
Because the M.S.S.E. program is designed for full-time working professionals, international applicants must hold an H-1B visa.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.S.S.E. requires 30 credits. Students take eight core courses, two industrial seminar courses and two elective courses. The project requirement can be met by a combination of class projects, or by an independent project elective.
Twin Cities Campus
Stream Restoration Science and Engineering Postbaccalaureate Certificate
CSENG Civil, Envrn & Geo-Eng (CEGE)
College of Science and Engineering

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 16
- This program does not require summer semesters for timely completion.
- Degree: Stream Rest. Science & Engineering PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postbaccalaureate certificate in stream restoration science and engineering is a three-semester program producing graduates who understand how to blend engineering, physical, biological, and social sciences in prioritizing, designing, implementing, and evaluating stream restoration projects. Two courses, including an introduction to stream restoration and a restoration design experience are required. The remaining courses are chosen from a specified list of relevant courses taught across a number of University departments.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must have a bachelor's degree in a related field from an accredited postsecondary U.S. institution or its foreign equivalent.

Other requirements to be completed before admission:
In addition to the University's online application form, students must submit a program application and one letter of reference. The SRSE program application form and directions for submission can be found at http://nced.umn.edu/apply-certificate-program-stream-restoration

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required core courses:

ESCI/CE/EEB 8601 - Introduction to Stream Restoration (3 cr, offered alternative fall terms) covers key background topics and skills involved in stream restoration.

ESCI/CE/EEB 8602 - Stream Restoration Practice (2 cr, offered alternative fall terms) is a course in which students participate in a stream restoration design experience.

Students obtaining a degree in either earth sciences; civil engineering; or ecology, evolution and behavior should register for these courses under a designator other than their major field. In addition to core courses, students are required to take a minimum of 11 elective credits from four theme areas: river and floodplain science and engineering (3 to 8 cr); river and floodplain ecology (up to 8 cr); water quality (up to 8 cr); water policy and management (up to 4 cr). A full listing of approved electives can be found on the web page http://www.nced.umn.edu/srcp.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 15
- This program does not require summer semesters for timely completion.
- Degree: Advanced Dental Therapy P'Bacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Advanced Dental Therapy certificate is designed for dental therapists who have completed a baccalaureate or master degree in dental therapy from the University of Minnesota, School of Dentistry between the years 2011 and 2014. It focuses on acquiring the knowledge and skills mandated by the Minnesota Board of Dentistry to become eligible for advanced dental therapy certification.

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
Bachelor Degree of Dental Therapy from the University of Minnesota.

Master Degree of Dental Therapy from the University of Minnesota.

Other requirements to be completed before admission:
Completion of a Bachelor of Science in Dental Therapy degree or Master of Dental Therapy degree at the University of Minnesota, School of Dentistry between 2011 thru 2014. Holds current credentials of Licensed Dental Therapist in the state of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The ADT Post-baccalaureate Certificate will be awarded after the completion of the specified 15 master's level credits, which include five didactic-based credits and 10 clinical-based credits. Students are required to maintain a minimum GPA of 3.00 and to achieve no less than a C grade in each course. Students must enroll in the Advance Dental Therapy Post-baccalaureate Certificate within five years following the completion of their dental therapy degree and must complete the course and clinic requirements within five years of enrollment.
Course Group 0
Didactic Courses
Take 3 or more course(s) totaling 5 or more credit(s) from the following:
- DT 6162 - Principles of Exodontia and Minor Oral Surgery (1.0 cr)
- DT 6321 - Treatment Planning (2.0 cr)
- DT 6341 - Advanced Dental Therapy Prep Lecture (2.0 cr)

Course Group 1
Clinical
DT 6340 - Advanced Dental Therapy Prep Clinic (10.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 35 to 39
- This program requires summer semesters for timely completion.
- Degree: Master of Science Dental Hygiene

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Master of Science in Dental Hygiene Program prepares leaders in the profession for practice, research, the healthcare industry, and academia.

The curriculum provides meaningful academic experiences for each graduate student based on his/her career goals and interest. Courses in the management track will provide students with knowledge and skills necessary for careers in the healthcare industry such as sales, marketing and professional relations management, management of large dental clinics, practice management consulting, and entrepreneurship.

Courses in the education track will provide students with the knowledge and skills to teach didactic, clinic, and laboratory courses in dental hygiene programs; conduct research; and assume administrative positions.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Baccalaureate or Associate degree in dental hygiene required from an accredited U.S. institution or foreign equivalent dental hygiene program.

Other requirements to be completed before admission:
Dental hygiene license; CPR certification; undergraduate statistics course

Special Application Requirements:
Applicants must submit directly to the Admissions Committee a typed essay including short and long term goals and an explanation of why an advanced degree is of interest, a current resume including evidence of leadership and dental hygiene clinic experience, and three letters of reference. Application deadline is March 1.

Applicants pursuing the management track must submit their GMAT score.

Applicants must submit their test score(s) from the following:
- GMAT
  - Total score: 500

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 94
  - Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS - Total Score: 6.5
- MELAB - Final score: 80
- Speaking test score: 0

Key to test abbreviations (GMAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 25 to 26 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan C: Plan C requires 39 major credits and up to null credits outside the major. There is no final exam. A capstone project is required. Capstone Project: Internship Capstone project based on internship experiences.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students in both the management and dental hygiene education tracks will participate in the following five core courses: instructional strategies, research methods in health sciences, administrative leadership and professional development, statistics and grantwriting.

In addition to the core courses, management track students will complete the following courses: financial accounting, marketing management, operations management and electives chosen from the MBA and Medical Industry Leadership Institute (MILI) curricula.

Dental hygiene education track students will participate in the following courses: the discipline of dental hygiene, curriculum and course development, dental hygiene supervised clinical teaching, dental hygiene clinic administration, web-based teaching/learning strategies, principles of educational and psychological measurement and dental hygiene supervised didactic teaching.

MSDH students pursuing the Plan A option must complete a thesis. Plan C students must complete an internship and Capstone project.

MSDH Core Curriculum

DH 5401 - Research Methods in Health Sciences (2.0 cr)
DH 5407 - Instructional Strategies for Effective Teaching (2.0 cr)
DH 5411 - Administrative Leadership and Professional Development (1.0 cr)
DH 5421 - Grant Writing for Health Professionals (1.0 cr)

Statistics

PUBH 6414 - Biostatistical Literacy (3.0 cr)
or EPSY 5261 - Introductory Statistical Methods (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Dental Hygiene Education

This sub-plan is limited to students completing the program under Plan A.

Courses in the dental hygiene education track provide students with the knowledge and skills to teach didactic, clinic, and laboratory courses in dental hygiene programs; conduct research; and assume administrative positions.

Education Track Curriculum
Management
This sub-plan is limited to students completing the program under Plan A or Plan C.

Courses in the management track provide students with the knowledge and skills necessary for healthcare industry careers such as sales, marketing and professional relations management, management of large dental clinics, practice management consulting, and entrepreneurship.

Management Track Curriculum
MBA 6030 - Financial Accounting (3.0 cr)
MBA 6210 - Marketing Management (3.0 cr)
MBA 6220 - Operations Management (3.0 cr)

Plan A Choice
DH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

or Plan C Choice
DH 5201 - Management Internship (5.0 cr)
DH 5203 - Capstone Project (3.0 cr)

MBA Electives
Plan A chooses 8 electives; Plan C chooses 13 elective credits. Not inclusive list.
Take 8 - 13 credit(s) from the following:
• ENTR 6020 - Business Formation (4.0 cr)
• HRIR 6301 - Staffing, Training, and Development (4.0 cr)
• MBA 6300 - Strategic Management (3.0 cr)
• MILI 6235 - Pharmaceutical Industry: Business and Policy (2.0 cr)
• MILI 6562 - Information Technology in Health Care (2.0 cr)
• MKTG 6051 - Marketing Research (4.0 cr)
Twin Cities Campus

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.S. program in dentistry prepares dentists with clinical expertise for positions of leadership in education, research, and program administration in the oral health field. A multidisciplinary faculty of dental educators, researchers, and clinicians teach the program, which is housed in the School of Dentistry. All students complete core coursework in teaching and evaluation of dentistry, research methods, and health care administration. Additional advanced coursework is offered in these same focus areas, as well as in selected clinical and oral science topics with multidisciplinary impact, including conscious sedation, craniofacial pain, geriatrics, oral biology, oral medicine and radiology, oral pathology, practice administration, and psychology. Students have flexibility in planning individualized programs to accommodate their specific areas of interest, and courses from other disciplines may be included for credit in the major area.

Students enrolled in an advanced clinical dental training program may be admitted to the dentistry graduate program for concurrent study, but must carefully plan their curriculum with their faculty adviser and the director of graduate studies so that their residency and M.S. programs are appropriately integrated and satisfy University registration requirements. Programs in the School of Dentistry that may enroll students for the M.S. degree include endodontics, orthodontics, pediatric dentistry, periodontics, and prosthodontics and TMJ disorders/orofacial pain.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

DDS/DMD or equivalent from accredited US institution or recognized foreign school. Clinical residency enrollment and 3.0 GPA or rank in top quarter of graduating professional school class preferred.

Other requirements to be completed before admission:
Applicants must submit three letters of recommendation from individuals familiar with their academic capabilities. Also required is a brief essay (under 500 words) which relates the applicant's career goals to the goals of the program. Applications are received and reviewed throughout the year. Students may enter the program in any semester at the discretion of program faculty.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 80
  - Paper Based - Total Score: 600

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students pursuing either Plan A or Plan B must complete a minimum of 14 credits in the major, including four core courses in teaching and evaluation in dentistry, basic research methodology, introductory biostatistics, and fundamentals of health care administration. Courses from other disciplines may also be taken for credit in the major with the approval of the student's adviser and the director of graduate studies. All students must complete at least 6 credits outside the major field (either as a minor or related field credits), as well as program requirements for training in the Responsible Conduct of Research.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The interdisciplinary Oral Biology Program is offered by the School of Dentistry with cooperating faculty in the Medical School, College of Pharmacy, and Veterinary Medicine. It gives students research skills and a broad understanding of the development, structure, function, and pathology of the orofacial region. Students are encouraged to focus in one of five areas of emphasis: biomaterials and biomechanics; epithelial biology and carcinogenesis; microbiology and immunology; sensory neuroscience; and bone biology, craniofacial development, and tissue engineering. An exceptional student can create his/her own area of emphasis or specialize in topics not listed here; students should discuss their interests with the director of graduate studies before applying. Curricula are designed to allow considerable flexibility in planning individual programs to accommodate specific areas of interest; courses from other disciplines may be included as part of the major.

Program Delivery

- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The M.S. in oral biology is intended for individuals who are currently involved in a research laboratory or program and are seeking to increase their scientific perspectives. This program generally requires a minimum of two years and a total of 30 credits. Students must complete the Plan A (with thesis) program, which requires a minimum of 14 credits in the major, including 4 credits of oral biology topics courses (8021-8028). Courses in the major may be taken from other disciplines with the approval of the adviser and the director of graduate studies. Registration and participation in the oral biology student seminar series (8030) is required each semester. Students must also complete a minor or related field program in an associated nonclinical discipline (minimum 6 credits) and 10 thesis credits. Students must conform to the University's GPA requirements for master's degree students.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The interdisciplinary Oral Biology program is offered by the School of Dentistry with cooperating faculty in the Medical School, College of Pharmacy, and Veterinary Medicine. It gives students research skills and a broad understanding of the development, structure, function, and pathology of the orofacial region. Students are encouraged to focus in one of five areas of emphasis: biomaterials and biomechanics; epithelial biology and carcinogenesis; microbiology and immunology; sensory neuroscience; and bone biology, craniofacial development, and tissue engineering. An exceptional student can create his/her own area of emphasis or specialize in topics not listed here; students should discuss their interests with the director of graduate studies before applying. Curricula are designed to allow considerable flexibility in planning individual programs to accommodate specific areas of interest.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A master's minor in oral biology consists of 6 credits, at least two advanced courses in oral biology, and other coursework determined in consultation with the director of graduate studies.

A Ph.D. minor in oral biology consists of 12 credits, at least two advanced courses in oral biology, and other coursework in consultation with the director of graduate studies.

Curricula are designed to allow considerable flexibility in planning individual programs to accommodate specific areas of interest; courses from other disciplines may be included as part of the major.

**Program Delivery**

This program is available:

- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

**Special Application Requirements:**

Applicants must submit 1) scores from the General Test of the GRE, 2) three letters of recommendation from persons who can comment authoritatively about the applicant's potential for a research and academic career, 3) a clearly written personal statement (one to two pages), and 4) an essay describing research aspirations (one to two pages), and 5) a résumé highlighting research experience and accomplishments. For D.D.S./Ph.D. applicants who are U.S. citizens, resident aliens, or Canadian citizens, U.S. or Canadian Dental Admission Test (DAT) scores at or above the national average will be accepted in lieu of the GRE. Applicants who have graduated from U.S. or Canadian dental or medical schools within three years of their application to the Ph.D. program may request that previous U.S. or Canadian DAT or MCAT scores be considered in lieu of the GRE.

Applicants must submit their test score(s) from the following:

- GRE
  - General Test - Verbal Reasoning: 500
  - General Test - Quantitative Reasoning: 600
  - General Test - Analytical Writing: 5

International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 90
  - Internet Based - Writing Score: 25
  - Internet Based - Reading Score: 25
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
- Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
23 to 25 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The Ph.D. in oral biology is a four-year program. The first year consists primarily of a core curriculum specifically chosen for each student. The curriculum provides students with a working knowledge of the major concepts and research paradigms in their scientific area, a working vocabulary, and the basis for continued learning. During months 13-15, the student writes a major research thesis proposal, which is defended orally by month 16. The oral exam must capture the student's ability to think critically about the field and the application of logical experimental designs to test hypotheses and answer questions. Months 17-45 will focus on thesis research. Months 45-48 are used for dissertation writing. Students must also present a public seminar describing their thesis research (which is attended by the final oral exam committee) no later than 6 months before defense of the thesis. The dissertation is defended in month 48. Students are expected to complete a core curriculum of 23-25 credits including 8 credits of oral biology topics courses (8021-8028) and continued participation in the oral biology student seminar series (8030). Courses may be selected from departments and programs outside the oral biology program with the approval of the adviser and director of graduate studies. A minor (minimum 12 cr) in a nonclinical discipline and 24 thesis credits are also required. A cumulative GPA of at least 3.00 in both the major and minor is required. Only grades of A or B are acceptable in the core courses.

Joint- or Dual-degree Coursework: D.D.S./Ph.D. students typically complete all requirements for the Ph.D. program, except for the thesis defense, before entering the D.D.S. program. The Ph.D. and D.D.S. degrees may be awarded concurrently or separately.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 50
- This program requires summer semesters for timely completion.
- Degree: Master of Development Practice

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of development practice (M.D.P.) prepares students for careers in international development. The degree provides rigorous interdisciplinary training and equips students with the skills needed to address the problems of poverty and sustainable development in the developing world.

The M.D.P. program is jointly administered by the Humphrey School of Public Affairs and the Interdisciplinary Center for the Study of Global Change (ICGC) and spans several academic units across the University of Minnesota. The degree provides training in policy analysis and management, health and education, natural sciences, social sciences, and interdisciplinary research methods. An international field experience and capstone workshop in development practice also are required.

The M.D.P. degree is part of a global consortium of international development programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year bachelor's degree from an accredited U.S. university or foreign equivalent at time of enrollment.

Other requirements to be completed before admission:
A grade of B or better in an introductory microeconomics or general economics course that includes introductory microeconomics is required. A macroeconomic course will not satisfy this requirement. Competence in college-level algebra (including facility with functional notations, algebraic manipulation of polynomials, logs, and exponentials, and graphic representation of equations) is required for M.D.P. students. A grade of B or better in a college-level course in biology, chemistry, or ecology. At least one course in political science (that analyzes political institutions) is strongly recommended.

Competence in MS Excel and Word is strongly recommended. International professional experience and foreign language competency are strongly preferred.

Special Application Requirements:
A complete application will include a University of Minnesota graduate application, personal statement, resume or C.V., transcripts, GRE scores, TOEFL scores, at least three letters of recommendation, and an optional diversity statement.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
Program Requirements

Plan C: Plan C requires 50 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: The capstone project is an opportunity for M.D.P. students in their second year to apply their knowledge through a client-based team project. Each student team and the workshop instructor will work with an NGO or public sector client engaged in some dimension of international development, preferably situated in a developing country, to identify a suitable project. While the specifics of each project will vary, all will include in-depth research, analysis, and the creation of a professional written report. Student teams will be expected to develop an appropriate presentation of this product to the relevant stakeholders. The projects will be done by small groups and can have multiple dimensions. Students will have the opportunity to integrate various aspects of development such as economic development, public health, environmental sustainability, education and skills development, and citizen participation.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Required Core Courses

AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
MDP 5001 - Ways of Knowing and Sustainable Livelihoods (2.0 cr)
MDP 5002 - Research Methods for Sustainable Livelihoods (4.0 cr)
MDP 5003 - Field Study Pre-Départure Seminar (1.0 cr)
MDP 5004 - International Field Experience (3.0 cr)
MDP 5100 - International Field Seminar (1.0 cr)
MDP 5200 - Capstone Workshop in Development Practice (1.0 - 2.0 cr)
PA 5003 - Introduction to Financial Analysis and Management (1.5 cr)
PA 5031 - Empirical Analysis I (4.0 cr)
PA 5501 - Theories and Policies of Development (3.0 cr)
PA 5503 - Economics of Development (3.0 cr)
PA 5521 - Development Planning and Policy Analysis (4.0 cr)

Education Policy

OLPD 5121 - Educational Reform in International Context (3.0 cr)

or
OLPD 5080 - Special Topics: Organizational Leadership, Policy, & Development (1.0 - 3.0 cr)

Environmental Science

GEOG 5401 - Geography of Environmental Systems and Global Change (4.0 cr)

or
EEB 5146 - Science and Policy of Global Environmental Change (3.0 cr)

or
FNRM 5146 - Science and Policy of Global Environmental Change (3.0 cr)

Leadership

PA 5105 - Integrative Leadership Seminar (3.0 cr)

or
PA 5251 - Strategic Planning and Management (3.0 cr)

or
PA 5941 - Leadership for the Common Good (3.0 cr)

or
PA 5405 - Public Policy Implementation (3.0 cr)

Public Health

PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)

or
PUBH 6134 - Sustainable Development and Global Public Health (2.0 cr)

Electives

Electives to bring total degree credits to at least 50. See www.hh.humn.edu/degrees/mdp/ for further information.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Early Childhood Policy PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The early childhood policy post-baccalaureate certificate gives students expertise in applying research-based knowledge to public policies affecting young children and the adults who care for them. In addition to completing coursework, students in the certificate program complete a capstone workshop or independent study focused on early childhood policy. These certificate components provide a vehicle for students to gain fundamental early childhood policy skills and knowledge and to foster connection between the University of Minnesota and the early childhood policy community. Students will have opportunities to participate in the work of the University of Minnesota's renowned Human Capital Research Collaborative.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission to the certificate will be allowed in fall and spring semesters. Admission decisions will be made by a subcommittee of the faculty advisory group. A complete application will include a Graduate School application, personal statement, resume or C.V., and transcripts.

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- **IELTS**
  - Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

The 12-credit certificate consists of one cornerstone course: PA5413/CPSY 5413 - Early Childhood and Public Policy (3 cr), one policy elective (3 cr), one open elective (3 cr), and a capstone workshop, professional paper, or independent study focused on early childhood policy (PA 8081, 8082, 8921 or 8991). The certificate can be completed in two to four semesters.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Public safety professionals face extraordinary challenges that require innovative thinking and an interdisciplinary approach. The Certificate in Executive Leadership: Public Safety provides mid-career professionals knowledge and skills in leadership, management, public policy, and communication for greater success plus increased potential for advancement to serve in chief, deputy, director, and mid- to senior-level leadership positions.

Intended for working professionals in law enforcement, fire, emergency management, emergency health services, and related public safety fields, the program was designed by highly respected leaders in those same fields. The program allows students to complete a professional graduate-level certificate in an integrative cohort format in nine months, earning 12 graduate credits that can serve as a stepping stone to the mid-career Master of Public Affairs degree.

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
Special Application Requirements:
7 years minimum (10 years preferred) of professional experience in public safety or related fields. A complete application will include Graduate School application, personal statement, resume or C.V., transcripts, TOEFL scores (if applicable), at least two letters of recommendation (preferred from candidate’s organizational supervisor and from a community professional colleague), and optional diversity statement.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS).

- This program does not require summer semesters for timely completion.
- Degree: Nonprofit Management PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The nonprofit management certificate program is designed for professionals who are employed in nonprofit organizations, especially persons who do not have a formal educational background in managing and leading a nonprofit organization. Students acquire knowledge and skills in effective leadership and management, organizational development, nonprofit governance, strategic planning, policy analysis, human resource development, finance, and fundraising. Jointly sponsored by the Humphrey School of Public Affairs, the School of Social Work, the School of Public Health, and the College of Education and Human Development, this program offers a wide array of elective courses appropriate to a broad range of nonprofit settings.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree from an accredited institution. Mathematics courses through algebra. A one-semester course in microeconomics.

Special Application Requirements:
A complete application will include a University of Minnesota application, personal statement, resume or C.V., transcripts, and nonprofit experience form.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

- Length of program in credits: 15
- This program does not require summer semesters for timely completion.
- Degree: Policy Issues on Work and Pay PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The policy issues in work and pay certificate provides an understanding of, and the ability to evaluate and develop, federal, state, and local policies that affect the employment relationship. Students learn about the role of government in the employment relationship, including statutes and how employers, unions, and the government interpret and utilize policies. Core courses are drawn from the Humphrey School of Public Affairs as well as the Center for Human Resources and Labor Studies in the Carlson School of Management, with auxiliary courses in law, history, sociology, and applied economics.

The certificate consists of at least 15 credits. Students complete 10 elective credits that allow them to focus on the area of public policy that is most relevant to their professional and educational goals and needs. Some elective courses require prerequisites, which do not count toward the certificate.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Mathematics courses at least through algebra; a one-semester course in microeconomics.

Special Application Requirements:
A complete application will include a Graduate School application, personal statement, resume or C.V., transcripts, and a diversity statement.

International applicants must submit score(s) from one of the following tests:
- TOEFL

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Certificate in Public Affairs Leadership offers mid-career professionals specific knowledge and skills in leadership, management, public policy, and analysis to succeed in today's challenging environment. Intended for working professionals, the program allows students to complete a professional certificate in an integrative cohort format in nine months. The certificate stands on its own or can be a stepping stone to the mid-career Master of Public Affairs degree. The Certificate in Public Affairs Leadership is offered in a unique combination of on campus and online sessions, making it convenient for students from outside of the Twin Cities area to participate. The program starts with an intensive, introductory week in August, followed by monthly Friday-Saturday meetings from September to May. This cohort approach combines the intensity and depth of in-person instruction paired with the convenience of online coursework. (Students also may pursue the certificate by taking courses in a weekly classroom format.)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year bachelor's degree from an accredited U.S. university or foreign equivalent at time of enrollment is required.

Other requirements to be completed before admission:
Students must have 10 years of professional experience and a demonstrated interest in public affairs.

A complete application will include a Graduate School application, personal statement, resume or C.V., transcripts, TOEFL scores (when applicable), at least three letters of recommendation, and a diversity statement.

International applicants must submit score(s) from one of the following tests:

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Public Affairs

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of public affairs (M.P.A.) is intended for mid-career professionals, and prepares them for public leadership and policy making. The program is typically completed in two to three years of part-time enrollment. The program can be completed in one calendar year (fall, spring, summer semesters) by attending full-time. Courses in a self-designed concentration provide a knowledge base and skills to achieve career goals. Concentration courses can be from Public Affairs and from the 150+ graduate programs across the University of Minnesota. Required courses in this degree may be taken in a traditional weekly on-campus classroom setting or through a cohort format. The cohort meets on campus one full week in August, one Friday/Saturday each month (September-May), and online throughout the year.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year bachelor's degree from an accredited U.S. university or foreign equivalent at time of enrollment.

Special Application Requirements:
Ten years or more of postbaccalaureate professional career or public affairs experience. Demonstrated basic competency in MS Excel and Word. A complete application will include a Graduate School application, personal statement, resume or C.V., transcripts, TOEFL scores (if applicable), at least three letters of recommendation, and an optional diversity statement.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 30 major credits and up to null credits outside the major. The final exam is required. A capstone project is required.

**Capstone Project**: The capstone project is designed to provide a learning opportunity for students to apply their knowledge through a client-based team project. The workshop includes a written report for the client, an oral presentation to the client that summarizes the major findings of the report, and a reflection paper on the workshop experience.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

**Required Core Courses (12 credits)**

**Weekly Class Option**
- PA 5941 - Leadership for the Common Good (3.0 cr)
- PA 5038 - Analytics for Leaders I (3.0 cr)
- PA 5039 - Analytics for Leaders II (3.0 cr)
- PA 8001 - Transforming Public Policy (3.0 cr)

**or Cohort Option**
- PA 5051 - Cohort Leadership I (2.0 cr)
- PA 5052 - Cohort Leadership II (2.0 cr)
- PA 5053 - Cohort Policy Analysis I (2.0 cr)
- PA 5054 - Cohort Policy Analysis II (2.0 cr)
- PA 5055 - Cohort Analytics for Leaders I (2.0 cr)
- PA 5056 - Cohort Analytics for Leaders II (2.0 cr)

**Capstone Project**
- PA 5080 - Capstone Preparation Workshop (1.0 cr)
- PA 8081 - Capstone Workshop (3.0 cr)

**Remaining Credits (14)**

M.P.A. students self-design their courses of study, choosing from a wide variety of classes, including skills courses in management, analysis, and planning; and concentration courses in such areas as global policy; social policy; economic and community development; science, technology, and environmental policy; and urban and regional policy and planning. For a list of ideas on how to formulate their concentrations, students should read the program planning worksheet for M.P.A.s.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 63
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Doctor of Philosophy (PhD) in Public Affairs offers students opportunities for rigorous, advanced study in the areas of public affairs, policy analysis, and planning. The goal of the PhD program is to train researchers who will enter academia or join highly respected public or nonprofit institutions involved in cutting edge research in public affairs, policy, planning, and management. Successful applicants to the program will be clear about the research they wish to undertake and why they think the Humphrey School is the best place to do that research. Students are expected to make original theoretical, methodological, or substantive contributions in the area of their specialization (sub-plans). Sub-plans are offered in Public Policy; Urban Planning; Public and Nonprofit Management; and Science, Technology, and Environmental Policy. Students will be expected to complete the degree program within five years.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
The general requirement is the capability to pursue Ph.D.-level work. Normally, a student should have an academic record from a recognized college that includes undergraduate coursework in microeconomics and mathematics (either calculus, statistics, or algebra).

Special Application Requirements:
A complete application will include a U of MN graduate application, a personal statement that includes motivation for pursuing doctoral studies, a resume or C.V., transcripts, GRE scores, TOEFL scores (if applicable), and at least three letters of recommendation.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
39 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Practical teaching experience: Each candidate must complete training in pedagogy, and a teaching experience as a course instructor or teaching assistant (TA) with instructional responsibilities. The pedagogical training may take place prior to or concurrent with the teaching experience. Training options may include for-credit courses in the Preparing Future Faculty program (e.g., GRAD 5102, 5105, 8101, 8102, and 8200); completion of Center for Teaching and Learning non-credit courses on teaching techniques; and informal training or courses offered in other units at the University.

Dissertation Requirement: Each candidate must complete original academic research and fulfill a dissertation requirement by completing either an academic thesis or three related academic papers that are judged by the student's committee to be of publishable quality.

Integrative Seminars
- PA 8003 - Integrative Doctoral Seminar in Public Affairs I (3.0 cr)
- PA 8004 - Integrative Doctoral Seminar in Public Affairs II (3.0 cr)

Research Seminar
- PA 8005: Research Seminar is taken at the end of students' Ph.D. coursework as capstone experience and is a means of developing and refining their research ideas.
- PA 8005 - Research Seminar (3.0 cr)

Research Methods
Minimum of 12 credits in research methods, including at least one course each in: research design, quantitative methods, and qualitative methods. Courses are chosen in consultation with adviser based on student's background and research interests.

Academic Sub-plan
Students are required to complete one of four sub-plans consisting of a minimum of 18 credits, as described below. Sub-plans offer well-prepared students the opportunity for advanced, rigorous study in the theory, methods, and practice in their field.

Thesis
Minimum of 24 thesis credits.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Public and Nonprofit Management
- PA 8106: Research Seminar in Leadership and Management
- PA 8106 - Research Seminar in Leadership and Management (3.0 cr)
- PA 5012: Politics of Public Affairs
- PA 5012 - The Politics of Public Affairs (3.0 cr)

Electives
12 credits in the area of public and nonprofit leadership and management. Courses are chosen in consultation with adviser based on student's background and research interests.

Public Policy
The Public Policy sub-plan is a self-designed set of topic-based courses determined by the student and advisor with the consent of the other faculty in the sub-plan area.
Science, Technology, and Environmental Policy
PA 8706: Science of Science Policy: Theory and Research Methods
   PA 8706 - Science of Science Policy: Theory and Research Methods (3.0 cr)
PA 5702: Science Education or PA 5703: Science Communication
   PA 5702 - Science Education (1.0 cr)
   or PA 5703 - Science Communication (1.0 cr)
PA 5704: STEP Research Seminar
   PA 5704 - STEP Research Seminar (1.0 cr)
PA 5711: Science and Technology Policy
   PA 5711 - Science and Technology Policy (3.0 cr)
Courses in Law, Economics, Decision or Behavioral Science, and Technology
Law: one course from approved list (e.g., renewable energy law, IP law, environmental law); Economics/Finance of Science and
Technology: one course from approved list; Decision Science or Behavioral Science: one course from approved list; Technical Area:
one course from approved list (e.g., renewable energy, nanotechnology, materials science, electrical engineering, biotechnology)

Urban Planning
PA 8206: Planning Theory
   PA 8206 - Planning Theory (3.0 cr)
PA 5204: Urban Spatial and Social Dynamics
   PA 5204 - Urban Spatial and Social Dynamics (3.0 cr)
Urban Planning Electives
Four additional courses to be determined by student and advisor; demonstrated proficiency in GIS

- Program Type: Master’s
- Requirements for this program are current for Fall 2014
- Length of program in credits: 45
- This program does not require summer semesters for timely completion.
- Degree: Master of Public Policy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of public policy (M.P.P.) curriculum is built upon a core of required theoretical and methodological courses. In remaining courses, students choose either to emphasize more advanced study of analysis or management, or to focus on a particular substantive area of public policy. Structured concentrations include advanced policy analysis methods; economic and community development; gender and public policy; global public policy; human rights; politics and governance; public and nonprofit leadership and management; public finance and budgeting; science, technology, and environmental policy; and social policy. Students have multiple opportunities to apply the concepts learned in their coursework to real-life policy problems, including cases presented in courses, their internships, and workshops. Dual degrees include M.P.P./master of business administration; M.P.P./juris doctor; M.P.P./master of public health; and M.P.P./master of social work.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year bachelor’s degree from an accredited U.S. university or foreign equivalent at time of enrollment.

Other requirements to be completed before admission:
Competence in college-level algebra (including facility with functional notations; algebraic manipulation of polynomials, logs, and exponentials; and graphic representation of equations) is required. A grade of B or better in an introductory course in microeconomics is required. At least one course in political science (that analyzes political institutions) is strongly recommended.

Competence in MS Excel and Word is strongly recommended.

Special Application Requirements:
A complete application will include a University of Minnesota application, personal statement, resume or C.V., transcripts, GRE scores, TOEFL scores (if applicable), at least three letters of recommendation, and an optional diversity statement.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
- Total Score: 7

Key to test abbreviations (GRE, TOEFL, IELTS).

Program Requirements

**Plan C:** Plan C requires 45 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

This program offers options for four dual degrees. Each dual degree option within the M.P.P. allows for a different number of credits in common between the two programs:

- M.P.P./M.B.A.: 24 credits in common allowed
- M.P.P./J.D.: 29 credits in common allowed
- M.P.P./M.P.H. - Public Health Practice: 24 credits in common allowed
- M.P.P./M.S.W.: 21 credits in common allowed for full program, 15 for advanced standing, 11 for Direct Practice.

In addition, an accelerated bachelor's/master's (BA/MPP in Political Engagement) is available to University of Minnesota Political Science undergraduate students.

**Core Courses**

- PA 5011 - Management of Organizations (3.0 cr)
- PA 5012 - The Politics of Public Affairs (3.0 cr)
- PA 5021 - Economics For Policy Analysis and Planning I (3.0 cr)
- PA 5031 - Empirical Analysis I (4.0 cr)
- PA 5002 - Introduction to Policy Analysis (1.5 cr)
- PA 5003 - Introduction to Financial Analysis and Management (1.5 cr)
- PA 5022 - Economics For Policy Analysis and Planning II (1.5 - 3.0 cr)

**Methods Courses**

- PA 5032 - Regression Analysis (2.0 cr)
- or PA 5044 - Regression Analysis, Accelerated (2.0 cr)
- PA 5033 - Multivariate Techniques (2.0 cr)
- or PA 5041 - Qualitative Methods for Policy Analysts (4.0 cr)

**Concentration:** 9 credits

**Professional Paper**

Professional paper through a Capstone Workshop, Working Group, or Master's: Professional Paper (Individual Option).

- PA 8081 - Capstone Workshop (3.0 cr)
- or PA 8082 - Working Group (3.0 cr)
- or PA 8921 - Master's: Professional Paper (Individual Option) (1.0 - 3.0 cr)

**Electives**

Electives to bring total credits to 45.

**Joint- or Dual-degree Coursework:** MPP/MBA, MPP/JD, MPP/MPH, MPP/MSW

**Program Sub-plans**
A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

**Political Engagement**
This sub-plan is limited to students completing the program under Plan C.

The College of Liberal Arts and the Humphrey School of Public Affairs offer an early-admission opportunity for eligible University of Minnesota Political Science B.A. students also interested in completing the Master’s in Public Policy (M.P.P.). The M.P.P.’s Political Engagement sub-plan enables Political Science majors to take 13 M.P.P. credits during their senior (fourth) year, and to complete the M.P.P. after a fifth year of full-time graduate study plus one summer.

Interested Political Science undergraduates should contact the Department of Political Science adviser for more information. The M.P.P./Political Engagement sub-plan application deadline is December 15th of the student's junior year, and admission to the M.P.P./Political Engagement sub-plan is contingent on a formal admissions process.

Students admitted to the M.P.P./Political Engagement sub-plan must maintain timely degree progress to ensure all undergraduate degree requirements are completed by the end of their fourth year.

The M.P.P.’s Political Engagement sub-plan is open to Political Science undergraduates only. Double majors may apply, but only if they choose to complete the senior project requirement in Political Science.

In addition to Master of Public Policy degree requirements,* students in the Political Engagement sub-plan will take:
- “Political Engagement” (POL 5xxx, 4 credits).
- Methods: At least 3 credits beyond PA 5031: Empirical Analysis. Chosen from a slate of PA and POL methods courses.
- Electives: 15 credits relevant to Political Engagement sub-plan. May be chosen from PA or POL. At least 8 credits must be 8xxx POL. Satisfies MPP concentration requirement.
- Outside electives: 3 credits from outside POL or PA. Number of outside electives may be increased or reduced, in consultation with DGS.
- Research for Mentorship Placement: 1 credit directed reading with adviser.
- Mentorship placement: PA 8991 (3 credits).
- Professional paper: PA 8081, PA 8082, or PA 8921 (3 credits).

(*Political Engagement students are not required to take PA 5012 and PA 5022. They are required to take only 3 credits of methods courses beyond PA 5031.)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The public policy curriculum is built upon a core of required theoretical and methodological courses. In coursework, students study policy analysis or management or focus on a substantive area of public policy. Substantive areas include advanced policy analysis methods; economic and community development; global public policy; human rights; politics and governance; public and nonprofit leadership and management; public finance and budgeting; science, technology, and environmental policy; social policy; and gender and public policy. Students have multiple opportunities to apply the concepts learned to real-life policy problems.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The minor in public policy consists of graduate-level public affairs (PA) courses. Up to 3 credits may be taken on an S/N grade basis. All other courses must be completed with grades of B or better. Specific coursework is chosen in consultation with the student’s minor adviser or director of graduate studies. Students are required to take a minimum of three credits from those required in the master of urban and regional planning degree program.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.S. in science, technology, and environmental policy (STEP) provides students with an understanding of the role of science and technology in society, including food and agriculture, the economy, energy and the environment, security, health, and education; the impact of science and technology on the political and economic relationships within and among nations; and the analysis and design of policies for appropriate promotion and regulation of science and technology regionally, nationally, and internationally. The program educates students with natural and social science backgrounds to assume roles in public policy development.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year bachelor's degree from an accredited U.S. university or foreign equivalent at time of enrollment.

Other requirements to be completed before admission:

A grade of B or better in introductory microeconomics is required. At least one course in political science (that analyzes political institutions) is strongly recommended. At least one semester of calculus is required. A degree or advanced-level coursework in the natural or engineering sciences is expected. Students who have not taken introductory statistics prior to admission must take PA 5031, above the 36 credits required for the degree.

Competence in MS Excel and Word is strongly recommended.

**Special Application Requirements:**

A complete application will include a University of Minnesota application, personal statement, resume or C.V., transcripts, GRE scores, TOEFL scores (if applicable), at least three letters of recommendation, and an optional diversity statement.

Applicants must submit their test score(s) from the following:
- GRE
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 700
- IELTS
  - Total Score: 7

Key to test abbreviations (GRE, TOEFL, IELTS).
For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 20 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students should take 6 credits to complement their previous training: appropriate courses in natural or engineering science or its history or philosophy for those with social science backgrounds; appropriate courses in the social sciences for those with natural or engineering science backgrounds.

Elective credits are chosen in consultation with the student’s adviser.

Students who have not taken prior coursework in statistics must demonstrate to their advisers that they have adequate preparation in statistics or must take Empirical Analysis I (PA 5031). PA 5031 does not count toward fulfilling the 36-credit minimum requirement.

**Required Core Courses**

- PA 5012 - The Politics of Public Affairs (3.0 cr)
- PA 5021 - Economics For Policy Analysis and Planning I (3.0 cr)
- PA 5002 - Introduction to Policy Analysis (1.5 cr)
- PA 5711 - Science and Technology Policy (3.0 cr)
- PA 5722 - Environmental and Resource Economics Policy (3.0 cr)
- PA 5715 - Survey of Current Issues in Science, Technology, and Environmental Policy (1.5 cr)

**At least one of the following:**

- PA 5723 - Water Policy (3.0 cr)
- or PA 5721 - Energy and Environmental Policy (3.0 cr)
- or PA 5731 - Emerging Technologies and Society (3.0 cr)
- or PA 5741 - Risk Analysis and Policy (3.0 cr)
- or PA 5751 - Urban Infrastructure Systems for Sustainable and Healthy Cities (3.0 cr)

**Methods Courses**

- PA 5032 - Regression Analysis (2.0 cr)
- or PA 5044 - Regression Analysis, Accelerated (2.0 cr)
- PA 5033 - Multivariate Techniques (2.0 cr)
- or PA 5041 - Qualitative Methods for Policy Analysts (4.0 cr)

**Plan B Paper or Plan A Thesis**

**Electives**

Electives to bring total credits to at least 40.

**Joint- or Dual-degree Coursework:** Joint Degree Program in Law, Health, and the Life Sciences (M.S.-S.T.E.P./J.D.) Student may take a total of 24 credits in common among the academic programs.

• Program Type: Master's
• Requirements for this program are current for Fall 2014
• Length of program in credits: 48
• This program does not require summer semesters for timely completion.
• Degree: Master of Urban and Regional Planning

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of urban and regional planning (M.U.R.P.) degree is an interdisciplinary program that prepares students to analyze, forecast, design, and implement plans for regions, communities, and neighborhoods. Students develop a comprehensive understanding of the built environment (land use, transportation, housing, regional economies) and the ability to mediate among competing interests. They are prepared for jobs in public, nonprofit, and private sectors. Students can generally complete the M.U.R.P. degree in two years of full-time study.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year bachelor's degree from an accredited U.S. university or foreign equivalent at time of enrollment.

Other requirements to be completed before admission:
Competence in college-level algebra (including facility with functional notations, algebraic manipulation of polynomials, logs, and exponentials, and graphic representation of equations) is required. A grade of B or better in an introductory course in microeconomics is required. (A macroeconomics or single-semester general economics course will not satisfy this requirement.) At least one course in political science (that analyzes political institutions) is strongly recommended.

Competence in MS Excel and Word is strongly recommended. M.U.R.P. students must demonstrate competence with GIS through coursework or work experience. (Students not competent in GIS must take a GIS course as part of their 48 credits).

Special Application Requirements:
A complete application will include a University of Minnesota graduate application, personal statement, resume or C.V., transcripts, GRE scores, TOEFL scores (if applicable), at least three letters of recommendation, and an optional diversity statement.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7
Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 32 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan C: Plan C requires 48 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

A 400-hour professional internship is required.

This program offers options for five dual degrees. Each dual degree option allows a different number of credits in common between the two degrees:

- M.U.R.P./M.L.A.: 37 credits in common allowed. (Applications to the joint M.U.R.P./M.L.A. degree are not currently being accepted.)
- M.U.R.P./M.S.W.: 21 credits in common allowed for the full program; 15 for advanced standing; and 11 for M.S.W. Direct Practice.

Required Core Courses

- PA 5004 - Introduction to Planning (3.0 cr)
- PA 5013 - Law and Urban Land Use (1.5 cr)
- PA 5031 - Empirical Analysis I (4.0 cr)
- PA 5042 - Urban and Regional Economics (2.0 cr)
- PA 5043 - Economic and Demographic Data Analysis (2.0 cr)
- PA 5204 - Urban Spatial and Social Dynamics (3.0 cr)
- PA 5211 - Land Use Planning (3.0 cr)
- PA 5253 - Designing Planning and Participation Processes (3.0 cr)
- PA 8081 - Capstone Workshop (3.0 cr)

Concentration

12-credit concentration (Plan C) or 6-credit concentration (Plan A)

Electives or Thesis Credits

Plan C students complete additional elective credits to meet the 48-credit minimum. Plan A students complete the required 10 thesis credits and additional elective credits to meet the 48-credit minimum.

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2014
• Length of program in credits (Masters): 9
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Planners bring together knowledge and expertise from many diverse disciplines to shape neighborhoods, cities, and regions. The urban and regional planning minor helps students to think across those fields of expertise and act upon links among environmental systems, infrastructure development, and housing and community development. The program teaches technical and analytical skills needed to think strategically about developing and implementing plans at the neighborhood, city, and regional level.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The minor in urban and regional planning consists of graduate-level public affairs (PA) courses. Up to 3 credits may be taken on an S/N grade basis. All other courses must be completed with grades of B or better. Specific coursework is chosen in consultation with the student's minor adviser or director of graduate studies. Students are required to take a minimum of three credits from those required in the master of urban and regional planning degree program.
Twin Cities Campus
Law Minor
Law School

Link to a list of faculty for this program.

Contact Information:
Law School, Walter F. Mondale Hall, 229 19th Avenue South, Minneapolis, MN 55406 (612-625-1000; fax: 612-625-2011)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

A law minor is available to both master's (M.A. and M.S.) and doctoral students and is individually tailored to their academic interests.

Accreditation
This program is accredited by American Bar Association (ABA)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission to the law graduate minor is contingent upon prior admission to a University of Minnesota master's or doctoral degree-granting program. Enrollment in Law School courses is on a space-available basis, with preference given to law-degree-seeking candidates. To request admission to Law School courses, complete a declaration form and the non-Law student petition form (found at http://www.law.umn.edu/legaledprograms/non-id-students.html) and forward them to the Law School Registrar's office.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A master's minor requires at least 6 graduate credits; a doctoral minor requires at least 12 graduate credits.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Science Patent Law

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Master of Science in Patent Law is a one year, full time, professional master's degree for scientists and engineers interested in pursuing a career in the growing field of patent law. This program is offered through the University of Minnesota Law School. Students in this program will learn practical patent drafting, patent research, patent portfolio management and innovation skills. Many courses in this program will be taken jointly with J.D. students.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Science and Engineering preferred.

Other requirements to be completed before admission:
GRE and LSAT scores are accepted but not required.

Special Application Requirements:
Personal statement, resume, letters of recommendation, interview, patent bar eligibility assessment.

International applicants must submit score(s) from one of the following tests:
- TOEFL
- IELTS

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 30 to 36 major credits and 0 credits outside the major. There is no final exam. A capstone project is required.
Capstone Project: CAPSTONE: Innovation (3 credits): In this course students will select a technology of interest with the cooperation of their adviser. Using their knowledge of innovation, patent law, patent prosecution, patent research and strategy they will identify, articulate and present opportunities for innovation in their chosen technology.
This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

**Patent Law: Core Curriculum**

Students are required to take 24 credits of core coursework, plus 6 additional credits as approved by the program director.

- LAW 5000 - Introduction to the American Legal System (2.0 cr)
- LAW 5224 - Patents (3.0 cr)
- LAW 5231 - Patent Prosecution Practice I (2.0 - 3.0 cr)
- LAW 5250 - Patent Portfolio Management (3.0 cr)
- LAW 5003 - Writing, Analysis & Persuasion (2.0 cr)
- LAW 5025 - Patent Law Proseminar I (1.0 cr)
- LAW 5232 - Patent Prosecution Practice II (3.0 cr)
- LAW 5255 - Patent Transactions (2.0 cr)
- LAW 5290 - Patent Law Capstone: Innovation (3.0 cr)
- LAW 5075 - Ethics for Patent Agents (1.0 cr)
- LAW 5026 - Patent Law Proseminar II (1.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 42
- This program requires summer semesters for timely completion.
- Degree: Master of Science in Experimental Surgery

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The general surgery program trains medical doctors for the practice of surgery and for academic positions. See the Medical School Catalog for professional degree requirements; see below for academic degree requirements. Trainees spend two to three years in laboratory research, either in a basic science or in surgery, after which they begin their senior residency and chief residency training. The Medical School's laboratory departments offer many graduate courses closely related to surgery (see the graduate programs in biochemistry, molecular biology, and biophysics; cellular and integrative physiology; microbiology, immunology, and molecular pathobiology; and pharmacology). These fields also offer opportunities for research work. The Department of Surgery offers supervised work in its experimental research laboratories, as well as in its hospital and outpatient departments in the areas of surgical diagnosis and operative surgery and in some surgical specialties (such as colon and rectal surgery, transplantation, thoracic and cardiovascular surgery, and pediatric surgery).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 26 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

- Program Type: Master's  
- Requirements for this program are current for Fall 2014  
- Length of program in credits: 30  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students enter the Twin Cities M.S. program in integrative biology and physiology only for exceptional reasons. Most Twin Cities graduate work is performed at the Ph.D. level. See the Integrative Biology and Physiology Ph.D. program for more information.

The graduate programs in the Twin Cities have a cardiovascular emphasis, although other areas of specialization are represented.

On the Duluth campus, students can enroll in coursework and participate in research in several basic areas.

The program includes faculty and corresponding research laboratories from the Department of Integrative Biology and Physiology and also the Departments of Medicine; Surgery; Neuroscience; Neurosurgery; Biochemistry, Molecular Biology, and Biophysics; Pharmacology; Physical Medicine and Rehabilitation; Kinesiology; and Animal Science.

**Program Delivery**
This program is available:  
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

International applicants must submit score(s) from one of the following tests:

- **TOEFL**  
  - Internet Based - Total Score: 79  
  - Internet Based - Writing Score: 21  
  - Internet Based - Reading Score: 19  
  - Paper Based - Total Score: 550  
- **IELTS**  
  - Total Score: 6.5  
- **MELAB**  
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 14 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** The Plan B project focuses on some aspect of Physiology. Plan B students complete a project under the direction of a faculty member and present the work to their faculty committee in an oral exam.
This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Duluth campus: All course requirements for the M.S. degree can be completed on the Duluth campus. Students are expected to fulfill all degree requirements over a period of two to three calendar years. The program includes at least 20 credits in physiology and 6 credits in a minor or related field of study. Incoming students are encouraged to undertake at least two laboratory rotations in faculty research laboratories of their choice. Fulfillment of degree requirements also includes the presentation and defense of a thesis (Plan A). The final written examination and oral defense of the thesis takes place with participation of faculty from both campuses.

Twin Cities campus: Plan A or B degrees are awarded only in exceptional circumstances. A Plan A M.S. degree requires 14 credits in physiology and 6 credits outside of physiology. The degree is based on laboratory research off or on campus, and requires a written thesis or written project and an oral presentation of the work for the final exam. The M.S. degree is Plan A, unless there are special circumstances requiring a Plan B. For Plan B, the final exam is oral.
Twin Cities Campus
Integrative Biology and Physiology Minor

Contact Information:

Email: ibpdept@umn.edu
Website: http://physiology.med.umn.edu/grad/index.html

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Physiology may be defined as the application of mathematics, physics, and chemistry to the study of structure and function in living systems. As such, physiology is a "hybrid" field in which expertise from many other disciplines is ordinarily required and combined. The program emphasizes a quantitative approach to understanding the functions of cells, organs, and systems in living animals.

The graduate program in the Twin Cities has a cardiovascular emphasis, although many other areas of specialization are represented.

The program includes faculty and corresponding research laboratories from the Department of Integrative Biology and Physiology and also the Departments of Medicine; Surgery; Neuroscience; Neurosurgery; Biochemistry, Molecular Biology, and Biophysics; Pharmacology; Physical Medicine and Rehabilitation; Kinesiology; and Animal Science.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
For the minor, a background in mathematics, physics, chemistry, and biology acceptable to the graduate faculty is required.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum of 6 graduate credits in physiology is required (with approval by the director of graduate studies) for the master's minor.
Ph.D. students seeking a doctoral minor are expected to take PHSL 5101 or the equivalent, plus additional courses for a total of 12 credits. Approval is required by the director of graduate studies.
Twin Cities Campus

Integrative Biology and Physiology Ph.D.

Link to a list of faculty for this program.

Contact Information:
Department of Integrative Biology and Physiology, Jackson Hall 6-125, 321 Church Street S.E., Minneapolis, MN 55455 (612-625-5902; fax: 612-625-5149)

Website: http://www.umnphysiology.com/grad/home

• Program Type: Doctorate
• Requirements for this program are current for Fall 2014
• Length of program in credits: 53
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Physiology may be defined as the application of mathematics, physics, and chemistry to the study of structure and function in living systems. As such, physiology is a “hybrid” field in which expertise from many other disciplines is ordinarily required and combined.

The program emphasizes a quantitative approach to understanding the functions of cells, organs, and systems in living animals. Ph.D. students take a core concentration that provides a broad background in the physiology of membranes, cells, transport, and organ systems. Individualized programs are structured to build on the student’s strengths and to fill in gaps that would otherwise be an impediment to specific problem solving. Teaching experience is also available to all students.

The graduate program in the Twin Cities has a cardiovascular emphasis, although many other areas of specialization are represented.

Students can enter the Ph.D. program from the Twin Cities or Duluth campus. Highly qualified individuals with solid quantitative backgrounds are encouraged to apply. In the Twin Cities, prospective students also include people with previous medical training who are already at the University of Minnesota or are considering the University of Minnesota Medical School for residency or fellowship training.

Entering Ph.D. students are expected to take a series of laboratory rotations to familiarize themselves with active areas of research within the degree program. The program includes faculty and corresponding research laboratories from the Department of Integrative Biology and Physiology and also the Departments of Medicine; Surgery; Neuroscience; Neurosurgery; Biochemistry, Molecular Biology, and Biophysics; Pharmacology; Physical Medicine and Rehabilitation; Kinesiology; and Animal Science.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
An undergraduate degree with at least one year (three quarters or two semesters) of calculus, one year of physics, one year of biology, and two years of chemistry is required. For the minor, a background in mathematics, physics, chemistry and biology acceptable to the graduate faculty is required.

Special Application Requirements:
For the Ph.D., applicants must take either the General Test of the GRE or the Medical College Admission Test. In addition, all applicants need three letters of recommendation. Admission can be in either fall (preferable) or spring semester.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

• IELTS
  - Total Score: 6.5

• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
17 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

The Ph.D. program requires courses in cellular physiology and medical physiology. Coursework is tailored to the student's interests with input from the director of graduate studies and the student's adviser. During the first year, students rotate through three laboratories, attend weekly seminars, choose an adviser, and begin a research project. A preliminary written exam in physiology is given after the first year and examines the ability of the student to apply concepts learned in core courses. By the end of the second year, students have completed their coursework including a grant-writing class, and selected a laboratory for their thesis research. A preliminary oral exam is given at the end of the second year and tests the student's ability to apply principles of both physiology and the minor or supporting program to a proposed research-based thesis. A minimum of 12 credits must be completed in the minor field or supporting program.

Minor Requirements for Students Majoring in Other Fields: Ph.D. students are expected to take PHSL 5101 or the equivalent plus additional courses for a total of 12 credits.

Radiation Oncology Administration, Radiology

Medical School

Link to a list of faculty for this program.

Contact Information:
University of Minnesota Medical School, Department of Radiation Oncology, Mayo Mail Code 494, 420 Delaware Street S.E., Minneapolis, MN 55455 (phone: 612-626-6154; fax: 612-626-7060)
Email: gerbi001@umn.edu
Website: http://www.med.umn.edu/trad/GraduateProgram/home.html

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- no
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program is made up of faculty members with primary appointments in departments that include radiation oncology, radiology, physics, engineering, computer science, physiology, dentistry, and biochemistry. In addition to providing clinical experience in areas such as radiation oncology, radiation safety and quality assurance, the program is active in research and provides graduate level training in medical physics. The goal of the program is to prepare students (1) for further education, teaching, and research in medical physics, (2) to qualify to enter a medical physics residency program in radiation oncology or diagnostic radiology, and (3) to provide the mathematical and technical knowledge needed to succeed in the increasingly complex field of medical physics.

Accreditation
This program is accredited by Commission on Accreditation of Medical Physics Education Programs, Inc. (CAMPEP)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A degree in physics or engineering or other physical science. Equivalent of an undergraduate physics minor at least 2 semesters of calculus based physics and at least 3 upper level physics courses.

Other requirements to be completed before admission:
All students should have some familiarity with physical chemistry, intermediate physics, intermediate mathematics, biostatistics, computer programming, biology, physiology, and biochemistry. This may be demonstrated by coursework completed at the undergraduate level or as part of the graduate program; by reading or practical experience; or by informal competency examinations.

Special Application Requirements:
Three letters of recommendation are required. The General Test of the GRE is required. The computer based GRE exam is provided year round by the Educational Testing Service. A list of test centers can be found at: http://www.ets.org/gre. Our institution code is R6874 with no department code. If the GRE was taken more than two years prior to application, the applicant will need to retake the examination. We have no absolute GRE cutoff score, but the score is taken into consideration among many individual factors in the evaluation of each application. Applicants are considered for admission in both semesters.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan B**: Plan B requires 30 major credits and 0 credits outside the major. The final exam is oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

The M.S. is offered under one plan. Plan B students complete a project under the direction of a faculty member/advisor, submit a written document to their oral exam committee, and defend their work in front of the committee.

**Required Courses M.S.**

- MPHY 5170 - Basic Radiological Physics (3.0 cr)
- PHYS 5401 - Physiological Physics (4.0 cr)
- MPHY 5138 - Research Seminar (1.0 - 5.0 cr)
- MPHY 5173 - Medical and Health Physics of Radiation Therapy (3.0 cr)
- PHYS 5402 - Radiological Physics (4.0 cr)
- PHAR 5201 - Applied Health Sciences Terminology (2.0 cr)
- MPHY 5171 - Medical and Health Physics of Imaging I (3.0 cr)
- MPHY 5172 - Radiation Biology (3.0 cr)
- MPHY 5174 - Medical and Health Physics of Imaging II (3.0 cr)
- MPHY 5139 - Seminar and Journal Club (1.0 cr)

**Medical Physics Electives**

Other electives as advised.

- MPHY 5177 - Radiation Therapy Physics Lab: Radiation Physics Basics (3.0 cr)
- or MPHY 8149 - Advanced Topics in Radiation Therapy Physics (2.0 cr)
- or MPHY 8148 - Advanced Digital Imaging Science (3.0 cr)
- or MPHY 8147 - Advanced Physics of Magnetic Resonance Imaging (MRI) (3.0 cr)

**ADDITIONAL REQUIREMENTS (NOT FOR CREDIT)**

In the fall semester of their first year, students must take the University ethics training: Responsible Conduct of Research (RCR), Parts 1 (a 3-hour session offered about 4 times/year) and 2.

- no
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program is made up of faculty members with primary appointments in departments that include radiation oncology, radiology, physics, engineering, computer science, physiology, dentistry, and biochemistry. In addition to providing clinical experience in areas such as radiation oncology, radiation oncology, radiation safety and quality assurance, the program is active in research and provides graduate level training in medical physics. The goal of the program is to prepare students (1) for further education, teaching, and research in medical physics, (2) to qualify to enter a medical physics residency program in radiation oncology or diagnostic radiology, and (3) to provide the mathematical and technical knowledge needed to succeed in the increasingly complex field of medical physics.

Accreditation
This program is accredited by Commission on Accreditation of Medical Physics Education Programs, Inc. (CAMPEP)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A degree in physics or engineering or other physical science. Equivalent of an undergraduate physics minor-at least 2 semesters of calculus based physics and at least 3 upper level physics courses.

Other requirements to be completed before admission:
All students should have some familiarity with physical chemistry, intermediate physics, intermediate mathematics, biostatistics, computer programming, biology, physiology, and biochemistry. This may be demonstrated by coursework completed at the undergraduate level or as part of the graduate program; by reading or practical experience; or by informal competency examinations.

Special Application Requirements:
Three letters of recommendation are required. The General Test of the GRE is required. The computer based GRE exam is provided year-round by the Educational Testing Service. A list of test sites can be found at: http://www.ets.org/gre. Our institution code is R6874 with no department code. If the GRE was taken more than two years prior to application, the applicant will need to retake the examination. We have no absolute GRE cutoff score, but the score is taken into consideration among many individual factors in the evaluation of each application. Applicants are considered for admission in both semesters.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
IELTS
- Total Score: 6.5
MELAB
- Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
48 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Ph.D. students take preliminary written exams at the end of the first year of study or as soon as possible after completing the core course sequence in topics in physics for medicine and biology. An oral preliminary exam focuses on the plan for thesis research and the student's grasp of related information and is taken by the fall of the third year of full-time registration or its equivalent. Additionally, 24 thesis credits are required.

Required Courses
- MPH5170 - Basic Radiological Physics (3.0 cr)
- PHYS 5401 - Physiological Physics (4.0 cr)
- MPH5138 - Research Seminar (1.0 - 5.0 cr)
- MPH5173 - Medical and Health Physics of Radiation Therapy (3.0 cr)
- PHYS 5402 - Radiological Physics (4.0 cr)
- PHAR 5201 - Applied Health Sciences Terminology (2.0 cr)
- MPH5171 - Medical and Health Physics of Imaging I (3.0 cr)
- MPH5172 - Radiation Biology (3.0 cr)
- MPH5174 - Medical and Health Physics of Imaging II (3.0 cr)
- MPH5177 - Radiation Therapy Physics Lab: Radiation Physics Basics (3.0 cr)
- MPH5149 - Advanced Topics in Radiation Therapy Physics (2.0 cr)
- MPH5139 - Seminar and Journal Club (1.0 cr)

Medical Physics Electives
- Electives will be based on focus of program objectives with advisor.
  MPH58148 - Advanced Digital Imaging Science (3.0 cr)
  or MPH58147 - Advanced Physics of Magnetic Resonance Imaging (MRI) (3.0 cr)
  or Other electives as advised.

ADDITIONAL REQUIREMENTS (NOT FOR CREDIT)
- In the fall semester of their first year, students must take the University ethics training:
  Responsible Conduct of Research (RCR), Parts 1 (a 3-hour session offered about 4 times/year)
  and 2.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are not admitted directly into the master's program; it is available only by special arrangement with the program.

Students prepare for careers in biomedical research and teaching by completing broad training in molecular biology or biological sciences, and focused specialization in one of three concentrations (microbiology, immunology, or cancer biology). The program offers exceptional research opportunities for graduate training in autoimmunity, biotechnology, cancer biology and therapy, environmental microbiology, genetic engineering of microorganisms, lymphocyte activation and development, microbial pathogenesis, molecular genetics of disease, tumor immunology, vaccine development, and vascular biology and inflammation.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Applicants must have a bachelor's degree (B.S. preferred).

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 96
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 85

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 12 to 18 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.
This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students are not admitted directly into the master's program; it is available only by special arrangement with the program. Students complete 14 MICA course credits, 6 credits in the minor or related field, and 10 thesis credits. Students must write and defend a thesis based on original research.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Students enrolled in a University master's or doctoral program are eligible for the MICaB minor. Requirements for the master's- and doctoral-level MICaB minor include: completion of 8 MICaB credits from 2 of the following 4-credit courses: MICA 8002, MICA 8003, MICA 8004; and the approval of the MICaB director of graduate studies. Doctoral students must also complete at least 4, but no more
than 10, additional MICAB credits in consultation with the MICaB director of graduate studies.

- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students prepare for careers in biomedical research and teaching by completing broad training in molecular biology or biological sciences, and focused specialization in one of three concentrations (microbiology, immunology, or cancer biology). The program offers exceptional research opportunities for graduate training in autoimmunity, biotechnology, cancer biology and therapy, environmental microbiology, genetic engineering of microorganisms, lymphocyte activation and development, microbial pathogenesis, molecular genetics of disease, tumor immunology, vaccine development, and vascular biology and inflammation.

Accreditation
This program is accredited by NA

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Applicants must have a bachelor's degree (B.S. preferred).

Other requirements to be completed before admission:
Required courses include calculus, general chemistry, organic chemistry, and physics. A minimum of two upper-level biology courses, which may include biochemistry, genetics, cell biology, molecular biology, microbiology, or immunology, etc. are also required.

Research experience is required. Relevant undergraduate experience includes honors thesis work, paid or volunteer work in a research laboratory and summer internships. It does not include laboratory courses that accompany science courses such as biology. Postbaccalaureate research experience is preferred but not required.

Special Application Requirements:
The program evaluates applications based on four equally weighted criteria: academics (GPA and GRE scores), letters (3) of recommendation, a personal statement, and research experience. The average GPA and GRE scores of accepted applicants are typically 3.50 and 80th percentile, respectively (no GRE Subject Test is required). Letters of recommendation from research advisers or mentors are preferred as these individuals can comment knowlegably on the student's potential in biomedical research. Applicants' personal statements should describe their research in general and their specific contribution to it, their rationale for seeking a doctoral degree, and any information they wish to share regarding their backgrounds and interest in the MICaB Program. Finally, applicants should provide specific details of their research experiences (project titles, mentors, dates, locations, etc.), along with a list of relevant abstracts, publications, etc.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 96
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7
• MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
11 to 12 credits are required in the major.
12 to 13 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Beginning study in the fall, students spend their first year on major coursework, identifying an adviser by doing laboratory rotations, selecting a concentration, and initiating their thesis research project. The program encourages students to take at least two of the three MICA8 track core courses, but only requires one. In the fall semester of their second year, all students take MICA 8012, which highlights the integrated nature of the three tracks and helps prepare the students for their written and oral qualifying examinations (taken in the spring semester of the second year). Students also take courses that support studies in their focus area during their first two years.

In addition to coursework and research, students have opportunities to participate in laboratory meetings, journal clubs, and student research seminars, and to assist in laboratory courses. Most students complete the Ph.D. in four to five years.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 48
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Neuroscience is an interdisciplinary field of inquiry. The objects of this inquiry, the brain and nervous system, are sufficiently complex and unique among biological systems to require experimental and analytical approaches that cross the traditional boundaries of molecular and cell biology, behavioral biology, biochemistry, genetics, pharmacology, physiology, and psychology. In some instances, neuroscientific inquiry may also encompass computer science, information processing, engineering, physics, and mathematics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 26 major credits, 12 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

The course requirements for a master's degree are the same as those for a Ph.D. degree. See the Program Requirements of the Neuroscience Ph.D.

**Program Requirements**

20 credits are required in the major.  
6 credits are required outside the major.  
24 thesis credits are required.
This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

The neuroscience Ph.D. curriculum begins in the summer session with the intensive laboratory course in cellular and molecular neurobiology (NSC 5551), held at the Itasca Biological Station and Laboratories.

The core curriculum continues on the Twin Cities campus with NSC 5461, 5561, 5661, and 8211. While taking these courses, students explore research opportunities in the faculty's laboratories and thereby select a thesis adviser.

Students will also participate in journal clubs (NSC 8320) to discuss work in the field of Neuroscience. Elective courses totaling 6 credits are required and selected in consultation with the adviser.

Students with sufficient background and previous course experience may apply for a waiver of specific requirements. A student, if they so choose, must take at least 12 elective credits to receive a minor (typical minors include cell biology, physiology, statistics, psychology, and medicine; medicine is primarily for students in the M.D. Ph.D. program). Students are also expected to participate in teaching neuroscience and to attend the weekly colloquium, as well as neuroscience seminars and sessions devoted to professional development. Students are strongly encouraged to attend seminars in other areas and departments that may interest them.

• Program Type: Post-baccalaureate credit certificate/licensure/endorsement
• Requirements for this program are current for Fall 2014
• Length of program in credits: 14
• This program requires summer semesters for timely completion.
• Degree: Orthoptics PostBaccalaureate Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Orthoptic Certificate program is a vital part of the ophthalmic health care profession. This is a specialized profession, the focus of which is the evaluation and treatment of disorders of vision, eye movements, and eye alignment in children and adults. The study of orthoptics follows a logical sequence of studies vital to the understanding of the visual system. The didactic education is integrated with practical clinical experience. Orthoptists work with ophthalmologists, eye physicians and surgeons, as part of the medical team. They are employed in a variety of settings, including university and teaching hospitals, children's hospitals, and solo or multi-specialty group medical practices. An orthoptist sees a variety of patients of all ages, although due to the nature of their visual disorders, the majority of the patients are young children; some individuals with multiple health concerns are also evaluated as they commonly have ocular/binocular problems. After completing an Orthoptic Certificate, a student earns national certification as an orthoptist through written and practical examinations administered by the American Orthoptic Council.

This program requires two semesters and a summer term of coursework.

Accreditation
This program is accredited by American Association of Certified Orthoptists

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.00.

Required prerequisites

Course Group 0

Other requirements to be completed before admission:
Requirements for entry into the Orthoptics Certificate Program include the following:
1. Completion of baccalaureate degree with GPA at least 2.0.
2. Successful completion of one year in a hospital/clinic-based ophthalmic technician training program (e.g., Regions Hospital)

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

The 2.8 GPA requirement complies with University of Minnesota policy.

Orthoptics Required Courses
- OPH 5501 - Orthoptics I (4.0 cr)
- OPH 5601 - Orthoptics II (5.0 cr)
- OPH 5701 - Orthoptics III (5.0 cr)

Contact Information:
Department of Otolaryngology, MMC 396, 420 Delaware Street S.E., Minneapolis, MN 55455 (612-625-3200; fax: 612-625-2101)
Website: http://www.ent.umn.edu

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 55
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy in Otolaryngology

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program prepares students in both clinical and experimental aspects of otolaryngology. The Ph.D.Otol. degree requires a publishable thesis. Rotations at University of Minnesota Medical Center-Fairview, Minneapolis Veterans Administration Medical Center, Regions Hospital, Minneapolis Children's Hospital, and Hennepin County Medical Center provide a wide range of opportunity for clinical education and surgical experience.

Opportunities for independent research are provided in the laboratories of audiology, auditory electrophysiology, auditory neurophysiology, biochemistry, cancer biology, cell biology and genetics, electron microscopy, electrophysiology, histochemistry, morphometry, psychoacoustics, temporal bone pathology, tumor immunology, skin-flap physiology, laryngeal physiology, mandibular bone physiology, microvascular tissue transfer, and vestibular physiology. Graduates of the program have careers in teaching, research, and professional practice.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Requires a bachelor's or master's degree, preferably in an area related to otolaryngology or, for those pursuing the degree in conjunction with a residency in otolaryngology, an M.D. degree.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
19 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The number of credits varies depending on preparation and the research undertaken. Most students take a total of about 55 credits. A minimum of 12 credits in the minor or supporting program, plus 24 doctoral thesis credits, are required. An advisory committee, including the student, the adviser, and the director of graduate studies, determines coursework in the major. At least one seminar is selected from seminars such as OTOL 8247, 8248, 8249, and 8250. Understanding and application of basic statistics and experimental
methodology are expected. Statistics coursework is usually necessary. Choice of statistics courses is made with the guidance of the director of graduate studies.

All students are expected to publish a research paper in a peer-reviewed journal. Students concurrently in an otolaryngology residency usually take five to six years to complete research, course, and dissertation requirements.

Website: http://www.pharmacology.med.umn.edu/graduate.html

• Program Type: Master's
• Requirements for this program are current for Fall 2014
• Length of program in credits: 30 to 36
• This program requires summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Pharmacology is the study of the interactions of chemicals with biological systems. Courses and research training in biochemistry, biophysics, genetics, and molecular biology provide a solid foundation for performing original research in pharmacology, neuropharmacology, and cancer chemotherapy.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

A four-year B.A. or B.S. degree (or its equivalent) in a basic science program is generally required.

Other requirements to be completed before admission:
Candidates for admission are evaluated on the basis of undergraduate record, GRE score, previous research experience, and letters of recommendation.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of official transcripts; and a clearly written statement of career interests, goals, and objectives.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7.5

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 30 major credits and 0 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: A research project approved by the advisor and Director of Graduate Studies.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students are required to maintain a GPA of 3.0. Students who fail to maintain this standard must petition the Director of Graduate Studies for permission to remain in the program.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Pharmacology is the study of the interactions of chemicals with biological systems. Courses and research training in biochemistry, biophysics, genetics, and molecular biology provide a solid foundation for performing original research in pharmacology, neuropharmacology, and cancer chemotherapy.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A master's minor requires a minimum of 9 credits in pharmacology approved by the director of graduate studies. A doctoral minor requires a minimum of 12 credits in pharmacology approved by the director of graduate studies. There are no special requirements (e.g., specific courses, written examination).

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 48
- This program requires summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Pharmacology is the study of the interactions of chemicals with biological systems. Courses and research training in biochemistry, biophysics, genetics, and molecular biology provide a solid foundation for performing original research in pharmacology, neuropharmacology, and cancer chemotherapy.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

A four-year B.A. or B.S. degree (or its equivalent) in a basic science program is generally required.

Other requirements to be completed before admission:
Candidates for admission are evaluated on the basis of undergraduate record, GRE score, previous research experience, and letters of recommendation.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of official transcripts; and a clearly written statement of career interests, goals, and objectives.

Applicants must submit scores from the General Test of the GRE, with scores above the 80th percentile in all categories preferred.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7.5

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
24 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students are required to maintain a GPA of 3.00. Students who fail to maintain this standard must petition the Director of Graduate Studies for permission to remain in the program.

For more detailed information, contact the Director of Graduate Studies in Pharmacology.

Joint- or Dual-degree Coursework: Joint Degree Program in Law, Health and the Life Sciences. Student may take a total of 12 credits in common among the academic programs.

Website: http://physther.umn.edu

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 141
- This program requires summer semesters for timely completion.
- Courses in this Program are taught on campus for the first 7 semesters, with numerous off-site clinic visits scheduled throughout semester 2-7. The remaining 2 semesters of the Program consist of 4 full-time clinical internships. These internships occur off-campus in physical therapy clinics.
- Degree: Doctor of Physical Therapy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Physical Therapy Program, a division within the Department of Physical Medicine and Rehabilitation, offers a professional doctoral degree in physical therapy (D.P.T.). Physical therapy is a health care discipline involved with the study and rehabilitation of movement impairments such as muscular weakness, impaired coordination, joint stiffness, and pain, which can lead to functional problems affecting self care, employment, ambulation, etc. Graduates are prepared to promote proper health care and quality of living by maximizing human movement following disease or injury or by preventing its loss. The program requires three years of year-round, full-time graduate study. Academic coursework and research activity are completed during the first seven semesters. The final two semesters are devoted to clinical internships.

Accreditation
This program is accredited by Commission on Accreditation in Physical Therapy Education (CAPTE) (APTA).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The University of Minnesota Program in Physical Therapy has no required or preferred undergraduate major. Any baccalaureate degree or equivalent from an accredited institution is accepted.

Other requirements to be completed before admission:
To be eligible for admission, the student must complete a baccalaureate degree, or its foreign equivalent, from an accredited institution by June 1st of the year of admission, including the required prerequisite courses or their equivalents.

Applicant must complete at least 100 hours of volunteer or work experience in a physical therapy setting. Exposure to multiple and varied areas of practice in physical therapy and additional health care exposure are considered an important preparation. The GRE General exam only is required. TOEFL is required for international students. Two letters of recommendation.

Special Application Requirements:
Below is a list of required prerequisite coursework to be taken before entering the program. Courses must be taken A-F, unless receiving Advanced Placement (AP) credit. A minimum grade of C is required in all prerequisite coursework. It is recommended that these courses be taken within the previous five years. Courses may be taken at any accredited college. Students are expected to be skillful with computer applications for word processing and creating spreadsheets.
- General biology, with lab
- A second biology course of the student's choice, with lab
- Human anatomy
- Human physiology
- General chemistry or inorganic chemistry - minimum two courses, with lab
- General physics, which includes mechanics and electricity - minimum two courses, with lab
- General psychology
- Abnormal psychology
- Statistics - ANOVA and regression analysis content strongly recommended
- Introductory calculus (pre-calculus not acceptable; Intro to Calculus or Short Calculus acceptable)
- Medical terminology

For all AP courses on the transcript, a score must be entered. This will be the score issued by the College Board. Students must also forward a copy of the College Board Report to the admissions coordinator to keep on file.

If distance learning courses are taken from an accredited college or university for college credit, there is no limit to the number that may be taken through distance education.

All prerequisite courses and an undergraduate degree must be completed before the student enrolls in the professional program. Students may apply with two remaining prerequisites in progress. Past students have found that biochemistry, and human/animal biology classes have been helpful preparation for the D.P.T. curriculum.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations: (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
141 credits are required in the major.
This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The program requires 141 major field credits, of which 101 are core academic credits and 40 are clinical internship credits. Nine credits of research are included in the core academic credits and a scientific poster presentation and written exam based on this research culminates the project. No minor or related field is required. Students must maintain a cumulative GPA of 2.80 while in the program.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 33
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The Rehabilitation Science Program prefers Ph.D. applicants over M.S. applicants. The M.S. track often applies to students who are in need of a trial program to determine whether or not the Ph.D. track is a good fit. In addition, the M.S. track is used for students who initially begin the Ph.D., but find that the Ph.D. is not the best fit and subsequently switch to the M.S.

The graduate program in rehabilitation science is a post-professional program designed to train rehabilitation scientists and academicians. The program includes occupational and physical therapists and students with other backgrounds interested in rehabilitation research. The program's philosophy provides students with 1) a strong foundation in research methodology, 2) a concentrated educational experience specifically tailored toward a student's specific research question in rehabilitation science, and 3) a working knowledge of the importance of a collaborative, interdisciplinary approach to the scientific process.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Minimum US equivalent bachelor's degree.

Other requirements to be completed before admission:
Applicants must hold a US equivalent bachelor's degree or graduate degree in a discipline related to rehabilitation such as biomedical engineering, medicine, occupational therapy, physical therapy, or speech/audiology. International students must hold a comparable foreign degree from an accredited program. Depending on the educational background of the applicant, admission may be contingent upon completion of selected prerequisite coursework.

Special Application Requirements:
In addition to the University's application (including personal statement and fee), applicants must submit the following materials: GRE General Test scores (scores in the 60th percentile or higher are preferred); official transcripts; three letters of reference; and TOEFL score for international students. Student must also have an agreed-upon faculty adviser at the time of applying. Compatibility of research interests is a major determinant in the student/adviser relationship.

The Rehabilitation Science Program prefers Ph.D. applicants over M.S. applicants. The M.S. track often applies to students who are in need of a trial program to determine whether or not the Ph.D. track is a good fit. In addition, the M.S. track is used for students who initially begin the Ph.D., but find that the Ph.D. is not the best fit and subsequently switch to the M.S.

GRE score is mandatory. Scores in the 50th percentile or higher are preferred.

Applicants must submit their test score(s) from the following:
- GRE
General Test - Verbal Reasoning: 154
General Test - Quantitative Reasoning: 155
General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 88
  - Internet Based - Listening Score: 21
  - Internet Based - Writing Score: 23
  - Internet Based - Reading Score: 21
  - Internet Based - Speaking Score: 23

- **IELTS**
  - Total Score: 6.5

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 9 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 14 to 21 major credits and 9 to 16 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** The Plan B project is a demonstration of the student’s familiarity with the tools of research or scholarship in their major field, the ability to work independently, and the ability to present the results of their investigation effectively, by completing at least one Plan B project. The graduate faculty in each major field may require as many as three such projects. The Plan B project(s) should involve a combined total of approximately 120 hours (the equivalent of three full-time weeks) of work. The graduate faculty in each major field specifies both the nature and extent of the options available to satisfy this requirement, and whether the requirement is to be satisfied in conjunction with, or independent of, the courses in the student's program.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

M.S. Plan A students must complete a minimum of 23 graduate course credits, in addition to 10 thesis credits. MS Plan B students must complete a minimum of 30 graduate course credits. The break down of credit requirements is as follows for both Plan A and Plan B: 14 credits or more of RSC course work, which include 4 credits from a core group of courses (RSC 5106, RSC 5206, RSC 5306, RSC 8106, RSC 8206, RSC 8306); 3 credits of statistics coursework (acceptable courses include, but are not limited to PUBH 6450 - Biostatistics I, PUBH 6451 - Biostatistics II, EPSY 8261 - Statistical Methods I, EPSY 8262 - Statistical Methods II), and 6 or more additional graduate credits from Rehab Science or from other graduate disciplines. For Plan B students, the remaining 7 graduate credits are determined in consultation with the student's advisor. Students may minor in a supporting field, but minors are not required. Minor areas of past students include gerontology, kinesiology, and public health. If a student chooses to declare a minor, the student must follow the minor requirements of the program offering the minor. The student's adviser may require additional courses. Students pursuing Plan A (with thesis) have the additional requirement of registering for 10 thesis credits.

- **Program Type:** Graduate minor related to major
- **Requirements for this program are current for Fall 2014**
- **Length of program in credits (Masters):** 6
- **Length of program in credits (Doctorate):** 12
- **This program does not require summer semesters for timely completion.**

Along with the program-specific requirements listed below, please read the [General Information](http://www.rehabscience.umn.edu) section of the catalog website for requirements that apply to all major fields.

The graduate program in rehabilitation science is a post-professional program designed to train rehabilitation scientists and academicians. The program includes occupational and physical therapists and students with other backgrounds interested in rehabilitation research. The program's philosophy provides students with 1) a strong foundation in research methodology, 2) a concentrated educational experience specifically tailored toward a student's specific research question in rehabilitation science, and 3) a working knowledge of the importance of a collaborative, interdisciplinary approach to the scientific process.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

Minimum US equivalent bachelor's degree.

Other requirements to be completed before admission:
Applicants must hold a bachelor's degree or graduate degree in a discipline related to rehabilitation such as biomedical engineering, medicine, occupational therapy, physical therapy, or speech/audiology. International students must hold a comparable foreign degree from an accredited program. Depending on the educational background of the applicant, admission may be contingent upon completion of selected prerequisite coursework.

**Special Application Requirements:**
The student must inform the director of graduate studies (DGS) in writing of his or her intent to pursue the minor. A rehabilitation science faculty admissions committee determines student admission for the minor. To be admitted, a student must be an active graduate student pursuing an equivalent graduate degree in another field. The student must be in good academic standing within his or her major program. The student must have a mutually agreed-upon graduate faculty member in rehabilitation science serve as a reviewer on the student's dissertation committee and serve as the minor field examiner on the final exam committee.

For an online application or for more information about graduate education admissions, see the [General Information](http://www.rehabscience.umn.edu) section of the catalog website.

**Program Requirements**
Use of 4xxx courses towards program requirements is not permitted.

Master's students must complete a minimum of 6 RSC credits. Doctoral students must complete a minimum of 12 RSC credits. All students pursuing the minor must take the RSC courses on the A-F grade basis, and maintain at least a 3.0 GPA in those courses. Up to 2 RCS independent study credits are allowed for the master's, and up to 4 RCS independent study credits are allowed for the doctoral degree.
Below is a list of eligible rehabilitation science courses. Independent courses are indicated with an asterisk (*).

RSC 5101 - Math Tools for Research Applications (1 cr)
RSC 5106 - RSC Past, Present, Future (1 cr)
RSC 5135 - Advanced Biomechanics I: Kinematics (3 cr)
RSC 5200 - Intro to TMS
RSC 5206 - Academic Ethos (1 cr)
RSC 5231 - Clinical Biomechanics (3 cr)
*RSC 5294 - Independent Study in Rehabilitation Science (credits arranged)
RSC 5306 - Scientific and Professional Presentation (1 cr)
RSC 5814 - Age, Exercise, and Rehabilitation (2 cr)
RSC 5841 - Rehabilitation Science Instrumentation and Methodology (4 cr)
RSC 5901 - Scholarly Inquiry in Health Sciences (4 cr)
RSC 8106 - Critical Analysis of Scientific Literature (2 cr)
*RSC 8130 - Current Literature (credits arranged)
*RSC 8170 - Special Topics in Rehabilitation Science (credits arranged)
*RSC 8185 - Problems in Rehabilitation Science (credits arranged)
RSC 8192 - Research Design in Rehabilitation Science (3 cr)
RSC 8206 - Grant Writing (2 cr)
RSC 8282 - Problems in Human Movement (4 cr)
RSC 8306 - Peer Review and Publication (2 cr)

The program's philosophy provides students with 1) a strong foundation in research methodology, 2) a concentrated educational experience specifically tailored toward a student's specific research question in rehabilitation science, and 3) a working knowledge of the importance of a collaborative, interdisciplinary approach to the scientific process.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Minimum US equivalent bachelor's degree.

Professional, graduate, or master's degree preferred but not required.

Other requirements to be completed before admission:
Applicants must hold a US equivalent bachelor's degree or graduate degree in a discipline related to rehabilitation such as biomedical engineering, medicine, occupational therapy, physical therapy, or speech/audiology. International students must hold a comparable foreign degree from an accredited program. Depending on the educational background of the applicant, admission may be contingent upon completion of selected prerequisite coursework.

Special Application Requirements:
In addition to the University's application (including personal statement and fee), applicants must submit the following materials: official GRE General Test scores (scores in the 60th percentile or higher are preferred); official transcripts; three letters of recommendation; and TOEFL scores for international students. Student must also have an agreed-upon faculty adviser at the time applying. Compatibility of research interests is a major determinant in the student/adviser relationship.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 154
  - General Test - Quantitative Reasoning: 155
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 88
  - Internet Based - Listening Score: 21
- Internet Based - Writing Score: 23
- Internet Based - Reading Score: 21
- Internet Based - Speaking Score: 23

IELTS
- Total Score: 6.5

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
16 credits are required in the major.
20 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The Ph.D. degree requires a minimum of 36 graduate credits, in addition to 24 dissertation credits. The minimum of 36 graduate credits is broken down as follows: 16 credits of Rehabilitation Science (RSC) credits, which include 6 credits of departmental core courses (RSC 5106, RSC 5206, RSC 5306, RSC 8106, RSC 8206, RSC 8306); 12 additional graduate credits which may be a combination of RSC courses or courses from other disciplines; and 8 graduate credits of approved statistics coursework. Minors are allowed, but not required. Sample minors of past students include gerontology, neuroscience, and public health. If a student chooses to declare a minor, the student must follow the minor requirements of the program offering the minor. RSC courses and statistics courses cannot be applied to the credits needed for the minor degree. Acceptable statistics courses include, but are not limited to: PUBH 6450 - Biostatistics I, PUBH 6451 - Biostatistics II, EPSY 8261 - Statistical Methods I, and EPSY 8262 - Statistical Methods II. To fulfill the requirement students need to take both courses in the respective series (Biostats I and Biostats II; Stat Methods I and Stat Methods II). Students cannot fulfill the statistics requirement by taking only PUBH 6450 - Biostatistics I and EPSY 8261 - Statistical Methods I. In addition to these minimum requirements, the adviser may require additional courses. Students should meet with their advisers prior to each semester to plan their courses of study.

Joint- or Dual-degree Coursework: DPT/PhD-Rehabilitation Science

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This degree program offers training in stem cell biology, a rapidly growing interdisciplinary field that rests on foundations provided by molecular, cellular, and developmental biology. Students will take lecture, lab, and seminar courses in these various disciplines, in addition to stem cell biology. They will interact with members of the Stem Cell Institute through participation in research seminars and journal clubs, and will spend a full calendar year conducting stem cell research in the laboratory of a stem cell biology graduate program faculty member. This research will form the basis of the master's thesis.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

A bachelor's degree or foreign equivalent in biological science or a related field.

Special Application Requirements:
Applicants must upload 1) a personal statement (500 words or less) outlining previous research experience, research interests, and long- and short-term goals; 2) a curriculum vitae or resume; 3) the names of three individuals whom the student has asked to write letters of recommendation; and 4) unofficial transcripts to the Apply Yourself on-line application web site.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 94
  - Internet Based - Listening Score: 22
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 22
  - Internet Based - Speaking Score: 26
- Paper Based - Total Score: 580
- IELTS
  - Total Score: 7
  - Listening Score: 6.2
  - Reading Score: 6.2
  - Writing Score: 6.2
  - Speaking Score: 6.2
- MELAB
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 to 16 major credits, 4 to 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students must demonstrate familiarity with the tools of research and scholarship in their major field, the ability to work independently, and the ability to present the results of their investigation effectively, by completing a master's thesis and taking an oral exam.

The M.S. is a multidisciplinary program that prepares the basic science undergraduate for a career in research, teaching, or industry within the field of stem cell biology. In addition to taking courses in two or three semesters, students will concurrently conduct research for a full calendar year; this research will form the basis for the thesis.

**Required Courses**

All students are required to take these courses.

**Required Courses**

- **SCB 5051** - Stem Cell Biology Practical Training Module (1.0 cr)
- **SCB 5054** - Stem Cell Institute Research Seminar and Journal Club (2.0 cr)
- **SCB 8181** - Stem Cell Biology (3.0 cr)

**Required Molecular Biology Course**

At least one of these courses is required.

- **BIOC 8002** - Molecular Biology and Regulation of Biological Processes (3.0 cr)
- or **GCD 4034** - Molecular Genetics (3.0 cr)

**Required courses - at least one of these three is required.**

At least one of these courses is required.

- **GCD 8161** - Advanced Developmental Biology (3.0 cr)
- or **GCD 8008** - Mammalian Gene Transfer and Expression (2.0 cr)
- or Either 5xxx or 8xxx level course, must be approved by SCB program before registration.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 12
- Length of program in credits (Doctorate): 12
- This program requires summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This degree program offers training in stem cell biology, which is a rapidly growing interdisciplinary field that rests on foundations provided by molecular, cellular, and developmental biology. Students will take lecture, lab, and seminar courses in these various disciplines, in addition to stem cell biology. They will interact with members of the Stem Cell Institute through participation in research seminars and journal clubs, and will spend a full calendar year conducting stem cell research in the laboratory of a stem cell biology graduate program faculty member. This research will form the basis of the master's thesis.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Applicants must be admitted to a Ph.D. program and obtain approval from the director of graduate studies in stem cell biology to enroll in the minor program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

In addition to the major requirement appropriate to the student's specific program, the stem cell biology minor will require 12 credits from designated courses with a minimum GPA 3.00.

The main research project must be done in the lab of a member of the stem cell biology graduate faculty.

• Program Type: Master's
• Requirements for this program are current for Fall 2014
• Length of program in credits: 63
• This program requires summer semesters for timely completion.
• Degree: Master of Science in Surgery

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The general surgery program trains medical doctors for the practice of surgery and for academic positions. See the Medical School Catalog for professional degree requirements; see below for academic degree requirements. Trainees spend two to three years in laboratory research, either in a basic science or in surgery, after which they begin their senior residency and chief residency training. The Medical School's laboratory departments offer many graduate courses closely related to surgery (see the graduate programs in biochemistry, molecular biology, and biophysics; cellular and integrative physiology; microbiology, immunology, and molecular pathobiology; and pharmacology). These fields also offer opportunities for research work. The Department of Surgery offers supervised work in its experimental research laboratories, as well as in its hospital and outpatient departments in the areas of surgical diagnosis and operative surgery and in some surgical specialties (such as colon and rectal surgery, transplantation, thoracic and cardiovascular surgery, and pediatric surgery).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Prospective students must be in the general surgery training program and have two to three clinical years of training completed.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 47 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The master's degree in surgery (M.S.Surg.) is offered Plan A only. Students spend two to three years in the Medical School's general surgery program. A minimum of 53 course credits (47 in the major, plus 6 in the minor or related fields) plus 10 thesis credits are required for a total of 63 credits.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program requires summer semesters for timely completion.
- Degree: Adlt Hlth/Geron Clincial Nurse Spec Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postgraduate certificate program in nursing offers students with a doctor of nursing practice (D.N.P.) or other graduate degree in a clinical nursing specialty area the opportunity to complete an additional area of study. Completion of required coursework and practice hours provides eligibility to take certification examinations.

Accreditation
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A D.N.P. or other accredited graduate degree in a clinical nursing specialty area is required for admission to this program.

Other requirements to be completed before admission:
All applicants must have a current registered nurse license.

Special Application Requirements:
Applicants are required to submit transcripts from all institutions where post-secondary credit was earned, reference materials containing an Admission Reference Form and personal letter of reference from two separate individuals, two essays, a current curriculum vitae/resume, a current registered nurse license, and English language proficiency scores (if applicable). Application deadlines for this certificate are a priority deadline of November 1, with rolling admissions on a space-available basis until March 1.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
- MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Please contact the School of Nursing for detailed information about the requirements for this certificate.

Courses may include:
- NURS 6405 - Advanced Practice CNS Roles Across the Lifespan (3.0 cr)
- NURS 6406 - Advanced Practice CNS Roles Across the Lifespan: Practicum (1.0 cr)
- NURS 6407 - Advanced Nursing Care of Older Adults (3.0 cr)
- NURS 6408 - Advanced Nursing Care of Older Adults Practicum (1.0 cr)
- NURS 6502 - Assessment and Management of Health for Advanced Practice Nurses, II (3.0 cr)
- NURS 7505 - Assessment and Management of Health for Advanced Practice Nurses Practicum II (1.0 - 2.0 cr)
- NURS 7706 - Implementing the Role of the Clinical Nurse Specialist in Acute Care (1.0 cr)
- NURS 7406 - Advanced Nursing Practicum in Adult-Gerontology Health (3.0 cr)
- NURS 7705 - The Adult and Gerontological Clinical Nurse Specialist in Acute Care (2.0 cr)

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 37 to 100
- This program requires summer semesters for timely completion.
- Degree: Doctor of Nursing Practice

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Doctor of Nursing Practice (D.N.P.) Program is offered as the post-baccalaureate with specialty (13 specialties). The School of Nursing also offers the Post-Master's D.N.P. Program (35-36 credits) for students who have completed a master's degree in a nursing practice specialty.

The D.N.P. program is an innovative, practice-focused program that prepares students to be leaders in health care, develop quality improvement, and systems problem solving. It prepares nurses to create and lead new models of care delivery for communities locally, across the nation, and around the world. Students work with faculty who are leaders in their fields and on the cutting edge of nursing research and practice. These experts become mentors and guide students through the program. The unique, interdisciplinary core curriculum is divided into the following four areas.

1. D.N.P. Core - Includes science of nursing intervention, moral and ethical positions, research, statistics, program evaluation, evidence-based practice, epidemiology, informatics, leadership, health economics, health policy, and teaching and learning.
2. D.N.P. Specialty Core - Prepares students for advanced clinical practice; includes physiology, pharmacology, pharmacotherapeutics, and advanced health assessment.
3. DNP Specialization - Prepares graduates for certification in their chosen specialty by a national certifying body and includes:
   a. Advanced clinical practice with specialty-specific courses for each of the areas of clinical specialization
   b. Other specialty coursework in public health, organizational leadership, informatics, and integrative health and healing
4. Scholarly Leadership Project - Completed by all students in a three-semester sequence during which the project is planned, implemented, evaluated, and disseminated

Accreditation
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The post-baccalaureate D.N.P. and post-master's D.N.P. programs require an entry-level nursing degree (e.g. B.S.N., B.A.N., post-baccalaureate certificate in nursing, or entry-level master of nursing)

A graduate degree is not required for admission to the post-baccalaureate D.N.P. program.

Applicants for the post-master's D.N.P. must hold a master's degree in a nursing practice specialty.

Other requirements to be completed before admission:
The required application process is available on the School of Nursing website at www.nursing.umn.edu. Interviews are by invitation.
only and are not granted to all applicants. Application deadlines for the D.N.P. program: September 1 for the nurse anesthesia specialty. All other specialties have November 1 for priority consideration, with applications accepted on a space available basis until March 1.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 144

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
- MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (GRE, TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
37 to 100 credits are required in the major.
This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Core Courses
- NURS 6200 - Science of Nursing Intervention (3.0 cr)
- NURS 7100 - DNP Seminar I (2.0 cr)
- NURS 7101 - DNP Seminar II (3.0 cr)
- NURS 7102 - DNP Seminar III (2.0 cr)
- NURS 7110 - DNP Project Direction I: Planning (1.0 cr)
- NURS 7111 - DNP Project Direction II: Implementation (1.0 cr)
- NURS 7112 - DNP Project Direction III: Evaluation (1.0 cr)
- NURS 7300 - Program Evaluation (3.0 cr)
- NURS 7400 - Health Policy Leadership (3.0 cr)
- NURS 7600 - Nursing Research and Evidence Based Practice (4.0 cr)
- NURS 7610 - Health Innovations and Leadership (3.0 cr)
- NURS 7900 - Scholarly Teaching and Learning in Nursing (3.0 cr)
- NURS 6110 - Epidemiology in Nursing (2.0 cr)
  or PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may complete the program with more than one sub-plan.

Adult Health/Gerontological Clinical Nurse Specialist
The D.N.P. program with a specialty in adult health and gerontological nursing as a clinical nurse specialist prepares nurses for leadership as advanced practice nurses and clinical experts to provide advanced nursing care to adults and elders in a variety of settings. The D.N.P. program is for students who already hold a baccalaureate degree in nursing, and involves both coursework and practicum experiences as well as a final internship where the student has the opportunity focus on a sub-specialty area (e.g. oncology, cardiology, palliative care), if desired. Graduates work as expert clinicians and consultants in acute care settings, nursing homes, transitional care, and specialty practices. The adult health and gerontological specialty offers leadership preparation for nurses desiring expertise in the management of complex health conditions, working with nurses and interdisciplinary teams and organizations to provide care and services for adults and older adults. Students ground their studies in the science of nursing interventions, moral/ethical issues, and nursing research. Practicum experiences are arranged to meet the individual needs of students while also meeting...
accreditation and certification requirements. In addition to completing core studies in the specialty, students also gain skills in evidence-based practice, program evaluation, informatics, teaching/learning, health economics, health care policy, and epidemiology.

**Required Coursework**

CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 5200 - Holistic Health Assessment and Therapeutics for Advanced Practice Nurses (3.0 cr)
NURS 5222 - Advanced Physiology (3.0 cr)
NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
NURS 6405 - Advanced Practice CNS Roles Across the Lifespan (3.0 cr)
NURS 6406 - Advanced Practice CNS Roles Across the Lifespan: Practicum (1.0 cr)
NURS 6407 - Advanced Nursing Care of Older Adults (3.0 cr)
NURS 6408 - Advanced Nursing Care of Older Adults Practicum (1.0 cr)
NURS 6502 - Assessment and Management of Health for Advanced Practice Nurses, II (3.0 cr)
NURS 7000 - DNP Proseminar (1.0 cr)
NURS 7200 - Economics of Health Care (3.0 cr)
NURS 7202 - Moral and Ethical Positions and Actions in Nursing (2.0 cr)
NURS 7406 - Advanced Nursing Practicum in Adult-Gerontology Health (3.0 cr)
NURS 7505 - Assessment and Management of Health for Advanced Practice Nurses Practicum II (1.0 - 2.0 cr)
NURS 7706 - Implementing the Role of the Clinical Nurse Specialist in Acute Care (1.0 cr)

Statistics: As approved by D.N.P. specialty

**Adult/Gerontological Nurse Practitioner**

The D.N.P. program with a specialty in adult health and gerontological nursing as a nurse practitioner prepares nurses for leadership as advanced practice nurses and clinical experts to provide advanced nursing care to adults in a variety of settings. This D.N.P. program is designed for students who already hold a baccalaureate degree in nursing, and involves both coursework and practicum experiences, as well as a final internship where the student has the opportunity to focus on a sub-specialty area (e.g. oncology, cardiology, palliative care), if desired. Graduates work in primary care/ambulatory care settings, hospitals, group practices of advanced practice gerontological nurses that manage care of adults and older adults in nursing homes, transitional care settings, assisted living, and specialty practices.

The adult health and gerontological specialty offers leadership preparation for nurses desiring expertise in advanced nursing assessment and management for health promotion and disease prevention, management of complex health conditions, and working with interdisciplinary teams to provide care and services for persons ranging from adolescents, adults, and older adults. Practicum experiences are arranged to meet the individual needs of students while also meeting accreditation and certification requirements.

**Required Coursework**

CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 5200 - Holistic Health Assessment and Therapeutics for Advanced Practice Nurses (3.0 cr)
NURS 5222 - Advanced Physiology (3.0 cr)
NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
NURS 6305 - Women's Reproductive Health Care (2.0 - 3.0 cr)
NURS 6307 - Women's Health Care Practicum (1.0 cr)
NURS 6407 - Advanced Nursing Care of Older Adults (3.0 cr)
NURS 6408 - Advanced Nursing Care of Older Adults Practicum (1.0 cr)

NURS 7505 - Assessment and Management of Health for Advanced Practice Nurses Practicum II (1.0 - 2.0 cr)

Statistics: As approved by D.N.P. specialty

**Women's Healthcare Nurse Practitioner or (NP)**

The D.N.P. program with a specialty in women's health prepares nurses for leadership as advanced practice nurses. This D.N.P. program is for students who hold a baccalaureate degree in nursing, and involves both coursework and clinical practicum experiences with an internship in the final semester.

Clinical experience is offered in primary care, women's health, and specialty practice areas, such as oncology and reproductive endocrinology. Students ground their studies in the science of nursing intervention, moral/ethical issues, and nursing research. They
then focus on courses that examine the basis of assessment and intervention for adolescent and adult populations with an emphasis on adolescent and adult women. Practicum experiences are arranged to meet the individual needs of students while also meeting accreditation and certification requirements. In addition to completing core studies in the specialty, students also gain skills in evidence-based practice, program evaluation, informatics, teaching/learning, health economics, health care policy, and epidemiology. A final project that is a systematic investigation of a practice problem is planned, implemented, and completed during the curriculum.

**Required Coursework**

- CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
- NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
- NURS 5200 - Holistic Health Assessment and Therapeutics for Advanced Practice Nurses (3.0 cr)

- NURS 7200 - Economics of Health Care (3.0 cr)
- NURS 7202 - Moral and Ethical Positions and Actions in Nursing (2.0 cr)
- NURS 7310 - ANP/WHNP Clinical and Professional Integration (2.0 cr)

**Nurse Anesthesia**

This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

The nurse anesthesia area of study prepares registered nurses to become Certified Registered Nurse Anesthetists (CRNAs) who are prepared for nurse anesthesia practice at the highest level. Graduates will possess expertise in general and regional anesthesia techniques and will be prepared to provide leadership in the practice setting. The nurse anesthesia area of study is fully accredited by the Council on Accreditation of Nurse Anesthesia Education Programs. In January of 2009, the University of Minnesota Nurse Anesthesia Area of Study received the maximum 10-year accreditation approval from the Council on Accreditation of Nurse Anesthesia Educational Programs. The program was the first nurse anesthesia program in the U.S. to be accredited to offer the entry-level D.N.P.

With the Minneapolis VA Medical Center serving as the primary clinical site for the program, the University of Minnesota nurse anesthesia students rotate to several urban and rural clinical sites, which offer a broad spectrum of practice experiences. Some of the clinical sites are required, and some are optional. All required clinical sites are within daily driving distance of the campus.

Nurse anesthesia students complete the requirements for the D.N.P. degree, as well as the requirements to take the National Certification Exam for nurse anesthetists.

**Required Coursework**

- NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
- NURS 5222 - Advanced Physiology (3.0 cr)
- NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
- NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
- NURS 6895 - Adult Acute Care Holistic Health Assessment (2.0 cr)
- NURS 6900 - Introduction to Principles of Anesthesia (6.0 cr)
- NURS 6901 - Basic Nurse Anesthesia Principles (3.0 cr)
- NURS 6902 - Nurse Anesthesia Care: Cardiothoracic Disease (2.0 cr)
- NURS 6903 - Nurse Anesthesia Care: Special Populations (2.0 cr)
- NURS 6910 - Introduction to Nurse Anesthesia Practicum I (1.0 cr)
- NURS 6911 - Basic Nurse Anesthesia Principles Practicum I (1.0 cr)
- NURS 6912 - Nurse Anesthesia Care: Cardiothoracic Disease Practicum (3.0 cr)
- NURS 6913 - Nurse Anesthesia Care: Special Populations Practicum (4.0 cr)
- NURS 7000 - DNP Proseminar (1.0 cr)
- NURS 7004 - Nurse Anesthesia Practicum A (5.0 cr)
- NURS 7005 - Nurse Anesthesia Practicum B (5.0 cr)
- NURS 7006 - Nurse Anesthesia Practicum C (5.0 cr)
- NURS 7200 - Economics of Health Care (3.0 cr)
Family Nurse Practitioner
The D.N.P. program with a specialty in the family nurse practitioner (FNP) area of study prepares nurses for leadership as advanced practice nurses. The three-year D.N.P. program is for students who already hold a baccalaureate degree in nursing, and involves both coursework and clinical practicums.

The FNP area of study offers leadership preparation for nurses desiring expertise in the scope of practice and in the role of the family nurse practitioner. Students ground their studies in the science of nursing intervention, moral/ethical issues, and nursing research. They then focus on courses that examine the basis of assessment and intervention for families and individuals of all ages. Practicum experiences are arranged to meet the individual needs of students while also meeting accreditation and certification requirements. In addition to completing core studies in the specialty, students also gain skills in evidence-based practice, program evaluation, informatics, teaching/learning, health economics, health care policy, and epidemiology. A final project that is a systematic investigation of a practice problem is planned, implemented, and completed during the curriculum.

Where applicable, completion of required FNP coursework and practice hours provides eligibility to sit for the FNP Certification through the American Nurses Credentialing Center.

Required Coursework
- **CSPH 5101** - Introduction to Integrative Healing Practices (3.0 cr)
- **NURS 5115** - Interprofessional Health Care Informatics (3.0 cr)
- **NURS 5200** - Holistic Health Assessment and Therapeutics for Advanced Practice Nurses (3.0 cr)
- **NURS 5222** - Advanced Physiology (3.0 cr)
- **NURS 5228** - Pharmacology for Advanced Practice Nursing (2.0 cr)
- **NURS 5229** - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
- **NURS 6102** - Family Health Theory (2.0 cr)
- **NURS 6305** - Women's Reproductive Health Care (2.0 - 3.0 cr)
- **NURS 6501** - Assessment and Management of Health for Advanced Practice Nurses, I (3.0 cr)
- **NURS 6502** - Assessment and Management of Health for Advanced Practice Nurses, II (3.0 cr)
- **NURS 7000** - DNP Proseminar (1.0 cr)
- **NURS 7200** - Economics of Health Care (3.0 cr)
- **NURS 7202** - Moral and Ethical Positions and Actions in Nursing (2.0 cr)
- **NURS 7501** - Health Care of Children for the Family Nurse Practitioner Practicum (1.0 cr)
- **NURS 7503** - Reproductive Health Care of Women Practicum for Family Nurse Practitioners (1.0 cr)
- **NURS 7504** - Assessment and Management of Health for Advanced Practice Nurses, Practicum I (1.0 - 2.0 cr)
- **NURS 7505** - Assessment and Management of Health for Advanced Practice Nurses Practicum II (1.0 - 2.0 cr)
- **NURS 7506** - Family Practice Practicum III: Assessment and Management of Health for the Family Nurse Practitioner (1.0 cr)
- **NURS 7507** - Assessment Management of Health Practicum IV: Community Health Leadership for Family Nurse Prac (1.0 cr)
- **NURS 7508** - Assessment Management of Health Practicum V: Clinical Specialty Care for Family Nurse Practitioner (1.0 cr)
- **NURS 7509** - Assessment and Management of Health Practicum VI: Primary Care for the Family Nurse Practitioner (1.0 cr)
- **NURS 7515** - Health Care of Children for the Family Nurse Practitioner: Well Child Care (1.0 cr)
- **NURS 7516** - Health Care of Children for the Family Nurse Practitioner: Acute and Chronic Management (2.0 cr)

Statistics: As approved by D.N.P. specialty

Health Innovation and Leadership
Health care is delivered today in diverse settings, by an expanding workforce and with extraordinary opportunities for nurses to lead, whether through formal leadership positions or through personal advocacy, in traditional settings or in emerging sites. This requires an individual who can think broadly and embrace a global perspective; who embraces diversity in all its forms, including diversity of thought; who is curious and never satisfied with the status quo; who stimulates new ways of thinking and solutions which open up possibilities for action; who bases action on informed practice gained from multiple ways of knowing; who engages in critical thinking, and learns from other thought leaders; who inspires and creates needed change within a particular environment; who can work effectively with a variety of individuals and within disparate groups; and who can create healing environments within which others can do their best work.

The D.N.P. with a focus on health innovation and leadership prepares nurses to function effectively as leaders in traditional and contemporary settings. The goal is to prepare a leader who can work well in the current environment while promoting change and improvement. Students in the program utilize a combination of learning strategies, readings, reflections, and independent learning experiences. Seminars will enable students and faculty to discuss relevant issues and share expertise.

Required Coursework
- **COMM 5441** - Communication in Human Organizations (3.0 cr)
Nursing Informatics

The nursing informatics (NI) specialty area prepares graduates with knowledge and skills necessary for leadership roles in health and nursing informatics to address the issues for consumers, clinical providers, and public health for processing and managing information through the use of various technologies. A wide array of courses throughout the University of Minnesota accompany nursing offerings, which offers students the opportunity to strengthen their disciplinary and interdisciplinary expertise.

With increasing demand for computerizing health information, graduates of the nursing informatics specialty are well positioned to assume leadership roles in nursing and health informatics field. The NI area of study provides knowledge and scholarship complemented by clinical experiences in the following areas:

* Systems analysis and design
* Knowledge representation and interoperability
* Clinical decision support and evidence-based practice
* Human factors and usability
* Leadership and health informatics
* Consumer, clinical provider, and population health informatics
* Health policy leadership
* Development and project management of health informatics projects
* Program evaluation
* Organization and administration of health services
* Ethical foundations of nursing
* Applied research

Required Coursework

HINF 5510 - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
CSPH 5711 - Optimal Healing Environments (3.0 cr)
NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 5116 - Consumer Health Informatics (1.0 cr)
NURS 5117 - Consumer Health Informatics Practicum (1.0 cr)

Statistics: As approved by D.N.P. specialty

Integrative Health and Healing

The integrative health and healing specialty area prepares graduates with skills necessary for working with individuals, families, communities and health systems in developing holistic approaches to health promotion, disease prevention, and chronic disease management, with a special emphasis on managing lifestyle changes and incorporating the use of complementary therapies. Graduates are prepared to work in diverse settings including hospitals, outpatient settings, health plans, corporate and community
organizations, and in private practice. A wide array of courses are available which offer students the opportunity to strengthen their disciplinary and interdisciplinary expertise. Through a collaboration with the Center for Spirituality and Healing, students can opt to concurrently earn a graduate certificate in integrative therapies and healing practices, including a focus in health coaching.

The integrative health and healing area of study provides a foundation of knowledge and practical experiences in the following areas:

* Optimal healing environments
* Botanical medicine
* Clinical aromatherapy
* Mind/body healing
* Functional nutrition
* Energy healing
* Health coaching
* Self-care
* Advanced integrative health and healing skills and program planning
* Applied research

Students choosing to complete coursework part-time are well accommodated by the curriculum.

**Required Coursework**

- CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
- CSPH 5102 - Art of Healing: Self as Healer (1.0 cr)
- NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
- CSPH 5226 - Advanced Meditation: Body, Mind, and Universe (1.0 cr)
- CSPH 5313 - Acupressure (1.0 cr)
- CSPH 5423 - Botanical Medicines: Foundations and Practical Applications (1.0 cr)
- CSPH 5431 - Functional Nutrition: An Expanded View of Nutrition, Chronic Disease, and Optimal Health (2.0 cr)
- CSPH 5503 - Aromatherapy Fundamentals (1.0 cr)
- CSPH 5533 - Introduction to Energy Healing (2.0 cr)
- CSPH 5535 - Reiki Healing (1.0 cr)
- CSPH 5536 - Advanced Reiki Healing: Level II (1.0 cr)
- CSPH 5631 - Healing Imagery I (2.0 cr)
- CSPH 5701 - Fundamentals of Health Coaching I (4.0 cr)

  or CSPH 5535 - Reiki Healing (1.0 cr)
- CSPH 5536 - Advanced Reiki Healing: Level II (1.0 cr)

**Nurse Midwifery**

This program combines academic preparation with clinical skills for the independent management of health care of women and newborns. Further, students receive additional academic preparation in health care policy, economics, evidence-based practice, evaluation and informatics, and complete a systems change project while in the program. D.N.P. midwifery graduates will be prepared to more quickly fulfill leadership roles in the health care setting.

Courses are offered in a web-based format, with multi-day, on-campus seminars approximately two to three times per semester, in Minneapolis. By taking the courses in a web-based or online format, students may complete the midwifery program without having to relocate. Trips to campus to interact with faculty and other students allow for development of a professional learning community and complete a systems change project while in the program. D.N.P. midwifery graduates will be prepared to more quickly fulfill leadership roles in the health care setting.

Trip to campus to interact with faculty and other students allow for development of a professional learning community and complete a systems change project while in the program. D.N.P. midwifery graduates will be prepared to more quickly fulfill leadership roles in the health care setting.

Nurse-midwives assist women and families to promote and maintain health, and to facilitate optimal individual and family integrity in the context of culture and community.

Pediatric Clinical Nurse Specialist

Students who pursue the pediatric clinical nurse specialist (PCNS) specialty area take core courses in nursing theory, moral/ethical issues, and research. They acquire skills in health assessment, intervention, and evaluation. They examine the care of children and families with special health care needs. They focus on planning and implementing programs to improve quality of care for children with chronic and complex illnesses. As the population of children with special health care needs continues to increase, there is likely to be a greater demand for clinical experts and leaders in pediatric nursing. The PCNS area of study is supported by the Center for Children with Special Health Care Needs.

PCNS coursework includes supervised clinical experiences. Efforts are made to provide students with clinical settings within their geographical area. Clinical courses are directed by certified faculty and supervised by clinical nurse specialist preceptors. The PCNS area of study can be completed in a two-year (full-time) or three-year (part-time) sequence.

PCNSs work in collaboration with health care teams in a variety of settings to facilitate quality care for children across the continuum of care settings. They function as clinical experts in the planning, implementation, and evaluation of patient care standards. They provide direct care, oversee staff, patient and family education, participate in clinical research, and develop programs specific to the needs of children.

Required Coursework

NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 5200 - Holistic Health Assessment and Therapeutics for Advanced Practice Nurses (3.0 cr)
NURS 5222 - Advanced Physiology (3.0 cr)

Pediatric Nurse Practitioner

The pediatric nurse practitioner (PNP) area of study incorporates theory and clinical courses to prepare students to provide comprehensive care to children and their families. Most students elect to complete the children with special health care needs (C SHCN) leadership track by taking additional courses which are supported by the Center for Children with Special Health Care Needs.
Coursework includes nursing theory, moral/ethical issues, research, child assessment, management of childhood illnesses, and health policy. Courses are taught by faculty from the School of Nursing, School of Public Health, the Institute of Child Development, Family Social Science, the Medical School, and the Institute of Community Integration in the College of Education.

Supervised clinical experience is incorporated in the program. Efforts are made to meet students’ individual goals and to provide experiences in their geographic area. Clinical experiences are available in interdisciplinary settings such as primary care, home care, schools, specialty clinics, community agencies, the legislature, and the Minnesota Department of Health.

At the completion of the program, students are eligible to take the Pediatric Nurse Practitioner certification examinations offered by the American Nurses Credentialing Center or the National Certification Board of Pediatric Nurse Practitioners and Nurses. Students in the CSHCN track are eligible for certification from the Institute on Community Integration.

### Psychiatric-Mental Health Nurse Practitioner

Graduate studies in psychiatric-mental health nursing prepare nurses to assume clinical nurse specialist roles with an emphasis on providing direct patient care to persons with major mental disorders and their families. Coursework focuses on the development of advanced practice nursing knowledge and skills required to provide both psychotherapeutic and biological interventions for the management of acute and chronic psychiatric symptoms with a variety of patients in diverse settings. Coursework integrates extant theories and research in the study of advanced health assessment, psychopathology assessment, psychopharmacology, and individual family and group therapy within various community and institutional systems.

Clinical emphasis is on secondary and tertiary psychiatric interventions and outcomes within a managed care context. Students are clinically precepted by certified psychiatric-mental health clinical nurse specialists. Clinical experiences are available in outpatient clinics, community mental health centers, hospitals, schools, and home care agencies. Full-time or part-time students may enroll in the area of study. Current psychiatric nursing experience is strongly encouraged.

Graduates will be academically prepared to take the American Nurses Credentialing Center (ANCC) certification examination for certified specialists in psychiatric-mental health nursing, after obtaining additional required post-master's clinical hours and supervision.

Public Health Nursing
The D.N.P. program with a specialty in public health nursing prepares nurses for leadership as advanced practice public health nurses in management, education, clinical practice, leadership, policy development, and advocacy. The three-year D.N.P. program is for students who already hold a baccalaureate degree in nursing, and involves both coursework and a practicum. This specialty offers leadership preparation for nurses desiring expertise in population-based public health nursing practice. Students ground their studies in the science of nursing intervention, moral/ethical issues, and nursing research. They then focus on courses that examine the basis of assessment and intervention of populations, integrating the study of health determinants and health disparities. Practicum experiences are arranged to meet the individual needs of students while also meeting accreditation and certification requirements. In addition to completing core studies in the specialty, students also gain skills in evidence-based practice, program evaluation, informatics, teaching/learning, health economics, health care policy, and epidemiology. A final project that is a systematic investigation of a practice problem is planned, implemented, and completed during the curriculum.

Required Coursework
CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
NURS 6930 - Foundations of Advanced Public Health Nursing Practice (3.0 cr)
NURS 6931 - Health Equity and Social Justice (3.0 cr)
NURS 6934 - Population-focused Assessment and Prioritization (1.0 cr)

Elective 2: Graduate Credit (3 credits)
Either course may be taken
NURS 6942 - Health Equity and Social Justice Practicum (2.0 cr)
or
NURS 7109 - Population Health Informatics Practicum (2.0 cr)

Public Health Nursing - Adolescent Nursing

Public Health Nursing - Adolescent Nursing
Graduate study in adolescent nursing utilizes interdisciplinary courses taught by faculty from the Schools of Nursing, Medicine, and Public Health, and the Institute for Child Development. Its curriculum emphasizes the special health care needs of youth and teaches learners best practices in working with youth to promote health and health care.

Students should visit the center's website to gain a better idea of what the Center for Adolescent Nursing is about: http://www.nursing.umn.edu/CANL.
NURS 5016 - Critical Reading of Scientific Literature in Adolescent Health (1.0 cr)
NURS 5604 - Advanced Health Assessment and Interventions with Adolescents (2.0 cr)
PUBH 6607 - Adolescent Health: Issues, Programs, and Policies (2.0 cr)

Post-Master's D.N.P.
The post-master's option is for individuals who already hold a master's degree in a nursing practice specialty and who have nursing specialty preparation. The D.N.P. program prepares nurses for leadership as advanced practice nurses, clinical experts, health care executives, policy experts, and informaticians.

Required Courses
Students must complete the core courses of the D.N.P. program.
NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 7200 - Economics of Health Care (3.0 cr)
Twin Cities Campus

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program requires summer semesters for timely completion.
- Degree: Family Nurse Practitioner Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postgraduate certificate program in nursing offers students with a doctor of nursing practice (D.N.P.) or other graduate degree in a clinical nursing specialty area the opportunity to complete an additional area of study. Completion of required coursework and practice hours provides eligibility to take certification examinations.

Accreditation
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A D.N.P. or other accredited graduate degree in a clinical nursing specialty area is required for admission to this program.

Other requirements to be completed before admission:
All applicants must have a current registered nurse license.

Special Application Requirements:
Applicants are required to submit transcripts from all institutions where post-secondary credit was earned, reference materials containing an Admission Reference Form and personal letter of reference from two separate individuals, two essays, a current curriculum vitae/resume, a current registered nurse license, and English language proficiency scores (if applicable). Application deadlines for this certificate are a priority deadline of November 1, with rolling admissions on a space available basis until March 1.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
• MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Please contact the School of Nursing for detailed information about the requirements for this certificate. Each applicant's curriculum is unique and based on the applicant's previous D.N.P. degree and coursework. Final coursework decisions are made by the faculty adviser.

Courses may include:

- **NURS 6501** - Assessment and Management of Health for Advanced Practice Nurses, I (3.0 cr)
- **NURS 6502** - Assessment and Management of Health for Advanced Practice Nurses, II (3.0 cr)
- **NURS 7500** - Health Care of Children for the Family Nurse Practitioner (3.0 cr)
- **NURS 7501** - Health Care of Children for the Family Nurse Practitioner Practicum (1.0 cr)
- **NURS 7503** - Reproductive Health Care of Women Practicum for Family Nurse Practitioners (1.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 15
- This program requires summer semesters for timely completion.
- Degree: Ldrshp in Hlth Info Tec for Hlth Pro PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

By combining formal clinical or public health advanced preparation with course work in health information technology (HIT), individuals who earn the postbaccalaureate certificate in leadership in health information technology for health professionals will be able to lead the successful deployment and use of HIT to achieve transformational improvement in the quality, safety, outcomes, and thus in the value of health services.

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Admittance to the program requires a baccalaureate degree from an accredited institution in a clinical or public health discipline. Example degrees would be a B.S./B.A. in nursing or public health.

Preferred: Advanced degree in clinical or public health discipline from an accredited institution (nursing M.S./D.N.P./Ph.D.; public health M.P.H./M.S./Ph.D.; M.S./Ph.D. in other health-related field)

Other requirements to be completed before admission:
Applicants must have clinical or public health experience. A minimum of two years of management experience is required if the applicant does not hold an advanced degree.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 587
- MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students may qualify for tuition support for informatics courses through the University Partnership in Health Informatics (UPHI). If students receive UPHI funding, they are required to complete certificate requirements within one year of starting the program.

Required Coursework
The certificate consists of seven courses (15 credits)
NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 5116 - Consumer Health Informatics (1.0 cr)
NURS 6105 - Systems Analysis and Design (3.0 cr)
NURS 7105 - Knowledge Representation and Interoperability (2.0 cr)
NURS 7108 - Population Health Informatics (2.0 cr)
NURS 7113 - Clinical Decision Support: Theory (2.0 cr)
HINF 5510 - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
or CSCI 5707 - Principles of Database Systems (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 54
- This program requires summer semesters for timely completion.
- Degree: Master of Nursing

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of nursing degree (M.N.) is a full-time, 16-month, graduate-level program for students with a baccalaureate (or higher) degree in a non-nursing field. The program includes all the essentials of a bachelor of science in nursing (B.S.N.) program, plus additional graduate work. Upon completion of the coursework, students are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN) and are also eligible for Public Health Nursing (PHN) certification in Minnesota. Traditional classroom formats are complemented by interactive components and web-based resources.

Accreditation
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Completion of a baccalaureate degree from an accredited institution in a non-nursing area of study completed no later than June 1 prior to start of fall semester for year admitted.

Other requirements to be completed before admission:
There are nine prerequisite courses to complete before the start of the master of nursing (M.N.) program: General Chemistry, Human Anatomy, Human Physiology, Microbiology, Pathology, Human Nutrition, Lifespan Growth and Development, Abnormal Psychology, Inferential Statistics.

Five courses must be complete, with final grades sent to the School of Nursing, by the application deadline. Students are recommended to make three of the five courses their science courses.

Special Application Requirements:
Prior to matriculation to the program, students must complete a Minnesota background check, immunizations, submit provider-level CPR verification, and meet the School of Nursing published technical standards. Application to the Master of Nursing program is available on the School of Nursing website. After a preliminary review of submitted materials, selected applicants are invited to participate in an interview with representatives of the admissions committee.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
• MELAB
- Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan C:** Plan C requires 54 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

**Capstone Project:** The capstone project is an examination of a clinical problem in the setting where students complete their final clinical rotation. It may also be a type of research experience or practicum with a School of Nursing faculty member.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students must maintain the compliance requirements (Minnesota background check, immunizations, provider-level CPR verification, and School of Nursing published technical standards) throughout the program.

**Required Coursework**

- NURS 5029 - Introduction to Nursing Interventions (4.0 cr)
- NURS 5030 - Foundational Concepts of Professional Nursing (3.0 cr)
- NURS 5031 - Human Response to Health and Illness: Adults and Elders (6.0 cr)
- NURS 5032 - Human Response to Health and Illness: Children and Childbearing Families (6.0 cr)
- NURS 5033 - Population Response to Health and Mental Illness (5.0 cr)
- NURS 5034 - Nursing Care of Complex Clients and Diverse Populations (2.0 cr)
- NURS 5035 - Practicum Nursing Care for Complex Health Conditions (4.0 cr)
- NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
- NURS 5190 - Essentials of Holistic Health Assessment (3.0 cr)
- NURS 5222 - Advanced Physiology (3.0 cr)
- NURS 5241 - Nursing Leadership for Effective Practice (3.0 cr)
- PHAR 5800 - Pharmacotherapy for the Health Professions (3.0 cr)
- NURS 6200 - Science of Nursing Intervention (3.0 cr)
- NURS 7202 - Moral and Ethical Positions and Actions in Nursing (2.0 cr)
- NURS 7600 - Nursing Research and Evidence Based Practice (4.0 cr)

**Program Sub-plans**

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

**MN Bridge Program**

This sub-plan is not currently accepting applicants.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program requires summer semesters for timely completion.
- Degree: Nurse Midwifery Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postgraduate certificate program in nurse midwifery offers students with a doctor of nursing practice (D.N.P.) or other graduate degree in a clinical nursing specialty area the opportunity to complete an additional area of study. Completion of required coursework and practice hours provides eligibility to take certification examinations.

Accreditation
This program is accredited by American Midwifery Certification Board & Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A D.N.P. or other accredited graduate degree in a clinical nursing specialty area is required for admission to this program.

Other requirements to be completed before admission:
All applicants must have a current registered nurse license.

Special Application Requirements:
Applicants are required to submit transcripts from all institutions where postsecondary credit was earned, reference materials containing an Admission Reference Form and personal letter of reference from two separate individuals, two essays, a current curriculum vitae/resume, a current registered nurse license, and English language proficiency scores (if applicable). Application deadlines for this certificate are a priority deadline of November 1, with rolling admissions on a space available basis until March 1.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
- MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Please contact the School of Nursing for detailed information about the requirements for this certificate. Each applicant's curriculum is unique and based on the applicant's previous D.N.P. degree and coursework. Final coursework decisions are made by the faculty adviser.

Courses may include:

- NURS 6305 - Women's Reproductive Health Care (2.0 - 3.0 cr)
- NURS 6306 - Women's Reproductive Health Practicum (1.0 cr)
- NURS 6501 - Assessment and Management of Health for Advanced Practice Nurses, I (3.0 cr)
- NURS 6212 - Primary Care Practicum: for Midwives (1.0 cr)
- NURS 6210 - Midwifery Care of the Childbearing Family (3.0 cr)
- NURS 6211 - Midwifery Care of the Childbearing Family Practicum (2.0 cr)
- NURS 6213 - Reproductive Healthcare for Women at Risk (2.0 cr)
- NURS 6214 - Reproductive Healthcare for Women at Risk Practicum (2.0 cr)
- NURS 7213 - Midwifery Clinical and Professional Integration (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The School of Nursing no longer admits students directly to the M.S. program in nursing. Students interested in pursuing graduate study in nursing may apply to the master of nursing (M.N.), doctor of nursing practice (D.N.P.) or nursing Ph.D. programs.

Accreditation
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
The School of Nursing does not accept students directly into the M.S. program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The program is offered under Plan A and Plan B. Plan A emphasizes research; Plan B prepares students to integrate research into advanced practice roles or leadership positions.

Plan A requires 30 credits: 14 credits in the major, including NURS 8170 - Research in Nursing (3 cr); NURS 8100 - The Discipline of Nursing (3 cr); NURS 8140 - Moral and Ethical Positions in Nursing (3 cr); 6 credits in a minor or related field; and 10 thesis credits.

Plan B requires a minimum of 30 credits with at least 9 credits of disciplinary core courses; 9 credits of advanced nursing core courses, including NURS 8194 - Problems in Nursing (3 cr); 6 credits of specialty core courses; and 6 credits in related fields. Individual areas of study vary in the number of credits required.
Program Sub-plans
A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 58 to 76
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Ph.D. program in nursing prepares scholars as scientists, leaders, innovators, and educators in nursing and health care who:
* discover new knowledge for nursing science and health care practice through ethical, innovative, theory-based research;
* integrate knowledge to influence health care delivery and policy through collaborative, interprofessional initiatives at organizational, local, state, regional, national, and global levels;
* create and evaluate strategies to improve the health and well-being of individuals, families, communities, and populations; and
* disseminate knowledge to those in nursing, other health sciences, policy makers, and the public through scholarly publication, formal teaching, and other creative venues.

**Accreditation**
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must submit their test score(s) from the following:
- **GRE**
  - General Test - Verbal Reasoning: 156
  - General Test - Quantitative Reasoning: 146
  - General Test - Analytical Writing: 5

International applicants must submit score(s) from one of the following tests:

- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A D.N.P. or other accredited graduate degree in a clinical nursing specialty area is required for admission to this program.

Other requirements to be completed before admission:
All applicants must have a current registered nurse license.

Special Application Requirements:
Applicants are required to submit transcripts from all institutions where post-secondary credit was earned, reference materials containing an Admission Reference Form and personal letter of reference from two separate individuals, two essays, a current curriculum vitae/resume, a current registered nurse license, and English language proficiency scores (if applicable). Application deadlines for this certificate are a priority deadline of November 1, with rolling admissions on a space available basis until March 1.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
- MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Please contact the School of Nursing for detailed information about the requirements for this certificate.

Courses may include:
- **NURS 6307** - Women's Health Care Practicum (1.0 cr)
- **NURS 7504** - Assessment and Management of Health for Advanced Practice Nurses, Practicum I (1.0 - 2.0 cr)
- **NURS 6305** - Women's Reproductive Health Care (2.0 - 3.0 cr)
- **NURS 6306** - Women's Reproductive Health Practicum (1.0 cr)
- **NURS 6501** - Assessment and Management of Health for Advanced Practice Nurses, I (3.0 cr)
- **NURS 6925** - Advanced Concepts in Women's Health Care I (3.0 cr)
- **NURS 6926** - Advanced Concepts in Women's Health for WHNP Practicum I (1.0 cr)
- **NURS 6408** - Advanced Nursing Care of Older Adults Practicum (1.0 cr)
- **NURS 7505** - Assessment and Management of Health for Advanced Practice Nurses Practicum II (1.0 - 2.0 cr)
- **NURS 6407** - Advanced Nursing Care of Older Adults (3.0 cr)
**Twin Cities Campus**  
**Experimental and Clinical Pharmacology M.S.**  
**Experimental and Clinical Pharmacology**  
**College of Pharmacy**

Website: [http://www.pharmacy.umn.edu/ecp/grad/home.html](http://www.pharmacy.umn.edu/ecp/grad/home.html)

- Program Type: Master's  
- Requirements for this program are current for Fall 2014  
- Length of program in credits: 30  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Experimental and Clinical Pharmacology (ECP) graduate program was designed specifically for students interested in clinical research. Its goal is to advance the science of human pharmacology and therapeutics to improve the safe, effective, and economical use of drugs by patients.

Students study such topics as experimental pharmacotherapy, drug metabolism, infectious disease, pharmacometrics, and pharmacogenomics. Graduates are prepared for distinguished careers in clinical research.

**Program Delivery**  
This program is available:  
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**  
The preferred undergraduate GPA for admittance to the program is 3.00.

A U.S. bachelor's degree or a comparable foreign degree from a recognized college or university is required.

Preference is given to candidates who have had professionally-related pharmacy education, but those from other fields such as biology, chemistry, statistics, and public health will be considered.

Other requirements to be completed before admission:  
GRE scores are required from non-U.S. Pharm.D. applicants. Foreign students may be required to have a phone interview. All international students who are non-English speakers are required to submit TOEFL scores. However, applicants who have completed 24 quarter credits or 16 semester credits within the past 24 months in residence as full-time students at recognized institutions of higher learning in the United States or other English-speaking countries before entering the University of Minnesota are generally exempted from this requirement.

**Special Application Requirements:**  
Students are generally admitted to the ECP program for fall semester only. The application deadline is February 1. Applications received after February 1 will be considered on a space-available basis only.

Application to the ECP program at the University of Minnesota is done entirely online through ApplyYourself. A supplemental departmental application form is also required. Applicants should upload it directly to the ApplyYourself system.

International applicants must submit score(s) from one of the following tests:  
- **TOEFL**  
  - Internet Based - Total Score: 79  
  - Internet Based - Writing Score: 21  
  - Internet Based - Reading Score: 19  
  - Paper Based - Total Score: 550
The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are not admitted directly to the M.S. program. See the Medicinal Chemistry Ph.D. or contact the director of graduate studies for more information.

The medicinal chemistry program emphasizes the application of chemical principles to research on the action of drugs on biological systems. Courses offered by the program focus on general principles of medicinal chemistry, drug design and synthesis, chemical aspects of drug metabolism, chemical mechanisms of drug toxicity and carcinogenicity, computer-assisted drug design and receptor modeling, and combinatorial chemistry.

Students must complete a core curriculum of advanced courses in organic and medicinal chemistry, as well as credits in a minor or related field.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Note: Students are not admitted directly to the M.S. program. See the Medicinal Chemistry Ph.D.

The program in medicinal chemistry emphasizes the application of chemical principles to research on the action of drugs on biological systems. Courses offered by the program focus on general principles of medicinal chemistry, drug design and synthesis, chemical aspects of drug metabolism, chemical mechanisms of drug toxicity and carcinogenicity, computer-assisted drug design and receptor modeling, and combinatorial chemistry.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants should have a B.S. or M.S. degree in an appropriate related science field such as pharmacy, chemistry, or biology. Students majoring in other degree programs that encompass chemical, biochemical, or biological fields of study are also encouraged to apply. All applicants should have completed undergraduate chemistry through elementary organic chemistry. Undergraduate coursework in biochemistry and physical chemistry is also a prerequisite, but under certain circumstances such coursework may be taken during the first year. Students may apply for admission to the Ph.D. program only, and usually are admitted fall semester only.

Special Application Requirements:
Scores from the General (Aptitude) Test of the GRE, three letters of recommendation from college-level faculty, a complete set of official transcripts, and a statement of immediate and long range career objectives are required. All application materials should be submitted by the admissions deadline listed on the departmental website in order to be considered for fellowship, teaching, and research assistantships awarded in the next academic year.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

24 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

Students must also participate in the department seminar program, successfully complete a comprehensive exam requirement that serves as the preliminary written exam, and prepare and defend an original research proposal which serves as the preliminary oral exam.

All students must complete a core curriculum of advanced courses in organic chemistry and biochemistry (totaling 12 credits); and medicinal chemistry (12 cr).

- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Entry to the M.S. program is available on a very restricted basis. Please contact the director of graduate studies to obtain details about admission.

The pharmaceutics program offers emphases in physical pharmacy, biopharmaceutics, and pharmacokinetics. Minor fields of particular value include biochemistry, biometry, chemistry, biomedical engineering, chemical engineering, mechanical engineering, pharmacology, and statistics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

Other requirements to be completed before admission:
Undergraduate (and graduate, if applicable) scholastic records, recent GRE scores, a statement of career goals and research interests, and three letters of recommendation. International applicants must submit results from the TOEFL or IELTS. These collectively are used to determine each candidate's admisssibility. Prefer "First Class" or the equivalent on transcripts from foreign institutions. Fall admission is preferred and the deadline to apply is December 31. Students can receive a free evaluation of the competitiveness of their credentials by completing the pre-application form on the pharmaceutics website [www.pharmacy.umn.edu/pharmaceutics].

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Analytical Writing: 4
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Speaking Score: 23
- IELTS
  - Total Score: 26

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students in the Social and Administrative Pharmacy Program are prepared for research and related activities investigating relationships between biological and physical factors in social settings that involve the drug use process. The flexible interdisciplinary program uses the resources of the many health and social science departments at the University, and may include courses and offerings from public health, geriatrics, management, sociology, psychology, and public affairs.

The program focuses on the discovery and dissemination of new knowledge to foster appropriate use of drugs to improve patient outcomes at the individual and societal level. Students are educated and mentored to become professional scientists. Those who complete the program will understand the process of conducting high quality research and problem solving through the application of disciplinary and interdisciplinary knowledge, theory, and research methodology.

Social and administrative pharmacy (SAPH) is the application of behavior-oriented interdisciplinary theories to pharmacy problem solving and pharmacy system development. This includes the study of the social, psychosocial, political, legal, public policy, historic, and economic factors that impinge upon the use, non-use, and abuse of drugs.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants must complete a supplementary application form in addition to the University application. The supplementary form along with three letters of recommendation should be uploaded to the University Apply Yourself application. GRE scores are required and a performance level of 580 (158 for November 1, 2011-June 30, 2012) is preferred on the TOEFL for all international applicants whose native language is not English.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

35 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Two preliminary written exams are required: one concentrates on research design, methodological issues, and statistical analysis; the other on material specific to social and administrative pharmacy. Students must also pass a preliminary oral exam.
Twin Cities Campus
Social and Administrative Pharmacy M.S.
Pharmaceutical Care and Health
College of Pharmacy

Email: cremi001@umn.edu
Website: http://www.pharmacy.umn.edu/pchs/saph/home.html

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 32
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Study within the Social and Administrative Pharmacy Program is tailored carefully to the specific needs and objectives of the student. It is a flexible, interdisciplinary program which utilizes all resources of the University's many outstanding departments in an effort to provide the student with knowledge and experience in areas she/he feels are applicable to the resolution of pharmacy-oriented problems.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Although the majority of students in the program are pharmacists, a pharmacy education is not required. A bachelor's degree or its foreign equivalent from a recognized college of pharmacy and a strong scholastic record are desirable. Individuals from other fields such as economics, engineering, computer science, medicine, psychology, sociology, or public health may be admitted if their undergraduate coursework satisfies the prerequisites for graduate coursework.

Special Application Requirements:
Applicants must complete a supplementary application form in addition to the University application. The supplementary form along with three letters of recommendation should be uploaded to the University Apply Yourself application. GRE scores are required and a performance level of 580 (158 for November 1, 2011-June 30, 2012) is preferred on the TOEFL for all international applicants whose native language is not English.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 16 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 16 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The balance of coursework taken to meet the 30-credit minimum (8 credits in addition to the 16 major field credits and 6 minor or related field credits) is determined by agreement between the student and adviser.

Plan B also requires two papers of publishable quality; one paper must include a research component with an analysis of data.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 13
- This program requires summer semesters for timely completion.
- Degree: Adv Mgmt Training for Clin Leaders PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

NOTE: APPLICATIONS FOR THIS CERTIFICATE ARE NOT CURRENTLY BEING ACCEPTED.
The Regents Certificate in Advanced Management Training for Clinician Leaders is intended for clinicians employed by integrated health systems who will take on critical and expanded roles as executives and managers. This one-year course of study will prepare clinician leaders for successful innovation in emerging forms of healthcare organizations, bring new healthcare leaders with clinical backgrounds into network relationships with other administrators, and consider new approaches to strategy and success in healthcare that are specific to integrated systems.

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have at least two years experience in a U.S.-based healthcare organization that either has developed or is considering integrated system relationships. International applications will be considered on a case-by-case basis with special attention paid to the nature and structure of their employing organizations.

Special Application Requirements:
NOTE: APPLICATION ARE NOT CURRENTLY BEING ACCEPTED FOR THE CERTIFICATE PROGRAM.
Applicants must submit a letter of intent describing career interests and the relevance of the certificate to the applicant's personal development. One letter of recommendation from a person qualified to assess the applicant's academic work; clinical, public health or professional experience; or leadership potential in integrated health systems is required.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The certificate is build on a cohort model and comprises 13 credits: five 2-credit courses, one 1-credit face-to-face course and a 2-credit face-to-face practicum. Students will be required to attend on-campus sessions twice during the program. The first on-campus session will be four days in length, during which students will complete a 1-credit course, PUBH 7571. The second session will be held at the end of the program over three days, during which students will present their capstone projects.

Requirements
The certificate requires 13 total credits. PUBH 7571, PUBH 7572, along with four brand-new courses and a practicum/capstone project (each offered as topics courses via PUBH 6570) make up the requirements for the program. Students complete PUBH 7571 while on campus during for four days at the start of the program, and will complete five courses online during the remaining 12 months. Students will present their capstone projects completed for the practicum during their final three days on campus.

PUBH 7572 - Health Care Strategies in Competitive Markets (2.0 cr)
PUBH 6570 - Healthcare Administration (1.0 - 4.0 cr)

Website: http://www.sph.umn.edu/

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Aging Studies PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Certificate on Aging is a 12-credit graduate level program with some courses offerings available online, as well as in a face-to-face format. The certificate is designed to increase knowledge and understanding in the multifaceted field of human aging. This interdisciplinary program provides students with the background and confidence necessary to meet the challenges of serving the aging population. The courses are offered through the Center on Aging within the Division of Health Policy and Management.

Aging Studies at the University of Minnesota involves an interdisciplinary approach to gerontology for those individuals who hold at least a bachelor's degree. The interdisciplinary nature of the program embraces different backgrounds and interests, and is suitable for graduates from any major.

The primary purpose of Aging Studies is to prepare professionals for work in programs, businesses, organizations, and agencies that address the needs of an aging population. Examples include the following: hospitals, long-term care facilities, education, clinics, home health care agencies, hospice and end-of-life care organizations, insurance groups, counseling and social services, physician groups, financial planning, architecture and design, public policy makers, and nursing.

Accreditation
This program is accredited by CEPH

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Students who have completed 16-semester credits/24-quarter credits (within the past 24 months) in an academic program in a recognized institution of higher learning in the U.S. do not need to submit the TOEFL as part of the application process.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

*The Aging Studies Certificate will be designed by each admitted participant in consultation with the director of the program.

Suggested courses
The following are suggested courses, and are not required.

Take 12 or more credit(s) from the following:

• FSOS 8105 - Family Gerontology (3.0 cr)
• GERO 5100 - Topics in Gerontology (0.5 - 4.0 cr)
• GERO 5110 - Biology of Aging (3.0 cr)
• GERO 5111 - Studying Aging and Chronic Illness (2.0 cr)
• GERO 5115 - Introduction to Geriatrics (2.0 cr)
• GERO 5125 - Gerontology Service Learning (3.0 cr)
• GERO 8020 - Seminar in Gerontology (2.0 cr)
• PSY 5138 - Social Work with Older Adults (2.0 cr)
• SW 5810 - Seminar: Special Topics (1.0 - 4.0 cr)
• SOC 5590 - Topics in Life Course Sociology (3.0 cr)
• PUBH 8803 - Long-Term Care: Principles, Programs, and Policies (2.0 cr)
• PA 5412 - Aging and Disability Policy (3.0 cr)
• GERO 5105 - Multidisciplinary Perspectives on Aging (3.0 cr)
Applied Biostatistics Postbaccalaureate Certificate

School of Public Health - Adm

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 16
- This program requires summer semesters for timely completion.
- Degree: Applied Biostatistics PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Our Applied Biostatistics Certificate is designed for persons currently working as data managers or analysts, but who lack formal training in biostatistics and the science of uncertainty and would like to gain the corresponding technical, mathematical, and computational skills.

Our goal is to enhance one's understanding of key elements of database management and investigation, alert a student to key variables and trends, help a student judge their statistical significance, and improve a student's overall data evaluation and programming skills. Students will learn key aspects of study design, implementation and analysis for both observational and clinical studies.

Fourteen of the 16 required credits are offered entirely online, throughout the calendar year. The remaining two credits are required and are offered face-to-face/in class instruction during a single week in early June as part of the Summer Public Health Institute, University of Minnesota, Twin Cities Campus.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH)

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Please visit www.sph.umn.edu for admission requirements and application instructions.

International applicants must submit score(s) from one of the following tests:

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 42
- This program requires summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Biostatistics M.P.H. Program requires that students meet the Association of Schools of Public Health (ASPH) Core Competencies in five core public health areas, including administration, behavioral science, biostatistics, environmental health, and epidemiology, plus an additional requirement in ethics.

The master of public health (M.P.H.) program has different course requirements than the master of science (M.S.). In place of the four elective courses (one in health science and three in biostatistics), which are required for the M.S., the M.P.H. requires five public health courses. The M.P.H. program also requires students to complete a field experience, in addition to a written master's project like the M.S. Plan B written project. Unlike the M.S., the M.P.H. does not have a comprehensive written exam requirement. More detailed information is available in the Program Requirements section below.

**Accreditation**
This program is accredited by CEPH (Council on Education for Public Health).

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
The admissions committee reviews applicants according to their personal statements, background and experience, record of academic achievement, demonstrated academic potential, letters of recommendation, compatibility of interests with program faculty, and other factors.

Test scores and GPAs provide competitive points of reference for admission but are not alone decisive in the admissions review.

Prospective applicants should have taken at least:
- Three semesters of calculus (including multivariable calculus)
- One semester of linear algebra

Experience with a programming language (eg. Java, C, Python) is helpful, but not required.

Preferred GRE performance expectations (test taken post-August 2011): 150 Verbal; 146 Quantitative

**Special Application Requirements:**
International applicants who have attended post-secondary institutions outside of the U.S. are also required to submit the following supporting documentation to SOPHAS.
World Education Services (WES) evaluation of foreign academic credentials. The University of Minnesota School of Public Health requires all applicants with foreign academic credentials to provide a WES course-by-course evaluation of those credentials. Note: Applicants with transcripts from Canadian schools are exempt from this requirement. Instead, applicants should have copies of their Canadian transcripts sent directly to SOPHAS.

Through special arrangements with SOPHAS, WES will deliver its credential evaluation report directly to SOPHAS by secure electronic transmission. This expedites the delivery of the evaluation report as well as images of the applicant's verified transcripts to SOPHAS and allows SOPHAS to process the report most efficiently. Go to http://www.wes.org/sophas for more information.

Note: Once WES receives the required documentation, it can complete an evaluation in seven business days or less, depending on the type of service requested. However, if additional research, correspondence, or verification is required, the evaluation will take longer. Students are recommended to start the process at least six weeks prior to the program deadline to ensure that their WES evaluation reports are complete by the deadline.

Proof of English Proficiency

Applicants whose native language is not English, or whose academic study was done exclusively at non-English speaking institutions, must prove English proficiency by providing either official Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. Official report of the scores should be sent directly to SOPHAS using designation code 5688 for the TOEFL or designation code SOPHAS for the IELTS.

Applicants must submit their test score(s) from the following:

• GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 146
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:

• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600

• IELTS
  - Total Score: 7

• MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 42 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Culminating Experience

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The culminating experience project demonstrates the student's familiarity with the tools of research or scholarship in the major, the capacity to work independently, and the ability to present the results of the investigation effectively. The master's project should involve a combined total of 120 hours of work.

MPH Program Curriculum

PUBH 7405 - Biostatistics: Regression (4.0 cr)
PUBH 7406 - Advanced Regression and Design (4.0 cr)
PUBH 7450 - Survival Analysis (3.0 cr)
PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
STAT 5101 - Theory of Statistics I (4.0 cr)  
or STAT 8101 - Theory of Statistics I (3.0 cr)  
STAT 5102 - Theory of Statistics II (4.0 cr)  
or STAT 8102 - Theory of Statistics II (3.0 cr)  
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)  
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)  
PUBH 6101 - Environmental Health (2.0 cr)  
or PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)  
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)  
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)  
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)  
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)  
students can complete final 9 credits by registering for 1 or both of the courses below  
PUBH 7494 - Culminating Experience: Biostatistics (1.0 - 3.0 cr)  
or PUBH 7496 - Biostatistics: Field Experience (1.0 - 6.0 cr)

Program Sub-plans
A sub-plan is not required for this program.  
Students may not complete the program with more than one sub-plan.

Global Health Interdisciplinary Concentration Area
The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

Developing countries are currently undergoing profound demographic changes--changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad. SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators.

According to the Minnesota Department of Health:
- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.  
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.  
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.  
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area
The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care.
PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- Understanding community dynamics
- Developing advocacy skills for public health
- Analyzing legal and policy structures
- Evaluating and implementing policies and programs
- Influencing community health
- Motivating and educating stakeholders and decision-makers
- Using policy as prevention strategy
- Eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Biostatistics combines statistics, biomedical science, and computing to advance health research. Biostatisticians design, direct, and analyze clinical trials; develop new statistical methods; and analyze data from observational studies, laboratory experiments, and health surveys. This is an ideal field for students who have strong mathematical backgrounds and who enjoy working with computers, collaborating with investigators, and participating in health research. Students take courses in biostatistical methods, theory of statistics, clinical trials, statistical computing, categorical data, survival analysis, and health sciences.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.10.

Other requirements to be completed before admission:
For the M.S., prospective applicants should have taken at least three semesters of calculus (including multivariable calculus) and one semester of linear algebra. Experience with a programming language (e.g., Java, C) is helpful, but not required.

Special Application Requirements:
Students should apply for admission during fall semester only. New students are not admitted in spring semester.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 146
  - General Test - Analytical Writing: 4.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 25 major credits and 11 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

A comprehensive written exam to be taken after finals of spring semester in year 1.

The Plan B project demonstrates the student's familiarity with the tools of research or scholarship in the major, the capacity to work independently, and the ability to present the results of the investigation effectively. The master's project should involve a combined total of 120 hours of work.

The Plan A project requires students to complete a thesis project. The required courses for the MS Degree Plan B do not prepare a student to write a thesis, that is, to do original research in biostatistics methodology. That is why nearly all students choose to do a written project (Plan B) rather than a thesis. Only students with an advanced background in mathematics or theoretical statistics should consider Plan A.

**Biostatistics M.S. Coursework (Plan B)**

- PUBH 7405 - Biostatistics: Regression (4.0 cr)
- PUBH 7406 - Advanced Regression and Design (4.0 cr)
- PUBH 7450 - Survival Analysis (3.0 cr)

School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-oasr@umn.edu
Website: http://www.sph.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12 to 14
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Biostatistics combines statistics, biomedical science, and computing to advance health research. Biostatisticians design, direct, and analyze clinical trials, develop new statistical methods, and analyze data from observational studies, laboratory experiments, and health surveys. This is an ideal field for students who have strong mathematical backgrounds and who enjoy working with computers, collaborating with investigators, and participating in health research. Students take courses in biostatistical methods, theory of statistics, clinical trials, statistical computing, categorical data, survival analysis, and health sciences.

Minors are available for both University of Minnesota masters and doctoral level students.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission to the biostatistics graduate minor is contingent upon prior admission to a master's or doctoral degree-granting program.

Students should first consult with their major program adviser about the advisability of a minor in biostatistics. Students will then need to contact the director of graduate studies (bstdgs@umn.edu). A biostatistics faculty member must be on the student's doctoral preliminary oral examination committee as well as masters and doctoral final oral examination committees.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

12 credits required for doctoral minor for statistic students. 14 credits are required for doctoral minor for non-statistic students.

Minor Options

Master’s-level minor in Biostatistics
NOTE: One course may be taken S/N and all other courses must be taken A/F
Take 2 or more course(s) from the following:
• PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
• PUBH 7435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
• PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)
• PUBH 7445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
• PUBH 7450 - Survival Analysis (3.0 cr)
• PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
or PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)

-OR-

Doctoral-level minor in Biostatistics for Non-Statistics Students
Students should take the required set of 2 core courses (either 7401 and 7402, or 7405 and 7406) first, before choosing two additional courses from the list of elective courses below.

NOTE: One course may be taken S/N and all other courses must be taken A/F

Biostatistics Core
PUBH 7405 - Biostatistics: Regression (4.0 cr)
PUBH 7406 - Advanced Regression and Design (4.0 cr)
or PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)

Take 2 or more course(s) totaling 6 or more credit(s) from the following:
• PUBH 7407 - Analysis of Categorical Data (3.0 cr)
• PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
• PUBH 7435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
• PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)
• PUBH 7445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
• PUBH 7450 - Survival Analysis (3.0 cr)
or PUBH 7415 - Introduction to Clinical Trials (3.0 cr)

-OR-

Doctoral-level minor Biostatistics for Statistics Students
NOTE: One course may be taken S/N and all other courses must be taken A/F
PUBH 7450 - Survival Analysis (3.0 cr)

Take 2 or more course(s) totaling 6 or more credit(s) from the following:
• PUBH 8422 - Modern Nonparametrics (3.0 cr)
• PUBH 8442 - Bayesian Decision Theory and Data Analysis (3.0 cr)
• PUBH 8452 - Advanced Longitudinal Data Analysis (3.0 cr)
• PUBH 8462 - Advanced Survival Analysis (3.0 cr)
• PUBH 8472 - Spatial Biostatistics (3.0 cr)
• PUBH 8482 - Sequential and Adaptive Methods for Clinical Trials (3.0 cr)

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 62 to 74
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

Biostatistics combines statistics, biomedical science, and computing to advance health research. Biostatisticians design, direct, and analyze clinical trials; develop new statistical methods; and analyze data from observational studies, laboratory experiments, and health surveys. This is an ideal field for students who have strong mathematical backgrounds and who enjoy working with computers, collaborating with investigators, and participating in health research. Students take courses in biostatistical methods, theory of statistics, clinical trials, statistical computing, categorical data, survival analysis, and health sciences.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.70.

Other requirements to be completed before admission:
Prospective applicants should have taken at least three semesters of calculus (including multivariable calculus) and one semester of linear algebra. Experience with a programming language (e.g., Java, C) is helpful, but not required.

In addition to completing the SOPHAS application, students are also required to submit the following supporting documentation directly to SOPHAS:
- Statement of purpose and objectives (an essay describing past education, experience, and current professional career objectives)
- Résumé or curriculum vitae (C.V.)
- Official postsecondary transcripts from all institutions attended, including previous study at the University of Minnesota (transcripts must be sent directly from the institutions to SOPHAS)
- Three letters of recommendation from persons qualified to assess the student's academic work; clinical, public health, or professional experiences; and leadership potential

**Special Application Requirements:**
All admitted international Ph.D. applicants are required to provide a World Education Services (WES) document verification report prior to beginning the program.

**Proof of English Proficiency**
Applicants whose native language is not English, or whose academic study was done exclusively at non-English speaking institutions, must prove English proficiency by providing either official Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. Official report of the scores should be sent directly to SOPHAS using designation code 5688 for the TOEFL or designation code SOPHAS for the IELTS. Scores must be less than two years old. The preferred minimum English language test scores for admission to the School of Public Health are listed below.

The English Language test requirement may be waived if an applicant can provide proof of one of the following:
- Completion of 16 semester credits/24 quarter credits (within the past 24 months) in an academic program at a recognized institution of higher learning in the U.S. or Canada.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
- An Educational Commission for Foreign Medical Graduates (ECFMG) certificate. Students should have an official or attested copy sent directly to the University of Minnesota School of Public Health at the address listed above.

Applicants must submit their test score(s) from the following:

- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 146

International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

27 to 35 credits are required in the major.
11 to 15 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.3 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

The Ph.D. program requires seven core courses (including mathematical statistics, linear models, probability models, and Bayesian methodology), one health science elective and three elective courses in biostatistical theory and methods, a preliminary written examination on the material from some of the required courses, a preliminary oral examination, a written dissertation, and dissertation defense in a final oral examination. This usually requires three years of full-time study after the M.S. degree. Students entering the PhD program without a previous MS degree in Math/Stat will be required to take 3 additional courses.

Curriculum

Schedule 1

For students admitted to the University of Minnesota with an M.S. in statistics or biostatistics.

<table>
<thead>
<tr>

Take 3 or more course(s) totaling 9 or more credit(s) from the following:

- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- PUBH 7465 - Biostatistics Consulting (3.0 cr)
- PUBH 8422 - Modern Nonparametrics (3.0 cr)
- PUBH 8435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
- PUBH 8445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
- PUBH 8446 - Advanced Statistical Genetics and Genomics (3.0 cr)
- PUBH 8452 - Advanced Longitudinal Data Analysis (3.0 cr)
- PUBH 8462 - Advanced Survival Analysis (3.0 cr)
- PUBH 8472 - Spatial Biostatistics (3.0 cr)
• PUBH 8475 - Statistical Learning and Data Mining (3.0 cr)
• PUBH 8482 - Sequential and Adaptive Methods for Clinical Trials (3.0 cr)
• PUBH 8492 - Theories of Hierarchical and Other Richly Parametrized Linear Models (3.0 cr)
• Any 8000-level course offered by the School of Statistics not included in the Core Curriculum

3 credits of public health electives from PUBH 6000, 7000, 8000 level courses offered by other divisions in the School of Public Health.

Students who have not taken a course equivalent to Survival Analysis (PubH 7450) should take the course as early as possible.

-OR-

Schedule 2
For students entering the Ph.D. program with an undergraduate degree in mathematics, statistics, or biostatistics. Student in this curriculum are required to complete 3 additional courses than those students entering the PhD already with an MS degree in Math/Stat.

- PUBH 7405 - Biostatistics: Regression (4.0 cr)
- PUBH 7406 - Advanced Regression and Design (4.0 cr)
- PUBH 8401 - Linear Models (4.0 cr)
- PUBH 8432 - Probability Models for Biostatistics (3.0 cr)
- PUBH 8442 - Bayesian Decision Theory and Data Analysis (3.0 cr)
- STAT 8101 - Theory of Statistics 1 (3.0 cr)
- STAT 8102 - Theory of Statistics 2 (3.0 cr)
- Biostat Research Skills course (1 credit)

PUBH 8412 - Advanced Statistical Inference (3.0 cr)

Students without a prior course in real analysis are strongly recommended to take Advanced Calculus I (MATH 4603) in the fall of their first year. Students with a prior analysis course may choose to take the Real Analysis sequence (MATH 5615-16) as an elective, but are not required to do so.

- MATH 5615H - Honors: Introduction to Analysis I (4.0 cr)
  or MATH 4603 - Advanced Calculus I (4.0 cr)

Take 3 or more course(s) totaling 9 or more credit(s) from the following:

- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- PUBH 7455 - Biostatistics Consulting (3.0 cr)
- PUBH 8422 - Modern Nonparametrics (3.0 cr)
- PUBH 8435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
- PUBH 8445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
- PUBH 8446 - Advanced Statistical Genetics and Genomics (3.0 cr)
- PUBH 8452 - Advanced Longitudinal Data Analysis (3.0 cr)
- PUBH 8462 - Advanced Survival Analysis (3.0 cr)
- PUBH 8472 - Spatial Biostatistics (3.0 cr)
- PUBH 8475 - Statistical Learning and Data Mining (3.0 cr)
- PUBH 8482 - Sequential and Adaptive Methods for Clinical Trials (3.0 cr)
- PUBH 8492 - Theories of Hierarchical and Other Richly Parametrized Linear Models (3.0 cr)
• Any 8000-level course offered by the School of Statistics not included in the Core Curriculum

3 credits

3 credits of a Public Health elective from 6000, 7000, 8000 level courses offered by other divisions in the School of Public Health.

Survival Analysis Course
Students who have not taken a course equivalent to Survival Analysis (PubH 7450) should take the course as early as possible.

Students who have not taken a course equivalent to Survival Analysis (PubH 7450) should take the course as early as possible.

Website: http://www.sph.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 38
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The field of clinical research is becoming increasingly complex and regulated, creating a recognition and demand for formally trained clinical researchers. This program will prepare you to conduct patient-oriented research, directly interacting with human subjects to better understand disease; therapeutic interventions, clinical trials and more; conduct epidemiologic and behavioral studies; understand outcomes and health services research.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

An advanced health professional degree, e.g. M.D., D.D.S., D.O., D.N.P., D.C., D.V.M., Pharm.D., Ph.D.; an advanced doctoral degree in a clinical biomedical field; or an advanced nursing degree.

Other requirements to be completed before admission:
Students must have completed or must be at an advanced stage of their clinical practice training and be affiliated with someone at the University of Minnesota who can provide advising and access to a clinical project. The admissions committee considers exceptions on an individual basis.

Special Application Requirements:
The M.S. has specific application requirements including an advanced health professional degree, and training sufficient to be eligible for a license to practice as supported in the form of an official transcript. One of the three required recommendation letters and a completed School of Public Health Recommendation form should be from the clinical director of training supporting the applicant's potential as a clinical researcher.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).
Program Requirements

Plan A: Plan A requires 25 major credits, 3 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 to 28 major credits and 10 to 14 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: There are two options for Capstone project: 1) Write a manuscript to be submitted to a peer-reviewed journal in the student's field; students need to be the first author, contribute to the design and analysis presented in the manuscript; manuscript cannot be a review article; however meta-analysis and formal systematic reviews are allowed. 2) Write a grant at the standard national institute grant mechanism level of R21, R03 or higher (example, R01), to be submitted to the National Institute of Health (NIH) or equivalent organization in student's field; student should be Principal Investigator (PI). The Clinical Research MS program requires 38 credits minimum: students have a choice about scope of the Capstone project. Project must warrant minimally six credits; may go up to 10 credits maximum, depending on scope. Advisor and faculty director will approve project and number of credits, depending on scope of project.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The Plan A curriculum prepares the next generation of clinical researchers and principal investigators. The curriculum covers clinical trials, epidemiology, biostatistics, ethics, grant writing, and research methods. Students are trained to conduct patient-oriented research, epidemiological and behavioral research. There is a 10-credit thesis requirement where the thesis is (1) first, presented in a 30 minute public presentation, followed by a 90 minute closed exam with the thesis committee, and (2) is submitted to a peer-reviewed journal as a first-authored paper and describes original work accomplished during the graduate program.

The Plan B curriculum prepares the next generation of translational, clinical, and outcomes researchers. The curriculum is flexible with a core of required courses covering clinical trials, epidemiology, and biostatistics. Students can take elective courses in Translational Sciences, Outcomes Sciences, Health Services Research or other areas and fashion a personalized curriculum in consultation with their mentors and the program director.

Plan B has a 6 - 10 credit Capstone project requirement, typically either a first-authored paper describing original work accomplished during graduate program, or a grant submission written by the student as Principal Investigator during the program. There is a closed exam with the committee--the project does not have to be presented publicly. Students have choice about scope of Capstone project--minimally six, maximum ten credits, depending on scope. Advisor and DGS approve project and number of credits.

Required Coursework

The first set of courses are required for Plan A and Plan B students. Following those are courses that are only required for each specific plan. Also required for both plans: both sessions of the University of Minnesota Responsible Conduct of Research course, validated by ORTTA; and the NIH online training, Protection of Human Research Subjects, validated by the electronic certificate given at end of course.

PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Supporting Program Credits: Plan A students take 3 credits to complete 38 credits required. Plan B students take 10 - 14 credits to complete 38 credits required.

Plan A

Note: students must take a total of 10 thesis credits (PubH 8777).

PUBH 6301 - Fundamentals of Clinical Research (3.0 cr)
PUBH 6348 - Writing Research Grants (2.0 cr)
PUBH 6303 - Clinical Research Project Seminar (2.0 cr)
PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

or Plan B

Plan B students are required to take 6 - 10 credits, PubH 8394, Culminating Experience: Clinical Research.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 16
- This program does not require summer semesters for timely completion.
- Degree: Clinical Research PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

There is a growing need for health professionals who advance science discoveries to clinical applications through research on human beings; i.e., clinical research. This includes observational studies and clinical trials on individuals and in communities. It is increasingly recognized that many individuals seek formal training in clinical research, both in the U.S. and abroad, but cannot spend the time or do not have the resources to attend an on-campus program or do an original research project for a thesis. This certificate in clinical research includes the alternative of distance learning for health professionals in Minnesota, outside the state, and in other countries.

Of the 16 required credits, 14 are offered entirely online. The 2-credit PUBH 6303 Seminar will be offered as a hybrid with much of the didactic portions online and student presentations done either during an 8-week, on-campus period or via live video technology.

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants are required to have a baccalaureate degree and either a minimum of five years of relevant clinical research experience or GRE scores.

Special Application Requirements:
Please visit www.sph.umn.edu for admission requirements and application instructions.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

• Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Through coursework and fieldwork taken at the School of Public Health, students in community health promotion develop basic competencies in theory, health behavior and policy interventions, assessment methods, cultural competency, and management.

Each graduate should have the ability to:
- Use theories of behavior and social change to inform the planning and evaluation of health interventions
- Identify individual, community, and policy-level interventions that are effective in promoting healthy behaviors and social conditions
- Design and implement effective individual, community, and policy-level interventions targeting a variety of health behaviors
- Assess the health status of populations and communities
- Utilize appropriate data collection strategies and qualitative and quantitative methods to evaluate health interventions
- Identify the role of cultural, social, and behavioral factors in influencing health behaviors and status
- Develop and adapt approaches to solving health problems, taking into account cultural differences
- Communicate health information effectively both in writing and orally
- Advocate for public health programs and resources
- Collaborate with public health agencies and other constituency groups
- Coordinate and manage health programs/services
- Relate ethical considerations and values to one's professional practice

The M.P.H. in community health promotion is a good path for students planning for careers as public health practitioners or planning to pursue a Ph.D. degree in social and behavioral epidemiology, which is available in the School of Public Health.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have one year of community, social service or public health experience. An introductory course in statistics and three to four social and behavioral science courses are also required. The average undergraduate GPA for admitted applicants is a 3.5.

Special Application Requirements:
Applicants are admitted from a wide variety of academic backgrounds, including social and behavioral sciences (e.g., psychology, sociology, anthropology), the humanities, basic sciences (e.g., biology, nursing), and mathematics. There is no single appropriate undergraduate major; however, applicants should meet prerequisites by the time of admission.
Who should apply? Individuals who want skills to:
- influence policy and public opinion on health issues;
- develop and evaluate innovative community-based programs to prevent disease and injury;
- work with communities, health departments, and non-profit organizations and policymakers to create healthy living and working environments;
- work on issues related to specific population, including youth and disadvantaged populations.
And individuals who:
- have a variety of backgrounds, including those trained in basic sciences, social and behavioral sciences, and the humanities;
- want an M.P.H. degree;
- plan to pursue a Ph.D. degree in social and behavioral epidemiology at the University of Minnesota;
- have met the prerequisites listed below before admission.

Prerequisites for Admission
- Baccalaureate degree or higher from an accredited college or university
- College-level courses in the following areas:
  - Social and behavioral sciences (at least 3 courses)
  - Introductory statistics (1 course)
  - One year of paid or volunteer experience in a public health, social service, or community setting

Preferences for Admission
- Strong personal statement indicating why applicant is interested in pursuing a community health promotion degree
- Compatibility of interests with program faculty
- GPA of 3.0
- Combined GRE score of 300 and analytical writing score of 3.5
- TOEFL score of 600/250/100 for international applicants
- Strong reference letters

Applicants must submit their test score(s) from the following:
- **GRE**
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- **IELTS**
  - Total Score: 7

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan C:** Plan C requires 34 to 48 major credits and 0 to 14 credits outside the major. The is no final exam. A capstone project is required.

**Capstone Project:** Culminating experience of either needs assessment, program development, program evaluation, or research project.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

**Theory**
- **PUBH 6050** - Community Health Theory and Practice I (3.0 cr)
- **PUBH 6051** - Community Health Theory and Practice II (3.0 cr)

**Health Behavior and Policy Interventions**
Take 8 or more credit(s) from the following:
Students must select one course from the following list:
Take 1 or more course(s) from the following:
• PUBH 6000 - Topics: Community Health Education (0.5 - 4.0 cr)
• PUBH 6010 - Public Health Approaches to HIV/AIDS (3.0 cr)
• PUBH 6055 - Social Inequalities in Health (2.0 cr)
• PUBH 6085 - Combating the Global Pandemic: Tobacco and Alcohol (2.0 cr)
• Intervention Approaches
  Students must select at least two courses from the following list:
  Take 2 or more course(s) from the following:
  • PUBH 6025 - e-Public Health: Online Intervention Design (3.0 cr)
  • PUBH 6045 - Skills for Policy Development (1.0 cr)
  • PUBH 6049 - Legislative Advocacy Skills for Public Health (3.0 cr)
  • PUBH 6066 - Building Communities, Increasing Health: Preparing for Community Health Work (2.0 cr)
  • PUBH 6074 - Mass Communication and Public Health (3.0 cr)
  • PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
  • SW 8551 - Advanced Community Practice: Assessment, Organizing, and Advocacy (3.0 cr)

Assessment Methods
  Take exactly 2 course(s) from the following:
  • PUBH 6034 - Program Evaluation for Public Health Practice (3.0 cr)
  • PUBH 6035 - Applied Research Methods (3.0 cr)

Additional Assessment Methods
  Students must select one course from the following list:
  PUBH 6600 - Topics: Maternal and Child Health (0.5 - 4.0 cr)
  or PUBH 6415 - Biostatistical Methods II (3.0 cr)
  or PUBH 6450 - Biostatistics I (4.0 cr)
  or PUBH 6617 - Practical Methods for Secondary Data Analysis (3.0 cr)

SPH Core Courses
  Environmental Health
  PUBH 6101 - Environmental Health (2.0 cr)
  or PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
  Epidemiology
  PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
  Ethics
  PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
  or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
  Management
  Take exactly 1 course(s) from the following:
  • PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Field Experience and Culminating Experience
  PUBH 7096 - Field Experience: Community Health Promotion (1.0 - 6.0 cr)
  PUBH 7094 - Culminating Experience: Community Health Promotion (1.0 - 6.0 cr)

Electives
  Electives to total 48 credits.

Joint- or Dual-degree Coursework: Master of Social Work (MSW), Juris Doctorate (JD)
Student may take a total of 12 credits in common among the academic programs.

Program Sub-plans
  A sub-plan is not required for this program.
  Students may not complete the program with more than one sub-plan.

Global Health Interdisciplinary Concentration Area
  The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

  Developing countries are currently undergoing profound demographic changes—changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to...
chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:
- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area
The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care.

PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- Understanding community dynamics
- Developing advocacy skills for public health
- Analyzing legal and policy structures
- Evaluating and implementing policies and programs
- Influencing community health
- Motivating and educating stakeholders and decision-makers
- Using policy as prevention strategy
- Eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 42 to 52
- This program does not require summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Environmental health is the study of how exposures to external hazards, including chemical, physical, and biological agents, affect human health. Environmental health researchers and professionals seek to understand how to evaluate exposures that create risk to human health, how those exposures elicit biological responses that lead to disease and injury, and how policy is developed and used to prevent adverse health effects. This program offers academic programs at the master’s and doctoral levels, conducts research in diverse areas of environmental health, offers continuing education, and conducts outreach. The academic programs prepare students to be leaders in environmental health in academia, industry, consulting groups, and government agencies. The program's training and research emphasizes the importance of translating basic scientific knowledge into solutions for current societal problems and concerns.

**Accreditation**
This program is accredited by Council on Education for Public Health

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

Minimum qualifications include a baccalaureate degree with coursework in the basic sciences. Occupational health nursing/medicine applicants must have a relevant degree from an accredited school.

**Required prerequisites**

**Program Course Prerequisites**
All specialties require basic sciences. Industrial hygiene also requires demonstrable strengths in physics, chemistry (including organic chemistry), biology and math (including calculus). A microbiology background is preferred for the environmental infectious diseases specialty.

Other requirements to be completed before admission:
For more information visit [www.sph.umn.edu](http://www.sph.umn.edu)

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5
- GMAT
- MCAT
Program Requirements

Plan C: Plan C requires 42 to 52 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: This requirement is met by registering for PUBH 7194 Culminating Experience: Environmental Health for a minimum of 3 credits. Results in a written paper and presentation and oral exam. Students choose from a broad set of project options including a Plan B style project. The project must be required to be relevant to the field of environmental health and should represent a minimum of 120 hours of work. Minimum program length is 42 credits.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

Concentration Areas

General Program

Students looking for a program of study that does not fit precisely with the defined concentrations in the major may be admitted to this program. Emphasis is on the development of a broad, solid foundation, with a larger than usual number of elective credits to allow the student an opportunity to pursue their particular interests. It is occasionally possible for students to transfer into a different concentration after admission to the general program.

Public Health Core Courses

- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Division Core Courses

- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
- PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
- PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Concentration Courses

- PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
- PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)

Electives

Selected in consultation with adviser to meet the 42 credit minimum requirement.
Environmental and Occupational Epidemiology (EOE)
Env Occ Epi strives to understand the causal impact of environment and occupation on human health. Public health interventions are most likely to be effective when disease and injury etiology is understood. Epidemiologists develop studies to identify factors that cause diseases and injuries - requiring knowledge of both subject matter and methods. Students may focus in one of three these areas: exposures related to cancer, exposures related to injury, or epidemiologic methods.

Public Health Core Courses
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses
PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Concentration Program Courses
PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)

Elective Courses
Select electives in consultation with adviser to meet the 42 credits requirement
Take exactly 0 course(s) totaling exactly 0 credit(s) from the following:
• PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
• PUBH 6160 - Systems Toxicology (3.0 cr)
• PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
• PUBH 6171 - Exposure Assessment for Air Contaminants (3.0 cr)
• PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)
• PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)
• PUBH 6192 - Measurement and Properties of Air Contaminants (2.0 cr)
• PUBH 6193 - Advanced Topics in Human Exposure Science (2.0 cr)
• PUBH 6343 - Epidemiologic Methods III (4.0 cr)
• PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)
• PUBH 6381 - Genetics in Public Health (2.0 cr)
• PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
• PUBH 6386 - Public Health Aspects of Cardiovascular Disease (2.0 cr)
• PUBH 6387 - Cancer Epidemiology (2.0 cr)
• PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
• PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)
• PUBH 7407 - Analysis of Categorical Data (3.0 cr)
• PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
• PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)
• VMED 8090 - Epidemiology of Zoonoses and Diseases Common to Animals and Humans (3.0 cr)
• PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)
• PUBH 7210 - Topics: Global Food Systems (0.5 cr)

Environmental Health Policy
This concentration provides broad, multidisciplinary training in environmental health issues, including occupational health, risk assessment, risk management, decision making, and policy analysis. Internship experiences are arranged with leading occupational and environmental health policy experts who assist students who assist students with synthesizing and applying their academic experiences to potential professional settings. Students participate in ongoing research.

Environmental Health Policy
Public Health Core Course Requirements
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)

  - PUBH 6835 - Principles of Health Policy (2.0 cr)
  - PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
  - PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
  - PUBH 8801 - Health Services Policy Analysis: Theory (3.0 cr)
  - PUBH 8802 - Health Services Policy Analysis: Applications (2.0 cr)
  - PUBH 8803 - Long-Term Care: Principles, Programs, and Policies (2.0 cr)
  - ANTH 5041 - Ecological Anthropology (3.0 cr)
  - ANTH 8203 - Research Methods in Social and Cultural Anthropology (3.0 cr)
  - PA 5001 - Intellectual Foundations of Public Action (1.5 cr)
  - PA 5002 - Introduction to Policy Analysis (1.5 cr)
  - PA 5021 - Economics For Policy Analysis and Planning I (3.0 cr)
  - PA 5022 - Economics For Policy Analysis and Planning II (1.5 - 3.0 cr)
  - PA 5031 - Empirical Analysis I (4.0 cr)
  - PA 5032 - Regression Analysis (2.0 cr)
  - PA 5033 - Multivariate Techniques (2.0 cr)
  - PA 5035 - Survey Research and Data Collection (1.5 cr)
  - PA 5711 - Science and Technology Policy (3.0 cr)
  - PA 5722 - Environmental and Resource Economics Policy (3.0 cr)
  - PUBH 6863 - Understanding Health Care Quality (2.0 cr)
  - PA 8790 - Advanced Topics in Science, Technology, and Environmental Policy (1.0 - 3.0 cr)
  - PA 5311 - Program Evaluation (3.0 cr)
- OR-

**Environmental Infectious Diseases**
This program explores the environmental factors associated with infectious diseases and the emergence of food-borne diseases in the United States and around the world. The environment and changing conditions have a great impact on the distribution and occurrence of infectious diseases. In evaluating the chain of infection, the environment may play a key role in reservoir maintenance. Coursework includes basic principles of infection control and predicting the impact of emerging infections.

**Public Health Core Courses**
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)

-OR-

Global Environmental Health

Issues of water and air quality, food safety, and the effects of industrialization are examined, as well as major ecological problems such as deforestation and sustainable agriculture. Interactions between the physical environment and biological health risks are considered also, as the effects of globalization of trade and the rapid movement of populations from one part of the world to the other are important vectors for the spread of disease globally.

Public Health Core Courses

- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)

Occupational and Environmental Medicine

The Occupational and Environmental Medicine (OEM) residency program trains physicians who will improve the health and safety of workers. The program emphasizes a solid clinical basis for the practice of occupational medicine and the management of patients with work-related health problems, as well as the identification and remediation of occupational risks and hazards in the workplace.

Public Health Core Courses

PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses

PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Concentration Courses

PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
PUBH 6173 - Exposure to Physical Agents (2.0 cr)
PUBH 6387 - Cancer Epidemiology (2.0 cr)
PUBH 7200 - Topics: Public Health Practice (0.5 - 4.0 cr)
PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)

Select electives in consultation with adviser to meet the 42 credit minimum requirement.

- OR -

Regulatory Toxicology and Risk Assessment

Regulatory toxicology and risk assessment teaches students to think analytically about the biochemical mechanisms of toxicity, and how toxicology is used to protect human health through laboratory research, and the development of sound environmental policy and regulations. Strong background in the biological sciences, interest in laboratory research or environmental regulation and policy.

Emphases: biological sciences, physiology, biochemistry, cellular and molecular biology, toxicology.

Public Health Core Courses

PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)

Ethics Courses

PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses

PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
Concentration Courses
PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
PUBH 6160 - Systems Toxicology (3.0 cr)
PUBH 6161 - Regulatory Toxicology (2.0 cr)
PUBH 8160 - Advanced Toxicology (2.0 cr)
PUBH 8161 - Current Literature in Toxicology (1.0 cr)

Electives
Selected in consultation with adviser to meet the 42 credit minimum requirement.

Joint- or Dual-degree Coursework: Master of Public Health and Juris Doctor (MPH/JDP). Student may take a total of 12 credits in common among the academic programs.

Program Sub-plans
A sub-plan is not required for this program. Students may complete the program with more than one sub-plan.

Industrial Hygiene
The Industrial Hygiene (IH) program is concerned with the health and safety of people at work, and the community at large. Specific concerns are with the recognition, evaluation and control of potential workplace hazards, including chemical, physical, and biological agents; and the potential health threats to the community and the environment.

Industrial Hygiene
The Industrial Hygiene program is concerned with the health and safety of people at work, and the community at large. Specific concerns are with the recognition, evaluation and control of potential workplace hazards, including chemical, physical and biological agents; and the potential health threats to the community and the environment. Prepares well-qualified practitioners and researchers for an exciting career in industry, government organizations, and academic and research institutions.

School of Public Health Core Requirements
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
Choose one of the following courses.
PUBH 6450 - Biostatistics I (4.0 cr)

Division Core Course Requirements
PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Occupational Health and Safety Core Requirements
PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)

Industrial Hygiene Program Requirements
PUBH 6172 - Industrial Hygiene Applications (2.0 cr)
PUBH 6173 - Exposure to Physical Agents (2.0 cr)
PUBH 6174 - Control of Workplace Exposure (3.0 cr)
PUBH 6175 - Environmental Measurements Laboratory (2.0 cr)
PUBH 6192 - Measurement and Properties of Air Contaminants (2.0 cr)
PUBH 6193 - Advanced Topics in Human Exposure Science (2.0 cr)

Industrial Hygiene Electives
Select electives in consultation with adviser to meet the 52 credit minimum requirement. Take 0 or more credit(s) from the following:
• PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
• PUBH 6115 - Worker Protection Law (1.0 cr)
• PUBH 6116 - Environmental Law (1.0 cr)
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6131 - Working in Global Health (2.0 cr)
• PUBH 6132 - Air, Water, and Health (2.0 cr)
Global Health Interdisciplinary Concentration Area

The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

Developing countries are currently undergoing profound demographic changes—changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Health Disparities Interdisciplinary Concentration Area

The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020 and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:

- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Mortality rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area

The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., and includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care.

PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:

- Understanding community dynamics
- Developing advocacy skills for public health
- Analyzing legal and policy structures

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
- Evaluating and implementing policies and programs
- Influencing community health
- Motivating and educating stakeholders and decision-makers
- Using policy as prevention strategy
- Eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 33 to 56
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

Environmental health is the study of how exposures to external hazards, including chemical, physical, and biological agents, affect human health. Environmental health researchers and professionals seek to understand how to evaluate exposures that create risk to human health, how those exposures elicit biological responses that lead to disease and injury, and how policy is developed and used to prevent adverse health effects. This program offers academic programs at the master's and doctoral levels, conducts research in diverse areas of environmental health, offers continuing education, and conducts outreach. The academic programs prepare students to be leaders in environmental health in academia, industry, consulting groups, and government agencies. The program's training and research emphasizes the importance of translating basic scientific knowledge into solutions for current societal problems and concerns.

Applicants must indicate an interest in one of the following specialties within the major: the general environmental health, environmental health policy, environmental infectious diseases, environmental and occupational epidemiology, regulatory toxicology, occupational and environmental health nursing, occupational environmental medicine, occupational injury epidemiology and control, or industrial hygiene.

**Program Delivery**

This program is available:

- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

Minimum requirements include a baccalaureate degree with coursework in the basic sciences. Each concentration requires different preparation: [http://www.sph.umn.edu/programs/ehs/tracks/index.asp](http://www.sph.umn.edu/programs/ehs/tracks/index.asp)

**Required prerequisites**

**Industrial Hygiene**

In addition to program requirements - industrial hygiene requires demonstrable strengths in physics, chemistry (including organic chemistry), biology, and math (including calculus). One or two missing requirements may be completed upon enrollment.

Other requirements to be completed before admission:

Please visit [www.sph.umn.edu](http://www.sph.umn.edu) for admission requirements.

Applicants must submit their test score(s) from the following:

- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5
- GMAT
- MCAT
  - Verbal Reasoning score: 10
  - Physical Science score: 10
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- **IELTS**
  - Total Score: 7
- **MELAB**
  - Final score: 80

Key to test abbreviations (GRE, GMAT, MCAT, LSAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 to 20 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 27 to 45 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** The Plan B project is a master's project.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

The M.S. program prepares students for specialized careers in environmental and occupational health. M.S. students receive a solid technical background in their disciplines and by graduation are proficient in applied or basic research.

The minimum credits required for graduation depend on the chosen specialty area. Most concentration areas require a two-year program. M.S. students have the option of completing a Plan A with a thesis or a Plan B project or Plan C.

**Concentration Areas**

Students may pursue a general program in environmental and occupational health, or focus in a concentration area with basic required courses, or pursue the industrial hygiene sub-plan.

**Environmental Chemistry**

Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105

Environmental chemistry examines the interactions of pollutants with air, water, soil, and their exposures to humans and wildlife. The curriculum emphasizes the processes that control chemical behavior, transport, and fate as a function of environmental factors and chemical properties.

**General Requirements**

- Thesis/dissertation will be taken for 10 credits
  - PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  - STAT 5021 - Statistical Analysis (4.0 cr)
  - PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
  - PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

**Division Core Courses**

- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)

**Specialty Program Course Requirements**

- CE 5541 - Environmental Water Chemistry (3.0 cr)
EEB 5601 - Limnology (3.0 cr)
PUBH 6190 - Environmental Chemistry (3.0 cr)

Proposed Electives
Select electives in consultation with adviser.
Take 0 or more credit(s) from the following:
• CBIO 8004 - Economic and Social Aspects of Conservation Biology (3.0 cr)
• CE 4561 - Solid Hazardous Wastes (3.0 cr)
• CE 8503 - Environmental Mass Transport (4.0 cr)
• CE 8542 - Chemistry of Organic Pollutants in Environmental Systems (3.0 cr)
• CE 8561 - Analysis and Modeling of Aquatic Environments I (3.0 cr)
• EEB 4611 - Biogeochemical Processes (3.0 cr)
• PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)
• WRS 8050 - Special Topics in Water Resources Science (1.0 - 3.0 cr)
• EEB 5609 - Ecosystem Ecology (3.0 cr)
  -OR-
  Environmental and Occupational Epidemiology
  Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
  Environmental and occupational epidemiology strives to understand the causal impact of environment and occupation on human health, because public health interventions are most likely to be effective when disease and injury etiology is understood. Epidemiologists develop studies to identify factors that cause diseases and injuries.

  General Core Requirements
  PUBH 6341 - Epidemiologic Methods I (3.0 cr)
  PUBH 6450 - Biostatistics I (4.0 cr)
  PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

  Division Core
  PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
  PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
  PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
  PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
    or PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)

  Specialty Program Course Requirements
  PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
  PUBH 6342 - Epidemiologic Methods II (3.0 cr)
  PUBH 6451 - Biostatistics II (4.0 cr)

  Proposed Electives
Select electives in consultation with adviser.
Take 0 or more credit(s) from the following:
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6121 - Topics: Injury Prevention in the Workplace, Community, and Home (1.0 - 2.0 cr)
• PUBH 6122 - Seminar: Safety in the Workplace (1.0 cr)
• PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
• PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
• PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
• PUBH 6173 - Exposure to Physical Agents (2.0 cr)
• PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)
• PUBH 6343 - Epidemiologic Methods III (4.0 cr)
• PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)
• PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
• PUBH 6387 - Cancer Epidemiology (2.0 cr)
• PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)
• PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
• PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)
  -OR-

  Environmental Health Policy
  Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
  Environmental health policy provides broad, multidisciplinary training in environmental health issues, including occupational health, risk assessment, risk management, decision making, and policy analysis.

  General Requirements
  PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
  PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
    or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
  PUBH 6414 - Biostatistical Literacy (3.0 cr)
    or PUBH 6450 - Biostatistics I (4.0 cr)
### Division Core Courses
- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
- PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)

### Specialty Program Course Requirements
- PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
- PUBH 6115 - Worker Protection Law (1.0 cr)
- PUBH 6116 - Environmental Law (1.0 cr)

### Proposed Electives
Select electives in consultation with adviser.
Take 0 or more credit(s) from the following:
- PUBH 6049 - Legislative Advocacy Skills for Public Health (3.0 cr)
- PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
- PUBH 6080 - Politics, Policy, and Ethics of Public Health Decision Making (2.0 cr)
- PUBH 6420 - Introduction to SAS Programming (1.0 cr)
- PUBH 6634 - Advocacy and Children's Rights (2.0 cr)
- PUBH 6711 - Public Health Law (2.0 cr)
- PUBH 6724 - The Health Care System and Public Health (3.0 cr)
- PUBH 6726 - Medical Device Industry: Business and Public Policy (3.0 cr)
- PUBH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)
- PUBH 6835 - Principles of Health Policy (2.0 cr)
- PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
- PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- PUBH 8801 - Health Services Policy Analysis: Theory (3.0 cr)
- PUBH 8802 - Health Services Policy Analysis: Applications (2.0 cr)
- PUBH 8803 - Long-Term Care: Principles, Programs, and Policies (2.0 cr)
- ANTH 5041 - Ecological Anthropology (3.0 cr)
- ANTH 8203 - Research Methods in Social and Cultural Anthropology (3.0 cr)
- PA 5001 - Intellectual Foundations of Public Action (1.5 cr)
- PA 5002 - Introduction to Policy Analysis (1.5 cr)
- PA 5021 - Economics For Policy Analysis and Planning I (3.0 cr)
- PA 5022 - Economics For Policy Analysis and Planning II (1.5 - 3.0 cr)
- PA 5031 - Empirical Analysis I (4.0 cr)
- PA 5032 - Regression Analysis (2.0 cr)
- PA 5033 - Multivariate Techniques (2.0 cr)
- PA 5035 - Survey Research and Data Collection (1.5 cr)
- PA 5711 - Science and Technology Policy (3.0 cr)
- PA 5722 - Environmental and Resource Economics Policy (3.0 cr)
- PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

### Environmental Infectious Diseases
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105

The Environmental Infectious Diseases (EID) specialty is concerned with the emergence of food-borne and infectious diseases in the United States and around the world. The environment, and changing conditions in the environment can have a great impact on the distribution and occurrence of infectious diseases. In evaluating the chain of infection, environment may play a key role in reservoir maintenance, as well as a route of transmission through food, water, and air.

### General Requirements
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

### Division Core Courses
- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
- PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
- PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)

### Specialty Program Course Requirements
- PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
- PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)
- PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)
- PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
Recommended Electives
Select electives in consultation with adviser.
Take 0 or more credit(s) from the following:

• PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)
• PUBH 7210 - Topics: Global Food Systems (0.5 cr)
• PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
• VMED 8090 - Epidemiology of Zoonoses and Diseases Common to Animals and Humans (3.0 cr)
• VMED 5420 - Molecular Epidemiology of Infectious Disease (3.0 cr)
• FSCN 4121 - Food Microbiology (3.0 cr)
• FSCN 4122 - Food Fermentations and Biotechnology (2.0 cr)
• BIOL 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)
• MICB 4131 - Immunology (3.0 cr)
• MICB 4151 - Molecular and Genetic Bases for Microbial Diseases (3.0 cr)
• MICB 4171 - Biology, Genetics, and Pathogenesis of Viruses (3.0 cr)

-OR-

Exposure Science
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
Students in the Exposure Science program study methods for the identification, measurement and simulation of human exposure and dose from single and multimedia environmental exposures. Students will receive training on various aspects of exposure analysis such as measurements and modeling; chemical, biological, and physical principles required to analyze exposure; mechanisms of exposure; development of molecular biomarkers; and genomic, proteomic, and metabolomic metrics for assessing exposure.

General Requirements
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)

Division Core Courses
PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Specialty Program Course Requirements
PUBH 6192 - Measurement and Properties of Air Contaminants (2.0 cr)
PUBH 6193 - Advanced Topics in Human Exposure Science (2.0 cr)
PUBH 6175 - Environmental Measurements Laboratory (2.0 cr)
PUBH 6100 - Topics: Environmental Health (0.5 - 4.0 cr)
PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
PUBH 6190 - Environmental Chemistry (3.0 cr)
PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)

Electives
Select electives in consultation with adviser.

-OR-

General Program in Environmental Health
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
Students are admitted to the General Program in Environmental Health when they are looking for a program of study that does not fit precisely with the specialty tracks defined in the environmental health sciences major. Emphasis is on the development of a broad, solid foundation in environmental health, with a larger than usual number of elective credits to allow the student an opportunity to pursue their particular interests.

General Requirements
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)

Division Core Courses
PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
or PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)

Concentration Program Course Requirements
Choose at least two courses from each of the following Environmental Health focus areas.

Exposure
Take 2 or more course(s) from the following:
- PUBH 6190 - Environmental Chemistry (3.0 cr)
- PUBH 6192 - Measurement and Properties of Air Contaminants (2.0 cr)
- PUBH 6193 - Advanced Topics in Human Exposure Science (2.0 cr)
- VMED 5180 - Ecology of Infectious Disease (3.0 cr)

Policy
Check with adviser for other policy class options.

Take 2 or more course(s) from the following:
- PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)

Health Effects
Take 2 or more course(s) from the following:
- PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
- PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
- PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
- PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)

Electives
Select electives in consultation with adviser.

-OR-

Global Environmental Health
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
The global environmental health track provides key information for individuals looking to work in the field of global environmental health either overseas or in the U.S. Issues of water and air quality, food safety, and the effects of industrialization are examined, as well as major ecological problems such as deforestation and sustainable agriculture.

General Requirements
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
  or PUBH 6450 - Biostatistics I (4.0 cr)

Division Core Courses
- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
- PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
  or PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)

Specialty Program Course Requirements
- PUBH 6131 - Working in Global Health (2.0 cr)
- PUBH 6132 - Air, Water, and Health (2.0 cr)
- PUBH 6133 - Global Health Seminar (1.0 cr)
- PubH 72xx Topics: Globalization and Health (1 cr)
- PUBH 6390 - Topics: Epidemiology (0.5 - 4.0 cr)
- PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)

Electives
7-9 credits, selected in consultation with adviser.

-OR-

Occupational and Environmental Health Nursing (OEHN)
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
Occupational and Environmental Health Nursing (OEHN) provides intensive training for nurses interested in the development, management and evaluation of health services, programs, and policies designed to promote health and prevent work-related injuries and disease.

General Requirements
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses
- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
- PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
- PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)
- PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
Specialty Program Course Requirements
PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
NURS 8600 - Advanced Public Health Nursing (2.0 cr)
NURS 8170 - Research in Nursing (3.0 cr)

Recommended Electives
Select electives in consultation with adviser.
Take 3 or more credit(s) from the following:
• PUBH 6034 - Program Evaluation for Public Health Practice (3.0 cr)
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
• PUBH 6342 - Epidemiologic Methods II (3.0 cr)
• PUBH 6348 - Writing Research Grants (2.0 cr)
• NURS 8100 - The Discipline of Nursing (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Industrial Hygiene
Industrial hygiene (IH) is concerned with the health and safety of people at work, and the community at large. Specific concerns are with the recognition, evaluation and control of potential workplace hazards, including chemical, physical, and biological agents; and the potential health threats to the community and the environment.

Required Coursework
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
School of Public Health Core Requirements
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
Choose one of the following courses.
PUBH 614 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
Division of Environmental Health Sciences Core Requirements
PUBH 6013 - Exposure to Environmental Hazards (2.0 cr)
PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)
Occupational Health and Safety Core Requirements
PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
Industrial Hygiene Program Requirements
PUBH 6172 - Industrial Hygiene Applications (2.0 cr)
PUBH 6173 - Exposure to Physical Agents (2.0 cr)
PUBH 6174 - Control of Workplace Exposure (3.0 cr)
PUBH 6175 - Environmental Measurements Laboratory (2.0 cr)
PUBH 6192 - Measurement and Properties of Air Contaminants (2.0 cr)
PUBH 6193 - Advanced Topics in Human Exposure Science (2.0 cr)
Industrial Hygiene Electives
Select electives in consultation with adviser.
Take 0 or more credit(s) from the following:
• PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
• PUBH 6115 - Worker Protection Law (1.0 cr)
• PUBH 6116 - Environmental Law (1.0 cr)
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6131 - Working in Global Health (2.0 cr)
• PUBH 6132 - Air, Water, and Health (2.0 cr)
• PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
• PUBH 6161 - Regulatory Toxicology (2.0 cr)
• PUBH 6176 - Hazardous Materials and Waste Management (2.0 cr)
• PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)
• PUBH 6190 - Environmental Chemistry (3.0 cr)
• PUBH 6415 - Biostatistical Methods II (3.0 cr)
• PUBH 6451 - Biostatistics II (4.0 cr)
• PUBH 7220 - Personal Protective Equipment and Respiratory Protection (1.0 cr)
• PUBH 7260 - Ergonomics and the Prevention of Workplace Injuries (1.0 cr)
• CE 4561 - Solid Hazardous Wastes (3.0 cr)
• CE 5551 - Environmental Microbiology (3.0 cr)
• IE 5511 - Human Factors and Work Analysis (4.0 cr)
• IE 5513 - Engineering Safety (4.0 cr)
• KIN 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)
• ME 5113 - Aerosol/Particle Engineering (4.0 cr)
• ME 5133 - Aerosol Measurement Laboratory (4.0 cr)
• PA 5721 - Energy and Environmental Policy (3.0 cr)

**Contact Information:**
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-oasr@umn.edu
Website: [http://www.sph.umn.edu](http://www.sph.umn.edu)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 14
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The master's minor requires a minimum of 8 graduate credits; the doctoral minor requires a minimum of 14 graduate credits. Courses for the minor must be selected from those offered by the School of Public Health. In order to meet the minor requirements, students must successfully complete graduate coursework in each of the following disciplines: biostatistics, epidemiology, and environmental health.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Suggested courses include PUBH 6101 - Environmental Health or PUBH 6102 - Issues in Environmental Health; PUBH 6320 - Fundamentals of Epidemiology or PUBH 6341 - Epidemiologic Methods I; and PUBH 6414 - Biostatistical Methods I or PUBH 6450 - Biostatistics I.

Students completing a master's minor in environmental health must complete 8 credits in environmental health, including PUBH 6103, 6104, and 6105.

Students completing a doctoral minor are required to take a minimum of 14 credits in environmental health, including PUBH 6103, 6104, and 6105.

Students who have already taken comparable graduate-level courses in these disciplines may use other public health courses to complete the minor requirement with the approval of the public health adviser and the director of graduate studies. Since public health courses may have prerequisites or enrollment limitations, early planning with an adviser is suggested.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 48 to 74
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Environmental health is the study of how exposures to external hazards, including chemical, physical, and biological agents, affect human health. Environmental health researchers and professionals seek to understand how to evaluate exposures that create risk to human health, how those exposures elicit biological responses that lead to disease and injury, and how policy is developed and used to prevent adverse health effects. This program offers academic programs at the master's and doctoral levels, conducts research in diverse areas of environmental health, offers continuing education, and conducts outreach. The academic programs prepare students to be leaders in environmental health in academia, industry, consulting groups, and government agencies. The program's training and research emphasizes the importance of translating basic scientific knowledge into solutions for current societal problems and concerns.

The Ph.D. brings students to a high level of academic competence through a combination of advanced coursework and research, and prepares students to assume leadership roles in the field.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A baccalaureate degree with coursework in the basic sciences. Each specialty requires slightly different preparation. Industrial Hygiene requires physics, biology, chemistry, organic, and calculus.

Other requirements to be completed before admission:
For more information visit www.sph.umn.edu

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 4
- GMAT
- MCAT
  - Verbal Reasoning score: 10
  - Physical Science score: 10
  - Biological Reasoning score: 10
- LSAT

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
Paper Based - Total Score: 600

• IELTS
  - Total Score: 7

• MELAB
  - Final score: 80

Key to test abbreviations (GRE, GMAT, MCAT, LSAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 to 50 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

Concentration Areas

Environmental Chemistry
Environmental Chemistry examines the interactions of pollutants with air, water, soil, and their exposures to humans and wildlife. The curriculum emphasizes the processes that control chemical behavior, transport, and fate as a function of environmental factors and chemical properties. This concentration requires a minimum of 54 total course credits.

Environmental Chemistry

Public Health Core Courses
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Division Core Courses
- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)

Concentration Program Courses
- CE 5541 - Environmental Water Chemistry (3.0 cr)
- CE 8542 - Chemistry of Organic Pollutants in Environmental Systems (3.0 cr)
- EEB 5601 - Limnology (3.0 cr)
- PUBH 6190 - Environmental Chemistry (3.0 cr)

Electives
Select electives in consultation with adviser to meet the 54 total credit minimum.
Take 1 or more course(s) from the following:
- CBIO 8004 - Economic and Social Aspects of Conservation Biology (3.0 cr)
- CE 4561 - Solid Hazardous Wastes (3.0 cr)
- CE 8503 - Environmental Mass Transport (4.0 cr)
- CE 8561 - Analysis and Modeling of Aquatic Environments I (3.0 cr)
- EEB 4611 - Biogeochemical Processes (3.0 cr)
- PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)
- WRS 8050 - Special Topics in Water Resources Science (1.0 - 3.0 cr)
- EEB 5609 - Ecosystem Ecology (3.0 cr)

-OR-

Environmental and Occupational Epidemiology
Environmental and occupational epidemiology strives to understand the causal impact of environment and occupation on human health, because public health interventions are most likely to be effective when disease and injury etiology is understood. This concentration requires a minimum of 53 total course credits.

Public Health Core Courses
PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses
PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)

Concentration Program Courses
PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
PUBH 8141 - Doctoral Seminar in Observational Inference (2.0 cr)
PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)
PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Electives
Select electives in consultation with adviser to meet the required minimum of 54 course credits
Take 1 or more course(s) from the following:
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6121 - Topics: Injury Prevention in the Workplace, Community, and Home (1.0 - 2.0 cr)
• PUBH 6122 - Seminar: Safety in the Workplace (1.0 cr)
• PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
• PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
• PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
• PUBH 6173 - Exposure to Physical Agents (2.0 cr)
• PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)
• PUBH 6343 - Epidemiologic Methods III (4.0 cr)
• PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)
• PUBH 6381 - Genetics in Public Health (2.0 cr)
• PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
• PUBH 6387 - Cancer Epidemiology (2.0 cr)
• PUBH 6806 - Principles of Public Health Research (2.0 cr)
• PUBH 7400 - Topics: Biostatistics (0.5 - 4.0 cr)
• PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
• PUBH 7435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
• PUBH 7460 - Advanced Statistical Computing (3.0 cr)
• PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)
• PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)

-OR-

Environmental Health Policy
Environmental health policy provides broad, multidisciplinary training in environmental health issues, including occupational health, risk assessment, risk management, decision making, and policy analysis. This concentration requires a minimum of 61 total course credits.

General Requirements
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

Division Core Courses
PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)

Program Course Requirements
PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
PUBH 6115 - Worker Protection Law (1.0 cr)
PUBH 6116 - Environmental Law (1.0 cr)
PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Electives
Select electives in consultation with adviser to meet the minimum of 61 total course credits.
Take 1 or more course(s) from the following:
• PUBH 6049 - Legislative Advocacy Skills for Public Health (3.0 cr)
• PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
• PUBH 6080 - Seminar: Policy, Politics, and Ethics of Public Health Decision Making (2.0 cr)
• PUBH 6420 - Introduction to SAS Programming (1.0 cr)
• PUBH 6634 - Advocacy and Children's Rights (2.0 cr)
Environmental Infectious Diseases
The study of Environmental Infectious Diseases is concerned with the emergence of foodborne and infectious diseases in the United States and around the world. The environment, and changing conditions in the environment can have a great impact on the distribution and occurrence of infectious diseases. In evaluating the chain of infection, environment may play a key role in reservoir maintenance, as well as a route of transmission through food, water, and air. Minimum 63 total course credits.

Public Health Core Courses
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses
- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Concentration Program Courses
- PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
- PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)
- PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)
- PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
- VMED 8090 - Epidemiology of Zoonoses and Diseases Common to Animals and Humans (3.0 cr)

Recommended Electives
Select electives in consultation with adviser to meet the minimum required 63 total course credits.

Take 1 or more course(s) from the following:
- PUBH 6381 - Genetics in Public Health (2.0 cr)
- PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)
- PUBH 6711 - Public Health Law (2.0 cr)
- PUBH 7210 - Topics: Global Food Systems (0.5 cr)
- PUBH 7214 - Principles of Risk Communication (1.0 cr)
- VMED 5420 - Molecular Epidemiology of Infectious Disease (3.0 cr)
- FSCN 4121 - Food Microbiology (3.0 cr)
- FSCN 4122 - Food Fermentations and Biotechnology (2.0 cr)
- MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
- MICA 8003 - Immunity and Immunopathology (4.0 cr)
- MICA 8010 - Microbial Pathogenesis (3.0 cr)
-OR-

**Occupational and Environmental Health Nursing**

Occupational and Environmental Health Nursing provides intensive training for nurses interested in the development, management, and evaluation of health services, programs, and policies designed to promote health and prevent work-related injuries and disease. This concentration requires a minimum of 68 total course credits.

**Public Health Core Courses**
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

**Division Core Courses**
- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
- PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

**Concentration Program Courses**
- PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
- PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
- PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
- PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)
- PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
- NURS 8170 - Research in Nursing (3.0 cr)
- NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

**Recommended Electives**
Select electives in consultation with adviser to meet the required minimum of 68 total course credits.
Take 1 or more course(s) from the following:
- PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
- PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
- PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
- PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)

-OR-

**Environmental Physiology**
This is a trans-disciplinary program emphasizing new perspectives on the study of how humans, as complex heterogeneous biological systems, respond and adapt to their environment. Such study is required to understand the role of the environment in injury and disease, and to shape future technologies and policy for monitoring and protecting human health. Requires a minimum of 52 total course credits.

**Public Health Core Courses**
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

**Concentration Program Courses**
- PUBH 8163 - Toxicology (5.0 cr)
- PUBH 8165 - Current Topics in Toxicology (1.0 cr)
- PUBH 8166 - Experiences in Toxicology Research (3.0 cr)
- PHSL 5101 - Human Physiology (5.0 cr)
- BIOL 4004 - Cell Biology (3.0 cr)
- BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)
- BIOC 4332 - Biochemistry II: Molecular Mechanisms of Signal Transduction and Gene Expression (4.0 cr)
- or BIOC 8001 - Biochemistry: Structure, Catalysis, and Metabolism (3.0 cr)
- BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)

**Recommended Electives**
Select electives in consultation with adviser to fulfill the requirement of 52 total course credits.
Take 1 or more course(s) from the following:
- ANSC 8344 - Mechanisms of Hormone Action (2.0 cr)
- PHCL 5111 - Pharmacogenomics (3.0 cr)
- BIOC 8216 - Signal Transduction and Gene Expression (3.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- PUBH 6160 - Systems Toxicology (3.0 cr)
• PUBH 6161 - Regulatory Toxicology (2.0 cr)

- OR-

**Occupational Injury Prevention Research Training**

Occupational Injury Prevention Research Training (OIPRT), in concert with programs in Occupational Medicine, Occupational Health Nursing, and Industrial Hygiene, among others, is part of the nationally funded Midwest Center for Occupational Health and Safety. This program provides a multifaceted approach to advanced academic and research training, with a primary goal to prevent and control occupational injuries. This concentration requires a minimum of 74 total course credits.

**Epidemiology Course Requirements**

- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 6343 - Epidemiologic Methods III (4.0 cr)

**Biostatistics Course Requirements**

- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)

**Environmental Health Sciences Core Course Requirements**

- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)

**OIPRTT Course Requirements**

See main website for more information: http://sph.umn.edu/

- PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
- PUBH 6121 - Topics: Injury Prevention in the Workplace, Community, and Home (1.0 - 2.0 cr)
- PUBH 6122 - Seminar: Safety in the Workplace (1.0 cr)
- PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
- PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
- PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
- PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 8100 - Topics: Applied Analyses of Occupational Health Data (1.0 - 4.0 cr)
- PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)
- PUBH 8140 - Occupational and Environmental Epidemiology (2.0 cr)
- PUBH 8141 - Doctoral Seminar in Observational Inference (2.0 cr)
- GRAD 8101 - Teaching in Higher Education (3.0 cr)
- IE 5511 - Human Factors and Work Analysis (4.0 cr)
- IE 5513 - Engineering Safety (4.0 cr)
- PSY 5501 - Vocational and Occupational Health Psychology (3.0 cr)

**Thesis Credit Requirement**

24 thesis credits required.

- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

**Electives**

Electives chosen in consultation with advisor to meet the minimum required 74 course credits.

Take 1 or more course(s) from the following:

- PUBH 6348 - Writing Research Grants (2.0 cr)
- PUBH 7405 - Biostatistics: Regression (4.0 cr)
- PUBH 7406 - Advanced Regression and Design (4.0 cr)
- PUBH 7407 - Analysis of Categorical Data (3.0 cr)
- PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
- PUBH 7435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
- PUBH 7450 - Survival Analysis (3.0 cr)
- PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)
- PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
- GRAD 8102 - Practicum for Future Faculty (3.0 cr)
- GRAD 8200 - Teaching and Learning Topics in Higher Education (1.0 cr)
- PUBH 6115 - Worker Protection Law (1.0 cr)
- PUBH 6116 - Environmental Law (1.0 cr)
- PUBH 6123 - Violence Prevention and Control: Theory, Research, and Application (2.0 cr)
- PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
- PUBH 6173 - Exposure to Physical Agents (2.0 cr)
- PUBH 6344 - Research Methods: Application for the Culminating Experience (2.0 cr)
- PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)
- PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
• PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
• PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)
• PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
• KIN 5122 - Applied Exercise Physiology (3.0 cr)
• KIN 5723 - Psychology of Sport Injury (3.0 cr)

-OR-

Occupational Health Services Research and Policy
The OHSRP training program is an innovative collaboration between the Division of Environmental Health Sciences and the Division of Health Policy and Management. The program prepares researchers that will help meet the demand for more rigorous evaluation of workplace policies and programs designed to reduce the nation's burden of occupational illness and injury and to protect and promote the well-being of the American workforce. This concentration requires a minimum of 74 total credits.

Public Health Core Curriculum
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
- PUBH 6103 - Exposure to Environmental Hazards (2.0 cr)
- PUBH 6104 - Environmental Health Effects: Introduction to Toxicology (2.0 cr)
- PUBH 6105 - Environmental and Occupational Health Policy (2.0 cr)
- PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)

Supporting Coursework in Health Policy and Management
- PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- PUBH 6855 - Medical Sociology (3.0 cr)
- PUBH 8801 - Health Services Policy Analysis: Theory (3.0 cr)
- PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)

Potential Electives
Select electives in consultation with advisor to meet the required minimum of 74 total credits. Take 1 or more course(s) from the following:
- PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)
- PUBH 6810 - Survey Research Methods (3.0 cr)
- PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
- PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
- PUBH 6835 - Principles of Health Policy (2.0 cr)
- PUBH 6724 - The Health Care System and Public Health (3.0 cr)
- PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
- PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
- PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Industrial Hygiene
Industrial hygiene is concerned with the health and safety of people at work, and the community at large. Specific concerns are with the recognition, evaluation and control of potential workplace hazards, including chemical, physical, and biological agents; and the potential health threats to the community and the environment.

Required Coursework
The Industrial Hygiene program is concerned with the health and safety of people at work, and the community at large. Specific concerns are with the recognition, evaluation and control of potential workplace hazards, including chemical, physical and biological agents; and the potential health threats to the community and the environment. Requires a minimum of 63 total credits.

Public Health Core Courses
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Choose one of the following courses:
- PUBH 6414 - Biostatistical Literacy (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 42 to 48
- This program does not require summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Epidemiology is the science that describes quantitative trends in health and disease for populations, with application in the biological, environmental, behavioral, and social sciences. Epidemiologists generally collaborate with multidisciplinary teams of health professionals, such as physicians, laboratory scientists, exercise physiologists, nutritionists, statisticians, veterinarians, and behavioral scientists.

Epidemiologists analyze public health trends, design and implement studies, and interpret study results for policy and program development. Beyond investigation into the causes of disease, epidemiologists also develop intervention strategies to prevent disease and promote health. Epidemiologists work at both the individual and community levels to translate medical and laboratory data into population trends.

Students complete a 48-credit curriculum for the standard program. Many epidemiology and other health-related graduate-level courses are available as electives. These allow students to develop a specialty emphasis in either specific public health topics or methodological areas. The 48-credit curriculum includes 22 Epidemiology core course credits, 8 SPH core course credits, 8 credits of biostatistics, and elective credits. An alternative, 42-credit curriculum is offered for students who have completed M.D., D.D.S., D.V.M., or Ph.D. work in a related field. The 42-credit curriculum includes 18 Epidemiology core course credits, 8 SPH core course credits, 8 credits of biostatistics, and elective credits. The standard and alternate programs require a final examination.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Minimum qualifications include a baccalaureate degree with coursework in the basic sciences. Occupational health nursing/medicine applicants must have a relevant degree from an accredited school.

Other requirements to be completed before admission:
For more information visit www.sph.umn.edu

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014
• GMAT
• MCAT
  - Verbal Reasoning score: 10
  - Physical Science score: 10
  - Biological Reasoning score: 10
  - Writing Sample score: 10
• LSAT

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7
• MELAB
  - Final score: 80

Key to test abbreviations (GRE, GMAT, MCAT, LSAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 18 to 22 major credits and 24 to 26 credits outside the major. The is no final exam. A capstone project is required.
Capstone Project: Culminating Experience
This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Courses
Epidemiology Core Courses (18 credits)
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 6343 - Epidemiologic Methods III (4.0 cr)
- PUBH 6350 - Epidemiologic Methods III: Lab (1.0 cr)
- PUBH 7394 - Culminating Experience: Epidemiology (1.0 - 6.0 cr)
- PUBH 7396 - Field Experience: Epidemiology (1.0 - 5.0 cr)
- PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
  or PUBH 6420 - Introduction to SAS Programming (1.0 cr)
"Epi of" Courses
- PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
  or PUBH 6386 - Public Health Aspects of Cardiovascular Disease (2.0 cr)
- PUBH 6387 - Cancer Epidemiology (2.0 cr)
- PUBH 6389 - Nutritional Epidemiology (2.0 cr)
- PUBH 6381 - Genetics in Public Health (2.0 cr)
  or PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)
Biostatistics Courses (8 credits)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
Public Health Core (8 credits)
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
  or PUBH 6101 - Environmental Health (2.0 cr)
- PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
  or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
Basic Science Course (4 credits)
Not required for students with a prior-earned doctorate in a health-related discipline. Nurses or other health professionals may be exempt.
PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)

Electives (8-10 credits)
10 credits required for the standard program.
8 credits required for the accelerated program.

Program Sub-plans
A sub-plan is not required for this program.
Students may complete the program with more than one sub-plan.

Global Health Interdisciplinary Concentration Area
The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

Developing countries are currently undergoing profound demographic changes—changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:

- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Course Group 0

Public Health Policy Interdisciplinary Concentration Area
PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:

- Understanding community dynamics
- Developing advocacy skills for public health
- Analyzing legal and policy structures
- Evaluating and implementing policies and programs
- Influencing community health
- Motivating and educating stakeholders and decision-makers
- Using policy as prevention strategy
- Eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](http://www.sph.umn.edu) section of the catalog website for requirements that apply to all major fields.

Note: Students are not admitted directly into the master of science program; it is available only by special arrangement with the program. Students interested in a master's degree in epidemiology should apply for the master of public health (M.P.H.) degree through the School of Public Health (SPH). For more information on the M.P.H. program, visit the SPH website at www.sph.umn.edu.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Please visit www.sph.umn.edu for admission requirements.

**Special Application Requirements:**
Students are not admitted directly into the master of science program; it is available only by special arrangement with the program. Students interested in a master's degree in epidemiology should apply for the master of public health (M.P.H.) program through the School of Public Health (SPH). For more information on the M.P.H. degree, visit the SPH website at www.sph.umn.edu.

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- **IELTS**
  - Total Score: 7
- **MELAB**
  - Final score: 80

Key to [test abbreviations](http://www.sph.umn.edu) (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the [General Information](http://www.sph.umn.edu) section of the catalog website.

**Program Requirements**

**Plan B:** Plan B requires 22 major credits and 8 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** A master's project is required, equivalent to approximately 4 semester credits.
This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

These requirements apply only to students admitted by special arrangement with the program; students are not admitted directly into the master's program. Students interested in a master's degree in epidemiology should apply for the master of public health (M.P.H.) program through the School of Public Health (SPH). For more information on the M.P.H. degree, visit the SPH website.

Epidemiology Minor
School of Public Health - Adm
School of Public Health

Link to a list of faculty for this program.

Contact Information:
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-oasr@umn.edu
Website: http://www.sph.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 8
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The minors in epidemiology are open to students in master's and doctoral programs that allow a minor, and who want to take some focused coursework in epidemiology. For the doctoral minor, there is the expectation that an aspect of epidemiology is incorporated into the student's doctoral thesis, and a requirement that an epidemiology faculty member represent the minor on the student's preliminary oral and final oral committees.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission to the epidemiology graduate minor is contingent upon prior admission to a University of Minnesota master's or doctoral degree-granting program. Students should first consult with their major program adviser about the advisability of a minor in epidemiology. They will then need to contact the program level assistant, Andrea Kish, at kish@umn.edu for information about the minor and how to get approval to complete it.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The master's minor requires at least 8 credits.

The doctoral minor requires 12 credits: 10 credits in epidemiology and biostatistics, and 2 credits in epidemiology or methods courses. The director of graduate studies must approve the student's selection of elective credits.

The doctoral minor offers two 12-credit options. Option 1, for students with prior epidemiology training, consists of PUBH 8341 (3 credits), PUBH 8342 (3 credits), PUBH 7401 (4 credits), and two credits of electives in an epidemiology- or biostatistics-related area, to be approved by the epidemiology DGS.

Option 2, for students without extensive epidemiology/biostatistics training, consists of PUBH 6341 (3 credits), PUBH 6342 (3 credits), PUBH 6450 (4 credits), and two credits of electives in an epidemiology- or biostatistics-related area, to be approved by the epidemiology DGS. For more detailed information, please contact Andrea Kish at kish@umn.edu.
Twin Cities Campus
Epidemiology Ph.D.
School of Public Health - Adm
School of Public Health

Link to a list of faculty for this program.

Contact Information:
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-oasr@umn.edu
Website: http://www.sph.umn.edu

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 61
- This program requires summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The epidemiology Ph.D. program is designed for students interested in research and teaching careers in the health sciences. Students select one of two formal tracks: clinical/biological epidemiology (CBE) or social/behavioral epidemiology (SBE). The two tracks, each with a minimum of 61 credits, emphasize advanced epidemiologic design, methodology, and analytic skills.

The social/behavioral epidemiology track focuses on origins and development of human behavior patterns and how they are influenced and formed by personality, family, culture, and environment. The clinical/biological epidemiology track focuses on the etiology of diseases, particularly cardiovascular, cancer, genetics, and infectious diseases. A detailed description of the details related to each track may be obtained online or by contacting the major coordinator at epichstu@umn.edu.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

For the doctoral program, applicants must have completed or be about to complete a master's degree in a related field.

Special Application Requirements:
Because of the program's strong emphasis on methodology, quantitative aptitude is very important. This can be demonstrated by scoring at or above the 70th percentile on the quantitative section of the GRE, along with satisfactory grades in college-level quantitative courses. At least three recommendations (form and separate letter) from faculty and/or work supervisors with knowledge of the applicant's scholastic and professional capabilities and potential, and a statement of goals and objectives (letter of intent) for seeking a career in epidemiology are also required.

In addition to the above materials, applicants for the Ph.D. program must submit a separate essay (statement of research interests) beyond what is required for the SOPHAS application process that provides evidence of their potential to conduct original research in a specific epidemiologic area and, if possible, that indicates an interest in particular methodologies or study designs. Serious doctoral applicants are encouraged to contact the major coordinator at epichstu@umn.edu before applying. Students begin their studies in the fall semester. Applications must be completed by December 1 of the year prior to beginning the doctoral program for scholarship consideration; the final deadline is February 15.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
- Paper Based - Total Score: 600
  • IELTS
    - Total Score: 7
  • MELAB
    - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
37 to 39 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students may select one of two formal tracks; both have an applied perspective that emphasizes study design, measurement, quantitative analysis, and data interpretation. Social/behavioral epidemiology focuses on origins and development of human behavior patterns and how they are influenced and formed by personality, family, culture, and environment. Clinical/biological epidemiology focuses on the biological causes of diseases, especially determinants of cardiovascular disease, cancer, infectious diseases, and genetic epidemiology.

The Ph.D. program includes a minimum curriculum of 61 credits. Students must pass written and oral preliminary exams, serve as a TA for 1 semester, write and defend a dissertation, and prepare a first-authored manuscript for publication.

Coursework includes 14-16 credits in epidemiology, biostatistics, ethics, writing grants, and teaching core courses common to both tracks; 6 credits in advanced methodology/statistics that focus on track-specific courses; 4 credits of content-area courses; and 13 credits of supporting program or minor coursework. In addition, the University requires 24 doctoral thesis credits.

Required Coursework
14-16 credits plus 24 thesis credits
- PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
- PUBH 7648 - Writing Research Grants (2.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
- PUBH 8341 - Advanced Epidemiologic Methods: Concepts (3.0 cr)
- PUBH 8342 - Advanced Epidemiologic Methods: Applications (3.0 cr)

Epidemiology PhD students need to take one teaching course. They can take either Grad 8101 (3 cr) or Grad 8200 (1 cr, online) to fulfill the requirement.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Clinical/Biological Epidemiology
Clinical/biological epidemiology focuses on the biological causes of diseases, especially determinants of cardiovascular disease, cancer, infectious diseases, and genetic epidemiology.

Clinical/Biological Track
Clinical/Biological Track (22 credits minimum)
- Biological Methods/Statistics (6 credits minimum).
  - PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
  - or PUBH 6363 - Design and Analysis of Group-Randomized Trials in Epidemiology (3.0 cr)
Choose additional credits from the following courses:

- PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)
- PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
- PUBH 7435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
- PUBH 7407 - Analysis of Categorical Data (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
- EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
- PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
- PUBH 6915 - Nutrition Assessment (2.0 cr)
- PUBH 7445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
- PUBH 8141 - Doctoral Seminar in Observational Inference (2.0 cr)
- PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)

Content area courses (4 credits minimum)

- PUBH 6366 - Public Health Aspects of Cardiovascular Disease (2.0 cr)
- PUBH 6387 - Cancer Epidemiology (2.0 cr)
- PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
- PUBH 6381 - Genetics in Public Health (2.0 cr)
- PUBH 6389 - Nutritional Epidemiology (2.0 cr)
- PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)

Supporting Program/Minor Credits

13 credits minimum. Chosen in consultation with adviser. Potential supporting program courses include courses from the additional biological methods/statistics courses listed above not used to satisfy the biological methods/statistics requirement, or other appropriate courses. Other courses can be considered with adviser's approval.

Social/Behavioral Epidemiology

Social/behavioral epidemiology focuses on origins and development of human behavior patterns and how they are influenced and formed by personality, family, culture, and environment.

Social/Behavioral Track

Social/Behavioral Track (22 credits minimum)

Behavioral Methods/Statistics (6 credits minimum)

- PUBH 6363 - Design and Analysis of Group-Randomized Trials in Epidemiology (3.0 cr)
- or PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)

Choose additional credits from the following courses

Take 1 or more course(s) from the following:

- PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)
- PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
- PUBH 7435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
- PUBH 7407 - Analysis of Categorical Data (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
- EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
- PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
- PUBH 6915 - Nutrition Assessment (2.0 cr)
- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
- EPSY 8221 - Psychological Scaling (3.0 cr)

Content area courses (4 credits minimum)

- PUBH 6333 - Principles of Human Behavior I (2.0 cr)
- PUBH 6334 - Human Behavior II (2.0 cr)

Supporting Program/Minor Credits

13 credits minimum. Chosen in consultation with adviser. Potential supporting program courses include courses from the additional biological methods/statistics courses listed above not used to satisfy the biological methods/statistics requirement, or other appropriate courses. Other courses can be considered with adviser's approval.

Contact Information:
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-oasr@umn.edu
Website: http://www.sph.umn.edu

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 8
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The gerontology minor is available to master's (M.A. and M.S.) and doctoral students. The minor provides a multidisciplinary foundation in gerontology for the master's minors and a more intensive preparation in aging for Ph.D. minors. Past students who have minored in gerontology have majored in many departments, including but not limited to: curriculum and instruction (adult education); communication disorders; dentistry; design, housing, and apparel; family medicine and community health; family social science; journalism and mass communication; kinesiology; nursing; psychology; social work; and sociology. The program of courses is tailored in advance, with consultation between the student and the director of graduate studies of the gerontology minor.

Program Delivery

This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission

The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission to the gerontology minor is contingent upon prior admission to a master's or doctoral degree-granting program. Students must have prepared a minor program of coursework approved by the director of graduate studies in gerontology.

Students should first consult with their major program adviser about the advisability of a minor in gerontology. They will then need to contact the director of graduate studies, Dr. Robert Kane at kanex001@umn.edu, for minor information.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Use of 4xxx courses towards program requirements is not permitted.

The master's and doctoral minors are developed in consultation with, and should be approved in advance by, the director of graduate studies for gerontology. The master's minor requires at least 8 credits, including GERO 5105 - Multidisciplinary Perspectives on Aging (3 cr), or an alternative course approved by the director of graduate studies. The doctoral minor requires at least 12 credits.

Courses are ordinarily taken from a designated course list provided by the Center on Aging and annually updated by the minor program. Students are welcome to identify and propose to the director of graduate studies additional courses on aging that might fulfill the minor requirements.
Graduate Program Requirements

Master's Minor
Take 8 or more credit(s) from the following:
- FSOS 8105 - Family Gerontology (3.0 cr)
- GERO 5100 - Topics in Gerontology (0.5 - 4.0 cr)
- GERO 5105 - Multidisciplinary Perspectives on Aging (3.0 cr)
- GERO 5110 - Biology of Aging (3.0 cr)
- GERO 5111 - Studying Aging and Chronic Illness (2.0 cr)
- GERO 5115 - Introduction to Geriatrics (2.0 cr)
- GERO 5125 - Gerontology Service Learning (3.0 cr)
- GERO 8021 - Application of Proteomics to Aging (1.0 cr)
- GERO 8022 - Fostering a Career in Aging Research (1.0 cr)
- GERO 8023 - Aging Policy Seminar (2.0 cr)
- PSY 5138 *(Inactive)* (3.0 cr)
- PUBH 6904 - Nutrition and Aging (2.0 cr)
- PUBH 8803 - Long-Term Care: Principles, Programs, and Policies (2.0 cr)
- SW 5313 - Social Work with Older Adults (2.0 cr)
- SW 5810 - Seminar: Special Topics (1.0 - 4.0 cr)

-OR-

Doctoral Minor
Take 12 or more credit(s) from the following:
- FSOS 8105 - Family Gerontology (3.0 cr)
- GERO 5100 - Topics in Gerontology (0.5 - 4.0 cr)
- GERO 5105 - Multidisciplinary Perspectives on Aging (3.0 cr)
- GERO 5110 - Biology of Aging (3.0 cr)
- GERO 5111 - Studying Aging and Chronic Illness (2.0 cr)
- GERO 5115 - Introduction to Geriatrics (2.0 cr)
- GERO 5125 - Gerontology Service Learning (3.0 cr)
- GERO 8021 - Application of Proteomics to Aging (1.0 cr)
- GERO 8022 - Fostering a Career in Aging Research (1.0 cr)
- GERO 8023 - Aging Policy Seminar (2.0 cr)
- PSY 5138 *(Inactive)* (3.0 cr)
- PUBH 6904 - Nutrition and Aging (2.0 cr)
- PUBH 8803 - Long-Term Care: Principles, Programs, and Policies (2.0 cr)
- SW 5313 - Social Work with Older Adults (2.0 cr)
- SW 5810 - Seminar: Special Topics (1.0 - 4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 42 to 60
- This program requires summer semesters for timely completion.
- Degree: Master of Healthcare Administration

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The full-time master of healthcare administration (M.H.A.) program is appropriate for applicants with limited or no healthcare work experience, or individuals who wish to make a career change from industries other than health care. Now ranked second in the nation by U.S. News & World Report, the program is accredited by the CAHME.

The program's consistently high rankings are a reflection of many factors--an outstanding faculty of researchers and practitioners, location in one of the nation's centers of healthcare innovation, an extraordinary alumni association, and a track record of educating outstanding leaders for the healthcare industries.

Accreditation
This program is accredited by Commission on Accreditation of Healthcare Management Education (CAHME)

Program Delivery
This program is available:
  • via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Full-time program applicants should have a strong commitment to managing people and resources to create and sustain outstanding healthcare services and organizations. Strong quantitative and communication skills are essential; prior experience in health care is not required.

Visit SPH for detailed application requirements at www.sph.umn.edu

Special Application Requirements:
For the executive program: At least three years of management or clinical leadership experience in a healthcare organization is required. The program reserves the right to require the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT) as a part of the admissions process.

For the full-time program: To prepare for the program's rigorous curriculum, the faculty highly recommends the following coursework prior to matriculation:
  - Statistics
  - Accounting
  - Microeconomics
  - Finance

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5
• GMAT
  - Total score: 500

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7
• MELAB
  - Final score: 80

Key to test abbreviations (GRE, GMAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 42 to 60 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Please see website for information: www.sph.umn.edu

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

Required Courses
- PUBH 6560 - Operations Research and Quality in Health Care (2.0 cr)
- PUBH 6556 - Health and Health Systems (3.0 cr)
- PUBH 6541 - Statistics for Health Management Decision Making (3.0 cr)
- PUBH 6562 - Information Technology in Health Care (2.0 cr)
- PUBH 6535 - Managerial Accounting for Health Services (3.0 cr)
- PUBH 6547 - Health Care Human Resources Management (2.0 cr)
- PUBH 6557 - Health Finance I (3.0 cr)
- PUBH 6555 - Topics in Health Economics (2.0 cr)
- PUBH 6558 - Health Finance II (3.0 cr)
- PUBH 6565 - Innovation of Healthcare Services (2.0 cr)
- PUBH 6568 - Interprofessional Teamwork in Health Care (2.0 cr)
- PUBH 6564 - Private Purchasers of Health Care: Roles of Employers and Health Plans in U.S. Health Care System (2.0 cr)
- PUBH 6553 - Health Care Management Ethics (1.0 cr)
- PUBH 6596 - Legal Considerations in Health Services Organizations (2.0 cr)

Course Group 1

Advanced Problem Solving or New Product Design (Full-time MHA students only)
Students choose between the full-time or executive MHA program. 42 credits are required for the Executive MHA program, and 60 required for the full-time program. Students in the full-time program have the option of choosing the Advanced Problem Solving or New Product Design EMPHASIS with the consent of their adviser.

Executive MHA
The Executive MHA is specifically designed for practicing executives, physicians, and other healthcare professionals seeking to advance their management and leadership capabilities. This is a 42-credit, 25-month program.
- PUBH 7565 - Health Care Delivery, Design & Innovation (2.0 cr)
- PUBH 7556 - Health and Health Systems (2.0 cr)
PUBH 7551 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 7535 - Managerial Accounting for Health Services (3.0 cr)
PUBH 7566 - The Henry Capstone: Core Concepts in Managing Health Care Organizations (1.0 - 2.0 cr)
PUBH 7536 - Health Finance I (3.0 cr)
PUBH 7576 - Legal Considerations in Health Services Organizations (2.0 cr)
PUBH 7568 - Interdisciplinary Teamwork in Health Care (2.0 cr)
PUBH 7569 - Health Care Policy (1.0 cr)
PUBH 7541 - Statistics for Health Management Decision Making (3.0 cr)
PUBH 7537 - Health Finance II (3.0 cr)
PUBH 7564 - Private Purchasers of Health Care (2.0 cr)
PUBH 7547 - Health Care Human Resource Management (2.0 cr)
PUBH 7555 - Topics in Health Economics (2.0 cr)
PUBH 7562 - Information Technology in Health Care (2.0 cr)
PUBH 7571 - Organizational Integration in Health Care Delivery (1.0 cr)
PUBH 7572 - Health Care Strategies in Competitive Markets (2.0 cr)
PUBH 7573 - Managing the Embedded Medical Practice (2.0 cr)
PUBH 7553 - Health Care Management Ethics (1.0 cr)
PUBH 6570 - Healthcare Administration (1.0 - 4.0 cr)

-OR-

Full-time MHA
This program is appropriate for applicants with limited or no healthcare work experience or individuals who wish to make a career change. This is a 60-credit, two-year program.

Year 1: An Introduction to Healthcare Administration
- PUBH 6544 - Principles of Problem Solving in Health Services Organizations (3.0 cr)
- PUBH 7596 - Clerkship in Health Care Administration (2.0 cr)
- Electives (2-4 cr) - can take up to 4 elective credits during Year I

Year II: Advanced Courses and Specialization in Healthcare Administration
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
- PUBH 6568 - Interprofessional Teamwork in Health Care (2.0 cr)
- ENTR 6041 - Initiating New Product Design and Business Development (2.0 - 4.0 cr)
- PUBH 6554 - Healthcare Strategy and Marketing (2.0 cr)
- PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)
- Electives (2-4 cr) - can take up to 4 elective credits during Year II
- ENTR 6041 - Initiating New Product Design and Business Development (2.0 - 4.0 cr)
or PUBH 6577 (2 cr) Advanced Problem Solving.

-OR-

Course List 2
Take exactly 0 course(s) totaling exactly 0 credit(s) from the following:

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 32 to 52
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The MS-HSPRA includes Plan A (Outcomes Research) and Plan B (Health Intelligence and Analytics).

Plan A (Outcomes Research) prepares students to conduct studies that examine the effects of health care treatments and organization on patients and societal outcomes. It provides evidence for what works best for whom under what conditions. The Plan A is an excellent fit for providers, such as physicians, who are seeking to conduct and publish research level studies examining health care treatments and interventions. The Plan A is 49-52 credits that can be completed in two years.

The Plan B (Health Intelligence and Analytics) prepares students to work closely with clinicians, executives and policy makers to translate data into organizational intelligence and evidence that can be used to improve organizational performance and patient outcomes. In contrast to the Plan A, the Plan B (Health Intelligence and Analytics) focuses on helping clinicians, managers, and policy makers frame and answer questions that require rapid response using readily available health care data. The Plan B has 32-34 credits that can be completed in 12 months by attending fall, spring and summer terms.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Preferred GRE scores from exams taken before August 1, 2011, are: Verbal: 500, Quantitative 500, Analytical Writing: 3.5.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 144
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 33 to 36 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 25 to 27 major credits and 7 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Students choose between either a capstone style Plan B project or a thesis style Plan B project. The capstone project is completed as part of a summer course, PUBH 6812, Applied Projects in HIA. Students are matched with a community research organization, given a problem from the organization to analyze and present findings. The Plan B thesis-style project is required to be relevant to the field of health service research, and should represent a minimum of 120 hours of work.

Program length is 32 cr for the Plan B.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Good math skills are essential. Previous coursework in algebra, statistics, or other quantitative coursework is recommended.

Focus Requirements

Plan A: Outcomes Research (49-52 credits)

PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6343 - Epidemiologic Methods III (4.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6806 - Principles of Public Health Research (2.0 cr)
PUBH 6802 - Managing Electronic Health Information (3.0 cr)
PUBH 6724 - The Health Care System and Public Health (3.0 cr)
PUBH 6863 - Understanding Health Care Quality (2.0 cr)
PUBH 6864 - Conducting Health Outcomes Research (3.0 cr)
PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
Electives (6 credits)

-OR-

Plan B: Health Intelligence and Analytics (33-34 credits)

Curriculum includes a required core of 26 credits, plus a specialty area of 7-8 credits.

Plan B Health Intelligence and Analytics

These are the courses that all Plan B students must take.

PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 6806 - Principles of Public Health Research (2.0 cr)
PUBH 6802 - Managing Electronic Health Information (3.0 cr)
PUBH 6724 - The Health Care System and Public Health (3.0 cr)
PUBH 6808 - Professional Practice in HIA, 2 cr.
PUBH 6805 Introduction to Project Management for Health Professionals, 2cr.
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6808 Professional Practice in HIA, 2 cr.
PUBH 6812 Applied Projects in HIA, 2 cr

Plan B Project Options

Students have two options for fulfilling the Plan B Project. Students choose either a capstone-style project completed within a course, or write a traditional thesis-style project.
PUBH 7894 - MS in Health Services Research, Policy, and Administration Plan B Project (2.0 cr)

**Specialty Areas**
Choose one Specialty Area from the 5 listed below or students may propose their own specialty area of 7 credits or more with the assistance of their advisor.

**Cost Effectiveness**
Choose a minimum of 7 credits for this specialization.
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
- PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
- PUBH 6809 - Advanced Methods in Health Decision Science (3.0 cr)
- PUBH 6862

**or Health Care Quality Improvement/Operations Research**
Choose a minimum of 7 credits for this specialization.
- PUBH 6560 - Operations Research and Quality in Health Care (2.0 cr)
- PUBH 6561 - Quantitative Methods Applied to Health Administration Problems (2.0 cr)
- PUBH 6765 - Continuous Quality Improvement: Methods and Techniques (3.0 cr)

**or Health Services Research and Evaluation**
Choose a minimum of 7 credits for this specialization.
- PUBH 6863 - Understanding Health Care Quality (2.0 cr)
- PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
- PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)
- PUBH 6810 - Survey Research Methods (3.0 cr)
- PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)
- PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)

**or Research Methods**
Choose a minimum of 7 credits for this specialization.
- PUBH 6560 - Operations Research and Quality in Health Care (2.0 cr)
- PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)
- PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)

**or Health Economics**
Choose a minimum of 7 credits for this specialization.
- PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
- PUBH 6555 - Topics in Health Economics (2.0 cr)

**or Student Proposed Specialty Area**
Students may design their own specialty area with a minimum of 7 credits, in consultation with their advisor.

**Joint- or Dual-degree Coursework**
Joint Degree Program with Law and M.S. in Health Services Research, Policy, and Administration (J.D./M.S.). Student may take a total of 8 credits in common among the academic programs.

Course Group 1

Other requirements to be completed before admission:
Admission to the health services research, policy, and administration graduate minor is contingent upon prior admission to a master's or doctoral degree-granting program. Students enrolled in graduate programs throughout the University are eligible for this minor.

Students should first consult with their major program adviser about the advisability of a minor in health services research, policy, and administration. They will then need to contact the director of graduate studies, Dr. Kathleen Call at callx001@umn.edu or director of graduate studies assistant, Maureen Andrew at andre031@umn.edu for minor information.

Special Application Requirements:
The master's minor in health services research, policy, and administration is 6 credits and will be individually tailored via consultation with the HSRP&A program director.

The Ph.D. minor is 12 credits and has some specific course requirements. Both the master's and doctoral minor require approval by the HSRP&A program director.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Ph.D. and M.S. Minor Required Coursework
The HSRP&A minor coursework must be chosen from within that major from the following course number sequences: PUBH 65xx, PUBH 67xx, PUBH 68xx, or PUBH 88xx.
The master's minor requires 6 credits and is individually tailored with the advice and approval of the HSRP&A program director. The Ph.D. minor requires 12 credits, of which 2 courses are prescribed below. The remaining credits can be selected from other HSRP&A courses.

- PUBH 6556 - Health and Health Systems (3.0 cr)
- or PUBH 6724 - The Health Care System and Public Health (3.0 cr)
- PUBH 8801 - Health Services Policy Analysis: Theory (3.0 cr)
- or PUBH 8802 - Health Services Policy Analysis: Applications (2.0 cr)
Health Services Research, Policy, and Administration Ph.D.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 48 to 74
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Health services research is a multidisciplinary field of study. Health services researchers examine how social factors, government policies, financing systems, organizational structures, and personal behaviors affect access to needed care, the quality of care provided, and the cost of care delivery. The focus of research is broad and includes individuals, families, providers, healthcare organizations, communities, and populations. The field of health services research is ultimately interested in both "health," understood as health status and well-being, as well as "health care," understood as the effective delivery of healthcare services.

The doctoral program in health services research, policy, and administration is primarily for students interested in academic careers or senior research positions in government or the private sector. The core curriculum is a multidisciplinary examination of the social, political, and economic forces that affect the organization, financing, and delivery of health care services. The emphasis is on theory, modeling, and quantitative methods. Coursework is complemented by the student's involvement with faculty on health services research projects, through weekly academic research seminars, doctoral colloquia, and conference presentations.

Students come from a variety of educational backgrounds, including decision sciences, economics, political science, sociology, business, engineering, and public affairs. Strong quantitative skills are essential.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Preferred GRE scores from exams taken before August 1, 2012 are: Verbal: 600, Quantitative: 600, Analytical Writing: 5.0. Minimum GRE scores taken after Aug. 1, 2012 are: 300 (combined verbal and quantitative), and 4.0 Analytical Writing.

The Ph.D. program requires prerequisites in calculus and statistics. Applicants who have not completed the prerequisites, but are otherwise qualified for admission, are required to take relevant courses at the University or another accredited institution before beginning the program.

Special Application Requirements:
Please visit www.sph.umn.edu for admission requirements

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 144
  - General Test - Analytical Writing: 5
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600

- **IELTS**
  - Total Score: 7

- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

24 to 50 credits are required in the major.

24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

**Required Courses**

All doctoral students complete the Ph.D. core.

- **PUBH 7401** - Fundamentals of Biostatistical Inference (4.0 cr)
- **PUBH 7402** - Biostatistics Modeling and Methods (4.0 cr)
- **PUBH 8810** - Research Studies in Health Care (3.0 cr)
- **PUBH 8811** - Research Methods in Health Care (3.0 cr)
- **PUBH 8830** - Writing for Research (2.0 cr)
- **PUBH 8831** - Writing for Research (2.0 cr)
- **PUBH 6832** - Economics of the Health Care System (3.0 cr)
- **PUBH 6855** - Medical Sociology (3.0 cr)
- **PUBH 6742** - Ethics in Public Health: Research and Policy (1.0 cr)
- **PUBH 8801** - Health Services Policy Analysis: Theory (3.0 cr)
- **PUBH 8341** - Advanced Epidemiologic Methods: Concepts (3.0 cr)

**Concentration Areas**

**Multidisciplinary Social Science**

All doctoral students complete the Ph.D. core courses, and also choose an Area of Emphasis. The Area of Emphasis course work varies by area.

- **PUBH 8805** - Sociological Theory in Health Services Research (3.0 cr)
- **APEC 5151** - Applied Microeconomics: Firm and Household (3.0 cr)

Choose one additional theory course to be decided with your adviser.

- **PUBH 6862** - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- **PUBH 8821** - Health Economics II (3.0 cr)
- **APEC 8203** - Applied Welfare Economics and Public Policy (3.0 cr)
- **SOC 8701** - Sociological Theory (4.0 cr)
- **SOC 8721** - Theories of Social Psychology (3.0 cr)
- **PUBH 8804** - Advanced Quantitative Methods Seminar (3.0 cr)

-OR-

**Health Organizations and Management Science**

All doctoral students complete the Ph.D. core.

Choose 6-8 credits from the list below for theoretical foundations.

Take 6 - 8 credit(s) from the following:
• IDSC 8711 - Cognitive Science (4.0 cr)
• MGMT 8301 - Seminar in Organizational Behavior (4.0 cr)
• MGMT 8302 - Seminar in Organizations Theory (4.0 cr)
• SCO 8745 - Research on Quality Management (3.0 cr)
• PUBH 8894 - Directed Research: Health Services Research, Policy, and Administration (1.0 - 8.0 cr)

Take 2-3 credits in the the methods foundations courses listed below.

SOC 8412 - Social Network Analysis: Theory and Methods (3.0 cr)
or EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
or HRIR 8812 - Core Seminar: Research Methods in Work and Organizations (4.0 cr)

Supporting Program
Students are required to select a minimum of 12 credits for a supporting program with advice from adviser and area of emphasis faculty.

-OR-

Health Decision Science
All doctoral students complete the Ph.D. core and choose an area of Emphasis. The Health Decision Science courses are below.

PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
PUBH 6809 - Advanced Methods in Health Decision Science (3.0 cr)

Supporting program must total a minimum of 12 credits, and must be approved by the area of emphasis faculty.

Take 12 or more credit(s) from the following:

• IE 5112 - Introduction to Operations Research (3.0 cr)
• PUBH 7450 - Survival Analysis (3.0 cr)
• PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
• PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)

-OR-

Sociology of Health and Illness
All doctoral students complete the Ph.D. core and complete the coursework in their chosen Area of Emphasis.

Supporting Program
Below is a sample list of courses for theoretical foundations.

Take 6 or more credit(s) from the following:

• PUBH 8805 - Sociological Theory in Health Services Research (3.0 cr)
• SOC 8701 - Sociological Theory (4.0 cr)
• Sociology of Knowledge (3 cr)
or Seminar in Organizations Theory (4cr)
or Race Relations Theory (3cr)

Students complete a minimum of 12 credits for the supporting program. Below are sample courses.

Take 12 or more credit(s) including 2 or more sub-requirement(s) from the following:

Area of Specialization (disparities, demography, social networks, family, etc.)
Take 8 or more credit(s) from the following:

• SOC 8735 - Sociology of Culture (3.0 cr)
• SOC 8590 - Topics in Life Course Sociology (3.0 cr)
• SOC 8390 - Topics in Political Sociology (3.0 cr)
• SOC 8101 - Sociology of Law (3.0 cr)
• SOC 8290 - Topics in Social Stratification (3.0 cr)
• SOC 8501 - Sociology of the Family (3.0 cr)
• SOC 8221 - Sociology of Gender (3.0 cr)

• Advanced Methodology
Take 4 or more credit(s) from the following:

• PSY 8881 - Seminar: Quantitative and Psychometric Methods (3.0 cr)
• PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
• PUBH 6811 - Health Disparities Research: Measures, Methods, and Data (2.0 cr)
• POL 8126 - Qualitative Methods (3.0 cr)
• PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)
• PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)

-OR-

Clinical Outcomes Research
All doctoral students complete the Ph.D. core.

Area of Emphasis Required Courses

PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6343 - Epidemiologic Methods III (4.0 cr)
PUBH 6854 - Conducting Health Outcomes Research (3.0 cr)
PUBH 6863 - Understanding Health Care Quality (2.0 cr)  
PUBH 7450 - Survival Analysis (3.0 cr)

**Supporting Program**
Students complete a supporting program with a minimum of 12 credits. Take 12 or more credit(s) from the following:
- PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
- PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
- PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)
- PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
- PUBH 6810 - Survey Research Methods (3.0 cr)

-OR-

**Health Policy and Analysis**
All doctoral students complete the Ph.D. core.

**Prerequisites**
By the end of the first year, take, substitute, or test out of one of the following courses:
PUBH 6724 - The Health Care System and Public Health (3.0 cr)  
or  
PUBH 6556 - Health and Health Systems (3.0 cr)

**Supporting Program Required Coursework**
**Supporting Program (minimum 12 credits)**
Take 12 or more credit(s) from the following:
- PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
- PUBH 6810 - Survey Research Methods (3.0 cr)
- PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
- PUBH 6811 - Health Disparities Research: Measures, Methods, and Data (2.0 cr)
- PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)
- PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)

-OR-

**Health Economics**
All doctoral students complete the Ph.D. core.

**Prerequisites**
Calculus, statistics and micro-economics

**Area of Emphasis Required Core**
PUBH 8821 - Health Economics II (3.0 cr)  
APEC 8001 - Applied Microeconomic Analysis of Consumer Choice and Consumer Demand (2.0 cr)  
APEC 8002 - Applied Microeconomic Analysis of Production Choice Under Uncertainty (2.0 cr)  
APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)  
APEC 8004 - Applied Microeconomic Analysis of Social Choice and Welfare (2.0 cr)

or

**Microeconomic Analysis**
ECON 8001 - Microeconomic Analysis (2.0 cr)  
ECON 8002 - Microeconomic Analysis (2.0 cr)  
ECON 8003 - Microeconomic Analysis (2.0 cr)  
ECON 8004 - Microeconomic Analysis (2.0 cr)

or

**Microeconomic Theory**
ECON 8101 - Microeconomic Theory (2.0 cr)  
ECON 8102 - Microeconomic Theory (2.0 cr)  
ECON 8103 - Microeconomic Theory (2.0 cr)  
ECON 8104 - Microeconomic Theory (2.0 cr)

Take 12 or more credit(s) including 1 or more sub-requirement(s) from the following:
Students who choose APEC 8211 must also take 8212
Students who choose to take ECON 8205, must also take 8206, 8207, and 8208.
Students who choose to take ECON 8117, must also take 8118.

Take 2 or more course(s) totaling 8 or more credit(s) from the following:
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)
- ECON 8205 - Applied Econometrics (2.0 cr)  
- ECON 8206 - Applied Econometrics (2.0 cr)  
- ECON 8207 - Applied Econometrics (2.0 cr)  
- ECON 8208 - Applied Econometrics (2.0 cr)  
- HRIR 8812 - Core Seminar: Research Methods in Work and Organizations (4.0 cr)
• ECON 8117 - Noncooperative Game Theory (2.0 cr)
• ECON 8118 - Noncooperative Game Theory (2.0 cr)
• APEC 8202 - Mathematical Optimization in Applied Economics (3.0 cr)
• APEC 8206 - Dynamic Optimization: Applications in Economics and Management (3.0 cr)
• Students may use these courses to reach the overall 12-credit requirement.
• Take 0 or more course(s) from the following:
  • ECON 8xxx
  • APEC 8xxx
  • PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
Twin Cities Campus
Management Fundamentals Postbaccalaureate Certificate

Contact Information:
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-oasr@umn.edu
Website: http://www.sph.umn.edu

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 13
- This program does not require summer semesters for timely completion.
- Degree: Management Fundamentals PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The management fundamentals certificate is specifically designed for employed executives, physicians, and other healthcare professionals seeking to advance their management and leadership capabilities. Specific features of this design include a curriculum that parallels the first portion of the executive M.H.A. curriculum. Students in the certificate who decide to pursue the executive M.H.A. can apply to the program and, if admitted, complete the degree by finishing the executive M.H.A. curriculum.

The curriculum includes a focus on the management of complex, integrated health systems, including the expanded role of physicians as providers, managers, and leaders in those systems. Program faculty are actively involved in applied research with health systems with a focus on integrated health system performance. The on-campus session invites alumni and expert speakers to participate with students in symposia and other learning events.

Students complete the certificate in eight months. The program is designed to minimize interference with work and family: most of the coursework is online and asynchronous; students spend only eight days on campus at the outset of the program. The program builds on the practical application of learning to the participant's organization. The program is based on a learning cohort model in which all students start the program together and progress through the same curriculum providing myriad opportunities for students to learn and work together.

Accreditation
This program is accredited by Commission on Accreditation of Healthcare Management.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Admission to the certificate is decided by the M.H.A. faculty with the advice and counsel of an admissions committee. Admission to the certificate requires the following:
- a bachelor's degree from an accredited college or university
- at least two years experience in a healthcare organization
- current employment in a healthcare organization which affords the opportunity to apply the assignments in the coursework, or an agreement with such an organization in which the applicant is not employed
- a letter of intent describing career interests and the relevance of the certificate to the applicant's personal development

In addition, as noted in the SPH Catalog, applicants whose native language is not English or whose education was completed exclusively at an institution(s) whose language of instruction was not in English must prove English proficiency.

Because the coursework in Certificate 1 is the same as that of the executive M.H.A., some enrollees in the certificate may decide to
pursue the executive M.H.A. after completing the first or second semester of the certificate. Students interested in that option will be required to meet the requirements for admission to the executive M.H.A.

Note: All students in the management fundamentals certificate will be expected to bring a personal computer to the on-campus sessions.

Other than the admission requirements, there are no prerequisites.

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- **IELTS**
  - Total Score: 7
- **MELAB**
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan C:** Plan C requires 50 major credits and 10 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** The capstone project for the M.H.A. program builds upon the coursework throughout the program. Students integrate and synthesize the knowledge, attitudes and skills acquired in the curriculum and apply them to the resolution of a significant management problem in a healthcare organization. The capstone project also provides one of the last opportunities in the M.H.A. program for students to further develop and demonstrate their leadership and team competencies, and receive constructive feedback on these competencies, prior to graduation.

M.H.A. students have three options to choose from as they complete their capstone requirement: (1) the Advanced Problem Solving Course; (2) the Carlson Consulting Enterprise Experiential Learning Program; and (3) the New Product Development Course.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

**Required Coursework**

- PUBH 6562 - Information Technology in Health Care (2.0 cr)
- PUBH 6556 - Health and Health Systems (3.0 cr)
- PUBH 6535 - Managerial Accounting for Health Services (3.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6557 - Health Finance I (3.0 cr)
- PUBH 6568 - Interprofessional Teamwork in Health Care (2.0 cr)

Website: http://www.sph.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 42 to 48
- This program requires summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

While the name of the program, Maternal and Child Health (MCH), may suggest that a focus only on mothers and children, the M.P.H. in maternal and child health program is dedicated to improving the health of youth and families too. The program is especially interested in socially vulnerable populations and the environments, behaviors, and policies that affect their long-term health and well-being.

Students come from a variety of backgrounds, but share a common interest in social justice and public health principles. Graduates quickly assume leadership roles in non-profit organizations, research settings, state and local public health agencies, and healthcare organizations.

The program has a standard, on-campus curriculum (with the option of an epidemiology emphasis) and an online curriculum.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
At least one year's work or volunteer experience in a clinical, community-based, public health or managed-care agency/program that focuses on women, children, adolescents, and/or families.

Basic understanding of physiological and/or psychological human development as demonstrated by coursework, experience, and/or referenced readings.

Applicants to the online track must hold either an advanced degree (M.S., M.D., M.A., M.S.W., etc.) or have 3-5 years of experience directly related to maternal and child health.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 500
  - General Test - Quantitative Reasoning: 500
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 36 to 42 major credits and 10 to 22 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Students may choose from four options for the M.P.H. project. The choice of options should be decided in consultation with their adviser. The options are:
1. Research project
2. Technical report
3. Critical literature review project
4. Research proposal

Students with an M.C.H. epidemiology emphasis are encouraged to select the research report or the research proposal.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Standard or Epidemiology Emphasis

Standard Curriculum
The standard curriculum is for students without advanced degrees or who have limited professional experience. Students complete a minimum of 48 credits in two years.

Scientific Basis courses (8 credits)
- PUBH 6600 - Topics: Maternal and Child Health (0.5 - 4.0 cr)
- PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)
- PUBH 6606 - Children's Health: Issues, Programs, and Policies (2.0 cr)
- PUBH 6607 - Adolescent Health: Issues, Programs, and Policies (2.0 cr)
- PUBH 6613 - Children and Youth With Special Health Care Needs (2.0 cr)
- PUBH 6675 - Women's Health (2.0 cr)
- PUBH 6902 - Maternal, Infant, and Preschool Nutrition (2.0 cr)
- PUBH 6903 - Child and Adolescent Nutrition (2.0 cr)
- PUBH 6906 - Global Nutrition (2.0 cr)

Methodological and Analytical Skills (7-14 credits)
- PUBH 6034 - Program Evaluation for Public Health Practice (3.0 cr)
Select 3 courses from the following list:
  - PUBH 6035 - Applied Research Methods (3.0 cr)
  - PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
  - PUBH 6342 - Epidemiologic Methods II (3.0 cr)
  - PUBH 6343 - Epidemiologic Methods III (4.0 cr)
  - PUBH 6344 - Research Methods: Application for the Culminating Experience (2.0 cr)
  - PUBH 6415 - Biostatistical Methods II (3.0 cr)
  - PUBH 6451 - Biostatistics II (4.0 cr)
  - PUBH 6451 - Biostatistics II (4.0 cr)
  - PUBH 6451 - Biostatistics II (4.0 cr)
  - PUBH 6451 - Biostatistics II (4.0 cr)
  - PUBH 6617 - Practical Methods for Secondary Data Analysis (3.0 cr)
  - PUBH 6705 - Community Health Assessment (3.0 cr)
  - PUBH 6806 - Principles of Public Health Research (2.0 cr)
  - PUBH 6910 - Critical Review of Research in Public Health Nutrition (1.0 cr)

Management and Communication Skills (1 credit)
- PUBH 6673 - Grant Writing for Public Health (1.0 cr)

Policy & Advocacy Skills (2 credits)
PUBH 6630 - Foundations of Maternal and Child Health Leadership (3.0 cr)
Select one course from the following list:
  PUBH 6066 - Building Communities, Increasing Health: Preparing for Community Health Work (2.0 cr)
  PUBH 6074 - Mass Communication and Public Health (3.0 cr)
  PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
  PUBH 6634 - Advocacy and Children's Rights (2.0 cr)
  PUBH 6272 - Management and Organization in Hospital and Health Care Systems (4.0 cr)
PUBH 6760 Healthcare Finance (2).
Public Health Core Courses (14-16 credits).
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
  PUBH 6101 - Environmental Health (2.0 cr)
or PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
  PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
  PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
  PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
  PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
Master's Project and Field Experience (4 credits).
PUBH 7694 - Culminating Experience: Maternal and Child Health (1.0 - 4.0 cr)
PUBH 7696 - Field Experience: Maternal and Child Health (1.0 - 4.0 cr)
-OR-
Epidemiology Emphasis Curriculum
Students admitted into the two-year program also have the option of completing their M.P.H. in maternal and child health with an epidemiology emphasis. This emphasis was created to meet the increasing local, state, and national demands for MCH epidemiologists. It allows students to develop quantitative expertise in MCH content areas.

The MCH program is in our Division of Epidemiology and Community Health, consistently ranked as one of the top epidemiology departments in the United States.

Scientific Basis of MCH Epi Courses (6 credits)
Select one course from the following list:
  PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)
or PUBH 6675 - Women's Health (2.0 cr)
or PUBH 6600 - Topics: Maternal and Child Health (0.5 - 4.0 cr)
Select one course from the following list:
  PUBH 6381 - Genetics in Public Health (2.0 cr)
or PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
or PUBH 6386 - Public Health Aspects of Cardiovascular Disease (2.0 cr)
or PUBH 6387 - Cancer Epidemiology (2.0 cr)
or PUBH 6389 - Nutritional Epidemiology (2.0 cr)
Select one course from the following list:
  PUBH 6606 - Children's Health: Issues, Programs, and Policies (2.0 cr)
or PUBH 6607 - Adolescent Health: Issues, Programs, and Policies (2.0 cr)
or PUBH 6613 - Children and Youth With Special Health Care Needs (2.0 cr)
or PUBH 6902 - Maternal, Infant, and Preschool Nutrition (2.0 cr)
or PUBH 6903 - Child and Adolescent Nutrition (2.0 cr)
or PUBH 6906 - Global Nutrition (2.0 cr)
Methodological and Analytical Skills (13 credits)
PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6343 - Epidemiologic Methods III (4.0 cr)
PUBH 6390 - Topics: Epidemiology (0.5 - 4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
Management and Communication Skills (1 credit)
PUBH 6673 - Grant Writing for Public Health (1.0 cr)
Policy and Advocacy Skills (5-6 credits)
PUBH 6630 - Foundations of Maternal and Child Health Leadership (3.0 cr)
Select one course from the following list:
  PUBH 6066 - Building Communities, Increasing Health: Preparing for Community Health Work (2.0 cr)
or PUBH 6074 - Mass Communication and Public Health (3.0 cr)
or PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
or PUBH 6634 - Advocacy and Children's Rights (2.0 cr)
Public Health Core Courses (15 credits)
Students may take 6102 instead of 6101 or 6741 instead of 6742.
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6101 - Environmental Health (2.0 cr)
PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

**Master's Project and Field Experience (4 credits)**
PUBH 7694 - Culminating Experience: Maternal and Child Health (1.0 - 4.0 cr)
PUBH 7696 - Field Experience: Maternal and Child Health (1.0 - 4.0 cr)

**Electives**
Electives to total 48 credits.

**Program Sub-plans**
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

**Online**

**Required Coursework**

**Scientific Basis of MCH (5 credits)**
Scientific Basis of MCH (5 credits).
PUBH 6000 - Topics: Maternal and Child Health (0.5 - 4.0 cr)
PUBH 6006 - Children's Health: Issues, Programs, and Policies (2.0 cr)
PUBH 6613 - Children and Youth With Special Health Care Needs (2.0 cr)
PUBH 6902 - Maternal, Infant, and Preschool Nutrition (2.0 cr)
PUBH 6903 - Child and Adolescent Nutrition (2.0 cr)

**Methodological and Analytical Skills (5 credits)**
Methodological and Analytical Skills (5 credits). Select a minimum of three additional credits. These credits should be chosen with consultation of an advisor.
PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)

**Management and Communication Skills (6 credits)**
Management and Communication Skills (6 credits). These credits should be chosen with consultation of an advisor.
NURS 5925 - Grant Writing and Critique (1.0 cr)
PUBH 6655 - Principles and Programs in Maternal and Child Health (2.0 cr)

**Public Health Core Courses**
Public Health Core Courses (14 credits).
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)

or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

**Master's Project and Field Experience**
Master's Project and Field Experience (4 credits).
PUBH 7696 - Field Experience: Maternal and Child Health (1.0 - 4.0 cr)
PUBH 7694 - Culminating Experience: Maternal and Child Health (1.0 - 4.0 cr)

**Electives**
Electives to total 42 credits.

**Complementary and Alternative Medicine Interdisciplinary Concentration Area**
The Complementary and Alternative Medicine Interdisciplinary Concentration (CAMIC) offered through the School of Public Health is a unique opportunity for SPH students who are pursuing an MPH degree to acquire and cultivate professional skills in an emerging area of health care that is expanding and altering the field of public health.

The concentration includes coursework from the Center for Spirituality and Healing at the University of Minnesota, a nationally recognized leader in integrative medicine that brings together biomedical, complementary, cross-cultural, and spiritual care.

SPH graduate students must complete a formal program plan if they want the CAMIC to appear on their transcripts. For more information, contact Carol Francis, Interdisciplinary Concentrations Coordinator, at franc004@umn.edu or 612-624-6952.

**Global Health Interdisciplinary Concentration Area**
The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing...
nations.

Developing countries are currently undergoing profound demographic changes--changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions aboard.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, Interdisciplinary Concentrations Coordinator, at franc004@umn.edu or 612-624-6952.

Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration addresses the unequal burden of health risks, morbidity and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to healthcare. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. For example, according to the Minnesota Department of Health:
- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, Interdisciplinary Concentrations Coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area
PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- Understanding community dynamics
- Developing advocacy skills for public health
- Analyzing legal and policy structures
- Evaluating and implementing policies and programs
- Influencing community health
- Motivating and educating stakeholders and decision-makers
- Using policy as prevention strategy
- Eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, Interdisciplinary Concentrations Coordinator, at franc004@umn.edu or 612-624-6952.
Public Health Administration and Policy M.P.H.

Website: http://www.sph.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 42 to 44
- This program requires summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Public Health Administration and Policy (PHAP) program offers a core curriculum centering on managing organizations to improve the health of certain populations. Throughout the program, there is a strong emphasis on developing effective communication skills and the ability to work well with various cultures and communities.

To receive this degree, students will need to complete the curriculum, a field experience, and a master's project. Graduates pursue public health careers in a variety of settings including non-profit organizations, state and local public health agencies, and healthcare companies.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Preferred GRE performance expectations (test taken post August 2011): A combination of 300 on the quantitative and verbal sections of the test and a score of 3.5 on the analytical writing assessment. Some programs may have higher preferred minimum scores. Check specific programs for details.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 500
  - General Test - Quantitative Reasoning: 500
  - General Test - Analytical Writing: 3.5
- GMAT
- MCAT
- LSAT
  - Law School Admission Test (LSAT) score: 150

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
IELTS
- Total Score: 7
MELAB
- Final score: 80

Key to test abbreviations (GRE, GMAT, MCAT, LSAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 42 to 44 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: Culminating Experience

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

Required SPH Core Courses

M.P.H. Core Courses
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6101 - Environmental Health (2.0 cr)
  - or PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  - or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
  - or PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
  - or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

PHAP Core Courses
- PUBH 6700 - Foundations of Public Health (3.0 cr)
- PUBH 6724 - The Health Care System and Public Health (3.0 cr)
- PUBH 6755 - Planning and Budgeting for Public Health (2.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)
- PUBH 7796 - Field Experience: Public Health Administration and Policy (2.0 cr)
- PUBH 7784 - Master's Project Seminar: PHAP and HSRP&A (1.0 cr)
- PUBH 7794 - Master's Project: Public Health Administration and Policy (2.0 - 3.0 cr)
- PUBH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)

Specialty Areas (includes concentrations, emphasis)

Students must complete 7 credits within one specialty area. NOTE: If a student chooses an interdisciplinary concentration, a specialty area need not be chosen.

Management
- For this area, PUBH 6727 is a required course; remaining credits will be chosen along with the advisor from a list of courses.
  - PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)
  - OR-

Analysis
- For this area, PUBH 6717, 6811, 6845 and 6852 are required courses; remaining credits will be chosen along with the advisor from a list of courses.
  - PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
  - PUBH 6811 - Health Disparities Research: Measures, Methods, and Data (2.0 cr)
  - PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)
  - PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
  - OR-
Policy
For this area, PUBH 6711 and 6835 are required courses; remaining credits will be chosen along with the advisor from a list of courses.
PUBH 6711 - Public Health Law (2.0 cr)
PUBH 6835 - Principles of Health Policy (2.0 cr)

-OR-

General Health Policy and Management
For this area, PUBH 6726 and 6835 are required courses; remaining credits will be chosen along with the advisor from a list of courses.
PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)
PUBH 6835 - Principles of Health Policy (2.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Executive Public Health Administration and Policy
This sub-plan is limited to students completing the program under Plan C.

The e-PHAP degree is a 42 credit program designed to be completed in 25 months. It is designed for working public health professionals who are in, or would like to move into, leadership or managerial roles in organizations that provide core public health functions. Students enrolled in the program will spend 17 days on campus where they will complete four intensive (7 credits total) in-person courses that include an online component. The remainder of the program is delivered in an online environment.

Three years of professional public health experience.

ePHAP Core Courses
These courses are required for students enrolled in the Executive Public Health Administration and Policy program, along with the required M.P.H core courses (14 credits), plus two credits of electives.
Course will review how to use and understand data to help make decision within a public health organization. First time offered fall 2014. Syllabus currently in development. Course is two credits.
PUBH 6700 - Foundations of Public Health (3.0 cr)
PUBH 6724 - The Health Care System and Public Health (3.0 cr)
PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)
PUBH 6755 - Planning and Budgeting for Public Health (2.0 cr)
PUBH 6835 - Principles of Health Policy (2.0 cr)
PUBH 7796 - Field Experience: Public Health Administration and Policy (2.0 cr)
Course will review how to lead an organization through changes determined via evaluating program effectiveness. First time offered fall 2015. Syllabus currently in development. Course is two credits.
This course will address basic concepts of public health law and the legal bases for the existence and administration of public health programs. First time offered spring 2015. Syllabus currently in development. Course is one credits.
PUBH 6765 - Continuous Quality Improvement: Methods and Techniques (3.0 cr)
PUBH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)

Global Health Interdisciplinary Concentration Area
The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

Developing countries are currently undergoing profound demographic changes—changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.
Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:
- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area
Public Health Policy Interdisciplinary Concentration (PHPIC) coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- understanding community dynamics
- developing advocacy skills for public health
- analyzing legal and policy structures
- evaluating and implementing policies and programs
- influencing community health
- motivating and educating stakeholders and decision-makers
- using policy as prevention strategy
- eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Arizona State University
The Public Health Administration & Policy (PHAP) program hosted by Arizona State University is a 44 credit program designed to be completed by students located in the Phoenix area in a hybrid format. Students earn a University of Minnesota MPH degree, by taking a combination of online classes from the U of M and in-person classes at the Arizona State University Campus. The program is targeted to students in Phoenix and the surrounding area interested in working with government agencies, nonprofits, or private health care organizations that seek to advance public health. This program prepares students to:
- Lead, manage and evaluate public health programs and agencies
- Design and implement research to guide evidence-based decision-making
- Evaluate and inform public policy that impacts population health

MPH Core
Students will be required to take the MPH core courses for a total of 14 credits.
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

PHAP Core
Students will be required to take the PHAP Core courses for a total of 17 credits.
- PUBH 6700 - Foundations of Public Health (3.0 cr)
- PUBH 6724 - The Health Care System and Public Health (3.0 cr)
- PUBH 6755 - Planning and Budgeting for Public Health (2.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)
- PUBH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)
- PUBH 7784 - Master's Project Seminar: PHAP and HSRP&A (1.0 cr)
- PUBH 7794 - Master's Project: Public Health Administration and Policy (2.0 - 3.0 cr)
- PUBH 7796 - Field Experience: Public Health Administration and Policy (2.0 cr)
General Health Policy and Management Specialty Area
These courses are required for students enrolled in the Public Health Administration and Policy program located at Arizona State University. Students will choose an additional 3 credits (for a total of 7) to complete the specialty area from the U of MN approved by the advisor and program coordinator.

PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)
PUBH 6835 - Principles of Health Policy (2.0 cr)

Electives
Students will take 6 elective credits from the U of MN that have been approved by the advisor and program coordinator.
Twin Cities Campus

Public Health Core Concepts Postbaccalaureate Certificate

School of Public Health - Adm

School of Public Health

Contact Information:
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-oasr@umn.edu
Website: [http://www.sph.umn.edu](http://www.sph.umn.edu)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 14
- This program does not require summer semesters for timely completion.
- Degree: Public Health Core Concepts PBacc Certificate

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The certificate program offers an opportunity to gain the knowledge and skills to understand, assess, and manage population health in public health, health care, and human services settings. Many students will use their public health knowledge and skills to enhance effectiveness and opportunities in their current work or career path. Population science is an increasingly valued area of expertise in many health and human service organizations. It will help prepare public health workers and others to respond to emerging public health issues.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission preferences and prerequisites:
- Applicants must hold a baccalaureate degree.
- Applicant should demonstrate strong written skills.
- The admissions committee looks closely at the applicant's work experience and grades in math and science.

Special Application Requirements:
Applicants must submit to SOPHAS, the centralized online application service:
- Completed SOPHAS application and application fee, designating the University of Minnesota School of Public Health
- Personal essay describing the applicant's reason for applying, career goals, and how the certificate will help them achieve their goals
- Three letters of recommendation
- Official transcripts of record from each college/university attended
- Resume or C.V.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Coursework
The public health core concepts certificate curriculum is the same as the core content taught in the School of Public Health's M.P.H. degree programs. All six courses are available in online and in-person formats. Students will be able to register, receive materials, interact with faculty and fellow students, and complete this program without traveling to the campus. If completing coursework online, internet access is required.

PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
or PUBH 6101 - Environmental Health (2.0 cr)

- This program requires summer semesters for timely completion.
- Degree: Public Health Food Protection PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The public health certificate in food protection is part of the public health practice major. It provides formal training in public health. This training will help prepare public health workers and others to respond to incidences of bio-terrorism, infectious disease outbreaks, and other emerging public health issues. Students typically complete the curriculum by attending at least two Public Health Institutes (PHI), held in May/June of each year.

Many students will use their public health knowledge and skills to enhance effectiveness and opportunities in their current work or career paths. Population science is an increasingly valued area of expertise in many health and human service organizations.

**Program Delivery**

• Program Type: Master's
• Requirements for this program are current for Fall 2014
• Length of program in credits: 43
• This program does not require summer semesters for timely completion.
• Courses are available both on campus and online.
• Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Information is key to effective public health administration. Surveillance systems provide information on infectious disease tracking, disease clusters, food-borne outbreaks, and injuries. Environmental monitoring systems provide information on health risks such as toxic chemicals or airborne pollutants. Registries contain information on vital statistics such as birth, death, and immunization. e-Public Health integrates information from electronic health records to use in improving population health.

Students pursuing the MPH in Public Health Informatics (MPH-PHI) learn how to manage public health information systems, including vital statistics systems, online analytical processing tools, immunization registries, population health surveillance, community health information networks, and more.

The MPH-PHI is offered both in-person and fully online. This program will prepare you to:

- Understand the significance of the various public health information systems and how to leverage these systems to improve health of the public
- Conceive, design, develop, implement, and use IT by applying informatics skills to population health
- Manage information systems within an organization or network of organizations
- Create state-of-the-art solutions at the intersection of informatics and global public health

Accreditation
This program is accredited by CEPH (Council on Education for Public Health)

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)
• primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
All application materials are submitted directly to SOPHAS:
- Statement of Purpose and Objectives: Provide an essay describing your past education, experience, and current professional career objectives. You are encouraged to comment on any or all of the following: plans you have to use your education and training; the needs and/or challenges you perceive as important in your field of study; and any personal qualities, characteristics, and skills you believe will enable you to be successful in your chosen field of study.
- Resume or CV
- Official post-secondary transcripts from all U.S. institutions attended (must be sent directly from the institutions to SOPHAS). This includes previous study at the University of Minnesota.
- Three letters of recommendation from persons qualified to assess your academic work;
clinical, public health, or professional experiences; or leadership potential in public health.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 43 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: The purpose of the master's project is to enable students to demonstrate: familiarity with the tools of research and scholarship in the field of public health informatics; the ability to work independently; the ability to plan and carry out a systematic investigation related to a public health issue; and the ability to effectively present, in written and oral form, the results of their investigation.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

MPH-PHI Required Courses

MPH Core (15 credits)

Students must satisfy competency requirements in the six core areas of public health - administration, behavioral science, biostatistics, environmental health, epidemiology, and ethics.

Administration

PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Behavioral Science

PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)

Biostatistics

PUBH 6450 - Biostatistics I (4.0 cr)

Environmental Health

PUBH 6101 - Environmental Health (2.0 cr)

or PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)

Ethics

PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)

or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Epidemiology

PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)

or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

PHI Core (20 credits)

Students are required to complete the following PHI core courses to fulfill the MPH-PHI program requirements.

PUBH 6802 - Managing Electronic Health Information (3.0 cr)

PUBH 6806 - Principles of Public Health Research (2.0 cr)

HINF 5430 - Health Informatics I (3.0 cr)

PUBH 6876 - Public Health Systems Analysis and Development (2.0 cr)

PUBH 6877 - Public Health Systems Analysis and Development Practicum (2.0 cr)
PUBH 6880 - Introduction to Public Health Informatics (2.0 cr)
HINF 5560 - Advanced Public Health Informatics (2.0 cr)
PUBH 6890 - Public Health Systems Development Project I (2.0 cr)
PUBH 6891 - Public Health Systems Development Project II (2.0 cr)

**Electives (8 credits)**
Students select the remaining 8 credits from other 5xxx, 6xxx, 7xxx, and 8xxx level courses. Courses can be taken outside of SPH as long as they begin with 5xxx or above, and with prior approval from program director. Students are strongly encouraged to take the following elective course as most related to PHI are projects:
- PUBH 6805 - Project Management for Health Professionals (2.0 cr)

Other suggested electives:
- PUBH 6705 - Community Health Assessment (3.0 cr)
- PUBH 6025 - e-Public Health: Online Intervention Design (3.0 cr)
- PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)
- NURS 7108 - Population Health Informatics (2.0 cr)
- HINF 5431 - Health Informatics II (3.0 cr)
- HINF 5520 - Clinical Informatics and Patient Safety (2.0 cr)
- HINF 5540 - Interprofessional Health Informatics (2.0 cr)
- NURS 5116 - Consumer Health Informatics (1.0 cr)

**Program Sub-plans**
A sub-plan is not required for this program. Students may complete the program with more than one sub-plan.

**Global Health Interdisciplinary Concentration Area**
The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations. Developing countries are currently undergoing profound demographic changes—changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease. Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad. SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

**Health Disparities Interdisciplinary Concentration Area**
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

**Public Health Policy Interdisciplinary Concentration Area**
The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care. PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:

- Understanding community dynamics
- Developing advocacy skills for public health
- Analyzing legal and policy structures
- Evaluating and implementing policies and programs
- Influencing community health
- Motivating and educating stakeholders and decision-makers
- Using policy as prevention strategy

© 2005 by the Regents of the University of Minnesota

The University of Minnesota is an equal opportunity educator and employer.

Information current as of September 19, 2014
Eliminating health disparities through policy SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Courses are available both on campus and online.
- Degree: Public Health Informatics PostBaccalaureate Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Certificate in Public Health Informatics (Cert-PHI) is a 9-12 month program designed to prepare professionals for leadership positions that bridge information technology and public health.

Students who complete the certificate will be able to implement and manage public health information systems, including: vital statistics systems, online analytic processing tools that support decision-making, immunization registries, population health surveillance, community health information networks, and electronic public health data interchange.

This certificate is awarded upon successful completion of 12 credits. We expect students who complete the Cert-PHI to have expanded and supplemented their current domain knowledge in a way that opens up new corridors of discovery and employment for them.

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Baccalaureate degree or higher

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.
In addition to the required courses specified below, Cert-PHI students are strongly encouraged to take the following course as most work in PHI are projects. PUBH 6805 - Project Management for Health Professionals (2.0 cr).

**Required Cert-PHI Courses**
- PUBH 6876 - Public Health Systems Analysis and Development (2.0 cr)
- PUBH 6877 - Public Health Systems Analysis and Development Practicum (2.0 cr)
- HINF 5430 - Health Informatics I (3.0 cr)
- PUBH 6802 - Managing Electronic Health Information (3.0 cr)
- PUBH 6880 - Introduction to Public Health Informatics (2.0 cr)
Twin Cities Campus

Public Health Minor

School of Public Health - Adm
School of Public Health

Link to a list of faculty for this program.

Contact Information:
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-oasr@umn.edu
Website: http://www.sph.umn.edu

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 8
- Length of program in credits (Doctorate): 14
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The minor in public health is available only to students enrolled in master's and doctoral programs outside of the School of Public Health. Students enrolled in master's and doctoral programs within the School of Public Health are not eligible for this minor because the requirements of the public health minor are part of their major field of study.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission to the public health graduate minor is contingent upon prior admission to a master's or doctoral degree-granting program at the University of Minnesota. Students enrolled in graduate programs within the School of Public Health are not eligible for this minor.

Students should first consult with their major program adviser about the advisability of a minor in public health. They will then need to contact the director of graduate studies, Kristin Anderson, Ph.D., M.P.H. (ander116@umn.edu or 612-624-1818) or plan level coordinator, Carol Francis (franc004@umn.edu or 612-624-6952), for minor information.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The minor program is designed to suit the particular needs and interests of the students with the provision that a graduate-level course in environmental health, epidemiology, and biostatistics be included in that requirement. These courses must at least meet the content level of the school's basic courses in those three subjects.

The master's minor requires a minimum of 8 graduate credits; the doctoral minor requires a minimum of 14 graduate credits. Courses for the minor must be selected from those offered by the School of Public Health. In order to meet the minor requirements, students must successfully complete graduate coursework in each of the following disciplines: biostatistics, epidemiology, and environmental health.

Suggested courses include PUBH 6101 - Environmental Health or PUBH 6102 - Issues in Environmental Health; PUBH 6320 - Fundamentals of Epidemiology or PUBH 6341 - Epidemiologic Methods I; and PUBH 6414 - Biostatistical Methods I or PUBH 6450 - Biostatistics I.
If students have already taken comparable graduate-level courses in these disciplines, other public health courses can be used to complete the minor requirement with the approval of the public health adviser and the director of graduate studies. Since public health courses may have prerequisites or enrollment limitations, early planning with an adviser is suggested.

School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph.oasr@umn.edu
Website: http://www.sph.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 44 to 64
- This program requires summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Public Health Nutrition (PHN) program is designed to meet the needs of students who want graduate training in health promotion, disease prevention, program development, and nutrition interventions.

The program's faculty are internationally recognized for research in obesity prevention, child and adolescent nutrition, eating disorder prevention, nutrition epidemiology, and nutrition intervention.

Coordinated Master's Program (CMP):
In addition to the traditional public health nutrition degree, the program offers the opportunity to gain expertise in a concentrated area of study such as epidemiology, global health, alternative medicine, health policy, and disability policy. It also offers a coordinated master's program. Please note that the coordinated master's program requires that students have their own transportation during the academic year and summer session, since many sites are not located on public transportation routes.

Full- and Part-time Program:
Students may pursue the M.P.H. on a full-time or part-time basis, but should note that the majority of the courses are offered only during the day. (Note: The Coordinated Master's Program must be taken on a full-time basis.)

Accreditation
This program is accredited by Council on Education for Public Health (CEPH) & Commission on Accreditation for Dietetics Education.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
The following courses are required for admission: one general biology course with lab; two general chemistry classes with labs; one organic chemistry; one biochemistry; one human nutrition course; and one social science course. In addition, CMP applicants must also complete one physiology course; one microbiology course with lab; one intro to nutrition course; one intro to food science course; one food systems/service management course. All courses MUST be complete before starting the program. If students are currently completing the prerequisites while they are applying, they must indicate on their application materials how their prerequisites will be completed before they start the program.

Preferred GRE performance expectations (test taken post August 2011): A combination of 300 on the quantitative and verbal sections of the test and a score of 3.5 on the analytical writing assessment. Some programs may have higher preferred minimum scores. Check specific programs for details.
Special Application Requirements:
Students applying for the Coordinated Master's Program track go through a two-step process for admission. The first is to be admitted to the M.P.H. degree program. After all CMP applications submitted prior to the Dec. 1 CMP application deadline have been reviewed and admission decisions made, the applicant will receive an email questionnaire and will undergo a phone interview. The top eight candidates will be selected to fill the eight available CMP spots. Students not selected for the CMP may not start the standard track and later transfer to the CMP.

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7

Key to test abbreviations(GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 44 to 64 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: Culminating Experience

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Public Health Nutrition Core
PUBH 6901 - Foundations of Public Health Nutrition Leadership (2.0 cr)
PUBH 6914 - Community Nutrition Intervention (3.0 cr)
PUBH 6915 - Nutrition Assessment (2.0 cr)
PUBH 6933 - Nutrition and Chronic Diseases (2.0 cr)
PUBH 7994 - Culminating Experience: Public Health Nutrition (1.0 - 6.0 cr)
PUBH 7996 - Field Experience: Public Health Nutrition (1.0 - 6.0 cr)

Tracks

Standard Track
Lifecycle Courses
Take 2 or more course(s) from the following:
• PUBH 6902 - Maternal, Infant, and Preschool Nutrition (2.0 cr)
• PUBH 6903 - Child and Adolescent Nutrition (2.0 cr)
• PUBH 6904 - Nutrition and Aging (2.0 cr)
• PUBH 6906 - Global Nutrition (2.0 cr)

Research Methods
PUBH 6910 - Critical Review of Research in Public Health Nutrition (1.0 cr)

Research Methods Options
Take 3 or more credit(s) from the following:
• PUBH 6034 - Program Evaluation for Public Health Practice (3.0 cr)
• PUBH 6035 - Applied Research Methods (3.0 cr)
• PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
• PUBH 6342 - Epidemiologic Methods II (3.0 cr)
• PUBH 6415 - Biostatistical Methods II (3.0 cr)
• PUBH 6420 - Introduction to SAS Programming (1.0 cr)
• PUBH 6451 - Biostatistics II (4.0 cr)
• PUBH 6617 - Practical Methods for Secondary Data Analysis (3.0 cr)
• PUBH 6705 - Community Health Assessment (3.0 cr)
• PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)
• PUBH 6806 - Principles of Public Health Research (2.0 cr)
• PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
• PUBH 6389 - Nutritional Epidemiology (2.0 cr)
• PUBH 7250 - Designing and Conducting Focus Group Interviews (1.0 cr)
• NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)

Public Health Core
PUBH 6101 - Environmental Health (2.0 cr)
or PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Electives
Students must take enough graduate-level electives to fulfill minimum credit requirements in order to graduate. Students without a nutrition/dietetics background must take PUBH 6355 - Pathophysiology, PUBH 6905 - Nutrition for Public Health Promotion and Disease Prevention, and FSCN 4621 - Nutrition and Metabolism.

-OR-

Coordinated Master's Program

Lifecycle Courses
Students who already have a nutrition/dietetics undergraduate degree need to select two of the following four courses. Students who do NOT have a nutrition/dietetics undergraduate degree must choose PUBH 6902, PUBH 6903, and PUBH 6904.
Take 2 - 3 course(s) from the following:
• PUBH 6902 - Maternal, Infant, and Preschool Nutrition (2.0 cr)
• PUBH 6903 - Child and Adolescent Nutrition (2.0 cr)
• PUBH 6904 - Nutrition and Aging (2.0 cr)
• PUBH 6906 - Global Nutrition (2.0 cr)

Research Methods
PUBH 6910 - Critical Review of Research in Public Health Nutrition (1.0 cr)

Research Methods Options
Take 3 or more credit(s) from the following:
• PUBH 6034 - Program Evaluation for Public Health Practice (3.0 cr)
• PUBH 6035 - Applied Research Methods (3.0 cr)
• PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
• PUBH 6420 - Introduction to SAS Programming (1.0 cr)
• PUBH 6342 - Epidemiologic Methods II (3.0 cr)
• PUBH 6415 - Biostatistical Methods II (3.0 cr)
• PUBH 6451 - Biostatistics II (4.0 cr)
• PUBH 6617 - Practical Methods for Secondary Data Analysis (3.0 cr)
• PUBH 6705 - Community Health Assessment (3.0 cr)
• PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)
• PUBH 6806 - Principles of Public Health Research (2.0 cr)
• PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
• PUBH 6389 - Nutritional Epidemiology (2.0 cr)
• PUBH 7250 - Designing and Conducting Focus Group Interviews (1.0 cr)
• NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)

Field Experience/Nutrition Practicum
CMP students take four credits of PUBH 7996 in addition to the following:
PUBH 6995 - Community Nutrition Practicum (8.0 cr)
PUBH 6996 - Clinical Nutrition Practicum (9.0 cr)

Public Health Core

Environmental Health
PUBH 6101 - Environmental Health (2.0 cr)
or PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)

Epidemiology
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

**Biostatistics**
PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)

**Ethics**
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

**Administration/Management**
Take 2 or more credit(s) from the following:
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

**Electives**
CMP students who do not have a nutrition/dietetics undergraduate degree must take FSCN 4621 - Nutrition and Metabolism or FSCN 4612 - Advanced Nutrition AND FSCN 4665 - Medical Nutrition Therapy I, AND FSCN 4666 - Medical Nutrition Therapy II and enough graduate-level elective credits to fulfill the minimum required to graduate. Students with a nutrition/dietetics undergraduate degree must take 8-12 graduate-level elective credits to fulfill 60 total credits.

-OR-

**Nutritional Epidemiology Track**

**Lifecycle courses**
PUBH 6902 - Maternal, Infant, and Preschool Nutrition (2.0 cr)
or PUBH 6903 - Child and Adolescent Nutrition (2.0 cr)
or PUBH 6904 - Nutrition and Aging (2.0 cr)
or PUBH 6906 - Global Nutrition (2.0 cr)

**Nutrition Science**
Only students who do not have an undergraduate degree in nutrition/dietetics need to take the following nutrition science courses.
- FSCN 4621W - Nutrition and Metabolism [WI] (4.0 cr)
- PUBH 6905 - Nutrition for Public Health Promotion and Disease Prevention (2.0 cr)

**Epidemiology and Biostatistics Core**
PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6343 - Epidemiologic Methods III (4.0 cr)
PUBH 6390 - Topics: Epidemiology (0.5 - 4.0 cr)
PUBH 6389 - Nutritional Epidemiology (2.0 cr)
PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)

**“Epi of” Courses**
PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
or PUBH 6386 - Public Health Aspects of Cardiovascular Disease (2.0 cr)
or PUBH 6387 - Cancer Epidemiology (2.0 cr)

**Public Health Core**

**Environmental Health**
PUBH 6101 - Environmental Health (2.0 cr)
or PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)

**Ethics**
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

**Administration/Management**
Take 1 or more course(s) from the following:
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

**Program Sub-plans**
A sub-plan is not required for this program.
Students may complete the program with more than one sub-plan.

**Coordinated Option**
The Coordinated Masters Program (CMP) in public health nutrition provides both a master of public health degree in public health nutrition and the didactic coursework and supervised practice components for registration eligibility and entry into dietetic practice. The program accepts eight students each year. The CMP provides a public health nutrition concentration area that focuses on rural and disadvantaged populations. Supervised practice experiences are integrated throughout the 24-month program utilizing sites both within and outside of Minnesota. Students complete a total of 1,200 hours of supervised practice. Upon successful completion of the program (i.e. coursework, supervised practice experiences, master's project and a comprehensive oral examination) students will receive an
M.P.H. degree and a verification statement of eligibility to write the national registration examination for dietitians.

See Program Requirements Page

Global Health Interdisciplinary Concentration Area
The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

Developing countries are currently undergoing profound demographic changes—changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:
- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area
The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care.

PHPIC coursework provides a better understanding of the healthcare system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- understanding community dynamics
- developing advocacy skills for public health
- analyzing legal and policy structures
- evaluating and implementing policies and programs
- influencing community health
- motivating and educating stakeholders and decision-makers
- using policy as prevention strategy
- eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Arizona State University
This sub-plan is limited to students completing the program under Plan C.

**Public Health Nutrition Core**
Students take PubH 6901, 6914 and 6933 from the U of MN as part of the nutrition core in addition to PubH 69XX nutrition assessment course (to be developed)

**Research Methods**
Students will take three research methods credits that are approved by the advisor and program coordinator. Students are also required to take PubH 6910 and PubH 7994 from the U of MN.

**Electives**
Students will take elective credits from the U of MN that have been approved by the advisor and program coordinator.

**additional nutrition science courses for non-nutrition/dietetics undergrad majors**
- PubH 69XX: Human Pathophysiology (3 cr)
- PubH 69XX: Advanced Macronutrient Metabolism (3 cr)
Twin Cities Campus
Public Health Postbaccalaureate Certificate in Performance Improvement

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program requires summer semesters for timely completion.
- Degree: Performance Improvement PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The public health certificate in performance improvement trains students to understand and apply quality improvement methods at both the systems and organizational level. The program will provide the tools needed in order to achieve and maintain high process performance.

The certificate provides participants with hands-on knowledge about how to improve processes in their respective organizations. By so doing, best practices will be diffused, and process performance will improve public health services.

This certificate addresses concerns voiced by the National Board of Public Health Examiners, the Public Health Accreditation Board, and the Council on Education for Public Health to provide more educational opportunities in performance improvement to working public health professionals.

Program Delivery
This program is available:
- completely online (all program coursework can be completed online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Please visit www.sph.umn.edu for admission requirements and application information.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

**Required Coursework**
- PUBH 6765 - Continuous Quality Improvement: Methods and Techniques (3.0 cr)
- PUBH 6780 - Advanced Performance Improvement Methods in Public Health (2 cr)
- PUBH 6780 - Public Health Process Improvement Project - Practicum (3 cr)
- PUBH 6780 - Performance Management and Transformational Change (2 cr)

Students choose two elective credits with their advisor.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan C: Plan C requires 42 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: Each student must complete a culminating experience in which they synthesize and integrate knowledge acquired in coursework and other learning experiences and apply theory and principles in a context that reflects an aspect of professional practice. The culminating experience must be used as a means by which faculty judge whether the student has mastered the body of knowledge and can demonstrate proficiency in the required competencies through written and oral presentation.

Students are expected to demonstrate familiarity with the tools of applied research or scholarship in public health practice, the ability to work independently, and the ability to apply skills learned in coursework by completing a Research Paper, Systematic Literature Review, Consultative Report, Grant Proposal. Students also have the option of taking the Certificate Public Health exam (CPH) instead of completing a project.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

Applicants must have an advanced degree or be admitted or enrolled in a DDS, MPP, MURP, LAW, PHARMD, DVM, MD or CMU program.

Core Courses

- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (1.0 cr)

Epidemiology

- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- or PUBH 6342 - Epidemiologic Methods II (3.0 cr)

Biostatistics

- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- or PUBH 6450 - Biostatistics I (4.0 cr)
- or PUBH 6451 - Biostatistics II (4.0 cr)

Ethics

- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Environmental Health

- PUBH 6101 - Environmental Health (2.0 cr)
- or PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)

M.P.H. Culminating Experience

- PUBH 7294 - Master's Project: Public Health Practice (0.5 - 4.0 cr)

Field Experience

- PUBH 7296 - Field Experience: Public Health Practice (0.5 - 6.0 cr)

Electives

Students have the opportunity to choose their elective courses based on their career goals and interests. Students are required to choose at least one class from each of the four public health practice domains as established by the APHA Council on Linkages. Minimum of 19 credits

Specialty areas (includes concentrations, dual degree programs)

Students applying to a dual degree program must be admitted to both schools which are listed as official sub-plans. Students have the option to add a concentration area or minor.

DDS/MPH Dual Degree

This dual degree will provide students with a unique opportunity in the Upper Midwest to integrate dentistry and the practice of public health to identify and solve community health problems in areas of oral health. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-
MPP/MPH or MURP/MPH Dual Degree
This dual degree will provide students with a unique opportunity in the Upper Midwest to gain in-depth training in the planning, public policy, and the public health arenas at the master's level. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

PharmD/MPH Dual Degree
This dual degree will provide students with a unique opportunity in the Upper Midwest to make significant contributions in areas such as health education and prevention of disease in our state and nation. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

JD/MPH Dual Degree
This dual degree will provide students with a unique opportunity in the Upper Midwest to make significant contributions between the legal and health-care delivery systems in our state and nation. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

MD/MPH Dual Degree
This dual degree will provide students with a deeper understanding of population-based science and the cultural and environmental factors that affect patients. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

DVM/MPH Dual Degree
This dual degree will provide students with credentials to work at the interface of human wellness and animal health. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

Global One Health-CMU
The School of Public Health is collaborating with Chiang Mai University in Northern Thailand to provide their students with a U of MN TC Master of Public Health degree, Executive Program in Public Health Practice. Students are required to have an advanced degree and to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

Joint- or Dual-degree Coursework: DDS/MPH Public Health Dentistry Dual Degree Program, MPP/MPH Public Health Public Policy Dual Degree Program, MURP/MPH Public Health Urban and Regional Planning Dual Degree Program, PHarmD/MPH Public Health Pharmacy Dual Degree Program, LAW/MPH Public Health Law Dual Degree Program, MD/MPH Public Health Medicine Dual Degree Program, DVM/MPH Veterinary Public Health Dual Degree Program, Global One Health - CMU
Student may take a total of 14 credits in common among the academic programs.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Executive Program in Public Health Practice
This sub-plan is limited to students completing the program under Plan C.

This program builds on the student's work and educational experience. It is possible to complete all work for the M.P.H. degree in 16 months, with 42 graduate credits. On average, students complete the program in three years.

Attending the Public Health Institute during the May Session is a unique opportunity for students from multiple disciplines to connect and immerse themselves in emerging public health issues.

EPPHP is a flexible curriculum that students may tailor to their career and practice. Some established focus areas are:
- Cultural competency
- Food protection
- Preparedness, response, and recovery
- Public health leadership
Required courses

Our hybrid executive MPH offers a flexible curriculum that students can tailor to fit their career and practice goals. Online classes comprise the core curriculum, with elective options online or in person at the yearly Public Health Institute.

The program is designed for health professionals with an advanced degree, such as an MD, DDS, D.V., PharmD, PhD, MS, or public health professional with significant work experience who have completed a Public Health Core Concept Certificate. Students must complete the core curriculum, M.P.H. culminating experience, field experience, and elective courses chosen to meet their academic and career interests.

- PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (1.0 cr)
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 7294 - Master's Project: Public Health Practice (0.5 - 4.0 cr)
- PUBH 7296 - Field Experience: Public Health Practice (0.5 - 6.0 cr)

Students may choose up to 24 credits of elective classes.

Public Health Dentistry

This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

This sub-plan is limited to students completing the program under Plan C.

This dual degree will provide students with a unique opportunity in the Upper Midwest to integrate dentistry and the practice of public health to identify and solve community health problems in areas of oral health.

Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102, and PUBH 7294, and PUBH 7296, and PUBH 6299.

Course Group 1

This dual degree will provide students with a unique opportunity in the Upper Midwest to integrate dentistry and the practice of public health to identify and solve community health problems in areas of oral health.

- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (1.0 cr)
- PUBH 7296 - Field Experience: Public Health Practice (0.5 - 6.0 cr)

Student may choose up to 23 credits of electives and may transfer up to 14 credits from a school of dentistry upon approval of the program director.

Public Health Medicine

The Public Health Medicine (PHM) program prepares medical students to have a deeper understanding of population-based science and the cultural and environmental factors that affect patients.

The classroom requirements of the M.P.H. are completed during a 12-month sabbatical (May through May) from medical school while enrolled full time in the School of Public Health. Most students begin the M.P.H. program after year two of medical school.

Students must complete the basic curriculum, the courses below, and approved electives to meet the required 42-credit minimum.

Students must register for the master's project and field experience while enrolled in the program. They may choose to complete these...
during their time at the SPH or after returning to medical school. A public health medicine setting is required for field placement but may be double counted for clinical rotation with adviser approval.

**Public Health Medicine**

- PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (1.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6210 - Public Health Medicine Seminar (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Take 2 or more course(s) from the following:

- PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
- PUBH 6724 - The Health Care System and Public Health (3.0 cr)
- PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)

Students must take 10.5 to 11.5 elective credits that are approved by their adviser.

**Public Health Public Policy**

This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

This sub-plan is limited to students completing the program under Plan C.

The Public Policy/Public Health (MPP/MPH) dual degree program provide you with training in planning, public policy, and in the public health arenas.

Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102 and PUBH 7296.

**Required**

As a graduate student pursing a Public Policy, you seek to advance the common good; as a School of Public Health student, you seek to protect, restore and promote health. Together, the dual degrees provide the skills to create significant change. With approval, you may use up to 14 credits of MPP courses toward the MPH, and 12 credits of Public Health courses toward the MPP.

- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 7296 - Field Experience: Public Health Practice (0.5 - 6.0 cr)

Students may choose up to 23 credits of elective courses and may transfer up to 14 credits from a Master of Public Policy program with approval from the director.

**Public Health Urban and Regional Planning**

This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

This sub-plan is limited to students completing the program under Plan C.

The Master Urban & Regional Planning/Master Public Health (MURP/MPH) dual degree programs provide you with training in planning, public policy, and in the public health arenas.

As a graduate student pursing Urban Regional Planning degree, you seek to advance the common good; as a School of Public Health student, you seek to protect, restore and promote health. Together, the dual degrees provide the skills to create significant change.

With approval, you may use up to 14 credits of MURP courses toward the MPH, and 12 credits of Public Health courses toward the MURP.

The dual degree in Master Urban & Regional Planning/Master Public Health (MURP/MPH) dual degree programs provide you with training in planning, public policy, and in the public health arenas.
Required
The dual degree in Master Urban & Regional Planning/Master Public Health (MURP/MPH) provides you with training in planning, public policy, and in the public health arenas. With approval, you may use up to 14 credits of MURP courses toward the MPH, and 12 credits of Public Health courses toward the MURP.

PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (1.0 cr)
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 7296 - Field Experience: Public Health Practice (0.5 - 6.0 cr)

Students may choose up to 23 credits of elective courses and may transfer up to 14 credits from a Master of Urban and Regional Planning program with approval from the director.

Veterinary Public Health
The dual degree in Veterinary Public Health D.V.M./M.P.H. program is part of the public health practice program. It allows students to combine veterinary studies with a public health degree, giving them the credentials to work at the interface of human wellness and animal health, spanning agriculture and food industry concerns, emerging infectious diseases, and other public health issues.

There are formal MOUs with the following Colleges of Veterinary Medicine: Cornell University, Purdue University, Western University of Health Science and Ross University.

The program in public health practice brings together the science and the art of public health. It addresses public health as a broad social enterprise that seeks to extend the benefits of current knowledge in ways that will have the maximum impact on the health status of populations.

The program offers academic study at the master's level that prepares students to be leaders and practitioners in the application of public health principles in agencies delivering preventive health services and public health programs. The major emphasizes the importance and applications of basic scientific knowledge to current societal problems and concerns.

Up to 14 credits may be transferred into the M.P.H. from a school of veterinary medicine upon approval of the adviser and program director. Each of the elective curriculum options outlined below addresses the need for students to have coursework in the following four domains: public health policy and systems development, community intervention, assessment and basic sciences, and program management and communications.

D.V.M./M.P.H. students are also required to take one course to fulfill the veterinary public health competencies: biostatistics, surveillance, infectious disease epidemiology, zoonoses, and environmental health.

Required
PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (1.0 cr)
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 7294 - Master's Project: Public Health Practice (0.5 - 4.0 cr)
PUBH 7296 - Field Experience: Public Health Practice (0.5 - 6.0 cr)

Student may choose up to 25 credits of electives and may also transfer up to 14 credits from a school of veterinary medicine upon approval of the program director.

Global One Health-CMU
This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

This sub-plan is limited to students completing the program under Plan C.

The University of Minnesota, School of Public Health (SPH) recognizes the need for more global presence in the MPH curriculum and for more opportunities for students across the world to share learning experiences. The SPH is collaborating with Chiang Mai University (CMU) in northern Thailand to provide CMU students with a University of Minnesota Master of Public Health degree in Public Health Practice. This is a distance program offered at a new site.
For admission requirements go to www.sph.umn.edu

**Course Group 0**

Global One Health - Chiang Mai University (CMU) is designed for Chiang Mai University students with an advanced degree to earn MPH degrees from UMN and CMU within two years. Students will complete 25 credits with the UMN and 17 credits with CMU.

- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6102 - Issues in Environmental and Occupational Health (2.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)
- PUBH 6904 - Nutrition and Aging (2.0 cr)

Students may transfer up to 17 credits from Chiang Mai University with approval of the program director.

**Global Health Interdisciplinary Concentration Area**

The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

Developing countries are currently undergoing profound demographic changes--changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

**Health Disparities Interdisciplinary Concentration Area**

The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:

- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

**Public Health Policy Interdisciplinary Concentration Area**

The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care.

PHPIC coursework provides a better understanding of the healthcare system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:

- understanding community dynamics
- developing advocacy skills for public health
- analyzing legal and policy structures
- evaluating and implementing policies and programs
- influencing community health

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of September 19, 2014

Page 116 of 119
- motivating and educating stakeholders and decision-makers
- using policy as prevention strategy
- eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

• Program Type: Post-baccalaureate credit certificate/licensure/endorsement
• Requirements for this program are current for Fall 2014
• Length of program in credits: 12
• This program requires summer semesters for timely completion.
• Degree: Public Hlth Prepared/Response/Recovery PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Public Health Certificate in Preparedness, Response, and Recovery (PHCert-PRR) is a program in the public health practice major. This training will help prepare public health workers and others to respond to incidences of bio-terrorism, infectious disease outbreaks, and other emerging public health issues. Students typically complete the curriculum by attending at least two Public Health Institutes (PHI), held in May/June of each year.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Please visit www.sph.umn.edu for admission requirements and application instructions.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.
Required Coursework

PUBH 7223 - Concepts of Disaster Behavioral Health (1.0 cr)
PUBH 7227 - Incident Management Systems: The Public Health Role (1.0 cr)
PUBH 7221 - Planning for Urgent Threats (1.0 cr)
PUBH 7214 - Principles of Risk Communication (1.0 cr)
PUBH 7225 - Communication and Information Technology Tools for Public Health Emergency Response (1.0 cr)

Students must take at least one course from each of the following groups:

PUBH 7231 - Surveillance of Foodborne Diseases in Humans (1.0 cr)

or
PUBH 7230 - Topics in Infectious Disease (0.5 - 4.0 cr)

or
PUBH 7217 - Advances in Molecular Epidemiological Analysis (1.0 cr)

PUBH 7200 - Topics: Public Health Practice (0.5 - 4.0 cr)

or
PUBH 6711 - Public Health Law (2.0 cr)

Students select 4-5 additional credits from an approved list to complete the required 12 certificate credits. Courses at the Public Health Institute are topical and will change from year to year. Please consult the program staff for appropriate courses.

* Program Type: Master's
* Requirements for this program are current for Fall 2014
* Length of program in credits: 30
* This program requires summer semesters for timely completion.
* Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Biochemistry, Molecular Biology and Biophysics (BMBB) graduate program is an interdisciplinary program that is supported by the College of Biological Sciences (CBS) and the Medical School of the University of Minnesota. The program provides a broad research-based education involving faculty from BMBB, as well as many faculty members from several other departments in CBS, the Medical School, the College of Science and Engineering (CSE), the College of Food, Agricultural and Natural Resources Sciences (CFANS), and the College of Veterinary Medicine.

BMBB focuses on determining the molecular mechanisms that underlie basic biological functions using an integrated approach that encompasses biochemistry, chemistry, biophysics, genomics, molecular biology, proteomics, and structural biology. Special emphasis is placed on revealing how biological processes go awry in diseases including cancer, diabetes, heart disease, and AIDS. The program has four areas of emphasis: synthetic biology and biotechnology, molecular biology, metabolic and systems biology, and chemical and structural biology. All students are expected to demonstrate a minimum level of competence in these areas but will emphasize the area most related to their thesis project.

While graduate training in a BMBB laboratory involves first-year coursework and associated preliminary examinations, the focal point for graduate education is thesis research. Laboratory-based exploration coupled with journal clubs, seminars, scientific meetings and retreats, career counseling and scientific ethics constitutes the major components of the program. Support for graduate education comes from a variety of sources but is augmented by several NIH and NSF-based training grants. Most graduate students from the University of Minnesota obtain full-time employment immediately after graduation or pursue advanced training in academic or corporate positions.

Students pursuing a degree in BMBB are only admitted to the PhD program (see note below) under the auspices of Molecular, Cellular and Structural Biology (MCSB), a first year program administered by BMBB and the Molecular, Cellular, Developmental Biology and Genetics (MCDB&BG) graduate programs. After the first year, students select either BMBB or MCDB&BG to complete their degree.

***Note: Pursuit of a Master's degree in BMBB is not an option at the point of admission. Students are only admitted to the BMBB PhD program. If you are interested in a Master's-only program, however, the Master of Biological Science (MBS) program is available for working professionals, including scientific staff working at the University of Minnesota. This program is offered through the College of Continuing Education (CCE) and is flexible with respect to time and focus of study. Please visit the program website for more information (http://www.cce.umn.edu/Master-of-Biological-Sciences/index.html).

Program Delivery

This program is available:
* via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

The program can accommodate for a variety of educational backgrounds. However, applications from students with an undergraduate degree in the biological, chemical, or physical sciences are encouraged.
The program can accommodate for a variety of educational backgrounds. However, applications from students with an advanced degree in the biological, chemical, or physical sciences are encouraged.

Other requirements to be completed before admission:
Recommended academic preparation includes one year each of calculus, organic chemistry, and basic biology, including biochemistry and genetics. For students of demonstrated ability, background deficiencies can be made up during the first year of graduate study.

Successful applicants must have previous research experience in an academic or industrial setting in addition to any course-related laboratory experiences. It is important to demonstrate familiarity with an aptitude for basic science research prior to embarking on a graduate career in this program.

***Note: Students are admitted only to the PhD program for BMBB (see additional note below).

Special Application Requirements:
Additionally, applicants must submit three letters of recommendation from persons familiar with their academic and research capabilities. A statement of interests and goals, a complete set of transcripts, and official scores from the General Test of the GRE are required. The GRE Subject Test in biochemistry, cell and molecular biology, biology, or chemistry is strongly recommended, but not required.

The deadline to submit a completed application is December 1. Completed files are reviewed between January and February. Graduate studies begin fall semester only.

***Note: Pursuit of a Master's degree in BMBB is not an option at the point of admission. Students are only admitted to the BMBB PhD program. If you are interested in a Master's-only program, however, the Master of Biological Science (MBS) program is available for working professionals, including scientific staff working at the University of Minnesota. This program is offered through the College of Continuing Education (CCE) and is flexible with respect to time and focus of study. Applicants must submit their test score(s) from the following:
• GRE

Key to test abbreviations (GRE).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

Requirements for the Masters degree include core coursework, thesis credits, and laboratory experiences taken by all students as well as coursework in one of the four BMBB emphases: synthetic biology and biotechnology, molecular biology, metabolic and systems biology, or chemical and structural biology. Additionally, all students are expected to participate in the seminars involving student reports on current literature and research. A thesis based on original laboratory research is required.

Key to test abbreviations (GRE).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
9 credits are required in the major.
15 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Requirements for the doctoral degree include core coursework, thesis credits, and laboratory experiences taken by all students as well as coursework in one of the four BMBB emphases listed below. To obtain a PhD degree, students must register for a minimum of 24 thesis credits (BioC 8888). Upon completion of the 24 thesis-credit requirement, students are required to register every fall and spring, up through the term they are awarded the Ph.D., for 1 credit of advanced doctoral credits (BioC 8444) in order to maintain full-time,
active student status.

Additional requirements for the PhD degree include seminar presentations, examinations, and teaching assignments. BioC 8084 is a weekly student seminar on current literature and research, and students must register for 1 credit of BioC 8084 each term until they have reached Advanced Doctoral Status. Students must attend at least 50% of weekly meetings for BioC 8084 and BioC 8184 which is a Departmental seminar involving prominent national and international scientists. Three examinations for the PhD degree include a written preliminary proposal (4th semester), preliminary oral exam (4th semester), and a final oral exam with thesis defense (typically year 5). Examinations will be conducted by the student's preliminary and graduate committees. Students are also required to complete two semesters of teaching, typically between years 2-4.

Biochemistry Core
To obtain a PhD in BMBB, all students must complete the biochemistry core coursework.
- BioC 8001 - Biochemistry: Structure, Catalysis, and Metabolism (3.0 cr)
- BioC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
- BioC 8401 - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)

Laboratory and Field Course
In August of the first year, all PhD BMBB students must register for this hands-on, intensive lab course which takes place at the Itasca Biological Station and Laboratories. This course will provide first-year students with exposure to a range of modern methods and model systems.
- MCDG 8920 - Special Topics (1.0 - 4.0 cr)

Electives for Emphases
All students must complete 15 credits of coursework in one of the four BMBB emphases: synthetic biology and biotechnology, molecular biology, metabolic and systems biology, or chemical and structural biology. Synthetic biology and biotechnology, molecular biology, metabolic and systems biology, or chemical and structural biology. Courses from disciplines other than BMBB may be used to build an emphasis in consultation with the student's advisor.
- BioC 5352 - Biotechnology and Bioengineering for Biochemists (3.0 cr)
or BioC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
or MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
or GCD 8151 - Cell Structure and Function (3.0 cr)
or MICA 8003 - Immunity and Immunopathology (4.0 cr)
or MICA 8004 - Cellular and Cancer Biology (4.0 cr)
or GCD 8131 - Advanced Genetics and Genomics (3.0 cr)
or GCD 8008 - Mammalian Gene Transfer and Expression (2.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or SGB 8181 - Stem Cell Biology (3.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or MICA 8010 - Microbial Pathogenesis (3.0 cr)
or BioC 5216 - Current Topics in Signal Transduction (3.0 cr)
or BioC 5527 - Introduction to Modern Structural Biology (4.0 cr)
or BioC 5528 - Spectroscopy and Kinetics (4.0 cr)
or CHEN 8754 - Systems Analysis of Biological Processes (3.0 cr)
or BioC 5213 - Selected Topics in Molecular Biology (3.0 cr)
or BioC 5444 - Muscle (3.0 cr)
or BioC 5531 - Macromolecular Crystallography I: Fundamentals and Techniques (1.0 cr)
or BioC 5532 - Macromolecular Crystallography II: Techniques and Applications (1.0 cr)
or CHEM 8011 - Mechanisms of Chemical Reactions (4.0 cr)
or CHEM 8021 - Computational Chemistry (4.0 cr)
or CHEM 8411 - Introduction to Chemical Biology (4.0 cr)
or CHEM 8412 - Chemical Biology of Enzymes (4.0 cr)
or CHEM 8735 - Bioinorganic Chemistry (4.0 cr)
or PHCL 5111 - Pharmacogenomics (3.0 cr)
or PUBH 7445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
or MICA 8013 - Translational Cancer Research (2.0 cr)
or GRAD 8101 - Teaching in Higher Education (3.0 cr)

Center for Bioethics, University of Minnesota, Suite N504 Boynton, 410 Church Street S.E., Minneapolis, MN 55455 (612-624-9440; fax: 612-624-9108)
Email: bthxed@umn.edu
Website: http://www.bioethics.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Center for Bioethics offers a Master of Arts (M.A., Plan A) degree with a major in Bioethics. The curriculum for this program includes a set of required core courses, the opportunity for study of electives in bioethics, as well as a requirement for coursework in other fields that are related to bioethics. Students will be required to write a master's thesis. Given the fundamentally interdisciplinary nature of bioethics, professional opportunities in the field are greatly enhanced for trainees with a graduate degree in bioethics as well as a terminal graduate or professional degree in another field - for example, degree combinations of an MA degree in Bioethics with another degree such as a JD, PhD, MD or others. This model prompts students to acquire a firm disciplinary grounding as well as interdisciplinary bioethics expertise, a practice which best prepares students for bioethics related career placement.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree is required for admission.

Special Application Requirements:
Transcripts of all postsecondary academic work, a personal statement, a writing sample (preferably on a topic in bioethics), a description of research or relevant work experience, a C.V. or résumé, and at least three letters of reference are required. Applicants may also submit a statement on "Extenuating Circumstances" and "Diversity." See program website for more details.

Students are admitted to the Bioethics M.A. program for fall semester only. While the application deadline is April 30, applications are accepted as early as the fall semester prior to the proposed start of the student's M.A. program. Admissions decisions are made on a rolling basis, and preference is given to early applicants.

Students are encouraged to link their degree in bioethics to a degree in a related field (either before entering the bioethics M.A. program or at the same time). Given the fundamentally interdisciplinary nature of bioethics, prospective students are advised against viewing the bioethics M.A. as a stand-alone degree that prepares them for career placement. This model prompts students to acquire a firm disciplinary grounding as well as interdisciplinary bioethics expertise—a practice that best prepares students for bioethics-related career placement. Thus, the admissions process will give preference to students who have already earned or are in the process of earning an advanced degree in a related field, although this will not strictly be required for admission.

Applicants must submit their test score(s) from the following:
- GRE
- MCAT
- LSAT

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600

Key to test abbreviations (GRE, MCAT, LSAT, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students in this Plan A (thesis-based) master's degree program are required to take at least 20 credits of courses: 9 credits of required courses including one course fulfilling an area requirement, 5 credits of bioethics electives, and 6 credits of electives from a related field. Details about curriculum can be found at www.ahc.umn.edu/bioethics/education/gradprogram/dregreq/home.html. Elective courses must be chosen in consultation with the DGS or student's adviser to ensure their appropriateness for the student's course of study. Students may elect a graduate minor to fulfill their elective credits in a related field. However, students may also elect to take courses from different programs, for example, a health policy course from the School of Public Health and a health law course from the Law School.

Of the 20 total course credits required, at least one BTHX course and at least two courses total are to be taken at the 8xxx level. Thesis credits do not count toward this requirement.

Course Group 0

Joint- or Dual-degree Coursework: Joint Degree Program in Law, Health, and the Life Sciences. Student may take a total of 11 credits in common among the academic programs.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 8
- Length of program in credits (Doctorate): 14
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Graduate Minor in Bioethics is designed for University of Minnesota students interested in deepening their knowledge of the ethical issues surrounding health and the life sciences. Students can explore their interests in bioethics while also earning a degree in their home discipline. Created by the Center for Bioethics in cooperation with the Department of Philosophy, the Graduate Minor program is administered by the Center for Bioethics and is open to students in many of the University’s Master’s or Doctoral degree programs.

Some professional degree-seeking students may elect a minor as well. The University’s policy states that MEd, MPH, MBA, MHA, MN, DNP, MOT, MPSE, MDH, MDT, MPS students may be eligible to pursue a minor. To be eligible, the degree program must offer the option to pursue a minor; please consult with your Director of Graduate Studies in your major field to determine if this option is open for you. At this time, students in first-professional programs (JD, MD, PharmD, DVM, DDS, and LLM) are not eligible for minors.

Enrollment in the Graduate Minor in Bioethics is contingent upon approval by the Director of Graduate Studies in Bioethics. Students work with the Director of Graduate Studies to tailor their minor program to their individual needs and interests.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A doctoral student must complete a minimum of 14 graduate credits in bioethics offered outside the major field: 8 credits of required courses and 6 credits of electives. A master’s student must complete a minimum of 8 graduate credits in bioethics offered outside the major field: 6 credits of required courses and 2 credits of electives. All students must take BTHX 5010 - Bioethics Proseminar and one moral theory course, preferably BTHX 5300 - Foundations of Bioethics. Courses should be chosen in consultation with the bioethics director of graduate studies. Courses that satisfy requirements and serve as electives can be found at http://www.ahc.umn.edu/bioethics/education/graduate/home.html.

Website: [http://www.r.umn.edu/academics-research/bicb](http://www.r.umn.edu/academics-research/bicb)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- The Biomedical Informatics and Computational Biology Program is an all-University program delivered on the Rochester and Twin Cities campuses. The University of Minnesota Twin Cities is the degree-granting authority for delivery of the Biomedical Informatics and Computational Biology Program in Rochester.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The graduate program in biomedical informatics and computational biology (BICB) offers course work in five core areas: 1) biochemistry, molecular and cell biology; 2) database, data mining, and computing; 3) informatics, analysis, and machine learning; 4) mathematics, biostatistics, and statistics; and 5) computational and systems biology. In addition, students select courses from a diverse set of fields, including chemistry, chemical engineering, physics, biophysics, structural biology, imaging, signal processing, and clinical and translational sciences. The curriculum is individualized to fit the student's interest and research direction. Prior coursework may be used to fill the requirements if appropriate. Students may pursue a minor in a different program.

All students receive training in ethics, leadership, and management, including legal and intellectual property issues and entrepreneurship. Those interested in academic careers have the opportunity to participate in development programs that focus on aspects of teaching and learning.

The M.S. is offered under two plans: Plan A (with thesis), and Plan B (with project). Plan A is considered suitable for students planning to pursue careers that require a limited research experience or those planning to continue their education in a Ph.D. program. It is also suitable for students with full-time employment whose thesis can be related to their work assignments. Plan B is suitable for students planning to work in settings where technical knowledge is more germane than research experience.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
Other requirements to be completed before admission:
The program expects incoming graduate students to have a strong background in the quantitative sciences and varied backgrounds in the life/health sciences. The expected competencies of incoming students may be demonstrated by coursework completed at the undergraduate level or by informal competency examinations.

In addition to completing the online application form, applicants must submit a personal statement, which describes past experiences and career aspirations, and reasons for pursuing graduate studies in biomedical informatics and computational biology. Applicants should also indicate the names of the BICB graduate faculty whose interests overlap their own. Although there is no page limit for the personal statement, 2-3 pages are recommended.

**Special Application Requirements:**
Applications for the M.S. program are accepted throughout the year for either fall or spring.

GRE scores may be waived for students with significant work or academic experience.
Applicants must submit their test score(s) from the following:

- GRE

International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A:** Plan A requires 14 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 24 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Plan B students complete a project under the direction of a faculty member and present the work to their faculty committee in an oral exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The M.S. is offered under two plans: Plan A (with thesis), and Plan B (with project).

Plan A is considered suitable for students planning to pursue careers that require a limited research experience or those planning to continue their education in a Ph.D. program. Plan A students defend their thesis in public and must pass an oral examination. Plan A is suitable for students with full-time employment whose thesis can be related to their work assignments.

Plan B is suitable for students planning to work in settings where technical knowledge is more germane than research experience.

The requirements include 20 course credits for Plan A and 30 course credits for Plan B.

Up to 6 credits outside the major may be taken but are not required.

**Program Sub-plans**

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Minor programs are arranged on an individual basis.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Master's Minor: A minimum of 9 credits must be completed in Core Area 1 and one of Core Areas 2-5.

Doctoral Minor: A minimum of 12 credits must be completed in Core Area 1 and two of Core Areas 2-5.

Graduate students choose from a list of courses that satisfy requirements in core areas and electives.

There are five core areas:
1. Biochemistry, molecular and cell biology
2. Database, data mining, and computing
3. Informatics, analysis, and machine learning
4. Mathematics, biostatistics, and statistics
5. Computational and systems biology

Students choose elective courses from the following eight areas:

1. Biochemistry, molecular and cell biology
2. Informatics, database, data mining, and computing
3. Mathematics, biostatistics, and statistics
4. Chemistry, chemical engineering, and physics
5. Biophysics and structural biology
6. Imaging, information theory, and signal processing
7. Computational chemistry, medicinal chemistry, and drug design
8. Clinical and translational sciences

Core/elective courses are listed on the courses page of the BICB Student Handbook (http://r.umn.edu/academics-research/bicb/graduate-program/student-handbook/courses). The adviser(s), together with the DGS, will ensure that the student selects appropriate courses.

All students receive training in ethics, leadership, and management, including legal and intellectual property issues and entrepreneurship. The Ph.D. program includes an industrial or clinical internship. Students interested in academic careers have the opportunity to participate in development programs that focus on aspects of teaching and learning.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
The program expects incoming graduate students to have a strong background in the quantitative sciences and varied backgrounds in the life/health sciences. The expected competencies of incoming students may be demonstrated by coursework completed at the undergraduate level or by informal competency examinations.

In addition to completing the online application form, applicants must submit a personal statement, which describes past experiences and career aspirations, and reasons for pursuing graduate studies in biomedical informatics and computational biology. Prospective students should also indicate the names of the BICB graduate faculty whose interests overlap with their own. The department strongly encourages applicants to contact these faculty members before applying. Although there is no page limit for the personal statement, 2-3 pages are recommended.

Special Application Requirements:

Three letters of recommendation and scores from the General Test of the GRE are required. Applicants are admitted only for the fall semester.

GRE scores may be waived for students with significant work or academic experience.

Applicants must submit their test score(s) from the following:
• GRE
International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- IELTS
  - Total Score: 6.5

- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

30 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Ph.D. students take preliminary written exams at the end of the second year of study, which focuses on the development of a research proposal. An oral preliminary exam focuses on the plan for thesis research and the student's coursework and is taken by the fall of the third year of full-time registration or its equivalent. At least 24 course credits are required to gain competency in both biology and quantitative areas related to biomedical informatics and computational biology. An internship is required, which may be waived for students with equivalent experience. Additionally, 24 thesis credits are required. Ph.D. students defend their thesis in public and must pass an oral examination.

An internship is required, which may be waived for students with equivalent experience.

Up to 9 credits outside the major may be taken but are not required.

Program Sub-plans

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This interdisciplinary program includes faculty members who have primary appointments in fields such as radiobiology, physics, engineering, computer science, physiology, dentistry, genetics, and biochemistry. Students concentrate in research areas such as molecular biophysics, medical imaging, magnetic resonance imaging and spectroscopy, radiobiology, radiation therapy physics, and mathematical biophysics and computation. A limited number of students prepare for employment as hospital-based medical physicists through a program that includes opportunities for coursework, laboratory work, and directed study to provide experience in areas such as purchase specification, acceptance testing, quality assurance, and radiation safety.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
All students should have some familiarity with physical chemistry, intermediate physics, intermediate mathematics, biostatistics, computer programming, biology, physiology, and biochemistry. This may be demonstrated by coursework completed at the undergraduate level or as part of the graduate program; by reading or practical experience; or by informal competency examinations.

Special Application Requirements:
Three letters of recommendation and scores from the General Test of the GRE are required. Applicants are considered for admission in both semesters.

Applicants must submit their test score(s) from the following:
- GRE

Key to test abbreviations (GRE).

Health Care Design and Innovation Postbaccalaureate Certificate

School of Nursing

Graduate School

Link to a list of faculty for this program.

Contact Information:
Densford International Center for Nursing Leadership, University of Minnesota School of Nursing, 4-185 Weaver-Densford Hall, 308 Harvard Street S.E., Minneapolis, MN 55455 (612-625-1187; fax: 612-624-0908)
Email: nursecerts@umn.edu
Website: http://www.hcdi.umn.edu

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Health Care Design & Innovation PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postbaccalaureate certificate in health care design and innovation prepares health care and design practitioners to create optimal healing environments. Students learn how to apply design thinking in creating new processes, systems, and care environments. The certificate emphasizes principles that promote healing and safe patient care while maximizing clinical and financial outcomes.

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Admittance to the certificate program requires a baccalaureate degree from an accredited institution in a health-related field, interior design, architecture, or other design-related area.

Other requirements to be completed before admission:
Applicants are required to submit transcripts from all institutions where postsecondary credit was earned, reference materials containing an Admission Reference Form and personal letter of reference from two separate individuals, one essay, a current curriculum vitae/resume, and English language proficiency scores (if applicable). This certificate has two application deadlines: November 1 for spring admission and July 1 for fall admission.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Paper Based - Total Score: 550

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.
The certificate has four required courses, taken from the School of Nursing, the College of Design, and the Center for Spirituality and Healing:

1. Health Innovation and Leadership, which integrates whole systems thinking, relevant theories and generative leadership to enhance the student's ability to advance innovation and achieve sustainable change in contemporary health care settings.

2. Optimal Healing Environments, which focuses on the development and implementation of Optimal Healing Environments (OHE) and examines the evidence base supporting design of human and care processes, and begins to explore how OHEs are created.

3. The Design of Health Care Processes, which provides a foundation for the thinking required to design processes in health care to reduce/eliminate medical errors and examines the use of design principles and the role of human factors in reducing human error.

4. Evidence-based Design in Health Care, which emphasizes the evidence-based processes used in the design of health care environments by interdisciplinary teams of designers, health care practitioners, administrators, and other users.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Health Informatics

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Health informatics is an interdisciplinary field of scholarship that applies computer, information, and cognitive sciences to promote the effective and efficient use and analysis of information, ultimately improving the health, well-being, and economic functioning of society. Students take a sequence of core courses in health informatics and biostatistics, and electives in technical and health science areas. Possible areas of emphasis include health information systems, telehealth, bioinformatics, user interface design, system impact evaluation, database construction and analysis, clinical decision-making, evaluation of health programs, and physiological monitoring and control.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants are expected to have at least a bachelor of science or equivalent degree from a regionally accredited institution of higher education.

Required prerequisites
Health or Biological Sciences
6-semester credits or 9 quarter-credits of health or biological coursework at the undergraduate or graduate level. HINF 5501 may be used to help meet this requirement.

Programming Language
Documented work or educational experience working with a programming language such as C, C++, Java, Visual Basic, PASCAL, etc. or HINF 5502 - Programming Essentials Python 3 (1.0 cr)
or Department Consent

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 152
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

**IELTS**
- Total Score: 6.5

**MELAB**
- Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

---

**Program Requirements**

**Plan C:** Plan C requires 18 to 24 major credits and 6 to 12 credits outside the major. There is no final exam. A capstone project is required.

**Capstone Project:** The capstone project is a 3-credit course in which students will have a final opportunity to apply their newly acquired knowledge and skills to a project involving a practical problem in health informatics. Students will learn how to design these projects properly, reviewing past exemplary projects as guides. Then, with the help of their advisers and the capstone course director, students will design and carry out their own projects which can take a variety of forms, including: developing design and evaluation specifications for software to address a specific healthcare need; working on, observing, analyzing, and reporting the actions of a team involved in implementing a new information system; or observing and measuring the impact of such a system in a healthcare setting. Students will submit a written project report in lieu of a final examination. The capstone project instructor and the student's adviser grade the report.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semester must be completed before filing a Degree Program Form.

**HINF Courses**

- HINF 5430 - Health Informatics I (3.0 cr)
- HINF 5431 - Health Informatics II (3.0 cr)
- HINF 5436 - AHC Informatics Grand Rounds (1.0 cr)
- HINF 5510 - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
- HINF 5520 - Clinical Informatics and Patient Safety (2.0 cr)
- HINF 5531 - Health Data Analytics and Data Science (2.0 cr)
- HINF 5499 - Capstone Project for the Masters of Health Informatics (3.0 cr)

**Other Required Courses**

- NURS 5116 - Consumer Health Informatics (1.0 cr)
- NURS 7113 - Clinical Decision Support: Theory (2.0 cr)

**Biostatistics**

- PUBH 6414 - Biostatistical Literacy (3.0 cr)
  or PUBH 6450 - Biostatistics I (4.0 cr)

**Electives**

Graduate-level electives of your choice; see student handbook for a list of recommended electives.

**Joint- or Dual-degree Coursework:** MD/MHI program

Student may take a total of 3 credits in common among the academic programs.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Health informatics is an interdisciplinary field of scholarship that applies computer, information, and cognitive sciences to promote the effective and efficient use and analysis of information, ultimately improving the health, well-being, and economic functioning of society. Students take a sequence of core courses in health informatics and biostatistics, and electives in technical and health science areas. Possible areas of emphasis include health information systems, telehealth, bioinformatics, user interface design, system impact evaluation, database construction and analysis, clinical decision-making, evaluation of health programs, and physiological monitoring and control.

The MS is a 36 credit degree that may be completed in as little as two years or up to five years. It is intended for students who are interested in research, but who do not have the background or are not ready to commit to the PhD program.

There are two kinds of MS degrees: MS Plan A and MS Plan B. The Plan A culminates in a substantial, 10-credit master's thesis. The Plan B culminates in a smaller, 4-credit, Plan B project. Electives comprise the additional six credits in the Plan B degree.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.30.

Applicants are expected to have at least a bachelor of science or equivalent degree from a regionally accredited institution of higher education.

Required prerequisites
Health or Biological Sciences
6-semester credits or 9 quarter-credits of health or biological coursework at the undergraduate or graduate level. HINF 5501 may be used to help meet this requirement.

or Department Consent

Programming Language
Documented work or educational experience working with a programming language such as C, C++, Java, Visual Basic, PASCAL, etc.

or HINF 5502 - Programming Essentials Python 3 (1.0 cr)

or Department Consent

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 152
  - General Test - Quantitative Reasoning: 159
- General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 15 to 17 major credits, 9 to 11 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 19 to 27 major credits and 9 to 17 credits outside the major. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Required HINF Courses

N.b. All students must take AHC Informatics Grand Rounds (HINF 5436) twice for a total of two credits.

HINF 5430 - Health Informatics I (3.0 cr)
HINF 5431 - Health Informatics II (3.0 cr)
HINF 5436 - AHC Informatics Grand Rounds (1.0 cr)
HINF 5510 - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
HINF 5520 - Clinical Informatics and Patient Safety (2.0 cr)
HINF 5531 - Health Data Analytics and Data Science (2.0 cr)

Other Required Courses

NURS 5116 - Consumer Health Informatics (1.0 cr)
NURS 7113 - Clinical Decision Support: Theory (2.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)

Final Project/Thesis

Plan A students will take 10 credits of 8777 and Plan B students will take 4 credits of 8770.

HINF 8770 - Plan B Project (4.0 cr)
or HINF 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Electives

Graduate-level electives of your choice; see student handbook for a list of recommended electives. Plan A students will need 4 credits of electives, and Plan B students will need 10 credits of electives.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Health informatics is an interdisciplinary field of scholarship that applies computer, information, and cognitive sciences to promote the effective and efficient use and analysis of information, ultimately improving the health, well-being, and economic functioning of society. The minor provides an opportunity for the student to supplement their primary training with additional knowledge and skills in health informatics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants are required to have taken 6 semester credits or 9 quarter credits in medical, life, or biological sciences from a recognized institution of higher learning. This a broadly defined requirement and most courses with a health or biology emphasis will be accepted including biostatistics, health services research, and public health, as well as the more traditional biology or life science courses.

Special Application Requirements:
Applicants must be earning a graduate-level degree from the University of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Master’s students must take the introductory sequence in health informatics (HINF 5430 and HINF 5431). Ph.D. students must take a total of 12 credits in health informatics including the introductory sequence and at least 6 additional credits including one 8xxx course.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 33
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: This program has been temporarily suspended. Applications are not being accepted at this time. Please contact Graduate Student Services at sjmcgrad@umn.edu with questions.

A joint program of the School of Journalism and Mass Communication and the School of Public Health, the professional master's in health journalism and communication promotes improved public communication about health matters by combining knowledge, skills, and experience from both disciplines. The program is designed for journalists and health professionals, who earn a master's degree in health journalism. Journalists and communications professionals learn the fundamentals of medical research and public health. Health professionals learn basic journalistic principles and ethics, and how to develop meaningful health stories. Those pursuing other master's degrees, (e.g., master's in public health), earn the M.A. in health journalism and communication in addition to the other degree.

The Health Journalism and Communication program has two distinct, but overlapping, programs of study. Students in the health journalism emphasis will gain advanced knowledge about public health and the evaluation of claims from health, medical, and scientific sources, as well as advanced training on reporting health stories for different media. Students in the health communication emphasis will learn the fundamentals of writing about health topics for different audiences in different formats, as well as health campaign development and evaluation.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Applications to this master's program are not currently being accepted. Please contact sjmcgrad@umn.edu with questions.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan B: Plan B requires 25 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Contact the program for capstone project information.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The M.A. in health journalism and communication requires a minimum of 33 semester credits, to be completed over a two-year schedule. The program has two distinct areas of emphasis: health journalism and health communication. Students in the health journalism emphasis area learn to evaluate claims from health, medical, and scientific sources and to tell health-oriented stories in broadcast or magazine journalism. Students in the health communication emphasis learn the fundamentals of writing about health topics for different audiences, as well as health campaign development and evaluation.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program offers opportunities for advanced research and study in the history of science and technology (with particular expertise in the history of the physical sciences, history of the biological sciences, history of technology, and history of American science and technology) and in the history of medicine.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students must have a bachelor’s degree with a preferred grade average of B or better and should be capable of interdisciplinary study. Depending on background and career objectives, additional preparatory studies may be necessary in either the science-technology area or in the humanities and social sciences.

Special Application Requirements:
All application materials are submitted online to the University. Check the HSTM website (www.hstm.umn.edu) for more information. Although it is not required for admission, it's strongly recommended that applicants submit a GRE score.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading proficiency in one foreign language.

A minimum GPA of 3.30 is required for students to remain in good standing.

The M.A. is offered under Plan A and Plan B. Following the guidelines in the Graduate Student Handbook for the program (www.hstm.umn.edu), M.A. students select one of two tracks, the history of science and technology or the history of medicine, and, within the chosen track, select courses subject to distribution requirements in terms of area and period. In addition, each student must take one of the two courses in the two-semester sequence of historiography and research methods (HSCI/HMED 8112 and HSCI/HMED 8113). All of the courses selected for the requirements must be passed with a grade of B or better.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

• Program Type: Master's
• Requirements for this program are current for Fall 2014
• Length of program in credits: 30
• This program requires summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The all-University integrated biosciences graduate program offers study toward the master of science (M.S.) degree under Plan A (coursework and original thesis). The program has two areas of emphasis: cell, molecular, and physiological (CMP) biology; and ecology, organismal, and population (EOP) biology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree or equivalent from an accredited college/university in the biological or physical sciences or a related field. Background in a variety of subdisciplines is appropriate preparation.

Other requirements to be completed before admission: Recommended undergraduate courses for applicants pursuing the M.S. degree include one year each of chemistry, biology, and physics. One semester of calculus is also recommended. Applicants are strongly encouraged to have taken other advanced courses in chemistry, biology, additional calculus, and introductory statistics.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Required Coursework
**Twin Cities Campus**

**Integrated Biosciences Ph.D.**

**Medical School - Adm**

**Graduate School**

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 56
- This program does not require summer semesters for timely completion.
- The Integrated Biosciences Ph.D. is an All-University program delivered on the Twin Cities and Duluth Campuses. The University of Minnesota Twin Cities is the degree granting authority for the Integrated Biosciences Ph.D. program in Duluth.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The all-University integrated biosciences graduate program offers study toward the doctor of philosophy (Ph.D.) degree. The program has two areas of emphasis: cell, molecular, and physiological (CMP) biology; and ecology, organismal, and population (EOP) biology.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree or equivalent from an accredited college or university in the biological or physical sciences or a related field.

Other requirements to be completed before admission:
Recommended undergraduate courses for applicants pursuing the Ph.D. degree include one year each of chemistry, biology, physics, calculus, and advanced chemistry. One semester (minimum) of statistics is also recommended.

Additional recommended courses for students in the ecology, organismal, and population (EOP) emphasis include one year of calculus, one semester each of ecology and evolutionary biology along with one course in two of the following subjects: genetics, cell biology, biochemistry.

Additional recommended courses for students in the cell, molecular, and physiological (CMP) emphasis include one year of organic chemistry plus one course in each of the following: genetics, cell biology, and biochemistry.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language.

Information current as of September 19, 2014
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
20 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Ph.D. Written Preliminary Examination: In addition to completing the curriculum for the major and internal related fields, students will be required to pass both a written and oral preliminary examination prior to completing the Ph.D. program. The preliminary written examination will be administered once the student has completed the majority of the required coursework. This will typically occur in the summer of the second year. The written examination will consist of a completed NIH or NSF grant application for the student's proposed research project. The project will be evaluated by the Thesis Examining Committee, which will also serve as the student's Final Oral Examining Committee to provide continuity of advice during the length of the student's research program.

Ph.D. Oral Preliminary Examination: The oral preliminary examination will be administered within two months of the successful completion of the preliminary written examination. The examination will be administered by the graduate faculty according to University regulations and all students will be required to pass the oral examination to continue in the Ph.D. program.

Most students will complete the requirements for the Ph.D. degree within five years. The final oral defense will be conducted by the graduate faculty according to University regulations. It will consist of a public seminar presented by the student.

• Program Type: Master's
• Requirements for this program are current for Fall 2014
• Length of program in credits: 38
• This program requires summer semesters for timely completion.
• No
• Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The proposed Master of Arts degree is designed for individuals with a bachelor's degree in a health-related field, or in a health field. Professionals without healthcare backgrounds, but with extensive interest in working with individuals and groups to optimize wellbeing, and who have a desire for a full graduate degree, would also be excellent candidates assuming completion of required prerequisites. This Master's degree is designed for students who wish to further their education so that they may hold positions of responsibility coaching individuals and groups, initiating and leading new coaching service lines, and developing outcomes assessments for coaching initiatives.

Although the instruction is based on research in the field, this Plan B degree is not intended to provide intensive research training. This Plan B Master's Degree Program is understood to be a terminal degree, and is thus not recommended for students who intend to pursue the PhD degree. The degree consists of a minimum of thirty-eight (38) credits of coursework, including 6 credits of electives, and a minimum 2-semester, 2-credit project that is presented in both verbal and written format prior to graduation.

This degree is structured to prepare a wide variety of students to be skilled and knowledgeable advocates and support agents for individuals on their path to greater health and healing. All students must be able to demonstrate the following competencies (through review of transcripts and course work completed) prior to being admitted into the Advanced Health Coaching Seminar:

- Demonstrate appropriate knowledge of major health problems.
- Demonstrate familiarity with the routine mechanics of the conventional healthcare system and its processes.
- Demonstrate basic knowledge of physical and psychological symptoms related to disease and treatment.
- Demonstrate basic knowledge of pharmacology, pathophysiology of disease, and assessment of symptoms across the life span.

Students whose previous coursework does not enable them to meet these competencies can arrange with the program director to do additional outside coursework during the first year of the program. If a significant gap in knowledge has been identified by the program director upon admission, supplemental coursework may be judiciously required during the first year of study. Six credits of electives are required to be chosen from one of four CSH areas of concentration, or students may design their own concentration or complete a minor from other departments, based on interests, if approved by their academic adviser. In all cases, the student's faculty adviser will work with the student in designing a program plan that accommodates the student's unique learning objectives. Upon successful completion of this Plan B program, the student will receive a Masters of Arts Degree in Integrative Health and Wellbeing Coaching.

Accreditation
This program is accredited by n/a

Program Delivery
This program is available:
• primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Bachelor's degree in a health-related field or a Bachelor's in a non-health-related field with specific coursework in psychology, physiology, and statistics from an accredited institution.

Required prerequisites
Course Group 0
- Previous coursework in psychology, physiology, and statistics must have been completed.

Other requirements to be completed before admission:
In addition to the University's online application, applicants must submit a letter describing their goals for the program and their professional qualifications. This three to five page personal statement should focus on what led to the applicant's interest in health coaching as a professional activity, including a description of interest in and experience with holistic integrative health and healing. Be as specific as possible. Three letters of recommendation, transcripts and a current C.V. or resume are also required. All items can be uploaded to the University's online application. An applicant interview is required prior to admission.

Special Application Requirements:
This M.A. is designed for individuals with a bachelor¹s degree in a health-related field, or in a health field. Professionals without healthcare backgrounds, but with extensive interest in working with individuals and groups to optimize wellbeing, and who have a desire for a full graduate degree, would also be excellent candidates assuming completion of required prerequisites. Although the instruction is based on research in the field, the Plan B degree is not intended to provide intensive research training. It is understood to be a terminal degree, and is thus not recommended for students who intend to pursue the PhD degree. All students must be able to demonstrate certain competencies and knowledge in healthcare (through review of transcripts and course work completed) prior to being admitted into the Advanced Health Coaching Seminar. Students whose previous coursework does not enable them to meet these competencies can arrange with the program director to do additional outside coursework during the first year of the program.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 32 to 38 major credits and 0 to 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: 2 credits (120 hrs.) Optimally spread over 2 semesters, this service-learning opportunity builds upon the core tenets from all preceding course work, including the Health and Wellness Coaching for Groups course. Students will be matched with a community partner to design, develop, and deliver a program that contains some component of both individual coaching and group-coaching, with an identified population in need. Additionally, the project must be placed within, or utilized through an interdisciplinary team. The 2-semester coursework will culminate with students submitting a formal 20-page paper, as well as presenting their projects to faculty and their classmates.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.
At least 1 semester must be completed before filing a Degree Program Form.

Required Coursework

- CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
- CSPH 5431 - Functional Nutrition: An Expanded View of Nutrition, Chronic Disease, and Optimal Health (2.0 cr)
- KIN 5133 - Motivational Interventions in Physical Activity (3.0 cr)
- CSPH 5701 - Fundamentals of Health Coaching I (4.0 cr)
- CSPH 5702 - Fundamentals of Health Coaching II (4.0 cr)
- CSPH 5703 - Advanced Health Coaching Practicum (3.0 cr)
- CSPH 5704 - Business of Health Coaching (2.0 cr)
- CSPH 5705 - Health Coaching Professional Internship (2.0 cr)

Required Coursework

- CSPH 5000 Introduction to Lifestyle Medicine (2 cr);
- CSPH 5000 Coaching People with Chronic Clinical Conditions (2 cr);
- CSPH 5000 Health and Wellness Coaching for Groups (2 cr);
- CSPH 5000 Mind-Body Science and the Art of Transformation (1 cr);
- CSPH 8000 Master's Capstone project (2 cr)

Take 5 or more courses from the following:

Electives A. Cultural Healing Approaches

- CSPH 5111 Ways of Thinking about Health (2 cr)
- CSPH 5115 Cultural Awareness, Knowledge, and Health (3 cr)
- CSPH 5311 Introduction to Traditional Chinese Medicine (2 cr)
- CSPH 5331 Foundations of Shamanism & Shamanic Healing (2 cr)
- CSPH 5341 Overview of Indigenous Hawaiian Healing (2 cr)
- CSPH 5342 Overview of Traditional Tibetan Medicine: Ethics, Spirituality, & Healing (2 cr)
- CSPH 5315 Traditional Tibetan Medicine: Ethics, Spirituality, & Healing (2 cr)

Take 0 - 6 credit(s) from the following:

Electives B. Expanding Healing Practices

- CSPH 5503 Aromatherapy Fundamentals (1 cr)
- CSPH 5535 Reiki Healing (1 cr)
- CSPH 5536 Advanced Reiki Healing: Level II (1 cr)
- CSPH 5631 Healing Imagery I (2 cr)
- CSPH 5313 Acupressure (1 cr)
- CSPH 5545 Mind-Body Healing Therapies (2 cr)
- CSPH 5421 Botanical Medicines in Complementary Healthcare (3 cr)
- CSPH 5423 Botanical Medicines: Foundations and Practical Applications (1 cr)

Take 0 - 6 credit(s) from the following:

Electives C. Mind-Body Integration

- CSPH 5545 Mind-Body Healing Therapies (2 cr)
- CSPH 5225 Meditation: Integrating Body and Mind (2 cr)
- CSPH 5226 Advanced Meditation: Body, Brain, Mind, and Universe (1 cr)
- CSPH 5541 Emotional Healing and Happiness: Eastern and Western Approaches to Transforming the Mind (2 cr)
- CSPH 5201 Spirituality and Resilience (2 cr)
- CSPH 5212 Peace-building Through Mindfulness: Transformative Dialogue in the Global Community (3 cr)

Take 0 - 6 credit(s) from the following:

Electives D. Creative Expressions for Health

- CSPH 5555 Introduction to Body and Movement-based Therapies (2 cr)
- CSPH 5561 Overview of the Creative Arts in Health and Healing (2 cr)
- CSPH 5601 Music, Health and Healing (2 cr)
- CSPH 5605 Movement and Music for Well-being and Healing (2 cr)
- CSPH 5631 Healing Imagery I (2 cr); CSPH 5611 Healthy Humor (1 cr)
- CSPH 5641 Animals in Health Care: The Healing Dimensions of Human/Animal Relationships (3 cr)

Take 0 - 6 credit(s) from the following:

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 8
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Graduate Minor in Integrative Therapies and Healing Practices is an interdisciplinary program designed to expose students to the global range of integrative, complementary, cross-cultural, and spiritual healing practices. It enhances the preparation of graduate students in health sciences and other disciplines by developing knowledge and skills in the emerging field of integrative health care. Specifically, the Minor provides students with a theoretical basis for applying integrative therapies and healing practices; prepares students to research integrative therapies and healing practices; and prepares students to work collaboratively with other health professionals and patients in a multicultural, pluralistic healthcare system. The Minor includes a set of core courses that provide the theoretical foundation for the program. Students may elect to take additional courses offered by the Center for Spirituality & Healing in clinical applications, spirituality, or cross-cultural health and healing. A number of other University courses also satisfy the course requirements of the minor; contact the Minor program office for more information.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
Health professional students, practitioners and lifelong learners seeking to deepen their understanding of integrative therapeutic topics.

Full and part-time graduate students come from wide-ranging backgrounds and careers, including nursing, pharmacy, medicine, nutrition, psychology, physical therapy, liberal studies and public health.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Master's and doctoral students are required to take CSPH 5101 (3 cr). Master's students take an additional 5 credits for a total 8 credits; Doctoral students take an additional 9 credits for a total of 12 credits. Note that students cannot use course credits to satisfy requirements for both a major and the minor.

Website: http://www.csh.umn.edu

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2014
- Length of program in credits: 12 to 19
- This program does not require summer semesters for timely completion.
- Degree: Integrative Thpys & Healing Practices PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Certificate in Integrative Therapies and Healing Practices is an interdisciplinary program designed to expose students to the global range of integrative, complementary, cross-cultural, and spiritual healing practices. It enhances the preparation of health science practitioners by developing knowledge and skills in the emerging field of integrative health care. Specifically, the Certificate provides students with a theoretical basis for applying integrative therapies and healing practices; prepares students to research integrative therapies and healing practices; and prepares students to work collaboratively with other health professionals and patients in a multicultural, pluralistic healthcare system. The 12-credit Certificate includes a set of core courses that provide the theoretical foundation for the program. Students who choose the Certificate's Health Coaching track must complete a total of 19 credits. Students may elect to take additional courses offered by the Center for Spirituality and Healing in clinical applications, spirituality, and cross-cultural health and healing.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
This field of study is designed for the healthcare professional, those currently enrolled in a graduate health professions program, board-certified chaplains with at least three years in a healthcare setting, and those with a non-healthcare bachelor's degree with life/work experience in health related areas. Such fields include nursing, social work, psychology, medicine, nutrition, pharmacy, chiropractic, naturopathy, and licensed acupuncturist.

The Health Coaching track of the Certificate requires an applicant interview prior to admission.

Special Application Requirements:
In addition to the University's online application, applicants must submit a letter describing their goals for obtaining the Certificate and their professional qualifications. The statement should address the question, "What are your short- and long-term professional goals after you complete the Postbaccalaureate Certificate program in Integrative Therapies and Healing Practices?" Be as specific as possible. Two letters of support are required if the individual is not currently enrolled in a graduate program at the University of Minnesota, one from an academic source and one from an employer/supervisor. A current C.V. is also requested. All items can be uploaded to the University's online application.

Applicants to the Health Coaching track will need three recommendations and a three to five page personal statement focusing on what led to the applicant's interest in Health Coaching as a professional activity, including a description of interest in and experience with holistic integrative health and healing. Students should also include a current C.V. or resume. All items can be uploaded to the University's online application.
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5

- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semester must be completed before filing a Degree Program Form.

A total of 12 credits are required to complete the Certificate. Required courses: CSPH 5101 - Introduction to Integrative Therapies and Healing Practices (3 cr), and CSPH 5102 - Art of Healing: Self as Healer (1 cr). Students are encouraged to choose the remaining 8 credits from courses consistent with their academic training and professional goals. The student's faculty adviser works with the student in designing a program plan that accommodates the student's unique learning objectives. Students pursuing the Health Coaching Track within the Certificate must complete 19 credits. In addition to the two courses required for the Certificate, Health Coaching students complete a required course sequence of CSPH 5701, CSPH 5702, CSPH 5703, CSPH 5704 and CSPH 5705. To earn a Certificate, the preferred GPA for all courses is 2.80.

**Program Sub-plans**

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

**Health Coaching**

A total of 19 credits are required to complete this track within the Certificate. The track requires four semesters of coursework, which can be spread over a variable amount of time up to a maximum of four years. Certain courses must be taken sequentially, leading to skill sets and a knowledge base which grows and matures over time. In addition to the two required courses for the Certificate, Health Coaching students must take CSPH 5701 - Fundamentals of Health Coaching I (4 cr), CSPH 5702 - Fundamentals of Health Coaching II (4 cr), CSPH 5703 - Advanced Health Coaching Practicum (3 cr), CSPH 5704 - Business of Health Coaching (2 cr), and a professional internship in health coaching (2 cr). To earn a Certificate, the preferred GPA for all courses is 2.80.

- CSPH 5101 - Introduction to Integrative Healing Practices (3 cr)
- CSPH 5102 - Art of Healing: Self as Healer (1 cr)
- CSPH 5701 - Fundamentals of Health Coaching I, with Laboratory (4 cr)
- CSPH 5702 - Fundamentals of Health Coaching II, with Laboratory (4 cr)
- CSPH 5703 - Advanced Health Coaching Practicum (3 cr)
- CSPH 5704 - Business of Health Coaching (2 cr)
- CSPH 5705 - Professional Internship in Health Coaching (2 cr)

Website: http://mcdbg.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30 to 50
- This program requires summer semesters for timely completion.
- The clinical component of the program involves work in multiple clinical settings throughout the Twin Cities, Mayo Clinic in Rochester, and clinics in St. Cloud and Duluth.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Genetic Counseling Focus: The master of science in MCDB&G is offered with a focus of study in genetic counseling. It is offered for full-time study, and designed to provide students with the academic foundation and clinical expertise necessary to enter the profession of genetic counseling. The curriculum integrates selected coursework with firsthand experience in the diagnostic medical genetics laboratories and supervised work in multiple clinical genetics settings with patients and families. The program is accredited by the Accreditation Council for Genetic Counseling and all graduates are eligible to apply to the American Board of Genetic Counseling for active candidate status and sit for board certification.

Joint Degree Program: MCDB&G also offers a master of science that is part of the Joint Degree Program in Law, Science, and Technology. This program is unique in the nation and enables students to combine a JD degree with a PhD or MS degree. Students entering this program must be admitted to both the MCDB&G program and the Law School. Admission qualifications for MS and PhD students are identical; only the student's career objectives distinguish the degree that they pursue.

MS Research Degree: Eligible students who were admitted to the MCDB&G doctoral program, but who leave before they have completed their PhD, may be offered the option to complete the MS degree. Eligibility is determined by the student's adviser and the MCDB&G DGS.

Accreditation
This program is accredited by The Accreditation Council for Genetic Counseling

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

An undergraduate or master's degree in the biological, chemical, or physical sciences is preferred.

Other requirements to be completed before admission:
Applicants to the MCDB&G with the genetic counseling focus are required to have completed courses in organic chemistry, biochemistry, general genetics, statistics and probability, and psychology. In addition, all applicants to the genetic counseling focus must have some type of client advocacy experience such as volunteer or paid work with troubled teens, working in a shelter for battered women, or a suicide prevention hotline, etc. The best experiences afford the applicant the opportunity to work in a helping profession.

Successful applicants to the JD/MS must have previous research experience in an academic or industrial setting in addition to any course-related laboratory experiences. It is important to demonstrate familiarity with and aptitude for basic science research prior to embarking on a graduate career in this program. Recommended academic preparation includes coursework in molecular biology,
genetics, biology, and biochemistry.

**Special Application Requirements:**
Applications to the genetic counseling focus of study are stronger if the applicant has spent some time with a practicing genetic counselor either in the clinical setting or in some capacity such as personal interviews that affords the applicant a real life understanding of the profession.

Applicants to the JD/MS program must submit three letters of recommendation from persons familiar with their academic and research capabilities. A statement of interests and goals, a complete set of transcripts, and scores from the General Test of the GRE are required. The GRE Subject Test in biochemistry, cell and molecular biology, biology, or chemistry is strongly recommended, but not required. The recommended date for receipt of completed applications is December 1. Graduate studies begin fall semester. Entry into the JD/MS program requires separate admittance to both the Law School and the MCDB&G Graduate Program.

Applicants must submit their test score(s) from the following:
- **GRE**
  - General Test - Verbal Reasoning: 550
  - General Test - Quantitative Reasoning: 600
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 107
  - Internet Based - Writing Score: 25
  - Internet Based - Reading Score: 25
  - Paper Based - Total Score: 625
- **IELTS**

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 14 to 40 major credits and 6 to 10 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** All Plan B students must complete a research or capstone project that is scholarly in quality, and present their results at their final oral examination. Projects that qualify for the genetic counseling focus include those that study a genetic counseling problem and add to the existing genetic counseling literature; produce materials that add to the profession such as teaching materials or ways of evaluating the service; or produce educational materials needed by patient populations or the general public. Other Plan B students are expected to produce a report approximately 15 pages in length that thoughtfully discusses an important scientific topic that the student and adviser agree upon. The report should include an introduction that explains the significance of the topic, a review of the literature or an analysis of a specific aspect of the area and a discussion regarding current or future endeavors.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The genetic counseling focus of study is offered under Plan B and is designed to be completed in 4 semesters and the interim summer. Most of the coursework takes place in the first year, leaving more open time during the second year for clinical experience. Students must complete a minimum of 40 graduate credits with at least 30 credits in the major area of study, a plan B project paper, and a final oral exam. Students will be placed in laboratory and clinical observation experiences during the first year and five clinical genetic counseling internships during the second year. Students will complete a minimum of 800 hours of direct patient contact. Students must earn a passing grade in their five clinical internship rotations and present a completed log of at least 50 clinical cases before final oral exam. Only under exceptional circumstances will the course of study be varied to meet the needs of a student with many of the courses...
already completed or with extensive clinical laboratory experience.

Students in the JD/MS program or PhD to MS students may complete the MS under Plan A or Plan B. Plan A requires a minimum of 24 course credits and 10 thesis credits; Plan B requires a minimum of 24 course credits and the completion of a Plan B paper. Students take a core curriculum, which is multidisciplinary and contributes to both the major and minor or related field requirements. Students may choose a concentration or specialization within the program such as cell biology, developmental biology, genetics, or human genetics.

Degree Focuses

Genetic Counseling

Year 1
Students will take courses that focus on medical, human, and behavioral genetics and genetic counseling practice. Students will have the option to choose between several electives from law and ethics, public health, and counseling psychology. In addition, students will observe in a clinical setting one day per week and gain experience in the clinical laboratories one day per week.

Summer
During the summer between the first and second year of the program, students will begin their first clinical internship rotation where the student will have patient responsibilities. This rotation will be a full 10 weeks long with the expectation that students will spend between 2-3 days per week in the clinic. The minimum time in the clinic will be 20 hours per week but will ultimately be set by the clinical supervisor and may exceed the minimum.

Year 2
Students will complete course work in counseling skills, psychosocial issues in genetic counseling, and ethical issues in genetic counseling. In addition students will spend 2-3 days per week in the clinic seeing patients and families under the supervision of a board certified genetic counselor.

-OR-

Academic Focus

Joint- or Dual-degree Coursework: Joint Degree Program in Law, Science and Technology. Student may take a total of 12 credits in common among the academic programs.
Twin Cities Campus
Molecular, Cellular, Developmental Biology and Genetics Minor
Genetics, Cell Biology, and Development TCBS, Genetics, Cell Biology, and Development TMED
Graduate School

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2014
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program provides scientific training in the basic life sciences, with emphasis on the molecular basis of genetics, development, and cell biology. Areas of specialization include membranes, receptors, membrane transport, cell interactions, macromolecular structure, extracellular matrix, cytoskeleton, cell motility, regulation of gene expression, neuroscience, developmental mechanisms, human genetics, plant cell and molecular biology, genetic mechanisms, and genomics.

The program is interdisciplinary and involves faculty from several departments in the College of Biological Sciences, the Medical School, and the College of Food, Agricultural and Natural Resource Sciences. Institutes for human genetics, plant molecular genetics, biological process technology, Genome Engineering, Stem Cell research and a center for developmental biology provide opportunities for graduate study.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A master's minor requires 6 credits. A doctoral minor typically includes the genetics core (GCD 8131 and BIOC 8002 or GCD 4034), cell biology (GCD 8151 or 5036), and developmental biology (GCD 8161, 4151, or 4161), as appropriate to the student's field of specialization.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 48
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program provides scientific training in the basic life sciences, with emphasis on the molecular basis of genetics, development, and cell biology. Areas of specialization include membranes, receptors, membrane transport, cell interactions, macromolecular structure, extracellular matrix, cytoskeleton, cell motility, regulation of gene expression, neuroscience, developmental mechanisms, human genetics, plant cell and molecular biology, genetic mechanisms, and genomics.

The program is interdisciplinary and involves faculty from several departments in the College of Biological Sciences, the Medical School, and the College of Food, Agricultural and Natural Resource Sciences. Institutes for human genetics, plant molecular genetics, biological process technology, Genome Engineering, Stem Cell research and a center for developmental biology provide opportunities for graduate study.

Ph.D. students are admitted to MCDB&G under the auspices of Molecular, Cellular and Structural Biology (MCSB), a first year program administered by the MCDB&G and the Biochemistry, Molecular Biology and Biophysics (BMBB) Graduate Programs. After the first year, students select either MCDB&G or BMBB to complete their degree. MCDB&G does not have a freestanding master's program.

The MCDB&G Ph.D. is also part of two joint degree programs: The Joint Degree Program in Law, Health and Life Sciences; and the M.D./Ph.D. program.

The Joint Degree Program in Law, Health and Life Sciences is unique in the nation and enables students to combine a J.D. degree with a Ph.D. or M.S. degree. Students entering this program must be admitted to both the MCDB&G program and the Law School. Admission qualifications for M.S. and Ph.D. students are identical; only the student's career objectives distinguish the degree that they pursue.

The M.D./Ph.D. program emphasizes integration of the two major components of training--medicine and research--to ensure excellence in both. The program features a special curriculum that facilitates the transition from Medical School to the first year of formal graduate training, and the transition from graduate training back to Medical School.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Applications from students with an undergraduate or master's degree in the biological, chemical, or physical sciences are preferred.

Other requirements to be completed before admission:
Recommended academic preparation includes coursework in molecular biology, genetics, biology, and biochemistry.

Successful applicants must have previous research experience in an academic or industrial setting in addition to any course-related laboratory experiences. It is important to demonstrate familiarity with and aptitude for basic science research prior to embarking on a
graduate career in this program.

**Special Application Requirements:**
Applicants must submit three letters of recommendation from persons familiar with their academic and research capabilities. A statement of interests and goals, a complete set of transcripts, and scores from the General Test of the GRE are required. We will accept copies of the transcripts and GRE scores. The GRE Subject Test in biochemistry, cell and molecular biology, biology, or chemistry is strongly recommended, but not required. The deadline for receipt of completed applications is December 1. Graduate studies begin fall semester only.

Entry into the J.D./Ph.D. program requires separate admittance to both the Law School and the MCDB&G Graduate Program. Entry into the M.D./Ph.D. program requires separate admittance to both the Medical School and the MCDB&G Graduate Program.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 550
  - General Test - Quantitative Reasoning: 600
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 107
  - Internet Based - Writing Score: 25
  - Internet Based - Reading Score: 25
  - Paper Based - Total Score: 625

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**
12 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

The Ph.D. program is designed by the student and the adviser to meet individual interests and goals. Advanced courses in genetics, molecular biology, cell biology, developmental biology, and biochemistry are required, in addition to special courses, topical seminar courses, laboratory research rotations, thesis research, student research seminars, departmental seminars, and journal clubs. The student's core curriculum is multidisciplinary and contributes to both major and minor field requirements. Ph.D. students serve as TAs for two semesters during their graduate career. Students in one of the joint degree programs serve as a TA for one semester.

This program is part of Joint Degree Program in Law, Health and the Life Sciences offering a J.D./Ph.D. and a J.D./M.S. track. Selected courses must be approved by the DGS. Students pursuing the J.D./Ph.D. start by completing the first year of Law School, then enter the Ph.D. portion of the program and complete this degree before returning to finish Law School.

This program also offers a joint M.D./Ph.D. degree program; 12 credits of Medical School courses can be used to fulfill credit requirements for the Ph.D. program with approval of the DGS. Students pursuing the M.D./Ph.D. start the program by completing the first two years of Medical School during which time they do laboratory rotations. After selecting a laboratory, they then enter the Ph.D. portion of the program and complete this degree before returning to finish Medical School.

**First Year**
To obtain a PhD in MCDB&G, all students must complete the following courses.
- BIOC 8001 - Biochemistry: Structure, Catalysis, and Metabolism (3.0 cr)
- BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
- MCDG 8920 - Special Topics (1.0 - 4.0 cr)
- MCDG 8900 - Student Research Seminar (1.0 cr)
GCD 8151 - Cell Structure and Function (3.0 cr)
BIOC 8401 - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)
GCD 8131 - Advanced Genetics and Genomics (3.0 cr)
GCD 8171 - Literature Analysis (2.0 cr)

Joint- or Dual-degree Coursework: The Joint Degree Program in Law, Health and the Life Sciences; and the M.D./Ph.D. program. Student may take a total of 12 credits in common among the academic programs.

Website: http://wrs.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- University of Minnesota, Duluth
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This cross-campus interdisciplinary program provides comprehensive training in water resources science, with integration across scientific disciplines. A structured interdisciplinary graduate curriculum is offered. The program includes a set of core courses plus electives in the following areas of emphasis at the M.S. level: aquatic biology, environmental chemistry, hydrologic science, limnology, water management technology, water policy, water quality, and watershed science and management. Approximately 80 courses offered within 15 other graduate programs are available to students majoring in water resources science.

The goal of the program is to produce scientists with strong technical skills in disciplines relevant to water resources and a broad understanding of 1) the hydrologic cycle and associated ecosystems, 2) the interconnectedness of the sciences involved in managing aquatic resources, and 3) the interplay between the biophysical sciences and social sciences in developing and implementing public policies related to water.

Students in the program develop the breadth of scientific knowledge appropriate to understand the complicated aquatic ecosystems and watersheds on which they will work, as well as social dimensions of the topic, including the public policy and legal frameworks in which water resources are protected and managed.

The program involves faculty from the following departments on the Twin Cities campus: Applied Economics; Bioproducts and Biosystems Engineering; Civil Engineering; Earth Sciences; Ecology, Evolution, and Behavior; Entomology; Environmental and Occupational Health; Fisheries, Wildlife, and Conservation Biology; Forest Resources; Geography; Horticultural Science; Plant Biology; and Soil, Water, and Climate. It also involves faculty from the following departments on the Duluth campus: Biology; Chemical Engineering; Chemistry; Civil Engineering; Geography; Geological Sciences; and Physics; as well as the Large Lakes Observatory and the Natural Resources Research Institute in Duluth.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The program is flexible enough to accommodate students from a variety of backgrounds. Normally students have a bachelor's degree in physical, biological, or environmental science or engineering.

Other requirements to be completed before admission:
Recommended academic preparation includes one year (or two semesters) each of calculus, physics, and chemistry, and one biology course.

Availability of funding and willingness of a member of the graduate faculty to serve as an adviser are important criteria for admission to the program.
Special Application Requirements:
 Applicants must submit three letters of recommendation via the University of Minnesota's ApplyYourself website. These letters should be from professors qualified to estimate applicant's class rank and evaluate their ability to complete a program of graduate study, or from persons who can assess their professional or research potential.

Applicants must also submit a résumé of their academic history and professional experience and a statement of purpose, including the proposed area of emphasis. Applicants should submit results of the GRE General Test. Students may be admitted any semester but are strongly encouraged to submit their application by December 15 for fall semester admission. More specific application instruction can be found on the program website: wrs.umn.edu/prospectivestudents/apply/index.htm.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is defined by the faculty adviser. The Plan B option is well suited to students who have little undergraduate course work in water resources science and thus need more coursework to gain the combination of depth and breadth needed in this field. Plan B projects involve field, laboratory, or computer work and the analysis, synthesis, or interpretation of data.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students may choose Plan A, which requires a thesis, or Plan B, which requires additional coursework and a major project. Both plans incorporate courses offered on the Twin Cities and Duluth campuses.

Students must complete courses in four core areas: 1) hydrology (surface and/or hydrogeology); 2) environmental/water chemistry; 3) limnology; and 4) water resources policy and economics, and two electives in such areas of emphasis: aquatic biology, hydrologic science, watershed science and management, water quality, environmental chemistry, limnology, water policy and economics, or water management technology. One elective must be from an approved list of technical courses dealing with water quality science/management. A minimum of two related field courses (at least 6 credits) outside of aquatic science are required. Registration for the WRS Seminar during the first semester in residence and training in responsible conduct of research and ethics are also required.

Approved core and area of emphasis courses as well as a list of faculty are listed on the program website: wrs.umn.edu/degreesandcourses/index.htm.

A minimum of 20 course credits (plus 10 thesis credits) are required for Plan A and a minimum of 30 credits are required for Plan B (up to 3 credits may be used for the Plan B project). Students who had classes equivalent to those in the WRS core as undergraduates
may substitute other classes to meet minimum credit requirements.

**Program Sub-plans**

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

**Limnology and Oceanography**

The science of inland waters, or "limnology," includes the study of streams, lakes, ponds, and wetlands. While Lake Superior falls into this category, the style of research, particularly the nature of sampling and the scale of the processes investigated, makes study of Lake Superior and other Great Lakes more akin to oceanography than to classical limnology. A program that focuses on the study of both limnology and oceanography strengthens understanding of both systems, through comparative studies and by fostering interaction between groups that focus more strongly on one or the other system. Limnology and oceanography are by necessity interdisciplinary fields, with major components contributed by biological, geological, physical and chemical sciences. Such interdisciplinary fields in the modern research university require mechanisms to insure cross-fertilization of ideas, approaches, methods, techniques, and knowledge. The limnology and oceanography track in WRS provides just such a much-needed mechanism.

The goal of the program is to produce scientists with strong technical skills in aquatic science and a broad understanding of limnology and oceanography.

Students may choose Plan A, which requires a thesis, or Plan B, which requires additional coursework and a major project. Specific curriculum for the limnology and oceanography track follows WRS course requirements. Both plans incorporate courses offered on the Twin Cities and Duluth campuses.

Students must complete courses in four limnology and oceanography track core areas: 1) hydrology (surface and/or hydrogeology); 2) environmental/water chemistry; 3) limnology; and 4) water resources policy, economics, and management; and one elective must be from an approved list of technical courses dealing with water quality science/management. An additional one or two electives in limnology and oceanography are also required. A minimum of two related field courses (at least 6 credits) outside of aquatic science are required. Registration for the WRS Seminar during the first semester in residence and training in responsible conduct of research and ethics are also required.

A minimum of 20 course credits (plus 10 thesis credits) are required for Plan A and a minimum of 30 credits are required for Plan B (up to 3 credits may be used for the Plan B project). Students who had classes equivalent to those in the WRS core as undergraduates may substitute other classes to meet minimum credit requirements.

The faculty adviser must be a member of the limnology and oceanography track faculty.

Approved limnology and oceanography track core and elective courses as well as a list of faculty are listed on the program website: wrs.umn.edu/degreesandcourses/landotrack/index.htm.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
28 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Coursework is tailored to student interests, and many areas of emphasis are possible. Core courses are offered on both the Twin Cities and Duluth campuses.

Students complete coursework equivalent to that of an M.S. in water resources science, with additional coursework in an area of emphasis. There are no specific credit requirements in the major, but Ph.D. programs normally include at least 40 course credits beyond the B.S. level, including relevant coursework taken for a master’s degree and a required minimum of 12 credits in a supporting or minor program.

Approved core and area of emphasis courses as well as a list of faculty are listed on the program website: wrs.umn.edu/degreesandcourses/index.htm.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Limnology and Oceanography
The science of inland waters, or “limnology,” includes the study of streams, lakes, ponds and wetlands. While Lake Superior falls into this category, the style of research, particularly the nature of sampling and the scale of the processes investigated, makes study of Lake
Superior and other Great Lakes more akin to oceanography than to classical limnology. A program that focuses on the study of both limnology and oceanography strengthens understanding of both systems, through comparative studies and by fostering interaction between groups that focus more strongly on one or the other system. Limnology and oceanography are by necessity interdisciplinary fields, with major components contributed by biological, geological, physical, and chemical sciences.

This track within the cross-campus interdisciplinary WRS program provides comprehensive training in limnology and oceanography. As is the case for the WRS graduate program as a whole, the L&O program includes a set of core courses plus electives in the subfield of limnology and oceanography.

The goal of the program is to produce scientists with strong technical skills in aquatic science and a broad understanding of limnology and oceanography. Faculty on both Twin Cities and Duluth campuses participate in the limnology and oceanography track. WRS limnology and oceanography faculty list: http://wrs.umn.edu/faculty/landotracklist/index.htm.

Specific curriculum for the limnology and oceanography track follows WRS course requirements. Core courses are offered on both the Twin Cities and Duluth campuses.

Students must complete coursework equivalent to that of an M.S. in the water resources science limnology and oceanography track, with additional coursework in an area of limnology and oceanography. There are no specific credit requirements in the major, but Ph.D. programs normally include at least 40 course credits beyond the B.S. level, including relevant coursework taken for a master's degree and a required minimum of 12 credits in a supporting or minor program.

Ph.D. students pursuing this track must have at least two members of the limnology and oceanography track faculty on their committee including the adviser.

Approved limnology and oceanography track core and elective courses as well as a list of faculty are listed on the program website: wrs.umn.edu/degreesandcourses/landotrack/index.htm.

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The mission of the Comparative and Molecular Biosciences (CMB) program is to train outstanding scientists in the basic mechanisms of animal and human health and disease.

The CMB program is transdisciplinary, bringing together basic, applied, and clinical scientists from a number of departments to provide students with individualized, cutting-edge biomedical research training. Areas of emphasis include genetic and infectious diseases, and comparative aspects of biology and pathology across animal species and humans. Students receive scientific training that prepares them for careers as independent investigators and educators in academia, industry, and government. The CMB program focuses on health that spans a wide range of species, from laboratory animal, companion animal, and livestock species to humans, and is unique within the University of Minnesota.

Note: The primary emphasis of the CMB program is the training of doctoral students; however, a small number of individuals complete a master's degree. The purpose of the master's degree is to provide technical training and scientific competence in the basic mechanisms of animal and human health and disease.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.25.

A bachelor's degree in a biological or basic science is required. Previous laboratory experience is strongly preferred.

Other requirements to be completed before admission:

Applicants must submit a C.V. or résumé; three letters of recommendation from persons familiar with their scholarship and research potential; and a statement of any research experience, as well as career interests, goals, and objectives.

**Special Application Requirements:**

Submission of all application materials by December 15 is required to ensure consideration for fall semester admission.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.S. requires a core curriculum of fundamental coursework and laboratory experiences. Students complete a minimum of 20 course credits and 10 thesis credits; the thesis is based on original laboratory research.

Required Courses

- CMB 8134 - Ethical Conduct of Animal Research (3.0 cr)
- CMB 8202 - Mechanisms of Animal Health and Disease II (3.0 cr)
- CMB 8303 - Comparative Models of Disease (2.0 cr)
- CMB 8550 - Comparative and Molecular Biosciences Seminar (1.0 cr)
- CMB 8560 - Research and Literature Reports (1.0 cr)

Statistics

- CMB 5200 - Statistical Genetics and Genomics (4.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)
- STAT 5031 - Statistical Methods for Quality Improvement (4.0 cr)
- STAT 5302 - Applied Regression Analysis (4.0 cr)
- STAT 5303 - Designing Experiments (4.0 cr)
- STAT 5421 - Analysis of Categorical Data (3.0 cr)

- Program Type: Doctorate
- Requirements for this program are current for Fall 2014
- Length of program in credits: 48
- This program requires summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The mission of the Comparative and Molecular Biosciences (CMB) program is to train outstanding scientists in the basic mechanisms of animal and human health and disease.

The CMB program is transdisciplinary, bringing together basic, applied, and clinical scientists from a number of departments to provide students with individualized, cutting-edge biomedical research training. Areas of emphasis include genetic and infectious diseases, and comparative aspects of biology and pathology across animal species and humans. Students receive scientific training that prepares them for careers as independent investigators and educators in academia, industry, and government. The CMB program focuses on health that spans a wide range of species, from laboratory animal, companion animal, and livestock species to humans, and is unique within the University of Minnesota.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.25.

A bachelor's degree in a biological or basic science is required. Previous laboratory experience is strongly preferred.

Other requirements to be completed before admission:
Applicants must submit a C.V. or résumé; three letters of recommendation from persons familiar with their scholarship and research potential; and a statement of any research experience, as well as career interests, goals, and objectives.

Special Application Requirements:
Submission of all application materials by December 15 is required to ensure consideration for fellowships and research assistantships awarded for the next academic year.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Program Requirements
24 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The Ph.D. requires a core curriculum of fundamental coursework and laboratory experiences. Considerable flexibility is available for students in selecting their courses to construct a program around their own interests and research. In addition, all students are required to complete a teaching experience.

CMB program courses

CMB 8100 - Research Rotation in Comparative and Molecular Biosciences (1.0 cr)
CMB 8202 - Mechanisms of Animal Health and Disease II (3.0 cr)
CMB 8303 - Comparative Models of Disease (2.0 cr)
CMB 8550 - Comparative and Molecular Biosciences Seminar (1.0 cr)
CMB 8560 - Research and Literature Reports (1.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2014
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The mission of the Veterinary Medicine graduate program is to promote science-based research and provide high-quality education to develop scientists working to improve the health and well-being of animals and humans.

Program Goals:
- Prepare independent basic and applied scientists for successful careers in academia, industry, government, or veterinary practice
- Foster development of specific skills including leadership, communication, independent and critical thinking, teaching, interdisciplinary research in collaborative environments, scientific and grant writing, experimental and analytical methods
- Contribute to the body of knowledge in basic, translational, and applied sciences in animal health and well-being, and emerging and zoonotic threats

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.25.

D.V.M. or equivalent; students with a B.A. or B.S. in biological sciences may be considered. Previous laboratory experience is preferred.

Other requirements to be completed before admission:
Applicants must submit a C.V. or résumé; three letters of recommendation from persons familiar with their scholarship and research potential; and a statement of any research experience, as well as career interests, goals, and objectives.

Special Application Requirements:
Submission of all application materials by December 15 is required to ensure consideration for fellowships and research assistantships awarded for the next academic year.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Formal coursework for the M.S. degree varies according to the field of study, interests, and career goals of the individual student. Courses may be taken in disciplines other than veterinary medicine.

Ethics

VMED 8134 - Ethical Conduct of Animal Research (3.0 cr)

Seminar

VMED 8550 - Veterinary Medicine Seminar (1.0 cr)

Statistics

At least one course, but two are recommended.

PUBH 6450 - Biostatistics I (4.0 cr)

or PUBH 6451 - Biostatistics II (4.0 cr)

or STAT 5021 - Statistical Analysis (4.0 cr)

or STAT 5031 - Statistical Methods for Quality Improvement (4.0 cr)

or STAT 5302 - Applied Regression Analysis (4.0 cr)

or STAT 5303 - Designing Experiments (4.0 cr)

or STAT 5421 - Analysis of Categorical Data (3.0 cr)

8000 level courses

At least one additional 8000 level course for the major field

Program Sub-plans

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.
