- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 32 to 55
- This program requires summer semesters for timely completion.
- Degree: Master of Education

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of education (MEd)/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with the Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

Accreditation
This program is accredited by Minnesota Board of Teaching and the NCATE (National Council for Accreditation of Teacher Education).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Each program area has a subset of prerequisite courses. A transcript review is recommended to be completed before applying in order to determine if an applicant is ready to apply or should continue to work on additional prerequisite coursework. Unofficial transcript(s) can be submitted for evaluation to the attention of the appropriate C&I MEd advisor. Students with international coursework must arrange for a transcript evaluation from a foreign transcript evaluation service.

When ready to apply, applicants must submit the following materials in the online application system:
Upload unofficial transcripts from all schools attended, even if a degree was not earned.
Upload resume
Upload essay
Upload one letter of recommendation
Upload extenuating circumstances statement (if applicable)
Upload TOEFL/IELTS/MELAB score (if applicable)

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80
The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 32 to 55 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: For specific language sub-plans only

A minimum GPA of 2.80 is required for students to remain in good standing.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may complete the program with more than one sub-plan.

Arts in Education

This sub-plan is limited to students completing the program under Plan C.

The arts in education initial licensure program at the University of Minnesota is designed to help students become inquiring, analytical, and reflective professional educators who can help all students understand and appreciate visual art, theatre and dance. The program seeks to develop thoughtful practitioners who are enthusiastic about and prepared for leadership roles in the schools.

Master of education (MEd)/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

The teaching MEd arts in education sub-plan requires a minimum of 32 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

Arts in Education

Total: 32 credits

Summer session

1 additional credit will be required during the summer session to meet licensure requirements by all Visual Arts, Dance and Theatre students by the Minnesota Department of Education. In addition, theatre students will take TH 5183 in the summer session to meet licensure requirements by the Minnesota Department of Education.

CI 5049 - Digital Media & Technology Integration: Arts Education Theory & Practice (3.0 cr)
CI 5078 - Application of Aesthetic Theory in Education (2.0 cr)
CI 5163 - Child and Adolescent Development for Teaching and Learning I (1.0 cr)
EPSY 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)

Fall session

4 additional credits will be required during the fall session to meet licensure requirements by all Visual Arts, Dance and Theatre students by the Minnesota Department of Education.

CI 5065 - Improving Arts Programs in the Schools (3.0 cr)
CI 5069 - Curriculum Innovations in Arts Education (3.0 cr)
CI 5075 - The Social, Historical and Cultural Foundations of Arts Education (3.0 cr)
CI 5617 - Academic Language and English Learners I (1.0 cr)
CI 5164 - Child and Adolescent Development for Teaching and Learning II (2.0 cr)
EPSY 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
OLPD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
OLPD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)

Spring session
CI 5008 and CI 5452 should each be taken for 2 credits. 8 additional credits will be required during the spring session to meet licensure requirements by all Visual Arts, Dance and Theatre students by the Minnesota Department of Education.

**CI 5008 - Theory and Practice of Arts Teaching (1.0 - 2.0 cr)**
**CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)**
**CI 5618 - Academic Language and English Learners II (1.0 cr)**
**OLPD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)**

**MED Completion Coursework**

CI 5050 should be taken for 3 credits.

CI 5050 - Issues in Art Education (1.0 - 4.0 cr)

**Elementary**

This sub-plan is limited to students completing the program under Plan C.

The elementary education initial licensure program is designed to help students become inquiring, analytical, and reflective professional educators who can help students succeed in school. The program also seeks to develop thoughtful practitioners who are enthusiastic about and prepared for leadership roles in the schools.

The MED/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with the Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

The teaching MED elementary sub-plan requires a minimum of 54.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

The teaching MED elementary sub-plan for those who completed the University of Minnesota BS elementary education foundations degree, requires a minimum of 39 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

**Elementary Education sub-plans**

**Elementary Education**

Total: 54.5 credits

**May session**

CI 5111 - Introduction to Elementary School Teaching (3.0 cr)
EPSY 5001 - Learning, Cognition, and Assessment (3.0 cr)

**Summer session**

1 additional credit will be required during the summer session to meet licensure requirements by the Minnesota Department of Education.

CI 5307 - Technology for Teaching and Learning (1.5 cr)
CPSY 5301 - Advanced Developmental Psychology (3.0 cr)
EPSY 5017 - Teaching Exceptional Students in General Education Classrooms (2.0 cr)
OLPD 5005 - School and Society (2.0 cr)
OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)

**Fall session**

CI 5283 - Practicum: Applying Instructional Methods in the Elementary Classroom (3.0 cr)
CI 5425 - Reading Instruction in the Elementary Grades (3.0 cr)
CI 5426 - Language Arts Instruction in the Elementary Grades (3.0 cr)
CI 5502 - Science Instruction in the Elementary Grades (3.0 cr)
CI 5645 - Teaching English Learners in the Elementary Classroom (3.0 cr)
CI 5702 - Social Studies Instruction in the Elementary Grades (3.0 cr)
CI 5822 - Mathematics Instruction in the Elementary Grades (3.0 cr)

**Spring session**

CI 5285 - Clinical Experience in Elementary School Teaching (12.0 cr)
CI 5286 - Student Teaching Seminar: Elementary Education (3.0 cr)
CI 5287 - Capstone Project: Improvement of Teaching in Elementary and Pre-Kindergarten Schools (3.0 cr)

-OR-

**Elementary Education - U of M BS Degree Transitioners**

Total: 39 credits

**Fall session**

CI 5283 - Practicum: Applying Instructional Methods in the Elementary Classroom (3.0 cr)
CI 5425 - Reading Instruction in the Elementary Grades (3.0 cr)
CI 5426 - Language Arts Instruction in the Elementary Grades (3.0 cr)
CI 5502 - Science Instruction in the Elementary Grades (3.0 cr)
CI 5645 - Teaching English Learners in the Elementary Classroom (3.0 cr)
CI 5702 - Social Studies Instruction in the Elementary Grades (3.0 cr)
CI 5822 - Mathematics Instruction in the Elementary Grades (3.0 cr)

Spring session
CI 5285 - Clinical Experience in Elementary School Teaching (12.0 cr)
CI 5286 - Student Teaching Seminar: Elementary Education (3.0 cr)
CI 5287 - Capstone Project: Improvement of Teaching in Elementary and Pre-Kindergarten Schools (3.0 cr)

English
This sub-plan is limited to students completing the program under Plan C.

The English education initial licensure program is designed to develop inquiring, analytical, and reflective professional educators prepared to teach in the classroom and lead in the schools. These educators can help students succeed in mastering a wide range of written and spoken communication skills.

The MEd/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

The teaching MEd English sub-plan requires a minimum of 39.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

English Education
Total: 39.5 credits

Summer session
1 additional credit will be required during the summer session to meet licensure requirements by the Minnesota Department of Education.
CI 5163 - Child and Adolescent Development for Teaching and Learning I (1.0 cr)
CI 5307 - Technology for Teaching and Learning (1.5 cr)
EPSY 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)

Fall session
CI 5441 should be taken for 3 credits.
CI 5164 - Child and Adolescent Development for Teaching and Learning II (2.0 cr)
CI 5441 - Teaching Literature in the Secondary School (2.0 - 3.0 cr)
CI 5451 - Teaching Reading in Middle and Secondary Grades (3.0 cr)
CI 5471 - Clinical Experience in Teaching Secondary English (3.0 cr)
CI 5617 - Academic Language and English Learners I (1.0 cr)
EPSY 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
OLPD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
OLPD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)

Spring session
8 additional credits will be required during the spring session to meet licensure requirements by the Minnesota Department of Education.
CI 5461 - Teaching Composition in the Secondary School (3.0 cr)
CI 5481 - Developments in Teaching English and Speech (3.0 cr)
CI 5618 - Academic Language and English Learners II (1.0 cr)
OLPD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)

MEd Completion Coursework
If student chooses CI 5150, the course should be taken for 3 credits under the topic “Teaching Pop Music: Youth Music, Youth Culture”. If student chooses CI 5410, the course should be taken for 3 credits. If student chooses CI 5484, we recommend the student also take CI 5485.
Take 12 or more credit(s) from the following:
• CI 5150 - Curriculum Topics (3.0 cr)
• CI 5156 - Popular Culture, Teaching, and Learning (3.0 cr)
• CI 5404 - Multicultural Literature for Children and Adolescents (3.0 cr)
• CI 5410 - Special Topics in the Teaching of Literacy (1.0 - 3.0 cr)
• CI 5422 - Teaching Writing in Schools (3.0 cr)
• CI 5442 - Literature for Adolescents (3.0 cr)
• CI 5462 - Evaluating and Assessing Writing (3.0 cr)
• CI 5464 - The Politics of Literacy and Race in Schools (3.0 cr)
• CI 5472 - Teaching Critical Media Analysis in Schools (3.0 cr)
Mathematics
This sub-plan is limited to students completing the program under Plan C.

The mathematics education initial licensure program at the University of Minnesota is designed to help students become accomplished professional mathematics educators, and inquiring, analytical, and reflective professional educators prepared to teach in the classroom and lead in the schools.

MEd/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

The teaching MEd mathematics sub-plan requires a minimum of 34.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

Mathematics Education
Total: 34.5 credits

Summer session
1 additional credit will be required during the summer session to meet licensure requirements by the Minnesota Department of Education.

CI 5307 - Technology for Teaching and Learning (1.5 cr)
EPSY 5001 - Learning, Cognition, and Assessment (3.0 cr)
EPSY 5017 - Teaching Exceptional Students in General Education Classrooms (2.0 cr)
MTHE 5011 - Arithmetic Structures in School Mathematics (3.0 cr)

Fall session
CI 5452 should be taken for 2 credits.
CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
CI 5617 - Academic Language and English Learners I (1.0 cr)
MTHE 5021 - Algebraic Structures in School Mathematics (3.0 cr)
OLPD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
OLPD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)

Spring session
8 additional credits will be required during the spring session to meet licensure requirements by the Minnesota Department of Education.

MTHE 5031 - Geometric Structures in School Mathematics (3.0 cr)
OLPD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
CI 5618 - Academic Language and English Learners II (1.0 cr)

MEd Completion Coursework

MTHE 5314 - Teaching and Learning Mathematics (3.0 cr)
MTHE 5366 - Technology-Assisted Mathematics Instruction (3.0 cr)
MTHE 5993 - Directed Studies in Mathematics Education (2.0 cr)

Elective
A minimum of three elective credits is required from the following list.

Take 1 or more course(s) totaling 3 or more credit(s) from the following:

• MTHE 5155 - Rational Number Concepts and Proportionality (3.0 cr)
• MTHE 5171 - Teaching Problem Solving (3.0 cr)
• MTHE 5172 - Teaching Probability and Statistics (3.0 cr)

Science
This sub-plan is limited to students completing the program under Plan C.

Science teachers are in high demand, and this program will prepare students to step into the classroom with confidence. The college offers a solid mix of theory and practice, as well as all of the resources that come with studying at a top research institution.

MEd/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.
The teaching MEd science sub-plan requires a minimum of 39.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

**Science Education**

**Total:** 39.5 credits

**Summer session**

1 additional credit will be required during the summer session to meet licensure requirements by the Minnesota Department of Education.

- **CI 5530 - Secondary Science Methods I (3.0 cr)**
- **EPSY 5001 - Learning, Cognition, and Assessment (3.0 cr)**
- **EPSY 5017 - Teaching Exceptional Students in General Education Classrooms (2.0 cr)**

**Fall session**

- **CI 5452 should be taken for 2 credits.**
- **CI 5307 - Technology for Teaching and Learning (1.5 cr)**
- **CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)**
- **CI 5531 - Secondary Science Methods II (3.0 cr)**
- **CI 5541 - Teaching History and Nature of Science (3.0 cr)**
- **CI 5596 - Clinical Experience in Middle School Science (4.0 cr)**
- **CI 5617 - Academic Language and English Learners I (1.0 cr)**
- **OLPD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)**
- **OLPD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)**

**Spring session**

8 additional credits will be required during the spring session to meet licensure requirements by the Minnesota Department of Education.

- **CI 5532 - Secondary Science Methods III (3.0 cr)**
- **CI 5618 - Academic Language and English Learners II (1.0 cr)**
- **OLPD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)**

**MEd Completion Coursework**

No more than 3 credits of CI 5540 can be taken without faculty advisor approval. If student takes CI 5551, student must also take CI 5552. CI 5539 is equivalent to CI 5551/5552. No courses outside of this list will be approved unless exceptional circumstances exist. Take 9 or more credit(s) from the following:

- **CI 5533 - Current Developments in Science Teaching (3.0 cr)**
- **CI 5535 - Foundations of Science Education (3.0 cr)**
- **CI 5536 - Equity, Policy, and Assessment in Science Education (3.0 cr)**
- **CI 5538 - Action Research in Science Education (3.0 cr)**
- **CI 5540 - Special Topics: Science Education (1.0 - 4.0 cr)**
- **CI 5551 - Reflecting on Science Classroom Practices I (1.5 cr)**
- **CI 5552 - Reflecting on Science Classroom Practices II (1.5 cr)**

**Second Language Education**

This sub-plan is limited to students completing the program under Plan C.

The Second Language Education (SLE) initial licensure program at the University of Minnesota is designed to help enrolled students become accomplished professional second language educators for grades K-12. The program integrates the fields of world languages and English as a Second Language (ESL), enabling teachers from both fields to learn from each other. Theory and practice are also linked through concurrent coursework and student teaching, a nationally recognized approach to teacher education.

Native speakers of English who are seeking licensure in a world language must demonstrate proficiency in that language. The following licensure options are available: Arabic, Chinese, French, German, Greek, Hebrew, Italian, Japanese, Latin, Norwegian, Ojibwe, Russian, Spanish, and Swedish. Candidates must have advanced proficiency in the language and an understanding of the formal aspects of the language, such as grammar and writing. Nonnative speakers of Arabic, Mandarin Chinese, French, German, Greek, Hebrew, Italian, Japanese, Norwegian, Russian, Spanish, or Swedish who are seeking a K-12 license in any of these languages must obtain a score of at least “advanced low” on the Oral Proficiency Interview (OPI).

The teaching MEd English as a Second Language (ESL) focus area requires a minimum of 36.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

The teaching MEd world language focus area requires a minimum of 33.5 credits. Students will follow the listed curriculum with the exception of CI 5646. In addition to the courses already listed, students also have the option of taking CI 5619 and CI 5658 under the "MEd Completion Coursework" portion of the degree. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

Students seeking two language licenses will have additional credit requirements beyond what is listed.
Second Language Education

Summer session
CI 5452 and CI 5631 should each be taken for 1 credit. 1 additional credit will be required during the summer session to meet licensure requirements by the Minnesota Department of Education.

CI 5163 - Child and Adolescent Development for Teaching and Learning I (1.0 cr)
CI 5307 - Technology for Teaching and Learning (1.5 cr)
CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
CI 5620 - Introduction to Second Language Acquisition for Language Teachers (3.0 cr)
CI 5631 - Second Language Curriculum Development and Assessment (1.0 - 3.0 cr)
EPSY 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
LING 5001 - Introduction to Linguistics (4.0 cr)

EPSY 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
OLPD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
OLPD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)

Fall session
CI 5631 will be required again in Fall session, this time for 2 credits. 6-8 additional credits, dependent upon language license area, will be required during the spring session to meet licensure requirements by the Minnesota Department of Education.

CI 5164 - Child and Adolescent Development for Teaching and Learning II (2.0 cr)
CI 5632 - Literacy and Language Development in Second Language Classrooms (3.0 cr)
CI 5626 - English Grammar for ESL Teachers (3.0 cr)
OLPD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
OLPD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)

Spring session
6-8 additional credits, dependent upon language license area, will be required during the spring session to meet licensure requirements by the Minnesota Department of Education. Additionally, another 3 credits will be required during the May session for students seeking state licensure in world languages in order to meet licensure requirements by the Minnesota Department of Education.

CI 5634 - Content-Based Instruction in Second Language Settings (3.0 cr)
CI 5635 - Culture and Diversity in Second Language Classrooms (3.0 cr)
EPSY 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
OLPD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)

MEd Completion Coursework

If student chooses to take CI 5636, we recommend the student also take CI 5637. If student chooses to complete CI 5660, it should be taken for 3 credits.

Take 3 or more credit(s) from the following:

• CI 5636 - Problems of Practice in Second Language Education: Seminar for Early Career Language Teachers Part 1 (1.5 cr)
• CI 5637 - Problems of Practice in Second Language Education: Seminar for Early Career Language Teachers Part 2 (1.5 cr)
• CI 5641 - Language, Culture, and Education (3.0 cr)
• CI 5648 - Advanced Practices in Teaching Academic Language (3.0 cr)
• CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)
• CI 5660 - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)

Second Language Education for Working Professionals

This sub-plan is limited to students completing the program under Plan C.

The Second Language Education (SLE) for working professionals initial licensure post-baccalaureate program at the University of Minnesota is designed for practicing teachers in the areas of ESL and/or any of the 14 world languages available for licensure through the state of Minnesota. This part-time program provides educators with the specific knowledge base and skill set needed to be a K-12 teacher of ESL or a world language.

The teaching MEd English as a second language (ESL) focus area requires a minimum of 38.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

The teaching MEd world languages focus area requires a minimum of 31.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

Students seeking two language licenses will have additional credit requirements beyond what is listed.

ESL or World Languages

SLE Working Professionals - ESL

M.Ed. Required Coursework
CI 5452 should be taken for 1 credit
PUBH 6003 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)
OLPD 5005 - School and Society (2.0 cr)
OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
CI 5307 - Technology for Teaching and Learning (1.5 cr)

**Special Education focus**
Choose either EPSY 5017 for 2 credits, or EPSY 5015 + EPSY 5016
Take exactly 2 credit(s) from the following:
- EPSY 5017 - Teaching Exceptional Students in General Education Classrooms (2.0 cr)
- EPSY 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
- EPSY 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)

**Psychology focus**
Choose either EPSY 5001 + CPSY 5301 or CI 5163 + CI 5164
Take exactly 2 course(s) totaling 3 - 6 credit(s) from the following:
- EPSY 5001 - Learning, Cognition, and Assessment (3.0 cr)
- CPSY 5301 - Advanced Developmental Psychology (3.0 cr)
- CI 5163 - Child and Adolescent Development for Teaching and Learning I (1.0 cr)
- CI 5164 - Child and Adolescent Development for Teaching and Learning II (2.0 cr)

**Additional Required Experiences/Coursework**
100 hours of experience in schools across elementary, middle and high school language classrooms which must be completed before practicum and student teaching. Credit hours allotted to CI 5697 and student teaching course will depend on the teacher candidates current teaching position.
CI 5620 - Introduction to Second Language Acquisition for Language Teachers (3.0 cr)
CI 5642 - Assessing English Learners (3.0 cr)
CI 5646 - English Grammar for ESL Teachers (3.0 cr)
CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)
CI 5662 - Second Language Curriculum Design (3.0 cr)
CI 5697 - Practicum: ESL in the Elementary School (2.0 - 6.0 cr)
LING 5001 - Introduction to Linguistics (4.0 cr)

-OR-

**SLE Working Professionals - World Languages**

**MEd Required Coursework**
CI 5452 should be taken for 1 credit
PUBH 6003 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)
OLPD 5005 - School and Society (2.0 cr)
OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
CI 5307 - Technology for Teaching and Learning (1.5 cr)

**Special Education focus**
Choose either EPSY 5017 for 2 credits, or EPSY 5015 + EPSY 5016
Take exactly 2 credit(s) from the following:
- EPSY 5017 - Teaching Exceptional Students in General Education Classrooms (2.0 cr)
- EPSY 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
- EPSY 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)

**Psychology focus**
Choose either EPSY 5001 + CPSY 5301 or CI 5163 + CI 5164
Take exactly 2 course(s) totaling 3 - 6 credit(s) from the following:
- EPSY 5001 - Learning, Cognition, and Assessment (3.0 cr)
- CPSY 5301 - Advanced Developmental Psychology (3.0 cr)
- CI 5163 - Child and Adolescent Development for Teaching and Learning I (1.0 cr)
- CI 5164 - Child and Adolescent Development for Teaching and Learning II (2.0 cr)

**Additional Required Experiences/Coursework**
100 hours of experience in schools across elementary, middle and high school language classrooms which must be completed before practicum and student teaching. Credit hours allotted to CI 5696 and student teaching course will depend on the teacher candidates current teaching position.
CI 5619 - Teaching World Languages and Cultures in Elementary Settings (3.0 cr)
CI 5651 - Foundations of Second Languages and Cultures Education (3.0 cr)
CI 5656 - Teaching Literacy in Second Language Classrooms (3.0 cr)
CI 5657 - Teaching Speaking and Listening in Second Language Classrooms (3.0 cr)
CI 5662 - Second Language Curriculum Design (3.0 cr)
or CI 5624 - Content-based Language Instruction and Curriculum Development (2.0 cr)
If student chooses CI 5660, the topic must be "STARTALK for Mandarin Chinese" for 2 credits
CI 5621 - Culture as the Core in the Second Language Classroom (2.0 cr)
or CI 5641 - Language, Culture, and Education (3.0 cr)

Social Studies
This sub-plan is limited to students completing the program under Plan C.

The social studies education initial licensure program is designed to help students become an inquiring, analytical, and reflective professional educators prepared to teach in grades 5-12 classrooms and lead in the schools. The program seeks to develop educators who are advocates for young people and the social studies, and can help youth to become thoughtful and active citizens in a culturally diverse, democratic society.

The MEd/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching.

The teaching MEd social studies sub-plan requires a minimum of 32.5 credits. Additional requirements and credits will be required to earn the initial licensure, which is awarded through the Minnesota Department of Education.

Social Studies Education
Total: 32.5 credits

Summer session
CI 5452 should be taken for 2 credits. 1 additional credit will be required during the summer session to meet licensure requirements by the Minnesota Department of Education.
CI 5163 - Child and Adolescent Development for Teaching and Learning I (1.0 cr)
CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
CI 5741 - Introduction to Social Studies Education (3.0 cr)
CI 5743 - The Social Sciences and the Social Studies (3.0 cr)
EPSY 5015 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)

Fall session
5 additional credits will be required during the fall session to meet licensure requirements by the Minnesota Department of Education.
CI 5164 - Child and Adolescent Development for Teaching and Learning II (2.0 cr)
CI 5307 - Technology for Teaching and Learning (1.5 cr)
CI 5617 - Academic Language and English Learners I (1.0 cr)
CI 5742 - Advanced Methods of Teaching the Social Studies (3.0 cr)
CI 5745 - Engaging Youth With Social Studies Texts (3.0 cr)
EPSY 5016 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
OLPD 5000 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)
OLPD 5010 - Cultures, Schools, and Communities (Human Relations) (2.0 cr)

Spring session
7 additional credits will be required during the spring session to meet licensure requirements by the Minnesota Department of Education.
CI 5618 - Academic Language and English Learners II (1.0 cr)
CI 5744 - Seminar: Reflecting on Professional Development in Social Studies Education (3.0 cr)
OLPD 5020 - Cultures, Schools, and Communities (Human Relations) (1.0 cr)

Elective
A minimum of three elective credits is required from the following list.
Take 1 or more course(s) totaling 3 or more credit(s) from the following:
• CI 5746 - Global and Multicultural Education in the Secondary Classroom (3.0 cr)
• CI 5762 - Developing Civic Discourse in the Social Studies (3.0 cr)

Alternative Pathway: Elementary Education
This sub-plan is limited to students completing the program under Plan C.

The alternative pathway elementary education initial licensure program is designed to help students become inquiring, analytical, and reflective professional educators who can help students succeed in school. The program also seeks to develop thoughtful practitioners who are enthusiastic about and prepared for leadership roles in the schools. Alternative pathway MEd/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous professional teacher preparation in accordance with the Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching. This Alternative Pathway to Teaching program is for designated cohorts with department approval.

Students must maintain a 2.8 GPA throughout their MEd program in addition to earning a C- or higher in each individual course.

Information current as of August 31, 2018
credits are required to complete this sub-plan. Required coursework includes 15 credits in common content area, 15 credits in elementary education track, and 6 elective credits selected in consultation with faculty advisor.

**Common Content Coursework**
- CI 5980 will be taken a total of four semesters; 1 credit each semester. CI 5452 should be taken for 1 credit.
- CI 5980 - Clinical Experiences for K-12 Teaching (1.0 - 4.0 cr)
- CI 5981 - Introduction to Equity-Based Pedagogy (1.0 cr)
- CI 5982 - Enacting Equity-Based Pedagogy (2.0 cr)
- CI 5983 - Equity-Based Pedagogy/Advocacy (1.0 cr)
- CI 5984 - Planning Design and Management (1.0 cr)
- CI 5985 - Academic Language and English Learners in the Content Areas (1.0 cr)
- CI 5986 - Foundations of Special Education (1.0 cr)
- CI 5987 - Child and Adolescent Development for Teaching, Learning, and Assessment (1.0 cr)
- CI 5988 - Clinical Experience: Improvement of Teaching (2.0 cr)
- CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)

**Elementary Education Coursework**
- CI 5211 - Elementary Education Content and Pedagogy I (4.0 cr)
- CI 5212 - Elementary Education Content and Pedagogy II (3.0 cr)
- CI 5213 - Elementary Education Content and Pedagogy III (3.0 cr)
- CI 5214 - Elementary Education Content and Pedagogy IV (3.0 cr)
- CI 5215 - Elementary Education Content and Pedagogy V (2.0 cr)

**Elective Coursework**
A minimum of six credits is required, selected in consultation with faculty advisor.

**Alternative Pathway: Secondary Mathematics**
- This sub-plan is limited to students completing the program under Plan C.

ALERT: the Teaching MEd degree program in Alternative Pathway: Secondary Mathematics is currently suspended. We are not accepting applications at this time.

The alternative pathway mathematics education initial licensure program at the University of Minnesota is designed to help students become accomplished professional mathematics educators, and inquiring, analytical, and reflective professional educators prepared to teach in the classroom and lead in the schools. alternative pathway MEd/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching. This Alternative Pathway to Teaching program is for designated cohorts with department approval.

Students must maintain a 2.8 GPA throughout their MEd program in addition to earning a C- or higher in each individual course. 36 credits are required to complete this sub-plan. Required coursework includes 15 credits in common content area, 15 credits in secondary mathematics track, and 6 elective credits selected in consultation with faculty advisor.

**Common Content Coursework**
- CI 5980 will be taken a total of four semesters; 1 credit each semester. CI 5452 should be taken for 1 credit.
- CI 5980 - Clinical Experiences for K-12 Teaching (1.0 - 4.0 cr)
- CI 5981 - Introduction to Equity-Based Pedagogy (1.0 cr)
- CI 5982 - Enacting Equity-Based Pedagogy (2.0 cr)

Alternative Pathway: English as a Second Language
This sub-plan is limited to students completing the program under Plan C.

ALERT: the Teaching MEd degree program in Alternative Pathway: ESL is currently suspended. We are not accepting applications at this time.

The second languages and cultures education (SLC) initial licensure program at the University of Minnesota is designed to help enrolled students become accomplished professional second language educators for grades K-12. The program integrates the fields of world languages and English as a Second Language (ESL), enabling teachers from both fields to learn from each other. Theory and practice are also linked through concurrent coursework and student teaching— a nationally recognized approach to teacher education. Alternative pathway MEd/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with the Standards of Effective Practice for Teachers (SEPT) and content standards adopted by the Minnesota Board of Teaching. This alternative pathway to teaching program is for designated cohorts with department approval.

Students must maintain a 2.8 GPA throughout their MEd program in addition to earning a C- or higher in each individual course. 36 credits are required to complete this sub-plan. Required coursework includes 15 credits in common content area, 15 credits in English as a Second Language track, and 6 elective credits selected in consultation with faculty advisor.

Contact Information:
Department of Curriculum and Instruction, University of Minnesota, 125 Peik Hall, 159 Pillsbury Drive SE, Minneapolis, MN 55455 (612-625-4006; fax: 612-624-8277)
Email: CIinfo@umn.edu
Website: http://www.cehd.umn.edu/ci

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 15
- This program requires summer semesters for timely completion.
- Degree: Teaching, Writing & Critical Literacy PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate in teaching writing and critical literacy prepares preK-college educators to strengthen their skills and knowledge of current practice and research in the teaching of critical reading and writing (note that a university certificate program or certificate is distinct from a state certificate or certification).

Writing and reading complement one another, and their interconnectedness is critical to literacy instruction. This certificate will offer advanced knowledge of the teaching of literacy through a focused, rigorous program while developing practicing educators’ skills as teachers and writers in a supportive learning community.

Changing literacy needs of students from all socioeconomic and educational backgrounds demand highly qualified teachers of reading and writing at the K-12 and postsecondary levels. Educators must prepare K-12 students to meet testing requirements at the state and national levels. In addition, teachers must meet the increasing literacy needs that accompany Minnesota’s changing demographics of growing immigrant and English language learner (ELL) populations. Educators also must prepare students to communicate effectively by using new technologies.

The certificate program seeks to accomplish the following goals:
- Develop effective strategies for teaching the writing process to English-language learners and diverse populations, as well as reading and writing across the curriculum.
- Engage educators in current research about composition, reading, and learning theory.
- Create learning communities where educators reflect on their own teaching, reading, and writing.
- Give educators opportunities to learn from other practicing educators.

This program begins with a three-week, 3-credit Minnesota Writing Project (MWP) Invitational Institute and then extends to allow educators to choose from a wider range of courses from multiple University departments throughout the academic year.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A completed bachelor’s degree is required for admission.

Applicants must be licensed teachers or administrators. Non-licensed teachers may be admitted with faculty letters of recommendation if program space is available.

Special Application Requirements:
Applicants must submit transcripts from every college attended (even those where a degree wasn’t earned), scores from the TOEFL/IELTS/MELAB (if applicable), a resume, a goal statement that explains the relationship of courses and research to your
professional goals, and two letters of recommendation addressing your teaching accomplishments and potential for further study. Certificate applications are reviewed by the department three times per academic year: Fall, Spring and Summer.

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5

- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language. Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

**Core Courses (9 credits)**

- **CI 5463** - Minnesota Writing Project Annual Invitational Summer Institute (3.0 cr)

**Teaching Core**

Students must complete one of the following courses in the teaching of reading and/or writing.

- **CI 5422** - Teaching Writing in Schools (3.0 cr)
- **CI 5462** - Evaluating and Assessing Writing (3.0 cr)

**Directed Study**

3 credits of “directed study” will be taken in consultation with faculty adviser.

**Elective Courses (6 credits)**

Take 2 or more course(s) totaling 6 or more credit(s) from the following:

- **CI 5145** - Critical Pedagogy (3.0 cr)
- **CI 5177** - Practical Research (1.0 - 3.0 cr)
- **CI 5404** - Multicultural Literature for Children and Adolescents (3.0 cr)
- **CI 5410** - Special Topics in the Teaching of Literacy (1.0 - 3.0 cr)
- **CI 5417** - Elementary literacy Instruction for ESL Students (3.0 cr)
- **CI 5442** - Literature for Adolescents (3.0 cr)
- **CI 5462** - Evaluating and Assessing Writing (3.0 cr)
- **CI 5475** - Teaching Digital Writing (3.0 cr)
- **CI 5641** - Language, Culture, and Education (3.0 cr)
- **CI 5656** - Teaching Literacy in Second Language Classrooms (3.0 cr)
- **CI 5660** - Special Topics in the Teaching of Second Languages and Cultures (1.0 - 4.0 cr)
- **ENGL 5790** - Topics in Rhetoric, Composition, and Language (3.0 cr)
- **LING 5001** - Introduction to Linguistics (4.0 cr)
- **LING 5461** - Conversation Analysis (3.0 cr)
- **LING 5990** - Topics in Linguistics (1.0 - 4.0 cr)
- **WRIT 5531** - Introduction to Writing Theory and Pedagogy (3.0 cr)
- **EPSY 5618** - Specialized Interventions for Students With Mild/Moderate Disabilities in Reading & Written Language (3.0 cr)
- **EPSY 5644** - Early Childhood Language and Literacy Development and Best Practices: Deaf and Hard of Hearing (3.0 cr)
- **EPSY 5646** - Best Practices Teaching Reading and Writing for School Age: Deaf and Hard of Hearing (3.0 cr)
- **EPSY 8116** - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
- **EPSY 8117** - Writing Empirical Paper and Research/Grant Proposals in Education and Psychology (3.0 cr)

- This program does not require summer semesters for timely completion.
- Degree: Ugrd Multicultural Tchng & Lrnng PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The post baccalaureate certificate in undergraduate multicultural teaching and learning aims to improve the quality of instruction and academic support for all undergraduates, particularly those who traditionally have been underprepared for and underserved in higher education. The required core courses are designed to provide opportunities to apply multicultural theory to practice and engage as reflective practitioners.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

Special Application Requirements:
Students may apply to the undergraduate multicultural teaching and learning graduate certificate any time; there is no set application deadline. All applicants must complete the ApplyYourself online application and submit a personal statement. The personal statement should address: interest in the program; professional/academic or community qualifications; what the student will bring to the program, and; how completion of the certificate will build on the applicant's capacity to transform.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

Admission to the Work and Human Resource Education (WHRE) MED program is currently suspended.

The Department of Organizational Leadership, Policy, and Development is a leader in advancing knowledge about educational and organizational change in local, national, and international contexts. The department's research, teaching, and outreach reflect a commitment to interdisciplinary and intercultural engagement with educators, scholars, and policy makers seeking to enhance leadership, policy, and development around the globe. Students in the MA and PhD programs choose from one of five complementary but distinct program tracks: education policy and leadership (EPL), evaluation studies (ES), higher education (HE), comparative and international development education (CIDE), and human resource development (HRD). Undergraduate programs focus on human resource development and business and marketing education. In addition, the department offers a variety of programs for practicing professionals and various licensure programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Other requirements to be completed before admission:
Professional experience in a work and human resource education field or an undergraduate major in education with an appropriate content field.

Special Application Requirements:
Admission to the Work and Human Resource Education (WHRE) MED program are currently suspended.

Program Requirements
Plan C: Plan C requires 17 to 21 major credits and 9 to 13 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The work and human resource education (WHRE) MEd program is not accepting new students at this time. Information about degree requirements for current students can be found at http://www.cehd.umn.edu/olpd/grad-programs/.

Required Coursework

Two plans are offered:

Plan I is for licensed educators planning to pursue advanced professional study and requires a minimum of 17 semester credits of OLPD courses.

Plan II is for professionals seeking additional education and requires a minimum of 21 semester credits. Students must complete all Plan I requirements. However, the Plan II specialization area must include at least one methods of instruction course.

General Aspects
- OLPD 5806 - Philosophy and Practice of Career and Technical Education (2.0 cr)
- or OLPD 5811 - Education for Work (3.0 cr)
- or OLPD 5813 - Enhancing Work-based Learning Through Collaboration (2.0 cr)
- or OLPD 5823 - Work-Based Learning Policies (2.0 cr)

Specialization
- 8-12 credits of OLPD courses with advisor approval depending if Plan I or Plan II.

Research
- OLPD 5819 - Evaluating and Using Research in Organizations and Education (3.0 cr)

Students electing Plan II must take an advisor approved methods of instruction course.

Electives
- Up to 13 credits with advisor approval, a minimum of 6 credits must come from outside the OLPD department.

Integrating Project
- Students work with their faculty advisor to select specialization courses consistent with their professional goals, select the course(s) to meet the general aspects requirement, and design and complete the integrating project. The proposed program must be reviewed and approved by departmental faculty.

- OLPD 5893 - Directed Study in OLPD (1.0 - 4.0 cr)

Program Sub-plans

A sub-plan is not required for this program.

Students may complete the program with more than one sub-plan.

Comprehensive Work and Human Resource Education
- This sub-plan is limited to students completing the program under Plan C.

Rochester
- This sub-plan is limited to students completing the program under Plan C.

All subplans in this major use same curriculum. The work and human resource education (WHRE) MEd program is not accepting new students at this time. Information about degree requirements for current students can be found at http://www.cehd.umn.edu/olpd/grad-programs/.

Youth development leadership (YDL) understands leadership as a practice everyone does every day, regardless of age. You will be invited to reflect on your own leadership experiences within a learning community that includes fellow students, community practitioners, and faculty. You will learn about your own leadership, deepen your understanding of the young people you work with, and expand your connection within the larger youth work community both locally and globally. You will be invited to think critically about how communities often understand and respond to young people and work to create innovative interventions for young people in schools, community organizations, and the workplace that challenge these typical understandings and create opportunities for young people to fully flourish. How can we collaborate with young people when responding to the most pressing current issues and needs? What organizational structures and strategies support and sustain young people's authentic and meaningful involvement in inclusive, socially just, and equitable opportunities? How can organizations, schools, and communities transform to provide developmentally rich and meaningful opportunities for young people?

Utilizing the most current understanding of youth development joined to issues of inclusion, equity, and social justice, you will graduate with the necessary knowledge and skills to work collaboratively, think critically, and act intentionally to create sustainable opportunities for young people and to transform youth-serving organizations to better respond to all young people and the communities they live in.

The YDL M.Ed. emphasizes:
- A community-based model of positive youth development;
- Experiential learning models;
- Leadership and community building by encouraging consultation among faculty, professional youth workers, fellow students, and young people;
- Diverse, flexible, and interdisciplinary faculty and curriculum that provide an informed understanding of practices, policies, and ethics of youth development work;
- Positive professional development;
- Collaborative approach to learning;
- Interdisciplinary curriculum;
- Cohort of other youth work professionals, for supportive learning environment;
- Diverse faculty dedicated to healthy youth development and committed to helping students develop a course of study that meets their professional and personal needs and interests.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

A bachelor's degree from an accredited institution.
Other requirements to be completed before admission:
At least two years of experience working with youth.

**Special Application Requirements:**
All applicants must upload the following items to their online application in Apply Yourself:
- Résumé
- Personal statement describing career goals and rationale for interest in the M.Ed. program (limit two pages)
- Unofficial transcripts from all post-secondary institutions you have attended or are currently attending, including the University of Minnesota
- Letters of recommendation from at least two persons (e.g., administrators, colleagues, instructors) familiar with the applicant's performance who can attest to his or her capacity for youth development leadership
- Application fee, charged when the online application is submitted. Fee must be paid with a credit card.
Applications are accepted on a year-round basis.

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- **IELTS**
  - Total Score: 6.5
- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 21 major credits and 9 credits outside the major. There is no final exam. A capstone project is required.

**Capstone Project:** The portfolio is a demonstration and personal assessment of individual learning and leadership in youth development work and in the YDL program. Successful completion of the portfolio presentation to the student’s faculty committee of two or more faculty is the final requirement of the YDL program.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

**Required Coursework**

*NOTE: Students must take a total two credits of YOST 5960, in one credit increments, during their time in the program.*

- **YOST 5950** - Ways of Knowing in Youth Development Leadership: Using Research and Evaluation to Support Community (3.0 cr)
- **YOST 5952** - Everyday Lives of Youth (3.0 cr)
- **YOST 5954** - Experiential Learning: Pedagogy for Community and Classroom (3.0 cr)
- **YOST 5956** - Organizational Approaches to Youth Development (3.0 cr)
- **YOST 5958** - Community Context for Youth Development Leadership (3.0 cr)
- **YOST 5960** - Seminar in Youth Development Leadership (1.0 cr)
- **YOST 5962** - Leadership Field Experience: Youth Development (4.0 cr)

**Elective Credits**

9 or more 5xxx level elective credits must be selected with approval of faculty adviser.
Twin Cities Campus
Agricultural Education M.S.
Applied Economics
College of Food, Agricultural and Natural Resource Sciences

St. Paul, MN 55108
Email: ageddgs@umn.edu
Website: http://ag-ed.cfans.umn.edu/

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 45
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This Master's degree leads to an initial licensure in Agricultural Education. Master of Science (MS)/initial licensure programs are for individuals with bachelor's degrees who want to become licensed teachers. These graduate-level programs provide rigorous, professional teacher preparation in accordance with Standards of Effective Practice for Teachers (SEPT) and content standards of the Minnesota Board of Teaching.

The agricultural education initial licensure program at the University of Minnesota is designed to help students become accomplished professional educators who can help students succeed in the classroom. The program prepares inquiring, analytical, and reflective professional educators who can teach in the classroom and lead in the schools.

Students enter a 12 to 15-month program integrating educational theory with classroom practice. Working closely with experienced teachers, students observe firsthand the daily rewards and pressures of their profession.

Flexibility is an important advantage of this program. Students may enroll in any semester and are welcomed into the entire agriculture education program, building valuable professional support. A second advantage is that most program credits may be applied toward completion of the MS degree.

This program includes two components: initial licensure and the MS degree. After successfully completing licensure requirements and appropriate work experience, students are recommended for state licensure to teach agricultural education in grades 5-12.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.50.

Relevant professional experience and/or a relevant undergraduate major is required.

Other requirements to be completed before admission:
A minimum of 100 hours of experience in youth education.

Special Application Requirements:
In addition to other required materials, applicants must submit Statements #1 and #2, a résumé and two letters of recommendation from individuals who can attest to the applicant's potential in the field.

Admissions is done on a rolling basis with the following semester deadlines: March 1 (Summer), July 1 (Fall), and November 1 (Spring).
Applicants must submit their test score(s) from the following:
• NES Essential Academic Skills for Minnesota Teacher Licensure

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 30 to 45 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Courses must be taken A - F (unless only offered S/N) and students must earn a grade of C- or better.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Initial Licensure
This sub-plan is limited to students completing the program under Plan C.

In addition to the required coursework, content course credits are required for licensure. Students can take these courses as an undergrad prior to entering the program or enroll in these courses concurrently (totaling 39 credits).

Agricultural Science (4)
Animal Science (7)
Applied Economics and Agribusiness (6)
Food Science (3)
Natural Resources (3)
Plant Science (6)
Soil Science (4)
Technology [Ag Mechanics] (6)

General Psychology (3)

Agricultural Education Licensure Courses
AFEE 5111W - Agricultural Education: Methods of Teaching [WI] (4.0 cr)
AFEE 5112 - Agricultural Education Program Organization and Curriculum for Youth (3.0 cr)
AFEE 5114 - Agricultural Education Teaching Seminar (1.0 cr)
AFEE 5116 - Coordination of SAE Programs: Work-based Learning (2.0 cr)
AFEE 5118 - Strategies for Managing and Advising the FFA Organization (2.0 cr)
AFEE 5697 - Teaching Internship: School and Classroom Setting (2.0 cr)
AFEE 5698 - Teaching Internship (2.0 - 8.0 cr)
CI 4602 - English Learners and Academic Language (1.0 cr)
CI 5163 - Child and Adolescent Development for Teaching and Learning I (1.0 cr)
CI 5164 - Child and Adolescent Development for Teaching and Learning II (2.0 cr)
CI 5307 - Technology for Teaching and Learning (1.5 cr)
CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
EPSY 4001 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
OLPD 5005 - School and Society (2.0 cr)
OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
PUBH 6003 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)

Post-Licensure Courses
AFEE 5995 - Integrating Paper--Master of Education: Agricultural and Extension Education (1.0 - 5.0 cr)
AFEE 5220 - Special Topics in Agriculture Education and Extension (1.0 - 3.0 cr)
AFEE 5280 - Current Issues for the Beginning Agricultural Education Teacher (1.0 - 3.0 cr)
AFEE 5993 - Directed Study in Agricultural Education and Extension (1.0 - 4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students in the Animal Sciences M.S. concentrate on one of the animal sciences emphasis areas: genetics; growth biology; nutrition; physiology; or production systems. Students have the option of tailoring their individual programs to include study in more than one emphasis area.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The Plan B project requires approximately 120 hours to complete. The nature and extent of the project is agreed
upon in advance by the student and faculty advisor.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Plan A requires a minimum of 14 semester credits in the major and 6 credits in a designated minor or related field outside the major. Selection of courses to fulfill this requirement and development of the thesis project are primarily the responsibility of the student and faculty advisor. Students also must register for a minimum of 10 thesis credits.

Plan B requires a minimum of 30 credits, which must include 14 or more credits in the major area and at least 6 credits in one or more related fields outside the major. The balance of credits is chosen by agreement between the advisor and student. In addition to coursework, students must complete the Plan B capstone project, which requires approximately 120 hours. The nature and extent of the project is agreed upon in advance by the student and faculty advisor.

Ethics Requirement
All students are required to be trained in ethical issues in science. Please select one course from the list below to meet this requirement.

- ANSC 8134 - Ethical Conduct of Animal Research (3.0 cr)
- APEC 8901 - Graduate Seminar: MS & PhD (1.0 cr)
- APEC 8902 - Graduate Research Development Seminar (1.0 cr)
- APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
- BBE 8001 - Seminar I (1.0 cr)
- BBE 8002 - Seminar II (1.0 cr)
- CONS 8001 - Conservation Biology Seminar (1.0 cr)
- ENT 8061 - Scientific Communication and Ethics (1.0 cr)
- FSCN 8318 - Current Issues in Food Science (2.0 cr)
- NUTR 8621 - Presentation Skills (1.0 cr)
- PLPA 8123 - Research Ethics in Plant and Environmental Sciences (0.5 cr)
- SOIL 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
- WRS 8581 - Research and Professional Ethics in Water Resources and Environmental Science (0.5 cr)

Seminar Requirement
All master's students are required to take 4 credits of AnSc 8510 Graduate Seminar

ANSC 8510 - Graduate Seminar (1.0 cr)
Twin Cities Campus

Animal Sciences Minor

Email: ansci@umn.edu
Website: http://www.ansci.umn.edu/GraduateProgram/index.htm

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students pursuing the Animal Sciences minor concentrate on one of the animal sciences emphasis areas: genetics; growth biology; nutrition; physiology; or production systems. Students have the option of tailoring their minor to include study in more than one emphasis area.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Requirements are designed to fit the student's needs. A master's minor requires 6 credits in areas not closely related to the major; no more than 2 of these credits may be in research or special problems. A doctoral minor requires 12 credits in areas not closely related to the major; no more than 3 of these credits may be in research or special problems.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Minor Requirements
The AnSci program does not require specific courses for completion of the minor. The minor requires at least 6 credits of graduate-level courses to be chosen in consultation with the student's major adviser, the AnSci faculty member who will serve on the student's examination committee as the minor program representative, and the AnSci Director of Graduate Studies.

Doctoral
Minor Requirements
The AnSci program does not require specific courses for completion of the minor. The minor requires at least 12 credits of graduate-level courses to be chosen in consultation with the student's major adviser, the AnSci faculty member who will serve on the student's examination committee as the minor program representative, and the AnSci Director of Graduate Studies.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students in the PhD program concentrate on one of the animal sciences emphasis areas: genetics, nutrition, physiology, or production systems. Students have the option of tailoring their program to include study in more than one emphasis area and to emphasize basic or applied science.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in agriculture or a biological field with training in biology, chemistry, physics, and mathematics is required.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 credits are required in the major.
24 thesis credits are required.
This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

**Ethics Requirement**
All students are required to be trained in ethical issues in science. Please select one course from the list below to meet this requirement.
- ANSC 5091 - Research Proposals: From Ideas to Strategic Plans [WI] (3.0 cr)
- or ANSC 8134 - Ethical Conduct of Animal Research (3.0 cr)
- or APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
- or ENT 8061 - Scientific Communication and Ethics (1.0 cr)
- or PLPA 8123 - Research Ethics in Plant and Environmental Sciences (0.5 cr)
- or SOIL 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
- or WRS 8581 - Research and Professional Ethics in Water Resources and Environmental Science (0.5 cr)

**Seminar Requirement**
All doctoral students are required to take 6 credits of AnSc 8510 Graduate Seminar

ANSC 8510 - Graduate Seminar (1.0 cr)

**Thesis Requirement**
All doctoral students are required to take 24 thesis credits of AnSc 8888 Graduate Seminar

ANSC 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

**Major Coursework**
Students are required to take 15 to 17.5 credits in consultation with adviser.
**Twin Cities Campus**

**Applied Economics M.S.**

**College of Food, Agricultural and Natural Resource Sciences**

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The MS degree in applied economics prepares students for employment opportunities in the public and private sectors, and for further graduate study. This rigorous but flexible program includes core coursework in economic theory and quantitative methods, and offers opportunities for specialized coursework and research in all the fields of study offered by the program.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:

The following coursework is considered the minimum preparation for the MS program: micro and macroeconomic theory at the intermediate undergraduate level, statistics, two semesters of calculus, and introductory linear algebra. Additional coursework in economics, statistics, and math is highly desirable and recommended, especially for students who intend to apply for the doctoral program after completion of the MS degree.

**Special Application Requirements:**

Applicants must submit scores from the General Test of the GRE, three letters of recommendation from persons familiar with the applicant's scholarship and research potential, a complete set of college or university transcripts, and a clearly written statement of academic and career interests, goals, and objectives. For complete application instructions, visit the website: [http://www.apecgrad.umn.edu/Admissions/index.htm](http://www.apecgrad.umn.edu/Admissions/index.htm). Students should apply by the December deadline to ensure priority consideration for admissions and funding.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 to 16 major credits and 10 to 12 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: A project that demonstrates familiarity with the theoretical and empirical tools of economics. The Plan B project requires between 4 and 6 project credits (APEC 8793).

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

MS students are required to complete graduate-level courses in microeconomic theory, macroeconomic theory, and econometrics or statistics, and are required to participate in two 1-credit MS seminars. Both Plan A and Plan B require a minimum of 30 credits, 14 credits of which must be in the major field (APEC, ECON, or STAT classes). These 14 major field credits must include a minimum of 9 credits in applied economics (excluding thesis and special topics, independent study, and APEC 8901-02). Plan A requires 10 thesis credits. Plan B requires a 4- to 6-credit project.

Required Courses

All students must complete one course from each sub-group and both seminar courses, with a minimum of 11 credits. Courses must be taken A-F only excluding seminar.

Complete one of the courses from this group A-F only.

APEC 5031 - Methods of Economic Data Analysis (3.0 cr)
or APEC 8211 - Econometric Analysis I (4.0 cr)
Complete one of the two 5XXX level courses or the 8XXX level series A-F only and a minimum of 3 credits.

APEC 5152 - Applied Macroeconomics: Income and Employment (3.0 cr)
or APEC 5032 - Economic Data Analysis for Managerial and Policy Decisions (3.0 cr)
or Must complete entire series A-F

ECON 8105 - Macroeconomic Theory (3.0 cr)
ECON 8106 - Macroeconomic Theory (2.0 cr)

Complete the 5XXX level course or the 8XXX level series A-F only and a minimum of 3 credits.

APEC 5151 - Applied Microeconomics: Firm and Household (3.0 cr)
or Must complete entire series A-F

APEC 8001 - Applied Microeconomic Analysis of Consumer Choice and Consumer Demand (2.0 cr)
APEC 8002 - Applied Microeconomic Analysis of Production and Choice Under Uncertainty (2.0 cr)
APEC 8901 - Graduate Seminar: MS & PhD (1.0 cr)
APEC 8902 - Graduate Research Development Seminar (1.0 cr)

Plan A
Electives

9 credits required (A-F only). 3 credits must be chosen from APEC, ECON, STAT (excluding STAT 5021, 5022, 5031). 6 credits may be chosen from APEC, ECON, STAT or a related field in consultation with advisor. All courses must be at 5XXX or 8XXX level. Recommended course APEC 5032.

10 credits required in APEC 8777.

APEC 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B
Electives

13 credits required (A-F only). 3 credits must be chosen from APEC, ECON, STAT (excluding STAT 5021, 5022, 5031). 6 credits may be chosen from APEC, ECON, STAT or a related field in consultation with advisor. All courses must be at 5XXX or 8XXX level. Recommended course APEC 5032.

Plan B Project

4 to 6 credits required in APEC 8793.

APEC 8793 - Master's Paper: Plan B Project (1.0 - 6.0 cr)
Joint- or Dual-degree Coursework: MS-Applied Economics/MBA
Student may take a total of 18 credits in common among the academic programs.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Graduate study in applied economics requires an operational knowledge of economic theory and modern methods of quantitative analysis, as well as practical application in specialized fields of inquiry, which include consumer behavior; household economics; health economics; labor economics; policy analysis; production and marketing economics; resource and environmental economics; and trade and development economics.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

**Special Application Requirements:**
Courses for the minor must be approved by the director of graduate studies in the Applied Economics Graduate Program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**
Use of 4xxx courses towards program requirements is not permitted.

The Director of Graduate Studies must approve minor coursework.
Courses must be taken at the 5XXX or 8XXX level.

**Program Sub-plans**
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

**Masters**
At least 9 credits of 5xxx or 8xxx coursework in applied economics, approved by the applied economics director of graduate studies, are required. All courses in the minor must be taken A-F and completed with a GPA of 3.00 or higher.

**Doctoral**

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48 to 66
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The PhD degree program in applied economics prepares students for careers in academia, government, and the private sector. This rigorous program includes core coursework in economic theory, quantitative methods, and two fields of specialization selected from the following: consumer behavior and household economics; production and marketing economics; trade and development economics; natural resource and environmental economics; health economics; labor economics; and policy analysis.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The minimum preferred undergraduate GPA for admittance to the program is a B average (3.00/4.00). Most admitted students will have a higher GPA.

Other requirements to be completed before admission:
Applicants for the PhD degree should have completed an MS degree in economics, agricultural economics, or a related field; or have equivalent coursework and research experience. Applicants without a master's degree are, except in a few special cases, considered for admission into the MS program.

Prior training should include micro- and macro-economic theory at the master's level, multivariate calculus, differential equations and linear algebra, and mathematical statistics. Students lacking background in economics or quantitative methods may be required to complete additional coursework before entering the program.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE, three letters of recommendation from persons familiar with the applicant's scholarship and research potential, a complete set of college or university transcripts, and a clearly written statement of academic and career interests, goals, and objectives. For complete application instructions, visit the website: http://www.apecgrad.umn.edu/Admissions/index.htm. Students should apply by the December deadline to ensure priority consideration for admissions and funding.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Paper Based - Total Score: 550

IELTS
- Total Score: 6.5

MELAB
- Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

24 to 42 credits are required in the major.

0 credits are required outside the major.

24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Most students take at least 42 credits of coursework and must take 24 doctoral thesis credits. Required courses in microeconomic theory, macroeconomic theory and applied econometrics, and at least two-thirds of the remaining credits included in the PhD degree program are to be completed on the A-F grade basis.

Students must complete at least 18 course credits in applied economics at the 8xxx-level while enrolled as a current student in the graduate program (not including APEC 8901-04 and APEC 8991), PA, PUBH, and HRIR courses included in the list of fields noted in the Graduate Student Handbook can be applied to this requirement. Up to 6 credits of Department of Economics 8xxx-level field courses may be substituted for these credits (excluding ECON 8001-04, 8101-04, 8105-06, and 8205-08).

Students must pass a written preliminary exam in microeconomic theory and at least one field examination in one of the seven PhD fields offered by the Applied Economics graduate program. In addition, there is a requirement for a qualifying paper written in the second year of the program.

For more details, please see the Graduate Student Handbook at: http://www.apec.umn.edu/sites/apec.umn.edu/files/2015-16_apec_graduatestudenthandbook_final.pdf

Microeconomic Theory

All students must complete one of the three microeconomics theory sequences noted below (A-F only).

APEC - Applied Microeconomic Theory
- APEC 8001 - Applied Microeconomic Analysis of Consumer Choice and Consumer Demand (2.0 cr)
- APEC 8002 - Applied Microeconomic Analysis of Production and Choice Under Uncertainty (2.0 cr)
- APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)
- APEC 8004 - Applied Microeconomic Analysis of Social Choice and Welfare (2.0 cr)

or ECON - Microeconomic Theory (Majors Sequence)
- ECON 8101 - Microeconomic Theory (2.0 cr)
- ECON 8102 - Microeconomic Theory (2.0 cr)
- ECON 8103 - Microeconomic Theory (2.0 cr)
- ECON 8104 - Microeconomic Theory (2.0 cr)

Macroeconomic Theory

All students must complete the following two courses (A-F only).

ECON 8105 - Macroeconomic Theory (2.0 cr)
ECON 8106 - Macroeconomic Theory (2.0 cr)

Econometrics

All students must complete the following two courses (A-F only).

APEC
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
First Year Seminars
All students must complete the following two courses (S-N only).
APEC 8901 - Graduate Seminar: MS & PhD (1.0 cr)
APEC 8902 - Graduate Research Development Seminar (1.0 cr)

Second Year Seminars
All students must complete the following two courses (S-N only).
APEC 8903 - PhD Qualifying Paper Seminar I (1.0 cr)
APEC 8904 - PhD Qualifying Paper Seminar II (1.0 cr)

Electives
(A-F only). Up to six credits of 8-level ECON courses (excluding micro theory, macro theory, 8105 and 8106) may be accepted as electives.
Take 18 or more credit(s) from the following:
• APEC 8202 - Mathematical Optimization in Applied Economics (3.0 cr)
• APEC 8203 - Applied Welfare Economics and Public Policy (3.0 cr)
• APEC 8206 - Dynamic Optimization: Applications in Economics and Management (3.0 cr)
• APEC 8341 - Applied Public Finance (3.0 cr)
• APEC 8401 - Consumer Behavior and Household Economics (2.0 cr)
• APEC 8402 - Information and Behavioral Economics (2.0 cr)
• APEC 8403 - Consumer Theory and Demand Analysis (3.0 cr)
• APEC 8501 - Labor Economics I (2.0 cr)
• APEC 8502 - Labor Economics II (2.0 cr)
• APEC 8601 - Natural Resource Economics (3.0 cr)
• APEC 8602 - Economics of the Environment (3.0 cr)
• APEC 8701 - Trade and Development I (2.0 cr)
• APEC 8702 - Trade and Development II (2.0 cr)
• APEC 8703 - Trade and Development III (2.0 cr)
• APEC 8704 - Trade and Development IV (2.0 cr)
• APEC 8801 - Applied Production Theory (3.0 cr)
• APEC 8803 - Marketing Economics (3.0 cr)
• APEC 8804 - Managerial Economics (3.0 cr)
• ECON 8119 - Cooperative Game Theory (2.0 cr)
• ECON 8205 - Applied Econometrics (2.0 cr)
• ECON 8206 - Applied Econometrics (2.0 cr)
• ECON 8207 - Applied Econometrics (2.0 cr)
• ECON 8208 - Applied Econometrics (2.0 cr)
• ECON 8401 - International Trade and Payments Theory (2.0 cr)
• ECON 8402 - International Trade and Payments Theory (2.0 cr)
• ECON 8403 - International Trade and Payments Theory (2.0 cr)
• ECON 8501 - Wages and Employment (2.0 cr)
• ECON 8502 - Wages and Employment (2.0 cr)
• ECON 8503 - Wages and Employment (2.0 cr)
• ECON 8581 - Advanced Topics in Labor Economics (2.0 cr)
• ECON 8601 - Industrial Organization and Government Regulation (2.0 cr)
• ECON 8602 - Industrial Organization and Government Regulation (2.0 cr)
• ECON 8603 - Industrial Organization and Government Regulation (2.0 cr)
• ECON 8701 - Monetary Economics (2.0 cr)
• ECON 8702 - Monetary Economics (2.0 cr)
• ECON 8704 - Financial Economics (2.0 cr)
• ECON 8705 - Financial Economics (2.0 cr)
• ECON 8801 - Public Economics (2.0 cr)
• ECON 8803 - Public Economics (2.0 cr)
• HRIR 8801 - Core Seminar: Fundamentals of Economic Analysis for Work and Organizations (4.0 cr)
• PA 8302 - Applied Policy Analysis (4.0 cr)
• PA 8312 - Analysis of Discrimination (4.0 cr)
• PA 8331 - Economic Demography (3.0 cr)
• PUBH 6832 - Economics of the Health Care System (3.0 cr)
• PUBH 8811 - Research Methods in Health Care (3.0 cr)
• PUBH 8821 - Health Economics II (3.0 cr)
• APEC 8221 - Programming for Econometrics (2.0 cr)
• APEC 8222 - Big Data Methods in Economics (2.0 cr)

Doctoral Thesis Credits
Students must enroll for a minimum of 24 thesis credits. Take 24 or more credit(s) from the following:
• APEC 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Applied Plant Sciences M.S.
Agronomy & Plant Genetics, Horticultural Science
College of Food, Agricultural and Natural Resource Sciences

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Applied Plant Sciences is an interdisciplinary program for educating students to become professional scientists well grounded in the applied disciplines of agronomy/agroecology, horticulture, and plant breeding/molecular genetics. Graduates of the program are able to provide innovative leadership and contribute to problem solving within their disciplines in the public or private sector and within society at large. The program develops the quantitative and qualitative research skills necessary to conduct high quality research and scholarship. Students choose from among four specialization tracks: agronomy/agroecology, applied plant sciences, horticulture, or plant breeding/plant molecular genetics. Students gain broad familiarity with all of the disciplines within the program and gain in-depth knowledge within their area of expertise. The program's graduate faculty is drawn primarily from the Department of Agronomy and Plant Genetics and the Department of Horticultural Science; but also from the Departments of Plant and Microbial Biology; Plant Pathology; Soil, Water, and Climate; Ecology, Evolution and Behavior; and Fisheries, Wildlife and Conservation Biology. The faculty embrace the University of Minnesota's position that promoting and supporting diversity among the student body is central to our academic mission.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students entering the program should have a foundation in the physical and biological sciences, preferably with some emphasis in plant science. A minimum of 10 credits of math and physics, 12 credits of chemistry and biochemistry, and 15 credits of biological and/or agricultural sciences are recommended for admission. In addition, students should have completed a BS or BA degree in agriculture, biology, or other related life science. Students with a BS or BA degree outside these areas may be admitted with the requirement that they take the prerequisite courses noted above at the undergraduate level in addition to their graduate coursework.

Special Application Requirements:
Applicants must submit scores from the General (Aptitude) Test of the GRE; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of transcripts; and a clearly written personal statement of career interests, goals, and objectives as part of the online application. Students should apply by December 5 for admission into fall semester of the following year. Students should apply by October 1 for admission into spring semester of the following year.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  - IELTS
    - Total Score: 6.5
  - MELAB
    - Final score: 550

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A**: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B**: Plan B requires 30 major credits and up to null credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project**: Determined in consultation with advisor.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

MS students must complete the core curriculum, requirements for their specialization track, and present one graduate seminar. Additional course requirements are flexible and determined in consultation with the students advisor(s) and advisory committee.

**Required Courses**

- AGRO 5311 - Research Methods in Crop Improvement and Production (1.0 cr)
- APSC 8270 - Graduate Seminar (2.0 cr)
- APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)

At least 3 credits of graduate-level statistics

- AGRO 5121 - Applied Experimental Design (4.0 cr)
- or BIOL 5272 - Applied Biostatistics (4.0 cr)
- or ENT 5126 - Spatial and Temporal Analysis of Ecological Data (3.0 cr)
- or ESPM 5211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)
- or FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
- or GIS 5555 - Basic Spatial Analysis (3.0 cr)
- or NR 5021 - Statistics for Agricultural and Natural Resource Professionals (3.0 cr)
- or PUBH 6450 - Biostatistics I (4.0 cr)
- or STAT 5021 - Statistical Analysis (4.0 cr)
- or STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
- or STAT 5302 - Applied Regression Analysis (4.0 cr)
- or STAT 5303 - Designing Experiments (4.0 cr)
- or STAT 5401 - Applied Multivariate Methods (3.0 cr)
- or STAT 5421 - Analysis of Categorical Data (3.0 cr)
- or STAT 5601 - Nonparametric Methods (3.0 cr)

**Plan A Thesis Credits**

Plan A students must take at least 10 master's thesis credits.

- APSC 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Program Sub-plans

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

**Agronomy and Agroecology**
Students conduct research to increase their knowledge of cropping systems and weed science, including alternative approaches and management strategies. Emphasis is on improving production efficiency and profitability in an environmentally sound approach that benefits society. Mechanisms of crop physiology and ecology underlying plant responses to the environment are a particular emphasis of this track.

In addition to the APS core curriculum, students pursuing the Agronomy and Agroecology specialization track must complete remaining MS credit requirements, which will include 14 credits with at least two agroecology/agronomy courses, one plant biology course, and one additional course. Other specialization courses can be substituted with agreement of the advisor, the advisory committee, and director of graduate studies.

**Agroecology/Agronomy Courses**

Students must complete two courses from this group
- AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)
- AGRO 4605 - Strategies for Agricultural Production and Management (3.0 cr)
- AGRO 5021 - Plant Breeding Principles (3.0 cr)
- AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
- AGRO 5999 - Special Topics: Workshop in Agronomy (1.0 - 6.0 cr)
- APSC 8201 - Advanced Plant Breeding (3.0 cr)
- APSC 8280 - Current Topics in Applied Plant Sciences (1.0 - 3.0 cr)
- GCC 5017 - World Food Problems: Agronomics, Economics and Hunger [GP] (3.0 cr)
- SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)

**Plant Biology**

Students must complete one course in plant biology such as:
- PMB 5516 - Plant Cell Biology (3.0 cr)
- PMB 5412 - Plant Physiology (3.0 cr)
- PMB 5601 - Topics in Plant Biochemistry (3.0 cr)

**Suggested Additional Courses**

Students must take at least one course from the following courses
- BIOL 5407 - Ecology (3.0 cr)
- EEB 4068 - Plant Physiological Ecology (3.0 cr)
- EEB 5053 - Ecology: Theory and Concepts (4.0 cr)
- EEB 5609 - Ecosystem Ecology (3.0 cr)
- ESPM 5108 - Ecology of Managed Systems (4.0 cr)
- ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
- ESPM 5609 - GIS in Environmental Science and Management (4.0 cr)
- HORT 4071W - Applications of Biotechnology to Plant Improvement [WI] (4.0 cr)
- HORT 5071 - Ecological Restoration (4.0 cr)
- PLPA 5103 - Plant-Microbe Interactions (3.0 cr)
- PLPA 5202 - Field Plant Pathology (2.0 cr)
- PLPA 5480 - Principles of Plant Pathology (3.0 cr)
- PLPA 5660 - Plant Disease Resistance and Applications (3.0 cr)
- SOIL 4111 - Introduction to Precision Agriculture (3.0 cr)
- SOIL 5611 - Soil Biology and Fertility (4.0 cr)

**Horticulture**

Students conduct research related to fruits, vegetables, potatoes, flowers, ornamental trees and shrubs, or turf; on the physiology, production, environmental impact of cropping systems; and use of horticultural crops. Research areas include the effect of horticultural commodities on human health, hormonal, and stress physiology; flower development and flowering physiology; integrated pest management; post harvest physiology; and cropping system strategies. Students get a broad range of experiences in the field, greenhouse, and/or laboratory using genetic, molecular, biochemical, and ecological tools to answer research questions.

In addition to the APS core curriculum, students pursuing the horticulture specialization track must complete 14 credits in Areas 1, 2 and 3; with at least one course in Area 1 and at least one course in Area 2.

**Area 1: Cross Commodity Horticulture**

Students must complete at least one course in Area 1.
- AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)
- AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
- HORT 4071W - Applications of Biotechnology to Plant Improvement [WI] (4.0 cr)
- HORT 4461 - Horticultural Marketing (3.0 cr)
- HORT 4850 - Pollinator Protection in Managed Landscapes (3.0 cr)
- HORT 5007 - Advanced Plant Propagation (3.0 cr)
or HORT 5023 - Public Garden Management (2.0 cr)
or HORT 8280 - Current Topics in Applied Plant Sciences (1.0 cr)
or MBA 6210 - Marketing Management (3.0 cr)
or MKTG 6051 - Marketing Research (4.0 cr)
or MKTG 6055 - Buyer Behavior (4.0 cr)
or MKTG 6082 - Brand Strategy (2.0 cr)
or SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)

Area 2: Commodity-based Horticulture
Students must complete at least one course in Area 2.
HORT 4061W - Turfgrass Management [WI] (3.0 cr)
or HORT 4063 - Turfgrass Science (3.0 cr)
or HORT 5011 - Common Medicinal Plants: Classification, Identification, and Application (3.0 cr)
or HORT 5012 - Common Medicinal Plants: Growing and Processing (3.0 cr)
or HORT 5031 - Fruit Production and Viticulture for Local and Organic Markets (3.0 cr)
or HORT 5032 - Organic Vegetable Production (3.0 cr)
or HORT 5061 - Advanced Turfgrass Science (2.0 cr)
or HORT 5071 - Ecological Restoration (4.0 cr)

Area 3: Additional Coursework
Courses other than those listed below can be substituted with agreement of the advisor, advisory committee, and director of graduate studies.
AGRO 5021 - Plant Breeding Principles (3.0 cr)
or AGRO 8023 - Evolution of Crop Plants (3.0 cr)
or APSC 8201 - Advanced Plant Breeding (3.0 cr)
or BIOL 5407 - Ecology (3.0 cr)
or EEB 4068 - Plant Physiological Ecology (3.0 cr)
or EEB 5053 - Ecology: Theory and Concepts (4.0 cr)
or EEB 5609 - Ecosystem Ecology (3.0 cr)
or ESPM 5108 - Ecology of Managed Systems (4.0 cr)
or ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
or ESPM 5295 - GIS in Environmental Science and Management (4.0 cr)
or HORT 5058 - Plant Cytogenetics (2.0 cr)
or HORT 5059 - Plant Cytogenetics Lab (1.0 cr)
or PLPA 5103 - Plant-Microbe Interactions (3.0 cr)
or PLPA 5202 - Field Plant Pathology (2.0 cr)
or PLPA 5480 - Principles of Plant Pathology (3.0 cr)
or PLPA 5660 - Plant Disease Resistance and Applications (3.0 cr)
or PMB 5412 - Plant Physiology (3.0 cr)
or PMB 5516 - Plant Cell Biology (3.0 cr)
or PMB 5601 - Topics in Plant Biochemistry (3.0 cr)
or SOIL 4111 - Introduction to Precision Agriculture (3.0 cr)
or SOIL 5611 - Soil Biology and Fertility (4.0 cr)

Plant Breeding/Plant Molecular Genetics
This track allows students to select from genetic research projects ranging from applied plant breeding projects emphasizing breeding procedures and methodologies to molecular genetic projects doing biotechnology, genetic engineering, and genomic research in agronomic and horticultural crops. These research projects give students the opportunity to integrate the latest developments in the laboratory with applied applications in the field to reach the overarching goal of developing new germplasm that will improve the sustainability of our food/feed/fiber/fuel systems.

In addition to the APS core curriculum, students pursuing the plant breeding and plant molecular genetics specialization track must complete remaining MS credit requirements, which will include at least one course from plant breeding, at least two courses from genetics and genomics, with any additional credits determined in consultation with the students advisor and advisory committee.

Plant Breeding
Take at least one course from the following:
AGRO 5021 - Plant Breeding Principles (3.0 cr)
or APSC 8201 - Advanced Plant Breeding (3.0 cr)
or AGRO 8202 - Breeding for Quantitative Traits in Plants (3.0 cr)

Genetics and Genomics
Take at least two courses from the following:
AGRO 5431 - Applied Plant Genomics and Bioinformatics (3.0 cr)
or AGRO 8023 - Evolution of Crop Plants (3.0 cr)
or AGRO 8241 - Chromosomal and Molecular Genetics of Plant Improvement (3.0 cr)
or EEB 5042 - Quantitative Genetics (3.0 cr)
or HORT 5058 - Plant Cytogenetics (2.0 cr)
or HORT 5059 - Plant Cytogenetics Lab (1.0 cr)

Other suggested courses
Courses other than those listed below can be substituted with approval of the advisor, advisory committee, and director of graduate studies.

AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
AGRO 5999 - Special Topics: Workshop in Agronomy (1.0 - 6.0 cr)
HORT 5011 - Common Medicinal Plants: Classification, Identification, and Application (3.0 cr)
HORT 5012 - Common Medicinal Plants: Growing and Processing (3.0 cr)
HORT 5023 - Public Garden Management (2.0 cr)
HORT 5031 - Fruit Production and Viticulture for Local and Organic Markets (3.0 cr)
HORT 5032 - Organic Vegetable Production (3.0 cr)
HORT 5071 - Ecological Restoration (4.0 cr)
SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)
AGRO 5121 - Applied Experimental Design (4.0 cr)
ANSC 5200 - Statistical Genetics and Genomics (4.0 cr)
BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
CSCI 4041 - Algorithms and Data Structures (4.0 cr)
CSCI 4048 - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
CSCI 5980 - Special Topics in Computer Science (1.0 - 3.0 cr)
PMB 5412 - Plant Physiology (3.0 cr)
PLPA 5103 - Plant-Microbe Interactions (3.0 cr)
PLPA 5202 - Field Plant Pathology (2.0 cr)
PLPA 5203 - Introduction to Fungal Biology (3.0 cr)
PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
PLPA 5480 - Principles of Plant Pathology (3.0 cr)
PLPA 5660 - Plant Disease Resistance and Applications (3.0 cr)
PLPA 58103 - Plant-Microbe Interactions (3.0 cr)
PLPA 58104 - Plant Virology (2.0 cr)
PLPA 8105 - Plant Bacteriology (2.0 cr)
AGRO 5121 - Applied Experimental Design (4.0 cr)
AGRO 5021 - Plant Breeding Principles (3.0 cr)
AGRO 5431 - Applied Plant Genomics and Bioinformatics (3.0 cr)
AGRO 8023 - Evolution of Crop Plants (3.0 cr)
AGRO 8202 - Breeding for Quantitative Traits in Plants (3.0 cr)
AGRO 8241 - Chromosomal and Molecular Genetics of Plant Improvement (3.0 cr)

Applied Plant Sciences
Students who choose to complete the Applied Plant Sciences track must complete the APS core curriculum; at least one course from the areas of genetics and plant breeding, organismal biology, and cropping systems, communities, and commodities; and any remaining credits to meet MS credit requirements.

Genetics and Plant Breeding
Take at least one course from the following:
AGRO 5021 - Plant Breeding Principles (3.0 cr)
AGRO 5431 - Applied Plant Genomics and Bioinformatics (3.0 cr)
AGRO 8023 - Evolution of Crop Plants (3.0 cr)
AGRO 8202 - Breeding for Quantitative Traits in Plants (3.0 cr)
AGRO 8241 - Chromosomal and Molecular Genetics of Plant Improvement (3.0 cr)
or APSC 8201 - Advanced Plant Breeding (3.0 cr)
or EEB 5042 - Quantitative Genetics (3.0 cr)
or GCD 4034 - Molecular Genetics and Genomics (3.0 cr)
or GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
or HORT 4071W - Applications of Biotechnology to Plant Improvement [WI] (4.0 cr)
or HORT 5058 - Plant Cytogenetics (2.0 cr)
or HORT 5059 - Plant Cytogenetics Lab (1.0 cr)
or PLPA 5301 - Large Scale Omic Data in Plant Biology (3.0 cr)

Organismal Biology
Take at least one course from the following:
HORT 5007 - Advanced Plant Propagation (3.0 cr)
or PLPA 5203 - Introduction to Fungal Biology (3.0 cr)
or PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
or PLPA 5480 - Principles of Plant Pathology (3.0 cr)
or PLPA 5660 - Plant Disease Resistance and Applications (3.0 cr)
or PLPA 8103 - Plant-Microbe Interactions (3.0 cr)
or PLPA 8104 - Plant Virology (2.0 cr)
or PLPA 8105 - Plant Bacteriology (2.0 cr)
or PMB 5412 - Plant Physiology (3.0 cr)
or PMB 5516 - Plant Cell Biology (3.0 cr)
or PMB 5601 - Topics in Plant Biochemistry (3.0 cr)

Cropping Systems, Communities, and Commodities
Take at least one course from the following:
AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)
or AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
or HORT 4062 - Turfgrass Weed and Disease Science (3.0 cr)
or HORT 4066 - Turfgrass Science (3.0 cr)
or HORT 4141W - Scheduling Crops for Protected Environments [WI] (4.0 cr)
or HORT 5031 - Fruit Production and Viticulture for Local and Organic Markets (3.0 cr)
or HORT 5032 - Organic Vegetable Production (3.0 cr)
or HORT 5071 - Ecological Restoration (4.0 cr)
or HORT 5131 - Student Organic Farm Planning, Growing, and Marketing (3.0 cr)
or PLPA 5202 - Field Plant Pathology (2.0 cr)
or PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
or SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)

Integrated BS Plant Science/MS APS Plant Breeding
CFANS offers an integrated Bachelor of Science (BS) in Plant Science and Master of Science (MS) in Applied Plant Sciences (Plant Breeding and Molecular Genetics track). The integrated BS/MS program offers students the opportunity to complete coursework for both degrees in five years by working toward a master's degree while simultaneously working toward their undergraduates degree.
Plant Science undergraduate students in the Plant Breeding and Genetics sub-plan are welcome to apply to this program during their 3rd year of undergraduate study. During the 4th year, students take undergraduate and graduate courses concurrently and are advised by an undergraduate and graduate program adviser. Students must complete undergraduate degree requirements before the end of their fourth year.

Students in this program will complete the 120 undergraduate credits required for a BS degree in Plant Science by the end of the 4th year and must be awarded an undergraduate degree at the 4th year mark or earlier. During the 4th and 5th years, students will complete 30 graduate credits and a Plan A or B research project with a final oral defense as required for the Applied Plant Sciences MS degree. Students cannot double-count credits to meet credit requirements for both the undergraduate and graduate degrees. At least one course must be taken from each of the Plant Breeding areas and at least two courses from the Genetics & Genomics area.
Additional course requirements are flexible and are determined in consultation with the student's advisor(s) and advisory committee.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 7
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor in applied plant sciences provides students in other fields an opportunity to gain knowledge and expertise in plant sciences at the molecular, organismal and community levels with applications to sustainable production of horticultural and agronomic crops. Applied Plant Sciences is an interdisciplinary program for educating students to become professional scientists well-grounded in the applied disciplines of agronomy/agroecology, horticulture, and plant breeding/molecular genetics. Graduates of the program are able to provide innovative leadership and contribute to problem solving within their disciplines in the public or private sector and within society at large.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students entering the program should have a foundation in the physical and biological sciences, preferably with some emphasis in plant science. A minimum of 10 credits of math and physics, 12 credits of chemistry and biochemistry, and 15 credits of biological and/or agricultural sciences are recommended for admission. In addition, students should have completed a BS or BA degree in agriculture, biology, or other related life science. Students with a BS or BA degree outside these areas may be admitted with the requirement that they take the prerequisite courses noted above at the undergraduate level in addition to their graduate coursework.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Coursework is determined in consultation with the Applied Plant Sciences director of graduate studies.

Required Course (1 Credit)
All students pursuing the applied plant sciences minor must complete one course from the following:
 APSC 8270 - Graduate Seminar (2.0 cr)
 or APSC 8280 - Current Topics in Applied Plant Sciences (1.0 - 3.0 cr)

Electives
Master's students select at least six credits, and doctoral students select at least eleven credits from the following:
 AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)

**Program Sub-plans**

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Masters**
Take at least six credits from the list of electives, in consultation with the applied plant sciences director of graduate studies, to complete the 7-credit minimum. Electives will be chosen from courses on genetics and plant breeding; organismal biology; or cropping systems, communities, and commodities.

**Doctoral**
Take at least eleven credits from the list of electives, in consultation with the applied plant sciences director of graduate studies, to complete the 12-credit minimum. Electives will be chosen from courses on genetics and plant breeding; organismal biology; or cropping systems, communities, and commodities.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 54
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Applied plant sciences is an interdisciplinary program for educating students to become professional scientists well grounded in the applied disciplines of agronomy/agroecology, horticulture, and plant breeding/molecular genetics. Graduates of the program are able to provide innovative leadership and contribute to problem solving within their disciplines in the public or private sector and within society at large. The program develops the quantitative and qualitative research skills necessary to conduct high quality research and scholarship. Students choose from among four specialization tracks: agronomy/agroecology, applied plant sciences, horticulture, or plant breeding/plant molecular genetics. Students gain broad familiarity with all of the disciplines within the program and gain in-depth knowledge within their area of expertise. The program's graduate faculty is drawn primarily from the Department of Agronomy and Plant Genetics and the Department of Horticultural Science; but also from the Departments of Plant Biology; Plant Pathology; Soil, Water, and Climate; Ecology, Evolution and Behavior; and Fisheries, Wildlife and Conservation Biology. The faculty embrace the University of Minnesota's position that promoting and supporting diversity among the student body is central to our academic mission.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students entering the program should have a foundation in the physical and biological sciences, preferably with some emphasis in plant science. A minimum of 10 credits of math and physics, 12 credits of chemistry and biochemistry, and 15 credits of biological and/or agricultural sciences are recommended for admission. In addition, students should have completed a BS or BA degree in agriculture, biology, or other related life science. Students with a BS or BA degree outside these areas may be admitted with the requirement that they take the prerequisite courses noted above at the undergraduate level in addition to their graduate coursework.

Special Application Requirements:
Applicants must submit scores from the General (Aptitude) Test of the GRE; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of official transcripts; and a clearly written personal statement of career interests, goals, and objectives as part of the online application. Students should apply by December 1 for admission into fall semester of the following year. Students should apply by October 1 for admission into spring semester of the following year.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
30 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

PhD students must complete the core curriculum, requirements for their specialization, and present one graduate seminar. Additional course requirements are flexible and determined in consultation with the students advisor(s) and advisory committee.

Required Courses
Take the following courses:
AGRO 5311 - Research Methods in Crop Improvement and Production (1.0 cr)
APSC 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
APSC 8270 - Graduate Seminar (2.0 cr)

Take one of the following courses:
AGRO 5121 - Applied Experimental Design (4.0 cr)
or BIOL 5272 - Applied Biostatistics (4.0 cr)
or ENT 5126 - Spatial and Temporal Analysis of Ecological Data (3.0 cr)
or ESPM 5211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)
or FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
or GIS 5555 - Basic Spatial Analysis (3.0 cr)
or NR 5021 - Statistics for Agricultural and Natural Resource Professionals (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
or STAT 5302 - Applied Regression Analysis (4.0 cr)
or STAT 5303 - Designing Experiments (4.0 cr)
or STAT 5401 - Applied Multivariate Methods (3.0 cr)
or STAT 5421 - Analysis of Categorical Data (3.0 cr)
or STAT 5601 - Nonparametric Methods (3.0 cr)

Take one of the following courses. Consult with the advisor regarding number of credits to take if APSC 8280 is selected.
APSC 8280 - Current Topics in Applied Plant Sciences (1.0 - 3.0 cr)
or SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)

Take one of the following courses:
GRAD 8101 - Teaching in Higher Education (3.0 cr)
or CFAN 8101 - Professional Skills for Scientists (2.0 cr)

Electives
Select courses, in consultation with the advisor, to complete 30 course credits.

Thesis Credits
Take at least 24 doctoral thesis credits.
APSC 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Agronomy and Agroecology
Students conduct research to increase their knowledge of cropping systems and weed science, including alternative approaches and management strategies. Emphasis is on improving production efficiency and profitability in an environmentally sound approach that benefits society. Mechanisms of crop physiology and ecology underlying plant responses to the environment are a particular emphasis of this track.

Students pursuing the agroecology/agronomy specialization track must complete at least two agroecology/agronomy courses, one plant biology course, and one ecology course.

Courses listed within agroecology/agronomy, plant biology, and ecology/plant pathology/soil science groups are provided as a guide for students and faculty. Other specialization courses can be substituted with agreement of the advisor, the advisory committee, and director of graduate studies.

Agronomy/Agroecology
Take two courses from the following list. Consult with advisor to determine number of credits to take if AGRO 5999 is selected.
AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)
or AGRO 4605 - Strategies for Agricultural Production and Management (3.0 cr)
or AGRO 5021 - Plant Breeding Principles (3.0 cr)
or AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
or AGRO 5999 - Special Topics: Workshop in Agronomy (1.0 - 6.0 cr)
or APSC 8201 - Advanced Plant Breeding (3.0 cr)
or SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)

Plant Biology
Take one of the following courses or another course selected in consultation with the advisor:
PMB 5516 - Plant Cell Biology (3.0 cr)
or PMB 5412 - Plant Physiology (3.0 cr)

Ecology/Plant Pathology/Soil Science
Take at least one course from the following list:
BIOL 5407 - Ecology (3.0 cr)
or EEB 4068 - Plant Physiological Ecology (3.0 cr)
or EEB 5053 - Ecology: Theory and Concepts (4.0 cr)
or EEB 5609 - Ecosystem Ecology (3.0 cr)
or ESPM 5108 - Ecology of Managed Systems (4.0 cr)
or ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
or ESPM 5295 - GIS in Environmental Science and Management (4.0 cr)
or HORT 4071W - Applications of Biotechnology to Plant Improvement [WI] (4.0 cr)
or HORT 5071 - Ecological Restoration (4.0 cr)
or PLPA 5103 - Plant-Microbe Interactions (3.0 cr)
or PLPA 5202 - Field Plant Pathology (2.0 cr)
or PLPA 5480 - Principles of Plant Pathology (3.0 cr)
or PLPA 5660 - Plant Disease Resistance and Applications (3.0 cr)
or SOIL 4111 - Introduction to Precision Agriculture (3.0 cr)
or SOIL 5611 - Soil Biology and Fertility (4.0 cr)

Horticulture
Students conduct research related to fruits, vegetables, potatoes, flowers, ornamental trees and shrubs, or turf; and on the physiology, production, environmental impact of cropping systems, and use of horticultural crops. Research areas include the effect of horticultural commodities on human health, hormonal, and stress physiology; flower development and flowering physiology; integrated pest management; post harvest physiology; and cropping system strategies. Students get a broad range of experiences in the field, greenhouse, and/or laboratory using genetic, molecular, biochemical, and ecological tools to answer research questions.

Students pursuing the PhD with a horticulture specialization track must take at least one course from each area; four courses in total from Areas 1 and 2.

Area 1 - Cross Commodity Horticulture
Students must complete at least one Area 1 course.
HORT 4071W - Applications of Biotechnology to Plant Improvement [WI] (4.0 cr)
or AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)
or HORT 4461 - Horticultural Marketing (3.0 cr)

Area 2 - Specialty Horticulture
Students must complete at least one Area 2 course.
HORT 5071 - Ecological Restoration (4.0 cr)
or PLPA 5103 - Plant-Microbe Interactions (3.0 cr)
or PLPA 5202 - Field Plant Pathology (2.0 cr)
or PLPA 5480 - Principles of Plant Pathology (3.0 cr)
or PLPA 5660 - Plant Disease Resistance and Applications (3.0 cr)
or SOIL 4111 - Introduction to Precision Agriculture (3.0 cr)
or SOIL 5611 - Soil Biology and Fertility (4.0 cr)
or HORT 4850 - Pollinator Protection in Managed Landscapes (3.0 cr)
or HORT 5007 - Advanced Plant Propagation (3.0 cr)
or HORT 5023 - Public Garden Management (2.0 cr)
or AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
or MKTG 6051 - Marketing Research (4.0 cr)
or MKTG 6055 - Buyer Behavior (4.0 cr)
or MKTG 6082 - Brand Strategy (2.0 cr)
or MBA 6210 - Marketing Management (3.0 cr)
or HORT 8044 - Manipulation of Plant Growth and Reproduction (2.0 cr)

Area 2 - Commodity-based Horticulture
Students must complete at least one Area 2 course.
HORT 4062 - Turfgrass Weed and Disease Science (3.0 cr)
or HORT 4063 - Turfgrass Science (3.0 cr)
or HORT 5011 - Common Medicinal Plants: Classification, Identification, and Application (3.0 cr)
or HORT 5012 - Common Medicinal Plants: Growing and Processing (3.0 cr)
or HORT 5031 - Fruit Production and Viticulture for Local and Organic Markets (3.0 cr)
or HORT 5032 - Organic Vegetable Production (3.0 cr)
or HORT 5061 - Advanced Turfgrass Science (2.0 cr)
or HORT 5071 - Ecological Restoration (4.0 cr)

Area 3 - Related Fields
Students must complete at least one Area 3 course. Courses other than those listed below can be substituted with agreement of the advisor, advisory committee, and director of graduate studies.
AGRO 5021 - Plant Breeding Principles (3.0 cr)
or AGRO 8023 - Evolution of Crop Plants (3.0 cr)
or APSC 8201 - Advanced Plant Breeding (3.0 cr)
or BIOL 5407 - Ecology (3.0 cr)
or EEB 4068 - Plant Physiological Ecology (3.0 cr)
or EEB 5053 - Ecology: Theory and Concepts (4.0 cr)
or EEB 5609 - Ecosystem Ecology (3.0 cr)
or ESPM 5108 - Ecology of Managed Systems (4.0 cr)
or ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
or ESPM 5295 - GIS in Environmental Science and Management (4.0 cr)
or HORT 5058 - Plant Cytogenetics (2.0 cr)
or HORT 5059 - Plant Cytogenetics Lab (1.0 cr)
or HORT 8201 - Advanced Plant Breeding (3.0 cr)
or PMB 5412 - Plant Physiology (3.0 cr)
or PMB 5516 - Plant Cell Biology (3.0 cr)
or PMB 5601 - Topics in Plant Biochemistry (3.0 cr)
or PLPA 5103 - Plant-Microbe Interactions (3.0 cr)
or PLPA 5202 - Field Plant Pathology (2.0 cr)
or PLPA 5480 - Principles of Plant Pathology (3.0 cr)
or PLPA 5660 - Plant Disease Resistance and Applications (3.0 cr)
or SOIL 4111 - Introduction to Precision Agriculture (3.0 cr)
or SOIL 5611 - Soil Biology and Fertility (4.0 cr)

Plant Breeding and Plant Molecular Genetics
This track allows students to select from genetic research projects ranging from applied plant breeding projects emphasizing breeding procedures and methodologies to molecular genetic projects doing biotechnology, genetic engineering, and genomic research in agronomic and horticultural crops. These research projects give students the opportunity to integrate the latest developments in the laboratory with applied applications in the field to reach the overarching goal of developing new germplasm that will improve the sustainability of our food/feed/fiber/fuel systems.

Students pursuing the PhD with a plant breeding and plant molecular genetics track must complete at least one course from the Plant Breeding area and at least two courses from the Genetics & Genomics area. PhD students are required to complete a minimum of 30 course credits including the program-wide required courses.

Plant Breeding
Take at least one course from the following:
AGRO 5021 - Plant Breeding Principles (3.0 cr)
or AGRO 8202 - Breeding for Quantitative Traits in Plants (3.0 cr)
or APSC 8201 - Advanced Plant Breeding (3.0 cr)

Genetics and Genomics
Take at least one course from the following:
AGRO 5431 - Applied Plant Genomics and Bioinformatics (3.0 cr)
or AGRO 8023 - Evolution of Crop Plants (3.0 cr)
or AGRO 8241 - Chromosomal and Molecular Genetics of Plant Improvement (3.0 cr)
or EEB 5042 - Quantitative Genetics (3.0 cr)
or GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
or HORT 5058 - Plant Cytogenetics (2.0 cr)
or HORT 5059 - Plant Cytogenetics Lab (1.0 cr)

Other Suggested Courses
Courses other than those listed below can be substituted with approval of the advisor, advisory committee, and director of graduate studies.

**Agroecology and Cropping Systems**
Consult with the advisor regarding number of credits to take if AGRO 5999 is selected.
AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
or AGRO 5999 - Special Topics: Workshop in Agronomy (1.0 - 6.0 cr)
or HORT 5011 - Common Medicinal Plants: Classification, Identification, and Application (3.0 cr)
or HORT 5012 - Common Medicinal Plants: Growing and Processing (3.0 cr)
or HORT 5023 - Public Garden Management (2.0 cr)
or HORT 5031 - Fruit Production and Viticulture for Local and Organic Markets (3.0 cr)
or HORT 5032 - Organic Vegetable Production (3.0 cr)
or HORT 5071 - Ecological Restoration (4.0 cr)

**Biochemistry**
BIOC 8001 - Biochemistry: Structure, Catalysis, and Metabolism (3.0 cr)
or BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
or PMB 5601 - Topics in Plant Biochemistry (3.0 cr)

**Biotechnology/Genetics/Genomics**
GCD 4034 - Molecular Genetics and Genomics (3.0 cr)
or GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
or HORT 4071W - Applications of Biotechnology to Plant Improvement [WI] (4.0 cr)
or HORT 5007 - Advanced Plant Propagation (3.0 cr)
or PLPA 5301 - Large Scale Omic Data in Plant Biology (3.0 cr)

**Computational Biology/Bioinformatics**
Consult with the advisor regarding number of credits to take if CSCI 5980 is selected.
BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
or CSCI 4041 - Algorithms and Data Structures (4.0 cr)
or CSCI 5461 - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
or CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
or CSCI 5980 - Special Topics in Computer Science (1.0 - 3.0 cr)

**Evolution**
EEB 5221 - Molecular Evolution (3.0 cr)

**Physiology**
PMB 5412 - Plant Physiology (3.0 cr)
or PMB 5516 - Plant Cell Biology (3.0 cr)

**Plant Pathology**
PLPA 5202 - Field Plant Pathology (2.0 cr)
or PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
or PLPA 5480 - Principles of Plant Pathology (3.0 cr)
or PLPA 5660 - Plant Disease Resistance and Applications (3.0 cr)
or PLPA 8103 - Plant-Microbe Interactions (3.0 cr)
or PLPA 8104 - Plant Virology (2.0 cr)
or PLPA 8105 - Plant Bacteriology (2.0 cr)

**Applied Plant Sciences**
Students who choose to pursue the PhD without a specialization track must complete the APS required core curriculum and at least one course from these three areas: genetics and plant breeding; organismal biology; and cropping systems, communities, and commodities.

**Genetics and Plant Breeding**
Take at least one course from the following:
AGRO 5021 - Plant Breeding Principles (3.0 cr)
or APSC 8201 - Advanced Plant Breeding (3.0 cr)
or EEB 5042 - Quantitative Genetics (3.0 cr)
or GCD 4034 - Molecular Genetics and Genomics (3.0 cr)
or GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
or HORT 5058 - Plant Cytogenetics (2.0 cr)
or HORT 5059 - Plant Cytogenetics Lab (1.0 cr)
or PLPA 5301 - Large Scale Omic Data in Plant Biology (3.0 cr)

Organismal Biology
Take at least one course from the following:
HORT 5007 - Advanced Plant Propagation (3.0 cr)
or HORT 8044 - Manipulation of Plant Growth and Reproduction (2.0 cr)
or PMB 5412 - Plant Physiology (3.0 cr)
or PMB 5516 - Plant Cell Biology (3.0 cr)
or PMB 5601 - Topics in Plant Biochemistry (3.0 cr)
or PLPA 5103 - Plant-Microbe Interactions (3.0 cr)
or PLPA 8103 - Plant-Microbe Interactions (3.0 cr)
or PLPA 5203 - Introduction to Fungal Biology (3.0 cr)
or PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
or PLPA 5480 - Principles of Plant Pathology (3.0 cr)
or PLPA 5560 - Plant Disease Resistance and Applications (3.0 cr)
or PLPA 8104 - Plant Virology (2.0 cr)
or PLPA 8105 - Plant Bacteriology (2.0 cr)

Cropping Systems, Communities, and Commodities
Take at least one course from the following:
AGRO 4505 - Biology, Ecology, and Management of Invasive Plants (3.0 cr)
or AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
or HORT 4062 - Turfgrass Weed and Disease Science (3.0 cr)
or HORT 4063 - Turfgrass Science (3.0 cr)
or HORT 4141W - Scheduling Crops for Protected Environments [WI] (4.0 cr)
or HORT 5031 - Fruit Production and Viticulture for Local and Organic Markets (3.0 cr)
or HORT 5032 - Organic Vegetable Production (3.0 cr)
or HORT 5071 - Ecological Restoration (4.0 cr)
or HORT 5131 - Student Organic Farm Planning, Growing, and Marketing (3.0 cr)
or PLPA 5202 - Field Plant Pathology (2.0 cr)
or PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
or SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of science degree in the bioproducts and biosystems science engineering and management (BBSEM) graduate program provides a strong foundation in the basic sciences, engineering, and management in support of the renewable bio-resources utilization, environmental quality, and national security, while improving our global competitiveness. The areas of specialization include bioproducts science and engineering, biosystems science and engineering, and bioproducts marketing and management.

Bioproducts science and engineering specialization focuses on the fundamental science and engineering of the various manufacturing processes used in sustainable conversion of biomass into bio-based industrial and consumer products, and their effective end-use applications. Bioproducts include "green" materials, chemicals and energy derived from bio-resources, including biofuels, bioenergy, biocomposites, bio-based plastics, adhesives, pulp and paper, building materials, and more.

Biosystems science and engineering specialization is designed for students who seek to develop a strong foundation in physical sciences and engineering principles, which are applied to important problems involving biological systems. Potential areas of interest include water and soil management and protection; livestock environment; food engineering and value-added processing; machinery systems design; grain quality; safety, health, and risk management; renewable energy systems; and waste management.

Bioproducts marketing and management specialization is designed for graduate students who seek to build on a strong diverse background encompassing liberal arts, basic sciences, communications and product development, and marketing and management of bioproducts.

**Program Delivery**

This program is available:

- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:

Students seeking a master's degree should have a bachelor's degree in engineering, mathematics, the physical or biological sciences, or a related field from a recognized U.S. or international university. Applicants should have a performance level of at least a 3.0 GPA (on a 4.0 grading scale) on previous academic work required for a degree.

Applicants must submit their test score(s) from the following:

- GRE

International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Students complete a project that involves a total of about 120 hours of work, and write a Plan B paper on their project.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

All master's level students must take BBE 8013, Parameter Estimation (3 cr), unless they can demonstrate to the BBE 8013 instructor that they have already mastered the course material or can identify a suitable alternative.

Students and their advisors must include a letter of explanation if submitting a graduate degree plan that includes more than 4 credits of special problems or advanced problems coursework.

Required Courses

BBE 8001 - Seminar I (1.0 cr)
BBE 8002 - Seminar II (1.0 cr)
BBE 8013 - Parameter Estimation in Biosystems and Agricultural Engineering (3.0 cr)

Master's Plan A and Master's Plan B

Master's Plan A
Take at least 15 additional credits, in consultation with advisor and approved by the director of Graduate Studies. Students need to take a total of 10 thesis credits.

BBE 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Master's Plan B
Take an additional 25 credits, in consultation with advisor and approved by the director of Graduate Studies.

- Program Type: Doctorate  
- Requirements for this program are current for Fall 2018  
- Length of program in credits: 69  
- This program does not require summer semesters for timely completion.  
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The PhD offered by the bioproducts and biosystems science engineering and management (BBSEM) graduate program provides a strong foundation in the basic sciences, engineering, and management in support of the renewable bio-resources utilization, environmental quality, and national security while improving our global competitiveness. The areas of specialization include bioproducts science and engineering, biosystems science and engineering, and bioproducts marketing and management.

Bioproducts science and engineering specialization focuses on the fundamental science and engineering of the various manufacturing processes used in the sustainable conversion of biomass into bio-based industrial and consumer products and their effective end-use applications. Bioproducts include "green" materials, chemicals and energy derived from bio-resources, including biofuels, bioenergy, biocomposites, bio-based plastics, adhesives, pulp and paper, building materials, and more.

Biosystems science and engineering specialization is designed for students who seek to develop a strong foundation in physical sciences and engineering principles, which are applied to important problems involving biological systems. Potential areas of interest include water and soil management and protection; livestock environment; food engineering and value-added processing; machinery systems design; grain quality; safety, health, and risk management; renewable energy systems; and waste management.

Bioproducts marketing and management specialization is designed for graduate students who seek to build on a strong, diverse background encompassing liberal arts, basic sciences, communications and product development, and marketing and management of bioproducts.

**Program Delivery**  
This program is available:  
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**  
The preferred undergraduate GPA for admittance to the program is 3.20.

Students seeking the PhD should have a bachelor's degree in engineering, mathematics, the physical or biological sciences, or a related field from a recognized U.S. or international university.

**Special Application Requirements:**  
Students seeking the PhD should also have a master's degree in engineering, mathematics, the physical or biological sciences, or a related field from a recognized U.S. or international university. Applicants should have a performance level on previous academic work required for a degree of at least a 3.2 GPA (on a 4.0 grading scale). Students expecting to pursue a PhD normally complete a master of science Plan A degree before starting their PhD programs. Exceptional students who want to go straight to the PhD from the bachelor's level may be admitted subject to conditions agreed upon by the advisor, the director of graduate studies, and the graduate program coordinator.

Applicants must submit their test score(s) from the following:  
- GRE
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5

- **MELAB**
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

### Program Requirements
36 credits are required in the major.

9 credits are required outside the major.

24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

All doctoral level students must take BBE 8001, Seminar I (1 cr), and BBE 8002, Seminar II (1 cr), and BBE 8013, Parameter Estimation (3 cr), unless they can demonstrate to the BBE 8013 instructor that they have already mastered the course material, or have justified the selection of a suitable alternative.

BBE 8001, BBE 8002, and BBE 8013, if taken at the master's level, count toward the PhD and do not have to be retaken.

The PhD in bioproducts and biosystems science engineering and management requires extended study and intense intellectual effort, conducting cutting-edge research and advancing the forefront of knowledge in the subject matter area. Students develop skills that enable them to define problems or research questions, plan research, conduct independent research and/or lead research efforts, analyze data, and effectively communicate research results to a variety of audiences.

All PhD degree programs must include a minimum of 45 graduate course credits beyond the B.S. degree, and a minimum of 24 doctoral thesis credits (BBE 8888). PhD degree programs should contain a minimum of 9 course credits in a concentrated area of scientific or theoretical development that is related to the student's research, and may contain up to 3 credits of enrichment courses.

### Required Courses

- **BBE 8001** - Seminar I (1.0 cr)
- **BBE 8002** - Seminar II (1.0 cr)
- **BBE 8013** - Parameter Estimation in Biosystems and Agricultural Engineering (3.0 cr)

### 31 Credits in Major Area of Study

31 credits in major area of study selected with advisor, and approved by the director of Graduate Studies. The student is encouraged to take up to 3 credits of enrichment courses, which are included in the 31-credit requirement.

### 9 Credits of Scientific or Mathematical Theoretical Development

9 credits of scientific or mathematical theoretical development that is related to the student's research, selected with advisor and approved by the director of Graduate Studies.

### 24 Thesis Credits

- **BBE 8888** - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Conservation Sciences M.S.
Fisheries, Wildlife, and Conservation Biology
College of Food, Agricultural and Natural Resource Sciences

Link to a list of faculty for this program.

Email: conssci@umn.edu
Website: http://www.consci.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The conservation sciences (CS) program has two complementary objectives leading to a unique multidisciplinary program. The first is to provide students with sound graduate training in the biological sciences relevant to the global conservation of plants, animals, and ecosystems. The second objective promotes the study of social, political, and economic sciences that relate to recognition and solution of conservation problems. Students may select one of the three tracks, 1) conservation science or 2) fisheries and aquatic biology or 3) wildlife ecology & management. Students may also pursue a joint degree in law and conservation sciences through the joint law degree program. The overall goal of the program is to prepare students to develop solutions or approaches to address problems that are scientifically and environmentally sound and likely to be acted upon or implemented within their social and political context.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A BS/BA degree in biology or a closely related field is preferred. Applicants with a baccalaureate degree in another field are accepted, but may be required to take selected courses in biology.

Special Application Requirements:
A statement of career goals and three letters of recommendation evaluating the applicant's potential for graduate study are required. Scores less than five years old from the General Test of the GRE are required. TOEFL is required for applicants who speak English as a second language. Applicants to the joint law degree program must also apply to the Law School. Application deadline is December 15. Typically, students only are admitted for fall semester.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80
- MN Batt
Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Plan B master's students must demonstrate familiarity with the tools of research or scholarship in their major field, the ability to work independently, and the ability to present the results of their investigation effectively, by completing at least one Plan B project. The Plan B project should involve a combined total of approximately 120 hours (the equivalent of three full-time weeks) of work. The advisory committee specifies both the nature and extent of the options available to satisfy this requirement, subject to approval by the director of graduate studies. The Plan B project must be satisfied independent of the courses in the student's program.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Core Course
Take the following course for 3 credits:
FW 8452 - Conservation Biology (3.0 cr)

Seminar Requirement
Take 2 semesters of CBIO 8001. Students in the fisheries and aquatic biology track may substitute one semester of CBIO 8001 with FW 8200.
Take 2 or more credit(s) from the following:
• CONS 8001 - Conservation Biology Seminar (1.0 cr)
• FW 8200 - Seminar (1.0 - 4.0 cr)

Statistics Requirement
Take at least one 3-credit statistics or systematics course from following list, or select other 5xxx- or 8xxx-level coursework in consultation with the advisory committee.
Take 3 or more credit(s) from the following:
• BIOL 5272 - Applied Biostatistics (4.0 cr)
• STAT 5021 - Statistical Analysis (4.0 cr)
• STAT 5302 - Applied Regression Analysis (4.0 cr)
• STAT 5303 - Designing Experiments (4.0 cr)
• STAT 5421 - Analysis of Categorical Data (3.0 cr)
• STAT 5601 - Nonparametric Methods (3.0 cr)
• FW 8051 - Statistical Modeling of Ecological Data using R and WinBugs/JAGS (4.0 cr)
• EEB 5371 - Principles of Systematics (3.0 cr)

Plan Options

Plan A
Take at least 10 master's thesis credits.
CONS 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B
Take an additional 10 elective course credits, chosen in consultation with the advisor. Coursework may be from the electives section of the chosen track, or other 5xxx- or 8xxx-level courses.

Joint- or Dual-degree Coursework: JD/Conservation Sciences-MSStudent may take a total of 12 credits in common among the academic programs.
Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Conservation Science
The conservation science track is available for students wishing to emphasize this concentration within the conservation sciences degree. The track provides structure and oversight for students interested in the interface of population, species, and ecosystem biology with disciplines of social sciences, education, economics. The conservation science track name will be posted to the transcript.

Conservation Science - Electives
Take at least 12 (Plan A) or at least 22 (Plan B) elective credits from the following list, or select other 5xxx- or 8xxx-level coursework in consultation with the advisory committee.

Take 12 or more credit(s) from the following:
- APEC 5151 - Applied Microeconomics: Firm and Household (3.0 cr)
- APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- EEB 4129 - Mammalogy (4.0 cr)
- EEB 4134 - Introduction to Ornithology (4.0 cr)
- EEB 5042 - Quantitative Genetics (3.0 cr)
- EEB 5327 - Behavioral Ecology (3.0 cr)
- EEB 5409 - Evolution (3.0 cr)
- EEB 5609 - Ecosystem Ecology (3.0 cr)
- ENT 5011 - Insect Structure and Function (4.0 cr)
- ENT 5041 - Insect Ecology (3.0 cr)
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- FNRM 5104 - Forest Ecology (4.0 cr)
- FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
- FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
- FNRM 5203 - Forest Fire and Disturbance Ecology (3.0 cr)
- FNRM 5204 - Landscape Ecology and Management (3.0 cr)
- FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
- FW 5003 - Human Dimensions of Biological Conservation (3.0 cr)
- FW 5051 - Analysis of Populations (4.0 cr)
- FW 5603W - Habitats and Regulation of Wildlife [WI] (3.0 cr)
- FW 5625 - Wildlife Handling and Immobilization for Research and Management (2.0 cr)
- GEOG 8280 - Biogeography (3.0 cr)
- HORT 5071 - Ecological Restoration (4.0 cr)
- LA 5202 - Landscape Analysis Workshop (1.0 cr)
- LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
- PA 5251 - Strategic Planning and Management (3.0 cr)
- PA 5253 - Designing Planning and Participation Processes (3.0 cr)
- PA 5501 - Theories and Policies of Development (3.0 cr)
- PA 5511 - Community Economic Development (3.0 cr)
- VMED 5181 - Spatial Analysis in Infectious Disease Epidemiology (3.0 cr)

Fisheries and Aquatic Biology
Three-quarters of the global ecosystem is water and most is a global commons. Many biologists and economists argue that freshwater is one of the most critical global resources and that the functional integrity and biodiversity within freshwater and marine ecosystems are highly threatened. The fisheries and aquatic biology (FAB) track is available for MS, PhD, and joint degree students wishing to emphasize this concentration. The track name will be posted to the transcript, and may be useful to the graduate for obtaining jobs with many federal and state agencies where such expertise is specified in job announcements or hiring criteria. The track designation clearly indicates that the student has specialized coursework and research or project experience leading to expertise in fisheries or aquatic biology. Combined with a typical undergraduate degree in biology or natural resource science, careful selection of courses in the graduate program will satisfy the educational requirements for professional certification by the American Fisheries Society.

Students in the track must be advised or co-advised by a faculty member affiliated with the track. Requests for admission to the track may be made during the application process or at any time after the student is admitted to conservation sciences. Students in the track must meet all MS degree requirements.

Students who designate this track will be expected to work closely with their Student Advisory Committee (SAC) to develop an appropriate course of study. The track coordinator will review each student’s academic program to examine how track expectations are met and forward it with a recommendation to the director of graduate studies for approval.

Fisheries & Aquatic Biology - Required Courses
Take a minimum of 6 credits from the following list. Other advanced courses or colloquia on fisheries or aquatic biology, not listed...
here, may satisfy track requirements; consult with the track coordinator.
Take 6 or more credit(s) from the following:
• EEB 5601 - Limnology (3.0 cr)
• EEB 5605 - Limnology Laboratory (2.0 cr)
• EEB 8601 - Introduction to Stream Restoration (3.0 cr)
• EEB 8602 - Stream Restoration Practice (2.0 cr)
• ENT 5361 - Aquatic Insects (4.0 cr)
• FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
• FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)
• FW 4401 - Fish Physiology and Behavior (3.0 cr)
• FW 5136 - Ichthyology (4.0 cr)
• FW 5601 - Fisheries Population Analysis (3.0 cr)
• FW 5003 - Human Dimensions of Biological Conservation (3.0 cr)
• FW 8459 - Stream and River Ecology (3.0 cr)
• FW 8465 - Fish Habitats and Restoration (3.0 cr)

Fisheries & Aquatic Biology - Electives
Take at least 6 (Plan A) or 16 (Plan B) course credits from following list, or select 5xxx- or 8xxx-level coursework in consultation with the advisory committee.
Take 6 or more credit(s) from the following:
• APEC 5151 - Applied Microeconomics: Firm and Household (3.0 cr)
• APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
• EEB 5042 - Quantitative Genetics (3.0 cr)
• EEB 5327 - Behavioral Ecology (3.0 cr)
• EEB 5409 - Evolution (3.0 cr)
• EEB 5609 - Ecosystem Ecology (3.0 cr)
• ENT 5011 - Insect Structure and Function (4.0 cr)
• ENT 5041 - Insect Ecology (3.0 cr)
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
• FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
• FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
• FNRM 5204 - Landscape Ecology and Management (3.0 cr)
• FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
• FW 5003 - Human Dimensions of Biological Conservation (3.0 cr)
• FW 5051 - Analysis of Populations (4.0 cr)
• GEOG 8280 - Biogeography (3.0 cr)
• HORT 5071 - Ecological Restoration (4.0 cr)
• LA 5202 - Landscape Analysis Workshop (1.0 cr)
• LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
• PA 5251 - Strategic Planning and Management (3.0 cr)
• PA 5253 - Designing Planning and Participation Processes (3.0 cr)
• PA 5511 - Community Economic Development (3.0 cr)
• VMED 5181 - Spatial Analysis in Infectious Disease Epidemiology (3.0 cr)

Wildlife Ecology and Management
The Wildlife Ecology and Management track is available for students wishing to emphasize this concentration within the conservation sciences degree. The track provides structure and oversight for students interested in the ecology and management of both game and non-game wildlife species. The track name will be posted to the transcript, and may be useful to the graduate for obtaining jobs with many federal and state agencies where such expertise is specified in job announcements or hiring criteria. The track designation clearly indicates that the student has specialized coursework and research or project experience leading to expertise in wildlife ecology & management.

Students in the track must be advised or co-advised by a faculty member affiliated with the track. Requests for admission to the track may be made during the application process or at any time after the student is admitted to conservation sciences. Students in the track must meet all MS degree requirements. Students who designate this track will be expected to work closely with their Student Advisory Committee (SAC) to develop an appropriate course of study. The track coordinator will review each student's academic program to examine how track expectations are met and forward it with a recommendation to the director of graduate studies for approval.

Wildlife Ecology and Management - Electives
Take at least 12 (Plan A) or at least 22 (Plan B) elective credits from the following list, or select other 5xxx- or 8xxx-level coursework in consultation with the advisory committee.
Take 12 or more credit(s) from the following:
• APEC 5151 - Applied Microeconomics: Firm and Household (3.0 cr)
• APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
• EEB 4129 - Mammalogy (4.0 cr)
• EEB 4134 - Introduction to Ornithology (4.0 cr)
• EEB 5042 - Quantitative Genetics (3.0 cr)
• EEB 5327 - Behavioral Ecology (3.0 cr)
• EEB 5409 - Evolution (3.0 cr)
• EEB 5609 - Ecosystem Ecology (3.0 cr)
• ENT 5011 - Insect Structure and Function (4.0 cr)
• ENT 5041 - Insect Ecology (3.0 cr)
• EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
• FNRM 5104 - Forest Ecology (4.0 cr)
• FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
• FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
• FNRM 5203 - Forest Fire and Disturbance Ecology (3.0 cr)
• FNRM 5204 - Landscape Ecology and Management (3.0 cr)
• FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
• FW 5003 - Human Dimensions of Biological Conservation (3.0 cr)
• FW 5051 - Analysis of Populations (4.0 cr)
• FW 5603W - Habitats and Regulation of Wildlife [WI] (3.0 cr)
• FW 5625 - Wildlife Handling and Immobilization for Research and Management (2.0 cr)
• GEOG 8280 - Biogeography (3.0 cr)
• HORT 5071 - Ecological Restoration (4.0 cr)
• LA 5202 - Landscape Analysis Workshop (1.0 cr)
• LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
• PA 5251 - Strategic Planning and Management (3.0 cr)
• PA 5253 - Designing Planning and Participation Processes (3.0 cr)
• PA 5501 - Theories and Policies of Development (3.0 cr)
• PA 5511 - Community Economic Development (3.0 cr)
• VMED 5181 - Spatial Analysis in Infectious Disease Epidemiology (3.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 7
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The conservation sciences (CS) program has two complementary objectives leading to a unique multidisciplinary program. The first is to provide students with sound graduate training in the biological sciences relevant to the global conservation of plants, animals, and ecosystems. The second objective promotes the study of social, political, and economic sciences that relate to recognition and solution of conservation problems. Students may select a named track, fisheries and aquatic biology, which offers an aquatic specialization. Students may also pursue a joint degree in law and conservation biology through the joint law degree program. The overall goal of the program is to prepare students to develop solutions or approaches to address problems that are scientifically and environmentally sound and likely to be acted upon or implemented within their social and political context.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Core Course
FW 8452 - Conservation Biology (3.0 cr)
Seminar
CONS 8001 - Conservation Biology Seminar (1.0 cr)
Electives
Three credits of electives in consultation with the director of graduate studies.

Doctoral
Core Course
FW 8452 - Conservation Biology (3.0 cr)

Seminar
2 credits required including at least one credit of CBIO 8001.
Take 2 or more credit(s) from the following:
• CONS 8001 - Conservation Biology Seminar (1.0 cr)
• FW 8200 - Seminar (1.0 - 4.0 cr)

Electives
7 credits of electives in consultation with the director of graduate studies.
Twin Cities Campus
Conservation Sciences Ph.D.
Fisheries, Wildlife, and Conservation Biology
College of Food, Agricultural and Natural Resource Sciences

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The conservation sciences (CS) program has two complementary objectives leading to a unique multidisciplinary program. The first is to provide students with sound graduate training in the biological sciences relevant to the global conservation of plants, animals, and ecosystems. The second objective promotes the study of social, political, and economic sciences that relate to recognition and solution of conservation problems. Students may select one of three tracks, conservation science track or fisheries and aquatic biology track or wildlife ecology and management track. Students may also pursue a joint degree in law and conservation sciences through the joint law degree program. The overall goal of the program is to prepare students to develop solutions or approaches to address problems that are scientifically and environmentally sound and likely to be acted upon or implemented within their social and political context.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
A BS/BA degree in biology or a closely related field is preferred. Applicants with a baccalaureate degree in another field are accepted, but these individuals may be required to take selected courses in biology. In general, PhD applicants holding a baccalaureate degree are first expected to complete a master's degree.

Special Application Requirements:
A statement of career goals and three letters of recommendation evaluating the applicant's potential for graduate study are required. Three letters of recommendation are required. Scores less than five years old from the General Test of the GRE are required. TOEFL is required for applicants who speak English as a second language. Applicants to the joint law degree program must also apply to the Law School. Application deadline is January 1. Typically, students are admitted only for fall semester.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80
The preferred English language test is Test of English as Foreign Language Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
12 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

PhD students complete 48 credits, 24 credits in courses and 24 thesis credits. Students are expected to show competency in both the biological and social sciences. With their advisory committee, students develop a program that emphasizes the ecological and social aspects of conservation. Dissertation research may require proficiency in supporting areas (e.g., statistics, computing, communications).

Core Courses
All PhD students are required to take following core courses
FW 8452 - Conservation Biology (3.0 cr)
CONS 8095 - Contemporary Problems in Conservation Biology (1.0 cr)

Seminar Requirement
PhD students are required to take 3 semesters of conservation biology seminar, CBIO 8001. FAB track PhD students may substitute 1-2 semesters of FW 8200 to meet 3 semester conservation biology seminar requirement.
Take 3 or more credit(s) from the following:
• CONS 8001 - Conservation Biology Seminar (1.0 cr)
• FW 8200 - Seminar (1.0 - 4.0 cr)

Statistics Requirement
PhD students should take one statistics course (minimum of 3 semester credits) from the following list, or choose from 5- or 8-xxx level courses in other departments in consultation with the advisor and/or SAC.
Take 3 or more credit(s) from the following:
• BIOL 5272 - Applied Biostatistics (4.0 cr)
• EPSY 8251 - Statistical Methods in Education I (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• FW 8051 - Statistical Modeling of Ecological Data using R and WinBugs/JAGS (4.0 cr)
• PSY 8960 - Graduate Seminar in Psychology (1.0 - 4.0 cr)
• PUSH 5810 - Survey Research Methods (3.0 cr)
• PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
• STAT 5021 - Statistical Analysis (4.0 cr)
• STAT 5302 - Applied Regression Analysis (4.0 cr)
• STAT 5303 - Designing Experiments (4.0 cr)
• STAT 5421 - Analysis of Categorical Data (3.0 cr)
• STAT 5601 - Nonparametric Methods (3.0 cr)

Thesis
All PhD students are required to take 24 thesis semester credits
CONS 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Joint- or Dual-degree Coursework: Joint degree in conservation sciences and lawStudent may take a total of 12 credits in common among the academic programs.
Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Conservation Science
Conservation science track is available for MS, PhD, and joint degree students wishing to emphasize this concentration within a conservation sciences. This track name will be indicated on the student's transcript. This track provides structure and oversight for students interested in the interface of population, species, and ecosystem biology with disciplines of social sciences, education, economics.

Conservation Science - Electives
Doctoral students should take a minimum of 14 credits from the following list, or choose 5- or 8-xxx level courses from other departments in consultation with SAC to meet minimum credit requirements.
Take 14 or more credit(s) from the following:
- APEC 5151 - Applied Microeconomics: Firm and Household (3.0 cr)
- APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- EEB 4129 - Mammalogy (4.0 cr)
- EEB 4134 - Introduction to Ornithology (4.0 cr)
- EEB 5042 - Quantitative Genetics (3.0 cr)
- EEB 5327 - Terrestrial Ecology (3.0 cr)
- EEB 5409 - Evolution (3.0 cr)
- EEB 5601 - Limnology (3.0 cr)
- EEB 5609 - Ecosystem Ecology (3.0 cr)
- ENT 4021 - Honey Bees and Insect Societies (3.0 cr)
- ENT 5011 - Insect Structure and Function (4.0 cr)
- ENT 5041 - Insect Ecology (3.0 cr)
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- FNRM 5104 - Forest Ecology (4.0 cr)
- FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
- FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
- FNRM 5203 - Forest Fire and Disturbance Ecology (3.0 cr)
- FNRM 5204 - Landscape Ecology and Management (3.0 cr)
- FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
- FW 5003 - Human Dimensions of Biological Conservation (3.0 cr)
- FW 5051 - Analysis of Populations (4.0 cr)
- FW 5401 - Fish Physiology and Behavior (3.0 cr)
- FW 5603W - Habitats and Regulation of Wildlife [WI] (3.0 cr)
- FW 5625 - Wildlife Handling and Immobilization for Research and Management (2.0 cr)
- GEOG 8280 - Biogeography (3.0 cr)
- GRAD 8101 - Teaching in Higher Education (3.0 cr)
- GRAD 8102 - Practicum for Future Faculty (3.0 cr)
- HORT 5071 - Ecological Restoration (4.0 cr)
- ISG 5010 - Risk Analysis for Introduced Species and Genotypes (3.0 cr)
- ISG 5020 - Risk Analysis Modeling for Introduced Species and Genotypes (1.0 cr)
- ISG 8001 - Discussions in Introduced Species and Genotypes (1.0 cr)
- ISG 8021 - Problem Solving Practicum in Risk Analysis (3.0 cr)
- ISG 8031 - Cooperative Learning Practicum (1.0 cr)
- LA 5202 - Landscape Analysis Workshop (1.0 cr)
- LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
- PA 5251 - Strategic Planning and Management (3.0 cr)
- PA 5253 - Designing Planning and Participation Processes (3.0 cr)
- PA 5501 - Theories and Policies of Development (3.0 cr)
- PA 5511 - Community Economic Development (3.0 cr)
- VMED 5181 - Spatial Analysis in Infectious Disease Epidemiology (3.0 cr)

Fisheries and Aquatic Biology
Three-quarters of the global ecosystem is water and most is a global commons. Many biologists and economists argue that freshwater is one of the most critical global resources and that the functional integrity and biodiversity within freshwater and marine ecosystems are highly threatened. The fisheries and aquatic biology (FAB) track is available for MS, PhD, and joint degree students wishing to emphasize this concentration within a CS major. The track name will be indicated on the student's transcript and may be useful to the graduate for obtaining jobs with many federal and state agencies where such expertise is specified in job announcements or hiring criteria. The track designation clearly indicates that the student has specialized coursework and research or project experience leading to expertise in fisheries or aquatic biology. Combined with a typical undergraduate degree in biology or natural resource science, careful selection of courses in the graduate program will satisfy the educational requirements for professional certification by the
American Fisheries Society.

Students in the track must be advised or co-advised by a faculty member affiliated with the track. Request for admission to the track may be made during the application process or any time after the student is admitted to the CS graduate program. Students in the track must meet all requirements for the PhD in CS.

Students who designate this track will be expected to work closely with their Student Advisory Committee (SAC) to develop an appropriate course of study. The track coordinator will review each student's academic program to examine how track expectations are met and forward it with a recommendation to the director of graduate studies for approval.

Fisheries and Aquatic Biology - Required Courses
In addition to course requirements for the conservation sciences major, PhD students in fisheries and aquatic biology track are required to take minimum of 8 semester credits from following list. Other advanced courses or colloquia on fisheries or aquatic biology that are not listed here may also satisfy needs of students in the track. Please check with FAB track coordinator to add other courses.

**Take 8 or more credit(s) from the following:**
- EEB 5601 - Limnology (3.0 cr)
- EEB 5605 - Limnology Laboratory (2.0 cr)
- EEB 8601 - Introduction to Stream Restoration (3.0 cr)
- EEB 8602 - Stream Restoration Practice (2.0 cr)
- ENT 5361 - Aquatic Insects (4.0 cr)
- FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
- FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)
- FW 4401 - Fish Physiology and Behavior (3.0 cr)
- FW 5003 - Human Dimensions of Biological Conservation (3.0 cr)
- FW 5051 - Analysis of Populations (4.0 cr)
- FW 5136 - Ichthyology (4.0 cr)
- FW 5601 - Fisheries Population Analysis (3.0 cr)
- FW 8459 - Stream and River Ecology (3.0 cr)
- FW 8465 - Fish Habitats and Restoration (3.0 cr)

Fisheries and Aquatic Biology - Electives
PhD students should take a minimum of 6 semester credits either from the following list, or choose 5- or 8-xxxx courses from other departments in consultation with the advisor and/or SAC.

**Take 6 or more credit(s) from the following:**
- APEC 5151 - Applied Microeconomics: Firm and Household (3.0 cr)
- APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- EEB 5042 - Quantitative Genetics (3.0 cr)
- EEB 5327 - Behavioral Ecology (3.0 cr)
- EEB 5409 - Evolution (3.0 cr)
- EEB 5601 - Limnology (3.0 cr)
- EEB 5609 - Ecosystem Ecology (3.0 cr)
- ENT 5011 - Insect Structure and Function (4.0 cr)
- ENT 5041 - Insect Ecology (3.0 cr)
- EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
- FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
- FNRM 5203 - Forest Fire and Disturbance Ecology (3.0 cr)
- FNRM 5204 - Landscape Ecology and Management (3.0 cr)
- FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
- FW 5003 - Human Dimensions of Biological Conservation (3.0 cr)
- FW 5051 - Analysis of Populations (4.0 cr)
- FW 5401 - Fish Physiology and Behavior (3.0 cr)
- FW 5603W - Habitats and Regulation of Wildlife [WI] (3.0 cr)
- FW 5625 - Wildlife Handling and Immobilization for Research and Management (2.0 cr)
- GEOG 8280 - Biogeography (3.0 cr)
- GRAD 8101 - Teaching in Higher Education (3.0 cr)
- GRAD 8102 - Practicum for Future Faculty (3.0 cr)
- HORT 5071 - Ecological Restoration (4.0 cr)
- ISG 5010 - Risk Analysis for Introduced Species and Genotypes (3.0 cr)
- ISG 5020 - Risk Analysis Modeling for Introduced Species and Genotypes (1.0 cr)
- ISG 8001 - Discussions in Introduced Species and Genotypes (1.0 cr)
- ISG 8021 - Problem Solving Practicum in Risk Analysis (3.0 cr)
- LA 5202 - Cooperative Learning Practicum (1.0 cr)
- LA 5204 - Metropolitan Landscape Ecology (3.0 cr)
Wildlife Ecology and Management

The Wildlife Ecology and Management track is available for students wishing to emphasize this concentration within the conservation sciences degree. The track provides structure and oversight for students interested in the interface of population, species, and ecosystem biology with the disciplines of social sciences, education, and economics. The track name will be posted to the transcript, and may be useful to the graduate for obtaining jobs with many federal and state agencies where such expertise is specified in job announcements or hiring criteria. The track designation clearly indicates that the student has specialized coursework and research or project experience leading to expertise in wildlife ecology and management.

Students in the track must be advised or co-advised by a faculty member affiliated with the track. Requests for admission to the track may be made during the application process or at any time after the student is admitted to conservation sciences. Students in the track must meet all MS degree requirements. Students who designate this track will be expected to work closely with their Student Advisory Committee (SAC) to develop an appropriate course of study. The track coordinator will review each student's academic program to examine how track expectations are met and forward it with a recommendation to the director of graduate studies for approval.

Wildlife Ecology & Management - Electives

Doctoral students should take a minimum of 14 credits from the following list, or choose 5- or 8-xxx level courses from other departments in consultation with SAC to meet minimum credit requirements.

Take 14 or more credit(s) from the following:

- APEC 5151 - Applied Microeconomics: Firm and Household (3.0 cr)
- APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- EEB 4129 - Mammalogy (4.0 cr)
- EEB 4134 - Introduction to Ornithology (4.0 cr)
- EEB 5042 - Quantitative Genetics (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Entomology centers on the study of insects and includes specializations in ecology, behavior, molecular biology, microbiology, neurobiology, physiology, population dynamics, systematics, and taxonomy. Specialized or applied areas include apiculture, biological control, cell culture, insect conservation, insect-vector relations, integrated pest management, and modeling. Research programs are active in aquatic systems, forest systems, crop and animal agriculture, human health, and natural and urban environments.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
A bachelor's degree with a major in a biological science is a prerequisite. Preference is given to students with a broad background in the basic sciences. Admission depends primarily on applicant’s undergraduate record, letters of recommendation, and the statement of interest from the applicant.
GRE scores in Verbal Reasoning, Quantitative Reasoning, Analytical Writing are required.

Special Application Requirements:
Applicants must submit a complete set of official transcripts and a clearly written statement of career interests, goals, and objectives, and a diversity statement. Three letters of recommendation are required from persons well acquainted with the student's academic record, and should be either uploaded or sent directly to the department.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Program Requirements

Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: 1-3 project reports as directed by the advisor and the advisory committee.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students must accumulate 2 written examination points.

Required Coursework

ENT 5011 - Insect Structure and Function (4.0 cr)
ENT 5021 - Insect Biodiversity and Evolution (4.0 cr)
ENT 5041 - Insect Ecology (3.0 cr)

Plan Options

Plan A Requirements

Graduate Seminar
Take at least 1 credit of the following:
ENT 8300 - Graduate Seminar (1.0 - 2.0 cr)

Electives
Take at least 8 credits in consultation with the advisor. Elective courses can be taken from entomology or any University of Minnesota program. Students must work with their advisor(s) when selecting electives outside of the entomology program. Elective courses must be taken at the graduate (4xxx-8xxx) level.

Master's Thesis Credits
Take at least 10 master's thesis credits.
ENT 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B Requirements

Take 1-6 credits of Independent Research (ENT 5910: Special Problems in Entomology)
ENT 5910 - Special Problems in Entomology (1.0 - 6.0 cr)

Electives
Take at least 13-18 credits in consultation with the advisor and the advisory committee. Elective courses can be taken from entomology or any University of Minnesota program. Students must work with their advisor(s) when selecting electives outside of the entomology program. Elective courses must be taken at the graduate (4xxx-8xxx) level.
**Twin Cities Campus**

**Entomology Minor**

**Entomology**

**College of Food, Agricultural and Natural Resource Sciences**

**Contact Information:**
Department of Entomology, 1980 Folwell Ave, 219 Hodson Hall, St. Paul, MN 55108 (612-624-3636; fax: 612-625-5299)
Email: entodept@umn.edu
Website: [http://www.entomology.umn.edu](http://www.entomology.umn.edu)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the [General Information](http://www.entomology.umn.edu) section of the catalog website for requirements that apply to all major fields.

Entomology centers on the study of insects and includes specializations in ecology, behavior, molecular biology, microbiology, neurobiology, physiology, population dynamics, systematics, and taxonomy. Specialized or applied areas include apiculture, biological control, cell culture, insect conservation, insect-vector relations, integrated pest management, and modeling. Research programs are active in aquatic systems, forest systems, crop and animal agriculture, human health, and natural and urban environments.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the [General Information](http://www.entomology.umn.edu) section of the catalog website.

**Program Requirements**
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

**Program Sub-plans**
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Masters**
Courses are chosen in consultation with the student's major advisor and the Entomology director of graduate studies.

**Master's Course List**
Take at least six credits from the following:
- ENT 4xxx
- ENT 5xxx
- ENT 8xxx

**Doctoral**
Courses are chosen in consultation with the student's major advisor and the Entomology director of graduate studies.

**Doctoral Course List**
Take at least 12 credits from the following:
Twin Cities Campus
Entomology Ph.D.
Entomology
College of Food, Agricultural and Natural Resource Sciences

Link to a list of faculty for this program.

Contact Information:
Department of Entomology, 1980 Folwell Avenue, 219 Hodson Hall, St. Paul, MN 55108 (612-624-3636; fax: 612-625-5299)
Email: entodept@umn.edu
Website: http://www.entomology.umn.edu

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Entomology centers on the study of insects and includes specializations in ecology, behavior, molecular biology, microbiology, neurobiology, physiology, population dynamics, systematics, and taxonomy. Specialized or applied areas include apiculture, biological control, cell culture, insect conservation, insect-vector relations, integrated pest management, and modeling. Research programs are active in aquatic systems, forest systems, crop and animal agriculture, human health, and natural and urban environments.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A GPA of 3.00 (on a 4.00 scale).

A 3.50 GPA (on a 4.00 scale) for prior graduate work is preferred for admission.

Other requirements to be completed before admission:
A bachelor's degree with a major in a biological science is a prerequisite. Preference is given to students with a broad background in the basic sciences. Admission depends primarily on applicant's undergraduate record, letters of recommendation, and the statement of interest from the applicant.
GRE scores for Verbal Reasoning, Quantitative Reasoning and Analytical Writing are required for admission.

Special Application Requirements:
Applicants must submit a complete set of official transcripts and a clearly written statement of career interests, goals, objectives and a diversity statement. Three letters of recommendation are required from persons well acquainted with the student's academic record, and should be either uploaded or sent directly to the department.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 credits are required in the major.
24 thesis credits are required.

**Plan A:** Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** 1-3 project reports as directed by the advisor and the advisory committee.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students must accumulate 3 written examination points.

**Core Courses**
11 credits required
- ENT 5021 - Insect Biodiversity and Evolution (4.0 cr)
- ENT 5011 - Insect Structure and Function (4.0 cr)
- ENT 5041 - Insect Ecology (3.0 cr)

**Seminar Requirement**
2 credits required
- ENT 8300 - Graduate Seminar (1.0 - 2.0 cr)

**Electives**
11 or more credits required.

Elective courses can be taken from entomology or any University of Minnesota program. Students must work with their advisor(s) when selecting electives outside of the entomology program. Elective courses must be taken at the graduate (4xxx-8xxx) level, but only a maximum of 9 credits from the 4xxx level may be used.

**Thesis Credits**
24 credits required
- ENT 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Food Science M.S.
College of Food, Agricultural and Natural Resource Sciences

Email: fsgrad@umn.edu
Website: http://fscn.cfans.umn.edu/graduate_programs/foodsciencegraduate/index.htm

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Food science applies scientific principles to the manufacture, distribution, marketing, and consumer aspects of food. Food scientists apply the basic principles and techniques of many disciplines, including chemistry, physics, microbiology, and nutrition, to food processing and preservation, new product development, and food marketing. Food scientists are concerned with the theoretical and practical aspects of the food chain, from the production of raw materials to the use of food products by consumers. Students may emphasize the chemistry, engineering, microbiology, nutrition, or technology of food products.

Students may spend a maximum of five (5) years in this degree program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants to the program need a bachelor's degree, or its international equivalent, in any field.

Other requirements to be completed before admission:
The minimum requirements are general chemistry with laboratory, organic chemistry with laboratory, physics with laboratory, biology with laboratory, and calculus. If preparation appears inadequate, certain additional courses may be required after admission.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 major credits and 0 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is equivalent to 120 hours of work or three full weeks of research and writing. It should consist of one of the following options, which are intended to familiarize the candidate with the tools of research or scholarship in the field and serve to demonstrate the ability to work independently: 1) The candidate may prepare one paper equivalent to 120 hours of work in one advanced course, over and above the normal course requirement as approved by the instructor in consultation with the advisor. This course must be from the major field of interest. 2) The candidate may prepare one paper equivalent to the requirement of 120 hours in some related field or course as approved in consultation with the instructor and the adviser. 3) The student may do an equivalent amount of library or laboratory research and write a research report to satisfy the requirement as approved by the adviser. This may take the form of a research proposal.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

All students are expected to participate as teaching assistants during their graduate careers. Up to 9 credits of 4xxx-level courses are allowed.

Required Courses

All students take the following required courses for 11 credits:
- FSCN 4112 - Food Chemistry and Functional Foods (3.0 cr)
- FSCN 4121 - Food Microbiology (3.0 cr)
- FSCN 4332 - Food Processing Operations (3.0 cr)
- FSCN 8318 - Current Issues in Food Science (2.0 cr)

Take one of the following courses for a total of 2 to 4 credits:
- FSCN 5131 - Food Quality for Graduate Credit (3.0 cr)
- or FSCN 5312 - Food Analysis (4.0 cr)
- or If FSCN 5122 is taken, FSCN 5123 must also be taken
  - FSCN 5122 - Food Fermentations and Biotechnology (2.0 cr)
  - FSCN 5123 - Molecular Biology for Applied Scientists (1.0 cr)

Food Science Elective

Take at least 3 additional FSCN credits, in consultation with the adviser.
- FSCN 5xxx
- or FSCN 8xxx

General Elective

Choose remaining credits in consultation with the adviser to meet minimum credit requirements.

Plan Options

Plan A

Take 10 master's thesis credits.
- FSCN 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
- OR-

Plan B

Plan B students do not have additional requirements.

Students may emphasize the chemistry, engineering, microbiology, nutrition, or technology of food products.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Students wishing to complete the food science minor must consult with the food science director of graduate studies to establish specific requirements and goals for an acceptable minor program of study.

Required Courses
- FSCN 4112 - Food Chemistry and Functional Foods (3.0 cr)
- FSCN 4121 - Food Microbiology (3.0 cr)
- FSCN 4332 - Food Processing Operations (3.0 cr)

Doctoral
Required Courses
Students wishing to complete the food science minor must consult with the food science director of graduate studies to establish specific requirements and goals for an acceptable minor program of study.
In addition to the 3 courses listed below, students pursuing the doctoral minor must take at least 3 5xxx- or 8xxx-level FSCN credits.

- **FSCN 4112** - Food Chemistry and Functional Foods (3.0 cr)
- **FSCN 4121** - Food Microbiology (3.0 cr)
- **FSCN 4332** - Food Processing Operations (3.0 cr)
- FSCN 5xxx
- FSCN 8xxx

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Land and atmospheric science (LAAS) is a science-based interdisciplinary program focused on the fundamentals of Earth system processes related to land and atmosphere and their coupled interactions. Students have the option to develop a program based on one of the more traditional areas in atmospheric science or soil science or to design their own interdisciplinary course of study bridging the two disciplines. The land and atmospheric science graduate program has no formal tracks or emphasis areas, but instead allows students to design a curriculum that addresses their interests within the scope of the program. This multidisciplinary program encompasses aspects of chemistry, physics, biology, atmospheric sciences, and geology.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

BS degree in a related field of science, or a graduate or professional degree.

Required prerequisites

Basic Sciences
Students are expected to have taken a minimum of four of the following courses (or their equivalent).

- MATH 1271 - Calculus I [MATH] (4.0 cr)
  or MATH 1142 - Short Calculus [MATH] (4.0 cr)
- MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
- PHYS 1101W - Introductory College Physics I [PHYS, WI] (4.0 cr)
  or ESPM 3131 - Environmental Physics (3.0 cr)
- PHYS 1102W - Introductory College Physics II [PHYS, WI] (4.0 cr)
  or STAT 3011 - Introduction to Statistical Analysis [MATH] (4.0 cr)
- CHEM 1061 - Chemical Principles I [PHYS] (3.0 cr)
  or BIOL 1009 - General Biology [BIOL] (4.0 cr)
- CHEM 1062 - Chemical Principles II [PHYS] (3.0 cr)
- CHEM 1066 - Chemical Principles II Laboratory [PHYS] (1.0 cr)
- STAT 3011 - Introduction to Statistical Analysis [MATH] (4.0 cr)

Environmental Sciences
Students are expected to have taken a minimum of two of the following (or similar) courses:

Take 2 - 6 course(s) from the following:
- ESPM 1011 - Issues in the Environment [ENV] (3.0 cr)
- ESPM 1425 - Introduction to Weather and Climate [PHYS, ENV] (4.0 cr)
- SOIL 2125 - Basic Soil Science [PHYS, ENV] (4.0 cr)
- ESCI 1001 - Earth and Its Environments [PHYS, ENV] (4.0 cr)
• ESPM 3612W - Soil and Environmental Biology [WI] (4.0 cr)  
  or MICB 3301 - Biology of Microorganisms (5.0 cr)  
• EEB 3407 - Ecology (3.0 cr)

Other requirements to be completed before admission:
Student course admission prerequisites are as shown below. Students who are admitted with deficiencies would be provided with a list of courses they are required to take before the completion of their degree. This list would be developed by the directors of graduate studies in consultation with the student's faculty advisor.

International applicants must submit score(s) from one of the following tests:
  • TOEFL  
    - Internet Based - Total Score: 79  
    - Internet Based - Writing Score: 21  
    - Internet Based - Reading Score: 19  
    - Paper Based - Total Score: 550  
  • IELTS  
    - Total Score: 6.5  
  • MELAB  
    - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 20 major credits and 10 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project typically consists of a technical paper of a topic and length acceptable to the student's advisory committee.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Core Courses
All students must complete the 5-credit core curriculum.
Take exactly 3 course(s) totaling exactly 5 credit(s) from the following:
• LAAS 5050 - Integrated Topics in Land & Atmospheric Science (3.0 cr)  
• LAAS 8128 - Land and Atmospheric Science Seminar (1.5 cr)  
• SOIL 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)  

LAAS and Related Courses
Plan A students must select at least 15 credits (9 major credits and 6 related fields) from this list, and Plan B students must select at least 25 credits (15 major credits and 10 related fields). Courses are selected based on relevance to research interests and with the consent of the advisor.

Take 15 or more credit(s) from the following:
• LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)  
• LAAS 5425 - Atmospheric Processes I: Thermodynamics and Dynamics of the Atmosphere (3.0 cr)  
• LAAS 5426 - Atmospheric Processes II: Radiation, Composition, and Climate (3.0 cr)  
• LAAS 5480 - Special Topics in Land and Atmospheric Science (1.0 - 4.0 cr)  
• LAAS 5515 - Soil Formation: Earth Surface Processes and Biogeochemistry (3.0 cr)  
• LAAS 8195 - Research Problems in Soils (1.0 - 5.0 cr)  
• AGRO 5121 - Applied Experimental Design (4.0 cr)
• AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
• BBE 5535 - Assessment and Diagnosis of Impaired Waters (3.0 cr)
• BBE 5608 - Environmental and Industrial Microbiology (3.0 cr)
• CEGE 4502 - Water and Wastewater Treatment (3.0 cr)
• CEGE 4562 - Environmental Remediation Technologies (3.0 cr)
• CEGE 5180 - Special Topics (1.0 - 4.0 cr)
• CEGE 5511 - Urban Hydrology and Water Quality (4.0 cr)
• CEGE 5541 - Environmental Water Chemistry (3.0 cr)
• CEGE 5542 - Experimental Methods in Environmental Engineering (3.0 cr)
• CEGE 5543 - Introductory Environmental Fluid Mechanics (4.0 cr)
• CEGE 5551 - Environmental Microbiology (3.0 cr)
• CEGE 8501 - Environmental Fluid Mechanics I (4.0 cr)
• CEGE 8502 - Environmental Fluid Mechanics II (4.0 cr)
• CEGE 8503 - Environmental Mass Transport (4.0 cr)
• CEGE 8506 - Stochastic Hydrology (4.0 cr)
• CEGE 8521 - The Atmospheric Boundary Layer (4.0 cr)
• CEGE 8541 - Aquatic Chemistry (3.0 cr)
• CEGE 8542 - Chemistry of Organic Pollutants in Environmental Systems (3.0 cr)
• CEGE 8551 - Environmental Microbiology: Molecular Theory and Methods (4.0 cr)
• CEGE 8561 - Analysis and Modeling of Aquatic Environments I (3.0 cr)
• CEGE 8562 - Analysis and Modeling of Aquatic Environments II (3.0 cr)
• CEGE 8572 - Computational Environmental Fluid Dynamics (4.0 cr)
• EEB 4068 - Plant Physiological Ecology (3.0 cr)
• EEB 4611 - Biogeochemical Processes (3.0 cr)
• EEB 5053 - Ecology: Theory and Concepts (4.0 cr)
• EEB 5601 - Limnology (3.0 cr)
• EEB 5605 - Limnology Laboratory (2.0 cr)
• ESCL 5102 - Climate Change and Human History (3.0 cr)
• ESCL 5205 - Fluid Mechanics in Earth and Environmental Sciences (3.0 cr)
• ESCL 5351 - Geochemical Modeling of Aquous Systems (3.0 cr)
• ESCL 5402 - Science and Politics of Global Warming (3.0 cr)
• ESCL 8401 - Aqueous Environmental Geochemistry (3.0 cr)
• ESCL 8402 - Biogeochemical Cycles in the Ocean (3.0 cr)
• ESCL 8801 - Geomicrobiology (3.0 cr)
• ESPM 5061 - Water Quality and Natural Resources (3.0 cr)
• ESPM 5111 - Hydrology and Water Quality Field Methods (3.0 cr)
• ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
• ESPM 5402 - Biometeorology (3.0 cr)
• ESPM 5601 - Principles of Waste Management (3.0 cr)
• FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
• FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
• FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)
• FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
• FW 8459 - Stream and River Ecology (3.0 cr)
• GEOG 5401 - Geography of Environmental Systems and Global Change (4.0 cr)
• GEOG 5426 - Climatic Variations (3.0 cr)
• GEOG 5531 - Numerical Spatial Analysis (4.0 cr)
• GEOG 5562 - GIS Development Practicum (3.0 cr)
• GEOG 5839 - Introduction to Dendrochronology (3.0 cr)
• GEOG 8270 - Seminar: Climatology (3.0 cr)
• GIS 5555 - Basic Spatial Analysis (3.0 cr)
• PMB 4111 - Microbial Physiology and Diversity (3.0 cr)
• PMB 5412 - Plant Physiology (3.0 cr)
• PLPA 8103 - Plant-Microbe Interactions (3.0 cr)
• PUBH 6100 - Topics: Environmental Health (1.0 - 4.0 cr)
• PUBH 6190 - Environmental Chemistry (3.0 cr)
• PUBH 6191 - Air Pollution (3.0 cr)
• SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)
• SOIL 5232 - Vadose Zone Hydrology (3.0 cr)
• SOIL 5555 - Wetland Soils (3.0 cr)
• SOIL 5611 - Soil Biology and Fertility (4.0 cr)
• SOIL 8252 - Advanced Soil Physics (2.0 cr)
• SOIL 8510 - Advanced Topics in Pedology (2.0 - 4.0 cr)
• SOIL 8541 - Aquatic and Soil Chemistry (3.0 cr)
• STAT 5021 - Statistical Analysis (4.0 cr)
Plan Options

Plan A
Take 10 or more credit(s) from the following:
- LAAS 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B
Plan B students do not have additional requirements other than those described above.
Twin Cities Campus

Land and Atmospheric Science Minor
Soil, Water, & Climate
College of Food, Agricultural and Natural Resource Sciences

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Land and atmospheric science (LAAS) is a science-based interdisciplinary program focused on the fundamentals of Earth system processes related to land and atmosphere and their coupled interactions. Students have the option to develop a program based on one of the more traditional areas in atmospheric science or soil science or to design their own interdisciplinary course of study bridging the two disciplines. The Land and atmospheric science graduate program has no formal tracks or emphasis areas, but instead allows students to design a curriculum that addresses their interests within the scope of the program. This multidisciplinary program encompasses aspects of chemistry, physics, biology, atmospheric sciences, and geology.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

B.S. degree in a related science field.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

All minor courses must be taken A-F, unless approved by the Graduate Advisory Committee, or if they are offered on the S-N basis only. Courses for use in the minor must be selected with the consultation of the Land and Atmospheric Science graduate faculty member serving as the minor advisor and approved by the director of graduate studies.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Integrated Topics
All students are required to take the following course.
Take exactly 1 course(s) totaling exactly 3 credit(s) from the following:

- LAAS 5050 - Integrated Topics in Land & Atmospheric Science (3.0 cr)

Other LAAS courses
Take 6 credits for MS minor from the following options, or others approved by the DGS and the LAAS graduate faculty member serving as the minor advisor.

Take 6 or more credit(s) from the following:

- LAAS 5051 - Thesis Proposal Writing for Land & Atmospheric Science (2.0 cr)
- LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
- LAAS 5425 - Atmospheric Processes I: Thermodynamics and Dynamics of the Atmosphere (3.0 cr)
- LAAS 5426 - Atmospheric Processes II: Radiation, Composition, and Climate (3.0 cr)
- LAAS 5515 - Soil Formation: Earth Surface Processes and Biogeochemistry (3.0 cr)
- LAAS 5621 - Soil and Environmental Genomics (3.0 cr)
- LAAS 8128 - Land and Atmospheric Science Seminar (1.5 cr)

Doctoral

Integrated Topics
All students are required to take the following course.

Take exactly 1 course(s) totaling exactly 3 credit(s) from the following:

- LAAS 5050 - Integrated Topics in Land & Atmospheric Science (3.0 cr)

Other LAAS courses
Take 9 credits for PhD minor from the following options, or others approved by the DGS and the LAAS graduate faculty member serving as the minor advisor.

Take 9 or more credit(s) from the following:

- LAAS 5051 - Thesis Proposal Writing for Land & Atmospheric Science (2.0 cr)
- LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
- LAAS 5425 - Atmospheric Processes I: Thermodynamics and Dynamics of the Atmosphere (3.0 cr)
- LAAS 5426 - Atmospheric Processes II: Radiation, Composition, and Climate (3.0 cr)
- LAAS 5515 - Soil Formation: Earth Surface Processes and Biogeochemistry (3.0 cr)
- LAAS 5621 - Soil and Environmental Genomics (3.0 cr)
- LAAS 8128 - Land and Atmospheric Science Seminar (1.5 cr)

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 50
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Land and atmospheric science (LAAS) is a science-based interdisciplinary program focused on the fundamentals of Earth system processes related to land and atmosphere and their coupled interactions. Students have the option to develop a program based on one of the more traditional areas in atmospheric science or soil science or to design their own interdisciplinary course of study bridging the two disciplines. The Land and atmospheric science graduate program has no formal tracks or emphasis areas, but instead allows students to design a curriculum that addresses their interests within the scope of the program. This multidisciplinary program encompasses aspects of chemistry, physics, biology, atmospheric sciences, and geology.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

Applicants to the LAAS PhD program are expected to have an MS degree or equivalent in a related field of science.

Required prerequisites
Basic Sciences
Students are expected to have taken a minimum of four of the following courses (or their equivalent):
- MATH 1271 - Calculus I [MATH] (4.0 cr)
- MATH 1142 - Short Calculus [MATH] (4.0 cr)
- MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
- PHYS 1101W - Introductory College Physics I [PHYS, WI] (4.0 cr)
- PHYS 1102W - Introductory College Physics II [PHYS, WI] (4.0 cr)
- or ESPM 3131 - Environmental Physics (3.0 cr)
- or BIOL 1009 - General Biology [BIOL] (4.0 cr)
- or CHEM 1061 - Chemical Principles I [PHYS] (3.0 cr)
- CHEM 1065 - Chemical Principles I Laboratory [PHYS] (1.0 cr)
- CHEM 1062 - Chemical Principles II [PHYS] (3.0 cr)
- CHEM 1066 - Chemical Principles II Laboratory [PHYS] (1.0 cr)
- or STAT 3011 - Introduction to Statistical Analysis [MATH] (4.0 cr)

Environmental Sciences
Students are expected to have taken a minimum of two of the following (or similar) courses:
Take 2 - 6 course(s) from the following:
- ESPM 1011 - Issues in the Environment [ENV] (3.0 cr)
- ESPM 1425 - Introduction to Weather and Climate [PHYS, ENV] (4.0 cr)
- SOIL 2125 - Basic Soil Science [PHYS, ENV] (4.0 cr)
- ESCI 1001 - Earth and Its Environments [PHYS, ENV] (4.0 cr)
- ESPM 3612W - Soil and Environmental Biology [WI] (4.0 cr)
  or MICB 3301 - Biology of Microorganisms (5.0 cr)
- EEB 3407 - Ecology (3.0 cr)

Other requirements to be completed before admission:
Students with a BS degree and outstanding scholarship can request direct admission to the LAAS PhD program. Each request will be considered on a case-by-case basis by the Graduate Advisory Committee. Evidence of outstanding scholarship may include: peer-reviewed publications, a pre-doctoral fellowship, a National Science Foundation PhD Fellowship, high GPA/GRE scores, or strong previous research experience. Current MS candidates who exhibit outstanding scholarship may request transfer to a PhD degree program after completion of their first two semesters of coursework.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
16 credits are required in the major.
10 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Core Courses
All doctoral students must complete the 10-credit core curriculum.
Take exactly 5 course(s) totaling exactly 10 credit(s) from the following:
- LAAS 5050 - Integrated Topics in Land & Atmospheric Science (3.0 cr)
- LAAS 8128 - Land and Atmospheric Science Seminar (1.5 cr)
- SOIL 8123 - Research Ethics in the Plant and Environmental Sciences (0.5 cr)
- LAAS 5051 - Thesis Proposal Writing for Land & Atmospheric Science (2.0 cr)
- GRAD 8101 - Teaching in Higher Education (3.0 cr)

LAAS and Related Courses
Choose courses relevant to particular area of research with consent of advisor. Take at least 6 credits from the following list to complete the 16-credit minimum for the major, and at least 10 credits for the supporting program minimum.
Take 16 or more credit(s) from the following:
- LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
- LAAS 5425 - Atmospheric Processes I: Thermodynamics and Dynamics of the Atmosphere (3.0 cr)
- LAAS 5426 - Atmospheric Processes II: Radiation, Composition, and Climate (3.0 cr)
- LAAS 5480 - Special Topics in Land and Atmospheric Science (1.0 - 4.0 cr)
- LAAS 5515 - Soil Formation: Earth Surface Processes and Biogeochemistry (3.0 cr)
- LAAS 8195 - Research Problems in Soils (1.0 - 5.0 cr)
- AGRO 5121 - Applied Experimental Design (4.0 cr)

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
• AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
• BBE 5535 - Assessment and Diagnosis of Impaired Waters (3.0 cr)
• BBE 5608 - Environmental and Industrial Microbiology (3.0 cr)
• CEGE 4502 - Water and Wastewater Treatment (3.0 cr)
• CEGE 4562 - Environmental Remediation Technologies (3.0 cr)
• CEGE 5180 - Special Topics (1.0 - 4.0 cr)
• CEGE 5511 - Urban Hydrology and Water Quality (4.0 cr)
• CEGE 5541 - Environmental Water Chemistry (3.0 cr)
• CEGE 5542 - Experimental Methods in Environmental Engineering (3.0 cr)
• CEGE 5543 - Introductory Environmental Fluid Mechanics (4.0 cr)
• CEGE 5551 - Environmental Microbiology (3.0 cr)
• CEGE 8501 - Environmental Fluid Mechanics I (4.0 cr)
• CEGE 8502 - Environmental Fluid Mechanics II (4.0 cr)
• CEGE 8503 - Environmental Mass Transport (4.0 cr)
• CEGE 8506 - Stochastic Hydrology (4.0 cr)
• CEGE 8521 - The Atmospheric Boundary Layer (4.0 cr)
• CEGE 8541 - Aquatic Chemistry (3.0 cr)
• CEGE 8542 - Chemistry of Organic Pollutants in Environmental Systems (3.0 cr)
• CEGE 8551 - Environmental Microbiology: Molecular Theory and Methods (4.0 cr)
• CEGE 8561 - Analysis and Modeling of Aquatic Environments I (3.0 cr)
• CEGE 8562 - Analysis and Modeling of Aquatic Environments II (3.0 cr)
• CEGE 8572 - Computational Environmental Fluid Dynamics (4.0 cr)
• EEB 4068 - Plant Physiological Ecology (3.0 cr)
• EEB 4611 - Biogeochemical Processes (3.0 cr)
• EEB 5053 - Ecology: Theory and Concepts (4.0 cr)
• EEB 5601 - Limnology (3.0 cr)
• EEB 5605 - Limnology Laboratory (2.0 cr)
• ESCI 5102 - Climate Change and Human History (3.0 cr)
• ESCI 5205 - Fluid Mechanics in Earth and Environmental Sciences (3.0 cr)
• ESCI 5351 - Geochemical Modeling of Aquatic Systems (3.0 cr)
• ESCI 5402 - Science and Politics of Global Warming (3.0 cr)
• ESCI 8401 - Aquatic Environmental Geochemistry (3.0 cr)
• ESCI 8402 - Biogeochemical Cycles in the Ocean (3.0 cr)
• ESCI 8801 - Geomicrobiology (3.0 cr)
• ESPM 5061 - Water Quality and Natural Resources (3.0 cr)
• ESPM 5111 - Hydrology and Water Quality Field Methods (3.0 cr)
• ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
• ESPM 5402 - Biometeorology (3.0 cr)
• ESPM 5601 - Principles of Waste Management (3.0 cr)
• FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
• FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
• FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)
• FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
• FW 8459 - Stream and River Ecology (3.0 cr)
• GEOG 5401 - Geography of Environmental Systems and Global Change (4.0 cr)
• GEOG 5426 - Climatic Variations (3.0 cr)
• GEOG 5531 - Numerical Spatial Analysis (4.0 cr)
• GEOG 5562 - GIS Development Practicum (3.0 cr)
• GEOG 5839 - Introduction to Dendrochronology (3.0 cr)
• GEOG 8270 - Seminar: Climatology (3.0 cr)
• GIS 5555 - Basic Spatial Analysis (3.0 cr)
• PMB 4111 - Microbial Physiology and Diversity (3.0 cr)
• PMB 5412 - Plant Physiology (3.0 cr)
• PLPA 8103 - Plant-Microbe Interactions (3.0 cr)
• PUBH 6100 - Topics: Environmental Health (1.0 - 4.0 cr)
• PUBH 6190 - Environmental Chemistry (3.0 cr)
• PUBH 6191 - Air Pollution (3.0 cr)
• SAQR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)
• SOIL 5232 - Vadose Zone Hydrology (3.0 cr)
• SOIL 5555 - Wetland Soils (3.0 cr)
• SOIL 5611 - Soil Biology and Fertility (4.0 cr)
• SOIL 8252 - Advanced Soil Physics (2.0 cr)
• SOIL 8510 - Advanced Topics in Pedology (2.0 - 4.0 cr)
• STAT 5021 - Statistical Analysis (4.0 cr)
• STAT 5302 - Applied Regression Analysis (4.0 cr)
- STAT 5303 - Designing Experiments (4.0 cr)
- WRS 5101 - Water Policy (3.0 cr)

Thesis credits
Take 24 or more credit(s) from the following:
- LAAS 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus

Natural Resources Science and Management M.S.
Bioproducts and Biosystems Engineering, Fisheries, Wildlife, and Conservation Biology, Forest Resources
College of Food, Agricultural and Natural Resource Sciences

Link to a list of faculty for this program.

Contact Information:
Department of Forest Resources, 116d Green Hall, 1530 Cleveland Avenue N, St. Paul MN 55108 (612-624-7683; fax: 612-625-5212)
Email: nrsm@umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students in the natural resources science and management program emphasize one of the following tracks: 1) forests: biology, ecology, conservation, and management; 2) economics, policy, management, and society; 3) assessment, monitoring, and geospatial analysis; 4) recreation resources, tourism, and environmental education; 5) forest hydrology and watershed management; 6) forest products; or 7) paper science and engineering.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Most admitted students have earned degrees in natural resource-related majors. Applicants with exceptional academic records but no related background are eligible; if admitted, they may complete the prerequisites for advanced courses during the early stages of their graduate program. These prerequisites will vary depending upon the student's track and major advisor.

Applicants will not be admitted unless a member of the program faculty agrees to advise them ahead of time. This decision depends on admissibility (the applicant's overall credentials), mutual research interests, and the faculty member's ability to take on a new student. Some faculty members will not advise students unless they have funding for the student. Applicants are encouraged to review faculty profiles on the program website and begin making contacts prior to and during the application process.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language.
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Plan B project(s) is(are) designed in consultation with the student's advisor and committee. It(They) must develop and demonstrate competence in the student's track.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The MS is offered under Plan A (with thesis) and Plan B (without thesis). Plan A requires at least 20 coursework credits and Plan B requires at least 30 coursework credits. Plan A students must also register for 10 thesis credits. Plan A students usually design a program to support their specific thesis project. In consultation with faculty members, Plan B students design a program that develops competence in at least one track. Students present a seminar on the thesis or the Plan B project. Specific requirements vary by track and research project; prospective students should contact the director of graduate studies or a prospective faculty advisor for specific information. Students must also receive training in the ethical conduct of research and present a formal seminar to faculty and peers. This presentation is separate from the final exam seminar.

**Required Seminar**

All students in NRSM must take the Natural Resources Seminar course. Course was listed as FNRM 8107 prior to spring 2017, and NR 8107 in all future semesters.

NR 8107 - Seminar: Natural Resources Science and Management (1.0 cr)

**Joint- or Dual-degree Coursework:** Law, Science & Technology Student may take a total of 12 credits in common among the academic programs.

**Program Sub-plans**

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

**Assessment, Monitoring, and Geospatial Analysis**

Addresses measurements and related technology applications and resource analysis. Graduate students in this track may choose to specialize in topics such as: geographic information systems (GIS); remote sensing; geospatial analysis; survey design (including forest inventory and monitoring), measurement, modeling; and biometrics. Studies typically focus on landscape, region, or global levels.

**Assessment, Monitoring, and Geospatial Analysis - Suggested Course List**

NRSM students in the assessment, monitoring, and geospatial analysis track should refer to this list when enrolling in courses that are appropriate for their area of study. Plan A students must enroll in 19 coursework credits in addition to their seminar requirement and thesis credits, and Plan B students must enroll in 29 credits in addition to their seminar requirement. Students may elect to take courses outside of this list if advised to do so by their advisor or committee.

Take 0 or more course(s) from the following:

- **AGRO 5121** - Applied Experimental Design (4.0 cr)
- **APEC 5031** - Methods of Economic Data Analysis (3.0 cr)
- **APEC 5032** - Economic Data Analysis for Managerial and Policy Decisions (3.0 cr)
- **APEC 8211** - Econometric Analysis I (4.0 cr)
- **APEC 8212** - Econometric Analysis II (4.0 cr)
- **CI 8149** - Qualitative Research: Coding, Analysis, Interpretation, and Writing (3.0 cr)
- **CSCI 5302** - Analysis of Numerical Algorithms (3.0 cr)
- **CSCI 5707** - Principles of Database Systems (3.0 cr)
- **DES 8103** - Qualitative and Mixed Methods Research (3.0 cr)
- **ECON 8201** - Econometric Analysis (2.0 cr)
- **ECON 8203** - Econometric Analysis (2.0 cr)

Degree Plan Options

Plan A
Plan A students are required to complete 10 thesis credits of NR 8777.

-OR-

Plan B
Plan B students do not need to complete additional research credits.

Economics, Policy, Management, and Society
For students interested in focusing on how society values and makes decisions about the use, management, and protection of natural and environmental resources. Graduate students in this track can specialize in areas such as: economics, policy, administration and management, planning, operations research, conflict resolution, human dimensions, and land use planning. Studies might consider choices, impacts, and tradeoffs in protecting, restoring, developing, and allocating natural and environmental resources. The research conducted by students in this track may address a wide range of issues and problems from local to international in scope.

Economics, Policy, Management, and Society - Suggested Course List
NRSM students in the economics, policy, management, and society track should refer to this list when enrolling in courses that are appropriate for their area of study. Plan A students must enroll in 19 coursework credits in addition to their seminar requirement and thesis credits, and Plan B students must enroll in 29 credits in addition to their seminar requirement. Students may elect to take courses outside of this list if advised to do so by their advisor or committee.

Degree Plan Options

Plan A
Plan A students are required to complete 10 thesis credits of NR 8777.

-OR-

Plan B

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Plan B students do not need to complete additional research credits.

Forest Hydrology and Watershed Management
Brings together the integrally related areas of earth sciences, soils, and water resources management with an applied focus on wildland ecosystems, which may include the interface of forests with grasslands, wetlands, and agriculture. Graduate students in this track may specialize in areas such as: forest hydrology, water quality, and watershed management. Research would focus on forest, riparian, and wetland ecosystems.

Forest Hydrology and Watershed Management - Suggested Course List
NRSM students in the forest hydrology and watershed management track should refer to this list when enrolling in courses that are appropriate for their area of study. Plan A students must enroll in 19 coursework credits in addition to their seminar requirement and thesis credits, and Plan B students must enroll in 29 credits in addition to their seminar requirement. Students may elect to take courses outside of this list if advised to do so by their advisor or committee.

Degree Plan Options

Plan A
Plan A students are required to complete 10 thesis credits of NR 8777.

-OR-

Plan B
Plan B students do not need to complete additional research credits.

Forests: Biology, Ecology, Conservation, and Management
Focuses on forest resources and allows students to choose from specializations in the following areas: forest biology, ecology, ecophysiology; genetics and tree improvement; tree physiology; reproductive biology and forest regeneration; forest growth and vegetation dynamics; timber harvesting, silviculture, and sustainable forest management; landscape ecology, restoration, and management; conservation of biodiversity and wildlife habitat management; forest health; disturbance (including fire) ecology; urban and community forestry; and agroforestry. Research normally focuses on forest and related ecosystems.

Forests: Biology, Ecology, Conservation, and Management - Suggested Course List
NRSM students in the forests: biology, ecology, conservation, and management track should refer to this list when enrolling in courses that are appropriate for their area of study. Plan A students must enroll in 19 coursework credits in addition to their seminar requirement and thesis credits, and Plan B students must enroll in 29 credits in addition to their seminar requirement. Students may elect to take courses outside of this list if advised to do so by their advisor or committee.

Take 0 or more course(s) from the following:
• AGRO 5121 - Applied Experimental Design (4.0 cr)
• APEC 5031 - Methods of Economic Data Analysis (3.0 cr)
• APEC 5032 - Economic Data Analysis for Managerial and Policy Decisions (3.0 cr)
• APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
• APEC 8211 - Econometric Analysis I (4.0 cr)
• APEC 8212 - Econometric Analysis II (4.0 cr)
• BBE 5001 - Chemistry of Biomass and Biomass Conversion to Fuels and Products (4.0 cr)
• BBE 5302 - Biodegradation of Bioproducts (3.0 cr)
• BBE 5535 - Assessment and Diagnosis of Impaired Waters (3.0 cr)
• CI 8149 - Qualitative Research: Coding, Analysis, Interpretation, and Writing (3.0 cr)
• DES 8103 - Qualitative and Mixed Methods Research (3.0 cr)
• EEB 4609W - Ecosystem Ecology [ENV, WI] (3.0 cr)
• EEB 5068 - Plant Physiological Ecology (3.0 cr)
• EEB 5609 - Ecosystem Ecology (3.0 cr)
• EEB 8200 - Sustainability Science Distributed Graduate Seminar (3.0 cr)
• ENT 4251 - Forest and Shade Tree Entomology (3.0 cr)
• EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
• EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
• EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
• EPSY 5261 - Introductory Statistical Methods (3.0 cr)
• EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• ESPM 5071 - Ecological Restoration (4.0 cr)
• ESPM 5101 (inactive) (3.0 cr)
• ESPM 5108 - Ecology of Managed Systems (4.0 cr)
• ESPM 5202 - Environmental Conflict Management, Leadership, and Planning (3.0 cr)
• ESPM 5211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)
• ESPM 5242 - Methods for Environmental and Natural Resource Policy Analysis (3.0 cr)
• ESPM 5256 - Natural Resource Law and the Management of Public Lands and Waters (3.0 cr)
• ESPM 5555 - Wetland Soils (3.0 cr)
• ESPM 5603 - Environmental Life Cycle Analysis (3.0 cr)
• ESPM 5703 - Agroforestry in Watershed Management (3.0 cr)
• FNRM 5104 - Forest Ecology (4.0 cr)
• FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
• FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
• FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)
• FNRM 5203 - Forest Fire and Disturbance Ecology (3.0 cr)
• FNRM 5204 - Landscape Ecology and Management (3.0 cr)
• FNRM 5205 - Productivity and Ecology of Forest Soils (3.0 cr)
• FNRM 5218 - Measuring and Modeling Forests (3.0 cr)
• FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
• FNRM 5264 - Advanced Forest Management Planning (3.0 cr)
• FNRM 5411 - Managing Forest Ecosystems: Silviculture (3.0 cr)
• FNRM 5413 - Managing Forest Ecosystems: Silviculture Lab (1.0 cr)
• FNRM 5501 - Urban Forest Management: Managing Greenspaces for People (3.0 cr)
• FNRM 8101 - Research Problems: Physiological Ecology (1.0 - 5.0 cr)
• FNRM 8102 - Research Problems: Forest-Tree Genetics (1.0 - 5.0 cr)
• FNRM 8103 - Research Problems: Forest Hydrology (1.0 - 5.0 cr)
• FNRM 8104 - Research Problems: Forest Ecology (1.0 - 5.0 cr)
• FNRM 8105 - Research Problems: Silviculture (1.0 - 5.0 cr)
• FNRM 8106 - Research Problems: Urban Forestry--Biology and Management (1.0 - 5.0 cr)
• FNRM 8201 - Research Problems: Forest Economics (1.0 - 5.0 cr)
• FNRM 8202 - Research Problems: Forest Biometry and Measurements (1.0 - 5.0 cr)
• FNRM 8203 - Research Problems: Forest Recreation (1.0 - 5.0 cr)
• FNRM 8204 - Research Problems: Forest Policy (1.0 - 5.0 cr)
• FNRM 8205 - Research Problems: Spatial Data Analysis (1.0 - 5.0 cr)
• FNRM 8206 - Research Problems: Forest Management (1.0 - 5.0 cr)
• FNRM 8207 - Economic Analysis of Natural Resource Projects (2.0 cr)
• FNRM 8208 - Research Problems: Environmental Learning and Leadership (1.0 - 5.0 cr)
• FW 5003 - Human Dimensions of Biological Conservation (3.0 cr)
• FW 5603W - Habitats and Regulation of Wildlife [WI] (3.0 cr)
• FW 8051 - Statistical Modeling of Ecological Data using R and WinBugs/JAGS (4.0 cr)
• FW 8200 - Seminar (1.0 - 4.0 cr)
• FW 8452 - Conservation Biology (3.0 cr)
• GEOG 5426 - Climatic Variations (3.0 cr)
• GEOG 5839 - Introduction to Dendrochronology (3.0 cr)
• GEOG 8260 - Seminar: Physical Geography (2.0 cr)
• GIS 5555 - Basic Spatial Analysis (3.0 cr)
• HORT 5071 - Ecological Restoration (4.0 cr)
• NR 5021 - Statistics for Agricultural and Natural Resource Professionals (3.0 cr)
• NR 8100 - Topics in Natural Resources Science and Management (1.0 - 2.0 cr)
• OLPD 5061 - Ethnographic Research Methods (3.0 cr)
• OLPD 5528 - Focus Group Interviewing Research Methods (1.0 - 3.0 cr)
• PA 5002 - Introduction to Policy Analysis (1.5 cr)
• PA 5031 - Statistics for Public Affairs (4.0 cr)
• PA 5035 - Survey Research and Data Collection (1.5 cr)

Degree Plan Options

Plan A
Plan A students are required to complete 10 thesis credits of NR 8777.

-OR-

Plan B
Plan B students do not need to complete additional research credits.

Paper Science and Engineering
Specializes in areas such as: the chemistry and biotechnology of lignocellulosic materials; material science of paper and fiber products; paper recycling; energy and manufacturing efficiency in the pulp and paper-making process; novel and environmentally friendly pulping and bleaching, transport processes through porous media, surface and colloid science of papermaking; chemical engineering applications in pulp and paper processes; and statistical process control.

Paper Science and Engineering - Suggested Course List
NRSM students in the paper science and engineering track should refer to this list when enrolling in courses that are appropriate for their area of study. Plan A students must enroll in 19 coursework credits in addition to their seminar requirement and thesis credits, and Plan B students must enroll in 29 credits in addition to their seminar requirement. Students may elect to take courses outside of this list if advised to do so by their advisor or committee.

Plan B
Plan B students do not need to complete additional research credits.

Recreation Resources, Tourism, and Environmental Education
Focuses on the use and management of natural resources for recreation and tourism. Graduate students in this track may specialize in
areas such recreational land management, resource-based tourism, planning for recreation and tourism, and the human dimensions of natural resource uses. Additionally, students may focus on environmental education and leadership for effective communication with diverse publics about natural resources.

Recreation Resources, Tourism, and Environmental Education - Suggested Course List

NRSM students in the recreation resources, tourism, and environmental education track should refer to this list when enrolling in courses that are appropriate for their area of study. Plan A students must enroll in 19 coursework credits in addition to their seminar requirement and thesis credits, and Plan B students must enroll in 29 credits in addition to their seminar requirement. Students may elect to take courses outside of this list if advised to do so by their advisor or committee.

Take 0 or more course(s) from the following:

- AGRO 5121 - Applied Experimental Design (4.0 cr)
- APEC 4311 - Tourism Development: Principles, Processes, Policies (3.0 cr)
- APEC 5031 - Methods of Economic Data Analysis (3.0 cr)
- APEC 5032 - Economic Data Analysis for Managerial and Policy Decisions (3.0 cr)

Degree Plan Options

Plan A
Plan A students are required to complete 10 thesis credits of NR 8777.

-OR-

Plan B
Plan B students do not need to complete additional research credits.
Twin Cities Campus
Natural Resources Science and Management Minor
Bioproducts and Biosystems Engineering, Fisheries, Wildlife, and Conservation Biology, Forest Resources
College of Food, Agricultural and Natural Resource Sciences

Link to a list of faculty for this program.

Contact Information:
Department of Forest Resources, 116d Green Hall, 1530 Cleveland Avenue N., St. Paul MN 55108 (612-624-7683; fax 612-625-5212)
Email: nrsm@umn.edu
Website: http://www.nrsm.umn.edu

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 8
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Students majoring in other programs who wish to declare a minor in Natural Resources Science and Management must file a proposal with the NRSM program office.

The NRSM program does not require specific courses for completion of the minor. Rather, the student should work in consultation with their major advisor(s) and with the NRSM faculty member who will serve on the student's examination committee as the representative of the program minor.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Minor Requirements
The NRSM program does not require specific courses for completion of this minor. The minor requires at least 8 credits of graduate-level courses to be chosen in consultation with the student's major advisor and the NRSM faculty member who will serve on the student's examination committee as the minor program representative.

The proposed coursework will be reviewed by NRSM's Director of Graduate Studies, and must be approved before the student can submit their Graduate Degree Plan.
Doctoral Requirements

The NRSM program does not require specific courses for completion of this minor. The minor requires at least 12 credits of graduate-level courses to be chosen in consultation with the student's major advisor and the NRSM faculty member who will serve on the student's examination committee as the minor program representative.

The proposed coursework will be reviewed by NRSM's Director of Graduate Studies, and must be approved before the student can submit their Graduate Degree Plan.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 59 to 72
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students in the natural resources science and management (NRSM) PhD program emphasize one of the following tracks: 1) forests: biology, ecology, conservation, and management; 2) economics, policy, management, and society; 3) assessment, monitoring, and geospatial analysis; 4) recreation resources, tourism, and environmental education; 5) forest hydrology and watershed management; 6) forest products; or 7) paper science and engineering.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Most admitted students have earned degrees in natural resource-related majors. Applicants with exceptional academic records but no related background are eligible; if admitted, they may complete the prerequisites for advanced courses during the early stages of their graduate program. These prerequisites will vary depending upon the student's chosen track and major advisor.

Applicants will not be admitted unless a member of the program faculty agrees to advise the student ahead of time. This decision depends on admissibility (the applicant's overall credentials), mutual research interests, and the faculty member's ability to take on a new student. Some faculty members will not advise students unless they have funding for the student. Applicants are encouraged to review faculty profiles on the program website and begin making contacts prior to and during the application process.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
35 to 48 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The University of Minnesota requires at least 48 credits for a doctoral degree, 24 of which must be thesis credits [NR 8888]. The NRSM graduate program will typically expect to see 40 to 48 course credits. If a student enters the program with a relevant master’s degree, relevant credits from the prior degree can be transferred in to apply toward the doctoral degree pending advisor, committee, graduate program, and college approval. Normally, a student who enters the doctoral program with a master's degree will complete 30-40 additional credits in the major program. There are no minor courses required, but students have the option of formally declaring a minor.

Course selection and thesis proposals are developed by each student in consultation with the faculty advisor and are approved by the Natural Resources Science and Management Graduate Studies Committee. Students must also receive training in the ethical conduct of research and present a formal seminar to faculty and peers. This presentation is separate from the final exam seminar.

Required Seminar
All students in NRSM must take the Natural Resources Seminar course. Course was listed as FNRM 8107 prior to spring 2017, and NR 8107 in all future semesters.
NR 8107 - Seminar: Natural Resources Science and Management (1.0 cr)

Joint- or Dual-degree Coursework: Law, Science & Technology Student may take a total of 12 credits in common among the academic programs.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Assessment, Monitoring, and Geospatial Analysis
Addresses measurements and related technology applications and resource analysis. Graduate students in this track may choose to specialize in topics such as: geographic information systems (GIS); remote sensing; geospatial analysis; survey design (including forest inventory and monitoring), measurement, modeling; and biometrics. Studies typically focus on landscape, region, or global levels.

Assessment, Monitoring, and Geospatial Analysis - Suggested Course List
NRSM students in the assessment, monitoring, and geospatial analysis track should refer to this list when enrolling in courses that are appropriate for their area of study. Students must enroll in at least 34 credits in addition to their seminar and thesis credit (24 credits of NR 8888) requirements. Students may elect to take courses outside of this list if advised to do so by their advisor or committee.
Take 0 or more course(s) from the following:
• AGRO 5121 - Applied Experimental Design (4.0 cr)

Economics, Policy, Management, and Society
For students interested in focusing on how society values and makes decisions about the use, management, and protection of natural and environmental resources. Graduate students in this track can specialize in areas such as: economics, policy, administration and management, planning, operations research, conflict resolution, human dimensions, and land use planning. Studies might consider choices, impacts, and tradeoffs in protecting, restoring, developing, and allocating natural and environmental resources. The research conducted by students in this track may address a wide range of issues and problems from local to international in scope.

Economics, Policy, Management, and Society - Suggested Course List
NRSM students in the economics, policy, management, and society track should refer to this list when enrolling in courses that are appropriate for their area of study. Students must enroll in at least 34 credits in addition to their seminar and thesis credit (24 credits of NR 8888) requirements. Students may elect to take courses outside of this list if advised to do so by their advisor or committee.

Take 0 or more course(s) from the following:
• AGRO 5121 - Applied Experimental Design (4.0 cr)
• APEC 5031 - Methods of Economic Data Analysis (3.0 cr)

Forest Hydrology and Watershed Management
Brings together the integrally related areas of earth sciences, soils, and water resources management with an applied focus on wildland ecosystems, which may include the interface of forests with grasslands, wetlands, and agriculture. Graduate students in this track may specialize in areas such as: forest hydrology, water quality, and watershed management. Research would focus on forest, riparian, and wetland ecosystems.

Forest Hydrology and Watershed Management - Suggested Course List
NRSM students in the forest hydrology and watershed management track should refer to this list when enrolling in courses that are appropriate for their area of study. Students must enroll in at least 34 credits in addition to their seminar and thesis credit (24 credits of NR 8888) requirements. Students may elect to take courses outside of this list if advised to do so by their advisor or committee. Take 0 or more course(s) from the following:
• AGRO 5121 - Applied Experimental Design (4.0 cr)
• APEC 5031 - Methods of Economic Data Analysis (3.0 cr)
• APEC 5032 - Economic Data Analysis for Managerial and Policy Decisions (3.0 cr)

Forest Products
For students who wish to specialize in areas such as: wood and fiber as raw materials; deterioration of wood; wood mechanics and structural design; wood moisture interactions and drying; processing and performance of composites; economics of manufacturing systems; technology and processing of solid wood products; marketing, design and production of housing components; and energy-efficient building construction.

Forest Products - Suggested Course List
NRSM students in the forest products track should refer to this list when enrolling in courses that are appropriate for their area of study. Students must enroll in at least 34 credits in addition to their seminar and thesis credit (24 credits of NR 8888) requirements.

Take 0 or more course(s) from the following:
• AGRO 5121 - Applied Experimental Design (4.0 cr)
• APEC 5031 - Methods of Economic Data Analysis (3.0 cr)
• APEC 5032 - Economic Data Analysis for Managerial and Policy Decisions (3.0 cr)
• APEC 8211 - Econometric Analysis I (4.0 cr)
• APEC 8212 - Econometric Analysis II (4.0 cr)
• BBE 5001 - Chemistry of Biomass and Biomass Conversion to Fuels and Products (4.0 cr)
• BBE 5023 - Process Control and Instrumentation (3.0 cr)
• BBE 5301 - Applied Surface and Colloid Science (3.0 cr)
• BBE 5302 - Biodegradation of Bioproducts (3.0 cr)
• BBE 5303 - Introduction to Bio-based Materials Science (3.0 cr)
• BBE 5401 - Bioproducts Separation and Purification Processes (3.0 cr)
• BBE 5402 - Bio-based Products Engineering Lab II (1.0 cr)
• BBE 5403 - Bio-based Products Engineering Lab I (1.0 cr)
• BBE 5404 - Biopolymers and Biocomposites Engineering (3.0 cr)
• BBE 5608 - Environmental and Industrial Microbiology (3.0 cr)
• BBE 5713 - Biological Process Engineering (3.0 cr)
• BBE 5733 - Renewable Energy Technologies (3.0 cr)
• BBE 8001 - Seminar I (1.0 cr)
• BBE 8002 - Seminar II (1.0 cr)

Forests: Biology, Ecology, Conservation, and Management

Focuses on forest resources and allows students to choose from specializations in the following areas: forest biology, ecology, ecophysiology; genetics and tree improvement; tree physiology; reproductive biology and forest regeneration; forest growth and vegetation dynamics; timber harvesting, silviculture, and sustainable forest management; landscape ecology, restoration, and management; conservation of biodiversity and wildlife habitat management; forest health; disturbance (including fire) ecology; urban and community forestry; and agroforestry. Research normally focuses on forest and related ecosystems.

Forests: Biology, Ecology, Conservation, and Management - Suggested Course List

NRSM students in the forests: biology, ecology, conservation, and management track should refer to this list when enrolling in courses that are appropriate for their area of study. Students must enroll in at least 34 credits in addition to their seminar and thesis credit (24 credits of NR 8888) requirements. Students may elect to take courses outside of this list if advised to do so by their advisor or committee.

Take 0 or more course(s) from the following:

• AGRO 5121 - Applied Experimental Design (4.0 cr)
• APEC 5031 - Methods of Economic Data Analysis (3.0 cr)
• APEC 5032 - Economic Data Analysis for Managerial and Policy Decisions (3.0 cr)
• APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
• APEC 8211 - Econometric Analysis I (4.0 cr)
• APEC 8212 - Econometric Analysis II (4.0 cr)
• BBE 5001 - Chemistry of Biomass and Biomass Conversion to Fuels and Products (4.0 cr)

Paper Science and Engineering
Specializes in areas such as: the chemistry and biotechnology of lignocellulosic materials; material science of paper and fiber products; paper recycling; energy and manufacturing efficiency in the pulp and paper-making process; novel and environmentally friendly pulping and bleaching, transport processes through porous media, surface and colloid science of papermaking; chemical engineering applications in pulp and paper processes; and statistical process control.

Paper Science and Engineering - Suggested Course List
NRSM students in the paper science and engineering track should refer to this list when enrolling in courses that are appropriate for their area of study. Students must enroll in at least 34 credits in addition to their seminar and thesis credit (24 credits of NR 8888) requirements. Recreation Resources, Tourism, and Environmental Education
Focuses on the use and management of natural resources for recreation and tourism. Graduate students in this track may specialize in areas such as recreational land management, resource-based tourism, planning for recreation and tourism, and the human dimensions of natural resource uses. Additionally, students may focus on environmental education and leadership for effective communication with diverse publics about natural resources.

Recreation Resources, Tourism, and Environmental Education - Suggested Course List
NRSM students in the recreation resources, tourism, and environmental education track should refer to this list when enrolling in courses that are appropriate for their area of study. Students must enroll in at least 34 credits in addition to their seminar and thesis credit (24 credits of NR 8888) requirements. Students may elect to take courses outside of this list if advised to do so by their advisor or committee.

Take 0 or more course(s) from the following:

- AGRO 5121 - Applied Experimental Design (4.0 cr)
- APEC 4311 - Tourism Development: Principles, Processes, Policies (3.0 cr)
- APEC 5031 - Methods of Economic Data Analysis (3.0 cr)
- APEC 5032 - Economic Data Analysis for Managerial and Policy Decisions (3.0 cr)
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)
- CI 5537 - Principles of Environmental Education (3.0 cr)
- CI 5747 - Global and Environmental Education: Content and Practice (3.0 cr)
- CI 8149 - Qualitative Research: Coding, Analysis, Interpretation, and Writing (3.0 cr)
- DES 8103 - Quantitative and Mixed Methods Research (3.0 cr)
- EEB 5053 - Ecology: Theory and Concepts (4.0 cr)
- EPSY 5241 - Principles of Educational and Psychological Measurement (3.0 cr)
- EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
- EPSY 5244 - Survey Design, Sampling, and Implementation (3.0 cr)
- EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 8256 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- ESPM 5202 - Environmental Conflict Management, Leadership, and Planning (3.0 cr)
- ESPM 5211 - Survey, Measurement, and Modeling for Environmental Analysis (3.0 cr)
- ESPM 5242 - Methods for Environmental and Natural Resource Policy Analysis (3.0 cr)
- ESPM 5245 - Sustainable Land Use Planning and Policy (3.0 cr)
- ESPM 5251 - Natural Resources in Sustainable International Development (3.0 cr)
- ESPM 5261 - Economics and Natural Resources Management (4.0 cr)
- ESPM 5603 - Environmental Life Cycle Analysis (3.0 cr)
- ESPM 5811 - Environmental Interpretation (3.0 cr)
- FNRM 5101 - Park and Protected Area Tourism (3.0 cr)
- FNRM 5104 - Forest Ecology (4.0 cr)
- FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
- FNRM 5201 - Introduction to Travel and Tourism (3.0 cr)
- FNRM 5232 - Managing Recreational Lands (4.0 cr)
- FNRM 5259 - Visitor Behavior Analysis (3.0 cr)
- FNRM 8101 - Research Problems: Physiological Ecology (1.0 - 5.0 cr)
- FNRM 8102 - Research Problems: Forest-Tree Genetics (1.0 - 5.0 cr)
- FNRM 8103 - Research Problems: Forest Hydrology (1.0 - 5.0 cr)
- FNRM 8104 - Research Problems: Forest Ecology (1.0 - 5.0 cr)
- FNRM 8105 - Research Problems: Silviculture (1.0 - 5.0 cr)
- FNRM 8106 - Research Problems: Urban Forestry–Biology and Management (1.0 - 5.0 cr)
• FNRM 8201 - Research Problems: Forest Economics (1.0 - 5.0 cr)
• FNRM 8202 - Research Problems: Forest Biometry and Measurements (1.0 - 5.0 cr)
• FNRM 8203 - Research Problems: Forest Recreation (1.0 - 5.0 cr)
• FNRM 8204 - Research Problems: Forest Policy (1.0 - 5.0 cr)
• FNRM 8205 - Research Problems: Spatial Data Analysis (1.0 - 5.0 cr)
• FNRM 8206 - Research Problems: Forest Management (1.0 - 5.0 cr)
• FNRM 8207 - Economic Analysis of Natural Resource Projects (2.0 cr)
• FNRM 8208 - Research Problems: Environmental Learning and Leadership (1.0 - 5.0 cr)
• FW 5003 - Human Dimensions of Biological Conservation (3.0 cr)
• GIS 5555 - Basic Spatial Analysis (3.0 cr)
• GRAD 8101 - Teaching in Higher Education (3.0 cr)
• GRAD 8200 - Teaching and Learning Topics in Higher Education (1.0 cr)
• LS 5950 - Special Topics (1.0 - 4.0 cr)
• NR 5021 - Statistics for Agricultural and Natural Resource Professionals (3.0 cr)
• NR 8100 - Topics in Natural Resources Science and Management (1.0 - 2.0 cr)
• OLPD 5061 - Ethnographic Research Methods (3.0 cr)
• OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
• OLPD 5502 - Theory and Models of Evaluation (3.0 cr)
• OLPD 5528 - Focus Group Interviewing Research Methods (1.0 - 3.0 cr)
• OLPD 5611 - Facilitation and Meeting Skills (1.0 cr)
• PA 4101 - Nonprofit Management and Governance (3.0 cr)
• PA 5002 - Introduction to Policy Analysis (1.5 cr)
• PA 5011 - Management of Organizations (3.0 cr)
• PA 5031 - Statistics for Public Affairs (4.0 cr)
• PA 5035 - Survey Research and Data Collection (1.5 cr)
• PA 5041 - Qualitative Methods for Policy Analysts (4.0 cr)
• PA 5111 - Financing Public and Nonprofit Organizations (3.0 cr)
• PA 5501 - Theories and Policies of Development (3.0 cr)
• PA 5920 - Skills Workshop (0.5 - 4.0 cr)
• POL 8126 - Qualitative Methods (3.0 cr)
• PSY 5202 - Attitudes and Social Behavior (3.0 cr)
• PSY 5960 - Topics in Psychology (1.0 - 4.0 cr)
• PUBH 7250 - Designing and Conducting Focus Group Interviews (1.0 cr)
• PUBH 7407 - Analysis of Categorical Data (3.0 cr)
• SOC 5811 - Social Statistics for Graduate Students [MATH] (4.0 cr)
• SOC 8701 - Sociological Theory (4.0 cr)
• SOC 8801 - Sociological Research Methods (4.0 cr)
• SOC 8811 - Advanced Social Statistics (4.0 cr)
• STAT 5021 - Statistical Analysis (4.0 cr)
• STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
• STAT 5302 - Applied Regression Analysis (4.0 cr)
• STAT 5303 - Designing Experiments (4.0 cr)
• STAT 5401 - Applied Multivariate Methods (3.0 cr)
• STAT 5421 - Analysis of Categorical Data (3.0 cr)
• STAT 5601 - Nonparametric Methods (3.0 cr)
• STAT 8051 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)
• STAT 8052 - Applied Statistical Methods 2: Design of Experiments and Mixed -Effects Modeling (3.0 cr)
• STAT 8053 - Applied Statistical Methods 3: Multivariate Analysis and Advanced Regression (3.0 cr)
• STAT 8054 - Statistical Methods 4: Advanced Statistical Computing (3.0 cr)
• WRIT 5051 - Graduate Research Writing for International Students (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Nutrition is the study of how nutrients, both essential and nonessential, affect health and all life processes. Consequently, nutrition is an extremely broad field that encompasses physiology, biochemistry, education, public health, and public policy. The nutrition graduate program is interdisciplinary. Advisors and financial support may come from any of the departments or schools in which nutrition graduate faculty reside, including the Department of Food Science and Nutrition (College of Food, Agricultural and Natural Resource Sciences); Division of Epidemiology (School of Public Health); Departments of Medicine, Surgery, Psychiatry, Lab Medicine and Pathology, and Family Medicine and Community Health (Medical School); Department of Kinesiology and Leisure Studies (College of Education and Human Development); Department of Biochemistry and Molecular Biology (University of Minnesota Duluth); University of Minnesota Extension; Hormel Institute (Austin, MN); and V.A. Medical Center and Park Nicollet Institute (Minneapolis, MN).

Three subspecialty areas are offered in the program: human nutrition, nutritional biochemistry, and public health nutrition. Thesis work can be conducted locally or internationally in the laboratory, clinic, or field.

Students are allowed a maximum of 5 years in the program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants to the program need a bachelor's degree in any field or its international equivalent.

Other requirements to be completed before admission:
A strong foundation in the biological and physical sciences is required. This background includes college mathematics, the equivalent of one semester of general chemistry, organic chemistry, general biology, biochemistry, physiology, and statistics. For the doctoral program, additional prerequisite courses include calculus and physics. If there is evidence that the applicant has a good background in the sciences, some of the prerequisites can be met after admission. The M.S. program also requires the following nutrition courses, or equivalent, which may be completed after the student's admission to the program: Principles of Nutrition (FSCN 1112), Life Cycle Nutrition (FSCN 3612), and Human Nutrition (FSCN 4612).

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  • IELTS
  - Total Score: 6.5
  • MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is a combined total of approximately 120 hours (the equivalent of three full-time weeks) of work. The graduate faculty, including the student’s advisor and director of Graduate Studies, specify both the nature and extent of the course and project work necessary to satisfy this requirement.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

All students are expected to obtain teaching experience, subject to the policies of the advisor’s department or division.

Required Coursework

All students must take the following courses for at least 20 credits:

Orientation Course
NUTR 8621 - Presentation Skills (1.0 cr)

Core Coursework
NUTR 5625 - Nutritional Biochemistry (3.0 cr)
NUTR 5626 - Nutritional Physiology (3.0 cr)
NUTR 5622 - Vitamin and Mineral Biochemistry (3.0 cr)
NUTR 5624 - Nutrition and Genetics (2.0 cr)

Advanced Topics Course
Take at least one course from the following list after completing two semesters in the program:
NUTR 8620 - Advances in Nutrition (2.0 cr)

Outside Coursework
All students must complete at least 6 credits outside the major, including at least one statistics course and at least one methods course.

Statistics Course
Take at least one statistics course from the following list. A different statistics course can be substituted with advisor approval.

PUBH 6450 - Biostatistics I (4.0 cr)
or PUBH 6451 - Biostatistics II (4.0 cr)
or PUBH 6414 - Biostatistical Literacy (3.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)

Research Methods Course
Take one or more courses for at least 2 credits of research methods coursework from this list, or graduate-level methods coursework from another field with advisor approval.

ANSC 5091 - Research Proposals: From Ideas to Strategic Plans [WI] (3.0 cr)
or NURS 8173 - Principles and Methods of Implementing Research (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
or PUBH 6617 - Practical Methods for Secondary Data Analysis (3.0 cr)
or PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)
or PUBH 6806 - Principles of Public Health Research (2.0 cr)

Additional Outside Coursework
Other courses may be from any field, but must be at the 5000 or 8000 level. Exceptions: 6000 level courses from Public Health (PUBH) are allowed.

The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Plan Options

Plan A: Master's Thesis Credits
Plan A students take at least 10 credits of the following:
NUTR 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B: Additional Coursework
Plan B students must take at least 10 credits from the following, or other graduate-level coursework with advisor approval:
NUTR 8695 - Independent Study: Nutrition (1.0 - 10.0 cr)
NUTR 8xxx
NUTR 5xxx

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Integrated BS/MS-Nutrition
This sub-plan is limited to students completing the program under Plan B.

The Department of Food Science and Nutrition offers and integrated bachelor of science (BS) and master of science (MS) in nutrition. The integrated BS/MS program offers students the opportunity to earn both degrees in five years by working toward a master's degree while simultaneously working toward their undergraduate degree. Nutrition undergraduate students in the DPD or nutrition studies sub-plans are welcome to apply to this program during their 3rd year of undergraduate study. During the 4th year, students take undergraduate and graduate courses concurrently and are advised by an undergraduate and graduate program advisor.

Students in this program will complete the 120 undergraduate credits required for a BS degree in nutrition by the end of the 4th year and must be awarded an undergraduate degree at the 4th year mark. During the 4th and 5th years, students will complete 30 graduate credits and a Plan B research project with a final oral defense as required for the nutrition MS degree. Students who satisfy the Didactic Program in Dietetics (DPD) verification requirements can begin the Emily Program Dietetic Internship in August following their 5th year. Students cannot double-count credits to meet credit requirements for both the undergraduate and graduate degrees.

- This program requires summer semesters for timely completion.  
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

Plant pathology focuses on the biology of plant-microbe interactions, and incorporates research involving biochemical, molecular, genetic, physiological, whole organism, population, and community levels of biological organization. Plant pathology interfaces with all plant science disciplines, and with many other fields including food sciences, veterinary medicine, biobased products, and ecology. Areas of concentration include molecular plant pathology (offered as a special emphasis), plant disease management, biological control of plant disease, forest pathology and microbial degradation of wood, microbial ecology, population biology, plant-microbe interactions, disease resistance, host-parasite coevolution, plant microbe mutualisms, and virology. Students have opportunities for laboratory and field research locally, as well as nationally and internationally. The course of study varies with the requirements for the area of concentration and interests of the student. Students who choose the emphasis in molecular plant pathology enhance their ability to design and use molecular approaches to investigate plant disease, increase basic knowledge, and develop new strategies for disease control.

**Program Delivery**  
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**  
The preferred undergraduate GPA for admittance to the program is 3.50.

Master's degree applicants must have a sound college background in the basic biological and physical sciences and mathematics.

Other requirements to be completed before admission:
Applicants must have completed 35 semester credits in biology with at least one course in each of the following areas: botany, zoology, genetics, plant physiology, and microbiology. Applicants must also have completed at least one course each in inorganic chemistry, organic chemistry, biochemistry, and physics. If deficiencies exist in the prerequisites, students must correct them during the first year of the graduate program. These courses cannot be counted as part of the degree program. All students accepted into the department with a BS degree are admitted into the MS program. After a minimum of two semesters, students who qualify may elect to change their degree status to the PhD program. Criteria for the change include scholastic standing, potential for success in completing a PhD, and writing competency.

**Special Application Requirements:**
GRE scores are required for all students and TOEFL or IELTS scores are required for international students. A clearly written statement of career interests as well as three letters of recommendation are required of all students. Students may apply at any time; however, submission of all application materials by December 10 will ensure priority consideration for fellowships and research assistantships for the next academic year. Students can be admitted any semester.

Applicants must submit their test score(s) from the following:
- GRE  
  - General Test - Verbal Reasoning: 153  
  - General Test - Quantitative Reasoning: 148  
  - General Test - Analytical Writing: 4.5

© 2005 by the Regents of the University of Minnesota  
The University of Minnesota is an equal opportunity educator and employer.  
Information current as of August 31, 2018
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5

The preferred English language test is Test of English as Foreign Language (TOEFL).

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** The Plan B option requires one to three projects, determined and approved by the advisor and director of graduate studies, totaling approximately 120 hours of work.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

All students:

- Students must enroll in a credit or non-credit teaching methods seminar or workshop, chosen in consultation with the advisor and director of graduate studies.
- Regular attendance at weekly plant pathology seminars is expected.
- Internships are encouraged as part of the graduate experience. Financial support for international or domestic internships is available on a competitive basis.
- Take PLPA 5480 (3 credits), if an introductory plant pathology course has not previously been taken.

**Required Coursework**

Take all of the following courses. Take PLPA 8005 (S-N grade basis) for 2 credits for completing a one-semester teaching experience. Consult with the advisor and director of graduate studies regarding the additional teaching methods seminar/workshop requirement. These credits count toward the major credit requirement.

- **PLPA 5480** - Principles of Plant Pathology (3.0 cr)
- **PLPA 8123** - Research Ethics in Plant and Environmental Sciences (0.5 cr)
- **PLPA 8200** - Seminar (1.0 cr)
- **PLPA 8005** - Supervised Classroom or Extension Teaching Experience (1.0 - 2.0 cr)
- **PLPA 8104** - Plant Virology (2.0 cr)
- **PLPA 8105** - Plant Bacteriology (2.0 cr)

**Plant Pathology Electives**

Select at least 5 credits from the following course list in consultation with the director of graduate studies, advisor, and graduate advisory committee.

Take 5 or more credit(s) from the following:

- **PLPA 5003** - Diseases of Forest and Shade Trees (3.0 cr)
- **PLPA 5202** - Field Plant Pathology (2.0 cr)
- **PLPA 5203** - Introduction to Fungal Biology (3.0 cr)
- **PLPA 5300** - Current Topics in Molecular Plant Pathology (1.0 cr)
- **PLPA 5301** - Large Scale Omic Data in Plant Biology (3.0 cr)
- **PLPA 5444** - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
- **PLPA 5660** - Plant Disease Resistance and Applications (3.0 cr)
- **PLPA 8103** - Plant-Microbe Interactions (3.0 cr)
Outside Coursework
Take at least 6 credits outside the major. Select courses in consultation with the advisor, director of graduate studies, and advisory committee. Suggested courses include the following:
AGRO 8241 - Chromosomal and Molecular Genetics of Plant Improvement (3.0 cr)
EEB 5221 - Molecular Evolution (3.0 cr)
GCD 5036 - Molecular Cell Biology (3.0 cr)
BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)

Thesis Credits or Capstone Project Credits
Plan A students must take 10 credits of PLPA 8777. Plan B students must take 10 credits of PLPA 8300.

Thesis Credits
Plan A students take 10 credits of PLPA 8777. 
Take 10 or more credit(s) from the following:
• PLPA 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

or Plan B students take 10 credits of PLPA 8300.
Take 10 or more credit(s) from the following:
• PLPA 8300 - Plant Pathology Project (1.0 - 6.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Molecular Plant Pathology
This sub-plan is limited to students completing the program under Plan A.

Students in the molecular plant pathology track complete specialized coursework that emphasizes molecular approaches to investigating plant diseases, increase their knowledge of basic science, and explore emerging strategies for disease control. Students in the molecular plant pathology track will learn about topics such as pathogen effectomics, plant phenomics, molecular plant/microbe interactions, and an ever-evolving array of molecular research techniques, strategies, and analytical approaches. At the same time, students will garner a comprehensive understanding of plant interactions with pathogenic and non-pathogenic microbes from a systems level, building a firm knowledge base of classical and contemporary plant pathology concepts. Students completing the molecular plant pathology track will be well positioned for research careers in molecular plant pathology in academia, industry, and government.

Take all of the following courses. Take PLPA 8005 (S-N grade basis) for 2 credits for completing a one-semester teaching experience. Consult with the advisor and director of graduate studies regarding the additional teaching methods seminar/workshop requirement. These credits count toward the major credit requirement.

Molecular Plant Pathology
Take 14 - 20 credit(s) from the following:

Required Coursework
Minimum of 14 credits in plant pathology required.
• PLPA 5480 - Principles of Plant Pathology (3.0 cr)
• PLPA 5300 - Current Topics in Molecular Plant Pathology (1.0 cr)
• PLPA 8103 - Plant-Microbe Interactions (3.0 cr)
• PLPA 8200 - Seminar (1.0 cr)
• PLPA 8123 - Research Ethics in Plant and Environmental Sciences (0.5 cr)
• PLPA 8005 - Supervised Classroom or Extension Teaching Experience (1.0 - 2.0 cr)

Outside Coursework
Take at least 6 course credits outside the major. Select courses in consultation with advisor, director of graduate studies, and advisory committee. Suggested courses include the following:
• AGRO 8241 - Chromosomal and Molecular Genetics of Plant Improvement (3.0 cr)
• BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
• EEB 5221 - Molecular Evolution (3.0 cr)
• GCD 5036 - Molecular Cell Biology (3.0 cr)

Plant Pathology Electives
Take elective credits from the following list, chosen in consultation with your advisor, director of graduate studies, and advisory committee to meet the 14-credit (Plan A) minimum major requirement.
Take at most 8 credit(s) from the following:
• PLPA 5003 - Diseases of Forest and Shade Trees (3.0 cr)
• PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
• PLPA 5660 - Plant Disease Resistance and Applications (3.0 cr)
• PLPA 5202 - Field Plant Pathology (2.0 cr)
• PLPA 5203 - Introduction to Fungal Biology (3.0 cr)
- PLPA 5301 - Large Scale Omic Data in Plant Biology (3.0 cr)
- PLPA 8104 - Plant Virology (2.0 cr)
- PLPA 8105 - Plant Bacteriology (2.0 cr)

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctoral

Doctoral
Take 12 or more credit(s) from the following:
- PLPA 8103 - Plant-Microbe Interactions (3.0 cr)
- PLPA 5300 - Current Topics in Molecular Plant Pathology (1.0 cr)
- PLPA 5301 - Large Scale Omic Data in Plant Biology (3.0 cr)
- PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
- PLPA 5480 - Principles of Plant Pathology (3.0 cr)
- PLPA 8104 - Plant Virology (2.0 cr)
- PLPA 8105 - Plant Bacteriology (2.0 cr)
- PLPA 8123 - Research Ethics in Plant and Environmental Sciences (0.5 cr)

Masters

Master's Minor
Take 6 or more credit(s) from the following:
• PLPA 5103 - Plant-Microbe Interactions (3.0 cr)
• PLPA 5300 - Current Topics in Molecular Plant Pathology (1.0 cr)
• PLPA 5301 - Large Scale Omic Data in Plant Biology (3.0 cr)
• PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)
• PLPA 5480 - Principles of Plant Pathology (3.0 cr)
• PLPA 8104 - Plant Virology (2.0 cr)
• PLPA 8105 - Plant Bacteriology (2.0 cr)
• PLPA 8123 - Research Ethics in Plant and Environmental Sciences (0.5 cr)

---

**Program Requirements**

20 credits are required in the major.

12 credits are required outside the major.

24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students must enroll in a supervised teaching or extension teaching experience, chosen in consultation with the advisor and director of graduate studies.

Degree plans are determined by the advisory committee, with approval of the director of graduate studies.

Regular attendance at weekly plant pathology seminars is expected.

Internships are encouraged as part of the graduate experience. Financial support for international or domestic internships is available on a competitive basis.

**Required Coursework (13 credits)**

All students take the following courses, if not completed previously. Take PLPA 8200 twice for a total of 2 credits. Take PLPA 8005 for 2 credits to fulfill the one-semester teaching experience requirement. Take GRAD 8101 concurrently with or after completing PLPA 8005.

- **PLPA 5480 - Principles of Plant Pathology** (3.0 cr)
- **PLPA 8103 - Plant-Microbe Interactions** (3.0 cr)
- **PLPA 8123 - Research Ethics in Plant and Environmental Sciences** (0.5 cr)
- **PLPA 8200 - Seminar** (1.0 cr)
- **PLPA 8005 - Supervised Classroom or Extension Teaching Experience** (1.0 - 2.0 cr)
- **GRAD 8101 - Teaching in Higher Education** (3.0 cr)

**Electives (12 credits)**

Take at least 12 credits, in consultation with the advisor, to complete the outside credit requirement.

- **AGRO 8241 - Chromosomal and Molecular Genetics of Plant Improvement** (3.0 cr)
- **ANSC 5200 - Statistical Genetics and Genomics** (4.0 cr)
- **BIOC 5361 - Microbial Genomics and Bioinformatics** (3.0 cr)
- **CSCI 5481 - Computational Techniques for Genomics** (3.0 cr)
- **EEB 5221 - Molecular Evolution** (3.0 cr)
- **AGRO 5021 - Plant Breeding Principles** (3.0 cr)
- **GCD 5036 - Molecular Cell Biology** (3.0 cr)
- **GCD 8131 - Advanced Molecular Genetics and Genomics** (3.0 cr)
- **MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses** (4.0 cr)
- **AGRO 5431 - Applied Plant Genomics and Bioinformatics** (3.0 cr)
BBE 5302 - Biodegradation of Bioproducts (3.0 cr)
PMB 5412 - Plant Physiology (3.0 cr)
CSCI 5461 - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)

Thesis Credits
Take at least 24 doctoral thesis credits.
PLPA 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Standard Program

Standard Program Courses (7 credits)
Take the following courses:
- PLPA 8104 - Plant Virology (2.0 cr)
- PLPA 8105 - Plant Bacteriology (2.0 cr)
- PLPA 5444 - Ecology, Epidemiology, and Evolutionary Biology of Plant-Microbe Interactions (3.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Molecular Plant Pathology
Students in the molecular plant pathology track complete specialized coursework that emphasizes molecular approaches to investigating plant diseases, increase their knowledge of basic science, and explore emerging strategies for disease control. Students in the Molecular Plant Pathology track will learn about topics such as pathogen effectomics, plant phenomics, molecular plant/microbe interactions, and an ever-evolving array of molecular research techniques, strategies, and analytical approaches. At the same time, students will garner a comprehensive understanding of plant interactions with pathogenic and non-pathogenic microbes from a systems level, building a firm knowledge base of classical and contemporary plant pathology concepts. Students completing the molecular plant pathology track will be well positioned for research careers in molecular plant pathology in academia, industry, and government.

Molecular Plant Pathology Courses (7 credits)
Take the following courses. Take PLPA 5300 twice for a total of 2 credits.
- PLPA 5301 - Large Scale Omic Data in Plant Biology (3.0 cr)
- PLPA 5300 - Current Topics in Molecular Plant Pathology (1.0 cr)

Virology OR Bacteriology
Take one of the following courses:
- PLPA 8104 - Plant Virology (2.0 cr)
- or PLPA 8105 - Plant Bacteriology (2.0 cr)
Twin Cities Campus

Risk Analysis for Introduced Species and Genotypes Minor

• Program Type: Graduate free-standing minor
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 13
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor in risk analysis for introduced species and genotypes is available to master's (M.A. and M.S.) and doctoral students. The minor provides an interdisciplinary curriculum that addresses all phases of risk analysis pertaining to the introduction of exotic species and novel genotypes. The curriculum is based on collaborative learning and includes a survey course, discussions, a problem solving practicum, and a cooperative learning practicum. The minor complements major programs in applied economics; applied plant sciences; conservation biology; ecology, evolution, and behavior; entomology; natural resources science and management; plant biological sciences; and water resources science.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
ISG Core Courses
The master's minor requires 6 graduate credits from the core curriculum; ISG 8001 must be taken two times for 1 credit each time.
ISG 5010 - Risk Analysis for Introduced Species and Genotypes (3.0 cr)
ISG 5020 - Risk Analysis Modeling for Introduced Species and Genotypes (1.0 cr)
ISG 8001 - Discussions in Introduced Species and Genotypes (1.0 cr)

Doctoral
ISG Doctoral Minor
In addition to the 10-credit core listed, a 3-credit decision analysis or quantitative modeling course from another program is required. ISG 8001 must be taken twice for one credit.
ISG 5010 - Risk Analysis for Introduced Species and Genotypes (3.0 cr)

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
ISG 5020 - Risk Analysis Modeling for Introduced Species and Genotypes (1.0 cr)
ISG 8001 - Discussions in Introduced Species and Genotypes (1.0 cr)
ISG 8021 - Problem Solving Practicum in Risk Analysis (3.0 cr)
ISG 8031 - Cooperative Learning Practicum (1.0 cr)
Twin Cities Campus

Email: sheaf001@umn.edu
Website: http://www.misa.umn.edu/StudentPrograms/GraduateMinor/index.htm

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor in sustainable agriculture systems offers master's (MA and MS) and doctoral students an interdisciplinary curriculum that considers the biological, sociological, and economic aspects of agriculture. The minor emphasizes a holistic perspective to designing farming and food systems and solving problems in agriculture. The importance of yield and profitability are balanced by considerations of the environment and the health and social well-being of producers, consumers, and communities. A unique component of the minor is an on-site internship with growers, grassroots organizations, or public agencies working in sustainable agriculture. The minor complements major programs in ecology, conservation biology, forestry, sociology, geography, political science, and public affairs, as well as majors in the College of Food, Agricultural and Natural Resource Sciences.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission is contingent upon prior admission to a master's or doctoral degree-granting program.

Special Application Requirements:
Contact the director of graduate studies in sustainable agriculture systems for an Intent to Enroll Form. Students are admitted each semester.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Required Coursework (6 Credits)
All students pursuing the Sustainable Agriculture Systems minor must complete the following courses for a total of 6 credits. Take SAGR 8020 for 1 credit.
SAGR 8010 - Colloquium in Sustainable Agriculture (2.0 cr)
SAGR 8020 - Field Experience in Sustainable Agriculture (1.0 - 4.0 cr)
AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
**Master’s-level Minor**
The master's-level Sustainable Agriculture minor comprises the 6 required course credits noted above.

Doctoral
**Doctoral-level Minor Electives (6 Credits)**
In addition to the 6 required credits, select at least 6 credits in consultation with the Sustainable Agriculture Systems director of graduate studies to complete the 12-credit minimum.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 15
- This program does not require summer semesters for timely completion.
- Degree: Advanced Dental Therapy PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Advanced Dental Therapy certificate is designed for dental therapists who have completed a baccalaureate or master degree in dental therapy from the University of Minnesota, School of Dentistry between the years 2011 and 2014. It focuses on acquiring the knowledge and skills mandated by the Minnesota Board of Dentistry to become eligible for advanced dental therapy certification.

Program Delivery
This program is available:
• completely online (all program coursework can be completed online)

Prerequisites for Admission
Bachelor Degree of Dental Therapy from the University of Minnesota.

Master Degree of Dental Therapy from the University of Minnesota.

Other requirements to be completed before admission:
Completion of a Bachelor of Science in Dental Therapy degree or Master of Dental Therapy degree at the University of Minnesota, School of Dentistry between 2011 thru 2014. Holds current credentials of Licensed Dental Therapist in the state of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students are required to maintain a minimum GPA of 3.00 and to achieve no less than a C grade in each course. Students must enroll in the Advance Dental Therapy Post-baccalaureate Certificate within five years following the completion of their dental therapy degree and must complete the course and clinic requirements within five years of enrollment.

Required Didactic Coursework (5 Credits)
Take the following courses for a total of 5 credits:
DT 5162 - Principles of Exodontia and Minor Oral Surgery (1.0 cr)
DT 6321 - Treatment Planning (2.0 cr)
DT 6341 - Advanced Dental Therapy Prep Lecture (2.0 cr)

Required Clinical Coursework (10 Credits)
Take the following for at least 10 credits:
DT 6340 - Advanced Dental Therapy Prep Clinic (10.0 cr)
Twin Cities Campus
Dental Hygiene M.S.D.H.
Denistry Primary Care Administration
School of Dentistry

Website: http://www.dentistry.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 33 to 40
- This program requires summer semesters for timely completion.
- Degree: Master of Science Dental Hygiene

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of science in dental hygiene program prepares leaders in the profession for practice, research, the healthcare industry, and academia.

The curriculum provides meaningful academic experiences for each graduate student based on their career goals and interest. Courses in the management track will provide students with knowledge and skills necessary for careers in the healthcare industry such as sales, marketing and professional relations management, management of large dental clinics, practice management consulting, and entrepreneurship.

Courses in the education track will provide students with the knowledge and skills to teach didactic, clinic, and laboratory courses in dental hygiene programs; conduct research; and assume administrative positions.

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Graduate of an accredited US institution or foreign equivalent dental hygiene program.

Other requirements to be completed before admission:
Baccalaureate degree; dental hygiene license; CPR certification; undergraduate statistics course.

Special Application Requirements:
Applicants must submit directly to the Admissions Committee a typed essay including short and long term goals and an explanation of why an advanced degree is of interest, a current resume including evidence of leadership and dental hygiene clinic experience, and three letters of reference. Deadline May 1.

Applicants pursuing the managment track must submit their GMAT score.

Applicants must submit their test score(s) from the following:
- GMAT
  - Total score: 500

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 94
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
IELTS
- Total Score: 6.5
MELAB
- Final score: 80
- Speaking test score: 0

Key to test abbreviations (GMAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 23 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan C: Plan C requires 40 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: Plan C students complete a capstone project based on internship experiences.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Core Curriculum (11 Credits)

All MSDH students take the following courses for a total of 11 credits:

- DH 5401 - Research Methods in Health Sciences (3.0 cr)
- DH 5407 - Instructional Strategies for Effective Teaching (2.0 cr)
- DH 5411 - Administrative Leadership and Professional Development (2.0 cr)
- DH 5421 - Grant Writing for Health Professionals (1.0 cr)

Statistics

- EPSY 5261 - Introductory Statistical Methods (3.0 cr)

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Dental Hygiene Education

This sub-plan is limited to students completing the program under Plan A.

Courses in the dental hygiene education track provide students with the knowledge and skills to teach didactic, clinic, and laboratory courses in dental hygiene programs; conduct research; and assume administrative positions.

Education Track Curriculum (12 Credits)

In addition to the 11 MSDH core credits, take the following 12 credits to complete the 23 course credits required:

- DH 5403 - The Discipline of Dental Hygiene (2.0 cr)
- DH 5405 - Curriculum and Course Development (2.0 cr)
- DH 5409 - Dental Hygiene Clinic Administration (2.0 cr)
- DH 5413 - Dental Hygiene Supervised Clinic Student Teaching (4.0 cr)
- DH 5415 - Dental Hygiene Supervised Didactic Course Student Teaching (2.0 cr)

Thesis Credits

Take 10 masters thesis credits.

- DH 8777 - Thesis Credits: Master’s (1.0 - 18.0 cr)
This sub-plan is limited to students completing the program under Plan A or Plan C.

The Management Track coursework can be taken on-line or on campus. Courses in the management track provide students with the knowledge and skills necessary for healthcare industry careers such as sales, marketing and professional relations management, management of large dental clinics, practice management consulting, and entrepreneurship.

**Management Track Curriculum (27 to 29 Credits)**
In addition to the 11 MSDH core credits, Plan A students take 27 credits (17 course credits and 10 thesis credits) to complete the 38-credit minimum, and Plan C students take 29 credits to complete the 40-credit minimum.

**Management Track Core Courses (9 Credits)**
All Management track students take the following courses for a total of 9 credits:
- MBA 6030 - Financial Accounting (3.0 cr)
- MBA 6210 - Marketing Management (3.0 cr)
- MBA 6220 - Supply Chain & Operations (3.0 cr)

**MBA Electives (8 to 12 Credits)**
Plan A students select at least 8 credits, and Plan C students select at least 12 credits, from the following list in consultation with the advisor. Alternative courses may be taken with advisor approval.
- ENTR 6020 - Business Formation (4.0 cr)
- HRIR 6301 - Staffing, Training, and Development (4.0 cr)
- MBA 6300 - Strategic Management (3.0 cr)
- MILI 6235 - Pharmaceutical Industry: Business and Policy (2.0 cr)
- MILI 6562 - Information Technology in Health Care (2.0 cr)
- MKTG 6051 - Marketing Research (4.0 cr)

**Plan A Option (10 Credits)**
Plan A students must take 10 masters thesis credits.
- DH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

**Plan C Option (8 Credits)**
Plan C students must take the following courses for a total of 8 credits:
- DH 5201 - Management Internship (5.0 cr)
- DH 5203 - Capstone Project (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 91
- This program requires summer semesters for timely completion.
- Degree: Master of Dental Therapy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The M.D.T. program blends a strong dental therapy education with the study of the biological, behavioral, and social sciences. It provides the didactic, laboratory, and clinical experiences required for the assessment and treatment of specified dental procedures. Dental therapy students learn alongside the dental and dental hygiene students with whom they will work with after graduation.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must have a bachelor of science or bachelor of arts degree.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 92
  - Internet Based - Writing Score: 20
  - Internet Based - Reading Score: 20

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 91 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program requires summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The MS program in dentistry prepares dentists with clinical expertise for positions of leadership in education, research, and program administration in the oral health field. A multidisciplinary faculty of dental educators, researchers, and clinicians teach the program, which is housed in the School of Dentistry. All students complete core coursework in teaching and evaluation of dentistry, research methods, and health care administration. Additional advanced coursework is offered in these same focus areas, as well as in selected clinical and oral science topics with multidisciplinary impact, including conscious sedation, craniofacial pain, geriatrics, oral biology, oral medicine and radiology, oral pathology, practice administration, and psychology. Students have flexibility in planning individualized programs to accommodate their specific areas of interest, and courses from other disciplines may be included for credit in the major area.

Students enrolled in an advanced clinical dental training program may be admitted to the dentistry graduate program for concurrent study, but must carefully plan their curriculum with their faculty adviser and the director of graduate studies so that their residency and M.S. programs are appropriately integrated and satisfy University registration requirements. Programs in the School of Dentistry that may enroll students for the MS degree include: General Practice Residency, Endodontics, Geriatrics, Orthodontics, Pediatric dentistry, Periodontics, Prosthodontics and Orofacial Pain

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

DDS/DMD or equivalent from accredited US institution or recognized foreign school. Clinical residency enrollment and 3.0 GPA or rank in top quarter of graduating professional school class preferred.

Other requirements to be completed before admission:
Applicants must submit three letters of recommendation from individuals familiar with their academic capabilities. Also required is a brief essay (under 500 words) which relates the applicant's career goals to the goals of the program. Applications are received and reviewed throughout the year. Students may enter the program in any semester at the discretion of program faculty.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 80
  - Paper Based - Total Score: 600

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the
Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students must complete training in the responsible conduct of research.

Core Coursework (8-9 Credits)

All students must select at least 8 credits, in consultation with the advisor, from the following list:

Required Courses
Three core courses are required.
- GRAD 8200 - Teaching and Learning Topics in Higher Education (1.0 cr)
- OBIO 5001 - Methods in Research and Writing (2.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)

Health Care Administration Course
At least one course is required.
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
  or PUBH 6724 - The Health Care System and Public Health (3.0 cr)

Plan A Thesis Credits
Plan A students must take at least 10 master's thesis credits.
- DENT 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Topics Areas
Students must complete one topic area.

Periodontology (12 to 22 Credits)
Plan A students pursuing the Periodontology topic area must select at least 12 credits, and Plan B students must take at least 22 credits from the following list, in consultation with the advisor:
- ANAT 7999 - Head and Neck Anatomy (3.0 cr)
- OSUR 5277 - Physical Diagnosis for Oral Surgery Residents (2.0 cr)
- DENT 7102 - Conscious Sedation (2.0 cr)
- DENT 8100 - Topics in Advanced Periodontology: Literature Review (2.0 cr)
- DENT 7051 - Advanced Study in the Theory and Principles of Oral Medicine (2.0 cr)
- OBIO 8012 - Basic Concepts in Skeletal Biology (2.0 cr)
- DENT 7061 - Special Oral Pathology I (1.0 cr)
- DENT 7062 - Special Oral Pathology II (1.0 cr)
- DENT 7052 - Oral and Maxillofacial Radiologic Interpretation (2.0 cr)
- DENT 7101 - Management Philosophy for Dental Practices (1.0 cr)
- DENT 8101 - Dental Implantology: A Multidisciplinary Approach (2.0 cr)

-OR-

General Practice Residency (12 to 22 Credits)
Plan A students pursuing the General Practice Residency topic area must select at least 12 credits from the following, in consultation with the advisor. Plan B students must select at least 22 credits from the following and in consultation with the advisor:
- DENT 7051 - Advanced Study in the Theory and Principles of Oral Medicine (2.0 cr)
- DENT 7102 - Conscious Sedation (2.0 cr)
- DENT 7123 - Temporomandibular Disorders and Orofacial Pain (1.0 cr)
- DENT 7052 - Oral and Maxillofacial Radiologic Interpretation (2.0 cr)
- DENT 7061 - Special Oral Pathology I (1.0 cr)
- DENT 7062 - Special Oral Pathology II (1.0 cr)
DENT 7101 - Management Philosophy for Dental Practices (1.0 cr)
DENT 8121 - Current Literature in TMD and Orofacial Pain (1.0 cr)

-OR-

TMD, Orofacial Pain & Dental Sleep Medicine (12 to 22 Credits)
Plan A students pursuing the TMD, Orofacial Pain & Dental Sleep Medicine topic area must select at least 12 credits, and Plan B students must take at least 22 credits from the following list, in consultation with the advisor:
OSUR 5277 - Physical Diagnosis for Oral Surgery Residents (2.0 cr)
ANAT 7999 - Head and Neck Anatomy (3.0 cr)
DENT 8121 - Current Literature in TMD and Orofacial Pain (1.0 cr)
DENT 7121 - Psychological Issues in Medical and Dental Patient Management (1.0 cr)
DENT 7052 - Oral and Maxillofacial Radiologic Interpretation (2.0 cr)
DENT 8120 - Advanced Principles and Techniques of Orofacial Pain Disorders (2.0 cr)
DENT 7051 - Advanced Study in the Theory and Principles of Oral Medicine (2.0 cr)
DENT 8123 - Advanced Topics in Orofacial Pain (2.0 cr)

-OR-

Endodontics (12 to 22 Credits)
Plan A students pursuing the Endodontics topic area must select at least 12 credits from the following, in consultation with the advisor.
Plan B students must select at least 22 credits from the following and in consultation with the advisor:
DENT 7102 - Conscious Sedation (2.0 cr)
DENT 7051 - Advanced Study in the Theory and Principles of Oral Medicine (2.0 cr)
DENT 7052 - Oral and Maxillofacial Radiologic Interpretation (2.0 cr)
DENT 7021 - Contemporary Diagnosis and Management of Orofacial Pain (1.0 cr)
DENT 7062 - Special Oral Pathology II (1.0 cr)
DENT 7061 - Special Oral Pathology I (1.0 cr)
ANAT 7999 - Head and Neck Anatomy (3.0 cr)
DENT 7101 - Management Philosophy for Dental Practices (1.0 cr)

-OR-

Prosthodontics (12 to 22 Credits)
Plan A students pursuing the Prosthodontics topic area must select at least 12 credits, and Plan B students must take at least 22 credits from the following list, in consultation with the advisor:
ANAT 7999 - Head and Neck Anatomy (3.0 cr)
DENT 7220 - Prosthetically-Driven Implant Surgery and Treatment Planning (1.0 cr)
DENT 7102 - Conscious Sedation (2.0 cr)
DENT 7112 - Treatment Planning Seminar (2.0 cr)
DENT 7111 - Current Literature Review in Dentistry (2.0 cr)
DENT 7052 - Oral and Maxillofacial Radiologic Interpretation (2.0 cr)
DENT 8101 - Dental Implantology: A Multidisciplinary Approach (2.0 cr)
DENT 7411 - Dental Biomaterials in Prosthodontics (1.0 cr)
DENT 7123 - Temporomandibular Disorders and Orofacial Pain (1.0 cr)
DENT 7061 - Special Oral Pathology I (1.0 cr)
DENT 7062 - Special Oral Pathology II (1.0 cr)
PERO 7321 - Periodontics/Orthodontics Seminar (1.0 cr)
PERO 7322 - Multidisciplinary Treatment Seminar in Dentistry Related to Periodontics (1.0 cr)
DENT 7051 - Advanced Study in the Theory and Principles of Oral Medicine (2.0 cr)
DENT 7101 - Management Philosophy for Dental Practices (1.0 cr)

-OR-

Orthodontics (12 to 22 Credits)
Plan A students pursuing the Orthodontics topic area must select at least 12 credits from the following, in consultation with the advisor.
Plan B students must select at least 22 credits from the following and in consultation with the advisor:
ANAT 7999 - Head and Neck Anatomy (3.0 cr)
DENT 8091 - Interdisciplinary Care of the Cleft Palate Patient (1.0 cr)
DENT 7061 - Special Oral Pathology I (1.0 cr)
PERO 7321 - Periodontics/Orthodontics Seminar (1.0 cr)
DENT 7062 - Special Oral Pathology II (1.0 cr)

The interdisciplinary Oral Biology Program is offered by the School of Dentistry with cooperating faculty in the Medical School, College of Pharmacy, and Veterinary Medicine. It gives students research skills and a broad understanding of the development, structure, function, and pathology of the orofacial region. Students are encouraged to focus in one of five areas of emphasis: biomaterials and biomechanics; epithelial biology and carcinogenesis; microbiology and immunology; sensory neuroscience; and bone biology, craniofacial development, and tissue engineering. An exceptional student can create his/her own area of emphasis or specialize in topics not listed here; students should discuss their interests with the director of graduate studies before applying. Curricula are designed to allow considerable flexibility in planning individual programs to accommodate specific areas of interest; courses from other disciplines may be included as part of the major.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must submit 1) scores from the General Test of the GRE, 2) three letters of recommendation from persons who can comment authoritatively about the applicant's potential for a research and academic career, 3) a clearly written personal statement (one to two pages) describing career goals, 4) an essay describing research aspirations (one to two pages), and 5) a résumé highlighting research experience and accomplishments.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 148
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 90
  - Internet Based - Writing Score: 25
  - Internet Based - Reading Score: 25

IELTS
  - Total Score: 6.5

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The MS in oral biology is intended for individuals who are currently involved in a research laboratory or program and are seeking to increase their scientific perspectives. This program generally requires a minimum of two years to complete. Courses in the major may be taken from other disciplines with the approval of the advisor and the director of graduate studies. Students must also complete a minor in an associated non-clinical discipline (minimum 6 credits).

Program Requirements

Required Coursework (4 Credits)

Select at least 4 credits from the following list, in consultation with the advisor:

- OBIO 8012 - Basic Concepts in Skeletal Biology (2.0 cr)
- OBIO 8018 - Topics in Oral Pathobiology (2.0 cr)
- OBIO 8021 - Oral Microbiology (2.0 cr)
- OBIO 8022 - Oral Neuroscience (2.0 cr)
- OBIO 8023 - Physical Biology of the Oral Cavity (2.0 cr)
- OBIO 8024 - Genetics and Human Disease (1.0 cr)
- OBIO 8025 - Topics in Cariology (2.0 cr)
- OBIO 8026 - Salivary Glands and Secretions (2.0 cr)
- OBIO 8027 - Biomaterials in Regenerative Dentistry (2.0 cr)
- OBIO 8028 - Molecular Basis of Cellular and Microbial Adhesion (2.0 cr)
- OBIO 8371 - Mucosal Immunobiology (3.0 cr)

Oral Biology Seminar (4 Credits)

Registration and participation in the oral biology student seminar series each semester is required. Take OBIO 8030 four times for a total of 4 credits.

- OBIO 8030 - Oral Biology Seminar (1.0 cr)

Electives (6 Credits)

Select at least 6 credits, in consultation with director of graduate studies.

Required Minor (6 Credits)

Students must complete a graduate minor in a complementary, non-clinical discipline. At least 6 minor field credits are required. Confer with the director of graduate studies for the minor field to determine additional requirements.

Thesis Credits (10 Credits)

Take at least 10 master's thesis credits.

- OBIO 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

The interdisciplinary oral biology program is offered by the School of Dentistry with cooperating faculty in the Medical School, College of Pharmacy, and Veterinary Medicine. It gives students research skills and a broad understanding of the development, structure, function, and pathology of the orofacial region. Students are encouraged to focus in one of five areas of emphasis: biomaterials and biomechanics; epithelial biology and carcinogenesis; microbiology and immunology; sensory neuroscience; and bone biology, craniofacial development, and tissue engineering. An exceptional student can create their own area of emphasis or specialize in topics not listed here; students should discuss their interests with the director of graduate studies before applying. Curricula are designed to allow considerable flexibility in planning individual programs to accommodate specific areas of interest.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Required Coursework (4-8 Credits)
Master's students must select at least 4 credits, and doctoral students must select at least 8 credits, from the following list in consultation with the oral biology director of graduate studies.

<table>

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

**Masters**

**Electives (2 credits)**
Select at least 2 credits, in consultation with the oral biology director of graduate studies, to meet the 6-credit minimum for the master's minor.

**Doctoral**

**Electives (4 credits)**
Select at least 4 credits, in consultation with the oral biology director of graduate studies, to meet the 12-credit minimum for the doctoral minor.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 55 to 61
- This program requires summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The interdisciplinary graduate program in oral biology is offered by the School of Dentistry with cooperating faculty in the Medical School, College of Pharmacy, and Veterinary Medicine. It gives students research skills and a broad understanding of the development, structure, function, and pathology of the orofacial region. Students are encouraged to focus in one of five areas of emphasis: biomaterials and biomechanics; epithelial biology and carcinogenesis; microbiology and immunology; sensory neuroscience; and bone biology, craniofacial development, and tissue engineering. An exceptional student can create his/her own area of emphasis or specialize in topics not listed here; students should discuss their interests with the director of graduate studies before applying.

Curricula are designed to allow considerable flexibility in planning individual programs to accommodate specific areas of interest; courses from other disciplines may be included as part of the major.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants must submit 1) scores from the General Test of the GRE, 2) three letters of recommendation from persons who can comment authoritatively about the applicant’s potential for a research and academic career, 3) a clearly written personal statement (one to two pages) describing career goals, 4) an essay describing research aspirations (one to two pages), and 5) a résumé highlighting research experience and accomplishments. For D.D.S./Ph.D. applicants who are U.S. citizens, resident aliens, or Canadian citizens, U.S. or Canadian Dental Admission Test (DAT) scores at or above the national average will be accepted in lieu of the GRE. Applicants who have graduated from U.S. or Canadian dental or medical schools within three years of their application to the Ph.D. program may request that previous U.S. or Canadian DAT or MCAT scores be considered in lieu of the GRE.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 148
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 90
  - Internet Based - Writing Score: 25
  - Internet Based - Reading Score: 25
- IELTS
  - Total Score: 6.5

The preferred English language test is Test of English as Foreign Language.
Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
19 to 25 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Completion of a minor in a complementary, non-clinical discipline is required.

Program Requirements
Courses may be selected from departments and programs outside oral biology with approval of the advisor and director of graduate studies.

Oral Biology Topics Courses (8 Credits)
Select at least 8 credits from the following list:

- OBIO 8012 - Basic Concepts in Skeletal Biology (2.0 cr)
- OBIO 8018 - Topics in Oral Pathobiology (2.0 cr)
- OBIO 8021 - Oral Microbiology (2.0 cr)
- OBIO 8022 - Oral Neuroscience (2.0 cr)
- OBIO 8023 - Physical Biology of the Oral Cavity (2.0 cr)
- OBIO 8024 - Genetics and Human Disease (1.0 cr)
- OBIO 8025 - Topics in Cariology (2.0 cr)
- OBIO 8026 - Salivary Glands and Secretions (2.0 cr)
- OBIO 8027 - Biomaterials in Regenerative Dentistry (2.0 cr)
- OBIO 8028 - Molecular Basis of Cellular and Microbial Adhesion (2.0 cr)
- OBIO 8371 - Mucosal Immunobiology (3.0 cr)

Oral Biology Seminar (8 Credits)
Take the following seminar eight times for a total of 8 credits:

- OBIO 8030 - Oral Biology Seminar (1.0 cr)

Statistics Course (3 Credits)
Take at least one course from the following list:

- STAT 5021 - Statistical Analysis (4.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 7445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)

Required Minor (12 Credits)
Students must complete a non-clinical minor in the basic sciences or public health. At least 12 minor field credits are required. Confer with the director of graduate studies for the minor field to determine additional requirements.

Thesis Credits (24 Credits)
Take at least 24 doctoral thesis credits.

- OBIO 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Joint- or Dual-degree Coursework: Doctor of Dental Surgery DDS/Oral Biology PhD
Biochemistry, Molecular Biology and Biophysics M.S.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The biochemistry, molecular biology and biophysics (BMBB) graduate program is an interdisciplinary program that is supported by the College of Biological Sciences (CBS) and the Medical School of the University of Minnesota. The program provides a broad research-based education involving faculty from BMBB, as well as many faculty members from several other departments in CBS, the Medical School, the College of Science and Engineering (CSE), the College of Food, Agricultural and Natural Resources Sciences (CFANS), and the College of Veterinary Medicine.

BMBB focuses on determining the molecular mechanisms that underlie basic biological functions using an integrated approach that encompasses biochemistry, chemistry, biophysics, genomics, molecular biology, proteomics, and structural biology. Special emphasis is placed on revealing how biological processes go awry in diseases including cancer, diabetes, heart disease, and AIDS. The program has four areas of emphasis: synthetic biology and biotechnology, molecular biology, metabolic and systems biology, and chemical and structural biology. All students are expected to demonstrate a minimum level of competence in these areas, but will emphasize the area most related to their thesis project.

While graduate training in a BMBB laboratory involves first-year coursework and associated preliminary examinations, the focal point for graduate education is thesis research. Laboratory-based exploration coupled with journal clubs, seminars, scientific meetings and retreats, career counseling, and scientific ethics constitutes the major components of the program. Support for graduate education comes from a variety of sources but is augmented by several NIH and NSF-based training grants. Most graduate students from the University of Minnesota obtain full-time employment immediately after graduation or pursue advanced training in academic or corporate positions.

Students pursuing a degree in BMBB are only admitted to the PhD program (see note below) under the auspices of Molecular, Cellular and Structural Biology (MCSB), a first-year program administered by BMBB and the Molecular, Cellular, Developmental Biology and Genetics (MCDB&G) graduate programs. After the first year, students select either BMBB or MCDB&G to complete their degree.

Note: One cannot apply for admission to the master's degree in BMBB. Students are only admitted to the BMBB PhD program. Alternative, related master's degree programs that admit students are the master's of biological Sciences (MBS) (http://cce.umn.edu/master-of-biological-sciences) and the master's in microbial engineering (http://bti.umn.edu/MicE/).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The program can accommodate for a variety of educational backgrounds. However, applications from students with an undergraduate degree in the biological, chemical, or physical sciences are encouraged.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
The program can accommodate for a variety of educational backgrounds. However, applications from students with an advanced degree in the biological, chemical, or physical sciences are encouraged.

Other requirements to be completed before admission:
Recommended academic preparation includes one year each of calculus, organic chemistry, and basic biology, including biochemistry and genetics. For students of demonstrated ability, background deficiencies can be made up during the first year of graduate study.

Successful applicants must have previous research experience in an academic or industrial setting, in addition to any course-related laboratory experiences. It is important to demonstrate familiarity, with an aptitude for basic science research prior to embarking on a graduate career in this program.

***Note: Students are admitted only to the PhD program for BMBB (see additional note below).

**Special Application Requirements:**
Additionally, applicants must submit three letters of recommendation from persons familiar with their academic and research capabilities. A statement of interests and goals, a complete set of transcripts, and official scores from the General Test of the GRE are required. The GRE Subject Test in biochemistry, cell and molecular biology, biology, or chemistry is strongly recommended, but not required.

The deadline to submit a completed application is December 1. Completed files are reviewed between January and February. Graduate studies begin fall semester only.

Note: One cannot apply for admission to the master's degree in BMBB. Students are only admitted to the BMBB PhD program. Alternative, related master's degree programs that admit students are the Master of Biological Sciences (MBS) (http://cce.umn.edu/master-of-biological-sciences) and the Master in Microbial Engineering (http://bti.umn.edu/MicE/).

Applicants must submit their test score(s) from the following:
- GRE

Key to test abbreviations (GRE).

For an online application or for more information about graduate education admissions, see the **General Information** section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

All students are expected to participate in seminars involving student reports on current literature and research.

**Biochemistry Core (1 Credit)**
- Take the following core course for 1 credit:
  - **BIOC 8401 - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)**

**Laboratory and Field Course (1 Credit)**
- Take **MCDG 8920** for at least 1 credit. In August of the first year, BMBB students must register for this hands-on, intensive lab course that takes place at the Itasca Biological Station and Laboratories, which provides first-year students with exposure to a range of modern methods and model systems.
  - **MCDG 8920 - Special Topics (1.0 - 4.0 cr)**

**Module Options (6 Credits)**
- Complete 6 credits in consultation with the director of graduate studies.
  - **BIOC 5535 - Introduction to Modern Structural Biology -- Diffraction (2.0 cr)**
  - **BIOC 5536 - Introduction to Modern Structural Biology - Nuclear Magnetic Resonance (2.0 cr)**
  - **BIOC 8005 - Biochemistry: Structure and Catalysis (2.0 cr)**
  - **BIOC 8006 - Biochemistry: Metabolism and Control (2.0 cr)**
  - **BIOC 8007 - Molecular Biology of DNA (2.0 cr)**
  - **BIOC 8008 - Molecular Biology of RNA (2.0 cr)**

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
**Electives (12 Credits)**

Take 12 credits of coursework in one of the four BMBB emphases: synthetic biology and biotechnology, molecular biology, metabolic and systems biology, or chemical and structural biology. Courses from disciplines other than BMBB, in consultation with the advisor, may be used to build an emphasis.

Take 12 or more credit(s) from the following:

- **BIOC 5352** - Biotechnology and Bioengineering for Biochemists (3.0 cr)
- **BIOC 5361** - Microbial Genomics and Bioinformatics (3.0 cr)
- **MICA 8002** - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
- **GCD 8151** - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
- **MICA 8003** - Immunity and Immunopathology (4.0 cr)
- **MICA 8004** - Cellular and Cancer Biology (4.0 cr)
- **GCD 8131** - Advanced Molecular Genetics and Genomics (3.0 cr)
- **GCD 8008** - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
- **PUBH 6450** - Biostatistics I (4.0 cr)
- **SCB 8181** - Stem Cell Biology (3.0 cr)
- **STAT 5021** - Statistical Analysis (4.0 cr)
- **MICA 8010** - Microbial Pathogenesis (3.0 cr)
- **BIOC 5216** - Current Topics in Signal Transduction (3.0 cr)
- **BIOC 5527** - Introduction to Modern Structural Biology (4.0 cr)
- **BIOC 5528** - Spectroscopy and Kinetics (4.0 cr)
- **CHEN 8754** - Systems Analysis of Biological Processes (3.0 cr)
- **BIOC 5213** - Selected Topics in Molecular Biology (3.0 cr)
- **BIOC 5444** - Muscle (3.0 cr)
- **CHEM 8011** - Mechanisms of Chemical Reactions (4.0 cr)
- **CHEM 8021** - Computational Chemistry (4.0 cr)
- **CHEM 8411** - Introduction to Chemical Biology (4.0 cr)
- **CHEM 8412** - Chemical Biology of Enzymes (4.0 cr)
- **CHEM 8735** - Bioinorganic Chemistry (4.0 cr)
- **PHCL 5111** - Pharmacogenomics (3.0 cr)
- **PUBH 7445** - Statistics for Human Genetics and Molecular Biology (3.0 cr)
- **MICA 8013** - Translational Cancer Research (2.0 cr)
- **GRAD 8101** - Teaching in Higher Education (3.0 cr)
- **GRAD 8200** - Teaching and Learning Topics in Higher Education (1.0 cr)
- **BIOC 5309** - Biocatalysis and Biodegradation (3.0 cr)
- **BIOC 5351** - Protein Engineering (3.0 cr)
- **CSCI 5461** - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
- **GRAD 5102** - Preparation for University Teaching for Nonnative English Speakers (2.0 cr)
- **BIOC 8184** - Graduate Seminar (1.0 cr)
- **BIOC 8084** - Research and Literature Reports (1.0 cr)
- **BIOL 8100** - Improvisation for Scientists (1.0 cr)
- **GCD 5005** - Computer Programming for Biology (3.0 cr)

**Thesis Credits**

Take at least 10 master's thesis credits.

**BIOC 8777** - Thesis Credits: Master's (1.0 - 18.0 cr)

Program Requirements
24 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Requirements include core coursework, thesis credits, and laboratory experiences, as well as coursework in one of the four BMBB
emphases listed below.

Additional requirements for the PhD degree include seminar presentations, examinations, and teaching assignments. BIOC 8084 is a
weekly student seminar on current literature and research, and students must register for 1 credit of BIOC 8084 each term until they
have reached advanced doctoral status. BIOC 8184 is a departmental seminar involving prominent national and international scientists.
Students must attend at least 50% of weekly meetings for BIOC 8084 and BIOC 8184. Students are also required to complete two
semesters of teaching, typically between years 2 to 4.

Biochemistry Core Coursework (3 Credits)
Complete the following core courses. MCDBG 8920 must be taken for two credits.

BIOC 8401 - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)
MCDG 8920 - Special Topics (1.0 - 4.0 cr)

Complete six credits, in consultation with the director of graduate studies, from the following list:
BIOC 5535 - Introduction to Modern Structural Biology -- Diffraction (2.0 cr)
BIOC 5536 - Introduction to Modern Structural Biology - Nuclear Magnetic Resonance (2.0 cr)
BIOC 8005 - Biochemistry: Structure and Catalysis (2.0 cr)
BIOC 8006 - Biochemistry: Metabolism and Control (2.0 cr)
BIOC 8007 - Molecular Biology of DNA (2.0 cr)
BIOC 8008 - Molecular Biology of RNA (2.0 cr)

Emphasis Electives (15 Credits)
Complete 15 credits of coursework in one of the four BMBB emphases: synthetic biology and biotechnology, molecular biology, metabolic and systems biology, or chemical and structural biology. Courses from disciplines other than BMBB may be used to build an emphasis in consultation with the advisor.

Take 15 or more credit(s) from the following:
- BIOC 5352 - Biotechnology and Bioengineering for Biochemists (3.0 cr)
- BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
- MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
- GCD 8151 - Cellular Biochemistry and Cell Biology (3.0 cr)
- MICA 8003 - Immunity and Immunopathology (4.0 cr)
- MICA 8004 - Cellular and Cancer Biology (4.0 cr)
- GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
- GCD 8008 - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- SCB 8181 - Stem Cell Biology (3.0 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)
- MICA 8010 - Microbial Pathogenesis (3.0 cr)

Website: http://www.bioethics.umn.edu/education/master-arts-bioethics

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Admissions for the Bioethics MA Program are currently on hold. Please contact bthxed@umn.edu for updates.

The Center for Bioethics offers two kinds of MA degrees: Plan A and Plan B with a major in bioethics. The curriculum for both Plan A and Plan B degrees includes a set of required core courses, bioethics electives, and a requirement for coursework in fields related to bioethics. The Plan A culminates in a substantial, 10-credit master's thesis. In lieu of a thesis, the Plan B culminates in a 4-credit practicum, a 3-credit capstone project and final exam. Electives comprise the additional 3 credits in the Plan B degree.

Graduates of the MA in bioethics greatly enhance their professional opportunities in the field when they combine their bioethics degree with a terminal graduate or professional degree in another field. Examples of degree combinations can include an MA degree in bioethics with a JD, PhD, MD, nursing, or others. This model of pairing the MA in bioethics with another degree prompts students to acquire a firm disciplinary grounding as well as interdisciplinary bioethics expertise, a practice which best prepares students for the interdisciplinary career options related to bioethics. Some examples of careers include work in the fields of genetics, social work, public health, veterinary science, religious studies, psychology, biology and philosophy.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree is required for admission.

Special Application Requirements:
Transcripts of all postsecondary academic work, a personal statement, a writing sample (preferably on a topic in bioethics), a description of research or relevant work experience, a C.V. or résumé, and at least three letters of reference are required. Applicants may also submit a statement on "Extenuating Circumstances" and "Diversity." See program website for more details.

Students are admitted to the Bioethics M.A. program for fall semester only. Applications are accepted as early as the first day of fall semester prior to the proposed start of the student's M.A. program. Our primary deadline is March 1 with an extended deadline of May 1 if space in our program remains available.

Students are encouraged to link their degree in bioethics to a degree in a related field (either before entering the bioethics M.A. program or at the same time). Given the fundamentally interdisciplinary nature of bioethics, prospective students are advised against viewing the bioethics M.A. as a stand-alone degree that prepares them for career placement. This model prompts students to acquire a firm disciplinary grounding as well as interdisciplinary bioethics expertise—a practice that best prepares students for bioethics-related career placement. Thus, the admissions process will give preference to students who have already earned or are in the process of earning an advanced degree in a related field, although this will not strictly be required for admission.
Because our program recommends pairing the Bioethics degree with another graduate or professional degree, we recognize applicants may need to answer to another program prior to our deadline. If this is the case, please email bthxed@umn.edu with your concern.

Applicants must submit their test score(s) from the following:
- GRE
- MCAT
- LSAT

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600

Key to test abbreviations (GRE, MCAT, LSAT, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 21 major credits and 9 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** Students will design and undertake a project and its corollary product relevant to their interests, experience, and intended use of the MA in bioethics. The experiential component is designed to be flexible, allowing the student to undertake an internship, shadow physicians or other health care personnel, or use their own work experience when relevant to cater a project to their intended goals. Rigor is maintained through committee oversight, nature of the experience, and number of hours undertaken.

Products are also designed to be flexible while retaining rigor, innovation, and written analysis. Original research is not required (as with a thesis), but a thorough literature review and accompanying overview or synthesis of the arena of which the project is a part is necessary, as is a thorough explanation of the final product. Full committee approval of the final product before the project is undertaken is required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

**Joint- or Dual-degree Coursework:** Joint Degree Program in Law, Health, and the Life Sciences

Student may take a total of 11 credits in common among the academic programs.

Center for Bioethics, University of Minnesota, N504 Boynton, 410 Church Street SE, Minneapolis, MN 55455 (612-624-9440; fax: 612-624-9108)
Email: bthxed@umn.edu
Website: http://www.bioethics.umn.edu/education/graduate-minor-bioethics

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 8
- Length of program in credits (Doctorate): 14
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor is administered by the Center for Bioethics and is designed for University of Minnesota students interested in deepening their knowledge of the ethical issues surrounding health and the life sciences. Explore your interests in bioethics while also earning a degree in your home discipline.

The minor is open to students in many of the Universitys masters or doctoral degree programs. Some professional degree-seeking students also may elect a minor, including MEd, MPH, MHA, MN, DNP, MOT, MPSE, MDH, MDT, and MPS students. To be eligible, the degree program must offer the option to pursue a minor; please consult with your director of graduate studies in your major field to determine if this option is open for you. At this time, students in first-professional programs (JD, MD, PharmD, DVM, DDS, and LLM) are not eligible for minors.

Enrollment is contingent upon approval by the director of graduate studies in bioethics. Students work with the director of graduate studies to tailor their minor program to their individual needs and interests.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
For an online application or for more information about graduate education admissions, see the General Information section of this website.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Courses must be chosen in consultation with the bioethics director of graduate studies.

Philosophy students are expected to have successfully completed at least one course in ethical theory at the 5xxx or 8xxx level prior to undertaking coursework in the minor.

Students must complete the minor with a 3.00 GPA.

Bioethics Minor Required Courses
Complete either BTHX 5010 or BTHX 5325, not both.

**BTHX 5010 - Bioethics Proseminar (2.0 cr)**

or **BTHX 5325 - Biomedical Ethics (3.0 cr)**

Select one course.

- **BTHX 5300 - Foundations of Bioethics (3.0 cr)**
- **PHIL 5320 - Intensive Study of a Historical Moral Theory (3.0 cr)**
- **PHIL 8310 - Seminar: Moral Philosophy (3.0 cr)**

**Electives**

Doctoral students must also take additional ethics courses to total 14 credits of required plus elective courses; at least 3 credits of the electives must be BTHX courses. Masters students must also take additional credits of ethics courses for a total of 8 credits of required plus elective courses. Any of the following BTHX courses may be taken as electives. The student may take courses offered through other designators only if they have the permission of the bioethics DGS.

- **BTHX 5000 - Topics in Bioethics (1.0 - 4.0 cr)**
- **BTHX 5100 - Introduction to Clinical Ethics (3.0 cr)**
- **BTHX 5120 - Dying in Contemporary Medical Culture (2.0 cr)**
- **BTHX 5210 - Ethics of Human Subjects Research (3.0 cr)**
- **BTHX 5400 - Intro Ethics in Hlth Policy (3.0 cr)**
- **BTHX 5411 - Health Law and Policy (3.0 cr)**
- **BTHX 5433 - Law, Biomedicine, and Bioethics (3.0 cr)**
- **BTHX 5510 - Gender and the Politics of Health (3.0 cr)**
- **BTHX 5520 - Social Justice and Bioethics (3.0 cr)**
- **BTHX 5540 - Bioethics, Psychiatry & Psychology (3.0 cr)**
- **BTHX 5610 - Research & Publication Seminar (1.0 cr)**
- **BTHX 5620 - Social Context of Health and Illness (3.0 cr)**
- **BTHX 5630 - Bioethics Colloquium (1.0 cr)**
- **BTHX 5650 - Disability Ethics (3.0 cr)**
- **BTHX 5900 - Independent Study in Bioethics (1.0 - 4.0 cr)**
- **BTHX 8000 - Advanced Topics in Bioethics (1.0 - 4.0 cr)**
- **BTHX 8120 - Dying in Contemporary Medical Culture (2.0 cr)**
- **BTHX 8500 - Practicum in Bioethics (1.0 - 4.0 cr)**
- **BTHX 8510 - Gender and the Politics of Health (3.0 cr)**
- **BTHX 8520 - Social Justice and Bioethics (3.0 cr)**
- **BTHX 8610 - Medical Consumerism (3.0 cr)**

**Program Sub-plans**

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Masters**

**Doctoral**

Email: biobgrad@umn.edu
Website: http://www.r.umn.edu/academics-research/bicb

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- The Biomedical Informatics and Computational Biology Program is an all-University program delivered on the Rochester and Twin Cities campuses. The University of Minnesota Twin Cities is the degree-granting authority for delivery of the Biomedical Informatics and Computational Biology Program in Rochester.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in biomedical informatics and computational biology (BICB) offers course work in five core areas: 1) biochemistry, molecular and cell biology; 2) database, data mining, and computing; 3) informatics, analysis, and machine learning; 4) mathematics, biostatistics, and statistics; and 5) computational and systems biology. In addition, students select courses from a diverse set of fields, including chemistry, chemical engineering, physics, biophysics, structural biology, imaging, signal processing, and clinical and translational sciences. The curriculum is individualized to fit the student's interest and research direction. Prior coursework may be used to fill the requirements if appropriate. Students may pursue a minor in a different program.

All students receive training in ethics, leadership, and management, including legal and intellectual property issues and entrepreneurship. Those interested in academic careers have the opportunity to participate in development programs that focus on aspects of teaching and learning.

The M.S. is offered under two plans: Plan A (with thesis), and Plan B (with project). Plan A is considered suitable for students planning to pursue careers that require a limited research experience or those planning to continue their education in a Ph.D. program. It is also suitable for students with full-time employment whose thesis can be related to their work assignments. Plan B is suitable for students planning to work in settings where technical knowledge is more germane than research experience.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
The program expects incoming graduate students to have a strong background in the quantitative sciences and varied backgrounds in the life/health sciences. The expected competencies of incoming students may be demonstrated by coursework completed at the undergraduate level or by informal competency examinations.

In addition to completing the online application form, applicants must submit a personal statement, which describes past experiences and career aspirations, and reasons for pursuing graduate studies in biomedical informatics and computational biology. Applicants should also indicate the names of the BICB graduate faculty whose interests overlap their own. Although there is no page limit for the personal statement, 2-3 pages are recommended.

Special Application Requirements:
Applications for the M.S. program are accepted throughout the year for either fall or spring.

GRE scores may be waived for students with significant work or academic experience.
Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A:** Plan A requires 14 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 24 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Plan B students complete a project under the direction of a faculty member and present the work to their faculty committee in an oral exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The M.S. is offered under two plans: Plan A (with thesis), and Plan B (with project).

Plan A is considered suitable for students planning to pursue careers that require a limited research experience or those planning to continue their education in a Ph.D. program. Plan A students defend their thesis in public and must pass an oral examination. Plan A is suitable for students with full-time employment whose thesis can be related to their work assignments.

Plan B is suitable for students planning to work in settings where technical knowledge is more germane than research experience.

The requirements include 20 course credits for Plan A and 30 course credits for Plan B.

Up to 6 credits outside the major may be taken but are not required.

Program Sub-plans

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

All students receive training in ethics, leadership, and management, including legal and intellectual property issues and entrepreneurship. Students interested in academic careers have the opportunity to participate in development programs that focus on aspects of teaching and learning.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Minor programs are arranged on an individual basis.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Master's Minor: A minimum of 9 credits must be completed in Core Area 1 and one of Core Areas 2-5.

Doctoral Minor: A minimum of 12 credits must be completed in Core Area 1 and two of Core Areas 2-5.

Graduate students choose from a list of courses that satisfy requirements in core areas and electives.

There are five core areas:
1. Biochemistry, molecular and cell biology
2. Database, data mining, and computing
3. Informatics, analysis, and machine learning
4. Mathematics, biostatistics, and statistics
5. Computational and systems biology

Students choose elective courses from the following eight areas:
1. Biochemistry, molecular and cell biology
2. Informatics, database, data mining, and computing
3. Mathematics, biostatistics, and statistics
4. Chemistry, chemical engineering, and physics
5. Biophysics and structural biology
6. Imaging, information theory, and signal processing
7. Computational chemistry, medicinal chemistry, and drug design
8. Clinical and translational sciences

Core/elective courses are listed on the courses page of the BICB Student Handbook (http://r.umn.edu/academics-research/bicb/graduate-program/student-handbook/courses). The adviser(s), together with the DGS, will ensure that the student selects appropriate courses.

Students may pursue a minor in a different program.

All students receive training in ethics, leadership, and management, including legal and intellectual property issues and entrepreneurship. The Ph.D. program includes an industrial or clinical internship. Students interested in academic careers have the opportunity to participate in development programs that focus on aspects of teaching and learning.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
The program expects incoming graduate students to have a strong background in the quantitative sciences and varied backgrounds in the life/health sciences. The expected competencies of incoming students may be demonstrated by coursework completed at the undergraduate level or by informal competency examinations.

In addition to completing the online application form, applicants must submit a personal statement, which describes past experiences and career aspirations, and reasons for pursuing graduate studies in biomedical informatics and computational biology. Prospective students should also indicate the names of the BICB graduate faculty whose interests overlap with their own. The department strongly encourages applicants to contact these faculty members before applying. Although there is no page limit for the personal statement, 2-3 pages are recommended.

Special Application Requirements:
Three letters of recommendation and scores from the General Test of the GRE are required. Applicants are admitted only for the fall semester.

GRE scores may be waived for students with significant work or academic experience.

Applicants must submit their test score(s) from the following:
- GRE
International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

30 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Ph.D. students take preliminary written exams at the end of the second year of study, which focuses on the development of a research proposal. An oral preliminary exam focuses on the plan for thesis research and the student's coursework and is taken by the fall of the third year of full-time registration or its equivalent. At least 24 course credits are required to gain competency in both biology and quantitative areas related to biomedical informatics and computational biology. An internship is required, which may be waived for students with equivalent experience. Additionally, 24 thesis credits are required. Ph.D. students defend their thesis in public and must pass an oral examination.

An internship is required, which may be waived for students with equivalent experience.

Up to 9 credits outside the major may be taken but are not required.

Program Sub-plans

A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This interdisciplinary program includes faculty members who have primary appointments in fields such as radiobiology, physics, engineering, computer science, physiology, dentistry, genetics, and biochemistry. Students concentrate in research areas such as molecular biophysics, medical imaging, magnetic resonance imaging and spectroscopy, radiobiology, radiation therapy physics, and mathematical biophysics and computation. A limited number of students prepare for employment as hospital-based medical physicists through a program that includes opportunities for coursework, laboratory work, and directed study to provide experience in areas such as purchase specification, acceptance testing, quality assurance, and radiation safety.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
All students should have some familiarity with physical chemistry, intermediate physics, intermediate mathematics, biostatistics, computer programming, biology, physiology, and biochemistry. This may be demonstrated by coursework completed at the undergraduate level or as part of the graduate program; by reading or practical experience; or by informal competency examinations.

Special Application Requirements:
Three letters of recommendation and scores from the General Test of the GRE are required. Applicants are considered for admission in both semesters.

Applicants must submit their test score(s) from the following:
- GRE

Key to test abbreviations (GRE).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

The M.S. is offered under two plans: Plan A, (with thesis), and Plan B, (with project). Plan A is considered suitable for students with full-time employment whose thesis can be related to their work assignments. Plan B is more suitable for students planning to work in government or hospital settings where technical knowledge is more germane than research experience. Plan B students complete a project under the direction of a faculty member and present the work to their faculty committee in an oral exam. A total of 30 credits is required, including 14 in the major and 6 in a related field or minor.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Programs are arranged on an individual basis and must consist of courses that represent a subfield of the discipline, e.g., radiobiology or medical physics.
Twin Cities Campus
Biophysical Sciences and Medical Physics Ph.D.
Radiology
Graduate School

Link to a list of faculty for this program.

Contact Information:
University of Minnesota School of Medicine, Department of Radiology, Box 292 UMHC, 420 Delaware Street S.E., Minneapolis, MN 55455 (612-626-0131; fax: 612-626-1951)
Email: riten001@tc.umn.edu
Website: http://www.med.umn.edu/radiology/research/physics/home.html

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 36
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This interdisciplinary program includes faculty members who have primary appointments in fields such as radiobiology, physics, engineering, computer science, physiology, dentistry, genetics, and biochemistry. Students concentrate in research areas such as molecular biophysics, medical imaging, magnetic resonance imaging and spectroscopy, radiobiology, radiation therapy physics, and mathematical biophysics and computation. A limited number of students prepare for employment as hospital-based medical physicists through a program that includes opportunities for coursework, laboratory work, and directed study to provide experience in areas such as purchase specification, acceptance testing, quality assurance, and radiation safety.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
All students should have some familiarity with physical chemistry, intermediate physics, intermediate mathematics, biostatistics, computer programming, biology, physiology, and biochemistry. This may be demonstrated by coursework completed at the undergraduate level or as part of the graduate program; by reading or practical experience; or by informal competency examinations.

Special Application Requirements:
Three letters of recommendation and scores from the General Test of the GRE are required. Applicants are considered for admission in both semesters.

Applicants must submit their test score(s) from the following:
- GRE

Key to test abbreviations (GRE).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.
Ph.D. students take preliminary written exams at the end of the first year of study or as soon as possible after completing the core course sequence in topics in physics for medicine and biology. An oral preliminary exam focuses on the plan for thesis research and the student's grasp of related information and is taken by the fall of the third year of full-time registration or its equivalent. At least 12 credits are required in a minor or supporting program. Additionally, 24 thesis credits are required.
Clinical Ethics Postbaccalaureate Certificate
Bioethics, Center for Graduate School

Contact Information:
Center for Bioethics
N504 Boynton
410 Church St SE
Minneapolis, MN 55455
Email: bthxed@umn.edu
Website: http://www.bioethics.umn.edu/education/clinical-ethics-certificate-program

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 13
- This program does not require summer semesters for timely completion.
- Degree: Clinical Ethics PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Admissions to the clinical ethics post-baccalaureate certificate are currently on hold. Please contact bthxed@umn.edu for updates.

The clinical ethics post-baccalaureate certificate will offer a graduate level educational opportunity for practicing professionals including physicians, nurses, social workers, chaplains, and others. Students will engage in classwork and practical experience geared toward mastery of the knowledge and skills needed for work in clinical ethics, including participation on ethics committees, clinical ethics consultation services, institutional and regional clinical ethics policy bodies such as organ allocation committees or brain death committees, support for institutional staff development programs in their professional fields, or simply being better prepared to meet the ethical challenges that arise in their work. The curriculum will fulfill the health care ethics core competencies promulgated by the American Society for Bioethics and Humanities.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A graduate or professional degree in a field related to clinical ethics is required for admission.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Required Courses
NB: BTHX 8500 will be taken twice, 2 cr each time, once fall once spring.

- **BTHX 5100** - Introduction to Clinical Ethics (3.0 cr)
- **BTHX 5110** Ethical Issues in Pediatrics (2.0 cr)
- **BTHX 5120** Dying in Contemporary Medical Culture (2.0 cr)
- **BTHX 8100** Advanced Theory and Practice of Clinical Ethics (2.0 cr)
- **BTHX 8500** - Practicum in Bioethics (1.0 - 4.0 cr)
Twin Cities Campus
Health Care Design and Innovation Postbaccalaureate Certificate
School of Nursing
Graduate School

Contact Information:
Densford International Center for Nursing Leadership, University of Minnesota School of Nursing, 4-185 Weaver-Densford Hall, 308 Harvard St SE, Minneapolis, MN 55455 (612-625-1187; fax: 612-624-0908)
Email: nursecerts@umn.edu
Website: http://www.hcdi.umn.edu

• Program Type: Post-baccalaureate credit certificate/licensure/endorsement
• Requirements for this program are current for Fall 2018
• Length of program in credits: 12
• This program does not require summer semesters for timely completion.
• Degree: Health Care Design & Innovation PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postbaccalaureate certificate in health care design and innovation prepares health care and design practitioners to create optimal healing environments. Students learn how to apply design thinking in creating new processes, systems, and care environments. The certificate emphasizes principles that promote healing and safe patient care while maximizing clinical and financial outcomes.

Program Delivery
This program is available:
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Admittance to the certificate program requires a baccalaureate degree from an accredited institution in a health-related field, interior design, architecture, or other design-related area.

Other requirements to be completed before admission:
Applicants are required to submit transcripts from all institutions where postsecondary credit was earned, reference materials containing an Admission Reference Form and personal letter of reference from two separate individuals, one essay, a current curriculum vitae/resume, and English language proficiency scores (if applicable). This certificate has two application deadlines: November 1 for spring admission and July 1 for fall admission.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Paper Based - Total Score: 550

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.
Required Courses
CSPH 5711 - Optimal Healing Environments (3.0 cr)
NURS 7610 - System Leadership and Innovation (3.0 cr)
HUMF 5874 - Service Design: Designing complex systems to improve service delivery (4.0 cr)
NURS 6707 - Health Care Design and Innovation Practicum (2.0 cr)
Twin Cities Campus

Website: http://healthinformatics.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 31
- This program does not require summer semesters for timely completion.
- Degree: Master of Health Informatics

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Health informatics (also known as biomedical informatics) is an interdisciplinary field of scholarship that applies computer, information, statistical, management, and related scientific methods to enable biomedical discovery and support the effective and efficient use and analysis of data, management of information, and application of knowledge across the spectrum from basic science to clinical care. The ultimate goal of the field is to improve the health, well-being, and economic functioning of society. Students take a sequence of core courses in health informatics and biostatistics and take electives in technical and health science areas.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants are expected to have at least a bachelor of science or equivalent degree from a regionally accredited institution of higher education or an international equivalent.

Required prerequisites
Health or Biological Sciences
Applicants must have taken 6 semester-credits or 9 quarter-credits at the undergraduate or graduate level in medical, life, or biological sciences from a regionally accredited institution of higher learning or equivalent. This broadly defined requirement includes most courses with a health or biology emphasis, including biostatistics, health services research, and public health, as well as more traditional biology or life science courses.

Programming Language
Documented work or educational experience working with a programming language such as C, C++, Java, Python, R, Visual Basic, etc.
- or HINF 5502 - Python Programming Essentials for the Health Sciences (1.0 cr)
- or Department Consent

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 151
  - General Test - Quantitative Reasoning: 153
  - General Test - Analytical Writing: 4
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19

- **IELTS**
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5

- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language (TOEFL).

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 31 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

**Capstone Project:** The capstone project is a 3- or 4-credit course in which students apply their newly acquired knowledge and skills to a project involving a practical problem in health informatics. Students learn how to design these projects properly through review of past exemplary projects. With the help of their advisors and the capstone course director, students design and carry out their own projects, which can take a variety of forms, including developing design and evaluation specifications for software to address a specific healthcare need; working on, observing, analyzing, and reporting the actions of a team involved in implementing a new information system; or observing and measuring the impact of such a system in a healthcare setting. Students submit a written project report, graded by the capstone project instructor and the student’s advisor, in lieu of a final examination.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

**HINF Courses**

Take HINF 5436 AHC Informatics Grand Rounds twice for a total of 2 credits.

- HINF 5430 - Foundations of Health Informatics I (3.0 cr)
- HINF 5431 - Foundations of Health Informatics II (3.0 cr)
- HINF 5436 - AHC Informatics Grand Rounds (1.0 cr)
- HINF 5510 - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
- HINF 5520 - Informatics Methods for Health Care Quality, Outcomes, and Patient Safety (2.0 cr)
- HINF 5531 - Health Data Analytics and Data Science (3.0 cr)

**Other Required Courses**

- NURS 5116 - Consumer Health Informatics (1.0 cr)
- NURS 7108 - Population Health Informatics (2.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)

**Final Project**

- MHI students take HINF 5499 (3 credits).
- MD/MHI students take LAMP 7195 (4 credits).
- HINF 5499 - Capstone Project for the Masters of Health Informatics (3.0 cr)
- or LAMP 7195 - Medical Informatics (4.0 cr)

**Electives**

Take electives as needed to meet the 31-credit minimum. If labs or practicums are selected as electives, they must be taken concurrently with the associated course (i.e. take HINF 8430 with HINF 5430). Electives must be approved by the advisor.

- BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
- BIOC 8007 - Molecular Biology of DNA (2.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Health informatics (also known as biomedical informatics) is an interdisciplinary field of scholarship that applies computer, information, statistical, management, and related scientific methods to enable biomedical discovery and support the effective and efficient use and analysis of data, management of information, and application of knowledge across the spectrum from basic science to clinical care. The ultimate goal of the field is to improve the health, well-being, and economic functioning of society. Students take a sequence of core courses in health informatics, computing, and biostatistics, and electives in technical and health science areas. Possible areas of emphasis include health information systems, telehealth, bioinformatics, user interface design, system impact evaluation, database construction and analysis, clinical decision-making, evaluation of health programs, and physiological monitoring and control.

The health informatics MS is intended for students who are interested in research, but who do not have the background or are not ready to commit to the PhD program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.30.

Applicants are expected to have at least a bachelor of science or equivalent degree from a regionally accredited institution of higher education.

Required prerequisites
Health or Biological Sciences
Applicants must have taken 6 semester-credits or 9 quarter-credits at the undergraduate or graduate level in medical, life, or biological sciences from a regionally accredited institution of higher learning or equivalent. This broadly defined requirement includes most courses with a health or biology emphasis, including biostatistics, health services research, and public health, as well as more traditional biology or life science courses.

Programming Language
Documented work or educational experience working with a programming language such as C, C++, Java, Python, R, Visual Basic, etc.
- HINF 5502 - Python Programming Essentials for the Health Sciences (1.0 cr)
- or Department Consent

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 151
  - General Test - Quantitative Reasoning: 160
- General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19

- **IELTS**
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5

- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 26 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 36 major credits and up to null credits outside the major. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

**Required HINF Courses (16 credits)**

All students must take AHC Informatics Grand Rounds (HINF 5436) twice for a total of two credits.

- **HINF 5430** - Foundations of Health Informatics I (3.0 cr)
- **HINF 5431** - Foundations of Health Informatics II (3.0 cr)
- **HINF 5436** - AHC Informatics Grand Rounds (1.0 cr)
- **HINF 5510** - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
- **HINF 5520** - Informatics Methods for Health Care Quality, Outcomes, and Patient Safety (2.0 cr)
- **HINF 5531** - Health Data Analytics and Data Science (3.0 cr)

**Other Required Courses (7 credits)**

- **NURS 5116** - Consumer Health Informatics (1.0 cr)
- **NURS 7108** - Population Health Informatics (2.0 cr)
- **PUBH 6450** - Biostatistics I (4.0 cr)

**Electives**

Plan A students must take at least 3 credits, and Plan B students must take at least 9 credits of electives to meet the 36-credit minimum. If labs or practicums are selected as electives, they must be taken concurrently with the associated course (i.e. take HINF 8430 with HINF 5430). Electives must be approved by the advisor.

Information current as of August 31, 2018
Plan Options

Plan A
Take at least 10 master's thesis credits.
HINF 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
Plan B
Take the following course:
HINF 8770 - Plan B Project (4.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.
Twin Cities Campus
Health Informatics Minor
Health Informatics, AHC Inst
Graduate School

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Health informatics (also known as biomedical informatics) is an interdisciplinary field of scholarship that applies computer, information, statistical, management, and related scientific methods to enable biomedical discovery and support the effective and efficient use and analysis of data, management of information, and application of knowledge across the spectrum from basic science to clinical care. The ultimate goal of the field is to improve the health, well-being, and economic functioning of society. The minor provides an opportunity for students to supplement their primary training with additional knowledge and skills in health informatics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Required prerequisites
Health or Biological Sciences
Applicants must have taken 6 semester-credits or 9 quarter-credits at the undergraduate or graduate level in medical, life, or biological sciences from a regionally accredited institution of higher learning or equivalent. This broadly defined requirement includes most courses with a health or biology emphasis, including biostatistics, health services research, and public health, as well as more traditional biology or life science courses.

Programming language
Documented work or educational experience working with a programming language such as C, C++, Java, Python, R, Visual Basic, etc.

or HINF 5502 - Python Programming Essentials for the Health Sciences (1.0 cr)
or Department Consent

Special Application Requirements:
Applicants must be earning a graduate-level degree from the University of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.
Required Coursework
All students pursuing the Health Informatics minor must complete the following course:
HINF 5430 - Foundations of Health Informatics I (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Required Course
Take the following course to complete the 6-credit minimum for the master's minor:
HINF 5431 - Foundations of Health Informatics II (3.0 cr)

Doctoral
Required courses
HINF 5440 - Foundations of Translational Bioinformatics (3.0 cr)

Foundations Lab
Students must take at least one lab concurrently with the associated course (i.e. take 8430 concurrently with 5430 or 8440 concurrently with 5440).
Take 1 - 2 course(s) from the following:
• HINF 8430 - Foundations of Health Informatics I Lab (2.0 cr)
• HINF 8440 - Foundations of Translational Bioinformatics Lab (2.0 cr)

Electives
Take HINF electives to meet the 12-credit minimum for the doctoral minor.
HINF 5431 - Foundations of Health Informatics II (3.0 cr)
HINF 5436 - AHC Informatics Grand Rounds (1.0 cr)
HINF 5450 - Foundations of Precision Medicine Informatics (3.0 cr)
HINF 5494 - Topics in Health Informatics (3.0 cr)
HINF 5510 - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
HINF 5520 - Informatics Methods for Health Care Quality, Outcomes, and Patient Safety (2.0 cr)
HINF 5531 - Health Data Analytics and Data Science (3.0 cr)
HINF 5610 - Foundations of Biomedical Natural Language Processing (3.0 cr)
HINF 5620 - Data Visualization for the Health Sciences (3.0 cr)
HINF 5630 - Clinical Data Mining (3.0 cr)
HINF 5640 - Advanced Translational Bioinformatics Methods (3.0 cr)
HINF 5650 - Integrative Genomics and Computational Methods (3.0 cr)
HINF 8220 - Computational Causal Analytics (3.0 cr)
HINF 8405 - Advanced Topics in Health Informatics I (1.0 - 4.0 cr)
HINF 8406 - Advanced Topics in Health Informatics II (1.0 - 4.0 cr)
HINF 8492 - Advanced Readings or Research in Health Informatics (1.0 - 6.0 cr)
Twin Cities Campus

• Program Type: Doctorate
• Requirements for this program are current for Fall 2018
• Length of program in credits: 70
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Health informatics (also known as biomedical informatics) is an interdisciplinary field of scholarship that applies computer, information, statistical, management, and related scientific methods to enable biomedical discovery and support the effective and efficient use and analysis of data, management of information, and application of knowledge across the spectrum from basic science to clinical care. The ultimate goal of the field is to improve the health, well-being, and economic functioning of society. Students take a sequence of core courses in health informatics, computing, and biostatistics, and electives in technical and health science areas, and pursue one of four tracks: data science and informatics for learning health systems; clinical informatics; translational bioinformatics; or precision and personalized medicine (PPM) informatics. Students pursuing the data science and informatics for learning health systems track are expected to complete the University's data science MS degree en route to the PhD. Students pursuing any of the other three tracks are expected to complete the health informatics MS degree en route to the PhD. Phase I is the MS phase, and Phase II is the PhD phase of the program. Phase II is completed after students have earned the MS degree. Students who have an MS in data science or health informatics from a comparable program may be exempt from this requirement in whole or in part, subject to Academic Program Committee (APC) review and approval.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Applicants must have a BS or equivalent in science, technology, engineering, computer science, math, or another pertinent field from a regionally accredited university or international equivalent.

Required prerequisites
Health or Biological Sciences
Applicants must have taken 6 semester-credits or 9 quarter-credits at the undergraduate or graduate level in medical, life, or biological sciences from a regionally accredited institution of higher learning or equivalent. This broadly defined requirement includes most courses with a health or biology emphasis, including biostatistics, health services research, and public health, as well as more traditional biology or life science courses.
6-9 credits

Computer Science
Clinical Informatics Track
Documented work or educational experience working with a general purpose programming language such as C, C++, Java, Visual Basic, PASCAL, etc.
or HINF 5502 - Python Programming Essentials for the Health Sciences (1.0 cr)
or Other Tracks
Applicants to the data science for learning health systems, translational bioinformatics, and precision and personalized medicine informatics tracks must also have taken an introduction to data structures and algorithms, such as the course listed below.
CSCI 1933 - Introduction to Algorithms and Data Structures (4.0 cr)

Track-Specific Prerequisites
Applicants to the data science for learning health systems, translational bioinformatics, and precision and personalized medicine informatics tracks must also have the following prerequisites or must take remedial courses at the discretion of the admissions committee:

Mathematics
Applicants must have college-level calculus and linear algebra, such as the courses listed below.
- MATH 1271 - Calculus I [MATH] (4.0 cr)
- CSCI 2033 - Elementary Computational Linear Algebra (4.0 cr)
  or MATH 4242 - Applied Linear Algebra (4.0 cr)

Statistics
Applicants must have college-level statistics, such as the courses below.
- STAT 3011 - Introduction to Statistical Analysis [MATH] (4.0 cr)
  or STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 151
  - General Test - Quantitative Reasoning: 160
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- IELTS
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
46 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

All courses taken, milestones met, and progress made in the program are subject to Academic Program Committee (APC) review. The inclusion of 4000-level coursework requires APC approval.

Required Core Coursework (14 credits)

Phase I (12 credits)
All students take the following core coursework for a total of 12 credits. HINF 5436 must be taken twice.
- HINF 5430 - Foundations of Health Informatics I (3.0 cr)
- HINF 5430 - Foundations of Health Informatics I Lab (2.0 cr)
- HINF 5436 - AHC Informatics Grand Rounds (1.0 cr)
HINF 5440 - Foundations of Translational Bioinformatics (3.0 cr)
HINF 8440 - Foundations of Translational Bioinformatics Lab (2.0 cr)

Phase II (2 credits)
All students take the following core course after completing the Phase I core, and with the approval of the APC.
HINF 8525 - Health Informatics Teaching (2.0 cr)

Doctoral Thesis Credits (24 credits)
All students must take at least 24 doctoral thesis credits, in consultation with the APC.
HINF 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Clinical Informatics
The clinical informatics track provides instruction and training for students interested in clinical applications methods and applications. The curriculum includes instruction in health data and coding, systems analysis, human-computer interaction, current informatics research, and current applications such as decision support systems, natural language processing, and predictive modeling. Additionally, students learn biostatistical methods, relational database theory and practice, analytics and data science methodologies, consumer health informatics, and interprofessional practice. Electives supplement individual student interests in areas such as computer programming, health data management, health care finance, and public and population health (with scope to include person-empowered participation and inter-professional engagement). Courses use a mixture of theoretical and applied subject matter to provide a solid grounding in current informatics thinking and practice.

Students who pursue the clinical informatics track must complete the health informatics MS degree en route to completing the PhD. Students must consult with the APC to coordinate completion of coursework and other requirements for the health informatics MS, the health informatics PhD, and the clinical informatics track. Students who have an MS in health informatics from a comparable program may be exempt from this requirement in whole or in part, subject to APC review and approval.

Clinical Informatics Coursework (32 credits)
Core Coursework (16 credits)
Take the following core courses:
HINF 5431 - Foundations of Health Informatics II (3.0 cr)
HINF 8431 - Foundations of Health Informatics II Lab (2.0 cr)
HINF 5510 - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
HINF 5520 - Informatics Methods for Health Care Quality, Outcomes, and Patient Safety (2.0 cr)
HINF 5531 - Health Data Analytics and Data Science (3.0 cr)
NURS 5116 - Consumer Health Informatics (1.0 cr)
NURS 7108 - Population Health Informatics (2.0 cr)

Required Biostatistics Coursework (8 credits)
Take the following two courses:
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)

Electives
Select at least 8 elective credits, in consultation with the APC, to complete the 46 course credits required for the PhD degree.
BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
BIOC 8007 - Molecular Biology of DNA (2.0 cr)
BIOC 8008 - Molecular Biology of RNA (2.0 cr)
CGSC 8410 - Perspectives in Learning, Perception, and Cognition (2.0 cr)
CSCI 5108 - Programming Languages (3.0 cr)
CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
CSCI 5271 - Introduction to Computer Security (3.0 cr)
CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
CSCI 5461 - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
CSCI 5481 - Computational Techniques for Genomics (3.0 cr)

Data Science and Informatics for Learning Health Systems

The data science and informatics for learning health systems track builds on the highly regarded data science program offered jointly by the School of Engineering, School of Public Health, and School of Statistics. It also takes advantage of School of Nursing’s breadth of nursing and health informatics courses. It requires students to fulfill the requirements of the master’s in data science program and use their elective courses to gain exposure to health sciences and health care in the form of a suite of required foundational courses: Foundations of Health Informatics I and Lab, Foundations of Translational Bioinformatics I and Lab and the US Health Care System offered by the Institute for Health Informatics. The MS capstone project will address a research question related to health sciences or healthcare. Specialization to the health care field intensifies at the PhD level by offering additional courses focusing on advanced analytics and its applications to healthcare. The thesis research will naturally relate to health science or healthcare.

Students who pursue the data science and informatics for learning health systems track are expected to earn the University’s data science MS degree en route to completing the PhD. Students will have to apply and be admitted to both the PhD in health informatics and the MS in data science separately. Acceptance into one program does not guarantee acceptance into the other program. Students must meet the requirements of both programs as determined by each program. See the data science catalog page and website (https://datascience.umn.edu) for more information about the MS in data science requirements. Students must consult with the APC to coordinate completion of coursework and other requirements for the data science MS, the health informatics PhD, and the data science and informatics for learning health systems track. Credits earned in the University’s data science MS program may be used to fulfill required courses or elective credits in the data science and informatics for learning health systems track, subject to APC approval. Students who have an MS in data science from a comparable program may be exempt from this requirement in whole or in part, subject to APC review and approval.
Data Science and Informatics Coursework (32 credits)

Core Coursework (18 credits)
Take the following courses, in consultation with the APC, after completion of the data science MS degree. Take HINF 5496 and HINF 8492 for at least 3 credits each.
- HINF 5496 - Internship in Health Informatics (1.0 - 6.0 cr)
- HINF 5510 - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
- HINF 5630 - Clinical Data Mining (3.0 cr)
- HINF 8220 - Computational Causal Analytics (3.0 cr)
- HINF 8492 - Advanced Readings or Research in Health Informatics (1.0 - 6.0 cr)

Elective Coursework (14 credits)
Select at least 14 elective credits from the following list, in consultation with the APC, to complete the 46 course credits required for the PhD degree. Credits earned in pursuit of the data science MS may be used to fulfill elective course requirements for this track, subject to APC approval.

Take 14 or more course(s) from the following:

Informatics
Take 0 or more course(s) from the following:
- HINF 5431 - Foundations of Health Informatics II (3.0 cr)
- HINF 8431 - Foundations of Health Informatics II Lab (2.0 cr)
- HINF 5610 - Foundations of Biomedical Natural Language Processing (3.0 cr)
- HINF 5620 - Data Visualization for the Health Sciences (3.0 cr)
- MATH 5467 - Introduction to the Mathematics of Image and Data Analysis (4.0 cr)

Applications
Take 0 or more course(s) from the following:
- NURS 7113 - Clinical Decision Support: Theory (2.0 cr)
- PUBH 6102 - Issues in Environmental Health (2.0 cr)
- PUBH 6560 - Operations Research and Quality in Health Care (3.0 cr)
- PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6765 - Continuous Quality Improvement: Methods and Techniques (3.0 cr)
- PUBH 6809 - Advanced Methods in Health Decision Science (3.0 cr)
- PUBH 6814 - Data and Information for Population Health Management (2.0 cr)
- PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- PUBH 6876 - Public Health Systems Analysis and Design (2.0 cr)

Advanced Methodology
Take 0 or more course(s) from the following:
- PUBH 8452 - Advanced Longitudinal Data Analysis (3.0 cr)
- PUBH 8462 - Advanced Survival Analysis (3.0 cr)
- PUBH 8472 - Spatial Biostatistics (3.0 cr)

Data Science
Take 0 or more course(s) from the following:
- STAT 5101 - Theory of Statistics I (4.0 cr)
- STAT 5102 - Theory of Statistics II (4.0 cr)
- STAT 5302 - Applied Regression Analysis (4.0 cr)
- STAT 5511 - Time Series Analysis (3.0 cr)
- STAT 5401 - Applied Multivariate Methods (3.0 cr)
- STAT 8051 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)
- PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)
- CSCI 5521 - Introduction to Machine Learning (3.0 cr)
- CSCI 5523 - Introduction to Data Mining (3.0 cr)
- CSCI 5525 - Machine Learning (3.0 cr)
- PUBH 8475 - Statistical Learning and Data Mining (3.0 cr)
- CSCI 5105 - Introduction to Distributed Systems (3.0 cr)
- CSCI 5451 - Introduction to Parallel Computing: Architectures, Algorithms, and Programming (3.0 cr)
- CSCI 5707 - Principles of Database Systems (3.0 cr)

Translational Bioinformatics
The translational bioinformatics track bridges genomics and bioinformatics to precision medicine through its methods and techniques development and innovation that directly relate to the study of basic biological science and diseases. The computational methods related to genomics, epigenomics, transcriptomics, proteomics, metabolomics and pharmacogenomics are included, which build the connection of molecular findings and phenotypes to characterize disease susceptibility or determine disease markers, and predict response to treatment and prognosis. The program offers three specialized areas: structural and functional genomics, microbiomics and metagenomics, and cancer genomics.
Students pursuing the translational bioinformatics track are expected to earn the health informatics MS degree en route to completing the PhD. Students must consult with the APC to coordinate completion of coursework and other requirements for the health informatics MS, the health informatics PhD, and the translational bioinformatics track. Students who have an MS in health informatics from a comparable program may be exempt from this requirement in whole or in part, subject to APC review and approval.

Translational Bioinformatics Coursework (32 credits)
Phase 1 (22 credits)
Take the following courses for a total of 22 credits:
- CSCI 5521 - Introduction to Machine Learning (3.0 cr)
- CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
- HINF 8220 - Computational Causal Analytics (3.0 cr)
- HINF 5650 - Integrative Genomics and Computational Methods (3.0 cr)
- STAT 8051 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)
- STAT 8052 - Applied Statistical Methods 2: Design of Experiments and Mixed -Effects Modeling (3.0 cr)
- BIOC 8007 - Molecular Biology of DNA (2.0 cr)
- BIOC 8008 - Molecular Biology of RNA (2.0 cr)

Phase II (6 credits)
Take the following courses after completing Phase I, and with the approval of the APC:
- HINF 5496 - Internship in Health Informatics (1.0 - 6.0 cr)
- HINF 8492 - Advanced Readings or Research in Health Informatics (1.0 - 6.0 cr)

Elective Coursework (4 credits)
Select at least 4 elective credits from the following list, in consultation with the APC, to complete the 46 course credits required for the PhD degree.
- HINF 5431 - Foundations of Health Informatics II (3.0 cr)
- HINF 8431 - Foundations of Health Informatics II Lab (2.0 cr)
- HINF 5450 - Foundations of Precision Medicine Informatics (3.0 cr)
- HINF 5610 - Foundations of Biomedical Natural Language Processing (3.0 cr)
- MEDC 5245 - Introduction to Drug Design (3.0 cr)
- PHAR 6224 - Pharmacogenomics: Genetic Basis for Variability in Drug Response (2.0 cr)
- PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- PUBH 8445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
- STAT 8053 - Applied Statistical Methods 3: Multivariate Analysis and Advanced Regression (3.0 cr)

Precision and Personalized Medicine Informatics
The precision and personalized medicine informatics track provides a didactic program for students training in informatics who will develop specialized knowledge in precision informatics methods applied to personal and population health-focused problems. The scope of this track includes social determinants of health and inter-professional research and expertise. Students will develop skills in quantitative methods and biomedical sciences for their application to precision medicine. In addition, students will gain an understanding of medical and biological science to provide needed context on which to apply informatics methods.

Students who pursue the precision and personalized medicine informatics track are expected to earn the health informatics MS degree en route to completing the PhD. Students must consult with the APC to coordinate completion of coursework and other requirements for the health informatics MS, the health informatics PhD, and the precision and personalized medicine informatics track. Students who have an MS in health informatics from a comparable program may be exempt from this requirement in whole or in part, subject to APC review and approval.

Precision and Personalized Medicine Informatics Coursework (32 credits)
Phase I (19 credits)
Take the following coursework for at least 19 credits.
- HINF 5450 - Foundations of Precision Medicine Informatics (3.0 cr)
- HINF 5510 - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
- HINF 5520 - Informatics Methods for Health Care Quality, Outcomes, and Patient Safety (2.0 cr)
- PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
- PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)
- HINF 5531 - Health Data Analytics and Data Science (3.0 cr)
- or HINF 5630 - Clinical Data Mining (3.0 cr)

Phase II (8 credits)
Take the following courses after completing Phase I, and with the approval of the APC. Take HINF 5496 and HINF 8492 for at least 3 credits each.
- HINF 5496 - Internship in Health Informatics (1.0 - 6.0 cr)
- HINF 8492 - Advanced Readings or Research in Health Informatics (1.0 - 6.0 cr)
- PHAR 6224 - Pharmacogenomics: Genetic Basis for Variability in Drug Response (2.0 cr)

Elective Coursework (5 credits)
Select at least 5 elective credits, in consultation with the APC, to complete the 46 course credits required for the PhD degree.
HINF 5431 - Foundations of Health Informatics II (3.0 cr)
MATH 5652 - Introduction to Stochastic Processes (4.0 cr)
MATH 5445 - Mathematical Analysis of Biological Networks (4.0 cr)
PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)
PUBH 7445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
PUBH 8432 - Probability Models for Biostatistics (3.0 cr)
PUBH 8442 - Bayesian Decision Theory and Data Analysis (3.0 cr)
PUBH 8445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
PUBH 8446 - Advanced Statistical Genetics and Genomics (3.0 cr)
STAT 5511 - Time Series Analysis (3.0 cr)
STAT 5401 - Applied Multivariate Methods (3.0 cr)
Twin Cities Campus
Health Journalism and Communication M.A.
School of Journalism & Mass Communication
Graduate School

Link to a list of faculty for this program.

Contact Information:
Health Journalism and Communication M.A. Program, School of Journalism and Mass Communication, 111 Murphy Hall, 206 Church Street S.E., Minneapolis MN 55455 (612-626-1851; fax 612-625-9525)
Email: dans@umn.edu
Website: http://sjmc.umn.edu/grad/hjComm.html#degree

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 33
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: This program has been temporarily suspended. Applications are not being accepted at this time. Please contact Graduate Student Services at sjmcgrad@umn.edu with questions.

A joint program of the School of Journalism and Mass Communication and the School of Public Health, the professional master's in health journalism and communication promotes improved public communication about health matters by combining knowledge, skills, and experience from both disciplines. The program is designed for journalists and health professionals, who earn a master's degree in health journalism. Journalists and communications professionals learn the fundamentals of medical research and public health. Health professionals learn basic journalistic principles and ethics, and how to develop meaningful health stories. Those pursuing other master's degrees, (e.g., master's in public health), earn the M.A. in health journalism and communication in addition to the other degree.

The Health Journalism and Communication program has two distinct, but overlapping, programs of study. Students in the health journalism emphasis will gain advanced knowledge about public health and the evaluation of claims from health, medical, and scientific sources, as well as advanced training on reporting health stories for different media. Students in the health communication emphasis will learn the fundamentals of writing about health topics for different audiences in different formats, as well as health campaign development and evaluation.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Applications to this master's program are not currently being accepted. Please contact sjmcgrad@umn.edu with questions.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the
Program Requirements

Plan B: Plan B requires 25 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Contact the program for capstone project information.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The M.A. in health journalism and communication requires a minimum of 33 semester credits, to be completed over a two-year schedule. The program has two distinct areas of emphasis: health journalism and health communication. Students in the health journalism emphasis area learn to evaluate claims from health, medical, and scientific sources and to tell health-oriented stories in broadcast or magazine journalism. Students in the health communication emphasis learn the fundamentals of writing about health topics for different audiences, as well as health campaign development and evaluation.

History of Science, Technology, and Medicine M.A.
History of Science & Technology
Graduate School

Link to a list of faculty for this program.

Contact Information:
Program in the History of Science, Technology, and Medicine, University of Minnesota, 154 Shepherd Labs, 100 Union Street S.E., Minneapolis, MN 55455 (612-624-7069; fax: 612-301-1442)
Email: hstm@umn.edu
Website: http://www.hstm.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 31
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program offers opportunities for advanced research and study in the history of science and technology (with particular expertise in the history of the physical sciences, history of the biological sciences, history of technology, and history of American science and technology) and in the history of medicine.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students must have a bachelor's degree with a preferred grade average of B or better and must be capable of interdisciplinary study. Depending on background and career objectives, additional preparatory studies may be necessary in either the science-technology area or in the humanities and social sciences.

Although it is not strictly required for admission, it's strongly recommended that applicants submit a GRE score.

Special Application Requirements:
All application materials are submitted online to the University. Check the HSTM website (www.hstm.umn.edu) for more information. Applications are accepted for fall admission only. The application deadline is December 1.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 15 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading proficiency in one foreign language.

A minimum GPA of 3.30 is required for students to remain in good standing.

The MA is offered under Plan A and Plan B. Following the guidelines in the Graduate Student Handbook for the program (www.hstm.umn.edu), MA students select one of two tracks, the history of science and technology or the history of medicine, and, within the chosen track, select courses subject to distribution requirements in terms of area and period. All of the courses selected for the requirements must be passed with a grade of B or better.

Plan A requires 31 credits consisting of 6 credits in the required courses HSCI/HMED 8112 and 8113, 9 additional credits in HSCI or HMED, 6 credits in an outside field or in a minor, and 10 thesis credits.

Plan B requires 30 credits consisting of 6 credits in the required courses HSCI/HMED 8112 and 8113, 15 additional credits in HSCI or HMED, 3 credits in a directed study course, and 6 credits in an outside field or in a minor.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

History of Medicine

Plan A
Required Courses
Take the two-semester sequence of historiography and research preparation, plus an additional 9 credits in HMED chosen in consultation with advisor.
HMED 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
HMED 8113 - Research Methods in the History of Science, Technology, and Medicine (3.0 cr)

Outside Field Coursework
In consultation with advisor and the director of graduate studies, take 6 credits in courses from either the track alternative to the one in which you are enrolled, in outside fields, or in a minor.

Thesis Credits
Take 10 thesis credits
HMED 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B
Required Courses
Take the two-semester sequence of historiography and research preparation, plus an additional 15 credits in HMED chosen in consultation with advisor.
HMED 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
HMED 8113 - Research Methods in the History of Science, Technology, and Medicine (3.0 cr)

Outside Field Coursework
In consultation with advisor and the director of graduate studies, take 6 credits in courses from either the track alternative to the one in which you are enrolled, in outside fields, or in a minor.

Directed Study
Take 3 credits in a directed study course.
HMED 8631 - Directed Study (1.0 - 6.0 cr)
or HMED 8632 - Directed Study (1.0 - 6.0 cr)

History of Science and Technology

Plan A
Required Courses
Take the two-semester sequence of historiography and research preparation, plus an additional 9 credits in HSCI chosen in
consultation with advisor.

**HSCI 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)**

**HSCI 8113 - Research Methods in the History of Science, Technology, and Medicine (3.0 cr)**

**Outside Field Coursework**
In consultation with advisor and the director of graduate studies, take 6 credits in courses from either the track alternative to the one in which you are enrolled, in outside fields, or in a minor.

**Thesis Credits**
Take 10 thesis credits

**HSCI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)**

**Plan B**

**Required Courses**
Take the two-semester sequence of historiography and research preparation, plus an additional 15 credits in HSCI chosen in consultation with advisor.

**HSCI 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)**

**HSCI 8113 - Research Methods in the History of Science, Technology, and Medicine (3.0 cr)**

**Outside Field Coursework**
In consultation with advisor and the director of graduate studies, take 6 credits in courses from either the track alternative to the one in which you are enrolled, in outside fields, or in a minor.

**Directed Study**
Take 3 credits in a directed study course.

**HSCI 8993 - Directed Studies (1.0 - 5.0 cr)**

or **HSCI 8994 - Directed Research (1.0 - 5.0 cr)**

The program offers opportunities for advanced research and study in the history of science and technology (with particular expertise in the history of the physical sciences, history of the biological sciences, history of technology, and history of American science and technology) and in the history of medicine.

Prerequisites for Admission
Other requirements to be completed before admission:
Students must have a bachelor's degree with a preferred grade average of B or better and must be capable of interdisciplinary study. Depending on background and career objectives, additional preparatory studies may be necessary in either the science-technology area or in the humanities and social sciences.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Students who wish to take the graduate minor in the history of science, technology, and medicine are required to take 6 credits for the master's minor and 12 credits for a doctoral minor. The historiography course (HSCI or HMED 8112) is strongly recommended, along with other courses that are selected to define a course of study that should have some identifiable focus but also a certain breadth. Students should not plan to take all courses in the minor from the same faculty member.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
The master's minor requires two 3-credit courses in HSTM or HMED at the 5xxx level or above.

Recommended Courses
HSCI 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
or HMED 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
Doctoral
The doctoral minor requires four 3-credit courses in HSTM or HMED at the 5xxx level or above.

Recommended Courses
HSCI 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
or HMED 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
Twin Cities Campus
History of Science, Technology, and Medicine Ph.D.
History of Science & Technology

Website: http://www.hstm.umn.edu

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 54
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program offers opportunities for advanced research and study in the history of science and technology (with particular expertise in the history of the physical sciences, history of the biological sciences, history of technology, and history of American science and technology) and in the history of medicine.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students must have a bachelor's degree with a preferred grade average of B or better and must be capable of interdisciplinary study. Depending on background and career objectives, additional preparatory studies may be necessary in either the science-technology area or in the humanities and social sciences.

Although it is not strictly required for admission, it's strongly recommended that applicants submit a GRE score.

Special Application Requirements:
All application materials are submitted online to the University. Check the HSTM website (www.hstm.umn.edu) for more information. Applications are accepted for fall semester only. The application deadline is December 1.

International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
24 credits are required in the major.
6 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading proficiency in two foreign languages.

A minimum GPA of 3.30 is required for students to remain in good standing.

Following the guidelines in the Graduate Student Handbook for the program (www.hstm.umn.edu), Ph.D. students select one of two tracks: the history of science and technology or the history of medicine; and within the chosen track, select courses subject to distribution requirements in terms of area and period. All of the courses selected for the requirements must be passed with a grade of B or better.

The PhD requires 54 credits consisting of the following: 6 credits in the required courses HSCI/HMED 8112 and 8113, 15 additional credits in HSCI or HMED courses, 3 credits in a directed study course, 6 credits in outside fields, and 24 thesis credits.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

History of Medicine
Required Courses
Take the two-semester sequence of historiography and research preparation, plus an additional 15 credits in HMED chosen in consultation with advisor.
HMED 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
HMED 8113 - Research Methods in the History of Science, Technology, and Medicine (3.0 cr)

Directed Study
Take 3 credits in a directed study course.
HMED 8631 - Directed Study (1.0 - 6.0 cr)
or HMED 8632 - Directed Study (1.0 - 6.0 cr)

Outside Field Coursework
In consultation with advisor and the director of graduate studies, take 6 credits in courses from either the track alternative to the one in which you are enrolled, in outside fields, or towards a doctoral minor.

Thesis Credits
Take 24 credits after passing preliminary oral exam.
HMED 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

History of Science and Technology
Required Courses
Take the two-semester sequence of historiography and research preparation, plus an additional 15 credits in HSCI chosen in consultation with advisor.
HSCI 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
HSCI 8113 - Research Methods in the History of Science, Technology, and Medicine (3.0 cr)

Directed Study
Take 3 credits in a directed study course.
HSCI 8993 - Directed Studies (1.0 - 5.0 cr)
or HSCI 8994 - Directed Research (1.0 - 5.0 cr)

Outside Field Coursework
In consultation with advisor and the director of graduate studies, take 6 credits in courses from either the track alternative to the one in which you are enrolled, in outside fields, or towards a doctoral minor.

Thesis Credits
Take 24 credits after passing preliminary oral exam.
HSCI 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 45
- This program does not require summer semesters for timely completion.
- Degree: Master of Human Rights

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master's of human rights is a two-year interdisciplinary professional master's degree to prepare students to work in the field of human rights or to advance their knowledge and skills in the field. This degree equips graduate students with core professional and conceptual knowledge and analytical tools necessary to operate on the professional level in the field of human rights, along with the in-depth academic and professional training needed for the specific human rights area in which they practice or intend to practice. Students follow a core curriculum that includes the study of human rights norms and law, methodology, critical views of human rights, and human rights policy that will equip them with the skills needed to address the problems.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Complete application will include a University of Minnesota application, personal statement, resume or C.V., transcripts, GRE scores, TOEFL scores (if applicable), at least three letters of recommendation, and an optional diversity statement.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 45 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.
Capstone Project: Students will participate in a three-credit capstone seminar rather than a thesis. The capstone seminar is one of the required core courses.

This program may be completed with a minor.
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

In addition to course requirements, a non-credit professional internship of 400 hours, supervised by the Human Rights Program, is required. Ideally, it will be completed during the summer after the first year.

4xxx-level courses are limited to language courses; other subjects allowed only with DGS approval.

**Human Rights Core**
- **PA 5885** - Human Rights Policy: Issues and Actors (3.0 cr)
- **PA 5886** - Master of Human Rights Cohort Seminar I (1.0 cr)
- **PA 5887** - Master of Human Rights Cohort Seminar II (1.0 cr)

Take 2 or more course(s) totaling 6 or more credit(s) from the following:
- **LAW 6886** - International Human Rights Law (3.0 cr)
- **GLOS 5403** - Human Rights Advocacy (3.0 cr)
- **SOC 8171** - Cross-Disciplinary Perspectives in Human Rights (3.0 cr)

**Professional Core**
Minimum 12 credits

**Quantitative**
- Higher-level options available for students with strong statistical background, with DGS approval.
- Take 1 or more course(s) from the following:
  - **PA 5031** - Statistics for Public Affairs (4.0 cr)
  - **PA 5032** - Applied Regression (2.0 cr)
  - **PA 5033** - Multivariate Techniques (2.0 cr)
  - **PA 5044** - Applied Regression, Accelerated (2.0 cr)
  - **SOC 5811** - Social Statistics for Graduate Students [MATH] (4.0 cr)
  - **STAT 5021** - Statistical Analysis (4.0 cr)
  - **STAT 5201** - Sampling Methodology in Finite Populations (3.0 cr)
  - **STAT 5401** - Applied Multivariate Methods (3.0 cr)

**Qualitative**
- Take 1 or more course(s) from the following:
  - **PA 5041** - Qualitative Methods for Policy Analysts (4.0 cr)
  - **OLPD 5061** - Ethnographic Research Methods (3.0 cr)
  - **SOC 8852** - Advanced Qualitative Research Methods: Ethnographic Practicum (3.0 cr)

**Management**
- Take 1 or more course(s) from the following:
  - **PA 5011** - Management of Organizations (3.0 cr)
  - **PA 5101** - Management and Governance of Nonprofit Organizations (3.0 cr)
  - **PA 5151** - Organizational Perspectives on Global Development & Humanitarian Assistance (3.0 cr)

**Policy and Economic Analysis**
- Take 1 or more course(s) from the following:
  - **PA 5002** - Introduction to Policy Analysis (1.5 cr)
  - **PA 5021** - Microeconomics for Policy Analysis (3.0 cr)
  - **PA 5012** - The Politics of Public Affairs (3.0 cr)
  - **PA 5801** - Global Public Policy (3.0 cr)

**Capstone or Professional Paper**
- Take 1 or more course(s) from the following:
  - **PA 8081** - Capstone Workshop (3.0 cr)
  - **PA 8082** - Professional Paper-Writing Seminar (3.0 cr)
  - **PA 8921** - Master's: Professional Paper (Individual Option) (1.0 - 3.0 cr)

**Concentration and Electives**
Concentration (12 credits) plus electives to bring total credits to 45.

**Concentrations: Pre-Designed**
Students complete 12 credits in a pre-designed or self-designed concentration. Pre-designed concentrations are listed below. Consult the program or adviser for courses which do not appear but which may be eligible with consent of adviser.

**Human Rights, Race, and Ethnicity**
Take 12 or more credit(s) from the following:

- **AFRO 5866** - The Civil Rights and Black Power Movement, 1954–1984 (3.0 cr)
- **AFRO 8202** - Seminar: Intellectual History of Race (3.0 cr)
- **AFRO 8554** - Seminar: Gender, Race, Nation, and Policy--Perspectives from Within the African Diaspora (3.0 cr)
- **PA 5002** - Introduction to Policy Analysis (1.5 cr)
- **PA 5311** - Program Evaluation (3.0 cr)
- **PA 5422** - Diversity and Public Policy (3.0 cr)
- **PA 5421** - Racial Inequality and Public Policy (3.0 cr)
- **PA 8302** - Applied Policy Analysis (4.0 cr)
- **PA 8312** - Analysis of Discrimination (4.0 cr)
- **PSY 8210** - Law, Race, and Social Psychology (3.0 cr)

-OR-

**Human Rights, Gender, and Sexuality**
Take 12 or more credit(s) from the following:

- **GWSS 5104** - Transnational Feminist Theory (3.0 cr)
- **GWSS 8101** - Intellectual History of Feminism (3.0 cr)
- **GWSS 8103** - Feminist Theories of Knowledge (3.0 cr)
- **LAW 6827** - Women's International Human Rights (2.0 cr)
- **PA 5601** - Global Survey of Gender and Public Policy (3.0 cr)
- **PA 5561** - Gender and International Development (3.0 cr)
- **PUBH 6675** - Women's Health (2.0 cr)

-OR-

**Human Rights in the Arts and Humanities**
Take 12 or more credit(s) from the following:

- **ARTS 5710** - Advanced Photography (4.0 cr)
- **ARTS 5760** - Experimental Film and Video (4.0 cr)
- **ENGW 5102** - Graduate Fiction Writing (4.0 cr)
- **ENGW 5106** - Graduate Literary Nonfiction Writing (4.0 cr)

-OR-

**Human Rights, NGO Leadership, and Management Course**
Take 12 or more credit(s) from the following:

- **PA 5101** - Management and Governance of Nonprofit Organizations (3.0 cr)
- **PA 5104** - Strategic Human Resource Management (3.0 cr)
- **PA 5108** - Board leadership development (1.0 cr)
- **PA 5116** - Financing Public and Nonprofit Organizations (1.5 cr)
- **PA 5123** - Philanthropy in America: History, Practice, and Trends (3.0 cr)
- **PA 5137** - Project Management in the Public Arena (1.5 cr)
- **PA 5144** - Social Entrepreneurship (3.0 cr)
- **PA 5145** - Civic Participation in Public Affairs (3.0 cr)
- **PA 5151** - Organizational Perspectives on Global Development & Humanitarian Assistance (3.0 cr)
- **PA 5251** - Strategic Planning and Management (3.0 cr)
- **PA 5311** - Program Evaluation (3.0 cr)
- **PA 5405** - Public Policy Implementation (3.0 cr)
- **PA 5501** - Theories and Policies of Development (3.0 cr)
- **PA 5801** - Global Public Policy (3.0 cr)
- **PA 5927** - Effective Grantwriting for Nonprofit Organizations (1.5 cr)

-OR-

**Human Rights and Project/Policy Evaluation**
Take 12 or more credit(s) from the following:

- **PA 5311** - Program Evaluation (3.0 cr)
- **PA 5103** - Leadership and Change (3.0 cr)
- **PA 5104** - Strategic Human Resource Management (3.0 cr)
- **PA 5105** - Integrative Leadership Seminar (3.0 cr)
- **PA 5145** - Civic Participation in Public Affairs (3.0 cr)
- **PA 5251** - Strategic Planning and Management (3.0 cr)
- **PA 5405** - Public Policy Implementation (3.0 cr)
- **PUBH 6852** - Program Evaluation in Health and Mental Health Settings (2.0 cr)
- **SW 8602** - Direct Practice Evaluation (2.0 cr)

-OR-
Human Rights and Development
Take 12 or more credit(s) from the following:
- ESPM 5251 - Natural Resources in Sustainable International Development (3.0 cr)
- OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)
- OLPD 5107 - Gender, Education, and International Development (3.0 cr)
- OLPD 5121 - Educational Reform in International Context (3.0 cr)
- PA 5151 - Organizational Perspectives on Global Development & Humanitarian Assistance (3.0 cr)
- PA 5405 - Public Policy Implementation (3.0 cr)
- PA 5501 - Theories and Policies of Development (3.0 cr)
- PA 5503 - Economics of Development (3.0 cr)
- PA 5521 - Development Planning and Policy Analysis (4.0 cr)
- PA 5522 - International Development Policy, Families, and Health (3.0 cr)
- PA 5561 - Gender and International Development (3.0 cr)
- PA 5601 - Global Survey of Gender and Public Policy (3.0 cr)

-OR-

Human Rights, Conflict and International Security
Take 12 or more credit(s) from the following:
- LAW 6027 - Law of the Sea (2.0 cr)
- LAW 6889 - Laws of War (3.0 cr)
- LAW 6918 - Rule of Law (2.0 cr)
- PA 5801 - Global Public Policy (3.0 cr)
- PA 5813 - US Foreign Policy: The Institutional Basis (3.0 cr)
- PA 5823 - Managing Humanitarian and Refugee Crises: Challenges for Policymakers & Practitioners (1.0 cr)
- PA 8821 - National Security Policy (3.0 cr)
- POL 5885 - International Conflict and Security (3.0 cr)
- POL 5465 - Democracy and Dictatorship in Southeast Asia [GP] (3.0 cr)
- SOC 5315 - Never Again! Memory & Politics after Genocide [GP] (3.0 cr)
- GLOS 5315 - Never Again! Memory & Politics after Genocide [GP] (3.0 cr)
- SOC 5411 - Terrorist Networks & Counterterror Organizations (3.0 cr)

-OR-

Human Rights and Migration
Take 12 or more credit(s) from the following:
- PA 5281 - Immigrants, Urban Planning and Policymaking in the U.S. (3.0 cr)
- PA 5301 - Population Methods & Issues for the United States & Global South (3.0 cr)
- PA 5451 - Immigration, Health and Public Policy (3.0 - 4.0 cr)
- PA 5452 - Immigration and Public Policy (3.0 cr)
- PA 5801 - Global Public Policy (3.0 cr)
- LAW 6027 - Law of the Sea (2.0 cr)
- LAW 6872 - Immigration Law (3.0 cr)
- CHIC 5374 - Migrant Farmworkers in the United States: Families, Work, and Advocacy [CIV] (4.0 cr)

-OR-

Human Rights: Crime, Law, and Justice
Take 12 or more credit(s) from the following:
- LAW 6648 - International Criminal Law (3.0 cr)
- LAW 6893 - Transitional Justice (2.0 cr)
- LAW 6918 - Rule of Law (2.0 cr)
- POL 5403 - Constitutions, Democracy, and Rights: Comparative Perspectives (3.0 cr)
- POL 5492 - Law and (In)Justice in Latin America (3.0 cr)
- SOC 5104 - Crime and Human Rights (3.0 cr)
- SOC 5170 - Sociology of International Law: Human Rights, Trafficking, and Business Regulation [GP] (3.0 cr)
- SOC 5411 - Terrorist Networks & Counterterror Organizations (3.0 cr)
- SOC 5315 - Never Again! Memory & Politics after Genocide [GP] (3.0 cr)
- GLOS 5315 - Never Again! Memory & Politics after Genocide [GP] (3.0 cr)

-OR-

Human Rights and Research Methods (Qualitative and/or Quantitative)
Take 12 or more credit(s) from the following:
- OLPD 5061 - Ethnographic Research Methods (3.0 cr)
- PA 5031 - Statistics for Public Affairs (4.0 cr)
- PA 5032 - Applied Regression (2.0 cr)
- PA 5033 - Multivariate Techniques (2.0 cr)
- OR -

Human Rights and Area Studies (Latin America, Asia, Middle East, Africa, etc.)
The potential area studies courses offered at the University are vast. Students will work with their advisor to select at least 12 credits for an area studies concentration.

Take 12 or more credit(s) from the following:

-OR-

Human Rights and Public Health
Take 12 or more credit(s) from the following:
- BTHX 5520 - Social Justice and Bioethics (3.0 cr)
- CSPH 5111 - Ways of Thinking about Health (2.0 cr)
- PA 5451 - Immigration, Health and Public Policy (3.0 - 4.0 cr)
- PUBH 6034 - Evaluation (3.0 cr)
- PUBH 6115 - Worker Protection Law (1.0 cr)
- PUBH 6134 - Sustainable Development and Global Public Health (2.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6606 - Children's Health: Issues, Programs, and Policies (2.0 cr)
- PUBH 6634 - Children and Families: Public Health Policy and Advocacy (2.0 cr)
- PUBH 6801 - Health and Human Rights (3.0 cr)
- PUBH 6804 - Community Mental Health (2.0 cr)

-OR-

Human Rights and Environment
Take 12 or more credit(s) from the following:
- ESPM 5251 - Natural Resources in Sustainable International Development (3.0 cr)
- LAW 6215 - Environmental Law (3.0 cr)
- LAW 6400 - International Environmental Law (2.0 cr)
- LAW 7012 - CL: Environment and Energy Law (3.0 cr)
- PA 5242 - Environmental Planning, Policy, and Decision Making (3.0 cr)
- PA 5711 - Science, Technology & Environmental Policy (3.0 cr)
- PA 5722 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- PA 5723 - Water Policy (3.0 cr)
- PA 5724 - Climate Change Policy (3.0 cr)
- PA 5752 - Material-Energy Flows & Sustainable Development (3.0 cr)
- PA 5721 - Energy Systems and Policy (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The all-University integrated biosciences graduate program offers study toward the master of science (M.S.) degree under Plan A (coursework and original thesis). The program has two areas of emphasis: cell, molecular, and physiological (CMP) biology; and ecology, organismal, and population (EOP) biology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree or equivalent from an accredited college/university in the biological or physical sciences or a related field. Background in a variety of subdisciplines is appropriate preparation.

Other requirements to be completed before admission:
Recommended undergraduate courses for applicants pursuing the M.S. degree include one year each of chemistry, biology, and physics. One semester of calculus is also recommended. Applicants are strongly encouraged to have taken other advanced courses in chemistry, biology, additional calculus, and introductory statistics.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

**Required Coursework**

- Requirements for this program are current for Fall 2018
- Length of program in credits: 56
- This program does not require summer semesters for timely completion.
- The Integrated Biosciences Ph.D. is an All-University program delivered on the Twin Cities and Duluth Campuses. The University of Minnesota Twin Cities is the degree granting authority for the Integrated Biosciences Ph.D. program in Duluth.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The all-University integrated biosciences graduate program offers study toward the doctor of philosophy (Ph.D.) degree. The program has two areas of emphasis: cell, molecular, and physiological (CMP) biology; and ecology, organismal, and population (EOP) biology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree or equivalent from an accredited college or university in the biological or physical sciences or a related field.

Other requirements to be completed before admission:
Recommended undergraduate courses for applicants pursuing the Ph.D. degree include one year each of chemistry, biology, physics, calculus, and advanced chemistry. One semester (minimum) of statistics is also recommended.

Additional recommended courses for students in the ecology, organismal, and population (EOP) emphasis include one year of calculus, one semester each of ecology and evolutionary biology along with one course in two of the following subjects: genetics, cell biology, and biochemistry.

Additional recommended courses for students in the cell, molecular, and physiological (CMP) emphasis include one year of organic chemistry plus one course in each of the following: genetics, cell biology, and biochemistry.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79

Program Requirements
20 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Ph.D. Written Preliminary Examination: In addition to completing the curriculum for the major and internal related fields, students will be required to pass both a written and oral preliminary examination prior to completing the Ph.D. program. The preliminary written examination will be administered once the student has completed the majority of the required coursework. This will typically occur in the summer of the second year. The written examination will consist of a completed NIH or NSF grant application for the student's proposed research project. The project will be evaluated by the Thesis Examining Committee, which will also serve as the student's Final Oral Examining Committee to provide continuity of advice during the length of the student's research program.

Ph.D. Oral Preliminary Examination: The oral preliminary examination will be administered within two months of the successful completion of the preliminary written examination. The examination will be administered by the graduate faculty according to University regulations and all students will be required to pass the oral examination to continue in the Ph.D. program.

Most students will complete the requirements for the Ph.D. degree within five years. The final oral defense will be conducted by the graduate faculty according to University regulations. It will consist of a public seminar presented by the student.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 38
- This program requires summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Health coaching is an emerging method of partnering with clients to achieve their overall goals. It is practiced from a holistic perspective that views each person as intrinsically whole and the ultimate expert in his or her healing journey. Health coaching is being offered in a wide range of venues including hospitals, clinics, community health and fitness facilities, corporations, educational institutions, and private practices. The Earl E. Bakken Center for Spirituality & Healing is a pioneer in the field of health coaching, working to advance education, research and care model innovation.

The master's of arts degree is designed for individuals with a bachelor's degree in either a healthcare or non-healthcare field. Students without healthcare backgrounds are eligible for admission with the prior completion of required prerequisites. The degree is designed for students who wish to further their education so that they may hold positions of responsibility coaching individuals and groups, initiating and leading new coaching service lines, and developing outcomes assessments for coaching initiatives. Although the instruction is based on research in the field, this Plan B degree is not intended to provide intensive research training and is understood to be a terminal degree. The degree consists of 38 credits of coursework, including 6 credits of electives, and a minimum 2-credit project that is presented in both verbal and written format prior to graduation. Elective credits may be chosen from CSPH courses or students may complete a minor from other departments, if approved by their academic adviser. In all cases, the student's faculty advisor will work with the student in designing a program plan that accommodates the student's unique learning objectives.

The program is structured to prepare a wide variety of students to be skilled and knowledgeable advocates and support agents for individuals on their path to greater health and healing. Students must be able to demonstrate the following competencies prior to being admitted into the Advanced Health Coaching Seminar:
- Demonstrate appropriate knowledge of major health problems.
- Demonstrate familiarity with the routine mechanics of the conventional healthcare system and its processes.
- Demonstrate basic knowledge of physical and psychological symptoms related to disease and treatment.
- Demonstrate basic knowledge of pharmacology, pathophysiology of disease, and assessment of symptoms across the life span.

Students whose previous coursework does not enable them to meet these competencies may arrange with the program director to do additional outside coursework during the first year of the program.

University of Minnesota health coaching programs are accredited by the National Consortium for Credentialing Health and Wellness Coaches (www.nccchwco.org). Students in the MA program are eligible to sit for National Board Certification when the required core courses are completed (CSPH 5701-5702-5703-5705-5706).

Program Delivery
This program is available:
* primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.
Bachelor's degree in a health-related field or a bachelor's in a non-health-related field with specific coursework in psychology, physiology, and statistics from an accredited institution.

**Required prerequisites**

**Required Prerequisite Coursework**

Previous coursework in basic psychology, human physiology, and statistics must have been completed. Statistics must be completed within 7 years prior to application. All prerequisites must be completed at an accredited institution for a grade equal to B (3.0) or better.

Other requirements to be completed before admission:

In addition to the University's online application, applicants submit a personal statement describing their goals for the program and their professional qualifications. This three to five page statement should focus on what led to the applicant's interest in health coaching as a professional activity, including a description of interest in, and experience with, holistic integrative health and healing. Three letters of recommendation, transcripts and a current CV or resume are also required. All items are uploaded into the University's online application. Selected applicants will be invited for admissions interviews.

**Special Application Requirements:**

The M.A. is designed for individuals with a bachelor's degree in a health-related field, or for professionals without healthcare backgrounds who have extensive interest in working with individuals and groups to optimize wellbeing, assuming completion of required prerequisites. All applicants must have completed the prerequisite courses in Physiology, Statistics (within past 7 years) and Psychology before beginning core health coaching coursework the Fall semester of entrance. All prerequisite courses must be completed at an accredited institution with a grade equal to B (3.0) or better.

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- **IELTS**
  - Total Score: 6.5
- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan B:** Plan B requires 32 to 38 major credits and 0 to 6 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** Culminating course for the master's of arts in integrative health and wellbeing coaching program. Students use coaching data collected during the Advanced Health Coaching Practicum, Health Coaching Professional Internship, or group health coaching course to write and orally present a research-informed concept analysis and retrospective narrative case report. Prerequisites: Integrative Health and Wellbeing Coaching MA student, CSPH 5701, 5702, 5703, 5704, 5706, 5707, 5709* (*may be taken concurrently).

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Up to 3 credits of CSPH courses at the 4xxx-level may be used for elective credits.
Core Required Coursework
Core courses require a grade of B (3.0) or higher, except CSPH 5705 and 8701, which require a grade of S. Final skills assessments for CSPH 5702, 5703, 5705 and 5709 must earn scores of at least 80%. If a core course or skills assessment is not successfully completed, students may be required at instructors' discretion to repeat the course and/or take CSPH 5712 for 1-2 credits for remediation within one calendar year. CSPH 5712 taken for remediation cannot be counted as an elective.

CSPH 5701 - Fundamentals of Health Coaching I (4.0 cr)
CSPH 5702 - Fundamentals of Health Coaching II (4.0 cr)
CSPH 5703 - Advanced Health Coaching Practicum (3.0 cr)
CSPH 5704 - Business of Health Coaching (2.0 cr)
CSPH 5705 - Health Coaching Professional Internship (2.0 cr)
CSPH 5706 - Lifestyle Medicine (2.0 cr)
CSPH 5707 - Coaching People with Clinical Conditions (2.0 cr)
CSPH 5709 - Health and Wellbeing Group Coaching (2.0 cr)
CSPH 8701 - Integrative Health and Wellbeing Coaching MA Capstone Project (2.0 cr)

Additional Required Coursework
Each additional required course must be taken on an A-F grading basis and requires a grade of B- or higher. Failure to earn at least a B- may result in required remediation work at the discretion of the instructor, the program director, and the director of graduate studies. Remediation work may include repeating the course for an acceptable grade within one calendar year.

CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
CSPH 5431 - Functional Nutrition: An Expanded View of Nutrition, Chronic Disease, and Optimal Health (2.0 cr)
CSPH 5708 - Mind-Body Science and the Art of Transformation (1.0 cr)
KIN 5123 - Motivational Interventions in Physical Activity (3.0 cr)

Electives
Complete 6 CSPH credits. Up to 3 credits may be from 4xxx-level CSPH courses. Electives require a passing grade of C- or higher or S, provided an overall GPA of 3.0 is maintained.

Take 6 or more credit(s) from the following:
- CSPH 4311 - Foundations of Hatha Yoga: Alignment & Movement Principles (3.0 cr)
- CSPH 4312 - Hatha Yoga Philosophy, Lifestyle, & Ethics (3.0 cr)
- CSPH 4313 - Hatha Yoga Teaching Principles & Methodology (2.0 cr)
- CSPH 5000 - Explorations in Integrative Therapies and Healing Practices (1.0 - 4.0 cr)
- CSPH 5102 - Art of Healing: Self as Healer (1.0 cr)
- CSPH 5111 - Ways of Thinking about Health (2.0 cr)
- CSPH 5115 - Cultural Awareness, Knowledge and Health (3.0 cr)
- CSPH 5118 - Whole Person, Whole Community: The Reciprocity of Wellbeing (3.0 cr)
- CSPH 5121 - Whole Systems Healing: Health and the Environment (2.0 cr)
- CSPH 5201 - Spirituality and Resilience (2.0 cr)
- CSPH 5211 - Peacemaking and Spirituality: A Journey Toward Healing and Strength (2.0 - 3.0 cr)
- CSPH 5212 - Peacebuilding Through Mindfulness: Transformative Dialogue in the Global Community (3.0 cr)
- CSPH 5215 - Forgiveness and Healing: A Journey Toward Wholeness (3.0 cr)
- CSPH 5225 - Meditation: Integrating Body and Mind (2.0 cr)
- CSPH 5226 - Advanced Meditation: Body, Brain, Mind, and Universe (1.0 cr)
- CSPH 5311 - Introduction to Traditional Chinese Medicine (2.0 cr)
- CSPH 5313 - Acupuncture (1.0 cr)
- CSPH 5315 - Traditional Tibetan Medicine: Ethics, Spirituality, and Healing (2.0 cr)
- CSPH 5317 - Yoga: Ethics, Spirituality, and Healing (2.0 cr)
- CSPH 5318 - Tibetan Medicine, Ayurveda, and Yoga in India (4.0 cr)
- CSPH 5319 - Yoga and Ayurveda in India (4.0 cr)
- CSPH 5331 - Foundations of Shamanism and Shamanic Healing (2.0 cr)
- CSPH 5332 - Global Healing Traditions: Amazonia Plant Spirit Medicine (2.0 cr)
- CSPH 5341 - Overview of Indigenous Hawaiian Healing (2.0 cr)
- CSPH 5343 - Ayurveda Medicine: The Science of Self-healing (2.0 cr)
- CSPH 5401 - People, Plants, and Drugs: Introduction to Ethnopharmacology (3.0 cr)
- CSPH 5421 - Botanical Medicines in Integrative Healthcare (3.0 cr)
- CSPH 5423 - Botanical Medicines: Foundations and Practical Applications (1.0 cr)
- CSPH 5431 - Functional Nutrition: An Expanded View of Nutrition, Chronic Disease, and Optimal Health (2.0 cr)
- CSPH 5503 - Aromatherapy Fundamentals (1.0 cr)
- CSPH 5511 - Interdisciplinary Palliative Care: An Experiential Course in a Community Setting (2.0 cr)
- CSPH 5512 - Spiritual Aspects of Palliative Care (2.0 cr)
- CSPH 5513 - Living Well, Dying Well: Empowering Patient Communication at the End of Life (2.0 cr)
- CSPH 5521 - Therapeutic Landscapes (3.0 cr)
- CSPH 5522 - Therapeutic Horticulture (3.0 cr)
- CSPH 5523 - Applications in Therapeutic Horticulture (2.0 cr)
- CSPH 5533 - Introduction to Energy Healing (2.0 cr)
• CSPH 5535 - Reiki Healing (1.0 cr)
• CSPH 5536 - Advanced Reiki Healing: Level II (1.0 cr)
• CSPH 5541 - Emotional Healing and Happiness: Eastern and Western Approaches to Transforming the Mind (2.0 cr)
• CSPH 5555 - Introduction to Body and Movement-based Therapies (2.0 cr)
• CSPH 5561 - Overview of the Creative Arts in Health and Healing (2.0 cr)
• CSPH 5601 - Music, Health and Healing (2.0 cr)
• CSPH 5605 - Movement and Music for Well-being and Healing (2.0 cr)
• CSPH 5631 - Healing Imagery I (2.0 cr)
• CSPH 5641 - Animals in Health Care: The Healing Dimensions of Human/Animal Relationships (3.0 cr)
• CSPH 5642 - Nature Heals: An Introduction to Nature-Based Therapeutics (3.0 cr)
• CSPH 5643 - Horse as Teacher: Intro to Nature-Based Therapeutics Equine-Assisted Activities & Therapies (EAAT) (3.0 cr)
• CSPH 5711 - Optimal Healing Environments (3.0 cr)
• CSPH 5712 - Supervised Health Coaching Skills Advancement (1.0 - 2.0 cr)
• CSPH 5713 - Health Coaching for Health Professionals (2.0 cr)
• CSPH 5805 - Wellbeing in the Workplace (3.0 cr)
• CSPH 5806 - Wellbeing and Resiliency for Health Professionals (1.0 cr)
• CSPH 5807 - Mindfulness in the Workplace: Pause, Practice, Perform (2.0 cr)
• CSPH 5805 - Food Matters: Cook Like Your Life Depends On It (1.0 cr)
• CSPH 6000 - Integrative Therapies and Healing Practices Topics (1.0 - 4.0 cr)
• CSPH 8101 - Critiquing and Synthesizing Complementary and Alternative Healing Practices (CAHP) Research (2.0 cr)
• CSPH 8191 - Independent Study in Integrative Therapies and Healing Practices (1.0 - 6.0 cr)

Integrative Therapies and Healing Practices Minor
Spirituality and Healing, Earl E Bakken Center for
Graduate School

Link to a list of faculty for this program.

Contact Information:
Earl E. Bakken Center for Spirituality & Healing, Mayo Memorial Building, Room C591, MMC 505, 420 Delaware Street SE, Minneapolis, MN 55455 (612-624-9459; fax: 612-626-5280)
Website: http://www.csh.umn.edu

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 8
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The integrative therapies and healing practices minor is an interdisciplinary program designed to expose students to a global range of integrative, complementary, cross-cultural and spiritual healing practices. Courses enhance the preparation of graduate students in health sciences and other disciplines by developing knowledge and skills in the emerging field of integrative health care. Specifically, the minor provides students with a theoretical basis for applying integrative therapies and healing practices; prepares students to research integrative therapies and healing practices; and prepares students to work collaboratively with other health professionals and patients in a multicultural, pluralistic healthcare system. The curriculum includes a core introductory course that provides the theoretical foundation for the program. Students choose additional courses offered by the Earl E. Bakken Center for Spirituality & Healing in clinical applications, spirituality, or cross-cultural health and healing. The program draws upon the rich expertise of University and community-based faculty who encourage and challenge students to discover new ways of caregiving, and to cultivate diverse skills that will transform their life's work, experiences and relationships with others.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The minor is designed for graduate students pursuing health or other careers, and who are seeking to deepen their understanding of integrative therapeutic topics.

Graduate students come from wide-ranging backgrounds and careers, including nursing, pharmacy, medicine, nutrition, psychology, physical therapy, liberal studies and public health.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Note that students may not use course credits to satisfy requirements for both a major and the minor.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.
Masters

Required Course
All students complete the Introduction to Integrative Therapies and Healing Practices course.

CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)

Elective Options
Take 2 or more course(s) totaling 5 or more credit(s) from the following:

- CSPH 5000 - Explorations in Integrative Therapies and Healing Practices (1.0 - 4.0 cr)
- CSPH 5102 - Art of Healing: Self as Healer (1.0 cr)
- CSPH 5111 - Ways of Thinking about Health (2.0 cr)
- CSPH 5115 - Cultural Awareness, Knowledge and Health (3.0 cr)
- CSPH 5118 - Whole Person, Whole Community: The Reciprocity of Wellbeing (3.0 cr)
- CSPH 5121 - Whole Systems Healing: Health and the Environment (2.0 cr)
- CSPH 5201 - Spirituality and Resilience (2.0 cr)
- CSPH 5211 - Peacemaking and Spirituality: A Journey Toward Healing and Strength (2.0 - 3.0 cr)
- CSPH 5212 - Peacebuilding Through Mindfulness: Transformative Dialogue in the Global Community (3.0 cr)
- CSPH 5215 - Forgiveness and Healing: A Journey Toward Wholeness (3.0 cr)
- CSPH 5225 - Meditation: Integrating Body and Mind (2.0 cr)
- CSPH 5226 - Advanced Meditation: Body, Brain, Mind, and Universe (1.0 cr)
- CSPH 5311 - Introduction to Traditional Chinese Medicine (2.0 cr)
- CSPH 5313 - Acupressure (1.0 cr)
- CSPH 5315 - Traditional Tibetan Medicine: Ethics, Spirituality, and Healing (2.0 cr)
- CSPH 5317 - Yoga: Ethics, Spirituality, and Healing (2.0 cr)
- CSPH 5318 - Tibetan Medicine, Ayurveda, and Yoga in India (4.0 cr)
- CSPH 5319 - Yoga and Ayurveda in India (4.0 cr)
- CSPH 5331 - Foundations of Shamanism and Shamantic Healing (2.0 cr)
- CSPH 5332 - Global Healing Traditions: Amazonia Plant Spirit Medicine (2.0 cr)
- CSPH 5341 - Overview of Indigenous Hawaiian Healing (2.0 cr)
- CSPH 5343 - Ayurveda Medicine: The Science of Self-healing (2.0 cr)
- CSPH 5401 - People, Plants, and Drugs: Introduction to Ethnopharmacology (3.0 cr)
- CSPH 5421 - Botanical Medicines in Integrative Healthcare (3.0 cr)
- CSPH 5423 - Botanical Medicines: Foundations and Practical Applications (1.0 cr)
- CSPH 5431 - Functional Nutrition: An Expanded View of Nutrition, Chronic Disease, and Optimal Health (2.0 cr)
- CSPH 5503 - Aromatherapy Fundamentals (1.0 cr)
- CSPH 5511 - Interdisciplinary Palliative Care: An Experiential Course in a Community Setting (2.0 cr)
- CSPH 5512 - Spiritual Aspects of Palliative Care (2.0 cr)
- CSPH 5513 - Living Well, Dying Well: Empowering Patient Communication at the End of Life (2.0 cr)
- CSPH 5521 - Therapeutic Landscapes (3.0 cr)
- CSPH 5522 - Therapeutic Horticulture (3.0 cr)
- CSPH 5523 - Applications in Therapeutic Horticulture (2.0 cr)
- CSPH 5533 - Introduction to Energy Healing (2.0 cr)
- CSPH 5535 - Reiki Healing (1.0 cr)
- CSPH 5536 - Advanced Reiki Healing: Level II (1.0 cr)
- CSPH 5541 - Emotional Healing and Happiness: Eastern and Western Approaches to Transforming the Mind (2.0 cr)
- CSPH 5555 - Introduction to Body and Movement-based Therapies (2.0 cr)
- CSPH 5556 - Overview of the Creative Arts in Health and Healing (2.0 cr)
- CSPH 5560 - Movement and Music for Well-being and Healing (2.0 cr)
- CSPH 5563 - Healing Imagery I (2.0 cr)
- CSPH 5564 - Animals in Health Care: The Healing Dimensions of Human/Animal Relationships (3.0 cr)
- CSPH 5564 - Nature Heals: An Introduction to Nature-Based Therapeutics (3.0 cr)
- CSPH 5600 - Nature Heals: An Introduction to Nature-Based Therapeutics Equine-Assisted Activities & Therapies (EAAT) (3.0 cr)
- CSPH 5701 - Fundamentals of Health Coaching I (4.0 cr)
- CSPH 5706 - Lifestyle Medicine (2.0 cr)
- CSPH 5708 - Mind-Body Science and the Art of Transformation (1.0 cr)
- CSPH 5711 - Optimal Healing Environments (3.0 cr)
- CSPH 5712 - Supervised Health Coaching Skills Advancement (1.0 - 2.0 cr)
- CSPH 5713 - Health Coaching for Health Professionals (2.0 cr)
- CSPH 5805 - Wellbeing in the Workplace (3.0 cr)
- CSPH 5806 - Wellbeing and Resiliency for Health Professionals (1.0 cr)
- CSPH 5807 - Mindfulness in the Workplace: Pause, Practice, Perform (2.0 cr)
- CSPH 5905 - Food Matters: Cook Like Your Life Depends On It (1.0 cr)
- CSPH 6000 - Integrative Therapies and Healing Practices Topics (1.0 - 4.0 cr)
- CSPH 8101 - Critiquing and Synthesizing Complementary and Alternative Healing Practices (CAHP) Research (2.0 cr)
- CSPH 8191 - Independent Study in Integrative Therapies and Healing Practices (1.0 - 6.0 cr)
Doctoral

Required Course
All students take the Introduction to Integrative Therapies and Healing Practices course.

CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)

Elective Options
Take 2 or more course(s) totaling 9 or more credit(s) from the following:

- CSPH 5000 - Explorations in Integrative Therapies and Healing Practices (1.0 - 4.0 cr)
- CSPH 5102 - Art of Healing: Self as Healer (1.0 cr)
- CSPH 5111 - Ways of Thinking about Health (2.0 cr)
- CSPH 5115 - Cultural Awareness, Knowledge and Health (3.0 cr)
- CSPH 5118 - Whole Person, Whole Community: The Reciprocity of Wellbeing (3.0 cr)
- CSPH 5121 - Whole Systems Healing: Health and the Environment (2.0 cr)
- CSPH 5201 - Spirituality and Resilience (2.0 cr)
- CSPH 5211 - Peacemaking and Spirituality: A Journey Toward Healing and Strength (2.0 - 3.0 cr)
- CSPH 5212 - Peacebuilding Through Mindfulness: Transformative Dialogue in the Global Community (3.0 cr)
- CSPH 5215 - Forgiveness and Healing: A Journey Toward Wholeness (3.0 cr)
- CSPH 5225 - Meditation: Integrating Body and Mind (2.0 cr)

The integrative therapies and healing practices certificate is an interdisciplinary program designed to expose students to a global range of integrative, complementary, cross-cultural and spiritual healing practices. Courses enhance the preparation of students in health sciences and other disciplines by developing knowledge and skills in the emerging field of integrative health care. Specifically, the certificate provides students with a theoretical basis for applying integrative therapies and healing practices; prepares students to research integrative therapies and healing practices; and prepares students to work collaboratively with other health professionals and patients in a multicultural, pluralistic healthcare system. The curriculum for the 12-credit certificate includes a core introductory course that provides the theoretical foundation for the program, as well as a course in self care. Students choose additional courses offered by the Earl E. Bakken Center for Spirituality & Healing in clinical applications, spirituality, or cross-cultural health and healing. The program draws upon the rich expertise of University and community-based faculty who encourage and challenge students to discover new ways of care-giving, and to cultivate diverse skills that will transform their life’s work, experiences and relationships with others.

The certificate is also available with a health coaching track. Students who pursue the certificate with the health coaching track complete a total of 20 credits, including the core introductory course.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)
• primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The certificate requires applicants to have a bachelors or higher degree in a healthcare or healthcare-related field.

Other requirements to be completed before admission:
This field of study is designed for the healthcare professional, those currently enrolled in a graduate health professions program, board-certified chaplains with at least three years in a healthcare setting, and those with a non-healthcare bachelor's degree with direct work experience in health related areas. Such fields include nursing, social work, psychology, medicine, nutrition, pharmacy, chiropractic, naturopathy, and licensed acupuncture.

The certificate’s Health Coaching track requires an applicant interview prior to admission.

Special Application Requirements:
In addition to the University's online application, applicants submit a personal statement describing their goals for obtaining the certificate and their professional qualifications. The statement should address your interest in integrative therapies and short- and long-term professional goals after completing the program. Two letters of recommendation are required, preferably one from an academic source and one from an employer/supervisor. A current C.V. or resume is also required. All items are uploaded directly into the University's online application.
Applicants to the Health Coaching track are required to provide three letters of recommendation and a three-to-five page personal statement focusing on what led to the applicant's interest in Health Coaching as a professional activity, including a description of interest in and experience with holistic integrative health and healing. A current C.V. or resume is also required. All items are uploaded directly into the University's online application. Selected Health Coaching track applicants will be chosen for admissions interviews.

The application deadline is March 15 for entrance into program the following fall semester.

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- **IELTS**
  - Total Score: 6.5
- **MELAB**
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

### Program Requirements

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

#### Required Course

Students pursuing either the general certificate or the certificate with health coaching track must complete this course.

**CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)**

#### Certificate Options

**General Certificate**

**Self Care Course Requirement**

General certificate students complete one of the two following courses for at least one credit:

- **CSPH 5102 - Art of Healing: Self as Healer (1.0 cr)**
- or **CSPH 5806 - Wellbeing and Resiliency for Health Professionals (1.0 cr)**

**Electives**

Students are encouraged to choose electives, in consultation with their faculty advisor, from CSPH courses consistent with their academic training and professional goals. Up to 3 credits of CSPH courses at the 4xxx-level may be applied to the certificate.

Take 3 or more course(s) totaling 8 or more credit(s) from the following:

- **CSPH 4311 - Foundations of Hatha Yoga: Alignment & Movement Principles (3.0 cr)**
- **CSPH 4312 - Hatha Yoga Philosophy, Lifestyle, & Ethics (3.0 cr)**
- **CSPH 4313 - Hatha Yoga Teaching Principles & Methodology (2.0 cr)**
- **CSPH 5000 - Explorations in Integrative Therapies and Healing Practices (1.0 - 4.0 cr)**
- **CSPH 5102 - Art of Healing: Self as Healer (1.0 cr)**
- **CSPH 5111 - Ways of Thinking about Health (2.0 cr)**
- **CSPH 5115 - Cultural Awareness, Knowledge and Health (3.0 cr)**
- **CSPH 5118 - Whole Person, Whole Community: The Reciprocity of Wellbeing (3.0 cr)**
- **CSPH 5121 - Whole Systems Healing: Health and the Environment (2.0 cr)**
- **CSPH 5201 - Spirituality and Resilience (2.0 cr)**
- **CSPH 5211 - Peacemaking and Spirituality: A Journey Toward Healing and Strength (2.0 - 3.0 cr)**
- **CSPH 5212 - Peacebuilding Through Mindfulness: Transformative Dialogue in the Global Community (3.0 cr)**
- **CSPH 5215 - Forgiveness and Healing: A Journey Toward Wholeness (3.0 cr)**
- **CSPH 5225 - Meditation: Integrating Body and Mind (2.0 cr)**
- **CSPH 5226 - Advanced Meditation: Body, Brain, Mind, and Universe (1.0 cr)**
• CSPH 5311 - Introduction to Traditional Chinese Medicine (2.0 cr)
• CSPH 5313 - Acupressure (1.0 cr)
• CSPH 5315 - Traditional Tibetan Medicine: Ethics, Spirituality, and Healing (2.0 cr)
• CSPH 5317 - Yoga: Ethics, Spirituality, and Healing (2.0 cr)
• CSPH 5318 - Tibetan Medicine, Ayurveda, and Yoga in India (4.0 cr)
• CSPH 5319 - Yoga and Ayurveda in India (4.0 cr)
• CSPH 5331 - Foundations of Shamanism and Shamanic Healing (2.0 cr)
• CSPH 5332 - Global Healing Traditions: Amazonia Plant Spirit Medicine (2.0 cr)
• CSPH 5341 - Overview of Indigenous Hawaiian Healing (2.0 cr)
• CSPH 5343 - Ayurveda Medicine: The Science of Self-healing (2.0 cr)
• CSPH 5401 - People, Plants, and Drugs: Introduction to Ethnopharmacology (3.0 cr)
• CSPH 5421 - Botanical Medicines in Integrative Healthcare (3.0 cr)
• CSPH 5423 - Botanical Medicines: Foundations and Practical Applications (1.0 cr)
• CSPH 5431 - Functional Nutrition: An Expanded View of Nutrition, Chronic Disease, and Optimal Health (2.0 cr)
• CSPH 5503 - Aromatherapy Fundamentals (1.0 cr)
• CSPH 5511 - Optimal Healing Environments: An Experiential Course in a Community Setting (2.0 cr)
• CSPH 5512 - Spiritual Aspects of Palliative Care (2.0 cr)
• CSPH 5513 - Living Well, Dying Well: Empowering Patient Communication at the End of Life (2.0 cr)
• CSPH 5521 - Therapeutic Landscapes (3.0 cr)
• CSPH 5522 - Therapeutic Horticulture (3.0 cr)
• CSPH 5523 - Applications in Therapeutic Horticulture (2.0 cr)
• CSPH 5533 - Introduction to Energy Healing (2.0 cr)
• CSPH 5535 - Reiki Healing (1.0 cr)
• CSPH 5536 - Advanced Reiki Healing: Level II (1.0 cr)
• CSPH 5541 - Emotional Healing and Happiness: Eastern and Western Approaches to Transforming the Mind (2.0 cr)
• CSPH 5544 - Introduction to Body and Movement-based Therapies (2.0 cr)
• CSPH 5561 - Overview of the Creative Arts in Health and Healing (2.0 cr)
• CSPH 5601 - Music, Health, and Healing (2.0 cr)
• CSPH 5605 - Movement and Music for Well-being and Healing (2.0 cr)
• CSPH 5631 - Healing Imagery I (2.0 cr)
• CSPH 5641 - Animals in Health Care: The Healing Dimensions of Human/Animal Relationships (3.0 cr)
• CSPH 5642 - Nature Heals: An Introduction to Nature-Based Therapeutics (3.0 cr)
• CSPH 5643 - Horse as Teacher: Intro to Nature-Based Therapeutics Equine-Assisted Activities & Therapies (EAAT) (3.0 cr)
• CSPH 5701 - Fundamentals of Health Coaching I (4.0 cr)
• CSPH 5706 - Lifestyle Medicine (2.0 cr)
• CSPH 5708 - Mind-Body Science and the Art of Transformation (1.0 cr)
• CSPH 5711 - Optimal Healing Environments (3.0 cr)
• CSPH 5712 - Supervised Health Coaching Skills Advancement (1.0 - 2.0 cr)
• CSPH 5713 - Health Coaching for Health Professionals (2.0 cr)
• CSPH 5805 - Wellbeing in the Workplace (3.0 cr)
• CSPH 5806 - Wellbeing and Resiliency for Health Professionals (1.0 cr)
• CSPH 5807 - Mindfulness in the Workplace: Pause, Practice, Perform (2.0 cr)
• CSPH 5905 - Food Matters: Cook Like Your Life Depends On It (1.0 cr)
• CSPH 6000 - Integrative Therapies and Healing Practices (1.0 - 4.0 cr)
• CSPH 8101 - Critiquing and Synthesizing Complementary and Alternative Healing Practices (CAHP) Research (2.0 cr)
• CSPH 8191 - Independent Study in Integrative Therapies and Healing Practices (1.0 - 6.0 cr)

-OR-

Health Coaching track
Coursework for the certificate with the health coaching track is detailed in sub-plan requirements.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Health Coaching
Health coaching is an emerging method of partnering with clients to achieve their overall goals. It is practiced from a holistic perspective that views each person as intrinsically whole and the ultimate expert in his or her healing journey. Health coaching is being offered in a wide range of venues including hospitals, clinics, community health and fitness facilities, corporations, educational institutions, and private practices. The Earl E. Bakken Center for Spirituality & Healing is a pioneer in the field of health coaching, working to advance education, research and care model innovation.

University of Minnesota health coaching programs have program approval from the National Consortium for Credentialing Health and...
Wellness Coaches (www.ncchwc.org), and were permanently accredited in 2017.

In addition to the required CSPH 5101 introduction course, students complete the health coaching track course requirements for a minimum of 20 credits. Students are strongly encouraged to confer with their faculty advisor concerning the specific sequence in which the track coursework must be taken. A minimum GPA of 3.0 must be maintained for all required track coursework.

Coursework may be completed in a minimum of four semesters or may be spread over a variable amount of time up to a maximum of four years.

**Health Coaching track requirements**

- CSPH 5701 - Fundamentals of Health Coaching I (4.0 cr)
- CSPH 5702 - Fundamentals of Health Coaching II (4.0 cr)
- CSPH 5703 - Advanced Health Coaching Practicum (3.0 cr)
- CSPH 5704 - Business of Health Coaching (2.0 cr)
- CSPH 5705 - Health Coaching Professional Internship (2.0 cr)
- CSPH 5706 - Lifestyle Medicine (2.0 cr)
**Twin Cities Campus**

**Molecular, Cellular, Developmental Biology and Genetics M.S.**

**Graduate School**

**Contact Information:**
MCDB&G Graduate Program, 6-160 Jackson Hall, 321 Church Street SE, University of Minnesota, Minneapolis, MN, 55455 (612-624-7470, fax: 612-626-6140)
Email: mcdbg@umn.edu OR gcgrad@umn.edu
Website: [http://mcdbg.umn.edu](http://mcdbg.umn.edu) OR [http://cbs.umn.edu/genetic-counseling/home](http://cbs.umn.edu/genetic-counseling/home)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 55
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The MCDB&G MS degree can be earned in one of three ways:

1. The MS with a genetic counseling track: This full-time program is designed to provide students with the academic foundation and clinical expertise necessary to enter the profession of genetic counseling. The curriculum integrates selected coursework with firsthand experience in the diagnostic medical genetics laboratories and supervised work in clinical settings with patients and families. The clinical component involves work in multiple clinical settings throughout the Twin Cities, the Mayo clinic in Rochester, St. Cloud and other centers. The MS with a genetic counseling track is accredited by the Accreditation Council for Genetic Counseling, and all graduates are eligible to apply to the American Board of Genetic Counseling for active candidate status and to sit for board certification.

2. The joint JD/MS-MCDB&G program: This program, offered in conjunction with the joint degree program in law, science, and technology, is unique in the nation and enables students to combine a JD degree with the MCDB&G MS degree. Students entering this program must be admitted to both MCDB&G and the Law School.

3. Eligible MCDB&G PhD students, who leave before they have completed their doctoral degree, may be offered the option to complete the MS. Eligibility to complete the MS is determined by the student's advisor and the MCDB&G director of graduate studies. MCDB&G does not offer a free-standing MS degree program in research.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

For genetic counseling admissions information go to [http://cbs.umn.edu/genetic-counseling/admissions](http://cbs.umn.edu/genetic-counseling/admissions)

For JD/MS admissions info - [http://cbs.umn.edu/academics/departments/gcd/graduate/prospective](http://cbs.umn.edu/academics/departments/gcd/graduate/prospective)

Other requirements to be completed before admission:
Applications to the MS with the genetic counseling track are stronger if the applicant has interacted with a practicing genetic counselor--in the clinical setting, or in another capacity such as personal interviews--that affords the applicant a real-life understanding of the profession. The application deadline date is December 15, and admission is for fall semester only.

Successful applicants to the joint JD/MS program must have previous research experience in an academic or industrial setting, in addition to any course-related laboratory experience. Demonstrated familiarity with and aptitude for basic science research is important prior to embarking on this dual degree program. The application deadline date is December 1, and admission is for fall semester only. Entry into the joint JD/MS program requires separate admittance to both the Law School and MCDB&G.

Applicants must submit their test score(s) from the following:
- GRE
International applicants must submit score(s) from one of the following tests:
- TOEFL
- IELTS

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 30 to 55 major credits and 0 credits outside the major. The final exam is written and oral.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

Plan A
Take the following courses for at least 17 credits. Non-GCD coursework, selected in consultation with the advisor, may be applied to this requirement. MCDG 8900 can be taken for one credit four times (over four semesters). MCDG 8950 can be taken for one credit twice (over two semesters).
- GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
- GCD 8151 - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
- GCD 8161 - Advanced Cell Biology and Development (3.0 cr)
- GCD 8171 - Literature Analysis (1.0 - 2.0 cr)
- BIOC 8401 - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)
- MCDG 8900 - Student Research Seminar (1.0 cr)
- MCDG 8950 - Teaching Practicum (1.0 cr)

Required Coursework
Take at least one of the following courses for three credits:
- GCD 5005 - Computer Programming for Biology (3.0 cr)
  or GCD 8920 - Special Topics (1.0 - 4.0 cr)

Plan A thesis credits
10 thesis credits are required.
Take 10 or more credit(s) from the following:
- MCDG 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B
Take at least 27 credits of coursework from the following list. Non-GCD courses, selected in consultation with the advisor, can be applied to this requirement. MCDG 8900 can be taken for one credit four times (over four semesters). MCDG 8950 can be taken for one credit twice (over two semesters).
- GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
- GCD 8151 - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
- GCD 8161 - Advanced Cell Biology and Development (3.0 cr)
- GCD 8171 - Literature Analysis (1.0 - 2.0 cr)
- BIOC 8401 - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)
- MCDG 8900 - Student Research Seminar (1.0 cr)
- MCDG 8950 - Teaching Practicum (1.0 cr)

Required Coursework
Take at least one of the following courses for three credits:
- GCD 8920 - Special Topics (1.0 - 4.0 cr)
  or GCD 5005 - Computer Programming for Biology (3.0 cr)

Joint- or Dual-degree Coursework: JD/MS-MCDB&G (Joint Degree Program in Law, Science and Technology) Student may take a total of 12 credits in common among the academic programs.
Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Genetic Counseling
This sub-plan is limited to students completing the program under Plan B.

The MS with genetic counseling track is designed to be completed in 4 semesters and the interim summer. Most of the coursework is taken the first year, with more time during the second year dedicated to clinical experience. Students will be placed in laboratory and clinical observation experiences during the first year, five clinical genetic counseling internships during the second year, and will complete a minimum of 800 hours of direct patient contact. Students must earn a passing grade in their five clinical internship rotations and present a completed log of at least 50 clinical cases before the final oral examination.

Only under exceptional circumstances will the course of study be varied to meet the needs of a student with many of the courses already completed or with extensive clinical laboratory experience.

Plan B projects that qualify for the genetic counseling track include those that study a genetic counseling problem and add to the existing genetic counseling literature; produce materials that add to the profession, such as teaching materials or ways of evaluating the service; or produce educational materials needed by patient populations or the general public.

First Year
Students will observe in a clinical setting one day per week, and gain experience in the clinical laboratories one day per week. An elective course of the student's choice is an option.
Credit requirement for these courses are: GCD 6110 (6.0 crs); GCD 8994 (2.0 crs, S/N only). Register for GCD 8993 for 2.0 crs twice (over two semesters), S/N only.
GCD 8911 - Introduction to Genetic Counseling Skills and Practice (3.0 cr)
GCD 8912 - Genetic Counseling in Practice (4.0 cr)
GCD 8073 - Genetics & Genomics in Human Health (3.0 cr)
GCD 6110 - Science of Medical Practice (3.0 - 6.0 cr)
PSY 5137 - Introduction to Behavioral Genetics (3.0 cr)
GCD 8993 - Directed Studies (1.0 - 5.0 cr)
GCD 8994 - Research (1.0 - 5.0 cr)

Summer
During the summer between the first and second year of the program, students will begin their first clinical internship rotation with patient responsibilities. This 10-week rotation includes the expectation that students will spend between 2-3 days per week in the clinic. The students time in the clinic, which is set by the clinical supervisor, may exceed the 20-hour minimum.
GCD 8001 - Genetic Counseling Clinical Internship I (3.0 cr)

Second Year
Students will complete internships in a clinical setting 2-3 days per week for 15 weeks. An elective course of the student's choice is an option.

Register for GCD 8994 for 2.0 crs twice (over two semesters), S/N only.
GCD 8002 - Genetic Counseling Clinical Internship II (5.0 cr)
GCD 8003 - Genetic Counseling Clinical Internship III (5.0 cr)
GCD 8913 - Psychosocial Issues in Genetic Counseling I (3.0 cr)
GCD 8914 - Ethical and Legal Issues in Genetic Counseling (3.0 cr)
GCD 8915 - Psychosocial Issues in Genetic Counseling II (3.0 cr)
GCD 8994 - Research (1.0 - 5.0 cr)
Twin Cities Campus
Molecular, Cellular, Developmental Biology and Genetics Minor
Genetics, Cell Biology, and Development TCBS, Genetics, Cell Biology, and Development TMED
Graduate School

Website: http://mcdbg.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 12
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program provides scientific training in the basic life sciences, with emphasis on the molecular basis of genetics, development, and cell biology. Areas of specialization include membranes, receptors, membrane transport, cell interactions, macromolecular structure, extracellular matrix, cytoskeleton, cell motility, regulation of gene expression, neuroscience, developmental mechanisms, human genetics, plant cell and molecular biology, genetic mechanisms, and genomics.

The program is interdisciplinary and involves faculty from several departments in the College of Biological Sciences, the Medical School, and the College of Food, Agricultural and Natural Resource Sciences. Institutes for human genetics, plant molecular genetics, biological process technology, Genome Engineering, Stem Cell research and a center for developmental biology provide opportunities for graduate study.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Courses taken for the minor must be graded A-F. A minimum GPA of 3.0 for these courses is required.

Required Coursework (9 credits)
Take the following courses for 9 credits. With approval of the director of the MCDB&G director of graduate studies, other courses may be substituted.

GCD 8151 - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
GCD 8161 - Advanced Cell Biology and Development (3.0 cr)

Electives (3 credits)
Choose at least one of the following courses. GCD 8920 Special Topics: Computational Genomics must be taken for 3 credits.
GCD 8920 - Special Topics (1.0 - 4.0 cr)
or GCD 5005 - Computer Programming for Biology (3.0 cr)
Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters

Doctoral
Twin Cities Campus

Molecular, Cellular, Developmental Biology and Genetics Ph.D.
Genetics, Cell Biology, and Development TCBS, Genetics, Cell Biology, and Development TMED

Graduate School

Website: http://mcdbg.umn.edu

• Program Type: Doctorate
• Requirements for this program are current for Fall 2018
• Length of program in credits: 48
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program provides scientific training in the basic life sciences, with emphasis on the molecular basis of genetics, development, and cell biology. Areas of specialization include membranes, receptors, membrane transport, cell interactions, macromolecular structure, extracellular matrix, cytoskeleton, cell motility, regulation of gene expression, neuroscience, developmental mechanisms, human genetics, plant cell and molecular biology, genetic mechanisms, and genomics.

The program is interdisciplinary and involves faculty from several departments in the College of Biological Sciences, the Medical School, and the College of Food, Agricultural and Natural Resource Sciences. Institutes for human genetics, plant molecular genetics, biological process technology, genome engineering, stem cell research and a center for developmental biology provide opportunities for graduate study.

PhD students are admitted to MCDB&G under the auspices of Molecular, Cellular and Structural Biology (MCSB), a first year program administered by the MCDB&G and the Biochemistry, Molecular Biology and Biophysics (BMBB) graduate programs. After the first year, students select either MCDB&G or BMBB to complete their degree. MCDB&G does NOT have a freestanding master's program.

The MCDB&G PhD is also part of two joint degree programs: The Joint Degree Program in Law, Health, and Life Sciences; and the MD/PhD program.

The Joint Degree Program in Law, Health, and Life Sciences is unique in the nation and enables students to combine a JD degree with a PhD or MS degree. Students entering this program must be admitted to both the MCDB&G program and the Law School. Admission qualifications for MS and PhD students are identical; only the student's career objectives distinguish the degree that they pursue.

The MD/PhD program emphasizes integration of the two major components of training--medicine and research--to ensure excellence in both. The program features a special curriculum that facilitates the transition from Medical School to the first year of formal graduate training, and the transition from graduate training back to Medical School.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Applications from students with an undergraduate or master's degree in the biological, chemical, or physical sciences are preferred.

Other requirements to be completed before admission:
Recommended academic preparation includes coursework in molecular biology, genetics, biology, and biochemistry.

Successful applicants must have previous research experience in an academic or industrial setting in addition to any course-related laboratory experiences. It is important to demonstrate familiarity with and aptitude for basic science research prior to embarking on a
graduate career in this program.

**Special Application Requirements:**
Applicants must submit three letters of recommendation from persons familiar with their academic and research capabilities. A statement of interests and goals, a complete set of transcripts, and scores from the General Test of the GRE are required. We will accept copies of the transcripts and GRE scores. The GRE Subject Test in biochemistry, cell and molecular biology, biology, or chemistry is strongly recommended, but not required. The deadline for receipt of completed applications is December 1. Graduate studies begin fall semester only.

Entry into the J.D./Ph.D. program requires separate admittance to both the Law School and the MCDB&G Graduate Program. Entry into the M.D./Ph.D. program requires separate admittance to both the Medical School and the MCDB&G Graduate Program.

Applicants must submit their test score(s) from the following:
- **GRE**
  - General Test - Verbal Reasoning: 550
  - General Test - Quantitative Reasoning: 600
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 107
  - Internet Based - Writing Score: 25
  - Internet Based - Reading Score: 25
  - Paper Based - Total Score: 625

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**
24 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

**Required Coursework (24 credits)**
Take all of the following courses for at least 21 credits. MCDG 8900 can be taken for one credit four times (over four semesters). MCDG 8950 and MCDG 8920 each can be taken for one credit twice (over two semesters).
- **GCD 8151** - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
- **GCD 8131** - Advanced Molecular Genetics and Genomics (3.0 cr)
- **GCD 8161** - Advanced Cell Biology and Development (3.0 cr)
- **GCD 8171** - Literature Analysis (1.0 - 2.0 cr)
- **BIOC 8401** - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)
- **MCDG 8920** - Special Topics (1.0 - 4.0 cr)
- **MCDG 8900** - Student Research Seminar (1.0 cr)
- **MCDG 8950** - Teaching Practicum (1.0 cr)

Take at least one of the following courses for 3 credits to complete the 24-credit course requirement.
- **GCD 5005** - Computer Programming for Biology (3.0 cr)
  or **GCD 8920** - Special Topics (1.0 - 4.0 cr)

**Electives**
Students may take additional elective credits if necessary. Select courses from the following list, or in consultation with the advisor and director of graduate studies.
Take 0 or more credit(s) from the following:
• BIOC 8001 - Biochemistry: Structure, Catalysis, and Metabolism (3.0 cr)
• BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
• BIOC 5309 - Biocatalysis and Biodegradation (3.0 cr)
• BIOC 5352 - Biotechnology and Bioengineering for Biochemists (3.0 cr)
• BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
• BIOC 5444 - Muscle (3.0 cr)
• BIOC 5527 - Introduction to Modern Structural Biology (4.0 cr)
• BIOC 5528 - Spectroscopy and Kinetics (4.0 cr)
• CSCI 5461 - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
• CSCI 5980 - Special Topics in Computer Science (1.0 - 3.0 cr)
• CSCI 8980 - Special Advanced Topics in Computer Science (1.0 - 3.0 cr)
• GCD 8008 - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
• GCD 8073 - Genetics & Genomics in Human Health (3.0 cr)
• GRAD 8101 - Teaching in Higher Education (3.0 cr)
• GRAD 8200 - Teaching and Learning Topics in Higher Education (1.0 cr)
• MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
• MICA 8003 - Immunity and Immunopathology (4.0 cr)
• MICA 8004 - Cellular and Cancer Biology (4.0 cr)
• MATH 8540 - Topics in Mathematical Biology (1.0 - 3.0 cr)
• NSC 8211 - Developmental Neurobiology (3.0 cr)
• OBIO 8012 - Basic Concepts in Skeletal Biology (2.0 cr)
• PHCL 5111 - Pharmacogenomics (3.0 cr)
• PUBH 6450 - Biostatistics I (4.0 cr)
• SCB 8181 - Stem Cell Biology (3.0 cr)
• STAT 5021 - Statistical Analysis (4.0 cr)
• BIOC 5535 - Introduction to Modern Structural Biology -- Diffraction (2.0 cr)
• BIOC 5536 - Introduction to Modern Structural Biology - Nuclear Magnetic Resonance (2.0 cr)

Thesis Credits
Take at least 24 doctoral thesis credits.

MCDG 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Joint- or Dual-degree Coursework: Joint Degree Program in Law, Science and Technology (JD/PhD). Medical Scientist Training Program (MD/PhD) Student may take a total of 12 credits in common among the academic programs.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 32
- This program does not require summer semesters for timely completion.
- University of Minnesota, Duluth
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This cross-campus interdisciplinary program provides comprehensive training in water resources science, with integration across scientific disciplines. A structured interdisciplinary graduate curriculum is offered. The program includes a set of core courses plus electives in the following areas of interest: aquatic biology, environmental chemistry, hydrologic science, limnology, water management technology, water policy, water quality, and watershed science and management. A Limnology and Oceanography track is also offered. Approximately 80 courses offered within 15 other graduate programs are available to students majoring in water resources science.

The goal of the program is to produce scientists with strong technical skills in disciplines relevant to water resources and a broad understanding of 1) the hydrologic cycle and associated ecosystems, 2) the interconnectedness of the sciences involved in managing aquatic resources, and 3) the interplay between the biophysical sciences and social sciences in developing and implementing public policies related to water.

Students in the program develop the breadth of scientific knowledge appropriate to understand the complicated aquatic ecosystems and watersheds on which they will work, as well as social dimensions of the topic, including the public policy and legal frameworks in which water resources are protected and managed.

The program involves faculty from the following departments on the Twin Cities campus: Applied Economics; Bioproducts and Biosystems Engineering; Civil Engineering; Earth Sciences; Ecology, Evolution, and Behavior; Entomology; Environmental and Occupational Health; Fisheries, Wildlife, and Conservation Biology; Forest Resources; Geography; Horticultural Science; Plant Biology; and Soil, Water, and Climate. It also involves faculty from the following departments on the Duluth campus: Biology; Chemical Engineering; Chemistry; Civil Engineering; Geography; Geological Sciences; and Physics; as well as the Large Lakes Observatory and the Natural Resources Research Institute in Duluth.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The program is flexible enough to accommodate students from a variety of backgrounds. Normally students have a bachelor's degree in physical, biological, or environmental science or engineering.

Other requirements to be completed before admission:
Recommended academic preparation includes one year (or two semesters) each of calculus, physics, and chemistry, and one biology course.

Availability of funding and willingness of a member of the graduate faculty to serve as an advisor are important criteria for admission to the program.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Special Application Requirements:
Applicants must submit three letters of recommendation via the University of Minnesota's ApplyYourself website. These letters should be from professors qualified to estimate applicant's class rank and evaluate their ability to complete a program of graduate study, or from persons who can assess their professional or research potential.

Applicants must also submit a résumé of their academic history and professional experience and a statement of purpose, including the proposed area of emphasis. Applicants should submit results of the GRE General Test. Students may be admitted any semester but are strongly encouraged to submit their application by December 15 for fall semester admission. More specific application instructions can be found on the program website: wrs.umn.edu/admissions/admissions-info.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 22 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 major credits and 0 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is defined by the faculty advisor. The Plan B option is well suited to students who have little undergraduate course work in water resources science and thus need more coursework to gain the combination of depth and breadth needed in this field. Plan B projects involve field, laboratory, or computer work and the analysis, synthesis, or interpretation of data.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Credits from a minor may count toward the total credits of your master's degree, with adviser approval.

All course credits must be at the post-baccalaureate level, taken for graduate credits, and assessed at the graduate tuition rate. Masters students may request to transfer 40% of their coursework from another accredited graduate program.

Students with WRS-equivalent core courses taken as undergraduates may substitute other classes to meet program requirements, with advisor approval.

Water Resources Seminar

WRS 8100 - Interdisciplinary Seminar in Water Resources (0.5 cr)

Water Resources Ethics

WRS 8581 - Research and Professional Ethics in Water Resources and Environmental Science (0.5 cr)

Hydrology Core

Take at least 3 credits from the following:
BBE 8513 - Hydrologic Modeling of Small Watersheds (3.0 cr)
or CEGE 4501 - Hydrologic Design (4.0 cr)
or ESCI 4702 - General Hydrogeology (4.0 cr)
or FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
or FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)

Environmental/Water Chemistry Core
Take at least 3 credits from the following:
CEGE 5541 - Environmental Water Chemistry (3.0 cr)
or ESCI 4401 - Aqueous Environmental Geochemistry (3.0 cr)
or LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
or PUBH 6190 - Environmental Chemistry (3.0 cr)

Limnology Core
EEB 5601 - Limnology (3.0 cr)

Water Resources Policy Core
WRS 5101 - Water Policy (3.0 cr)

WRS Electives
Plan A students need at least 9 credits from the following list and Plan B students need at least 17 credits.
APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
or BBE 5523 - Ecological Engineering Design (3.0 cr)
or BBE 5513 - Watershed Engineering (3.0 cr)
or BBE 5535 - Assessment and Diagnosis of Impaired Waters (3.0 cr)
or BBE 8513 - Hydrologic Modeling of Small Watersheds (3.0 cr)
or CEGE 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)
or CEGE 4351 - Groundwater Mechanics (3.0 cr)
or CEGE 4352 - Groundwater Modeling (3.0 cr)
or CEGE 4501 - Hydrologic Design (4.0 cr)
or CEGE 4502 - Water and Wastewater Treatment (3.0 cr)
or CEGE 4511 - Hydraulic Structures (3.0 cr)
or CEGE 4512 - Open Channel Hydraulics (4.0 cr)
or CEGE 5541 - Environmental Water Chemistry (3.0 cr)
or CEGE 4562 - Environmental Remediation Technologies (3.0 cr)
or CEGE 5542 - Experimental Methods in Environmental Engineering (3.0 cr)
or CEGE 5551 - Environmental Microbiology (3.0 cr)
or CEGE 8504 - Theory of Unit Operations (4.0 cr)
or CEGE 8505 - Biological Processes (3.0 cr)
or CEGE 8506 - Stochastic Hydrology (4.0 cr)
or CEGE 8507 - Advanced Methods in Hydrology (4.0 cr)
or CEGE 8511 - Mechanics of Sediment Transport (3.0 cr)
or ESCI 8511 - Mechanics of Sediment Transport (3.0 cr)
or CEGE 8542 - Chemistry of Organic Pollutants in Environmental Systems (3.0 cr)
or CEGE 8572 - Computational Environmental Fluid Dynamics (4.0 cr)
or CEGE 8601 - Introduction to Stream Restoration (3.0 cr)
or ESCI 8601 - Introduction to Stream Restoration (3.0 cr)
or CEGE 8602 - Stream Restoration Practice (2.0 cr)
or EEB 8602 - Stream Restoration Practice (2.0 cr)
or ESCI 8602 - Stream Restoration Practice (2.0 cr)
or CONS 8004 - Economic and Social Aspects of Conservation Biology (3.0 cr)
or EEB 4611 - Biogeochemical Processes (3.0 cr)
or EEB 5601 - Limnology (3.0 cr)
or ENT 5081 - Insects, Aquatic Habitats, and Pollution (3.0 cr)
or ENT 5361 - Aquatic Insects (4.0 cr)
or ESCI 4401 - Aqueous Environmental Geochemistry (3.0 cr)
or ESCI 4402 - Biogeochemical Cycles in the Ocean (3.0 cr)
or ESCI 4702 - General Hydrogeology (4.0 cr)
or ESCI 5705 - Limnogeology and Paleoenvironment (3.0 cr)
or ESCI 5971 - Field Hydrogeology (2.0 cr)
or ESPM 4216 - Contaminant Hydrology (3.0 cr)
or ESPM 5061 - Water Quality and Natural Resources (3.0 cr)
or ESPM 5111 - Hydrology and Water Quality Field Methods (3.0 cr)
or ESPM 5256 - Natural Resource Law and the Management of Public Lands and Waters (3.0 cr)
or ESPM 5402 - Biometeorology (3.0 cr)
or ESPM 5555 - Wetland Soils (3.0 cr)
or SOIL 5555 - Wetland Soils (3.0 cr)
or ESPM 5575 - Wetlands (3.0 cr)
or ESPM 5601 - Principles of Waste Management (3.0 cr)
or ESPM 5703 - Agroforestry in Watershed Management (3.0 cr)
or FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
or FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)
or FW 4136 - Ichthyology (4.0 cr)
or FW 5604W - Fisheries Ecology and Management [WI] (3.0 cr)
or FW 8459 - Stream and River Ecology (3.0 cr)
or FW 8465 - Fish Habitats and Restoration (3.0 cr)
or GEOG 5426 - Climatic Variations (3.0 cr)
or HORT 5071 - Ecological Restoration (4.0 cr)
or LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
or PUBH 6190 - Environmental Chemistry (3.0 cr)
or SOIL 5232 - Vadose Zone Hydrology (3.0 cr)
or ESPM 5295 - GIS in Environmental Science and Management (4.0 cr)
or FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
or FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
or FW 5459 - Stream and River Ecology (3.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or WRS 5150 - Watershed Specialist Training (2.0 cr)

Plan A Option:
Take 10 or more credit(s) from the following:
- WRS 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B Option
Select additional courses in consultation with your advisor to compete the Plan B option.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Limnology and Oceanography
The science of inland waters, or "limnology," includes the study of streams, lakes, ponds, and wetlands. While Lake Superior falls into this category, the style of research, particularly the nature of sampling and the scale of the processes investigated, makes the study of Lake Superior and other Great Lakes more akin to oceanography than to classical limnology.

A program that focuses on the study of both limnology and oceanography strengthens understanding of both systems, through comparative studies and by fostering interaction between groups that focus more strongly on one or the other system. Limnology and oceanography are by necessity interdisciplinary fields, with major components contributed by biological, geological, physical and chemical sciences. Such interdisciplinary fields in the modern research university require mechanisms to ensure cross-fertilization of ideas, approaches, methods, techniques, and knowledge. The limnology and oceanography track in WRS provides just such a much-needed mechanism. The goal of the program is to produce scientists with strong technical skills in aquatic science and a broad understanding of limnology and oceanography.

Students with WRS-equivalent coursework taken as undergraduates may substitute other classes to meet minimum credit requirements.

The faculty advisor must be a member of the limnology and oceanography track faculty.

Water Resources Seminar
- WRS 8100 - Interdisciplinary Seminar in Water Resources (0.5 cr)

Water Resources Ethics
- WRS 8581 - Research and Professional Ethics in Water Resources and Environmental Science (0.5 cr)

Hydrology Core for Limnology/Oceanography Students
Take at least 3 credits from the following:
- BBE 8513 - Hydrologic Modeling of Small Watersheds (3.0 cr)
or FNRM 5114 - Hydrology and Watershed Management (3.0 cr)

Environmental/Water Chemistry Core for Limnology/Oceanography Students
Take at least 3 credits from the following:
- CEGE 5541 - Environmental Water Chemistry (3.0 cr)
or ESCI 4401 - Aqueous Environmental Geochemistry (3.0 cr)
or LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
or PUBH 6190 - Environmental Chemistry (3.0 cr)
or EEB 4611 - Biogeochemical Processes (3.0 cr)

Limnology Core
EEB 5601 - Limnology (3.0 cr)

Water Resources Policy Core
WRS 5101 - Water Policy (3.0 cr)

WRS Electives
Plan A students need at least 9 credits from the following list and Plan B students need at least 17 credits. Electives must be selected under the guidance of your L&O committee. Choose from the following:

APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
or BBE 5523 - Ecological Engineering Design (3.0 cr)
or BBE 5513 - Watershed Engineering (3.0 cr)
or BBE 5535 - Assessment and Diagnosis of Impaired Waters (3.0 cr)
or BBE 5513 - Hydrologic Modeling of Small Watersheds (3.0 cr)
or PMB 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)
or CECE 4351 - Groundwater Mechanics (3.0 cr)
or CECE 4352 - Groundwater Modeling (3.0 cr)
or CECE 4501 - Hydrologic Design (4.0 cr)
or CECE 4502 - Water and Wastewater Treatment (3.0 cr)
or CECE 4511 - Hydraulic Structures (3.0 cr)
or CECE 4512 - Open Channel Hydraulics (4.0 cr)
or CECE 5541 - Environmental Water Chemistry (3.0 cr)
or CECE 4562 - Environmental Remediation Technologies (3.0 cr)
or CECE 5542 - Experimental Methods in Environmental Engineering (3.0 cr)
or CECE 5551 - Environmental Microbiology (3.0 cr)
or CECE 8504 - Theory of Unit Operations (4.0 cr)
or CECE 8505 - Biological Processes (3.0 cr)
or CECE 8506 - Stochastic Hydrology (4.0 cr)
or CECE 8507 - Advanced Methods in Hydrology (4.0 cr)
or CECE 8511 - Mechanics of Sediment Transport (3.0 cr)
or ESCI 8511 - Mechanics of Sediment Transport (3.0 cr)
or CECE 8542 - Chemistry of Organic Pollutants in Environmental Systems (3.0 cr)
or CECE 8572 - Computational Environmental Fluid Dynamics (4.0 cr)
or CECE 8601 - Introduction to Stream Restoration (3.0 cr)
or EEB 8601 - Introduction to Stream Restoration (3.0 cr)
or CECE 8602 - Stream Restoration Practice (2.0 cr)
or EEB 8602 - Stream Restoration Practice (2.0 cr)
or ESCI 8602 - Stream Restoration Practice (2.0 cr)
or CONS 8004 - Economic and Social Aspects of Conservation Biology (3.0 cr)
or EEB 4611 - Biogeochemical Processes (3.0 cr)
or EEB 5601 - Limnology (3.0 cr)
or ENT 5081 - Insects, Aquatic Habitats, and Pollution (3.0 cr)
or ENT 5361 - Aquatic Insects (4.0 cr)
or ESCI 4401 - Aqueous Environmental Geochemistry (3.0 cr)
or ESCI 4402 - Biogeochemical Cycles in the Ocean (3.0 cr)
or ESCI 4702 - General Hydrogeology (4.0 cr)
or ESCI 5705 - Limnogeology and Paleoenvironment (3.0 cr)
or ESCI 5971 - Field Hydrogeology (2.0 cr)
or ESPM 4216 - Contaminant Hydrology (3.0 cr)
or ESPM 5061 - Water Quality and Natural Resources (3.0 cr)
or ESPM 5111 - Hydrology and Water Quality Field Methods (3.0 cr)
or ESPM 5256 - Natural Resource Law and the Management of Public Lands and Waters (3.0 cr)
or ESPM 5402 - Biometeorology (3.0 cr)
or ESPM 5555 - Wetland Soils (3.0 cr)
or SOIL 5555 - Wetlands (3.0 cr)
or ESPM 5575 - Wetlands (3.0 cr)
or ESPM 5601 - Principles of Waste Management (3.0 cr)
or ESPM 5703 - Agroforestry in Watershed Management (3.0 cr)

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Water Resources Seminar
Students must take WRS 8100 for 0.5 credits.
WRS 8100 - Interdisciplinary Seminar in Water Resources (0.5 cr)

Water Resources Ethics
WRS 8581 - Research and Professional Ethics in Water Resources and Environmental Science (0.5 cr)

Hydrology Core
Take at least 3 credits from the following:
BBE 8513 - Hydrologic Modeling of Small Watersheds (3.0 cr)
or CEGE 4501 - Hydrologic Design (4.0 cr)
or ESCI 4702 - General Hydrogeology (4.0 cr)
or FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
or FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)

Environmental/Water Chemistry Core
Take at least 3 credits from the following:
CEGE 5541 - Environmental Water Chemistry (3.0 cr)
or ESCI 4401 - Aqueous Environmental Geochemistry (3.0 cr)
or LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
or PUBH 6190 - Environmental Chemistry (3.0 cr)

**Limnology Core**
- EEB 5601 - Limnology (3.0 cr)

**Water Resources Policy Core**
- WRS 5101 - Water Policy (3.0 cr)

**WRS Electives**
Approved electives to fulfill the required 24 course credits, choose from the following:
- APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- BBE 5523 - Ecological Engineering Design (3.0 cr)
- BBE 5513 - Watershed Engineering (3.0 cr)
- BBE 5535 - Assessment and Diagnosis of Impaired Waters (3.0 cr)
- BBE 5513 - Hydrologic Modeling of Small Watersheds (3.0 cr)
- PMB 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)
- CEGE 4351 - Groundwater Mechanics (3.0 cr)
- CEGE 4352 - Groundwater Modeling (3.0 cr)
- CEGE 4501 - Hydrologic Design (4.0 cr)
- CEGE 4502 - Water and Wastewater Treatment (3.0 cr)
- CEGE 4511 - Hydraulic Structures (3.0 cr)
- CEGE 4512 - Open Channel Hydraulics (4.0 cr)
- CEGE 4562 - Environmental Remediation Technologies (3.0 cr)
- CEGE 5541 - Environmental Water Chemistry (3.0 cr)
- CEGE 5542 - Experimental Methods in Environmental Engineering (3.0 cr)
- CEGE 5551 - Environmental Microbiology (3.0 cr)
- CEGE 8504 - Theory of Unit Operations (4.0 cr)
- CEGE 8505 - Biological Processes (3.0 cr)
- CEGE 8505 - Stochastic Hydrology (4.0 cr)
- CEGE 8507 - Advanced Methods in Hydrology (4.0 cr)
- CEGE 8511 - Mechanics of Sediment Transport (3.0 cr)
- ESCI 8511 - Mechanics of Sediment Transport (3.0 cr)
- ESCI 8542 - Chemistry of Organic Pollutants in Environmental Systems (3.0 cr)
- CEGE 8572 - Computational Environmental Fluid Dynamics (4.0 cr)
- CEGE 8501 - Introduction to Stream Restoration (3.0 cr)
- EEB 8601 - Introduction to Stream Restoration (3.0 cr)
- CEGE 8601 - Introduction to Stream Restoration (3.0 cr)
- CEGE 8602 - Stream Restoration Practice (2.0 cr)
- EEB 8602 - Stream Restoration Practice (2.0 cr)
- ESCI 8602 - Stream Restoration Practice (2.0 cr)
- CONS 8004 - Economic and Social Aspects of Conservation Biology (3.0 cr)
- EEB 4611 - Biogeochemical Processes (3.0 cr)
- EEB 5601 - Limnology (3.0 cr)
- ENT 5081 - Insects, Aquatic Habitats, and Pollution (3.0 cr)
- ENT 5361 - Aquatic Insects (4.0 cr)
- ESCI 4401 - Aqueous Environmental Geochemistry (3.0 cr)
- ESCI 4402 - Biogeochemical Cycles in the Ocean (3.0 cr)
- ESCI 4702 - General Hydrogeology (4.0 cr)
- ESCI 5705 - Limnogeology and Paleoenvironment (3.0 cr)
- ESCI 5971 - Field Hydrogeology (2.0 cr)
- ESPM 4216 - Contaminant Hydrology (3.0 cr)
- ESPM 5061 - Water Quality and Natural Resources (3.0 cr)
- ESPM 5111 - Hydrology and Water Quality Field Methods (3.0 cr)
- ESPM 5256 - Natural Resource Law and the Management of Public Lands and Waters (3.0 cr)
- ESPM 5402 - Biometeorology (3.0 cr)
- ESPM 5555 - Wetland Soils (3.0 cr)
- SOIL 5555 - Wetland Soils (3.0 cr)
- ESPM 5575 - Wetlands (3.0 cr)
- ESPM 5601 - Principles of Waste Management (3.0 cr)
- ESPM 5703 - Agroforestry in Watershed Management (3.0 cr)
- FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
- FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)
- FW 4136 - Ichthyology (4.0 cr)
- FW 5604W - Fisheries Ecology and Management [WI] (3.0 cr)
or FW 8459 - Stream and River Ecology (3.0 cr)
or FW 8465 - Fish Habitats and Restoration (3.0 cr)
or GEOG 5426 - Climatic Variations (3.0 cr)
or HORT 5071 - Ecological Restoration (4.0 cr)
or LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
or PUBH 6190 - Environmental Chemistry (3.0 cr)
or SOIL 5232 - Vadose Zone Hydrology (3.0 cr)
or ESPM 5295 - GIS in Environmental Science and Management (4.0 cr)
or FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
or FW 5459 - Stream and River Ecology (3.0 cr)
or FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or WRS 5150 - Watershed Specialist Training (2.0 cr)

Thesis Requirement
All doctoral students must take 24 doctoral thesis credits.
WRS 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Limnology and Oceanography
The science of inland waters, or "limnology," includes the study of streams, lakes, ponds, and wetlands. While Lake Superior falls into this category, the style of research, particularly the nature of sampling and the scale of the processes investigated, makes study of Lake Superior and other Great Lakes more akin to oceanography than to classical limnology. A program that focuses on the study of both limnology and oceanography strengthens understanding of both systems, through comparative studies and by fostering interaction between groups that focus more strongly on one or the other system. Limnology and oceanography are by necessity interdisciplinary fields, with major components contributed by biological, geological, physical, and chemical sciences.

This track within the cross-campus interdisciplinary WRS program provides comprehensive training in limnology and oceanography. As is the case for the WRS graduate program as a whole, the L&O program includes a set of core courses plus electives in the subfield of limnology and oceanography.

The goal of the program is to produce scientists with strong technical skills in aquatic science and a broad understanding of limnology and oceanography. Faculty on both Twin Cities and Duluth campuses participate in the limnology and oceanography track.

PhD students pursuing the limnology and oceanography track must have at least two members of the limnology and oceanography faculty on their committee, including the advisor.

Water Resources Seminar
Students must take WRS 8100 for 0.5 credits.
WRS 8100 - Interdisciplinary Seminar in Water Resources (0.5 cr)

Water Resources Ethics
WRS 8581 - Research and Professional Ethics in Water Resources and Environmental Science (0.5 cr)

Hydrology Core for Limnology/Oceanography Students
Take 3 or more credit(s) from the following:
• BBE 8513 - Hydrologic Modeling of Small Watersheds (3.0 cr)
• FNRM 5114 - Hydrology and Watershed Management (3.0 cr)

Environmental/Water Chemistry Core for Limnology/Oceanography Students
Take at least 3 credits from the following:
CEGE 5541 - Environmental Water Chemistry (3.0 cr)
or ESCI 4401 - Aqueous Environmental Geochemistry (3.0 cr)
or LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
or PUBH 6190 - Environmental Chemistry (3.0 cr)
or EEB 4611 - Biogeochemical Processes (3.0 cr)

Limnology Core
EEB 5601 - Limnology (3.0 cr)

Water Resources Policy Core
WRS 5101 - Water Policy (3.0 cr)

WRS Electives
Approved electives to fulfill the required 24 course credits must be chosen in consultation with your L&O committee. Choose from the following:
APEC 5651 - Economics of Natural Resource and Environmental Policy (3.0 cr)
or BBE 5523 - Ecological Engineering Design (3.0 cr)
or BBE 5513 - Watershed Engineering (3.0 cr)
or BBE 5535 - Assessment and Diagnosis of Impaired Waters (3.0 cr)
or BBE 8513 - Hydrologic Modeling of Small Watersheds (3.0 cr)
or PMB 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)
or CEGE 4351 - Groundwater Mechanics (3.0 cr)
or CEGE 4352 - Groundwater Modeling (3.0 cr)
or CEGE 4501 - Hydrologic Design (4.0 cr)
or CEGE 4502 - Water and Wastewater Treatment (3.0 cr)
or CEGE 4511 - Hydraulic Structures (3.0 cr)
or CEGE 4512 - Open Channel Hydraulics (4.0 cr)
or CEGE 4562 - Environmental Remediation Technologies (3.0 cr)
or CEGE 5541 - Environmental Water Chemistry (3.0 cr)
or CEGE 5542 - Experimental Methods in Environmental Engineering (3.0 cr)
or CEGE 5551 - Environmental Microbiology (3.0 cr)
or CEGE 8504 - Theory of Unit Operations (4.0 cr)
or CEGE 8505 - Biological Processes (3.0 cr)
or CEGE 8506 - Stochastic Hydrology (4.0 cr)
or CEGE 8507 - Advanced Methods in Hydrology (4.0 cr)
or CEGE 8511 - Mechanics of Sediment Transport (3.0 cr)
or CEGE 8542 - Chemistry of Organic Pollutants in Environmental Systems (3.0 cr)
or CEGE 8572 - Computational Environmental Fluid Dynamics (4.0 cr)
or CEGE 8601 - Introduction to Stream Restoration (3.0 cr)
or EEB 8601 - Introduction to Stream Restoration (3.0 cr)
or ESCI 8601 - Introduction to Stream Restoration (3.0 cr)
or CEGE 8602 - Stream Restoration Practice (2.0 cr)
or EEB 8602 - Stream Restoration Practice (2.0 cr)
or ESCI 8602 - Stream Restoration Practice (2.0 cr)
or CONS 8004 - Economic and Social Aspects of Conservation Biology (3.0 cr)
or EEB 4611 - Biogeochemical Processes (3.0 cr)
or EEB 5601 - Limnology (3.0 cr)
or ENT 5081 - Insects, Aquatic Habitats, and Pollution (3.0 cr)
or ENT 5361 - Aquatic Insects (4.0 cr)
or ESCI 4401 - Aqueous Environmental Geochemistry (3.0 cr)
or ESCI 4402 - Biogeochemical Cycles in the Ocean (3.0 cr)
or ESCI 4702 - General Hydrogeology (4.0 cr)
or ESCI 5705 - Limnogeology and Paleoenvironment (3.0 cr)
or ESCI 5971 - Field Hydrogeology (2.0 cr)
or ESPM 4216 - Contaminant Hydrology (3.0 cr)
or ESPM 5061 - Water Quality and Natural Resources (3.0 cr)
or ESPM 5111 - Hydrology and Water Quality Field Methods (3.0 cr)
or ESPM 5256 - Natural Resource Law and the Management of Public Lands and Waters (3.0 cr)
or ESPM 5402 - Biometeorology (3.0 cr)
or ESPM 5555 - Wetland Soils (3.0 cr)
or SOIL 5555 - Wetland Soils (3.0 cr)
or ESPM 5575 - Wetlands (3.0 cr)
or ESPM 5601 - Principles of Waste Management (3.0 cr)
or ESPM 5703 - Agroforestry in Watershed Management (3.0 cr)
or FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
or FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)
or FW 4136 - Ichthyology (4.0 cr)
or FW 5604W - Fisheries Ecology and Management [WI] (3.0 cr)
or FW 8459 - Stream and River Ecology (3.0 cr)
or FW 8465 - Fish Habitats and Restoration (3.0 cr)
or GEOG 5426 - Climatic Variations (3.0 cr)
or HORT 5071 - Ecological Restoration (4.0 cr)
or LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
or PUBH 6190 - Environmental Chemistry (3.0 cr)
or SOIL 5232 - Vadose Zone Hydrology (3.0 cr)
or WRS 5150 - Watershed Specialist Training (2.0 cr)
or ESPM 5295 - GIS in Environmental Science and Management (4.0 cr)
or FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
or FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
or FW 5459 - Stream and River Ecology (3.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)

**Thesis Requirement**
All doctoral students must take 24 doctoral thesis credits.

WRS 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Development Practice M.D.P.
HHH Administration
Hubert H. Humphrey School of Public Affairs

Website: http://www.hhh.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 50
- This program requires summer semesters for timely completion.
- Degree: Master of Development Practice

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of development practice (MDP) prepares students for careers in international development. The degree provides rigorous interdisciplinary training and equips students with the skills needed to address the problems of poverty and sustainable development in the developing world.

The MDP program is jointly administered by the Humphrey School of Public Affairs and the Interdisciplinary Center for the Study of Global Change (ICGC) and spans several academic units across the University of Minnesota. The degree provides training in policy analysis and management, health and education, natural sciences, social sciences, and interdisciplinary research methods. An international field experience and capstone workshop in development practice also are required.

The MDP degree is part of a global consortium of international development programs.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year bachelor's degree from an accredited US university or foreign equivalent at time of enrollment.

Other requirements to be completed before admission:
While no specific experience or academic pathway is required, students with a strong liberal education background and sound quantitative and analytical skills will be best prepared for academic success at the Humphrey School of Public Affairs.

Previous coursework in mathematics, statistics, and economics is recommended. Past applicants needing to strengthen this part of their skill set have found courses in introductory microeconomics, college algebra, and introductory statistics to be helpful preparation. Prior to admission students may find such courses available online; many are also available at the University of Minnesota.

International professional experience and foreign language competency are strongly preferred.

Special Application Requirements:
A complete application will include a University of Minnesota graduate application, personal statement, resume or C.V., transcripts, GRE scores, TOEFL scores, at least three letters of recommendation, and an optional diversity statement.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 100
- Paper Based - Total Score: 600
- IELTS - Total Score: 7

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 50 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: The capstone project is an opportunity for MDP students in their second year to apply their knowledge through a client-based team project. Each student team and the workshop instructor will work with an NGO or public sector client engaged in some dimension of international development, preferably situated in a developing country, to identify a suitable project. While the specifics of each project will vary, all will include in-depth research, analysis, and the creation of a professional written report. Student teams will be expected to develop an appropriate presentation of this product to the relevant stakeholders. The projects will be done by small groups and can have multiple dimensions. Students will have the opportunity to integrate various aspects of development such as economic development, public health, environmental sustainability, education and skills development, and citizen participation.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Core Courses

AGRO 5321 - Ecology of Agricultural Systems (3.0 cr)
MDP 5001 - Ways of Knowing for Sustainable Development (2.0 cr)
MDP 5002 - Program Development Workshop (3.0 cr)
MDP 5004 - International Field Experience (3.0 cr)
MDP 5005 - Qualitative Methods for Development Practice (3.0 cr)
MDP 5100 - Post-Field / Pre-Capstone Seminar (1.0 cr)
MDP 5200 - Capstone Workshop in Development Practice (3.0 cr)
PA 5031 - Statistics for Public Affairs (4.0 cr)
PA 5501 - Theories and Policies of Development (3.0 cr)
PA 5503 - Economics of Development (3.0 cr)
PA 5521 - Development Planning and Policy Analysis (4.0 cr)

Additional Methods

PA 5003 - Introduction to Financial Analysis and Management (1.5 cr)
or PA 5032 - Applied Regression (2.0 cr)
or PA 5044 - Applied Regression, Accelerated (2.0 cr)
or PA 5311 - Program Evaluation (3.0 cr)
or EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
or OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)

International Education

OLPD 5104 - Strategies for International Development of Education Systems (3.0 cr)
or OLPD 5107 - Gender, Education, and International Development (3.0 cr)

Environmental Science

GEOG 5401 - Geography of Environmental Systems and Global Change (4.0 cr)
or GCC 5008 - Policy and Science of Global Environmental Change [ENV] (3.0 cr)

Leadership and Management

PA 5151 - Organizational Perspectives on Global Development & Humanitarian Assistance (3.0 cr)
or PA 5405 - Public Policy Implementation (3.0 cr)

Public Health

PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6134 - Sustainable Development and Global Public Health (2.0 cr)

Electives
Electives to bring total degree credits to at least 50. See www.hhh.umn.edu/degrees/mdp/ for further information.
Twin Cities Campus
Early Childhood Policy Postbaccalaureate Certificate
HHH Social Policy Academic Program
Hubert H. Humphrey School of Public Affairs

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.
- Degree: Early Childhood Policy PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The early childhood policy post-baccalaureate certificate gives students expertise in applying research-based knowledge to public policies affecting young children and the adults who care for them. In addition to completing coursework, students in the certificate program complete a capstone workshop or independent study focused on early childhood policy. These certificate components provide a vehicle for students to gain fundamental early childhood policy skills and knowledge and to foster connection between the University of Minnesota and the early childhood policy community. Students will have opportunities to participate in the work of the University of Minnesota's renowned Human Capital Research Collaborative.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission to the certificate will be allowed in fall and spring semesters. Admission decisions will be made by a subcommittee of the faculty advisory group. A complete application will include a Graduate School application, personal statement, resume or C.V., and transcripts.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

Early Childhood and Public Policy Course (3 credits)
Take one of the following courses for a total of 3 credits:
PA 5413 - Early Childhood and Public Policy (3.0 cr)
or CPSY 5413 - Early Childhood and Public Policy (3.0 cr)

Electives (6 Credits)
Take one course from the Policy Electives list, and one course from the Open Electives list for a total of 6 credits.

Policy Electives (3 Credits)
Topics courses (such as PA 5490) are eligible if they cover early childhood.
PA 5415 - Economics of Early Childhood Development (1.5 - 3.0 cr)
PA 5442 - Education Law and Policy (3.0 cr)
FSOS 8104 - Family Policy Seminar (3.0 cr)
PREV 8001 - Prevention Science: Principles and Practices (3.0 cr)
SW 5101 - Historical Origins and Contemporary Policies and Programs in Social Welfare (3.0 - 4.0 cr)
SW 8804 - Child Welfare Policy (3.0 cr)

Open Electives (3 Credits)
Topics courses (such as PA 5490) are eligible if they cover early childhood.
PA 5311 - Program Evaluation (3.0 cr)
PA 5480 - Topics in Race, Ethnicity, and Public Policy (1.0 - 3.0 cr)
CI 8900 - Family, Youth, and Community Colloquium (1.0 - 4.0 cr)
CPSY 5251W - Social and Philosophical Foundations of Early Childhood Education [WI] (3.0 cr)
CPSY 5252 - Facilitating Social and Emotional Learning in Early Childhood Education (3.0 cr)
CPSY 5253 - Facilitating Cognitive and Language Learning in Early Childhood Education (3.0 cr)
CPSY 5254 - Facilitating Creative and Motor Learning in Early Childhood Education (2.0 cr)
EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
EPSY 5243 - Principles and Methods of Evaluation (3.0 cr)
EPSY 5625 - Education of Infants, Toddlers, and Preschool Children with Disabilities: Introduction (2.0 cr)
EPSY 5849 - Multi-tiered Systems of Support in Early Childhood Education (3.0 cr)
FSOS 5032 - Family Systems Theories and Interventions (3.0 cr)
FSOS 8106 - Seminar: Families From an Economic Perspective (3.0 cr)
NURS 5032 - Human Response to Health and Illness: Children and Childbearing Families (5.0 cr)
OLPD 5346 - Politics of Education (3.0 cr)
OLPD 5356 - Disability Policy and Services (3.0 cr)
OLPD 5501 - Principles and Methods of Evaluation (3.0 cr)
OLPD 8015 - Inquiry strategies in educational and organizational research (3.0 cr)
OLPD 8016 - Research Design and Educational Policy (3.0 cr)
OLPD 8087 - Seminar: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
OLPD 8095 - Problems: Organizational Leadership, Policy, and Development (1.0 - 3.0 cr)
OLPD 8302 - Educational Policy Perspectives (3.0 cr)
POL 8602 - Families, Children, and the State (3.0 cr)
PUBH 6606 - Children's Health: Issues, Programs, and Policies (2.0 cr)
PUBH 6607 - Adolescent Health: Issues, Programs, and Policies (2.0 cr)
PUBH 6613 - Children and Youth With Special Health Care Needs (2.0 cr)
PUBH 6630 - Foundations of Maternal and Child Health Leadership (3.0 cr)
PUBH 6634 - Children and Families: Public Health Policy and Advocacy (2.0 cr)
PUBH 6655 - Principles and Programs in Maternal and Child Health (2.0 cr)
PUBH 6945 - From Kid to Community: Personal, Environmental, and Policy Interventions Targeting Youth Obesity (1.0 cr)
SW 5905 - Permanency in Child Welfare (2.0 cr)
SW 8363 - Social Work in Child Welfare (3.0 cr)

Final Paper (3 Credits)
The final paper can be completed by taking PA 8081, 8082, 8921 or 8991. The paper must have a focus on early childhood policy.
Papers may be completed under other designators by permission.
PA 8081 - Capstone Workshop (3.0 cr)
or PA 8082 - Professional Paper-Writing Seminar (3.0 cr)
or PA 8921 - Master's: Professional Paper (Individual Option) (1.0 - 3.0 cr)
or PA 8991 - Independent Study (0.5 - 4.0 cr)

- This program does not require summer semesters for timely completion.
- Degree: Election Administration PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The election administration post-baccalaureate certificate prepares students across the country for mid-career positions in election administration. Students will acquire and develop the skills and knowledge of election operations and procedures they need to serve as election staff or to further their existing careers in election administration. All courses are offered in an on-line format and include topics such as election law, election design, and voter participation.

Program Delivery
This program is available:
• completely online (all program coursework can be completed online)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission to the certificate will be allowed in fall and spring semesters. Admission decisions will be made by a subcommittee of the faculty advisory group. The application must include a personal statement, resume or C.V., and transcripts.

International applicants must submit score(s) from one of the following tests:
• TOEFL

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Human service professionals face extraordinary challenges that require innovative thinking and an interdisciplinary approach. The certificate in human services leadership provides mid-career professionals knowledge and skills in leadership, public policy, and public service redesign for greater success plus increased potential for advancement to serve in mid- to senior-level leadership positions in county, state, and nonprofit agencies. Designed with input from industry leaders, the program is intended for working professionals involved in human service program development and delivery. The program allows students to complete a professional 12-credit graduate-level certificate that can serve as a stepping stone to the mid-career master of public affairs degree.

Accreditation
This program is accredited by N/A

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year bachelor's degree from an accredited US university or foreign equivalent at time of enrollment.

Special Application Requirements:
At least 8 years of post-baccalaureate professional work experience. Pre-baccalaureate experience may be considered for applicants with a significant gap between completion of high school and the bachelor's degree. Sufficient prior academic preparation as demonstrated in a four-year bachelor's degree. A complete application will include a University of Minnesota application, personal statement, resume or C.V., transcripts, TOEFL scores (if applicable), at least three letters of recommendation, and a diversity statement.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Listening Score: 25
  - Internet Based - Writing Score: 25
  - Internet Based - Reading Score: 25
  - Internet Based - Speaking Score: 25
  - Paper Based - Total Score: 600
• IELTS

- Requirements for this program are current for Fall 2018
- Length of program in credits: 15
- This program does not require summer semesters for timely completion.
- Degree: Policy Issues on Work and Pay PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Policy Issues in Work and Pay certificate provides an understanding of, and the ability to evaluate and develop, federal, state, and local policies that affect the employment relationship. Students learn about the role of government in the employment relationship, including statutes, and how employers, unions, and the government interpret and utilize policies. Core courses are drawn from the Humphrey School of Public Affairs as well as the Center for Human Resources and Labor Studies in the Carlson School of Management, with auxiliary courses in law, history, sociology, and applied economics.

The certificate consists of at least 15 credits. Students complete 10 elective credits that allow them to focus on the area of public policy that is most relevant to their professional and educational goals and needs. Some elective courses require prerequisites, which do not count toward the certificate.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Mathematics courses at least through algebra; a one-semester course in microeconomics.

Special Application Requirements:
A complete application will include a Graduate School application, personal statement, resume or C.V., transcripts, and a diversity statement.

International applicants must submit score(s) from one of the following tests:

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Certificate in Public Affairs Leadership offers mid-career professionals specific knowledge and skills in leadership, management, public policy, and analysis to succeed in today’s challenging environment. Intended for working professionals, the program allows students to complete a professional certificate in an integrative cohort format in nine months. The certificate stands on its own or can be a stepping stone to the mid-career Master of Public Affairs degree. The Certificate in Public Affairs Leadership is offered in a unique combination of on campus and online sessions, making it convenient for students from outside of the Twin Cities area to participate. The program starts with an intensive, introductory week in August, followed by monthly Friday-Saturday meetings from September to May. This cohort approach combines the intensity and depth of in-person instruction paired with the convenience of online coursework.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year bachelor's degree from an accredited U.S. university or foreign equivalent at time of enrollment is required.

Other requirements to be completed before admission:
At least 10 years of post-baccalaureate professional work experience is preferred and highly recommended. Pre-baccalaureate experience may be considered for applicants with a significant gap between completion of high school and the bachelor's degree. Sufficient prior academic preparation as demonstrated in a four-year bachelor's degree.

A complete application will include a University of Minnesota application, personal statement, resume or C.V., transcripts, TOEFL scores (when applicable), at least three letters of recommendation, and a diversity statement.

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Public Affairs

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of public affairs (MPA) is intended for mid-career professionals, and prepares them for public leadership and policy making. The program is typically completed in two to three years of part-time enrollment. The program can be completed in one calendar year (fall, spring, summer semesters) by attending full-time. Courses in a self-designed concentration provide a knowledge base and skills to achieve career goals. Concentration courses can be from Public Affairs and from the 150+ graduate programs across the University of Minnesota. Required courses in this degree are taken in a cohort format. The cohort meets on campus one full week in August, one Friday/Saturday each month (September-May), and online throughout the year.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year bachelor's degree from an accredited US university or foreign equivalent at time of enrollment.

Special Application Requirements:
At least 10 years of post-baccalaureate professional work experience is preferred and highly recommended. Pre-baccalaureate experience may be considered for applicants with a significant gap between completion of high school and the bachelor's degree. Applicants must demonstrate sufficient prior academic preparation as demonstrated in a four-year bachelor's degree. A complete application will include a University of Minnesota application, personal statement, resume or C.V., transcripts, TOEFL scores (if applicable), at least three letters of recommendation, and an optional diversity statement.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 30 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.
**Capstone Project:** The capstone project is designed to provide a learning opportunity for students to apply their knowledge through a client-based team project. The workshop includes a written report for the client and an oral presentation to the client that summarizes the major findings of the semester-long study.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

**Required Core Courses (12 credits)**

- PA 5051 - Public Affairs Leadership I (2.0 cr)
- PA 5052 - Public Affairs Leadership II (2.0 cr)
- PA 5053 - Policy Analysis in Public Affairs (2.0 cr)
- PA 5054 - Program Design and Implementation Analysis (2.0 cr)
- PA 5055 - Qualitative Research Methods and Analysis (2.0 cr)
- PA 5056 - Quantitative Research Methods and Analysis (2.0 cr)

**Capstone Project**

- PA 5080 - Capstone Preparation Workshop (1.0 cr)
- PA 8081 - Capstone Workshop (3.0 cr)

**Remaining Credits (14)**

MPA students self-design a concentration, choosing from a wide variety of classes, including skills courses in management, analysis, and planning; courses in such areas as global policy; social policy; economic and community development; science, technology, and environmental policy; and urban and regional policy and planning; or courses from more than 150 different graduate programs in the University of Minnesota system.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 66
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The doctor of philosophy (PhD) in public affairs offers students opportunities for rigorous, advanced study in the areas of public affairs, policy analysis, and planning. The goal of the PhD program is to train researchers who will enter academia or join highly respected public or nonprofit institutions involved in cutting edge research in public affairs, policy, planning, and management. Successful applicants to the program will be clear about the research they wish to undertake and why they think the Humphrey School is the best place to do that research. Students are expected to make original theoretical, methodological, or substantive contributions in the area of their specialization (sub-plans). Sub-plans are offered in public policy; urban planning; management and governance; and science, technology, and environmental policy. Students will be expected to complete the degree program within five years.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
The general requirement is the capability to pursue PhD-level work. Typically, an applicant should have an academic record from a recognized college that includes undergraduate coursework in microeconomics and mathematics (either calculus, statistics, or algebra).

Special Application Requirements:
A complete application will include a U of MN graduate application, a personal statement that includes motivation for pursuing doctoral studies, a resume or C.V., transcripts, GRE scores, a writing sample, TOEFL scores (if applicable), and at least three letters of recommendation.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

The preferred English language test is Test of English as Foreign Language

Program Requirements
42 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Practical teaching experience: Each candidate must complete training in pedagogy and a teaching experience as a course instructor or teaching assistant (TA) with instructional responsibilities. The pedagogical training may take place prior to or concurrent with the teaching experience. Evidence of English-speaking proficiency is required prior to the teaching experience.

Dissertation requirement: Each candidate must complete original academic research and fulfill a dissertation requirement by completing either an academic thesis or three related academic papers that are judged by the student's committee to be of publishable quality.

Core Courses
Key concepts, literature, and research questions of public affairs. PA 8006 (1.5 credits) is taken two semesters for total of 3 credits.
PA 8003 - Integrative Doctoral Seminar in Public Affairs I (3.0 cr)
PA 8004 - Integrative Doctoral Seminar in Public Affairs II (3.0 cr)
PA 8005 - Doctoral Research Seminar in Public Affairs (3.0 cr)
Take exactly 3 credit(s) from the following:
• PA 8006 - Current Research in Public Affairs: Topics, Approaches, and Cultures (1.5 cr)

Research Methods
Take 4 or more courses totaling 12 or more credits, including at least one course each in: research design, quantitative methods, and qualitative methods. Courses are chosen in consultation with advisor based on student's background and research interests. Students may use previous graduate-level coursework for up to three of the four methods courses (up to 9 credits) with approval of PhD program director.

Academic Sub-plan
Students are required to complete one of four sub-plans consisting of a minimum of 18 credits, as described below. Sub-plans offer students the opportunity for advanced, rigorous study in the theory, methods, and practice in their field. Students may use up to 18 credits of previous graduate-level coursework to fulfill sub-plan requirements.

Doctoral Thesis Credits
Take 24 or more credit(s) from the following:
• PA 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Management and Governance
Required Courses
PA 8106 - Research Seminar in Management, Leadership & Governance (3.0 cr)
PA 5012 - The Politics of Public Affairs (3.0 cr)
Electives
12 credits in the area of public and nonprofit leadership and management. Courses are chosen in consultation with advisor based on student's background and research interests.

Public Policy
The public policy sub-plan is a self-designed set of topic-based courses (minimum 18 credits) determined by the student and advisor with the consent of the other faculty in the sub-plan area.

   or PA 5731 - Emerging Sciences and Technologies: Law, Ethics and Policy (3.0 cr)
   or PA 5751 - Urban Infrastructure Systems for Sustainable and Healthy Cities (3.0 cr)

Environmental and Sustainability Systems
One course (at least 3 credits of coursework at the 8000-level, or advisor permission) providing depth in environmental and sustainability systems, such as:
   Health & well-being, environmental psychology
   Climate, environment and eco-system studies
   Environmental economics, applied economics
   Industrial ecology
   Models, scenarios, risk, uncertainty, decision analysis
Examples of courses offered in U of M departments related to these topics are available from faculty advisors.

Policy Process and Implementation
One course (at least 3 credits of coursework at the 8000-level, or advisor permission) providing depth in policy process and implementation, covering topics such as:
   Law, regulations, science and innovation policy
   Politics of public affairs
   Urban environmental planning
   Leadership and management
   Global policy
   Public finance, budgeting
   Policy implementation and evaluation
Examples of courses offered in U of M departments related to these topics are available from faculty advisors.

Additional electives (at least 3 credits) to be selected in consultation with your advisor.

Urban Planning
Required Courses
PA 8206 - Planning Theory (3.0 cr)
PA 5204 - Urban Spatial and Social Dynamics (3.0 cr)

Urban Planning Electives
Four additional courses, for at least 12 credits, to be determined by student and advisor. Students must demonstrate proficiency in GIS.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 45
- This program does not require summer semesters for timely completion.
- Degree: Master of Public Policy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of public policy (MPP) curriculum is built upon a core of required theoretical and methodological courses. In remaining courses, students choose either to emphasize more advanced study of analysis or management, or to focus on a particular substantive area of public policy. Structured concentrations include advanced policy analysis methods; economic and community development; gender and public policy; global public policy; human rights; politics and governance; public and nonprofit leadership and management; science, technology, and environmental policy; and social policy. Students have multiple opportunities to apply the concepts learned in their coursework to real-life policy problems, including cases presented in courses, their internships, and workshops. Dual degrees include MPP/master of business administration; MPP/juris doctor; MPP/master of public health; and MPP/master of social work.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A four-year bachelor's degree from an accredited US university or foreign equivalent at time of enrollment.

Other requirements to be completed before admission:
While no specific experience or academic pathway is required, students with a strong liberal education background and sound quantitative and analytical skills will be best prepared for academic success at the Humphrey School of Public Affairs.

Previous coursework in mathematics, statistics, and economics is recommended. Past applicants needing to strengthen this part of their skill set have found courses in introductory microeconomics, college algebra, and introductory statistics to be helpful preparation.

Special Application Requirements:
A complete application will include a University of Minnesota application, personal statement, resume or C.V., transcripts, GRE scores, TOEFL scores (if applicable), at least three letters of recommendation, and an optional diversity statement.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the

Information current as of August 31, 2018
Program Requirements

Plan C: Plan C requires 45 major credits and 0 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semester must be completed before filing a Degree Program Form.

Core
- PA 5011 - Management of Organizations (3.0 cr)
- PA 5012 - The Politics of Public Affairs (3.0 cr)
- PA 5021 - Microeconomics for Policy Analysis (3.0 cr)
- PA 5002 - Introduction to Policy Analysis (1.5 cr)
- PA 5003 - Introduction to Financial Analysis and Management (1.5 cr)

Statistics
- PA 5031 - Statistics for Public Affairs (4.0 cr)
  or PA 5045 - Statistics for Public Affairs, Accelerated (4.0 cr)

Economics
Take 3 or more credit(s) from the following:
- PA 5022 - Applications of Economics for Policy Analysis (1.5 - 3.0 cr)
- PA 5431 - Public Policies on Work and Pay (3.0 cr)
- PA 5503 - Economics of Development (3.0 cr)
- PA 5521 - Development Planning and Policy Analysis (4.0 cr)
- PA 5722 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- PA 5805 - Global Economics (3.0 cr)

Methods
- PA 5032 - Applied Regression (2.0 cr)
  or PA 5044 - Applied Regression, Accelerated (2.0 cr)
- PA 5033 - Multivariate Techniques (2.0 cr)
  or PA 5041 - Qualitative Methods for Policy Analysts (4.0 cr)

Concentration: 9-12 credits
- Global policy concentration requires 12 credits. All other concentrations require 9 credits.

Professional Paper
Professional paper through a capstone workshop, working group, or master's: professional paper (individual option).
- PA 8081 - Capstone Workshop (3.0 cr)
  or PA 8082 - Professional Paper-Writing Seminar (3.0 cr)
  or PA 8921 - Master's: Professional Paper (Individual Option) (1.0 - 3.0 cr)

Electives
- Electives to bring total credits to 45.

Joint- or Dual-degree Coursework: This program offers options for four dual degrees. Each dual degree option within the MPP allows for a different number of credits in common between the two programs: MPP/MBA: 24 credits in common allowed; MPP/JD: 29 credits in common allowed; MPP/MPH - Public Health Practice: 26 credits in common allowed; MPP/MSW: 21 credits in common allowed for full program, 15 for advanced standing, 11 for direct practice.

Program Sub-plans
- A sub-plan is not required for this program.
- Students may not complete the program with more than one sub-plan.

The public policy curriculum is built upon a core of required theoretical and methodological courses. In coursework, students study policy analysis or management or focus on a substantive area of public policy. Substantive areas include advanced policy analysis methods; economic and community development; global public policy; human rights; politics and governance; public and nonprofit leadership and management; public finance and budgeting; science, technology, and environmental policy; social policy; and gender and public policy. Students have multiple opportunities to apply the concepts learned to real-life policy problems.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Specific coursework for the minor is chosen in consultation with the student's minor advisor or the public policy director of graduate studies. Students are required to take a minimum of three credits from the public policy MPP curriculum. Up to 3 credits may be taken on an S/N grade basis. All other courses must be completed with grades of B or better.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Required Coursework
Students pursuing the master's-level minor must complete 9 credits from the following:
PA 5xxx
PA 8xxx

Doctoral
Required Coursework
Students pursuing the doctoral-level minor must complete at least 12 credits from the following:
PA 5xxx

Program Requirements

**Plan A:** Plan A requires 29 to 31 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan C:** Plan C requires 36 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Elective credits are chosen in consultation with the student’s advisor.

**Science, Technology, and Environmental Policy Overview**

- PA 5711 - Science, Technology & Environmental Policy (3.0 cr)
- PA 5715 - Survey of Current Issues in Science, Technology, and Environmental Policy (1.5 cr)

**Sustainability Systems Science**

- PA 5722 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- PA 5741 - Risk, Resilience and Decision Making (1.5 cr)
- PA 5752 - Material-Energy Flows & Sustainable Development (3.0 cr)

**Social and Policy Processes**

- PA 5002 - Introduction to Policy Analysis (1.5 cr)
- PA 5012 - The Politics of Public Affairs (3.0 cr)

**Foundational Methods**

**Statistics**

- PA 5031 - Statistics for Public Affairs (4.0 cr)
- or PA 5045 - Statistics for Public Affairs, Accelerated (4.0 cr)

Take one of the following:

- PA 5032 - Applied Regression (2.0 cr)
- or PA 5044 - Applied Regression, Accelerated (2.0 cr)

Take one of the following:

- PA 5033 - Multivariate Techniques (2.0 cr)
- or PA 5041 - Qualitative Methods for Policy Analysts (4.0 cr)

**Focus Area - Take one of the following:**

Only the following 5790 titles are applicable: “Environmental Mgmt of Food, Water, and Energy Systems” and “Urban Agriculture and Food Systems Policy.”

- PA 5721 - Energy Systems and Policy (3.0 cr)
- or PA 5723 - Water Policy (3.0 cr)
- or PA 5724 - Climate Change Policy (3.0 cr)
- or PA 5731 - Emerging Sciences and Technologies: Law, Ethics and Policy (3.0 cr)
- or PA 5751 - Urban Infrastructure Systems for Sustainable and Healthy Cities (3.0 cr)
- or PA 5790 - Topics in Science, Technology, and Environmental Policy (1.0 - 3.0 cr)

**Electives**

Electives to bring total credits to required number, in consultation with the advisor.

**Plan Options**

**Plan A Requirements**

Take 10 master’s thesis credits.
PA 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan C Requirements - Take one of the following:
PA 8081 - Capstone Workshop (3.0 cr)
or PA 8082 - Professional Paper-Writing Seminar (3.0 cr)
or PA 8921 - Master's: Professional Paper (Individual Option) (1.0 - 3.0 cr)

Joint- or Dual-degree Coursework: MS-STEP/JD (Joint Degree Program in Law, Health, and the Life Sciences) Student may take a total of 24 credits in common among the academic programs.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate minor in Science, Technology, and Environmental Policy (STEP) provides students with the skills and knowledge to study public issues arising at the intersection of science, technology, environment and society that shape economic development, environmental sustainability, human health, and well-being. The STEP graduate minor is designed to facilitate a cohort experience through the required survey course, PA 5711, additional coursework offered by STEP and STEP-affiliated faculty, and opportunities outside of the classroom through the Center for Science, Technology, and Environmental Policy (CSTEP). Students pursuing the STEP minor are strongly encouraged to participate in the activities of CSTEP, particularly the regular STEP Feedback and Research (STEP-FAR) seminar.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

- This program does not require summer semesters for timely completion.
- Degree: Master of Urban and Regional Planning

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of urban and regional planning (MURP) degree is an interdisciplinary program that prepares students to analyze, forecast, design, and implement plans for regions, communities, and neighborhoods. Students develop a comprehensive understanding of the built environment (land use, transportation, housing, regional economies) and the ability to mediate among competing interests. They are prepared for jobs in public, nonprofit, and private sectors. Students can generally complete the MURP degree in two years of full-time study.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A four-year bachelor's degree from an accredited US university or foreign equivalent at time of enrollment.

Other requirements to be completed before admission:
While no specific experience or academic pathway is required, students with a strong liberal education background and sound quantitative and analytical skills will be best prepared for academic success at the Humphrey School of Public Affairs.

Program Requirements

Plan A: Plan A requires 38 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan C: Plan C requires 48 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

A 400-hour professional internship is required. MURP students must demonstrate competence with GIS through coursework or work experience. (Students not competent in GIS must take a graduate-level GIS course as part of their 48 credits.)

Required Core Courses

- PA 5004 - Introduction to Planning (3.0 cr)
- PA 5013 - Law and Urban Land Use (1.5 cr)
- PA 5205 - Statistics for Planning (4.0 cr)
- PA 5042 - Urban and Regional Economics (2.0 cr)
- PA 5043 - Economic and Demographic Data Analysis (2.0 cr)
- PA 5204 - Urban Spatial and Social Dynamics (3.0 cr)
- PA 5211 - Land Use Planning (3.0 cr)
- PA 5253 - Designing Planning and Participation Processes (3.0 cr)
- PA 8081 - Capstone Workshop (3.0 cr)

Plan Options

Plan A Requirements
Plan A students must complete at least 38 course credits, which will include the core courses, at least 6 credits from one of four concentration areas, and electives. Plan A students also must take at least 10 master's thesis credits.

Concentration Requirement
Take at least 6 credits from one of the following concentration areas: Environmental Planning; Housing and Community Development; Land Use and Urban Design; or Transportation Planning.

Electives
Take elective courses as needed to meet the 38-credit requirement for coursework.

Thesis Credits
Take 10 master's thesis credits.
- PA 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan C Requirements
Plan C students must complete at least 48 course credits, which will include the core courses, at least 12 credits from one of four concentration areas, and electives.

Concentration Requirement
Take at least 12 credits from one of the following concentration areas: environmental planning; housing and community development; land use and urban design; or transportation planning.

Electives
Take elective courses as needed to meet the 48-credit requirement.

Joint- or Dual-degree Coursework: MURP/JD: 29 credits in common allowed. MURP/MLA: 37 credits in common allowed. MURP/MPH: 26 credits in common allowed. MURP/MSCE: 18 credits in common allowed. MURP/MSW: 21 credits in common allowed for the full program; 15 for the advanced standing program; and 11 for MSW Direct Practice.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Planners bring together knowledge and expertise from many diverse disciplines to shape neighborhoods, cities, and regions. The urban and regional planning minor helps students to think across those fields of expertise and act upon links among environmental systems, infrastructure development, and housing and community development. The program teaches technical and analytical skills needed to think strategically about developing and implementing plans at the neighborhood, city, and regional level.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

No more than 3 credits may be taken S/N. All other courses must be completed with grades of B or higher. Students must complete the minor with at least a 3.0 GPA.

PA 5004
- PA 5004 - Introduction to Planning (3.0 cr)

Additional Coursework
Take 1 or more course(s) totaling 3 or more credit(s) from the following:
- PA 5211 - Land Use Planning (3.0 cr)
- PA 5231 - Transit Planning and Management (3.0 cr)
- PA 5242 - Environmental Planning, Policy, and Decision Making (3.0 cr)
- PA 5261 - Housing Policy (3.0 cr)
- PA 8202 - Networks and Places: Transportation, Land Use, and Design (4.0 cr)
- PA 8203 - Neighborhood Revitalization Strategies and Theories (4.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.
Masters

Required Coursework
Take additional courses as needed, in consultation with the Urban and Regional Planning director of graduate studies, to meet the 9-credit requirement.
PA 5xxx
PA 8xxx

Doctoral

Required Coursework
Take additional courses as needed, in consultation with the Urban and Regional Planning director of graduate studies, to meet the 12-credit requirement.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Grounded by a strong commitment to the worlds, histories, representations, and political struggles of Indigenous peoples locally and globally, the intellectual project of American Indian and Indigenous Studies (AIIS) uses interdisciplinary methods of critical inquiry as a means through which students engage research and scholarship in their major fields of study. An AIIS minor is composed of graduate course work with core and affiliated Indigenous studies faculty in the Department of American Indian Studies and other departments. Students receive foundational training in one of three required courses: Indigenous Critical Theory, Problems in American Indian History, or American Colonialism and Indigenous Histories.

In addition, students choose (in consultation with the director of graduate studies) from graduate courses in a range of disciplines committed to Indigenous studies to tailor their work to their own scholarly needs. The AIIS graduate minor strengthens student work in their major field of study as AIIS minors will learn how to best integrate American Indian and Indigenous Studies into their existing work as well as how to complement their research to include indigenous methodologies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Students are strongly encouraged to take at least one elective course with an AMIN designator, under consultation with the American Indian and Indigenous Studies director of graduate studies.

Required Core Course (3 Credits)
Select one of three core courses, for at least 3 credits, from the following:
Take 3 or more credit(s) from the following:
- AMIN 5920 - Topics in American Indian Studies (3.0 cr)
- HIST 5890 - Readings in American Indian and Indigenous History (3.0 cr)
  or AMIN 5880 - Readings in American Indian and Indigenous History (3.0 cr)
  or AMIN 8890
  or HIST 5910 - Topics in U.S. History (1.0 - 4.0 cr)
  or AMST 5920
  or AMST 5920
Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Doctoral

Electives (9 Credits)
Take at least 9 credits from the following list. Courses from the core course list not used to meet that requirement can be taken as an elective.
Take 9 or more credit(s) from the following:
- AMIN 4532 - Vine Deloria, Jr.: A Renaissance Indigenous Figure (3.0 cr)
- AMIN 4990 - Topics in American Indian Studies (1.0 - 4.0 cr)
- AMIN 5402 - American Indians and the Cinema [AH, DSJ] (3.0 cr)
- AMIN 5409 - American Indian Women: Ethnographic and Ethnohistorical Perspectives [HIS, DSJ] (3.0 cr)
- AMIN 4xxx
- AMIN 5xxx
- AMIN 8xxx
- ESCI 4602 - Sedimentology and Stratigraphy (3.0 cr)
- CI 8645 - Indigenous Language Revitalization and Activist Research Methods (3.0 cr)
- ANTH 8510 - Topics in Archaeology (3.0 cr)

- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 31
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The master's degree in American studies is not designed as a terminal degree; therefore, students are not admitted directly to the MA program. Students may apply for graduate study at the PhD level only. A PhD student may elect to pursue the MA. All PhD coursework is applicable. Current graduate students seeking to obtain the MA should review the information in the current graduate handbook on the website at http://americanstudies.umn.edu/grad/handbook.html.

American studies is an interdisciplinary, interdepartmental program. The American studies graduate faculty consists of American studies core faculty members and graduate faculty members drawn from a wide number of departments. Students develop subfields (understood as a more specific focus of research and teaching) and also pursue broad training in analyzing the development of cultural and historical processes that shaped the nation and its diverse cultures, as well as analyzing contemporary practices.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
An undergraduate major in a field related to American studies or other preparation acceptable to the Admissions Committee for American studies is required.

Special Application Requirements:
American studies admits for graduate study at the PhD level only. PhD students may obtain a MA during the course of their studies; however no students are admitted for a terminal MA. Students entering the PhD program must hold at least a bachelor's level degree from a recognized institution of higher education. The deadline for application to the Department of American Studies is December 1 of the year prior to intended entry. Refer to the department website for application procedures and additional information.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 21 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 30 major credits and 0 credits outside the major. The final exam is written and oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading knowledge of one foreign language

A minimum GPA of 3.50 is required for students to remain in good standing.

The master's degree is not designed as a terminal degree; therefore, students are not admitted directly to the MA program. A PhD student may elect to pursue the MA. All PhD coursework is applicable. Current graduate students seeking to obtain the MA should review the information in the current Graduate Handbook on the program website at http://americanstudies.umn.edu/grad/handbook.html.

All courses are selected in consultation with the student's advisor and the director of Graduate Studies.

"Major" courses are defined as any courses that American Studies deems appropriate to the student's area of study, due to the interdisciplinary nature of the program.

Requirements
The following courses are required for all students:

- AMST 8201 - Historical Foundations of American Studies (3.0 cr)
- AMST 8202 - Theoretical Foundations and Current Practice in American Studies (3.0 cr)

Core Areas
Research Seminars
6 credits (2 courses) worth of research seminars offered by the Department of American Studies or another department related to research area. Requires director of Graduate Studies approval.

Comparative Culture
3 credits (1 course) in a course on comparative cultures, covering international or non-US subjects offered by the Department of American Studies or another department related to research area.

Plans A & B
Students are required to specify a field of concentration. The courses required to fulfill these concentrations are to be selected between the student and the advisor, and approved by the director of Graduate Studies.

Plan A
Field of Concentration
Concentration Area Courses
3 credits (one course) in students field of concentration offered by the Department of American Studies or another department related to research area.

Cultural Pluralism Course
3 credits (one course) in student's field of concentration, focused on cultural pluralism within the United States offered by the Department of American Studies or another department related to research area.

Thesis Credits
Take exactly 10 credit(s) from the following:
- AMST 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
- OR -

Plan B
This plan requires 3 papers in lieu of an MA thesis.

Concentration Area Courses
12 credits (4 courses) in student's field of concentration offered by the Department of American Studies or another department related to research area.

Cultural Pluralism Course
3 credits (one course) in students field of concentration, focused on cultural pluralism within the United States offered by the Department of American Studies or another department related to research area.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

For the master's and doctoral minors, students are expected to choose courses consistent with or complementary to their major.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Requirements
AMST 8201 - Historical Foundations of American Studies (3.0 cr)
or AMST 8202 - Theoretical Foundations and Current Practice in American Studies (3.0 cr)

American Studies Electives
Take 6 or more credit(s) from the following:
• AMST 5xxx
• AMST 8xxx

Doctoral
Requirements
AMST 8201 - Historical Foundations of American Studies (3.0 cr)
or AMST 8202 - Theoretical Foundations and Current Practice in American Studies (3.0 cr)
American Studies Electives
Take 9 or more credit(s) from the following:
• AMST 5xxx
• AMST 8xxx

  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**  
39 to 45 credits are required in the major.  
0 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Reading knowledge of one foreign language.

A minimum GPA of 3.50 is required for students to remain in good standing.

Requirements
The following courses are required for all students:

- AMST 8201 - Historical Foundations of American Studies (3.0 cr)
- AMST 8202 - Theoretical Foundations and Current Practice in American Studies (3.0 cr)
- AMST 8401 - Practicum in American Studies (3.0 cr)
- AMST 8801 - Dissertation Seminar (3.0 cr)

Core Areas
Of the 3 core areas below, at least 3 credits must focus on American cultural diversity. Coursework is chosen in consultation with the advisor and director of Graduate Studies.

1. Research Seminars
   A minimum of 3 and maximum of 9 credits (3 courses) worth of research seminars offered by the department of American Studies or another department related to research area. Requires DGS approval.
   
   One of these seminars requires original research.

2. Comparative Culture
   3 credits (1 course) in a course on comparative cultures, covering international or non-US subjects.

3. Electives
   21 credits (7 courses) of American studies courses or courses related to an area of study chosen in consultation with your advisor.

Outside Coursework
Take 12 credits in a declared minor field or supporting program in integration with the research focus.

Contact Information:
Department of Anthropology, 395 Hubert H. Humphrey Center, 301 19th Ave S, Minneapolis, MN 55455 (612-625-3400; fax: 612-625-3095).
Email: anthgrad@umn.edu
Website: http://anthropology.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The Department of Anthropology admits students for the PhD degree only, although in some cases students admitted to the PhD program complete a master's degree as they work toward the PhD.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 84

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is a demonstration of familiarity with the tools of research or scholarship in the graduate student's area of study, the ability to work independently, and the ability to present the results of their investigation effectively, by completing at least one Plan B project, though advisors may require as many as three such projects. The norm in anthropology is two to three projects. Master's-level projects are often the result of work carried out in a seminar or course (e.g., a paper), and are generally
polished in a directed reading or research course. Plan B project(s) should involve a combined total of approximately 120 hours of work. With the approval of their advisors, graduate students have considerable flexibility in defining the nature of their Plan B project(s).

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

Concentrations

Sociocultural Anthropology

Required Core Courses

ANTH 8001 - Ethnography, Theory, History (3.0 cr)
ANTH 8002 - Ethnography: Contemporary Theory and Practice (3.0 cr)
ANTH 8203 - Research Methods in Social and Cultural Anthropology (3.0 cr)

Major Electives

Take 5 or more credit(s) from the following:
• ANTH 5xxx
• ANTH 8xxx
• or other 5xxx or 8xxx level that is approved by advisor and director of Graduate Studies.

-OR-

Biological Anthropology

Required Core Courses

ANTH 8111 - Evolutionary Morphology (3.0 cr)
ANTH 8112 - Reconstructing Hominin Behavior (3.0 cr)
ANTH 8114 - Biological Anthropology Graduate Program Seminar: Behavioral Ecology of Primates (3.0 cr)

Major Electives

Take 5 or more credit(s) from the following:
• ANTH 5xxx
• ANTH 8xxx
• or other 5xxx or 8xxx level that is approved by advisor and director of Graduate Studies.

-OR-

Archaeology

Required Core Courses

ANTH 8002 - Ethnography: Contemporary Theory and Practice (3.0 cr)
ANTH 8004 - Foundations of Anthropological Archaeology (3.0 cr)
ANTH 8230 - Anthropological Research Design (3.0 cr)

Methods Course

Take 3 or more credit(s) from the following:
• ANTH 5269 - Analysis of Stone Tool Technology (4.0 cr)
• ANTH 5444 - Archaeological Ceramics (4.0 cr)
• ANTH 5403 - Quantitative Methods in Biological Anthropology (4.0 cr)
• ANTH 4101 - Archival Analysis for Anthropologists (3.0 cr)
• ANTH 5402 - Zooarchaeology Laboratory (3.0 cr)

Major Electives

Take 2 or more credit(s) from the following:
• ANTH 5xxx
• ANTH 8xxx
• or other 5xxx or 8xxx level that is approved by advisor and director of Graduate Studies.

-OR-

Cultural Heritage Management

Required Core Courses

ANTH 8004 - Foundations of Anthropological Archaeology (3.0 cr)

Additional Required Course

Take 3 or more credit(s) from the following:
• ANTH 5448 - Applied Heritage Management (3.0 cr)
• MST 5011 - Museum History and Philosophy (3.0 cr)
• ANTH 5601 - Archaeology and Native Americans [DSJ] (3.0 cr)

Major Electives
Take 8 or more credit(s) from the following:
• ANTH 5xxx
• ANTH 8xxx
• or other 5xxx or 8xxx level that is approved by advisor and director of Graduate Studies.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor program in anthropology is individually designed by each student in consultation with a faculty advisor at both the master's and Ph.D. level. Consult the director of graduate studies about selecting an advisor.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The master's and doctoral minors are individually designed by the student and a faculty advisor. Consult with the anthropology director of graduate studies about selecting an advisor, and obtaining approval for course choices. Students pursuing the doctoral minor must complete at least one 8xxx-level course.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Required
  Take 6 or more credit(s) from the following:
  - ANTH 5xxx
  - ANTH 8xxx

Doctoral
Required
  At least one course must be at the 8xxx-level.
  Take 12 or more credit(s) from the following:
  - ANTH 5xxx
  - ANTH 8xxx
Twin Cities Campus
Anthropology Ph.D.
Anthropology
College of Liberal Arts

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 60 to 61
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Anthropology offers graduate education in sociocultural and linguistic anthropology, archaeology, and biological anthropology. The program admits students only for the PhD, although some students do earn a master's degree as part of their PhD program.

Major areas of faculty research and graduate student training in sociocultural and linguistic anthropology include art and visual culture, critical theory, cultures of capitalism, discourse and power, experimental writing, gender and sexuality, medical anthropology, memory and haunting, multi-species ethnography, new materialisms, philosophical anthropology, science and technology studies, sovereignty and the state, and temporality and futurity. Regional specialisations include Europe, the Pacific, the Middle East, North America, the Caribbean, East Asia and South Asia.

The program in archaeology offers training and research opportunities in the use of anthropological theories and interpretive strategies in the reconstruction of historic and prehistoric pasts based on material culture, the application of faunal and lithic analysis to questions in paleoecology and evolutionary theory, and the application of archaeological science to the reconstruction of site formation. Regional specializations include Europe, Southwest Asia, Central Asia, and North America.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor of arts degree or equivalent is required for admission.

Other requirements to be completed before admission:
Graduate students who enter the PhD program with an MA degree in Anthropology, or a closely related field from another institution, will generally enter the program at the second-year level. Should second-year requirements (e.g., the research paper, preparation for the bibliography) prove overly challenging for the graduate student, the student will, in most cases, be required to continue their second year activities into their third year. In addition, they may be asked to take courses in areas of perceived weakness.

Special Application Requirements:
Three letters of recommendation and scores from the General test of the GRE should be sent to the director of graduate studies. Admission is for fall semester only; the deadline for all materials is December 1.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 21
Program Requirements

24 to 25 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

During the first year, students are required to take at least one graduate-level (8xxx) seminar in the PhD program each semester. Students should consult the Graduate Student Handbook for special requirements for sociocultural anthropology, linguistic anthropology, archaeology, and biological anthropology. Language requirements depend upon student's special area of research.

Concentration Areas

Sociocultural Anthropology

Required Major Core Courses
Take 9 or more credit(s) from the following:
- ANTH 8001 - Ethnography, Theory, History (3.0 cr)
- ANTH 8002 - Ethnography: Contemporary Theory and Practice (3.0 cr)
- ANTH 8203 - Research Methods in Social and Cultural Anthropology (3.0 cr)

Major Elective Courses
Take 15 or more credit(s) from the following:
- ANTH 5xxx
- ANTH 8xxx
- or other 5xxx or 8xxx level that is approved by advisor and director of Graduate Studies

Outside the Major in a Supporting Program
Take 12 credits outside the major in a graduate minor or supporting program.

Thesis Credits
Take 24 or more credit(s) from the following:
- ANTH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
- OR -

Biological Anthropology

Required Major Core Courses
Take 9 or more credit(s) from the following:
- ANTH 8111 - Evolutionary Morphology (3.0 cr)
- ANTH 8112 - Reconstructing Hominin Behavior (3.0 cr)
- ANTH 8114 - Biological Anthropology Graduate Program Seminar: Behavioral Ecology of Primates (3.0 cr)

Major Elective Courses
Take 15 or more credit(s) from the following:
- ANTH 5xxx
- ANTH 8xxx
- or other 5xxx or 8xxx level that is approved by advisor and director of Graduate Studies

Outside the Major in a Supporting Program
Take 12 credits outside the major in a graduate minor or supporting program.
Thesis Credits
Take 24 or more credit(s) from the following:
• ANTH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

-OR-

Archaeology
Required Major Core Courses
Take 9 or more credit(s) from the following:
• ANTH 8004 - Foundations of Anthropological Archaeology (3.0 cr)
• ANTH 8230 - Anthropological Research Design (3.0 cr)
• ANTH 8009 - Prehistoric Pathways to World Civilizations (3.0 cr)

Required Methods Course
ANTH 5402 - Zooarchaeology Laboratory (3.0 cr)
or ANTH 5269 - Analysis of Stone Tool Technology (4.0 cr)
or ANTH 5444 - Archaeological Ceramics (4.0 cr)
or ANTH 4101 - Archival Analysis for Anthropologists (3.0 cr)
or ANTH 5403 - Quantitative Methods in Biological Anthropology (4.0 cr)

Major Electives Courses
Take 12 or more credit(s) from the following:
• ANTH 5xxx
• ANTH 8xxx
• or other 5xxx/8xxx level courses approved by advisor

Outside the Major in a Supporting Program
Take 12 credits outside the major in a graduate minor or supporting program.

Thesis Credits
Take 24 or more credit(s) from the following:
• ANTH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 36
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Please note that the MA is not a freestanding program; rather, it is offered as an "in-process" degree along the way to the PhD. Please refer to the "Prerequisites for Admission" section below for more information. Areas of specialization include all current faculty specialties.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Students are not admitted directly to the art history MA degree, nor is a terminal master's degree offered.

Special Application Requirements:
The Art History department accepts students only into the PhD program. For PhD application requirements, please refer to the Art History PhD program information.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 30 major credits and 6 credits outside the major. The final exam is written. A capstone project is required.
Capstone Project: The Plan B capstone project requires two Plan B papers demonstrating the student's mastery of the essential skills of scholarship. One paper is written on a subject in the area of the student's primary concentration. This paper is supervised by the student's academic adviser. The second paper is written on a subject in the area of the student's secondary concentration and is supervised by someone other than the academic adviser. Term papers or seminar reports may serve as the basis for the Plan B papers, or the topic may be the result of independent study. The student and the project supervisor should decide upon the length for the chosen topic. The projects are evaluated and approved by two art history graduate faculty, one of whom is the project supervisor. Both are required to sign the title page of the paper. Upon completion of the Plan B papers, they should be submitted to the Graduate Studies secretary.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: Reading Proficiency
A minimum GPA of 3.50 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Reading proficiency in a a modern foreign research language is required. Additional modern or ancient languages may be required by the student's advisor, depending on the field.

**Art History Department Courses**
Within the following concentrations and electives, students must fulfill the following distribution requirements. Courses must be taken in the Art History department.

1. Global Perspectives (one course)
2. Two 8xxx-level Art History seminars in addition to ArtH 8001. ArtH 8975 cannot be used to meet this requirement.

**Art History Concentrations**

**Primary Concentration**
Take 9 or more credits from the following:
- Arth 5xxx
- Arth 8xxx

**Secondary Concentration**
Take 6 or more credits from the following:
- Arth 5xxx
- Arth 8xxx

**Required Art History Courses**
Take at least 3 credits of 5xxx- or 8xxx-level Art History courses in addition to ArtH 8001.

- **ARTH 8001** - Art Historiography: Theory and Methods (3.0 cr)
- ARTH 5xxx
  - or ARTH 8xxx

**Electives**
Take 9 or more credits of electives, in consultation with Director of Graduate Studies. At least 3 credits must be from the following:
- ARTH 5xxx
  - or ARTH 8xxx

**Outside Coursework**
Take at least 6 credits outside the department that do not focus on art history.

**Concentration Areas**

**Examples of potential concentrations include:**
- Ancient Mediterranean/Western Asia
- South Asia
- Islamic
- Early Modern Europe and the Atlantic World
- North American
- Contemporary
- Film/Photography
Twin Cities Campus

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 11
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Areas of specialization in the art history program include: American art and material culture; early modern and Baroque art; East Asian art and archaeology; art and archaeology of ancient Iran, Hellenistic Asia, and the late Roman empire; modern and contemporary art and theory, including film and photography studies as well as 19th- through 21st-century art; pre-Columbian and colonial art of the Americas, and South Asian art and architecture.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Required Electives
Take 11 or more credit(s) from the following:
- ARTH 5xxx
- ARTH 8xxx

Doctoral
Required Electives
Take 12 or more credit(s) from the following:
- ARTH 5xxx
- ARTH 8xxx
Twin Cities Campus
Art History Ph.D.
Art History
College of Liberal Arts

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 78
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The University of Minnesota’s doctoral program in art history trains scholars who go on to careers in universities, colleges, museums, and other arts institutions throughout the nation and the world. The faculty’s unique range of expertise allow us to offer specialized training that only a few other institutions worldwide are able to match. Our current faculty and institutional strengths support specialization in the following overlapping fields: art and archaeology of ancient Persia (including Achaemenid, Seleucid, Parthian, and Sasanian Iran); Islamic art (including the medieval Persianate world and the Ottoman, Safavid, and Mughal empires); art and archaeology of late antiquity; the global early modern in Europe, the Atlantic world, and South Asia; Northern and Italian Renaissance and Baroque art; North American art and visual/material culture; film and photography; and contemporary art and theory.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Applicants with the necessary preparation holding a BA or an MA are equally encouraged to apply and every incoming class normally consists of students with both backgrounds. Although all students apply to, and begin in, the PhD program, students complete the requirements for an ‘in-process’ MA on their way to the PhD degree. In addition to transcripts and test scores, students are required to submit a writing sample, statement of objectives (personal statement) outlining their current and future research interests, and three letters of recommendation. Please refer to the program website and contact the DGS for further information:
https://cla.umn.edu/art-history/graduate/apply

Applicants must submit their test score(s) from the following:
- GRE
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
42 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: See other program requirements below:

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students complete all requirements for an MA degree en route to the PhD. Therefore, all courses in the MA at the University of Minnesota are applied to and part of the the PhD requirements.

Students with a previous MA in art history may be given credit towards some of their in-process MA coursework requirements (up to 40%).

Students may take up to 2 directed study courses to satisfy requirements.

Language requirement: Reading proficiency in two modern foreign research languages. Additional modern or ancient languages may be required by the student's advisor depending on field.

Art History Department Courses
Within this the following concentrations and electives, students must fulfill the following distribution requirements in courses taken in the Art History department:

1) Global Perspectives Requirement (1 course)
2) Art History Seminars at the 8xxx level (2 courses)
   - This requirement is in addition to ARTH 8001, and excluding ARTH 8975.

Primary Concentration
Take 18 or more credit(s) from the following:
• ARTH 5xxx
• ARTH 8xxx

Secondary Concentration
Take 9 or more credit(s) from the following:
• ARTH 5xxx
• ARTH 8xxx

Required Art History Courses
ARTH 8001 - Art Historiography: Theory and Methods (3.0 cr)
Take 3 additional credits from either:
ARTH 5xxx
or ARTH 8xxx

Electives
Take 9 or more elective credits. At least 3 of these credits must be from the following:
ARTH 5xxx
or ARTH 8xxx

Outside Coursework
Doctoral Minor
A doctoral-level minor is comprised of a minimum of 12 credits, with the terms specified by the department housing the minor program.
At least 6 credits of the minor must be taken in a single field outside the Department of Art History. The field must be related to Art History, but cannot be art historical in content.

or Supporting Program
A supporting program consists of 12 credits, which may be from more than one discipline outside the department and which represent a coherent area of work. Such self-designed supporting programs are constructed with input from the adviser.
6 credits may be art historical in content; however, they must be outside the student's primary area of concentration. 6 additional credits of the supporting program must NOT be art historical in content.

**Thesis Credits**
Take 24 or more credit(s) from the following:
• ARTH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

**Areas of Concentration**

**Examples of potential concentrations include:**
- Ancient Mediterranean/Western Asia
- South Asia
- Islamic
- Early Modern Europe and the Atlantic World
- North American
- Contemporary
- Film/Photography

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 64
- This program does not require summer semesters for timely completion.
- Degree: Master of Fine Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of fine arts program places major emphasis on creative artistic work of high quality. It promotes not only the conceptual and technical education of the professional artist in their artistic practice, encouraging critical inquiry, excellence, and an understanding of the history of art, but also an experimental approach toward each media. The following areas of concentration are available: ceramics, drawing and painting, photography, printmaking, sculpture, and experimental and media arts. The MFA is considered the terminal degree in the field of fine arts and is typically the degree required to teach at the college or university level.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Admission to the M.F.A. program is highly competitive. In addition to meeting the University's application requirements, students applying to the program must demonstrate a high degree of capability and commitment in their artistic portfolio and in their statements of artistic and academic intent. Applicants must submit a portfolio electronically with documentation of artwork completed in the three years prior to admission. Instructions for submitting the portfolio and supplemental materials including three letters of recommendation may be found at the department's website: www.art.umn.edu

Students are admitted for fall semester only.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan B: Plan B requires 58 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Candidates demonstrate their visual research accomplishments through participation in the MFA thesis exhibition in the Katherine E. Nash Gallery, a supporting paper, and a final oral examination.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The MFA program requires a total of 64 credits. It is typically a three-year program and studio space is provided for a maximum of three consecutive years for the pursuit of appropriate artistic research. MFA candidates plan programs with their advisors with approval of the director of graduate studies. The program requires all coursework be completed by the end of the second year of the program.

In the third year of the MFA program, candidates are required to register for 8 ARTS 8990 credits per semester and a 3-credit thesis research and writing course in the fall.

Candidates must be reviewed annually for progress through the program. At the end of the final year, candidates demonstrate their artistic research accomplishments through participation in the MFA thesis exhibition held in the Katherine E. Nash Gallery, a supporting paper, and a final oral examination.

Seminar Courses

Take the following courses for a total of 6 credits:
- ARTS 8404 - MFA Thesis Research + Writing (3.0 cr)
- ARTS 8403 - MFA Professional Practices and Teaching Pedagogy (3.0 cr)

MFA Critique Seminar

Take ARTS 8410 in the fall of 1st year, the fall of 2nd year, and the spring of 2nd year, for a total of 9 credits (see below)
Take 9 or more credit(s) from the following:
- ARTS 8410 - MFA Critique Seminar (3.0 cr)

Studio Credits

ARTS 8420 and 8450 can be repeated multiple times for credit.
Take 24 or more credit(s) from the following:
- ARTS 8420 - MFA Studio (1.0 - 6.0 cr)
- ARTS 5110 - Advanced Drawing (4.0 cr)
- ARTS 5120 - Advanced Painting (4.0 cr)
- ARTS 5140 - Advanced Printmaking (4.0 cr)
- ARTS 5710 - Advanced Photography (4.0 cr)
- ARTS 5780 - Advanced Super 8 and 16 MM Filmmaking (4.0 cr)
- ARTS 5810 - Advanced Ceramics (4.0 cr)
- ARTS 5850 - Advanced Foundry and Metal Sculpture (4.0 cr)
- ARTS 5860 - Advanced Sculpture (4.0 cr)
- ARTS 5610 - New Media: Making Art Interactive (4.0 cr)
- ARTS 5650 - Advanced Sound Art (4.0 cr)
- ARTS 5670 - Interdisciplinary Media Collaborations (3.0 cr)
- ARTS 5750 - Advanced Narrative Digital Filmmaking (4.0 cr)
- ARTS 5760 - Experimental Film and Video (4.0 cr)
- ARTS 5770 - Animation (4.0 cr)
- ARTS 5890 - 3D Modeling and Digital Fabrication (4.0 cr)
- GCC 5013 - Making Sense of Climate Change - Science, Art, and Agency [CIV] (3.0 cr)

Take 16 or more credit(s) from the following:
- ARTS 8450 - MFA Creative Thesis (1.0 - 9.0 cr)

Theoretical Constructions of Contemporary Art

ARTS 8402 - Theoretical Constructions in Contemporary Art (3.0 cr)

Art Theory or Art History Electives

Take at least 6 credits from outside art to fulfill the art theory or art history course requirements. Courses can be selected from the following departments, or in consultation with the advisor and director of graduate studies.

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 9
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor program in art places major emphasis on creative artistic work of high quality. It promotes not only the conceptual and technical education of the professional artist in their artistic practice, encouraging critical inquiry, excellence, and an understanding of the history of art, but also an experimental approach toward each media. The following media areas are available: ceramics, drawing and painting, photography, printmaking, sculpture, and experimental and media arts.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Required Course
ARTS 8402 - Theoretical Constructions in Contemporary Art (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Coursework is chosen in consultation with the art director of graduate studies.

Electives
Take 6 - 9 credit(s) from the following:
• ART 5xxx
• ART 8xxx

Doctoral
Coursework is chosen in consultation with the art director of graduate studies.

Electives
Take at least 9 credits from the following:
Twin Cities Campus
Asian Literatures, Cultures, and Media M.A.
Asian Languages and Literatures
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of Asian Languages and Literatures, 220 Folwell Hall, 9 Pleasant St SE, Minneapolis, MN 55455 (612-625-6534; fax: 612-624-5513)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The Asian Languages and Literatures Department considers applications only from students seeking the PhD degree; it does not admit students directly to the MA. The MA is offered only as an exit degree or interim credential.

The Asian literatures, cultures, and media (ALCM) program enables students to pursue the study of Asian texts and media, broadly understood. The program encourages work that questions the boundaries of traditional area studies, demands proficiency in the language(s) of concentration, and provides opportunities for students to design a flexible program of study. Students must designate a language of concentration on their ALCM program application form. Currently, students may select Arabic, Chinese, Japanese, Korean, or Hindi/Urdu for their language of concentration. However, it is possible to select another South Asian language with permission of the director of graduate studies. For details, see the graduate program website at www.all.umn.edu.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Only applications from students seeking the PhD degree are considered, although applicants are not required to have taken graduate coursework before entering the program. The MA is offered as an exit degree or interim credential. A bachelor’s degree from an accredited US institution (or its foreign equivalent) is required for admission. Students entering with an MA in a related field will have the appropriate number of credits and courses applied to their program of study (as determined by the director of graduate studies).
Applicants are expected to have a strong academic record from a relevant humanities or social science discipline and at least three years of college-level study in the proposed language of concentration, or a demonstration of comparable linguistic proficiency.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit test score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

**Program Requirements**

**Plan B:** Plan B requires 30 major credits and 0 credits outside the major. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

**Language Requirement:** Advanced knowledge in the chosen language.

A minimum GPA of 3.5 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The MA examination comprises the PhD qualifying examination, which is normally taken at the end of the student's second year in the program. Students entering the program with an MA in a related field can take the qualifying examination after one year of study, with approval of the director of graduate studies.

The final examination consists of the following:
1) written language examination(s), typically an in-room reading/translation examination on materials directly related to study and research interests;
2) an oral presentation and interview discussing the materials that were part of the written examination;
3) submission of two Plan B research papers for evaluation (normally papers from two different classes, revised for submission); and
4) an oral examination (in English) by a faculty committee, based on the submitted papers.

**Required Courses**

- ALL 8001 - Critical Approaches to Asian Literary and Cultural Studies (3.0 cr)
- ALL 8002 - Critical Approaches to Asian Studies (3.0 cr)

**Electives**

- Take 24 or more credit(s) from the following:
- Take 0 - 8 credit(s) from the following:
  - ARAB 4101 - Beginning Arabic I for Graduate Student Research (5.0 cr)
  - ARAB 4102 - Beginning Arabic II for Graduate Student Research (5.0 cr)
  - ARAB 4121 - Intermediate Arabic I for Graduate Student Research (5.0 cr)
  - ARAB 4122 - Intermediate Arabic II for Graduate Student Research (5.0 cr)
  - CHN 4041 - Advanced Readings in Modern Chinese I (4.0 cr)
  - CHN 4042 - Advanced Readings in Modern Chinese II (4.0 cr)
  - CHN 5040 - Readings in Chinese Texts (3.0 cr)

**Seminars and Courses**

Many 8xxx-level CLA seminars can be taken to fulfill the requirements of this degree. Students choose courses in consultation with their advisor. The following list includes frequently taken electives:

- Take 16 - 24 credit(s) from the following:
  - ALL 8xxx
  - ALL 8xxx
  - CSDS 8001 - Basic Research Seminar: Comparative Studies in Discourse and Society I (3.0 cr)
  - CSDS 8002 - Basic Research Seminar in Comparative Studies in Discourse and Society II (3.0 cr)
  - MIMS 8001 - Theories of the Moving Image (3.0 cr)
  - MIMS 8003 - Historiography of the Moving Image (3.0 cr)
  - HIST 5940 - Topics in History (1.0 - 4.0 cr)
  - HIST 5960 - Topics in History (1.0 - 4.0 cr)
  - HIST 8960 - Topics in History (1.0 - 4.0 cr)
  - ARTH 5765 - Early Chinese Art (3.0 cr)
  - ARTH 8710 - Seminar: Islamic Art (3.0 cr)
  - ARTH 8720 - Seminar: East Asian Art (3.0 cr)
  - ARTH 8950 - Seminar: Issues in the History of Art (3.0 cr)
  - GWSS 5490 - Topics: Political Economy and Global Studies (3.0 cr)
  - ANTH 5980 - Topics in Anthropology (3.0 cr)
  - ANTH 8810 - Topics in Sociocultural Anthropology (3.0 cr)

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The MA in Asian studies program is a terminal master's degree designed to accommodate students with a wide range of backgrounds and aspirations. The MA is designed for students who seek to pursue careers in government; nonprofit institutions and social work; law, journalism, business; K-12 and community college education; library and archival work; and translation and interpretation. The degree also prepares students interested in pursuing a doctorate in other graduate programs, including the PhD in Asian literatures, cultures, and media. Completion of the Asian studies MA degree indicates proficiency in one Asian language, and knowledge of the relevant histories, literatures, and cultures of the region.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 30 major credits and 0 credits outside the major. The final exam is written.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: See Other Requirements

A minimum GPA of 3.3 is required for students to remain in good standing.

At least 1 semester must be completed before filing a Degree Program Form.

Language requirements for Plan A and Plan B differ. For Plan A: Intermediate-advanced knowledge in the chosen language, indicated by completion of one of the following courses: ARAB5102, CHN4008, HNUR4006, JPN4006, KOR4006. Other evidence of comparable linguistic proficiency will also be considered.

For Plan B: Intermediate knowledge in the chosen language, indicated by completion of one of the following courses: ARAB4122, CHN4004, CHN4006, HNUR4004, JPN4004, KOR4004. Other evidence of comparable linguistic proficiency will also be considered.

Required Course (3 Credits)

All students must take the following course:
ALL 8001 - Critical Approaches to Asian Literary and Cultural Studies (3.0 cr)

Language Courses

Students may take up to 9 credits from the following list. Courses are selected in consultation with the advisor.
ARAB 4101 - Beginning Arabic I for Graduate Student Research (5.0 cr)
ARAB 4102 - Beginning Arabic II for Graduate Student Research (5.0 cr)
ARAB 4121 - Intermediate Arabic I for Graduate Student Research (5.0 cr)
ARAB 4122 - Intermediate Arabic II for Graduate Student Research (5.0 cr)
ARAB 5040 - Readings in Arabic Texts (3.0 cr)
ARAB 5101 - Advanced Arabic I (4.0 cr)
ARAB 5102 - Advanced Arabic II (4.0 cr)
CHN 4001 - Beginning Modern Chinese I for Graduate Student Research (6.0 cr)
CHN 4002 - Beginning Modern Chinese II for Graduate Student Research (6.0 cr)
CHN 4003 - Intermediate Modern Chinese I for Graduate Student Research (5.0 cr)
CHN 4004 - Intermediate Modern Chinese II for Graduate Student Research (5.0 cr)
CHN 4005 - Accelerated Beginning Modern Chinese for Graduate Student Research (5.0 cr)
CHN 4006 - Accelerated Intermediate Modern Chinese for Graduate Student Research (5.0 cr)
CHN 4007 - Advanced Modern Chinese I for Graduate Student Research (4.0 cr)
CHN 4008 - Advanced Modern Chinese II for Graduate Student Research (4.0 cr)
CHN 4041 - Advanced Readings in Modern Chinese I (4.0 cr)
CHN 4042 - Advanced Readings in Modern Chinese II (4.0 cr)
CHN 5040 - Readings in Chinese Texts (3.0 cr)
CHN 5120 - Topics in Chinese Linguistics (4.0 cr)
CHN 5211 - Introductory Classical Chinese I (3.0 cr)
CHN 5212 - Introductory Classical Chinese II (3.0 cr)
HNUR 4001 - Beginning Hindi-Urdu I for Graduate Student Research (5.0 cr)
HNUR 4002 - Beginning Hindi-Urdu II for Graduate Student Research (5.0 cr)
HNUR 4003 - Intermediate Hindi-Urdu I for Graduate Student Research (5.0 cr)
HNUR 4004 - Intermediate Hindi-Urdu II for Graduate Student Research (5.0 cr)
HNUR 4005 - Advanced Hindi-Urdu I for Graduate Student Research (4.0 cr)
HNUR 4006 - Advanced Hindi-Urdu II for Graduate Student Research (4.0 cr)
HNUR 4015 - Accelerated Beginning Hindi-Urdu for Graduate Research (5.0 cr)
JPN 4001 - Beginning Japanese I for Graduate Student Research (5.0 cr)
JPN 4002 - Beginning Japanese II for Graduate Student Research (5.0 cr)
JPN 4003 - Intermediate Japanese I for Graduate Student Research (5.0 cr)
JPN 4004 - Intermediate Japanese II for Graduate Student Research (5.0 cr)
JPN 4005 - Third Year Japanese I for Graduate Student Research (4.0 cr)
JPN 4006 - Third Year Japanese II for Graduate Student Research (4.0 cr)
JPN 4041 - Advanced Japanese Conversation and Composition I (4.0 cr)
JPN 4042 - Advanced Japanese Conversation and Composition II (4.0 cr)
JPN 5040 - Readings in Japanese Texts (3.0 cr)
KOR 4001 - Beginning Korean I for Graduate Student Research (5.0 cr)
KOR 4002 - Beginning Korean II for Graduate Student Research (5.0 cr)
KOR 4003 - Intermediate Korean I for Graduate Student Research (5.0 cr)
KOR 4004 - Intermediate Korean II for Graduate Student Research (5.0 cr)
KOR 4006 - Third Year Korean II for Graduate Student Research (4.0 cr)
KOR 4041 - Advanced Readings in Modern Korean I (4.0 cr)
KOR 4042 - Advanced Readings in Modern Korean II (4.0 cr)
KOR 5040 - Readings in Korean Texts: North Korean Dialect (3.0 cr)
KOR 5140 - Readings in Sino-Korean Texts (3.0 cr)

Electives
Select courses from the following list, in consultation with the advisor, to complete the Plan A 20-credit minimum or the Plan B 30-credit minimum. Other elective courses may be taken with approval of the advisor and director of graduate studies.

ALL 5xxx
ALL 8xxx
CSDS 8001 - Basic Research Seminar: Comparative Studies in Discourse and Society I (3.0 cr)
CSDS 8002 - Basic Research Seminar in Comparative Studies in Discourse and Society II (3.0 cr)
CL 8910 - Advanced Topics in Comparative Literature (3.0 cr)
MIMS 8001 - Theories of the Moving Image (3.0 cr)
MIMS 8003 - Historiography of the Moving Image (3.0 cr)
HIST 5940 - Topics in Asian History (1.0 - 4.0 cr)
HIST 5960 - Topics in History (1.0 - 4.0 cr)
HIST 8960 - Topics in History (1.0 - 4.0 cr)
ARTH 8720 - Seminar: East Asian Art (3.0 cr)
ARTH 8810 - Seminar: Issues in the History of Art (3.0 cr)
GWSS 5490 - Topics: Political Economy and Global Studies (3.0 cr)
ANTH 5980 - Topics in Anthropology (3.0 cr)
ANTH 8810 - Topics in Sociocultural Anthropology (3.0 cr)

Plan Options
Plan A

Thesis Credits
Plan A students must take 10 master's thesis credits.
ALL 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Integrated BA Asian Languages and Literatures / MA Asian Studies
The Integrated BA/MA Sub-plan is open to University of Minnesota students majoring in Asian languages and literatures who have a GPA of at least 3.5 and are within 30 credits of completing their undergraduate requirements. Preference will go to students who already have a high degree of proficiency in their language of concentration. Interested undergraduates apply for admission to the program in the Spring semester of their junior year, and admission to the sub-plan is contingent on a formal admissions process. Students admitted to the sub-plan must maintain timely degree progress to ensure all undergraduate degree requirements are completed by the end of their fourth year.

Upon admission, students may opt to complete either Plan A (Thesis option) or Plan B (non-thesis option) of the MA degree. Up to 10 graduate credits (5xxx or 8xxx or 4xxx language courses) may be completed in the senior year of undergraduate study. These credits will count towards the students MA requirements and will not double count to their BA. In their fifth year, students complete all remaining MA coursework requirements as well as the final examination or MA thesis (depending on the students choice of plan).
Twin Cities Campus
Audiology Au.D.
Speech-Language-Hearing Sciences
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of Speech-Language-Hearing Sciences, 115 Shevlin Hall, 164 Pillsbury Dr SE, Minneapolis, MN 55455 (612-624-3322; fax: 612-624-7586)

Website: http://www.slhs.umn.edu

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 102
- This program requires summer semesters for timely completion.
- Degree: Doctor of Audiology

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The emphases in the AuD program focus on meeting the standards for licensure as an audiologist. The program emphasizes outcome-based learning activities that prepare graduates to interpret research findings and incorporate them into clinical practice. Coursework and clinical education focus on diagnostic, rehabilitative techniques, technology counseling approaches, and human development. Note that all offers of admission for the AuD program are contingent upon the results of a criminal background check administered by the Minnesota Department of Human Services which will be conducted during the upcoming fall semester.

The doctoral (AuD) education program in audiology at the University of Minnesota - Twin Cities is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850, 800-498-2071 or 301-296-5700.

Accreditation
This program is accredited by the American Speech-Language-Hearing Association (ASHA).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Prerequisite coursework for the Au.D. program includes transcript credit in statistics, social science, and scientific method/inquiry.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
94 credits are required in the major.
8 credits are required outside the major.
This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The AuD is a four-year plan of study for students entering with a background in speech-language-hearing sciences. Students without such a background should expect an additional year of study. In addition to study in the major field, the degree requires 8 related-fields credits. With advisor approval, up to 6 of these outside-major credits may be completed within the department. During the final year, students complete a clinical externship. Summative evaluations will include a written comprehensive examination followed by an oral exam, and a written capstone project that includes an oral presentation and an oral defense of the project.

Audiology Track: Required Courses
SLHS 5401 - Counseling and Professional Issues (3.0 cr)
SLHS 5801 - Advanced Audiologic Assessment (3.0 cr)
SLHS 5802 - Hearing Aids I (3.0 cr)
SLHS 5803 - Pediatric Audiology (3.0 cr)
SLHS 5804 - Cochlear Implants (3.0 cr)
SLHS 5805 - Advanced Rehabilitative Audiology (3.0 cr)
SLHS 5806 - Auditory Processing Disorders (3.0 cr)
SLHS 5807 - Noise and Hearing Conservation (3.0 cr)
SLHS 5808 - Pathophysiology of Hearing Disorders (3.0 cr)
SLHS 8801 - Electrophysiologic Assessment of Auditory Function (3.0 cr)
SLHS 8802 - Hearing Aids II (3.0 cr)
SLHS 8803 - Signals and Systems in Audiology (3.0 cr)
SLHS 8805 - Hearing Science Foundations of Audiology (3.0 cr)
SLHS 8807 - Balance Assessment (3.0 cr)

Audiology Capstone
Take exactly 6 credit(s) from the following:
• SLHS 8806 - Audiology Capstone (1.0 - 6.0 cr)

Clinical Education in Audiology
Take exactly 17 credit(s) from the following:
• SLHS 8820 - Clinical Education in Audiology (1.0 - 8.0 cr)

Audiology Externship
Take exactly 17 credit(s) from the following:
• SLHS 8840 - Audiology Externship (1.0 - 8.0 cr)

Laboratory Module in Audiology
Take exactly 2 credit(s) from the following:
• SLHS 5810 - Laboratory Module in Audiology (1.0 - 2.0 cr)

Clinical Research and Practice: Grand Rounds
Take exactly 4 credit(s) from the following:
• SLHS 5820 - Clinical Research and Practice: Grand Rounds (1.0 - 6.0 cr)

Clinical Foundations in Audiology
Take exactly 2 credit(s) from the following:
• SLHS 5830 - Clinical Foundations in Audiology (1.0 - 8.0 cr)

Directed Research
Take exactly 4 credit(s) from the following:
• SLHS 8994 - Directed Research (1.0 - 12.0 cr)

Related Fields
A minimum of 2 credits must be taken outside of SLHS.
Take 8 or more credit(s) from the following:
• ADDS 5021 - Introduction to Evidence Based Practices and the Helping Relationship (3.0 cr)
• CI 5451 - Teaching Reading in Middle and Secondary Grades (3.0 cr)
• CPSY 4302 - Infant Development (3.0 cr)
• CPSY 4329 - Biological Foundations of Development (3.0 cr)
• CPSY 4341 - Perceptual Development (3.0 cr)
• CPSY 4343 - Cognitive Development (3.0 cr)
• CSPH 5806 - Wellbeing and Resiliency for Health Professionals (1.0 cr)
• CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
• CSPH 5111 - Ways of Thinking about Health (2.0 cr)
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5135 - Human Relations Workshop (4.0 cr)
• EPSY 5400 - Special Topics in Counseling Psychology (1.0 - 4.0 cr)
• EPSY 5415 - Child and Adolescent Development and Counseling (4.0 cr)
• EPSY 5451 - College Students Today (3.0 cr)
• EPSY 5461 - Cross-Cultural Counseling (3.0 cr)
• EPSY 5609 - Family-centered Services (2.0 cr)
• EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
• EPSY 5625 - Introduction to Behavioral Genetics: Introduction (2.0 cr)
• EPSY 5641 - Foundations of Deaf Education (3.0 cr)
• EPSY 5642 - Early Intervention for Infants, Toddlers and Families: Deaf and Hard of Hearing (3.0 cr)
• EPSY 5644 - Early Childhood Language and Literacy Development and Best Practices: Deaf and Hard of Hearing (3.0 cr)
• EPSY 5661 - Introduction to Autism Spectrum Disorder (3.0 cr)
• EPSY 5663 - Assessment and Intervention for Individuals with Autism Spectrum Disorder (3.0 cr)
• EPSY 5668 - Education of Preschool Children With Disabilities: Methods and Materials (3.0 cr)
• GER O 5125 - Gerontology Service Learning (3.0 cr)
• HINF 5501 - US Health Care System: Information Challenges in Clinical Care (1.0 cr)
• KIN 8211 - Seminar: Perception and Action (3.0 cr)
• LING 8921 - Seminar in Language and Cognition (3.0 cr)
• NSCI 5101 - Neurobiology I: Molecules, Cells, and Systems (3.0 cr)
• NSCI 5111 - Medical Neuroscience for Graduate Students (5.0 cr)
• OTOL 8234 - Anatomy of the Head and Neck and Temporal Bone Dissection (2.0 cr)
• OTOL 8247 - Anatom y and Physiology of Hearing and Balance (3.0 cr)
• PHAR 5201 - Applied Medical Terminology (2.0 cr)
• PSY 4036 - Perceptual Issues in Visual Impairment (3.0 cr)
• PSY 4960 - Seminar in Psychology (1.0 - 4.0 cr)
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5037 - Psychology of Hearing (3.0 cr)
• PSY 5054 - Psychology of Language (3.0 cr)
• PSY 5137 - Introduction to Behavioral Genetics (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5960 - Topics in Psychology (1.0 - 4.0 cr)
• PSY 8037 - Psychophysics and Audition (3.0 cr)
• PUBH 6370 - Social Epidemiology (2.0 cr)
• PUBH 6904 - Nutrition and Aging (2.0 cr)
• PUBH 8805 - Sociological Theory in Health Services Research (3.0 cr)
• SPAN 5985 - Sociolinguis tics Perspectives on Spanish in the United States (3.0 cr)
• SLHS 5900 - Topic in Speech-Language-Hearing Sciences (1.0 - 3.0 cr)
• SLHS 8530 - Seminar: Speech (3.0 cr)
• BTHX 5100 - Introduction to Clinical Ethics (3.0 cr)
• CSPH 5807 - Mindfulness in the Workplace: Pause, Practice, Perform (2.0 cr)
• SLHS 5602 - Speech Sound Disorders: Assessment and Treatment across Languages (3.0 cr)
• SLHS 5603 - Assessment and Intervention of Language Disorders in Children (3.0 cr)
• EPSY 8600 - Special Topics: Special Education Issues (1.0 - 3.0 cr)
• FSOS 5942 - Everyday Experiences of Families (2.0 cr)
• FSOS 8101 - Family Stress, Coping, and Adaptation (3.0 cr)
• OLPD 5211 - Introduction to the Undereducated Adult (1.0 cr)
• SOC 4246 - Sociology of Health and Illness (3.0 cr)
• CGSC 8410 - Perspectives in Learning, Perception, and Cognition (2.0 cr)
• CI 5642 - Assessing English Learners (3.0 cr)
• CI 5653 - Methods in Teaching English as a Second Language (ESL) in Higher Education (3.0 cr)
• EPSY 5851 - Engaging Diverse Students and Families (3.0 cr)
• FSOS 4107 - Traumatic Stress and Resilience in Vulnerable Families Across the Lifespan (3.0 cr)
• OLPD 5356 - Disability Policy and Services (3.0 cr)
• PA 5451 - Immigration, Health and Public Policy (3.0 - 4.0 cr)
• PSY 5062 - Cognitive Neuropsychology (3.0 cr)
• PSY 5138 - Adult Development and Aging (3.0 cr)
• PUBH 6055 - Social Inequalities in Health (2.0 cr)
• PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Joint- or Dual-degree Coursework: AuD and PhD in Speech-Language-Hearing Sciences
Student may take a total of 9 credits in common among the academic programs.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 34 to 47
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Classical and Near Eastern Studies (CNES) is an interdisciplinary department that brings together faculty and graduate students who might in other settings be dispersed among a wide range of programs. CNES is dedicated to rigorous philological and literary training and to the conviction that the ancient Mediterranean world is best studied as a diverse but richly integrated cultural whole. The various master's and Ph.D. tracks allow students to concentrate in the area and period that most appeal to them, but students are strongly encouraged to take courses across the entire range of the department's offerings and to develop a broad, multidisciplinary approach to research and teaching. Related special facilities include the Center for Medieval Studies, the Center for Jewish Studies, and the Center for Modern Greek Studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

For the major track in classics, students should have sufficient knowledge to begin graduate reading courses in either Greek or Latin and at least intermediate ability in the other language.

Other requirements to be completed before admission:
In addition to the online University application, applicants must complete the Department of Classical and Near Eastern Studies application on the ApplyYourself site (also available for download on the department website); other supporting materials, including recommendations and a writing sample, can be uploaded directly into the University's online application. For non-native speakers of English, a copy of TOEFL results is required. Students may be admitted in any academic term, but financial assistance is normally available only to applicants admitted for fall semester.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Program Requirements

Plan A: Plan A requires 28 to 31 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 28 to 31 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: A capstone project is required. Two research papers from departmental seminars (numbered 8190 or 8910), as long as the paper receives a grade of B+ or higher and makes substantive use of at least one modern scholarly language other than English.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Translation proficiency exams offered 1x semester.

A minimum GPA of 3.25 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Required Coursework

CNES 5794 - Introduction to Classical and Near Eastern Studies (1.0 cr)

Plan Options

Plan A Requirements
Take at least 10 master's thesis credits.

CNES 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B Requirements
Complete two master's-level research papers, in consultation with the adviser.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Classics
The Classics track provides broad training in the literature of ancient Greece and Rome in its cultural context. Work in Greek and Latin is supplemented by courses in a related field or area of interest. This track requires nearly equal emphasis on courses and seminars in Greek and in Latin.

Both the Plan A and Plan B options require a minimum of 34 course credits. The Plan A also requires 10 master's thesis credits.

Language Requirements: One modern research language as appropriate (normally French, German, or Italian), and reading proficiency in both Greek and Latin as certified by departmental exam based on a set reading list. Final examinations: the final examinations are written (Greek and Latin reading proficiency) and oral (general).

Required Coursework (27 credits)
Take a minimum of 27 Greek and Latin language credits, with at least 15 credits in one language and 12 credits in the other. One 3-credit prose composition course and two 3-credit seminars (one in each language) are required, and can be applied to the 27-credit minimum with approval of the director of graduate studies. No more than two 51xx or 52xx courses can be used to meet this requirement.

Language Courses

GRK 5xxx
GRK 8xxx
LAT 5xxx
LAT 8xxx

Seminar Courses
Take at least one seminar each in Greek and Latin

GRK 8910 - Seminar (3.0 cr)
LAT 8910 - Seminar (3.0 cr)

Prose Composition Course
Take at least one of the following courses:
GRK 5701 - Prose Composition (3.0 cr)
LAT 5701 - Latin Prose Composition (3.0 cr)

Additional Coursework (6 credits)
Take 6 additional credits, selected in consultation with the adviser.

Greek
A core of advanced work in Greek is supplemented by a related field or area of interest. Both the Plan A and Plan B options require a minimum of 37 course credits. The Plan A also requires 10 master's thesis credits. Language Requirements: One modern research language as appropriate, preferably French, German, or Italian, and reading proficiency in Greek as demonstrated by a departmental examination based on a set reading list. Final examinations: the final examinations are written (Greek reading proficiency) and oral (general).

Required Language Coursework (24 credits)
Take a minimum of 24 Greek language credits. One 3-credit prose composition course and two 3-credit seminars are required, and can be applied to the 24-credit minimum with approval of the director of graduate studies. No more than two 51xx or 52xx courses can be used to meet this requirement.

Language Courses
Take at least 15 credits of Greek.
GRK 5xxx
GRK 8xxx

Seminar Courses
Take two seminars for a total of 6 credits. At least one seminar must be GRK 8910.
GRK 8910 - Seminar (3.0 cr)
CNES 8190 - Seminar: Issues in Ancient Art and Archaeology (3.0 cr)

Prose Composition Course
Take the following course for 3 credits:
GRK 5701 - Prose Composition (3.0 cr)

Electives
Select elective credits as needed, in consultation with the adviser, to complete the 31-credit minimum for the major.

Additional Coursework (6 credits)
Take 6 additional credits, selected in consultation with the adviser.

Latin
A core of advanced work in Latin is supplemented by a related field or area of interest. Both the Plan A and Plan B options require a minimum of 37 course credits. The Plan A also requires 10 master's thesis credits. Language Requirements: One modern research language as appropriate, preferably French, German, or Italian, and reading proficiency in Latin as demonstrated by a departmental examination based on a set reading list. Final examinations: the final examinations are written (Latin reading proficiency) and oral (general).

Required Language Coursework (24 credits)
Take a minimum of 24 Latin language credits. One 3-credit prose composition course and two 3-credit seminars are required, and can be applied to the 24-credit minimum with approval of the director of graduate studies. No more than two 51xx or 52xx courses can be used to meet this requirement.

Language Courses
Take at least 15 credits of Latin.
LAT 5xxx
LAT 8xxx

Seminar Courses
Take two seminars for a total of 6 credits. At least one seminar must be LAT 8910.
LAT 8910 - Seminar (3.0 cr)
CNES 8190 - Seminar: Issues in Ancient Art and Archaeology (3.0 cr)

Prose Composition Course
Take the following course for 3 credits:
LAT 5701 - Latin Prose Composition (3.0 cr)

Electives
Select elective credits as needed, in consultation with the adviser, to complete the 31-credit minimum for the major.

Additional Coursework (6 credits)
Take at least 6 additional credits, selected in consultation with the adviser.

Religions in Antiquity
The religions in antiquity track is comparative in both method and content. Although students may focus on a particular religious tradition, they will nonetheless study several ancient religions. Both the Plan A and Plan B require a minimum of 37 course credits. The
Plan A also requires 10 master's thesis credits. Language Requirements: Proficiency in one modern language (usually German) and master's-level proficiency in classical Hebrew, Greek, or Latin as demonstrated by a departmental examination based on a set reading list. Final examinations: the final examinations are written (ancient language reading proficiency) and oral (general).

**Required Core (6 credits)**
Take the following courses for a total of 6 credits:
- RELS 5001 - Theory and Method in the Study of Religion: Critical Approaches to the Study of Religion (3.0 cr)
- RELS 8190 - Comparative Seminar in Religions in Antiquity (3.0 cr)

**Ancient Art and Archaeology Requirement (3 credits)**
Take at least 3 credits from the following:
- ANTH 8004 - Foundations of Anthropological Archaeology (3.0 cr)
- ANTH 8112 - Reconstructing Hominin Behavior (3.0 cr)
- ANTH 8230 - Anthropological Research Design (3.0 cr)
- ANTH 8244 - Interpreting Ancient Bone (4.0 cr)
- ANTH 8510 - Topics in Archaeology (3.0 cr)
- ANTH 5027W - Archaeology of Prehistoric Europe [HIS, WI] (3.0 cr)
- ANTH 5221 - Anthropology of Material Culture (3.0 cr)
- ANTH 5269 - Analysis of Stone Tool Technology (4.0 cr)
- ANTH 5401 - The Human Fossil Record (3.0 cr)
- ANTH 5402 - Zooarchaeology Laboratory (3.0 cr)
- ANTH 5980 - Topics in Anthropology (3.0 cr)
- ANTH 5448 - Applied Heritage Management (3.0 cr)
- ARTH 5xxx

**Distribution Requirement (21 credits)**
Take a minimum of 21 credits, with at least one 3-credit course from three of the following areas, and with the approval of the director of graduate studies. At least four of the courses must involve substantial primary readings in an ancient language (usually Greek, Hebrew, or Latin).

**Hebrew Bible or Ancient Near East**
- CNES 5513W - Scripture and Interpretation in Israelite Religion and Judaism [WI] (3.0 cr)
- RELS 5513W - Scripture and Interpretation in Israelite Religion and Judaism [WI] (3.0 cr)
- JWST 5513W - Scripture and Interpretation (3.0 cr)
- CNES 8513 - Scripture and Interpretation (3.0 cr)

**Greek and Roman Religions**
- CNES 5071 - Greek and Hellenistic Religions (3.0 cr)
- RELS 5071 - Greek and Hellenistic Religions (3.0 cr)

**Ancient Judaism**
- CNES 5204 - The Dead Sea Scrolls (3.0 cr)
- RELS 5204 - The Dead Sea Scrolls (3.0 cr)
- RELS 5504 - Development of Israelite Religion II (3.0 cr)
- HEBR 5300 - Post-Biblical Hebrew: Second Temple Period (3.0 cr)

**New Testament and Early Christianity**
- RELS 5072 - The Birth of Christianity [AH] (3.0 cr)
- CNES 5072 - The Birth of Christianity [AH] (3.0 cr)
- CNES 5188 [Inactive](3.0 cr)
- RELS 5252 [Inactive](3.0 cr)
- GRK 5200 - Biblical Greek (3.0 cr)
- GRK 8400 - Readings in Patristic Greek (3.0 cr)

**Additional Coursework (6 credits)**
Take at least 6 additional credits, selected in consultation with the adviser.

Contact Information:
Department of Classical and Near Eastern Studies, 245 Nicholson Hall, 216 Pillsbury Drive SE, Minneapolis, MN 55455 (612-625-5353; fax: 612-624-4894)
Email: cnes@umn.edu
Website: http://cnes.cla.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Classical and Near Eastern Studies (CNES) is an interdisciplinary department that brings together faculty and graduate students who might in other settings be dispersed among a wide range of programs. CNES is dedicated to rigorous philological and literary training, and to the conviction that the ancient Mediterranean world is best studied as a diverse but richly integrated cultural whole. The various MA and PhD tracks allow students to concentrate in the area and period that most appeal to them, but students are strongly encouraged to take courses across the entire range of the department’s offerings and to develop a broad, multidisciplinary approach to research and teaching.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

For the minor track in classics, students should have sufficient knowledge to begin graduate reading courses in either Greek or Latin and at least intermediate ability in the other language.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: Reading proficiency in either Greek or Latin.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters

Language Options

Classics Option (9 Credits)
Greek
Take at least 3 credits of Greek. GRK 5003 and GRK 5004 are not eligible.

- Length of program in credits: 70 to 71
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Classical and Near Eastern Studies (CNES) is an interdisciplinary department that brings together faculty and graduate students who might in other settings be dispersed among a wide range of programs. CNES is dedicated to rigorous philological and literary training and to the conviction that the ancient Mediterranean world is best studied as a diverse but richly integrated cultural whole. The various Master's and Ph.D. tracks allow students to concentrate in the area and period that most appeal to them, but students are strongly encouraged to take courses across the entire range of the department's offerings and to develop a broad, multidisciplinary approach to research and teaching. Students entering the PhD program with an master's can usually receive credit for some earlier coursework, subject to the approval of the graduate faculty and University requirements. Related special facilities include the Center for Medieval Studies, the Center for Jewish Studies, and the Consortium for the Study of the Pre-Modern World.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
In addition to the online University application, applicants must complete the Department of Classical and Near Eastern Studies application on the ApplyYourself site (also available for download on the department website); other supporting materials, including recommendations and a writing sample, can be uploaded directly into the University's online application. For nonnative speakers of English, a copy of TOEFL results is required. Students may be admitted in any academic term, but financial assistance is normally available only to applicants admitted for fall semester.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Program Requirements
34 to 35 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: German and a second modern research language.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Required Coursework
All students must taken the following 1-credit course:
CNES 5794 - Introduction to Classical and Near Eastern Studies (1.0 cr)

Doctoral Thesis Credits
All students must take at least 24 doctoral thesis credits.
CNES 8888 - Thesis Credits: Doctoral (1.0 - 24.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Classics
The Classics track requires extensive advanced work in both Latin and Greek, together with some study in a related field or area of interest. The program requires nearly equal emphasis on courses and seminars in Greek and in Latin.

Language Requirements: German, plus another modern language, preferably French or Italian, as well as reading proficiency in both Greek and Latin, as demonstrated by a departmental examination based on a set reading list.

Required Language Coursework (24 credits)
Language Courses (21 credits)
Take at least 9 credits of Greek and 9 credits of Latin for a total of 18 credits. Of the 18 credits, at least half must be from Greek or Latin seminar courses (6 seminar credits from one language and 3 seminar credits from the other). In addition, select at least 3 elective credits to complete the 21-credit language course requirement. 51xx and 52xx courses cannot be applied to this requirement.
GRK 5xxx
GRK 8xxx
GRK 8910 - Seminar (3.0 cr)
LAT 8910 - Seminar (3.0 cr)

Prose Composition Course (3 credits)
Take one of the following composition courses for 3 credits:
GRK 5701 - Prose Composition (3.0 cr)
LAT 5701 - Latin Prose Composition (3.0 cr)

Required Art or Archaeology Coursework (3 credits)
Take at least 3 credits from the following course list, or in consultation with the director of graduate studies:
ANTH 8004 - Foundations of Anthropological Archaeology (3.0 cr)
ANTH 8112 - Reconstructing Hominin Behavior (3.0 cr)
ANTH 8230 - Anthropological Research Design (3.0 cr)
ANTH 8244 - Interpreting Ancient Bone (4.0 cr)
ANTH 8510 - Topics in Archaeology (3.0 cr)
ANTH 5027W - Archaeology of Prehistoric Europe [HIS, WI] (3.0 cr)
ANTH 5221 - Anthropology of Material Culture (3.0 cr)
ANTH 5269 - Analysis of Stone Tool Technology (4.0 cr)
ANTH 5401 - The Human Fossil Record (3.0 cr)
ANTH 5402 - Zooarchaeology Laboratory (3.0 cr)
ANTH 5980 - Topics in Anthropology (3.0 cr)
ANTH 5448 - Applied Heritage Management (3.0 cr)
Required Ancient History Coursework (6 credits)
Take at least 6 credits in Ancient History, in consultation with the director of graduate studies.
CNES 5xxx
CNES 8xxx

Electives
Select at least 3 elective credits as needed, in consultation with the advisor, to complete the 34-credit minimum for the major.

Outside Coursework (12 credits)
Take at least 12 credits, selected in consultation with the advisor, to meet the outside credit requirement.

Religions of Antiquity

Required Coursework (9 credits)
Take the following courses for a total of 9 credits:
RELS 8190 - Comparative Seminar in Religions in Antiquity (3.0 cr)
CNES 8513 - Scripture and Interpretation (3.0 cr)
RELS 5001 - Theory and Method in the Study of Religion: Critical Approaches to the Study of Religion (3.0 cr)

Outside Coursework (12 credits)
All students take at least 12 credits outside the major, in consultation with the adviser. Outside coursework should comprise courses in languages or topics outside the primary concentration area, and can include relevant coursework from Anthropology; Art History; English; Gender, Women, & Sexuality Studies; History; Medieval Studies; or Philosophy.
ANTH 5xxx
ANTH 8xxx
ARTH 5xxx
ARTH 8xxx
ENGL 5xxx
ENGL 8xxx
HIST 5xxx
HIST 8xxx
GWSS 5xxx
GWSS 8xxx
PHIL 5xxx
PHIL 8xxx

Concentration Areas
Select one of the two following concentration areas. In addition, select a primary language of competence, and at least one secondary language of competence.

Ancient Near East and Hebrew Bible
This concentration area focuses on the religions, literatures, and cultures of Mesopotamia, Canaan, and Israel from the 2nd millennium BCE to the arrival of Roman rule in the first century BCE. The required primary language is Hebrew. Secondary language options are Aramaic, Akkadian, Ugaritic, or Greek.

Concentration Area Coursework (24 credits)
Courses are chosen from the following list, or in consultation with the adviser, based on concentration area and comparative themes for doctoral examinations.
CNES 5070 - Topics in Ancient Religion (3.0 cr)
CNES 5080 - New Testament Proseminar (3.0 cr)
CNES 8530 - Religions of the Ancient Mediterranean World (3.0 cr)
CNES 8550 - Gender and Body in Ancient Religion (3.0 cr)
CNES 8570 - Readings in Religious Texts (3.0 cr)
HEBR 5200 - Advanced Classical Hebrew (3.0 cr)
RELS 5013W - Biblical Law and Jewish Ethics [WI] (3.0 cr)
ANTH 4049 - Religion and Culture (3.0 cr)
ANTH 5027W - Archaeology of Prehistoric Europe [HIS, WI] (3.0 cr)
ANTH 5446 - Archaeology of Representation as Communication (3.0 cr)
CNES 5204 - The Dead Sea Scrolls (3.0 cr)
CNES 5502 - Ancient Israel: From Conquest to Exile (3.0 cr)
GRK 5200 - Biblical Greek (3.0 cr)
GRK 8400 - Readings in Patristic Greek (3.0 cr)
HEBR 5300 - Post-Biblical Hebrew: Second Temple Period (3.0 cr)
HIST 5053 - Doing Roman History: Sources, Methods, and Trends (3.0 cr)
HIST 5614 - The Medieval Church (3.0 cr)
HIST 8110 - Medieval History: Research Seminar (3.0 cr)
HIST 8930 - Topics in Ancient History (1.0 - 4.0 cr)
LAT 5200 - Advanced Reading in Later Latin (3.0 cr)
Greek and Roman Relgions, Formative Judaism, and Early Christianity
This concentration area focuses on the religions, literatures, and cultures of Greece, Rome and the Mediterranean world, with potential focal points in Egypt, Asia Minor, or Syria-Palestine. It centers on the period from Alexander the Great to Marcus Aurelius, and encompasses Second Temple Judaism and early Christianity, including New Testament literature. The required primary language is Greek or Latin. Secondary language options are Hebrew, Aramaic, Copic, Greek, or Latin.

Concentration Area Coursework (24 credits)
Courses are chosen from the following list, or in consultation with the advisor, based on concentration area and comparative themes for doctoral examinations.

- CNES 5070 - Topics in Ancient Religion (3.0 cr)
- CNES 5080 - New Testament Proseminar (3.0 cr)
- CNES 8530 - Religions of the Ancient Mediterranean World (3.0 cr)
- CNES 8550 - Gender and Body in Ancient Religion (3.0 cr)
- CNES 8570 - Readings in Religious Texts (3.0 cr)
- HEBR 5200 - Advanced Classical Hebrew (3.0 cr)
- RELS 5013W - Biblical Law and Jewish Ethics [WI] (3.0 cr)
- ANTH 4049 - Religion and Culture (3.0 cr)
- ANTH 5027W - Archaeology of Prehistoric Europe [HIS, WI] (3.0 cr)
- ANTH 5446 - Archaeology of Representation as Communication (3.0 cr)
- CNES 5204 - The Dead Sea Scrolls (3.0 cr)
- CNES 5502 - Ancient Israel: From Conquest to Exile (3.0 cr)
- GRK 5200 - Biblical Greek (3.0 cr)
- GRK 8400 - Readings in Patristic Greek (3.0 cr)
- HEBR 5300 - Post-Biblical Hebrew: Second Temple Period (3.0 cr)
- HIST 5053 - Doing Roman History: Sources, Methods, and Trends (3.0 cr)
- HIST 5614 - The Medieval Church (3.0 cr)
- HIST 8110 - Medieval History: Research Seminar (3.0 cr)
- HIST 8930 - Topics in Ancient History (1.0 - 4.0 cr)
- LAT 5200 - Advanced Reading in Later Latin (3.0 cr)

- Program Type: Master's  
- Requirements for this program are current for Fall 2018  
- Length of program in credits: 30  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The MS Cognitive Science program is structured to allow students the flexibility to pursue a wide variety of research topics, and to integrate methodologies and perspectives from different disciplines. In addition to a course that introduces students to the field of Cognitive Science, at least three course credits from each of the following areas are required: cognitive psychology, computer science/artificial intelligence, linguistics, neuroscience and philosophy.

**Program Delivery**  
This program is available:  
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**  
For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**  
**Plan A:** Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 30 major credits and 0 credits outside the major. The final exam is written and oral.

**Plan C:** Plan C requires 30 major credits and 0 credits outside the major. The is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

**Required Course (3 credits)**  
All students must take the following introductory course, or a substitute approved by the director of graduate studies:  
**CGSC 8000** - Seminar: Philosophy of the Cognitive Sciences (3.0 cr)

**Electives (15 credits)**  
Take at least 3 credits from each of the following areas:  
**Cognitive Psychology (3 credits)**  
**PSY 5014** - Psychology of Human Learning and Memory (3.0 cr)
PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
PSY 5062 - Cognitive Neuropsychology (3.0 cr)
PSY 5064 - Brain and Emotion (3.0 cr)
PSY 5137 - Introduction to Behavioral Genetics (3.0 cr)
PSY 8010 - Advanced Topics in Learning (3.0 cr)
PSY 8031 - Seminar: Visual Perception (2.0 cr)
PSY 8036 - Topics in Computational Vision (3.0 cr)
PSY 8055 - Seminar: Cognitive Neuroscience (3.0 cr)
PSY 8056 - Seminar: Psychology of Language (3.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 8 to 9
- Length of program in credits (Doctorate): 14 to 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Cognitive science is broadly concerned with integrating contemporary approaches to the study of mind/brain, and with the systems and processes underlying the acquisition and use of knowledge. The coherence of the program lies in its intellectual focus on cognition. This program spans cellular, behavioral, and psychological levels of scientific analysis in the study of cognition in a single unified graduate program. It integrates the diverse content, methods, and perspectives of a number of different disciplines (e.g., anthropology, biology, artificial intelligence, linguistics, neuroscience, philosophy, and psychology), which are concerned with or in some sense inform our understanding of cognition.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Substitutions for required courses are permitted only with prior permission from the director of graduate studies for cognitive science. Elected courses must be taught by faculty in the minor program or be approved in advance by the director of graduate studies for cognitive science. Courses in the student's major department do not count toward the minor.

Introduction to Cognitive Science
CGSC 8000 - Seminar: Philosophy of the Cognitive Sciences (3.0 cr)
or CGSC 8041 - Cognitive Neuroscience (4.0 cr)
or An appropriate substitute approved by the DGS.

Program Sub-plans
Students are required to complete one of the following sub-plans, Students may not complete the program with more than one sub-plan.

Masters
Major Electives
- Take 5 or more credit(s) from the following:
- CGSC 8xxx

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 63
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Cognitive science is broadly concerned with integrating contemporary approaches to the study of mind/brain, and with the systems and processes underlying the acquisition and use of knowledge. The coherence of the program lies in its intellectual focus on cognition. This program spans cellular, behavioral, and psychological levels of scientific analysis in the study of cognition in a single unified graduate program. It integrates the diverse content, methods, and perspectives of a number of different disciplines (e.g., anthropology, biology, artificial intelligence, linguistics, neuroscience, philosophy, and psychology), which are concerned with or in some sense inform our understanding of cognition. The PhD program trains cognitive scientists to conduct research integrating methodologies and content knowledge from a variety of approaches. In order to ensure an interdisciplinary approach, each student has two co-advisors from the cognitive science graduate faculty, each representing a different discipline from within the cognitive sciences.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Applicants must apply through the University's online application system. They must submit a completed application, scores from the GRE, and three letters of recommendation. Applicants wishing to be considered for financial support should apply no later than December 1 of the preceding academic year. Entry is usually in fall semester but may be permitted in other semesters in exceptional cases.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
39 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The PhD program requires a minimum of 39 credits, in addition to 24 thesis credits.

Students are required to take two core courses with a CGSC designator, as well as 3 credits of independent study related to research.

Responsible Conduct of Research training is required and is integrated into the two core courses taken by all students. Other course requirements are distributed among component disciplines and fields. Courses are intended to provide a foundation for the student's research program. Students are expected to conduct two research projects prior to taking their preliminary written exams. A report on the first-year research project should be concluded by the first term of the second year. A report on the second-year research project should be completed by the second term of the third year. The preliminary written exams will typically be (but are not necessarily) expansions of the first- and second-year research projects. The two PhD written preliminary projects are expected to be of near publishable quality. As entry into the PhD program assumes no previous graduate work, students who enter the program with an MA or other graduate coursework in a cognitive science-related discipline may apply credits from their previous graduate work towards the required 46 credits.

Introduction to Cognitive Science
  CGSC 8000 - Seminar: Philosophy of the Cognitive Sciences (3.0 cr)
  or CGSC 8041 - Cognitive Neuroscience (4.0 cr)
  or An appropriate substitute approved by the DGS.

Major Electives
Students must take at least 3 credits from each of the 5 disciplines listed below and take a total of at least 30 credits.

Cognitive Psychology
Take 3 or more credit(s) from the following:
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
• PSY 5062 - Cognitive Neuropsychology (3.0 cr)
• PSY 5064 - Brain and Emotion (3.0 cr)
• PSY 5137 - Introduction to Behavioral Genetics (3.0 cr)
• PSY 8010 - Advanced Topics in Learning (3.0 cr)
• PSY 8031 - Seminar: Visual Perception (2.0 cr)
• PSY 8036 - Topics in Computational Vision (3.0 cr)
• PSY 8055 - Seminar: Cognitive Neuroscience (3.0 cr)
• PSY 8056 - Seminar: Psychology of Language (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• EPSY 8116 - Reading for Meaning: Cognitive Processes in the Comprehension of Texts (3.0 cr)
• EPSY 8117 - Writing Empirical Paper and Research/Grant Proposals in Education and Psychology (3.0 cr)
• CPSY 8301 - Developmental Psychology: Cognitive Processes (4.0 cr)
• EEB 5322 - Evolution and Animal Cognition (3.0 cr)

Computer Science
Take 3 or more credit(s) from the following:
• CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
• CSCI 5511 - Artificial Intelligence I (3.0 cr)
• CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
• CSCI 5521 - Introduction to Machine Learning (3.0 cr)
• CSCI 5525 - Machine Learning (3.0 cr)
• CSCI 5561 - Computer Vision (3.0 cr)
• CSCI 8115 - Human-Computer Interaction and User Interface Technology (3.0 cr)
• CSCI 8211 - Advanced Computer Networks and Their Applications (3.0 cr)
• CSCI 8442 - Computational Geometry and Applications (3.0 cr)
• CSCI 8551 - Intelligent Agents (3.0 cr)
• CSCI 8725 - Databases for Bioinformatics (3.0 cr)

Linguistics
Take 3 or more credit(s) from the following:
• LING 5001 - Introduction to Linguistics (4.0 cr)
• LING 5201 - Syntactic Theory I (3.0 cr)
• LING 5202 - Syntactic Theory II (3.0 cr)
• LING 5205 - Semantics (3.0 cr)
• LING 5206 - Linguistic Pragmatics (3.0 cr)
• LING 5801 - Introduction to Computational Linguistics (3.0 cr)
• LING 8200 - Topics in Syntax and Semantics (3.0 cr)
• LING 8210 - Seminar in Syntax (3.0 cr)
• LING 8900 - Seminar: Topics in Linguistics (3.0 cr)
• LING 8921 - Seminar in Language and Cognition (3.0 cr)

Neuroscience
Take 3 or more credit(s) from the following:
• NSC 5202 - Theoretical Neuroscience: Systems and Information Processing (3.0 cr)
• NSC 5461 - Cellular and Molecular Neuroscience (4.0 cr)
• NSC 5561 - Systems Neuroscience (4.0 cr)
• NSC 8217 - Systems and Computational Neuroscience (2.0 cr)

Philosophy
Take 3 or more credit(s) from the following:
• PHIL 4615 - Minds, Bodies, and Machines (3.0 cr)
• PHIL 8131 - Epistemology Survey (3.0 cr)
• PHIL 8180 - Seminar: Philosophy of Language (3.0 cr)
• PHIL 8182 - Formal Semantics of Natural Language (3.0 cr)
• PHIL 8620 - Seminar: Philosophy of the Biological Sciences (3.0 cr)
• PHIL 8670 - Seminar: Philosophy of Science (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 31 to 33
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Communication studies focuses on the study of communicative dimensions of human experience using humanistic and social scientific methods. This program prepares students to become researchers and teachers, offering three concentrations: interpersonal communication, rhetorical studies, and critical media studies. Coursework in rhetoric and public discourse studies emphasizes humanistic methods and includes argumentation and persuasion, ethics, rhetorical theory and criticism, and political rhetoric. Students may also pursue special interests in rhetorical philosophies, movements and campaigns, or popular culture and critical theory. The program should be supplemented by coursework outside the department. An understanding of history, political science, sociology, or cultural studies is recommended. Coursework in interpersonal communication has a social scientific orientation. Most students focus on a subarea such as small group, intercultural, interpersonal communication, or problems (e.g., decision making, conflict resolution). Coursework outside the department is usually concentrated in one or more of the behavioral sciences. Students are expected to develop a command of research techniques and a thorough knowledge of statistics. Coursework in critical media studies emphasizes qualitative, historical, critical, and empirical methods and includes television studies, feminist media studies, ethnic and racial minorities in media, critical media literacy, political economy of media, popular culture, environmental communication, and music. Coursework outside the department is usually in the fields of American studies, political science, cultural studies, mass communication, or women's studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
All applicants must have completed at least 15 undergraduate credits in speech or communication courses related to their proposed area of emphasis in the department. A brochure detailing prerequisite requirements is available from the department or from the department website. All prerequisites must be completed before admission.

Special Application Requirements:
Applicants must submit scores from the GRE General Test, transcripts of all post-secondary academic work, and a written statement of academic and occupational objectives. Three letters of recommendation and a writing sample are required of all applicants for assistantships or fellowships.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 144
  - General Test - Analytical Writing: 5

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

**IELTS**
- Total Score: 6.5
**MELAB**
- Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 15 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 21 to 27 major credits and 6 to 12 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** A publishable, article-length paper consisting of the student's original research.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.50 is required for students to remain in good standing.

It is recommended that students pursue a graduate minor to fulfill the requirement of 6 credits outside the Communication Studies major.

**Plan A**

**Major Concentrations**
Student select two concentrations for their master's degree.
Courses are selected in consultation with the Director of Graduate Studies.
Take 15 or more credit(s) from the following:

**Primary Concentration**
Take 6 - 12 credit(s) from the following:
• COMM 5xxx
• COMM 8xxx

**Secondary Concentration**
Take 3 - 9 credit(s) from the following:
• COMM 5xxx
• COMM 8xxx

**Outside the Major -- Related Fields**
Take 6 credits outside Communication Studies for a master's minor or in related fields.

**Thesis Credits**
Take 10 or more credit(s) from the following:
• COMM 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

**Plan B**
Take 27 - 33 credit(s) from the following:

**Major Concentrations**
Students select two concentrations for their master's degree.
Courses are selected in consultation with the Director of Graduate Studies.
Take 21 - 27 credit(s) from the following:

**Primary Concentration**
Take 18 or more credit(s) from the following:
• COMM 5xxx
• COMM 8xxx

**Secondary Concentration**
Take 3 or more credit(s) from the following:
• COMM 5xxx
• COMM 8xxx

Outside the Major -- Related Fields
Take 6-12 credits outside Communication Studies for a master's minor or in related fields.

- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are not admitted to work toward the MA degree. In the event that a PhD student decides not to finish the PhD and is in good standing, that student may apply for a terminal MA.

Comparative literature is the oldest field of literary criticism, dating back to the seventeenth century. Among the wide range of studies currently conducted in comparative literature nationally and internationally, this program focuses on theories of literary criticism and its explanatory bases; indeed the program is seen as one of the principal initiators of such fields of study. This program is likewise engaged in pushing the bounds of critical inquiry in related domains of literary studies, directing much of its energies toward the intersection of literature with other media (in various constellations of word, sound, and image) and of literatures of the global North with those of the global South, engaging problems ranging from narrative to post-colonial studies.

The curriculum emphasizes seminars and directed research. The core requirement is a two-semester Basic Research Seminar (CL 8001-8002) that develops critical and analytic skills, and introduces current theoretical perspectives with the study of historical problems. Each entering graduate student also enrolls in courses that focus on developing skills and experience in teaching and other professional domains. Apart from core courses, many courses are nonrecurring and closely relate to current faculty research. A major portion of coursework for degrees in Comparative Literature is cross-listed with the literature and language departments. Approval may also be given to take graduate courses in such areas as anthropology, art, architecture, history, music, philosophy, political theory, and sociology. In all cases, students should consult their advisors and the director of Graduate Studies concerning course selections.

Program Requirements

**Plan B:** Plan B requires 18 to 24 major credits and 6 to 12 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** One Plan B paper of approximately 40 pages is required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Proficiency in two languages (other than English)

A minimum GPA of 3.50 is required for students to remain in good standing.

**Required Courses**

- **CL 8001 - Basic Research Seminar in Comparative Literature I (3.0 cr)**
- **CL 8002 - Basic Research Seminar in Comparative Literature II (3.0 cr)**

Take 3 or more credit(s) from the following:

- **•CL 8901 - Intro to the Profession: Critical Methods of Research, Pedagogy, and Creative Work in the Humanities (3.0 cr)**

**Major Electives**

Take 9 or more credit(s) from the following:

- **•CL 5xxx**
- **•CL 8xxx**

**Additional Comparative Literature Courses in the Related Minor Field**

Take 6 or more credit(s) from the following:

- **•CL 5xxx**
- **•CL 8xxx**

**Formal Minor or Supporting Program**

Take 6 or more credits in related fields outside Comparative Literature, or in a formal minor in another program (excluding Comparative Studies in Discourse and Society).

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Comparative literature is the oldest field of literary criticism, dating back to the seventeenth century. Among the wide range of studies currently conducted in comparative literature nationally and internationally, this program focuses on theories of literary criticism and its explanatory bases; indeed the program is seen as one of the principal initiators of such fields of study.

This program is likewise engaged in pushing the bounds of critical inquiry in related domains of literary studies, directing much of its energies toward the intersection of literature with other media (in various constellations of word, sound, and image) and of literatures of the global North with those of the global South, engaging problems ranging from narrative to postcolonial studies.

The curriculum emphasizes seminars and directed research. The core requirement is a two-semester Basic Research Seminar (CL 8001-8002) that develops critical and analytic skills and introduces current theoretical perspectives with the study of historical problems. Each entering graduate student also enrolls in courses that focus on developing skills and experience in teaching and other professional domains. Apart from core courses, many courses are nonrecurring and closely relate to current faculty research. A major portion of coursework for degrees in comparative literature is cross-listed with the literature and language departments. Approval may also be given to take graduate courses in such areas as anthropology, art, architecture, history, music, philosophy, political theory, and sociology. In all cases, students should consult with their advisors and the director of Graduate Studies concerning course selections.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Master's
Required Courses
- CL 8001 - Basic Research Seminar in Comparative Literature I (3.0 cr)
- CL 8002 - Basic Research Seminar in Comparative Literature II (3.0 cr)
Electives
Take 3 or more credit(s) from the following:
- CL 5xxx
- CL 8xxx

Doctoral Required Courses
- CL 8001 - Basic Research Seminar in Comparative Literature I (3.0 cr)
- CL 8002 - Basic Research Seminar in Comparative Literature II (3.0 cr)

Electives
Take 6 or more credit(s) from the following:
- CL 5xxx
- CL 8xxx
Twin Cities Campus
Comparative Literature Ph.D.
Cultural Studies & Comparative Literature
College of Liberal Arts

Prerequisites for Admission
The BS and/or MA degree in a humanities or a social science discipline, or other relevant field, is required for admission to the PhD.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
35 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Proficiency in two languages (other than English)

A minimum GPA of 3.50 is required for students to remain in good standing.

Coursework should include a minimum of 12 course credits at the 8xxx-level (excluding CL 8001 and CL 8002).

Required Courses
- **CL 8001** - Basic Research Seminar in Comparative Literature I (3.0 cr)
- **CL 8002** - Basic Research Seminar in Comparative Literature II (3.0 cr)
- **CL 8901** - Intro to the Profession: Critical Methods of Research, Pedagogy, and Creative Work in the Humanities (3.0 cr)

Comparative Literature Electives
With approval of the advisor and the director of Graduate Studies, up to 3 credits of the 15-credit requirement may be taken in the field of the minor or supporting program.

Take 15 or more credit(s) from the following:
- CL 5xxx
- CL 8xxx

Additional Comparative Literature Courses or Courses in a Related Field
Take 11 or more credit(s) from the following:
- CSDS 5xxx
- CSDS 8xxx
- CL 5xxx
- CL 8xxx

Outside the Major in a Supporting Program
Formal Minor Option
Take 12 or more credit(s) from the following:
A formal minor in another graduate program, excluding Comparative Studies in Discourse and Society.

or Supporting Program Option
Take 12 or more credit(s) from the following:
Coursework outside of CSDS, CSCL, or CL courses in a coherent and complementary program to be approved by the advisor and the DGS. This option is for students who do not pursue a formal minor in another program.

Thesis Credits
Take 24 or more credit(s) from the following:
- **CL 8888** - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Comparative Studies in Discourse and Society M.A.
Cultural Studies & Comparative Literature
College of Liberal Arts

Twin Cities Campus

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are not admitted to work toward the MA degree. In the event that a PhD student decides not to finish the PhD and is in good standing, that student may apply for a terminal MA. While most traditional humanistic disciplines tend to focus either on a given mode of discourse (e.g., art history, musicology) or a specific cultural context (e.g., American studies, European languages and literatures), this program engages broader topics: how discourse and cultural production both shape and are shaped by life in time, space, matter, and society. Drawing on a variety of theoretical positions, close attention is paid to various types of discourse, such as music, film, myth, ritual, architecture, landscape and urban design, painting, sculpture, and literature in elite, popular, folk, and mass culture, understanding these as both a site and an instrument of contestation and negotiation among social forces. More generally, the program seeks to re-associate intellectual and cultural history with social and political history, to set discourse of various sorts within a social context, and to consider specific social formations within the ongoing historical process. In all this, the program encourages work that is interdisciplinary (at times, even anti-disciplinary) as well as cross-cultural. The curriculum emphasizes seminars and directed research. The core requirement is a two-semester Basic Research Seminar (CSDS 8001-8002) that develops critical and analytic skills and introduces current theoretical perspectives with the study of historical problems. Each entering graduate student also enrolls in courses that focus on developing skills and experience in teaching and other professional domains. Apart from core courses, many courses are nonrecurring and closely relate to current faculty research. In all cases, students should consult their advisors and the Director of Graduate Studies concerning course selections.

Program Requirements

**Plan B:** Plan B requires 18 to 24 major credits and 6 to 12 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** One Plan B paper of approximately 40 pages is required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Proficiency in two languages (other than English)

A minimum GPA of 3.50 is required for students to remain in good standing.

MA Plan B degree requirements: students are not admitted to work toward the MA degree. In the event that a PhD student decides not to finish the PhD and is in good standing, that student may apply for a terminal MA.

Students are advised to check the program website indicated above for updated information.

**Required Courses**

Take the following courses for a total of 9 credits:
- **CSDS 8001** - Basic Research Seminar: Comparative Studies in Discourse and Society I (3.0 cr)
- **CSDS 8002** - Basic Research Seminar in Comparative Studies in Discourse and Society II (3.0 cr)
- **CSDS 8901** - Intro to the Profession: Critical Methods of Research, Pedagogy, and Creative Work in the Humanities (3.0 cr)

**Major Electives**

Select major electives in consultation with the advisor.

Take 9 or more credit(s) from the following:
- CSDS 5xxx
- CSDS 8xxx

**Additional Coursework**

Take at least 6 credits, in consultation with advisor, of courses within or outside CSDS.
- CSDS 5xxx
- CSDS 8xxx

**Outside Coursework**

Take at least 6 credits of related fields coursework, either outside of CSDS or as a formal minor (excluding comparative literature).

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 45
• This program does not require summer semesters for timely completion.
• Degree: Master of Fine Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The creative writing program in the Department of English offers the master of fine arts (MFA) degree for students committed to pursuing the writing life. This three-year degree provides advanced, graduate-level coursework in writing, language, and literature, as well as study in a related field. The third year of the program focuses on the final development of a book-length manuscript suitable for publication. At the heart of the program are writing workshops in poetry, fiction, and literary nonfiction, and courses in the "Reading as Writers" and "Topics in Advanced Writing" series, which enable writers to explore a variety of issues relating to contemporary themes in American and world literature. The program encourages experimentation across genres, fostering the discovery of new and varied forms for a developing voice. Students also have the opportunity to work editorially on "Great River Review," the graduate literary magazine.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The program does not require a graduate degree for admission.

Special Application Requirements:
The MFA in Creative Writing does not require undergraduate work in English literature or an undergraduate degree in literature. Students come from a variety of educational backgrounds and life experiences. Applicants should be aware, however, that graduate coursework in literature and/or language is required once admitted to the program.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

Information current as of August 31, 2018
Program Requirements

**Plan C:** Plan C requires 42 major credits and 3 credits outside the major. The is no final exam. A capstone project is required.

**Capstone Project:** The capstone project is a publishable thesis manuscript of poetry, fiction, or literary nonfiction. The final exam is an oral defense of the thesis manuscript and literary essay.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The MFA requires 45 credits distributed over a three-year period, culminating in a book-length manuscript suitable for publication, an MFA literary essay, and an MFA defense.

**Required Courses**

- **ENGW 8101 - Reading Across Genres (4.0 cr)**
- **ENGW 8180 - Thesis Seminar: Multi-Genre (4.0 cr)**

Take exactly 4 credit(s) from the following:
- **ENGW 8990 - MFA Creative Thesis (2.0 - 8.0 cr)**

**Workshop Electives**

Take at least 12 credits from the following:
- **ENGW 4205 - Screenwriting (3.0 cr)**
- **ENGW 5102 - Graduate Fiction Writing (4.0 cr)**
- **ENGW 5104 - Graduate Poetry Writing (4.0 cr)**
- **ENGW 5106 - Graduate Literary Nonfiction Writing (4.0 cr)**
- **ENGW 5130 - Topics: Graduate Creative Writing (4.0 cr)**
- **TH 4115 - Intermediate Playwriting (3.0 cr)**

**Creative Writing Electives**

Take exactly 4 credit(s) from the following:
- **ENGW 4xxx**
- **ENGW 5xxx**
- **ENGW 8xxx**

**Seminar Elective**

- **ENGW 8110 - Seminar: Writing of Fiction (4.0 cr)**
- **ENGW 8120 - Seminar: Writing of Poetry (4.0 cr)**
- **ENGW 8130 - Seminar: Writing of Literary Nonfiction (4.0 cr)**

**Literature Language Electives**

Take 3 or more credit(s) from the following:
- **ENGL 5xxx**
- **ENGL 8xxx**
- **ENGL 5701 - Great River Review (4.0 cr)**
- **ENGW 5701 - Great River Review (4.0 cr)**

**Other Literature Language Electives**

Take 7 or more credit(s) from the following:
- **ENGW 5310 - Reading as Writers (4.0 cr)**
- **ENGW 5130 - Topics: Graduate Creative Writing (4.0 cr)**
- **ENGW 8110 - Seminar: Writing of Fiction (4.0 cr)**
- **ENGW 8120 - Seminar: Writing of Poetry (4.0 cr)**
- **ENGW 8130 - Seminar: Writing of Literary Nonfiction (4.0 cr)**
- **ENGL 5xxx**
- **ENGL 8xxx**

**Outside the Major or in a Supporting Program**

Any graduate level course for 3 credits outside the English Department (not ENGW or ENGL).

• Program Type: Graduate free-standing minor
• Requirements for this program are current for Fall 2018
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This structured interdisciplinary doctoral minor is offered in conjunction with the Interdisciplinary Center for the Study of Global Change (ICGC). By focusing on the social bases of change in the global south, the program engages a wide range of academic disciplines, including the social sciences, humanities, and biological sciences. The minor focuses on three areas: 1) the relationships between macroscopic processes of political, economic, and social change, and the microscopic conditions of lived experience in the global south; 2) specifically interdisciplinary perspectives (encompassing the social sciences, the biological sciences, and the humanities) on this general thematic concern; and 3) preparation of doctoral students for research on the global south.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission is contingent upon prior admission to a doctoral degree-granting program at the University and upon affiliation with ICGC.

Special Application Requirements:
Students enrolled in a doctoral degree-granting program may apply for the minor at any time during the academic year; acceptance will take effect the following term. Students must be officially in the minor prior to taking their preliminary oral examination.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Doctoral
Required Courses
DSSC 8111 - Approaches to Knowledge and Truth: Ways of Knowing in Development Studies and Social Change (3.0 cr)
DSSC 8112 - Scholarship and Public Responsibility (1.0 cr)
DSSC 8211 - Doctoral Research Workshop in Development Studies and Social Change (2.0 cr)
DSSC 8212 - Doctoral Research Workshop in Development Studies and Social Change (1.0 cr)
Take 2 or more credit(s) from the following:
DSSC 8310 - Topics in Development Studies and Social Change (1.0 - 3.0 cr)

Electives
Students are required to take a minimum of 3 credits from outside their own department or program. This list is intended only as a guide; other graduate courses may qualify as electives for the DSSC minor upon approval by the minor program director of Graduate Studies. The program for an individual student will be developed in consultation among the student, the major advisor, and the director or associate director of Graduate Studies in Development Studies and Social Change.

Take 3 or more credit(s) from the following:

**Afro-American Studies**
- AFRO 5101 - Seminar: Introduction to Africa and the African Diaspora (3.0 cr)
- AFRO 5103 - World History and Africa (3.0 cr)
- AFRO 5120 - Social and Intellectual Movements in the African Diaspora (3.0 cr)
- AFRO 5191 - Seminar: The African American Experience in South Africa (3.0 cr)
- AFRO 5876 [Inactive] (3.0 cr)
- AFRO 5910 - Topics in African American and African Studies (2.0 - 4.0 cr)

Early Modern Studies Minor

History Department
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Email: emsdbgs@umn.edu
Website: http://www.cemh.umn.edu/minor

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 7
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The early modern studies (EMS) minor is available to master's and doctoral students. The program encourages inquiry into the early modern period, roughly 1300 to 1800 A.C.E., using insights and perspectives from multiple disciplines. The minor provides graduate students with solid grounding in the theories and multi-disciplinary methods used by scholars studying the early modern period, particularly through the required core seminar (EMS 8250 - Seminar in EMS: Current Research and Methodologies), which is co-taught by professors from two distinct departments.

The minor also offers an opportunity to interact with the current research of visiting scholars and University of Minnesota faculty and graduate students through EMS 8100 - Workshop in Early Modern Studies, in which students share written responses to workshops and lectures on campus. Finally, the minor draws electives from existing courses in departments across the College of Liberal Arts, as well as those in the History of Science, Technology, and Medicine. The University of Minnesota has numerous library collections and research centers which include a focus on the early modern period. For more information on the minor, visit www.cemh.umn.edu/minor.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Admission to the early modern studies graduate minor is contingent upon prior admission to a master's or doctoral degree-granting program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Required Courses
EMS 8250 - Seminar in Early Modern Studies (3.0 cr)
Students are required to enroll in EMS 8100 for 1 credit worth of workshop experience.
Take 1 or more credit(s) from the following:
- EMS 8100 - Workshop in Early Modern Studies (1.0 - 3.0 cr)
Elective Credits
Take 3 or more credit(s) from the following:

- EMS 5500 - Topics in Early Modern Studies (3.0 cr)
- EMS 8500 - Topics in Early Modern Studies (3.0 cr)
- EMS 8993 - Directed Study (1.0 - 6.0 cr)

*These electives can apply towards the minor. Not all courses are offered every semester.

- ARTH 5301 - Visual Culture of the Atlantic World (3.0 cr)
  or ARTH 5302 (Inactive) (3.0 cr)
  or ARTH 5324 - 15th-Century Painting (3.0 cr)
  or ARTH 5335 - Baroque Rome: Art and Politics in the Papal Capital (3.0 cr)
  or ARTH 5777 - The Diversity of Traditions: Indian Art 1200 to Present (3.0 cr)
  or ARTH 5781 - Age of Empire: The Mughals, Safavids, and Ottomans (3.0 cr)

Doctoral

Required Courses
EMS 8250 - Seminar in Early Modern Studies (3.0 cr)

Students are required to enroll in the following course for 3 credits, either all at once, or split between separate semesters:

Take 3 or more credit(s) from the following:

- EMS 8100 - Workshop in Early Modern Studies (1.0 - 3.0 cr)

Elective Credits
Take 6 or more credit(s) from the following:

- EMS 5500 - Topics in Early Modern Studies (3.0 cr)
- EMS 8500 - Topics in Early Modern Studies (3.0 cr)
- EMS 8993 - Directed Study (1.0 - 6.0 cr)

*These electives can apply towards the minor. Not all courses are offered every semester.

- ARTH 5301 - Visual Culture of the Atlantic World (3.0 cr)
  or ARTH 5302 (Inactive) (3.0 cr)
  or ARTH 5324 - 15th-Century Painting (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are admitted only for the PhD in economics; the MA is an optional part of the PhD program.

The economics graduate program offers degree work in both theoretical and applied fields of economics. It is possible to pursue thesis research in microeconomic or macroeconomic theory. In addition, the following fields of specialization are offered: econometrics, economic growth and development, financial economics, game theory, industrial organization, international economics, labor economics, mathematical economics, monetary economics, and public economics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written. A capstone project is required.
Capstone Project: Two Plan B projects consisting of research papers or literature reviews are required; the PhD written preliminary exams required in two fields outside of economic theory ("field exams") may be used to satisfy either or both of the Plan B projects. Because the standards used to judge whether a preliminary exam has satisfied the requirement for the MA are less rigorous than those for the PhD, students may qualify for the master's Plan B without having satisfied all requirements for the PhD written preliminary exams.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

Director of graduate studies approval is required for inclusion of any 4xxx-level coursework.

Required Core Courses (16 Credits)
Take the following courses for 16 credits:
- ECON 8101 - Microeconomic Theory (2.0 cr)
- ECON 8102 - Microeconomic Theory (2.0 cr)
- ECON 8103 - Microeconomic Theory (2.0 cr)
- ECON 8104 - Microeconomic Theory (2.0 cr)
ECON 8105 - Macroeconomic Theory (2.0 cr)
ECON 8106 - Macroeconomic Theory (2.0 cr)
ECON 8107 - Macroeconomic Theory (2.0 cr)
ECON 8108 - Macroeconomic Theory (2.0 cr)

**Economics Electives (8 Credits)**
Select at least 8 credits of electives in consultation with the director of graduate studies.
ECON 5xxx
ECON 8xxx

**Outside Coursework (6 Credits)**
Take at least 6 credits outside the major. Courses are selected in consultation with the director of graduate studies.

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The economics graduate program offers degree work in both theoretical and applied fields of economics. It is possible to pursue thesis research in microeconomic or macroeconomic theory. In addition, the following fields of specialization are offered: econometrics, economic growth and development, financial economics, game theory, industrial organization, international economics, labor economics, mathematical economics, monetary economics, and public economics.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Coursework must be selected in consultation with the Economics director of graduate studies. All courses must be taken A-F and completed with grades of B or better (one 8xxx-level course may carry a grade of C). Option 2 is for master's-level students whose previous work in economics courses, in the judgement of the Economics director of graduate studies, has included coursework equivalent to the 4xxx-level economic theory courses.

Advanced Economic Theory Requirement
Option 1
Take 4 or more credits from the following (or from the 8-xxx theory sequences in the doctoral minor):

Microeconomic Analysis Sequence
ECON 4161 - Microeconomic Analysis I (2.0 cr)
ECON 4162 - Microeconomic Analysis II (2.0 cr)
ECON 4163 - Microeconomic Analysis (2.0 cr)
ECON 4164 - Microeconomic Analysis (2.0 cr)
Macroeconomic Analysis Sequence
- ECON 4165 - Macroeconomic Theory (2.0 cr)
- ECON 4166 - Macroeconomic Theory (2.0 cr)
- ECON 4167 - Macroeconomic Theory (2.0 cr)
- ECON 4168 - Macroeconomic Theory (2.0 cr)

Additional Electives
Take 2 or more credit(s) from the following:
- ECON 4xxx
- ECON 5xxx
- ECON 8xxx

or Option 2
For students whose previous work in economic theory, in the judgement of the Economics director of graduate studies, satisfies the theory sequence requirement. Option 2 students instead take economics electives chosen in consultation with the director of graduate studies.
Take 6 or more credit(s) from the following:
- ECON 4xxx
- ECON 5xxx
- ECON 8xxx

Doctoral
All courses must be selected in consultation with the Economics director of graduate studies.

Sequence Requirement
Take 8 credits from the following:

Microeconomic Theory Sequence
- ECON 8101 - Microeconomic Theory (2.0 cr)
- ECON 8102 - Microeconomic Theory (2.0 cr)
- ECON 8103 - Microeconomic Theory (2.0 cr)
- ECON 8104 - Microeconomic Theory (2.0 cr)

Macroeconomic Theory Sequence
- ECON 8105 - Macroeconomic Theory (2.0 cr)
- ECON 8106 - Macroeconomic Theory (2.0 cr)
- ECON 8107 - Macroeconomic Theory (2.0 cr)
- ECON 8108 - Macroeconomic Theory (2.0 cr)

Electives
Take 4 or more credit(s) from the following:
- ECON 8xxx
Twin Cities Campus
Economics Ph.D.
Economics
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 62
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The economics graduate program offers degree work in both theoretical and applied fields of economics. It is possible to pursue thesis research in microeconomic or macroeconomic theory. In addition, the following fields of specialization are offered: econometrics, economic growth and development, financial economics, game theory, industrial organization, international economics, labor economics, mathematical economics, monetary economics, and public economics.

Students are admitted only for the PhD; the MA is an optional part of the PhD program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Special Application Requirements:
Coursework in linear algebra and multivariate calculus is required for admission to the Ph.D. program.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Quantitative Reasoning: 159

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Speaking Score: 23
- IELTS
  - Total Score: 7
- MELAB

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
16 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.
This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.20 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

Emphasis in all aspects of the program is on careful development of the theoretical basis for the work, whether the work is theoretical or applied, and whether the relevant theory is drawn from economics, econometrics, mathematics, statistics, or other related disciplines.

Before undertaking research for a doctoral thesis, the student must pass written preliminary exams in micro- and macroeconomic theory, plus in two of the fields listed under the curriculum section above. The number of courses taken to help students prepare for the preliminary examinations is determined through consultation with the student's advisor.

**Required Core Courses**
Take the following courses for 16 credits:
- ECON 8101 - Microeconomic Theory (2.0 cr)
- ECON 8102 - Microeconomic Theory (2.0 cr)
- ECON 8103 - Microeconomic Theory (2.0 cr)
- ECON 8104 - Microeconomic Theory (2.0 cr)
- ECON 8105 - Macroeconomic Theory (2.0 cr)
- ECON 8106 - Macroeconomic Theory (2.0 cr)
- ECON 8107 - Macroeconomic Theory (2.0 cr)
- ECON 8108 - Macroeconomic Theory (2.0 cr)

**Economics Electives**
These courses are optional
Take 0 or more credit(s) from the following:
- ECON 8xxx

**Outside Coursework**
Take at least 12 credits outside the major. Courses are chosen in consultation with the director of graduate studies.

**Thesis Credits**
Take exactly 24 credit(s) from the following:
- ECON 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Over the past 20 years, the field of English studies has changed dramatically from a discipline concerned with studying the literary works produced by English speakers in Britain and the United States to encompass writings in English from around the globe. The concerns of literary scholars have broadened to include not only textual analyses but also cultural, social, political, and economic contexts. The field of literature itself now encompasses not only the traditional genres of poetry, prose (fiction and belles-lettres), and drama, but also extra-literary discourses: popular culture, film, television, legal documents, conduct books, and manifestos. The Department of English has been in the forefront of interdisciplinary projects, thanks to the efforts of a faculty committed to research in American studies, medieval studies, feminist studies, film studies, and cultural studies. At the same time, the department maintains the core concerns of the discipline—the traditional study of the literatures and languages in English—as well as develops writers for the present and future through the master of fine arts in creative writing degree. The department is engaged in two simultaneous projects: to preserve the core curriculum and to re-imagine its future shape.

The department offers a master of arts in English language and literature. The MA offers training in the areas of literary history, literary theory and interpretation, language, linguistics, rhetoric, and composition. Students in the MA can develop specific concentrations through consultation with the director of graduate studies.

Course requirements for the MA program are broadly defined, allowing the student to shape a personal program of study. The English program encourages and supports interdisciplinary work.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
A minimum of four courses in English, three of which must be at the upper-division level, is required for degree program admission. The courses should be widely distributed.

Special Application Requirements:
Required admission materials include three letters of recommendation; scores from the General Test of the GRE; a short essay explaining scholarly, professional, and personal goals and reason(s) for choosing the University of Minnesota; and a writing sample, such as a course paper. Candidates for all degrees are admitted fall semester only; all materials must be received by December 1st.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 164

International applicants must submit score(s) from one of the following tests:

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
• TOEFL
  - Internet Based - Total Score: 105
  - Paper Based - Total Score: 620
• IELTS
  - Total Score: 7.5
• MELAB
  - Final score: 88

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is made up of three Plan B papers. Each is a tightly argued essay of about 5,000 words, usually a reworking of a paper done originally for a course.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: A reading knowledge of one language.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Courses

ENGL 5001 - Ph.D. Colloquium: Introduction to Literary Theory and Literary Studies in the Modern University (3.0 cr)

Major Electives

Emphases are chosen in consultation with the student's advisor and the Director of Graduate Studies.

Take 21 or more credit(s) from the following:

Emphasis One
Take 9 - 12 credit(s) from the following:
• ENGL 5xxx
• ENGL 8xxx

Emphasis Two
Take 9 - 12 credit(s) from the following:
• ENGL 5xxx
• ENGL 8xxx

Outside the Major -- Related Fields

Take 6 or more credits outside the program, in consultation with the Director of Graduate Studies.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Doctorate): 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate minor program in Feminist and Critical Sexuality Studies is located in the Department of Gender, Women, and Sexuality Studies (GWSS). The feminist and critical sexuality studies minor is a supplementary program for graduate students already admitted to the University of Minnesota and enrolled in another graduate program. The minor is designed for students with widely flexible interests and academic aims looking for advanced graduate academic training in feminist and critical sexuality studies. The program is also designed to provide an interdisciplinary graduate program in GLBTQ studies. Students must apply for special admission through the program. Application instructions and materials are available at https://cla.umn.edu/gwss/graduate/degree-programs/graduate-minor-feminist-and-critical-sexuality-studies

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Students must apply to the feminist and critical sexuality studies minor for admission by submitting a letter of interest to the director of graduate studies that demonstrates a clear relationship between the focus and objectives of their doctoral research and the goals, curriculum, and scholarly resources of the minor.
Since the emphasis of the graduate minor is interdisciplinary, a focus or strong interest in such work is preferred.
A prerequisite undergraduate major or minor in gender, women and/or GLBTQ/sexuality studies is not required for admission, but preferable. Applicants are expected to demonstrate general knowledge of this relevant scholarship in some combination of previous coursework, research and writing, and/or organizational activity/experience.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctoral
Feminist Theories and Methods
GWSS 8108 - Genealogies of Feminist Theory (3.0 cr)
or GWSS 8109 - Feminist Knowledge Production (3.0 cr)
Electives
Graduate minors must take four elective courses approved for FCSS minor, which may include 5000-8000 level courses in Gender, Women, and Sexuality Studies or 5000-8000 level courses in other departments. At least one of these graduate level courses must be taken inside the GWSS Department and at least one of these graduate courses must be taken outside the GWSS Department, preferably in the students home department. Consult the director of graduate studies to see if your courses qualify.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The MA is available only to students admitted to the feminist studies PhD program who wish to secure a Plan B MA along the way to obtaining a PhD. This credential is helpful for ABD employment purposes or for students who must exit the program. It is similar to the PhD milestones but does not require a dissertation.

The PhD program in feminist studies is designed to help students develop a high level of competence in feminist theories, research methods, interdisciplinarity, and pedagogies. The program is especially strong on feminist theory and issues related to women’s diversity, nationally and globally. To guarantee a high level of interdisciplinary exchange, the program is designed to bring feminist studies doctoral students together with graduate minor students who are pursuing a disciplinary specialty in their own home department. The program’s interdisciplinary curriculum emphasizes the interaction of social conditions such as class, ethnicity, race, sexualities, and national identity with gender. These interactions and their effects are examined in cultural productions such as media representations or colonialist paradigms in social systems and relations of power; in aspects of science such as genetics and new technologies; in epistemologies and philosophy; in professional areas such as health care to public policy; and in social, political, and environmental justice studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 28 major credits and 6 credits outside the major. The final exam is written and oral.
This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

**Required Core Courses and Colloquia**

**Required Core**
- GWSS 8108 - Genealogies of Feminist Theory (3.0 cr)
- GWSS 8109 - Feminist Knowledge Production (3.0 cr)
- GWSS 8103 - Feminist Theories of Knowledge (3.0 cr)

**Colloquia Credits**
- Take 4 or more credit(s) from the following:
  - GWSS 8996 - Feminist Studies Colloquium (1.0 cr)

**GWSS Seminars**
- Take 6 or more credit(s) from the following:
  - GWSS 8210 - Seminar: Feminist Theory & Praxis (3.0 cr)
  - GWSS 8220 - Seminar: Science, Technology & Environmental Justice (3.0 cr)
  - GWSS 8230 - Seminar: Cultural Criticism and Media Studies (3.0 cr)
  - GWSS 8490 - Seminar: Transnational, Postcolonial, Diaspora (3.0 cr)
  - GWSS 8250 - Seminar: Nation, State, and Citizenship (1.0 - 3.0 cr)
  - GWSS 8260 - Seminar: Race, Representation and Resistance (3.0 cr)
  - GWSS 8270 - Seminar: Theories of Body (3.0 cr)
  - GWSS 8103 - Feminist Theories of Knowledge (3.0 cr)
  - GWSS 5104 - Transnational Feminist Theory (3.0 cr)
  - GWSS 5406 - Black Feminist Thought in the American and African Diasporas (3.0 cr)

**Research Methods & Tools**
- Take at least 6 research methods & tools credits from the list below, or chosen in consultation with the director of graduate studies. Up to 6 of these credits can be applied to the 6-credit requirement for outside coursework.
- Take 0 - 6 credit(s) from the following:
  - GWSS 8201 - Feminist Theory and Methods in the Social Sciences (3.0 cr)

**GWSS Electives**
- Take additional GWSS courses as necessary to meet the 28-credit minimum for the major.
- Take 0 - 6 credit(s) from the following:
  - GWSS 5xxx
  - GWSS 8xxx

**Outside Coursework**
- Take at least 6 credits outside the major.

- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The PhD program in feminist studies is designed to help students develop a high level of competence in feminist theories, research methods, interdisciplinarity, and pedagogies. The program is especially strong on feminist theory and issues related to women's diversity, nationally and globally. To guarantee a high level of interdisciplinary exchange, the program is designed to bring feminist studies doctoral students together with graduate minor students who are pursuing a disciplinary specialty in their own home department. The program's interdisciplinary curriculum emphasizes the interaction of social conditions such as class, ethnicity, race, sexualities, and national identity with gender. These interactions and their effects are examined in cultural productions such as media representations or colonialist paradigms in social systems and relations of power; in aspects of science such as genetics and new technologies; in epistemologies and philosophy; in professional areas such as health care to public policy; and in social, political, and environmental justice studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

A MA in gender, women, and/or sexuality studies or a related field will be considered important, but is not required.

Other requirements to be completed before admission:
Preference is given to students with academic training or an undergraduate degree in gender, women, and/or sexuality studies or a related field. Extensive political work in these areas will also be considered important but not required.

Special Application Requirements:
Applicants for the Ph.D. program must submit scores from the General (Aptitude) Test of the GRE, three letters of recommendation, a writing sample, a current curriculum vitae, and a clearly written statement of career interests, goals, and objectives by electronic application through the Graduate Office (Apply Yourself). Graduate study in the program begins in the fall semester following admission. The application deadline is December 1; all applications are evaluated once each year in December.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
20 to 22 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

The course and credit requirements for the PhD fall into roughly two categories: interdisciplinary courses satisfying core requirements, and courses constituting or enhancing a concentration.

Students are expected to participate in the department colloquium series of faculty, student, and guest lecturer presentations.

Interdisciplinary Core and Required Courses

Required Core
GWSS 8108 - Genealogies of Feminist Theory (3.0 cr)
GWSS 8109 - Feminist Knowledge Production (3.0 cr)
GWSS 8107 - Feminist Pedagogies (3.0 cr)
GWSS 8997 - Dissertation Seminar (1.0 - 3.0 cr)

Colloquia Credits
Take 4 or more credit(s) from the following:
• GWSS 8996 - Feminist Studies Colloquium (1.0 cr)

GWSS Seminars
Take 6 or more credit(s) from the following:
• GWSS 8210 - Seminar: Feminist Theory & Praxis (3.0 cr)
• GWSS 8220 - Seminar: Science, Technology & Environmental Justice (3.0 cr)
• GWSS 8230 - Seminar: Cultural Criticism and Media Studies (3.0 cr)
• GWSS 8490 - Seminar: Transnational, Postcolonial, Diaspora (3.0 cr)
• GWSS 8250 - Seminar: Nation, State, and Citizenship (1.0 - 3.0 cr)
• GWSS 8260 - Seminar: Race, Representation and Resistance (3.0 cr)
• GWSS 8270 - Seminar: Theories of Body (3.0 cr)
• GWSS 8103 - Feminist Theories of Knowledge (3.0 cr)
• GWSS 5104 - Transnational Feminist Theory (3.0 cr)
• GWSS 5406 - Black Feminist Thought in the American and African Diasporas (3.0 cr)

Research Methods & Tools
Take at least 6 Research Methods & Tools credits from the list below, or chosen in consultation with the director of graduate studies. Up to 6 of these credits can be applied to the 12-credit requirement for outside coursework.
Take 0 - 6 credit(s) from the following:
• GWSS 8201 - Feminist Theory and Methods in the Social Sciences (3.0 cr)

Outside Coursework
Take at least 12 credits outside the major. Courses are chosen in consultation with the director of graduate studies.

Thesis Credits
Take 24 or more credit(s) from the following:
• GWSS 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The French program, which offers MA and PhD degrees, covers all areas of French literature and culture from the Middle Ages to the present. Traditional areas of study and scholarship are inflected by the faculty's interests, expertise, and research in areas that are shaping the discipline of French studies. The program, which fosters interdisciplinary research, has particular strengths in literary and cultural studies, critical theory, feminist studies, medieval studies, cinema studies, and francophone studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Applicants must submit three letters of recommendation from persons familiar with their scholarship and research potential, a complete set of official transcripts, a sample of their academic writing, evidence of spoken French proficiency (audio sample or phone interview), and a written statement of research interests and goals. International student applicants should also submit scores for the TOEFL or equivalent English proficiency testing program. The program offers funding packages of five years for those admitted at the MA level. Submission of all application materials by January 10 ensures consideration for other fellowships and graduate instructorships for the next academic year. New teaching assistants and fellowship recipients are only admitted for fall semester; others may be admitted in mid-year.

Special Application Requirements:
A B.A. in French (or equivalent), with a literary emphasis, is required for the M.A. programs. Applicants have generally completed at least 18 credits in French literature and culture. Prospective students whose undergraduate degree is in another field, but who have taken substantial coursework in French and are strongly motivated to pursue literary studies, are invited to contact the director of graduate studies in French.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Program Requirements

Plan A: Plan A requires 18 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Proficiency in foreign language other than French

Required Courses

FRIT 5999 - Teaching of French and Italian: Theory and Practice (3.0 cr)
Take 1 or more credit(s) from the following:
• FREN 5995 - Directed Teaching (1.0 cr)

Plan Options

Plan A
Major Electives
Take 12 or more credit(s) from the following:
• FREN 5xxx
• FREN 8xxx
• FRIT 5xxx
• FRIT 8xxx
Outside the Major -- Related Fields
Students take at least 6 credits outside the major or in a master's-level minor.
Thesis Credits
Take exactly 10 credit(s) from the following:
• FREN 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B
Major Electives
Take 18 or more credit(s) from the following:
• FREN 5xxx
• FREN 8xxx
• FRIT 5xxx
• FRIT 8xxx
Outside the Major -- Related Fields
Students take at least 9 credits outside the major or in a master's-level minor.

  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
46 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Proficiency in foreign language other than French

Required Courses
- FRIT 5999 - Teaching of French and Italian: Theory and Practice (3.0 cr)
- Take exactly 1 credit(s) from the following:
  - FREN 5995 - Directed Teaching (1.0 cr)

Major Electives
- Take 42 or more credit(s) from the following:
  - FREN 5xxx
  - FREN 8xxx
  - FRIT 5xxx
  - FRIT 8xxx

Outside Coursework
- Take at least 12 credits outside the major, not including foreign language credits.

Thesis Credits
- Take exactly 24 credit(s) from the following:
  - FREN 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Optional Emphases

Medieval Emphasis
The medieval emphasis comprises coursework in Old French and Latin. With the exception of LAT courses, credits can be applied toward the emphasis and the 42-credit major electives requirement.
Students may be exempt from coursework by passing a department-specific examination. Confer with the adviser and director of graduate studies regarding options for completing the emphasis.

Successful completion of the emphasis satisfies the foreign language requirement.

-OR-

Early Modern (Pre-1600) Emphasis
The early modern emphasis requires the demonstration of intermediate knowledge of Latin. LAT courses cannot be applied toward both the emphasis and the 42-credit major electives requirement. Students may be exempt from coursework by passing a department-specific examination. Confer with the advisor and director of graduate studies regarding options for completing the emphasis.

Successful completion of the emphasis satisfies the foreign language requirement.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 15
- This program does not require summer semesters for timely completion.
- Degree: French Studies PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This 15-credit graduate program is primarily for secondary teachers of French, but welcomes any prospective students wishing to enhance their knowledge of diverse areas of French and francophone studies, including linguistics, culture, literature, and film. Consisting of coursework only, the certificate provides the opportunity to explore in-depth aspects of French and francophone literature, culture, and language, while also sharpening language skills. An additional benefit is the potential for professional advancement.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have a BA in French or equivalent (BA/BS in another field, but relevant professional experience or academic preparation in French language and culture) with a preferred GPA of 3.0.

Special Application Requirements:
Applicants must submit the following materials: transcripts, a personal statement (in English) explaining how this certificate meets their personal or professional goals, a writing sample in French (a 500-1,000 word essay on applicant's topic of choice), and two letters of recommendation from individuals who can comment knowledgeably on applicant's interest and abilities in French studies. Applications must be received by April 15 for fall semester and by October 15 for spring semester.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Coursework

Linguistics
  Take at least one course from the following:
  FREN 5531 - Sociolinguistics of French (3.0 cr)
  or FREN 5541 - Oral Discourse of French (3.0 cr)
  or FREN 4510

French or Francophone Literature or Culture
  Take at least one course from the following list. Note that neither FRIT 5999 nor FREN 5995 can be used to meet this requirement.
  FREN 4510
  or FREN 5xxx
  or FREN 8xxx
  or FRIT 5xxx
  or FRIT 8xxx

Electives
  A maximum of 3 elective credits can be taken in a French-culture related area outside French studies, such as linguistics, second language and cultures, history, english, art history, theatre arts, and music. Course selection is subject to advisor approval. Note that neither FRIT 5999 nor FREN 5995 can be used to meet this requirement.
  Take 9 or more credit(s) from the following:
  • FREN 5xxx
  • FREN 8xxx
  • FRIT 5xxx
  • FRIT 8xxx

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 35
- This program does not require summer semesters for timely completion.
- Degree: Master of Geographic Information Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The professional master of geographic information science (MGIS), administered by the Department of Geography, provides graduate-level work in the theory, applications, and technology of geographic information science (GIS). Courses for the program are divided into three broad categories. Core courses provide the conceptual and theoretical underpinnings for a comprehensive, well-rounded knowledge of GIS, including an introductory seminar for entering students (GIS 8501). A set of technology courses focuses on specific software and techniques of GIS. Elective courses provide additional breadth to the program by allowing students to take courses related to their area of interest.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Applicants must submit an application form; a M.G.I.S. supplemental application form; transcripts; a clearly written personal statement of career interests and goals; and three letters of recommendation from persons familiar with their academic and/or employment background. The GRE is not required. All materials must be submitted by January 30 for fall semester entrance and by September 1 for spring semester entrance.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 22
- IELTS
  - Total Score: 7.5
- MELAB
  - Final score: 84

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 29 major credits and 6 credits outside the major. There is no final exam.
This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students must complete a professional portfolio, and a set of concluding experiences including a public presentation, an exit survey, and a final meeting with an advisor.

**Required Courses**

- **GEOG 5561 - Principles of Geographic Information Science (4.0 cr)**
- **or** **FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)**
- **GIS 8501 - GIS Project Management and Professional Development (3.0 cr)**
- **GIS 5571 - ArcGIS I (3.0 cr)**
- **GIS 5572 - ArcGIS II (3.0 cr)**

**Advanced GIS Focus Courses**

**5xxx-level Requirement**

Take 3 credits from the following:

- **GEOG 5562 - GIS Development Practicum (3.0 cr)**
- **GEOG 5563 - Advanced Geographic Information Science (3.0 cr)**
- **ESPM 5295 - GIS in Environmental Science and Management (4.0 cr)**
- **FNRM 5412 - Advanced Remote Sensing and Geospatial Analysis (3.0 cr)**
- **GIS 5577 - Spatial Database Design and Administration (3.0 cr)**
- **GIS 5574 - Web GIS and Services (3.0 cr)**
- **GIS 5578 - GIS Programming (3.0 cr)**
- **CSCI 5715 - From GPS and Virtual Globes to Spatial Computing (3.0 cr)**

**8xxx-Level Requirement**

Take 3 credits from the following:

- **GEOG 8290 - Seminar in GIS and Cartography (3.0 cr)**
- **GEOG 8291 - Seminar in GIS, Technology, and Society (3.0 cr)**
- **GEOG 8292 - Seminar in GIS: Spatial Analysis and Modeling (3.0 cr)**
- **GIS 8990 - Research Problems in GIS (1.0 - 6.0 cr)**
- **FNRM 8205 - Research Problems: Spatial Data Analysis (1.0 - 5.0 cr)**
- **CSCI 8715 - Spatial Data Science Research (3.0 cr)**

**Electives**

Take remaining credits from the following list to meet the 35-credit minimum. At least 6 elective credits must be other than those with GEOG or GIS course designators.

Take 16 or more credit(s) from the following:

- **GEOG 5361 - Geography and Real Estate (4.0 cr)**
- **GEOG 5511 - Principles of Cartography (4.0 cr)**
- **GEOG 5531 - Numerical Spatial Analysis (4.0 cr)**
- **GEOG 5562 - GIS Development Practicum (3.0 cr)**
- **GEOG 5563 - Advanced Geographic Information Science (3.0 cr)**
- **GEOG 5564 - Urban Geographic Information Science and Analysis (3.0 cr)**
- **GEOG 8280 - Biogeography (3.0 cr)**
- **GEOG 8290 - Seminar in GIS and Cartography (3.0 cr)**
- **GEOG 8291 - Seminar in GIS, Technology, and Society (3.0 cr)**
- **GEOG 8292 - Seminar in GIS: Spatial Analysis and Modeling (3.0 cr)**
- **GIS 5530 - GIS Internship (1.0 - 3.0 cr)**
- **GIS 5555 - Basic Spatial Analysis (3.0 cr)**
- **GIS 5573 - Introduction to Digital Mapping: ArcGIS Basics (2.0 cr)**
- **GIS 5574 - Web GIS and Services (3.0 cr)**
- **GIS 5577 - Spatial Database Design and Administration (3.0 cr)**
- **GIS 5578 - GIS Programming (3.0 cr)**
- **GIS 5590 - Special Topics in GIS (3.0 cr)**
- **GIS 8990 - Research Problems in GIS (1.0 - 6.0 cr)**
- **CSCI 4041 - Algorithms and Data Structures (4.0 cr)**
- **CSCI 4131 - Internet Programming (3.0 cr)**
- **CSCI 4707 - Practice of Database Systems (3.0 cr)**
- **CSCI 5715 - From GPS and Virtual Globes to Spatial Computing (3.0 cr)**
- **CSCI 8715 - Spatial Data Science Research (3.0 cr)**
• ESPM 5031 - Applied Global Positioning Systems for Geographic Information Systems (3.0 cr)
• ESPM 5295 - GIS in Environmental Science and Management (4.0 cr)
• FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
• FNRM 5228 - Advanced Topics in Assessment and Modeling of Forests (3.0 cr)
• FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
• FNRM 5412 - Advanced Remote Sensing and Geospatial Analysis (3.0 cr)
• FNRM 8205 - Research Problems: Spatial Data Analysis (1.0 - 5.0 cr)
• PA 5231 - Transit Planning and Management (3.0 cr)
• VMED 5181 - Spatial Analysis in Infectious Disease Epidemiology (3.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The professional master of geographic information science (MGIS), administered by the Department of Geography, offers a master's and doctoral minor.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A graduate minor is developed in consultation with the M.G.I.S. director of graduate studies.

Required Course (4 credits)
All students pursuing the minor must take one of the following courses:
- GEOG 5561 - Principles of Geographic Information Science (4.0 cr)
- FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Electives (5 Credits)
In addition to the required course, master's students must take at least 5 credits from the following to complete the 9-credit minimum:
- CSCI 5715 - From GPS and Virtual Globes to Spatial Computing (3.0 cr)
- CSCI 8715 - Spatial Data Science Research (3.0 cr)
- ESPM 5031 - Applied Global Positioning Systems for Geographic Information Systems (3.0 cr)
- ESPM 5295 - GIS in Environmental Science and Management (4.0 cr)
- FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
- FNRM 5412 - Advanced Remote Sensing and Geospatial Analysis (3.0 cr)
- FNRM 8205 - Research Problems: Spatial Data Analysis (1.0 - 5.0 cr)
GEOG 5511 - Principles of Cartography (4.0 cr)
GEOG 5562 - GIS Development Practicum (3.0 cr)
GEOG 5563 - Advanced Geographic Information Science (3.0 cr)
GEOG 5564 - Urban Geographic Information Science and Analysis (3.0 cr)
GEOG 8290 - Seminar in GIS and Cartography (3.0 cr)
GEOG 8291 - Seminar in GIS, Technology, and Society (3.0 cr)
GEOG 8292 - Seminar in GIS: Spatial Analysis and Modeling (3.0 cr)
GIS 5555 - Basic Spatial Analysis (3.0 cr)
GIS 5571 - ArcGIS I (3.0 cr)
GIS 5572 - ArcGIS II (3.0 cr)
GIS 5574 - Web GIS and Services (3.0 cr)
GIS 5577 - Spatial Database Design and Administration (3.0 cr)
GIS 5578 - GIS Programming (3.0 cr)
VMED 5181 - Spatial Analysis in Infectious Disease Epidemiology (3.0 cr)

Doctoral
Electives (8 Credits)
In addition to the required course, doctoral students must take at least 8 credits from the following to complete the 12-credit minimum:
CSCI 5715 - From GPS and Virtual Globes to Spatial Computing (3.0 cr)
CSCI 8715 - Spatial Data Science Research (3.0 cr)
ESPM 5031 - Applied Global Positioning Systems for Geographic Information Systems (3.0 cr)
ESPM 5295 - GIS in Environmental Science and Management (4.0 cr)
FNRM 5262 - Remote Sensing and Geospatial Analysis of Natural Resources and Environment (3.0 cr)
FNRM 5412 - Advanced Remote Sensing and Geospatial Analysis (3.0 cr)
FNRM 8205 - Research Problems: Spatial Data Analysis (1.0 - 5.0 cr)
GEOG 5511 - Principles of Cartography (4.0 cr)
GEOG 5562 - GIS Development Practicum (3.0 cr)
GEOG 5563 - Advanced Geographic Information Science (3.0 cr)
GEOG 5564 - Urban Geographic Information Science and Analysis (3.0 cr)
GEOG 8290 - Seminar in GIS and Cartography (3.0 cr)
GEOG 8291 - Seminar in GIS, Technology, and Society (3.0 cr)
GEOG 8292 - Seminar in GIS: Spatial Analysis and Modeling (3.0 cr)
GIS 5555 - Basic Spatial Analysis (3.0 cr)
GIS 5571 - ArcGIS I (3.0 cr)
GIS 5572 - ArcGIS II (3.0 cr)
GIS 5574 - Web GIS and Services (3.0 cr)
GIS 5577 - Spatial Database Design and Administration (3.0 cr)
GIS 5578 - GIS Programming (3.0 cr)
VMED 5181 - Spatial Analysis in Infectious Disease Epidemiology (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The geography graduate program at the University of Minnesota reflects the intellectual breadth of the discipline by maintaining strengths in the broad areas of human geography, physical geography, nature-society relationships, and geographic information science. Faculty and students are engaged in teaching and research both within and across these broad areas as evidenced by prominent research themes within the program: culture, place, and flow; environmental change; geographies of the information society; geovisualization; globalization and uneven development; governance, citizenship, and justice; metropolis and world; and nature and society. To support students in gaining both depth and breadth within the discipline, the program is highly individualized with a limited number of requirements. Students work with their advisers to design individual programs suited to their educational and professional goals.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Undergraduate degrees need not be from a program in geography. However, students whose previous work is not in geography may be asked to complete specific courses that do not provide graduate credit.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 158
  - General Test - Quantitative Reasoning: 158
  - General Test - Analytical Writing: 4.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 22
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 84

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Three Plan B papers are required. These papers have the quality but not the scope of a master's thesis, and usually are enhanced versions of research papers done in connection with coursework and seminars.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Competency in a foreign language.

A minimum GPA of 2.80 is required for students to remain in good standing.

**Required Coursework**
- GEOG 8001 - Problems in Geographic Thought (3.0 cr)
- GEOG 8405 - Seminar: Graduate Student Professional Development (1.0 cr)

**Additional Geography Coursework**
- Take exactly 6 credit(s) from the following:
  - GEOG 8xxx

**Methods Coursework Requirement**
- Take at least 4 credits of methods coursework, chosen in consultation with the advisor.

**Outside Coursework**
- Take at least 6 credits outside the major.

**Plan Options**

**Plan A**

**Thesis Credits**
- Take 10 or more credit(s) from the following:
  - GEOG 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
  - OR-

**Plan B**

**Additional Major Elective Credits**
- Take 10 or more credit(s) from the following:
  - GEOG 5xxx
  - GEOG 8xxx
Twin Cities Campus

Program Requirements
16 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students must earn certification of expertise in language(s), techniques(s) or both as determined by the advising committee. The committee must verify completion of the requirements prior to scheduling of the PhD final examination.

Required Courses
GEOG 8001 and 8405 should be taken within the first year of study.
GEOG 8001 - Problems in Geographic Thought (3.0 cr)
GEOG 8405 - Seminar: Graduate Student Professional Development (1.0 cr)
Take 6 credits of GEOG 81xx and/or GEOG 82xx coursework, with at least 3 credits of GEOG 82xx. With advisor approval, GEOG 8970 and GEOG 8980 may be used for GEOG 81xx or GEOG 82xx courses.
Take exactly 6 credit(s) from the following:
• GEOG 8xxx

Methods Course Requirement
Take at least 3 credits of methods coursework, which can be from outside the Geography, Environment & Society department. Course selection must be done in consultation with the Geography director of graduate studies.

Proposal-Writing Course Requirement
Take GEOG 8302 or at least 3 credits of coursework from outside the Geography, Environment & Society department. Course selection must be done in consultation with the Geography director of graduate studies.
GEOG 8302 - Research Development (3.0 cr)

Supporting Program Coursework
Take at least 12 credits from outside the department.

Thesis Credits
Take 24 or more credit(s) from the following:
• GEOG 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
**Twin Cities Campus**

**Germanic Studies M.A.**

**German, Nordic, Slavic & Dutch**

- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Germanic studies program in the Department of German, Scandinavian, and Dutch (GSD) is distinguished for its interdisciplinary approach to the study of literature and culture. The program equips students to be creative scholars and skillful teachers through research and teaching programs covering the literature and culture of German-speaking and Nordic countries. Students work closely with faculty dedicated to scholarly innovation, teaching excellence, and interdisciplinary collaboration.

The Germanic studies program offers both MA and PhD degrees and allows students to tailor their programs to their individual needs and interdisciplinary interests. Students have the option to pursue a emphasis in German (MA, PhD), Germanic Medieval Studies (MA, PhD) or Scandinavian Studies (MA) by completing a specified number of courses in one of those areas.

**Program Delivery**

This program is available:

- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:

- BA or equivalent in German, Scandinavian, or related field. Students are usually admitted to the PhD program, but the MA must be completed first. Applicants must have fluency in German or a Scandinavian language.

**Special Application Requirements:**

In addition to the University's application requirements, the department requires the following: the department's Supplemental Application Information form (download from the department's website); a copy of one or more papers representative of the applicant's level of scholarly development (not to exceed 25 total pages); three letters of recommendation; the General (Aptitude) Test of the GRE (required for master's program applicants, but optional for those whose native language is not English). Students are admitted for fall semester only. All application materials may be uploaded into the online application and must be submitted by December 15.

For an online application or for more information about graduate education admissions, see the General Information section of this website.

Applicants must submit their test score(s) from the following:

- GRE

International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19

© 2005 by the Regents of the University of Minnesota

The University of Minnesota is an equal opportunity educator and employer.

Information current as of August 31, 2018
- Internet Based - Speaking Score: 27
- Paper Based - Total Score: 550
  - IELTS
    - Total Score: 6.5
  - MELAB
    - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan B**: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project**: The Plan B paper is usually an improved, reworked seminar paper written for a specific course in the major.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students must demonstrate oral and written proficiency in German or one Scandinavian language.

**Required Core**

- GSD 8001 - Approaches to Textual Analysis (3.0 cr)
- GSD 5103 - Teaching of Germanic Languages (3.0 cr)

**Outside the Major in a Supporting Program**

Take 6 credits outside the major in supporting program.

**Germanic Studies - No Emphasis**

**Electives for Germanic Studies - No Emphasis**

Students who elect not to to pursue a formal track can choose from any of the department's course offerings to complete remaining credit requirements.

Take 18 or more credit(s) from the following:

- DTCH 5xxx
- FIN 5xxx
- GER 5xxx
- GER 8xxx
- GSD 5xxx
- GSD 8xxx
- SCAN 5xxx
- SCAN 8xxx

**Program Sub-plans**

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

**German**

The Plan B paper must reflect the emphasis.

**German Emphasis Electives**

- GER 5011 cannot count towards credit requirements.

Take 15 or more credit(s) from the following:

- GER 5xxx
- GER 8xxx
• GSD 8xxx

**Additional Elective**

Take 3 or more credit(s) from the following:

• DTCH 5xxx
• FIN 5xxx
• GER 5xxx
• GER 8xxx
• GSD 5xxx
• GSD 8xxx
• SCAN 5xxx
• SCAN 8xxx

**Germanic Medieval Studies**

The Plan B paper must reflect the emphasis.

**Germanic Medieval Studies Emphasis Electives**

Take 15 or more credit(s) from the following:

• GER 5711 - History of the German Language I (3.0 cr)
• GER 5721 - Introduction to Middle High German (3.0 cr)
• GER 5734 - Old Saxon (3.0 cr)
• GER 5740 - Topics in Germanic Medieval Studies (3.0 cr)
• GER 8200 - Seminar in Medieval German Literature and Culture (3.0 cr)
• GER 8210 - Seminar in Early Modern German Literature and Culture (3.0 cr)
• SCAN 5502 - The Icelandic Saga (3.0 cr)
• SCAN 5701 - Old Norse Language and Literature (3.0 cr)
• SCAN 5703 - Old Norse Poetry (3.0 cr)
• SCAN 5710 - Topics in Old Norse Literature (3.0 cr)
• SCAN 8500 - Seminar in Medieval Scandinavian Languages and Literature (3.0 cr)
• ENGL 4612 - Old English I (3.0 cr)
• ENGL 4613 - Old English II (3.0 cr)

**Additional Elective**

Take 3 or more credit(s) from the following:

• DTCH 5xxx
• FIN 5xxx
• GER 5xxx
• GER 8xxx
• GSD 5xxx
• GSD 8xxx
• SCAN 5xxx

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program requires summer semesters for timely completion.
• Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Journalism & Mass Communication's (SJMC) MA health communication (integrated BA/MA track) program prepares students for healthcare careers that rely on the strategic use of health information to communicate with patient and nonpatient publics, care providers, administrators and other public health stakeholders. The program is designed around a curriculum of academic and professional skills courses from strategic communication, public health and other relevant disciplines.

The curriculum includes a summer practicum experience in a health media or health care organization. The program's balance of conceptual prowess and practical skills prepares its graduates to be expert health communication professionals in a variety of health care positions. Students who complete this program will have a combination of specific message strategy/content development skills and the subject knowledge demanded by the healthcare workplace. Every workplace now requires professionals who can communicate clearly and strategically about their subject matter with multiple audiences and using a variety of communication channels. This is especially true in the arena of health care.

This program provides an Integrated BA/MA option for eligible University of Minnesota journalism/strategic communication track BA students also interested in completing the school's health communication MA degree. The integrated BA journalism/MA health communication sub-plan enables students to complete both degrees in five years.

The combination of skills and context courses at the undergraduate level, and the sophisticated academic and practice-based courses at the graduate level will ensure that graduates of this program are fully prepared to contribute to their workplaces from day one.

Students who complete this program will have a combination of specific message strategy/content development skills and the subject knowledge demanded by the healthcare workplace. Every workplace now requires professionals who can communicate clearly and strategically about their subject matter with multiple audiences and using a variety of communication channels. This is especially true in the arena of health care. The combination of skills and context courses at the undergraduate level, and the sophisticated academic and practice-based courses at the graduate level will ensure that graduates of this program are fully prepared to contribute to their workplaces from day one.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
Students must be enrolled in the BA in journalism/strategic communication track to apply for Integrated BA journalism/MA health communication sub-plan admission. Admission is considered for summer term only; the application deadline is February 15.
Special Application Requirements:
Applicants must submit a department application; a statement of objectives articulating interest and readiness for the program; a complete set of transcripts; an academic and professional work sample; a resume or curriculum vita; and scores from the General Test of the GRE.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 155
  - General Test - Analytical Writing: 4.5

Key to test abbreviations (GRE).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is written. A capstone project is required.

Capstone Project: JOUR 8193, Health Communication Capstone, allows you to focus on different aspects of health communication relevant to your interests. Students will prepare a final project a publishable article, a multimedia projection, an original research paper or other options aimed at a particular audience. This project is completed during the second semester of the MA program.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 0 semesters must be completed before filing a Degree Program Form.

Core Courses
- JOUR 5541 - Mass Communication and Public Health (3.0 cr)
- JOUR 5542 - Theory-based Health Message Design (3.0 cr)
- JOUR 5543 - Public Health Campaign Evaluation (3.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)

Electives
Take 12 or more credit(s) from the following:
- JOUR 5501 - Communication, Public Opinion, and Social Media (3.0 cr)
- JOUR 8650 - Seminar: Psychology of Media Effects (3.0 cr)
- JOUR 8720 - Seminar: Mass Media and Health (3.0 cr)
- PUBH 6025 - Designing e-Interventions for Public Health (2.0 cr)
- PUBH 6055 - Social Inequalities in Health (2.0 cr)
- PUBH 6085 - Alcohol and Tobacco: Ongoing Threats to Global Health (2.0 cr)
- PUBH 7214 - Principles of Risk Communication (1.0 cr)
- PUBH 7226 - Media Relations Practicum (1.0 cr)
- PSY 5205 - Applied Social Psychology (3.0 cr)
- WRIT 4501 - Usability and Human Factors in Technical Communication (3.0 cr)
- WRIT 5112 - Information Design: Theory and Practice (3.0 cr)
- WRIT 8520 - Seminar in Scientific and Technical Communication (3.0 cr)
- WRIT 8550 - Seminar in Technology, Culture, and Communication (3.0 cr)
- WRIT 5561 - Editing and Style for Technical Communicators (3.0 cr)

Capstone
- JOUR 8193 - Health Communication Capstone (3.0 cr)

Practicum
- JOUR 8194 - Health Communication Practicum (3.0 cr)
Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Integrated BA Journalism/ MA Health Communication
This sub-plan is limited to students completing the program under Plan B.

The SJMC offers an early-admission opportunity for eligible University of Minnesota journalism/strategic communication BA students also interested in completing the health communication MA degree. The integrated BA journalism/MA health communication sub-plan enables journalism/strategic communication majors to take 9 credits during their senior (fourth) year, and to complete the MA after a fifth year of full-time graduate study plus one summer. Interested journalism/strategic communication undergraduates should contact the SJMC advisor for more information. The integrated BA journalism/MA health communication sub-plan application deadline is February 15 of the student's junior year, and admission to the sub-plan is contingent on a formal admissions process. Students admitted to the sub-plan must maintain timely degree progress to ensure all undergraduate degree requirements are completed by the end of their fourth year. The sub-plan is open to journalism/strategic communication track undergraduates only. Double majors may apply, but only if they choose to complete the senior project requirement in journalism.

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 36
• This program does not require summer semesters for timely completion.
• Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students entering the Hispanic and Lusophone Literatures, Cultures, and Linguistics PhD program without an MA from another institution, or with an unrelated graduate degree may elect, but are not required to, earn the MA at the University of Minnesota.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Prospective students generally have completed an undergraduate degree or substantial coursework in the fields of Hispanic literatures and cultures, Lusophone literatures and cultures, or Hispanic linguistics, although individuals with other backgrounds may be admitted.

Students admitted to the program are required to be fluent in Spanish or Portuguese. The Graduate Studies Committee may require completion of background coursework, without graduate degree credit, for admitted students with insufficient preparation.

Special Application Requirements:
All application materials must be submitted electronically through the ApplyYourself application system by December 15. Applicants are accepted for admission for fall semester only. Please refer to the Application Checklist for important details. The following is required for the application: the Departmental Application; a personal statement; a writing sample representative of the applicant's level of scholarly development; three letters of recommendation; five-minute voice sample; a Curriculum Vitae; GRE or TOEFL (or MELAB or IELTS) test scores; and transcripts. For more information, see the Department of Spanish & Portuguese Studies Applying page: http://spanport.umn.edu/grad/applying.html

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Part 1 (Composition) score: 80
Program Requirements

Plan B: Plan B requires 30 major credits and 6 credits outside the major. The final exam is written and oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.50 is required for students to remain in good standing.

Required Courses (6 Credits)
All students must take the following teacher-training courses for a total of 6 credits.
- SPPT 5999 - The Teaching of College-Level Spanish: Theory and Practice (3.0 cr)
- SPPT 5995 - Directed Teaching (1.0 cr)
- SPPT 8920 - Introduction to Hispanic and Lusophone Literatures, Cultures, and Languages (2.0 cr)

Outside Coursework (6 Credits)
All students must take at least 6 credits of outside coursework, selected in consultation with the advisor.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Hispanic Literatures and Cultures
This sub-plan is limited to students completing the program under Plan B.

Students receive a solid intellectual and professional preparation in Iberian and Latin American literatures and cultures. Works and intellectual movements are studied in their historical, social, and cultural contexts, combining the approaches of literary and cultural criticism with those of intellectual history, sociology, gender and sexuality studies, among others.

Spanish Peninsular and/or Spanish American Literatures and Cultures (24 Credits)
Take 24 or more credit(s) from the following:
- SPAN 5160 - Medieval Iberian Literatures and Cultures (3.0 cr)
- SPAN 5170 - The Literature of the Spanish Empire and Its Decline (3.0 cr)
- SPAN 5180 - Don Quixote (3.0 cr)
- SPAN 5190 - The Crisis of the Old Regime: Spanish Literature of the Enlightenment and Romanticism (3.0 cr)
- SPAN 5150 - Contemporary Spanish Literature (3.0 cr)
- SPAN 5550 - Caribbean Literature: An Integral Approach (3.0 cr)
- SPAN 5560 - Global Colonial Studies in the Hispanic World (3.0 cr)
- SPAN 5570 - Nineteenth Century Latin America: Enlightened Thought, Nation Building, Literacy, Cultural Discourse (3.0 cr)
- SPAN 5580 - Latin American Cultural Integration in the Neocolonial Order (3.0 cr)
- SPAN 5590 - The Impact of Globalization in Latin American Discourses (3.0 cr)

Hispanic Linguistics
This sub-plan is limited to students completing the program under Plan B.

This track is centered on the relation between language and its context of use, encompassing social, pragmatic, and discourse factors. It provides students with a strong background in the following areas of Hispanic linguistics: phonetics, phonology, syntax, pragmatics and discourse, historical linguistics, language variation, and second language acquisition.

Required Linguistics Courses (12 Credits)

Phonology
Take 6 or more credit(s) from the following:
• SPAN 5711 - The Structure of Modern Spanish: Phonology (3.0 cr)
• SPAN 5721 - Spanish Laboratory Phonology (3.0 cr)
• LING 5302 - Phonological Theory I (3.0 cr)

Syntax/Pragmatics
Take 6 or more credit(s) from the following:
• SPAN 5716 - Structure of Modern Spanish: Pragmatics (3.0 cr)
• SPAN 5714 - Theoretical Foundations of Spanish Syntax (3.0 cr)
• LING 5201 - Syntactic Theory I (3.0 cr)
• LING 5206 - Linguistic Pragmatics (3.0 cr)

Electives (12 Credits)
• SPAN 5701 - History of Ibero-Romance (3.0 cr)
• SPAN 5711 - The Structure of Modern Spanish: Phonology (3.0 cr)
• SPAN 5714 - Theoretical Foundations of Spanish Syntax (3.0 cr)
• SPAN 5716 - Structure of Modern Spanish: Pragmatics (3.0 cr)
• SPAN 5717 - Spanish Sociolinguistics (3.0 cr)
• SPAN 5718 - Spanish Language Contact (3.0 cr)
• SPAN 5721 - Spanish Laboratory Phonology (3.0 cr)
• SPAN 5930 - Topics in Ibero-Romance Linguistics (3.0 cr)
• SPAN 5985 - Sociolinguistic Perspectives on Spanish in the United States (3.0 cr)

Lusophone Literatures and Cultures
This sub-plan is limited to students completing the program under Plan B.

This track prepares students in Portuguese studies, understood as an interdisciplinary critical formation through which the cultures and literatures of Portugal, Brazil, and Lusophone Africa are approached. Students are trained in the main historical periods, cultural movements, and social issues pertaining to the Portuguese-speaking world, both nationally and transnationally, within relevant comparative frameworks.

Required Courses (24 Credits)
Lusophone Literatures and Culture
Take 12 or more credit(s) from the following:
• PORT 5520 - Portuguese Literary and Cultural Studies (3.0 cr)
• PORT 5530 - Brazilian Literary and Cultural Studies (3.0 cr)
• PORT 5540 - Literatures and Cultures of Lusophone Africa (3.0 cr)
• PORT 5910 - Topics in Lusophone Cultures and Literatures (3.0 cr)
• PORT 5930 - Topics in Brazilian Literature (3.0 cr)

Spanish Peninsular or Spanish-American Literatures & Cultures
Take 12 or more credit(s) from the following:
• SPAN 5160 - Medieval Iberian Literatures and Cultures (3.0 cr)
• SPAN 5170 - The Literature of the Spanish Empire and Its Decline (3.0 cr)
• SPAN 5180 - Don Quixote (3.0 cr)
• SPAN 5190 - The Crisis of the Old Regime: Spanish Literature of the Enlightenment and Romanticism (3.0 cr)
• SPAN 5150 - Contemporary Spanish Literature (3.0 cr)
• SPAN 5550 - Caribbean Literature: An Integral Approach (3.0 cr)
• SPAN 5560 - Global Colonial Studies in the Hispanic World (3.0 cr)
• SPAN 5570 - Nineteenth Century Latin America: Enlightened Thought, Nation Building, Literacy, Cultural Discourse (3.0 cr)
• SPAN 5580 - Latin American Cultural Integration in the Neocolonial Order (3.0 cr)
• SPAN 5590 - The Impact of Globalization in Latin American Discourses (3.0 cr)

- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The PhD program in Hispanic and Lusophone literatures, cultures, and linguistics is a four-year program (post MA) that provides students with a focused and rigorous formation in the literatures, languages, and cultures of Spain and Latin America. PhD students choose one of four areas of emphasis: Iberian (peninsular), Latin America, Lusophone literatures and cultures, and Hispanic linguistics.

In addition to establishing a specialization in one or more areas of Hispanic studies, the program allows and encourages students to pursue comparative or interdisciplinary work. Students complement their work in the department with coursework in other disciplines such as history; cultural studies and comparative literature; gender, women, and sexuality studies; medieval and early modern studies; and linguistics, among others. In addition to the requirements for the MA degree, PhD students must complete additional coursework.

The department's faculty is committed to preparing students and giving them the tools to become scholars and teachers of the highest quality. The department has a strong tradition of fostering socio-historical perspectives on literatures, languages, and cultures. The graduate faculty is committed to comparative and interdisciplinary research and engages a variety of contemporary theoretical approaches, with strengths in postcolonial theory, social justice and human rights, memory studies, critical race theory, diasporic studies, and gender and sexuality studies. Members of the Hispanic linguistics faculty are specialists in the fields of sociolinguistics, second language acquisition, syntax, pragmatics, and phonology.

The department offers students in the program faculty mentoring, a seminar, and workshops on professional development, including publishing, teaching, and interviewing. In addition, graduate student workshops in both literatures and cultures and in linguistics foster student-faculty relations and allow graduate students to ready themselves for conference participation. Travel funds are available through the department to allow students to present their papers at conferences in the US or abroad.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must first apply to, or hold, a master of arts degree (or its equivalent) before applying to the PhD program. A graduate GPA of 3.50 is preferred.

Other requirements to be completed before admission:
Prospective students generally have completed an undergraduate degree or substantial coursework in the fields of Hispanic literatures and cultures, Lusophone literatures and cultures, or Hispanic linguistics, although individuals with other backgrounds may be admitted.

The Graduate Studies Committee may require completion of background coursework, without graduate degree credit, for admitted students with insufficient preparation.

Special Application Requirements:
Students admitted to the program are required to be fluent in Spanish or Portuguese. The Graduate Studies Committee may require completion of background coursework, without graduate degree credit, for admitted students with insufficient preparation.

Program Requirements
42 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Fluency in Spanish and/or Portuguese.

A minimum GPA of 3.50 is required for students to remain in good standing.

Students entering the program with an MA from other institutions must take a minimum of 7 graduate courses (21 credits) in this department.

Required Coursework
All students must take the following 3-credit course:

SPPT 5999 - The Teaching of College-Level Spanish: Theory and Practice (3.0 cr)

Outside Coursework
Take 12 credits, selected in consultation with the advisor, from outside the major.

Thesis Credits
Take exactly 24 credit(s) from the following:

• SPAN 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Emphasis Options

Hispanic Literatures & Cultures
Spanish Peninsular Literature Electives
Take exactly 12 credit(s) from the following:
• SPAN 5110 - Discursive Formations at the Threshold of 20th-Century Spain (3.0 cr)
• SPAN 5150 - Contemporary Spanish Literature (3.0 cr)
• SPAN 5160 - Medieval Iberian Literatures and Cultures (3.0 cr)
• SPAN 5170 - The Literature of the Spanish Empire and Its Decline (3.0 cr)
• SPAN 5180 - Don Quixote (3.0 cr)
• SPAN 5190 - The Crisis of the Old Regime: Spanish Literature of the Enlightenment and Romanticism (3.0 cr)

**Spanish American Literature**

Take exactly 12 credit(s) from the following:
- SPAN 5550 - Caribbean Literature: An Integral Approach (3.0 cr)
- SPAN 5560 - Global Colonial Studies in the Hispanic World (3.0 cr)
- SPAN 5570 - Nineteenth Century Latin America: Enlightened Thought, Nation Building, Literacy, Cultural Discourse (3.0 cr)
- SPAN 5580 - Latin American Cultural Integration in the Neocolonial Order (3.0 cr)
- SPAN 5590 - The Impact of Globalization in Latin American Discourses (3.0 cr)

**Portuguese Literature**

Take exactly 6 credit(s) from the following:
- PORT 5530 - Brazilian Literary and Cultural Studies (3.0 cr)
- PORT 5540 - Literatures and Cultures of Lusophone Africa (3.0 cr)
- PORT 5910 - Topics in Lusophone Cultures and Literatures (3.0 cr)
- PORT 5520 - Portuguese Literary and Cultural Studies (3.0 cr)

**Major Electives**

Take three additional courses (9 credits) at 5xxx or 8xxx level in order to strengthen and further define the student's area of concentration. This can include credits from the student's minor field.

Take 9 or more credit(s) from the following:
- SPAN 5316 - Spanish Picaresque Narratives (3.0 cr)
- SPAN 5531 - Hispanic Literature of the United States (3.0 cr)
- SPAN 5920 - Topics in Spanish-American Studies (3.0 cr)
- SPAN 8100 - Research in Sociohistorical Approaches to Spanish Literature (3.0 cr)
- SPAN 8200 - Spanish Literary Texts: Theories of Formal Structures (3.0 cr)
- SPAN 8212 - Spanish Theater of the 16th Century: Drama up to Lope (3.0 cr)
- SPAN 8223 - The Poetry of the Spanish Golden Age (3.0 cr)
- SPAN 8300 - The Construction of Spanish Literary History (3.0 cr)
- SPAN 8312 - Two Spanish Masterpieces: [Libro de Buen Amor] and [La Celestina] (3.0 cr)
- SPAN 8960 - Workshop: Research in Hispanic Cultural Issues (3.0 cr)
- SPAN 8990 - Advanced Comparative Research of Caribbean Genres (3.0 cr)
- SPAN 5930 - Topics in Ibero-Romance Linguistics (3.0 cr)

-OR-

**Lusophone Literatures & Cultures**

*Portuguese and Lusophone Literature*

Take exactly 12 credit(s) from the following:
- PORT 5520 - Portuguese Literary and Cultural Studies (3.0 cr)
- PORT 5530 - Brazilian Literary and Cultural Studies (3.0 cr)
- PORT 5540 - Literatures and Cultures of Lusophone Africa (3.0 cr)
- PORT 5910 - Topics in Lusophone Cultures and Literatures (3.0 cr)

**Spanish Peninsular OR Spanish-American Literatures & Cultures**

Students can petition out of one of the four required Spanish courses if the advisor and student consider it appropriate in accordance to the student's intellectual needs with regard to his/her dissertation project.

Take exactly 12 credit(s) from the following:
- SPAN 5160 - Medieval Iberian Literatures and Cultures (3.0 cr)
- SPAN 5170 - The Literature of the Spanish Empire and Its Decline (3.0 cr)
- SPAN 5180 - Don Quixote (3.0 cr)
- SPAN 5190 - The Crisis of the Old Regime: Spanish Literature of the Enlightenment and Romanticism (3.0 cr)
- SPAN 5110 - Discursive Formations at the Threshold of 20th-Century Spain (3.0 cr)
- SPAN 5150 - Contemporary Spanish Literature (3.0 cr)
- SPAN 5550 - Caribbean Literature: An Integral Approach (3.0 cr)
- SPAN 5560 - Global Colonial Studies in the Hispanic World (3.0 cr)
- SPAN 5570 - Nineteenth Century Latin America: Enlightened Thought, Nation Building, Literacy, Cultural Discourse (3.0 cr)
- SPAN 5580 - Latin American Cultural Integration in the Neocolonial Order (3.0 cr)
- SPAN 5590 - The Impact of Globalization in Latin American Discourses (3.0 cr)

**Electives**

Take five additional courses (15 credits) at the 5xxx or 8xxx level in order to strengthen and further define the student's area of concentration. This can include credits from the student's minor field.

Take exactly 15 credit(s) from the following:
- PORT 5930 - Topics in Brazilian Literature (3.0 cr)
- SPAN 5316 - Spanish Picaresque Narratives (3.0 cr)
- SPAN 5531 - Hispanic Literature of the United States (3.0 cr)
- SPAN 5920 - Topics in Spanish-American Studies (3.0 cr)

Hispanic Linguistics

Linguistic Core Areas
Take at least one course from each of the five core areas, for a total of 21 credits.
Take exactly 21 credit(s) from the following:

Phonology
Take 3 or more credit(s) from the following:
• SPAN 5711 - The Structure of Modern Spanish: Phonology (3.0 cr)
• SPAN 5721 - Spanish Laboratory Phonology (3.0 cr)

Syntax/Pragmatics
Take 3 or more credit(s) from the following:
• SPAN 5714 - Theoretical Foundations of Spanish Syntax (3.0 cr)
• SPAN 5716 - Structure of Modern Spanish: Pragmatics (3.0 cr)

Language Variation
Take 3 or more credit(s) from the following:
• SPAN 5718 - Spanish Language Contact (3.0 cr)
• SPAN 5717 - Spanish Sociolinguistics (3.0 cr)
• SPAN 5985 - Sociolinguistic Perspectives on Spanish in the United States (3.0 cr)

History of Language
• SPAN 5701 - History of Ibero-Romance (3.0 cr)

Second Language Acquisition
• SPAN 5991 - The Acquisition of Spanish as a First and Second Language (3.0 cr)

Hispanic Linguistics Electives
Take at least three 5xxx or 8xxx level courses (9 credits) from within or outside the department with linguistics content.
Take 9 or more credit(s) from the following:
• SPAN 5xxx
• SPAN 8xxx
• PORT 5xxx
• PORT 8xxx
• LING 5xxx
• LING 8xxx
• STAT 5xxx
• STAT 8xxx
• CI 5xxx
• CI 8xxx

Spanish & Portuguese Electives
Select three 5xxx or 8xxx level courses (9 credits) from the following list in order to strengthen and further define the student's area of concentration. This can include credits from the student's minor field.
Take 9 or more credit(s) from the following:
• SPAN 5xxx
• SPAN 8xxx
• PORT 5xxx
• PORT 8xxx

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 31
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The Department of History does not currently admit students to the master's degree; however, PhD students often earn their MA on the way to the doctoral degree. The MA is normally completed by the end of the second year of the PhD program.

Areas of concentration include Africa; ancient history; East and South Asia; late antiquity and the middle ages; medieval, early modern, and modern Europe; the early modern world; Middle East; Latin America; and the United States and its colonial background. Scholarly resources include Center for Austrian Studies, Center for German and European Studies, Center for Medieval Studies, Immigration History Research Center, Minnesota Population Center, Modern Greek Studies, Center for Early Modern History, Institute for Advanced Study, and Consortium for the Study of the Premodern World.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
The Department of History does not currently admit master's students; however, PhD students often earn their MA on the way to the doctoral degree.

Special Application Requirements:
GRE scores above the 90% percentile in verbal (usually over 600) are preferred.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 15 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project requires students to substitute three expanded seminar papers for the thesis.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Varies by area of concentration (see below).

A minimum GPA of 3.00 is required for students to remain in good standing.

Students are only admitted to the PhD program. They may complete an MA while studying for the PhD.

Reading proficiency in one language other than English is required. Some areas of concentration require more than one. In some cases, competence in quantitative methods may replace one of the foreign languages.

Plan Options

Plan A

Major History Credits
Take 15 or more credit(s) from the following:
Courses in the department of history, or those offered by another department related to historical or thematic area of study. Courses are chosen in consultation with the student's advisor.

Outside Coursework
Take 6 additional credits of coursework outside the major.

Thesis Credits
Take 10 or more credit(s) from the following:

- HIST 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

- OR -

Plan B

Major History Credits
Take 24 or more credit(s) from the following:
Courses in the department of history, or those offered by another department related to historical or thematic area of study. Courses are chosen in consultation with the student's advisor.

Outside Coursework
Take 6 additional credits of coursework outside the major.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
About half of incoming students have master's degrees.

Special Application Requirements:
The average GPA of incoming students is approximately A-/B+, with more weight placed on history classes, where students are expected to have earned mostly A or A- grades.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 600

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
27 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Varies by area of concentration (see below).

A minimum GPA of 3.50 is required for students to remain in good standing.

Reading proficiency in one language other than English is required. Some areas of concentration may require more than one. The language requirement is required before admission to the preliminary oral examination. In some cases, competence in quantitative methods may replace one of the foreign languages.

Courses used to satisfy MA requirements can be counted in these totals.

History Courses
First Year Requirement
HIST 8015 - Scope and Methods of Historical Studies (3.0 cr)
HIST 8021 - History Research Seminar (3.0 cr)

Major Electives
Take 15 or more credit(s) from the following:
• HIST 5xxx
• HIST 8xxx

Comparative Area
Take 6 or more credit(s) from the following:
Courses are chosen in consultation with the student's advisor.
• HIST 5xxx
• HIST 8xxx

Outside Coursework
Take 12 course credits outside the major.

Thesis Credits
Take 24 or more credit(s) from the following:
• HIST 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus

Institute for Global Studies, 232 Social Sciences Building, 267 19th Ave S, Minneapolis, MN 55455 (612-626-1879; fax: 612-626-2242)
Email: hrminor@umn.edu
Website: http://www.hrp.cla.umn.edu

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The human rights minor, available to master's, doctoral, and law students, provides an interdisciplinary foundation in human rights studies and practical experience in human rights work. To satisfy the core requirements, students must complete two of the four core courses, each of which is 3 credits (GLOS 5403/LAW 6058 - Human Rights Advocacy; LAW 6886 - International Human Rights Law; POL 5485 - Human Rights and Democracy in the World; SOC 8090 - Topics: Cross-Disciplinary Perspectives on Human Rights), and one 200-hour internship (no coursework is associated with the internship). Master's students must complete one additional elective course (3 credits), while doctoral and law students select at least two additional elective courses (totaling 6 credits) outside their major field from a designated course list. Other courses may be taken with the approval of the program director. Qualifying courses taken prior to approval of the minor will be applied retroactively.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Admission to the minor is limited to enrolled graduate or professional students with a minimum GPA of 3.0. Doctoral students must declare their minor before taking their preliminary oral examination.

Other requirements to be completed before admission:
Students should submit a letter of application describing their background and motivation for applying to the minor program to the director of Graduate Studies. The director may request further information.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

In addition to the required course credits, all students pursuing the human rights minor must complete one six-week internship that is approved by the program director.

Core Courses
Take 6 or more credit(s) from the following:
- LAW 6886 - International Human Rights Law (3.0 cr)
- POL 5485 - Human Rights Policy: Issues and Actors (3.0 cr)
- LAW 6058 - Human Rights Advocacy (3.0 cr)
  or GLOS 5403 - Human Rights Advocacy (3.0 cr)
- SOC 8090 - Topics in Sociology (1.5 - 3.0 cr)
- Take with the topic: "Topics in Sociology: Cross-Disciplinary Perspectives on Human Rights"

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Master's
Electives
Take 3 or more credits from the following:

- AFEE 5361 - World Development Problems (3.0 cr)
- AFRO 5866 - The Civil Rights and Black Power Movement, 1954-1984 (3.0 cr)
- AFRO 8202 - Seminar: Intellectual History of Race (3.0 cr)
- AFRO 8554 - Seminar: Gender, Race, Nation, and Policy--Perspectives from Within the African Diaspora (3.0 cr)
- AMIN 5890 - Readings in American Indian and Indigenous History (3.0 cr)
- ANTH 8810 - Topics in Sociocultural Anthropology (3.0 cr)
- BTHX 5100 - Introduction to Clinical Ethics (3.0 cr)

Italian Studies Minor
French & Italian
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of French and Italian, 260 Folwell Hall, 9 Pleasant Street SE, Minneapolis, MN 55455 (612-624-4308; fax: 612-624-6021)
Website: http://frit.umn.edu/grad/italianminor.php

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

A minor in Italian studies is available for University students enrolled in master's and doctoral programs in such relevant fields as art history, architecture, French, comparative literature, history, English, and music. The graduate minor in Italian studies is under the general direction of the graduate faculty in Italian studies, all of whom hold membership in other fields of study within the University of Minnesota. The minor program is shaped to suit the particular research needs and interests of the student. Courses are selected in consultation with the director of Graduate Studies from a list of existing 4xxx and 5xxx courses, as well as appropriate 8xxx courses. Students may also elect to do a directed readings course with faculty affiliated with Italian studies to satisfy minor program requirements.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 2.80.

Other requirements to be completed before admission:
Admission to the Italian studies graduate minor is contingent on enrollment in good standing in a relevant University master's or doctoral degree-granting program. Interested students should consult with the director of Graduate Studies.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

With the approval of the director of Graduate Studies, one of the courses used to meet minor field requirements may be a 4xxx course, and one may be a directed readings course. Coursework from the major field may not be applied to satisfy minor field requirements.

Certification of proficiency in Italian language is required. Proficiency can be demonstrated in one of the following ways: by successfully completing an undergraduate literature/culture course in Italian, by having an undergraduate major or minor in Italian, or through a translation examination devised, administered, and assessed by the director of Graduate Studies. The proficiency requirement will be monitored by the director of Graduate Studies.

FRIT 5999 cannot be applied toward the minor field requirement.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

**Master's Required Courses**
Take 6 or more credit(s) from the following:
• ITAL 5xxx
• ITAL 8xxx
• FRIT 5xxx
• FRIT 8xxx

**Doctoral Required Courses**
Take 12 or more credit(s) from the following:
• ITAL 5xxx
• ITAL 8xxx
• FRIT 5xxx
• FRIT 8xxx

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 32 to 36
• This program does not require summer semesters for timely completion.
• Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Our program's goal is to train students in the scientific study of the human mental capacity for language. Successful study in this area investigates the syntactic, phonological and semantic/pragmatic properties of the language systems that humans naturally acquire, and asks what kinds of underlying mental capacity is implicated by these properties.

Our program emphasizes the place of this field of study among the cognitive sciences, and provides coursework and individual advising to prepare students to engage with and produce research in the field.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
There are no specific prerequisites for admission.

Special Application Requirements:
Applicants must submit the following application materials by December 15 of the preceding academic year:

(i)University of Minnesota Application form;
(ii)a statement of purpose;
(iii)a writing sample;
(iv)three letters of recommendation;
(v)a supplementary questionnaire;
(vi)transcripts from each college or university attended;
(vii)GRE scores;
(viii)English Language Proficiency Scores (TOEFL, MELAB or IELTS) are required of international applicants.

Entry is for fall semester.

International applicants must submit score(s) from one of the following tests:
•TOEFL
•IELTS
•MELAB

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 20 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 26 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project is an original paper usually a revision of a course project.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: See other requirements (below)

Students must demonstrate competence (the equivalent of two or more years of study) in one language other than English.

Required Courses

- LING 5001 - Introduction to Linguistics (4.0 cr)
- LING 5201 - Syntactic Theory I (3.0 cr)
- LING 5202 - Syntactic Theory II (3.0 cr)
- LING 5205 - Semantics (3.0 cr)
- LING 5302 - Phonological Theory I (3.0 cr)
- LING 8105 - Field Methods in Linguistics I (4.0 cr)

Outside Coursework

Take 6 credits outside the major.

Plan Options

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 10
- Length of program in credits (Doctorate): 16
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Linguistics is the scientific study of human language. Investigation in phonology, syntax, and semantics/pragmatics seeks to determine general principles governing the structure and use of human language and the parameters that determine degree and manner of variation across languages. These core areas constitute the foundation for other subfields of linguistics, including psycholinguistics, sociolinguistics, historical linguistics, computational linguistics, and neurolinguistics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Required Courses
LING 5001 - Introduction to Linguistics (4.0 cr)
LING 5201 - Syntactic Theory I (3.0 cr)
or LING 5302 - Phonological Theory I (3.0 cr)
One additional LING course (3.0 or more credits) approved by the director of graduate studies.
Take 3 or more credit(s) from the following:
• LING 5xxx
• LING 8xxx

Doctoral
Required Courses
LING 5001 - Introduction to Linguistics (4.0 cr)
LING 5201 - Syntactic Theory I (3.0 cr)
LING 5302 - Phonological Theory I (3.0 cr)
Two additional LING courses (6.0 or more credits) approved by the director of graduate studies.
Take 6 or more credit(s) from the following:
• LING 5xxx
• LING 8xxx
Twin Cities Campus
Linguistics Ph.D.
Linguistics, Institute of
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Institute of Linguistics, 205 Elliott Hall, 75 East River Road, Minneapolis, MN 55455 (612-624-3331; fax: 612-624-4579)
Email: ling@umn.edu
Website: http://www.linguistics.umn.edu/grad/

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 78
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Our program's goal is to trains students in the scientific study of the human mental capacity for language. Successful study in this area investigates the syntactic, phonological and semantic/pragmatic properties of language systems that humans naturally acquire, and asks what kind of underlying mental capacity is implicated by these properties.

Our program emphasizes the place of this field of study among the cognitive sciences, and provides coursework and individual advising to prepare students to engage with and produce research in the field.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
There are no specific prerequisites for admission.

Special Application Requirements:
Applicants must submit the following application materials by December 15 of the preceding academic year:

(i) University of Minnesota Application form;
(ii) a statement of purpose;
(iii) a writing sample;
(iv) three letters of recommendation;
(v) a supplementary questionnaire;
(vi) transcripts from each college or university attended;
(vii) GRE scores;
(viii) English Language Proficiency Scores (TOEFL, MELAB or IELTS) are required of international applicants.

Entry is for fall semester.

International applicants must submit score(s) from one of the following tests:
- TOEFL

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

42 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: See below.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students must demonstrate competence (the equivalent of two or more years of study) in two languages other than their native language before the PhD can be awarded.

Upon completion of required coursework, students must pass a preliminary written exam. To pass the preliminary written exam, a student must complete (1) a paper judged to be of near publishable quality by the student's committee in the student's primary area of specialization; (2) a paper judged to be of near publishable quality by the student's committee in the student's chosen secondary area of specialization.

Students are required to pass the preliminary oral exam. The preliminary oral exam is a presentation and defense of a research-paper-length dissertation prospectus, which introduces and motivates the student's dissertation topic and provides a detailed plan for completion of the dissertation.

Students are required to complete a dissertation and pass the Final Oral Exam, which is a defense of the completed dissertation.

Required Courses

LING 5001 - Introduction to Linguistics (4.0 cr)
LING 5201 - Syntactic Theory I (3.0 cr)
LING 5202 - Syntactic Theory II (3.0 cr)
LING 5205 - Semantics (3.0 cr)
LING 5302 - Phonological Theory I (3.0 cr)
LING 5303 - Phonological Theory II (3.0 cr)
LING 8005 - Research Paper Workshop (3.0 cr)
LING 8105 - Field Methods in Linguistics I (4.0 cr)
LING 8106 - Field Methods in Linguistics II (4.0 cr)
LING 8210 - Seminar in Syntax (3.0 cr)

Linguistics Seminar Courses

Take 9 or more credit(s) from the following:
- LING 8200 - Topics in Syntax and Semantics (3.0 cr)
- LING 8210 - Seminar in Syntax (3.0 cr)
- LING 8300 - Topics in Phonetics and Phonology (3.0 cr)
- LING 8500 - Topics in Second Language Acquisition (3.0 cr)
- LING 8900 - Seminar: Topics in Linguistics (3.0 cr)
- LING 8921 - Seminar in Language and Cognition (3.0 cr)
- LING 8991 - Independent Study (1.0 - 4.0 cr)

Supporting Program Courses

The required 12 credits of coursework from outside the major can be in the same field or in different fields. 6 credits of outside coursework from the MA may be used towards the PhD supporting program requirement.

Thesis Credits

Take 24 or more credit(s) from the following:
- LING 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
- LING 8888W - Thesis Credit Dissertation Seminar (1.0 - 3.0 cr)

Website: [http://writing.umn.edu](http://writing.umn.edu)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The goal of the literacy and rhetorical studies (LRS) minor is to encourage students to contribute to interdisciplinary activity and to create a forum for them and several dozen faculty members at the University whose research and teaching emphasize various facets of writing and communication. By crafting an individualized program of study with the LRS director of graduate studies ([http://writing.umn.edu/lrs/people.html](http://writing.umn.edu/lrs/people.html)), including theory, pedagogy, and research, often in a historical context, students can complement their disciplinary degree, and thereby open up new perspectives for their scholarship and teaching.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

**Special Application Requirements:**
For specific information about applying for the LRS minor, see: [http://writing.umn.edu/lrs/admission.html](http://writing.umn.edu/lrs/admission.html)

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

All courses are chosen in consultation with the LRS director of graduate studies.

**Program Sub-plans**
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

**Masters**
To ensure the minor is interdisciplinary, no more than one of the three courses may be from the student’s home department.

Students must write a substantial paper that emerges from one of the three courses.

**Literacy Theory or Practice**
Take 3 or more credit(s) from the following:
- A course in literacy theory or practice, including pedagogy.

**Research Methods and Practices**
Take 3 or more credit(s) from the following:
A course in research methods and practices in one of the areas of the minor.

**Historical Topic**
Take 3 or more credit(s) from the following:
A course about a historical topic (e.g., history of the book), of rhetoric or of literacy.

**Doctoral**
To ensure the minor is interdisciplinary, no more than two of the four courses may be from the student's home department.

To complete the doctoral minor, students must submit a capstone writing project emerging from their studies in literacy and/or rhetoric, such as a seminar paper or a completed dissertation chapter.

**Literacy Theory or Practice**
Take 3 or more credit(s) from the following:
A course in literacy theory or practice, including pedagogy.

**Research Methods and Practices**
Take 3 or more credit(s) from the following:
A course in research methods and practices in one of the areas of the minor.

**Historical Topic**
Take 3 or more credit(s) from the following:
A course about a historical topic (e.g., history of the book), of rhetoric or of literacy.

**Additional Coursework**
Take at least 3 credits to meet the 12-credit minimum for the doctoral minor, chosen in consultation with the LRS director of graduate studies.

Contact Information:
Hubbard School of Journalism and Mass Communication, 111 Murphy Hall, 206 Church Street SE, Minneapolis, MN 55455 (612-625-9824; fax: 612-625-9525)
Email: sjmcgrad@umn.edu
Website: http://sjmc.umn.edu/grad

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 35
• This program does not require summer semesters for timely completion.
• Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master's degree in mass communication emphasizes the theoretical study of mass communication and analysis of media systems and effects. The degree is intended for those who wish to pursue PhD degrees or teaching and research careers, as well as those who seek communication-related positions. The general master's program is not designed to provide professional skills training in journalism. Individuals with a bachelor's degree in journalism and mass communication or with strong social science or liberal arts backgrounds in areas such as political science, psychology, sociology, history, and English are encouraged to apply. Individuals with extensive professional experience in mass communication are also welcome. The program is suffused with the study of new communication technologies.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Students whose native language is not English are required to submit scores from the TOEFL or IELTS (academic). In addition, such students seeking teaching assistantships are required to pass the SPEAK test of spoken-English proficiency prior to appointment. Admission is considered for fall semester only; the priority application deadline is January 15, with a rolling deadline of March 1.

The mass communication MA and PhD programs offer a joint degree with the Law School. Applicants to either joint degree--either the MA/JD or the PhD/JD--are reviewed separately by the Law School and the mass communication programs for admission, but are asked to identify themselves as seeking the joint degree option in their statement of intent for the mass communication application. For more information, contact sjmcgrad@umn.edu.

Special Application Requirements:
Applicants must submit a department application; a clearly written statement of career interests, goals, and objectives; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of transcripts; academic work samples in English; a resume or curriculum vita; and scores from the General Test of the GRE.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
• IELTS
• MELAB

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
Program Requirements

Plan A: Plan A requires 19 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

All coursework must be taken A-F, except for JOUR 8009, which is taken S/N.

Required Mass Communication Core

JOUR 8001 - Studies and Theories of Mass Communication (3.0 cr)
JOUR 8009 - Pre-seminar in Mass Communication (1.0 cr)
One additional theory course inside or outside SJMC, chosen in consultation with the student's adviser (3.0 cr)

Required Methodology Core

JOUR 8501 - Seminar: The Process of Quantitative Mass Communication Research (3.0 cr)
JOUR 8503 - Seminar: Qualitative Methods in Mass Communication Research (3.0 cr)

Electives

Take 6 or more credit(s) from the following:
- JOUR 5xxx
- JOUR 8xxx
Courses are chosen in consultation with the advisor.

Outside Coursework

Take 6 credits outside the major.

Thesis Credits

Take exactly 10 credit(s) from the following:
- JOUR 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Joint- or Dual-degree Coursework: MA in Mass Communication and JD in Law (dual degree) Student may take a total of 12 credits in common among the academic programs.

The mass communication program emphasizes the theoretical study of mass communication and analysis of media systems and effects. The program is not designed to provide professional skills training in journalism.

Areas of specialization include media processes, influences, and effects (including health communication, advertising, and political communication); media law, ethics, history; and media management. All programs are suffused with the study of new communication technologies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Minor programs are planned in consultation with the director of graduate studies or another member of the mass communication graduate faculty. The master's minor consists of a minimum of 9 credits in a coherent area, with at least 6 credits at 8xxx. A PhD minor program consists of a minimum of 14 credits in a coherent disciplinary area.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Required Courses
Take 9 or more credit(s) from the following:
At least 6 credits must be taken at the 8xxx level:
- JOUR 5xxx
- or JOUR 8xxx

Doctoral
Required Courses
Take 14 or more credit(s) from the following:
• JOUR 5xxx
• JOUR 8xxx

- MELAB

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
34 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.5 is required for students to remain in good standing.

A minimum of 46 course credits and 24 thesis credits are required. Coursework must include 16 credits in required core courses, and at least 30 other graduate credits. Of these credits, at least 18 credits must come from SJMC courses and at least 12 credits from outside the SJMC. All courses included on the PhD graduate degree plan must be taken A-F, except for JOUR 8009, which is taken S/N.

Required Mass Communication Core
- JOUR 8001 - Studies and Theories of Mass Communication (3.0 cr)
- JOUR 8009 - Pro-seminar in Mass Communication (1.0 cr)
One additional theory course either inside of outside the SJMC, chosen in consultation with the student's adviser (3.0 cr)

Required Methodology Core
- JOUR 8501 - Seminar: The Process of Quantitative Mass Communication Research (3.0 cr)
- JOUR 8503 - Seminar: Qualitative Methods in Mass Communication Research (3.0 cr)
One additional methods course outside of the SJMC, chosen in consultation with the student's adviser (3.0 cr)

Electives
Take 18 or more credit(s) from the following:
- JOUR 5xxx
- JOUR 8xxx

Outside the Major in a Supporting Program
Take 12 credits outside the major in a minor or supporting program.

Thesis Credits
Take exactly 24 credit(s) from the following:
- JOUR 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Joint- or Dual-degree Coursework: JD/ Mass Communications PhD
Twin Cities Campus

Medieval Studies Minor

College of Liberal Arts

Medieval Studies Minor

Contact Information:
Department of Center for Medieval Studies, 1110 Heller Hall, 271 19th Avenue South, Minneapolis, MN 55455 (612-626-0805).
Email: cmedst@umn.edu
Website: http://cmedst.umn.edu

Program Type: Graduate free-standing minor
Requirements for this program are current for Fall 2018
Length of program in credits (Masters): 6
Length of program in credits (Doctorate): 12
This program does not require summer semesters for timely completion.

The medieval studies minor is available to master's and doctoral students. The Center for Medieval Studies (CMS) encourages collegial interaction and scholarly collaboration among faculty and students in all areas of medieval studies. CMS seeks to provide an opportunity for scholars of all disciplines and at all levels to focus intensively on historical, literary, anthropological, social, economic, religious, artistic, cultural, and methodological inquiries into the medieval period, which may fall within the chronology of roughly 300 to 1,500 A.D. The program emphasizes an interdisciplinary and cross-cultural approach to medieval culture including the study of medieval texts in original languages. Departments associated with the minor include: history; art history; theatre arts; music; English; French and Italian; German, Scandinavian, and Dutch; Spanish and Portuguese studies; Classical and Near Eastern studies; Asian languages and literatures; and others.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Use of 4xxx courses toward program requirements is permitted only with the permission of the CMS director.

The master's minor requires 6 graduate credits: two courses in medieval studies outside the student's major department, including a course which demonstrates command of Latin texts, normally LATN 51xx or higher or other Latin course by permission of the director of graduate studies, and one additional course in MEST or on a medieval topic.

The doctoral minor requires 12 graduate credits: four courses in medieval studies outside the student's major department, including a course which demonstrates command of Latin texts, normally LATN 51xx or higher or other Latin course by permission of the DGS; a second Latin course 51xx or above, or a course 5xxx or above in Arabic, Greek, Hebrew, classical Chinese, or a medieval vernacular; and two additional courses in MEST or on medieval topics.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Latin Course
Take 3 or more credit(s) from the following:
- LAT 5xxx
- LAT 8xxx

Medieval Studies or Medieval Topics Course
Course must be outside of the student's major field.

Consult with the Medieval Studies director of graduate studies for other courses that may fulfill this requirement.
Take 3 or more credit(s) from the following:
- MEST 4610 - Intermediate Topics in Medieval Studies (3.0 - 4.0 cr)
- MEST 5610 - Advanced Topics in Medieval Studies (3.0 - 4.0 cr)
- MEST 5993 - Directed Studies in Medieval Studies (1.0 - 3.0 cr)
- MEST 8010 - Medieval Studies Colloquium (3.0 cr)
- MEST 8110 - Seminar in Medieval Studies (3.0 - 4.0 cr)
- MEST 5xxx
- MEST 8xxx
- ANTH 5442 - Archaeology of the British Isles (3.0 cr)
- ARCH 5423 - Gothic Architecture (3.0 cr)
- ARTH 5324 - 15th-Century Painting (3.0 cr)
- ARTH 5765 - Early Chinese Art (3.0 cr)
- ARTH 5777 - The Diversity of Traditions: Indian Art 1200 to Present (3.0 cr)
- ARTH 5787 - Visual Cultures in Contact: Cross-Cultural Interaction in the Ancient and Early Medieval Worlds (3.0 cr)
- ARTH 8200 - Seminar: Medieval Art (3.0 cr)
- ENGL 4612 - Old English I (3.0 cr)
- ENGL 4613 - Old English II (3.0 cr)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The moving image increasingly permeates the fabric of contemporary culture and society. From cinema theaters and home televisions to installation art, portable electronic devices, medical technologies, and science laboratories, and in public spaces from airport terminals to building façades, the moving image is nearly ubiquitous.

The graduate minor in moving image studies trains students from a variety of disciplinary fields in the critical analysis of the moving image in its disparate yet interrelated forms. Drawing from the faculty's extensive research interests and expertise, the curriculum brings together discourses ranging from film theory to media studies, from the philosophy of the image to the history of technology, and beyond.

Program Delivery
This program is available:
* via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Admission to the minor is by request, with the approval of the student's adviser and the director of Graduate Studies of the minor.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The PhD minor (minimum 15 credits) requires two core courses (6 credits): MIMS 8001 - Theories of the Moving Image (3 credits), and MIMS 8003 - Historiography of the Moving Image (3 credits). The PhD minor also requires three electives (minimum 9 credits): one 8xxx Topics Course (3 credits) chosen from a list of courses offered in a given year by film/media faculty in various departments, and two additional 5xxx or 8xxx courses (6 credits) chosen from a list of courses offered in a given year by film/media faculty in various departments, including, as a recommended option, a production-based course. The master's minor (minimum 9 credits) requires two core courses (6 credits): MIMS 8001 - Theories of the Moving Image (3 credits), and MIMS 8003 - Historiography of the Moving Image (3 credits). The master's minor also requires one additional 5xxx or 8xxx course (3 credits) chosen from a list of courses offered by film/media faculty in various departments.

Students are advised to check the program website indicated above for updated information.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

**Master's**

**Required Courses**
- MIMS 8001 - Theories of the Moving Image (3.0 cr)
- MIMS 8003 - Historiography of the Moving Image (3.0 cr)

**Electives**
- Take 3 or more credit(s) from the following:
  - 5xxx or 8xxx courses (3.0 cr) chosen from a list of courses offered in a given year by film/media faculty in various departments.

**Doctoral**

**Required**
- MIMS 8001 - Theories of the Moving Image (3.0 cr)
- MIMS 8003 - Historiography of the Moving Image (3.0 cr)

**Electives**
- Take 9 or more credit(s) from the following:
  - 8xxx - Topics Course (3.0 cr) chosen from a list of courses offered in a given year by film/media faculty in various departments.
  - 5xxx or 8xxx courses (6.0 cr) chosen from a list of courses offered in a given year by film/media faculty in various departments, including, as a recommended option, a production-based course.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 85 to 90
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Musical Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Music offers the degrees of master of arts (M.A.), master of music (M.M.), doctor of musical arts (D.M.A.), and doctor of philosophy (Ph.D.). Specific degree plans and emphases are listed in each degree’s program requirements.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants interested in doctoral level study must hold a master’s degree in an appropriate field of study.

Other requirements to be completed before admission:
Applicants must hold a bachelor’s degree or its equivalent with a major emphasis in one of the following areas of music: musicology/ethnomusicology, theory and/or composition, performance, or music education/therapy.

The performance degree (D.M.A.) requires an audition for admission.

The conducting degree (D.M.A.) requires a preliminary DVD, an audition, and interview for admission.

Special Application Requirements:
For some areas of performance, a preliminary DVD may be required prior to scheduling an audition.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 21
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
74 to 79 credits are required in the major.
9 credits are required outside the major.
4 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: Varies according to field.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The doctor of musical arts offers and emphases in piano, organ, voice, guitar, collaborative piano/coaching, conducting, and instrumental performance (violin, viola, cello, flute, oboe, clarinet, saxophone, bassoon, trumpet, trombone, and percussion).

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 43 to 47
- This program does not require summer semesters for timely completion.
- Degree: Music Education Postbaccalaureate Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This post-baccalaureate certificate has two emphases that align with state teacher education requirements: K-12 Instrumental/General Music and K-12 Vocal/General Music. The certificate enables students with previous performance degrees to complete the required curriculum for licensure to teach music in K-12 settings in the state of Minnesota.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Eligibility requirements include a completed music degree from an accredited college or university with the following minima:
Music Theory and Aural Skills sequence--normally at least 4 semesters
Music History--a full sequence of at least 2 semesters of Western Art Music History from Renaissance to the present AND at least one semester of music history that focuses on genres beyond Western Art Music
Applied Music--7 semesters of intensive applied study on an instrument
Ensembles--at least 7 semesters of ensemble experience, at least 4 of which should be large ensembles appropriate to the major:
Wind Ensemble, Orchestra, or Symphonic band
Basic Conducting, One semester of basic conducting
Chorus or University Singers
Individual courses that are used to meet the above requirements must be passed with a grade of C- or better
Overall GPA must be at least 3.0

Special Application Requirements:
2 letters of recommendation
30 hours of field experience in a K-12 setting
Performance DVD on primary instrument
Successful completion of the Proficiency Exam for Music Education
- Written Skills
- Oral Skills
- Accompanying Skills
- Song- Leading Skills
- Error- Detection Skills

For an online application or for more information about graduate education admissions, see the General Information section of the
Program Requirements

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Prerequisite courses:

All students must complete the following prerequisite course, or its equivalent as determined by the certificate program:
MUED 1201 Intro to Music Ed 2 credits

Students pursuing the Instrumental Emphasis must complete the following prerequisite course, or its equivalent as determined by the certificate program:
MUS 1260 Voice Class 2 credits
OR
MUSA 1404 Voice: Music Major Secondary 2-4 credits

Students pursuing the Vocal (Piano or Voice) Emphasis must complete the following prerequisite course, or its equivalent as determined by the certificate program:
MUSA 1404 Voice: Music Major Secondary 2-4 credits
OR
MUSA 1401 Piano: Music Major Secondary 2-4 credits

Professional Education Requirements

Take the following courses for a total of 11 credits. CI 5452 must be taken for 2 credits.
CI 4602 - English Learners and Academic Language (1.0 cr)
CI 5163 - Child and Adolescent Development for Teaching and Learning I (1.0 cr)
CI 5164 - Child and Adolescent Development for Teaching and Learning II (2.0 cr)
CI 5452 - Reading in the Content Areas for Initial Licensure Candidates (1.0 - 2.0 cr)
EPSY 4001 - Teaching Students with Special Needs in Inclusive Settings (1.0 cr)
OLPD 5005 - School and Society (2.0 cr)
OLPD 5009 - Human Relations: Applied Skills for School and Society (1.0 cr)
PUBH 6003 - Fundamentals of Alcohol and Drug Abuse for Teacher Education (1.0 cr)

Music Education Core Requirements

Take the following courses for a total of 15 credits. MUED 5350 is taken for 5 credits.
MUED 5101 - Improvisation and Creativity in the Music Classroom (2.0 cr)
MUED 5301 - General Music I (3.0 cr)
MUED 5302 - General Music II (3.0 cr)
MUED 5350 - Student Teaching in Classroom Music (4.0 - 8.0 cr)
MUED 5650 - Student Teaching Seminar (2.0 cr)

Emphasis Options

Instrumental Emphasis

Take the following courses for a total of 21 credits. MUED 5550 is taken for 5 credits.
MUED 4502 - String Techniques and Teaching (2.0 cr)
MUED 4503 - Woodwind Techniques and Teaching (2.0 cr)
MUED 4504 - Brass Techniques and Teaching (2.0 cr)
MUED 4505 - Percussion Techniques and Teaching (2.0 cr)
MUED 5516 - Instrumental Methods and Materials I (3.0 cr)
MUED 5517 - Instrumental Methods and Materials II (3.0 cr)
MUED 5519 - Advanced Conducting and Repertoire (Instrumental) (2.0 cr)
-OR-

Vocal Emphasis (Piano or Voice)

Take the following courses for a total of 17 credits. MUED 5450 is taken for 5 credits.
MUED 4417 - Style, Pedagogy, and Diction in the Choral Music Classroom I (2.0 cr)
MUED 4418 - Style, Pedagogy, and Diction in the Choral Music Classroom II (2.0 cr)
MUED 5415 - Choral/Vocal Methods and Materials I (3.0 cr)
MUED 5416 - Choral/Vocal Methods and Materials II (3.0 cr)
MUED 5419 - Advanced Conducting and Repertoire (Choral) (2.0 cr)
MUED 5450 - Student Teaching in Vocal Music (4.0 - 8.0 cr)

Website: http://www.music.umn.edu

Program Type: Master's
Requirements for this program are current for Fall 2018
Length of program in credits: 30 to 35
This program does not require summer semesters for timely completion.
Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Music offers the degrees of master of arts (MA) with an emphasis in composition, music therapy, musicology (ethnomusicology), and theory.

Program Delivery
This program is available:
via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Applicants must hold a bachelor’s degree or its equivalent with a major emphasis in one of the following areas of music: musicology/ethnomusicology, theory and/or composition, performance, or music therapy.

Special Application Requirements:
The M.A.’s theory emphasis requires submission of original papers (one tonal and one post-tonal analysis) for admission.
The composition emphasis requires submissions of original scores and recordings (2-4 scores of varying genres) for admission.
The musicology/ethnomusicology emphasis requires the submission of original papers for admission.
The music therapy emphasis requires documentation of at least 3,500 hours of clinical experience. An interview is also required.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 19 major credits, 3 to 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written and oral.
This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Language Requirement: Varies according to field.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Language requirements: A reading knowledge of French, German, or Italian is required for all MA degree emphases except therapy. For the emphasis in composition, reading knowledge of a foreign language or, with approval, an equivalent research tool.

The master of arts in music offers emphases in musicology/ethnomusicology (Plan A and Plan B), theory (Plan B only), composition (Plan B only).

The MA in music with emphasis in musicology/ethnomusicology requires 35 credits (25 course credits and 10 thesis credits) for Plan A and 31 course credits for Plan B; the emphasis in composition (Plan B only) requires 35 course credits, and the emphasis in music theory (Plan B only) requires 30 course credits. The credit totals for these emphases include 6 credits required for courses outside the major field. Final Exams: For the emphasis in musicology/ethnomusicology, the final exams are written and oral. For the emphases in theory and composition, the final exams are oral.

Concentrations

1. Theory
   (Plan B only)
   **Music Theory and/or Analysis**
   Take 18 or more credit(s) from the following:
   • MUS 85xx
   **Musicology/Ethnomusicology**
   Take 3 or more credit(s) from the following:
   • MUS 86xx
   • MUS 88xx
   **Music Electives**
   Courses chosen in consultation with the director of graduate studies. Courses include music composition, musicology, ethnomusicology, or performance. NOT including music education or therapy.
   Take 3 or more credit(s) from the following:
   • MUS 5xxx
   • MUS 8xxx
   • MUSA 5xxx
   • MUSA 8xxx
   **Outside the Major in a Supporting Program**
   Students choose 6 credits outside of the major in consultation with the director of graduate studies. This may also include courses in music education (MuEd) or music therapy.

   -OR-

2. Musicology/Ethnomusicology
   **Required Courses**
   • MUS 8644 - Seminar: Advanced Research in Historical Musicology (3.0 cr)
   • MUS 8864 - Current Issues in Ethnomusicology (3.0 cr)
   • MUS 85xx - Seminar in Music Theory (3.0 cr)
   **Outside the Major in a Supporting Program**
   Students choose 6 credits outside of the major in consultation with the director of graduate studies. This may also include courses in music education or music therapy.

**Plan Options**

**Plan A**
   **Musicology or Ethnomusicology Electives**
   Take 9 or more credit(s) from the following:
   • MUS 56xx
   • MUS 86xx
   • MUS 58xx
   • MUS 88xx
   **Thesis Credits**
Take exactly 10 credit(s) from the following:
- MUS 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

or Plan B

Musicology or Ethnomusicology Electives
Take 15 or more credit(s) from the following:
- MUS 56xx
- MUS 58xx
- MUS 86xx
- MUS 88xx

-OR-

3. Composition
(Plan B only)
MUS 5591 - Introduction to Music Information Technology (3.0 cr)

Theory and/or Analysis
Take 3 or more credit(s) from the following:
- MUS 85xx

Composition
Take exactly 12 credit(s) from the following:
- MUS 8550 - Composition (3.0 cr)

Musicology/Ethnomusicology
Take 3 or more credit(s) from the following:
- MUS 56xx
- MUS 58xx
- MUS 86xx
- MUS 88xx

Creative Studies and Media
Courses chosen in consultation with the director of graduate studies.
Take 6 or more credit(s) from the following:
- MUS 5xxx
- MUS 8xxx

Ensemble
Take exactly 2 credit(s) from the following:
- MUS 54xx

Outside the major in a Supporting Program
Students choose 3 credits outside of the major in consultation with the director of graduate studies. This may also include courses in music education (MuEd) or music therapy.

-OR-

4. Music Therapy Equivalency
(Plan B only)
Bachelor’s Equivalent Coursework for Music Therapy
If students have not taken these courses during their bachelor's degree, they are required to take them as graduate students.

Prerequisites
MUED 3802 - Guitar I for Music Education and Music Therapy Majors: Developing Group Songleading Skills (2.0 cr)
MUED 3803 - Guitar II for Music Education and Music Therapy Majors: Developing Group Songleading Skills (2.0 cr)
MUED 5803 - Therapeutic Management in Music Settings (4.0 cr)
MUED 5804 - Music Therapy Methods and Procedures I (4.0 cr)
MUED 5805 - Music Therapy Methods and Procedures II (4.0 cr)
MUED 5806 - Career Preparation (4.0 cr)

Internship
MUED 5855 - Music Therapy Internship (1.0 - 13.0 cr)

Psychiatric Music Therapy
(3 credits; 4 credits if includes clinical component)
Take 3 - 4 credit(s) from the following:
- MUED 5807 - Psychiatric Music Therapy (3.0 - 4.0 cr)

Medical Music Therapy
(3 credits; 4 credits if includes clinical component)
Take 3 - 4 credit(s) from the following:
- MUED 5808 - Medical Music Therapy (3.0 - 4.0 cr)

Research Core
Take 6 or more credit(s) from the following:
- MUED 8112 - Introduction to Research Methods and Design in Arts Education (3.0 cr)
- MUED 8115 - Assessment in Arts Education (3.0 cr)
- MUED 8118 - Qualitative Research in Arts Education (3.0 cr)
Music Electives
Can be taken in musicology/ethnomusicology, theory, and creative studies and media.
Take 6 or more credit(s) from the following:
MUS 55xx
MUS 56xx
MUS 57xx
MUS 58xx
MUS 85xx
MUS 86xx
MUS 87xx
MUS 88xx

Research Project
Take 5 or more credit(s) from the following:
•MUED 8880 - Master's Research Project (3.0 - 6.0 cr)

Outside the Major in a Supporting Program
At least 3 credits MUST be taken outside the School of Music. May include social work, psychology, education, health, music, or music education/therapy (pending advisor approval).

5. Music Therapy Post Board Certification
(Plan B Only)
Music Therapy Courses
One of the following courses must be taken for 4 credits by including a clinical component.
Take 7 - 8 credit(s) from the following:
•MUED 5807 - Psychiatric Music Therapy (3.0 - 4.0 cr)
•MUED 5808 - Medical Music Therapy (3.0 - 4.0 cr)

Research Core
Take 6 or more credit(s) from the following:
•MUED 8112 - Introduction to Research Methods and Design in Arts Education (3.0 cr)
•MUED 8115 - Assessment in Arts Education (3.0 cr)
•MUED 8118 - Qualitative Research in Arts Education (3.0 cr)

Music Electives
Musicology/ethnomusicology, theory, and creative studies and media
Take 6 or more credit(s) from the following:
MUS 55xx
MUS 56xx
MUS 57xx
MUS 58xx
MUS 85xx
MUS 86xx
MUS 87xx
MUS 88xx

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Music Education
This sub-plan is limited to students completing the program under Plan B.

The Music Education sub-plan is no longer accepting applications, Music Education is now served by the Music Education Post-Baccalaureate Certificate option. Please refer to the School of Music's website at http://www.music.umn.edu.

Website: http://www.music.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Music

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Music offers the degrees of master of arts (M.A.), master of music (M.M.), doctor of musical arts (D.M.A.), and doctor of philosophy (Ph.D.). Specific degree plans and emphases are listed in each degree’s program requirements.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants interested in doctoral level study must hold a master's degree in an appropriate field of study.

Other requirements to be completed before admission:
Applicants must hold a bachelor's degree or its equivalent with a major emphasis in one of the following areas of music: musicology/ethnomusicology, theory and/or composition, performance, or music education/therapy.

The collaborative piano/coaching M.M. requires an audition for admission.

The M.M. in choral conducting, orchestral conducting, and wind ensemble/band conducting degrees all required a preliminary DVD, audition, and interview for admission.

The performance M.M. requires an audition for admission.

Special Application Requirements:
For some areas of performance, a preliminary DVD may be required prior to scheduling an audition.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 30 major credits and up to null credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The master of music degree offers emphases in piano, organ, voice, violin, viola, cello, double bass, violin performance and Suzuki pedagogy, flute, oboe, clarinet, saxophone, bassoon, French horn, trumpet, trombone, euphonium, tuba, percussion, harp, guitar, collaborative piano/coaching, orchestral conducting, wind ensemble/band conducting, and choral conducting.

The M.M. requires credit distribution among the following for each emphasis: applied music, study directly related to the emphasis (literature, pedagogy, performance practice, conducting, secondary instrument, chamber music, etc.), ensemble, and musicology/ethnomusicology and theory/composition. One recital is required for all emphases except collaborative piano/coaching, which requires two.

The minimum credit requirement for each emphasis is as follows: 30 credits are required for piano, instrumental performance, guitar, piano pedagogy, orchestral conducting, wind ensemble/band conducting, and choral conducting; 33 credits for organ and voice; 37 credits for violin performance and Suzuki pedagogy; 39 credits for collaborative piano/coaching.

The M.M. in both Research requires 33 credits and the M.M. in Pedagogy requires 30 credits.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The music minor is open to non-music major graduate students.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Applicants must be actively pursuing a graduate degree in a non-music field at the University of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The music minor requires a minimum of 12 credits (four 8xxx-level, 3-credit courses) in musicology/ethnomusicology or theory.
One or more courses may be at the 5xxx-level, but only with prior approval of the student's advisor and the music director of graduate studies.
Prior to registering for any 5xxx- or 8xxx-level courses offered by the School of Music, students must complete any prerequisites or background-knowledge equivalents, or obtain instructor approval.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Doctoral
Required Courses
*Can substitute 5xxx-level or MUSA 83xx with director of graduate studies approval.
Take 12 or more credit(s) from the following:
ONLY MUS 85xx, 86xx, 88xx.
Twin Cities Campus
Music Ph.D.
School of Music
College of Liberal Arts

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 87 to 92
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Music offers the degrees of master of arts (M.A.), master of music (M.M.), doctor of musical arts (D.M.A.), and doctor of philosophy (Ph.D.). Specific degree plans and emphases are listed in each degree's program requirements.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants interested in doctoral level study must hold a master's degree in an appropriate field of study. For the Ph.D. in music education/therapy, applicants must also have documentation of at least 3 years of teaching experience or at least 3,500 hours of clinical experience.

Special Application Requirements:
The theory Ph.D. requires original papers (one tonal and one post-tonal analysis) for admission.
The composition Ph.D. requires original scores and recordings (2-4 scores of varying genre) for admission.
The musicology/ethnomusicology Ph.D. requires original papers for admission.
The music education/music therapy Ph.D. requires original papers (e.g. research or professional papers) and documentation of at least 3 years of teaching experience or at least 3,500 hours of clinical experience. An interview is also required.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
51 to 56 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: Varies according to field.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The language requirement for musicology and ethnomusicology includes two languages chosen from French, German, and Italian. Substitution may be made when a different language is needed for the thesis.

For composition, the language requirement includes reading knowledge of two foreign languages; with approval, an equivalent research tool may be substituted for a foreign language.

For theory, the language requirement includes German and either French or Italian. Substitution may be made when a different language is needed for the thesis; with approval, the second language may also be replaced by a collateral field of knowledge or a special research technique.

There is no language requirement for the education/therapy degree.

Department of Philosophy, 271 19th Avenue South, 831 Heller Hall, Minneapolis, MN 55455-0310 (612-625-6563; fax: 612-626-8380)
Email: umphil@umn.edu
Website: http://www.philosophy.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students are primarily admitted to the PhD program, while admission to the MA is intended for those with professional goals in other fields, and is limited (0-2 candidates per year).

Philosophy is noteworthy for its emphasis on the individual student's research interests. With the help of an advisor, students design their own program of study, which consists of the philosophy major and either a supporting program or a minor. The minor or supporting program, drawn at least in part from a department or departments other than philosophy, complements the student's research focus. Students gain a broad base of knowledge through required coursework. Terminal MA students are required to take two history courses; one in ancient philosophy and one in modern.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Recognizing that evidence of ability to pursue graduate study in philosophy is diverse, the department does not specify prerequisites for admission. Normally, those admitted have a broad undergraduate background that includes some courses in philosophy.

Special Application Requirements:
Students must apply to both the University and the Department of Philosophy. The department application for admission and aid is available from the Admissions and Aid Committee at the address listed above, or may be downloaded from the philosophy website at www.philosophy.umn.edu. All application materials may be uploaded the Graduate School Admissions website. Department materials required include a completed application form, personal statement, transcripts, scores from the GRE General Test, three letters of recommendation, and a writing sample. Students interested in DOVE or ICGC Fellowship (Interdisciplinary Center for Global Change) should include a statement expressing their interest. Students interested in the ICGC Fellowship should also contact the Interdisciplinary Center for the Study of Global Change. Applications, together with all supporting materials, must be received by December 31. The philosophy department reviews applications once a year, and admits students for entry in the fall semester only.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
- Total Score: 6.5

• MELAB

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The project is three Plan B papers. For details see Philosophy Department Degree Program: MA, available as a PDF on the philosophy website at www.philosophy.umn.edu.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Use of 4xxx level courses toward program requirements is permitted under certain conditions with advisor approval. For graduate credit, students must enroll in the appropriate 8xxx level (1 credit) accompanying workshop.

Courses from outside the Philosophy department, in consultation with the director of graduate studies, may be applied towards the major credit requirement in certain circumstances.

Required Philosophy Courses

Philosophy coursework should show that consideration has been paid to the diversity and variety of areas of philosophy, as well as to the student's specialized interest. The department recommends that students consult with their advisors and the director of graduate studies when choosing coursework.

Take 14 or more credit(s) from the following:

• PHIL 5xxx
• PHIL 8xxx

Outside Courses -- Related Fields

Take 6 credits outside the major in related fields or a minor.

Plan Options

Plan A

Thesis Credits

Take 10 or more credit(s) from the following:

• PHIL 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B

Take 10 or more credit(s) from the following:

• PHIL 5xxx
• PHIL 8xxx
Twin Cities Campus

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

A master's minor requires 6 course credits in philosophy approved by the director of graduate studies in Philosophy. Programs are tailored to meet the interests and needs of the student. A doctoral minor requires 12 course credits in philosophy approved by the director of graduate studies in philosophy. Programs are tailored to meet the interests and needs of the student.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Students majoring in other fields who wish to pursue a Master's or Doctoral minor in philosophy should contact the director of graduate studies to set up an appointment to discuss their goals and objectives.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The philosophy minor coursework is tailored to meet the interests and needs of the student.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Required Courses
Take 6 or more credit(s) from the following:
- PHIL 5xxx
- PHIL 8xxx

Doctoral
Required Courses
Take 12 or more credit(s) from the following:
- PHIL 5xxx
Twin Cities Campus
Philosophy Ph.D.
Philosophy Department
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of Philosophy, 271 19th Avenue South, 831 Heller Hall, Minneapolis, MN  55455-0310 (612-624-6563; fax: 612-626-8380)
Email: umphil@umn.edu
Website: http://www.philosophy.umn.edu

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 62 to 68
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Philosophy offers both PhD and MA degrees. Students are primarily admitted to the PhD program, while admission to the MA is intended for those with professional goals in other fields and disciplines. The stand-alone MA program is not considered a laddering program into the PhD program at the University of Minnesota or any other institution. Students admitted to the PhD program usually choose to complete an MA Plan B en route to the PhD unless they already hold a master's degree in philosophy from another institution.

Philosophy is noteworthy for its emphasis on the individual student's research interests. With the help of an advisor, students design their own program of study, which consists of the philosophy major and either a supporting program or a minor. The minor or supporting program, drawn at least in part from a department or departments other than philosophy, complements the student's research focus. Students gain a broad base of knowledge through required coursework. PhD students take courses in four main areas: history of philosophy, logic, ELMS (epistemology, philosophy of language, metaphysics or mathematics, philosophy of science), moral and political philosophy, and value theory. These areas provide a firm foundation for research and teaching beyond the PhD program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Recognizing that evidence of ability to pursue graduate study in philosophy is diverse, the department does not specify prerequisites for admission. Normally, those admitted have a broad undergraduate background that includes some courses in philosophy.

Special Application Requirements:
Students must apply to both the University and the Department of Philosophy. The department application for admissions and aid is available from the Admissions and Aid Committee at the address listed above or may be downloaded from the philosophy website at www.philosophy.umn.edu. All application materials may be uploaded electronically to the Graduate School Admissions web site. Department materials required include a completed application form, personal statement, transcripts, three academic letters of recommendation, and a philosophical writing sample that does not exceed 25 pages. Students interested in DOVE or ICGC Fellowship (Interdisciplinary Center for Global Change) should include a statement expressing their interest. Students interested in the ICGC Fellowship should also contact the Interdisciplinary Center for the Study of Global Change. Applications, together with all supporting materials, must be received by December 31 for full consideration. The philosophy department reviews applications once a year, and only admits students for fall semester.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  - IELTS - Total Score: 6.5
  - MELAB

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
26 to 28 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

Use of 4xxx level courses toward program requirements is permitted under certain conditions with adviser approval. For graduate credit, students must enroll in the appropriate 8xxx level (1 credit) accompanying workshop. A maximum of nine (9) 4xxx level courses is allowed according to University policy.

Successful second-year department review includes completion of coursework with specified requirements, which constitutes passing the preliminary written examination. Successful third-year department review includes passing a three-paper examination, Stage 1 and Stage 2 review constitutes passing the preliminary oral examination. Students then write and defend a dissertation proposal and later defend a dissertation at the final oral examination. For details, see the Philosophy Department degree program policy, which is available as a PDF on the philosophy website: www.philosophy.umn.edu.

Required Philosophy Courses
The courses taken in philosophy should show that consideration has been paid to the diversity and variety of areas of philosophy as well as to the student’s specialized interest. The department recommends that students consult with their advisor and the director of graduate studies (DGS) when choosing coursework. Some courses outside the department of philosophy may be used in certain circumstances towards major requirements, with permission from the DGS.

Take 26 - 28 credit(s) from the following:
  • PHIL 5xxx
  • PHIL 8xxx

Outside the Major in a Supporting Field
Take 12 credits outside the major in a supporting field or minor.

Thesis Credits
Take 24 or more credit(s) from the following:
  • PHIL 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus

Political Psychology Minor

School of Journalism & Mass Communication, Political Science Department, Psychology

College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of Political Science, 1414 Social Sciences Building, 267 19th Avenue South, Minneapolis, MN 55455-0410 (612-626-7489; fax: 612-626-7599)
Email: ppcenter@umn.edu
Website: http://www.polisci.umn.edu/cspp/minor.php

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Doctorate): 13
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: This minor is available to doctoral students only.

Political psychology is a rapidly advancing field of scientific inquiry concerned with psychological aspects of political behavior. It encompasses a variety of interdisciplinary research perspectives, drawing on the theories and methods of core disciplines such as psychology, political science, law, and sociology, as well as interdisciplinary fields such as mass communication and decision sciences. The minor's structured curriculum provides a foundation in basic areas of political psychology: social attitudes and cognition, judgment and decision making, group relations, personality and leadership, mass communication, public opinion, mass political behavior, and political socialization. In addition to providing a background in political psychology, the program trains students in the theory and methods useful to this field, such as content analysis, survey analysis, and experimental design. The faculty is drawn from across the University.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctoral
Core Courses
With the approval of the minor DGS, students may substitute an alternative course of at least 3 credits for one of the three core courses listed below. This option may only be utilized if the student takes all three core courses listed below but wishes to count one of the three core courses towards their PhD major rather than their PhD minor.

POL 8311 - Political Psychology and Socialization (3.0 cr)
PSY 8201 - Social Cognition (3.0 cr)
JOUR 8661 - Seminar: Mediated Political Communication in the Digital Age (3.0 cr)

Political Psychology Proseminar
Take at least two semesters of the proseminar.
POL 8307 - Proseminar in Political Psychology I (2.0 cr)
POL 8308 - Proseminar in Political Psychology II (2.0 cr)
or PSY 8211 - Proseminar in Political Psychology I (2.0 cr)
PSY 8212 - Proseminar in Political Psychology II (2.0 cr)

**Methodology Requirement**

Students are advised to do a sequence of methods courses appropriate for their own research plans in political psychology. Generally, this is the standard quantitative method sequence within their major field (e.g. PSY 8814/8815; POL 8106/8107), but may include other courses depending on the students research goals. Students should consult with the minor DGS, especially if they do not plan to complete the standard quantitative method sequence in their major field.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 33
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The political science program only admits students into the PhD program. However, students admitted to the PhD program may earn a master's degree (Plan B) while pursuing their doctorate.

The political science curriculum is divided into five subfields: formal models and methodology, political theory, American politics, international relations, and comparative politics.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 27 major credits and 6 credits outside the major. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Three research papers, usually written in connection with coursework, are required.
Emphases
Choose two core courses from the emphases listed below.
Take 6 or more credit(s) from the following:

Political Theory
- POL 8201 - Understanding Political Theory (3.0 cr)
- American Politics
  - POL 8301 - American Politics (3.0 cr)
- International Relations
  - POL 8401 - International Relations (3.0 cr)
- Comparative Politics
  - POL 8601 - Introduction to Comparative Politics (3.0 cr)
- Political Models and Methodology
  - POL 8120 - Core Course in Political Methodology: Modeling Political Processes (3.0 cr)

Electives
Select two emphases from the above list, and take 9 elective credits to fulfill requirements for each. The additional elective credits can be chosen from any emphasis.

Emphasis 1
Take 9 or more credit(s) from the following:
- POL 8xxx

Emphasis 2
Take 9 or more credit(s) from the following:
- POL 8xxx

Floating Elective
Take 3 or more credit(s) from the following:
- POL 8xxx

Outside Coursework
Take at least 6 credits outside the major.
Twin Cities Campus
Political Science Ph.D.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The political science curriculum is divided into five subfields: formal models and methodology, political theory, American politics, international relations, and comparative politics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
All students are admitted directly into the Ph.D. program. To apply, submit the following through the University's graduate online application: Unofficial transcripts, research and diversity statements, GRE scores, three letters of recommendation, curriculum vitae or resume, writing sample, TOEFL or IELTS for non-native English speakers.

The application deadline is December 15. For more information, see the Political Science Admissions website.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
30 credits are required in the major.
6 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.30 is required for students to remain in good standing.

Research methodology requirementstudents must demonstrate one of the following: a) high proficiency in one foreign language; b) high proficiency in research methodology; c) low proficiency in two foreign languages; d) low proficiency in one foreign language and low proficiency in research methodology.

Field Emphases
Choose two of the core courses from the fields below:
Take 6 or more credit(s) from the following:
Political Theory
• POL 8201 - Understanding Political Theory (3.0 cr)

American Politics
• POL 8301 - American Politics (3.0 cr)

International Relations
• POL 8401 - International Relations (3.0 cr)

Comparative Politics
• POL 8601 - Introduction to Comparative Politics (3.0 cr)

Political Models and Methodology
• POL 8120 - Core Course in Political Methodology: Modeling Political Processes (3.0 cr)

Electives
Students select 2 emphases from above for which to fulfill their electives below:

Emphasis 1
Take 9 or more credit(s) from the following:
• POL 8xxx

Emphasis 2
Take 9 or more credit(s) from the following:
• POL 8xxx

Floating Elective
Take 3 or more credit(s) from the following:
• POL 8xxx

Professional Development Courses
Take 3 or more credit(s) from the following:
Taken during Spring of first year:
• POL 8104 - Professional Development I (2.0 cr)

Taken during Fall of Third year:
• POL 8105 - Professional Development II (1.0 cr)

Outside the Major in a Supporting Program
Take 6 graduate credits outside the department of political science in a minor or supporting program.

Thesis Credits
Take 24 or more credit(s) from the following:
• POL 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Population Studies Minor
Sociology
College of Liberal Arts

• Program Type: Graduate free-standing minor
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Population studies is a multidisciplinary research area at the intersection of the mathematical sciences, the health and social sciences, and public policy. The curriculum provides solid grounding in the theories and methods of demography, with additional specialized training across five interdisciplinary subject areas: historical demography, population geography, economic demography, public health demography, and family and life course demography.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

All courses should be from the same subject area and may not be in the student’s major field. Courses must be taken A-F.

SOC 8590 (Topics in Life Course Sociology; 3 credits) can be applied as an elective only if the topic is one of the following:

Sociology of Time: Age, Work and the Gendered Life Course
Work Health and Well Being

Required Courses
PA 5301 - Population Methods & Issues for the United States & Global South (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Electives
Take 3 or more credit(s) from the following:
• APEC 8701 - Trade and Development I (2.0 cr)
• FW 5051 - Analysis of Populations (4.0 cr)
• GERO 5103 - Aging and Society (2.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are admitted only for the PhD degree.

Doctoral program specialties are offered in biological psychopathology; clinical science and psychopathology research; cognitive and brain sciences; counseling psychology; industrial/organizational psychology; personality, individual differences, and behavior genetics; quantitative/psychometric methods; and social psychology.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: Plan B requires one to three review papers in lieu of a thesis.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Courses
Take 14 or more credit(s) from the following:
• PSY 5xxx
• PSY 8xxx

Outside the Major in a Supporting Program
Students are required to take 6 credits outside the major in a minor or supporting program.

Plan Options

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 60 to 72
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students are admitted only for the Ph.D. degree. Doctoral program specialties are offered in biological psychopathology; clinical science and psychopathology research; cognitive and brain sciences; counseling psychology; industrial/organizational psychology; personality, individual differences, and behavior genetics; quantitative/psychometric methods; school psychology; and social psychology.

Accreditation
This program is accredited by Committee on Accreditation of the Amer. Psychological Assoc (for Clinical & Counseling specialities)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Although there are no specific minimums for GPA and GRE scores, previous admissions statistics are available from the psychology website at psych.umn.edu.

Other requirements to be completed before admission:
Recommended academic preparation includes a minimum of 12 credits (three to four courses) of psychology coursework beyond introductory psychology, including one course in statistics or psychological measurement. Applicants to the clinical science program must have completed a course in abnormal psychology. An undergraduate major in psychology is desirable, but not required.

Special Application Requirements:
Applications are accepted for fall admission only; the deadline is December 1. A department application; a statement of career interests, goals, and objectives; three letters of recommendation from persons familiar with the applicant's scholarship and research potential; and scores from the GRE General Test are required. The GRE Subject Test in psychology is not required, but highly recommended. Applicants whose native language is not English must submit the results of the TOEFL iBT. Applications are submitted electronically through the ApplyYourself application system. For more information about the application procedures, see the psychology website at psych.umn.edu.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Internet Based - Speaking Score: 23
- IELTS
  - Total Score: 6.5
- MELAB
  - Speaking test score: 8
The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

24 to 36 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

Students must satisfy the general area distribution requirement using selected courses in four areas outside their specialization. There are no other general departmental course requirements. Each student's program is individually planned in consultation with an adviser to meet both the individual's goals and the specialty requirements. The specializations in clinical psychology and counseling psychology include specific requirements for applied coursework and practicum and internship experience. Each specialization also requires completion of a series of Ph.D. seminars covering scholarship and research skills. Students also complete a minimum of 12 credits in a minor or supporting program. Students are admitted into one specialty area when they apply. Please go to the Psychology website at www.psych.umn.edu to learn more about our specialty areas. Applicants are allowed to apply to only one specialty area.

Program Sub-plans

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

School Psychology
Twin Cities Campus
Public Art Minor

College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Public Art Program, Weisman Art Museum, University of Minnesota, 333 East River Road, Minneapolis, MN 55455 (612-625-9686; fax: 612-625-9630)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Public Art minor is inactive at this time. The graduate minor in public art (PArt) is an interdisciplinary program designed to expose students to the history of public art, contemporary issues, and current practices. The minor provides students the opportunity to work with instructors and other students with backgrounds in studio arts, design, architecture, landscape architecture, urban design, and public policy to learn collaborative methods essential to public art making and public art administration. Specifically, the minor provides students with a theoretical basis to both understand and produce public art projects. The minor includes a set of core courses in public art history, current issues and criticisms, and public engagement.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
This graduate minor is available to master's and doctoral students. Preference will be given to students with backgrounds in art, architecture, landscape architecture, urban design, and public policy. The PArt Admissions Committee screens applications and determines admission. Admission is limited to 25 students annually.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Master's and doctoral students take Issues and Ideas in Contemporary Public Art and History of Public Art as well as a practicum in Public Engagement. Doctoral students must also complete an internship.

- This program does not require summer semesters for timely completion.  
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The MA in rhetoric and scientific and technical communication prepares students to address complex issues in language, science, and technology. This program prepares students for doctoral-level research through courses and seminars in research methods, rhetoric, writing studies, pedagogy, and technical communication, technology and culture. Students also pursue additional courses of interest in allied departments to broaden their experience. In addition, you will write a research paper on a limited topic and present it at an oral examination.

Required courses include classical and modern rhetoric, research methods, and courses in writing studies and pedagogy, technical communication, and technology and culture. Students take at least 6 credits outside the department as a masters minor or supporting field. They also write a plan "B" paper in the context of a directed research course.

All MA applicants must meet the admission requirements of the University. MA applicants should have a strong interest in language and rhetorical theory or communication theory. A background in a science, Internet studies, environmental studies, or pedagogy and technology is helpful.

**Program Delivery**  
This program is available:  
* via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**  
Undergraduate degree in a related discipline.

**Special Application Requirements:**  
Scores from the General Test of the GRE that are less than five years old are required of students with baccalaureate degrees from U.S. institutions. International students are encouraged to take the General Test of the GRE. Nonnative speakers of English are required to take an appropriate test with satisfactory scores. All applicants must submit three letters of recommendation, two writing samples, and a professional objective statement. All M.A. and Ph.D. applicants begin in the fall semester and should apply by the January 1 application deadline.

International applicants must submit score(s) from one of the following tests:  
- TOEFL  
  - Internet Based - Total Score: 79  
  - Internet Based - Writing Score: 21  
  - Internet Based - Reading Score: 19  
  - Paper Based - Total Score: 550  
- IELTS  
  - Total Score: 6.5  
- MELAB  
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

Information current as of August 31, 2018
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan B:** Plan B requires 27 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

**Research Core**
- WRIT 8011 - Research Methods in Writing Studies and Technical Communication (3.0 cr)
- WRIT 8012 - Applied Research Methods in Writing Studies and Technical Communication (3.0 cr)

**Rhetoric Core**
- WRIT 5775 - The Rhetorical Tradition: Classical Period (3.0 cr)
- WRIT 5776 - The Rhetorical Tradition: Modern Era (3.0 cr)

**Writing Studies and Pedagogy**
- WRIT 8540 - Seminar in Technical Communication and Composition Pedagogies (3.0 cr)
  - or WRIT 8560 - Seminar in Writing Studies and Usability (3.0 cr)
  - or WRIT 5531 - Introduction to Writing Theory and Pedagogy (3.0 cr)

**Technical Communication and Composition Pedagogies**
- WRIT 8520 - Seminar in Scientific and Technical Communication (3.0 cr)
  - or WRIT 8550 - Seminar in Technology, Culture, and Communication (3.0 cr)

**Plan B Project Credits**
Take 3 or more credit(s) from the following:
- WRIT 8794 - Directed Research (1.0 - 4.0 cr)

**Specialty Area/Concentration**
Students are required to take 6 credits for this area, of which 3 credits must be taken in the Department of Writing Studies. The student's area of concentration will be developed chiefly through seminars in writing studies, and through consultation with the advisor.

**Outside Coursework**
Take at least 6 credits outside the Department of Writing Studies. Students often pursue a formal minor related to their research interests, chosen in conjunction with their advisor.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 66
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The primary purpose of the PhD program is to prepare graduate students to do research in areas related to writing, rhetoric, and scientific & technical communication, and to publish the results of that research.

Working in collaboration with faculty mentors, other students, and resources, such as the library and the internet, graduate students will become expert in a specialized field of knowledge, developing the scholarly and research skills needed to make a new and original contribution to research in rhetoric, composition, writing studies, literacy, or technical/scientific communication. Graduate students build their expertise and skills in the core areas of rhetoric, theory and history, writing studies and pedagogy, and technical communication and technology and culture. They also develop and refine knowledge and skills through departmental seminars and a supporting program of courses outside the department. The dissertation—an original, systematic, and significant program of research—will allow graduate students to join scholarly conversations and contribute to knowledge and theory within the field. This project, and the mentoring students receive as they complete the project, will stand students in good stead to continue to make important research contributions in their academic careers as they unfold.

Preparing graduate students to teach first-year writing, scientific and technical communication, and other courses related to their expertise is an important part of the program because the expectation is that graduates will teach at the college level. While most graduate students have entered college teaching, a few have preferred to work in industry or non-government organizations.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Masters in a related discipline, e.g., rhetoric, technical and professional communication, English, communication studies.

Other requirements to be completed before admission:
Applicants for the PhD must complete a master's degree, no later than the end of the first semester in our PhD program. Applicants will be asked to discuss their interests, explain their master's program and how the PhD will build upon it.

Special Application Requirements:
Scores from the General Test of the GRE that are less than five years old are required of students with baccalaureate degrees from U.S. institutions. International students are encouraged to take the General Test of the GRE and to have those results forwarded to the University. Nonnative speakers of English are required to take an appropriate test with satisfactory scores. All applicants must submit three letters of recommendation, two writing samples, and a professional objective statement. All M.A. and Ph.D. applicants begin in the fall semester and should apply by the January 5th application deadline.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
30 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Up to 6 credits from a master's program, upon consultation with the advisor and approval of the director of graduate studies, can be applied to the PhD.

Research Core
Take the following 6 credits of research core coursework:
- WRIT 8011 - Research Methods in Writing Studies and Technical Communication (3.0 cr)
- WRIT 8012 - Applied Research Methods in Writing Studies and Technical Communication (3.0 cr)

Required Core Areas
Take at least 3 credits from each of the following core areas, and an additional 6 credits from any of these areas, for a total of 15 credits.

Take 15 or more credit(s) from the following:
Rhetoric Theory and History
Take at least 3 credits from the following:
- WRIT 8510 - Seminar in Rhetoric (3.0 cr)
- WRIT 5775 - The Rhetorical Tradition: Classical Period (3.0 cr)
- WRIT 5776 - The Rhetorical Tradition: Modern Era (3.0 cr)

Writing Studies and Pedagogy
Take at least 3 credits from the following:
- WRIT 8540 - Seminar in Technical Communication and Composition Pedagogies (3.0 cr)
- WRIT 8560 - Seminar in Writing Studies and Usability (3.0 cr)
- WRIT 5531 - Introduction to Writing Theory and Pedagogy (3.0 cr)

Technical Communication and Composition Pedagogies
Take at least 3 credits from the following:
- WRIT 8520 - Seminar in Scientific and Technical Communication (3.0 cr)
- WRIT 8550 - Seminar in Technology, Culture, and Communication (3.0 cr)

Writing Studies Specialty Area/Concentration
Specialties include areas such as rhetoric, literacies, professional and technical communication, internet studies, theories of writing, writing pedagogies, rhetorics of science, medicine, or law, and the environment.

Writing Studies Courses
Take 6 or more credit(s) from the following:
- WRIT 5xxx
- WRIT 8xxx

Non-Writing Studies Course
Take at least 3 credits.
Coursework is chosen in consultation with the advisor, and must be outside the writing studies department but within the specialty area/concentration theme.

Outside Coursework
Take 12 credits of coursework outside the major.
Thesis Credits
Take 24 or more credit(s) from the following:
- WRT 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Scientific and Technical Communication M.S.
Writing Studies Department
College of Liberal Arts

Link to a list of faculty for this program.

Contact Information:
Department of Writing Studies, 214 Nolte Center, 315 Pillsbury Drive SE, Minneapolis, MN 55455 (612-624-3445; fax: 612-624-3617)
Email: WRIT@umn.edu
Website: http://cla.umn.edu/writing-studies

- Program Type: Master’s
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master's of science in scientific and technical communication focuses on applying basic theory and research to the practice of scientific and technical communication in the workplace.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 21 major credits and 9 credits outside the major. There is no final exam. A capstone project is required.
Capstone Project: The capstone course (WRIT 8505), this is the final course necessary to complete the degree requirements. The course is primarily for students seeking the MS in scientific and technical communication, but is also suitable for graduate students in any program who want structured support to write an extended project report. Classes are conducted in a “writers’ workshop” format, during which each student receives feedback and support for his or her individual research report writing.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Required Courses
Take the following courses for a total of 18 credits:
WRIT 5001 - Introduction to Graduate Studies in Scientific and Technical Communication (3.0 cr)
WRIT 5112 - Information Design: Theory and Practice (3.0 cr)
WRIT 5561 - Editing and Style for Technical Communicators (3.0 cr)
WRIT 8505 - Professional Practice (3.0 cr)
WRIT 5671 - Visual Rhetoric (3.0 cr)
WRIT 4501 - Usability and Human Factors in Technical Communication (3.0 cr)

Electives
Take at least 3 credits of electives, in consultation with the advisor.
Electives
Take 3 or more credit(s) from the following:
  • WRIT 4xxx

Related Field Competency Area
Take at least 9 credits outside the Department of Writing Studies, in consultation with the director of graduate studies.
Possible areas of study include, but are not limited to:
  Health sciences
  International technical communication
  Food science and nutrition
  Technical communication and software engineering
  Technical communication and environmental science
  Technical communication and law
Twin Cities Campus
Scientific and Technical Communication Minor

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 33
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: The sociology program only admits students into the Ph.D. program. However, students admitted to the Ph.D. may earn a master's degree while pursuing their doctorate. See the Ph.D. for admissions information.

Sociology is concerned with the study of human societies, groups, and social life. The program offers substantive training in seven areas of specialization:

1. Demography and population studies
2. Global, Transnational, & Comparative Sociology
3. Inequalities and identities: race, gender, sexuality, class, religion, and nation
4. Law, crime, punishment, and human rights
5. Life course: Family, education, and well-being
6. Networks, organizations, and work
7. Theory, knowledge, and culture

Methodological training is available in historical and comparative research, survey research, network analysis, advanced statistical analysis, and qualitative research.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

Special Application Requirements:
The sociology program only admits students into the Ph.D. program. However, students admitted to the Ph.D. may earn a master's degree while pursuing their doctorate. See the Ph.D. for admissions information.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 17 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written and oral.
This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

**Required Core Courses (17 Credits)**

- SOC 8701 - Sociological Theory (4.0 cr)
- SOC 8801 - Sociological Research Methods (4.0 cr)
- SOC 8811 - Advanced Social Statistics (4.0 cr)

Take 3 or more credit(s) from the following:

- SOC 8851 - Advanced Qualitative Research Methods: In-Depth Interviewing (3.0 cr)
- SOC 8852 - Advanced Qualitative Research Methods: Ethnographic Practicum (3.0 cr)
- SOC 8853 - Advanced Qualitative Research Methods: Historical & Comparative Sociology (3.0 cr)
- SOC 8890 - Advanced Topics in Research Methods (2.0 - 3.0 cr)

Take 2 or more credit(s) from the following:

- SOC 8001 - Sociology as a Profession (1.0 cr)

**Outside Coursework (6 Credits)**

Select 6 credits outside the major, in consultation with the advisor.

**Plan Options**

**Plan A**

Thesis Credits

Take 10 or more credit(s) from the following:

- SOC 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

**Plan B**

Select additional coursework in consultation with the advisor.

Take 7 or more credit(s) from the following:

- SOC 8xxx
**Twin Cities Campus**

**Sociology Minor**

*Sociology*

*College of Liberal Arts*

5. Life course: Family, education, and well-being
6. Networks, organizations, and work
7. Theory, knowledge, and culture

Methodological training is available in historical and comparative research, survey research, network analysis, advanced statistical analysis, and qualitative research. The doctoral program is for students planning to do research or teach.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
Students are not required to have earned a graduate or professional degree prior to entering the program.

It is recommended that applicants have a background in basic sociology, usually consisting of the equivalent of 18 credits in undergraduate work (including 9 credits of social science statistical methods), or an MA degree in sociology or a closely related field. Individuals without sociology coursework are generally required to complete background coursework in theory and statistics during their first year of residence.

Special Application Requirements:
Applicants are evaluated on their academic potential, commitment to the field, creativity, and potential for contribution to the field. In addition to the University application form, and its required documents, applicants must submit the following: GRE scores; a sample of written work, usually a term paper, written in English; three letters of recommendation; and a personal statement of professional objectives. Non-native English speakers are required to take the TOEFL test, this includes students who have studied in the U.S. The department accepts new students for fall admission only. The application deadline is December 15.

Applicants must submit their test score(s) from the following:
- GRE
International applicants must submit score(s) from one of the following tests:

- TOEFL
  - Internet Based - Total Score: 95
  - Internet Based - Listening Score: 22
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 22
  - Internet Based - Speaking Score: 27
  - Paper Based - Total Score: 587

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
29 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

Required Core Courses (17 Credits)
Take 17 or more credit(s) from the following:
- SOC 8701 - Sociological Theory (4.0 cr)
- SOC 8801 - Sociological Research Methods (4.0 cr)
- SOC 8811 - Advanced Social Statistics (4.0 cr)
- Take 3 or more credit(s) from the following:

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 36 to 60
- This program requires summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Speech-Language-Hearing Sciences offers an MA with three tracks: speech-language pathology, audiology, and speech-language-hearing sciences; however, the department only accepts MA applications for the speech-language pathology track. The speech-language pathology track focuses on meeting standards for certification as a speech-language pathologist by the American Speech-Language-Hearing Association. It emphasizes outcome-based learning activities that prepare graduates to interpret research findings and incorporate them into clinical practice. Coursework and clinical education focus on diagnostic, rehabilitative techniques, technology counseling approaches, and human development.

Individuals interested in pursuing an advanced degree in audiology should apply directly to the audiology AuD program. Students admitted to the AuD are eligible to apply for the MA with an audiology track.

The Speech-Language Pathology MA program is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association, 2200 Research Blvd, Rockville, MD 20850, Telephone: 800-638-8255

Accreditation
This program is accredited by American Speech-Language-Hearing Association (ASHA).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Prerequisite coursework includes undergraduate transcript credit in physical science, biological science, social/behavioral science, and statistics.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

© 2005 by the Regents of the University of Minnesota

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Speech-Language Pathology
This sub-plan is limited to students completing the program under Plan A or Plan C.

The speech-language pathology program emphasizes outcome-based learning activities that prepare graduates to interpret research findings and incorporate them into clinical practice. Coursework and clinical education focus on diagnostic, rehabilitative techniques, technology counseling approaches, and human development. This sub-plan is accredited by the American Speech-Language-Hearing Association for certification in speech-language pathology.

Students in this sub-plan may elect the Plan A option (60-credit minimum) or the Plan C option (54-credit minimum).

Speech Language Pathology: Required Courses
SLHS 5401 - Counseling and Professional Issues (3.0 cr)
SLHS 5502 - Voice and Cleft Palate (3.0 cr)
SLHS 5503 - Fluency and Motor Speech Disorders (3.0 cr)
SLHS 5504 - Evaluation and Management of Dysphagia (2.0 cr)
SLHS 5602 - Speech Sound Disorders: Assessment and Treatment across Languages (3.0 cr)
SLHS 5603 - Assessment and Intervention of Language Disorders in Children (3.0 cr)
SLHS 5605 - Language and Cognitive Disorders in Adults (3.0 cr)
SLHS 5606 - Introduction to Augmentative and Alternative Communication (3.0 cr)
SLHS 5608 - Clinical Issues in Bilingualism and Cultural Diversity (3.0 cr)

Clinical Education in Speech-Language Pathology
Take exactly 17 credit(s) from the following:
• SLHS 8720 - Clinical Education in Speech-Language Pathology (1.0 - 8.0 cr)

Clinical Education in Audiology
Take exactly 1 credit(s) from the following:
• SLHS 8820 - Clinical Education in Audiology (1.0 - 8.0 cr)

Related Fields
In addition to the other Related Fields options, SLP students can use the following course to fulfill their requirement:
Take 0 or more course(s) from the following:
- SLHS 5804 - Cochlear Implants (3.0 cr)
- SLHS 5805 - Advanced Rehabilitative Audiology (3.0 cr)
- SLHS 5808 - Pathophysiology of Hearing Disorders (3.0 cr)

Plans Options for Speech-Language Pathology Track

Plan A
Take exactly 10 credit(s) from the following:
- SLHS 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
- OR-

Plan C
Take exactly 4 credit(s) from the following:
- SLHS 8994 - Directed Research (1.0 - 12.0 cr)

Audiology
This sub-plan is limited to students completing the program under Plan B.

The audiology program emphasizes outcome-based learning activities that prepare graduates to interpret research findings and incorporate them into clinical practice. Coursework and clinical education focus on diagnostic, rehabilitative techniques, technology counseling approaches, and human development.

The audiology sub-plan requires a total of 60 credits, and a Plan B comprehensive written exam and a final oral examination.

Audiology Track: Required Courses
- SLHS 5401 - Counseling and Professional Issues (3.0 cr)
- SLHS 5801 - Advanced Audiologic Assessment (3.0 cr)
- SLHS 5802 - Hearing Aids I (3.0 cr)
- SLHS 5803 - Pediatric Audiology (3.0 cr)
- SLHS 5804 - Cochlear Implants (3.0 cr)
- SLHS 5805 - Advanced Rehabilitative Audiology (3.0 cr)
- SLHS 5806 - Auditory Processing Disorders (3.0 cr)
- SLHS 5807 - Noise and Hearing Conservation (3.0 cr)
- SLHS 5808 - Pathophysiology of Hearing Disorders (3.0 cr)
- SLHS 8801 - Electrophysiologic Assessment of Auditory Function (3.0 cr)
- SLHS 8802 - Hearing Aids II (3.0 cr)
- SLHS 8803 - Signals and Systems in Audiology (3.0 cr)
- SLHS 8805 - Hearing Science Foundations of Audiology (3.0 cr)
- SLHS 8807 - Balance Assessment (3.0 cr)

Laboratory Module in Audiology
Take exactly 2 credit(s) from the following:
- SLHS 5810 - Laboratory Module in Audiology (1.0 - 2.0 cr)

Clinical Research and Practice: Grand Rounds
Take exactly 4 credit(s) from the following:
- SLHS 5820 - Clinical Research and Practice: Grand Rounds (1.0 - 6.0 cr)

Clinical Foundations in Audiology
Take exactly 2 credit(s) from the following:
- SLHS 5830 - Clinical Foundations in Audiology (1.0 - 8.0 cr)

Related Fields
In addition to the other Related Fields course options, students in the AuD track can use the following courses to fulfill the Related Fields requirement:
Take 0 or more course(s) from the following:
- SLHS 5602 - Speech Sound Disorders: Assessment and Treatment across Languages (3.0 cr)
- SLHS 5603 - Assessment and Intervention of Language Disorders in Children (3.0 cr)

Plan B Audiology Track

Directed Research
Take exactly 4 credit(s) from the following:
- SLHS 8994 - Directed Research (1.0 - 12.0 cr)

Speech-Language-Hearing Sciences (SLHS)
This sub-plan is limited to students completing the program under Plan B.

**Speech-Language-Hearing Sciences Track: Required Courses**
- SLHS 5401 - Counseling and Professional Issues (3.0 cr)
- SLHS 5502 - Voice and Cleft Palate (3.0 cr)
- SLHS 5503 - Fluency and Motor Speech Disorders (3.0 cr)
- SLHS 5504 - Evaluation and Management of Dysphagia (2.0 cr)
- SLHS 5602 - Speech Sound Disorders: Assessment and Treatment across Languages (3.0 cr)
- SLHS 5603 - Assessment and Intervention of Language Disorders in Children (3.0 cr)
- SLHS 5605 - Language and Cognitive Disorders in Adults (3.0 cr)
- SLHS 5606 - Introduction to Augmentative and Alternative Communication (3.0 cr)
- SLHS 5608 - Clinical Issues in Bilingualism and Cultural Diversity (3.0 cr)

**Plan B Speech-Language-Hearing Sciences Track**

**Directed Research**
- Take exactly 4 credit(s) from the following:
  - SLHS 8994 - Directed Research (1.0 - 12.0 cr)
Twin Cities Campus
Speech-Language-Hearing Sciences Minor
Speech-Language-Hearing Sciences
College of Liberal Arts

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 12
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Emphasis in the graduate program is speech-language pathology and audiology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The approval of the SLHS director of graduate studies is required prior to registration for any 4xxx-level minor field coursework.

Speech Language Pathology Focus
Take 12 or more credit(s) from the following:
• SLHS 5502 - Voice and Cleft Palate (3.0 cr)
• SLHS 5503 - Fluency and Motor Speech Disorders (3.0 cr)
• SLHS 5504 - Evaluation and Management of Dysphagia (2.0 cr)
• SLHS 5602 - Speech Sound Disorders: Assessment and Treatment across Languages (3.0 cr)
• SLHS 5603 - Assessment and Intervention of Language Disorders in Children (3.0 cr)
• SLHS 5605 - Language and Cognitive Disorders in Adults (3.0 cr)
• SLHS 5606 - Introduction to Augmentative and Alternative Communication (3.0 cr)
• SLHS 5608 - Clinical Issues in Bilingualism and Cultural Diversity (3.0 cr)

Audiology Focus
Take 12 or more course(s) from the following:
• SLHS 4801 - Hearing Measurement and Disorders (3.0 cr)
• SLHS 4802 - Rehabilitative Audiology (3.0 cr)
• SLHS 5801 - Advanced Audiologic Assessment (3.0 cr)
• SLHS 5802 - Hearing Aids I (3.0 cr)
• SLHS 5803 - Pediatric Audiology (3.0 cr)
• SLHS 5804 - Cochlear Implants (3.0 cr)
• SLHS 5805 - Advanced Rehabilitative Audiology (3.0 cr)
• SLHS 5806 - Auditory Processing Disorders (3.0 cr)
• SLHS 5807 - Noise and Hearing Conservation (3.0 cr)
• SLHS 5808 - Pathophysiology of Hearing Disorders (3.0 cr)
• SLHS 5810 - Laboratory Module in Audiology (1.0 - 2.0 cr)
• SLHS 5820 - Clinical Research and Practice: Grand Rounds (1.0 - 6.0 cr)
• SLHS 5830 - Clinical Foundations in Audiology (1.0 - 8.0 cr)
• SLHS 8801 - Electrophysiologic Assessment of Auditory Function (3.0 cr)
• SLHS 8802 - Hearing Aids II (3.0 cr)
• SLHS 8803 - Signals and Systems in Audiology (3.0 cr)
• SLHS 8805 - Hearing Science Foundations of Audiology (3.0 cr)
• SLHS 8807 - Balance Assessment (3.0 cr)

Combined Speech Language Pathology and Audiology Focus
Take 12 or more credit(s) from the following:
• SLHS 4301 - Introduction to the Neuroscience of Human Communication (3.0 cr)
• SLHS 4402 - Assessment and Treatment in Speech-Language Pathology (3.0 cr)
• SLHS 5401 - Counseling and Professional Issues (3.0 cr)
• SLHS 5990 - Topic in Speech-Language-Hearing Sciences (1.0 - 3.0 cr)
• SLHS 5993 - Directed Study (1.0 - 12.0 cr)
• SLHS 8410 - Seminar: Research (3.0 cr)
• SLHS 8420 - Seminar: Teaching (3.0 cr)
• SLHS 8530 - Seminar: Speech (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters

Doctoral
Twin Cities Campus
Speech-Language-Hearing Sciences Ph.D.
Speech-Language-Hearing Sciences
College of Liberal Arts

Link to a list of faculty for this program.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 65
- This program requires summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Emphases in the PhD program are speech-language pathology, audiology, speech science, language science, or hearing science. The program prepares students for careers in research, teaching, and advanced clinical applications. Most students entering the program have a master's degree in speech-language pathology, audiology, or a related area. The PhD degree usually requires three or more years of work beyond the master's degree. In general, a student's program is designed by the student in consultation with the advisor to satisfy the particular objectives of the student and program requirements.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
29 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

The PhD degree usually requires three years of work beyond the master's degree. In general, a student's program is designed by the student in consultation with the advisor to satisfy the particular objectives of the student, but there are also some department and University requirements that must be satisfied. These include coursework, research activities, teaching experience, and preliminary and final exams.

A minimum of 12 course credits in a minor or supporting program and registration for 24 thesis credits are required. Also required is a statistics sequence, for which students typically register during their first two years. The written and oral preliminary exams are taken at the end of the second year.

Each student completes a seminar (SLHS 8430) and a minimum of 4 credits of teaching experience that provide an opportunity for the student to develop and teach sections of department courses. Students also complete a seminar (SLHS 8410) and a minimum of 4 credits of research under the direction of one or more faculty members in the department other than the advisor.

**Required Courses**

**Seminar Requirements**

- SLHS 8410 - Seminar: Research (3.0 cr)
- SLHS 8420 - Seminar: Teaching (3.0 cr)
- or GRAD 8101 - Teaching in Higher Education (3.0 cr)

Take 6 or more credit(s) from the following:

- SLHS 8430 - Proseminar in Speech-Language-Hearing Sciences (1.0 - 6.0 cr)

**Directed Research Requirement**

Take 4 or more credit(s) from the following:

- SLHS 8994 - Directed Research (1.0 - 12.0 cr)

**Directed Teaching Requirement**

Take 4 or more credit(s) from the following:

- SLHS 5993 - Directed Study (1.0 - 12.0 cr)

**Statistics**

- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- or EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
- or EPSY 8252 - Statistical Methods in Education II (3.0 cr)

**Statistics Electives**

Take 3 or more credit(s) from the following:

- EPSY 8220 - Special Topics: Seminar in Quantitative Methods (1.0 - 6.0 cr)
- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8265 - Factor Analysis (3.0 cr)
- EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
- EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
- EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- EPSY 8222 - Advanced Measurement: Theory and Application (4.0 cr)
- EPSY 8224 - Performance Assessment Design and Analysis (3.0 cr)
- EPSY 8225 - Operational Measurement: Test Score Quality Assurance, Standard Setting, and Equating (3.0 cr)
- EPSY 8226 - Item Response Models: Theory and Applications (3.0 cr)
- STAT 4101 - Theory of Statistics I (4.0 cr)
- STAT 4102 - Theory of Statistics II (4.0 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)
- STAT 5031 - Statistical Methods for Quality Improvement (4.0 cr)
- STAT 5101 - Theory of Statistics I (4.0 cr)
- STAT 5102 - Theory of Statistics II (4.0 cr)
- STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
- STAT 5302 - Applied Regression Analysis (4.0 cr)
- STAT 5303 - Designing Experiments (4.0 cr)
- STAT 5401 - Applied Multivariate Methods (3.0 cr)
- STAT 5421 - Analysis of Categorical Data (3.0 cr)
- STAT 5601 - Nonparametric Methods (3.0 cr)
- STAT 5701 - Statistical Computing (3.0 cr)
- STAT 5931 - Topics in Statistics (3.0 cr)
- STAT 5993 - Tutorial (1.0 - 6.0 cr)
- STAT 8051 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)
• STAT 8052 - Applied Statistical Methods 2: Design of Experiments and Mixed-Effects Modeling (3.0 cr)
• STAT 8053 - Applied Statistical Methods 3: Multivariate Analysis and Advanced Regression (3.0 cr)
• STAT 8054 - Statistical Methods 4: Advanced Statistical Computing (3.0 cr)
• STAT 8102 - Theory of Statistics 2 (3.0 cr)
• STAT 8111 - Mathematical Statistics I (3.0 cr)
• STAT 8112 - Mathematical Statistics II (3.0 cr)
• STAT 8311 - Linear Models (4.0 cr)
• STAT 8801 - Statistical Consulting (3.0 cr)
• STAT 8913 - Literature Seminar (1.0 cr)
• STAT 8931 - Advanced Topics in Statistics (3.0 cr)
• STAT 8932 - Advanced Topics in Statistics (3.0 cr)
• STAT 4893W - Consultation and Communication for Statisticians [WI] (3.0 cr)

Thesis Credits
Take at least 24 doctoral thesis credits.
SLHS 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Electives in Related Fields
Electives in Related Fields
Take 12 or more credit(s) from the following:
• ADDS 5021 - Introduction to Evidence Based Practices and the Helping Relationship (3.0 cr)
• CI 5451 - Teaching Reading in Middle and Secondary Grades (3.0 cr)
• CPSY 4302 - Infant Development (3.0 cr)
• CPSY 4329 - Biological Foundations of Development (3.0 cr)
• CPSY 4341 - Perceptual Development (3.0 cr)
• CPSY 4343 - Cognitive Development (3.0 cr)
• CPH 5906 - Wellbeing and Resiliency for Health Professionals (1.0 cr)
• CPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
• CPH 5111 - Ways of Thinking about Health (2.0 cr)
• EPSY 5101 - Intelligence and Creativity (3.0 cr)
• EPSY 5135 - Human Relations Workshop (4.0 cr)
• EPSY 5400 - Special Topics in Counseling Psychology (1.0 - 4.0 cr)
• EPSY 5415 - Child and Adolescent Development and Counseling (4.0 cr)
• EPSY 5451 - College Students Today (3.0 cr)
• EPSY 5461 - Cross-Cultural Counseling (3.0 cr)
• EPSY 5609 - Family-centered Services (2.0 cr)
• EPSY 5616 - Classroom Management and Behavior Analytic Problem Solving (3.0 cr)
• EPSY 5625 - Education of Infants, Toddlers, and Preschool Children with Disabilities: Introduction (2.0 cr)
• EPSY 5641 - Foundations of Deaf Education (3.0 cr)
• EPSY 5642 - Early Intervention for Infants, Toddlers and Families: Deaf and Hard of Hearing (3.0 cr)
• EPSY 5644 - Early Childhood Language and Literacy Development and Best Practices: Deaf and Hard of Hearing (3.0 cr)
• EPSY 5661 - Introduction to Autism Spectrum Disorder (3.0 cr)
• EPSY 5663 - Assessment and Intervention for Individuals with Autism Spectrum Disorder (3.0 cr)
• EPSY 5681 - Education of Preschool Children With Disabilities: Methods and Materials (3.0 cr)
• GER 5125 - Gerontology Service Learning (3.0 cr)
• HINF 5501 - US Health Care System: Information Challenges in Clinical Care (1.0 cr)
• KIN 8211 - Seminar: Perception and Action (3.0 cr)
• LING 8921 - Seminar in Language and Cognition (3.0 cr)
• NSCI 5101 - Neurobiology I: Molecules, Cells, and Systems (3.0 cr)
• NSCI 5111 - Medical Neuroscience for Graduate Students (5.0 cr)
• OTOL 8234 - Anatomy of the Head and Neck and Temporal Bone Dissection (2.0 cr)
• OTOL 8247 - Anatomy and Physiology of Hearing and Balance (3.0 cr)
• PHAR 5201 - Applied Medical Terminology (2.0 cr)
• PSY 4036 - Perceptual Issues in Visual Impairment (3.0 cr)
• PSY 4960 - Seminar in Psychology (1.0 - 4.0 cr)
• PSY 5014 - Psychology of Human Learning and Memory (3.0 cr)
• PSY 5037 - Psychology of Hearing (3.0 cr)
• PSY 5054 - Psychology of Language (3.0 cr)
• PSY 5137 - Introduction to Behavioral Genetics (3.0 cr)
• PSY 5205 - Applied Social Psychology (3.0 cr)
• PSY 5660 - Topics in Psychology (1.0 - 4.0 cr)
• PSY 8037 - Psychophysiology of Hearing and Audition (3.0 cr)
• PUBH 6370 - Social Epidemiology (2.0 cr)
• PUBH 6904 - Nutrition and Aging (2.0 cr)
• PUBH 8805 - Sociological Theory in Health Services Research (3.0 cr)
• SPAN 5985 - Sociolinguistic Perspectives on Spanish in the United States (3.0 cr)
SLHS 5900 - Topic in Speech-Language-Hearing Sciences (1.0 - 3.0 cr)
SLHS 8530 - Seminar: Speech (3.0 cr)
BTHX 5100 - Introduction to Clinical Ethics (3.0 cr)
CSPH 5807 - Mindfulness in the Workplace: Pause, Practice, Perform (2.0 cr)
EPSY 5657 - Interventions for Behavioral Problems in School Settings (3.0 cr)
EPSY 8600 - Special Topics: Special Education Issues (1.0 - 3.0 cr)
FSOS 5942 - Everyday Experiences of Families (2.0 cr)
FSOS 5937 - Parent-Child Interaction (3.0 cr)
OLPD 5211 - Introduction to the Undereducated Adult (1.0 cr)
SOC 4246 - Sociology of Health and Illness (3.0 cr)
BTHX 5000 - Topics in Bioethics (1.0 - 4.0 cr)
CGSC 8410 - Perspectives in Learning, Perception, and Cognition (2.0 cr)
CI 5642 - Assessing English Learners (3.0 cr)
CI 5653 - Methods in Teaching English as a Second Language (ESL) in Higher Education (3.0 cr)
CSPH 5708 - Mind-Body Science and the Art of Transformation (1.0 cr)
OLPD 5356 - Disability Policy and Services (3.0 cr)
PSY 5062 - Cognitive Neuropsychology (3.0 cr)
PSY 5138 - Adult Development and Aging (3.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
BMEN 5101 - Advanced Bioelectricity and Instrumentation (3.0 cr)
BMEN 5411 - Neural Engineering (3.0 cr)
BMEN 8101 - Biomedical Digital Signal Processing (3.0 cr)
BMEN 8502 - Physiological Control Systems (3.0 cr)
NSC 5561 - Systems Neuroscience (4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Statistics is the primary venue at the University for research, teaching, and dissemination of the theory, methodology, and applications of statistical procedures. Students may specialize in any area of statistics. The core program for all students has strong components of both theoretical and applied statistics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Required Courses
Core Courses
STAT 8101 - Theory of Statistics 1 (3.0 cr)
STAT 8102 - Theory of Statistics 2 (3.0 cr)
STAT 8051 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)
STAT 8052 - Applied Statistical Methods 2: Design of Experiments and Mixed-Effects Modeling (3.0 cr)
STAT 8801 - Statistical Consulting (3.0 cr)
STAT 5701 - Statistical Computing (3.0 cr)

Statistics Electives
Take 6 or more credit(s) from the following:
• STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
• STAT 5401 - Applied Multivariate Methods (3.0 cr)
• STAT 5421 - Analysis of Categorical Data (3.0 cr)
• STAT 5601 - Nonparametric Methods (3.0 cr)
• STAT 8053 - Applied Statistical Methods 3: Multivariate Analysis and Advanced Regression (3.0 cr)
• STAT 8054 - Statistical Methods 4: Advanced Statistical Computing (3.0 cr)
• STAT 8111 - Mathematical Statistics I (3.0 cr)
• STAT 8112 - Mathematical Statistics II (3.0 cr)
• STAT 8931 - Advanced Topics in Statistics (3.0 cr)
• STAT 8932 - Advanced Topics in Statistics (3.0 cr)

Outside Coursework
Take 6 credits outside the major.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 70
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Statistics is the primary venue at the University for research, teaching, and dissemination of the theory, methodology, and applications of statistical procedures. Students may specialize in any area of statistics. The core program for all students has strong components of both theoretical and applied statistics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
34 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.
Required Courses
Core Courses
STAT 8051 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)
STAT 8052 - Applied Statistical Methods 2: Design of Experiments and Mixed-Effects Modeling (3.0 cr)
STAT 8053 - Applied Statistical Methods 3: Multivariate Analysis and Advanced Regression (3.0 cr)
STAT 8054 - Statistical Methods 4: Advanced Statistical Computing (3.0 cr)
STAT 8111 - Mathematical Statistics I (3.0 cr)
STAT 8112 - Mathematical Statistics II (3.0 cr)
STAT 8801 - Statistical Consulting (3.0 cr)
STAT 8913 - Literature Seminar (1.0 cr)
Statistics Electives
Courses from other departments with heavy statistical content, and some 5xxx-level statistics courses may be used as electives. Students choose courses in consultation with the director of graduate studies.
Take 12 or more credit(s) from the following:
• STAT 8xxx

Outside Coursework
Take MATH 8651 (3 cr) and MATH 8652 (3 cr). Coursework comparable to MATH 8651 and 8652 may be substituted with approval of the director of graduate studies.
MATH 8651 - Theory of Probability Including Measure Theory (3.0 cr)
MATH 8652 - Theory of Probability Including Measure Theory (3.0 cr)
Electives
Take at least 6 additional credits to complete the 12-credit outside coursework requirement.

Thesis Credits
Take 24 or more credit(s) from the following:
• STAT 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus

Strategic Communication M.A.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 33
- This program requires summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The MA in strategic communication is designed to serve working communications professionals in advertising, public relations, corporate communications, nonprofit organizations, and government. The 33-credit program is conceptually and structurally distinct from the existing academic master's degree in mass communication in that it focuses on advanced professional study of communications strategy, media, planning, evaluation, and creative management.

The University of Minnesota is one of only a handful of institutions to offer a professional master's program in strategic communication designed for the busy working professional.

The MA in strategic communication curriculum is tailored to provide the best foundation for future communications leaders, recognizing that the communication industry is changing rapidly and is more volatile than ever. With Internet use moving well beyond its infancy, and massive organizational and global forces reshaping the U.S. economy, communications leaders face significant challenges and can prepare themselves through in-depth study of strategic process management.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

Special Application Requirements:
The minimum requirement for admission is a B.A. or equivalent. Professionals in strategic communication--currently employed in advertising, public relations, or marketing firms, or in a communications function within a corporation or nonprofit organization--must have a baccalaureate degree from an accredited U.S. institution or its foreign equivalent and at least two years professional experience. This professional experience should be in any of the following areas: account planning, account management, advertising management, media planning or buying, media sales, promotion marketing, corporate communications, public affairs, public relations, investor relations, direct marketing, sales management, marketing management, brand management, broadcast or print journalism, market research, content creation, or event management.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 33 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The MA in strategic communication is designed to be completed within 24 calendar months.

Students must maintain a GPA of at least 3.00 and achieve a grade of B or better on their final 6-credit individual project. The project is a sequence of two capstone courses (Jour 8206) designed to support completion of individual strategic communication campaign projects that demonstrate mastery of the MA curriculum.

Student progress is evaluated by the academic director, program coordinator, and program faculty. Students must progress each semester to continue in the program, though a student who must temporarily leave the program unexpectedly can return to the program at a later date and resume their studies at the point of departure. All coursework must be taken A-F.

Required Courses
- JOUR 8200 - Strategic Communication Research Methods (3.0 cr)
- JOUR 8201 - Factors Affecting Communication Strategy (3.0 cr)
- JOUR 8202 - Generation and Selection of Communication Strategies (3.0 cr)
- JOUR 8290 - Special Topics in Strategic Communication (3.0 cr)
- JOUR 8203 - Integration of Communication Strategies Across Media (3.0 cr)
- JOUR 8205 - Cases in Strategic Communication (3.0 cr)

Electives
Take at least 6 credits outside the School of Journalism and Mass Communication. The remaining 3 credits of the 9-credit elective requirement can be taken from the following list:
- JOUR 5251 - Strategic Communication Theory (3.0 cr)
- or JOUR 5xxx
- or JOUR 8xxx

Individual Project
Take JOUR 8206 two times (May session and summer session).
Take 6 or more credit(s) from the following:
- JOUR 8206 - Directed Study: Development of an Integrated Strategic Communication Campaign (3.0 cr)
Studies in Africa and African Diaspora Minor

College of Liberal Arts

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 15
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This interdisciplinary graduate minor is administered through the Department of African American & African Studies. The minor program gives students from a variety of disciplines a structured graduate curriculum that offers a systematic understanding of the contemporary and historical experiences of peoples of Africa and of the African diaspora. It is organized around a group of core seminars and focuses on two broad areas: the humanities and the arts, and the social and behavioral sciences.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Admission is contingent upon prior admission to a master's or doctoral degree-granting program.

Special Application Requirements:
Students must complete an application form by the end of spring semester to be considered for acceptance for the following academic year. It is expected that no more than 15 students will be admitted to this minor each year. An undergraduate major or minor in African American and/or African studies is not required for admission to the program, but students are expected to have had sufficient background to begin graduate level study.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Students develop their program in consultation with the director of Graduate Studies in studies in Africa and the African diaspora and in their major. All courses must be outside the student's major field of study.

The master's minor requires a minimum of 9 graduate credits, including the seminar AFRO 5101 - Studies in Africa and the African Diaspora. Remaining courses are selected from one of the following two areas: humanities and the arts or behavioral and social sciences.

The doctoral minor requires a minimum of 15 graduate credits, including the seminar AFRO 5101 - Studies in Africa and the African Diaspora. Students take one additional seminar that focuses on the study of Africa and peoples of African descent. Remaining courses are selected from one of the two areas listed above.
Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Required Course
AFRO 5101 - Seminar: Introduction to Africa and the African Diaspora (3.0 cr)
Course Electives
All courses must be outside the student's major field of study.
Take 6 or more credit(s) from the following:
• AFRO 5xxx
• AFRO 8xxx

Doctoral
Required Course
AFRO 5101 - Seminar: Introduction to Africa and the African Diaspora (3.0 cr)
Course Electives
All courses must be outside the student's major field of study.
Take 12 or more credit(s) from the following:
• AFRO 5xxx
• AFRO 8xxx

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 7
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Studies of science and technology (SST) deals with a rapidly expanding field that seeks to understand the conceptual foundations, historical development, and social dimensions and context of science and technology. SST faculty are drawn from a number of research and teaching units dedicated in whole or in part to the history, philosophy, and social studies of science and technology.

The graduate SST minor is for students from any major who want to gain a deeper understanding of the nature and development of science and technology. It can be particularly valuable for students who are planning teaching careers in science or engineering, or those majoring in philosophy or history of science and technology. Students admitted to the SST minor will develop individual programs of study in consultation with the faculty and the director of Graduate Studies. Adjustments in program requirements can be made for students with relevant previous course experience.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Admission is contingent upon prior admission to a University of Minnesota master's or doctoral degree-granting program, and is by permission of the director of Graduate Studies in SST.

Special Application Requirements:
Prospective students should contact director of Graduate Studies in SST.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

History Course
All students pursuing the minor take one of the following two courses:
HSCI 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)
or HMED 8112 - Historiography of Science, Technology, and Medicine (3.0 cr)

Philosophy Course
All students pursuing the minor take one of the following three courses:
PHIL 8670 - Seminar: Philosophy of Science (3.0 cr)
or PHIL 8610 - Seminar: History of Modern Physical Sciences (3.0 cr)
or PHIL 8620 - Seminar: Philosophy of the Biological Sciences (3.0 cr)
Colloquium
Master's students pursuing the minor take the following course once. Doctoral students take the following course twice.

**SST 8000 - Colloquium (1.5 cr)**

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Master's
Master's students pursuing the minor complete the 7.5 credits noted above.

Doctoral
**Additional Requirements for the Doctoral Minor**
In addition to the 7.5 credits required for the master's minor, doctoral students must take another 1.5 credits of SST 8000, and at least 3 more SST credits.

**SST 8000 - Colloquium (1.5 cr)**
**SST 8100 - Seminar: Models, Theories, and Reality (3.0 cr)**
or **SST 8200 - Seminar: Philosophy of the Physical Sciences (3.0 cr)**
or **SST 8300 - Seminar: The Biological and Biomedical Sciences (3.0 cr)**
or **SST 8400 - Seminar: Science, Technology, and Society (3.0 cr)**
or **SST 8420 - Seminar: Social and Cultural Studies of Science (3.0 cr)**

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 40
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The University of Minnesota offers a unique graduate program drawing from the varied research expertise of its core faculty. Together, the faculty is committed to the study of theatre and performance as practices of social, cultural, and political consequence. The department’s work in theatre historiography and performance criticism examines the stakes of acts of representation, movement, and meaning-production both within and without the discipline of theatre. The curriculum of this program trains students to be rigorous scholars and expert teachers of theatre and performance studies at the college level.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 24 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is written.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.
The MA degree emphasizes academic pursuits and is considered a prerequisite for the PhD. The areas of study for the MA are devised in collaboration with a faculty advisor, and demand original and challenging research in the fields of theatre historiography or performance criticism.

There is an 8 credit limit on practical/performance courses for program credit.

### Field Seminars
Take 6 or more credit(s) from the following:
- **TH 8111** - History and Theory of Western Theatre: Ancient World and Early Medieval (3.0 cr)
- **TH 8112** - History and Theory of Western Theatre: Medieval Through Renaissance (3.0 cr)
- **TH 8113** - History and Theory of Western Theatre: National Theatres to the French Revolution (3.0 cr)
- **TH 8114** - Theatre: Performance and Political Modernity (3.0 cr)
- **TH 8115** - History and Theory of Western Theatre: 20th Century Through World War II (3.0 cr)
- **TH 8116** - History and Theory of Western Theatre: 20th Century From 1945 to the Present (3.0 cr)

### Signature Seminars
Take 6 or more credit(s) from the following:
- **TH 8120** - Seminar (3.0 cr)
- **TH 5117** - Performance and Social Change (3.0 cr)

### Historiography Seminars
Take 3 or more credit(s) from the following:
- **TH 8102** - Theatre Historiography (3.0 cr)

### Professionalization
Take 3 or more credit(s) from the following:
- **TH 8590** - Theatre Technology Practicum (1.0 - 3.0 cr)

### Electives
Take 6 credits in elective coursework either in our outside the department.

### Outside Coursework
Take 6 credits outside the major.

### Plan Options

#### Plan A
**Thesis Credits**
Take 10 or more credit(s) from the following:
- **TH 8777** - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

#### Plan B
Consult with the advisor and director of Graduate Studies regarding the required Plan B paper(s).

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 60
• This program does not require summer semesters for timely completion.
• Degree: Master of Fine Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The MFA in theatre arts, which specialized in design and technical production, is awarded to students who, through the three-year course of study, explore challenges in the areas of scenery/properties, costuming, lighting, sound design, multimedia and technology with an emphasis in at least one of these areas. It is a rigorous program based on the belief that good designers must have a solid understanding of each area of design in order to be able to communicate and collaborate well with the other designers, technicians, and directors. Good designers must also have strong craft skills in order to understand how the design functions in execution. The department believes that technology is an integral tool of design and seeks to balance the education of the student in both areas.

Accreditation
This program is accredited by National Association of Schools of Theatre (NAST)

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Admission into the M.F.A. Theatre Arts program is dependent on a portfolio review by the Theatre Arts design/technology faculty.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 54 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: A realized design and technology project.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

The three-year, performance-oriented MFA degree specializes in design and technical production. All areas of design are studied to increase understanding in specialization areas, and technology is studied as an essential part of design. Students are expected to achieve proficiency in at least two areas of any combination of design and technology (scenery/properties, costuming, lighting, sound) and a level of expertise in at least one of these areas. Program faculty work with students to identify the final areas for the degree. The MFA degree is considered a terminal degree in these areas of theatre arts. Each program requires a final performance practicum and written record of it. For specific program requirements, contact the director of graduate studies.

**Required Courses**
- TH 5510 - Drawing, Rendering, and Painting for the Theatre Designer I (3.0 cr)
- TH 5520 - Scene Design (3.0 cr)
- TH 5530 - Costume Design (3.0 cr)
- TH 5540 - Lighting Design for the Theatre (3.0 cr)
- TH 5559 - Sound Design for Performance (3.0 cr)
- TH 5560 - Drawing, Rendering, and Painting for the Theatre Designer II (3.0 cr)

**Repeat Primary Design Area**
- TH 5520 - Scene Design (3.0 cr)
  or TH 5530 - Costume Design (3.0 cr)
  or TH 5540 - Lighting Design for the Theatre (3.0 cr)
  or TH 5559 - Sound Design for Performance (3.0 cr)

**MFA Creative Thesis**
Take 3 or more credit(s) from the following:
- TH 8990 - MFA Creative Thesis (3.0 - 4.0 cr)

**Design/Technology Practicums**
Take 6 or more credit(s) from the following:
- TH 5590 - Theatre Technology Practicum (1.0 - 3.0 cr)
  or TH 8590 - Theatre Technology Practicum (1.0 - 3.0 cr)
- Take 3 or more credit(s) from the following:
  - TH 5500 - Theatre Design Practicum (1.0 - 3.0 cr)
  - TH 8500 - Theatre Design Practicum (1.0 - 3.0 cr)

**Electives in Related Fields**
Take 15 or more credit(s) from the following:
- TH 5545 - Stage Lighting Technology (3.0 cr)
- TH 5570 - Properties/Scenery Technology (1.0 - 3.0 cr)
- TH 5580 - Costume Technology (3.0 cr)
- TH 8980 - Internship (1.0 - 5.0 cr)

**Professional Development Class**
Take once a year for 3 years.
Take 3 or more credit(s) from the following:
- TH 8950 - Topics in Theatre (1.0 - 4.0 cr)

**Internship**
(May or may not be taken for credit to apply towards electives.) Confer with advisor regarding internship.
Take 0 - 3 credit(s) from the following:
- TH 8980 - Internship (1.0 - 5.0 cr)

**History of Literature within the Major Field**
Upon consultation with the advisor and program faculty, there may be a substitution for the specific courses listed below for this requirement if it is in the best interest of the student. New coursework must be in the history/literature area.

• Requirements for this program are current for Fall 2018
• Length of program in credits: 54
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The University of Minnesota offers a unique graduate program drawing from the varied research expertise of its core faculty. Together, the faculty is committed to the study of theatre and performance as practices of social, cultural, and political consequence. The department’s work in theatre historiography and performance criticism examines the stakes of acts of representation, movement, and meaning-production both within and without the discipline of theatre. The curriculum of this program trains students to be rigorous scholars and expert teachers of theatre and performance studies at the college level.

Accreditation
This program is accredited by National Association of Schools of Theatre (NAST).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
In order to be admitted to the M.A./Ph.D. program, you must have a working knowledge/reading proficiency of at least one foreign language (or a sign language).

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
18 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: Proficiency in one foreign language.

A minimum GPA of 3.50 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

A. Signature Seminars
Each member of the MA/PhD faculty will offer a "signature seminar" on a two-year rotation. These seminars focus on the faculty member's current primary area of research interest, with an emphasis on articulating the distinct research methodology that the faculty member brings to bear on his/her field. Each member of the MA/PhD faculty will offer a "field seminar" on a two-year rotation. These seminars are designed to give students a level of field expertise that will enable them to teach.

Take 6 or more credit(s) from the following:
- TH 8120 - Seminar (3.0 cr)
- TH 5117 - Performance and Social Change (3.0 cr)

B. Field Seminars
Each member of the MA/PhD faculty will offer a "field seminar" on a two-year rotation. These seminars are designed to give students a level of field expertise that will enable them to teach in the history, literature, and criticism of theatre studies, and each focuses on a distinct period, problematic, or performance tradition. The emphasis here is on mastery of a body of literature and theory pertaining to a specific field.

Take 6 or more credit(s) from the following:
- TH 8111 - History and Theory of Western Theatre: Ancient World and Early Medieval (3.0 cr)
- TH 8112 - History and Theory of Western Theatre: Medieval Through Renaissance (3.0 cr)
- TH 8113 - History and Theory of Western Theatre: National Theatres to the French Revolution (3.0 cr)
- TH 8114 - Theatre: Performance and Political Modernity (3.0 cr)
- TH 8115 - History and Theory of Western Theatre: 20th Century Through World War II (3.0 cr)
- TH 8116 - History and Theory of Western Theatre: 20th Century From 1945 to the Present (3.0 cr)

C. Professionalization
This seminar is taught every second year, over an entire year (meeting every second week, 3 cr). It introduces students to the academic profession through a series of focused workshops on pedagogy (ethics, politics, and practice), professional protocols (publishing, job search, conferences), and forms of professional writing (grants, abstracts, statements of teaching philosophy, etc.).

Take 3 or more credit(s) from the following:
- TH 8590 - Theatre Technology Practicum (1.0 - 3.0 cr)

D. Historiography Seminars
This seminar is taught every second year (3 cr). It focuses on the contested nature of historical (theatre/performance) knowledge, and introduces students to the idea of historiography defined as an ethical exploration of the encounter with the Other (the past, the writing of history, the archive, the event, the fact, the object) that questions relations of knowledge and power, as well as the current apparatus of inquiry and interpretation.

Take 3 or more credit(s) from the following:
- TH 8102 - Theatre Historiography (3.0 cr)

Outside Coursework
Take 12 credits outside the major.

Thesis Credits
Take 24 or more credit(s) from the following:
- TH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Translational Sensory Sciences Minor

Contact Information:
Center for Applied & Translational Sensory Science

75 East River Parkway
Minneapolis, MN
Email: catss@umn.edu
Website: http://catss@umn.edu

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Students must be enrolled in a University doctoral program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Required Courses (5 credits)
Take the following courses for a total of 5 credits:
GCC 5022 - The human experience of sensory loss: Seeking equitable and effective solutions [TS] (3.0 cr)
CGSC 8001 - Proseminar in Cognitive Science (2.0 cr)

Program Sub-plans
A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

Doctoral
Elective Courses
Select elective courses, in consultation with the Translational Sensory Sciences director of graduate studies, to complete the 12-credit minimum. Courses may be from the following list or with approval of the director of graduate studies.
BMEN 5413 - Neural Decoding and Interfacing (3.0 cr)
BMEN 8101 - Biomedical Digital Signal Processing (3.0 cr)
CSCI 5525 - Machine Learning (3.0 cr)

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Juridical Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The SJD program at the University of Minnesota Law School is intended for those who wish to carry on advanced legal study and original research under faculty supervision. SJD students must present research which makes a significant, original contribution of long-term value to legal scholarship. The dissertation must be of publishable quality and provide lawyers, scholars, or governmental officials with a useful understanding, not previously available, of a particular area of the law.

Accreditation
This program is accredited by acquiescence of the American Bar Association.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Applicants must have completed the first degree in law AND must have completed (or are in the process of completing) a US LLM degree at the University of Minnesota or another institution.

Special Application Requirements:
1) Submission of a preliminary dissertation proposal demonstrating that the dissertation will constitute an original and substantial contribution, of publishable quality, to legal scholarship, in a research field in which the Law School has experienced faculty available for advising, and 2) Submission of an extensive, high quality writing sample written in English to demonstrate the ability to engage in advanced research and writing.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 credits are required in the major.
24 thesis credits are required.
This program may not be completed with a minor.
Use of 4xxx courses towards program requirements is not permitted.
A minimum GPA of 3.0 is required for students to remain in good standing.
At least 2 semesters must be completed before filing a Degree Program Form.

Coursework Requirements
Legal Research
Take one of the following courses, or another research course approved by your faculty adviser or the director of graduate studies.
LAW 6851 - Practice-Ready Legal Research (2.0 cr)
or LAW 6867 - Practice Ready International Legal Research (2.0 cr)
Elective Courses
The remaining 22 credits are determined through consultation with your faculty advisor or the director of graduate studies.

Thesis Credit Requirement
24 Thesis Credits

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

A law minor is available to both master's and doctoral students and is individually tailored to their academic interests.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission to the law graduate minor is contingent upon prior admission to a University of Minnesota master's or doctoral degree-granting program. Enrollment in Law School courses is on a space-available basis, with preference given to law-degree-seeking candidates. Some Law School courses are open for graduate student registration without need for permission. Other courses require that students request admission by completing a declaration form and the non-law student petition form (found at https://www.law.umn.edu/academics/non-degree-programs/graduate-and-undergraduate-courses), and submitting them to the Law School registrar's office.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A masters minor requires at least 6 graduate credits; a doctoral minor requires at least 12 graduate credits.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Required Courses
Select at least 6 credits from the following, in consultation with the law minor's director of graduate studies.
LAW 5xx
LAW 6xx

Doctoral
Required Courses
Select at least 12 credits from the following, in consultation with the law minor's director of graduate studies.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science Patent Law

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of science in patent law is a professional master's degree for scientists and engineers interested in pursuing a career in the growing field of patent law. The program requirements may be completed in one year of full-time study or in two years (with an optional third year) on a part-time basis. This program is offered through the University of Minnesota Law School. Students in this program will learn practical patent drafting, patent research, portfolio management, and innovation skills. Many courses in this program will be taken jointly with JD students.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Applicants with a degree in Science or Engineering are preferred.

Other requirements to be completed before admission:
GRE and LSAT scores are accepted but not required.

Special Application Requirements:
Personal statement, resume, letters of recommendation, interview, patent bar eligibility assessment.

International applicants must submit score(s) from one of the following tests:
- TOEFL
- IELTS

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 30 major credits and 0 credits outside the major. There is no final exam. A capstone project is required.
Capstone Project: Patent Law CAPSTONE: Innovation (3 credits): Students select a technology of interest with the cooperation of their adviser. Using their knowledge of innovation, patent law, patent prosecution, patent research and strategy, they will identify, articulate, and present opportunities for innovation in their chosen technology.
This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

**Patent Law: Core Curriculum**

Take 20 credits of core coursework and the 3-credit capstone course for a total of 23 credits.

- LAW 5001 - Introduction to the American Legal System (2.0 cr)
- LAW 5002 - MSPL Legal Research and Writing (1.0 cr)
- LAW 5025 - Patent Law Proseminar (1.0 cr)
- LAW 5026 - Intellectual Property and Technology Proseminar (1.0 cr)
- LAW 5075 - Ethics for Patent Agents (1.0 cr)
- LAW 5224 - Patents (3.0 cr)
- LAW 5231 - Patent Prosecution Practice I (2.0 cr)
- LAW 5232 - Patent Prosecution Practice II (3.0 cr)
- LAW 5243 - Patent Research and Writing (2.0 cr)
- LAW 5250 - Patent Portfolio Management (2.0 cr)
- LAW 5707 - Intellectual Property Transactions (2.0 cr)

**Capstone Course**

Students are required to take the 3 credit capstone course.

- LAW 5290 - Patent Law Capstone: Innovation (3.0 cr)

**Electives**

Take at least 7 elective credits in consultation with the program director. Coursework can be from the following list or selected with approval from the program director.

Take 7 or more credit(s) from the following:

- LAW 5062 - Energy Law (3.0 cr)
- LAW 5076 - Essentials of Business for Lawyers (3.0 cr)
- LAW 5103 - Data Privacy Law (3.0 cr)
- LAW 5608 - Trademarks (3.0 cr)
- LAW 5613 - Copyright (3.0 cr)
- LAW 5906 - Independent Research and Writing (1.0 - 2.0 cr)
- LAW 6037 - Emerging Sciences and Technologies: Law, Ethics and Policy (3.0 cr)
- LAW 6133 - Data Compliance Practicum (1.0 cr)
- LAW 6225 - Winning Patent Litigation (2.0 cr)
- LAW 6241 - Patent Remedies (1.0 cr)
- LAW 6402 - Food and Drug Law (3.0 cr)
- LAW 6605 - Health Law (3.0 cr)
- LAW 6609 - International Intellectual Property (3.0 cr)
- LAW 6610 - Unfair Competition (2.0 cr)
- LAW 6622 - International Business Operation and Negotiation (3.0 cr)
- LAW 6705 - Information Governance (2.0 cr)
- LAW 6709 - Current Agriculture-Environment Issues (2.0 cr)
- LAW 6714 - E-Discovery (2.0 cr)
- LAW 6832 - Cybercrime and Cybersecurity (2.0 cr)
- LAW 6853 - Law, Biomedicine and Bioethics (3.0 cr)
- LAW 6876 - Digital Evidence (2.0 cr)
- LAW 6949 - Biotechnology & Patent Law (2.0 cr)

**Contact Information:**  
Master Programs in Accounting, 3-110 Carlson School of Management, 321 19th Avenue S, Minneapolis, MN 55455 (612-624-7511; fax: 612-626-7795)  
Email: macct@umn.edu  
Website: [http://www.carlsonschool.umn.edu/master-accountancy](http://www.carlsonschool.umn.edu/master-accountancy)

- Program Type: Master's  
- Requirements for this program are current for Fall 2018  
- Length of program in credits: 30 to 46  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Accountancy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master’s of accountancy (MAcc) program offers a 30-credit track for students with a degree in accounting or finance. It provides these students with an opportunity to enhance their management skills with graduate-level courses in accounting, finance, taxation, information systems, and supply chain and operations. Completing the MAcc program enables them to meet the 150 semester hour requirement for CPA certification. In addition, it provides finance majors the opportunity to take accounting courses, required to sit for the CPA examination, that were not taken in their bachelor's degree program.

The MAcc program also offers a 46-credit track to students with a bachelor's degree in an academic discipline other than accounting or finance. The eight required core courses include the necessary accounting courses needed to sit for the CPA examination.

Elective courses in the MAcc program cover a broad range of topics in accounting, taxation, finance, supply chain and operations, and information systems. The curriculum has been designed and developed by Carlson School of Management faculty with extensive input and ongoing consultation with executives from the professional community. This ensures relevant, practical, and challenging courses that enhance the students' professional development.

Students may choose to complete the program on a full-time or part-time basis. Many of the courses are offered in the evenings (Monday-Thursday, 5:45-9:05 p.m.).

**Program Delivery**  
This program is available:  
• via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**  
Other requirements to be completed before admission:  
All applicants must have a bachelor's degree from an accredited college or university and a cumulative undergraduate grade point average of 3.0 (on a 4.0 scale) or higher.

Applicants with a bachelor's degree in accounting (or equivalent coursework) or finance are generally eligible for the 30-credit MAcc track.

Students who have a bachelor's degree in an academic discipline other than accounting or finance are eligible to apply for the MAcc program and take the 46-credit track. The following courses (or equivalents) are prerequisites to the MAcc courses: ACCT 2050 Financial Accounting, ACCT 3001 Management Accounting, ACCT 5101 Intermediate Accounting I, FINA 3001 Finance Fundamentals, IDSC 3001 Information Systems. If necessary some of the prerequisite courses can be taken after being admitted to the MAcc program but credits would not apply to the 46-credit requirement. Coursework will be evaluated after applying.

**Special Application Requirements:**  
Summer/Fall application deadline: February 1 priority, followed by rolling admission until program is full.  
Spring application deadline: October 1 priority, followed by rolling admission until program is full.
Applicants must submit all application materials through the University's admission system. Application materials include:

Three letters of recommendation from persons qualified to evaluate most recent work and potential for graduate study.

A GMAT score that is not more than five years old is required. The GMAT score must be sent directly from GMAT to be considered official. Admitted Carlson School of Management undergraduate students will have the GMAT requirement waived.

For international students, the results from one of the following English language tests are required: TOEFL, IELTS, MELAB. TOEFL scores must be received directly from TOEFL. IELTS and MELAB scores must be received directly from the testing center.

For additional application details, review the M.Acc. admissions webpages.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan C:** Plan C requires 30 to 46 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

Students in the 30-credit MAcc track are required to have completed the following courses (or equivalent courses) in their undergraduate program or complete them in their MAcc program. If required to take any of these courses in the MAcc program, the number of elective credits is reduced by that number of credits.

- ACCT 5102 Intermediate Accounting II, 4 cr
- ACCT 5125W Auditing, 4 cr
- ACCT 5135 Fundamentals of Federal Income Tax, 4 cr
- BLAW 3058/6158 The Law of Contracts and Agency, 2 cr

**Required Courses (12 Credits)**

All MAcc students must complete the following courses for 12 credits:

- ACCT 6601 - Internal Control (4.0 cr)
- ACCT 6602 - Securities and Exchange Commission (SEC) and Standard Setting (4.0 cr)
- IDSC 6003 - Accounting and Information Systems (4.0 cr)

**Additional Courses Required for the 46-Credit Track (16 Credits)**

Students pursuing the 46-credit track must also complete the following courses for 16 credits:

- ACCT 5102 - Intermediate Accounting II (4.0 cr)
- ACCT 5125W - Auditing Principles and Procedures [WI] (4.0 cr)
- ACCT 5135 - Fundamentals of Federal Income Tax (4.0 cr)
- ACCT 6604 - Advanced Management Accounting (2.0 cr)
- BLAW 6158 - The study of laws affecting private business and publicly-traded companies. (2.0 cr)

**Elective Courses (18 credits)**

All MAcc students must complete at least 18 elective credits, selected in consultation with the advisor, from the following list:

- ACCT 5126 - Internal Auditing (2.0 cr)
- ACCT 5180 - Consolidations and Advanced Reporting (2.0 cr)
- ACCT 5201 - Intermediate Management Accounting (2.0 cr)
- ACCT 5236 - Introduction to Taxation of Business (2.0 cr)
- ACCT 5310 - International Accounting (2.0 cr)
- ACCT 6603 - Advanced Auditing (4.0 cr)
- ACCT 6604 - Advanced Management Accounting (2.0 cr)
- ACCT 6605 - Negotiations for Financial Executives (2.0 cr)
- FINA 6121 - Debt Markets, Interest Rates, and Hedging (2.0 cr)
- FINA 6241 - Corporate Finance Analysis and Decisions (4.0 cr)
- FINA 6242 - Advanced Corporate Finance Analysis and Decisions (4.0 cr)
- FINA 6322 - Financial Modeling (2.0 cr)
- FINA 6341 - World Economy (4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48 to 64
- This program does not require summer semesters for timely completion.
- Degree: Master of Business Administration

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

At the Carlson School, students tailor their education to meet their career objectives. Supported by outstanding faculty, cutting-edge coursework, and extensive networking opportunities, students compile an impressive record of professional achievements even before they graduate.

The Carlson School offers several pathways to the master of business administration degree: the full-time MBA, the part-time MBA, the online MBA, and the executive MBA. Dual degree programs are only available through the full-time MBA program. Please visit our website at http://www.carlsonschool.umn.edu/mba/ for more information.

The Carlson School's China executive MBA program is offered through a partnership between the Carlson School and Lingnan (University) College of Sun Yat-sen University. The Carlson School's Vienna executive MBA program is offered jointly with the Vienna University of Economics and Business (WU). For additional information on these two programs, please contact cgi@umn.edu.

Accreditation
This program is accredited by AACSB International.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
Applicants must have a bachelor's degree from an accredited college or university.

Other requirements to be completed before admission:
Please review the Admissions Checklist online for detailed admissions requirements.

Special Application Requirements:
Applicants must have an acceptable score on the GMAT or GRE. In addition, international students must have an acceptable score on the Test of English as a Foreign Language (TOEFL), the International Language Testing System (IELTS), or the Pearson Test of English Academic (PTE).

Candidates will be required to apply and be admitted to both degree programs separately.

Applicants must submit their test score(s) from the following:
- GMAT
- Pearson Test of English Academic (PTE Academic)
International applicants must submit score(s) from one of the following tests:

- TOEFL
- IELTS

Key to test abbreviations (GMAT, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 48 to 64 major credits and up to null credits outside the major. The is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

Joint- or Dual-degree Coursework: The Full-Time MBA program offers the following dual degree program options: MS-Applied Economics/MBA: up to 18 credits in common allowed; MS-Business Analytics/MBA: up to 22 credits in common allowed; MA-HRIR/MBA: up to 24 credits in common allowed; MA/PhD/MBA: up to 24 credits in common allowed; MPP/MBA: up to 24 credits in common allowed; Med/MBA: up to 24 credits in common allowed; and PharmD/MBA: up to 24 credits in common allowed. For full complete Dual Degree information, visit http://carlsonschool.umn.edu/degrees/master-business-administration/dual-degrees

Students may take a total of 24 credits in common among the academic programs.

Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Full-Time Master of Business Administration

The Carlson full-time MBA program offers an intense curriculum that gives students a distinct edge. They start by taking coordinated core courses that provide a sound foundation in essential managerial disciplines, while at the same time, customizing their education to fit their career paths. The full-time program involves a rigorous time commitment. While the amount of time spent on campus varies from 30-50 hours per week, all students are expected to complete the degree in two years with a minimum of 64 credits.

Financial Accounting

Take 1 or more course(s) from the following:
- MBA 6030 - Financial Accounting (3.0 cr)

Data Analysis & Statistics

Take 1 or more course(s) from the following:
- MBA 6120 - Data Analysis and Statistics for Managers (3.0 cr)

Managerial Economics

Carlson Executive Master of Business Administration

The Carlson executive MBA is built on a foundation of time-tested business principles. By emphasizing a global perspective, the rigorous curriculum helps students develop a deeper understanding of theory and practice. Each class moves through the program together as a cohort, following set schedules. From orientation to graduation, it takes about 21 months to complete the program. Classes are held Fridays and Saturdays, predominantly on alternate weekends, 7:30 a.m. to 4:30 p.m., and do not meet during the summer.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Doctorate): 16
- This program does not require summer semesters for timely completion.
- None.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The PhD program in business administration offers full-time advanced graduate education for students seeking academic placement at leading universities or research-oriented positions in business or government. The program is for individuals who have the intellectual capacity for advanced study, enjoy independent research and analytical thinking, and who wish to master a discipline within business administration.

Non-business administration doctoral students working toward a minor within the business administration program must complete a cohesive program of study in one of seven areas of specialization: accounting; finance; information and decision sciences; marketing; supply chain and operations; strategic management and entrepreneurship, and work and organizations.

Accreditation
This program is accredited by AACSB International

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
University of Minnesota PhD student in a field other than business administration.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

For each of the seven areas of concentration, a minimum of 16 credits is required. Coursework is selected in consultation with the PhD program office or the PhD coordinator of the student's chosen concentration area. Courses should be 8xxx-level, although up to 8 credits of 5xxx- and 7xxx-level coursework can be taken with the approval of the PhD and master's program offices.

Areas of Concentration

Accounting
Take 16 or more credit(s) from the following:
- ACCT 8801 - Topics in Empirical Research I (2.0 cr)
- ACCT 8802 - Topics in Empirical Research II (2.0 cr)
- **ACCT 8803** - Topics in Empirical Research III (2.0 cr)
- **ACCT 8811** - Information Economics I (2.0 cr)
- **ACCT 8812** - Information Economics II (4.0 cr)
- **ACCT 8813** - Information Economics III (2.0 cr)
- **ACCT 8821** - Capital Markets I (2.0 cr)
- **ACCT 8822** - Capital Markets II (2.0 cr)
- **ACCT 8823** - Capital Markets III (2.0 cr)
- **ACCT 8831** - Analytical Research Topics I (2.0 cr)
- **ACCT 8832** - Analytical Research Topics II (2.0 cr)
- **ACCT 8833** - Topics in Analytical Research III (2.0 cr)

- **OR-**

**Finance**

Take 16 or more credit(s) from the following:
- **FINA 8802** - Theory of Capital Markets I: Discrete Time (2.0 cr)
- **FINA 8803** - Theory of Capital Markets II: Continuous Time (2.0 cr)
- **FINA 8804** - Advanced Continuous Time Finance (2.0 cr)
- **FINA 8810** - Topics in Asset Pricing (2.0 cr)
- **FINA 8812** - Corporate Finance I (2.0 cr)
- **FINA 8813** - Corporate Finance II (2.0 cr)
- **FINA 8820** - Topics in Corporate Finance (2.0 cr)
- **FINA 8822** - Empirical Methods in Finance (2.0 cr)
- **FINA 8823** - Empirical Corporate Finance (2.0 cr)
- **FINA 8890** - Seminar: Finance Topics (2.0 - 4.0 cr)

- **OR-**

**Information and Decision Sciences**

Take 16 or more credit(s) from the following:
- **IDSC 8511** - Conceptual Topics and Research Methods in Information and Decision Sciences (3.0 cr)
- **IDSC 8521** - System Development (3.0 cr)
- **IDSC 8531** - Organizational Theory and Research in Information Systems (3.0 cr)
- **IDSC 8541** - Introduction to Economics of Information Systems (3.0 cr)
- **IDSC 8620** - Data Mining and Personalization (3.0 cr)
- **IDSC 8721** - Behavioral Decision Theory (3.0 cr)
- **IDSC 8801** - Research Seminar in Information and Decision Sciences (2.0 cr)

- **OR-**

**Marketing**

Take 16 or more credit(s) from the following:
- **MKTG 8809** - Consumer Behavior Research Methods (2.0 cr)
- **MKTG 8810** - Consumer Behavior Special Topics (2.0 cr)
- **MKTG 8811** - Consumer Attitudes and Persuasion I (2.0 cr)
- **MKTG 8812** - Consumer Attitudes and Persuasion II (2.0 cr)
- **MKTG 8813** - Consumer Judgment and Decision Making I (2.0 cr)
- **MKTG 8814** - Consumer Judgment and Decision Making II (2.0 cr)
- **MKTG 8831** - Seminar: Inter-Organizational Relations (4.0 cr)
- **MKTG 8842** - Quantitative Modeling I (2.0 cr)
- **MKTG 8843** - Quantitative Modeling II (2.0 cr)
- **MKTG 8851** - Seminar: Marketing Management and Strategy I (2.0 cr)
- **MKTG 8852** - Marketing Management & Strategy II (2.0 cr)
- **MKTG 8890** - Seminar: Marketing Topics (1.0 - 4.0 cr)

- **OR-**

**Strategic Management and Entrepreneurship**

Take 16 or more credit(s) from the following:
- **MGMT 8101** - Theory Building and Research Design (4.0 cr)
- **MGMT 8202** - Seminar in International Management (4.0 cr)
- **MGMT 8301** - Seminar in Organizational Behavior (4.0 cr)
- **MGMT 8302** - Seminar in Organizations Theory (4.0 cr)
- **MGMT 8401** - Seminar in Strategy Content (2.0 - 4.0 cr)
- **MGMT 8402** - Seminar in Behavioral Strategy (2.0 - 4.0 cr)
- **MGMT 8501** - Seminar in Entrepreneurship (4.0 cr)
Supply Chain and Operations
Take 16 or more credit(s) from the following:
• SCO 8651 - Experimental Design (3.0 cr)
• SCO 8652 - Regression Analysis (3.0 cr)
• SCO 8711 - Research in Operations Strategy (3.0 cr)
• SCO 8721 - Management of Technological Operations (3.0 cr)
• SCO 8735 - Supply Chain Management (3.0 cr)
• SCO 8745 - Research on Quality Management (3.0 cr)
• SCO 8755 - Behavioral Operations (3.0 cr)

-OR-

Work and Organizations
Take 16 or more credit(s) from the following:
• HRIR 8801 - Core Seminar: Fundamentals of Economic Analysis for Work and Organizations (4.0 cr)
• HRIR 8802 - Core Seminar: Organizational Behavior (4.0 cr)
• HRIR 8803 - Core Seminar: Fundamentals of HR Research (4.0 cr)
• HRIR 8812 - Core Seminar: Research Methods in Work and Organizations (4.0 cr)
• HRIR 8820 - Seminar: Special Topics in Work and Organizations Research (2.0 cr)
• HRIR 8825 - Research Practicum/Workshop (1.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctoral

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 64 to 68
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program offers full-time advanced graduate education for students seeking academic placement at leading universities or research-oriented positions in business or government. The program is for individuals who have the intellectual capacity for advanced study, enjoy independent research and analytical thinking, and who wish to master a discipline within business administration.

Students choose to concentrate in one of seven areas of specialization: accounting; finance; information and decision sciences; marketing; supply chain and operations; strategic management and entrepreneurship; and work and organizations.

Accreditation
This program is accredited by Association to Advance Collegiate Schools of Business (AACSB)

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must have completed a four-year undergraduate degree in any relevant field of study.

Other requirements to be completed before admission:
Admission depends on the applicant's grades, test scores (GMAT or GRE), and strength of both the letters of recommendation and the statement of purpose.

Preferred minimum test scores are 650 total on the GMAT or 320 total on the GRE general test.

Special Application Requirements:
Applicants should submit the following items to the Carlson School of Management PhD program office: (1) an official copy of the GMAT or GRE scores taken within the last five years; and (2) official TOEFL or IELTS scores (international applicants only) from a test taken within the last two years. All other application materials (official application, application fee, statement of purpose, resume/vita, three letters of recommendation and transcripts) should be entered directly or uploaded into the online application system. The application deadline for all areas of concentration is December 15 each year for fall admission consideration. Applications are evaluated on a rolling basis beginning in mid-January. Admission decisions continue until available positions are filled.

Applicants must submit their test score(s) from the following:
• GRE
• GMAT
  - Total score: 650
International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Internet Based - Speaking Score: 25
• IELTS
  - Total Score: 7

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, GMAT, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 to 28 credits are required in the major.
16 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.30 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

Degree requirements vary by area of concentration. Each student's coursework is determined in consultation with an advisor. Some areas may require a first-year examination or presentation.

Areas of Concentration

Accounting
Students pursuing the accounting concentration work under one of two accounting research paradigms: analytic or empirical.

Required Accounting Coursework
Take all of the following for 24 credits:
ACCT 8801 - Topics in Empirical Research I (2.0 cr)
ACCT 8802 - Topics in Empirical Research II (2.0 cr)
ACCT 8803 - Topics in Empirical Research III (2.0 cr)
ACCT 8811 - Information Economics I (2.0 cr)
ACCT 8812 - Information Economics II (4.0 cr)
ACCT 8813 - Information Economics III (2.0 cr)
ACCT 8821 - Capital Markets I (2.0 cr)
ACCT 8822 - Capital Markets II (2.0 cr)
ACCT 8823 - Capital Markets III (2.0 cr)
ACCT 8831 - Analytical Research Topics I (2.0 cr)
ACCT 8832 - Analytical Research Topics II (2.0 cr)
ACCT 8833 - Topics in Analytical Research III (2.0 cr)

Supporting/Methodology Coursework
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested coursework is listed below.
Take 16 or more credit(s) from the following:
• APEC 8001 - Applied Microeconomic Analysis of Consumer Choice and Consumer Demand (2.0 cr)
• APEC 8002 - Applied Microeconomic Analysis of Production and Choice Under Uncertainty (2.0 cr)
• APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)
• APEC 8004 - Applied Microeconomic Analysis of Social Choice and Welfare (2.0 cr)
• APEC 8211 - Econometric Analysis I (4.0 cr)
• APEC 8212 - Econometric Analysis II (4.0 cr)
• CSOM 8101 - Methods and Topics in Applied Economics (2.0 - 4.0 cr)
• ECON 8003 - Microeconomic Analysis (2.0 cr)
• ECON 8004 - Microeconomic Analysis (2.0 cr)
• ECON 8205 - Applied Econometrics (2.0 cr)
• FINA 8802 - Theory of Capital Markets I: Discrete Time (2.0 cr)
Finance
Finance is viewed as a subfield of economics. Students achieve a strong foundation in economic theory and empirical methods.

Required Finance Coursework
Take at least 20 credits from the following list. FINA 8810, 8820, and 8890 may be taken more than once.

- FINA 8802 - Theory of Capital Markets I: Discrete Time (2.0 cr)
- FINA 8803 - Theory of Capital Markets II: Continuous Time (2.0 cr)
- FINA 8804 - Advanced Continuous Time Finance (2.0 cr)
- FINA 8810 - Topics in Asset Pricing (2.0 cr)
- FINA 8812 - Corporate Finance I (2.0 cr)
- FINA 8813 - Corporate Finance II (2.0 cr)
- FINA 8820 - Topics in Corporate Finance (2.0 cr)
- FINA 8822 - Empirical Methods in Finance (2.0 cr)
- FINA 8823 - Empirical Corporate Finance (2.0 cr)

Additional Required Finance Coursework (8 credits)
Take the following sequence of economics courses for at least 8 credits.

8101-04 Sequence
- ECON 8101 - Microeconomic Theory (2.0 cr)
- ECON 8102 - Microeconomic Theory (2.0 cr)
- ECON 8103 - Microeconomic Theory (2.0 cr)
- ECON 8104 - Microeconomic Theory (2.0 cr)

Supporting/Methodology Coursework (16 credits)
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested coursework is listed below.

- ACCT 8812 - Information Economics II (4.0 cr)
- ACCT 8831 - Analytical Research Topics I (2.0 cr)
- ACCT 8832 - Analytical Research Topics II (2.0 cr)
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)
- ECON 8003 - Microeconomic Analysis (2.0 cr)
- ECON 8004 - Microeconomic Analysis (2.0 cr)
- ECON 8101 - Microeconomic Theory (2.0 cr)
- ECON 8102 - Microeconomic Theory (2.0 cr)
- ECON 8103 - Microeconomic Theory (2.0 cr)
- ECON 8104 - Microeconomic Theory (2.0 cr)
- ECON 8105 - Macroeconomic Theory (2.0 cr)
- ECON 8106 - Macroeconomic Theory (2.0 cr)
- ECON 8107 - Macroeconomic Theory (2.0 cr)
- ECON 8108 - Macroeconomic Theory (2.0 cr)
- ECON 8181 - Advanced Topics in Microeconomics (2.0 cr)
- ECON 8182 - Advanced Topics in Microeconomics (2.0 cr)
- ECON 8185 - Advanced Topics in Macroeconomics (2.0 cr)
- ECON 8191 - Workshop in Mathematical Economics (1.0 - 3.0 cr)
- ECON 8201 - Econometric Analysis (2.0 cr)
- ECON 8205 - Applied Econometrics (2.0 cr)
- ECON 8206 - Applied Econometrics (2.0 cr)
- ECON 8207 - Applied Econometrics (2.0 cr)
- ECON 8208 - Applied Econometrics (2.0 cr)
- ECON 8211 - Econometrics (2.0 cr)
- ECON 8212 - Econometrics (2.0 cr)
Information and Decision Sciences

Required IDSc PhD Coursework (15 credits)
Take the following courses:
- IDSC 8511 - Conceptual Topics and Research Methods in Information and Decision Sciences (3.0 cr)
- IDSC 8521 - System Development (3.0 cr)
- IDSC 8531 - Organizational Theory and Research in Information Systems (3.0 cr)
- IDSC 8541 - Introduction to Economics of Information Systems (3.0 cr)
- IDSC 8721 - Behavioral Decision Theory (3.0 cr)

Additional IDSc Required Coursework (2 credits)
Take a minimum of 2 credits from the following. 8801 may be repeated.
Take 2 or more credit(s) from the following:
- IDSC 8620 - Data Mining and Personalization (3.0 cr)
- IDSC 8801 - Research Seminar in Information and Decision Sciences (2.0 cr)

Additional Required Coursework (8 credits minimum)
Take the following courses for a total of 8 credits:
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)

Supporting/Methodology Coursework (16 credits minimum)
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested coursework is listed below.
Take 16 or more credit(s) from the following:
- APEC 8001 - Applied Microeconomic Analysis of Consumer Choice and Consumer Demand (2.0 cr)
- APEC 8002 - Applied Microeconomic Analysis of Production and Choice Under Uncertainty (2.0 cr)
- APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)
- APEC 8206 - Dynamic Optimization: Applications in Economics and Management (3.0 cr)
- CSCI 5980 - Special Topics in Computer Science (1.0 - 3.0 cr)
- CSCI 8551 - Intelligent Agents (3.0 cr)
- CSCI 8980 - Special Advanced Topics in Computer Science (1.0 - 3.0 cr)
- CSOM 8101 - Methods and Topics in Applied Economics (2.0 - 4.0 cr)
- ECON 8581 - Advanced Topics in Labor Economics (2.0 cr)
- ECON 8601 - Industrial Organization and Government Regulation (2.0 cr)
- ECON 8602 - Industrial Organization and Government Regulation (2.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
- MGMT 8101 - Theory Building and Research Design (4.0 cr)
- MGMT 8301 - Seminar in Organizational Behavior (4.0 cr)
- MGMT 8302 - Seminar in Organizations Theory (4.0 cr)
- PSY 5018H - Mathematical Models of Human Behavior (3.0 cr)
- PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
- PSY 5993 - Research Laboratory in Psychology (3.0 cr)
- PSY 8201 - Social Cognition (3.0 cr)
- PSY 8960 - Graduate Seminar in Psychology (1.0 - 4.0 cr)
- PUBH 6470 - SAS Procedures and Data Analysis (3.0 cr)
- PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
- PUBH 8442 - Bayesian Decision Theory and Data Analysis (3.0 cr)
- SCO 8652 - Regression Analysis (3.0 cr)
- SCO 8721 - Management of Technological Operations (3.0 cr)
- IDSC 8892 - Readings in Information and Decision Sciences (1.0 - 8.0 cr)
- IDSC 8894 - Graduate Research in Information and Decision Sciences (1.0 - 8.0 cr)
Thesis Credits (24 credits minimum)
Take at least 24 doctoral thesis credits.
BA 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

-OR-

Marketing
Students pursuing the marketing concentration focus on one of two tracks: consumer behavior or marketing quantitative/marketing strategy.

Consumer Behavior Concentration (24 credits minimum)
Take all of the following courses, including at least 8 credits of MKTG 8810, for a total of 18 credits. In addition, take at least 6 credits from the quantitative/marketing strategy concentration course list.
Take 18 or more credit(s) from the following:
• MKTG 8809 - Consumer Behavior Research Methods (2.0 cr)
• MKTG 8810 - Consumer Behavior Special Topics (2.0 cr)
• MKTG 8811 - Consumer Attitudes and Persuasion I (2.0 cr)
• MKTG 8812 - Consumer Attitudes and Persuasion II (2.0 cr)
• MKTG 8813 - Consumer Judgment and Decision Making I (2.0 cr)
• MKTG 8814 - Consumer Judgment and Decision Making II (2.0 cr)

or Quantitative/Marketing Strategy Concentration (24 credits minimum)
Take 12 credits, which can include up to 4 credits of MKTG 8890, from the following list. In addition, take at least 12 credits from the consumer behavior concentration course list.
Take 12 or more credit(s) from the following:
• MKTG 8831 - Seminar: Inter-Organizational Relations (4.0 cr)
• MKTG 8842 - Quantitative Modeling I (2.0 cr)
• MKTG 8843 - Quantitative Modeling II (2.0 cr)
• MKTG 8851 - Seminar: Marketing Management and Strategy I (2.0 cr)
• MKTG 8852 - Marketing Management & Strategy II (2.0 cr)
• MKTG 8890 - Seminar: Marketing Topics (1.0 - 4.0 cr)

Supporting/Methodology Coursework (16 credits minimum)
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested courses are listed below.
ACCT 8811 - Information Economics I (2.0 cr)
ACCT 8831 - Analytical Research Topics I (2.0 cr)
APEC 8211 - Econometric Analysis I (4.0 cr)
APEC 8212 - Econometric Analysis II (4.0 cr)
CSOM 8101 - Methods and Topics in Applied Economics (2.0 - 4.0 cr)
ECON 8003 - Microeconomic Analysis (2.0 cr)
ECON 8004 - Microeconomic Analysis (2.0 cr)
ECON 8101 - Microeconomic Theory (2.0 cr)
ECON 8103 - Microeconomic Theory (2.0 cr)
ECON 8104 - Microeconomic Theory (2.0 cr)
ECON 8118 - Noncooperative Game Theory (2.0 cr)
ECON 8119 - Cooperative Game Theory (2.0 cr)
ECON 8191 - Workshop in Mathematical Economics (1.0 - 3.0 cr)
ECON 8205 - Applied Econometrics (2.0 cr)
ECON 8206 - Applied Econometrics (2.0 cr)
ECON 8207 - Applied Econometrics (2.0 cr)
ECON 8208 - Applied Econometrics (2.0 cr)
ECON 8211 - Econometrics (2.0 cr)
ECON 8212 - Econometrics (2.0 cr)
ECON 8601 - Industrial Organization and Government Regulation (2.0 cr)
ECON 8602 - Industrial Organization and Government Regulation (2.0 cr)
ECON 8603 - Industrial Organization and Government Regulation (2.0 cr)
EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
EPSY 5245 - Advanced Survey Data Analysis for Categorical and Rating Scale Data (1.0 cr)
EPSY 5261 - Introductory Statistical Methods (3.0 cr)
EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)
EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
IDSC 8721 - Behavioral Decision Theory (3.0 cr)
MSBA 6440 - Data-Driven Experimentation and Measurement (3.0 cr)
PSY 5202 - Attitudes and Social Behavior (3.0 cr)
PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
PSY 5207 - Personality and Social Behavior (3.0 cr)
PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
PSY 8203 - Impression Management (3.0 cr)
PSY 8208 - Social Psychology: The Self (3.0 cr)
PSY 8209 - Research Methods in Social Psychology (3.0 cr)
PSY 8935 - Readings in Behavioral Genetics and Individual Differences Psychology (1.0 cr)
PSY 8960 - Graduate Seminar in Psychology (1.0 - 4.0 cr)
STAT 5021 - Statistical Analysis (4.0 cr)
STAT 5303 - Designing Experiments (4.0 cr)
MKTG 8892 - Readings in Marketing (1.0 - 8.0 cr)
MKTG 8894 - Graduate Research in Marketing (1.0 - 8.0 cr)

**Thesis Credits**
Take at least 24 doctoral thesis credits.
BA 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

-OR-

**Supply Chain and Operations**
Students complete coursework in the areas of operations and supply chain management.

**Required SCO Coursework (25 credits minimum)**
Take the following courses for a total of 25 credits:
- SCO 8651 - Experimental Design (3.0 cr)
- SCO 8652 - Regression Analysis (3.0 cr)
- SCO 8711 - Research in Operations Strategy (3.0 cr)
- SCO 8721 - Management of Technological Operations (3.0 cr)
- SCO 8735 - Supply Chain Management (3.0 cr)
- SCO 8745 - Research on Quality Management (3.0 cr)
- SCO 8755 - Behavioral Operations (3.0 cr)
- MGMT 8101 - Theory Building and Research Design (4.0 cr)

**Supporting/Methodology Coursework (16 credits minimum)**
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested coursework is listed below.
Take 16 or more credit(s) from the following:
- APEC 8206 - Dynamic Optimization: Applications in Economics and Management (3.0 cr)
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)
- APEC 8602 - Economics of the Environment (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
- GRAD 8101 - Teaching in Higher Education (3.0 cr)
- HRIR 8802 - Core Seminar: Organizational Behavior (4.0 cr)
- MGMT 8302 - Seminar in Organizations Theory (4.0 cr)
- MKTG 8842 - Quantitative Modeling I (2.0 cr)
- MKTG 8843 - Quantitative Modeling II (2.0 cr)
- PA 5032 - Applied Regression (2.0 cr)
- PA 5033 - Multivariate Techniques (2.0 cr)
- PUBH 7405 - Biostatistics: Regression (4.0 cr)
- PUBH 7406 - Advanced Regression and Design (4.0 cr)
- PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)
- PUBH 7475 - Statistical Learning and Data Mining (3.0 cr)
- PUBH 8475 - Statistical Learning and Data Mining (3.0 cr)
- PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)
- SOC 5811 - Social Statistics for Graduate Students [MATH] (4.0 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)
- STAT 5022 - Theory of Statistics I (4.0 cr)
- STAT 5023 - Theory of Statistics II (4.0 cr)
- STAT 5302 - Applied Regression Analysis (4.0 cr)
- STAT 5421 - Analysis of Categorical Data (3.0 cr)
- STAT 5701 - Statistical Computing (3.0 cr)
- STAT 8051 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)
- STAT 8311 - Linear Models (4.0 cr)
- SCO 8892 - Readings in Operations and Management Science (1.0 - 8.0 cr)
- SCO 8894 - Graduate Research in Operations and Management Science (1.0 - 8.0 cr)

**Thesis Credits (24 credits minimum)**
Take at least 24 doctoral thesis credits.
BA 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Strategic Management and Entrepreneurship
Students focus on leadership, strategy, and entrepreneurship connecting the external worlds of competition and collaboration.

Required SME Coursework (12 credits minimum)
Take all of the following courses, including 4 credits of MGMT 8401.
MGMT 8302 - Seminar in Organizations Theory (4.0 cr)
MGMT 8401 - Seminar in Strategy Content (2.0 - 4.0 cr)
MGMT 8402 - Seminar in Behavioral Strategy (2.0 - 4.0 cr)

Additional Required Coursework (11 credits)
Take 11 or more credit(s) from the following:
- APEC 8211 - Econometric Analysis I (4.0 cr)
- GRAD 8101 - Teaching in Higher Education (3.0 cr)
- MGMT 8101 - Theory Building and Research Design (4.0 cr)

SME Electives (4 credits)
Take one of the following courses:
- MGMT 8202 - Seminar in International Management (4.0 cr)
- or MGMT 8501 - Seminar in Entrepreneurship (4.0 cr)

Supporting/Methodology Coursework (16 credits minimum)
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested coursework is listed below.
Take 16 or more credit(s) from the following:
- APEC 8001 - Applied Microeconomic Analysis of Consumer Choice and Consumer Demand (2.0 cr)
- APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)
- APEC 8004 - Applied Microeconomic Analysis of Social Choice and Welfare (2.0 cr)
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)
- CSCI 5980 - Special Topics in Computer Science (1.0 - 3.0 cr)
- CSOM 8101 - Methods and Topics in Applied Economics (2.0 - 4.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)
- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
- EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
- FINA 8823 - Empirical Corporate Finance (2.0 cr)
- GRAD 8101 - Teaching in Higher Education (3.0 cr)
- HINF 5502 - Python Programming Essentials for the Health Sciences (1.0 cr)
- MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
- MGMT 8892 - Readings in Management Theory and Administration (1.0 - 8.0 cr)
- MGMT 8894 - Graduate Research in Management Theory and Administration (1.0 - 8.0 cr)
- MKTG 8831 - Seminar: Inter-Organizational Relations (4.0 cr)
- PA 8302 - Applied Policy Analysis (4.0 cr)
- POL 8106 - Quantitative Political Science I (3.0 cr)
- PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)
- PUBH 8811 - Research Methods in Health Care (3.0 cr)
- SOC 8412 - Social Network Analysis: Theory and Methods (3.0 cr)
- SOC 8701 - Sociological Theory (4.0 cr)
- SOC 8721 - Social Psychology: Micro-Sociological Approaches to Inequalities and Identities (3.0 cr)
- SOC 8735 - Sociology of Culture (3.0 cr)
- SOC 8801 - Sociological Research Methods (4.0 cr)
- SOC 8811 - Advanced Social Statistics (4.0 cr)
- SOC 8890 - Advanced Topics in Research Methods (2.0 - 3.0 cr)
- STAT 8031 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)

Thesis Credits (24 credits minimum)
Take at least 24 doctoral thesis credits.
BA 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Work and Organizations
Students complete multidisciplinary coursework covering organizational behavior, human resource management, organizational economics, personnel economics, labor relations, and related areas.

Required WOrg Coursework (24-28 credits)
Take 24-28 credits from the following list. Take HRIR 8820 2-4 times for a total of 4-8 credits. Take HRIR 8825 4 times for a total of 4 credits.
Take 24 - 28 credit(s) from the following:
- HRIR 8801 - Core Seminar: Fundamentals of Economic Analysis for Work and Organizations (4.0 cr)
• HRIR 8802 - Core Seminar: Organizational Behavior (4.0 cr)
• HRIR 8803 - Core Seminar: Fundamentals of HR Research (4.0 cr)
• HRIR 8812 - Core Seminar: Research Methods in Work and Organizations (4.0 cr)
• HRIR 8820 - Seminar: Special Topics in Work and Organizations Research (2.0 cr)
• HRIR 8825 - Research Practicum/Workshop (1.0 cr)
• PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)

• Supporting/Methodology Coursework (16 credits minimum)
  Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested coursework is listed below.
  Take 16 or more credit(s) from the following:
  • APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)
  • APEC 8211 - Econometric Analysis I (4.0 cr)
  • APEC 8212 - Econometric Analysis II (4.0 cr)
  • APEC 8501 - Labor Economics I (2.0 cr)
  • APEC 8502 - Labor Economics II (2.0 cr)
  • CSOM 8101 - Methods and Topics in Applied Economics (2.0 - 4.0 cr)
  • ECON 8205 - Applied Econometrics (2.0 cr)
  • ECON 8206 - Applied Econometrics (2.0 cr)
  • EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
  • EPSY 5261 - Introductory Statistical Methods (3.0 cr)
  • EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
  • EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
  • EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
  • EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
  • MGMT 8101 - Theory Building and Research Design (4.0 cr)
  • MGMT 8301 - Seminar in Organizational Behavior (4.0 cr)
  • PSY 8208 - Social Psychology: The Self (3.0 cr)
  • PSY 8664 - Personality Assessment (3.0 cr)
  • PSY 8701 - Seminar in Industrial and Organizational Psychology I (3.0 cr)
  • PSY 8702 - Seminar in Industrial and Organizational Psychology II (3.0 cr)
  • PSY 8960 - Graduate Seminar in Psychology (1.0 - 4.0 cr)
  • PUBH 6724 - The Health Care System and Public Health (3.0 cr)
  • PUBH 6832 - Economics of the Health Care System (3.0 cr)
  • PUBH 6861 - Health Insurance (2.0 cr)
  • SOC 8590 - Topics in Life Course Sociology (3.0 cr)
  • HRIR 8991 - Independent Study in Human Resources and Industrial Relations (1.0 - 8.0 cr)

• Thesis Credits (24 credits minimum)
  Take at least 24 doctoral thesis credits.
  • BA 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
**Twin Cities Campus**

**Business Analytics M.S.**

*Information & Decision Sciences*

*Curtis L. Carlson School of Management*

Link to a list of faculty for this program.

**Contact Information:**
Phone: 612-625-5555  
Email: msba@umn.edu  
Website: [https://carlsonschool.umn.edu/degrees/master-science-in-business-analytics](https://carlsonschool.umn.edu/degrees/master-science-in-business-analytics)

- Program Type: Master's  
- Requirements for this program are current for Fall 2018  
- Length of program in credits: 45  
- This program requires summer semesters for timely completion.  
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The MS in Business Analytics (MSBA) program provides a strong foundation in data analytics by bringing together a diverse body of knowledge from consumer behavior, risk management, operations research, optimization, information systems, computer science, applied statistics, and decision theory for the purpose of data-driven business decision making in both public and private sectors.

Students who graduate from this 45-credit program will have the deep quantitative capabilities and technical expertise to create business and social value by extracting useful insights and applying them in a variety of career settings. The Business Analytics MS can be completed in one year of full-time study, or in two years part-time.

**Dual MBA-MSBA Degree**  
The Carlson School of Management offers a dual MBA-MSBA degree option. The MBA curriculum provides a rigorous business education while MSBA courses teach students how to collect and analyze data for business value. The combination of the two programs prepares graduates to identify business opportunities and advantages using data-derived insights. The MBA-MSBA dual degree can be completed in 2.5 years and culminates in the completion of two graduate degree programs.

**Accreditation**  
This program is accredited by AACSB International. The M.S. program in Business Analytics is STEM designated.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
Applicants must have a bachelor's degree from an accredited college or university.

Other requirements to be completed before admission:
- Demonstrated proficiency in computer programming is required. The following programming languages satisfy the requirement: Python, R, C, C++, C#, VB, Java, Pascal, and Fortran.  
- Applicants must have completed at least one semester college-level Calculus course with a grade of "C" or better (or grade equivalent).  
- Work experience is not required, but preferred.

**Special Application Requirements:**
MSBA Application Requirements:
Applicants must submit all application materials through the University's admissions system. Application materials include:
- A GMAT or GRE General Test that is not more than five years old, with an acceptable score. PT MSBA applicants: A GMAT/GRE waiver is available for qualified candidates.  
- For international students, an acceptable score on the Test of English as a Foreign Language (TOEFL) International Language Testing System (IELTS).  
- Three letters of recommendations need to be submitted through the online application.
- A personal statement of career goals, and objectives for pursuing a Business Analytics M.S. degree. The personal statement questions are the following:
  Briefly describe your short-term and long-term career goals. Why are you choosing to pursue a Business Analytics M.S. degree at this time in your career, and what are you hoping to accomplish by doing so? Why are you interested in pursuing a Business Analytics M.S. degree at the Carlson School of Management? What do you feel makes you a strong candidate for the program? How will you contribute to the Business Analytics M.S. Program overall? Applicants must submit a current resume that includes job responsibilities and accomplishments in the online application.
- Applicants may choose to submit an essay to comment on any item(s) in their application they consider worthy of further explanation.
- Applicants may be required to complete an admissions interview, which are by invitation only.

MSBA/MBA Dual Degree Application Requirements:
Students must be admitted to the MSBA and MBA programs separately. Students will take either the GRE or the GMAT as part of this process, and follow all other admissions criteria set by either program.

Applicants must submit their test score(s) from the following:
- GRE
- GMAT

International applicants must submit score(s) from one of the following tests:
- TOEFL
- IELTS

Key to test abbreviations (GRE, GMAT, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 45 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: Students will engage in an experiential learning application of the analytics methodologies, techniques, and tools learned throughout the program to a real-world problem. The final project will consist of the development and presentation of results, interpretations, insights, and recommendations.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

Some business/basic technical requirements can be waived for students with degrees in related business areas/computer science.

Business/Management Fundamentals (15 credits)

MBA 6030 - Financial Accounting (3.0 cr)
MBA 6210 - Marketing Management (3.0 cr)
MSBA 6250 - Analytics for Competitive Advantage (3.0 cr)
MSBA 6120 - Introduction to Statistics for Data Scientists (3.0 cr)
MSBA 6345 - Project Management of Analytics Projects (1.5 cr)
MSBA 6355 - Building and Managing Teams (0.0 - 1.5 cr)

Technical Fundamentals (9 credits)

MSBA 6310 - Programming for Data Science (3.0 cr)
MSBA 6320 - Data Management, Databases, and Data Warehousing (3.0 cr)
MSBA 6330 - Big Data Analytics (3.0 cr)

Specialty Courses (15 credits)

MSBA 6410 - Exploratory Data Analytics and Visualization (3.0 cr)
MSBA 6420 - Predictive Analytics (3.0 cr)
MSBA 6430 - Advanced Issues in Business Analytics (3.0 cr)
MSBA 6440 - Data-Driven Experimentation and Measurement (3.0 cr)
MSBA 6450 - Modeling and Heuristics for Decision Making and Support (3.0 cr)

Capstone Experience (6 credits)

MSBA 6510 - Business Analytics Experiential Learning (6.0 cr)

Website: http://TBD

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 8
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.
- Coursework is delivered through the Carlson School of Management via the following delivery methods: in-person courses on the Twin Cities campus, courses utilizing a hybrid of in-person meetings and online content delivery, or coursework delivered completely online.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The free-standing graduate-level minor in business management will enhance the preparation of graduate students to enter into organizations with a solid foundation of knowledge in key business disciplines. The business management minor program is flexible and designed to suit the particular needs and interests of the student through completion of a broad range of business core (foundation) and elective courses.

Note: Students enrolled in the master of business administration program or the business administration PhD program are not eligible for this minor.

Accreditation
This program is accredited by AACSB International

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Prior admission into an established master's or doctoral degree program at the University of Minnesota - Twin Cities, is required. Students must be in good academic standing within their own program to be admitted to the business minor. Students enrolled in the master of business administration program or the business administration PhD program are not eligible for this minor.

Students should first consult with their major program advisor about the advisability of a business minor and whether it is permitted by their program. They may then contact graduate program coordinator, Christina Wiencke (choldvog@umn.edu or 612) 625-7582) for more information on the minor.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.
Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters

Master’s Business Minor
Take 8 or more credit(s) from the following:
• ACCT 5180 - Consolidations and Advanced Reporting (2.0 cr)
• ACCT 6100 - Financial Statement Analysis (4.0 cr)
• BLAW 6158 - The study of laws affecting private business and publicly-traded companies. (2.0 cr)
• ENTR 6020 - Business Formation (4.0 cr)
• ENTR 6021 - Preparing and Implementing the Business Plan (2.0 cr)
• ENTR 6036 - Managing the Growing Business (2.0 cr)
• ENTR 6037 - Corporate Venturing (2.0 cr)
• ENTR 6041 - Initiating New Product Design and Business Development (2.0 - 4.0 cr)
• ENTR 6042 - Implementing New Product Design and Business Development (4.0 cr)
• FINA 6121 - Debt Markets, Interest Rates, and Hedging (2.0 cr)
• FINA 6122 - Financial Management of Depository Institutions (2.0 cr)
• FINA 6123 - Financial Services Industry (2.0 cr)
• FINA 6222 - Mergers and Acquisitions (2.0 cr)
• FINA 6241 - Corporate Finance Analysis and Decisions (4.0 cr)
• FINA 6242 - Advanced Corporate Finance Analysis and Decisions (4.0 cr)
• FINA 6321 - Portfolio Analysis and Management (2.0 cr)
• FINA 6322 - Financial Modeling (2.0 cr)
• FINA 6323 - Advanced Financial Modeling (2.0 cr)
• FINA 6324 - Securitization Markets (2.0 cr)
• FINA 6325 - Behavioral Finance (2.0 cr)
• FINA 6341 - World Economy (4.0 cr)
• FINA 6522 - Introduction to Derivatives and Financial Risk Management (2.0 cr)
• FINA 6529 - Advanced Topics in Fixed Income and Derivatives (2.0 cr)
• FINA 6621 - International Financial Management (2.0 cr)
• FINA 6801 - Finance Independent Study (1.0 - 6.0 cr)
• HRIR 6465 - Leadership and Personal Development (2.0 cr)
• IDSC 6040 - Information Technology Management (2.0 cr)
• IDSC 6050 - Information Technologies and Solutions (2.0 cr)
• IDSC 6423 - Enterprise Systems (2.0 cr)
• IDSC 6442 - E-Sourcing and E-Auctions (2.0 cr)
• IDSC 6444 - Business Analytics for Managers I (2.0 cr)
• IDSC 6446 - Business Analytics for Managers II (2.0 cr)
• IDSC 6455 - Web 2.0: The Business of Social Media (2.0 cr)
• IDSC 6465 - Global Sourcing of IT and IT Enabled Services (4.0 cr)
• IDSC 6471 - Knowledge Management (2.0 cr)
• IDSC 6481 - Managerial Decision Making (2.0 cr)
• MBA 6030 - Financial Accounting (3.0 cr)
• MBA 6035 - Managerial Accounting (3.0 cr)
• MBA 6110 - Leading Others (2.0 cr)
• MBA 6120 - Data Analysis and Statistics for Managers (3.0 cr)
• MBA 6140 - Managerial Economics (2.0 cr)
• MBA 6210 - Marketing Management (3.0 cr)
• MBA 6220 - Supply Chain & Operations (3.0 cr)
• MBA 6230 - Financial Management (3.0 cr)
• MBA 6300 - Strategic Management (3.0 cr)
• MBA 6403 - Energy Industry (2.0 cr)
• MBA 6990 - MBA Topics (2.0 cr)
• MCOM 5500 - Enhancing Your Executive Image in Business Communications (2.0 cr)
• MCOM 5510 - Persuasive Writing in Business (2.0 cr)
• MCOM 5530 - Strategies and Skills for Managerial Presentations (2.0 cr)
• MGMT 5102 - StartUp: Customer Development and Testing (2.0 cr)
• MGMT 6004 - Negotiation Strategies (2.0 cr)
• MGMT 6031 - Industry Analysis and Competitive Strategy (4.0 cr)
• MGMT 6032 - Strategic Alliances (2.0 cr)
• MGMT 6033 - Managing the Strategy Process (2.0 cr)
• MGMT 6034 - Strategic Leadership (2.0 cr)
• MGMT 6035 - Complex and Cross-Cultural Negotiations (2.0 cr)
• MGMT 6040 - International Strategy and Organization (2.0 cr)
• MGMT 6050 - Management of Innovation and Change (2.0 cr)
• MGMT 6084 - Management of Groups (2.0 cr)
• MGMT 6085 - Corporate Strategy (4.0 cr)
• MGMT 6100 - Topics in Management (1.0 - 4.0 cr)
• MGMT 6305 - The International Environment of Business (4.0 cr)
• MGMT 6310 - Cross-Cultural Management: Developing Intercultural Competence (2.0 cr)
• MGMT 6402 - Integrative Leadership: From Theory to Practice (3.0 cr)
• MGMT 6410 - Corporate Responsibility (2.0 cr)
• MILI 6235 - Pharmaceutical Industry: Business and Policy (2.0 cr)
• MILI 6421 - Healthcare Law: Strategic and Business Implications (2.0 cr)
• MILI 6562 - Information Technology in Health Care (2.0 cr)
• MILI 6589 - Medical Technology Evaluation and Market Research (2.0 cr)
• MILI 6726 - Medical Device Industry: Business and Public Policy (2.0 cr)
• MILI 6963 - Healthcare Analytics (2.0 cr)
• MILI 6990 - The Health Care Marketplace (2.0 cr)
• MILI 6991 - Anatomy and Physiology for Managers (2.0 cr)
• MILI 6992 - Healthcare Delivery Innovations: Optimizing Cost and Quality (2.0 cr)
• MILI 6995 - Medical Industry Valuation Laboratory (2.0 cr)
• MILI 6997 - MILI Global Valuation Lab (4.0 cr)
• MILI 6998 - MILI Fellows (0.0 - 2.0 cr)
• MILI 6999 - Independent Study (0.0 - 8.0 cr)
• MKTG 6050 - Business Research Methods (2.0 cr)
• MKTG 6051 - Marketing Research (4.0 cr)
• MKTG 6055 - Buyer Behavior (4.0 cr)
• MKTG 6060 - Marketing Channels (2.0 cr)
• MKTG 6072 - International Marketing (4.0 cr)
• MKTG 6073 - Marketing in High Tech Settings (2.0 cr)
• MKTG 6075 - Pricing Strategy (4.0 cr)
• MKTG 6078 - Advertising & Promotion (4.0 cr)
• MKTG 6082 - Brand Strategy (2.0 cr)
• MKTG 6084 - Persuasion and Influence (2.0 cr)
• MKTG 6085 - Harnessing Consumer Irrationality (2.0 cr)
• MKTG 6086 - Digital Marketing (2.0 cr)
• MKTG 6088 - Strategic Marketing (2.0 cr)
• MKTG 6090 - Marketing Topics (1.0 - 4.0 cr)
• SCO 6041 - Project Management (2.0 cr)
• SCO 6045 - Strategic Sourcing (2.0 cr)
• SCO 6048 - Logistics and Transportation (2.0 cr)
• SCO 6051 - Service Management (2.0 cr)
• SCO 6056 - Managing Supply Chain Operations (4.0 cr)
• SCO 6072 - Managing Technologies in the Supply Chain (2.0 cr)
• SCO 6081 - Global Operations Strategy (4.0 cr)
• SCO 6090 - Sales, Inventory, and Operations Planning (2.0 cr)
• SCO 6091 - Process Improvement Methods (2.0 cr)
• SCO 6092 - Supply Chain Risk and Security (2.0 cr)
• SCO 6094 - Responsible Supply Chain Management (2.0 cr)
• SCO 6095 - Supply Chain Management in the Food and Agribusiness Sector (2.0 cr)
• SCO 6096 - Supply Chain Management in the Health Care and Medical Devices Sector (2.0 cr)
• SCO 6097 - Supply Chain Management in the Retail Sector (2.0 cr)
• SCO 6098 - Operations Excellence via Lean Thinking (2.0 cr)
• SCO 6191 - Big Data Analytics in Supply Chains (2.0 cr)
• SCO 6192 - Supply Chain Finance (2.0 cr)
• SCO 6850 - Topics in Operations and Management Science (2.0 - 4.0 cr)

Business Administration PhD Program, Suite 4-205, 321-19th Avenue South, Minneapolis, MN 55455 (Phone: 612-624-0875; Fax: 612-624-8221)
Email: csom-phd@umn.edu
Website: http://www.carlsonschool.umn.edu/phd-ba/

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 40 to 44
- This program does not require summer semesters for timely completion.
- No
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The business research MS is a terminal master's degree option restricted to eligible business administration PhD students who do not complete the doctoral degree. Applications to the business research MS are not otherwise considered.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must be current business administration PhD students who have completed all required core, concentration, and supporting coursework for the doctoral degree. The preliminary written examination must have been passed at the master's level, based on a set of criteria approved by the Carlson School PhD Committee comprising members from all seven areas of concentration.

Applicants must submit their test score(s) from the following:
• GRE
• GMAT
  - Total score: 650

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100

Key to test abbreviations (GRE, GMAT, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 24 to 28 major credits and 16 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.
A minimum GPA of 3.3 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

Areas of Concentration
Students select one of seven areas of concentration. Concentration areas may require a first-year examination/presentation in addition to other program requirements.

Accounting
Students pursuing the accounting concentration must work under one of two accounting research paradigms: analytic or empirical.

Required Accounting Coursework (24 credits minimum)
Take the following 24 credits:
- ACCT 8801 - Topics in Empirical Research I (2.0 cr)
- ACCT 8802 - Topics in Empirical Research II (2.0 cr)
- ACCT 8803 - Topics in Empirical Research III (2.0 cr)
- ACCT 8811 - Information Economics I (2.0 cr)
- ACCT 8812 - Information Economics II (4.0 cr)
- ACCT 8813 - Information Economics III (2.0 cr)
- ACCT 8821 - Capital Markets I (2.0 cr)
- ACCT 8822 - Capital Markets II (2.0 cr)
- ACCT 8823 - Capital Markets III (2.0 cr)
- ACCT 8831 - Analytical Research Topics I (2.0 cr)
- ACCT 8832 - Analytical Research Topics II (2.0 cr)
- ACCT 8833 - Topics in Analytical Research III (2.0 cr)

Supporting/Methodology Coursework (16 credits minimum)
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested coursework is listed below.
Take 16 or more credit(s) from the following:
- APEC 8001 - Applied Microeconomic Analysis of Consumer Choice and Consumer Demand (2.0 cr)
- APEC 8002 - Applied Microeconomic Analysis of Production and Choice Under Uncertainty (2.0 cr)
- APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)
- APEC 8004 - Applied Microeconomic Analysis of Social Choice and Welfare (2.0 cr)
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)
- CSOM 8101 - Methods and Topics in Applied Economics (2.0 - 4.0 cr)
- ECON 8003 - Microeconomic Analysis (2.0 cr)
- ECON 8004 - Microeconomic Analysis (2.0 cr)
- ECON 8205 - Applied Econometrics (2.0 cr)
- FINA 8802 - Theory of Capital Markets I: Discrete Time (2.0 cr)
- FINA 8812 - Corporate Finance I (2.0 cr)
- FINA 8813 - Corporate Finance II (2.0 cr)
- FINA 8822 - Empirical Methods in Finance (2.0 cr)
- FINA 8823 - Empirical Corporate Finance (2.0 cr)
- MATH 4603 - Advanced Calculus I (4.0 cr)
- MATH 4604 - Advanced Calculus II (4.0 cr)
- MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
- PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
- STAT 5101 - Theory of Statistics I (3.0 cr)
- ACCT 8892 - Readings in Accounting (1.0 - 8.0 cr)
- ACCT 8894 - Research in Accounting (1.0 - 8.0 cr)

-OR-

Finance
Finance is viewed as a subfield of economics. Students achieve a strong foundation in economic theory and empirical methods.

Required Finance Coursework (20 credits minimum)
Take at least 20 credits from the following list. FINA 8810, 8820, and 8890 may be taken more than once.
- FINA 8802 - Theory of Capital Markets I: Discrete Time (2.0 cr)
- FINA 8803 - Theory of Capital Markets II: Continuous Time (2.0 cr)
- FINA 8804 - Advanced Continuous Time Finance (2.0 cr)
- FINA 8810 - Topics in Asset Pricing (2.0 cr)
- FINA 8812 - Corporate Finance I (2.0 cr)
- FINA 8813 - Corporate Finance II (2.0 cr)
- FINA 8820 - Topics in Corporate Finance (2.0 cr)
- FINA 8822 - Empirical Methods in Finance (2.0 cr)
- FINA 8823 - Empirical Corporate Finance (2.0 cr)
FINA 8890 - Seminar: Finance Topics (2.0 - 4.0 cr)

Additional Required Finance Coursework (8 credits required)

Take the following sequence of economics courses:

8101-04 Sequence
- ECON 8101 - Microeconomic Theory (2.0 cr)
- ECON 8102 - Microeconomic Theory (2.0 cr)
- ECON 8103 - Microeconomic Theory (2.0 cr)
- ECON 8104 - Microeconomic Theory (2.0 cr)

Supporting/Methodology Coursework (16 credits minimum)

Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested courses are listed below. Take 16 or more credit(s) from the following:
- ACCT 8812 - Information Economics II (4.0 cr)
- ACCT 8831 - Analytical Research Topics I (2.0 cr)
- ACCT 8832 - Analytical Research Topics II (2.0 cr)
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)
- ECON 8003 - Microeconomic Analysis (2.0 cr)
- ECON 8004 - Microeconomic Analysis (2.0 cr)
- ECON 8101 - Microeconomic Theory (2.0 cr)
- ECON 8102 - Microeconomic Theory (2.0 cr)
- ECON 8103 - Microeconomic Theory (2.0 cr)
- ECON 8104 - Microeconomic Theory (2.0 cr)
- ECON 8105 - Macroeconomic Theory (2.0 cr)
- ECON 8106 - Macroeconomic Theory (2.0 cr)
- ECON 8107 - Macroeconomic Theory (2.0 cr)
- ECON 8108 - Macroeconomic Theory (2.0 cr)
- ECON 8181 - Advanced Topics in Microeconomics (2.0 cr)
- ECON 8182 - Advanced Topics in Microeconomics (2.0 cr)
- ECON 8185 - Advanced Topics in Macroeconomics (2.0 cr)
- ECON 8191 - Workshop in Mathematical Economics (1.0 - 3.0 cr)
- ECON 8201 - Econometric Analysis (2.0 cr)
- ECON 8205 - Applied Econometrics (2.0 cr)
- ECON 8206 - Applied Econometrics (2.0 cr)
- ECON 8207 - Applied Econometrics (2.0 cr)
- ECON 8208 - Applied Econometrics (2.0 cr)
- ECON 8211 - Econometrics (2.0 cr)
- ECON 8212 - Econometrics (2.0 cr)
- ECON 8501 - Wages and Employment (2.0 cr)
- ECON 8601 - Industrial Organization and Government Regulation (2.0 cr)
- ECON 8602 - Industrial Organization and Government Regulation (2.0 cr)
- ECON 8701 - Monetary Economics (2.0 cr)
- ECON 8702 - Monetary Economics (2.0 cr)
- ECON 8704 - Financial Economics (2.0 cr)
- ECON 8705 - Financial Economics (2.0 cr)
- MATH 8601 - Real Analysis (3.0 cr)
- FINA 8892 - Independent Study in Finance (1.0 - 8.0 cr)
- FINA 8894 - Directed Research in Finance (1.0 - 8.0 cr)

-OR-

Information and Decision Sciences

Required IDsc Coursework (15 credits)

Take all of the following courses.
- IDSC 8511 - Conceptual Topics and Research Methods in Information and Decision Sciences (3.0 cr)
- IDSC 8521 - System Development (3.0 cr)
- IDSC 8531 - Organizational Theory and Research in Information Systems (3.0 cr)
- IDSC 8541 - Introduction to Economics of Information Systems (3.0 cr)
- IDSC 8721 - Behavioral Decision Theory (3.0 cr)

Additional IDsc Required Coursework

Take a minimum of 2 credits from the following
- Take 2 or more credit(s) from the following:
  - IDSC 8620 - Data Mining and Personalization (3.0 cr)
  - IDSC 8801 - Research Seminar in Information and Decision Sciences (2.0 cr)

Additional Required Coursework (8 credits)

Take the following courses for a total of 8 credits:
- APEC 8211 - Econometric Analysis I (4.0 cr)

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
APEC 8212 - Econometric Analysis II (4.0 cr)

Supporting/Methodology Coursework (16 credits minimum)
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested courses are listed below. Take 16 or more credit(s) from the following:
• APEC 8001 - Applied Microeconomic Analysis of Consumer Choice and Consumer Demand (2.0 cr)
• APEC 8002 - Applied Microeconomic Analysis of Production and Choice Under Uncertainty (2.0 cr)
• APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)
• APEC 8206 - Dynamic Optimization: Applications in Economics and Management (3.0 cr)
• CSCI 5980 - Special Topics in Computer Science (1.0 - 3.0 cr)
• CSCI 8551 - Intelligent Agents (3.0 cr)
• CSCI 8980 - Special Advanced Topics in Computer Science (1.0 - 3.0 cr)
• ECON 8581 - Advanced Topics in Labor Economics (2.0 cr)
• ECON 8601 - Industrial Organization and Government Regulation (2.0 cr)
• ECON 8602 - Industrial Organization and Government Regulation (2.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
• EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• MGMT 8101 - Theory Building and Research Design (4.0 cr)
• MGMT 8301 - Seminar in Organizational Behavior (4.0 cr)
• MGMT 8302 - Seminar in Organizations Theory (4.0 cr)
• PSY 5018H - Mathematical Models of Human Behavior (3.0 cr)
• PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
• PSY 5993 - Research Laboratory in Psychology (3.0 cr)
• PSY 8201 - Social Cognition (3.0 cr)
• PSY 8960 - Graduate Seminar in Psychology (1.0 - 4.0 cr)
• PUBH 6470 - SAS Procedures and Data Analysis (3.0 cr)
• PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
• PUBH 8442 - Bayesian Decision Theory and Data Analysis (3.0 cr)
• SCO 8652 - Regression Analysis (3.0 cr)
• SCO 8721 - Management of Technological Operations (3.0 cr)
• IDSC 8892 - Readings in Information and Decision Sciences (1.0 - 8.0 cr)
• IDSC 8894 - Graduate Research in Information and Decision Sciences (1.0 - 8.0 cr)

-OR-

Marketing
Students pursuing the marketing concentration choose one of two focus areas: consumer behavior or quantitative/ marketing strategy.

Consumer Behavior Concentration (24 credits minimum)
Take all of the following courses, including at least 8 credits of MKTG 8810, for a total of 18 credits. In addition, take at least 6 credits from the quantitative/marketing strategy concentration course list. Take 18 or more credit(s) from the following:
• MKTG 8809 - Consumer Behavior Research Methods (2.0 cr)
• MKTG 8810 - Consumer Behavior Special Topics (2.0 cr)
• MKTG 8811 - Consumer Attitudes and Persuasion I (2.0 cr)
• MKTG 8812 - Consumer Attitudes and Persuasion II (2.0 cr)
• MKTG 8813 - Consumer Judgment and Decision Making I (2.0 cr)
• MKTG 8814 - Consumer Judgment and Decision Making II (2.0 cr)

or Quantitative/Marketing Strategy Concentration (24 credits minimum)
Take 12 credits, which can include up to 4 credits of MKTG 8890, from the following list. In addition, take at least 12 credits from the consumer behavior concentration course list. Take 12 or more credit(s) from the following:
• MKTG 8831 - Seminar: Inter-Organizational Relations (4.0 cr)
• MKTG 8842 - Quantitative Modeling I (2.0 cr)
• MKTG 8843 - Quantitative Modeling II (2.0 cr)
• MKTG 8851 - Seminar: Marketing Management and Strategy I (2.0 cr)
• MKTG 8852 - Marketing Management & Strategy II (2.0 cr)
• MKTG 8890 - Seminar: Marketing Topics (1.0 - 4.0 cr)

Supporting/Methodology Coursework (16 credits minimum)
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested courses are listed below.
• ACCT 8811 - Information Economics I (2.0 cr)
• ACCT 8831 - Analytical Research Topics I (2.0 cr)
• APEC 8211 - Econometric Analysis I (4.0 cr)
• APEC 8212 - Econometric Analysis II (4.0 cr)
CSOM 8101 - Methods and Topics in Applied Economics (2.0 - 4.0 cr)
ECON 8003 - Microeconomic Analysis (2.0 cr)
ECON 8004 - Microeconomic Analysis (2.0 cr)
ECON 8101 - Microeconomic Theory (2.0 cr)
ECON 8103 - Microeconomic Theory (2.0 cr)
ECON 8104 - Microeconomic Theory (2.0 cr)
ECON 8118 - Noncooperative Game Theory (2.0 cr)
ECON 8119 - Cooperative Game Theory (2.0 cr)
ECON 8191 - Workshop in Mathematical Economics (1.0 - 3.0 cr)
ECON 8205 - Applied Econometrics (2.0 cr)
ECON 8206 - Applied Econometrics (2.0 cr)
ECON 8207 - Applied Econometrics (2.0 cr)
ECON 8208 - Applied Econometrics (2.0 cr)
ECON 8211 - Econometrics (2.0 cr)
ECON 8212 - Econometrics (2.0 cr)
ECON 8601 - Industrial Organization and Government Regulation (2.0 cr)
ECON 8602 - Industrial Organization and Government Regulation (2.0 cr)
ECON 8603 - Industrial Organization and Government Regulation (2.0 cr)
EPSY 5221 - Principles of Educational and Psychological Measurement (3.0 cr)
EPSY 5245 - Advanced Survey Data Analysis for Categorical and Rating Scale Data (1.0 cr)
EPSY 5261 - Introductory Statistical Methods (3.0 cr)
EPSY 5262 - Intermediate Statistical Methods (3.0 cr)
EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)
EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
EPSY 8267 - Applied Multivariate Analysis (3.0 cr)
IDS 8721 - Behavioral Decision Theory (3.0 cr)
MSBA 6440 - Data-Driven Experimentation and Measurement (3.0 cr)
PSY 5202 - Attitudes and Social Behavior (3.0 cr)
PSY 5204 - Psychology of Interpersonal Relationships (3.0 cr)
PSY 5207 - Personality and Social Behavior (3.0 cr)
PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)
PSY 8203 - Impression Management (3.0 cr)
PSY 8208 - Social Psychology: The Self (3.0 cr)
PSY 8209 - Research Methods in Social Psychology (3.0 cr)
PSY 8935 - Readings in Behavioral Genetics and Individual Differences Psychology (1.0 cr)
PSY 8960 - Graduate Seminar in Psychology (1.0 - 4.0 cr)
STAT 5021 - Statistical Analysis (4.0 cr)
STAT 5303 - Designing Experiments (4.0 cr)
MKTG 8892 - Readings in Marketing (1.0 - 8.0 cr)
MKTG 8894 - Graduate Research in Marketing (1.0 - 8.0 cr)

-OR-

Supply Chain and Operations
Students complete coursework in the areas of operations and supply chain management.

Required SCO Coursework (25 credits minimum)
Take the following courses for a total of 25 credits:
SCO 8651 - Experimental Design (3.0 cr)
SCO 8652 - Regression Analysis (3.0 cr)
SCO 8711 - Research in Operations Strategy (3.0 cr)
SCO 8721 - Management of Technological Operations (3.0 cr)
SCO 8735 - Supply Chain Management (3.0 cr)
SCO 8745 - Research on Quality Management (3.0 cr)
SCO 8755 - Behavioral Operations (3.0 cr)
MGMT 8101 - Theory Building and Research Design (4.0 cr)

Supporting/Methodology Coursework (16 credits minimum)
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested courses are listed below. Take 16 or more credit(s) from the following:
• APEC 8206 - Dynamic Optimization: Applications in Economics and Management (3.0 cr)
• APEC 8211 - Econometric Analysis I (4.0 cr)
• APEC 8212 - Econometric Analysis II (4.0 cr)
• APEC 8602 - Economics of the Environment (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• GRAD 8101 - Teaching in Higher Education (3.0 cr)
• HRIR 8802 - Core Seminar: Organizational Behavior (4.0 cr)
• MGMT 8302 - Seminar in Organizations Theory (4.0 cr)
• MKTG 8842 - Quantitative Modeling I (2.0 cr)
• MKTG 8843 - Quantitative Modeling II (2.0 cr)
• PA 5032 - Applied Regression (2.0 cr)
• PA 5033 - Multivariate Techniques (2.0 cr)
• PUBH 7405 - Biostatistics: Regression (4.0 cr)
• PUBH 7406 - Advanced Regression and Design (4.0 cr)
• PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)
• PUBH 7475 - Statistical Learning and Data Mining (3.0 cr)
• PUBH 8475 - Statistical Learning and Data Mining (3.0 cr)
• PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)
• SOC 5811 - Social Statistics for Graduate Students [MATH] (4.0 cr)
• STAT 5021 - Statistical Analysis (4.0 cr)
• STAT 5101 - Theory of Statistics I (4.0 cr)
• STAT 5102 - Theory of Statistics II (4.0 cr)
• STAT 5302 - Applied Regression Analysis (4.0 cr)
• STAT 5421 - Analysis of Categorical Data (3.0 cr)
• STAT 5701 - Statistical Computing (3.0 cr)
• STAT 8051 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)
• STAT 8311 - Linear Models (4.0 cr)
• SCO 8892 - Readings in Operations and Management Science (1.0 - 8.0 cr)
• SCO 8894 - Graduate Research in Operations and Management Science (1.0 - 8.0 cr)

-OR-

Strategic Management and Entrepreneurship

Students focus on leadership, strategy, and entrepreneurship connecting the external worlds of competition and collaboration.

Required SME Coursework (12 credits minimum)

Take all of the following courses, including 4 credits of MGMT 8401.

MGMT 8302 - Seminar in Organizations Theory (4.0 cr)
MGMT 8401 - Seminar in Strategy Content (2.0 - 4.0 cr)
MGMT 8402 - Seminar in Behavioral Strategy (2.0 - 4.0 cr)

Additional Required Coursework (11 credits)

At least 7 credits from the following list, and 4 elective credits, are required.

Take 7 or more credit(s) from the following:
• APEC 8211 - Econometric Analysis I (4.0 cr)
• GRAD 8101 - Teaching in Higher Education (3.0 cr)
• MGMT 8101 - Theory Building and Research Design (4.0 cr)

SME Electives (4 credits)

Take one of the following courses:

MGMT 8202 - Seminar in International Management (4.0 cr)
or MGMT 8501 - Seminar in Entrepreneurship (4.0 cr)

Supporting/Methodology Coursework (16 credits minimum)

Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested courses are listed below.

Take 16 or more credit(s) from the following:
• APEC 8001 - Applied Microeconomic Analysis of Consumer Choice and Consumer Demand (2.0 cr)
• APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)
• APEC 8004 - Applied Microeconomic Analysis of Social Choice and Welfare (2.0 cr)
• APEC 8211 - Econometric Analysis I (4.0 cr)
• APEC 8212 - Econometric Analysis II (4.0 cr)
• CSCI 5980 - Special Topics in Computer Science (1.0 - 3.0 cr)
• CSOM 8101 - Methods and Topics in Applied Economics (2.0 - 4.0 cr)
• EPSY 8251 - Statistical Methods in Education I (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)
• EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
• EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
• FINA 8823 - Empirical Corporate Finance (2.0 cr)
• HINF 5502 - Python Programming Essentials for the Health Sciences (1.0 cr)
• MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
• MGMT 8892 - Readings in Management Theory and Administration (1.0 - 8.0 cr)
• MGMT 8894 - Graduate Research in Management Theory and Administration (1.0 - 8.0 cr)
• MKTG 8831 - Seminar: Inter-Organizational Relations (4.0 cr)
• PA 8302 - Applied Policy Analysis (4.0 cr)
• POL 8106 - Quantitative Political Science I (3.0 cr)
Work and Organizations
Students complete multidisciplinary coursework covering organizational behavior, human resource management, organizational economics, personnel economics, labor relations, and related areas.

Required WOrg Coursework (24-28 credits minimum)
Take 24-28 credits from the following list. Take HRIR 8820 2-4 times for a total of 4-8 credits. Take HRIR 8825 4 times for a total of 4 credits.

Take 24 - 28 credit(s) from the following:
- HRIR 8801 - Core Seminar: Fundamentals of Economic Analysis for Work and Organizations (4.0 cr)
- HRIR 8802 - Core Seminar: Organizational Behavior (4.0 cr)
- HRIR 8803 - Core Seminar: Fundamentals of HR Research (4.0 cr)
- HRIR 8812 - Core Seminar: Research Methods in Work and Organizations (4.0 cr)
- HRIR 8820 - Seminar: Special Topics in Work and Organizations Research (2.0 cr)
- HRIR 8825 - Research Practicum/Workshop (1.0 cr)
- PSY 5862 - Psychological Measurement: Theory and Methods (3.0 cr)

Supporting/Methodology Coursework (16 credits minimum)
Courses must be chosen in consultation with the advisor or PhD coordinator. Suggested coursework is listed below.

Take 16 or more credit(s) from the following:
- APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)
- APEC 8501 - Labor Economics I (2.0 cr)
- APEC 8502 - Labor Economics II (2.0 cr)
- CSOM 8101 - Methods and Topics in Applied Economics (2.0 - 4.0 cr)
- ECON 8205 - Applied Econometrics (2.0 cr)
- ECON 8206 - Applied Econometrics (2.0 cr)
- EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
- EPSY 5261 - Introductory Statistical Methods (3.0 cr)
- EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
- EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
- EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)
- EPSY 8282 - Statistical Analysis of Longitudinal Data (3.0 cr)
- MGMT 8101 - Theory Building and Research Design (4.0 cr)
- MGMT 8301 - Seminar in Organizational Behavior (4.0 cr)
- PSY 8208 - Social Psychology: The Self (3.0 cr)
- PSY 8664 - Personality Assessment (3.0 cr)
- PSY 8701 - Seminar in Industrial and Organizational Psychology I (3.0 cr)
- PSY 8702 - Seminar in Industrial and Organizational Psychology II (3.0 cr)
- PSY 8960 - Graduate Seminar in Psychology (1.0 - 4.0 cr)
- PUBH 6724 - The Health Care System and Public Health (3.0 cr)
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
- PUBH 6861 - Health Insurance (2.0 cr)
- SOC 8590 - Topics in Life Course Sociology (3.0 cr)
- HRIR 8991 - Independent Study in Human Resources and Industrial Relations (1.0 - 8.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Business Taxation

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

As one of the premier graduate tax programs in the nation, the Carlson School Master of Business Taxation (MBT) program helps students acquire a conceptual understanding of taxation, and develop technical competence in the practical application of the rules of taxation in business. In addition, courses in government and economic tax policy, tax negotiations, and tax technology and analytics provide breadth to complement the technical tax courses.

The program gives students a chance to learn from world-class faculty who are distinguished professionals with extensive real-life experience. The faculty have in-depth knowledge of the tax industry and work closely with the Twin Cities business community. Combining rigorous coursework and top faculty from the tax community brings a broad perspective into the relationship between tax and business issues, which helps prepare graduates for greater responsibilities in business management and consulting.

Historically, more than 80 percent of students are employed in the business community and take courses on a part-time basis. The classroom based program offers courses in the evenings, Monday-Thursday, 5:45-9:05 p.m., accommodating both part-time and full-time students. For added flexibility, a fully online MBT program is available beginning fall 2018. Students in the classroom based program may also choose to take some courses online. To free tax professionals from coursework responsibilities during the busiest part of tax season, no courses are offered during the spring semester from early March through April 15. Students enrolled part-time can expect to complete the program in approximately three years. Students enrolled full-time can complete the program in a shorter period.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
Required prerequisites
Introduction to Accounting
ACCT 2050 - Introduction to Financial Reporting (4.0 cr)
or equivalent course taken at another institution

Introduction to Federal Income Tax
ACCT 5135 - Fundamentals of Federal Income Tax (4.0 cr)
or equivalent course at another institution

Other requirements to be completed before admission:
Applicants must have a bachelor's degree from an accredited college or university.

The following required prerequisite courses may be taken after being admitted to the MBT program, but must be taken before being eligible to take any MBT courses: ACCT 2050 and ACCT 5135. Equivalent courses may be substituted with approval of the director of
graduate studies.

Special Application Requirements:

Fall application deadline: June 15  
Spring application deadline: October 15  
Summer application deadline: March 15

Applicants must submit all application materials through the University's admission system.

A GMAT or LSAT (Law School Admission Test) score that is not more than five years old is required. The GMAT score must be sent directly from GMAT to be considered official. The GMAT requirement will be waived for domestic students in the following cases: 1) applicant has a CPA license (either active or inactive), 2) applicant has at least two years of relevant U.S. based tax-related work experience within the prior five years, or 3) applicant is a Carlson School accounting graduate within the prior five years. In order for the waiver to apply, the applicant must have a minimum 3.0 undergraduate GPA from an accredited university.

Applicants may submit their copy of their LSAT score to the MBT office.

For international applicants, the results from one of the following English language tests are required: TOEFL, IELTS, MELAB. TOEFL scores must be received directly from TOEFL. IELTS and MELAB scores must be received directly from the testing center.

For additional application details, review the M.B.T. admissions webpages.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 30 major credits and up to null credits outside the major. The is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Business Taxation Courses (12 credits)

- MBT 5200 - Tax Accounting Methods I (2.0 cr)
- MBT 5201 - Tax Accounting Methods II (2.0 cr)
- MBT 5220 - Tax Research, Communication, and Practice (4.0 cr)
- MBT 5230 - Corporate Taxation I (2.0 cr)
- MBT 5340 - Taxation of Partners and Partnerships (2.0 cr)

Elective Business Taxation Courses (18 credits)

In some cases, other graduate-level courses may be taken in place of an MBT elective course with prior approval from the MBT director.

Take exactly 18 credit(s) from the following:

- MBT 5223 - Tax-exempt Organizations (2.0 cr)
- MBT 5226 - Negotiation Techniques in Taxation (2.0 cr)
- MBT 5323 - Mergers and Acquisitions I (2.0 cr)
- MBT 5333 - Tax Aspects of Consolidated Returns (2.0 cr)
- MBT 5335 - Taxation of the Small Business Corporation (2.0 cr)
- MBT 5346 - ASC 740 Computations and Analysis (2.0 cr)
- MBT 5347 - Tax Technology and Analytics Fundamentals (2.0 cr)
- MBT 5348 - Advanced ASC 740 Concepts (2.0 cr)
- MBT 5350 - Wealth Transfer I (Estates and Gifts) (2.0 cr)
- MBT 5353 - Trusts and Estates (2.0 cr)
- MBT 5360 - State and Local Taxation (2.0 cr)
- MBT 5363 - Compensation and Benefits (2.0 cr)
- MBT 5370 - Taxation of Property Transactions (2.0 cr)
- MBT 5380 - Tax Aspects of International Business I (2.0 cr)
- MBT 5381 - Tax Aspects of International Business II (2.0 cr)
- MBT 5382 - Transfer Pricing (2.0 cr)
- MBT 5500 - Business, Government, and Economic Tax Policy (2.0 cr)
Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.
Twin Cities Campus

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 39
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The 39-credit master of science program in finance provides students with an advanced understanding of the tools and methods used in businesses and in financial markets. The program focuses on combining financial theory with quantitative and computational methods and real-world applications. Students can complete this full-time graduate program in 12 or 16 months. Graduates will be able to analyze and interpret complex financial data and communicate its implications. Successful applicants begin their MS studies in summer (July).

Accreditation
This program is accredited by AACSB International. The M.S. in Finance is STEM designated.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
- University level courses in calculus and statistics are required.
- Linear algebra is recommended, but not required.
- Work experience is not required, but preferred.

Special Application Requirements:
Applicants must submit all application materials through the University's admissions system. Application materials include:
- A GMAT or GRE General Test that is not more than five years old, with an acceptable score.
- For international students, an acceptable score on the Test of English as a Foreign Language (TOEFL) International Language Testing System (IELTS).
- Three letters of recommendations need to be submitted through the online application.
- A personal statement of career goals, and objectives for pursuing a M.S. Finance degree. The personal statement questions are the following: Briefly describe your short-term and long-term career goals. Why are you choosing to pursue an M.S. in Finance at this time in your career, and what are you hoping to accomplish by doing so? Why are you interested in pursuing an M.S. degree in Finance at the Carlson School of Management? What do you feel makes you a strong candidate for the program? How will you contribute to the M.S. in Finance program overall? Applicants must submit a current resume that includes job responsibilities and accomplishments in the online application.
- Applicants may choose to submit an essay to comment on any item(s) in their application they consider worthy of further explanation.
- Applicants may be required to complete an admissions interview, which are by invitation only.

Applicants must submit their test score(s) from the following:
- GRE
- GMAT
International applicants must submit score(s) from one of the following tests:

- TOEFL
- IELTS

Key to test abbreviations (GRE, GMAT, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 39 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

Required Courses: Summer (9 credits)

- MSF 6421 - Computing for Finance: Excel/VBA I & II (2.0 cr)
- MSF 6221 - Fundamentals of Finance I (2.0 cr)
- MSF 6031 - Financial Accounting (3.0 cr)
- MSF 6920 - Introduction to Python (2.0 cr)

Required Courses: Fall (16 credits)

- MSF 6422 - Financial Econometrics and Computational Methods I (2.0 cr)
- MSF 6223 - Fundamentals of Finance III (2.0 cr)
- MSF 6022 - Financial Statement Analysis (2.0 cr)
- MSF 6021 - Communications for Finance (2.0 cr)
- MSF 6423 - Financial Econometrics and Computational Methods II (2.0 cr)
- MSF 6621 - Finance within the Macroeconomy (2.0 cr)
- MSF 6322 - Corporate Valuation and Modeling (2.0 cr)
- MSF 6222 - Fundamentals of Finance II (2.0 cr)

Required Courses: Spring (10 credits)

- MSF 6821 - Experiential Learning (4.0 cr)
- MSF 6522 - Derivatives and Risk Management (2.0 cr)
- MSF 6321 - Quantitative Portfolio Analysis (2.0 cr)
- MSF 6121 - Fixed Income and Securities (2.0 cr)

Electives (4 credits)

Students can select from the following electives or graduate courses offered by other departments in the business school upon approval.

- FINA 6325 - Behavioral Finance (2.0 cr)
- FINA 6621 - International Financial Management (2.0 cr)
- FINA 6222 - Mergers and Acquisitions (2.0 cr)
- FINA 6324 - Securitization Markets (2.0 cr)
- FINA 6341 - World Economy (4.0 cr)

Non-Credit Courses

Noncredit 1: On occasion, external speakers will be brought in to enhance the experiential learning component of the MS finance program. Students are required to attend such meetings, and their participation will be assessed on a pass/fail basis.

Noncredit 2: Students will be required to pass the online ethics module from the Chartered Financial Analyst Institute by the end of the summer. Successful completion will be a requirement of the Fundamentals of Finance II course.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48
- This program does not require summer semesters for timely completion.
- Degree: Master of Arts

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Human resources and industrial relations (HRIR) students study the employment relationship. Teaching and research are guided by the belief that the employment relationship must be investigated through the lenses of different disciplines using systems thinking. The professional master of arts degree is for individuals interested in private and public sector careers in human resource management, labor relations, and related fields.

The curriculum is structured around the core HRIR areas of staffing, training, and development; compensation and benefits; and labor relations and collective bargaining. It is rooted in key concepts from the social and behavioral sciences and business, such as organizational behavior and theory, labor market analysis, leadership, and strategy. Quantitative analysis of employment problems and issues are also included. Master's candidates are encouraged to choose electives to support a generalist orientation with key business knowledge.

Accreditation
This program is accredited by Association to Advance Collegiate Schools of Business (AACSB).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Entering students have undergraduate degrees in many subjects ranging from the fine arts to engineering. The most common undergraduate majors of incoming students are in the areas of psychology, business, economics, human resources management, human resource development, and speech communication.

An undergraduate course in microeconomics must be completed with a grade of at least C before matriculating.

Special Application Requirements:
Applicants must submit three letters of recommendation, a complete set of transcripts, a résumé, personal statements, and GRE or GMAT scores. Applicants whose native language is not English must also submit score results from the TOEFL or IELTS.

Students may enter the full-time M.A. program in the fall and the part-time M.A. program in either the fall or spring semesters. The application deadlines are June 15 for fall admission and October 15 for spring admission. The M.A. financial aid deadline for fall semester is February 1. Applicants are encouraged to apply early.

Applicants must submit their test score(s) from the following:
- GRE
- GMAT
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5

Key to **test abbreviations** (GRE, GMAT, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 40 major credits and 8 credits outside the major. The is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The MA is offered as a coursework-only program with day (full-time) and evening (part-time) options. Major coursework includes 6001, 6111, 6301, 6401, 6441, 6501, 6701, 6801, and elective credits in HRIR. At least 8 credits must be earned in related fields. Commonly selected related fields include accounting, finance, operations management, managerial communications, economics, human resource development, law, psychology, public affairs, sociology, and research methods.

**Core Courses**

- **24 credits required**
  - HRIR 6001 - Business Principles for the HRIR Professional (4.0 cr)
  - HRIR 6111 - Using Data and Metrics in Human Resources and Industrial Relations (4.0 cr)
  - HRIR 6301 - Staffing, Training, and Development (4.0 cr)
  - HRIR 6401 - Organizational Theory Foundations of High-Impact HRIR (2.0 cr)
  - HRIR 6441 - Organizational Behavior Foundations of High-Impact HRIR (2.0 cr)
  - HRIR 6501 - Compensation and Benefits (4.0 cr)
  - HRIR 6701 - Labor Relations and Collective Bargaining (4.0 cr)

**Capstone**

- HRIR 6801 - HRIR in Practice: Strategy, Execution, and Ethics (2.0 cr)

**Economic Issues Analysis**

- **2 credits required**
  - HRIR 5655 - Public Policies on Work and Pay (3.0 cr)
  - or HRIR 5662 - Personnel Economics (2.0 cr)

**Electives**

- **Take 20 or more credit(s) including 2 or more sub-requirements(s) from the following:**

  **Related Field**

  - Take 8 or more credit(s) from the following:
    - MCOM 5400 - Managerial Communications for the HR Professional (2.0 cr)
    - MBA 6030 - Financial Accounting (3.0 cr)
    - MBA 6220 - Supply Chain & Operations (3.0 cr)
    - MBA 6230 - Financial Management (3.0 cr)
    - MBA 6210 - Marketing Management (3.0 cr)
    - MBA 6300 - Strategic Management (3.0 cr)
    - MBA 6315 - The Ethical Environment of Business (2.0 cr)
• MCOM 5510 - Persuasive Writing in Business (2.0 cr)
• MCOM 5530 - Strategies and Skills for Managerial Presentations (2.0 cr)
• MGMT 6004 - Negotiation Strategies (2.0 cr)
• MGMT 6033 - Managing the Strategy Process (2.0 cr)
• MGMT 6040 - International Strategy and Organization (2.0 cr)
• MGMT 6050 - Management of Innovation and Change (2.0 cr)
• OLDP 5048 - Cross-Cultural Perspectives on Leadership (3.0 cr)
• OLDP 5201 - Strategies for Teaching Adults (3.0 cr)
• OLDP 5202 - Perspectives of Adult Learning and Development (3.0 cr)
• OLDP 5611 - Facilitation and Meeting Skills (1.0 cr)
• OLDP 5616 - Training on the Internet (3.0 cr)
• OLDP 5619 - Planning and Decision-Making Skills (1.0 cr)
• OLDP 5816 - Distance Learning in Adult Education and Training (3.0 cr)
• OLDP 5829 - Course Development for Business and Industry (2.0 cr)
• OLDP 5033 - Foundations of Individual/Organizational Career Development (3.0 cr)
• IDSC 6471 - Knowledge Management (2.0 cr)
• IDSC 6040 - Information Technology Management (2.0 cr)
• IDSC 6481 - Managerial Decision Making (2.0 cr)
• LAW 6203 - Labor Law (2.0 cr)
• LAW 6631 - Employment Discrimination (3.0 cr)
• LAW 6632 - Employment Law (3.0 cr)
• LAW 6833 - Alternative Dispute Resolution (2.0 - 3.0 cr)
• MILI 6992 - Healthcare Delivery Innovations: Optimizing Cost and Quality (2.0 cr)
• PA 5251 - Strategic Planning and Management (3.0 cr)
• PA 5401 - Poverty, Inequality, and Public Policy (3.0 cr)
• PUBH 6102 - Issues in Environmental Health (2.0 cr)
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
• PUBH 6542 - Management of Health Care Organizations (3.0 cr)
• SCO 6041 - Project Management (2.0 cr)
• IBUS 5xxx
• MGMT 6035 - Complex and Cross-Cultural Negotiations (2.0 cr)
• IBUS 6xxx
• MSBA 6250 - Analytics for Competitive Advantage (3.0 cr)
• OLDP 5501 - Principles and Methods of Evaluation (3.0 cr)

**HRIR Electives**

Take 12 or more credit(s) from the following:

• HRIR 5000 - Topics in HRIR (2.0 cr)
• HRIR 5222 - Managing Diversity (2.0 cr)
• HRIR 5252 - Employment and Labor Law for the HRIR Professional (2.0 cr)
• HRIR 5442 - Employee Performance Management: Strategies, Systems, and Skills (2.0 cr)
• HRIR 5443 - Principles of Effective Coaching (2.0 cr)
• HRIR 6000 - Graduate Topics in Human Resources and Industrial Relations (1.0 - 8.0 cr)
• HRIR 6114 - Human Resource Information Systems (2.0 cr)
• HRIR 6223 - International Human Resource Management (2.0 cr)
• HRIR 6302 - Staffing and Selection: Strategic and Operational Concerns (2.0 cr)
• HRIR 6303 - Employee Training: Creating a Learning Organization (2.0 cr)
• HRIR 6304 - Employee Development: Creating a Competitive Advantage (2.0 cr)
• HRIR 6444 - Employee Motivation, Engagement, and Well-being (2.0 cr)
• HRIR 6465 - Leadership and Personal Development (2.0 cr)
• HRIR 6484 - Management of Groups (2.0 cr)
• HRIR 6502 - Compensation Theory and Applications (2.0 cr)
• HRIR 6503 - Employer-Sponsored Employee Benefit Programs (2.0 cr)
• HRIR 6504 - Executive Compensation (2.0 cr)
• HRIR 5992 - Independent Study in Human Resources and Industrial Relations (1.0 - 8.0 cr)

**Joint- or Dual-degree Coursework:** MBA/MA-HRIR Student may take a total of 24 credits in common among the academic programs.

**Program Sub-plans**

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

**Evening**

- Length of program in credits: 32
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The one-year, 32-credit MS degree in supply chain management will provide students with an end-to-end view of supply chain and will develop both their strategic and analytical capabilities needed to manage supply chains. The hallmarks of this MS degree will include leadership development as a programmatic theme, global immersion, corporate social responsibility and the flexibility to focus on supply chain management in specific industry sectors that are foundational to the economy of the State of Minnesota such as health care and medical devices, food and agribusiness, and retail.

Accreditation
This program is accredited by AACSB International. The M.S. in Supply Chain Management is STEM designated.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Applicants must have a bachelor's degree from an accredited college or university.

Other requirements to be completed before admission:
A minimum of 3 years of work experience is required.

Special Application Requirements:
Applicants must submit all application materials through the University's admissions system. Application materials include:
- A GMAT or GRE General Test that is not more than five years old, with an acceptable score. A GMAT/GRE waiver is available for qualified candidates.
- For international students, an acceptable score on the Test of English as a Foreign Language (TOEFL) International Language Testing System (IELTS).
- Three letters of recommendations need to be submitted through the online application.
- A personal statement of career goals, and objectives for pursuing a M.S. degree in Supply Chain Management. The personal statement questions are the following: Briefly describe your short-term and long-term career goals. Why are you choosing to pursue an M.S. in Supply Chain Management at this time in your career, and what are you hoping to accomplish by doing so? Why are you interested in pursuing an M.S. degree in Supply Chain Management at the Carlson School of Management? What do you feel makes you a strong candidate for the program? How will you contribute to the M.S. in Supply Chain Management program overall? Applicants must submit a current resume that includes job responsibilities and accomplishments in the online application.
- Applicants may choose to submit an essay to comment on any item(s) in their application they consider worthy of further explanation.
- Applicants may be required to complete an admissions interview, which are by invitation only.

Applicants must submit their test score(s) from the following:
- GRE
- GMAT

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students enter the Twin Cities M.S. program in integrative biology and physiology only for exceptional reasons. Most Twin Cities graduate work is performed at the Ph.D. level. See the Integrative Biology and Physiology Ph.D. program for more information.

The graduate programs in the Twin Cities have a cardiovascular emphasis, although other areas of specialization are represented.

On the Duluth campus, students can enroll in coursework and participate in research in several basic areas.

The program includes faculty and corresponding research laboratories from the Department of Integrative Biology and Physiology and also the Departments of Medicine; Surgery; Neuroscience; Neurosurgery; Biochemistry, Molecular Biology, and Biophysics; Pharmacology; Physical Medicine and Rehabilitation; Kinesiology; and Animal Science.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.
Plan B: Plan B requires 14 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B project focuses on some aspect of Physiology. Plan B students complete a project under the direction of a faculty member and present the work to their faculty committee in an oral exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Duluth campus: All course requirements for the M.S. degree can be completed on the Duluth campus. Students are expected to fulfill all degree requirements over a period of two to three calendar years. The program includes at least 20 credits in physiology and 6 credits in a minor or related field of study. Incoming students are encouraged to undertake at least two laboratory rotations in faculty research laboratories of their choice. Fulfillment of degree requirements also includes the presentation and defense of a thesis (Plan A). The final written examination and oral defense of the thesis takes place with participation of faculty from both campuses.

Twin Cities campus: Plan A or B degrees are awarded only in exceptional circumstances. A Plan A M.S. degree requires 14 credits in physiology and 6 credits outside of physiology. The degree is based on laboratory research off or on campus, and requires a written thesis or written project and an oral presentation of the work for the final exam. The M.S. degree is Plan A, unless there are special circumstances requiring a Plan B. For Plan B, the final exam is oral.

Website: http://physiology.med.umn.edu/graduate-program/

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Physiology may be defined as the application of mathematics, physics, and chemistry to the study of structure and function in living systems. As such, physiology is a "hybrid" field in which expertise from many other disciplines is ordinarily required and combined. The program emphasizes a quantitative approach to understanding the functions of cells, organs, and systems in living animals.

The graduate program in the Twin Cities has a cardiovascular emphasis, although many other areas of specialization are represented.

The program includes faculty and corresponding research laboratories from the Department of Integrative Biology and Physiology and also the Departments of Medicine; Surgery; Neuroscience; Neurosurgery; Biochemistry, Molecular Biology, and Biophysics; Pharmacology; Physical Medicine and Rehabilitation; Kinesiology; and Animal Science.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
For the minor, a background in mathematics, physics, chemistry, and biology acceptable to the graduate faculty is required.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum of 6 graduate credits in physiology is required (with approval by the director of graduate studies) for the master's minor. Ph.D. students seeking a doctoral minor are expected to take PHSL 5101 or the equivalent, plus additional courses for a total of 12 credits. Approval is required by the director of graduate studies.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Twin Cities Campus

Integrative Biology and Physiology Ph.D.

Integrated Biology and Physiology

Medical School

Website: http://z.umn.edu/ibpgradprog

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Physiology may be defined as the application of mathematics, physics, and chemistry to the study of structure and function in living systems. As such, physiology is a "hybrid" field in which expertise from many other disciplines is ordinarily required and combined.

The program emphasizes a quantitative approach to understanding the functions of cells, organs, and systems in living animals. PhD students take a core concentration that provides a broad background in the physiology of membranes, cells, transport, and organ systems. Individualized programs are structured to build on the student's strengths and to fill in gaps that would otherwise be an impediment to specific problem solving. Teaching experience is also available to all students.

The graduate program in the Twin Cities has cardiovascular, hypertension and metabolism emphases, although many other areas of specialization are represented.

Students can enter the PhD program from the Twin Cities or Duluth campus. Highly qualified individuals with solid quantitative backgrounds are encouraged to apply. In the Twin Cities, prospective students also include people with previous medical training who are already at the University of Minnesota or are considering the University of Minnesota Medical School for residency or fellowship training.

Entering PhD students are expected to take a series of laboratory rotations to familiarize themselves with active areas of research within the degree program. The program includes faculty and corresponding research laboratories from the Department of Integrative Biology and Physiology and also the Departments of Medicine; Surgery; Neuroscience; Neurosurgery; Biochemistry, Molecular Biology, and Biophysics; Pharmacology; Physical Medicine and Rehabilitation; Kinesiology; and Animal Science.

Program Delivery

This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

Other requirements to be completed before admission:
An undergraduate degree with at least one year (three quarters or two semesters) of calculus, one year of physics, one year of biology, and two years of chemistry is required. For the minor, a background in mathematics, physics, chemistry and biology acceptable to the graduate faculty is required.

Special Application Requirements:

For the Ph.D., applicants must take the General Test of the GRE. There is no minimum GPA or GRE score requirements to apply. In addition, all applicants need three letters of recommendation. Admission to the program begins in the Fall semester.

International applicants must submit score(s) from one of the following tests:
• TOEFL
Program Requirements
24 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

The PhD program requires courses in cellular physiology and medical physiology. Coursework is tailored to the student's interests with input from the director of graduate studies and the student's advisor. During the first year, students rotate through three to four laboratories, attend weekly seminars, choose an advisor, and begin a research project. A preliminary written exam in physiology is given after the first year and examines the ability of the student to apply concepts learned in core courses. By the end of the second year, students have completed their coursework including a grant-writing class, and selected a laboratory for their thesis research. A preliminary oral exam is given at the end of the second year and tests the student's ability to apply principles of both physiology and the minor or supporting program to a proposed research-based thesis. A minimum of 12 credits must be completed in the minor field or supporting program.

Required Coursework
Take all of the following coursework. Take 2-8 credits of PHSL 8294, and at least 4 credits of PHSL 5096. Take PHSL 8232 (Journal Club) in conjunction with PHSL 5101 (Medical Physiology).

- ANSC 5700 - Cell Physiology (4.0 cr)
- PHSL 8294 - Research in Physiology (1.0 - 18.0 cr)
- PHSL 5096 - Integrative Biology and Physiology Research Advances (1.0 cr)
- PHSL 5101 - Human Physiology (5.0 cr)
- PHSL 8232 - Critical Reading of Journal Articles in Physiology (2.0 cr)
- BIOC 8401 - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)
- PHSL 8242 - Professional Skills Development for Biomedical Scientists (2.0 cr)
- PHSL 5701 - Physiology Laboratory (1.0 - 2.0 cr)
- PHSL 5197 - Stress Physiology (1.0 cr)

Molecular Biology/Genetics Options
Take at least 3 credits of molecular biology/genetics coursework, chosen in consultation with the advisor.

- BIOL 4003 - Genetics (3.0 cr)
- or BIOL 4004 - Cell Biology (3.0 cr)
- or BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)
- or BIOC 4332 - Biochemistry II: Molecular Mechanisms of Signal Transduction and Gene Expression (4.0 cr)
- or BIOC 6021 - Biochemistry (3.0 cr)

Biostatistics Options
Take at least 3 credits of biostatistics coursework, chosen in consultation with the advisor.

- STAT 5021 - Statistical Analysis (4.0 cr)
- or PUBH 6450 - Biostatistics I (4.0 cr)
- or PUBH 6451 - Biostatistics II (4.0 cr)

Outside Coursework
Take at least 12 credits of coursework outside the major, in consultation with the advisor.
BMEN 5001 - Advanced Biomaterials (3.0 cr)
or BMEN 5041 - Tissue Engineering (3.0 cr)
or BMEN 5101 - Advanced Bioelectricity and Instrumentation (3.0 cr)
or BMEN 5351 - Cell Engineering (3.0 cr)
or CMB 8344 - Mechanisms of Hormone Action (2.0 cr)
or GCD 4134 - Endocrinology (3.0 cr)
or NSC 5540 - Survey of Biomedical Neuroscience (2.0 cr)
or BIOL 8100 - Improvisation for Scientists (1.0 cr)
or NUTR 8620 - Advances in Nutrition (2.0 cr)

Supporting Major Optional Coursework
PHSL 4021 - Advanced Physiology and Bioengineering: Bionic Human (3.0 cr)
PHSL 5095 - Problems in Physiology (1.0 - 5.0 cr)
PHSL 5444 - Muscle (3.0 cr)
PHSL 5510 - Advanced Cardiac Physiology and Anatomy (2.0 - 3.0 cr)
PHSL 5525 - Anatomy and Physiology of the Pelvis and Urinary System (1.0 - 2.0 cr)
PHSL 8222 - Central Regulation of Autonomic Function (3.0 cr)

Thesis Credits
Take 24 credits of doctoral thesis credits.
PHSL 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Medical Physics M.S.
Radiation Oncology Administration, Radiology
Medical School

Email: alaei001@umn.edu
Website: https://www.radiationoncology.umn.edu/medical-physics-graduate-program

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- no
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program is made up of faculty members with primary appointments in the departments of radiation oncology and radiology. Affiliate faculty have primary appointments in other departments. The goal of the program is to prepare students (1) for further education, teaching, and research in medical physics, (2) to qualify to enter a medical physics residency program in radiation therapy or imaging, and (3) to provide the mathematical and technical knowledge needed to succeed in the field of medical physics.

Accreditation
This program is accredited by Commission on Accreditation of Medical Physics Education Programs, Inc. (CAMPEP)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A degree in physics or engineering or other physical science. Equivalent of an undergraduate physics minor—at least 2 semesters of calculus based physics and at least 3 upper level physics courses.

Other requirements to be completed before admission:
All students should have some familiarity with physical chemistry, intermediate physics, intermediate mathematics, biostatistics, computer programming, biology, physiology, and biochemistry. This may be demonstrated by coursework completed at the undergraduate level or as part of the graduate program; by reading or practical experience; or by informal competency examinations.

Special Application Requirements:
Three letters of recommendation and the general GRE test are required. If the GRE was taken more than two years prior to application, the applicant may need to retake the examination. We have no absolute GRE cutoff score, but the score is taken into consideration along with other factors in the evaluation of each application. Applicants with a graduate degree from a US institution are waived the GRE requirement. Applicants are considered for admission in fall semester only.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- IELTS
  - Total Score: 6.5
- MELAB

Program Requirements

Plan B: Plan B requires 30 major credits and 0 credits outside the major. The final exam is oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Required Courses (24 Credits)
Take all of the following courses. Take MPH 5138 for 1 credit.

- MPH 5138 - Research Seminar (1.0 - 5.0 cr)
- MPH 5160 - Advanced Radiation Physics and Dosimetry (3.0 cr)
- MPH 5170 - Basic Radiological Physics (3.0 cr)
- MPH 5171 - Medical and Health Physics of Imaging I (3.0 cr)
- MPH 5172 - Radiation Biology (3.0 cr)
- MPH 5173 - Medical and Health Physics of Radiation Therapy (3.0 cr)
- MPH 5174 - Medical and Health Physics of Imaging II (3.0 cr)
- PHSL 5061 - Principles of Physiology for Biomedical Engineering (4.0 cr)
- PHAR 5201 - Applied Medical Terminology (2.0 cr)

Electives (6 Credits)
Take at least 6 electives credits, in consultation with the advisor, to complete the 30-credit requirement.

- MPH 5177 - Radiation Therapy Physics Lab: Radiation Physics Basics (3.0 cr)
- MPH 5178 - Physical Principles of Magnetic Resonance Imaging (3.0 cr)
- MPH 8147 - Advanced Physics of Magnetic Resonance Imaging (MRI) (3.0 cr)
- MPH 8148 - Advanced Digital Imaging Science (3.0 cr)
- MPH 8149 - Advanced Topics in Radiation Therapy Physics (2.0 cr)

ADDITIONAL REQUIREMENTS (NOT FOR CREDIT)
In the fall semester of their first year, students must take the University ethics training: Responsible Conduct of Research (RCR), Parts 1 (a 3-hour session offered about 4 times/year) and 2.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Students enrolled in a University master's or doctoral program are eligible for the MICaB minor. Requirements for the master's- and doctoral-level MICaB minor include: completion of 8 MICaB credits from 2 of the following 4-credit courses: MICA 8002, MICA 8003, MICA 8004; and the approval of the MICaB director of graduate studies. Doctoral students must also complete at least 4, but no more than 10, additional MICAB credits in consultation with the MICaB director of graduate studies.

MICaB minor requirements
Minimum requirement of 12-18 credits to include: two or three of the following MICa 8002, 8003 or 8004; and other MICa 8000-level 2, 3 or 4 credit courses to total 12-18 credits (excluding MICa 8012).

This program is accredited by NA

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Applicants must have a bachelor's degree (BS preferred).

Other requirements to be completed before admission:
Required courses include calculus, general chemistry, organic chemistry, and physics. A minimum of two upper-level biology courses, which may include biochemistry, genetics, cell biology, molecular biology, microbiology, or immunology, etc., are also required.

Research experience is required. Relevant undergraduate experience includes honors thesis work, paid or volunteer work in a research laboratory and summer internships. It does not include laboratory courses that accompany science courses such as biology. Postbaccalaureate research experience is preferred but not required.

Special Application Requirements:
The program evaluates applications based on four equally weighted criteria: academics, letters (3) of recommendation, a personal statement, and research experience. The average GPA scores of accepted applicants are typically 3.50. We do not accept or require GRE scores. Letters of recommendation from research advisers or mentors are preferred as these individuals can comment knowledgeably on the student's potential in biomedical research. Applicants' personal statements should describe their research in general and their specific contribution to it, their rationale for seeking a doctoral degree, and any information they wish to share regarding their backgrounds and interest in the MiCaB Program. Finally, applicants should provide specific details of their research experiences (project titles, mentors, dates, locations, etc.), along with a list of relevant abstracts, publications, etc.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 96
- Paper Based - Total Score: 600
  • IELTS - Total Score: 7
  • MELAB - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
11 to 12 credits are required in the major.
12 to 13 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Beginning study in the fall, students spend their first year on major coursework, identifying an advisor by doing laboratory rotations, selecting a focus area, and initiating their thesis research project. In the fall semester of their second year, all students take MICA 8012, which highlights the integrated nature of the three foci and helps prepare the students for their written and oral qualifying examinations (taken in the spring semester of the second year). Students also take courses that support studies in their focus area during their first two years.

In addition to coursework and research, students have opportunities to participate in laboratory meetings, journal clubs, and student research seminars, and to assist in laboratory courses. Most students complete the PhD in five years.

Required Coursework
Take 8 credits from the following list. Take MICA 8094 during the fall and spring semesters of the first year for a total of 2 credits.

While students are required to take only one of the three core courses (MICA 8002, 8003, and 8004), they are encouraged to take all three.

- MICA 5000 - Practicum: Teaching (0.0 cr)
- MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
- MICA 8003 - Immunity and Immunopathology (4.0 cr)
- MICA 8004 - Cellular and Cancer Biology (4.0 cr)
- MICA 8012 - Writing and Reviewing a Research Proposal (2.0 cr)
- MICA 8094 - Research in Microbiology, Immunology, and Cancer Biology (1.0 cr)
- MICA 8910 - Seminar: Faculty Research Topics (0.0 cr)
- MICA 8920 - Seminar: Student Research Topics (0.0 cr)

Focus Area and Elective Coursework
Take one 3-credit, 5xxx-level or higher focus area science course in the first and second years. Select a focus area course from the following list, or another course related to the area of interest. MICA 8002, 8003 or 8004 can be used as a focus area course, if not taken as a required course. Elective courses also can be chosen from this list or selected in consultation with the advisor. No more than one 4xxx-level course can be applied towards credit requirements.

Take 16 or more credit(s) from the following:

- BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)
- BIOC 5352 - Biotechnology and Bioengineering for Biochemists (3.0 cr)
- BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
- BIOC 5960 - Special Topics in Biochemistry (3.0 cr)
- BIOC 8001 - Biochemistry: Structure, Catalysis, and Metabolism (3.0 cr)
- BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
- BIOC 8216 - Signal Transduction and Gene Expression (3.0 cr)
- BTHX 5610 - Research & Publication Seminar (1.0 cr)
- CHEM 8412 - Chemical Biology of Enzymes (4.0 cr)
• CHEN 8754 - Systems Analysis of Biological Processes (3.0 cr)
• CHEN 8995 - Special Topics (1.0 - 4.0 cr)
• CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
• CSCI 5980 - Special Topics in Computer Science (1.0 - 3.0 cr)
• ESCI 4801 - Geomicrobiology (3.0 cr)
• GCD 5005 - Computer Programming for Biology (3.0 cr)
• GCD 6103 - Human Histology (3.0 - 8.0 cr)
• GCD 8008 - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
• GCD 8073 - Genetics & Genomics in Human Health (3.0 cr)
• GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
• GCD 8151 - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
• GCD 8161 - Advanced Cell Biology and Development (3.0 cr)
• GCD 8920 - Special Topics (1.0 - 4.0 cr)
• GEOG 8260 - Seminar: Physical Geography (2.0 cr)
• GRAD 5102 - Preparation for University Teaching for Nonnative English Speakers (2.0 cr)
• GRAD 8101 - Teaching in Higher Education (3.0 cr)
• GRAD 8200 - Teaching and Learning Topics in Higher Education (1.0 cr)
• HINF 5502 - Python Programming Essentials for the Health Sciences (1.0 cr)
• LAAS 5311 - Soil Chemistry and Mineralogy (3.0 cr)
• MICA 8009 - Biochemical Aspects of Normal and Abnormal Cell Growth and Cell Death (2.0 cr)
• MICA 8010 - Microbial Pathogenesis (3.0 cr)
• MICA 8011 - Current Topics in Immunology (3.0 cr)
• MICA 8013 - Translational Cancer Research (2.0 cr)
• MICA 8014 - Small RNA Biology (2.0 cr)
• MICA 8371 - Mucosal Immunobiology (3.0 cr)
• PHCL 5111 - Pharmacogenomics (3.0 cr)
• PUBH 6182 - Professional Skills Development for Biomedical Scientists (2.0 cr)
• PUBH 6341 - Epidemicologic Methods I (3.0 cr)
• PUBH 6450 - Biostatistics I (4.0 cr)
• PUBH 7445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
• SCB 8181 - Stem Cell Biology (3.0 cr)
• VMED 5180 - Ecology of Infectious Disease (3.0 cr)

Thesis Credits
Take at least 24 doctoral thesis credits.
MICA 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Email: neurosci@umn.edu
Website: http://www.neuroscience.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Neuroscience is an interdisciplinary field of inquiry. The objects of this inquiry, the brain and nervous system, are sufficiently complex and unique among biological systems to require experimental and analytical approaches that cross the traditional boundaries of molecular and cell biology, behavioral biology, biochemistry, genetics, pharmacology, physiology, and psychology. In some instances, neuroscientific inquiry may also encompass computer science, information processing, engineering, physics, and mathematics.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 26 major credits, 12 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

The course requirements for a master's degree are the same as those for a Ph.D. degree. See the Program Requirements of the Neuroscience Ph.D.

Prerequisites for Admission
Special Application Requirements:
Applicants are required to take the GRE General Test. Students whose native language is not English are required to take the TOEFL and obtain a minimum score of 625 (paper) or 107 (Internet); or obtain 6.5 on the IELTS examination. There are no minimum GPA or GRE score requirements to apply.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 107
  - Paper Based - Total Score: 625
- IELTS
  - Total Score: 6.5

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
21 credits are required in the major.
6 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The neuroscience PhD curriculum begins in the summer session with the intensive laboratory course in cellular and molecular neurobiology (NSC 5551), held at the Itasca Biological Station and Laboratories.

The core curriculum continues on the Twin Cities campus with NSC 5461, 5561, 5661, and 8211. While taking these courses, students explore research opportunities in the faculty’s laboratories and thereby select a thesis advisor.

Students will also participate in journal clubs (NSC 8320) to discuss work in the field of Neuroscience. Elective courses totaling 6 credits are required and selected in consultation with the advisor.

Students with sufficient background and previous course experience may apply for a waiver of specific requirements. A student, if they so choose, must take at least 12 elective credits to receive a minor (typical minors include cell biology, physiology, statistics, and psychology). Students are also expected to participate in teaching neuroscience and to attend the weekly colloquiums, as well as neuroscience seminars and sessions devoted to professional development. Students are strongly encouraged to attend seminars in other areas and departments that may interest them.

**Summer - First Year**
- NSC 5551: Cell & Molecular Neurobiology Lab at Itasca (4 cr)

**Fall - First Year**
- NSC 5461: Cellular & Molecular Neuroscience (4 cr)
- NSC 5561: Systems Neuroscience (4 cr)
- NSC 8321: Career Skills and Understanding Responsibilities as a Neuroscientist (0.5 cr)

**Spring - First Year**
- NSC 5661: Behavioral Neuroscience (3 cr)
- NSC 8211: Developmental Neurobiology (3 cr)
- NSC 8320: Neuroscience Seminar Series Journal Club (Section 2) (1 cr)
- NSC 8321: Career Skills and Understanding Responsibilities as a Neuroscientist (0.5 cr)

**Fall - Second Year**
- NSC 8321: Career Skills and Understanding Responsibilities as a Neuroscientist (0.5 cr)

**Spring - Second Year**
- NSC 8320: Neuroscience Seminar Series Journal Club (Section 2) (1 cr)

**Electives**
During the course of PhD studies, take at least 6 credits of electives. Electives are chosen in consultation with the advisor.
Orthoptics Post-baccalaureate Certificate

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 14
- This program requires summer semesters for timely completion.
- Degree: Orthoptics PostBaccalaureate Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Orthoptic Certificate program is a vital part of the ophthalmic health care profession. This is a specialized profession, the focus of which is the evaluation and treatment of disorders of vision, eye movements, and eye alignment in children and adults. The study of orthoptics follows a logical sequence of studies vital to the understanding of the visual system. The didactic education is integrated with practical clinical experience. Orthoptists work with ophthalmologists, eye physicians and surgeons, as part of the medical team. They are employed in a variety of settings, including university and teaching hospitals, children's hospitals, and solo or multi-specialty group medical practices. An orthoptist sees a variety of patients of all ages, although due to the nature of their visual disorders, the majority of the patients are young children; some individuals with multiple health concerns are also evaluated as they commonly have ocular/binocular problems. After completing an Orthoptic Certificate, a student earns national certification as an orthoptist through written and practical examinations administered by the American Orthoptic Council.

This program requires two semesters and a summer term of coursework.

**Accreditation**
This program is accredited by American Association of Certified Orthoptists

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 2.00.

**Required prerequisites**

**Course Group 0**

Other requirements to be completed before admission:
Requirements for entry into the Orthoptics Certificate Program include the following:
1. Completion of baccalaureate degree with GPA at least 2.0.
2. Successful completion of one year in a hospital/clinic-based ophthalmic technician training program (e.g., Regions Hospital)

For an online application or for more information about graduate education admissions, see the General Information section of the

Orthoptic Certificate
Twin Cities Campus
Otolaryngology Ph.D. Otol.
Otolaryngology
Medical School

Link to a list of faculty for this program.

Contact Information:
Department of Otolaryngology, MMC 396, 420 Delaware Street SE, Minneapolis, MN 55455 (612-625-7692; fax: 612-625-2101)
Website: http://www.ent.umn.edu

• Program Type: Doctorate
• Requirements for this program are current for Fall 2018
• Length of program in credits: 48
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy in Otolaryngology

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program prepares students in both clinical and experimental aspects of otolaryngology. The Ph.D.Otol. degree requires a publishable thesis. Rotations at University of Minnesota Medical Center-Fairview, Minneapolis Veterans Administration Medical Center, Regions Hospital, Minneapolis Children's Hospital, and Hennepin County Medical Center provide a wide range of opportunity for clinical education and surgical experience.

Opportunities for independent research are provided in the areas of audiology, auditory electrophysiology, auditory neurophysiology, basic sciences research, biochemistry, cancer biology, cell biology and genetics, chemical senses, clinical epidemiology, education research, electron microscopy, electrophysiology, histochemistry, laryngeal physiology, mandibular bone physiology, microvascular tissue transfer, morphometry, outcomes research, psychoacoustics, psychometrics, skin-flap physiology, temporal bone pathology, tumor immunology, and vestibular physiology. Graduates of the program have careers in teaching, research, and professional practice.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Requires an M.D. degree.

Other requirements to be completed before admission:
Doctorate will be completed in conjunction with otolaryngology residency.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Coursework will vary depending on preparation and the research undertaken. An advisory committee, including the student, the advisor, and the director of graduate studies, determines coursework. Understanding and application of basic statistics and experimental methodology are expected. Statistics coursework is usually necessary. Choice of statistics courses is made with the
guidance of the director of graduate studies.

All students are expected to publish a research paper in a peer-reviewed journal. Students are concurrently in otolaryngology residency and usually take five to six years to complete research, course, and dissertation requirements.

**Thesis Credits**
- Take 24 doctoral thesis credits.
- OTOL 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 36
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Pharmacology is the study of the interactions of chemicals with biological systems. Courses and research training in biochemistry, biophysics, genetics, and molecular biology provide a solid foundation for performing original research in pharmacology, neuropharmacology, and cancer chemotherapy.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

A four-year BA or BS degree (or its equivalent) in a basic science program is generally required.

Other requirements to be completed before admission:
Candidates for admission are evaluated on the basis of undergraduate record, previous research experience, and letters of recommendation.

Special Application Requirements:
Applicants must submit three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of official transcripts; and a clearly written statement of career interests, goals, and objectives.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7.5

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.
Plan B: Plan B requires 30 major credits and 0 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: A research project approved by the advisor and Director of Graduate Studies.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students are required to maintain a GPA of 3.00. Students who fail to maintain this standard must petition the director of graduate studies for permission to remain in the program.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 139
- This program requires summer semesters for timely completion.
- Courses for the DPT are taught on the Twin Cities campus for the first 7 semesters, with numerous off-site clinic visits scheduled throughout semesters 2 through 7. The remaining 2 semesters of the program consist of 4 full-time clinical internships, which occur off-campus in physical therapy clinics.
- Degree: Doctor of Physical Therapy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Division of Physical Therapy Program, a division within the Department of Rehabilitation Medicine, offers a professional doctoral degree in physical therapy (DPT). Physical therapy is a healthcare discipline involved with the study and rehabilitation of movement impairments such as muscular weakness, impaired coordination, joint stiffness, and pain, which can lead to functional problems affecting self care, employment, ambulation, etc. Graduates are prepared to promote proper health care and quality of living by maximizing human movement following disease or injury or by preventing its loss. The program requires three years of year-round, full-time graduate study. Academic coursework and research activity are completed during the first seven semesters. The final two semesters are devoted to clinical internships.

Accreditation
This program is accredited by Commission on Accreditation in Physical Therapy Education (CAPTE) (APTA).

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The University of Minnesota Division of Physical Therapy has no required or preferred undergraduate major. Any baccalaureate degree or equivalent from an accredited institution is accepted.

Other requirements to be completed before admission:
To be eligible for admission, the student must complete a baccalaureate degree, or its foreign equivalent, from an accredited institution by June 1st of the year of admission, including the required prerequisite courses or their equivalents.

Applicant must complete at least 100 hours of volunteer or work experience in a clinical physical therapy setting. Exposure to multiple and varied areas of practice in physical therapy and additional health care exposure are considered an important preparation. The GRE General exam is required. TOEFL is required for international students. Two letters of recommendation are also required. One letter must be from a physical therapist that applicant has shadowed.

Special Application Requirements:
Below is a list of required prerequisite coursework to be taken before entering the program. Courses must be taken A-F, unless receiving a score of 4 or above for Advanced Placement (AP) credit. AP score report must be submitted to Program office for AP credit given in prerequisite coursework. A minimum grade of C is required in all prerequisite coursework. It is recommended but not required that these courses be taken within the previous five years. Courses may be taken at any accredited college. Students are expected to be skillful with computer applications for word processing and creating spreadsheets.
- General biology, with on-site lab
- A second biology course of the student's choice, with on-site lab
- Human anatomy (lab strongly recommended)
- Human physiology
- General chemistry or inorganic chemistry - minimum two courses, with on-site lab
- General physics, which includes mechanics and electricity - minimum two courses, with on-site lab
- General psychology
- Abnormal psychology
- Statistics - ANOVA and regression analysis content strongly recommended
- Introductory calculus (pre-calculus not acceptable; Intro to Calculus or Short Calculus acceptable)
- Medical terminology

For all AP courses on the transcript, a score must be entered. This will be the score issued by the College Board. Students must also forward an unofficial copy of the College Board Report to the admissions coordinator to keep on file.

If distance learning courses are taken from an accredited college or university for college credit, there is no limit to the number that may be taken through distance education. Labs must be taken on-site unless prior approval is given by Admissions Chair.

All prerequisite courses and an undergraduate degree must be completed before the student enrolls in the professional program. Students may apply with two remaining prerequisites in progress. Past students have found that biochemistry, and animal biology classes have been helpful preparati

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
139 credits are required in the major.
This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.8 is required for students to remain in good standing.

At least 6 semesters must be completed before filing a Degree Program Form.

Year 1 Summer (6 Credits)
PT 6058 - Anatomy for Physical Therapy (6.0 cr)

Year 1 Fall (18 Credits)
PT 6002 - Ethics in Public Health: Research and Policy (1.0 cr)
PT 6213 - Clerkship I (2.0 cr)
PT 6231 - Clinical Biomechanics (5.0 cr)
PT 6280 - Clinical Assessment (4.0 cr)
PT 6281 - Scientific Foundations I: Theory of Therapeutic Exercise (3.0 cr)
PT 6340 - Human Growth and Development (3.0 cr)

Year 1 Spring (17 Credits)
NSCI 6112 - Medical Neuroscience for Professional Students (5.0 cr)
PT 8132 - Research Seminar (1.0 cr)
PT 6310 - Physiology for Physical Rehabilitation (5.0 cr)
PT 6214 - Clerkship II (2.0 cr)
PT 6221 - Therapeutic Procedures (4.0 cr)

Year 2 Summer (14 Credits)
Take PT 8193 for 2 credits.
PT 6813 - Cardiopulmonary Physical Therapy (3.0 cr)
PT 6250 - Acute Care in Physical Therapy (2.0 cr)
PT 6251 - Integument (2.0 cr)
PT 6252 - Pathophysiology (3.0 cr)
PHAR 6800 - Rehabilitation Pharmacotherapy (2.0 cr)
PT 8193 - Research Problems (2.0 - 6.0 cr)

Year 2 Fall (14 Credits)
Take PT 8193 for 2 credits.
PT 6283 - Musculoskeletal I (7.0 cr)
PT 6293 - Essentials of Rehabilitation Research (4.0 cr)
PT 6215 - Clerkship III (1.0 cr)
PT 8193 - Research Problems (2.0 - 6.0 cr)

Year 2 Spring (18 Credits)
Take PT 8193 for 2 credits.
PT 6282 - Scientific Foundations II: Neuromotor Control (3.0 cr)
PT 6287 - Neurorehabilitation (8.0 cr)
PT 6284 - Musculoskeletal Rehabilitation II (4.0 cr)
PT 6216 - Clerkship IV (1.0 cr)
PT 8193 - Research Problems (2.0 - 6.0 cr)

Year 3 Summer (12 Credits)
PT 6288 - Pediatric Rehabilitation (8.0 cr)
PT 6290 - Administration (4.0 cr)

Year 3 Fall (20 Credits)
PT 6295 - Clinical Internship I (10.0 cr)
PT 6296 - Clinical Internship II (10.0 cr)

Year 3 Spring (20 Credits)
PT 6297 - Clinical Internship III (10.0 cr)
PT 6298 - Clinical Internship IV (10.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 33
- This program does not require summer semesters for timely completion.
- No
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Division of Rehabilitation Science offers post-professional degrees designed to train rehabilitation scientists and academicians. Rehabilitation Science is interdisciplinary, including occupational and physical therapists, physiologists, engineers and students with other backgrounds interested in rehabilitation research. The Division's philosophy provides students with 1) a strong foundation in research methodology, 2) a concentrated educational experience specifically tailored toward a student's specific research question in rehabilitation science, and 3) a working knowledge of the importance of a collaborative, interdisciplinary approach to the scientific process.

Note: Rehabilitation Science prefers PhD applicants over MS applicants. The MS often applies to students who are in need of a trial program to determine whether or not the PhD is a good fit. In addition, the MS is used for students who initially begin the PhD, but find that the PhD is not the best fit and subsequently switch to the MS.

Accreditation
This program is accredited by NA

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.30.

University of Minnesota BME bachelor's degree.

Required prerequisites

BME BS / RSC MS Course List for Admissions
By the time BME BS students apply to this integrated BME BS/RSC MS degree, the student must have completed the following 13 B.Bm.E classes: BMEN 2101, 2401, 2501, 3011, 3015, 3111, 3115, 3211, 3215, 3311, 3315, 3411, 3415. Completion of these classes will satisfy all necessary prerequisites required for admission and Rehabilitation Science graduate courses. Students who have not completed these 13 courses (or BME approved equivalents) are not eligible to apply.

Take 13 or more course(s) from the following:

Special Application Requirements:
In addition to the University's application (including personal statement and fee), applicants must submit the following materials: unofficial transcripts; two reference names with email address and phone number, one reference must be from BME. Student must also have an agreed-upon faculty adviser at the time of applying. Compatibility of research interests is a major determinant in the student/adviser relationship.
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A:** Plan A requires 14 major credits, 9 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 14 major credits and 16 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** The Plan B project is determined in consultation with the advisor.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

**Plan A Requirements**
Take at least 14 RSC credits to meet the major field requirement; 3 statistics credits and 6 credits of electives for the outside credit requirement; and 10 master's thesis credits.

Take 14 or more credit(s) from the following:
- RSC 5058 - Anatomy for Rehabilitation Science (6.0 cr)
- RSC 5101 - Mathematical Tools for Research Applications in Health, Rehab, and Human Movement Sciences (1.0 cr)
- RSC 5106 - Introduction to Rehabilitation Science (1.0 cr)
- RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- RSC 5200 - Introduction to Transcranial Magnetic Stimulation (3.0 cr)
- RSC 5206 - Academic Ethos (1.0 cr)
- RSC 5231 - Clinical Biomechanics (2.0 - 5.0 cr)
- RSC 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
- RSC 5281 - Scientific Foundations: Exercise Theory (3.0 cr)
- RSC 5294 - Independent Study in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 5306 - Scientific and Professional Presentation (1.0 cr)
- RSC 5310 - Physiology for Physical Rehabilitation (1.0 - 5.0 cr)
- RSC 5814 - Age, Exercise, and Rehabilitation (2.0 cr)
- RSC 5841 - Applied Data Acquisition and Processing (4.0 cr)
- RSC 5901 - Scholarly Inquiry in Health Sciences (4.0 cr)
- RSC 8106 - Critical Analysis of Scientific Literature (1.0 - 2.0 cr)
- RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)
- RSC 8135 - Advanced Kinesiology (3.0 cr)
- RSC 8170 - Special Topics in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 8185 - Problems in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 8188 - Teaching Practicum (1.0 - 5.0 cr)
- RSC 8192 - Research Design in Rehabilitation Science (4.0 cr)
- RSC 8206 - Grant Writing (2.0 cr)
- RSC 8235 - Human Kinetics (3.0 cr)
- RSC 8282 - Problems in Human Movement (4.0 cr)
- RSC 8306 - Peer Review and Publication (2.0 cr)

**Statistics Requirement**
Take at least 3 credits of statistics from the following list, or chosen in consultation with the adviser.
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- EPSY 8251 - Statistical Methods in Education I (3.0 cr)
- EPSY 8252 - Statistical Methods in Education II (3.0 cr)

**Electives**
Take 6 elective RSC and/or non-RSC credits, selected in consultation with the advisor.
- RSC 5xxx
- RSC 8xxx

**Thesis Credits**
Take at least 10 master's thesis credits.
- RSC 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
Plan B Requirements
Take at least 14 RSC credits to meet the major field requirement; and 3 statistics credits and 13 credits of electives for the outside credit requirement.

Take 14 or more credit(s) from the following:
• RSC 5058 - Anatomy for Rehabilitation Science (6.0 cr)
• RSC 5101 - Mathematical Tools for Research Applications in Health, Rehab, and Human Movement Sciences (1.0 cr)
• RSC 5106 - Introduction to Rehabilitation Science (1.0 cr)
• RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
• RSC 5200 - Introduction to Transcranial Magnetic Stimulation (3.0 cr)
• RSC 5206 - Academic Ethos (1.0 cr)
• RSC 5231 - Clinical Biomechanics (2.0 - 5.0 cr)
• RSC 5235 - Advanced Biomechanics II: Kinetics (3.0 cr)
• RSC 5281 - Scientific Foundations: Exercise Theory (3.0 cr)
• RSC 5284 - Independent Study in Rehabilitation Science (1.0 - 3.0 cr)
• RSC 5306 - Scientific and Professional Presentation (1.0 cr)
• RSC 5310 - Physiology for Physical Rehabilitation (1.0 - 5.0 cr)
• RSC 5814 - Age, Exercise, and Rehabilitation (2.0 cr)
• RSC 5841 - Applied Data Acquisition and Processing (4.0 cr)
• RSC 5901 - Scholarly Inquiry in Health Sciences (4.0 cr)
• RSC 8106 - Critical Analysis of Scientific Literature (1.0 - 2.0 cr)
• RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)
• RSC 8135 - Advanced Kinesiology (3.0 cr)
• RSC 8170 - Special Topics in Rehabilitation Science (1.0 - 3.0 cr)
• RSC 8185 - Problems in Rehabilitation Science (1.0 - 3.0 cr)
• RSC 8188 - Teaching Practicum (1.0 - 5.0 cr)
• RSC 8192 - Research Design in Rehabilitation Science (4.0 cr)
• RSC 8206 - Grant Writing (2.0 cr)
• RSC 8235 - Human Kinetics (3.0 cr)
• RSC 8282 - Problems in Human Movement (4.0 cr)
• RSC 8306 - Peer Review and Publication (2.0 cr)

Statistics Requirement
Take at least 3 credits of statistics from the following list, or chosen in consultation with the advisor.
• PUBH 6450 - Biostatistics I (4.0 cr)
• PUBH 6451 - Biostatistics II (4.0 cr)
• EPSY 8251 - Statistical Methods in Education I (3.0 cr)
• EPSY 8252 - Statistical Methods in Education II (3.0 cr)

Electives
Take 13 elective RSC and/or non-RSC credits, selected in consultation with the advisor.
• RSC 5xxx
• RSC 8xxx

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in rehabilitation science is a post-professional program designed to train rehabilitation scientists and academicians. The program includes occupational and physical therapists and students with other backgrounds interested in rehabilitation research. The program's philosophy provides students with 1) a strong foundation in research methodology, 2) a concentrated educational experience specifically tailored toward a student's specific research question in rehabilitation science, and 3) a working knowledge of the importance of a collaborative, interdisciplinary approach to the scientific process.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Minimum US equivalent bachelor's degree.

Other requirements to be completed before admission:
Applicants must hold a bachelor's degree or graduate degree in a discipline related to rehabilitation such as biomedical engineering, medicine, occupational therapy, physical therapy, or speech/audiology. International students must hold a comparable foreign degree from an accredited program. Depending on the educational background of the applicant, admission may be contingent upon completion of selected prerequisite coursework.

Special Application Requirements:
The student must inform the director of graduate studies (DGS) in writing of his or her intent to pursue the minor. A rehabilitation science faculty admissions committee determines student admission for the minor. To be admitted, a student must be an active graduate student pursuing an equivalent graduate degree in another field. The student must be in good academic standing within his or her major program. The student must have a mutually agreed-upon graduate faculty member in rehabilitation science serve as a reviewer on the student's dissertation committee and serve as the minor field examiner on the final exam committee.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.
Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Doctoral**

**Ph.D. Minor**

Take at least 12 credits, selected in consultation with the Rehabilitation Sciences director of graduate studies. RSC courses must be taken on the A-F grading basis.

Take 12 or more credit(s) from the following:
- RSC 5106 - Introduction to Rehabilitation Science (1.0 cr)
- RSC 5206 - Academic Ethos (1.0 cr)
- RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- RSC 5294 - Independent Study in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 5306 - Scientific and Professional Presentation (1.0 cr)
- RSC 5814 - Age, Exercise, and Rehabilitation (2.0 cr)
- RSC 5841 - Applied Data Acquisition and Processing (4.0 cr)
- RSC 8106 - Critical Analysis of Scientific Literature (1.0 - 2.0 cr)
- RSC 8206 - Grant Writing (2.0 cr)
- RSC 8306 - Peer Review and Publication (2.0 cr)
- RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)
- RSC 8135 - Advanced Kinesiology (3.0 cr)
- RSC 8170 - Special Topics in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 8185 - Problems in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 8192 - Research Design in Rehabilitation Science (4.0 cr)
- RSC 8282 - Problems in Human Movement (4.0 cr)

**Masters**

**Master's Minor**

Take at least 6 credits, selected in consultation with the Rehabilitation Sciences director of graduate studies. RSC courses must be taken on the A-F grading basis.

Take 6 or more credit(s) from the following:
- RSC 5106 - Introduction to Rehabilitation Science (1.0 cr)
- RSC 5206 - Academic Ethos (1.0 cr)
- RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
- RSC 5294 - Independent Study in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 5306 - Scientific and Professional Presentation (1.0 cr)
- RSC 5814 - Age, Exercise, and Rehabilitation (2.0 cr)
- RSC 5841 - Applied Data Acquisition and Processing (4.0 cr)
- RSC 8106 - Critical Analysis of Scientific Literature (1.0 - 2.0 cr)
- RSC 8206 - Grant Writing (2.0 cr)
- RSC 8306 - Peer Review and Publication (2.0 cr)
- RSC 8130 - Current Literature Seminar (1.0 - 3.0 cr)
- RSC 8135 - Advanced Kinesiology (3.0 cr)
- RSC 8170 - Special Topics in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 8185 - Problems in Rehabilitation Science (1.0 - 3.0 cr)
- RSC 8192 - Research Design in Rehabilitation Science (4.0 cr)
- RSC 8282 - Problems in Human Movement (4.0 cr)

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in rehabilitation science is a post-professional program designed to train rehabilitation scientists and academicians to meet the growing demand for experts in physical and occupational therapy and related fields. The program includes occupational and physical therapists and students with other backgrounds interested in rehabilitation research. The program’s philosophy provides students with 1) a strong foundation in research methodology, 2) a concentrated educational experience tailored toward a student's specific research question in rehabilitation science, and 3) a working knowledge of the importance of a collaborative, interdisciplinary approach to the scientific process.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Bachelor's degree or US equivalent in a related discipline is minimal requirement.

Professional, graduate, or master's degree preferred but not required.

Other requirements to be completed before admission:
Applicants must hold a bachelor's or graduate degree, or accredited US equivalent, in a discipline related to rehabilitation; for example, biomedical engineering, kinesiology, medicine, occupational therapy, physical therapy, public health, or speech/audiology. Depending on the educational background of the applicant, admission may be contingent upon completion of selected prerequisite coursework.

Special Application Requirements:
In addition to completing and submitting the University's online application (which includes submission of a personal statement, diversity statement, and upload of CV/resume), applicants must submit the following materials: report of GRE General Test scores (scores in the 50th percentile or higher are preferred); transcripts from all institutions attended; three letters of recommendation; and TOEFL and/or iELTS scores for international students. Student must also have an agreed-upon faculty adviser at the time of application. Compatibility of research interest is a major determinant in the student/adviser relationship. For further information regarding these requirements, contact Program Administrator, Rich Adamczak, via email at adamc002@umn.edu.

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 155
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:
• TOEFL
- Internet Based - Total Score: 88
- Internet Based - Listening Score: 21
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 21
- Internet Based - Speaking Score: 23

IELTS
- Total Score: 6.5

The preferred English language test is Test of English as Foreign Language

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

16 credits are required in the major.
20 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

**Core Courses**

All students must complete the core courses.

Take 6 or more credit(s) from the following:
- RSC 5106 - Introduction to Rehabilitation Science (1.0 cr)
- RSC 5206 - Academic Ethos (1.0 cr)
- RSC 5306 - Scientific and Professional Presentation (1.0 cr)
- RSC 8106 - Critical Analysis of Scientific Literature (1.0 - 2.0 cr)
- RSC 8206 - Grant Writing (2.0 cr)
- RSC 8306 - Peer Review and Publication (2.0 cr)

**Additional RSC Courses**

Take at least 10 credits from the following courses, upon consultation with advisor:
- RSC 5xxx
- RSC 8xxx

**Statistics Requirement**

Take at least 8 credits of statistics from the following options, or choose 8 statistics credits in consultation with advisor:

**Public Health Statistics Series**
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)

**Educational Psychology Statistics Series**
- EPSY 8261 (inactive) (3.0 cr)
- EPSY 8262 (inactive) (3.0 cr)

**Elective Courses**

Take at least 12 credits in consultation with advisor. Electives can include a combination of RSC coursework and courses from other disciplines.

**Joint- or Dual-degree Coursework:** DPT/PhD
Student may take a total of 18 credits in common among the academic programs.
Twin Cities Campus

Stem Cell Biology M.S.

Stem Cell Institute

Medical School

Link to a list of faculty for this program.

Contact Information:
Stem Cell Institute, 2001 6th Street S.E., Mail Code 2873, Minneapolis, MN 55455-3007
Email: scbgrad@umn.edu
Website: http://www.stemcell.umn.edu/graduate_programs/master_of_science/home.htm

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program requires summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The stem cell biology master's program is a multidisciplinary program that prepares graduates for a career in research, teaching, or industry within the field of stem cell biology. It offers training in stem cell biology, a rapidly growing interdisciplinary field that rests on foundations provided by molecular, cellular, and developmental biology. Students will take lecture, lab, and seminar courses in these various disciplines, in addition to stem cell biology. They will interact with members of the Stem Cell Institute through participation in research seminars and journal clubs.

Students who elect Plan A will spend a full calendar year, including summer, conducting research in the laboratory of a stem cell graduate program faculty member. This research will form the basis of the master's thesis.

Students who elect Plan B will conduct research of primary literature resulting in a written paper and seminar on a topic in Stem Cell Biology agreed upon in advance by the student and faculty adviser. Part-time students choosing Plan B are expected to complete the degree within 3 years by taking one to two courses per semester, excluding summers.

Program Delivery

This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

The preferred undergraduate GPA for admittance to the program is 3.20.

A bachelor's degree or foreign equivalent in biological science or a related field.

Special Application Requirements:

Applicants must upload to the Apply Yourself on-line application website: 1) a personal statement (500 words or less) outlining research interests and long- and short-term goals (NOTE: students applying to Plan A should include information about previous research experience); 2) a curriculum vitae or resume; 3) the names of three individuals whom the student has asked to write letters of recommendation; and 4) unofficial transcripts.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 94
  - Internet Based - Listening Score: 22
  - Internet Based - Writing Score: 24
  - Internet Based - Reading Score: 22
  - Internet Based - Speaking Score: 26
  - Paper Based - Total Score: 580
• IELTS

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
- Total Score: 7
- Listening Score: 6.2
- Reading Score: 6.2
- Writing Score: 6.2
- Speaking Score: 6.2

**MELAB**

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A**: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B**: Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students must demonstrate familiarity with the tools of research and scholarship in their major field, the ability to work independently, and the ability to present the results of their investigation effectively.

**Plan Options**

**Plan A**

Take 10 master's thesis credits. Students are recommended to take 5 in spring of year 1 and the remaining 5 in fall of year 2. Plan A students must also take SCB 5051.

**SCB 8777** - Thesis Credits: Master's (1.0 - 18.0 cr)
**SCB 5051** - Stem Cell Biology Practical Training Module (1.0 cr)

**Plan A Electives**

Take elective credits from the following list, or other courses in consultation with the program advisor, to complete the minimum credit requirement.

**BIOC 8401** - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)
**BIOL 4004** - Cell Biology (3.0 cr)
**BMEN 5041** - Tissue Engineering (3.0 cr)
**BMEN 5351** - Cell Engineering (3.0 cr)
**BTHX 5210** - Ethics of Human Subjects Research (3.0 cr)
**BTHX 5325** - Biomedical Ethics (3.0 cr)
**BTHX 5400** - Intro Ethics in Hlth Policy (3.0 cr)
**GCD 5036** - Molecular Cell Biology (3.0 cr)
**GCD 8008** - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
**GCD 8131** - Advanced Molecular Genetics and Genomics (3.0 cr)
**GCD 8151** - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
**GCD 8161** - Advanced Cell Biology and Development (3.0 cr)
**MICA 8003** - Immunity and Immunopathology (4.0 cr)
**MICA 8004** - Cellular and Cancer Biology (4.0 cr)
**MILI 6235** - Pharmaceutical Industry: Business and Policy (2.0 cr)
**MILI 6726** - Medical Device Industry: Business and Public Policy (2.0 cr)
**MILI 6990** - The Health Care Marketplace (2.0 cr)
**MILI 6995** - Medical Industry Valuation Laboratory (2.0 cr)
**NSC 8211** - Developmental Neurobiology (3.0 cr)
**PHCL 5110** - Introduction to Pharmacology (3.0 cr)
**PHCL 5112** - A Graduate Toolkit I: An Introduction to the Scientific Research Lab (1.0 cr)
PHSL 5510 - Advanced Cardiac Physiology and Anatomy (2.0 - 3.0 cr)
PHSL 8242 - Professional Skills Development for Biomedical Scientists (2.0 cr)
PSY 5063 - Introduction to Functional MRI (3.0 cr)

-OR-

Plan B
Take SC B 5900.
SCB 5900 - Master's Plan B Research Paper and Presentation (2.0 cr)

Plan B Electives
Take elective credits from the following list, or other courses in consultation with the advisor, to complete the minimum credit requirement.
BIOC 5213 - Selected Topics in Molecular Biology (3.0 cr)
BIOC 8401 - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)
BIOC 4004 - Cell Biology (3.0 cr)
BMEN 5041 - Tissue Engineering (3.0 cr)

PHCL 5110 - Introduction to Pharmacology (3.0 cr)
PHCL 5112 - A Graduate Toolkit I: An Introduction to the Scientific Research Lab (1.0 cr)
PHSL 5510 - Advanced Cardiac Physiology and Anatomy (2.0 - 3.0 cr)
PHSL 8242 - Professional Skills Development for Biomedical Scientists (2.0 cr)
PSY 5063 - Introduction to Functional MRI (3.0 cr)

Required Coursework
Required Courses
All students take the following courses:
SCB 5054 - Stem Cell Institute Research Seminar and Journal Club (2.0 cr)
SCB 8181 - Stem Cell Biology (3.0 cr)

Required molecular biology course
Take at least one of the following required courses:
GCD 4034 - Molecular Genetics and Genomics (3.0 cr)
or GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
or BIOC 8007 - Molecular Biology of DNA (2.0 cr)

Take at least one of the following required courses:
GCD 8161 - Advanced Cell Biology and Development (3.0 cr)
or GCD 8008 - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
or 5xxx-or 8xxx-level Bioethics course, approved prior to registration by the SCB program.

Department of Stem Cell Biology Institute, 2001 6th Street SE, Mail Code 2873, Minneapolis, MN 55455-3007 (612-625-0602; fax: 612-624-2436)
Email: ander607@umn.edu
Website: http://www.stemcell.umn.edu/graduate-programs/phd-level-minor

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This degree program offers training in stem cell biology, a rapidly growing interdisciplinary field that rests on foundations provided by molecular, cellular, and developmental biology. Students will take lecture, lab, and seminar courses in these various disciplines, in addition to Stem Cell Biology. They will interact with members of the Stem Cell Institute through participation in research seminars and journal clubs, and will spend a full calendar year conducting stem cell research in the laboratory of a stem cell biology graduate program faculty member.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Special Application Requirements:
Applicants must be admitted to a Ph.D. program and obtain approval from the director of graduate studies in stem cell biology to enroll in the minor program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

In addition to the major requirement appropriate to the student's specific program, the stem cell biology PhD minor will require 12 credits from designated courses with a minimum GPA 3.00.

The main research project must be done in the lab of a member of the stem cell biology graduate faculty.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctoral
The PhD minor is available to students with an interest in stem cell biology who are in relevant PhD programs such as MCDB&G, MCB, pharmacology, microbiology, bio-engineering, or in a medical or veterinary medicine school program. It offers training in stem cell biology, which is a rapidly growing interdisciplinary field that rests on foundations provided by molecular, cellular, and developmental biology. Students will take lecture and seminar courses. They will interact with members of the Stem Cell Institute through participation in research seminar and journal clubs and conduct stem cell research in the laboratory of a stem cell biology
graduate program faculty member.

Requirements include 12 credits from designated courses—9 core credits and 3 credits from elective courses—and a research project in the lab of a Stem Cell Institute faculty member. Students may not use credits offered in their major field to satisfy minor requirements.

**Required Courses**

All students are required to take these courses.

- **BIOC 8002** - Molecular Biology and Regulation of Biological Processes (3.0 cr)
- **GCD 8161** - Advanced Cell Biology and Development (3.0 cr)
- **SCB 8181** - Stem Cell Biology (3.0 cr)

**PhD Minor Electives**

Students may choose from following list of courses. If any are required as part of major requirements, they may not be used to fulfill minor requirements.

Take 3 or more credit(s) from the following:

- **BIOC 8401** - Ethics, Public Policy, and Careers in Molecular and Cellular Biology (1.0 cr)
- **BMEN 5041** - Tissue Engineering (3.0 cr)
- **BMEN 5351** - Cell Engineering (3.0 cr)
- **BTHX 5400** - Intro Ethics in Hlth Policy (3.0 cr)
- **BTHX 8000** - Advanced Topics in Bioethics (1.0 - 4.0 cr)
- **GCD 8008** - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
- **GCD 8131** - Advanced Molecular Genetics and Genomics (3.0 cr)
- **GCD 8151** - Cellular Biochemistry and Cell Biology (3.0 cr)
- **MICA 8003** - Immunity and Immunopathology (4.0 cr)
- **MICA 8004** - Cellular and Cancer Biology (4.0 cr)
- **NSC 8211** - Developmental Neurobiology (3.0 cr)
- **PHCL 5110** - Introduction to Pharmacology (3.0 cr)
- **PHSL 5510** - Advanced Cardiac Physiology and Anatomy (2.0 - 3.0 cr)
- **PHSL 8242** - Professional Skills Development for Biomedical Scientists (2.0 cr)
- **PSY 5063** - Introduction to Functional MRI (3.0 cr)

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program requires summer semesters for timely completion.
• Degree: Master of Science in Surgery

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The general surgery residency program trains medical doctors for the practice of surgery and for academic positions. During Residency, research trainees spend two to three years in either a basic science laboratory or in clinical translational surgery. The Department of Surgery offers supervised work in its experimental research laboratories, hospital, and outpatient departments.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
MD or graduate student in an applicable field

Other requirements to be completed before admission:
Prospective students must be in the general surgery training program, with two to three clinical years of training completed; physicians interested in an advanced research degree; or individuals with relevant research education and experience. Non-physician applicants should confer with the Director of Graduate Studies prior to applying to determine their potential for the M.S.Surg degree.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Required Coursework
All students complete the following courses:
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 6301 - Fundamentals of Clinical Research (3.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
SURG 8202 - Surgical Research (3.0 cr)
SURG 8990 - Topics in Pancreatoloogy (1.0 - 4.0 cr)
SURG 8994 - Directed Readings (1.0 - 4.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 18 to 31
- This program requires summer semesters for timely completion.
- Degree: Adlt Hlth/Geron Clincial Nurse Spec Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postgraduate certificate program in nursing offers students with a doctor of nursing practice (DNP) or other graduate degree in a clinical nursing specialty area the opportunity to complete an additional area of study. Completion of required coursework and practice hours provides eligibility to take certification examinations.

Accreditation
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A DNP or other accredited graduate degree in a clinical nursing specialty area is required for admission to this program.

Other requirements to be completed before admission:
All applicants must have a current registered nurse license.

Special Application Requirements:
Applicants are required to submit transcripts from all institutions where post-secondary credit was earned, reference materials containing an Admission Reference Form and personal letter of reference from two separate individuals, two essays, a current curriculum vitae/resume, a current registered nurse license, and English language proficiency scores (if applicable). Application deadlines for this certificate are a priority deadline of November 1, with rolling admissions on a space-available basis until March 1.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
- MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

3.0 cumulative GPA is required. Please contact the School of Nursing for detailed information about the requirements for this certificate.

Specialty Courses (18 Credits)
Complete the following required specialty courses for the certificate. NURS 6408 must be taken for 1 credit. NURS 6502 must be taken for 3 credits. NURS 7505 must be taken for 2 credits.

- **NURS 6405 - Advanced Practice CNS Roles Across the Lifespan (3.0 cr)**
- **NURS 6406 - Advanced Practice CNS Roles Across the Lifespan: Practicum (1.0 cr)**
- **NURS 6407 - Advanced Nursing Care of Older Adults (3.0 cr)**
- **NURS 6408 - Advanced Nursing Care of Older Adults Practicum (1.0 - 2.0 cr)**
- **NURS 6502 - Assessment and Management of Health for Advanced Practice Nurses, II (2.0 - 3.0 cr)**
- **NURS 7505 - Assessment and Management of Health for Advanced Practice Nurses Practicum II (1.0 - 2.0 cr)**
- **NURS 7706 - Implementing the Role of the Clinical Nurse Specialist in Acute Care (1.0 cr)**
- **NURS 7406 - Advanced Nursing Practicum in Adult-Gerontology Health (2.0 cr)**
- **NURS 7705 - The Adult and Gerontological Clinical Nurse Specialist in Acute Care (2.0 cr)**

Advanced Practice Registered Nurse Core Courses (0 to 13 credits)
Completion of the following coursework is required for the post-graduate certificate program. Students who have not completed these courses or their equivalents prior to admission must do so to meet requirements. Consult with the Doctor of Nursing Practice Program Director to evaluate prior APRN coursework for equivalency. NURS 5229 must be taken for 4 credits.

- **NURS 5200 - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)**
- **NURS 5222 - Advanced Human Physiology (2.0 cr)**
- **NURS 5226 - Advanced Human Pathophysiology (2.0 cr)**
- **NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)**
- **NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)**

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 41 to 100
- This program requires summer semesters for timely completion.
- Degree: Doctor of Nursing Practice

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Doctor of Nursing Practice (DNP) Program is offered as the post-baccalaureate with specialty (12 specialties). The School of Nursing also offers a reduced-credit, post-master's DNP program for students who have completed a master's degree in a nursing practice specialty.

The DNP program is an innovative, practice-focused program that prepares students to be leaders in health care, develop quality improvement, and systems problem solving. It prepares nurses to create and lead new models of care delivery for communities locally, across the nation, and around the world. Students work with faculty who are leaders in their fields and on the cutting edge of nursing research and practice. These experts become mentors and guide students through the program. The unique, interdisciplinary core curriculum is divided into the following four areas.

1. DNP core - Includes science of nursing intervention, moral and ethical positions, research, statistics, program evaluation, evidence-based practice, epidemiology, informatics, leadership, health economics, health policy, and teaching and learning.
2. DNP specialty core - Prepares students for advanced clinical practice; includes physiology, pharmacology, pharmacotherapeutics, and advanced health assessment.
3. DNP specialization - Prepares graduates for certification in their chosen specialty by a national certifying body and includes:
   a. Advanced clinical practice with specialty-specific courses for each of the areas of clinical specialization
   b. Other specialization in public health, innovation and leadership, informatics, and integrative health and healing
4. DNP project - Completed by all students in a three-semester sequence during which the project is planned, implemented, evaluated, and disseminated

The School of Nursing and the School of Public Health offer a DNP/MPH-Public Health Practice dual degree program. This dual degree option provides students with a unique opportunity to provide advanced nursing care as leaders of inter-professional health care teams, emphasizing population-focused practice, and quality improvement to impact patient outcomes.

Accreditation
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
• primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

The post-baccalaureate DNP specialty areas and post-master's DNP require an entry-level nursing degree (e.g. BSN, BAN, post-bacc certificate in nursing, or entry-level master of nursing).

A graduate degree is not required for admission to the post-baccalaureate DNP program.
Applicants for the post-master's DNP must hold a master's degree in a nursing practice specialty.

Other requirements to be completed before admission:
The required application process is available on the School of Nursing website at www.nursing.umn.edu. Interviews are by invitation only and are not granted to all applicants. Application deadlines for the DNP program are available on the School of Nursing website.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
- MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
41 to 100 credits are required in the major.
This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students MUST complete coursework according to the program plan appropriate for their term of admission and year plan. Any modifications to the program plan must be approved by the Specialty Coordinator/Faculty Advisor and Doctoral Programs Coordinator.

Core Coursework
Students with a Master of Nursing (MN) degree earned prior to 2010 must take NURS 7600 for 4 credits, and complete the remaining core coursework for a total of 41 credits. Students with an MN degree earned between 2010 and 2014 must take NURS 7600 for 2 credits and complete the remaining core courses for a total of 39 credits.

NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 6200 - Science of Nursing Intervention (3.0 cr)
NURS 7000 - DNP Proseminar (1.0 cr)
NURS 7100 - Quality Improvement and Implementation Science in Health Care (3.0 cr)
NURS 7102 - Scholarly Dissemination and Advanced Professional Engagement (2.0 cr)
NURS 7200 - Economics of Health Care (3.0 cr)
NURS 7202 - Moral and Ethical Positions and Actions in Nursing (2.0 cr)
NURS 7300 - Program Planning and Evaluation (3.0 cr)
NURS 7400 - Health Policy Leadership (3.0 cr)
NURS 7600 - Nursing Research and Evidence Based Practice (2.0 - 4.0 cr)
NURS 7610 - System Leadership and Innovation (3.0 cr)
NURS 7900 - Scholarly Teaching and Learning in Nursing (3.0 cr)
NURS 6110 - Epidemiology in Nursing (2.0 cr)
or PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
Take 3 or more credit(s) from the following:
• NURS 7110 - NURS 7110 DNP Project Practicum (1.0 - 3.0 cr)

Statistics
Complete at least 3 credits of graduate-level inferential statistics
EPSY 5261 - Introductory Statistical Methods (3.0 cr)
or PUBH 6414 - Biostatistical Literacy (3.0 cr)

Joint- or Dual-degree Coursework:Doctor of Nursing Practice/Master of Public Health - Public Health Practice (D.N.P./M.P.H.-Public Health Practice) Student may take a total of 14 credits in common among the academic programs.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may complete the program with more than one sub-plan.

**Adult Health/Gerontological Clinical Nurse Specialist**
The DNP program with a specialty in adult health and gerontological nursing as a clinical nurse specialist prepares nurses for leadership as advanced practice nurses and clinical experts to provide advanced nursing care to adults and elders in a variety of settings. The DNP program is for students who already hold a baccalaureate degree in nursing, and involves both coursework and practicum experiences as well as a final internship where the student has the opportunity to focus on a sub-specialty area (e.g., oncology, cardiology, palliative care), if desired. Graduates work as expert clinicians and consultants in acute care settings, nursing homes, transitional care, and specialty practices. The adult health and gerontological specialty offers leadership preparation for nurses desiring expertise in the management of complex health conditions, working with nurses and interdisciplinary teams and organizations to provide care and services for adults and older adults. Students ground their studies in the science of nursing interventions, moral/ethical issues, and nursing research. Practicum experiences are arranged to meet the individual needs of students while also meeting accreditation and certification requirements. In addition to completing core studies in the specialty, students also gain skills in evidence-based practice, program evaluation, informatics, teaching/learning, health economics, health care policy, and epidemiology.

**Required Specialty Coursework**
Complete the following courses for at least 34 credits. 4 credits of NURS 5229 is required; 3 credits of NURS 6502 is required; 2 credits of NURS 7505 is required; 1 credit of NURS 6408 is required for this specialty.

- **CSPH 5101** - Introduction to Integrative Healing Practices (3.0 cr)
- **NURS 5200** - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
- **NURS 5222** - Advanced Human Physiology (2.0 cr)
- **NURS 5226** - Advanced Human Pathophysiology (2.0 cr)
- **NURS 5228** - Pharmacology for Advanced Practice Nursing (2.0 cr)
- **NURS 5229** - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
- **NURS 6405** - Advanced Practice CNS Roles Across the Lifespan (3.0 cr)
- **NURS 6406** - Advanced Practice CNS Roles Across the Lifespan: Practicum (1.0 cr)
- **NURS 6407** - Advanced Nursing Care of Older Adults (3.0 cr)
- **NURS 6408** - Advanced Nursing Care of Older Adults Practicum (1.0 - 2.0 cr)
- **NURS 6502** - Assessment and Management of Health for Advanced Practice Nurses, II (2.0 - 3.0 cr)
- **NURS 7406** - Advanced Nursing Practicum in Adult-Gerontology Health (2.0 cr)
- **NURS 7505** - Assessment and Management of Health for Advanced Practice Nurses Practicum II (1.0 - 2.0 cr)
- **NURS 7705** - The Adult and Gerontological Clinical Nurse Specialist in Acute Care (2.0 cr)
- **NURS 7706** - Implementing the Role of the Clinical Nurse Specialist in Acute Care (1.0 cr)

**Adult Health/Gerontological Primary Care Nurse Practitioner**
The DNP program with a specialty in adult health and gerontological nursing as a clinical nurse practitioner prepares nurses for leadership as advanced practice nurses and clinical experts to provide advanced nursing care to adults and elders in a variety of settings. This DNP program is for students who already hold a baccalaureate degree in nursing, and involves both coursework and practicum experiences, as well as a final internship where the student has the opportunity focus on a sub-specialty area (e.g., oncology, cardiology, palliative care), if desired. Graduates work in primary care/ambulatory care settings, hospitals, group practices of advanced practice gerontological nurses that manage care of adults and older adults in nursing homes, transitional care settings, assisted living, and specialty practices. The adult health and gerontological specialty offers leadership preparation for nurses desiring expertise in advanced nursing assessment and management for health promotion and disease prevention, management of complex health conditions, and working with interdisciplinary teams to provide care and services for persons ranging from adolescents, adults, and older adults. Practicum experiences are arranged to meet the individual needs of students while also meeting accreditation and certification requirements.

**Required Specialty Coursework**
Complete the following courses for 34 credits. Specialty requirements for Variable credit course: NURS 5229 = 4 credits; NURS 6305 = 2 credits; NURS 7504 = 1 credit; NURS 7505 = 1 credit; NURS 6502 = 3 credits; NURS 6408 = 2 credits

- **CSPH 5101** - Introduction to Integrative Healing Practices (3.0 cr)
- **NURS 5200** - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
- **NURS 5222** - Advanced Human Physiology (2.0 cr)
- **NURS 5226** - Advanced Human Pathophysiology (2.0 cr)
- **NURS 5228** - Pharmacology for Advanced Practice Nursing (2.0 cr)
- **NURS 5229** - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
- **NURS 6305** - Women's Reproductive Health Care (2.0 - 3.0 cr)
- **NURS 6307** - Assessment and Management of Health for APNs Practicum III (1.0 cr)
- **NURS 6407** - Advanced Nursing Care of Older Adults (3.0 cr)
- **NURS 6408** - Advanced Nursing Care of Older Adults Practicum (1.0 - 2.0 cr)
- **NURS 6501** - Assessment and Management of Health for Advanced Practice Nurses, I (3.0 cr)
- **NURS 7406** - Advanced Nursing Practicum in Adult-Gerontology Health (2.0 cr)
- **NURS 7504** - Assessment and Management of Health for Advanced Practice Nurses, Practicum I (1.0 - 2.0 cr)
Women’s Healthcare Nurse Practitioner or (NP)
The DNP program with a specialty in women’s health prepares nurses for leadership as advanced practice nurses. This DNP program is for students who hold a baccalaureate degree in nursing, and involves both coursework and clinical practicum experience with an internship in the final semester.

Clinical experience is offered in primary care, women’s health, and specialty practice areas, such as oncology and reproductive endocrinology. Students ground their studies in the science of nursing intervention, moral/ethical issues, and nursing research. They then focus on courses that examine the basis of assessment and intervention for adolescent and adult populations with an emphasis on adolescent and adult women. Practicum experiences are arranged to meet the individual needs of students while also meeting accreditation and certification requirements. In addition to completing core studies in the specialty, students also gain skills in evidence-based practice, program evaluation, informatics, teaching/learning, health economics, health care policy, and epidemiology. A final project that is a systematic investigation of a practice problem is planned, implemented, and completed during the curriculum.

Required Specialty Coursework
Complete the following courses for at least 36 credits. Courses with Variable credit requirements for this specialty: NURS 5229 = 3 credits; NURS 6305 = 3 credits; NURS 6925 = 3 credits.

- CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
- NURS 5200 - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
- NURS 5222 - Advanced Human Physiology (2.0 cr)
- NURS 5226 - Advanced Human Pathophysiology (2.0 cr)
- NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
- NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
- NURS 6213 - Reproductive Healthcare for Women at Risk (2.0 cr)
- NURS 6214 - Reproductive Healthcare for Women at Risk Practicum (2.0 cr)
- NURS 6305 - Women’s Reproductive Health Care (2.0 - 3.0 cr)
- NURS 6306 - Women’s Reproductive Health Practicum (1.0 cr)
- NURS 6501 - Assessment and Management of Health for Advanced Practice Nurses, I (3.0 cr)
- NURS 6925 - Advanced Concepts in Women’s Health Care I (1.0 - 3.0 cr)
- NURS 6926 - Advanced Concepts in Women's Health for WHNP Practicum I (1.0 cr)
- NURS 6927 - Advanced Concepts in Women's Health II (3.0 cr)
- NURS 6928 - Adv Concepts in Women's Health II WHNP Prac (1.0 cr)
- NURS 7310 - WHNP Clinical and Professional Integration (2.0 cr)

Nurse Anesthesia
This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

The nurse anesthesia area of study prepares registered nurses to become Certified Registered Nurse Anesthetists (CRNAs) who are prepared for nurse anesthesia practice at the highest level. Graduates will possess expertise in general and regional anesthesia techniques and will be prepared to provide leadership in the practice setting. The nurse anesthesia area of study is fully accredited by the Council on Accreditation of Nurse Anesthesia Education Programs. In January of 2009, the University of Minnesota Nurse Anesthesia Area of Study received the maximum 10-year accreditation approval from the Council on Accreditation of Nurse Anesthesia Educational Programs. The program was the first nurse anesthesia program in the US to be accredited to offer the entry-level DNP.

With the Minneapolis VA Medical Center serving as the primary clinical site for the program, the University of Minnesota nurse anesthesia students rotate to several urban and rural clinical sites, which offer a broad spectrum of practice experiences. Some of the clinical sites are required, and some are optional. All required clinical sites are within daily driving distance of the campus.

Nurse anesthesia students complete the requirements for the DNP degree, as well as the requirements to take the National Certification Exam for nurse anesthetists.

Required Specialty Coursework
Complete the following courses for at least 59 credits.

- NURS 5222 - Advanced Human Physiology (2.0 cr)
- NURS 5226 - Advanced Human Pathophysiology (2.0 cr)
- NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
- NURS 5230 - Pharmacotherapeutics for Nurse Anesthesia (4.0 cr)
- NURS 6895 - Adult Acute Care Holistic Health Assessment (2.0 cr)
- NURS 6900 - Introduction to Principles of Anesthesia (6.0 cr)
- NURS 6901 - Basic Nurse Anesthesia Principles (3.0 cr)
- NURS 6902 - Nurse Anesthesia Care: Cardiothoracic Disease (2.0 cr)
- NURS 6903 - Nurse Anesthesia Care: Special Populations (2.0 cr)
- NURS 6910 - Introduction to Nurse Anesthesia Practicum I (1.0 cr)
Family Nurse Practitioner

The DNP program with a specialty in the family nurse practitioner (FNP) area of study prepares nurses for leadership as advanced practice nurses. The three-year DNP program is for students who already hold a baccalaureate degree in nursing, and involves both coursework and clinical practicums.

The FNP area of study offers leadership preparation for nurses desiring expertise in the scope of practice and in the role of the family nurse practitioner. Students ground their studies in the science of nursing intervention, moral/ethical issues, and nursing research. They then focus on courses that examine the basis of assessment and intervention for families and individuals of all ages. Practicum experiences are arranged to meet the individual needs of students while also meeting accreditation and certification requirements. In addition to completing core studies in the specialty, students also gain skills in evidence-based practice, program evaluation, informatics, teaching/learning, health economics, health care policy, and epidemiology. A final project that is a systematic investigation of a practice problem is planned, implemented, and completed during the curriculum.

Where applicable, completion of required FNP coursework and practice hours provides eligibility to sit for the FNP Certification through the American Nurses Credentialing Center.

Required Specialty Coursework

Completion of the courses for 39 credits is required for this specialty. Specialty Credit requirements for courses with variable credits:

- NURS 5229 = 4 credits; NURS 6305 = 3 credits; NURS 6502 = 3 credits; NURS 7504 = 1 credit; NURS 7505 = 1 credit
- CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
- NURS 5200 - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
- NURS 5222 - Advanced Human Physiology (2.0 cr)
- NURS 5226 - Advanced Human Pathophysiology (2.0 cr)
- NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
- NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
- NURS 6102 - Family Health Theory (2.0 cr)
- NURS 6305 - Women’s Reproductive Health Care (2.0 - 3.0 cr)
- NURS 6501 - Assessment and Management of Health for Advanced Practice Nurses, I (3.0 cr)
- NURS 6502 - Assessment and Management of Health for Advanced Practice Nurses, II (2.0 - 3.0 cr)
- NURS 7501 - Health Care of Children for the Family Nurse Practitioner Practicum (1.0 cr)
- NURS 7503 - Reproductive Health Care of Women Practicum for Family Nurse Practitioners (1.0 cr)
- NURS 7504 - Assessment and Management of Health for Advanced Practice Nurses, Practicum I (1.0 - 2.0 cr)
- NURS 7505 - Assessment and Management of Health for Advanced Practice Nurses Practicum II (1.0 - 2.0 cr)
- NURS 7506 - Family Practice Practicum III: Assessment and Management of Health for the Family Nurse Practitioner (1.0 cr)
- NURS 7507 - Assessment Management of Health Practicum IV: Community Health Leadership for Family Nurse Prac (1.0 cr)
- NURS 7508 - Health Care of the Elderly for the Family Nurse Practitioner Practicum (1.0 cr)
- NURS 7509 - Assessment and Management of Health Practicum VI: Primary Care for the Family Nurse Practitioner (1.0 cr)
- NURS 7515 - Health Care of Children for the Family Nurse Practitioner: Well Child Care (1.0 cr)
- NURS 7516 - Health Care of Children for the Family Nurse Practitioner: Acute and Chronic Management (2.0 cr)
- NURS 7518 - Health Care of the Elder Patient for the Family Nurse Practitioner (1.0 cr)

Health Innovation and Leadership

Health care is delivered today in diverse settings, by an expanding workforce and with extraordinary opportunities for nurses to lead, whether through formal leadership positions or through personal advocacy, in traditional settings, or in emerging sites. This requires an individual who can think broadly and embrace a global perspective; who embraces diversity in all its forms, including diversity of thought; who is curious and never satisfied with the status quo; who stimulates new ways of thinking and solutions which open up possibilities for action; who bases action on informed practice gained from multiple ways of knowing; who engages in critical thinking, and learns from other thought leaders; who inspires and creates needed change within a particular environment; who can work effectively with a variety of individuals and within disparate groups; and who can create healing environments within which others can do their best work.

The DNP, with a focus on health innovation and leadership, prepares nurses to function effectively as leaders in traditional and contemporary settings. The goal is to prepare a leader who can work well in the current environment while promoting change and improvement. Students in the program utilize a combination of learning strategies, readings, reflections, and independent learning experiences. Seminars will enable students and faculty to discuss relevant issues and share expertise.
Students must complete the required specialty courses for 32 credits and at least 5 credits of electives to achieve 37 graduate level credits to complete the specialty. Credit requirements for this specialty for courses with variable credits: NURS 6704 = 1 credit; NURS 6706 = 2 credits; NURS 7605 = 2 credits. Students choose 5 credits of elective graduate level coursework in consultation with their faculty advisor.

**Required Coursework**
Completion of the following courses for at least 37 credits.

- **CSPH 5711** - Optimal Healing Environments (3.0 cr)
- **NURS 6600** - Health Systems and Care Models (3.0 cr)
- **NURS 6702** - Nursing Leadership Seminar: Introduction to Innovation and Leadership (3.0 cr)
- **NURS 6703** - Nursing Leadership Seminar: Organizational Culture and Leadership (2.0 cr)
- **NURS 6704** - Nursing Leadership Practicum: Organizational Culture and Leadership (1.0 - 2.0 cr)
- **NURS 6705** - Nursing Leadership Seminar: Quality and Change Management (2.0 cr)
- **NURS 6706** - Nursing Leadership Practicum: Quality and Change Management (1.0 - 2.0 cr)
- **NURS 6707** - Health Care Design and Innovation Practicum (2.0 cr)
- **NURS 7605** - Executive Leadership Practicum: Boundary Spanning Leadership (1.0 - 2.0 cr)
- **NURS 7606** - Executive Leadership Seminar: Boundary Spanning Leadership (2.0 cr)
- **NURS 7607** - Health Care Design and Innovation Practicum (2.0 cr)
- **NURS 7608** - Executive Leadership Seminar: Boundary Spanning Leadership (1.0 - 2.0 cr)
- **NURS 7609** - Relationship-Based Leadership and Management (3.0 cr)
- **NURS 7610** - Health Care Finance and Resource Management (3.0 cr)
- **HUMF 5874** - Service Design: Designing complex systems to improve service delivery (4.0 cr)

**Specialty Electives**
Choose 5 credits of elective coursework in collaboration with faculty advisor. Additional selections permitted with approval from the faculty advisor.

Take 5 or more credit(s) from the following:
- **CSPH 5118** - Whole Person, Whole Community: The Reciprocity of Wellbeing (3.0 cr)
- **NURS 5812** - Global Health Through Study Abroad (1.0 - 2.0 cr)
- **GCC 5010** - Grand Challenge: The Global Climate Challenge: Creating an Empowered Movement for Change [CIV] (3.0 cr)
- **CSPH 5805** - Wellbeing in the Workplace (3.0 cr)
- **CSPH 5806** - Wellbeing and Resiliency for Health Professionals (1.0 cr)
- **CSPH 5807** - Mindfulness in the Workplace: Pause, Practice, Perform (2.0 cr)
- **CSPH 5115** - Cultural Awareness, Knowledge and Health (3.0 cr)
- **PUBH 6170** - Introduction to Occupational Health and Safety (3.0 cr)
- **PUBH 6100** - Topics: Environmental Health (1.0 - 4.0 cr)

**Nursing Informatics**
The nursing informatics (NI) specialty area prepares graduates with knowledge and skills necessary for leadership roles in health and nursing informatics to address the issues for consumers, clinical providers, and public health for processing and managing information through the use of various technologies. A wide array of courses throughout the University of Minnesota accompany nursing offerings, which offers students the opportunity to strengthen their disciplinary and interdisciplinary expertise.

With increasing demand for computerizing health information, graduates of the nursing informatics specialty are well positioned to assume leadership roles in nursing and health informatics field. The NI area of study provides knowledge and scholarship complemented by clinical experiences in the following areas:

- Systems analysis and design
- Knowledge representation and interoperability
- Clinical decision support and evidence-based practice
- Human factors and usability
- Leadership and health informatics
- Consumer, clinical provider, and population health informatics
- Health policy leadership
- Development and project management of health informatics projects
- Program evaluation
- Organization and administration of health services
- Ethical foundations of nursing
- Applied research

**Required Specialty Coursework**
Complete the following courses and at least 26 credits:

- **CSPH 5711** - Optimal Healing Environments (3.0 cr)
- **HINF 5510** - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)
- **NURS 5116** - Consumer Health Informatics (1.0 cr)
- **NURS 5117** - Consumer Health Informatics Practicum (1.0 cr)
- **NURS 6105** - Systems Analysis and Design (3.0 cr)
Integrative Health and Healing

The integrative health and healing specialty area prepares graduates with skills necessary for working with individuals, families, communities and health systems in developing holistic approaches to health promotion, disease prevention, and chronic disease management, with a special emphasis on managing lifestyle changes and incorporating the use of complementary therapies. Graduates are prepared to work in diverse settings including hospitals, outpatient settings, health plans, corporate and community organizations, and in private practice. A wide array of courses are available which offer students the opportunity to strengthen their disciplinary and interdisciplinary expertise. Through a collaboration with the Center for Spirituality and Healing, students can opt to concurrently earn a graduate certificate in integrative therapies and healing practices, including a focus in health coaching.

The integrative health and healing area of study provides a foundation of knowledge and practical experiences in the following areas:

- Optimal healing environments
- Botanical medicine
- Clinical aromatherapy
- Mind/body healing
- Functional nutrition
- Energy healing
- Health coaching
- Self-care
- Advanced integrative health and healing skills and program planning
- Applied research

Students choosing to complete coursework part-time are well accommodated by the curriculum.

Completion of 40 graduate level credits is required for the specialty - 38 credits of required coursework and 2 credits of elective coursework.

Required Specialty Coursework

Complete the following courses for at least 38 credits.

- CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
- CSPH 5226 - Advanced Meditation: Body, Brain, Mind, and Universe (1.0 cr)
- CSPH 5313 - Acupressure (1.0 cr)
- CSPH 5423 - Botanical Medicines: Foundations and Practical Applications (1.0 cr)
- CSPH 5431 - Functional Nutrition: An Expanded View of Nutrition, Chronic Disease, and Optimal Health (2.0 cr)
- CSPH 5503 - Aromatherapy Fundamentals (1.0 cr)
- CSPH 5535 - Reiki Healing (1.0 cr)
- CSPH 5536 - Advanced Reiki Healing: Level II (1.0 cr)
- CSPH 5561 - Healing Imagery I (2.0 cr)
- CSPH 5701 - Fundamentals of Health Coaching I (4.0 cr)
- CSPH 5711 - Optimal Healing Environments (3.0 cr)
- NURS 5200 - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
- NURS 5222 - Advanced Human Physiology (2.0 cr)
- NURS 5226 - Advanced Human Pathophysiology (2.0 cr)
- NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
- NURS 7209 - Integrative Health and Healing (1.0 cr)
- NURS 7210 - Integrative Health and Healing Practicum I (1.0 cr)
- NURS 7211 - Integrative Health and Healing II (1.0 cr)
- NURS 7212 - Integrative Health and Healing Practicum II (2.0 cr)
- NURS 7214 - Integrative Health and Healing III (1.0 cr)
- NURS 7215 - Integrative Health and Healing Practicum III (2.0 cr)
- CSPH 5102 - Art of Healing: Self as Healer (1.0 cr)

or CSPH 5806 - Wellbeing and Resiliency for Health Professionals (1.0 cr)

Specialty Electives

Additional course options may be available with faculty advisor approval.

Take 2 or more credit(s) from the following:

- CSPH 5000 - Explorations in Integrative Therapies and Healing Practices (1.0 - 4.0 cr)
- CSPH 5111 - Ways of Thinking about Health (2.0 cr)
Nurse Midwifery

This program combines academic preparation with clinical skills for the independent management of health care of women and newborns. Further, students receive additional academic preparation in health care policy, economics, evidence-based practice, evaluation and informatics, and complete a systems change project while in the program. DNP midwifery graduates will be prepared to more quickly fulfill leadership roles in the health care setting.

Courses are offered in a web-based format, with multi-day, on-campus seminars approximately two to three times per semester, in Minneapolis. By taking the courses in a web-based or online format, students may complete the midwifery program without having to relocate. Trips to campus to interact with faculty and other students allow for development of a professional learning community and enhance professional socialization. Midwifery clinical sites are used in or near a student's home community if available. Travel may be necessary depending on available midwifery practice locations. The online program is primarily geared to students in the five-state Upper Midwest region of Minnesota, Iowa, South Dakota, North Dakota, and Wisconsin. For more information about online learning, please visit Online Learning Opportunities.

Nurse-midwives assist women and families to promote and maintain health, and to facilitate optimal individual and family integrity in the context of culture and community.

Completion of the following courses and at least 38 credits is required. NURS 5505 is required for students without labor and delivery experience as a Registered Nurse. Specialty credit requirements for courses with variable credits: NURS 5229 = 3 credits; NURS 6305 = 3 credits; NURS 6925 = 2 credits; NURS 6308 = 2 credits

Required Specialty Coursework

Complete the following courses for at least 38 credits.

- CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
- NURS 5200 - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
- NURS 5222 - Advanced Human Physiology (2.0 cr)
- NURS 5226 - Advanced Human Pathophysiology (2.0 cr)
- NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
- NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
NURS 6210 - Midwifery Care of the Childbearing Family (3.0 cr)
NURS 6211 - Midwifery Care of the Childbearing Family Practicum (2.0 cr)
NURS 6213 - Reproductive Healthcare for Women at Risk (2.0 cr)
NURS 6214 - Reproductive Healthcare for Women at Risk Practicum (2.0 cr)
NURS 6305 - Women's Reproductive Health Care (2.0 - 3.0 cr)
NURS 6306 - Women's Reproductive Health Practicum (1.0 cr)
NURS 6308 - Women's Primary Care Practicum (1.0 - 2.0 cr)
NURS 6501 - Assessment and Management of Health for Advanced Practice Nurses, I (3.0 cr)
NURS 6925 - Advanced Concepts in Women's Health Care I (1.0 - 3.0 cr)
NURS 7213 - Midwifery Clinical and Professional Integration (3.0 cr)

Labor and Delivery Experience
Students are required to complete NURS 5505 if they do not have labor and delivery experience as Registered Nurse
NURS 5505 - Assessment and Support of Women in Labor (2.0 cr)

Pediatric Clinical Nurse Specialist
Students who pursue the pediatric clinical nurse specialist (PCNS) specialty area take core courses in nursing theory, moral/ethical issues, and research. They acquire skills in health assessment, intervention, and evaluation. They examine the care of children and families with special health care needs. They focus on planning and implementing programs to improve quality of care for children with chronic and complex illnesses. As the population of children with special health care needs continues to increase, there is likely to be a greater demand for clinical experts and leaders in pediatric nursing. The PCNS area of study is supported by the Center for Children with Special Health Care Needs.

PCNS coursework includes supervised clinical experiences. Efforts are made to provide students with clinical settings within their geographical area. Clinical courses are directed by certified faculty and supervised by clinical nurse specialist preceptors. The PCNS area of study can be completed in a two-year (full-time) or three-year (part-time) sequence.

PCNs work in collaboration with health care teams in a variety of settings to facilitate quality care for children across the continuum of care settings. They function as clinical experts in the planning, implementation, and evaluation of patient care standards. They provide direct care, oversee staff, patient and family education, participate in clinical research, and develop programs specific to the needs of children.

Required Specialty Coursework
Completion of the courses for 37 credits. Specialty credit requirements for courses with variable credits: NURS 5229 = 3 credits; NURS 6921 = 1 credit
CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
NURS 5200 - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
NURS 5222 - Advanced Human Physiology (2.0 cr)
NURS 5226 - Advanced Human Pathophysiology (2.0 cr)
NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
NURS 6102 - Family Health Theory (2.0 cr)
NURS 6405 - Advanced Practice CNS Roles Across the Lifespan (3.0 cr)
NURS 6406 - Advanced Practice CNS Roles Across the Lifespan: Practicum (1.0 cr)
NURS 6920 - Primary Care: Assessment of Health and Care of Well Children (3.0 cr)
NURS 6921 - Assessment of Health and Care of Well Children: Primary Care Practicum (1.0 - 2.0 cr)
NURS 6924 - Assessment and Interventions for Children and Youth With Special Health Care Needs (2.0 cr)
NURS 6929 - Advanced Nursing Care of Children with Acute Illness: Practicum for PCNS (2.0 cr)
NURS 7925 - Systems of Care for Children and Youth With Special Health Care Needs Practicum (2.0 cr)
NURS 7926 - Advanced Assessment, Intervention in Families of Children and Youth With Special Health Care Needs (2.0 cr)
NURS 7927 - Adv Assessment, Intervention in Families of Children and Youth With Special Health Care Needs Prac (1.0 cr)
OLPD 5356 - Disability Policy and Services (3.0 cr)

Primary Care Pediatric Nurse Practitioner
The pediatric nurse practitioner (PNP) area of study incorporates theory and clinical courses to prepare students to provide comprehensive care to children and their families. Most students elect to complete the children with special health care needs (CSPHN) leadership track by taking additional courses which are supported by the Center for Children with Special Health Care Needs.

Coursework includes nursing theory, moral/ethical issues, research, child assessment, management of childhood illnesses, and health policy. Courses are taught by faculty from the School of Nursing, School of Public Health, the Institute of Child Development, Family Social Science, the Medical School, and the Institute of Community Integration in the College of Education.

Supervised clinical experience is incorporated in the program. Efforts are made to meet students’ individual goals and to provide experiences in their geographic area. Clinical experiences are available in interdisciplinary settings such as primary care, home care, schools, specialty clinics, community agencies, the legislature, and the Minnesota Department of Health.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
At the completion of the program, students are eligible to take the Pediatric Nurse Practitioner certification examinations offered by the American Nurses Credentialing Center or the National Certification Board of Pediatric Nurse Practitioners and Nurses. Students in the CSHCN track are eligible for certification from the Institute on Community Integration.

Required Specialty Coursework

Completion of the following courses for at least 37 credits is required. Specialty credit requirements for variable credit courses: NURS 5229 = 3 credits; NURS 6921 = 2 credits

- CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
- NURS 5200 - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
- NURS 5222 - Advanced Human Physiology (2.0 cr)
- NURS 5225 - Psychopharmacology Advanced Practice Psychiatric/Mental Health Nursing (3.0 cr)
- NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
- NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
- NURS 6102 - Family Health Theory (2.0 cr)
- NURS 6920 - Primary Care: Assessment of Health and Care of Well Children (3.0 cr)
- NURS 6921 - Assessment of Health and Care of Well Children: Primary Care Practicum (1.0 - 2.0 cr)
- NURS 6922 - Primary Care: Assessment and Management of Common Conditions Affecting Children (3.0 cr)
- NURS 6923 - Primary Care Practicum: Assessment and Management of Common Conditions Affecting Children (2.0 cr)
- NURS 6924 - Assessment and Interventions for Children and Youth With Special Health Care Needs (2.0 cr)
- NURS 7925 - Systems of Care for Children and Youth With Special Health Care Needs Practicum (2.0 cr)
- NURS 7926 - Advanced Assessment, Intervention in Families of Children and Youth With Special Health Care Needs (2.0 cr)
- NURS 7927 - Adv Assessment, Intervention in Families of Children and Youth With Special Health Care Needs Prac (1.0 cr)
- OLDP 5356 - Disability Policy and Services (3.0 cr)

Psychiatric-Mental Health Nurse Practitioner

Graduate studies in psychiatric-mental health nursing prepare nurses to assume clinical nurse specialist roles with an emphasis on providing direct patient care to persons with major mental disorders and their families. Coursework focuses on the development of advanced practice nursing knowledge and skills required to provide both psychotherapeutic and biological interventions for the management of acute and chronic psychiatric symptoms with a variety of patients in diverse settings. Coursework integrates extant theories and research in the study of advanced health assessment, psychopathology assessment, psychopharmacology, and individual family and group therapy within various community and institutional systems.

Clinical emphasis is on secondary and tertiary psychiatric interventions and outcomes within a managed care context. Students are clinically precepted by certified psychiatric-mental health clinical nurse specialists. Clinical experiences are available in outpatient clinics, community mental health centers, hospitals, schools, and home care agencies. Full-time or part-time students may enroll in the area of study. Current psychiatric nursing experience is strongly encouraged.

Graduates will be academically prepared to take the American Nurses Credentialing Center (ANCC) certification examination for certified specialists in psychiatric-mental health nursing, after obtaining additional required post-master's clinical hours and supervision.

Completion of 39 credits is required for the specialty - 36 credits of required specialty coursework and 3 credits of complimentary alternative medicine elective coursework.

Required Specialty Coursework

Completion of the following courses for at least 36 credits. Specialty requirements for courses with variable credits: NURS 5229 = 2 credits

- CSPH 5101 - Introduction to Integrative Healing Practices (3.0 cr)
- NURS 5200 - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
- NURS 5222 - Advanced Human Physiology (2.0 cr)
- NURS 5225 - Psychopharmacology Advanced Practice Psychiatric/Mental Health Nursing (3.0 cr)
- NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
- NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)
- NURS 6102 - Family Health Theory (2.0 cr)
- NURS 6920 - Primary Care: Assessment of Health and Care of Well Children (3.0 cr)
- NURS 6921 - Assessment of Health and Care of Well Children: Primary Care Practicum (1.0 - 2.0 cr)
- NURS 6922 - Primary Care: Assessment and Management of Common Conditions Affecting Children (3.0 cr)
- NURS 6923 - Primary Care Practicum: Assessment and Management of Common Conditions Affecting Children (2.0 cr)
- NURS 6924 - Assessment and Interventions for Children and Youth With Special Health Care Needs (2.0 cr)
- NURS 7925 - Systems of Care for Children and Youth With Special Health Care Needs Practicum (2.0 cr)
- NURS 7926 - Advanced Assessment, Intervention in Families of Children and Youth With Special Health Care Needs (2.0 cr)
- NURS 7927 - Adv Assessment, Intervention in Families of Children and Youth With Special Health Care Needs Prac (1.0 cr)
- OLDP 5356 - Disability Policy and Services (3.0 cr)

Complimentary Alternative Medicine Electives
Eelective coursework is required and chosen in consultation with faculty advisors. Additional options may be permitted with faculty advisor approval. Take 3 or more credit(s) from the following:

- CSPH 5102 - Art of Healing: Self as Healer (1.0 cr)
- CSPH 5111 - Ways of Thinking about Health (2.0 cr)
- CSPH 5115 - Cultural Awareness, Knowledge and Health (3.0 cr)
- CSPH 5311 - Introduction to Traditional Chinese Medicine (2.0 cr)
- CSPH 5315 - Traditional Tibetan Medicine: Ethics, Spirituality, and Healing (2.0 cr)
- CSPH 5317 - Yoga: Ethics, Spirituality, and Healing (2.0 cr)
- CSPH 5313 - Acupressure (1.0 cr)
- CSPH 5331 - Foundations of Shamanism and Shamanic Healing (2.0 cr)
- CSPH 5401 - People, Plants, and Drugs: Introduction to Ethnopharmacology (3.0 cr)
- CSPH 5421 - Botanical Medicines in Integrative Healthcare (3.0 cr)
- CSPH 5431 - Functional Nutrition: An Expanded View of Nutrition, Chronic Disease, and Optimal Health (2.0 cr)
- CSPH 5503 - Aromatherapy Fundamentals (1.0 cr)
- CSPH 5523 - Applications in Therapeutic Horticulture (2.0 cr)
- CSPH 5535 - Reiki Healing (1.0 cr)
- CSPH 5536 - Advanced Reiki Healing: Level II (1.0 cr)
- CSPH 5555 - Introduction to Body and Movement-based Therapies (2.0 cr)
- CSPH 5631 - Healing Imagery I (2.0 cr)
- CSPH 5641 - Animals in Health Care: The Healing Dimensions of Human/Animal Relationships (3.0 cr)
- CSPH 5121 - Whole Systems Healing: Health and the Environment (2.0 cr)
- CSPH 5201 - Spirituality and Resilience (2.0 cr)
- CSPH 5318 - Tibetan Medicine, Ayurveda, and Yoga in India (4.0 cr)
- CSPH 5343 - Ayurveda Medicine: The Science of Self-healing (2.0 cr)
- CSPH 5341 - Overview of Indigenous Hawaiian Healing (2.0 cr)
- CSPH 5323 - Botanical Medicines: Foundations and Practical Applications (1.0 cr)
- CSPH 5642 - Nature Heals: An Introduction to Nature-Based Therapeutics (3.0 cr)
- CSPH 5708 - Mind-Body Science and the Art of Transformation (1.0 cr)
- CSPH 5805 - Wellbeing in the Workplace (3.0 cr)
- CSPH 5806 - Wellbeing and Resiliency for Health Professionals (1.0 cr)
- CSPH 5807 - Mindfulness in the Workplace: Pause, Practice, Perform (2.0 cr)
- CSPH 5905 - Food Matters: Cook Like Your Life Depends On It (1.0 cr)

Post-Master's D.N.P.

The post-master's option is for individuals who already hold a master's degree in a nursing practice specialty and who have nursing specialty preparation. The DNP program prepares nurses for leadership as advanced practice nurses, clinical experts, health care executives, policy experts, and informaticians.

Post-master's DNP students complete the core DNP requirements and any additional coursework needed to achieve the 1000 hour practicum requirement. Consult with the DNP program for more information.

Preceptor Supervisor Practicum Hours

Students completing the Post-Master's DNP must complete 1000 supervised hours of practicum. Upon admission, the total hours completed through the master's degree is documented and a gap analysis identifies whether additional practicum hours are needed. The number of credits of appropriate systems-level practicum coursework necessary to meet the 1000-hour requirement, if any, will be determined in consultation with the faculty advisor.

Practicum Course Options

Courses are chosen in consultation with the faculty advisor. Additional options are permitted with advisor approval. Take 0 or more credit(s) from the following:

- NURS 5117 - Consumer Health Informatics Practicum (1.0 cr)
- NURS 6704 - Nursing Leadership Practicum: Organizational Culture and Leadership (1.0 - 2.0 cr)
- NURS 6706 - Nursing Leadership Practicum: Quality and Change Management (1.0 - 2.0 cr)
- NURS 7106 - Knowledge Representation and Interoperability Practicum (2.0 cr)
- NURS 7109 - Population Health Informatics Practicum (2.0 cr)
- NURS 7401 - Health Policy Leadership Practicum (0.5 - 1.0 cr)
- NURS 7605 - Executive Leadership Practicum: Boundary Spanning Leadership (1.0 - 2.0 cr)
- NURS 7904 - Nursing Education Practicum (2.0 cr)
- NURS 7113 - Clinical Decision Support: Theory (2.0 cr)
- NURS 5812 - Global Health Through Study Abroad (1.0 - 2.0 cr)

• Program Type: Post-baccalaureate credit certificate/licensure/endorsement
• Requirements for this program are current for Fall 2018
• Length of program in credits: 16
• This program requires summer semesters for timely completion.
• Degree: Ldrshp in Hlth Info Tec for Hlth Pro PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

By combining formal clinical or public health advanced preparation with course work in health information technology (HIT), individuals who earn the postbaccalaureate certificate in leadership in health information technology for health professionals will be able to lead the successful deployment and use of HIT to achieve transformational improvement in the quality, safety, outcomes, and thus in the value of health services.

Program Delivery
This program is available:
• primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Admittance to the program requires a baccalaureate degree from an accredited institution in a clinical or public health discipline. Example degrees would be a BS/BA in nursing or public health.

Preferred: Advanced degree in clinical or public health discipline from an accredited institution (nursing MS/DNP/PhD; public health MPH/MS/PhD; MS/PhD in other health-related field)

Other requirements to be completed before admission: Applicants must have clinical or public health experience. A minimum of two years of management experience is required if the applicant does not hold an advanced degree.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 587
• MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

3.0 GPA required.

Required Coursework
Take the following courses to meet the 16-credit minimum:
NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 5116 - Consumer Health Informatics (1.0 cr)
NURS 6105 - Systems Analysis and Design (3.0 cr)
NURS 7105 - Knowledge Representation and Interoperability (2.0 cr)
NURS 7108 - Population Health Informatics (2.0 cr)
NURS 7113 - Clinical Decision Support: Theory (2.0 cr)
HINF 5510 - Applied Health Care Databases: Database Principles and Data Evaluation (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 52
- This program requires summer semesters for timely completion.
- Degree: Master of Nursing

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of nursing degree (MN) is a full-time, 16-month, graduate-level program for students with a baccalaureate (or higher) degree in a non-nursing field. The program includes all the essentials of a bachelor of science in nursing (BSN) program, plus additional graduate work. Upon completion of the coursework, students are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN) and are also eligible for Public Health Nursing (PHN) certification in Minnesota. Traditional classroom formats are complemented by interactive components and web-based resources.

Accreditation
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Completion of a baccalaureate degree from an accredited institution in a non-nursing area of study completed no later than June 1 prior to start of fall semester for year admitted.

Other requirements to be completed before admission:
There are nine prerequisite courses to complete before the start of the master of nursing (MN) program: General Chemistry, Human Anatomy, Human Physiology, Microbiology, Pathology, Human Nutrition, Lifespan Growth and Development, Abnormal Psychology, Inferential Statistics.

Five courses must be complete, with final grades sent to the School of Nursing, by the application deadline. Students are recommended to make three of the five courses their science courses.

Special Application Requirements:
Prior to matriculation to the program, students must complete a Minnesota background check, immunizations, submit provider-level CPR verification, and meet the School of Nursing published technical standards. Application to the Master of Nursing program is available on the School of Nursing website. After a preliminary review of submitted materials, selected applicants are invited to participate in an interview with representatives of the admissions committee.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
- MELAB
Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 52 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: The capstone project is an examination of a clinical problem in the setting where students complete their final clinical rotation. It may also be a type of research experience or practicum with a School of Nursing faculty member.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students must maintain the compliance requirements (Minnesota background check, immunizations, provider-level CPR verification, and School of Nursing published technical standards) throughout the program.

Required Coursework

NURS 5029 - Introduction to Nursing Interventions (4.0 cr)
NURS 5030 - Foundational Concepts of Professional Nursing (3.0 cr)
NURS 5031 - Human Response to Health and Illness: Adults and Elders (4.0 cr)
NURS 5032 - Human Response to Health and Illness: Children and Childbearing Families (5.0 cr)
NURS 5033 - Population-Focused Health in Public Health and Mental Health Nursing (5.0 cr)
NURS 5034 - Transition to Professional Nursing Practice (3.0 cr)
NURS 5035 - Practicum Nursing Care for Complex Health Conditions (4.0 cr)
NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 5190 - Essentials of Holistic Health Assessment (3.0 cr)
NURS 5222 - Advanced Human Physiology (2.0 cr)
NURS 5241 - Nursing Leadership for Effective Practice (2.0 cr)
PHAR 5800 - Pharmacotherapy for the Health Professions (3.0 cr)
NURS 6200 - Science of Nursing Intervention (3.0 cr)
NURS 7202 - Moral and Ethical Positions and Actions in Nursing (2.0 cr)
NURS 7600 - Nursing Research and Evidence Based Practice (2.0 - 4.0 cr)
NURS 5226 - Advanced Human Pathophysiology (2.0 cr)

Program Sub-plans

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

- Requirements for this program are current for Fall 2018
- Length of program in credits: 23 to 37
- This program requires summer semesters for timely completion.
- Degree: Nurse Midwifery Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postgraduate certificate program in nurse midwifery offers students with a doctor of nursing practice (DNP) or other graduate degree in a clinical nursing specialty area the opportunity to complete an additional area of study. Completion of required coursework and practice hours provides eligibility to take certification examinations.

Accreditation
This program is accredited by American Midwifery Certification Board & Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A DNP or other accredited graduate degree in a clinical nursing specialty area is required for admission to this program.

Other requirements to be completed before admission:
All applicants must have a current registered nurse license.

Special Application Requirements:
Applicants are required to submit transcripts from all institutions where postsecondary credit was earned, reference materials containing an Admission Reference Form and personal letter of reference from two separate individuals, two essays, a current curriculum vitae/resume, a current registered nurse license, and English language proficiency scores (if applicable). Application deadlines for this certificate are a priority deadline of November 1, with rolling admissions on a space available basis until March 1.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
• MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Please contact the School of Nursing for detailed information about the requirements for this certificate. Each applicant's curriculum is unique and based on the applicant's previous DNP degree and coursework. Final coursework decisions are made by the faculty advisor. A 3.0 cumulative GPA is required.

Specialty Courses (23 Credits)
Complete the following required specialty courses for the certificate. Credit requirements for courses with variable credits: Take NURS 6305 for 3 credits; NURS 6308 for 2 credits; and NURS 6925 for 2 credits.

- NURS 6305 - Women's Reproductive Health Care (2.0 - 3.0 cr)
- NURS 6306 - Women's Reproductive Health Practicum (1.0 cr)
- NURS 6501 - Assessment and Management of Health for Advanced Practice Nurses, I (3.0 cr)
- NURS 6308 - Women's Primary Care Practicum (1.0 - 2.0 cr)
- NURS 6210 - Midwifery Care of the Childbearing Family (3.0 cr)
- NURS 6211 - Midwifery Care of the Childbearing Family Practicum (2.0 cr)
- NURS 6213 - Reproductive Healthcare for Women at Risk (2.0 cr)
- NURS 6214 - Reproductive Healthcare for Women at Risk Practicum (2.0 cr)
- NURS 7213 - Midwifery Clinical and Professional Integration (3.0 cr)
- NURS 6925 - Advanced Concepts in Women's Health Care I (1.0 - 3.0 cr)

Advanced Practice Registered Nurse Core Courses (0 to 12 Credits)
Completion of the following coursework is required for the post-graduate certificate program. Students who have not completed these courses or their equivalents prior to admission must do so to meet requirements. Consult with the Doctor of Nursing Practice Program Director to evaluate prior APRN coursework for equivalency. NURS 5229 must be taken for 3 credits.

- NURS 5200 - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
- NURS 5222 - Advanced Human Physiology (2.0 cr)
- NURS 5226 - Advanced Human Pathophysiology (2.0 cr)
- NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
- NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)

Labor and Delivery Competencies (2 Credits)
Students are required to complete NURS 5505 if they do not have labor and delivery experience as a registered nurse.

- NURS 5505 - Assessment and Support of Women in Labor (2.0 cr)
Twin Cities Campus

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 58 to 70
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The PhD program in nursing prepares scholars as scientists, leaders, innovators, and educators in nursing and health care who:
- Discover new knowledge for nursing science and health care practice through ethical, innovative, theory-based research;
- Integrate knowledge to influence health care delivery and policy through collaborative, interprofessional initiatives at organizational, local, state, regional, national, and global levels;
- Create and evaluate strategies to improve the health and well-being of individuals, families, communities, and populations; and
- Disseminate knowledge to those in nursing, other health sciences, policy makers, and the public through scholarly publication, formal teaching, and other creative venues.

Accreditation
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 156
  - General Test - Quantitative Reasoning: 146
  - General Test - Analytical Writing: 5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
- MELAB
  - Final score: 85

Key to test abbreviations (GRE, TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
34 to 46 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Core Coursework (26 credits)
All students take the following courses. Take NURS 8171 for 3 credits.
NURS 8180 - Doctoral Proseminar I: Scholarly Development (1.0 cr)
NURS 8175 - Quantitative Research Design and Methods (3.0 cr)
NURS 8172 - Theory and Theory Development for Research (3.0 cr)
NURS 8152 - Scholarship in Health Care Ethics (3.0 cr)
NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)
NURS 8177 - Advanced Nursing Research Practicum (2.0 cr)
NURS 8190 - Critical Review in Health Research (2.0 cr)
NURS 8121 - Health Behaviors and Illness Responses (3.0 cr)
NURS 8173 - Principles and Methods of Implementing Research (3.0 cr)
NURS 8134 - Interventions and Outcomes Research (3.0 cr)

Statistics (6 credits)
Select at least 6 statistics credits from the courses listed below, in consultation with the faculty advisor.
Biostatistics
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
or EPSY 8251 - Statistical Methods in Education I (3.0 cr)
EPSY 8252 - Statistical Methods in Education II (3.0 cr)

Thesis Credits
Take at least 24 doctoral thesis credits.
NURS 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Post-Master's- and Post-Baccalaureate-Entry Electives
The number of required elective credits is determined by the highest degree awarded prior to Nursing PhD enrollment. Note that the Master of Nursing degree does not qualify for Post-Master's-Entry status.

Post-Master's-Entry Electives (2 credits)
Take two or more credits from the following list, or select alternative courses, in consultation with the faculty advisor:
NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 5925 - Grant Writing and Critique (1.0 cr)
NURS 7600 - Nursing Research and Evidence Based Practice (2.0 - 4.0 cr)
NURS 6102 - Family Health Theory (2.0 cr)
NURS 7200 - Economics of Health Care (3.0 cr)
NURS 7300 - Program Planning and Evaluation (3.0 cr)
NURS 7900 - Scholarly Teaching and Learning in Nursing (3.0 cr)
NURS 7904 - Nursing Education Practicum (2.0 cr)
NURS 8195 - Mixed Methods in the Social, Behavioral, and Applied Health Sciences (3.0 cr)
NURS 8185 - Qualitative Data Analysis for Health Care Research (3.0 - 4.0 cr)
NURS 8179 - Biophysiological Measurement and Instrumentation in Clinical Research (3.0 cr)
NURS 8193 - Special Topics in Nursing Research (1.0 - 6.0 cr)
HINF 5430 - Foundations of Health Informatics I (3.0 cr)
HINF 5431 - Foundations of Health Informatics II (3.0 cr)
FSOS 8105 - Family Gerontology (3.0 cr)
GERO 5100 - Topics in Gerontology (0.5 - 4.0 cr)
GERO 5111 - Studying Aging and Chronic Illness (2.0 cr)
GERO 5125 - Gerontology Service Learning (3.0 cr)
GERO 8021 - Application of Proteomics to Aging (1.0 cr)
GERO 8022 - Fostering a Career in Aging Research (1.0 cr)
GERO 8023 - Aging Policy Seminar (2.0 cr)
PUBH 6904 - Nutrition and Aging (2.0 cr)
PUBH 8803 - Long-Term Care: Principles, Programs, and Policies (2.0 cr)
SW 5810 - Seminar: Special Topics (1.0 - 4.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6617 - Practical Methods for Secondary Data Analysis (3.0 cr)
PUBH 6810 - Survey Research Methods (3.0 cr)
PUBH 7250 - Designing and Conducting Focus Group Interviews (1.0 cr)
PUBH 7251 - Data Analysis From Focus Groups (1.0 cr)
EPSY 5245 - Advanced Survey Data Analysis for Categorical and Rating Scale Data (1.0 cr)
EPSY 8264 - Advanced Multiple Regression Analysis (3.0 cr)
EPSY 8265 - Factor Analysis (3.0 cr)
EPSY 8266 - Statistical Analysis Using Structural Equation Methods (3.0 cr)
EPSY 8268 - Hierarchical Linear Modeling in Educational Research (3.0 cr)

-OR-
Post-Baccalaureate-Entry Electives (14 credits)
Take 14 or more credits from the following list, or select alternative courses, in consultation with the faculty advisor:
NURS 5115 - Interprofessional Health Care Informatics (3.0 cr)
NURS 5925 - Grant Writing and Critique (1.0 cr)
NURS 7600 - Nursing Research and Evidence Based Practice (2.0 - 4.0 cr)
NURS 6102 - Family Health Theory (2.0 cr)
NURS 7200 - Economics of Health Care (3.0 cr)
NURS 7300 - Program Planning and Evaluation (3.0 cr)
NURS 7900 - Scholarly Teaching and Learning in Nursing (3.0 cr)
NURS 7904 - Nursing Education Practicum (2.0 cr)
NURS 8195 - Mixed Methods in the Social, Behavioral, and Applied Health Sciences (3.0 cr)
NURS 8185 - Qualitative Data Analysis for Health Care Research (3.0 - 4.0 cr)
NURS 8179 - Biophysiological Measurement and Instrumentation in Clinical Research (3.0 cr)
NURS 8193 - Special Topics in Nursing Research (1.0 - 6.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 17 to 29
- This program requires summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postgraduate certificate program in nursing offers students with a Doctor of Nursing Practice (DNP) or other graduate degree in a clinical nursing specialty area the opportunity to complete an additional area of study. Completion of required coursework and practice hours provides eligibility to take certification examinations.

Accreditation
This program is accredited by Commission on Collegiate Nursing Education (CCNE).

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A DNP or other accredited graduate degree in a clinical nursing specialty area is required for admission to this program.

Other requirements to be completed before admission:
All applicants must have a current registered nurse license.

Special Application Requirements:
Applicants are required to submit transcripts from all institutions where post-secondary credit was earned, reference materials containing an Admission Reference Form and personal letter of reference from two separate individuals, two essays, a current curriculum vitae/resume, a current registered nurse license, and English language proficiency scores (if applicable).

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Paper Based - Total Score: 586
- MELAB
  - Final score: 85

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Coursework (17 credits)
Take the following courses. Nurs 6921 must be completed for 2 credits.
   NURS 6920 - Primary Care: Assessment of Health and Care of Well Children (3.0 cr)
   NURS 6921 - Assessment of Health and Care of Well Children: Primary Care Practicum (1.0 - 2.0 cr)
   NURS 6922 - Primary Care: Assessment and Management of Common Conditions Affecting Children (3.0 cr)
   NURS 6923 - Primary Care Practicum: Assessment and Management of Common Conditions Affecting Children (2.0 cr)
   NURS 6924 - Assessment and Interventions for Children and Youth With Special Health Care Needs (2.0 cr)
   NURS 7925 - Systems of Care for Children and Youth With Special Health Care Needs Practicum (2.0 cr)
   NURS 7926 - Advanced Assessment, Intervention in Families of Children and Youth With Special Health Care Needs (2.0 cr)
   NURS 7927 - Adv Assessment, Intervention in Families of Children and Youth With Special Health Care Needs Prac (1.0 cr)

Advanced Practice Registered Nurse Core Courses (0 to 12 credits)
Completion of the following coursework is required for the post-graduate certificate program. Students who have not completed these courses or their equivalents prior to admission must do so to meet requirements. Consult with the Doctor of Nursing Practice Program Director to evaluate prior APRN coursework for equivalency. NURS 5229 must be taken for 3 credits.
   NURS 5200 - Advanced Holistic Health Assessment for the Advanced Practice Nurse (3.0 cr)
   NURS 5222 - Advanced Human Physiology (2.0 cr)
   NURS 5226 - Advanced Human Pathophysiology (2.0 cr)
   NURS 5228 - Pharmacology for Advanced Practice Nursing (2.0 cr)
   NURS 5229 - Clinical Pharmacotherapeutics (2.0 - 4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Experimental and Clinical Pharmacology (ECP) graduate program was designed specifically for students interested in clinical research. Its goal is to advance the science of human pharmacology and therapeutics to improve the safe, effective, and economical use of drugs by patients.

Students study such topics as experimental pharmacotherapy, drug metabolism, infectious disease, pharmacometrics, and pharmacogenomics. Graduates are prepared for distinguished careers in clinical research.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A U.S. bachelor's degree or a comparable foreign degree from a recognized college or university is required.

Preference is given to candidates who have had professionally-related pharmacy education, but those from other fields such as biology, chemistry, statistics, and public health will be considered.

Other requirements to be completed before admission:
GRE scores are required from non-U.S. Pharm.D. applicants. Foreign students may be required to have a phone interview. All international students who are non-English speakers are required to submit TOEFL scores. However, applicants who have completed 24 quarter credits or 16 semester credits within the past 24 months in residence as full-time students at recognized institutions of higher learning in the United States or other English-speaking countries before entering the University of Minnesota are generally exempted from this requirement.

Special Application Requirements:
Students are generally admitted to the ECP program for fall semester only. The application deadline is February 1. Applications received after February 1 will be considered on a space-available basis only.

Application to the ECP program at the University of Minnesota is done entirely online through ApplyYourself. A supplemental departmental application form is also required. Applicants should upload it directly to the ApplyYourself system.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 24 major credits and 6 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are not admitted directly to the MS program. See the Medicinal Chemistry PhD or contact the director of graduate studies for more information.

The medicinal chemistry program emphasizes the application of chemical principles to research on the action of drugs on biological systems. Courses offered by the program focus on general principles of medicinal chemistry, drug design and synthesis, chemical aspects of drug metabolism, chemical mechanisms of drug toxicity and carcinogenicity, computer-assisted drug design and receptor modeling, and combinatorial chemistry.

Students must complete a core curriculum of advanced courses in organic and medicinal chemistry, as well as credits in a minor or related field.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Note: Students are not admitted directly to the M.S. program. See the Medicinal Chemistry Ph.D.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students complete a 14-credit core curriculum of advanced courses in organic chemistry and medicinal chemistry. In addition, students take 6 credits of coursework, chosen in consultation with the advisor, which supports the course of study.
Required Courses
MEDC 8001 - General Principles of Medicinal Chemistry (3.0 cr)
MEDC 8002 - General Principles of Medicinal Chemistry (3.0 cr)
MEDC 8050 - Physical and Mechanistic Organic Chemistry (2.0 cr)
MEDC 8100 - Medicinal Chemistry Seminar (1.0 cr)
MEDC 8435 - BioAssay & Data Analysis (1.0 cr)
CHEM 8321 - Organic Synthesis (4.0 cr)

Additional Courses
Take at least 1 course from the following list. Choose remaining coursework to meet the 6-credit minimum in consultation with the advisor.
MEDC 5185 - Principles of Biomolecular Simulation (3.0 cr)
MEDC 5494 - Advanced Methods in Quantitative Drug Analysis (2.0 cr)
MEDC 8500 - Design of Chemotherapeutic Agents (2.0 cr)
MEDC 8753 - MOLECULAR TARGETS OF DRUG DISCOVERY (3.0 cr)
MEDC 8420 - Natural Products Chemistry (3.0 cr)
MEDC 8471 - High Throughput Drug Discovery (3.0 cr)
MEDC 8413 - Chemistry of Nucleic Acids (4.0 cr)
MEDC 8700 - Advanced Concepts in Drug Design (2.0 cr)

Thesis Credits
Take at least 10 masters thesis credits.
MEDC 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
Twin Cities Campus
Medicinal Chemistry Ph.D.
Graduate Studies in Medicinal Chemistry
College of Pharmacy

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program in medicinal chemistry emphasizes the application of chemical principles to research on the action of drugs on biological systems. Courses offered by the program focus on general principles of medicinal chemistry, drug design and synthesis, chemical aspects of drug metabolism, chemical mechanisms of drug toxicity and carcinogenicity, computer-assisted drug design and receptor modeling, and combinatorial chemistry.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants should have a BS or MS degree in an appropriate related science field such as pharmacy, chemistry, or biology. Students majoring in other degree programs that encompass chemical, biochemical, or biological fields of study are also encouraged to apply. All applicants should have completed undergraduate chemistry through elementary organic chemistry. Undergraduate coursework in biochemistry and physical chemistry is also a prerequisite, but under certain circumstances such coursework may be taken during the first year. Students may apply for admission to the PhD program only and are only admitted fall semester.

Special Application Requirements:
Scores from the General (Aptitude) Test of the GRE, three letters of recommendation from college-level faculty, a complete set of official transcripts, and a statement of immediate and long range career objectives are required. All application materials should be submitted by the admissions deadline listed on the departmental website in order to be considered for fellowship, teaching, and research assistantships awarded in the next academic year.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 95

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
24 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Required Courses (15 credits)
- MEDC 8001 - General Principles of Medicinal Chemistry (3.0 cr)
- MEDC 8002 - General Principles of Medicinal Chemistry (3.0 cr)
- MEDC 8050 - Physical and Mechanistic Organic Chemistry (2.0 cr)
- MEDC 8435 - BioAssay & Data Analysis (1.0 cr)
- MEDC 8100 - Medicinal Chemistry Seminar (1.0 cr)
- CHEM 8066 - Professional Conduct of Chemical Research (1.0 cr)
- CHEM 8321 - Organic Synthesis (4.0 cr)

Biochemistry Requirement (2 to 4 credits)
Take at least one of the following courses or select a different course in consultation with the advisor and director of graduate studies.
- BIOC 8005 - Biochemistry: Structure and Catalysis (2.0 cr)
- BIOC 8006 - Biochemistry: Metabolism and Control (2.0 cr)
- GCD 8151 - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
- CHEM 8411 - Introduction to Chemical Biology (4.0 cr)

Additional Course Requirements
Take three additional courses, two of which must be from the following list, to complete the 24 course-credit requirement.
- MEDC 5185 - Principles of Biomolecular Simulation (3.0 cr)
- MEDC 5494 - Advanced Methods in Quantitative Drug Analysis (2.0 cr)
- MEDC 8070 - The Chemistry and Biology of Infectious Diseases (3.0 cr)
- MEDC 8420 - Natural Products Chemistry (3.0 cr)
- MEDC 8471 - High Throughput Drug Discovery (3.0 cr)
- MEDC 8413 - Chemistry of Nucleic Acids (4.0 cr)
- MEDC 8461 - Design of Cancer Therapeutics (3.0 cr)
- MEDC 8753 - MOLECULAR TARGETS OF DRUG DISCOVERY (3.0 cr)
- CHEM 8322 - Advanced Organic Chemistry (4.0 cr)

Thesis Credits
Take at least 24 doctoral thesis credits.
- MEDC 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Pharmaceutics M.S.
College of Pharmacy

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Entry to the MS program is available on a restricted basis. Please contact the director of graduate studies to obtain details about admission.

The Pharmaceutics program offers emphases in physical pharmacy, biopharmaceutics, and pharmacokinetics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

Other requirements to be completed before admission:
Undergraduate (and graduate, if applicable) scholastic records, recent GRE scores (with a preferred minimum 80% quantitative reasoning score and 3.5 analytical writing score), a statement of career goals and research interests, and three letters of recommendation.

International applicants must submit results from the TOEFL (with a preferred minimum 100 total score and 23 speaking score, and a required minimum 21 writing score and 19 reading score) or IELTS (with a required minimum 6.5 total score, 6.5 reading score, and 6.5 writing score). Prefer "First Class" or the equivalent on transcripts from foreign institutions.

All of the above are collectively used to determine each candidate's admissibility. Fall admission is preferred and the deadline to apply is November 30.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
- IELTS

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

**Required Courses**

**Pharmaceutics Modules**
- Register for 2 credits of PHM 8295 in the fall and spring for a total of 4 credits.
- PHM 8295 - Research Problems in Pharmaceutics (1.0 - 12.0 cr)

**Pharmaceutics Graduate Courses: 84xx**
- Choose 1 of the following courses:
  - PHM 8421 - Advanced Pharmacokinetics (4.0 cr)
  - PHM 8431 - Controlled Drug and Gene Delivery: Materials, Mechanisms, and Models (4.0 cr)
  - PHM 8441 - Solubility and Solid-State Properties of Drugs (3.0 cr)
  - PHM 8481 - Advanced Neuropharmaceutics (4.0 cr)

**Required Background**
- Complete this requirement by taking one of the following courses. If PHAR 6726 or 6762 is chosen, or if the faculty accepts previous experience in lieu of background courses, additional elective coursework may be required to meet minimum credit requirements.
  - PHCL 5110 - Introduction to Pharmacology (3.0 cr)
  - PHAR 6726 - Principles of Pharmacology (2.3 cr)
  - PHAR 6762 - Medicinal Chemistry and Neuropharmacology (2.8 cr)

**Electives**
- Take at least 3 elective credits, in consultation with the advisor, to meet minimum credit requirements. Electives can be from inside or outside the major.

**Outside Courses**
- Take at least 6 credits outside the major, in consultation with the advisor.

**Thesis Credits**
- A total of 10 thesis credits is required.
- PHM 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The pharmaceutics program offers emphases in physical pharmacy, biopharmaceutics, and pharmacokinetics.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Doctoral
The doctoral minor requires a minimum of 12 credits in PHM 8xxx or PHAR 6xxx courses, approved by the pharmaceutics director of graduate studies.

Masters
The master's minor requires a minimum of 6 credits in PHM 8xxx or PHAR 6xxx courses, approved by the pharmaceutics director of graduate studies.

- Requirements for this program are current for Fall 2018
- Length of program in credits: 48
- This program requires summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The pharmaceutics program offers emphases in physical pharmacy, biopharmaceutics, and pharmacokinetics. Minor fields of particular value include biochemistry, biomedical engineering, biometry, chemistry, chemical engineering, mechanical engineering, molecular biology, pharmacology, and statistics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

Other requirements to be completed before admission:
Undergraduate (and graduate, if applicable) scholastic records, recent GRE scores (with a preferred minimum 80% quantitative reasoning score and 3.5 analytical writing score), a statement of career goals and research interests, and three letters of recommendation.

International applicants must submit results from the TOEFL (with a preferred minimum 100 total score and 23 speaking score, and a required minimum 21 writing score and 19 reading score) or IELTS (with a required minimum 6.5 total score, 6.5 reading score, and 6.5 writing score). Prefer “First Class” or the equivalent on transcripts from foreign institutions.

All of the above are collectively used to determine each candidate's admissibility. Fall admission is preferred and the deadline to apply is November 30.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
- IELTS

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
16 credits are required in the major.
8 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Successful completion of program examinations and timely progress towards the degree are also required for students to remain in good standing.

Required Courses

Pharmaceutics Modules
Register for 2 credits in fall and 2 credits in spring for a total of 4 credits.
PHM 8295 - Research Problems in Pharmaceutics (1.0 - 12.0 cr)

Pharmaceutics Seminar
Register for 1 credit each semester in which presenting a seminar, for a total of 3 credits.
PHM 8100 - Seminar: Pharmaceutics (1.0 cr)

Pharmaceutics Graduate Courses: 81xx
Take two courses for a total of 2 credits from the following list:
PHM 8110 - Readings in Pharmaceutics (1.0 cr)
or
PHM 8120 - Readings in Central Nervous System (CNS) Drug Delivery (1.0 cr)
or
PHM 8150 - Pharmacokinetics Research Seminar (1.0 cr)

Pharmaceutics Graduate Courses: 84xx
Choose two courses from the following list for at least 7 credits:
PHM 8421 - Advanced Pharmacokinetics (4.0 cr)
or
PHM 8431 - Controlled Drug and Gene Delivery: Materials, Mechanisms, and Models (4.0 cr)
or
PHM 8441 - Solubility and Solid-State Properties of Drugs (3.0 cr)
or
PHM 8481 - Advanced Neuropharmaceutics (4.0 cr)

Required Background
Equivalent coursework or previous experience, with approval of the program faculty, may be substituted for some or all of the following courses:

Pharmacy Background
PHCL 5110 - Introduction to Pharmacology (3.0 cr)
or
PHAR 6726 - Principles of Pharmacology (2.3 cr)
or
PHAR 6762 - Medicinal Chemistry and Neuropharmacology (2.8 cr)

Math Background
MATH 4512 - Differential Equations with Applications (3.0 cr)

Statistics Background
PUBH 6450 - Biostatistics I (4.0 cr)
or
STAT 5021 - Statistical Analysis (4.0 cr)
or
Take exactly 2 course(s) from the following:
• STAT 5101 - Theory of Statistics I (4.0 cr)
or
• STAT 5102 - Theory of Statistics II (4.0 cr)
or
Take exactly 3 course(s) from the following:
• STAT 5302 - Applied Regression Analysis (4.0 cr)
or
• STAT 5303 - Designing Experiments (4.0 cr)
or
• STAT 5401 - Applied Multivariate Methods (3.0 cr)

Outside Coursework Requirement
Take at least 8 credits of coursework outside the major, which can include non-PHAR- and non-PHM-designated courses taken to satisfy the background requirement. All courses must be selected in consultation with the advisor.

Thesis Credits
Take at least 24 doctoral thesis credits.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30 to 32
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Study within the Social and Administrative Pharmacy Program is tailored carefully to the specific needs and objectives of the student. It is a flexible, interdisciplinary program which utilizes all resources of the University's many outstanding departments in an effort to provide the student with knowledge and experience in areas she/he feels are applicable to the resolution of pharmacy-oriented problems.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Although the majority of students in the program are pharmacists, a pharmacy education is not required. A bachelor's degree or its foreign equivalent from a recognized college of pharmacy and a strong scholastic record are desirable. Individuals from other fields such as economics, engineering, computer science, medicine, psychology, sociology, or public health may be admitted if their undergraduate coursework satisfies the prerequisites for graduate coursework.

Special Application Requirements:
Applicants must complete a supplementary application form in addition to the University application. The supplementary form along with three letters of recommendation should be uploaded to the University Apply Yourself application. GRE scores are required and a performance level of 580 (158 for November 1, 2011-June 30, 2012) is preferred on the TOEFL for all international applicants whose native language is not English.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Program Requirements

**Plan A:** Plan A requires 16 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 16 major credits and 6 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** The balance of coursework taken to meet the 30-credit minimum (8 credits in addition to the 16 major field credits and 6 minor or related field credits) is determined by agreement between the student and adviser.

Plan B also requires two papers of publishable quality; one paper must include a research component with an analysis of data.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students in the Social and Administrative Pharmacy Program are prepared for research and related activities investigating relationships between biological and physical factors in social settings that involve the drug use process. The flexible interdisciplinary program uses the resources of the many health and social science departments at the University, and may include courses and offerings from public health, geriatrics, management, sociology, psychology, and public affairs.

The program focuses on the discovery and dissemination of new knowledge to foster appropriate use of drugs to improve patient outcomes at the individual and societal level. Students are educated and mentored to become professional scientists. Those who complete the program will understand the process of conducting high quality research and problem solving through the application of disciplinary and interdisciplinary knowledge, theory, and research methodology.

Social and administrative pharmacy (SAPH) is the application of behavior-oriented interdisciplinary theories to pharmacy problem solving and pharmacy system development. This includes the study of the social, psychosocial, political, legal, public policy, historic, and economic factors that impinge upon the use, non-use, and abuse of drugs.

Program Delivery
This program is available:

- Length of program in credits: 13
- This program requires summer semesters for timely completion.
- Degree: Adv Mgmt Training for Clin Leaders PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

NOTE: Applications to the Advanced Management Training for Clinician Leaders Certificate program are not being accepted at this time. For more information, please contact sph-ask@umn.edu.

The Regents Certificate in Advanced Management Training for Clinician Leaders is intended for clinicians employed by integrated health systems who will take on critical and expanded roles as executives and managers. This one-year course of study will prepare clinician leaders for successful innovation in emerging forms of healthcare organizations, bring new healthcare leaders with clinical backgrounds into network relationships with other administrators, and consider new approaches to strategy and success in healthcare that are specific to integrated systems.

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have at least two years experience in a US-based healthcare organization that either has developed or is considering integrated system relationships. International applications will be considered on a case-by-case basis with special attention paid to the nature and structure of their employing organizations.

Special Application Requirements:
NOTE: Applications to the Advanced Management Training for Clinician Leaders Certificate program are not being accepted at this time. For more information, please contact sph-ask@umn.edu.
Applicants must submit a letter of intent describing career interests and the relevance of the certificate to the applicant's personal development. One letter of recommendation from a person qualified to assess the applicant's academic work; clinical, public health or professional experience; or leadership potential in integrated health systems is required.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

The certificate is build on a cohort model and comprises 13 credits: five 2-credit courses, one 1-credit face-to-face course and a 2-credit face-to-face practicum. Students will be required to attend on-campus sessions twice during the program. The first on-campus session will be four days in length, during which students will complete a 1-credit course, PUBH 7571. The second session will be held at the end of the program over three days, during which students will present their capstone projects.

Requirements
The certificate requires 13 total credits. PUBH 7571, PUBH 7572, along with four brand-new courses and a practicum/capstone project (each offered as topics courses via PUBH 6570) make up the requirements for the program. Students complete PUBH 7571 while on campus during for four days at the start of the program, and will complete five courses online during the remaining 12 months. Students will present their capstone projects completed for the practicum during their final three days on campus.

PUBH 7572 - Health Care Strategies in Competitive Markets (2.0 cr)
PUBH 6570 - Healthcare Administration (1.0 - 4.0 cr)

- Degree: Aging Studies PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

NOTE: Applications to the Aging Certificate program are not being accepted at this time. For more information, please contact sph-ask@umn.edu. The Certificate on Aging is a 12-credit graduate level program with some course offerings available online, as well as in a face-to-face format. The certificate is designed to increase knowledge and understanding in the multifaceted field of human aging. This interdisciplinary program provides students with the background and confidence necessary to meet the challenges of serving the aging population. The courses are offered through the Center on Aging within the Division of Health Policy and Management.

Aging studies at the University of Minnesota involves an interdisciplinary approach to gerontology for those individuals who hold at least a bachelor's degree. The interdisciplinary nature of the program embraces different backgrounds and interests, and is suitable for graduates from any major.

The primary purpose of aging studies is to prepare professionals for work in programs, businesses, organizations, and agencies that address the needs of an aging population. Examples include the following: hospitals, long-term care facilities, education, clinics, home health care agencies, hospice and end-of-life care organizations, insurance groups, counseling and social services, physician groups, financial planning, architecture and design, public policy makers, and nursing.

Accreditation
This program is accredited by CEPH

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
NOTE: Applications to the Aging Certificate program are not being accepted at this time. For more information, please contact sph-ask@umn.edu. Students who have completed 16-semester credits/24-quarter credits (within the past 24 months) in an academic program in a recognized institution of higher learning in the U.S. do not need to submit the TOEFL as part of the application process.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This online certificate program is designed for working biostatisticians, such as data managers and analysts, who are not formally trained and want to improve their technical, mathematical, and computational skills.

The program will enhance your understanding of database management and investigation, alert you to key variables and trends, help you judge the statistical significance, and improve your overall data evaluation and programming skills. You'll learn key aspects of study design, implementation, and analysis for both observational and clinical studies.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH)

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission preferences and prerequisites:
- Applicants must hold a baccalaureate degree.
- Applicant should demonstrate strong written skills.
- The admissions committee looks closely at the applicant's work experience and grades in math and science.

Special Application Requirements:
Applicants must submit to SOPHAS Express, a centralized online application service:
- Completed SOPHAS Express application and application fee, designating the University of Minnesota School of Public Health
- Personal statement describing the applicant's reason for applying, career goals, and how the certificate will help them achieve their goals
- One letter of recommendation
- Unofficial transcripts of record from each college/university where a degree was earned. (If admitted, official transcripts will need to be sent directly to the School of Public Health.)
- Resume or C.V.

For detailed application requirements and instructions visit www.sph.umn.edu.

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 100
- Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

**Required Coursework (15 credits)**

Take the following courses, offered online throughout the calendar year, for 14 credits.

- **PUBH 6450** - Biostatistics I (4.0 cr)
- **PUBH 6451** - Biostatistics II (4.0 cr)
- **PUBH 6320** - Fundamentals of Epidemiology (3.0 cr)
- **PUBH 7415** - Introduction to Clinical Trials (3.0 cr)

Take one of the following 1-credit, in-class courses through the summer School of Public Health Institute to complete the 15-credit requirement.

- **PUBH 6431** - Topics in Hierarchical Bayesian Analysis (1.0 cr)
- or **PUBH 6432** - Biostatistical Methods in Translational and Clinical Research (1.0 cr)

Contact Information:
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street S.E., Minneapolis, MN 55455 (612-626-3500 or 1-800-774-8636; fax: 612-624-4498)
Email: sph-ask@umn.edu
Website: http://www.sph.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 42
- This program requires summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

A biostatistician is an important member of many research teams. Working in close partnership with researchers across a wide array of scientific disciplines, a biostatistician designs studies and develops statistical tools to extract meaning from complex data.

The Biostatistics M.P.H. program requires that students meet core competencies in seven core public health areas, including administration, behavioral science, biostatistics, environmental health, foundations, epidemiology, and ethics.

The M.P.H. program also requires students to complete an Applied Practice Experience, in addition to an Integrative Learning Experience.

Accreditation
This program is accredited by CEPH (Council on Education for Public Health).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
The admissions committee reviews applicants according to their record of academic achievement, demonstrated academic potential, letters of recommendation, background and experience, and other factors. GPAs and standardized test scores provide competitive points of reference for admission but are not alone decisive in the admissions review.

Prospective applicants should have taken at least:
- Three semesters of calculus (including multivariable calculus)
- One semester of linear algebra

Experience with a programming language (eg. Java, C, Python) is helpful, but not required.

Preferred GRE performance expectations (test taken post-August 2011): 150 Verbal; 146 Quantitative

Special Application Requirements:
International applicants who have attended post-secondary institutions outside of the U.S. are also required to submit the following supporting documentation to SOPHAS.

World Education Services (WES) evaluation of foreign academic credentials. The University of Minnesota School of Public Health requires all applicants with foreign academic credentials to provide a WES course-by-course evaluation of those credentials.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Note: Applicants with transcripts from Canadian schools are exempt from this requirement. Instead, applicants should have copies of their Canadian transcripts sent directly to SOPHAS.

Through special arrangements with SOPHAS, WES will deliver its credential evaluation report directly to SOPHAS by secure electronic transmission. This expedites the delivery of the evaluation report as well as images of the applicant's verified transcripts to SOPHAS and allows SOPHAS to process the report most efficiently. Go to http://www.wes.org/sophas for more information.

Note: Once WES receives the required documentation, it can complete an evaluation in seven business days or less, depending on the type of service requested. However, if additional research, correspondence, or verification is required, the evaluation will take longer. Students are recommended to start the process at least six weeks prior to the program deadline to ensure that their WES evaluation reports are complete by the deadline.

Proof of English Proficiency
Applicants whose native language is not English, or whose academic study was done exclusively at non-English speaking institutions, must prove English proficiency by providing either official Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Official report of the scores should be sent directly to SOPHAS using designation code 5688 for the TOEFL or designation code SOPHAS for the IELTS.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 146
  - General Test - Analytical Writing: 4
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 42 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: Integrative Learning Experience (ILE)
This program may be completed with a minor.
Use of 4xxx courses towards program requirements is not permitted.
A minimum GPA of 3.00 is required for students to remain in good standing.
At least 2 semesters must be completed before filing a Degree Program Form.

The Integrative Learning Experience (ILE) demonstrates the student’s familiarity with the tools of research or scholarship in the program, the capacity to work independently, and the ability to present the results of the investigation effectively. The ILE should involve a combined total of 120 hours of work.

MPH Core Curriculum (12 Credits)
Take the following courses for a total of 12 credits:
- Administration
  - PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- Foundations of Social and Behavioral Science
  - PUBH 6020 - Fundamentals of Social and Behavioral Science (2.0 cr)
- Environmental Health
Biostatistics Required Courses (22 Credits)
Take the following courses for a total of 22 credits:

- PUBH 7405 - Biostatistics: Regression (4.0 cr)
- PUBH 7406 - Advanced Regression and Design (4.0 cr)
- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- PUBH 7450 - Survival Analysis (3.0 cr)
- STAT 5101 - Theory of Statistics I (4.0 cr)
- STAT 5102 - Theory of Statistics II (4.0 cr)

Applied Practice Experience (1 Credit)
Take at least 1 credit of PubH 7494.

- PUBH 7494 - Integrative Learning Experience: Biostatistics (1.0 - 3.0 cr)

Integrative Learning Experience (1 Credit)
Take the following ILE course:

- PUBH 7496 - Applied Practice Experience: Biostatistics (1.0 cr)

Electives (6 Credits)
Take at least 6 elective credits, selected in consultation with the advisor, to meet the 42-credit minimum. Electives can be from the areas of public health, statistics, or biostatistics.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Public Health Policy Interdisciplinary Concentration Area
The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care.

PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- Understanding community dynamics
- Developing advocacy skills for public health
- Analyzing legal and policy structures
- Evaluating and implementing policies and programs
- Influencing community health
- Motivating and educating stakeholders and decision-makers
- Using policy as prevention strategy
- Eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- Program Type: Master's  
- Requirements for this program are current for Fall 2018  
- Length of program in credits: 30 to 31  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

A biostatistician is an important member of many research teams. Working in close partnership with researchers across a wide array of scientific disciplines, a biostatistician designs studies and develops statistical tools to extract meaning from complex data.

With an MS in biostatistics, you'll collaborate in the design of biomedical studies, analyze data, and put the results in context for researchers. You'll need mathematical, computational, and communication skills, as well as a curiosity about science.

Program Delivery  
This program is available:  
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission  
The preferred undergraduate GPA for admittance to the program is 3.10.

Other requirements to be completed before admission:  
For the MS, prospective applicants should have taken at least three semesters of calculus (including multivariable calculus) and one semester of linear algebra. A year (two semesters) of coursework in undergraduate-level probability and mathematical statistics is recommended. Experience with a programming language (e.g., R, Java, C, Python) and exposure to applied statistics is helpful, but not required.

Special Application Requirements:  
Students should apply for admission during fall semester only. New students are not admitted in spring semester.

Applicants must submit their test score(s) from the following:  
• GRE  
  - General Test - Verbal Reasoning: 150  
  - General Test - Quantitative Reasoning: 146  
  - General Test - Analytical Writing: 4.5

International applicants must submit score(s) from one of the following tests:  
• TOEFL  
  - Internet Based - Total Score: 100  
  - Paper Based - Total Score: 600  
• IELTS  
  - Total Score: 7  
• MELAB  
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 31 major credits and up to null credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

A comprehensive written exam is taken after year 1 spring semester final examinations.

An advanced background in mathematics or theoretical statistics is necessary for the Plan A (thesis) option. Students considering the Plan A must first consult with the advisor and director of graduate studies.

Coursework (31 Credits)
Plan B students take the following courses for at least 31 credits. Plan A students select at least 20 credits from the following in consultation with the advisor and director of graduate studies.

**Biostatistics Electives**
Take at least 8 Biostatistics elective credits from the following:
- GEOG 5561 - Principles of Geographic Information Science (4.0 cr)
- GIS 5571 - ArcGIS I (3.0 cr)
- MATH 5615H - Honors: Introduction to Analysis I (4.0 cr)
- MATH 5616H - Honors: Introduction to Analysis II (4.0 cr)
- PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
- PUBH 7435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
- PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)
- PUBH 7445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
- PUBH 7460 - Advanced Statistical Computing (3.0 cr)
- PUBH 7461 - Exploring and Visualizing Data in R (2.0 cr)
- PUBH 7462 - Advanced Programming and Data Analysis in R (2.0 cr)
- PUBH 7465 - Biostatistics Consulting (3.0 cr)
- PUBH 7470 - Statistics for Translational and Clinical Research (3.0 cr)
- PUBH 7475 - Statistical Learning and Data Mining (3.0 cr)
- PUBH 7485 - Methods for Causal Inference (3.0 cr)
- PUBH 8422 - Modern Nonparametrics (3.0 cr)
- PUBH 8435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
- PUBH 8472 - Spatial Biostatistics (3.0 cr)
- PUBH 8475 - Statistical Learning and Data Mining (3.0 cr)
- STAT 5401 - Applied Multivariate Methods (3.0 cr)
- STAT 5601 - Nonparametric Methods (3.0 cr)
- WRIT 5051 - Graduate Research Writing for International Students (3.0 cr)
- WRIT 5052 - Graduate Research Presentations and Conference Writing for Non-Native Speakers of English (3.0 cr)

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 12 to 14
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor in Biostatistics is designed to familiarize students with the statistical tools necessary to analyze health science data. By taking public health courses focused on the fundamentals of statistical methodologies and programming techniques, students will gain skills that enable them to be involved in the design and analysis of quantitative studies as part of their future professional career or graduate study in an applied field.

Minors are available for both University of Minnesota masters and doctoral level students.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Admission to the biostatistics graduate minor is contingent upon prior admission to a master's or doctoral degree-granting program.

Students should first consult with their adviser about declaring the minor in biostatistics. Students will then need to contact the director of graduate studies (DGS) at bstgdg@umn.edu or graduate program coordinator (GPC) for minor information. A biostatistics faculty member must be on the student's doctoral preliminary oral examination committee as well as master's and doctoral final oral examination committees.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Master's-level minor in Biostatistics
NOTE: One course may be taken S/N and all other courses must be taken A/F
Take 2 or more course(s) from the following:
• PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
Doctoral Minor

14 credits are required for doctoral minor for non-statistics students. 12 credits required for doctoral minor for statistics students.

Doctoral-level minor in Biostatistics for Non-Statistics Students

Students should take the required set of two core courses (either 7405 and 7406, or 7401 and 7402) first, before choosing two additional courses from the list of elective courses below.

NOTE: One course may be taken S/N and all other courses must be taken A/F

Biostatistics Core

Biostat Core Option 1
- PUBH 7405 - Biostatistics: Regression (4.0 cr)
- PUBH 7406 - Advanced Regression and Design (4.0 cr)

Biostat Core Option 2
- PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
- PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)

Electives
Take 2 or more course(s) totaling 6 or more credit(s) from the following:
- PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
- PUBH 7435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
- PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)
- PUBH 7445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
- PUBH 7450 - Survival Analysis (3.0 cr)
- PUBH 7470 - Statistics for Translational and Clinical Research (3.0 cr)
- PUBH 7475 - Statistical Learning and Data Mining (3.0 cr)
- PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
  or PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)

-OR-

Doctoral-level minor Biostatistics for Statistics Students

NOTE: One course may be taken S/N and all other courses must be taken A/F

- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- PUBH 7450 - Survival Analysis (3.0 cr)

Take 2 or more course(s) totaling 6 or more credit(s) from the following:
- PUBH 8422 - Modern Nonparametrics (3.0 cr)
- PUBH 8442 - Bayesian Decision Theory and Data Analysis (3.0 cr)
- PUBH 8452 - Advanced Longitudinal Data Analysis (3.0 cr)
- PUBH 8462 - Advanced Survival Analysis (3.0 cr)
- PUBH 8472 - Spatial Biostatistics (3.0 cr)
- PUBH 8482 - Sequential and Adaptive Methods for Clinical Trials (3.0 cr)
Twin Cities Campus

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 59 to 67
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

A biostatistician is an important part of many research teams. Working in close partnership with researchers across a wide array of scientific disciplines, a biostatistician designs studies and develops statistical tools to extract meaning from complex data.

With a biostatistics PhD, you'll conduct original research, collaborate and consult with biomedical researchers, implement and disseminate results of this research, and teach and mentor others in this field.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.70.

Other requirements to be completed before admission:
At least three semesters of calculus (including multivariable) and one semester of linear algebra, and two semesters of undergraduate courses in probability and mathematical statistics are strongly recommended. Real analysis or an equivalent is recommended. Experience with programming language (e.g., R, Java, C) and exposure to applied statistics is helpful, but not required.

In addition to completing the SOPHAS application, applicants must submit the following directly to SOPHAS:
- Statement of purpose and objectives (an essay describing past education, experience, and current professional career objectives)
- Résumé or curriculum vitae
- Official postsecondary transcripts from all institutions attended, including previous study at the University of Minnesota (have transcripts sent directly from the institutions to SOPHAS)
- Three letters of recommendation from persons qualified to assess academic work; clinical, public health, or professional experience; and leadership potential

Special Application Requirements:
All admitted international Ph.D. applicants are required to provide a World Education Services (WES) document verification report prior to beginning the program.

Proof of English Proficiency
Applicants whose native language is not English, or whose academic study was done exclusively at non-English speaking institutions, must prove English proficiency by providing either official Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. Official report of the scores should be sent directly to SOPHAS using designation code 5688 for the TOEFL or designation code SOPHAS for the IELTS. Scores must be less than two years old. The preferred minimum English language test scores for admission to the School of Public Health are listed below.

The English Language test requirement may be waived if an applicant can provide proof of one of the following:
- Completion of 16 semester credits/24 quarter credits (within the past 24 months) in an academic program at a recognized institution of
higher learning in the U.S. or Canada.
- An Educational Commission for Foreign Medical Graduates (ECFMG) certificate. Students should have an official or attested copy sent directly to the University of Minnesota School of Public Health at the address listed above.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 146

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
35 to 43 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.3 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

This program takes approximately 45 years. Coursework during the first 23 years provides a foundation in statistical theory, methods, and applied data analysis. Written exams are completed after the first and after the second year (after the first year for students entering with a masters degree). The dissertation is completed during years 45. Most students also work on several collaborative research projects during their training.

The PhD program usually requires three years of full-time study after the MS degree. Students entering the PhD program without an MS degree in mathematics or statistics will be required to take additional core coursework.

Required Coursework
Core Coursework
All students take the following 20 credits of core coursework:
- PUBH 8401 - Linear Models (4.0 cr)
- PUBH 8403 - Research Skills in Biostatistics (1.0 cr)
- PUBH 8412 - Advanced Statistical Inference (3.0 cr)
- PUBH 8432 - Probability Models for Biostatistics (3.0 cr)
- PUBH 8442 - Bayesian Decision Theory and Data Analysis (3.0 cr)
- STAT 8101 - Theory of Statistics 1 (3.0 cr)
- STAT 8102 - Theory of Statistics 2 (3.0 cr)

Elective Coursework
All students take at least 3 elective courses for a total of 9 or more credits from the following biostatistics and statistics course lists. Courses are selected in consultation with the advisor.

Biostatistics Elective Courses
- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- PUBH 7465 - Biostatistics Consulting (3.0 cr)
- PUBH 8422 - Modern Nonparametrics (3.0 cr)
- PUBH 8435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
- PUBH 8445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
or PUBH 8446 - Advanced Statistical Genetics and Genomics (3.0 cr)
or PUBH 8452 - Advanced Longitudinal Data Analysis (3.0 cr)
or PUBH 8462 - Advanced Survival Analysis (3.0 cr)
or PUBH 8472 - Spatial Biostatistics (3.0 cr)
or PUBH 8482 - Sequential and Adaptive Methods for Clinical Trials (3.0 cr)
or PUBH 8492 - Theories of Hierarchical and Other Richly Parametrized Linear Models (3.0 cr)
or PUBH 8475 - Statistical Learning and Data Mining (3.0 cr)
or PUBH 8485 - Methods for Causal Inference (3.0 cr)

or Statistics Elective Course
Students may select, in consultation with the advisor, an 8xxx-level course offered by the School of Statistics that is not among the core courses listed above.

or Biostatistics Topics Course
Students may select, in consultation with the advisor, any PUBH 84xx biostatistics topic course that is not among the core courses listed above.

Survival Analysis Course
Take PUBH 7450 as early as possible during the PhD program. Students who have taken a course equivalent to PUBH 7450 should confer with their advisor regarding a substitute course.

PUBH 7450 - Survival Analysis (3.0 cr)

Health Science Elective
Three public health course credits are required. PUBH 6250 is required and counts towards a portion of the three credit requirement. Students need at least one more credit from PUBH 6xx, 7xx, or 8xx level courses offered by other divisions in the SPH or other Academic Health Center Programs.
PUBH 6250 - Foundations of Public Health (2.0 cr)
PUBH 6xx
PUBH 7xx
PUBH 8xx

Thesis Credits
Take at least 24 doctoral thesis credits.
PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Curriculum for students without an MS in mathematics or statistics
Students without the MS in mathematics or statistics must take two additional core courses. Students also are strongly recommended to gain more background in real analysis by taking MATH 4603, Advanced Calculus I, in the fall of their first year. Students with a prior analysis course may choose instead, but are not required, to take MATH 5615 and MATH 5616 as an elective.

Additional Core Coursework
In addition to the standard curriculum outlined above, take the following two courses:

PUBH 7405 - Biostatistics: Regression (4.0 cr)
PUBH 7406 - Advanced Regression and Design (4.0 cr)
Twin Cities Campus
Clinical Research M.S.
School of Public Health - Adm
School of Public Health

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 38
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The field of clinical research is becoming increasingly complex and regulated. This has created a demand for formally trained clinical researchers. This program will prepare you to conduct patient-oriented research, including clinical trials and observational studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

An advanced health professional degree, e.g. M.D., D.D.S., D.O., D.N.P., D.C., D.V.M., Pharm.D., Ph.D.; an advanced doctoral degree in a clinical biomedical field; or an advanced nursing degree.

Other requirements to be completed before admission:
Students must have completed or must be at an advanced stage of their clinical practice training and be affiliated with someone at the University of Minnesota who can provide advising and access to a clinical project. The admissions committee considers exceptions on an individual basis.

Special Application Requirements:
The M.S. has specific application requirements including an advanced health professional degree, and training sufficient to be eligible for a license to practice as supported in the form of an official transcript. One of the three required recommendation letters and a completed School of Public Health Recommendation form should be from the clinical director of training supporting the applicant's potential as a clinical researcher.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 25 major credits, 3 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 21 major credits and 7 to 11 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: There are two options for capstone project: 1) A manuscript, for which the student is the first author who contributes to the design and analysis presented, and which is to be submitted to a peer-reviewed journal in the student's field. The manuscript cannot be a review article; however meta-analysis and formal systematic reviews are allowed. 2) A grant proposal, for which the student is Principal Investigator (PI) at the standard national institute grant mechanism level of R21, R03 or higher (example, R01), to be submitted to the National Institute of Health (NIH). Students' choices regarding the topic and scope of their capstone project must be approved by the advisor and director of graduate studies.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

Students must complete both sessions of the University's Responsible Conduct of Research course, validated by ORTTA. Students also must complete the NIH's online training, Protection of Human Research Subjects, validated by electronic certificate upon successful completion.

Required Coursework

All students take the following courses:
- PUBH 6301 - Fundamentals of Clinical Research (3.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Plan Options

Plan A Requirements

The Plan A curriculum prepares the next generation of clinical researchers and principal investigators. It covers clinical trials, epidemiology, biostatistics, ethics, grant writing, and research methods. Students are trained to conduct patient-oriented, epidemiological, and behavioral research.

Plan A Coursework

Take the following courses for a total of 4 credits:
- PUBH 6303 - Clinical Research Project Seminar (2.0 cr)
- PUBH 6348 - Writing Research Grants (2.0 cr)

Outside Coursework

Take at least 3 credits in a related field to meet minimum course credit requirements.

Thesis Credits

Take at least 10 master's thesis credits.
- PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

-OR-

Plan B Requirements

The Plan B curriculum prepares the next generation of translational, clinical, and outcomes researchers. The flexible curriculum, determined through consultation with mentors and the director of graduate studies, includes a core of required courses covering clinical trials, epidemiology, and biostatistics, supplemented by elective courses in translational sciences, outcomes sciences, health services research, and other areas.

Plan B Coursework

- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
  or PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
  or PUBH 7415 - Introduction to Clinical Trials (3.0 cr)

Outside Coursework
Take at least 7 credits in a related field to meet minimum course credit requirements.

**Capstone Project**
Take 6 to 10 credits of PUBH 8394, in consultation with the advisor and director of graduate studies.

**PUBH 8394 - Plan B Project: Clinical Research (1.0 - 10.0 cr)**

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 16
- This program does not require summer semesters for timely completion.
- Degree: Clinical Research PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This certificate is designed for clinicians and other health professionals who have at least five years of relevant experience and who want to learn how to design, implement, and interpret clinical research studies.

The program includes 16 credits and can be completed in six terms, attending part-time.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH)

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants are required to have a baccalaureate degree and either a minimum of five years of relevant clinical research experience or GRE scores.

Special Application Requirements:
Applicants must submit to SOPHAS Express, a centralized online application service:
- Completed SOPHAS Express application and application fee, designating the University of Minnesota School of Public Health
- Personal statement describing the applicant's reason for applying, career goals, and how the certificate will help them achieve their goals
- One letter of recommendation
- Unofficial transcripts of record from each college/university where a degree was earned. (If admitted, official transcripts will need to be sent directly to the School of Public Health.)
- Resume or C.V.

For detailed application requirements and instructions visit www.sph.umn.edu.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 100
- Paper Based - Total Score: 600
  • IELTS
    - Total Score: 7
  • MELAB
    - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

- Program Type: Master's  
- Requirements for this program are current for Fall 2018  
- Length of program in credits: 48  
- This program requires summer semesters for timely completion.  
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Through coursework and fieldwork taken at the School of Public Health, students in community health promotion develop basic competencies in theory, health behavior and policy interventions, assessment methods, cultural competency, and management.

Each graduate should have the ability to:
- Use theories of behavior and social change to inform the planning and evaluation of health interventions  
- Identify individual, community, and policy-level interventions that are effective in promoting healthy behaviors and social conditions  
- Design and implement effective individual, community, and policy-level interventions targeting a variety of health behaviors  
- Assess the health status of populations and communities  
- Utilize appropriate data collection strategies and qualitative and quantitative methods to evaluate health interventions  
- Identify the role of cultural, social, and behavioral factors in influencing health behaviors and status  
- Develop and adapt approaches to solving health problems, taking into account cultural differences  
- Communicate health information effectively both in writing and orally  
- Advocate for public health programs and resources  
- Collaborate with public health agencies and other constituency groups  
- Coordinate and manage health programs/services  
- Relate ethical considerations and values to one’s professional practice

The M.P.H. in community health promotion is a good path for students planning for careers as public health practitioners or planning to pursue a PhD in social and behavioral epidemiology, which is available in the School of Public Health.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH).

Program Delivery
This program is available: 
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must have one year of community, social service or public health experience. An introductory course in statistics and three to four social and behavioral science courses are also required. The average undergraduate GPA for admitted applicants is a 3.5.

Special Application Requirements:
Applicants are admitted from a wide variety of academic backgrounds, including social and behavioral sciences (e.g., psychology, sociology, anthropology), the humanities, basic sciences (e.g., biology, nursing), and mathematics. There is no single appropriate undergraduate major; however, applicants should meet prerequisites by the time of admission.
Who should apply? Individuals who want skills to:
- influence policy and public opinion on health issues;
- develop and evaluate innovative community-based programs to prevent disease and injury;
- work with communities, health departments, and non-profit organizations and policymakers to create healthy living and working environments;
- work on issues related to specific population, including youth and disadvantaged populations.
And individuals who:
- have a variety of backgrounds, including those trained in basic sciences, social and behavioral sciences, and the humanities;
- want an M.P.H. degree;
- plan to pursue a Ph.D. degree in social and behavioral epidemiology at the University of Minnesota;
- have met the prerequisites listed below before admission.

Prerequisites for Admission
- Baccalaureate degree or higher from an accredited college or university
- College-level courses in the following areas:
  - Social and behavioral sciences (at least 3 courses)
  - Introductory statistics (1 course)
  - One year of paid or volunteer experience in a public health, social service, or community setting

Preferences for Admission
- Strong personal statement indicating why applicant is interested in pursuing a community health promotion degree
- Compatibility of interests with program faculty
- GPA of 3.0
- Combined GRE score of 300 and analytical writing score of 3.5
- TOEFL score of 600/250/100 for international applicants
- Strong reference letters

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 34 to 48 major credits and 0 to 14 credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: Integrative Learning Experience (ILE)

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Theory
- PUBH 6050 - Community Health Theory and Practice I (3.0 cr)
- PUBH 6051 - Community Health Theory and Practice II (3.0 cr)

Health Behavior and Policy Interventions
Take 8 or more credit(s) from the following:
PUBH 6000 TOPICS: Urban Health and Social Policy
Take 1 or more course(s) from the following:
• PUBH 6081 - Sex, Sexuality, and Sexual Health (2.0 cr)
• PUBH 6010 - Public Health Approaches to HIV/AIDS (3.0 cr)
• PUBH 6055 - Social Inequalities in Health (2.0 cr)
• PUBH 6094 - Obesity and Eating Disorder Interventions (2.0 cr)
• PUBH 6000 - Topics: Community Health Promotion (0.5 - 4.0 cr)

Intervention Approaches
Take 2 or more course(s) from the following:
• PUBH 6025 - Designing e-Interventions for Public Health (2.0 cr)
• PUBH 6045 - Skills for Policy Development (1.0 cr)
• PUBH 6049 - Legislative Advocacy Skills for Public Health (3.0 cr)
• PUBH 6066 - Building Communities, Increasing Health: Preparing for Community Health Work (2.0 cr)
• PUBH 6074 - Mass Communication and Public Health (3.0 cr)
• PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
• SW 8551 - Advanced Community Practice: Assessment, Organizing, and Advocacy (3.0 cr)

Assessment Methods
Students are required to take 5-6 credits
PUBH 6035 - Applied Research Methods (3.0 cr)
choice of the following 2 courses
PUBH 6034 - Evaluation (3.0 cr)
or PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)

Additional Assessment Methods
Students must select one course from the following list:
PUBH 6636 - Qualitative Research Methods in Public Health Practice (2.0 cr)
or PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6451 - Biostatistics II (4.0 cr)
or PUBH 6617 - Practical Methods for Secondary Data Analysis (3.0 cr)

SPH Core Courses
PUBH 6250 - Foundations of Public Health (2.0 cr)
Biostatistics
PUBH 6450 - Biostatistics I (4.0 cr)
Environmental Health
PUBH 6101 - Environmental Health (2.0 cr)
or PUBH 6102 - Issues in Environmental Health (2.0 cr)
Epidemiology
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
Ethics
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
Management
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Applied Practice Experience (APEX) and Integrative Learning Experience (ILE)
PUBH 7096 - Applied Practice Experience: Community Health Promotion (1.0 - 5.0 cr)
PUBH 7094 - Integrative Learning Experience: Community Health Promotion (1.0 - 6.0 cr)

Electives
Electives to total 48 credits.

Joint- or Dual-degree Coursework: Master of Social Work (MSW), Juris Doctorate (JD)

Program Sub-plans
A sub-plan is not required for this program.
Students may complete the program with more than one sub-plan.

Public Health Policy Interdisciplinary Concentration Area
The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care.
PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- Understanding community dynamics
- Developing advocacy skills for public health
- Analyzing legal and policy structures
- Evaluating and implementing policies and programs
- Influencing community health
- Motivating and educating stakeholders and decision-makers
- Using policy as prevention strategy
- Eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 42 to 52
- This program does not require summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Environmental health is the study of how exposures to external hazards, including chemical, physical, and biological agents, affect human health. Environmental health researchers and professionals seek to understand how to evaluate exposures that create risk to human health, how those exposures elicit biological responses that lead to disease and injury, and how policy is developed and used to prevent adverse health effects. This program offers academic programs at the master's and doctoral levels, conducts research in diverse areas of environmental health, offers continuing education, and conducts outreach. The academic programs prepare students to be leaders in environmental health in academia, industry, consulting groups, and government agencies. The program's training and research emphasizes the importance of translating basic scientific knowledge into solutions for current societal problems and concerns.

The School of Public Health (SPH) and College of Biological Sciences (CBS) offer an early-admission opportunity for eligible University CBS students interested in completing the MPH Environmental Health degree. Interested CBS students should contact their college office or the SPH for more information.

Accreditation
This program is accredited by Council on Education for Public Health

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Minimum qualifications include a baccalaureate degree with coursework in the basic sciences. Occupational health nursing/medicine applicants must have a relevant degree from an accredited school.

Required prerequisites
Program Course Prerequisites
All specialties require basic sciences. Industrial hygiene also requires demonstrable strengths in physics, chemistry (including organic chemistry), biology and math (including calculus). A microbiology background is preferred for the environmental infectious diseases specialty.

Other requirements to be completed before admission:
For more information visit www.sph.umn.edu

Special Application Requirements:
To be considered for admission to Environmental Health's Accelerated MPH program, prospective students must be in their junior year, and in good academic standing (3.25 minimum GPA) in one of the BS degree programs offered by the University's College of Biological
Sciences. In lieu of the GRE, applicants to the accelerated MPH program must complete an interview with environmental health admissions committee.

Applicants must submit their test score(s) from the following:

- **GRE**
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5
- **GMAT**
- **MCAT**
  - Verbal Reasoning score: 10
  - Physical Science score: 10
  - Biological Reasoning score: 10
  - Writing Sample score: 10
- **LSAT**
  - Law School Admission Test (LSAT) score: 140
- **DAT**
  - Score: 15

International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- **IELTS**
  - Total Score: 7
- **MELAB**
  - Final score: 80

Key to test abbreviations (GRE, GMAT, MCAT, LSAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 42 to 52 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

**Capstone Project:** This requirement is met by registering for PUBH 7194 Culminating Experience: Environmental Health for a minimum of 3 credits. Results in a written paper and presentation and oral exam. Students choose from a broad set of project options including a Plan B style project. The project must be required to be relevant to the field of environmental health and should represent a minimum of 120 hours of work. Minimum program length is 42 credits.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

**Concentration Areas**

**General Program**

Students looking for a program of study that does not fit precisely with the defined concentrations in the major may be admitted to this program. Emphasis is on the development of a broad, solid foundation, with a larger than usual number of elective credits to allow the student an opportunity to pursue their particular interests. It is occasionally possible for students to transfer into a different concentration after admission to the general program.

**Public Health Core Courses**

- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

**Division Core Courses**

- PUBH 6103 (Inactive) (2.0 cr)
**PUBH 6104 - Environmental Health Effects (2.0 cr)**

**PUBH 6105 (Inactive) (2.0 cr)**

**PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)**

**PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)**

**Concentration Courses**

- **PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)**
- **PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)**

**Electives**

Selected in consultation with adviser to meet the 42 credit minimum requirement.

- **OR-**

**Environmental and Occupational Epidemiology (EOE)**

Env Occ Epi strives to understand the causal impact of environment and occupation on human health. Public health interventions are most likely to be effective when disease and injury etiology is understood. Epidemiologists develop studies to identify factors that cause diseases and injuries - requiring knowledge of both subject matter and methods. Students may focus in one of three these areas: exposures related to cancer, exposures related to injury, or epidemiologic methods.

**Public Health Core Courses**

- **PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)**
- **PUBH 6341 - Epidemiologic Methods I (3.0 cr)**
- **PUBH 6450 - Biostatistics I (4.0 cr)**
- **PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)**
- **PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)**
- **PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)**

**Division Core Courses**

- PA 5031 - Empirical Analysis I (4.0 cr)
- PA 5032 - Regression Analysis (2.0 cr)
- PA 5033 - Multivariate Techniques (2.0 cr)
- PA 5035 - Survey Research and Data Collection (1.5 cr)
- PA 5711 - Science, Technology & Environmental Policy (3.0 cr)
- PA 5722 - Economics of Natural Resource and Environmental Policy (3.0 cr)
- PUBH 6863 - Understanding Health Care Quality (2.0 cr)
- PA 8790 - Advanced Topics in Science, Technology, and Environmental Policy (1.0 - 3.0 cr)
- PA 5311 - Program Evaluation (3.0 cr)

-OR-

Environmental Infectious Diseases

This program explores the environmental factors associated with infectious diseases and the emergence of food-borne diseases in the United States and around the world. The environment and changing conditions have a great impact on the distribution and occurrence of infectious diseases. In evaluating the chain of infection, the environment may play a key role in reservoir maintenance. Coursework includes basic principles of infection control and predicting the impact of emerging infections.

Public Health Core Courses

- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
  or VMED 5180 - Ecology of Infectious Disease (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
  or PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses
PUBH 6103 (Inactive) (2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 (Inactive) (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Concentration Courses
PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)
PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)
PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
VMED 5180 - Ecology of Infectious Disease (3.0 cr)

Recommended Electives
Select electives in consultation with adviser.
Take exactly 0 course(s) totaling exactly 0 credit(s) from the following:
- PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
- PUBH 6711 - Public Health Law (2.0 cr)
- PUBH 7210 - Topics: Global Food Systems (0.5 cr)
- PUBH 7214 - Principles of Risk Communication (1.0 cr)
- VMED 8090 - Epidemiology of Zoonoses and Diseases Common to Animals and Humans (3.0 cr)
- VMED 5420 (Inactive) (3.0 cr)
- FSCN 4121 - Food Microbiology (3.0 cr)
- PMB 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)
- MICB 4131 - Immunology (3.0 cr)
- MICB 4151 - Molecular and Genetic Bases for Microbial Diseases (3.0 cr)
- MICB 4171 - Biology, Genetics, and Pathogenesis of Viruses (3.0 cr)

Global Environmental Health
Issues of water and air quality, food safety, and the effects of industrialization are examined, as well as major ecological problems such as deforestation and sustainable agriculture. Interactions between the physical environment and biological health risks are considered also, as the effects of globalization of trade and the rapid movement of populations from one part of the world to the other are important vectors for the spread of disease globally.

Public Health Core Courses
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)

Division Core Courses
PUBH 6103 (Inactive) (2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 (Inactive) (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Concentration Courses
PUBH 6131 - Working in Global Health (2.0 cr)
PUBH 6133 - Global Health Seminar (1.0 cr)
PUBH 72xx Topics: Globalization and Health (1 cr)
PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)

Recommended Electives
Selected in consultation with adviser to meet the 42 credit minimum requirement.

Occupational and Environmental Health Nursing (OEHN)
Occupational and Environmental Health Nursing provides intensive training for nurses interested in the development, management and evaluation of health services, programs, and policies designed to promote health and prevent work-related injuries and disease.

Public Health Core Courses
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses
PUBH 6103 (Inactive) (2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 (Inactive) (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Occupational and Environmental Health Nursing Courses
PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)

School of Nursing Courses
NURS 8170 (Inactive) (3.0 cr)
NURS 8600 (Inactive) (2.0 cr)

Recommended Electives
Select electives in consultation with adviser to meet the 42 credit minimum requirement.
Take exactly 0 course(s) totaling exactly 0 credit(s) from the following:
• PUBH 6034 - Evaluation (3.0 cr)
• PUBH 6055 - Social Inequalities in Health (2.0 cr)
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6122 - Seminar: Safety in the Workplace (1.0 cr)
• PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)
• PUBH 6765 - Continuous Quality Improvement: Methods and Techniques (3.0 cr)
• NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)

-OR-

Occupational and Environmental Medicine
The Occupational and Environmental Medicine (OEM) residency program trains physicians who will improve the health and safety of workers. The program emphasizes a solid clinical basis for the practice of occupational medicine and the management of patients with work-related health problems, as well as the identification and remediation of occupational risks and hazards in the workplace.

Public Health Core Courses
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses
PUBH 6103 (Inactive) (2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 (Inactive) (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Concentration Courses
PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
PUBH 6173 - Exposure to Physical Agents (2.0 cr)
PUBH 6387 - Cancer Epidemiology (2.0 cr)
PUBH 7200 - Topics: Public Health Practice (0.5 - 4.0 cr)
PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)
Select electives in consultation with adviser to meet the 42 credit minimum requirement.

-OR-

Regulatory Toxicology and Risk Assessment
Regulatory toxicology and risk assessment teaches students to think analytically about the biochemical mechanisms of toxicity, and how toxicology is used to protect human health through laboratory research, and the development of sound environmental policy and regulations. Strong background in the biological sciences, interest in laboratory research or environmental regulation and policy. Emphasizes: biological sciences, physiology, biochemistry, cellular and molecular biology, toxicology.

Public Health Core Courses
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)

**Ethics Courses**
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

**Division Core Courses**
PUBH 6103 *(inactive)* (2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 *(inactive)* (2.0 cr)
PUBH 7194 - Cumulating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

**Concentration Courses**
PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
PUBH 6160 - Systems Toxicology (3.0 cr)
PUBH 6161 - Regulatory Toxicology (2.0 cr)
PUBH 8160 - Advanced Toxicology (2.0 cr)
PUBH 8161 - Current Literature in Toxicology (1.0 cr)

**Electives**
Selected in consultation with adviser to meet the 42 credit minimum requirement.

**Joint- or Dual-degree Coursework:** Master of Public Health and Juris Doctor (MPH/JDP). Student may take a total of 12 credits in common among the academic programs.

**Program Sub-plans**
A sub-plan is not required for this program. Students may complete the program with more than one sub-plan.

**Industrial Hygiene**
The Industrial Hygiene (IH) program is concerned with the health and safety of people at work, and the community at large. Specific concerns are with the recognition, evaluation and control of potential workplace hazards, including chemical, physical, and biological agents; and the potential health threats to the community and the environment.

**Industrial Hygiene**
The Industrial Hygiene program is concerned with the health and safety of people at work, and the community at large. Specific concerns are with the recognition, evaluation and control of potential workplace hazards, including chemical, physical and biological agents; and the potential health threats to the community and the environment. Prepares well-qualified practitioners and researchers for an exciting career in industry, government organizations, and academic and research institutions.

**School of Public Health Core Requirements**
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
Choose one of the following courses.
PUBH 6450 - Biostatistics I (4.0 cr)

**Division Core Course Requirements**
PUBH 6103 *(inactive)* (2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 *(inactive)* (2.0 cr)
PUBH 7194 - Cumulating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

**Occupational Health and Safety Core Requirements**
PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)

**Industrial Hygiene Program Requirements**
PUBH 6172 - Industrial Hygiene Applications (2.0 cr)
PUBH 6173 - Exposure to Physical Agents (2.0 cr)
PUBH 6174 - Control of Workplace Exposure (3.0 cr)
PUBH 6175 - Environmental Measurements Laboratory (2.0 cr)
PUBH 6192 - Measurement and Properties of Air Contaminants (2.0 cr)
PUBH 6193 - Advanced Topics in Human Exposure Science (2.0 cr)

- ME 5133 - Aerosol Measurement Laboratory (4.0 cr)
- PA 5721 - Energy and Environmental Policy (3.0 cr)

Accelerated M.P.H. Program

This sub-plan is limited to students completing the program under Plan C.

The School of Public Health and the College of Biological Sciences offer an early-admission opportunity for eligible University of Minnesota Bachelor of Science students also interested in completing the Master's of Public Health (MPH) Environmental Health degree. The Accelerated MPH Environmental Health sub-plan enables majors from CBS undergraduate programs to take 12 MPH credits during their senior (fourth) year, and to complete the MPH after a fifth year of full-time graduate student plus one summer. Interested CBS undergraduates should contact their CBS college adviser for more information. The MPH accelerated program sub-plan application deadline is during the spring of the student's junior year, and admission to the MPH accelerated program sub-plan is contingent on a formal admissions process. Check sph.umn.edu for specific application deadline and instructions. Students admitted to the accelerated program sub-plan must maintain timely degree progress to ensure the bachelor of science is awarded by the end of their fourth year. The MPH accelerated program sub-plan is open to students in the CBS Bachelor of Science programs.

- PUBH 6100 Careers in Environmental Health

Electives

Selected in consultation with adviser to meet the 42 credit minimum requirement

Global Health Interdisciplinary Concentration Area

The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.
Developing countries are currently undergoing profound demographic changes—changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020 and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:
- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area
The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., and includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care.

PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- Understanding community dynamics
- Developing advocacy skills for public health
- Analyzing legal and policy structures
- Evaluating and implementing policies and programs
- Influencing community health
- Motivating and educating stakeholders and decision-makers
- Using policy as prevention strategy
- Eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- **Program Type: Master's**
- **Requirements for this program are current for Fall 2018**
- **Length of program in credits: 33 to 56**
- **This program does not require summer semesters for timely completion.**
- **Degree: Master of Science**

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Environmental health is the study of how exposures to external hazards, including chemical, physical, and biological agents, affect human health. Environmental health researchers and professionals seek to understand how to evaluate exposures that create risk to human health, how those exposures elicit biological responses that lead to disease and injury, and how policy is developed and used to prevent adverse health effects. This program offers academic programs at the master's and doctoral levels, conducts research in diverse areas of environmental health, offers continuing education, and conducts outreach. The academic programs prepare students to be leaders in environmental health in academia, industry, consulting groups, and government agencies. The program's training and research emphasizes the importance of translating basic scientific knowledge into solutions for current societal problems and concerns.

Applicants must indicate an interest in one of the following specialties within the major: the general environmental health, environmental health policy, environmental infectious diseases, environmental and occupational epidemiology, regulatory toxicology, occupational and environmental health nursing, occupational environmental medicine, occupational injury epidemiology and control, or industrial hygiene.

**Program Delivery**

This program is available:

- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

Minimum requirements include a baccalaureate degree with coursework in the basic sciences. Each concentration requires different preparation: [http://www.sph.umn.edu/programs/ehs/tracks/index.asp](http://www.sph.umn.edu/programs/ehs/tracks/index.asp)

**Required prerequisites**

**Industrial Hygiene**

In addition to program requirements - industrial hygiene requires demonstrable strengths in physics, chemistry (including organic chemistry), biology, and math (including calculus). One or two missing requirements may be completed upon enrollment.

Other requirements to be completed before admission:

Please visit [www.sph.umn.edu](http://www.sph.umn.edu) for admission requirements.

Applicants must submit their test score(s) from the following:

- **GRE**
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5
- **GMAT**
- **MCAT**
  - Verbal Reasoning score: 10
  - Physical Science score: 10

© 2005 by the Regents of the University of Minnesota

The University of Minnesota is an equal opportunity educator and employer.

Information current as of August 31, 2018
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600

- **IELTS**
  - Total Score: 7

- **MELAB**
  - Final score: 80

Key to test abbreviations (GRE, GMAT, MCAT, LSAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 to 20 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 27 to 45 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** The Plan B project is a master's project.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 3 semesters must be completed before filing a Degree Program Form.

The M.S. program prepares students for specialized careers in environmental and occupational health. M.S. students receive a solid technical background in their disciplines and by graduation are proficient in applied or basic research.

The minimum credits required for graduation depend on the chosen specialty area. Most concentration areas require a two-year program. M.S. students have the option of completing a Plan A with a thesis or a Plan B project or Plan C.

**Concentration Areas**

Students may pursue a general program in environmental and occupational health, or focus in a concentration area with basic required courses, or pursue the industrial hygiene sub-plan.

**Environmental Chemistry**

Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105

Environmental chemistry examines the interactions of pollutants with air, water, soil, and their exposures to humans and wildlife. The curriculum emphasizes the processes that control chemical behavior, transport, and fate as a function of environmental factors and chemical properties.

**General Requirements**

Thesis/dissertation will be taken for 10 credits

- **PUBH 6320** - Fundamentals of Epidemiology (3.0 cr)
- **STAT 5021** - Statistical Analysis (4.0 cr)
- **PUBH 6742** - Ethics in Public Health: Research and Policy (1.0 cr)
- **PUBH 8777** - Thesis Credits: Master's (1.0 - 18.0 cr)

**Division Core Courses**

- **PUBH 6103** *(Inactive)* (2.0 cr)
- **PUBH 6104** - Environmental Health Effects (2.0 cr)
- **PUBH 6105** *(Inactive)* (2.0 cr)

**Specialty Program Course Requirements**

- **CEGE 5541** - Environmental Water Chemistry (3.0 cr)
EEB 5601 - Limnology (3.0 cr)  
PUBH 6190 - Environmental Chemistry (3.0 cr)  

**Proposed Electives**  
Select electives in consultation with adviser.  
Take 0 or more credit(s) from the following:  
  • CONS 8004 - Economic and Social Aspects of Conservation Biology (3.0 cr)  
  • CEGE 4561 - Solids and Hazardous Wastes (3.0 cr)  
  • CEGE 8503 - Environmental Mass Transport (4.0 cr)  
  • CEGE 8542 - Chemistry of Organic Pollutants in Environmental Systems (3.0 cr)  
  • CEGE 8561 - Analysis and Modeling of Aquatic Environments I (3.0 cr)  
  • EEB 4611 - Biogeochemical Processes (3.0 cr)  
  • PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)  
  • WRS 8050 - Special Topics in Water Resources Science (1.0 - 3.0 cr)  
  • EEB 5609 - Ecosystem Ecology (3.0 cr)  

-OR-  

**Environmental and Occupational Epidemiology**  
**Environmental Health Sciences Core:** PUBH 6103, PUBH 6104, PUBH 6105  
Environmental and occupational epidemiology strives to understand the causal impact of environment and occupation on human health, because public health interventions are most likely to be effective when disease and injury etiology is understood. Epidemiologists develop studies to identify factors that cause diseases and injuries.  

**General Core Requirements**  
PUBH 6341 - Epidemiologic Methods I (3.0 cr)  
PUBH 6450 - Biostatistics I (4.0 cr)  
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)  

**Division Core**  
PUBH 6103 *(Inactive)* (2.0 cr)  
PUBH 6104 - Environmental Health Effects (2.0 cr)  
PUBH 6105 *(Inactive)* (2.0 cr)  
PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)  
  or PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)  

**Specialty Program Course Requirements**  
PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)  
PUBH 6342 - Epidemiologic Methods II (3.0 cr)  
PUBH 6451 - Biostatistics II (4.0 cr)  

**Proposed Electives**  
Select electives in consultation with adviser.  
Take 0 or more credit(s) from the following:  
  • PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)  
  • PUBH 6121 - Topics: Injury Prevention in the Workplace, Community, and Home (1.0 - 2.0 cr)  
  • PUBH 6122 - Seminar: Safety in the Workplace (1.0 cr)  
  • PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)  
  • PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)  
  • PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)  
  • PUBH 6173 - Exposure to Physical Agents (2.0 cr)  
  • PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)  
  • PUBH 6343 - Epidemiologic Methods III (4.0 cr)  
  • PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)  
  • PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)  
  • PUBH 6387 - Cancer Epidemiology (2.0 cr)  
  • PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)  
  • PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)  
  • PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)  

-OR-  

**Environmental Health Policy**  
**Environmental Health Sciences Core:** PUBH 6103, PUBH 6104, PUBH 6105  
Environmental health policy provides broad, multidisciplinary training in environmental health issues, including occupational health, risk assessment, risk management, decision making, and policy analysis.  

**General Requirements**  
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)  
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)  
  or PUBH 6341 - Epidemiologic Methods I (3.0 cr)  
PUBH 6414 - Biostatistical Literacy (3.0 cr)  
  or PUBH 6450 - Biostatistics I (4.0 cr)
Division Core Courses
PUBH 6103 *(Inactive)*(2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 *(Inactive)*(2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Specialty Program Course Requirements
PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
PUBH 6115 - Worker Protection Law (1.0 cr)
PUBH 6116 - Environmental Law (1.0 cr)

Proposed Electives
Select electives in consultation with adviser.
Take 0 or more credit(s) from the following:
• PUBH 6049 - Legislative Advocacy Skills for Public Health (3.0 cr)
• PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
• PUBH 6080 *(Inactive)*(2.0 cr)
• PUBH 6420 - Introduction to SAS Programming (1.0 cr)
• PUBH 6634 - Children and Families: Public Health Policy and Advocacy (2.0 cr)
• PUBH 6711 - Public Health Law (2.0 cr)
• PUBH 6724 - The Health Care System and Public Health (3.0 cr)
• PUBH 6726 - Medical Device Industry: Business and Public Policy (3.0 cr)
• PUBH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)
• PUBH 6835 - Principles of Health Policy (2.0 cr)
• PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
• PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
• PUBH 8801 - Health Services Policy Analysis: Theory (3.0 cr)
• PUBH 8802 - Health Services Policy Analysis: Applications (2.0 cr)
• PUBH 8803 - Long-Term Care: Principles, Programs, and Policies (2.0 cr)
• ANTH 5041 - Ecological Anthropology (3.0 cr)
• ANTH 8203 - Research Methods in Social and Cultural Anthropology (3.0 cr)
• PA 5001 - Intellectual Foundations of Public Action (1.5 cr)
• PA 5002 - Introduction to Policy Analysis (1.5 cr)
• PA 5021 - Economics For Policy Analysis and Planning I (3.0 cr)
• PA 5022 - Economics For Policy Analysis and Planning II (1.5 - 3.0 cr)
• PA 5031 - Empirical Analysis I (4.0 cr)
• PA 5032 - Regression Analysis (2.0 cr)
• PA 5033 - Multivariate Techniques (2.0 cr)
• PA 5035 - Survey Research and Data Collection (1.5 cr)
• PA 5711 - Science, Technology & Environmental Policy (3.0 cr)
• PA 5722 - Economics of Natural Resource and Environmental Policy (3.0 cr)
• PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

-OR-

Environmental Infectious Diseases
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
The Environmental Infectious Diseases (EID) specialty is concerned with the emergence of food-borne and infectious diseases in the United States and around the world. The environment, and changing conditions in the environment can have a great impact on the distribution and occurrence of infectious diseases. In evaluating the chain of infection, environment may play a key role in reservoir maintenance, as well as a route of transmission through food, water, and air.

General Requirements
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

Division Core Courses
PUBH 6103 *(Inactive)*(2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 *(Inactive)*(2.0 cr)
PUBH 6777 - Thesis Credits: Master's (1.0 - 18.0 cr)
or PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)

Specialty Program Course Requirements
PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)
PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)
PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
Recommended Electives
Select electives in consultation with adviser.
Take 0 or more credit(s) from the following:
- PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)
- PUBH 7210 - Topics: Global Food Systems (0.5 cr)
- PUBH 8100 - Validity Concepts in Epidemiologic Research (2.0 cr)
- VMED 6090 - Epidemiology of Zoonoses and Diseases Common to Animals and Humans (3.0 cr)
- VMED 5420 - Inactive (3.0 cr)
- FSCN 4121 - Food Microbiology (3.0 cr)
- FSCN 4122 - Food Fermentations and Biotechnology (2.0 cr)
- PMB 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)
- MICB 4131 - Immunology (3.0 cr)
- MICB 4151 - Molecular and Genetic Bases for Microbial Diseases (3.0 cr)
- MICB 4171 - Biology, Genetics, and Pathogenesis of Viruses (3.0 cr)

-OR-

Exposure Science
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
Students in the Exposure Science program study methods for the identification, measurement and simulation of human exposure and dose from single and multimedia environmental exposures. Students will receive training on various aspects of exposure analysis such as measurements and modeling; chemical, biological, and physical principles required to analyze exposure; mechanisms of exposure; development of molecular biomarkers; and genomic, proteomic, and metabolomic metrics for assessing exposure.

General Requirements
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)

Division Core Courses
- PUBH 6103 - Inactive (2.0 cr)
- PUBH 6104 - Environmental Health Effects (2.0 cr)
- PUBH 6105 - Inactive (2.0 cr)
- PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
- PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Specialty Program Course Requirements
- PUBH 6192 - Measurement and Properties of Air Contaminants (2.0 cr)
- PUBH 6193 - Advanced Topics in Human Exposure Science (2.0 cr)
- PUBH 6175 - Environmental Measurements Laboratory (2.0 cr)
- PUBH 6100 - Topics: Environmental Health (1.0 - 4.0 cr)
- PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
- PUBH 6190 - Environmental Chemistry (3.0 cr)
- PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)

Electives
Select electives in consultation with adviser.

General Program in Environmental Health
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
Students are admitted to the General Program in Environmental Health when they are looking for a program of study that does not fit precisely with the specialty tracks defined in the environmental health sciences major. Emphasis is on the development of a broad, solid foundation in environmental health, with a larger than usual number of elective credits to allow the student an opportunity to pursue their particular interests.

General Requirements
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)

Division Core Courses
- PUBH 6103 - Inactive (2.0 cr)
- PUBH 6104 - Environmental Health Effects (2.0 cr)
- PUBH 6105 - Inactive (2.0 cr)
- PUBH 6777 - Thesis Credits: Master's (1.0 - 18.0 cr)
or PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)

Concentration Program Course Requirements
Choose at least two courses from each of the following Environmental Health focus areas.

Exposure
Take 2 or more course(s) from the following:

- PUBH 6190 - Environmental Chemistry (3.0 cr)
- PUBH 6192 - Measurement and Properties of Air Contaminants (2.0 cr)
- PUBH 6193 - Advanced Topics in Human Exposure Science (2.0 cr)
- VMED 5180 - Ecology of Infectious Disease (3.0 cr)

Policy
Check with adviser for other policy class options.

Take 2 or more course(s) from the following:

- PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)

Health Effects
Take 2 or more course(s) from the following:

- PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
- PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
- PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
- PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)

Electives
Select electives in consultation with adviser.

-OR-

Global Environmental Health
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105

The global environmental health track provides key information for individuals looking to work in the field of global environmental health either overseas or in the U.S. Issues of water and air quality, food safety, and the effects of industrialization are examined, as well as major ecological problems such as deforestation and sustainable agriculture.

General Requirements

- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
  or PUBH 6450 - Biostatistics I (4.0 cr)

Division Core Courses

- PUBH 6103 (Inactive) (2.0 cr)
- PUBH 6104 - Environmental Health Effects (2.0 cr)
- PUBH 6105 (Inactive) (2.0 cr)
- PUBH 6777 - Thesis Credits: Master's (1.0 - 18.0 cr)
  or PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)

Specialty Program Course Requirements

- PUBH 6131 - Working in Global Health (2.0 cr)
- PUBH 6132 - Air, Water, and Health (2.0 cr)
- PUBH 6133 - Global Health Seminar (1.0 cr)
- PUBH 72xx Topics: Globalization and Health (1 cr)
- PUBH 6390 - Topics: Epidemiology (0.5 - 4.0 cr)
- PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)

Electives
7-9 credits, selected in consultation with adviser.

-OR-

Occupational and Environmental Health Nursing (OEHN)
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105

Occupational and Environmental Health Nursing (OEHN) provides intensive training for nurses interested in the development, management and evaluation of health services, programs, and policies designed to promote health and prevent work-related injuries and disease.

General Requirements

- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses

- PUBH 6103 (Inactive) (2.0 cr)
- PUBH 6104 - Environmental Health Effects (2.0 cr)
- PUBH 6105 (Inactive) (2.0 cr)
- PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
- PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)
- PUBH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
Specialty Program Course Requirements
PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
NURS 8600 (Inactive) (2.0 cr)
NURS 8170 (Inactive) (3.0 cr)

Recommended Electives
Select electives in consultation with adviser.
Take 3 or more credit(s) from the following:
• PUBH 6034 - Evaluation (3.0 cr)
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
• PUBH 6342 - Epidemiologic Methods II (3.0 cr)
• PUBH 6346 - Writing Research Grants (2.0 cr)
• NURS 8100 (Inactive) (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Industrial Hygiene
Industrial hygiene (IH) is concerned with the health and safety of people at work, and the community at large. Specific concerns are with the recognition, evaluation and control of potential workplace hazards, including chemical, physical, and biological agents; and the potential health threats to the community and the environment.

Required Coursework
Environmental Health Sciences Core: PUBH 6103, PUBH 6104, PUBH 6105
School of Public Health Core Requirements
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
Choose one of the following courses.
PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
Division of Environmental Health Sciences Core Requirements
PUBH 6103 (Inactive) (2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 (Inactive) (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)
Occupational Health and Safety Core Requirements
PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
Industrial Hygiene Program Requirements
PUBH 6172 - Industrial Hygiene Applications (2.0 cr)
PUBH 6173 - Exposure to Physical Agents (2.0 cr)
PUBH 6174 - Control of Workplace Exposure (3.0 cr)
PUBH 6175 - Environmental Measurements Laboratory (2.0 cr)
PUBH 6192 - Measurement and Properties of Air Contaminants (2.0 cr)
PUBH 6193 - Advanced Topics in Human Exposure Science (2.0 cr)
Industrial Hygiene Electives
Select electives in consultation with adviser.
Take 0 or more credit(s) from the following:
• PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
• PUBH 6115 - Worker Protection Law (1.0 cr)
• PUBH 6116 - Environmental Law (1.0 cr)
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6131 - Working in Global Health (2.0 cr)
• PUBH 6132 - Air, Water, and Health (2.0 cr)
• PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
• PUBH 6161 - Regulatory Toxicology (2.0 cr)
• PUBH 6176 - Hazardous Materials and Waste Management (2.0 cr)
• PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)
• PUBH 6190 - Environmental Chemistry (3.0 cr)
• PUBH 6415 - Biostatistical Methods II (3.0 cr)
• PUBH 6451 - Biostatistics II (4.0 cr)
• PUBH 7220 - Personal Protective Equipment and Respiratory Protection (1.0 cr)
• PUBH 7260 - Ergonomics and the Prevention of Workplace Injuries (1.0 cr)
• CEGE 4561 - Solids and Hazardous Wastes (3.0 cr)
• CEGE 5551 - Environmental Microbiology (3.0 cr)
• IE 5511 - Human Factors and Work Analysis (4.0 cr)
• IE 5513 - Engineering Safety (4.0 cr)
• KIN 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)
• ME 5113 - Aerosol/Particle Engineering (4.0 cr)
• ME 5133 - Aerosol Measurement Laboratory (4.0 cr)
• PA 5721 - Energy and Environmental Policy (3.0 cr)
Twin Cities Campus

Environmental Health Minor

School of Public Health - Adm

School of Public Health

Contact Information:
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-oasr@umn.edu
Website: http://www.sph.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master's minor requires a minimum of 6 graduate credits; the doctoral minor requires a minimum of 12 graduate credits. Courses for the minor must be selected from those offered by the School of Public Health.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Admission to a University graduate program in a related discipline is required.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Master's
Required Courses
Take the following three courses to meet the 6-credit minimum:
PUBH 6103 (inactive)(2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 (inactive)(2.0 cr)

Doctoral
Required EnvHlth Courses
Take the following three courses for 6 credits:
PUBH 6103 (inactive)(2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 (Inactive)(2.0 cr)

Required Epi Courses
Take one of the two following courses for at least 3 credits:
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

Required Biostats Courses
Take one of the two following courses for at least 3 credits:
PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
Twin Cities Campus
Environmental Health Ph.D.
School of Public Health - Adm
School of Public Health

Website: http://www.sph.umn.edu

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48 to 74
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Environmental health is the study of how exposures to external hazards, including chemical, physical, and biological agents, affect human health. Environmental health researchers and professionals seek to understand how to evaluate exposures that create risk to human health, how those exposures elicit biological responses that lead to disease and injury, and how policy is developed and used to prevent adverse health effects. This program offers academic programs at the master's and doctoral levels, conducts research in diverse areas of environmental health, offers continuing education, and conducts outreach. The academic programs prepare students to be leaders in environmental health in academia, industry, consulting groups, and government agencies. The program's training and research emphasizes the importance of translating basic scientific knowledge into solutions for current societal problems and concerns.

The Ph.D. brings students to a high level of academic competence through a combination of advanced coursework and research, and prepares students to assume leadership roles in the field.

Program Delivery
This program is available:
  • via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A baccalaureate degree with coursework in the basic sciences. Each specialty requires slightly different preparation. Industrial Hygiene requires physics, biology, chemistry, organic, and calculus.

Other requirements to be completed before admission:
For more information visit www.sph.umn.edu

Applicants must submit their test score(s) from the following:
  • GRE
    - General Test - Verbal Reasoning: 150
    - General Test - Quantitative Reasoning: 150
    - General Test - Analytical Writing: 4
  • GMAT
  • MCAT
    - Verbal Reasoning score: 10
    - Physical Science score: 10
    - Biological Reasoning score: 10
  • LSAT

International applicants must submit score(s) from one of the following tests:
  • TOEFL
    - Internet Based - Total Score: 100
Program Requirements
24 to 50 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

Concentration Areas

Environmental Chemistry
Environmental Chemistry examines the interactions of pollutants with air, water, soil, and their exposures to humans and wildlife. The curriculum emphasizes the processes that control chemical behavior, transport, and fate as a function of environmental factors and chemical properties. This concentration requires a minimum of 54 total course credits.

Environmental Chemistry
Public Health Core Courses
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Division Core Courses
- PUBH 6103 (Inactive) (2.0 cr)
- PUBH 6104 - Environmental Health Effects (2.0 cr)
- PUBH 6105 (Inactive) (2.0 cr)

Concentration Program Courses
- CEGE 5541 - Environmental Water Chemistry (3.0 cr)
- CEGE 8542 - Chemistry of Organic Pollutants in Environmental Systems (3.0 cr)
- EEB 5601 - Limnology (3.0 cr)
- PUBH 6190 - Environmental Chemistry (3.0 cr)

Electives
Select electives in consultation with adviser to meet the 54 total credit minimum.
Take 1 or more course(s) from the following:
- CONS 8004 - Economic and Social Aspects of Conservation Biology (3.0 cr)
- CEGE 4561 - Solids and Hazardous Wastes (3.0 cr)
- CEGE 8503 - Environmental Mass Transport (4.0 cr)
- CEGE 8561 - Analysis and Modeling of Aquatic Environments I (3.0 cr)
- EEB 4611 - Biogeochemical Processes (3.0 cr)
- PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)
- WRS 8050 - Special Topics in Water Resources Science (1.0 - 3.0 cr)
- EEB 5609 - Ecosystem Ecology (3.0 cr)

-OR-

Environmental and Occupational Epidemiology
Environmental and occupational epidemiology strives to understand the causal impact of environment and occupation on human health, because public health interventions are most likely to be effective when disease and injury etiology is understood. This concentration requires a minimum of 53 total course credits.

Public Health Core Courses

Key to test abbreviations (GRE, GMAT, MCAT, LSAT, TOEFL, IELTS, MELAB).
PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

**Division Core Courses**
- PUBH 6103 *(Inactive)* (2.0 cr)
- PUBH 6104 - Environmental Health Effects (2.0 cr)
- PUBH 6105 *(Inactive)* (2.0 cr)

**Concentration Program Courses**
- PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
- PUBH 8141 - Doctoral Seminar in Observational Inference (2.0 cr)
- PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

**Electives**
Select electives in consultation with adviser to meet the required minimum of 54 course credits.
- Take 1 or more course(s) from the following:
  - PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
  - PUBH 6121 - Topics: Injury Prevention in the Workplace, Community, and Home (1.0 - 2.0 cr)
  - PUBH 6122 - Seminar: Safety in the Workplace (1.0 cr)
  - PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
  - PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
  - PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
  - PUBH 6173 - Exposure to Physical Agents (2.0 cr)
  - PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)
  - PUBH 6343 - Epidemiologic Methods III (4.0 cr)
  - PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)
  - PUBH 6381 - Genetics in Public Health in the Age of Precision Medicine (2.0 cr)
  - PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
  - PUBH 6387 - Cancer Epidemiology (2.0 cr)
  - PUBH 6806 - Principles of Public Health Research (2.0 cr)
  - PUBH 7400 - Topics: Biostatistics (0.5 - 4.0 cr)
  - PUBH 7435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
- PUBH 7460 - Advanced Statistical Computing (3.0 cr)
- PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)
- PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)

-OR-

**Environmental Health Policy**
Environmental health policy provides broad, multidisciplinary training in environmental health issues, including occupational health, risk assessment, risk management, decision making, and policy analysis. This concentration requires a minimum of 61 total course credits.

**General Requirements**
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  - or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

**Division Core Courses**
- PUBH 6103 *(Inactive)* (2.0 cr)
- PUBH 6104 - Environmental Health Effects (2.0 cr)
- PUBH 6105 *(Inactive)* (2.0 cr)

**Program Course Requirements**
- PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
- PUBH 6115 - Worker Protection Law (1.0 cr)
- PUBH 6116 - Environmental Law (1.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

**Electives**
Select electives in consultation with adviser to meet the minimum of 61 total course credits.
- Take 1 or more course(s) from the following:
  - PUBH 6049 - Legislative Advocacy Skills for Public Health (3.0 cr)
  - PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
  - PUBH 6080 *(Inactive)* (2.0 cr)
  - PUBH 6420 - Introduction to SAS Programming (1.0 cr)
  - PUBH 6634 - Children and Families: Public Health Policy and Advocacy (2.0 cr)

Environmental Infectious Diseases
The study of Environmental Infectious Diseases is concerned with the emergence of foodborne and infectious diseases in the United States and around the world. The environment, and changing conditions in the environment can have a great impact on the distribution and occurrence of infectious diseases. In evaluating the chain of infection, environment may play a key role in reservoir maintenance, as well as a route of transmission through food, water, and air. Minimum 63 total course credits.

Public Health Core Courses
PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses
PUBH 6103 [inactive] (2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 [inactive] (2.0 cr)
PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Concentration Program Courses
PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
PUBH 6181 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)
PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)
PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6380 - Ecology of Infectious Diseases (3.0 cr)
PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
VMED 8090 - Epidemiology of Zoonoses and Diseases Common to Animals and Humans (3.0 cr)

Recommended Electives
Select electives in consultation with adviser to meet the minimum required 63 total course credits.
Take 1 or more course(s) from the following:
• PUBH 6381 - Genetics in Public Health in the Age of Precision Medicine (2.0 cr)
• PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)
• PUBH 6711 - Public Health Law (2.0 cr)
• PUBH 7210 - Topics: Global Food Systems (0.5 cr)
• PUBH 7214 - Principles of Risk Communication (1.0 cr)
• VMED 5420 [inactive] (3.0 cr)
• FSCN 4121 - Food Microbiology (3.0 cr)
• FSCN 4122 - Food Fermentations and Biotechnology (2.0 cr)
• MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
• MICA 8003 - Immunity and Immunopathology (4.0 cr)
• MICA 8010 - Microbial Pathogenesis (3.0 cr)
Occupational and Environmental Health Nursing

Occupational and Environmental Health Nursing provides intensive training for nurses interested in the development, management and evaluation of health services, programs, and policies designed to promote health and prevent work-related injuries and disease. This concentration requires a minimum of 68 total course credits.

Public Health Core Courses
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Division Core Courses
- PUBH 6103 (Inactive) (2.0 cr)
- PUBH 6104 - Environmental Health Effects (2.0 cr)
- PUBH 6105 (Inactive) (2.0 cr)
- PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Concentration Program Courses
- PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
- PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
- PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
- PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)
- PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Recommended Electives
Select electives in consultation with adviser to meet the required minimum of 68 total course credits.
- Take 1 or more course(s) from the following:
  - PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
  - PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
  - PUBH 8325 - Data Processing with PC-SAS (1.0 cr)
  - PUBH 6342 - Epidemiologic Methods II (3.0 cr)
  - PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
  - PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)

Environmental Physiology

This is a trans-disciplinary program emphasizing new perspectives on the study of how humans, as complex heterogeneous biological systems, respond and adapt to their environment. Such study is required to understand the role of the environment in injury and disease, and to shape future technologies and policy for monitoring and protecting human health. Requires a minimum of 52 total course credits.

Public Health Core Courses
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Concentration Program Courses
- PUBH 8163 - Toxicology (5.0 cr)
- PUBH 8165 - Current Topics in Toxicology (1.0 cr)
- PUBH 8166 - Experiences in Toxicology Research (3.0 cr)
- PHSI 5101 - Human Physiology (5.0 cr)
- BIOL 4004 - Cell Biology (3.0 cr)
- BIOC 4331 - Biochemistry I: Structure, Catalysis, and Metabolism in Biological Systems (4.0 cr)
  - or BIOC 8001 - Biochemistry: Structure, Catalysis, and Metabolism (3.0 cr)
- BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)

Recommended Electives
Select electives in consultation with adviser to fulfill the requirement of 52 total course credits.
- Take 1 or more course(s) from the following:
  - ANSC 8344 - Mechanisms of Hormone Action (2.0 cr)
  - PHCL 5111 - Pharmacogenomics (3.0 cr)
  - BIOC 8216 - Signal Transduction and Gene Expression (3.0 cr)
  - PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  - PUBH 6414 - Biostatistical Literacy (3.0 cr)
  - PUBH 6160 - Systems Toxicology (3.0 cr)
• PUBH 6161 - Regulatory Toxicology (2.0 cr)

-OR-

Occupational Injury Prevention Research Training

Occupational Injury Prevention Research Training (OIPRT), in concert with programs in Occupational Medicine, Occupational Health Nursing, and Industrial Hygiene, among others, is part of the nationally funded Midwest Center for Occupational Health and Safety. This program provides a multifaceted approach to advanced academic and research training, with a primary goal to prevent and control occupational injuries. This concentration requires a minimum of 74 total course credits.

Epidemiology Course Requirements

PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6343 - Epidemiologic Methods III (4.0 cr)

Biostatistics Course Requirements

PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)

Environmental Health Sciences Core Course Requirements

PUBH 6103 - Inactive (2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 - Inactive (2.0 cr)

OIPRTP Course Requirements

See main website for more information: http://sph.umn.edu/
PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
PUBH 6121 - Topics: Injury Prevention in the Workplace, Community, and Home (1.0 - 2.0 cr)
PUBH 6122 - Seminar: Safety in the Workplace (1.0 cr)
PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 8100 - Topics: Applied Analyses of Occupational Health Data (1.0 - 4.0 cr)
PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)
PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
PUBH 8141 - Doctoral Seminar in Observational Inference (2.0 cr)
GRAD 8101 - Teaching in Higher Education (3.0 cr)
IE 5511 - Human Factors and Work Analysis (4.0 cr)
IE 5513 - Engineering Safety (4.0 cr)
PSY 5501 - Vocational and Occupational Health Psychology (3.0 cr)

Grant Writers' Seminars and Workshops, L.L.C: Write Winning Grants (2 days)
ERC Interdisciplinary Seminar Series (minimum attendance: 5 of 9 per year)

Thesis Credit Requirement

24 thesis credits required.

PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Electives

Electives chosen in consultation with advisor to meet the minimum required 74 course credits.

Take 1 or more course(s) from the following:

• PUBH 6348 - Writing Research Grants (2.0 cr)
• PUBH 7405 - Biostatistics: Regression (4.0 cr)
• PUBH 7406 - Advanced Regression and Design (4.0 cr)
• PUBH 7407 - Analysis of Categorical Data (3.0 cr)
• PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
• PUBH 7435 - Latent Variable Measurement Models and Path Analysis (3.0 cr)
• PUBH 7450 - Survival Analysis (3.0 cr)
• PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)
• PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
• GRAD 8102 - Practicum for Future Faculty (3.0 cr)
• GRAD 8200 - Teaching and Learning Topics in Higher Education (1.0 cr)
• PUBH 6115 - Worker Protection Law (1.0 cr)
• PUBH 6116 - Environmental Law (1.0 cr)
• PUBH 6123 - Violence Prevention and Control: Theory, Research, and Application (2.0 cr)
• PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
• PUBH 6173 - Exposure to Physical Agents (2.0 cr)
• PUBH 6344 - Completing the Culminating Experience: Secondary Data Analysis (2.0 cr)
• PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)
• PUBH 6806 - Principles of Public Health Research (2.0 cr)
• PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
• PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
• PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)
• PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
• KIN 5122 - Applied Exercise Physiology (3.0 cr)
• KIN 5723 - Psychology of Sport Injury and Rehabilitation (3.0 cr)

-OR-

Occupational Health Services Research and Policy
The OHSRP training program is an innovative collaboration between the Division of Environmental Health Sciences and the Division of Health Policy and Management. The program prepares researchers that will help meet the demand for more rigorous evaluation of workplace policies and programs designed to reduce the nation's burden of occupational illness and injury and to protect and promote the well-being of the American workforce. This concentration requires a minimum of 74 total credits.

Public Health Core Curriculum
PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)
PUBH 6103 (Inactive)(2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 (Inactive)(2.0 cr)
PUBH 8120 - Occupational Health and Safety Research Seminar (1.0 cr)

Supporting Coursework in Health Policy and Management
PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
PUBH 6855 - Medical Sociology (3.0 cr)
PUBH 8801 - Health Services Policy Analysis: Theory (3.0 cr)
PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)

Potential Electives
Select electives in consultation with advisor to meet the required minimum of 74 total credits.
Take 1 or more course(s) from the following:
• PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)
• PUBH 6810 - Survey Research Methods (3.0 cr)
• PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
• PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
• PUBH 6835 - Principles of Health Policy (2.0 cr)
• PUBH 6724 - The Health Care System and Public Health (3.0 cr)
• PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
• PUBH 8140 - Validity Concepts in Epidemiologic Research (2.0 cr)
• PUBH 8142 - Epidemiologic Uncertainty Analysis (2.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Industrial Hygiene
Industrial hygiene is concerned with the health and safety of people at work, and the community at large. Specific concerns are with the recognition, evaluation and control of potential workplace hazards, including chemical, physical, and biological agents; and the potential health threats to the community and the environment.

Required Coursework
The Industrial Hygiene program is concerned with the health and safety of people at work, and the community at large. Specific concerns are with the recognition, evaluation and control of potential workplace hazards, including chemical, physical and biological agents; and the potential health threats to the community and the environment. Requires a minimum of 63 total credits.

Public Health Core Courses
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Choose one of the following courses.
• PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)

Environmental Health Core Courses
PUBH 6103 (Inactive) (2.0 cr)
PUBH 6104 - Environmental Health Effects (2.0 cr)
PUBH 6105 (Inactive) (2.0 cr)
PUBH 7194 - Culminating Experience: Environmental Health (1.0 - 5.0 cr)
PUBH 7196 - Field Experience: Environmental Health (1.0 - 5.0 cr)

Occupational Health and Safety Core Requirements
PUBH 6130 - Occupational Medicine: Principles and Practice (2.0 cr)
PUBH 6150 - Interdisciplinary Evaluation of Occupational Health and Safety Field Problems (3.0 cr)
PUBH 6170 - Introduction to Occupational Health and Safety (3.0 cr)

Industrial Hygiene Program Requirements
PUBH 6172 - Industrial Hygiene Applications (2.0 cr)
PUBH 6173 - Exposure to Physical Agents (2.0 cr)
PUBH 6174 - Control of Workplace Exposure (3.0 cr)
PUBH 6175 - Environmental Measurements Laboratory (2.0 cr)
PUBH 6192 - Measurement and Properties of Air Contaminants (2.0 cr)
PUBH 6193 - Advanced Topics in Human Exposure Science (2.0 cr)

Industrial Hygiene Electives
Select electives in consultation with adviser.
Take 1 or more course(s) from the following:
• PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
• PUBH 6115 - Worker Protection Law (1.0 cr)
• PUBH 6116 - Environmental Law (1.0 cr)
• PUBH 6120 - Injury Prevention in the Workplace, Community, and Home (2.0 cr)
• PUBH 6131 - Working in Global Health (2.0 cr)
• PUBH 6132 - Air, Water, and Health (2.0 cr)
• PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)
• PUBH 6161 - Regulatory Toxicology (2.0 cr)
• PUBH 6176 - Hazardous Materials and Waste Management (2.0 cr)
• PUBH 6182 - Emerging Infectious Disease: Current Issues, Policies, and Controversies (3.0 cr)
• PUBH 6190 - Environmental Chemistry (3.0 cr)
• PUBH 6415 - Biostatistical Methods II (3.0 cr)
• PUBH 6451 - Biostatistics II (4.0 cr)
• PUBH 7220 - Personal Protective Equipment and Respiratory Protection (1.0 cr)
• PUBH 7260 - Ergonomics and the Prevention of Workplace Injuries (1.0 cr)
• CEGE 4561 - Solids and Hazardous Wastes (3.0 cr)
• CEGE 5551 - Environmental Microbiology (3.0 cr)
• IE 5511 - Human Factors and Work Analysis (4.0 cr)
• IE 5513 - Engineering Safety (4.0 cr)
• KIN 5001 - Foundations of Human Factors/Ergonomics (3.0 cr)
• ME 5113 - Aerosol/Particle Engineering (4.0 cr)
• ME 5133 - Aerosol Measurement Laboratory (4.0 cr)
• PA 5721 - Energy and Environmental Policy (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 42 to 48
- This program does not require summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Epidemiology is the science that describes quantitative trends in health and disease for populations, with application in the biological, environmental, behavioral, and social sciences. Epidemiologists generally collaborate with multidisciplinary teams of health professionals, such as physicians, laboratory scientists, exercise physiologists, nutritionists, statisticians, veterinarians, and behavioral scientists.

Epidemiologists analyze public health trends, design and implement studies, and interpret study results for policy and program development. Beyond investigation into the causes of disease, epidemiologists also develop intervention strategies to prevent disease and promote health. Epidemiologists work at both the individual and community levels to translate medical and laboratory data into population trends.

Students complete a 48-credit curriculum for the standard program. Many epidemiology and other health-related graduate-level courses are available as electives. These allow students to develop a specialty emphasis in either specific public health topics or methodological areas. The 48-credit curriculum includes 22 Epidemiology core course credits, 8 SPH core course credits, 8 credits of biostatistics, and elective credits. An alternative, 42-credit curriculum is offered for students who have completed M.D., D.D.S., D.V.M., or Ph.D. work in a related field. The 42-credit curriculum includes 18 Epidemiology core course credits, 8 SPH core course credits, 8 credits of biostatistics, and elective credits. The standard and alternate programs require a final examination.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Minimum qualifications include a baccalaureate degree with coursework in the basic sciences. Occupational health nursing/medicine applicants must have a relevant degree from an accredited school.

Other requirements to be completed before admission:
For more information visit www.sph.umn.edu

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5
GMAT
- Verbal Reasoning score: 10
- Physical Science score: 10
- Biological Reasoning score: 10
- Writing Sample score: 10

MCAT

LSAT

International applicants must submit score(s) from one of the following tests:

TOEFL
- Internet Based - Total Score: 100
- Paper Based - Total Score: 600

IELTS
- Total Score: 7

MELAB
- Final score: 80

Key to test abbreviations (GRE, GMAT, MCAT, LSAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 18 to 22 major credits and 24 to 26 credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: Culminating Experience

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Courses

Epidemiology Core Courses (18 credits)
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 6343 - Epidemiologic Methods III (4.0 cr)
- PUBH 6350 - Epidemiologic Methods III: Lab (1.0 cr)
- PUBH 7394 - Culminating Experience: Epidemiology (1.0 - 6.0 cr)
- PUBH 7396 - Field Experience: Epidemiology (1.0 - 5.0 cr)

"Epi of" Courses
- PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
- PUBH 6386 - Public Health Aspects of Cardiovascular Disease (2.0 cr)
- PUBH 6387 - Cancer Epidemiology (2.0 cr)
- PUBH 6389 - Nutritional Epidemiology (2.0 cr)
- PUBH 6381 - Genetics in Public Health in the Age of Precision Medicine (2.0 cr)
- PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)

Biostatistics Courses (8 credits)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)

Public Health Core (8 credits)
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6101 - Environmental Health (2.0 cr)
- PUBH 6102 - Issues in Environmental Health (2.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Basic Science Course (4 credits)

Not required for students with a prior-earned doctorate in a health-related discipline. Nurses or other health professionals may be
PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)

Electives (8-10 credits)
10 credits required for the standard program.
8 credits required for the accelerated program.

Program Sub-plans
A sub-plan is not required for this program. Students may complete the program with more than one sub-plan.

Global Health Interdisciplinary Concentration Area
The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

Developing countries are currently undergoing profound demographic changes--changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:
- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Course Group 0

Public Health Policy Interdisciplinary Concentration Area
PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can chose courses that emphasize:
- Understanding community dynamics
- Developing advocacy skills for public health
- Analyzing legal and policy structures
- Evaluating and implementing policies and programs
- Influencing community health
- Motivating and educating stakeholders and decision-makers
- Using policy as prevention strategy
- Eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more
information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students are not admitted directly into the master of science program; it is available only by special arrangement with the program. Students interested in a master's degree in epidemiology should apply for the master of public health (M.P.H.) degree through the School of Public Health (SPH). For more information on the M.P.H. program, visit the SPH website at www.sph.umn.edu.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Please visit www.sph.umn.edu for admission requirements.

Special Application Requirements:
Students are not admitted directly into the master of science program; it is available only by special arrangement with the program. Students interested in a master's degree in epidemiology should apply for the master of public health (M.P.H.) program through the School of Public Health (SPH). For more information on the M.P.H. degree, visit the SPH website at www.sph.umn.edu.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan B: Plan B requires 22 major credits and 8 credits outside the major. The final exam is oral. A capstone project is required.
Capstone Project: A master's project is required, equivalent to approximately 4 semester credits.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 1 semesters must be completed before filing a Degree Program Form.

These requirements apply only to students admitted by special arrangement with the program; students are not admitted directly into the master's program. Students interested in a master's degree in epidemiology should apply for the master of public health (MPH) program through the School of Public Health (SPH). For more information on the MPH degree, please visit the SPH website.
Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission to the epidemiology graduate minor is contingent upon enrollment in a University of Minnesota master's or doctoral degree-granting program. Consult first with the program advisor about the advisability of an epidemiology minor. For information regarding the minor, and to connect with the directors of graduate studies for the master's or doctoral minor regarding requirements, contact the epidemiology graduate program coordinator at epichst@umn.edu.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

All minor field coursework must be taken A/F.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Required Coursework
Take the following courses for a total of 6 credits.
If PUBH 6320 is selected, a minimum grade of A- is required.
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6342 - Epidemiologic Methods II (3.0 cr)
Electives
Take at least one of the following courses:

- PUBH 6381 - Genetics in Public Health in the Age of Precision Medicine (2.0 cr)
- or PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
- or PUBH 6386 - Public Health Aspects of Cardiovascular Disease (2.0 cr)
- or PUBH 6387 - Cancer Epidemiology (2.0 cr)
- or PUBH 6389 - Nutritional Epidemiology (2.0 cr)
- or PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)

**Doctoral Minor Options**

The doctoral minor can be completed in one of two ways: Option 1 is for students with prior epidemiology training; Option 2 is for students without prior epidemiology training.

**Option 1**

**Required Coursework**

Take the following courses for a total of 10 credits:

- PUBH 8341 - Advanced Epidemiologic Methods: Concepts (3.0 cr)
- PUBH 8342 - Advanced Epidemiologic Methods: Applications (3.0 cr)
- PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)

**Electives**

Take at least 2 credits in an epidemiology- or biostatistics-related area, as approved by the epidemiology director of graduate studies.

- PUBH 5xxx
- PUBH 6xxx
- PUBH 7xxx
- PUBH 8xxx

**-OR-**

**Option 2**

**Required Coursework**

Take the following 3 courses for at least 10 credits:

- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)

**Electives**

Take at least two credits in an epidemiology- or biostatistics-related area, as approved by the epidemiology director of graduate studies.

- PUBH 5xxx
- PUBH 6xxx
- PUBH 7xxx
- PUBH 8xxx
**Twin Cities Campus**

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 61
- This program requires summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The epidemiology PhD program is designed for students interested in research and teaching careers in the health sciences. Students select one of two formal tracks: clinical/biological epidemiology (CBE) or social/behavioral epidemiology (SBE). The two tracks, each with a minimum of 61 credits, emphasize advanced epidemiologic design, methodology, and analytic skills.

The social/behavioral epidemiology track focuses on origins and development of human behavior patterns and how they are influenced and formed by personality, family, culture, and environment. The clinical/biological epidemiology track focuses on the etiology of diseases, particularly cardiovascular, cancer, genetics, and infectious diseases. A detailed description of the details related to each track may be obtained online or by contacting the major coordinator at epichstu@umn.edu.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

For the doctoral program, applicants must have completed or be about to complete a master's degree in a related field.

**Special Application Requirements:**
Because of the program's strong emphasis on methodology, quantitative aptitude is very important. This can be demonstrated by scoring at or above the 70th percentile on the quantitative section of the GRE, along with satisfactory grades in college-level quantitative courses. At least three recommendations (form and separate letter) from faculty and/or work supervisors with knowledge of the applicant's scholastic and professional capabilities and potential, and a statement of goals and objectives (letter of intent) for seeking a career in epidemiology are also required.

In addition to the above materials, applicants for the Ph.D. program must submit a separate essay (statement of research interests) beyond what is required for the SOPHAS application process that provides evidence of their potential to conduct original research in a specific epidemiologic area and, if possible, that indicates an interest in particular methodologies or study designs. Serious doctoral applicants are encouraged to contact the major coordinator at epichstu@umn.edu before applying. Students begin their studies in the fall semester. Applications must be completed by December 1 of the year prior to beginning the doctoral program for scholarship consideration; the final deadline is February 1.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Analytical Writing: 4

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
- Paper Based - Total Score: 600
  - IELTS
    - Total Score: 7
  - MELAB
    - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
37 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Students may select one of two formal tracks; both have an applied perspective that emphasizes study design, measurement, quantitative analysis, and data interpretation. Social/behavioral epidemiology focuses on origins and development of human behavior patterns and how they are influenced and formed by personality, family, culture, and environment. Clinical/biological epidemiology focuses on the biological causes of diseases, especially determinants of cardiovascular disease, cancer, infectious diseases, and genetic epidemiology.

The PhD program includes a minimum curriculum of 61 credits. Students must pass written and oral preliminary examinations, serve as a teaching assistant for one semester, write and defend a dissertation, and prepare a first-authored manuscript for publication.

Required Coursework
Take the following courses for a total of 13 credits:
- PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
- PUBH 6348 - Writing Research Grants (2.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 8341 - Advanced Epidemiologic Methods: Concepts (3.0 cr)
- PUBH 8342 - Advanced Epidemiologic Methods: Applications (3.0 cr)

Take one of the following teaching courses for at least 1 credit:
- GRAD 8101 - Teaching in Higher Education (3.0 cr)
- or GRAD 8200 - Teaching and Learning Topics in Higher Education (1.0 cr)

Thesis Credits
Take at least 24 doctoral thesis credits.
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Clinical/Biological Epidemiology
Clinical/biological epidemiology focuses on the biological causes of diseases, especially determinants of cardiovascular disease, cancer, infectious diseases, and genetic epidemiology.

Clinical/Biological Track
A minimum of 23 credits is required.

Biological Methods/Statistics Requirement (6 credits minimum)
Take one of the following required courses:
- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
- or PUBH 6363 - Design and Analysis of Cluster-Randomized Trials in Epidemiology (3.0 cr)
Choose additional credits from the following to complete the biological methods/statistics requirement:

- PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)
- PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
- PUBH 7407 - Analysis of Categorical Data (3.0 cr)
- PUBH 6915 - Nutrition Assessment (2.0 cr)
- PUBH 7445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
- PUBH 8141 - Doctoral Seminar in Observational Inference (2.0 cr)
- PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)

**Content Area Requirement (4 credits minimum)**
Take at least 4 credits from the following:

- PUBH 6386 - Public Health Aspects of Cardiovascular Disease (2.0 cr)
- PUBH 6387 - Cancer Epidemiology (2.0 cr)
- PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
- PUBH 6381 - Genetics in Public Health in the Age of Precision Medicine (2.0 cr)
- PUBH 6389 - Nutritional Epidemiology (2.0 cr)
- PUBH 6140 - Occupational and Environmental Epidemiology (2.0 cr)

**Additional Credits (13 credits minimum)**
Select courses in consultation with the advisor. Courses can include biological methods/statistics courses listed above not used to satisfy the biological methods/statistics requirement, or other appropriate courses.

---

**Social/Behavioral Epidemiology**
Social/behavioral epidemiology focuses on origins and development of human behavior patterns and how they are influenced and formed by personality, family, culture, and environment.

**Social/Behavioral Track**
A minimum of 23 credits is required.

**Behavioral Methods/Statistics Requirement (6 credits minimum)**
Take one of the following required courses:

- PUBH 6363 - Design and Analysis of Cluster-Randomized Trials in Epidemiology (3.0 cr)
- PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)

Choose additional credits from the following to complete the Behavioral Methods/Statistics requirement:

Take 1 or more course(s) from the following:

- PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)
- PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
- PUBH 7407 - Analysis of Categorical Data (3.0 cr)
- PUBH 6915 - Nutrition Assessment (2.0 cr)
- PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)

**Content Area Requirement (4 credits minimum)**
Take at least 4 credits from the following:

- PUBH 6333 - Principles of Human Behavior I (2.0 cr)
- PUBH 6334 - Human Behavior II (2.0 cr)

**Additional Credits (13 credits minimum)**
Select courses in consultation with the advisor. Courses can include biological methods/statistics courses listed above not used to satisfy the biological methods/statistics requirement, or other appropriate courses.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 15
- This program does not require summer semesters for timely completion.
- Degree: Global Health PBacc Certificate

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The Global Health Certificate focuses on knowledge, skills, and attitudes to address health issues that transcend national boundaries, and that develop and implement solutions to health problems that requires global cooperation.

The Global Health Certificate is designed for students who have a strong interest in global health, who have a desire to understand cultures, and who want to experience first-hand a global field experience which may prepare them for work in a global setting. Many students may want to complete the Certificate to complement their graduate degree.

It is increasingly recognized that issues that affect health transcend national boundaries, and that development and implementation of solutions to such health problems requires global cooperation. Global health represents an interdisciplinary approach that embraces both disease prevention in populations and clinical care of individuals, with a strong emphasis on health equity and health as a public good.

**Accreditation**

This program is accredited by Council on Education for Public Health (CEPH)

**Program Delivery**

This program is available:

- partially online (between 50% to 80% of instruction is online)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:

Applicants must hold a baccalaureate degree.

**Special Application Requirements:**

Applicants must submit to SOPHAS Express, a centralized online application service:

- Completed SOPHAS Express application and application fee, designating the University of Minnesota School of Public Health
- Personal statement describing the applicant’s reason for applying, career goals, and how the certificate will help them achieve their goals
- One letter of recommendation
- Unofficial transcripts of record from each college/university where a degree was earned. (If admitted, official transcripts will need to be sent directly to the School of Public Health.)
- Resume or C.V.

For detailed application instructions and requirements visit [www.sph.umn.edu](http://www.sph.umn.edu).

International applicants must submit score(s) from one of the following tests:
TOEFL
- Internet Based - Total Score: 100
- Paper Based - Total Score: 600
IELTS
- Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

Coursework Requirements
Foundations Course (2 Credits)
Take one course from the following list for at least 2 credits.
PUBH 6108 - Foundations of Global Health (0.0 - 2.0 cr)
or PUBH 6134 - Sustainable Development and Global Public Health (2.0 cr)

Other Required Courses (3 Credits)
Take the following courses for a total of 3 credits:
PUBH 6131 - Working in Global Health (2.0 cr)
PUBH 6231 - Global Health Capstone (1.0 cr)

Applied Practice Experience (2 Credits)
Take 2 credits of field experience related to global health.
PUBH 7296 - Applied Practice Experience: Public Health Practice (1.0 - 8.0 cr)
or Other Applied Practice Experience course in the SPH. Please consult with the Global Health certificate program staff about seeking approval.

Electives (8 Credits)
Students must complete a minimum of 8 elective credits. Choose from the following list, or select other global health-related courses in consultation with the Global Health certificate staff.
Take 8 or more credit(s) from the following:
- PUBH 6085 - Alcohol and Tobacco: Ongoing Threats to Global Health (2.0 cr)
- PUBH 6132 - Air, Water, and Health (2.0 cr)
- PUBH 6290 - International Humanitarian Crisis Simulation (1.0 cr)
- PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
- PUBH 6601 - Born a Girl: Global Women's Health (1.0 cr)
- PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)
- PUBH 6732 - Topics and Methods in Global Health Assessment (2.0 cr)
- PUBH 6906 - Global Nutrition (2.0 cr)
- PUBH 7262 - Globalization and Health (1.0 cr)
- PA 5451 - Immigration, Health and Public Policy (3.0 - 4.0 cr)

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Association of Schools and Programs of Public Health describes global health as the interdisciplinary and cross-cultural approach to studying the health of populations across the world, irrespective of national or political boundaries. This minor focuses on the basic tenets of global health and gaining the population health skills necessary to promote the health, well being, safety, and wellness of populations at the local and global levels.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission to the global public health minor is contingent upon prior admission to a master's or doctoral degree-granting program at the University of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Required Coursework (5 Credits)
All students pursuing the minor must complete the following for at least 5 credits:
- PUBH 6131 - Working in Global Health (2.0 cr)
- PUBH 6231 - Global Health Capstone (1.0 cr)
Take PUBH 6108 for 2 credits, if selected as the required foundations course.
- PUBH 6108 - Foundations of Global Health (0.0 - 2.0 cr)
- or PUBH 6134 - Sustainable Development and Global Public Health (2.0 cr)
Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Electives (2 Credits)
Take at least 2 elective credits to complete the 7-credit minimum for the master's-level minor. Other courses may be considered, with program staff approval.
Take 2 or more credit(s) from the following:
• PUBH 6132 - Air, Water, and Health (2.0 cr)
• PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
• PUBH 6365 - Global Challenges in Infectious Disease Epidemiology (2.0 cr)
• PUBH 6390 - Topics: Epidemiology (0.5 - 4.0 cr)
• PUBH 6732 - Topics and Methods in Global Health Assessment (2.0 cr)
• PUBH 6906 - Global Nutrition (2.0 cr)
• PUBH 7262 - Globalization and Health (1.0 cr)
• PA 5451 - Immigration, Health and Public Policy (3.0 - 4.0 cr)

Doctoral
Electives (7 Credits)
Take at least 7 elective credits to complete the 12-credit minimum for the doctoral-level minor. Other courses may be considered, with program staff approval.
Take 7 or more credit(s) from the following:
• PUBH 6132 - Air, Water, and Health (2.0 cr)
• PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
• PUBH 6365 - Global Challenges in Infectious Disease Epidemiology (2.0 cr)
• PUBH 6390 - Topics: Epidemiology (0.5 - 4.0 cr)
• PUBH 6732 - Topics and Methods in Global Health Assessment (2.0 cr)
• PUBH 6906 - Global Nutrition (2.0 cr)
• PUBH 7262 - Globalization and Health (1.0 cr)
• PA 5451 - Immigration, Health and Public Policy (3.0 - 4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 42 to 60
- This program requires summer semesters for timely completion.
- Degree: Master of Healthcare Administration

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The full-time master of healthcare administration (M.H.A.) program is appropriate for applicants with limited or no healthcare work experience, or individuals who wish to make a career change from industries other than health care. Now ranked second in the nation by U.S. News & World Report, the program is accredited by the CAHME.

The program's consistently high rankings are a reflection of many factors--an outstanding faculty of researchers and practitioners, location in one of the nation's centers of healthcare innovation, an extraordinary alumni association, and a track record of educating outstanding leaders for the healthcare industries.

Accreditation
This program is accredited by Commission on Accreditation of Healthcare Management Education (CAHME)

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Full-time program applicants should have a strong commitment to managing people and resources to create and sustain outstanding healthcare services and organizations. Strong quantitative and communication skills are essential; prior experience in health care is not required.

Visit SPH for detailed application requirements at www.sph.umn.edu

Special Application Requirements:
For the executive program: At least three years of management or clinical leadership experience in a healthcare organization is required. The program reserves the right to require the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT) as a part of the admissions process.

For the full-time program: To prepare for the program's rigorous curriculum, the faculty highly recommends the following coursework prior to matriculation:
- Statistics
- Accounting
- Microeconomics
- Finance

Applicants must submit their test score(s) from the following:
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- **IELTS**
  - Total Score: 7
- **MELAB**
  - Final score: 80

Key to test abbreviations (GRE, GMAT, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 42 to 60 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** Please see website for information: www.sph.umn.edu

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

**Required Courses**

- PUBH 6560 - Operations Research and Quality in Health Care (3.0 cr)
- PUBH 6556 - Health and Health Systems (3.0 cr)
- PUBH 6541 - Statistics for Health Management Decision Making (3.0 cr)
- PUBH 6562 - Information Technology in Health Care (2.0 cr)
- PUBH 6535 - Managerial Accounting for Health Services (3.0 cr)
- PUBH 6547 - Health Care Human Resources Management (2.0 cr)
- PUBH 6557 - Health Finance I (3.0 cr)
- PUBH 6555 - Topics in Health Economics (2.0 cr)
- PUBH 6562 - Information Technology in Health Care (2.0 cr)
- PUBH 6565 - Innovation of Healthcare Services (2.0 cr)
- PUBH 6568 - Interprofessional Teamwork in Health Care (2.0 cr)
- PUBH 6564 - Private Purchasers of Health Care: Roles of Employers and Health Plans in U.S. Health Care System (2.0 cr)
- PUBH 6553 - Health Care Management Ethics (1.0 cr)
- PUBH 6596 - Legal Considerations in Health Services Organizations (2.0 cr)

**Advanced Problem Solving or New Product Design (Full-time MHA students only)**

Students choose between the full-time or executive MHA program. 42 credits are required for the Executive MHA program, and 60 required for the full-time program. Students in the full-time program have the option of choosing the Advanced Problem Solving or New Product Design EMPHASIS with the consent of their adviser.

**Executive MHA**

The Executive MHA is specifically designed for practicing executives, physicians, and other healthcare professionals seeking to advance their management and leadership capabilities. This is a 42-credit, 25-month program.

- PUBH 7565 - Health Care Delivery, Design & Innovation (2.0 cr)
- PUBH 7556 - Health and Health Systems (2.0 cr)
- PUBH 7551 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 7535 - Managerial Accounting for Health Services (3.0 cr)
PUBH 7566 - The Henry Capstone: Core Concepts in Managing Health Care Organizations (2.0 cr)
PUBH 7536 - Health Finance I (3.0 cr)
PUBH 7576 - Legal Considerations in Health Services Organizations (2.0 cr)
PUBH 7568 - Interdisciplinary Teamwork in Health Care (2.0 cr)
PUBH 7569 - Health Care Policy (1.0 cr)
PUBH 7541 - Statistics for Health Management Decision Making (3.0 cr)
PUBH 7537 - Health Finance II (3.0 cr)
PUBH 7564 - Private Purchasers of Health Care (2.0 cr)
PUBH 7547 - Health Care Human Resource Management (2.0 cr)
PUBH 7555 - Topics in Health Economics (2.0 cr)
PUBH 7562 - Information Technology in Health Care (2.0 cr)
PUBH 7571 - Organizational Integration in Health Care Delivery (2.0 cr)
PUBH 7572 - Health Care Strategies in Competitive Markets (2.0 cr)
PUBH 7573 - Managing the Embedded Medical Practice (2.0 cr)
PUBH 7553 - Health Care Management Ethics (1.0 cr)
PUBH 6570 - Healthcare Administration (1.0 - 4.0 cr)

-OR-

Full-time MHA
This program is appropriate for applicants with limited or no healthcare work experience or individuals who wish to make a career change. This is a 60-credit, two-year program.

Year 1: An Introduction to Healthcare Administration
- PUBH 6544 - Principles of Problem Solving in Health Services Organizations (3.0 cr)
- PUBH 7596 - Clerkship in Health Care Administration (2.0 cr)
- Electives (2-4 cr) - can take up to 4 elective credits during Year I

Year II: Advanced Courses and Specialization in Healthcare Administration
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
- PUBH 6568 - Interprofessional Teamwork in Health Care (2.0 cr)
- ENTR 6041 - Initiating New Product Design and Business Development (2.0 - 4.0 cr)
- PUBH 6554 - Healthcare Strategy and Marketing (3.0 cr)
- PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)
- Electives (2-4 cr) - can take up to 4 elective credits during Year II
- ENTR 6041 - Initiating New Product Design and Business Development (2.0 - 4.0 cr)
  or PUBH 6577 (2 cr) Advanced Problem Solving.

Joint- or Dual-degree Coursework: Master of Healthcare Administration (MHA) and Master of Business Administration (MBA)
Student may take a total of 24 credits in common among the academic programs.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 7
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

The Health Equity Minor is a graduate minor that allows students to specialize in studying health disparities and inequalities. A firm understanding of the structural factors that cause health inequalities will help prepare students to enter the professional world of public health as an effective advocate.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Declaring this minor is contingent upon prior admission to a University master’s or doctoral degree-granting program.

Students should first consult with their program advisor, then contact the Health Equity Director of Graduate Studies regarding requirements.

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

**Program Requirements**
Use of 4xxx courses towards program requirements is not permitted.

**Required Capstone Seminar (1 Credit)**
All students pursuing the minor must take the following required seminar:

- PUBH 6772 - Health Disparities Capstone Seminar (1.0 cr)

**Program Sub-plans**
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

**Master’s**
**Additional Coursework (6 Credits)**
Select at least 6 credits from the following, in consultation the advisor and the health equity director of graduate studies, to complete the 7-credit minimum requirement:
CSPH 5115 - Cultural Awareness, Knowledge and Health (3.0 cr)
or PUBH 6066 - Building Communities, Increasing Health: Preparing for Community Health Work (2.0 cr)
or PUBH 6055 - Social Inequalities in Health (2.0 cr)
or PUBH 6855 - Medical Sociology (3.0 cr)

Doctoral
Required Coursework (10 Credits)
Complete the following required courses for a total of 10 credits:
CSPH 5115 - Cultural Awareness, Knowledge and Health (3.0 cr)
PUBH 6066 - Building Communities, Increasing Health: Preparing for Community Health Work (2.0 cr)
PUBH 6055 - Social Inequalities in Health (2.0 cr)
PUBH 6855 - Medical Sociology (3.0 cr)

Electives (1 Credit)
Select at least 1 elective credit, in consultation with the advisor and the health equity director of graduate studies, to complete the 12-credit minimum requirement.

PubH 6000 Topics: Urban Health and Social Policy (2 cr)
PubH 6570 Topics: Introduction to Population Health: A Health System Perspective
PUBH 6000 - Topics: Community Health Promotion (0.5 - 4.0 cr)
or PUBH 6370 - Social Epidemiology (2.0 cr)
or PUBH 6570 - Healthcare Administration (1.0 - 4.0 cr)
or PUBH 6601 - Born a Girl: Global Women's Health (1.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 34
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The MS in Health Services Research, Policy & Administration is for people with an analytical focus who enjoy research and data-driven approaches to solving health care problems.

Our program offers specializations that focus on health economics, access, quality, and social determinants of health, disparities, health policy, quality improvement, data science, analytics, and big data. We will accommodate your interests and fuel your passion. Use this degree to transition into practice or into a doctoral degree.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 144
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan B: Plan B requires 34 major credits and 0 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: There are two options for completing the master's project: 1) An industry-specific project where the student works on a project with a local organization and presents their findings. 2) Independent research conducted on a relevant topic of interest, with the guidance of the academic advisor.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Good math skills are essential. Previous coursework in algebra, statistics, or other quantitative coursework is recommended.

Required Curriculum (21 Credits)

Coursework (19 Credits)
Take at least 19 credits from the following list:
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 6724 - The Health Care System and Public Health (3.0 cr)
- PUBH 6250 - Foundations of Public Health (2.0 cr)
- PUBH 6341 - Epidemiologic Methods I (3.0 cr)
  - or PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)
  - or PUBH 6864 - Conducting Health Outcomes Research (3.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Plan B Project (2 Credits)
Take 2 Plan B project credits, in consultation with the advisor.
- PUBH 7894 - MS in Health Services Research, Policy, and Administration Plan B Project (1.0 - 5.0 cr)

Specialization Areas (6 to 11 Credits)
Select one of the following specialization areas, or design and propose a specialization area in consultation with the advisor.

Cost Effectiveness (11 Credits)
Take the following specialization courses for 11 credits:
- PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
- PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- PUBH 6809 - Advanced Methods in Health Decision Science (3.0 cr)
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
  - or PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)
  - or PUBH 6864 - Conducting Health Outcomes Research (3.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Health Care Quality Improvement/Operations Research (8 Credits)
Take the following specialization courses for 8 credits:
- PUBH 6560 - Operations Research and Quality in Health Care (3.0 cr)
- PUBH 6765 - Continuous Quality Improvement: Methods and Techniques (3.0 cr)
- PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)
  - or PUBH 6560 - Operations Research and Quality in Health Care (3.0 cr)
- PUBH 6765 - Continuous Quality Improvement: Methods and Techniques (3.0 cr)
- PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)

Health Services Research and Evaluation (6 Credits)
Take 6 credits of specialization courses from the following list:
- PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
  - or PUBH 6863 - Understanding Health Care Quality (2.0 cr)
  - or PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)
  - or PUBH 6810 - Survey Research Methods (3.0 cr)
  - or PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)
  - or PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)
  - or PUBH 6864 - Conducting Health Outcomes Research (3.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
  - or PUBH 6806 - Principles of Public Health Research (2.0 cr)
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
  - or PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
  - or PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)

Health Policy (9 Credits)
Take the following specialization courses for at least 9 credits:
- PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
- PUBH 6711 - Public Health Law (2.0 cr)
- PUBH 6702 - Integrative Leadership Seminar (3.0 cr)
- PUBH 6835 - Principles of Health Policy (2.0 cr)
  - or PUBH 8802 - Health Services Policy Analysis: Applications (2.0 cr)
  - or PUBH 6832 - Economics of the Health Care System (3.0 cr)
  - or PUBH 6555 - Topics in Health Economics (2.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)
  - or PUBH 6864 - Conducting Health Outcomes Research (3.0 cr)
  - or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
  - or PUBH 6806 - Principles of Public Health Research (2.0 cr)
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
  - or PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)

Health Economics (6 Credits)
Take at least 6 specialization credits.
- PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
or PUBH 6555 - Topics in Health Economics (2.0 cr)
or Social Determinants of Health (6 Credits)
Take 6 credits of specialization courses from the following list:
PUBH 6055 - Social Inequalities in Health (2.0 cr)
or PUBH 6066 - Building Communities, Increasing Health: Preparing for Community Health Work (2.0 cr)
or PUBH 6675 - Women's Health (2.0 cr)
or CSPH 5115 - Cultural Awareness, Knowledge and Health (3.0 cr)
or PUBH 6855 - Medical Sociology (3.0 cr)
or PUBH 6634 - Children and Families: Public Health Policy and Advocacy (2.0 cr)
or PUBH 6804 - Community Mental Health (2.0 cr)
or PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
or PUBH 6627 - Sexuality Education: Criteria, Curricula, and Controversy (1.0 cr)

Joint- or Dual-degree Coursework: JD/MS-HSRP&AStrong>Student may take a total of 8 credits in common among the academic programs.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The HSRP&A minor is available to students who are interested in the social, political, and economic forces that affect the operations, financing, and delivery of health care. This minor offers a high degree of flexibility in course selection, which can be tailored to individual interests and goals of the student.

Doctoral students have the option of declaring the standard HSRP&A minor or the HSRP&A minor with a focus in Health Economics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
The Health Services Research, Policy, and Administration graduate minor is contingent upon enrollment and good academic standing in a University master's or doctoral degree-granting program.

Students should confer with their program advisor about the advisability of an HSRP&A minor before contacting the HSRP&A director of graduate studies or graduate program coordinator. Approval of the HSRP&A director of graduate studies is required.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Master’s Minor Requirements
Take at least 6 HSRP&A credits, selected in consultation with the HSRP&A director of graduate studies, from the following course number sequences: PubH 65xx, PubH 67xx, PubH 68xx, or PubH 88xx.

PUBH 6xxx
Doctoral Minor -- Standard (Option 1)

Required Courses
Take one of the following two courses:
- PUBH 6556 - Health and Health Systems (3.0 cr)
- or PUBH 6724 - The Health Care System and Public Health (3.0 cr)
Take one of the following two courses:
- PUBH 8801 - Health Services Policy Analysis: Theory (3.0 cr)
- or PUBH 8802 - Health Services Policy Analysis: Applications (2.0 cr)

Electives
To complete the 12-credit minimum, select HSRP&A electives in consultation with the HSRP&A director of graduate studies from the following course number sequences: PubH 65xx, PubH 67xx, PubH 68xx, or PubH 88xx
- PUBH 6xxx
- PUBH 8xxx

Doctoral Minor -- Health Economics Focus (Option 2)

Take the following courses for 6 credits:
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
- PUBH 8821 - Health Economics II (3.0 cr)

Electives
To complete the 12-credit minimum, select at least 6 credits in consultation with the HSRP&A director of graduate studies from the following:
- PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
- PUBH 8801 - Health Services Policy Analysis: Theory (3.0 cr)
- PUBH 8811 - Research Methods in Health Care (3.0 cr)

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 69 to 82
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Health services research is a multidisciplinary field of study. Health services researchers examine how social factors, government policies, financing systems, organizational structures, and personal behaviors affect access to needed care, the quality of care provided, and the cost of care delivery. The focus of research is broad and includes individuals, families, providers, healthcare organizations, communities, and populations. The field of health services research is ultimately interested in both "health," understood as health status and well-being, as well as "health care," understood as the effective delivery of healthcare services.

The doctoral program in health services research, policy, and administration is primarily for students interested in academic careers or senior research positions in government or the private sector. The core curriculum is a multidisciplinary examination of the social, political, and economic forces that affect the organization, financing, and delivery of health care services. The emphasis is on theory, modeling, and quantitative methods. Coursework is complemented by the student's involvement with faculty on health services research projects, through weekly academic research seminars, doctoral colloquia, and conference presentations.

Students come from a variety of educational backgrounds, including decision sciences, economics, political science, sociology, business, engineering, and public affairs. Strong quantitative skills are essential.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Preferred GRE scores from exams taken before August 1, 2012 are: Verbal: 600, Quantitative: 600, Analytical Writing: 5.0. Minimum GRE scores taken after Aug. 1, 2012 are: 300 (combined verbal and quantitative), and 4.0 Analytical Writing.

The PhD program requires prerequisites in calculus and statistics. Applicants who have not completed the prerequisites, but are otherwise qualified for admission, are required to take relevant courses at the University or another accredited institution before beginning the program.

Special Application Requirements:
Please visit www.sph.umn.edu for admission requirements

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 153
  - General Test - Quantitative Reasoning: 144
  - General Test - Analytical Writing: 5
International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
33 to 46 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

Required Coursework
Take all of the following core courses, including the biostatistics or econometrics series, for a total of 31 credits.
- PUBH 8810 - Research Studies in Health Care (3.0 cr)
- PUBH 8811 - Research Methods in Health Care (3.0 cr)
- PUBH 8830 - Writing for Research (2.0 cr)
- PUBH 8831 - Writing for Research (2.0 cr)
- PUBH 6832 - Economics of the Health Care System (3.0 cr)
- PUBH 6855 - Medical Sociology (3.0 cr)
- PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
- PUBH 8801 - Health Services Policy Analysis: Theory (3.0 cr)
- PUBH 8341 - Advanced Epidemiologic Methods: Concepts (3.0 cr)

Biostatistics and Econometrics Options
Complete the 31-credit core course requirement by taking the biostatistics or econometrics series.

Biostatistics
To complete the biostatistics series, take the following courses for 8 credits:
- PUBH 7401 - Fundamentals of Biostatistical Inference (4.0 cr)
- PUBH 7402 - Biostatistics Modeling and Methods (4.0 cr)

or Econometrics
To complete the econometrics series, take the following courses for 8 credits:
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)

Thesis Credits
Take at least 24 doctoral thesis credits.
- PUBH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Concentration Areas
Multidisciplinary Social Science

Required Concentration Coursework
- PUBH 8805 - Sociological Theory in Health Services Research (3.0 cr)
- APEC 5151 - Applied Microeconomics: Firm and Household (3.0 cr)

Required Theory Course
Choose a theory course from the list below, in consultation with your advisor.
PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
or PUBH 8821 - Health Economics II (3.0 cr)
or APEC 8203 - Applied Welfare Economics and Public Policy (3.0 cr)
or SOC 8701 - Sociological Theory (4.0 cr)
or SOC 8721 - Social Psychology: Micro-Sociological Approaches to Inequalities and Identities (3.0 cr)
or PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)
or PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
or PUBH 6809 - Advanced Methods in Health Decision Science (3.0 cr)

Supporting Program Requirement
Take at least 12 outside credits in consultation with the advisor and concentration faculty.

-OR-

Health Organizations and Management Science
Required Concentration Coursework
Take 6 - 8 credit(s) from the following:
• MGMT 8301 - Seminar in Organizational Behavior (4.0 cr)
• MGMT 8302 - Seminar in Organizations Theory (4.0 cr)
• SOC 8745 - Research on Quality Management (3.0 cr)
• PUBH 8894 - Directed Research: Health Services Research, Policy, and Administration (1.0 - 8.0 cr)
• HRIR 8802 - Core Seminar: Organizational Behavior (4.0 cr)
• IDSC 8721 - Behavioral Decision Theory (3.0 cr)

Required Methods Foundation Course
Take one of the following methods foundations courses:
SOC 8412 - Social Network Analysis: Theory and Methods (3.0 cr)
or EPSY 5247 - Qualitative Methods in Educational Psychology (3.0 cr)
or HRIR 8812 - Core Seminar: Research Methods in Work and Organizations (4.0 cr)

Supporting Program Requirement
Take at least 12 outside credits in consultation with the advisor and concentration faculty.

-OR-

Health Decision Science
Required Concentration Coursework
PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
PUBH 6809 - Advanced Methods in Health Decision Science (3.0 cr)

Additional Coursework
Take 2 or more credit(s) from the following:
• IDSC 8721 - Behavioral Decision Theory (3.0 cr)
• IDSC 8511 - Conceptual Topics and Research Methods in Information and Decision Sciences (3.0 cr)

Supporting Program Requirement
Take at least 12 outside credits from the list below, or other outside coursework, in consultation with the advisor and concentration faculty.
IE 5112 {Inactive} (3.0 cr)
PUBH 7450 - Survival Analysis (3.0 cr)
PUBH 7420 - Clinical Trials: Design, Implementation, and Analysis (3.0 cr)
PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)

-OR-

Sociology of Health and Illness
Required Concentration Coursework
Theoretical Foundations Courses
Take 6 or more credit(s) from the following:
• PUBH 8805 - Sociological Theory in Health Services Research (3.0 cr)
• SOC 8701 - Sociological Theory (4.0 cr)
• SOC 8731 - Sociology of Knowledge (3.0 cr)
• SOC 8211 - The Sociology of Race & Racialization (3.0 cr)
• MGMT 8302 - Seminar in Organizations Theory (4.0 cr)

Supporting Program Requirements
Take at least 12 outside credits in consultation with the advisor and concentration faculty. At least 8 credits must be from an area of specialization, and at least 4 credits must be advanced methodology coursework.

Specialization Courses
Take at least 8 credits from the following list:
• SOC 8735 - Sociology of Culture (3.0 cr)
SOC 8590 - Topics in Life Course Sociology (3.0 cr)
SOC 8390 - Topics in Political Sociology (3.0 cr)
SOC 8101 - Sociology of Law (3.0 cr)
SOC 8290 - Topics in Social Stratification (3.0 cr)
SOC 8501 - Sociology of the Family (3.0 cr)
SOC 8221 - Sociology of Gender (3.0 cr)

Advanced Methodology Courses
Take at least 4 credits from the following list:

PSY 8881 - Seminar: Quantitative and Psychometric Methods (3.0 cr)
PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
PUBH 6811 - Health Disparities Research: Measures, Methods, and Data (2.0 cr)
POL 8126 - Qualitative Methods (3.0 cr)
PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)
PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)

-OR-

Clinical Outcomes Research

Required Concentration Coursework

PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6343 - Epidemiologic Methods III (4.0 cr)
PUBH 6864 - Conducting Health Outcomes Research (3.0 cr)
PUBH 6863 - Understanding Health Care Quality (2.0 cr)
PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)

Supporting Program Requirement
Take at least outside 12 credits in consultation with the advisor and area of concentration faculty.
Take 12 or more credit(s) from the following:
• PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
• PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
• PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
• PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
• PUBH 6810 - Survey Research Methods (3.0 cr)
• PUBH 7450 - Survival Analysis (3.0 cr)

-OR-

Health Policy and Analysis

Required Concentration Coursework

PUBH 8802 - Health Services Policy Analysis: Applications (2.0 cr)

Supporting Program Requirement
Take at least outside 12 credits in consultation with the advisor and concentration faculty. Students can choose to complete the supporting program requirement one of two ways: a methods focus or a topic-specific focus.

Methods Focus
Students choosing this option are strongly encouraged to take PUBH 6845 and PUBH 8804.
Take 12 or more credit(s) from the following:
• PUBH 6717 - Decision Analysis for Health Care (2.0 cr)
• PUBH 6810 - Survey Research Methods (3.0 cr)
• PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
• PUBH 8813 - Measurement of Health-Related Social Factors (3.0 cr)
• PUBH 6811 - Health Disparities Research: Measures, Methods, and Data (2.0 cr)
• PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)
• PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)

or Topic-specific Focus
Take courses in focus areas such as LTC, economics, health disparities, or ethics. Approval of the concentration faculty is required prior to taking the courses.

-OR-

Health Economics

The health economics concentration requires prerequisites in calculus, statistics, and microeconomics. Consult with the advisor and concentration faculty about satisfying this requirement.

Required Concentration Coursework
Take the following coursework, including one microeconomics series.
PUBH 8821 - Health Economics II (3.0 cr)
Required Microeconomics Series

Applied Microeconomics
- APEC 8001 - Applied Microeconomic Analysis of Consumer Choice and Consumer Demand (2.0 cr)
- APEC 8002 - Applied Microeconomic Analysis of Production and Choice Under Uncertainty (2.0 cr)
- APEC 8003 - Applied Microeconomic Analysis of Game Theory and Information (2.0 cr)
- APEC 8004 - Applied Microeconomic Analysis of Social Choice and Welfare (2.0 cr)

or Microeconomic Analysis
- ECON 8001 - Microeconomic Analysis (2.0 cr)
- ECON 8002 - Microeconomic Analysis (2.0 cr)
- ECON 8003 - Microeconomic Analysis (2.0 cr)
- ECON 8004 - Microeconomic Analysis (2.0 cr)

or Microeconomic Theory
- ECON 8101 - Microeconomic Theory (2.0 cr)
- ECON 8102 - Microeconomic Theory (2.0 cr)
- ECON 8103 - Microeconomic Theory (2.0 cr)
- ECON 8104 - Microeconomic Theory (2.0 cr)

Supporting Program Requirement

Take at least 12 outside credits in consultation with the advisor and concentration faculty. At least 8 of the 12 credits must be from the methods coursework list.

Take 12 or more credit(s) including 1 or more sub-requirements(s) from the following:

Methods Coursework

Choose at least two courses from the options below. Multi-course sequences count as one course, e.g. APEC 8211 must be taken with 8212. ECON 8205, must also include 8206, 8207, and 8208. ECON 8117 must also include 8118.

Take 2 or more course(s) totaling 8 or more credit(s) from the following:
- APEC 8211 - Econometric Analysis I (4.0 cr)
- APEC 8212 - Econometric Analysis II (4.0 cr)
- ECON 8205 - Applied Econometrics (2.0 cr)
- ECON 8206 - Applied Econometrics (2.0 cr)
- ECON 8207 - Applied Econometrics (2.0 cr)
- ECON 8208 - Applied Econometrics (2.0 cr)
- HRIR 8812 - Core Seminar: Research Methods in Work and Organizations (4.0 cr)
- ECON 8117 - Noncooperative Game Theory (2.0 cr)
- ECON 8118 - Noncooperative Game Theory (2.0 cr)
- APEC 8202 - Mathematical Optimization in Applied Economics (3.0 cr)
- APEC 8206 - Dynamic Optimization: Applications in Economics and Management (3.0 cr)
- PUBH 8804 - Advanced Quantitative Methods Seminar (3.0 cr)

Additional Supporting Program Coursework

Take additional outside coursework as needed to complete the 12-credit supporting program requirement, in consultation with the advisor and concentration faculty.

Take 0 or more course(s) from the following:
- ECON 8xxx
- APEC 8xxx
- PUBH 8862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)

Joint- or Dual-degree Coursework: Joint Degree with Law & PhD in Health Services Research, Policy & Administration (JD/PhD) Student may take a total of 12 credits in common among the academic programs.
Twin Cities Campus
Management Fundamentals Postbaccalaureate Certificate
School of Public Health - Adm
School of Public Health

Contact Information:
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-ask@umn.edu
Website: http://www.sph.umn.edu

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 14
- This program does not require summer semesters for timely completion.
- Degree: Management Fundamentals PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This certificate program provides students with the fundamentals of healthcare management. It includes coursework in the design of health care delivery systems, health economics, cost accounting in health care, introduction to health care finance, teamwork in health care, and an introduction to management principles in health care.

The program includes the core courses of the Executive MHA, but is for individuals who do not desire a full MHA, including those working in health care organizations who are interested in developing a better understanding of management.

Accreditation
This program is accredited by Commission on Accreditation of Healthcare Management.

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Admission to the certificate is decided by the M.H.A. faculty with the advice and counsel of an admissions committee. Admission to the certificate requires the following:
- a bachelor's degree from an accredited college or university
- at least three years experience in a healthcare organization
- current employment in a healthcare organization which affords the opportunity to apply the assignments in the coursework, or an agreement with such an organization in which the applicant is not employed
- a letter of intent describing career interests and the relevance of the certificate to the applicant's personal development

Students may decide to pursue the executive M.H.A. after completing the first or second semester of the certificate curriculum. Students interested in that option will be required to meet the requirements for admission to the executive M.H.A.

Note: All students in the management fundamentals certificate will be expected to bring a personal computer to the on-campus sessions.

Other than the admission requirements, there are no prerequisites.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 4 semesters must be completed before filing a Degree Program Form.

Required Coursework (14 credits)
Take PUBH 7570 for 2 credits.
- PUBH 7565 - Health Care Delivery, Design & Innovation (2.0 cr)
- PUBH 7535 - Managerial Accounting for Health Services (3.0 cr)
- PUBH 7556 - Health and Health Systems (2.0 cr)
- PUBH 7551 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 7536 - Health Finance I (3.0 cr)
- PUBH 7570 - Healthcare Administration (1.0 - 4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 42 to 48
- This program requires summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

While the name of the program, Maternal and Child Health (MCH), may suggest that a focus only on mothers and children, the MPH in maternal and child health program is dedicated to improving the health of youth and families too. The program is especially interested in socially vulnerable populations and the environments, behaviors, and policies that affect their long-term health and well-being.

Students come from a variety of backgrounds, but share a common interest in social justice and public health principles. Graduates quickly assume leadership roles in nonprofit organizations, research settings, state and local public health agencies, and healthcare organizations.

The program has a standard, on-campus curriculum (with the option of an epidemiology emphasis) and an online curriculum.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Prefer at least one year’s work or volunteer experience in a clinical, community-based, public health or managed-care agency/program that focuses on women, children, adolescents, and/or families.

Also prefer a basic understanding of physiological and/or psychological human development as demonstrated by coursework, experience, and/or referenced readings.

Applicants to the advanced standing (online) track must hold either an advanced degree (e.g., MS, MD, MA, MSW) or have 3-5 years of experience directly related to maternal and child health.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5

Program Requirements

Plan C: Plan C requires 42 to 48 major credits and up to null credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: See department for more details.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Please visit www.sph.umn.edu for the current curriculum options available.

Standard Program -- Scientific Basis Coursework

Select at least 8 credits from the following list, in consultation with the advisor.

Take 8 or more credit(s) from the following:

- PUBH 6686 - Global Reproductive Health (2.0 cr)
- PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)
- PUBH 6606 - Children's Health: Issues, Programs, and Policies (2.0 cr)
- PUBH 6607 - Adolescent Health: Issues, Programs, and Policies (2.0 cr)
- PUBH 6613 - Children and Youth With Special Health Care Needs (2.0 cr)
- PUBH 6675 - Women's Health (2.0 cr)
- PUBH 6902 [Inactive] (2.0 cr)
- PUBH 6903 [Inactive] (2.0 cr)
- PUBH 6906 - Global Nutrition (2.0 cr)
- PUBH 6123 - Violence Prevention and Control: Theory, Research, and Application (2.0 cr)
- PUBH 6850 - From Kid to Community: Personal, Social and Environmental Influences on Youth Obesity (2.0 cr)
- PUBH 6955 - Using Policy to Address Child and Adolescent Obesity Prevention (1.0 cr)
- PA 5451 - Immigration, Health and Public Policy (3.0 - 4.0 cr)

Standard Program -- Required Methodological and Analytical Skills Course

Take one of the following two courses, in consultation with the advisor.

PUBH 6034 - Evaluation (3.0 cr)
or PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)

Standard Program -- Additional Methodological and Analytical Skills Coursework

Take at least 3 courses from the following list, in consultation with the advisor.

Take 4 - 11 credit(s) from the following:

- PUBH 6035 - Applied Research Methods (3.0 cr)
- PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
- PUBH 6342 - Epidemiologic Methods II (3.0 cr)
- PUBH 6420 - Introduction to SAS Programming (1.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- PUBH 7400 - Topics: Biostatistics (0.5 - 4.0 cr)
- PUBH 6617 - Practical Methods for Secondary Data Analysis (3.0 cr)
- PUBH 6636 - Qualitative Research Methods in Public Health Practice (2.0 cr)
- PUBH 6765 - Continuous Quality Improvement: Methods and Techniques (3.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)
- PUBH 6810 - Survey Research Methods (3.0 cr)
- PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)
- PUBH 6910 *(Inactive)* (1.0 cr)
- PUBH 6914 - Community Nutrition Intervention (3.0 cr)

**Standard Program -- Grant Writing Course**
Take one of the following courses:
- PUBH 6673 - Grant Writing for Public Health (1.0 cr)
  or NURS 5925 - Grant Writing and Critique (1.0 cr)

**Standard Program -- Foundation Course**
Take one of the following courses:
- PUBH 6630 - Foundations of Maternal and Child Health Leadership (3.0 cr)
  or PUBH 6655 - Principles and Programs in Maternal and Child Health (2.0 cr)

**Standard Program -- Management Policy or Advocacy Skills Coursework**
Take one course from the following list, in consultation with the advisor.
Take 1 or more course(s) from the following:
- PUBH 6045 - Skills for Policy Development (1.0 cr)
- PUBH 6066 - Building Communities, Increasing Health: Preparing for Community Health Work (2.0 cr)
- PUBH 6074 - Mass Communication and Public Health (3.0 cr)
- PUBH 6078 - Public Health Policy as a Prevention Strategy (2.0 cr)
- PUBH 6634 - Children and Families: Public Health Policy and Advocacy (2.0 cr)
- PUBH 6571 - Leading Performance Improvement in Health Care (2.0 cr)
- PUBH 6700 *(Inactive)* (3.0 cr)
- PUBH 6702 - Integrative Leadership Seminar (3.0 cr)
- PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)
- PUBH 6755 - Planning and Budgeting for Public Health (2.0 cr)
- PUBH 6805 - Introduction to Project Management for Health Professionals (2.0 cr)
- PUBH 6807 *(Inactive)* (3.0 cr)
- PUBH 6835 - Principles of Health Policy (2.0 cr)

**Standard Program -- Public Health Core Coursework**

**Environmental Health**
Take one of the following courses:
- PUBH 6101 - Environmental Health (2.0 cr)
  or PUBH 6102 - Issues in Environmental Health (2.0 cr)

**Epidemiology**
Take one of the following courses:
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

**Biostatistics**
Take one of the following courses:
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
  or PUBH 6450 - Biostatistics I (4.0 cr)

**Ethics**
Take one of the following courses:
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
  or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

**Management**
Take exactly 1 course(s) from the following:
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

**Standard Program -- Field and Culminating Experience**
Take at least 2 credits of PUBH 7696, and 1-2 credits of PUBH 7694.
- PUBH 7696 - Field Experience: Maternal and Child Health (1.0 - 4.0 cr)
- PUBH 7694 - Culminating Experience: Maternal and Child Health (1.0 - 4.0 cr)

**Standard Program -- Electives**
Take elective credits, in consultation with the advisor, to meet the 48-credit requirement.

**Joint- or Dual-degree Coursework:** J.D./M.P.H.-Maternal and Child Health M.S.W./M.P.H.-Maternal and Child Health
Student may take a total of 12 credits in common among the academic programs.

**Program Sub-plans**
A sub-plan is not required for this program.
Students may complete the program with more than one sub-plan.

Online
Online Program -- Required Coursework
Scientific Basis Courses
Take 6 or more credits from the following:
• PUBH 6686 - Global Reproductive Health (2.0 cr)
• PUBH 6606 - Children’s Health: Issues, Programs, and Policies (2.0 cr)
• PUBH 6613 - Children and Youth With Special Health Care Needs (2.0 cr)
• PUBH 6902 [Inactive] (2.0 cr)
• PUBH 6903 [Inactive] (2.0 cr)

Methodological and Analytical Skills -- Required Course
PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)

Additional Methods Courses
Take 3 credits in consultation with the advisor.

Management and Communication Skills Courses
Take the following two courses:
NURS 5925 - Grant Writing and Critique (1.0 cr)
PUBH 6655 - Principles and Programs in Maternal and Child Health (2.0 cr)

Culminating and Field Experience Courses
Take 1 to 2 credits of PUBH 7694 and 2 credits of PUBH 7696.
PUBH 7696 - Field Experience: Maternal and Child Health (1.0 - 4.0 cr)
PUBH 7694 - Culminating Experience: Maternal and Child Health (1.0 - 4.0 cr)

Electives
Take elective credits, in consultation with the advisor, to meet the 42-credit minimum. Elective credits can include courses offered during the School of Public Health’s Summer Institute.

Public Health Core Courses
Take the following required courses:
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6101 - Environmental Health (2.0 cr)
PUBH 6102 - Issues in Environmental Health (2.0 cr)

Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity and mortality experienced by minority cultural and social groups in the US, as well as unequal quality of and access to healthcare. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota’s ranking as one of the nation’s healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:

- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, Interdisciplinary Concentrations Coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area
PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps MPH majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- Understanding community dynamics
- Developing advocacy skills for public health

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Analyzing legal and policy structures
Evaluating and implementing policies and programs
Influencing community health
Motivating and educating stakeholders and decision-makers
Using policy as prevention strategy
Eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, Interdisciplinary Concentrations Coordinator, at franc004@umn.edu or 612-624-6952.

• Program Type: Doctorate
• Requirements for this program are current for Fall 2018
• Length of program in credits: 53
• This program requires summer semesters for timely completion.
• The PhD research project can occur at any of the University of Minnesota coordinate campuses.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program is an interdisciplinary major offering the PhD degree housed in the Division of Environmental Health Sciences within the School of Public Health. All requirements of the University of Minnesota School of Public Health must be completed within a seven-year time frame degree completion. A master's degree is not required for completion of the PhD in molecular and systems toxicology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

B.A. or B.S. in basic sciences from an accredited institution of higher education required.

Other requirements to be completed before admission:
Basic chemistry through organic chemistry, biochemistry, and cell biology.

Special Application Requirements:
Physiology course recommended before starting program.

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
23 credits are required in the major.
6 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

Current topics in toxicology (PubH 8165) must be taken for 1 credit each over two separate terms.

Required Courses
PUBH 6112 - Environmental Health Risk Assessment: Application to Human Health Risks from Exposure to Chemicals (2.0 cr)
PUBH 6164 - Toxicological Analysis (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 8163 - Toxicology (5.0 cr)
PUBH 8165 - Current Topics in Toxicology (1.0 cr)
PUBH 8166 - Experiences in Toxicology Research (3.0 cr)

Minimum of six credits of electives

Electives
Selected in consultation with academic advisor

Website: http://www.sph.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 42 to 44
- This program requires summer semesters for timely completion.
- PCAS Data Entry
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Public Health Administration and Policy (PHAP) program offers a core curriculum centering on managing organizations to improve the health of certain populations. Throughout the program, there is a strong emphasis on developing effective communication skills and the ability to work well with various cultures and communities.

To receive this degree, students will need to complete the curriculum, a field experience, and a master's project. Graduates pursue public health careers in a variety of settings including non-profit organizations, state and local public health agencies, and healthcare companies.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Preferred GRE performance expectations (test taken post August 2011): A combination of 300 on the quantitative and verbal sections of the test and a score of 3.5 on the analytical writing assessment. Some programs may have higher preferred minimum scores. Check specific programs for details.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 500
  - General Test - Quantitative Reasoning: 500
  - General Test - Analytical Writing: 3.5
- GMAT
- MCAT
- LSAT
  - Law School Admission Test (LSAT) score: 150

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100

Specialty Areas (includes concentrations, emphasis)

Students must complete 7 credits within one specialty area. NOTE: If a student chooses an interdisciplinary concentration, a specialty area need not be chosen.

Management

For this area, PUBH 6727 is a required course; remaining credits will be chosen along with the advisor from a list of courses.

PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)

-OR-

Analysis

For this area, PUBH 6717, 6811, 6845 and 6852 are required courses; remaining credits will be chosen along with the advisor from a list of courses.

PUBH 6717 - Decision Analysis for Health Care (2.0 cr)

PUBH 6811 - Health Disparities Research: Measures, Methods, and Data (2.0 cr)

PUBH 6845 - Using Demographic Data for Policy Analysis (3.0 cr)

PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
Policy
For this area, PubH 6711 and 6835 are required courses; remaining credits will be chosen along with the advisor from a list of courses.
PubH 6711 - Public Health Law (2.0 cr)
PubH 6835 - Principles of Health Policy (2.0 cr)

-OR-

General Health Policy and Management
For this area, PubH 6726 and 6835 are required courses; remaining credits will be chosen along with the advisor from a list of courses.
PubH 6727 - Health Leadership and Effecting Change (2.0 cr)
PubH 6835 - Principles of Health Policy (2.0 cr)

Program Sub-plans
A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

Executive Public Health Administration and Policy
This sub-plan is limited to students completing the program under Plan C.

The e-PHAP degree is a 42 credit program designed to be completed in 25 months. It is designed for working public health professionals who are in, or would like to move into, leadership or managerial roles in organizations that provide core public health functions. Students enrolled in the program will spend 17 days on campus where they will complete four intensive (7 credits total) in-person courses that include an online component. The remainder of the program is delivered in an online environment.

Three years of professional public health experience.

ePHAP Core Courses
These courses are required for students enrolled in the Executive Public Health Administration and Policy program, along with the required M.P.H core courses (14 credits), plus two credits of electives.
Course will review how to use and understand data to help make decision within a public health organization. First time offered fall 2014. Syllabus currently in development. Course is two credits.
PubH 6700 - [Inactive] (3.0 cr)
PubH 6724 - The Health Care System and Public Health (3.0 cr)
PubH 6727 - Health Leadership and Effecting Change (2.0 cr)
PubH 6755 - Planning and Budgeting for Public Health (2.0 cr)
PubH 6835 - Principles of Health Policy (2.0 cr)
PubH 7796 - Field Experience: Public Health Administration and Policy (2.0 cr)
Course will review how to lead an organization through changes determined via evaluating program effectiveness. First time offered fall 2015. Syllabus currently in development. Course is two credits.
This course will address basic concepts of public health law and the legal bases for the existence and administration of public health programs. First time offered spring 2015. Syllabus currently in development. Course is one credits.
PubH 6765 - Continuous Quality Improvement: Methods and Techniques (3.0 cr)
PubH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)

Global Health Interdisciplinary Concentration Area
The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

Developing countries are currently undergoing profound demographic changes--changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more
Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:
- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area
Public Health Policy Interdisciplinary Concentration (PHPIC) coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- understanding community dynamics
- developing advocacy skills for public health
- analyzing legal and policy structures
- evaluating and implementing policies and programs
- influencing community health
- motivating and educating stakeholders and decision-makers
- using policy as prevention strategy
- eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Arizona State University
The Public Health Administration & Policy (PHAP) program hosted by Arizona State University is a 44 credit program designed to be completed by students located in the Phoenix area in a hybrid format.

Students earn a University of Minnesota MPH degree, by taking a combination of online classes from the University of Minnesota and in-person classes at the Arizona State University Campus.

The program is targeted to students in Phoenix and the surrounding area interested in working with government agencies, nonprofits, or private health care organizations that seek to advance public health.

This program prepares students to:
- Lead, manage and evaluate public health programs and agencies
- Design and implement research to guide evidence-based decision-making
- Evaluate and inform public policy that impacts population health

MPH Core
Students will be required to take the MPH core courses for a total of 14 credits.
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6102 - Issues in Environmental Health (2.0 cr)
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

PHAP Core
Students will be required to take the PHAP Core courses for a total of 17 credits.
- PUBH 6700 [Inactive] (3.0 cr)
- PUBH 6724 - The Health Care System and Public Health (3.0 cr)
- PUBH 6755 - Planning and Budgeting for Public Health (2.0 cr)
- PUBH 6806 - Principles of Public Health Research (2.0 cr)
PUBH 6780 - Topics: Public Health Administration and Policy (1.0 - 3.0 cr)
PUBH 7784 - Master's Project Seminar: PHAP and HSRP&A (1.0 cr)
PUBH 7794 - Master's Project: Public Health Administration and Policy (2.0 - 3.0 cr)
PUBH 7796 - Field Experience: Public Health Administration and Policy (2.0 cr)

General Health Policy and Management Specialty Area

These courses are required for students enrolled in the Public Health Administration and Policy program located at Arizona State University. Students will choose an additional 3 credits (for a total of 7) to complete the specialty area from the University of Minnesota approved by the advisor and program coordinator.
PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)
PUBH 6835 - Principles of Health Policy (2.0 cr)

Electives

Students will take 6 elective credits from the University of Minnesota that have been approved by the advisor and program coordinator.

JD/MPH with William Mitchell College of Law

The University of Minnesota (UMN) School of Public Health (SPH) created a Joint Degree Program through which qualified students may combine a Master of Public Health (MPH) in Public Health Administration & Policy (PHAP) with a Juris Doctor (JD) degree from William Mitchell College of Law (WMCL JD).

The PHAP MPH degree requires 44 credits, 12 of which may include approved WMCL course credits. The JD requires 83 credits, 12 of which may include approved SPH course credits. Each institution will be entitled to make determinations about which courses from the other program will count towards that institutions degree requirements. Allowing cross-counted (double-counted) transfer credits to fulfill requirements in each degree program will have the effect of reducing the length of the overall joint degree program by two semesters. Careful attention to the content of courses that cross count will ensure that neither institution comprises the core competencies of their individual programs.

MPH Core

(PUBH 6020 and PUBH 6751 and (PUBH 6101 or PUBH 6102 ) and (PUBH 6320 or PUBH 6341 ) and (PUBH 6414 or PUBH 6450 ) and (PUBH 6741 or PUBH 6742 )
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6101 - Environmental Health (2.0 cr)
  or PUBH 6102 - Issues in Environmental Health (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
  or PUBH 6414 - Biostatistical Literacy (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
  or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

PHAP/WMCL Core

PUBH 6700 (Inactive) (3.0 cr)
PUBH 6724 - The Health Care System and Public Health (3.0 cr)
PUBH 6835 - Principles of Health Policy (2.0 cr)
PUBH 7784 - Master's Project Seminar: PHAP and HSRP&A (1.0 cr)
PUBH 7794 - Master's Project: Public Health Administration and Policy (2.0 - 3.0 cr)
PUBH 7796 - Field Experience: Public Health Administration and Policy (2.0 cr)

Electives

Remaining courses are a combination of PubH courses with 12 credits transferred from William Mitchell College of Law.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 15 to 16
- This program does not require summer semesters for timely completion.
- Degree: Public Health Core Concepts PBacc Certificate

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The certificate program offers an opportunity to gain the knowledge and skills to understand, assess, and manage population health in public health, health care, and human services settings. Many students will use their public health knowledge and skills to enhance effectiveness and opportunities in their current work or career path. Population science is an increasingly valued area of expertise in many health and human service organizations. It will help prepare public health workers and others to respond to emerging public health issues.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission preferences and prerequisites:
- Applicants must hold a baccalaureate degree.
- Applicant should demonstrate strong written skills.
- The admissions committee looks closely at the applicant's work experience and grades in math and science.

Special Application Requirements:
Applicants must submit to SOPHAS Express, a centralized online application service:
- Completed SOPHAS Express application and application fee, designating the University of Minnesota School of Public Health
- Personal statement describing the applicant's reason for applying, career goals, and how the certificate will help them achieve their goals
- One letter of recommendation
- Unofficial transcripts of record from each college/university where a degree was earned. (If admitted, official transcripts will need to be sent directly to the School of Public Health.)
- Resume or C.V.

For detailed application requirements and instructions visit www.sph.umn.edu.

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 100
- Paper Based - Total Score: 600

**IELTS**
- Total Score: 7

**MELAB**
- Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

**Required Coursework**

The public health core concepts certificate curriculum is the same as the core content taught in the School of Public Health's MPH degree programs. All seven courses are available in online and in-person formats. Students will be able to register, receive materials, interact with faculty and fellow students, and complete this program without traveling to the campus. If completing coursework online, internet access is required.

- PUBH 6020 - Fundamentals of Social and Behavioral Science (2.0 cr)
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6250 - Foundations of Public Health (2.0 cr)
- PUBH 6102 - Issues in Environmental Health (2.0 cr)

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 43
• This program does not require summer semesters for timely completion.
• Courses are available both on campus and in a hybrid format where students attend classes remotely using WebEx or similar technology.
• Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Information is key to effective public health administration. Surveillance systems provide information on infectious disease tracking, disease clusters, food-borne outbreaks, and injuries. Environmental monitoring systems provide information on health risks such as toxic chemicals or airborne pollutants. Registries contain information on vital statistics such as birth, death, and immunization. E-Public Health integrates information from electronic health records to use in improving population health.

Students pursuing the MPH in Public Health Informatics (MPH-PHI) learn how to manage public health information systems, including vital statistics systems, online analytical processing tools, immunization registries, population health surveillance, community health information networks, and more.

The MPH-PHI is offered both in-person and fully online. This program will prepare you to:

Understand the significance of the various public health information systems and how to leverage these systems to improve health of the public
Conceive, design, develop, implement, and use IT by applying informatics skills to population health
Manage information systems within an organization or network of organizations
Create state-of-the-art solutions at the intersection of informatics and global public health

Accreditation
This program is accredited by CEPH (Council on Education for Public Health)

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
All application materials are submitted directly to SOPHAS;
Statement of purpose and objectives: Provide an essay describing your past education, experience, and current professional career objectives. You are encouraged to comment on any or all of the following: plans you have to use your education and training; the needs and/or challenges you perceive as important in your field of study; and any personal qualities, characteristics, and skills you believe will enable you to be successful in your chosen field of study.
Resume or CV
Official post-secondary transcripts from all US institutions attended (must be sent directly from the institutions to SOPHAS). This
includes previous study at the University of Minnesota.
Three letters of recommendation from persons qualified to assess your academic work; clinical, public health, or professional experiences; or leadership potential in public health.

Applicants must submit their test score(s) from the following:
- GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 43 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: The purpose of the master's project is to enable students to demonstrate: familiarity with the tools of research and scholarship in the field of public health informatics; the ability to work independently; the ability to plan and carry out a systematic investigation related to a public health issue; and the ability to effectively present, in written and oral form, the results of their investigation.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

Required Coursework

M.P.H. Core Coursework
Students must satisfy competency requirements in the six core areas of public health - administration, behavioral science, biostatistics, environmental health, epidemiology, and ethics.

Take 15 credits of MPH core courses from the following list:

Administration
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Behavioral Science
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)

Biostatistics
- PUBH 6450 - Biostatistics I (4.0 cr)

Environmental Health
- PUBH 6101 - Environmental Health (2.0 cr)
  or PUBH 6102 - Issues in Environmental Health (2.0 cr)

Ethics
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
  or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Epidemiology
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

Public Health Informatics Core Coursework
Take 21 credits of PHI core courses from the following list:
- HINF 5430 - Foundations of Health Informatics I (3.0 cr)
PUBH 6806 - Principles of Public Health Research (2.0 cr)  
PUBH 6876 - Public Health Systems Analysis and Design (2.0 cr)  
PUBH 6877 - Public Health Systems Analysis and Design - Practicum (2.0 cr)  
PUBH 6880 - Introduction to Public Health Informatics (2.0 cr)  
PUBH 6881 - Advanced Public Health Informatics Applications (2.0 cr)  
PUBH 6878 - Public Health Systems Analysis and Development Practicum (2.0 cr)  
PUBH 6879 - Public Health Systems Analysis and Development Practicum (2.0 cr)  
PUBH 6813 - Managing Electronic Health Information (2.0 cr)  
PUBH 6814 - Data and Information for Population Health Management (2.0 cr)  

Elective Credits  
Take at least 7 elective credits from the following list. Other graduate-level courses, including courses from outside the School of Public Health, can be taken with prior approval of the program director. Students are strongly encouraged to take PUBH 6805, as most PHI-related work is related to projects.  
Take 7 or more credit(s) from the following:  
• PUBH 6805 - Introduction to Project Management for Health Professionals (2.0 cr)  
• PUBH 6705 - Community Health Assessment (3.0 cr)  
• PUBH 6025 - Designing e-Interventions for Public Health (2.0 cr)  
• PUBH 6727 - Health Leadership and Effecting Change (2.0 cr)  
• NURS 7108 - Population Health Informatics (2.0 cr)  
• HINF 5431 - Foundations of Health Informatics II (3.0 cr)  
• HINF 5520 - Informatics Methods for Health Care Quality, Outcomes, and Patient Safety (2.0 cr)  
• HINF 5540 - Interprofessional Health Informatics (2.0 cr)  
• NURS 5116 - Consumer Health Informatics (1.0 cr)  

Program Sub-plans  
A sub-plan is not required for this program. Students may complete the program with more than one sub-plan.  

Health Disparities Interdisciplinary Concentration Area  
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the US, as well as unequal quality of and access to health care. Achieving optimum health for all segments of society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators.  
SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.  

Public Health Policy Interdisciplinary Concentration Area  
The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an MPH, includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care. PHPIC coursework provides a better understanding of the health care system as a whole and prevention policy. The challenging curriculum helps MPH majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:  

Understanding community dynamics  
Developing advocacy skills for public health  
Analyzing legal and policy structures  
Evaluating and implementing policies and programs  
Influencing community health  
Motivating and educating stakeholders and decision-makers  
Using policy as prevention strategy  

Eliminating health disparities through policy SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 13
- This program does not require summer semesters for timely completion.
- Degree: Public Health Informatics PostBaccalaureate Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

NOTE: Applications to the Public Health Informatics Certificate program are not being accepted at this time. For more information, please contact sph-ask@umn.edu.

The certificate in public health informatics (Cert-PHI) is a 9-12 month program designed to prepare professionals for leadership positions that bridge information technology and public health.

Students who complete the certificate will be able to implement and manage public health information systems, including: vital statistics systems, online analytic processing tools that support decision-making, immunization registries, population health surveillance, community health information networks, and electronic public health data interchange.

This certificate is awarded upon successful completion of 12 credits. We expect students who complete the Cert-PHI to have expanded and supplemented their current domain knowledge in a way that opens up new corridors of discovery and employment for them.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Baccalaureate degree or higher

Other requirements to be completed before admission:
Applications to the Public Health Informatics Certificate program are not being accepted at this time. For more information, please contact sph-ask@umn.edu.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7

Key to test abbreviations (TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

In addition to the required courses specified below, Cert PHI students are strongly encouraged to take the following course as most work in PHI involves projects:

PUBH 6805 - Project Management for Health Professionals (2.0 cr).

Required Coursework
- HINF 5430 - Foundations of Health Informatics I (3.0 cr)
- PUBH 6813 - Managing Electronic Health Information (2.0 cr)
- PUBH 6814 - Data and Information for Population Health Management (2.0 cr)
- PUBH 6876 - Public Health Systems Analysis and Design (2.0 cr)
- PUBH 6877 - Public Health Systems Analysis and Design - Practicum (2.0 cr)
- PUBH 6880 - Introduction to Public Health Informatics (2.0 cr)
Twin Cities Campus
Public Health Minor
School of Public Health - Adm
School of Public Health

Link to a list of faculty for this program.

Contact Information:
School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph-ask@umn.edu
Website: http://www.sph.umn.edu

• Program Type: Graduate free-standing minor
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 8
• Length of program in credits (Doctorate): 14
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate minor in public health is designed to prepare professionals in health and other fields (e.g., law, business, architecture, urban planning, teaching and engineering, including dual-degree students) to understand how their professional activities impact the health of communities, and to work together across disciplines, organizations, and sectors on innovative strategies to improve population health.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH)

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)
• completely online (all program coursework can be completed online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission to the public health graduate minor is contingent upon enrollment in a master's or doctoral degree-granting program at the University of Minnesota. Students enrolled in graduate programs within the School of Public Health are not eligible for this minor.

Consult with the major advisor and the public health director of graduate studies regarding the option of a minor in public health.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Required Courses (8 Credits)
All students pursuing the minor must take at least one course from each of the following three disciplines, for a total of 8 credits.

Biostatistics
Take one of the following courses:
PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)

Epidemiology
Take one of the following courses:
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

**Environmental Health**
Take one of the following courses:

- PUBH 6101 - Environmental Health (2.0 cr)
- PUBH 6102 - Issues in Environmental Health (2.0 cr)

**Program Sub-plans**
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Masters**
The minimum GPA for coursework applied to the minor is 3.0.

**Doctoral**
The minimum GPA for coursework applied to the minor is 3.0.

**Electives**
Select elective credits, in consultation with the public health director of graduate studies, to complete the 14-credit minimum.

School of Public Health, MMC 819, A395 Mayo Memorial Building, 420 Delaware Street, Minneapolis, MN 55455 (612-626-3500 OR 1-800-774-8636, Fax: 612-624-4498)
Email: sph.oasr@umn.edu
Website: http://www.sph.umn.edu

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 44 to 64
• This program requires summer semesters for timely completion.
• Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Public Health Nutrition (PHN) program is designed to meet the needs of students who want graduate training in health promotion, disease prevention, program development, and nutrition interventions.

The program's faculty are internationally recognized for research in obesity prevention, child and adolescent nutrition, eating disorder prevention, nutrition epidemiology, and nutrition intervention.

Coordinated Master's Program (CMP):
In addition to the traditional public health nutrition degree, the program offers the opportunity to gain expertise in a concentrated area of study such as epidemiology, global health, alternative medicine, health policy, and disability policy. It also offers a coordinated master's program. Please note that the coordinated master's program requires that students have their own transportation during the academic year and summer session, since many sites are not located on public transportation routes.

Full- and Part-time Program:
Students may pursue the M.P.H. on a full-time or part-time basis, but should note that the majority of the courses are offered only during the day. (Note: The Coordinated Master's Program must be taken on a full-time basis.)

Accreditation
This program is accredited by Council on Education for Public Health (CEPH) & Commission on Accreditation for Dietetics Education.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
The following courses are required for admission: one general biology course with lab; two general chemistry classes with labs; one organic chemistry; one biochemistry; one human nutrition course; and one social science course. In addition, CMP applicants must also complete one physiology course; one microbiology course with lab; one intro to nutrition course; one intro to food science course; one food systems/service management course. All courses MUST be complete before starting the program. If students are currently completing the prerequisites while they are applying, they must indicate on their application materials how their prerequisites will be completed before they start the program.

Preferred GRE performance expectations (test taken post August 2011): A combination of 300 on the quantitative and verbal sections of the test and a score of 3.5 on the analytical writing assessment. Some programs may have higher preferred minimum scores. Check specific programs for details.
Special Application Requirements:
Students applying for the Coordinated Master's Program track go through a two-step process for admission. The first is to be admitted to the M.P.H. degree program. After all CMP applications submitted prior to the Dec. 1 CMP application deadline have been reviewed and admission decisions made, the applicant will receive an email questionnaire and will undergo a phone interview. The top eight candidates will be selected to fill the eight available CMP spots. Students not selected for the CMP may not start the standard track and later transfer to the CMP.

Applicants must submit their test score(s) from the following:
• GRE
  - General Test - Verbal Reasoning: 150
  - General Test - Quantitative Reasoning: 150
  - General Test - Analytical Writing: 3.5

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
• IELTS
  - Total Score: 7

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Plan C: Plan C requires 44 to 64 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: Culminating Experience

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

Public Health Nutrition Core
PUBH 6901 - Foundations of Public Health Nutrition Leadership (2.0 cr)
PUBH 6914 - Community Nutrition Intervention (3.0 cr)
PUBH 6915 - Nutrition Assessment (2.0 cr)
PUBH 6933 - Nutrition and Chronic Diseases (2.0 cr)
PUBH 7994 - Culminating Experience: Public Health Nutrition (1.0 - 6.0 cr)
PUBH 7996 - Field Experience: Public Health Nutrition (1.0 - 6.0 cr)

Tracks

Standard Track
Lifecycle Courses
Take 2 or more course(s) from the following:
• PUBH 6902 (inactive) (2.0 cr)
• PUBH 6903 (inactive) (2.0 cr)
• PUBH 6904 - Nutrition and Aging (2.0 cr)
• PUBH 6906 - Global Nutrition (2.0 cr)

Research Methods
PUBH 6910 (inactive) (1.0 cr)

Research Methods Options
Take 3 or more credit(s) from the following:
• PUBH 6034 - Evaluation (3.0 cr)
• PUBH 6035 - Applied Research Methods (3.0 cr)
• PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
• PUBH 6342 - Epidemiologic Methods II (3.0 cr)
• PUBH 6415 - Biostatistical Methods II (3.0 cr)
• PUBH 6420 - Introduction to SAS Programming (1.0 cr)
• PUBH 6451 - Biostatistics II (4.0 cr)
• PUBH 6617 - Practical Methods for Secondary Data Analysis (3.0 cr)
• PUBH 6705 - Community Health Assessment (3.0 cr)
• PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)
• PUBH 6806 - Principles of Public Health Research (2.0 cr)
• PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
• PUBH 6389 - Nutritional Epidemiology (2.0 cr)
• PUBH 7250 - Designing and Conducting Focus Group Interviews (1.0 cr)
• NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)

Public Health Core
PUBH 6101 - Environmental Health (2.0 cr)
  or PUBH 6102 - Issues in Environmental Health (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
  or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
  or PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
  or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Electives
Students must take enough graduate-level electives to fulfill minimum credit requirements in order to graduate. Students without a nutrition/dietetics background must take PUBH 6355 - Pathophysiology, PUBH 6905 - Nutrition for Public Health Promotion and Disease Prevention, and FSCN 4621 - Nutrition and Metabolism.

-OR-

Coordinated Master's Program
Lifecycle Courses
Students who already have a nutrition/dietetics undergraduate degree need to select two of the following four courses. Students who do NOT have a nutrition/dietetics undergraduate degree must choose PUBH 6902, PUBH 6903, and PUBH 6904.
Take 2 - 3 course(s) from the following:
• PUBH 6902 (Inactive) (2.0 cr)
• PUBH 6903 (Inactive) (2.0 cr)
• PUBH 6904 - Nutrition and Aging (2.0 cr)
• PUBH 6906 - Global Nutrition (2.0 cr)

Research Methods
PUBH 6910 (Inactive) (1.0 cr)

Research Methods Options
Take 3 or more credit(s) from the following:
• PUBH 6034 - Evaluation (3.0 cr)
• PUBH 6035 - Applied Research Methods (3.0 cr)
• PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
• PUBH 6420 - Introduction to SAS Programming (1.0 cr)
• PUBH 6342 - Epidemiologic Methods II (3.0 cr)
• PUBH 6415 - Biostatistical Methods II (3.0 cr)
• PUBH 6451 - Biostatistics II (4.0 cr)
• PUBH 6617 - Practical Methods for Secondary Data Analysis (3.0 cr)
• PUBH 6705 - Community Health Assessment (3.0 cr)
• PUBH 6803 - Conducting a Systematic Literature Review (3.0 cr)
• PUBH 6806 - Principles of Public Health Research (2.0 cr)
• PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
• PUBH 6389 - Nutritional Epidemiology (2.0 cr)
• PUBH 7250 - Designing and Conducting Focus Group Interviews (1.0 cr)
• NURS 8171 - Qualitative Research Design and Methods (3.0 - 4.0 cr)

Field Experience/Nutrition Practicum
CMP students take four credits of PUBH 7996 in addition to the following:
PUBH 6995 - Community Nutrition Practicum (8.0 cr)
PUBH 6996 - Clinical Nutrition Practicum (9.0 cr)

Public Health Core
Environmental Health
PUBH 6101 - Environmental Health (2.0 cr)
  or PUBH 6102 - Issues in Environmental Health (2.0 cr)

Epidemiology
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

**Biostatistics**
PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)

**Ethics**
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

**Administration/Management**
Take 2 or more credit(s) from the following:
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

**Electives**
CMP students who do not have a nutrition/dietetics undergraduate degree must take FSCN 4621 - Nutrition and Metabolism or FSCN 4612 - Advanced Nutrition AND FSCN 4665 - Medical Nutrition Therapy I, AND FSCN 4666 - Medical Nutrition Therapy II and enough graduate-level elective credits to fulfill the minimum required to graduate. Students with a nutrition/dietetics undergraduate degree must take 8-12 graduate-level elective credits to fulfill 60 total credits.

-OR-

**Nutritional Epidemiology Track**

*Lifecycle courses*
- PUBH 6902 *(Inactive)* (2.0 cr)
or PUBH 6903 *(Inactive)* (2.0 cr)
or PUBH 6904 - Nutrition and Aging (2.0 cr)
or PUBH 6906 - Global Nutrition (2.0 cr)

**Nutrition Science**
Only students who do not have an undergraduate degree in nutrition/dietetics need to take the following nutrition science courses.
- FSCN 4621W - Nutrition and Metabolism [WI] (4.0 cr)
- PUBH 6905 - Nutrition for Public Health Promotion and Disease Prevention (2.0 cr)

**Epidemiology and Biostatistics Core**
PUBH 6341 - Epidemiologic Methods I (3.0 cr)
PUBH 6342 - Epidemiologic Methods II (3.0 cr)
PUBH 6343 - Epidemiologic Methods III (4.0 cr)
PUBH 6390 - Topics: Epidemiology (0.5 - 4.0 cr)
PUBH 6389 - Nutritional Epidemiology (2.0 cr)
PUBH 6325 - Data Processing with PC-SAS (1.0 cr)
PUBH 6355 - Pathophysiology of Human Disease (4.0 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)

“Epi of” Courses
- PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)
or PUBH 6386 - Public Health Aspects of Cardiovascular Disease (2.0 cr)
or PUBH 6387 - Cancer Epidemiology (2.0 cr)

**Public Health Core**

**Environmental Health**
PUBH 6101 - Environmental Health (2.0 cr)
or PUBH 6102 - Issues in Environmental Health (2.0 cr)

**Ethics**
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

**Administration/Management**
Take 1 or more course(s) from the following:
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

**Program Sub-plans**
A sub-plan is not required for this program.
Students may complete the program with more than one sub-plan.

**Coordinated Option**
The Coordinated Masters Program (CMP) in public health nutrition provides both a master of public health degree in public health nutrition and the didactic coursework and supervised practice components for registration eligibility and entry into dietetics practice. The program accepts eight students each year. The CMP provides a public health nutrition concentration area that focuses on rural and disadvantaged populations. Supervised practice experiences are integrated throughout the 24-month program utilizing sites both within and outside of Minnesota. Students complete a total of 1,200 hours of supervised practice. Upon successful completion of the program...
(i.e. coursework, supervised practice experiences, master's project and a comprehensive oral examination) students will receive an M.P.H. degree and a verification statement of eligibility to write the national registration examination for dietitians.

See Program Requirements Page

Global Health Interdisciplinary Concentration Area
The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

Developing countries are currently undergoing profound demographic changes—changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:

- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.

SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area
The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care.

PHPIC coursework provides a better understanding of the healthcare system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:

- understanding community dynamics
- developing advocacy skills for public health
- analyzing legal and policy structures
- evaluating and implementing policies and programs
- influencing community health
- motivating and educating stakeholders and decision-makers
- using policy as prevention strategy
- eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.
Arizona State University
This sub-plan is limited to students completing the program under Plan C.

Public Health Nutrition Core
Students take PubH 6901, 6914 and 6933 from the U of MN as part of the nutrition core in addition to PubH 69XX nutrition assessment course (to be developed)

Research Methods
Students will take three research methods credits that are approved by the advisor and program coordinator. Students are also required to take PubH 6910 and PubH 7994 from the U of MN.

Electives
Students will take elective credits from the U of MM that have been approved by the advisor and program coordinator.

additional nutrition science courses for non-nutrition/dietetics undergrad majors
- PubH 69XX: Human Pathophysiology (3 cr)
- PubH 69XX: Advanced Macronutrient Metabolism (3 cr)

- This program requires summer semesters for timely completion.
- Degree: Performance Improvement PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

NOTE: Applications to the Performance Improvement Certificate program are not being accepted at this time. For more information, please contact sph-ask@umn.edu.

The public health certificate in performance improvement trains students to understand and apply quality improvement methods at both the systems and organizational level. The program will provide the tools needed in order to achieve and maintain high process performance.

The certificate provides participants with hands-on knowledge about how to improve processes in their respective organizations. By so doing, best practices will be diffused, and process performance will improve public health services.

This certificate addresses concerns voiced by the National Board of Public Health Examiners, the Public Health Accreditation Board, and the Council on Education for Public Health to provide more educational opportunities in performance improvement to working public health professionals.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH)

Program Delivery
This program is available:
- completely online (all program coursework can be completed online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
NOTE: Applications to the Performance Improvement Certificate program are not being accepted at this time. For more information, please contact sph-ask@umn.edu.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Coursework
- PUBH 6765 - Continuous Quality Improvement: Methods and Techniques (3.0 cr)
- PUBH 6780 - Advanced Performance Improvement Methods in Public Health (2 cr)
- PUBH 6780 - Public Health Process Improvement Project - Practicum (3 cr)
- PUBH 6780 - Performance Management and Transformational Change (2 cr)

Students choose 2 elective credits with their advisor.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 42
- This program requires summer semesters for timely completion.
- Degree: Master of Public Health

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The program in public health practice brings together the science and the art of public health, addressing public health as a broad social enterprise that seeks to extend the benefits of current knowledge in ways that will have the maximum impact on the health status of populations.

The school offers academic programs at the master's level that prepare students to be leaders and practitioners in the application of public health principles in agencies delivering preventive health services and public health programs.

Accreditation
This program is accredited by Council on Education for Public Health (CEPH)

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Please visit www.sph.umn.edu for admission requirements.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7
- MELAB
  - Final score: 80
  - Speaking test score: 0

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

Information current as of August 31, 2018
Program Requirements

Plan C: Plan C requires 42 major credits and up to null credits outside the major. The is no final exam. A capstone project is required.

Capstone Project: Each student must complete a culminating experience in which they synthesize and integrate knowledge acquired in coursework and other learning experiences and apply theory and principles in a context that reflects an aspect of professional practice. The culminating experience must be used as a means by which faculty judge whether the student has mastered the body of knowledge and can demonstrate proficiency in the required competencies through written and oral presentation.

Students are expected to demonstrate familiarity with the tools of applied research or scholarship in public health practice, the ability to work independently, and the ability to apply skills learned in coursework by completing a Research Paper, Systematic Literature Review, Consultative Report, Grant Proposal. Students also have the option of taking the Certificate Public Health exam (CPH) instead of completing a project.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

Applicants must have an advanced degree or be admitted or enrolled in a DDS, MPP, MURP, LAW, PHARMD, DVM, MD, CMU or DNP program.

Core Courses
- PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
- PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
- PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (0.5 cr)

Epidemiology
- PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
- or PUBH 6341 - Epidemiologic Methods I (3.0 cr)
- or PUBH 6342 - Epidemiologic Methods II (3.0 cr)

Biostatistics
- PUBH 6414 - Biostatistical Literacy (3.0 cr)
- or PUBH 6450 - Biostatistics I (4.0 cr)
- or PUBH 6451 - Biostatistics II (4.0 cr)

Ethics
- PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
- or PUBH 6742 - Ethics in Public Health: Research and Policy (1.0 cr)

Environmental Health
- PUBH 6101 - Environmental Health (2.0 cr)
- or PUBH 6102 - Issues in Environmental Health (2.0 cr)

M.P.H. Culminating Experience
- PUBH 7294 - Master's Project: Public Health Practice (0.5 - 4.0 cr)

Field Experience
- PUBH 7296 - Field Experience: Public Health Practice (0.5 - 8.0 cr)

Electives
Students have the opportunity to choose their elective courses based on their career goals and interests. Students are required to choose at least one class from each of the four public health practice domains as established by the APHA Council on Linkages. Minimum of 19 credits

Specialty areas (includes concentrations, dual degree programs)
Students applying to a dual degree program must be admitted to both schools that are listed as official sub-plans. Students have the option to add a concentration area or minor.

DDS/MPH Dual Degree
This dual degree will provide students with a unique opportunity in the Upper Midwest to integrate dentistry and the practice of public health to identify and solve community health problems in areas of oral health. Students are required to take SPH core courses:
- PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and
- PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

Information current as of August 31, 2018
MPP/MPH or MURP/MPH Dual Degree
This dual degree will provide students with a unique opportunity in the Upper Midwest to gain in-depth training in the planning, public policy, and public health arenas at the master's level. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

PharmD/MPH Dual Degree
This dual degree will provide students with a unique opportunity in the Upper Midwest to make significant contributions in areas such as health education and prevention of disease in our state and nation. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

JD/MPH Dual Degree
This dual degree will provide students with a unique opportunity in the Upper Midwest to make significant contributions between the legal and health-care delivery systems in our state and nation. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

MD/MPH Dual Degree
This dual degree will provide students with a deeper understanding of population-based science and the cultural and environmental factors that affect patients. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

DVM/MPH Dual Degree
This dual degree will provide students with credentials to work at the interface of human wellness and animal health. Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

Global One Health-CMU
The School of Public Health is collaborating with Chiang Mai University in Northern Thailand to provide their students with a U of MN TC Master of Public Health degree, Executive Program in Public Health Practice. Students are required to have an advanced degree and to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102.

-OR-

DNP/MPH Dual Degree
This dual degree will provide students with a unique opportunity in the Upper Midwest to provide advanced nursing care as leaders of interprofessional health care teams, emphasizing population-focused practice and quality improvement to impact patient outcomes. Students are required to take SPH core courses: PubH 6751, PubH 6020, PubH 6299, PubH 6320 or 6341 or PubH 6342, and PubH 6414 or PubH 6450 or PubH 6451, and PubH 6741 or PubH 6742, and PubH 6101 or PubH 6102.

Joint- or Dual-degree Coursework:DDS/MPH Public Health Dentistry Dual Degree Program, MPP/MPH Public Health Public Policy Dual Degree Program, MURP/MPH Public Health Urban and Regional Planning Dual Degree Program, PharmD/MPH Public Health Pharmacy Dual Degree Program, LAW/MPH Public Health Law Dual Degree Program, MD/MPH Public Health Medicine Dual Degree Program, DVM/MPH Veterinary Public Health Dual Degree Program, Global One Health - CMU, DNP/MPH Public Health Doctor of Nursing PracticeStudent may take a total of 14 credits in common among the academic programs.

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Executive Program in Public Health Practice
This sub-plan is limited to students completing the program under Plan C.

This program builds on the student's work and educational experience. It is possible to complete all work for the M.P.H. degree in 16 months, with 42 graduate credits. On average, students complete the program in three years.
Attending the Public Health Institute during the May Session is a unique opportunity for students from multiple disciplines to connect and immerse themselves in emerging public health issues.

EPPHP is a flexible curriculum that students may tailor to their career and practice. Some established focus areas are:

- Cultural competency
- Food protection
- Preparedness, response, and recovery
- Public health leadership
- Global health*
- Health disparities*
- Public health policy*
- Complementary and alternative medicine*

*These are established interdisciplinary concentrations and the name of the concentration will be listed on the student's transcript. Students must complete and submit a proposal form; please refer to the website for full information.

Students are required to complete the core curriculum, M.P.H. culminating experience, field experience, and elective courses chosen to meet their academic and career interests.

Required courses
Our hybrid executive MPH offers a flexible curriculum that students can tailor to fit their career and practice goals. Online classes comprise the core curriculum, with elective options online or in person at the yearly Public Health Institute.

The program is designed for health professionals with an advanced degree, such as an MD, DDS, DV., PharmD, PhD, MS, or public health professional with significant work experience who have completed a Public Health Core Concept Certificate.

Students may choose up to 23 credits of electives and may transfer up to 14 credits from a school of dentistry upon approval of the program director.

Public Health Medicine
The Public Health Medicine (PHM) program prepares medical students to have a deeper understanding of population-based science
and the cultural and environmental factors that affect patients.

The classroom requirements of the M.P.H. are completed during a 12-month sabbatical (May through May) from medical school while enrolled full time in the School of Public Health. Most students begin the M.P.H. program after year two of medical school.

Students must complete the basic curriculum, the courses below, and approved electives to meet the required 42-credit minimum.

Students must register for the master's project and field experience while enrolled in the program. They may choose to complete these during their time at the SPH or after returning to medical school. A public health medicine setting is required for field placement but may be double counted for clinical rotation with adviser approval.

**Public Health Medicine**

PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (0.5 cr)
PUBH 6450 - Biostatistics I (4.0 cr)
PUBH 6451 - Biostatistics II (4.0 cr)
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6102 - Issues in Environmental Health (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6210 - Public Health Medicine Seminar (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)

Take 2 or more course(s) from the following:

• PUBH 6852 - Program Evaluation in Health and Mental Health Settings (2.0 cr)
• PUBH 6724 - The Health Care System and Public Health (3.0 cr)
• PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)

Students must take 10.5 to 11.5 elective credits that are approved by their adviser.

**Public Health Nursing Practice**

This sub-plan is limited to students completing the program under Plan C.

The Public Health Nursing Practice (DNP/MPH) dual degree program provides training in nursing practice and community health.

Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6101 or PUBH 6102 and PUBH 7294 and PUBH 7296

**Required**

As a graduate student pursing a DoDNP/MPH, you seek to lead, deliver and improve patient-centered care by bringing the latest evidence-based knowledge to clinical practice and protect, restore and promote public health. With approval, you may use up to 14 credits of DNP credits towards the MPH and 12 credits of the Public Health courses towards the DNP.

**Public Health Public Policy**

This sub-plan is limited to students completing the program under Plan C.

The Public Policy/Public Health (MPP/MPH) dual degree program provides training in planning, public policy, and in the public health arenas.

Students are required to take SPH core courses: PUBH 6751, PUBH 6020, PUBH 6299, PUBH 6320 or PUBH 6341 or PUBH 6342, and PUBH 6414 or PUBH 6450 or PUBH 6451, and PUBH 6741 or PUBH 6742, and PUBH 6101 or PUBH 6102 and PubH 7296.

**Required**

As a graduate student pursing a Public Policy, you seek to advance the common good; as a School of Public Health student, you seek to protect, restore and promote health. Together, the dual degrees provide the skills to create significant change. With approval, you may use up to 14 credits of MPP courses toward the MPP, and 12 credits of Public Health courses toward the MPP.

PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6102 - Issues in Environmental Health (2.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (0.5 cr)
Students may choose up to 23 credits of elective courses and may transfer up to 14 credits from a Master of Public Policy program with approval from the director.

Public Health Urban and Regional Planning
This sub-plan is limited to students completing the program under Plan C.

The Master Urban & Regional Planning/Master Public Health (MURP/MPH) dual degree program provides training in planning, public policy, and in the public health arenas.

As a graduate student pursuing Urban Regional Planning degree, you seek to advance the common good; as a School of Public Health student, you seek to protect, restore and promote health. Together, the dual degrees provide the skills to create significant change.

With approval, you may use up to 14 credits of MURP courses toward the MPH, and 12 credits of Public Health courses toward the MURP.

The dual degree in Master Urban & Regional Planning/Master Public Health (MURP/MPH) provides training in planning, public policy, and in the public health arenas.

Required
The dual degree in Master Urban & Regional Planning/Master Public Health (MURP/MPH) provides you with training in planning, public policy, and in the public health arenas. With approval, you may use up to 14 credits of MURP courses toward the MPH, and 12 credits of Public Health courses toward the MURP.

PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (0.5 cr)
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6102 - Issues in Environmental Health (2.0 cr)
PUBH 6320 - Fundamentals of Epidemiology (3.0 cr)
PUBH 6414 - Biostatistical Literacy (3.0 cr)
PUBH 6741 - Ethics in Public Health: Professional Practice and Policy (1.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 7296 - Field Experience: Public Health Practice (0.5 - 8.0 cr)

Students may choose up to 23 credits of elective courses and may transfer up to 14 credits from a Master of Urban and Regional Planning program with approval from the director.

Veterinary Public Health
The Veterinary Public Health D.V.M./M.P.H. dual degree program is part of the public health practice program. It allows students to combine veterinary studies with a public health degree, giving them the credentials to work at the interface of human wellness and animal health, spanning agriculture and food industry concerns, emerging infectious diseases, and other public health issues.

There are formal MOUs with the following Colleges of Veterinary Medicine: Cornell University, Purdue University, Western University of Health Science and Ross University.

The program in public health practice brings together the science and the art of public health. It addresses public health as a broad social enterprise that seeks to extend the benefits of current knowledge in ways that will have the maximum impact on the health status of populations.

The program offers academic study at the master's level that prepares students to be leaders and practitioners in the application of public health principles in agencies delivering preventive health services and public health programs. The major emphasizes the importance and applications of basic scientific knowledge to current societal problems and concerns.

Up to 14 credits may be transferred into the M.P.H. from a school of veterinary medicine upon approval of the adviser and program director. Each of the elective curriculum options outlined below addresses the need for students to have coursework in the following four domains: public health policy and systems development, community intervention, assessment and basic sciences, and program management and communications.

D.V.M./M.P.H. students are also required to take one course to fulfill the veterinary public health competencies: biostatistics, surveillance, infectious disease epidemiology, zoonoses, and environmental health.

Required
PUBH 6299 - Public Health Is a Team Sport: The Power of Collaboration (0.5 cr)
PUBH 6020 - Fundamentals of Social and Behavioral Science (3.0 cr)
PUBH 6102 - Issues in Environmental Health (2.0 cr)
Global One Health-CMU
This sub-plan is limited to students completing the program under Plan C.

The University of Minnesota, School of Public Health (SPH) recognizes the need for more global presence in the MPH curriculum and for more opportunities for students across the world to share learning experiences. The SPH is collaborating with Chiang Mai University (CMU) in northern Thailand to provide CMU students with a University of Minnesota Master of Public Health degree in Public Health Practice. This is a distance program offered at a new site.

For admission requirements go to www.sph.umn.edu.

Course Group 0
Global One Health - Chiang Mai University (CMU) is designed for Chiang Mai University students with an advanced degree to earn MPH degrees from UMN and CMU within two years. Students will complete 25 credits with the UMN and 17 credits with CMU.

Global Health Interdisciplinary Concentration Area
The Global Health Interdisciplinary Concentration (GHIC) provides graduate students who are pursuing an M.P.H. with information necessary to define the constitution, cause, and consequences of health problems worldwide. The program offers a unique opportunity to explore the relationships between health, environment, politics, culture, and economic pressures in developed and developing nations.

Developing countries are currently undergoing profound demographic changes—changes that are accompanied by shifts in patterns of illness. In many of these nations, the major causes of morbidity and mortality are mutating from traditional infectious diseases to chronic, non-communicable maladies like cardiovascular diseases, cancer, and diabetes. As a result, there is increasing demand for qualified public health practitioners who can identify and help reduce the vast and varied global vectors for chronic disease.

Practical application of theory in the field is a major component of the GHIC. Students are encouraged to hone their expertise by pursuing an international field experience. The School of Public Health has established relationships with collaborative institutions abroad.

SPH graduate students must complete a formal program plan if they want the GHIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Health Disparities Interdisciplinary Concentration Area
The Health Disparities Interdisciplinary Concentration (HDIC) addresses the unequal burden of health risks, morbidity, and mortality experienced by minority cultural and social groups in the U.S., as well as unequal quality of and access to health care. Achieving optimum health for all segments of our society is a central goal of Healthy People 2020, and a concern in Minnesota as well. Despite Minnesota's ranking as one of the nation's healthiest states, Minnesota has some of the largest gaps among cultural and social groups in health indicators. According to the Minnesota Department of Health:

- Infant mortality rates among the American Indians and African Americans are two to three times higher than for the state as a whole.
- Among African American youth aged 15-24, firearm injury mortality rates are 15 times greater than the rates of all ages, races, and genders combined.
- Women from minority communities are less likely to receive sufficient prenatal care compared to other women.
- Death rates for African Americans and American Indians are two to three times that of the state as a whole. Rates of diabetes, hypertension, cancer, and HIV/AIDS are higher for many minority communities compared to the state as a whole.
SPH graduate students must complete a formal program plan if they want the HDIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

Public Health Policy Interdisciplinary Concentration Area
The School of Public Health's Public Health Policy Interdisciplinary Concentration (PHPIC) focuses on promoting the health of populations and groups through public and organizational policy. PHPIC is open to students pursuing an M.P.H., includes coursework that explores the way in which federal, state, local, and institutional entities affect the financing, structure, and delivery of public health and medical care.

PHPIC coursework provides a better understanding of the healthcare system as a whole and prevention policy. The challenging curriculum helps M.P.H. majors hone practical skills that are highly sought after in the public health and policy arenas. Students who pursue the concentration can choose courses that emphasize:
- understanding community dynamics
- developing advocacy skills for public health
- analyzing legal and policy structures
- evaluating and implementing policies and programs
- influencing community health
- motivating and educating stakeholders and decision-makers
- using policy as prevention strategy
- eliminating health disparities through policy

SPH graduate students must complete a formal program plan if they want the PHPIC to appear on their transcripts. For more information, contact Carol Francis, interdisciplinary concentrations coordinator, at franc004@umn.edu or 612-624-6952.

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 12
- This program requires summer semesters for timely completion.
- Degree: Public Hlth Prepared/Response/Recovery PBacc Cert

Along with the program-specific requirements listed below, please read the [General Information](http://www.sph.umn.edu) section of the catalog website for requirements that apply to all major fields.

Part of the Public Health Practice major, this certificate program helps to prepare public health workers and others to respond to incidents of bioterrorism, infectious disease outbreaks, and other emerging public health issues.

**Accreditation**
This program is accredited by Council on Education for Public Health (CEPH)

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants must hold a baccalaureate degree.

**Special Application Requirements:**
Applicants must submit to SOPHAS Express, a centralized online application service:
- Completed SOPHAS Express application and application fee, designating the University of Minnesota School of Public Health
- Personal statement describing the applicant's reason for applying, career goals, and how the certificate will help them achieve their goals
- One letter of recommendation
- Unofficial transcripts of record from each college/university where a degree was earned. (If admitted, official transcripts will need to be sent directly to the School of Public Health.)
- Resume or C.V.

For detailed application requirements and instructions visit [www.sph.umn.edu](http://www.sph.umn.edu).

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 100
  - Paper Based - Total Score: 600
- IELTS
  - Total Score: 7

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Coursework
Take at least one course in each group below. Courses at the Public Health Institute are topical and will change from year to year. PUBH 7200 can meet the requirements of each group, depending on the topic. Please consult the program staff for appropriate courses.

Policy Development/Program Planning
Take 1 or more course(s) from the following:
- PUBH 5231 - Emergency Preparedness: A Public Health Perspective (2.0 cr)
- PUBH 7200 - Topics: Public Health Practice (0.5 - 4.0 cr)

Analytical/Assessment Skills
Take 1 or more course(s) from the following:
- PUBH 7230 - Topics in Infectious Disease (0.5 - 4.0 cr)
- PUBH 7231 - Surveillance of Foodborne Diseases in Humans (1.0 cr)
- PUBH 7235 - Surveillance of Zoonotic Pathogens in Animals (1.0 cr)

Communications Skills
Take 1 or more course(s) from the following:
- PUBH 7214 - Principles of Risk Communication (1.0 cr)
- PUBH 7200 - Topics: Public Health Practice (0.5 - 4.0 cr)

Cultural Competency Skills
Take 1 or more course(s) from the following:
- PUBH 7223 - Concepts of Disaster Behavioral Health (1.0 cr)
- PUBH 7200 - Topics: Public Health Practice (0.5 - 4.0 cr)

Community Dimensions of Practice Skills
Take 1 or more course(s) from the following:
- PUBH 7227 - Incident Management Systems: The Public Health Role (1.0 cr)
- PUBH 7200 - Topics: Public Health Practice (0.5 - 4.0 cr)

Leadership and Systems Thinking, Financial Planning and Management Skills
Take 1 or more course(s) from the following:
- PUBH 6711 - Public Health Law (2.0 cr)
- PUBH 7221 - Planning for Urgent Threats (1.0 cr)
- PUBH 7200 - Topics: Public Health Practice (0.5 - 4.0 cr)

Electives
Students select remaining credits from an approved list to complete the certificate's 12-credit minimum. Courses at the Public Health Institute are topical and will change from year to year. Please consult the program staff for appropriate courses.

Take 1 or more course(s) from the following:
- PUBH 7200 - Topics: Public Health Practice (0.5 - 4.0 cr)
- PUBH 7210 - Topics: Global Food Systems (0.5 cr)
- PUBH 7237 - Using Risk Analysis Tools: Estimating Food Safety on the Farm to Table Continuum (1.0 cr)
- PUBH 7253 - Introduction to GIS (1.0 cr)

• Program Type: Graduate free-standing minor
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Sexual Health minor is a graduate minor that allows students to specialize in sex, sexuality, reproductive health, and sexual health. A firm understanding of the structural factors involved in sexual health will prepare students to enter the professional world with the confidence and ability needed to handle complex questions and issues related to sexuality.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Admission to the sexual health graduate minor is contingent upon prior admission to a master's or doctoral degree-granting program at the University of Minnesota.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Foundation Course
PUBH 6081 - Sex, Sexuality, and Sexual Health (2.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Master's
Supporting Coursework for Master's Students
Students need to take a minimum of 6 credits, including the Foundation course (PubH 6081).
Public Health Admitted Students
The following coursework is for master's students admitted into the School of Public Health.
- PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)
- or PUBH 6010 - Public Health Approaches to HIV/AIDS (3.0 cr)
- or PUBH 6627 - Sexuality Education: Criteria, Curricula, and Controversy (1.0 cr)
- or PUBH 6675 - Women's Health (2.0 cr)

Non-public Health Students
The following coursework is required for master's students enrolled in colleges other than the School of Public Health.

Required for Non-public Health Students
- PUBH 6020 - Fundamentals of Social and Behavioral Science (2.0 cr)

Non-public Health Student Course Options
- PUBH 6627 - Sexuality Education: Criteria, Curricula, and Controversy (1.0 cr)
- or PUBH 6010 - Public Health Approaches to HIV/AIDS (3.0 cr)
- or PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)
- or PUBH 6675 - Women's Health (2.0 cr)

Elective Coursework
All master's students declaring the Sexual Health Minor must select from the electives list to reach a minimum of 6 credits.
Take 1 or more credit(s) from the following:
- AFRO 8554 - Seminar: Gender, Race, Nation, and Policy--Perspectives from Within the African Diaspora (3.0 cr)
- BTHX 8510 - Gender and the Politics of Health (3.0 cr)
- FMCH 5955 - Directed Study (1.0 - 10.0 cr)
- FSOS 4101 - Sexuality and Gender in Families and Close Relationships (3.0 cr)
- FSOS 4152 - Gay, Lesbian, Bisexual, and Transgender People in Families (3.0 cr)
- LAW 6046 - Human Trafficking (2.0 cr)
- LAW 6060 - Assisted Reproduction and the Family (3.0 cr)
- LAW 6827 - Women's International Human Rights (2.0 cr)
- PA 5601 - Global Survey of Gender and Public Policy (3.0 cr)
- PA 5690 - Topics in Women, Gender and Public Policy (0.5 - 3.0 cr)

Doctoral
Course Group Name: Supporting Coursework for Doctoral Students

Supporting Coursework for Doctoral Students
Students need to take a minimum of 12 credits, including the Foundation course (PubH 6081).

Public Health Admitted Students
The following coursework is for doctoral students admitted into the School of Public Health.
- PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)
- or PUBH 6010 - Public Health Approaches to HIV/AIDS (3.0 cr)
- or PUBH 6627 - Sexuality Education: Criteria, Curricula, and Controversy (1.0 cr)
- or PUBH 6675 - Women's Health (2.0 cr)

Non-public Health Students
The following coursework is for doctoral students enrolled in colleges other than the School of Public Health.

Required courses
- PUBH 6020 - Fundamentals of Social and Behavioral Science (2.0 cr)

Course options
- PUBH 6627 - Sexuality Education: Criteria, Curricula, and Controversy (1.0 cr)
- or PUBH 6010 - Public Health Approaches to HIV/AIDS (3.0 cr)
- or PUBH 6605 - Reproductive and Perinatal Health (2.0 cr)
- or PUBH 6675 - Women's Health (2.0 cr)

Elective Coursework
All doctoral students declaring the Sexual Health Minor must select from the electives list to reach a minimum of 12 credits.
Take 7 or more credit(s) from the following:
- AFRO 8554 - Seminar: Gender, Race, Nation, and Policy--Perspectives from Within the African Diaspora (3.0 cr)
- BTHX 8510 - Gender and the Politics of Health (3.0 cr)
- FMCH 5955 - Directed Study (1.0 - 10.0 cr)
- FSOS 4101 - Sexuality and Gender in Families and Close Relationships (3.0 cr)
- FSOS 4152 - Gay, Lesbian, Bisexual, and Transgender People in Families (3.0 cr)
- LAW 6046 - Human Trafficking (2.0 cr)
- LAW 6060 - Assisted Reproduction and the Family (3.0 cr)
- LAW 6827 - Women's International Human Rights (2.0 cr)
- PA 5601 - Global Survey of Gender and Public Policy (3.0 cr)
- PA 5690 - Topics in Women, Gender and Public Policy (0.5 - 3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Aerospace Engineering and Mechanics offers MS and PhD degrees. The graduate programs emphasize engineering sciences that are basic to fluid mechanics, aerospace systems, and solid mechanics. Theoretical, analytical, experimental, and computational aspects of these fields are covered by the courses and research opportunities offered by the department.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

A four-year BS degree in an engineering, basic science, or mathematics program is required.

Other requirements to be completed before admission:
Admission depends primarily on the applicant's undergraduate record and letters of recommendation.

Special Application Requirements:
GRE scores are not required but are strongly recommended for students applying for graduate fellowships. In all cases, these test scores are taken into account if provided. Students are admitted fall semester only. Only under unusual circumstances are students allowed to begin their studies at another time during the academic year.

The application deadline is December 15. Additional information is available at aem.umn.edu/teaching/graduate/

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 to 24 major credits and 6 to 16 credits outside the major. The final exam is oral.

Plan C: Plan C requires 14 to 24 major credits and 6 to 16 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

This program emphasizes coursework in engineering sciences that are basic to this field: fluid mechanics, aerospace systems, and solid mechanics. Options include coursework in aerodynamics and aerospace systems, dynamical systems, material properties, and fluid and solid behavior.

The MS in aerospace engineering and mechanics requires 30 credits and is offered under Plan A (thesis), Plan B (project), and Plan C (coursework). All plans require a minimum of 14 major credits, of which 12 must be at the 5xxx or 8xxx level, and a minimum of 6 credits outside the major. In addition, Plan A requires 10 thesis credits, and Plan B requires 3 project credits (which may be counted toward the 14 major credits). The remaining course credits may be taken in the major field or in any related field. Two semesters of seminar (AEM 8000) attendance are required, but only one credit may be used towards the course credit requirements. No more than 8 credits of 4xxx courses and no more than 8 credits (6 for Plan A) taken as S/N are allowed.

Required Courses
Take one 2-course sequence in fluids, solids or dynamics

Fluids
- AEM 8201 - Fluid Mechanics I (3.0 cr)
- AEM 8202 - Fluid Mechanics II (3.0 cr)

Solids
- AEM 5501 - Continuum Mechanics (3.0 cr)
- AEM 5503 - Theory of Elasticity (3.0 cr)

Dynamics
- AEM 5401 - Intermediate Dynamics (3.0 cr)
- AEM 8411 - Advanced Dynamics (3.0 cr)

Additional Major Credits
Take an additional 8 credits in AEM. The following sequences in controls or computational fluid mechanics may be used, or any other AEM courses chosen in consultation with advisor.

Controls
- AEM 5321 - Modern Feedback Control (3.0 cr)
- AEM 5451 - Optimal Estimation (3.0 cr)
- AEM 8421 - Robust Multivariable Control Design (3.0 cr)

Computational Fluid Mechanics
- AEM 5253 - Computational Fluid Mechanics (3.0 cr)
- AEM 8253 - Computational Methods in Fluid Mechanics (3.0 cr)

Seminar
1 credit of AEM 8000 may be used towards program credit requirements.
- AEM 8000 - Seminar: Aerospace Engineering and Mechanics (1.0 cr)

Minor or Related Field
For all plans, take a minimum of 6 credits in a minor or in related fields outside AEM

Plan A
Take a minimum of 10 thesis credits
- AEM 8777 - Thesis Credits: Master’s (1.0 - 18.0 cr)

Plan B
Take 3 credits of AEM 8880 and complete a final project.
- AEM 8880 - Plan B Project (1.0 - 3.0 cr)
Twin Cities Campus

Theoretical, analytical, experimental, and computational aspects of these fields are covered by the courses and research opportunities offered by the department.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A four-year BS degree in an engineering, basic science, or mathematics program is required. Admission depends primarily on the applicant’s undergraduate record and letters of recommendation.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The minor in Aerospace Engineering and Mechanics requires 6 credits in AEM courses for the master’s minor and 12 credits in AEM courses for the doctoral minor.

One course sequence in one of the following research areas must be included: fluids, solids, dynamics, controls, or computational fluid dynamics.

Courses cross listed with AEM courses must be registered for under the AEM course designation to be counted towards a minor.

Required Courses
One course sequence must be included for either a master’s minor or a doctoral minor.

Fluids
- AEM 8201 - Fluid Mechanics I (3.0 cr)
- AEM 8202 - Fluid Mechanics II (3.0 cr)

Solids
- AEM 5501 - Continuum Mechanics (3.0 cr)
- AEM 5503 - Theory of Elasticity (3.0 cr)

Dynamics
- AEM 5401 - Intermediate Dynamics (3.0 cr)

- Requirements for this program are current for Fall 2018
- Length of program in credits: 66
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Aerospace Engineering and Mechanics offers a PhD degree in aerospace engineering and mechanics. The PhD program emphasizes engineering sciences that are basic to fluid mechanics, aerospace systems, and solid mechanics. Theoretical, analytical, experimental, and computational aspects of these fields are covered by the courses and research opportunities offered by the department.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

A four-year BS degree in an engineering, basic science, or mathematics program is required.

Other requirements to be completed before admission:
Admission depends primarily on the applicant's undergraduate record, personal statement, and letters of recommendation.

Special Application Requirements:
GRE scores are not required but are strongly recommended for students applying for graduate fellowships. In all cases, these test scores are taken into account if provided. Students are admitted fall semester only. Only under unusual circumstances are students allowed to begin their studies at another time during the academic year.

The application deadline is December 15. Additional information is available at aem.umn.edu/teaching/graduate/.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
12 to 30 credits are required in the major.
12 to 30 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

The PhD program emphasizes coursework and research in engineering sciences that are basic to this field. Options include coursework and research in aerodynamics and aerospace systems, dynamical systems, material properties, and fluid and solid behavior.

The PhD requires about two years of coursework, but the heart of the program is the student's thesis research. The first year of the PhD program is similar to the master's program and most PhD students receive the master's degree. The second year is devoted to more advanced courses and beginning research. Subsequent years include some coursework with increased focus on research. The time required to complete a research project varies, but most students finish the PhD within five years after the bachelor's degree.

The program must include a minimum of 42 credits of approved courses; of these, a minimum of 12 credits must be in AEM courses at the 5xxx or 8xxx level and a minimum of 12 credits outside the major are required. Four semesters of seminar attendance are required (AEM 8000), but only one credit may be used towards the course credit requirements. The remaining 18 course credits may be taken in the major or in any supporting field. No more than 8 credits of 4xxx level courses and no more than 13 credits taken as S/N are allowed.

Required Courses
Take one 2-course sequence in fluids, solids or dynamics
Fluids
AEM 8201 - Fluid Mechanics I (3.0 cr)
AEM 8202 - Fluid Mechanics II (3.0 cr)
Solids
AEM 5501 - Continuum Mechanics (3.0 cr)
AEM 5503 - Theory of Elasticity (3.0 cr)
Dynamics
AEM 5401 - Intermediate Dynamics (3.0 cr)
AEM 8411 - Advanced Dynamics (3.0 cr)

Additional Major Credits
Take an additional 6 credits in AEM at the 5xxx or 8xxx level. The following sequences in controls or computational fluid mechanics may be used, or any other AEM courses chosen in consultation with adviser.
Controls
AEM 5321 - Modern Feedback Control (3.0 cr)
AEM 5451 - Optimal Estimation (3.0 cr)
AEM 8421 - Robust Multivariable Control Design (3.0 cr)
 Computational Fluid Dynamics
AEM 5253 - Computational Fluid Mechanics (3.0 cr)
AEM 8253 - Computational Methods in Fluid Mechanics (3.0 cr)

Minor or Supporting Program
Take 12 credits in a minor or supporting program outside AEM

Seminar
1 credit of AEM 8000 may be used towards program credit requirements.
AEM 8000 - Seminar: Aerospace Engineering and Mechanics (1.0 cr)

Thesis Credits
Take 24 credits after passing preliminary oral exam
AEM 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Astrophysics is the study of the universe and its constituent parts. The department conducts research in observational, theoretical, and computational astrophysics, as well as instrument development. The main research areas include minor planetary bodies, solar system properties, dynamics of normal and active galaxies, stellar evolution, interaction of stars with their environments, the interstellar medium, astrophysical magnetohydrodynamics, and galactic and cosmological structure. Observational research includes activities that cover X-ray, ultraviolet, optical, infrared, and radio wavelengths. Extensive research programs in space physics, nucleosynthesis, and the elementary particle-cosmology interface are also carried out in interdisciplinary connections with the graduate program in physics.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.50.

An undergraduate degree in astronomy or physics or the equivalent is required. Contact the Graduate Studies Committee for exceptions.

Other requirements to be completed before admission:
A statement of career goals, scores from the GRE General (Aptitude) Test and Subject (Advanced) Test in physics, and three letters of recommendation are required. Applications are due by January 1 to be considered for fellowships and by January 15 for teaching and research assistantships. Students are admitted fall semester only. Additional application information is available at [www.astro.umn.edu/grad/apply/](http://www.astro.umn.edu/grad/apply/).

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 to 24 major credits and 6 to 16 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The master's degree requires a minimum of 30 credits and is offered under Plan A (thesis) or Plan B (project). Completion of the degree normally takes two years.

Required Coursework

All students are required to take the following course

PHYS 5011 - Classical Physics I (4.0 cr)

Plan A

Plan A requires 14 credits in astrophysics, 6 credits in a minor or in related fields outside AST, and 10 thesis credits

AST 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B

Plan B requires 14 credits in astrophysics and 6 credits in a minor or in related fields outside of AST. The remaining 10 credits may be taken in the major field or any supporting field. The Plan B also requires the completion of 1-3 papers written in connection with three courses taken in the program.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Astrophysics is the study of the universe and its constituent parts. The department conducts research in observational, theoretical, and computational astrophysics, as well as instrument development. The main research areas include minor planetary bodies, solar system properties, dynamics of normal and active galaxies, stellar evolution, interaction of stars with their environments, the interstellar medium, astrophysical magnetohydrodynamics, and galactic and cosmological structure. Observational research includes activities that cover X-ray, ultraviolet, optical, infrared, and radio wavelengths. Extensive research programs in space physics, nucleosynthesis, and the elementary particle-cosmology interface are also carried out in interdisciplinary connections with the graduate program in physics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
Current enrollment in a related University graduate program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

AST courses at the 5xxx-level or higher may be used for the minor with the exception of AST 8990 and 8200.

Courses at the 4xxx-level may be used with approval from the Director of Graduate Studies.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

- Masters
- Doctoral
Twin Cities Campus
Astrophysics Ph.D.
Astrophysics, Minnesota Institute for
College of Science and Engineering

Link to a list of faculty for this program.

Contact Information:
Minnesota Institute for Astrophysics, 116 Church Street S.E., Minneapolis, MN 55455 (612-624-4811; fax: 612-626-2029)
Email: MIfA-gradreq@umn.edu
Website: http://www.astro.umn.edu

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 64
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Astrophysics is the study of the universe and its constituent parts. The department conducts research in observational, theoretical, and computational astrophysics, as well as instrument development. The main research areas include minor planetary bodies, solar system properties, dynamics of normal and active galaxies, stellar evolution, interaction of stars with their environments, the interstellar medium, astrophysical magnetohydrodynamics, and galactic and cosmological structure. Observational research includes activities that cover X-ray, ultraviolet, optical, infrared, and radio wavelengths. Extensive research programs in space physics, nucleosynthesis, and the elementary particle-cosmology interface are also carried out in interdisciplinary connections with the graduate program in physics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Undergraduate astronomy, physics or equivalent degree required.

Other requirements to be completed before admission:
Coursework in analytical mechanics, electrodynamics, quantum mechanics, thermodynamics, and statistical physics.

Special Application Requirements:
A statement of career goals, scores from the GRE General (Aptitude) Test and Subject (Advanced) Test in physics, and three letters of recommendation are required. Applications are due by January 1 to be considered for fellowships and by January 15 for teaching and research assistantships. Students are admitted fall semester only. Additional application information is available at www.astro.umn.edu/grad/apply/

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
28 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

The PhD degree requires a minimum of 40 course credits, including 28 credits in the major, and 12 credits in a minor or supporting program; 24 thesis credits are also required.

The graduate written examination, typically held during the week prior to the start of fall semester, must be passed on the second “real” attempt (first-year students are given a free trial). A second-year project must be defended by the end of the fall semester of the third year. The preliminary oral exam must be passed by the end of the third year. Normally, the preliminary oral exam includes a presentation on the second-year project.

Required Courses
The following 2 courses are required for all students. The remaining 20 major credits are chosen in consultation with advisor.
PHYS 5011 - Classical Physics I (4.0 cr)
PHYS 5012 - Classical Physics II (4.0 cr)

Supporting Program
Students must take a minimum of 12 credits in coursework from related fields. Specific courses are chosen in consultation with advisor.

Thesis Credits
Take 24 credits after passing preliminary oral exam.
AST 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Biomedical Engineering M.S.
Department of Biomedical Engineering
College of Science and Engineering

Link to a list of faculty for this program.

Contact Information:
Biomedical Engineering Graduate Program, 7-105 Nils Hasselmo Hall, 312 Church Street S.E., Minneapolis, MN 55455 (612-624-8396; fax 612-626-6583)
Email: bmengps@umn.edu
Website: http://bme.umn.edu/grad

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Biomedical engineering is the application of engineering principles and methods to problems in biology and medicine. The discipline includes the study of fundamental processes in biology and physiology, the study of the diagnosis and treatment of disease and injury, and the design and development of medical devices and techniques. Students take courses in mathematics, biology, biomedical engineering, and areas of science and engineering that are relevant to the degree objectives.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.20.

A baccalaureate degree in engineering or in a physical or biological science is required.

Other requirements to be completed before admission:
Applicants with an engineering degree do not need to complete any specific coursework prior to applying. Applicants without an engineering degree must complete (1) math coursework through calculus I, calculus II, linear algebra, and differential equations; and (2) at least 1 year of college-level physics, preferably calculus-based.

There are no minimum GPA, GRE, or English language test score requirements. A GPA of at least 3.2 on a 4.0 scale is preferred, but not required. Applicants with a lower GPA may still apply, but they will have a much lower chance of admission.

Special Application Requirements:
The fall application deadline for M.S. applicants is March 31. Local applicants applying for the program as part-time students may, under certain circumstances, be considered for spring admission. Application instructions are available at http://bme.umn.edu/grad/appinfo.html.

Students applying through the Combined B.Bm.E./M.S. Program (see below, under Program Sub-Plans) should refer to the application instructions and deadline information at http://bme.umn.edu/grad/appcombined.html.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
- IELTS

The preferred English language test is Test of English as Foreign Language.
Program Requirements

Plan A: Plan A requires 8 to 20 major credits, 0 to 12 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 10 to 30 major credits and 0 to 20 credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The Plan B Project (BMEn 8820, minimum of 2 credits) should entail approximately 50-75 hours of work per credit, performed in collaboration with a faculty advisor. Students must submit a written report of approximately 10 double-spaced pages per credit to the advisor, who will assign a letter grade for BMEn 8820 based on the report. The report must then be defended before the student's committee.

Plan C: Plan C requires 8 to 30 major credits and 0 to 22 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

The MS program requires a minimum of 30 total credits in mathematics, biology, biomedical engineering, and relevant areas of science and engineering.

PLAN A
BMEn Core - 6 credits
BMEn Seminars - 2 credits
Biology Electives - 6 credits
Technical Electives - 6 credits
Thesis - 10 credits

PLAN B
BMEn Core - 6 credits
BMEn Seminars - 2 credits
Biology Electives - 6 credits
Technical Electives - 9 credits
Free Electives - 5 credits
Capstone Project - 2 credits

PLAN C
BMEn Core - 6 credits
BMEn Seminars - 2 credits
Biology Electives - 6 credits
Technical Electives - 9 credits
Free Electives - 7 credits

A single course may NOT be counted simultaneously toward more than one of the requirements listed above.

Math/Statistics (Plans A, B, and C) - Included in the Core/Elective requirements listed above must be a minimum of 3 credits designated as math/statistics-intensive. These are not additional credits but will overlap with coursework already satisfying the BMEn Core, Technical Elective, and/or Free Elective requirements.

8000 Level (Plans A and B only) - Core/Elective coursework must include at least 3 credits at the 8000 level, from any department (does not need to be BMEn). Credits of seminar, directed research, internship, project, thesis, and/or independent study cannot be used to fulfill this requirement. Plan C students are not required to complete 8000-level coursework.

Approved courses for each category are listed below. All coursework (excluding seminars and internships) must be taken for a letter grade (A-F). A minimum grade of B- is required for coursework to be counted toward degree requirements.
BMEn Core
Take 6 or more credit(s) from the following:
- BMEN 5001 - Advanced Biomaterials (3.0 cr)
- BMEN 5101 - Advanced Bioelectricity and Instrumentation (3.0 cr)
- BMEN 5201 - Advanced Biomechanics (3.0 cr)
- BMEN 5311 - Advanced Biomedical Transport Processes (3.0 cr)
- BMEN 5351 - Cell Engineering (3.0 cr)
- BMEN 5401 - Advanced Biomedical Imaging (3.0 cr)
- BMEN 8001 - Polymeric Biomaterials (3.0 cr)
- BMEN 8041 - Advanced Tissue Engineering Lab (3.0 cr)
- BMEN 8101 - Biomedical Digital Signal Processing (3.0 cr)
- BMEN 8151 - Biomedical Electronics and Implantable Microsystems (3.0 cr)
- BMEN 8201 - Advanced Tissue Mechanics (3.0 cr)
- BMEN 8381 - Bioheat and Mass Transfer (3.0 cr)
- BMEN 8421 - Biophotonics (3.0 cr)
- BMEN 8431 - Advanced Drug and Gene Delivery: Materials, Mechanisms, and Models (4.0 cr)
- BMEN 8501 - Dynamical Systems in Biology (3.0 cr)
- BMEN 8502 - Physiological Control Systems (3.0 cr)
- BMEN 8511 - Systems and Synthetic Biology (3.0 cr)

BME Seminar
Seminars are 1 credit per semester, repeatable for credit, and may be taken in any order.
Take 2 or more credit(s) from the following:
- BMEN 8601 - Biomedical Engineering Seminar (1.0 cr)
- BMEN 8602 - Biomedical Engineering Seminar (1.0 cr)

Biology Electives
Additional courses may be approved by the director of graduate studies.
Take 6 or more credit(s) from the following:
- BIOC 5216 - Current Topics in Signal Transduction (3.0 cr)
- BIOC 5444 - Muscle (3.0 cr)
- BIOC 6021 - Biochemistry (3.0 cr)
- BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
- BIOC 8216 - Signal Transduction and Gene Expression (3.0 cr)
- BMEN 5501 - Biology for Biomedical Engineers (3.0 cr)
- BMEN 5701 - Cancer Bioengineering (3.0 cr)
- BMEN 8041 - Advanced Tissue Engineering Lab (3.0 cr)
- CGSC 8041 - Cognitive Neuroscience (4.0 cr)
- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)
- EEB 5371 - Principles of Systematics (3.0 cr)
- GCD 5036 - Molecular Cell Biology (3.0 cr)
- GCD 8008 - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
- GCD 8103 - Human Histology (5.0 cr)
- GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
- GCD 8151 - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
- GCD 8161 - Advanced Cell Biology and Development (3.0 cr)
- MEDC 5245 - Introduction to Drug Design (3.0 cr)
- MEDC 8461 - Design of Cancer Therapeutics (3.0 cr)
- MEDC 8760 - Design of Peptidomimetics (2.0 cr)
- MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
- MICA 8003 - Immunity and Immunopathology (4.0 cr)
- MICA 8004 - Cellular and Cancer Biology (4.0 cr)
- MICA 8009 - Biochemical Aspects of Normal and Abnormal Cell Growth and Cell Death (2.0 cr)
- MLSP 5111 - Concepts of Diagnostic Microbiology (3.0 cr)
- MLSP 5511 - Principles of Immunobiology (3.0 cr)
- MPHY 5172 - Radiation Biology (3.0 cr)
- NEUR 5290 - Cerebrovascular Hemodynamics and Diseases I (4.0 cr)
- NSC 5461 - Cellular and Molecular Neuroscience (4.0 cr)
- NSC 5540 - Survey of Biomedical Neuroscience (2.0 cr)
- NSC 5561 - Systems Neuroscience (4.0 cr)
- NSC 5661W - Behavioral Neuroscience [WI] (3.0 cr)
- NSC 5667 - Neurobiology of Disease (2.0 - 3.0 cr)
- NSC 8211 - Developmental Neurobiology (3.0 cr)
- NSC 8221 - Neurobiology of Pain and Analgesia (3.0 cr)
- NSCI 5101 - Neurobiology I: Molecules, Cells, and Systems (3.0 cr)

Thesis/Project Requirements

PLAN A
Take 10 or more credit(s) from the following:
• BMEN 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

OR

PLAN B
Take 2 or more credit(s) from the following:
• BMEN 8820 - Plan B Project (2.0 - 3.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

**Combined B.Bm.E./M.S.**
The College Science & Engineering offers an early-admission opportunity for eligible University of Minnesota B.Bm.E. students also interested in completing the Biomedical Engineering MS degree (Plan A or Plan B only). The Early Admission sub-plan, also referred to as the Combined B.Bm.E./MS Biomedical Engineering program, enables B.Bm.E. majors to take 3-16 credits toward the MS requirements during their senior (fourth) year, in addition to the courses required for the B.Bm.E. degree. The MS degree may then be completed in the fifth year of study. Students are NOT permitted to count a single course toward both the undergraduate and graduate degrees; each course must be counted either toward the B.Bm.E. requirements or the MS requirements.

Interested B.Bm.E. students should visit the program website at http://bme.umn.edu/grad/appcombined.html for detailed application and admission information, deadlines, and instructions.

Students admitted to the Combined B.Bm.E./M.S. must maintain timely degree progress to ensure that all undergraduate degree requirements are completed by the end of their fourth year. They must also be able to take additional courses during their senior year, beyond those required by the B.Bm.E. curriculum, to be eligible for this program.

Biomedical Engineering Graduate Program, 7-105 Nils Hasselmo Hall, 312 Church Street S.E., Minneapolis, MN 55455 (612-624-8396; fax: 612-626-6583)
Email: bmengqs@umn.edu
Website: http://bme.umn.edu/grad

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Biomedical engineering is the application of engineering principles and methods to problems in biology and medicine. The discipline includes the study of fundamental processes in biology and physiology, the study of the diagnosis and treatment of disease and injury, and the design and development of medical devices and techniques. Students take courses in mathematics, biology, biomedical engineering, and areas of science and engineering that are relevant for the degree objectives.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

All courses for the biomedical engineering minor must be completed for a letter grade (A-F). A minimum grade of B- is required for a course to count toward the minor.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Master's
BMEn Core
Take 1 or more course(s) from the following:
- BMEN 5001 - Advanced Biomaterials (3.0 cr)
- BMEN 5101 - Advanced Bioelectricity and Instrumentation (3.0 cr)
- BMEN 5201 - Advanced Biomechanics (3.0 cr)
- BMEN 5311 - Advanced Biomedical Transport Processes (3.0 cr)
- BMEN 5351 - Cell Engineering (3.0 cr)
- BMEN 5401 - Advanced Biomedical Imaging (3.0 cr)
- BMEN 8001 - Polymeric Biomaterials (3.0 cr)
- BMEN 8041 - Advanced Tissue Engineering Lab (3.0 cr)
- BMEN 8101 - Biomedical Digital Signal Processing (3.0 cr)
### Additional BMEn Courses

Three additional graduate level BMEn credits are required. Coursework from the BMEn Core list can be applied toward this requirement. The following courses cannot be used to satisfy any minor requirements: BMEn 8334, 8335, 8601, 8602, 8611, 8710, 8720, 8820, 8910.

Take 1 or more course(s) from the following:
- BMEN 5xxx
- BMEN 8xxx

### Doctoral

The Ph.D. minor in BME requires two courses from the BMEn Core list, one course from the Biology Electives list, and one course from the Technical Electives list, for a minimum of 12 credits.

A single course may not be counted toward more than one requirement.

### BMEn Core

Take 2 or more course(s) from the following:
- BMEN 5001 - Advanced Biomaterials (3.0 cr)
- BMEN 5101 - Advanced Bioelectricity and Instrumentation (3.0 cr)
- BMEN 5201 - Advanced Biomechanics (3.0 cr)
- BMEN 5311 - Advanced Biomedical Transport Processes (3.0 cr)
- BMEN 5351 - Cell Engineering (3.0 cr)
- BMEN 5401 - Advanced Biomedical Imaging (3.0 cr)
- BMEN 8001 - Polymeric Biomaterials (3.0 cr)
- BMEN 8041 - Advanced Tissue Engineering Lab (3.0 cr)
- BMEN 8101 - Biomedical Digital Signal Processing (3.0 cr)
- BMEN 8151 - Biomedical Electronics and Implantable Microsystems (3.0 cr)
- BMEN 8201 - Advanced Tissue Mechanics (3.0 cr)
- BMEN 8381 - Bioheat and Mass Transfer (3.0 cr)
- BMEN 8421 - Biophotonics (3.0 cr)
- BMEN 8431 - Controlled Drug and Gene Delivery: Materials, Mechanisms, and Models (4.0 cr)
- BMEN 8501 - Dynamical Systems in Biology (3.0 cr)
- BMEN 8502 - Physiological Control Systems (3.0 cr)
- BMEN 8511 - Systems and Synthetic Biology (3.0 cr)

### Biology Elective

Additional courses may be approved by the director of graduate studies.

Take 1 or more course(s) from the following:
- BIOC 5216 - Current Topics in Signal Transduction (3.0 cr)
- BIOC 5444 - Muscle (3.0 cr)
- BIOC 5021 - Biochemistry (3.0 cr)
- BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
- BIOC 8216 - Signal Transduction and Gene Expression (3.0 cr)
- BMEN 5501 - Biology for Biomedical Engineers (3.0 cr)
- BMEN 5701 - Cancer Bioengineering (3.0 cr)
- BMEN 8041 - Advanced Tissue Engineering Lab (3.0 cr)
- CGSC 8041 - Cognitive Neuroscience (4.0 cr)
- CPMS 5101 - Introduction to Clinical Physiology and Movement Science (3.0 cr)
- EEB 5371 - Principles of Systematics (3.0 cr)
- GCD 5036 - Molecular Cell Biology (3.0 cr)
- GCD 8008 - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
- GCD 8103 - Human Histology (5.0 cr)
- GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
- GCD 8151 - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
- GCD 8161 - Advanced Cell Biology and Development (3.0 cr)
- MEDC 5245 - Introduction to Drug Design (3.0 cr)
- MEDC 8461 - Design of Cancer Therapeutics (3.0 cr)
- MEDC 8760 - Design of Peptidomimetics (2.0 cr)
- MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
• MICA 8003 - Immunity and Immunopathology (4.0 cr)
• MICA 8004 - Cellular and Cancer Biology (4.0 cr)
• MICA 8009 - Biochemical Aspects of Normal and Abnormal Cell Growth and Cell Death (2.0 cr)
• MLSP 5111 - Concepts of Diagnostic Microbiology (3.0 cr)
• MLSP 5511 - Principles of Immunobiology (3.0 cr)
• MPHY 5172 - Radiation Biology (3.0 cr)
• NEUR 5230 - Cerebrovascular Hemodynamics and Diseases I (4.0 cr)
• NSC 5461 - Cellular and Molecular Neuroscience (4.0 cr)
• NSC 5540 - Survey of Biomedical Neuroscience (2.0 cr)
• NSC 5561 - Systems Neuroscience (4.0 cr)
• NSC 5661W - Behavioral Neuroscience [WI] (3.0 cr)
• NSC 5667 - Neurobiology of Disease (2.0 - 3.0 cr)
• NSC 8211 - Developmental Neurobiology (3.0 cr)
• NSC 8221 - Neurobiology of Pain and Analgesia (3.0 cr)
• NSCI 5101 - Neurobiology: Molecules, Cells, and Systems (3.0 cr)
• OBIO 5002 - Basic Concepts in Skeletal Biology (2.0 cr)
• OBIO 8028 - Molecular Basis of Cellular and Microbial Adhesion (2.0 cr)
• PHAR 5700 - Applied Fundamentals of Pharmacotherapy (3.0 cr)
• PHSL 5061 - Principles of Physiology for Biomedical Engineering (4.0 cr)
• PHSL 5115 - Clinical Physiology I (3.0 cr)
• PHSL 5116 - Clinical Physiology II (3.0 cr)
• PHSL 5444 - Muscle (3.0 cr)
• PHSL 5510 - Advanced Cardiac Physiology and Anatomy (2.0 - 3.0 cr)
• PHSL 5525 - Anatomy and Physiology of the Pelvis and Urinary System (1.0 - 2.0 cr)
• PSY 5015 - Cognition, Computation, and Brain (3.0 cr)
• PSY 5062 - Cognitive Neuropsychology (3.0 cr)
• PSY 8041 - Proseminar in Perception (3.0 cr)
• RSC 5200 - Introduction to Neuromodulation (1.0 - 3.0 cr)
• RSC 5231 - Clinical Biomechanics (2.0 - 5.0 cr)
• RSC 5281 - Scientific Foundations: Exercise Theory (3.0 cr)
• RSC 8282 - Problems in Human Movement (4.0 cr)
• SCB 8181 - Stem Cell Biology (3.0 cr)
• SLHS 5808 - Pathophysiology of Hearing Disorders (3.0 cr)

**Technical Elective**

Additional courses may be approved by the director of graduate studies.

Take 1 or more course(s) from the following:

• AEM 5401 - Intermediate Dynamics (3.0 cr)
• AEM 5451 - Optimal Estimation (3.0 cr)
• AEM 5501 - Continuum Mechanics (3.0 cr)
• AEM 5503 - Theory of Elasticity (3.0 cr)
• AEM 8511 - Advanced Topics in Continuum Mechanics (3.0 cr)
• AEM 8531 - Fracture Mechanics (3.0 cr)
• BIOC 5351 - Protein Engineering (3.0 cr)
• BIOC 5352 - Biototechnology and Bioengineering for Biochemists (3.0 cr)
• BIOC 5526 - Spectroscopy and Kinetics (4.0 cr)
• BIOC 8005 - Biochemistry: Structure and Catalysis (2.0 cr)
• BMEN 5001 - Advanced Biomaterials (3.0 cr)
• BMEN 5041 - Tissue Engineering (3.0 cr)
• BMEN 5101 - Advanced Bioelectricity and Instrumentation (3.0 cr)
• BMEN 5111 - Biomedical Ultrasound (3.0 cr)
• BMEN 5151 - Introduction to BioMEMs and Medical Microdevices (2.0 cr)
• BMEN 5201 - Advanced Biomechanics (3.0 cr)
• BMEN 5311 - Advanced Biomedical Transport Processes (3.0 cr)
• BMEN 5321 - Microfluidics in Biology and Medicine (3.0 cr)
• BMEN 5351 - Cell Engineering (3.0 cr)
• BMEN 5401 - Advanced Biomedical Imaging (3.0 cr)
• BMEN 5411 - Neural Engineering (3.0 cr)
• BMEN 5412 - Neuromodulation (3.0 cr)
• BMEN 5413 - Neural Decoding and Interfacing (3.0 cr)
• BMEN 5421 - Introduction to Biomedical Optics (3.0 cr)
• BMEN 5601 - Cardiovascular Devices (1.0 cr)
• BMEN 8001 - Polymeric Biomaterials (3.0 cr)
• BMEN 8101 - Biomedical Digital Signal Processing (3.0 cr)
• BMEN 8151 - Biomedical Electronics and Implantable Microsystems (3.0 cr)
• BMEN 8201 - Advanced Tissue Mechanics (3.0 cr)
• BMEN 8381 - Bioheat and Mass Transfer (3.0 cr)
• BMEN 8401 - New Product Design and Business Development (4.0 cr)
• BMEN 8421 - Biophotonics (3.0 cr)
• BMEN 8431 - Controlled Drug and Gene Delivery: Materials, Mechanisms, and Models (4.0 cr)
• BMEN 8501 - Dynamical Systems in Biology (3.0 cr)
• BMEN 8502 - Physiological Control Systems (3.0 cr)
• BMEN 8511 - Systems and Synthetic Biology (3.0 cr)
• CHEM 8021 - Computational Chemistry (4.0 cr)
• CHEM 8157 - Bioanalytical Chemistry (4.0 cr)

Website: http://bme.umn.edu/grad

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 54
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Biomedical engineering is the application of engineering principles and methods to problems in biology and medicine. The discipline includes the study of fundamental processes in biology and physiology, the study of the diagnosis and treatment of disease and injury, and the design and development of medical devices and techniques. Students take courses in mathematics, biology, biomedical engineering, and areas of science and engineering that are relevant for the degree objectives.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

A baccalaureate degree in engineering or in a physical or biological science is required.

Other requirements to be completed before admission:
Applicants with an engineering degree do not need to complete any specific coursework prior to applying. Applicants without an engineering degree must complete (1) math coursework through calculus I, calculus II, linear algebra, and differential equations; and (2) at least one year of college-level physics, preferably calculus-based.

There are no minimum required GPA, GRE, or English language test scores. A GPA of at least 3.5 on a 4.0 scale is preferred, but not required. Applicants with a lower GPA may still apply, but they will have a much lower chance of admission.

Special Application Requirements:
Fall application deadline is December 15. PhD applications are not accepted for the spring or summer terms. Application instructions are available at http://bme.umn.edu/grad/appinfo.html.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
- IELTS

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
11 to 30 credits are required in the major.
0 to 19 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The PhD program requires 30 credits of coursework in mathematics, biology, biomedical engineering, and relevant areas of science and engineering.

BMEn Core - 6 credits
BMEn Seminars - 3 credits
Biology Electives - 6 credits
Technical Electives - 9 credits
Free Electives - 6 credits

A single course may NOT be counted simultaneously toward more than one of the requirements listed above.

Math/Statistics - Included in the Core/Elective requirements listed above must be a minimum of 6 credits designated as Math-/Statistics-Intensive. These are not additional credits but will overlap with coursework already satisfying the BMEn Core, Technical Elective, and/or Free Elective requirements.

Approved courses for each category are listed below. All coursework (excluding seminars and internships) must be taken for a letter grade (A-F). A minimum grade of B- is required for coursework to be counted toward degree requirements.

In addition to the 30 credits of coursework, 24 thesis credits (BMEn 8888) are required.

BMEn 8000-Level Core
Take 6 or more credit(s) from the following:
• BMEN 8001 - Polymeric Biomaterials (3.0 cr)
• BMEN 8041 - Advanced Tissue Engineering Lab (3.0 cr)
• BMEN 8101 - Biomedical Digital Signal Processing (3.0 cr)
• BMEN 8151 - Biomedical Electronics and Implantable Microsystems (3.0 cr)
• BMEN 8201 - Advanced Tissue Mechanics (3.0 cr)
• BMEN 8381 - Bioheat and Mass Transfer (3.0 cr)
• BMEN 8421 - Biophotonics (3.0 cr)
• BMEN 8431 - Controlled Drug and Gene Delivery: Materials, Mechanisms, and Models (4.0 cr)
• BMEN 8501 - Dynamical Systems in Biology (3.0 cr)
• BMEN 8502 - Physiological Control Systems (3.0 cr)
• BMEN 8511 - Systems and Synthetic Biology (3.0 cr)

BMEn Seminars
Seminars are 1 credit per semester, repeatable for credit, and may be taken in any order. Another department/program graduate seminar may be substituted for 1 credit of this requirement, with prior approval from the director of graduate studies.
Take 3 or more credit(s) from the following:
• BMEN 8601 - Biomedical Engineering Seminar (1.0 cr)
• BMEN 8602 - Biomedical Engineering Seminar (1.0 cr)

Biology Electives
Additional courses may be approved by the director of graduate studies.
Take 6 or more credit(s) from the following:
• BIOC 5216 - Current Topics in Signal Transduction (3.0 cr)
• BIOC 5444 - Muscle (3.0 cr)
• BIOC 6021 - Biochemistry (3.0 cr)
• BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
• BIOC 8216 - Signal Transduction and Gene Expression (3.0 cr)
• BMEN 5501 - Biology for Biomedical Engineers (3.0 cr)
• BMEN 5701 - Cancer Bioengineering (3.0 cr)
• **BMEN 8041** - Advanced Tissue Engineering Lab (3.0 cr)
• **CGSC 8041** - Cognitive Neuroscience (4.0 cr)
• **CPMS 5101** - Introduction to Clinical Physiology and Movement Science (3.0 cr)
• **EEB 5371** - Principles of Systematics (3.0 cr)
• **GCD 5036** - Molecular Cell Biology (3.0 cr)
• **GCD 8008** - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
• **GCD 8103** - Human Histology (5.0 cr)
• **GCD 8131** - Advanced Molecular Genetics and Genomics (3.0 cr)
• **GCD 8151** - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
• **GCD 8161** - Advanced Cell Biology and Development (3.0 cr)
• **MEDC 5245** - Introduction to Drug Design (3.0 cr)
• **MEDC 8461** - Design of Cancer Therapeutics (3.0 cr)
• **MEDC 8760** - Design of Peptidomimetics (2.0 cr)
• **MICA 8002** - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
• **MICA 8003** - Immunity and Immunopathology (4.0 cr)
• **MICA 8004** - Cellular and Cancer Biology (4.0 cr)
• **MICA 8009** - Biochemical Aspects of Normal and Abnormal Cell Growth and Cell Death (2.0 cr)
• **MLSP 5111** - Concepts of Diagnostic Microbiology (3.0 cr)

Free Electives
6 credits total, must include BMEn 8611. Additional courses may be approved by the director of graduate studies.

BMEN 8611 - Professional Skills and Ethics for Biomedical Engineers (2.0 cr)

Take 4 or more credit(s) from the following:
• BMEN 8402 - New Product Design and Business Development (4.0 cr)
• MLLI 5589 - Medical Technology Evaluation and Market Research (2.0 cr)
• MOT 5001 - Technological Business Fundamentals (2.0 cr)
• MOT 5002 - Creating Technological Innovation (2.0 cr)
• MOT 5003 - Technological Business Planning Workshop (1.0 cr)
• PDES 5701 - Creativity, Idea Generation, and Innovation (3.0 cr)
• PDES 5702 - Concept Sketching and Rendering (3.0 cr)
• PDES 5704 - Computer-Aided Design Methods (3.0 cr)
• PHYS 5401 - Physiological Physics (4.0 cr)
• PSY 5036W - Computational Vision [WI] (3.0 cr)

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
• PUBH 6161 - Regulatory Toxicology (2.0 cr)
• PUBH 6414 - Biostatistical Literacy (3.0 cr)
• PUBH 7415 - Introduction to Clinical Trials (3.0 cr)
• RSC 5106 - Introduction to Rehabilitation Science (1.0 cr)
• Additional Core/Bio/Tech
  Any course(s) from the BMEn Core, Biology Elective, and/or Technical Elective lists that are not being used toward another degree requirement.
• Coursework Relevant to Science and Technology
  Max 3 credits in coursework relevant to science and technology (e.g., public policy, ethical/historical aspects, etc).
  Take 0 - 3 credit(s) from the following:
  • BTHX 5100 - Introduction to Clinical Ethics (3.0 cr)
  • BTHX 5120 - Dying in Contemporary Medical Culture (2.0 cr)
  • BTHX 5210 - Ethics of Human Subjects Research (3.0 cr)
  • BTHX 5300 - Foundations of Bioethics (3.0 cr)
  • BTHX 5325 - Biomedical Ethics (3.0 cr)
  • BTHX 5650 - Disability Ethics (3.0 cr)
  • BTHX 8120 - Dying in Contemporary Medical Culture (2.0 cr)
  • MILI 6235 - Pharmaceutical Industry: Business and Policy (2.0 cr)
  • MILI 6995 - Medical Industry Valuation Laboratory (2.0 cr)
  • PHAR 5200 - Drugs and the US Health Care System (3.0 cr)

Math-/Statistics-Intensive
  Included in the Core and/or Elective coursework must be at least 6 credits designated as Math-/Statistics-Intensive. These are not additional credits but will overlap with coursework already satisfying the BMEn Core, Technical Elective, and/or Free Elective requirements.
  Take 6 or more credit(s) from the following:
  • AEM 5451 - Optimal Estimation (3.0 cr)
  • AEM 5501 - Continuum Mechanics (3.0 cr)
  • AEM 5503 - Theory of Elasticity (3.0 cr)
  • AEM 8511 - Advanced Topics in Continuum Mechanics (3.0 cr)

Email: cemsgrad@umn.edu
Website: http://www.cems.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Chemical Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Research activities in the Chemical Engineering and Materials Science (CEMS) Department focus on the development of renewable energy technologies, the solution of important medical and biological engineering challenges, the development of advanced materials, and the application of sophisticated mathematical and theoretical models.

Graduate courses offered cover core areas of chemical engineering (fluid mechanics, applied mathematics: linear and nonlinear analysis, transport, chemical thermodynamics, statistical thermodynamics and kinetics, and analysis of chemical reactors) and core areas of materials science (structure and symmetry of materials, thermodynamics and kinetics, electronic properties of materials, and mechanical properties of materials). In addition, several specialized topics are offered, including biochemical engineering, biological transport processes, food processing technology, colloids, principles of mass transfer in engineering and biological engineering, rheology, coating process fundamentals, process control, finite elements methods of computer-aided analysis, ceramics, polymers, materials design and performance, materials processing, corrosion, introduction to polymer chemistry, polymer laboratory, contact and fracture properties of materials, electron microscopy, thin films and interfaces, composites, electrochemical engineering, physical chemistry of polymers, solid state reaction kinetics, electronic structure of materials, electronic properties and applications of organic materials, electronic ceramics, dislocations and interfaces, epitaxial thin film growth, and science of porous media.

The master of chemical engineering (M.Ch.E.), also known as the professional master's, is designed for working professionals who are interested in obtaining a master's degree part-time. This degree requires a design project. Part-time students may also choose the M.S.Ch.E. Plan C, which is coursework only.

The CEMS department focuses on the PhD, and does not generally admit students directly to the M.S.Ch.E. Plan A degree, which is a thesis-based master's and is intended for current graduate students who choose not to seek a PhD.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in chemical engineering or other related field.

Other requirements to be completed before admission:
This professional master of engineering degree is designed for employees of local industries who wish to pursue their studies part-time. No financial support is available. Applicants should contact the program before applying for admission.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of official transcripts; and a clearly written statement of career interests, goals, and objectives. International students are required to provide TOEFL results.

Applications are accepted for fall semester only. December 15 is the application deadline; late applications are considered if space is available.
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 560
- **IELTS**
  - Total Score: 6.5
- **MELAB**
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 12 to 14 major credits, 6 to 8 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

In addition to the coursework, MChE students are required to complete a design project. The work-related MChE design project consists of an in-depth study of an engineering design. It need not represent a publishable research project. While the amount of work should be the same as for a master’s thesis, the project can contain elements that the thesis would not, such as economic considerations, design consultation, and social relevance.

**Core Courses (12 Credits)**
Take at least 12 credits from the following, in consultation with the advisor.

- CHEN 8101 - Fluid Mechanics I: Change, Deformation, Equations of Flow (3.0 cr)
- CHEN 8201 - Applied Math (3.0 cr)
- CHEN 8301 - Physical Rate Processes I: Transport (3.0 cr)
- CHEN 8401 - Physical and Chemical Thermodynamics (3.0 cr)
- CHEN 8402 - Statistical Thermodynamics and Kinetics (3.0 cr)
- CHEN 8501 - Chemical Rate Processes: Analysis of Chemical Reactors (3.0 cr)

**Thesis Credits**
10 thesis credits are required for the design project.

- CHEN 8777 - Thesis Credits: Master’s (1.0 - 18.0 cr)

**Electives**
Select remaining coursework, in consultation with the advisor, to complete the 20 course credits required.

- AEM 5321 - Modern Feedback Control (3.0 cr)
- AEM 5501 - Continuum Mechanics (3.0 cr)
- AEM 5503 - Theory of Elasticity (3.0 cr)
- AEM 8201 - Fluid Mechanics I (3.0 cr)
- AEM 8202 - Fluid Mechanics II (3.0 cr)
- AEM 8203 - Fluid Mechanics III (3.0 cr)
- AEM 8251 - Finite-Volume Methods in Computational Fluid Dynamics (3.0 cr)
- AEM 8421 - Robust Multivariable Control Design (3.0 cr)
- AEM 8541 - Mechanics of Crystalline Solids (3.0 cr)

**Contact Information:**
Department of Chemical Engineering and Materials Science, University of Minnesota, 151 Amundson Hall, 421 Washington Ave SE, Minneapolis, MN 55455 (612-625-0382; fax: 612-626-7246)
Email: cemsgrad@umn.edu
Website: [http://www.cems.umn.edu](http://www.cems.umn.edu)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science in Chemical Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The CEMS Department offers two types of master's degrees: the MSChE (Plan A or C) and the MChE degree, also known as the professional master's. The MSChE Plan A degree is a thesis-based master's and is generally reserved only for current graduate students who choose not to seek a PhD. Working professionals who are interested in obtaining a master's degree part time should follow the requirements for the MChE degree, which requires a design project, or the MSChE Plan C, which is coursework only.

Research activities in CEMS focus on the development of renewable energy technologies, the solution of important medical and biological engineering challenges, the development of advanced materials, and the application of sophisticated mathematical and theoretical models.

Graduate courses offered cover core areas of chemical engineering (fluid mechanics, applied mathematics: linear and nonlinear analysis, transport, chemical thermodynamics, statistical thermodynamics and kinetics, and analysis of chemical reactors) and core areas of materials science (structure and symmetry of materials, thermodynamics and kinetics, electronic properties of materials, and mechanical properties of materials). In addition, several specialized topics are offered, including biochemical engineering, biological transport processes, food processing technology, colloids, principles of mass transfer in engineering and biological engineering, rheology, coating process fundamentals, process control, finite elements methods of computer-aided analysis, ceramics, polymers, materials design and performance, materials processing, corrosion, introduction to polymer chemistry, polymer laboratory, contact and fracture properties of materials, electron microscopy, thin films and interfaces, composites, electrochemical engineering, physical chemistry of polymers, solid state reaction kinetics, electronic structure of materials, electronic properties and applications of organic materials, electronic ceramics, dislocations and interfaces, epitaxial thin film growth, and science of porous media.

**Program Delivery**
This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
A bachelor's degree in chemical engineering or other related field.

Other requirements to be completed before admission:
With the exception of the professional master's degree (the MChE) and the MSChE Plan C, the CEMS Department focuses on the PhD and does not generally admit students directly to the MSChE Plan A degree.

**Special Application Requirements:**
Applicants must submit scores from the General Test of the GRE; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of official transcripts; and a clearly written statement of career interests, goals, and objectives. International students are required to provide TOEFL results.

Applications are accepted for fall semester only. December 15 is the application deadline; late applications are considered if space is available. More information is available at [http://www.cems.umn.edu/graduate/admissions](http://www.cems.umn.edu/graduate/admissions)
Applicants must submit their test score(s) from the following:
- **GRE**

International applicants must submit score(s) from one of the following tests:
- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 560
- **IELTS**
  - Total Score: 6.5
- **MELAB**
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

### Program Requirements

**Plan A:** Plan A requires 12 to 14 major credits, 6 to 8 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan C:** Plan C requires 12 to 18 major credits and 12 to 18 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

### Core Courses

Take 4 or more course(s) totaling 12 or more credit(s) from the following:
- CHEN 8101 - Fluid Mechanics I: Change, Deformation, Equations of Flow (3.0 cr)
- CHEN 8201 - Applied Math (3.0 cr)
- CHEN 8301 - Physical Rate Processes I: Transport (3.0 cr)
- CHEN 8401 - Physical and Chemical Thermodynamics (3.0 cr)
- CHEN 8402 - Statistical Thermodynamics and Kinetics (3.0 cr)
- CHEN 8501 - Chemical Rate Processes: Analysis of Chemical Reactors (3.0 cr)

**Plan A**

Plan A requires 12 credits in the major, 6 credits outside the major, and 10 thesis credits. The remaining course credits may be taken in the major or in any supporting field.

CHEN 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

**Plan C**

Plan C requires 12 credits in the major and a minimum of 12 credits outside the major. The remaining 6 credits may be taken in the major or in any supporting field.

### Electives

The remaining credits may be chosen from the following list or consult with advisor for further options.
- AEM 5321 - Modern Feedback Control (3.0 cr)
- AEM 5501 - Continuum Mechanics (3.0 cr)
- AEM 5503 - Theory of Elasticity (3.0 cr)
- AEM 8201 - Fluid Mechanics I (3.0 cr)
- AEM 8202 - Fluid Mechanics II (3.0 cr)
- AEM 8203 - Fluid Mechanics III (3.0 cr)
- AEM 8251 - Finite-Volume Methods in Computational Fluid Dynamics (3.0 cr)
- AEM 8421 - Robust Multivariable Control Design (3.0 cr)
- AEM 8541 - Mechanics of Crystalline Solids (3.0 cr)
- BIOC 4332 - Biochemistry II: Molecular Mechanisms of Signal Transduction and Gene Expression (4.0 cr)
- BIOC 5528 - Spectroscopy and Kinetics (4.0 cr)

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Minor programs must be approved by the director of Graduate Studies in Chemical Engineering.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Core Courses
Take 2 or more course(s) totaling 6 or more credit(s) from the following:

- CHEN 8101 - Fluid Mechanics I: Change, Deformation, Equations of Flow (3.0 cr)
- CHEN 8201 - Applied Math (3.0 cr)
- CHEN 8301 - Physical Rate Processes I: Transport (3.0 cr)
- CHEN 8401 - Physical and Chemical Thermodynamics (3.0 cr)
- CHEN 8402 - Statistical Thermodynamics and Kinetics (3.0 cr)
- CHEN 8501 - Chemical Rate Processes: Analysis of Chemical Reactors (3.0 cr)

**Doctoral Core Courses**

Take 4 or more course(s) totaling 12 or more credit(s) from the following:

- CHEN 8101 - Fluid Mechanics I: Change, Deformation, Equations of Flow (3.0 cr)
- CHEN 8201 - Applied Math (3.0 cr)
- CHEN 8301 - Physical Rate Processes I: Transport (3.0 cr)
- CHEN 8401 - Physical and Chemical Thermodynamics (3.0 cr)
- CHEN 8402 - Statistical Thermodynamics and Kinetics (3.0 cr)
- CHEN 8501 - Chemical Rate Processes: Analysis of Chemical Reactors (3.0 cr)

Information current as of August 31, 2018
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 560
  - IELTS - Total Score: 6.5
  - MELAB - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
21 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The PhD requires 33 course credits and 24 thesis credits. The course credits must include 12 credits in CHEN core courses and a minimum of 12 credits outside the major. The remaining 9 credits may be taken in the major or in any supporting field.

Students must attend, but not enroll in, the departmental seminar for six semesters. Informal attendance will be done within the department.

Core Courses
Take 4 or more course(s) totaling 12 or more credit(s) from the following:
- CHEN 8101 - Fluid Mechanics I: Change, Deformation, Equations of Flow (3.0 cr)
- CHEN 8201 - Applied Math (3.0 cr)
- CHEN 8301 - Physical Rate Processes I: Transport (3.0 cr)
- CHEN 8401 - Physical and Chemical Thermodynamics (3.0 cr)
- CHEN 8402 - Statistical Thermodynamics and Kinetics (3.0 cr)
- CHEN 8501 - Chemical Rate Processes: Analysis of Chemical Reactors (3.0 cr)

Thesis Credits
Take 24 credits after passing preliminary oral exam.
CHEN 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Electives
The remaining credits may be chosen from this list or consult with advisor for further options.
AEM 5321 - Modern Feedback Control (3.0 cr)
AEM 5501 - Continuum Mechanics (3.0 cr)
AEM 5503 - Theory of Elasticity (3.0 cr)

Email: chmapply@umn.edu
Website: http://chem.umn.edu/academics/graduate/chemical-physics

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program requires summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Chemical physics focuses on research areas where the techniques of chemistry and physics are combined for the study of atoms and molecules; their interactions in gases, liquids, and solids; and the detailed structure and dynamics of material changes. Areas of research and specialization include spectroscopy, optical properties, laser applications, molecular collisions, chemical dynamics, quantum mechanics, computational chemistry, statistical mechanics, thermodynamics, low-temperature behavior, polymers and macromolecules, surface science, biochemistry, and biochemical and heterogeneous catalysis.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
An undergraduate degree in chemistry, physics or a related field is required for admission. The preferred minimum undergraduate GPA for admittance to the program is 3.2.

Other requirements to be completed before admission:
Prospective graduate students should have adequate undergraduate preparation in chemistry, physics and mathematics.

Three letters of recommendation and scores from the GRE general test are required for all applications. In addition, international applicants are expected to provide scores of at least 587 (paper), 240 (computer), or 95 (Internet) on the TOEFL.

A Subject GRE score is not required but if available will help the admission committee to make better decisions, in particular in cases where undergraduate transcripts are more difficult to evaluate (which is especially true for international applicants, who are strongly encouraged to submit the GRE subject score). The Subject GRE can be taken in Chemistry, Physics, or a related discipline.

Special Application Requirements:
Applications for fall semester must be completed by December 15 in order to be considered for financial support. Applications received after December 15 will be reviewed on a space available basis. The department prefers to admit for fall semester and will only consider spring admission under extenuating circumstances. More application information is available at www.chem.umn.edu/chemphys

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 95
  - Internet Based - Speaking Score: 23
• IELTS
  - Total Score: 7
• MELAB
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is written. A capstone project is required.

Capstone Project: Each Plan B project should involve a combined total of approximately 160 hours (the equivalent of four full-time weeks) of library research, reading, and/or writing resulting in the preparation of a significant written document. Students who plan to work on Plan B projects independent of the Preliminary Examination should present a plan, after consultation with the chosen instructor for the Plan B project, outlining the number and content of their projects to the director of graduate studies. Projects should be completed to the satisfaction of the instructor; the final grade is determined by the instructor.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

Students are expected to pass a proficiency exam in physical chemistry during their first academic year in residence.

The MS degree requires a minimum of 30 credits and is offered under Plan A (thesis) and Plan B (project). The course credits must include at least 6 credits each in chemistry (CHEM) and physics (PHYS) or at least 3 credits each in quantum mechanics, thermodynamics, and statistical mechanics.

All first-year students must register for CHPH 8601 during both fall and spring semesters and for CHEM 8066 during the spring semester of their first year in residence.

Required Courses

Any CHPH, CHEM, and PHYS courses at the 5xxx or 8xxx level may be used to satisfy degree requirements. Up to 8 credits in 4xxx-level courses may be used with approval from the director of graduate studies.

Students may count one credit each of the following towards the degree.

- CHEM 8066 - Professional Conduct of Chemical Research (1.0 cr)
- CHPH 8601 - Seminar: Modern Problems in Chemical Physics (1.0 cr)

Plan A

Plan A requires 20 course credits and 10 thesis credits.

CHPH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B

Plan B requires 30 credits of coursework, including 8 credits in the two Plan B project courses.

- CHPH 8081 - M.S. Plan B Project I (4.0 cr)
- CHPH 8082 - M.S. Plan B Project II (4.0 cr)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Minor field coursework, determined by the chemical physics director of graduate studies, student, and advisor, may include any 5xxx- or 8xxx-level CPH, CHEM, or PHYS courses taken on the A-F grading basis.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
The master's minor requires a minimum of 3 credits each in chemistry (CHEM) and physics (PHYS).

Doctoral
The doctoral minor requires a minimum of 6 credits each in chemistry (CHEM) and physics (PHYS).

Program Requirements
24 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students are expected to pass a proficiency exam in physical chemistry during their first academic year in residence.

Each first-year chemical physics student will choose a program of study in consultation with his or her TMC (three-member committee).

The 24 course credits required must include either:

(a) At least 5 credits in chemistry (CHEM) and at least 5 credits in physics (PHYS), or
(b) At least 16 credits in chemistry and/or physics combined, including at least 5 credits of quantum mechanics and at least 5 credits chosen from among the areas of thermodynamics, statistical mechanics, statistical physics, and chemical dynamics.

All first-year students must register for CHPH 8601 during both fall and spring semesters and for CHEM 8066 during the spring semester of their first year in residence.

Required Courses
Any CHPH, CHEM, and PHYS courses at the 5xxx or 8xxx level may be used to satisfy degree requirements. Up to 8 credits in 4xxx-level courses may be used with approval from the director of graduate studies.

Students may count 1 credit each of the following towards the degree.

CHEM 8066 - Professional Conduct of Chemical Research (1.0 cr)
CHPH 8601 - Seminar: Modern Problems in Chemical Physics (1.0 cr)

Thesis Credits
Take 24 credits after passing preliminary oral exam.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

While modern research in chemistry is very interdisciplinary, graduate work in the Department of Chemistry falls broadly into the focus areas of analytical chemistry, chemical biology, environmental chemistry, inorganic chemistry, materials chemistry, organic chemistry, polymer chemistry, experimental physical chemistry, and computational chemistry.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
An undergraduate degree in chemistry or a related field is required for admission. The preferred minimum undergraduate GPA for admittance to the program is 3.20.

Other requirements to be completed before admission:
Applicants must offer the substantial equivalent of the courses in analytical, inorganic, organic, and physical chemistry that are required of undergraduate majors in the University of Minnesota chemistry curriculum. They must also have at least one year of college physics, plus college mathematics through calculus.

Three letters of recommendation and scores from the GRE general test are required for all applications. International applicants are expected to provide scores of at least 587 (paper), 240 (computer), or 95 (Internet) on the TOEFL, as well as GRE scores.

A Subject GRE score is not required but if available will help the admission committee to make better decisions, in particular in cases where undergraduate transcripts are more difficult to evaluate (which is especially true for international applicants, who are strongly encouraged to submit the GRE subject score). The Subject GRE can be taken in chemistry or a related discipline.

Special Application Requirements:
Applications for fall semester must be completed by December 15 in order to be considered for fellowship support and teaching and research assistantships. Applications received after December 15 will be reviewed on a space available basis. The department prefers to admit for fall semester and will only consider spring admission under extenuating circumstances. More information is available at chem.umn.edu/academics/graduate/prospective-students

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 95
  - Internet Based - Speaking Score: 23
- IELTS
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is written. A capstone project is required.

Capstone Project: Each Plan B project should involve a combined total of approximately 160 hours (the equivalent of four full-time weeks) of library research, reading, and/or writing resulting in the preparation of a significant written document. Students who plan to work on Plan B projects independent of the Preliminary Examination should present a plan, after consultation with the chosen instructor for the Plan B project, outlining the number and content of their projects to the director of Graduate Studies. Projects should be completed to the satisfaction of the instructor; the final grade is determined by the instructor.

Plan C: Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

MS students are expected to pass a proficiency exam during their first academic year in residence.

All first-year students must register for CHEM 8601 during both fall and spring semesters and for CHEM 8066 during the spring semester of their first year in residence.

All CHEM courses must be taken at the 5xxx or 8xxx level. Up to 8 credits in 4xxx-level courses from another department may be used with approval from the director of graduate studies.

Required Courses

Any 8xxx-level CHEM course can be used to satisfy degree requirements. Chem 5210 and 5755 will be accepted or consult with advisor for further 5xxx level course options.

Students may count one credit each of the following towards the degree.

CHEM 8066 - Professional Conduct of Chemical Research (1.0 cr)
CHEM 8601 - Seminar: Modern Problems in Chemistry (1.0 cr)

Plan A

Plan A requires 20 course credits and 10 thesis credits.

CHEM 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B

Plan B requires 30 credits of coursework, including 8 credits in the two Plan B project courses.

CHEM 8081 - M.S. Plan B Project I (1.0 - 4.0 cr)
CHEM 8082 - M.S. Plan B Project II (1.0 - 4.0 cr)

Plan C

Plan C requires 30 course credits chosen in consultation with advisor.

Program Requirements
24 credits are required in the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Students in the PhD program are expected to pass four of five proficiency examinations during their first year in residence. The exams, which are at the level of an advanced undergraduate course, are in analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. The exams are given during the chemistry first-year orientation program in August. In the event that a student does not pass the first exam, the exams are offered two more times during the academic year.

A minimum GPA of 3.00, 18 credits of coursework with a grade of B- or better, and passing grades on all four proficiency exams are required for students to remain in good standing.

All first-year students must register for CHEM 8601 during both fall and spring semesters and for CHEM 8066 during the spring semester of their first year in residence.

All CHEM courses must be taken at the 5xxx or 8xxx level. Up to 8 credits in 4xxx-level courses from another department may be used with approval from the director of graduate studies.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Civil Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Civil engineering emphases are available in environmental engineering (e.g., pollutant fate and transport, process modeling, soil and groundwater remediation, water and wastewater treatment), geomechanics (e.g., fracture and localization, groundwater flow, stability and liquefaction, wave and shock propagation), structural engineering (e.g., computational and structural mechanics, earthquake engineering, infrastructure performance and durability, new systems and materials), transportation engineering (e.g., intelligent transportation systems, pavement design and materials, transportation economics, traffic safety), and water resources engineering (e.g., earthscape processes, environmental and biological systems, hydrologic and climate dynamics, hydrodynamics, and turbulence).

The master of civil engineering (MCE) degree is designed for the practicing engineer who would like to obtain an advanced degree on a part-time or full-time basis. Students who intend to proceed to the Ph.D. program or who think they may later wish to be admitted to the Ph.D. program should apply for the master of science program. Students are expected to follow a coherent program of coursework in one of the following subareas of civil engineering: environmental, geomechanics, structural, transportation, or water resources engineering. The program is selected with the help of a faculty adviser and approved by the director of graduate studies. In addition to completing graduate-level courses, students must demonstrate professional competence either by carrying out and defending a design project or by taking a coursework-related final oral exam (without a project).

The degree typically takes 2-3 semesters (12-18 months) to complete on a full-time basis or 6-8 semesters on a part-time basis.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

An ABET-accredited, four-year bachelor's degree in engineering is required for admission.

Other requirements to be completed before admission:
The application deadlines are December 3 for fall admission and August 31 for spring admission. All materials must be submitted to the online application. Additional information is available at http://www.cege.umn.edu/prospective/graduate/how-to-apply.html

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
**IELTS**
- Total Score: 6.5

**MELAB**
- Final score: 80

Key to **test abbreviations** (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

### Program Requirements

**Plan A:** Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The MCE degree requires 30 credits and is offered under two plans. Plan A requires preparation of a thesis/design project. The thesis/design project must be carried out by the student in consultation with a faculty adviser. Plan C is a coursework-only degree program.

### Required Courses

Any courses at the 5xxx and 8xxx level from the following programs may be used: AEM, AST, BBE, BMEN, CEGE, CHEM, CHEN, CSCI, EE, ESCI, IE, MATH, MATS, ME, PHYS, STAT. Use of 4xxx level courses must be approved by the Director of Graduate Studies and a maximum of 9 credits may be included. The following 4xxx courses may not be used: CEGE 4301, 4401, 4501, 4502, and 4522. Six credits in a minor may be included in the course credit total.

**Seminar**

Students may include one seminar credit in the course credit total.

- CEGE 8200 - Seminar: Transportation (1.0 cr)
- CEGE 8300 - Seminar: Geomechanics (1.0 - 3.0 cr)
- CEGE 8400 - Seminar: Structures (1.0 cr)
- CEGE 8500 - Environmental Seminar (1.0 cr)

**Plan A**

Plan A requires a minimum of 20 course credits and 10 thesis credits for the design project.

- CEGE 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

**Plan C**

Plan C requires a minimum of 30 credits of coursework chosen in consultation with adviser and must include at least two courses at the 8xxx level. Students must also complete 100 hours of project work, give an oral presentation of no less than 10 minutes, and complete two hours of ethics training.

Department of Civil, Environmental, and Geo-Engineering, University of Minnesota, 122 Civil Engineering Building, 500 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-625-5522; fax: 612-626-7750)
Email: cegesps@umn.edu
Website: http://www.cege.umn.edu

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Civil engineering emphases are available in environmental engineering (e.g., pollutant fate and transport, process modeling, soil and groundwater remediation, water and wastewater treatment), geomechanics (e.g., fracture and localization, groundwater flow, stability and liquefaction, wave and shock propagation), structural engineering (e.g., computational and structural mechanics, earthquake engineering, infrastructure performance and durability, new systems and materials), transportation engineering (e.g., intelligent transportation systems, pavement design and materials, transportation economics, traffic safety), and water resources engineering (e.g., earthscape processes, environmental and biological systems, hydrologic and climate dynamics, hydrodynamics, and turbulence).

The master of science (M.S.) degree balances education in engineering fundamentals and design, and provides preparation for students wishing to pursue a career in industry, as well as those wanting to continue studies toward a Ph.D. degree. Programs range from the Plan C, which is a coursework-only program, to the Plan A, which balances coursework with research and development. The Plan C program is intended for practicing engineers who want to pursue a degree on a part-time basis, self-funded full-time students, as well as students who plan to continue on for a Ph.D. degree.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in an engineering, basic science, or mathematics program is preferred.

Other requirements to be completed before admission:
Admission depends primarily on the applicant's academic record and letters of recommendation. Applicants who lack civil engineering training are often required to complete one or more appropriate courses from the undergraduate civil engineering program. Graduate credit is not awarded for such preparatory work.

Special Application Requirements:
The application deadlines are December 3 for fall admission and August 31 for spring admission. All materials must be submitted to the online application. Additional information is available at http://www.cege.umn.edu/prospective/graduate/how-to-apply.html

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19

- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

**Plan A:** Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral.

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The MS requires at least 30 credits and is offered under three plans. Plan A emphasizes research and preparation of a thesis; Plan B emphasizes coursework and a project; Plan C is coursework only. The Plan A thesis is written on a research project carried out in consultation with a faculty adviser. Under Plan B, students complete one to three Plan B papers as determined by the faculty adviser. Plan B papers can include computer programs, annotated bibliographies, field investigations, and analysis/design of special engineering problems. A program typically takes 18 to 24 months to complete.

**Required Courses**

Any courses at the 5xxx and 8xxx level from the following programs may be used: AEM, AST, BBE, BMEN, CEGE, CHEM, CHEN, CSCI, EE, ESCI, IE, MATH, MATS, ME, PHYS, STAT. Use of 4xxx level courses must be approved by the Director of Graduate Studies and a maximum of 9 credits may be included. The following 4xxx courses may not be used: CEGE 4301, 4401, 4501, 4502, and 4522. Six credits in a minor may be included in the course credit total.

**Seminar**

Students may count one seminar credit towards the course credit requirement.

- **CEGE 8200** - Seminar: Transportation (1.0 cr)
- **CEGE 8300** - Seminar: Geomechanics (1.0 - 3.0 cr)
- **CEGE 8400** - Seminar: Structures (1.0 cr)
- **CEGE 8500** - Environmental Seminar (1.0 cr)

**Plan A**

Plan A requires a minimum of 20 course credits and 10 thesis credits.

- **CEGE 8777** - Thesis Credits: Master's (1.0 - 18.0 cr)

**Plan B**

Plan B requires a minimum of 30 credits, which includes at least 27 course credits and a maximum of 3 credits of CEGE 8094 for the Plan B project.

- **CEGE 8094** - Civil Engineering Research (1.0 - 4.0 cr)

**Plan C**

Plan C requires 30 course credits and must include at least 2 courses at the 8xxx-level. Students must also complete 100 hours of project work, give an oral presentation of no less than 10 minutes, and complete two hours of ethics training.

**Joint- or Dual-degree Coursework:** Dual Master's Degree in Civil Engineering and Industrial and Systems Engineering (Transportation Engineering Focus): Student may take a total of 15 credits in common among the academic programs. Dual Master's Degree in Civil Engineering and Urban and Regional Planning (Transportation or Environmental Engineering Focus): Student may take a total of 18 credits in common among the academic programs.
Program Sub-plans

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

Integrated B.C.E./M.S. - Civil Engineering

The department offers an integrated Bachelor of Civil Engineering (BCE) and Master of Science (MS) in Civil Engineering. The integrated BCE/MS program offers students the opportunity to earn a bachelor's degree and a master's degree in five years. These programs offer several benefits: streamlined admissions from the undergraduate to the graduate program (GRE not required); flexibility in fulfilling required courses for both degrees during the senior year (up to 16 credits can be transferred to the graduate program); and eligibility for teaching and research assistantships.

Both the BCE and MS degrees must be completed in their entirety, with no courses shared between them. The graduate degree cannot be earned before the undergraduate requirements are satisfied. Admitted students who decide not to complete the MS degree are permitted to count credits originally planned for the graduate program toward their BCE technical electives.

Eligibility Requirements:

Application to the Combined Program is open to civil engineering undergraduates who:

- are within 32 credits of completing the requirements for the bachelor's degree;
- have a faculty advisor selected prior to admission; and
- hold a cumulative GPA of 3.3 or higher.

Integrated B.GeoE./M.S. - Civil Engineering

The department offers an integrated Bachelor of Geoengineering (B.GeoE.) and Master of Science (MS) in Civil Engineering. Benefits, eligibility requirements, and degree-completion requirements outlined for the BCE/MS integrated program also apply to the B.GeoE./MS.

Integrated B.Env.E./M.S. - Civil Engineering

The department offers an integrated Bachelor of Environmental Engineering (B.Env.E.) and Master of Science (MS) in Civil Engineering. Benefits, eligibility requirements, and degree-completion requirements outlined for the BCE/MS integrated program also apply to the B.Env.E./MS.

Email: cegeseps@umn.edu
Website: http://www.cege.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Civil engineering emphases are available in environmental engineering (e.g., pollutant fate and transport, process modeling, soil and groundwater remediation, water and wastewater treatment), geomechanics (e.g., fracture and localization, groundwater flow, stability and liquefaction, wave and shock propagation), structural engineering (e.g., computational and structural mechanics, earthquake engineering, infrastructure performance and durability, new systems and materials), transportation engineering (e.g., intelligent transportation systems, pavement design and materials, transportation economics, traffic safety), and water resources engineering (e.g., earthscape processes, environmental and biological systems, hydrologic and climate dynamics, hydrodynamics, and turbulence).

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Minor courses should be chosen from one of the following subareas.

Environmental/Water Resources Engineering
CEGE 55xx
CEGE 85xx

Geomechanics
CEGE 53xx
CEGE 83xx

Structural Engineering
CEGE 54xx
CEGE 84xx

Transportation Engineering
CEGE 52xx
CEGE 82XX
Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Master's
For a master's minor, two or more 5xxx or 8xxx level courses from the same subarea of civil engineering are required, for a total of 6 or more credits.

Doctoral
For the doctoral minor, four or more 5xxx or 8xxx level courses from one or two subareas of civil engineering are required for a total of 12 or more credits.
Twin Cities Campus
Civil Engineering Ph.D.
CSENG Civil, Envrn & Geo-Eng (CEGE)
College of Science and Engineering

Link to a list of faculty for this program.

Contact Information:
Department of Civil, Environmental, and Geo-Engineering, University of Minnesota, 122 Civil Engineering Building, 500 Pillsbury Drive S.E., Minneapolis, MN 55455 (612-625-5522; fax: 612-626-7750)

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Civil engineering emphases are available in environmental engineering (e.g., pollutant fate and transport, process modeling, soil and groundwater remediation, water and wastewater treatment), geomechanics (e.g., fracture and localization, groundwater flow, stability and liquefaction, wave and shock propagation), structural engineering (e.g., computational and structural mechanics, earthquake engineering, infrastructure performance and durability, new systems and materials), transportation engineering (e.g., intelligent transportation systems, pavement design and materials, transportation economics, traffic safety), and water resources engineering (e.g., earthscape processes, environmental and biological systems, hydrologic and climate dynamics, hydrodynamics, and turbulence).

The PhD degree couples independent research with coursework in a comprehensive program for those wishing to attain mastery of their field. The PhD degree demands the ability and desire to pursue independent and original studies and can be earned with emphasis in environmental, geomechanics, structural, transportation, or water resources engineering. Research performance, as judged by preparation of a dissertation on an independently pursued research topic, is the primary requirement for the PhD degree.

Students enter the PhD program two to four years following the bachelor's degree, normally after completing the MS degree. The PhD program is typically completed in four to six years following the bachelor's degree. Each program of study is designed in consultation with a faculty adviser to meet the special needs of the student, although programs must be approved by the director of graduate studies.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in an engineering, basic science, or mathematics program is preferred.

Other requirements to be completed before admission:
Admission depends primarily on the applicant's academic record and letters of recommendation. Applicants who lack civil engineering training are often required to complete one or more appropriate courses from the undergraduate civil engineering program. Graduate credit is not awarded for such preparatory work.

Special Application Requirements:
The application deadlines are December 3 for fall admission and August 31 for spring admission. All materials must be submitted to the online application. Additional information is available at http://www.cege.umn.edu/prospective/graduate/how-to-apply.html

Applicants must submit their test score(s) from the following:
- GRE
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19

- **IELTS**
  - Total Score: 6.5

- **MELAB**
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

### Program Requirements

36 credits are required in the major.

24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

A typical program consists of 36 credits of coursework beyond the bachelor's degree, plus 24 thesis credits. Credits earned in a MS program may be presented in partial fulfillment of the PhD requirements. Rigid requirements for the number of 8xxx courses appropriate for PhD programs have not been set; nonetheless, the PhD represents the highest level of scholarly achievement and coursework should be selected accordingly.

### Required Courses

Any courses at the 5xxx and 8xxx level from the following programs may be used: AEM, AST, BBE, BMEN, CEGE, CHEM, CHEN, CSCI, EE, ESCI, IE, MATH, MATS, ME, PHYS, STAT. Use of 4xxx level courses must be approved by the Director of Graduate Studies and a maximum of 9 credits may be included. The following 4xxx courses may not be used: CEGE 4301, 4401, 4501, 4502, and 4522. The 36 course credits may include 12 credits in a minor.

### Seminar

Students may count up to two seminar credits for the Ph.D. program in the 36-credit total.

- CEGE 8200 - Seminar: Transportation (1.0 cr)
- or CEGE 8300 - Seminar: Geomechanics (1.0 - 3.0 cr)
- or CEGE 8400 - Seminar: Structures (1.0 cr)
- or CEGE 8500 - Environmental Seminar (1.0 cr)

### Thesis Credits

Take 24 credits after passing preliminary oral exam

- CEGE 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus
Computer Science M.C.S.
Computer Science and Engineering
College of Science and Engineering

Email: csgradmn@umn.edu
Website: http://www.cs.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 31
- This program does not require summer semesters for timely completion.
- Degree: Master of Computer Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in computer science offers coursework from across a broad spectrum of theoretical and applied computer science, combined with research opportunities in nearly all areas of the field. Faculty members advise students in such areas as algorithms and theoretical computer science; numerical, parallel, and high-performance computing; distributed computing and systems; artificial intelligence, robotics, and computer vision; databases and data mining; human-computer interaction and information systems; graphics and visualization; software engineering and programming languages; computer architecture and compilers; networking; bioinformatics and computational biology; and computer security. In addition, students may choose a course of study that integrates research in computer science with applications in other fields.

Computer science degrees include the M.C.S., a professional coursework-only degree designed for the professional student that is intended to be a terminal degree.

The department also offers the MS (Plan A with thesis, Plan B with project, or coursework-only Plan C with coursework-based projects) and the PhD. In addition, the department supports a master of science in software engineering (M.S.S.E.) degree.

Faculty from the Department of Computer Science and Engineering also participate in a variety of other graduate programs, including Bioinformatics and Computational Biology, Health Informatics, Cognitive Science, Scientific Computation, and Human Factors and Ergonomics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Applicants must have a undergraduate or graduate degree in a major with a substantial background in computer science and engineering.

Other requirements to be completed before admission:
The names and email addresses of three recommenders are required; they will be asked to upload their letters of recommendation to the university system. The department only accepts students for fall admission; the application deadline is March 1. Additional information is available at https://www.cs.umn.edu/admissions/graduate/mcs

Special Application Requirements:
Applicants with an inadequate background must resolve any deficiencies before applying to the program.
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5

- **MELAB**
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

### Program Requirements

**Plan C:** Plan C requires 31 major credits and 0 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.C.S. is a coursework-only degree requiring 31 course credits. At least 16 credits must be in computer science courses, including one course from each of the 3 breadth areas: theory, systems, and applications (9 credits); and 1 credit of colloquium (CSCI 8970). At least 6 credits must be in computer science 8xxx-level courses, in addition to the colloquium. The remaining 15 course credits may be taken in the major field or any supporting field as defined in the graduate handbook.

All major courses must be taken on the A-F grading option and students must maintain a GPA above 3.00 after completing 8 credits.

**Breadth Courses**

Take one course from each subject area.

**Applications**

Take 1 or more course(s) from the following:

- CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
- CSCI 5125 - Collaborative and Social Computing (3.0 cr)
- CSCI 5271 - Introduction to Computer Security (3.0 cr)
- CSCI 5461 - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
- CSCI 5471 - Modern Cryptography (3.0 cr)
- CSCI 5511 - Artificial Intelligence I (3.0 cr)
- CSCI 5512 - Artificial Intelligence II (3.0 cr)
- CSCI 5521 - Introduction to Machine Learning (3.0 cr)
- CSCI 5523 - Introduction to Data Mining (3.0 cr)
- CSCI 5551 - Introduction to Intelligent Robotic Systems (3.0 cr)
- CSCI 5551 - Computer Vision (3.0 cr)
- CSCI 5607 - Fundamentals of Computer Graphics I (3.0 cr)
- CSCI 5608 - Fundamentals of Computer Graphics II (3.0 cr)
- CSCI 5609 - Visualization (3.0 cr)
- CSCI 5611 - Animation & Planning in Games (3.0 cr)
- CSCI 5619 - Virtual Reality and 3D Interaction (3.0 cr)
- CSCI 5707 - Principles of Database Systems (3.0 cr)

**Architecture, Systems and Software**

Take 1 or more course(s) from the following:

- CSCI 5103 - Operating Systems (3.0 cr)
- CSCI 5106 - Programming Languages (3.0 cr)
- CSCI 5161 - Introduction to Compilers (3.0 cr)
- CSCI 5204 - Advanced Computer Architecture (3.0 cr)
- CSCI 5211 - Data Communications and Computer Networks (3.0 cr)
•CSCI 5221 - Foundations of Advanced Networking (3.0 cr)
•CSCI 5231 - Wireless and Sensor Networks (3.0 cr)
•CSCI 5451 - Introduction to Parallel Computing: Architectures, Algorithms, and Programming (3.0 cr)
•CSCI 5708 - Architecture and Implementation of Database Management Systems (3.0 cr)
•CSCI 5801 - Software Engineering I (3.0 cr)
•CSCI 5802 - Software Engineering II (3.0 cr)

Theory and Algorithms
Take 1 or more course(s) from the following:
•CSCI 5302 - Analysis of Numerical Algorithms (3.0 cr)
•CSCI 5304 - Computational Aspects of Matrix Theory (3.0 cr)
•CSCI 5403 - Computational Complexity (3.0 cr)
•CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
•CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
•CSCI 5525 - Machine Learning (3.0 cr)

Colloquium Credits
Take 1 credit of CS colloquium
CSCI 8970 - Computer Science Colloquium (1.0 cr)

Computer Science Courses
Students may choose additional coursework from this list or consult with their adviser for further options.
Take 0 or more credit(s) from the following:
•CSCI 5103 - Operating Systems (3.0 cr)
•CSCI 5105 - Introduction to Distributed Systems (3.0 cr)
•CSCI 5106 - Programming Languages (3.0 cr)
•CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
•CSCI 5125 - Collaborative and Social Computing (3.0 cr)
•CSCI 5143 - Real-Time and Embedded Systems (3.0 cr)
•CSCI 5161 - Introduction to Compilers (3.0 cr)
•CSCI 5204 - Advanced Computer Architecture (3.0 cr)
•CSCI 5211 - Data Communications and Computer Networks (3.0 cr)
•CSCI 5231 - Wireless and Sensor Networks (3.0 cr)
•CSCI 5271 - Introduction to Computer Security (3.0 cr)
•CSCI 5302 - Analysis of Numerical Algorithms (3.0 cr)
•CSCI 5304 - Computational Aspects of Matrix Theory (3.0 cr)
•CSCI 5403 - Computational Complexity (3.0 cr)
•CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
•CSCI 5451 - Introduction to Parallel Computing: Architectures, Algorithms, and Programming (3.0 cr)
•CSCI 5461 - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
•CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
•CSCI 5511 - Artificial Intelligence I (3.0 cr)
•CSCI 5512 - Artificial Intelligence II (3.0 cr)
•CSCI 5521 - Introduction to Machine Learning (3.0 cr)
•CSCI 5523 - Introduction to Data Mining (3.0 cr)
•CSCI 5525 - Machine Learning (3.0 cr)
•CSCI 5551 - Introduction to Intelligent Robotic Systems (3.0 cr)
•CSCI 5552 - Sensing and Estimation in Robotics (3.0 cr)
•CSCI 5561 - Computer Vision (3.0 cr)
•CSCI 5607 - Fundamentals of Computer Graphics I (3.0 cr)
•CSCI 5608 - Fundamentals of Computer Graphics II (3.0 cr)
•CSCI 5611 - Animation & Planning in Games (3.0 cr)
•CSCI 5619 - Virtual Reality and 3D Interaction (3.0 cr)
•CSCI 5707 - Principles of Database Systems (3.0 cr)
•CSCI 5708 - Architecture and Implementation of Database Management Systems (3.0 cr)
•CSCI 5715 - From GPS and Virtual Globes to Spatial Computing (3.0 cr)
•CSCI 5801 - Software Engineering I (3.0 cr)
•CSCI 5802 - Software Engineering II (3.0 cr)
•CSCI 5980 - Special Topics in Computer Science (1.0 - 3.0 cr)
•CSCI 8115 - Human-Computer Interaction and User Interface Technology (3.0 cr)
•CSCI 8205 - Parallel Computer Organization (3.0 cr)
•CSCI 8211 - Advanced Computer Networks and Their Applications (3.0 cr)
•CSCI 8271 - Security and Privacy in Computing (3.0 cr)
•CSCI 8363 - Numerical Linear Algebra in Data Exploration (3.0 cr)
•CSCI 8551 - Intelligent Agents (3.0 cr)
•CSCI 8715 - Spatial Data Science Research (3.0 cr)
• CSCI 8735 - Advanced Database Systems (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 31
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in computer science offers coursework from across a broad spectrum of theoretical and applied computer science, combined with research opportunities in nearly all areas of the field. The graduate program's faculty members advise students in such areas as algorithms and theoretical computer science; numerical, parallel, and high-performance computing; distributed computing and systems; artificial intelligence, robotics, and computer vision; databases and data mining; human-computer interaction and information systems; graphics and visualization; software engineering and programming languages; computer architecture and compilers; networking; bioinformatics and computational biology; and computer security. In addition, students may choose a course of study that integrates research in computer science with applications in other fields.

Computer science degrees include the MS (offered Plan A with thesis, Plan B with project, or coursework-only Plan C with coursework-based projects), the MCS (a terminal, coursework-only degree), and the PhD. The department also supports a master of science in software engineering (MSSE) degree.

Faculty from the Department of Computer Science and Engineering also participate in a variety of other graduate programs, including bioInformatics and computational biology, health informatics, cognitive science, scientific computation, and human factors and ergonomics.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.25.

A degree in any major with a substantial background in computer science is required; a computer science major is preferred.

Other requirements to be completed before admission:
Applicants with an inadequate background must resolve any deficiencies before applying to the program.

The program requires all applicants to complete the University's online application. The names and email addresses of three recommenders are required; Scores from the General (Aptitude) Test of the GRE are required for MS program applicants. Master's students are accepted for fall admission only. The application deadline is March 1. Additional information is available at https://www.cs.umn.edu/admissions/graduate

Applicants must submit their test score(s) from the following:
- GRE
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 85
  - Internet Based - Writing Score: 23
  - Internet Based - Reading Score: 23
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5
  - Reading Score: 6.5
  - Writing Score: 6.5

- **MELAB**
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 21 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.

**Plan B:** Plan B requires 31 major credits and 0 credits outside the major. The final exam is oral.

**Plan C:** Plan C requires 31 major credits and 0 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

The MS requires a minimum of 31 credits and is offered under three plans. All plans require students to take one course from each of the 3 breadth areas in computer science (9 credits): theory and algorithms; architecture, systems and software; and applications; and 1 credit of colloquium (CSCI 8970).

A minimum of 6 credits in computer science 8xxx-level courses, in addition to the colloquium, must be included in the required coursework for Plan A and Plan C; Plan B students must include a minimum of 3 credits in computer science 8xxx-level courses, in addition to the colloquium and Plan B project credits.

Plan A requires 13 credits in computer science coursework, including the breadth courses and colloquium credit, plus 10 thesis credits. The remaining 8 credits may be taken in the major field or any related field as defined by the graduate handbook.

Plan B and Plan C require 16 credits in computer science coursework, including the breadth courses and colloquium credit. Plan B students must also include 3 credits of the project course, CSCI 8760. The remaining 15 credits may be taken in the major field or in any related field.

**Breadth Courses**

Students in all plans must take 3 breadth requirement courses, one from each subject area.

**Applications**

Take 1 or more course(s) from the following:

- **CSCI 5115** - User Interface Design, Implementation and Evaluation (3.0 cr)
- **CSCI 5125** - Collaborative and Social Computing (3.0 cr)
- **CSCI 5271** - Introduction to Computer Security (3.0 cr)
- **CSCI 5461** - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
- **CSCI 5471** - Modern Cryptography (3.0 cr)
- **CSCI 5511** - Artificial Intelligence I (3.0 cr)
- **CSCI 5512** - Artificial Intelligence II (3.0 cr)
- **CSCI 5521** - Introduction to Machine Learning (3.0 cr)
- **CSCI 5523** - Introduction to Data Mining (3.0 cr)
- **CSCI 5551** - Introduction to Intelligent Robotic Systems (3.0 cr)
• CSCI 5561 - Computer Vision (3.0 cr)
• CSCI 5607 - Fundamentals of Computer Graphics I (3.0 cr)
• CSCI 5608 - Fundamentals of Computer Graphics II (3.0 cr)
• CSCI 5609 - Visualization (3.0 cr)
• CSCI 5611 - Animation & Planning in Games (3.0 cr)
• CSCI 5619 - Virtual Reality and 3D Interaction (3.0 cr)
• CSCI 5707 - Principles of Database Systems (3.0 cr)

**Architecture, Systems and Software**

Take 1 or more course(s) from the following:

• CSCI 5103 - Operating Systems (3.0 cr)
• CSCI 5106 - Programming Languages (3.0 cr)
• CSCI 5161 - Introduction to Compilers (3.0 cr)
• CSCI 5204 - Advanced Computer Architecture (3.0 cr)
• CSCI 5211 - Data Communications and Computer Networks (3.0 cr)
• CSCI 5221 - Foundations of Advanced Networking (3.0 cr)
• CSCI 5231 - Wireless and Sensor Networks (3.0 cr)
• CSCI 5451 - Introduction to Parallel Computing: Architectures, Algorithms, and Programming (3.0 cr)
• CSCI 5708 - Architecture and Implementation of Database Management Systems (3.0 cr)
• CSCI 5801 - Software Engineering I (3.0 cr)
• CSCI 5802 - Software Engineering II (3.0 cr)

**Theory and Algorithms**

Take 1 or more course(s) from the following:

• CSCI 5302 - Analysis of Numerical Algorithms (3.0 cr)
• CSCI 5304 - Computational Aspects of Matrix Theory (3.0 cr)
• CSCI 5403 - Computational Complexity (3.0 cr)
• CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
• CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
• CSCI 5525 - Machine Learning (3.0 cr)

**Colloquium Credits**

Students must take 1 credit of CS Colloquium

CSCI 8970 - Computer Science Colloquium (1.0 cr)

**Computer Science Courses**

Students may choose additional coursework from this list or consult with their advisor for further options. Take 0 or more credit(s) from the following:

• CSCI 5103 - Operating Systems (3.0 cr)
• CSCI 5105 - Introduction to Distributed Systems (3.0 cr)
• CSCI 5106 - Programming Languages (3.0 cr)
• CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
• CSCI 5125 - Collaborative and Social Computing (3.0 cr)
• CSCI 5143 - Real-Time and Embedded Systems (3.0 cr)
• CSCI 5161 - Introduction to Compilers (3.0 cr)
• CSCI 5204 - Advanced Computer Architecture (3.0 cr)
• CSCI 5211 - Data Communications and Computer Networks (3.0 cr)
• CSCI 5231 - Wireless and Sensor Networks (3.0 cr)
• CSCI 5271 - Introduction to Computer Security (3.0 cr)
• CSCI 5302 - Analysis of Numerical Algorithms (3.0 cr)
• CSCI 5304 - Computational Aspects of Matrix Theory (3.0 cr)
• CSCI 5403 - Computational Complexity (3.0 cr)
• CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
• CSCI 5451 - Introduction to Parallel Computing: Architectures, Algorithms, and Programming (3.0 cr)
• CSCI 5461 - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
• CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
• CSCI 5511 - Artificial Intelligence I (3.0 cr)
• CSCI 5512 - Artificial Intelligence II (3.0 cr)
• CSCI 5521 - Introduction to Machine Learning (3.0 cr)
• CSCI 5523 - Introduction to Data Mining (3.0 cr)
• CSCI 5525 - Machine Learning (3.0 cr)
• CSCI 5551 - Introduction to Intelligent Robotic Systems (3.0 cr)
• CSCI 5552 - Sensing and Estimation in Robotics (3.0 cr)
• CSCI 5561 - Computer Vision (3.0 cr)
• CSCI 5607 - Fundamentals of Computer Graphics I (3.0 cr)
• CSCI 5608 - Fundamentals of Computer Graphics II (3.0 cr)
• CSCI 5611 - Animation & Planning in Games (3.0 cr)
Plan A
Plan A students must take 10 thesis credits.
CSCI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B
Plan B requires 3 credits of the Plan B project course, CSCI 8760. The Plan B project is a significant project demonstrating the student's familiarity with the tools of research, the capability to work independently, and the ability to effectively relate their results to their committee. A written report describing the Plan B project must be approved by the advisor. A copy of the report should be provided to the committee members at least 1 week before the oral presentation.
CSCI 8760 - Plan B Project (3.0 cr)

Plan C
Plan C is a coursework only degree. Students must complete a minimum of 100 hours of course-based project work, a written research report, and an oral presentation within CSCI courses taken for graduate credit. Students can count at most 3 credits of the following directed research/independent study courses toward their degree plan: CSCI 5994, 8994, 5991, and 8991.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 13
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate program in computer science offers coursework from across a broad spectrum of theoretical and applied computer science, combined with research opportunities in nearly all areas of the field. Faculty members advise students in such areas as algorithms and theoretical computer science; numerical, parallel, and high-performance computing; distributed computing and systems; artificial intelligence, robotics, and computer vision; databases and data mining; human-computer interaction and information systems; graphics and visualization; software engineering and programming languages; computer architecture and compilers; networking; bioinformatics and computational biology; and computer security. In addition, students may choose a course of study that integrates research in computer science with applications in other fields.

Computer science degrees include the M.C.S., the M.S. (Plan A with thesis, Plan B with project, or coursework-only Plan C with coursework-based projects), and the Ph.D. The department also supports a master of science in software engineering (M.S.S.E.) degree.

Faculty from the Department of Computer Science and Engineering also participate in a variety of other graduate programs, including BioInformatics and Computational Biology, Health Informatics, Cognitive Science, Scientific Computation and Human Factors and Ergonomics.

**Program Delivery**

This program is available:

- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

**Program Sub-plans**

Students are required to complete one of the following sub-plans.

Students may not complete the program with more than one sub-plan.

**Master's**

A minor in computer science for master's students majoring in other fields must include 9 credits of graduate courses in CSCI. The
colloquium credit may not be included. There is a limit of one 4xxx course and a requirement of at least one 8xxx course or a 5xxx course that has a prerequisite of a 5xxx course. These courses must be taken on the A/F grading scale and a minimum GPA of 3.00 is expected.

Doctoral
A minor in computer science for Ph.D. students majoring in other fields must include 13 credits of graduate courses in CSCI, and should include the colloquium credit. There is a limit of one 4xxx course and a requirement of at least one 8xxx course or a 5xxx course that has a prerequisite of a 5xxx course. These courses must be taken on the A/F grading scale and a minimum GPA of 3.25 is expected.

Colloquium Credit
CSCI 8970 - Computer Science Colloquium (1.0 cr)

Computer science degrees include the PhD, as well as the M.C.S. (a terminal, coursework-only degree), and the MS (offered Plan A with thesis, Plan B with project, or coursework-only Plan C with coursework-based projects). The department also supports a master of science in software engineering (M.S.S.E.) degree.

Faculty from the Department of Computer Science and Engineering also participate in a variety of other graduate programs, including BioInformatics and Computational Biology, Health Informatics, Cognitive Science, Scientific Computation and Human Factors and Ergonomics.

**Program Delivery**
This program is available:
• via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**
The preferred undergraduate GPA for admittance to the program is 3.45.

A degree in any major with a substantial background in computer science is required; a computer science major is preferred.

Other requirements to be completed before admission:
The program requires all applicants to complete the department's online application, as well as the University's online application. The names and email addresses of three recommenders are required; they will be asked to upload their letters of recommendation to the CS&E online application only. Scores from the General (Aptitude) Test of the GRE are required for PhD program applicants. PhD students are accepted for fall admission only. The application deadline is April 1. Students seeking financial aid must apply by December 5. Additional information is available at https://www.cs.umn.edu/admissions/graduate

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 85
  - Internet Based - Writing Score: 23

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
16 to 25 credits are required in the major.
6 to 15 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.45 is required for students to remain in good standing.

The PhD requires a total of 55 credits consisting of 31 course credits and 24 thesis credits. Of the 31 course credits, 16 must be in computer science courses and at least 6 from outside the major. The 16 major credits must include five 3-credit courses that fulfill the breadth requirement in three different areas: theory and algorithms; architecture, systems and software; and applications; plus 1 credit of colloquium (CSCI 8970).

The remaining 9 credits may be taken as additional graduate-level courses in the major or in any supporting field. Students are recommended to take CSCI 8001/2 Introduction to Research in Computer Science I and II and a directed research course (CSCI 8994).

Students are expected to complete all courses in their degree program with a GPA of at least 3.45. All courses must be taken for graduate credit and on the A-F grading basis.

All doctoral students must demonstrate background knowledge in computer science as explained in the program requirements at: https://www.cs.umn.edu/academics/graduate/phd/bg-req

Breadth Requirement Courses
Students must take a total of 5 courses (typically 15 credits): one from each of the three subject areas and the remaining two from any of the three subject areas.
Take 5 or more course(s) from the following:

**Theory and Algorithms**
Take 1 or more course(s) from the following:
- CSCI 5302 - Analysis of Numerical Algorithms (3.0 cr)
- CSCI 5304 - Computational Aspects of Matrix Theory (3.0 cr)
- CSCI 5403 - Computational Complexity (3.0 cr)
- CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
- CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
- CSCI 5525 - Machine Learning (3.0 cr)

**Architecture, Systems and Software**
Take 1 or more course(s) from the following:
- CSCI 5103 - Operating Systems (3.0 cr)
- CSCI 5105 - Introduction to Distributed Systems (3.0 cr)
- CSCI 5106 - Programming Languages (3.0 cr)
- CSCI 5161 - Introduction to Compilers (3.0 cr)
- CSCI 5211 - Data Communications and Computer Networks (3.0 cr)
- CSCI 5221 - Foundations of Advanced Networking (3.0 cr)
- CSCI 5231 - Wireless and Sensor Networks (3.0 cr)
- CSCI 5451 - Introduction to Parallel Computing; Architectures, Algorithms, and Programming (3.0 cr)
- CSCI 5708 - Architecture and Implementation of Database Management Systems (3.0 cr)
- CSCI 5801 - Software Engineering I (3.0 cr)
• CSCI 5802 - Software Engineering II (3.0 cr)
• CSCI 5204 - Advanced Computer Architecture (3.0 cr)

Applications
Take 1 or more course(s) from the following:
• CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
• CSCI 5125 - Collaborative and Social Computing (3.0 cr)
• CSCI 5271 - Introduction to Computer Security (3.0 cr)
• CSCI 5471 - Modern Cryptography (3.0 cr)
• CSCI 5511 - Artificial Intelligence I (3.0 cr)
• CSCI 5512 - Artificial Intelligence II (3.0 cr)
• CSCI 5521 - Introduction to Machine Learning (3.0 cr)
• CSCI 5523 - Introduction to Data Mining (3.0 cr)
• CSCI 5551 - Introduction to Intelligent Robotic Systems (3.0 cr)
• CSCI 5561 - Computer Vision (3.0 cr)
• CSCI 5607 - Fundamentals of Computer Graphics 1 (3.0 cr)
• CSCI 5608 - Fundamentals of Computer Graphics II (3.0 cr)
• CSCI 5609 - Visualization (3.0 cr)
• CSCI 5611 - Animation & Planning in Games (3.0 cr)
• CSCI 5619 - Virtual Reality and 3D Interaction (3.0 cr)
• CSCI 5707 - Principles of Database Systems (3.0 cr)

Supporting Program
Take 6 credits in courses outside of computer science. These credits may be used toward the requirements for a doctoral minor.

Colloquium Credits
Take 1 credit of CS colloquium.
CSCI 8970 - Computer Science Colloquium (1.0 cr)

Thesis Credits
Take 24 credits after passing preliminary oral exam.
CSCI 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Computer Science Courses
The remaining 9 credits of coursework may be taken in the major field or any supporting field. Students may choose courses from this list or consult with their advisor for additional options.
Take 0 or more credit(s) from the following:
• CSCI 5103 - Operating Systems (3.0 cr)
• CSCI 5105 - Introduction to Distributed Systems (3.0 cr)
• CSCI 5106 - Programming Languages (3.0 cr)
• CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)
• CSCI 5117 - Developing the Interactive Web (3.0 cr)
• CSCI 5125 - Collaborative and Social Computing (3.0 cr)
• CSCI 5161 - Introduction to Compilers (3.0 cr)
• CSCI 5204 - Advanced Computer Architecture (3.0 cr)
• CSCI 5211 - Data Communications and Computer Networks (3.0 cr)
• CSCI 5221 - Foundations of Advanced Networking (3.0 cr)
• CSCI 5231 - Wireless and Sensor Networks (3.0 cr)
• CSCI 5271 - Introduction to Computer Security (3.0 cr)
• CSCI 5302 - Analysis of Numerical Algorithms (3.0 cr)
• CSCI 5304 - Computational Aspects of Matrix Theory (3.0 cr)
• CSCI 5403 - Computational Complexity (3.0 cr)
• CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
• CSCI 5451 - Introduction to Parallel Computing: Architectures, Algorithms, and Programming (3.0 cr)
• CSCI 5461 - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
• CSCI 5471 - Modern Cryptography (3.0 cr)
• CSCI 5481 - Computational Techniques for Genomics (3.0 cr)
• CSCI 5511 - Artificial Intelligence I (3.0 cr)
• CSCI 5512 - Artificial Intelligence II (3.0 cr)
• CSCI 5521 - Introduction to Machine Learning (3.0 cr)
• CSCI 5523 - Introduction to Data Mining (3.0 cr)
• CSCI 5525 - Machine Learning (3.0 cr)
• CSCI 5551 - Introduction to Intelligent Robotic Systems (3.0 cr)
• CSCI 5561 - Computer Vision (3.0 cr)
• CSCI 5607 - Fundamentals of Computer Graphics 1 (3.0 cr)
• CSCI 5619 - Virtual Reality and 3D Interaction (3.0 cr)
• CSCI 5707 - Principles of Database Systems (3.0 cr)
• CSCI 5619 - Virtual Reality and 3D Interaction (3.0 cr)
• CSCI 5707 - Principles of Database Systems (3.0 cr)
• CSCI 5708 - Architecture and Implementation of Database Management Systems (3.0 cr)
• CSCI 5715 - From GPS and Virtual Globes to Spatial Computing (3.0 cr)
• CSCI 5801 - Software Engineering I (3.0 cr)
• CSCI 5802 - Software Engineering II (3.0 cr)
• CSCI 5980 - Special Topics in Computer Science (1.0 - 3.0 cr)
• CSCI 5991 - Independent Study (1.0 - 3.0 cr)
• CSCI 5994 - Directed Research (1.0 - 3.0 cr)
• CSCI 8001 - Introduction to Research in Computer Science I (1.0 cr)
• CSCI 8002 - Introduction to Research in Computer Science, II (2.0 cr)
• CSCI 8115 - Human-Computer Interaction and User Interface Technology (3.0 cr)
• CSCI 8205 - Parallel Computer Organization (3.0 cr)
• CSCI 8363 - Numerical Linear Algebra in Data Exploration (3.0 cr)
• CSCI 8442 - Computational Geometry and Applications (3.0 cr)
• CSCI 8551 - Intelligent Agents (3.0 cr)
• CSCI 8735 - Advanced Database Systems (3.0 cr)
• CSCI 8801 - Advanced Software Engineering (3.0 cr)
• CSCI 8980 - Special Advanced Topics in Computer Science (1.0 - 3.0 cr)
• CSCI 8991 - Independent Study (1.0 - 3.0 cr)
• CSCI 8994 - Directed Research in Computer Science (1.0 - 3.0 cr)

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 8
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The minor in the Cyber Security program is administered by the Technological Leadership Institute (TLI) in the College of Science and Engineering. The program integrates the fields of technology, security, and management, to provide students with the skills and insights to assume a leadership role in cyber security, or continue their field of study with a focus on cyber security and its role in organizations.

The curriculum applies fundamental concepts of business management, organizational leadership, and risk management techniques and strategies, each as applied in the context of cyber security, to empower engineering, technology, and business professionals to adapt and lead in the emerging field of cyber security. Each class will include exercises that inform students on those cyber security topics, and give them an opportunity to practice the fundamental skills of communications, teamwork, and project management.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Required Courses
These core courses are designed to be taken in sequence.
ST 8661 - Securing Cyberspace (Fundamentals) (3.0 cr)
ST 8662 - Securing Cyberspace - Advanced (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Elective Courses
- Take 2 or more credit(s) from the following:
  - ST 8113 - Information and Cyber Security (2.0 cr)
• ST 8513 - Cyber Threat Intelligence (2.0 cr)
• CSCI 5271 - Introduction to Computer Security (3.0 cr)
• CSCI 5471 - Modern Cryptography (3.0 cr)
• CSCI 8271 - Security and Privacy in Computing (3.0 cr)

Doctoral
Elective Courses
Take 6 or more credit(s) from the following:
• ST 8113 - Information and Cyber Security (2.0 cr)
• ST 8513 - Cyber Threat Intelligence (2.0 cr)
• CSCI 5271 - Introduction to Computer Security (3.0 cr)
• CSCI 5471 - Modern Cryptography (3.0 cr)

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Data Science Certificate program provides a strong foundation in the science of Big Data and its analysis by gathering in a single program the knowledge, expertise, and educational assets in data collection and management, data analytics, scalable data-driven pattern discovery, and the fundamental concepts behind these methods.

Students who graduate from this 2-semester certificate program will learn the state-of-the-art methods for treating Big Data and be exposed to the cutting edge methods and theory forming the basis for the next generation of Big Data technology.

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree from an accredited college or university in computer science, math, statistics, engineering, natural sciences, or a related field.

Other requirements to be completed before admission:
The undergraduate degree must include statistics, calculus, multivariable calculus, linear algebra, and mathematical software environments such as Matlab or R or the equivalent, programming languages such as C++, C++, Java, programming experience including algorithms and data structures normally taught in beginning computer science courses either as part of the undergraduate degree or subsequent work experience.

Special Application Requirements:
Admission application deadlines: rolling. Applicants are considered for Fall or Spring admission and decisions are made after all applications are received following the close of the application cycle. Application instructions can be found here: https://datascience.umn.edu/admissions

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Writing Score: 23
  - Internet Based - Reading Score: 23
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Part 1 (Composition) score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.0 is required for students to remain in good standing.

The Data Science certificate requires a minimum of 12 credits consisting of one course from each of the three emphasis areas, plus one course chosen from any of the three emphasis areas.

Statistics
Take 1 or more course(s) totaling 3 or more credit(s) from the following:

- STAT 5101 - Theory of Statistics I (4.0 cr)
- STAT 5102 - Theory of Statistics II (4.0 cr)
- STAT 5302 - Applied Regression Analysis (4.0 cr)
- STAT 5401 - Applied Multivariate Methods (3.0 cr)
- STAT 5511 - Time Series Analysis (3.0 cr)
- STAT 8051 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)
- PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)

Algorithmics
Take 1 or more course(s) totaling 3 or more credit(s) from the following:

- CSCI 5521 - Introduction to Machine Learning (3.0 cr)
- CSCI 5523 - Introduction to Data Mining (3.0 cr)
- CSCI 5525 - Machine Learning (3.0 cr)
- EE 8591 - Predictive Learning from Data (3.0 cr)
- PUBH 8475 - Statistical Learning and Data Mining (3.0 cr)

Infrastructure and Large Scale Computing
Take 1 or more course(s) totaling 3 or more credit(s) from the following:

- CSCI 5105 - Introduction to Distributed Systems (3.0 cr)
- CSCI 5451 - Introduction to Parallel Computing: Architectures, Algorithms, and Programming (3.0 cr)
- CSCI 5707 - Principles of Database Systems (3.0 cr)
- CSCI 8980 - Special Advanced Topics in Computer Science (1.0 - 3.0 cr)
- EE 5351 - Applied Parallel Programming (3.0 cr)
- EE 8367 - Parallel Computer Organization (3.0 cr)

- Program Type: Master's  
- Requirements for this program are current for Fall 2018  
- Length of program in credits: 31  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The MS in data science program provides a strong foundation in the science of Big Data and its analysis by gathering in a single program the knowledge, expertise, and educational assets in data collection and management, data analytics, scalable data-driven pattern discovery, and the fundamental concepts behind these methods.

Students who graduate from this regular 2 year master's program will learn the state-of-the-art methods for treating Big Data, be exposed to the cutting edge methods and theory forming the basis for the next generation of Big Data technology, and will complete a project demonstrating that they can use the fundamental concepts to design innovative methods for new application areas arising from business, government, security, medicine, biology, physical sciences, and the environment.

**Program Delivery**  
This program is available:  
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**  
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree from an accredited college or university in computer science, math, statistics, engineering, natural sciences, or a related field.

Other requirements to be completed before admission:  
The undergraduate degree must include statistics, calculus, multivariable calculus, linear algebra, and mathematical software environments such as Matlab or R or the equivalent, programming languages such as C, C++, Java, programming experience including algorithms and data structures normally taught in beginning computer science courses either as part of the undergraduate degree or subsequent work experience.

**Special Application Requirements:**  
Admission application deadlines: February 1st international applicants, March 1st domestic applicants. Applicants are only considered for fall admission and decisions are made after all applications are received following the close of the application cycle.   - Part 1 (Composition) score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan B: Plan B requires 31 major credits and up to null credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: Students must complete 3 credit hours of capstone project coursework supervised by a faculty member.

The final examination for the Capstone Project may be oral, written, or both. The format of the final exam is decided between the student, the adviser, and the director of graduate studies, and is based on what is most appropriate for the students project. The final oral examination, if it is used, is a closed examination open only to the final oral examination committee and the student.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The program requires a total of 31 credits consisting of 6 credits each from the three emphasis areas: statistics, algorithms, and infrastructure and large scale computing; 9 credits in approved electives, 3 credits of which must be at the 8xxx level; 1 credit of research colloquium; and 3 credits for the capstone project.

Statistics

Short List
- Take one course from the short list and one additional statistics course from any in this emphasis for a total of 6 or more credits.
  - Take 2 or more course(s) totaling 6 or more credit(s) from the following:
    • STAT 5101 - Theory of Statistics I (4.0 cr)
    • STAT 5102 - Theory of Statistics II (4.0 cr)
    • STAT 5302 - Applied Regression Analysis (4.0 cr)
    • STAT 5401 - Applied Multivariate Methods (3.0 cr)
    • STAT 5511 - Time Series Analysis (3.0 cr)
    • STAT 8051 - Advanced Regression Techniques: linear, nonlinear and nonparametric methods (3.0 cr)
    • PUBH 7440 - Introduction to Bayesian Analysis (3.0 cr)

Additional Courses
- Take 0 or more course(s) totaling 0 or more credit(s) from the following:
  • PUBH 8401 - Linear Models (4.0 cr)
  • PUBH 8432 - Probability Models for Biostatistics (3.0 cr)
  • PUBH 7405 - Biostatistics: Regression (4.0 cr)
  • PUBH 7430 - Statistical Methods for Correlated Data (3.0 cr)
  • PUBH 8442 - Bayesian Decision Theory and Data Analysis (3.0 cr)
  • EE 5531 - Probability and Stochastic Processes (3.0 cr)
  • EE 8581 - Detection and Estimation Theory (3.0 cr)

Algorithmics

Short List
- Take one course from the short list and one additional course from any in this emphasis for a total of 6 or more credits.
  - Take 2 or more course(s) totaling 6 or more credit(s) from the following:
    • CSCI 5521 - Introduction to Machine Learning (3.0 cr)
    • CSCI 5523 - Introduction to Data Mining (3.0 cr)
    • CSCI 5525 - Machine Learning (3.0 cr)
    • EE 8591 - Predictive Learning from Data (3.0 cr)
    • PUBH 8475 - Statistical Learning and Data Mining (3.0 cr)

Additional Courses
- Take 0 or more course(s) totaling 0 or more credit(s) from the following:
  • CSCI 5302 - Analysis of Numerical Algorithms (3.0 cr)
  • CSCI 5304 - Computational Aspects of Matrix Theory (3.0 cr)
  • CSCI 5511 - Artificial Intelligence I (3.0 cr)
  • CSCI 5512 - Artificial Intelligence II (3.0 cr)
**Infrastructure and Large Scale Computing**

**Short List**
Take one course from the short list and one additional course from any in this emphasis for a total of 6 or more credits.

- Take 2 or more course(s) totaling 6 or more credit(s) from the following:
  - CSCI 5105 - Introduction to Distributed Systems (3.0 cr)
  - CSCI 5451 - Introduction to Parallel Computing: Architectures, Algorithms, and Programming (3.0 cr)
  - CSCI 5707 - Principles of Database Systems (3.0 cr)
  - CSCI 8980 - Special Advanced Topics in Computer Science (1.0 - 3.0 cr)
  - EE 5351 - Applied Parallel Programming (3.0 cr)
  - EE 8367 - Parallel Computer Organization (3.0 cr)
  - CSCI 5708 - Architecture and Implementation of Database Management Systems (3.0 cr)

**Additional Courses**
Take 0 or more course(s) totaling 0 or more credit(s) from the following:

- CSCI 5211 - Data Communications and Computer Networks (3.0 cr)
- CSCI 5231 - Wireless and Sensor Networks (3.0 cr)
- CSCI 5271 - Introduction to Computer Security (3.0 cr)
- CSCI 5715 - From GPS and Virtual Globes to Spatial Computing (3.0 cr)
- CSCI 8701 - Overview of Database Research (3.0 cr)
- CSCI 8715 - Spatial Data Science Research (3.0 cr)
- EE 5371 - Computer Systems Performance Measurement and Evaluation (3.0 cr)
- EE 5381 - Telecommunications Networks (3.0 cr)
- EE 5501 - Digital Communication (3.0 cr)

**Electives**
Take 3 elective courses for 9 graduate-credits. 3 credits must be at the 8xxx level. DSCI 8760 does not satisfy the elective requirement. Students may choose courses from this list or consult with their adviser for further options. Examples include 5xxx & 8xxx special topics classes in CSCI, EE, STAT, & PUBH (Biostat).

- Take 3 or more course(s) totaling 9 or more credit(s) from the following:
  - CSCI 5461 - Functional Genomics, Systems Biology, and Bioinformatics (3.0 cr)
  - CSCI 5561 - Computer Vision (3.0 cr)
  - CSCI 8271 - Security and Privacy in Computing (3.0 cr)
  - CSCI 8363 - Numerical Linear Algebra in Data Exploration (3.0 cr)
  - CSCI 8715 - Spatial Data Science Research (3.0 cr)
  - CSCI 8725 - Databases for Bioinformatics (3.0 cr)
  - PUBH 8445 - Statistics for Human Genetics and Molecular Biology (3.0 cr)
  - PUBH 8446 - Advanced Statistical Genetics and Genomics (3.0 cr)
  - PUBH 8472 - Spatial Biostatistics (3.0 cr)
  - MATH 5467 - Introduction to the Mathematics of Image and Data Analysis (4.0 cr)

**Research Colloquium**

- DSCI 8970 - Data Science M.S. Colloquium (1.0 cr)

**Capstone Course**

- DSCI 8760 - Data Science M.S. Plan B Project (3.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 9
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Data Science Minor provides a strong foundation in the science of Big Data and its analysis by gathering together the knowledge, expertise, and educational assets in data collection and management, data analytics, scalable data-driven pattern discovery, and the fundamental concepts behind these methods. Students completing this program will learn the state-of-the-art methods for treating Big Data and be exposed to the cutting edge methods and theory forming the basis for the next generation of Big Data technology.

Program Delivery
This program is available:
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
Currently enrolled in a University of Minnesota M.S. or Ph.D. program.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Courses must be taken at the University of Minnesota Twin Cities Campus and on the A/F grading scale. Transfer coursework will not be accepted. A 3.0 GPA must be maintained in the courses used for the Data Science minor.

All students must take one course from each of the three emphasis areas for a total of at least 9 credits. Doctoral students must take an additional electives course for at least 3 credits.

Algorithmics
Take 1 or more course(s) totaling 3 or more credit(s) from the following:
- CSCI 5521 - Introduction to Machine Learning (3.0 cr)
- CSCI 5523 - Introduction to Data Mining (3.0 cr)
- CSCI 5525 - Machine Learning (3.0 cr)
- EE 8591 - Predictive Learning from Data (3.0 cr)
- PUBH 7475 - Statistical Learning and Data Mining (3.0 cr)

Statistics
Take 1 or more course(s) totaling 3 or more credit(s) from the following:

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
• STAT 5101 - Theory of Statistics I (4.0 cr)
• STAT 5102 - Theory of Statistics II (4.0 cr)
• STAT 5302 - Applied Regression Analysis (4.0 cr)

• EE 5351 - Applied Parallel Programming (3.0 cr)

• Parallel Computer Organization
  Either CSCI 8205 or EE 8367. These courses are cross-listed.
  • CSCI 8205 - Parallel Computer Organization (3.0 cr)
  or EE 8367 - Parallel Computer Organization (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Master's
The master's minor requires one course from each of the three emphasis areas for a total of 9 credits.

Doctoral
In addition to one course from each of the three emphasis areas, doctoral students take one elective course from the following to complete the 12-credit minimum.

Biochemistry Electives (6 Credits)
Students cannot use a course from the department housing their degree program as an elective.
Take 1 or more course(s) totaling 3 or more credit(s) from the following:
• STAT 5101 - Theory of Statistics I (4.0 cr)
• STAT 5102 - Theory of Statistics II (4.0 cr)
• STAT 5302 - Applied Regression Analysis (4.0 cr)
• STAT 5511 - Time Series Analysis (3.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The modern earth sciences are a remarkable synthesis of the physical and biological sciences. They are at the forefront of inquiry into and solutions of most of the major issues involving the global environment: climate, oceans, freshwater in all its forms, natural resources, and natural disasters. Like no other field, they integrate all the systems, from surface to great depth, from physics to chemistry to biology, and over all of geologic time and all geographic scales. The program includes the fields of structural geology, tectonics, petrology, hydrogeology, geomorphology, sedimentology, surface processes, geochemistry, biogeochemistry, biogeology, chemical oceanography, mineralogy, mineral and rock magnetism, rock and mineral physics, geodynamics, seismology, geostatistics, planetary geology, and geophysics and applied geophysics.

Students may accommodate other areas of interest such as engineering geology, environmental geology, materials science, soil science, and paleoecology by choosing a minor or supporting field from outside the program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in geology, geophysics, earth and material sciences, chemistry, physics, biology, or environmental science.

Other requirements to be completed before admission:
At least one year each of study in calculus, chemistry, and physics is required. In general, an outstanding academic record is expected.

Special Application Requirements:
Materials required for a complete application file include the student's statement of purpose, three letters of recommendation, transcripts, official GRE scores, and the Application for Admission. Applications are considered at any time; however, to be considered for financial aid, all materials must be submitted by December 15. Studies may begin in any semester or summer session, although fall semester is preferable. IMPORTANT: Refer to the Graduate Programs section of the department website (http://www.esci.umn.edu/programs/gradprospective) for a listing of all required application materials and preferred method of submission.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
- Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

**IELTS**
- Total Score: 6.5

**MELAB**
- Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A**: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B**: Plan B requires 14 to 22 major credits and 8 to 16 credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project**: Students must demonstrate familiarity with the tools of research or scholarship in their track, the ability to work independently, and the ability to present the results of their investigation effectively, by completing one or more projects, which may take the form of a research paper, presentation of research results, or completion of a faculty-supervised research experience. The Plan B project(s) should involve a minimum combined total of approximately 120 hours (the equivalent of three full-time weeks) of work.

**Plan C**: Plan C requires 14 to 21 major credits and 9 to 16 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

At the onset of studies, a coursework "compact" will be developed with the student, his/her advisor, and the graduate studies committee. The compact will be reviewed annually to assure timely progress and revise as needed.

The masters degree is offered under Plan A (thesis), Plan B (project), or Plan C (coursework). Plan A and Plan B students must choose one of five tracks in the earth sciences program: geology, geophysics, biogeology, hydrogeology, or earth sciences. Plan C students may only choose the hydrogeology track. Tracks carry coursework requirements that are part of the student's course compact.

A maximum of 9 credits of 4xxx-level coursework may be used towards program requirements.

**Required Courses**

All students must complete ESCI 8001, preferably in the first year.

**ESCI 8001 - Introductory Graduate Seminar (2.0 cr)**

**Plan A**
Plan A requires 14 credits in the major (including the track requirements); 6 credits in a minor or in related fields outside ESCI, and 10 thesis credits.

**ESCI 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)**

**Plan B**
Plan B requires 14 credits in the major (including the track requirements) and 8 credits outside ESCI, which can include a minor. The remaining 8 credits can be taken in the major or in any supporting field. Up to 3 credits of ESCI 8994 may be used for the project requirement.

**ESCI 8994 - Research in Earth Sciences (1.0 - 4.0 cr)**

**Plan C**
Plan C requires 14 credits in the major (including the track requirements) and 9 credits outside ESCI, which can include a minor. The remaining 7 credits can be taken in the major or in any supporting field. Plan C students may only choose the Hydrogeology track.
Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Biogeology
This sub-plan is limited to students completing the program under Plan A or Plan B.

Biogeology represents a rapidly growing area at the intersection between Earth and the life sciences. It includes research in microbial evolution and biochemistry, microbe/mineral chemical interactions, the role of organisms in basic geological processes, the principles through which organisms or organic compounds can be used to reconstruct surface conditions, biogeochemical cycling, pollution control and remediation, the origin of life on Earth, and astrobiology. This is a broad field that is moving in new and exciting directions, and witnessing explosive growth in understanding the variety of ways biology mediates geology and vice versa. Many of the most basic earth surface processes are now seen as intimately biological with rates and pathways dictated by organic processes. Understanding the importance of these processes, quantifying them through time and place, and learning to utilize and/or control them will be major components of earth sciences research in the 21st century.

Required Courses
Take 6 or more credit(s) from the following:
- ESCI 8402 - Biogeochemical Cycles in the Ocean (3.0 cr)
- ESCI 8801 - Geomicrobiology (3.0 cr)

Earth Sciences
This sub-plan is limited to students completing the program under Plan A or Plan B.

This generalist track exists for students whose curriculum and/or thesis (paper or project for MS Plan B) do not fit any of the other four tracks. Because it is not specific to a discipline, there are no mandatory courses in the major apart from the introductory graduate seminar, a minimum of 6 additional graduate-level credits in the major program, 12 supporting program credits or completion of all requirements for a minor, and thesis credits. A curriculum specific to the student will be set through the compact process.

6-credit minimum; courses determined on an individual basis.

Geology
This sub-plan is limited to students completing the program under Plan A or Plan B.

Geology uses field observation, laboratory work, analog and computer modeling, chemical and biological probes and assays to understand Earth's coupled rock, water and biological systems, the underlying processes, and their history of interaction as evidenced in the rock record.

Required Courses
Take 6 or more credit(s) from the following:
- ESCI 5302 - Isotope Geology (3.0 cr)
- ESCI 5351 - Geochemical Modeling of Aqueous Systems (3.0 cr)
- ESCI 5353 - Electron Microprobe Theory and Practice (3.0 cr)
- ESCI 5502 - Advanced Structural Geology (3.0 cr)
- ESCI 5503 - Advanced Petrology (3.0 cr)
- ESCI 5601W - Advanced Sedimentology [WI] (4.0 cr)
- ESCI 5705 - Limnogeology and Paleoenvironment (3.0 cr)

Geophysics
This sub-plan is limited to students completing the program under Plan A or Plan B.

Geophysics uses remote sensing probes (seismic waves, potential fields, etc.), laboratory simulation of deep earth conditions and computer modeling of fluid and continuum mechanical dynamics to investigate the structure, composition, history and dynamics of solid Earth and other planets.

Required Courses
ESCI 4211 - Solid Earth Geophysics I (3.0 cr)
Take 1 or more course(s) totaling 3 or more credit(s) from the following:
- ESCI 4212 - Solid Earth Geophysics II (3.0 cr)
• ESCI 5201 - Time-Series Analysis of Geological Phenomena (3.0 cr)
• ESCI 5203 - Mineral and Rock Physics (3.0 cr)
• ESCI 5204 - Geostatistics and Inverse Theory (3.0 cr)
• ESCI 8203 - Environmental Geophysics (3.0 cr)
• ESCI 8204 - Geomagnetism and Paleomagnetism (3.0 cr)

Hydrogeology
Hydrogeology uses direct observation and remote sensing, computer modeling and laboratory simulation to constrain the interaction of water and rock in Earth's shallow subsurface. Freshwater is Earth's most precious and increasingly overexploited resource. Hydrogeology is a key discipline in the effective shepherding of this important reserve. This track establishes a baseline curriculum for hydrogeology at the graduate level. The compact process will identify additional coursework appropriate to the student's prior training and research directions.

Required Courses
ESCI 4702 - General Hydrogeology (4.0 cr)
Take 1 or more course(s) totaling 3 or more credit(s) from the following:
• ESCI 5205 - Fluid Mechanics in Earth and Environmental Sciences (3.0 cr)
• ESCI 5971 - Field Hydrogeology (2.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The modern earth sciences are a remarkable synthesis of the physical and biological sciences. They are at the forefront of inquiry into and solutions of most of the major issues involving the global environment: climate, oceans, freshwater in all its forms, natural resources, and natural disasters. Like no other field, they integrate all the systems, from surface to great depth, from physics to chemistry to biology, and over all of geologic time and all geographic scales. The program includes the fields of structural geology, tectonics, petrology, hydrogeology, geomorphology, sedimentology, surface processes, geochemistry, biogeochemistry, biogeology, chemical oceanography, mineralogy, mineral and rock magnetism, rock and mineral physics, geodynamics, seismology, geostatistics, planetary geology, and geophysics and applied geophysics.

Students may accommodate other areas of interest such as engineering geology, environmental geology, materials science, soil science, and paleoecology by choosing a minor or supporting field from outside the program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The minor is established individually with approval by the graduate studies committee.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
The master's minor requires a minimum of 6 credits in ESCI courses.

Doctoral
The doctoral minor requires a minimum of 12 credits in ESCI courses.
Twin Cities Campus
Earth Sciences Ph.D.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 48
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The modern earth sciences are a remarkable synthesis of the physical and biological sciences. They are at the forefront of inquiry into and solutions of most of the major issues involving the global environment: climate, oceans, freshwater in all its forms, natural resources, and natural disasters. Like no other field, they integrate all the systems, from surface to great depth, from physics to chemistry to biology, and over all of geologic time and all geographic scales. The program includes the fields of structural geology, tectonics, petrology, hydrogeology, geomorphology, sedimentology, surface processes, geochemistry, biogeochemistry, biogeology, chemical oceanography, mineralogy, mineral and rock magnetism, rock and mineral physics, geodynamics, seismology, geostatistics, planetary geology, and geophysics and applied geophysics.

Students may accommodate other areas of interest such as engineering geology, environmental geology, materials science, soil science, and paleoecology by choosing a minor or supporting field from outside the program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Bachelor's degree in geology, geophysics, earth and material sciences, chemistry, physics, biology, or environmental science.

Other requirements to be completed before admission:
At least one year of study each in calculus, chemistry, and physics is required. In general, an outstanding academic record is expected.

Special Application Requirements:
Materials required for a complete application file include the student's statement of purpose, three letters of recommendation, transcripts, official GRE scores, and the Application for Admission. Applications are considered at any time; however, to be considered for financial aid, all materials must be submitted by December 15. Studies may begin in any semester or summer session, although fall semester is preferable. IMPORTANT: Refer to the Graduate Programs section of the department website (http://www.esci.umn.edu/programs/gradprospective) for a listing of all required application materials and preferred method of submission.

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550

IELTS
- Total Score: 6.5

MELAB
- Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
12 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

At the onset of studies, a coursework "compact" will be developed with the student, his/her advisor, and the graduate studies committee. The compact will be reviewed annually to assure timely progress and revise as needed.

Students must choose one of five tracks in the earth sciences program: geology, geophysics, biogeology, hydrogeology, or earth sciences. Tracks carry coursework requirements that are part of the student's course compact.

The PhD requires a minimum 12 credits of coursework in earth sciences, including the track requirements, a minimum of 12 credits in a minor or supporting field, plus 24 thesis credits.

A maximum of 9 credits of 4xxx-level coursework may be used towards program requirements. Coursework taken A/F must be completed with an average grade of B or better.

Required Courses
All students must complete ESCI 8001, preferably in the first year.
ESCI 8001 - Introductory Graduate Seminar (2.0 cr)

Minor or Supporting Program Coursework
Take 12 credits in a minor or in supporting fields outside ESCI.

Thesis Credits
Take 24 credits after passing preliminary oral exam
ESCI 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Biogeology
Biogeology represents a rapidly growing area at the intersection between Earth and the life sciences. It includes research in microbial evolution and biochemistry, microbe/mineral chemical interactions, the role of organisms in basic geological processes, the principles through which organisms or organic compounds can be used to reconstruct surface conditions, biogeochemical cycling, pollution control and remediation, the origin of life on Earth, and astrobiology. This is a broad field that is moving in new and exciting directions, and witnessing explosive growth in understanding the variety of ways biology mediates geology and vice versa. Many of the most basic earth surface processes are now seen as intimately biological with rates and pathways dictated by organic processes. Understanding the importance of these processes, quantifying them through time and place, and learning to utilize and/or control them will be major components of earth sciences research in the 21st century.

Required Courses
Take 6 or more credit(s) from the following:

- ESCI 8402 - Biogeochemical Cycles in the Ocean (3.0 cr)
- ESCI 8801 - Geomicrobiology (3.0 cr)

**Earth Sciences**

This generalist track exists for students whose curriculum and/or thesis (paper or project for MS Plan B) do not fit any of the other four tracks. Because it is not specific to a discipline, there are no mandatory courses in the major apart from the introductory graduate seminar, a minimum of 6 additional graduate-level credits in the major program, 12 supporting program credits or completion of all requirements for a minor, and thesis credits. A curriculum specific to the student will be set through the compact process.

6-credit minimum; courses determined on an individual basis.

**Geology**

Geology uses field observation, laboratory work, analog and computer modeling, chemical and biological probes and assays to understand Earth’s coupled rock, water and biological systems, the underlying processes, and their history of interaction as evidenced in the rock record.

**Required Courses**

Take 6 or more credit(s) from the following:

- ESCI 5302 - Isotope Geology (3.0 cr)
- ESCI 5351 - Geochemical Modeling of Aqueous Systems (3.0 cr)
- ESCI 5353 - Electron Microprobe Theory and Practice (3.0 cr)
- ESCI 5502 - Advanced Structural Geology (3.0 cr)
- ESCI 5503 - Advanced Petrology (3.0 cr)
- ESCI 5601W - Advanced Sedimentology [WI] (4.0 cr)
- ESCI 5705 - Limnogeology and Paleoenvironment (3.0 cr)

**Geophysics**

Geophysics uses remote sensing probes (seismic waves, potential fields, etc.), laboratory simulation of deep Earth conditions and computer modeling of fluid and continuum mechanical dynamics to investigate the structure, composition, history and dynamics of solid Earth and other planets.

**Required Courses**

- ESCI 4211 - Solid Earth Geophysics I (3.0 cr)

Take 1 or more course(s) totaling 3 or more credit(s) from the following:

- ESCI 4212 - Solid Earth Geophysics II (3.0 cr)
- ESCI 5201 - Time-Series Analysis of Geological Phenomena (3.0 cr)
- ESCI 5203 - Mineral and Rock Physics (3.0 cr)
- ESCI 5204 - Geostatistics and Inverse Theory (3.0 cr)
- ESCI 8203 - Environmental Geophysics (3.0 cr)
- ESCI 8204 - Geomagnetism and Paleomagnetism (3.0 cr)

**Hydrogeology**

Hydrogeology uses direct observation and remote sensing, computer modeling and laboratory simulation to constrain the interaction of water and rock in Earth’s shallow subsurface. Freshwater is Earth’s most precious and increasingly overexploited resource. Hydrogeology is a key discipline in the effective shepherding of this important reserve. This track establishes a baseline curriculum for hydrogeology at the graduate level. The compact process will identify additional coursework appropriate to the student’s prior training and research directions.

**Required Courses**

- ESCI 4702 - General Hydrogeology (4.0 cr)

Take 1 or more course(s) totaling 3 or more credit(s) from the following:

- ESCI 5205 - Fluid Mechanics in Earth and Environmental Sciences (3.0 cr)
- ESCI 5971 - Field Hydrogeology (2.0 cr)

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Science in Electrical Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Electrical and Computer Engineering offers diverse educational programs that encompass nearly all aspects of modern electrical and computer engineering, ranging from the very theoretical system and information theory to highly experimental work in novel device research and microelectronics. Emphases in the major are solid state and physical electronics, surface physics, thin films, sputtering, noise and fluctuation phenomena, quantum electronics, plasma physics, automation, power systems and power electronics theory, wave propagation, communication systems and theory, optics, lasers, fiber optics, magnetism, semiconductor properties and devices, VLSI and WSI engineering in theory and practice, network theory, signal and image processing, and computer and systems engineering. Interdisciplinary work is also available in bioelectrical sciences, control sciences, computer sciences, solar energy, applications of systems theory to urban transportation and economic planning, and biological modeling.

Students are considered for admission beginning fall semester only (except for part-time students living in Minnesota who work in industry and who may apply for other terms). The deadline for applying for fall semester is December 1.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)
• completely online (all program coursework can be completed online)
• primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)
• partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.40.

Other requirements to be completed before admission:
Consideration is given to students who have completed another curriculum in engineering, science, physics, or mathematics that includes sufficient preparation to pursue a graduate program in electrical engineering. In some instances, additional preparatory studies may be required after admission.

All documents must be submitted electronically. No documents should be mailed to the department or the Graduate Admissions Office.

Every applicant must submit the General Test of the GRE (except University of Minnesota bachelor of electrical engineering graduates who have a GPA of 3.40 or better). The GRE Subject Test is not required for admission.

Special Application Requirements:
Applications are accepted for fall admission only. The deadline is December 1. Additional application information is available at http://www.ece.umn.edu/ProspectiveStudentsGraduate/index.htm

Applicants must submit their test score(s) from the following:
• GRE
International applicants must submit score(s) from one of the following tests:

- **TOEFL**
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550

- **IELTS**
  - Total Score: 6.5

- **MELAB**
  - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan C:** Plan C requires 18 to 24 major credits and 6 to 12 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The MSEE requires a minimum of 30 credits. Plan A requires 14 credits in EE courses, 6 credits in a minor or in related fields outside of the department, and 10 thesis credits. Plan C requires at least 18 credits from EE courses 5xxx and above, at least 6 credits in a minor or in related fields outside of the department, and additional credits from the major or related fields to meet the 30-credit minimum.

Courses taken outside of the major field must be within the College of Science and Engineering.

Part-time students must choose Plan C; full-time students may choose either Plan A or Plan C. The department limits project, seminar, special investigation, directed study credits, and GRAD 999 registrations.

All courses must be taken A-F, with the exception of EE 5041, EE 8925, and graduate seminars, which are only offered S-N. Cross-listed courses must be taken under the EE designator to count towards degree requirements. Non-EE coursework that is cross-listed with Electrical Engineering does not count toward the non-EE coursework requirement.

A maximum of nine 4xxx-level course credits may be used to satisfy masters degree requirements; of these, only six credits may be in EE courses. Only the 4xxx-level courses included on the lists below will be accepted.

M.S.E.E. students who wish to pursue the PhD must pass the PhD preliminary written examination by the end of their second year in residence. Students have two chances to pass the examination. The PhD preliminary written examination is typically held in November and in April.

**Coursework**

**Major Coursework**

Courses from this list can be applied to both Plan A and Plan C major field credit requirements. Plan C students can also apply these courses toward MSEE's 30-credit minimum.

- **EE 5121** - Transistor Device Modeling for Circuit Simulation (3.0 cr)
- **EE 5141** - Introduction to Microsystem Technology (4.0 cr)
- **EE 5163** - Semiconductor Properties and Devices I (3.0 cr)
- **EE 5164** - Semiconductor Properties and Devices II (3.0 cr)
- **EE 5171** - Microelectronic Fabrication (4.0 cr)
- **EE 5173** - Basic Microelectronics Laboratory (1.0 cr)
- **EE 5181** - Micro and Nanotechnology by Self Assembly (3.0 cr)
- **EE 5231** - Linear Systems and Optimal Control (3.0 cr)
- **EE 5235** - Robust Control System Design (3.0 cr)

Plan A
Plan A students have the option to apply the following courses to their major field credit requirement. A maximum of 2 credits from the following subset of this list can be used: EE 8190, EE 8210, EE 8230, EE 8360, EE 8370, EE 8500, EE 8610, EE 8660, EE 8920, EE 8925, EE 8940.

EE 4111 - Advanced Analog Electronics Design (4.0 cr)
EE 4161W - Energy Conversion and Storage [WI] (3.0 cr)
EE 4163 - Energy Conversion and Storage Laboratory (1.0 cr)
EE 4231 - Linear Control Systems: Designed by Input/Output Methods (3.0 cr)
EE 4233 - State Space Control System Design (3.0 cr)
EE 4235 - Linear Control Systems Laboratory (1.0 cr)
EE 4237 - State Space Control Laboratory (1.0 cr)
EE 4301 - Digital Design With Programmable Logic (4.0 cr)
EE 4303 - Introduction to Programmable Devices Laboratory (1.0 cr)
EE 4341 - Embedded System Design (4.0 cr)
EE 4363 - Computer Architecture and Machine Organization (4.0 cr)
EE 4389W - Introduction to Predictive Learning [WI] (3.0 cr)
EE 4501 - Communications Systems (3.0 cr)
EE 4505 - Communications Systems Laboratory (1.0 cr)
EE 4541 - Digital Signal Processing (3.0 cr)
EE 4607 - Wireless Hardware System Design (3.0 cr)
EE 4701 - Electric Drives (3.0 cr)
EE 4703 - Electric Drives Laboratory (1.0 cr)
EE 4721 - Introduction to Power System Analysis (3.0 cr)
EE 4722 - Power System Analysis Laboratory (1.0 cr)
EE 4741 - Power Electronics (3.0 cr)
EE 4743 - Switch-Mode Power Electronics Laboratory (1.0 cr)
EE 5041 - Industrial Assignment for Graduate Students (1.0 cr)
EE 8190 - Electronics Seminar (1.0 cr)
EE 8210 - System Theory Seminar (1.0 cr)
EE 8230 - Control Theory Seminar (1.0 cr)
EE 8360 - Computer Systems Seminar (1.0 cr)
EE 8370 - Computer Aided Design Seminar (1.0 cr)
EE 8500 - Seminar: Communications (1.0 cr)
EE 8610 - Seminar: Electronics, Fields, and Photonics (1.0 cr)
EE 8660 - Seminar: Magnetics (1.0 cr)
EE 8920 - Teaching Experience in Electrical and Computer Engineering (1.0 cr)
EE 8925 - Ethics in Electrical and Computer Engineering (1.0 cr)
EE 8940 - Special Investigations (1.0 - 3.0 cr)

Thesis Credits
All Plan A students must take at least 10 master's thesis credits.
EE 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan C
Plan C students have the option to apply the following courses toward MSEEs 30-credit minimum. These courses do not satisfy the major or outside (non-EE) credit requirements.
A maximum of 2 credits of the following may be applied: EE 5041, EE 8190, EE 8210, EE 8230, EE 8360, EE 8370, EE 8500, EE 8610, EE 8660, EE 8920, EE 8925, and EE 8940.

EE 4111 - Advanced Analog Electronics Design (4.0 cr)
EE 4161W - Energy Conversion and Storage [WI] (3.0 cr)
EE 4163 - Energy Conversion and Storage Laboratory (1.0 cr)
EE 4231 - Linear Control Systems: Designed by Input/Output Methods (3.0 cr)
EE 4233 - State Space Control System Design (3.0 cr)
EE 4235 - Linear Control Systems Laboratory (1.0 cr)
EE 4237 - State Space Control Laboratory (1.0 cr)
EE 4301 - Digital Design With Programmable Logic (4.0 cr)
EE 4303 - Introduction to Programmable Devices Laboratory (1.0 cr)
EE 4341 - Embedded System Design (4.0 cr)
EE 4363 - Computer Architecture and Machine Organization (4.0 cr)
Plan C students must complete a paper and project. The following courses satisfy all or a portion of the requirement. Contact the EE department for additional information.

**Program Sub-plans**

A sub-plan is not required for this program. Students may not complete the program with more than one sub-plan.

**Rochester**

The University of Minnesota Rochester (UMR) offers the MS degree in electrical engineering. Students may complete all degree requirements in Rochester by combining courses taught by College of Science and Engineering faculty in person (face-to-face), or via streaming video using the UNITE (University-Industry Television for Education) instructional television system. UNITE enables students
to watch class live via the internet or pick up class on a special server at a later time.

**Integrated B.E.E./M.S.E.E.**

The Department of Electrical and Computer Engineering offers an integrated bachelor of electrical engineering (BEE) and master of science in electrical engineering (MSEE). The integrated BEE/MSEE program offers students the opportunity to earn both degrees in five years. The programs were established to allow high-achieving University undergraduates the opportunity to work toward a masters degree while simultaneously working toward their undergraduate degree. The combined program offers several advantages: flexibility in fulfilling required courses for both degrees during the senior year; eligibility for graduate assistantships and fellowships; and the ability to save money by completing up to 16 graduate credits at the undergraduate tuition rate.

Both the BEE and MSEE degrees must be completed in their entirety, with no courses shared between them. The graduate degree cannot be earned before the undergraduate requirements are satisfied.

**Eligibility requirements:**

Application to the integrated program is open to University students in the electrical engineering or computer engineering program who have completed a majority of the required upper division courses for their undergraduate degree and have a cumulative GPA of 3.4 or higher. Students with a GPA between 3.2 and 3.4 may also apply, but must submit a GRE score.

**Integrated B.Comp.E./M.S.E.E.**

The Department of Electrical and Computer Engineering offers an integrated bachelor of computer engineering (B.Comp.E.) and master of science in electrical engineering (MSEE). Benefits, eligibility requirements, and degree-completion requirements outlined for the BEEE/MSEE integrated program also apply to the B.Comp.E./MSEE.

Contact Information:
Director of Graduate Studies, Department of Electrical and Computer Engineering, University of Minnesota, 3-166 Keller Hall, 200 Union Street SE, Minneapolis, MN 55455 (612-625-3564; fax: 612-626-1136)
Email: jager001@umn.edu
Website: http://www.ece.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Electrical and Computer Engineering offers diverse educational programs that encompass nearly all aspects of modern electrical and computer engineering, ranging from the very theoretical system and information theory, to highly experimental work in novel device research and microelectronics. Emphases in the major are solid state and physical electronics, surface physics, thin films, sputtering, noise and fluctuation phenomena, quantum electronics, plasma physics, automation, power systems and power electronics theory, wave propagation, communication systems and theory, optics, lasers, fiber optics, magnetism, semiconductor properties and devices, VLSI and WSI engineering in theory and practice, network theory, signal and image processing, and computer and systems engineering. Interdisciplinary work is also available in bioelectrical sciences, control sciences, solar energy, applications of systems theory to urban transportation and economic planning, and biological modeling.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.40.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Minor credits must be 5xxx or 8xxx level. Coursework must be from classroom and laboratory courses. No colloquia, seminar, or special investigation credits count toward meeting the minor requirements.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
The master's minor requires a minimum of 6 credits in EE courses. All courses must be taken A-F. Courses that are cross-listed must be taken under the EE designator to count towards degree requirements.
Doctoral

The doctoral minor requires a minimum of 12 credits in EE courses. All courses must be taken A-F. Courses that are cross-listed must be taken under the EE designator to count towards degree requirements.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 64
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Department of Electrical and Computer Engineering offers diverse educational programs that encompass nearly all aspects of modern electrical and computer engineering, ranging from the very theoretical system and information theory to highly experimental work in novel device research and microelectronics. Emphases in the major are solid state and physical electronics, surface physics, thin films, sputtering, noise and fluctuation phenomena, quantum electronics, plasma physics, automation, power systems and power electronics theory, wave propagation, communication systems and theory, optics, lasers, fiber optics, magnetism, semiconductor properties and devices, VLSI and WSI engineering in theory and practice, network theory, signal and image processing, and computer and systems engineering. Interdisciplinary work is also available in bioelectrical sciences, control sciences, computer sciences, solar energy, applications of systems theory to urban transportation and economic planning, and biological modeling.

Students are considered for admission beginning fall semester only (except for part-time students living in Minnesota who work in industry who may apply for other terms). The deadline for applying for fall semester is December 1.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- partially online (between 50% to 80% of instruction is online)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.40.

Other requirements to be completed before admission:
All documents must be submitted electronically. No documents should be mailed to the department or the Graduate Admissions Office.

Applicants to the doctoral program must submit a writing sample with their online application. The writing sample should consist of a minimum of one, to a maximum of three, class papers or publications.

Every applicant, except University of Minnesota bachelor of electrical engineering graduates who have a GPA of 3.40 or better, must submit the General Test of the GRE. The GRE Subject Test is not required for admission.

Special Application Requirements:
Applications are accepted for fall admission only. The deadline is December 1. Additional application information is available at http://www.ece.umn.edu/ProspectiveStudentsGraduate/index.htm

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
- Internet Based - Writing Score: 21
- Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
  • IELTS
    - Total Score: 6.5
  • MELAB
    - Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

14 to 28 credits are required in the major.
12 to 26 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.30 is required for students to remain in good standing.

The PhD degree requires a minimum of 40 course credits and 24 thesis credits. The program must include 14 credits in EE courses at the 5xxx-level and above, and 12 credits in a minor or supporting program outside of EE but within the College of Science and Engineering (CSE). The remaining 14 credits may be taken in the major field or in any supporting field within CSE.

All courses must be taken A-F, with the exception of EE 5041, EE 8925, and graduate seminars, which are only offered S-N. Courses that are cross-listed must be taken under the EE designator to count towards degree requirements, and non-EE coursework that is cross-listed with EE does not count toward the outside field requirement.

A minimum of 6 course credits at the 8xxx-level must be included. Courses can be from the major or outside field; but seminars, directed study, and special investigations may not be used to satisfy this requirement.

A maximum of nine 4xxx-level course credits may be used toward degree requirements. Only the 4xxx-level courses included on the lists below will be accepted.

PhD students who enter the department with a MS degree in electrical engineering must pass the PhD Preliminary Written Examination by the end of their third semester in residence. Students who enter with an MS in another field, or students who enter with a bachelor's degree, have until the end of their second year in residence to pass the exam. Students have two chances to pass the exam. The exam is typically held in November and in April.

**Required Courses**

**Major Field Coursework**

Major field coursework is accepted from the following list only.

Take 14 or more credit(s) from the following:

• EE 5121 - Transistor Device Modeling for Circuit Simulation (3.0 cr)
• EE 5141 - Introduction to Microsystem Technology (4.0 cr)
• EE 5163 - Semiconductor Properties and Devices I (3.0 cr)
• EE 5164 - Semiconductor Properties and Devices II (3.0 cr)
• EE 5171 - Microelectronic Fabrication (4.0 cr)
• EE 5173 - Basic Microelectronics Laboratory (1.0 cr)
• EE 5181 - Micro and Nanotechnology by Self Assembly (3.0 cr)
• EE 5231 - Linear Systems and Optimal Control (3.0 cr)
• EE 5235 - Robust Control System Design (3.0 cr)
• EE 5239 - Introduction to Nonlinear Optimization (3.0 cr)
• EE 5251 - Optimal Filtering and Estimation (3.0 cr)
• EE 5301 - VLSI Design Automation I (3.0 cr)
• EE 5302 - VLSI Design Automation II (3.0 cr)
• EE 5323 - VLSI Design I (3.0 cr)
• EE 5324 - VLSI Design II (3.0 cr)
• EE 5327 - VLSI Design Laboratory (3.0 cr)
• EE 5329 - VLSI Digital Signal Processing Systems (3.0 cr)
• EE 5333 - Analog Integrated Circuit Design (3.0 cr)
• EE 5351 - Applied Parallel Programming (3.0 cr)
• EE 5364 - Advanced Computer Architecture (3.0 cr)
• EE 5371 - Computer Systems Performance Measurement and Evaluation (3.0 cr)
• EE 5381 - Telecommunications Networks (3.0 cr)
• EE 5391 - Computing With Neural Networks (3.0 cr)
• EE 5393 - Circuits, Computation, and Biology (3.0 cr)
• EE 5501 - Digital Communication (3.0 cr)
• EE 5505 - Wireless Communication (3.0 cr)
• EE 5531 - Probability and Stochastic Processes (3.0 cr)
• EE 5542 - Adaptive Digital Signal Processing (3.0 cr)
• EE 5545 - Digital Signal Processing Design (3.0 cr)
• EE 5549 - Digital Signal Processing Structures for VLSI (3.0 cr)
• EE 5551 - Multiscale and Multirate Signal Processing (3.0 cr)
• EE 5561 - Image Processing and Applications (3.0 cr)
• EE 5581 - Information Theory and Coding (3.0 cr)
• EE 5583 - Error Control Coding (3.0 cr)
• EE 5585 - Data Compression (3.0 cr)
• EE 5601 - Introduction to RF/Microwave Engineering (3.0 cr)
• EE 5602 - RF/Microwave Circuit Design (3.0 cr)
• EE 5611 - Plasma-Aided Manufacturing (4.0 cr)
• EE 5613 - RF/Microwave Circuit Design Laboratory (2.0 cr)
• EE 5616 - Antenna Theory and Design (3.0 cr)
• EE 5621 - Physical Optics (3.0 cr)
• EE 5622 - Physical Optics Laboratory (1.0 cr)
• EE 5624 - Optical Electronics (4.0 cr)
• EE 5627 - Optical Fiber Communication (3.0 cr)
• EE 5628 - Fiber Optics Laboratory (1.0 cr)
• EE 5629 - Optical System Design (2.0 cr)
• EE 5653 - Physical Principles of Magnetic Materials (3.0 cr)
• EE 5655 - Magnetic Recording (3.0 cr)
• EE 5657 - Physical Principles of Thin Film Technology (4.0 cr)
• EE 5705 - Electric Drives in Sustainable Energy Systems (3.0 cr)
• EE 5707 - Electric Drives in Sustainable Energy Systems Laboratory (1.0 cr)
• EE 5721 - Power Generation Operation and Control (3.0 cr)
• EE 5725 - Power Systems Engineering (3.0 cr)
• EE 5741 - Advanced Power Electronics (3.0 cr)
• EE 5745 - Wind Energy Essentials (2.0 cr)
• EE 5940 - Special Topics in Electrical Engineering I (1.0 - 4.0 cr)
• EE 5950 - Special Topics in Electrical Engineering II (1.0 - 4.0 cr)
• EE 5960 - Special Topics in Electrical Engineering III (1.0 - 4.0 cr)
• EE 5970 - Special Topics in Electrical Engineering IV (1.0 - 4.0 cr)
• EE 8100 - Advanced Topics in Electronics (1.0 - 3.0 cr)
• EE 8141 - Advanced Heterojunction Transistors (3.0 cr)
• EE 8163 - Quantum Electronics (3.0 cr)
• EE 8213 - Advanced System Theory (3.0 cr)
• EE 8215 - Nonlinear Systems (3.0 cr)
• EE 8231 - Optimization Theory (3.0 cr)
• EE 8235 - Advanced Control Topics (3.0 cr)
• EE 8300 - Advanced Topics in Computers (1.0 - 3.0 cr)
• EE 8310 - Advanced Topics in VLSI (1.0 - 3.0 cr)
• EE 8320 - Advanced Topics in Design Automation (1.0 - 3.0 cr)
• EE 8331 - CMOS Data Converters: A/D and D/A (3.0 cr)
• EE 8337 - Analog Circuits for Wire/Wireless Communications (3.0 cr)
• EE 8367 - Parallel Computer Organization (3.0 cr)
• EE 8510 - Advanced Topics in Communications (1.0 - 3.0 cr)
• EE 8520 - Advanced Topics in Signal Processing (1.0 - 3.0 cr)
• EE 8581 - Detection and Estimation Theory (3.0 cr)
• EE 8591 - Predictive Learning from Data (3.0 cr)
• EE 8601 - Advanced Electromagnetic Theory (3.0 cr)
• EE 8611 - Plasma Physics (3.0 cr)
• EE 8620 - Advanced Topics in Magnetics (1.0 - 3.0 cr)
• EE 8630 - Advanced Topics in Electromagnetics (1.0 - 3.0 cr)
• EE 8725 - Advanced Power System Analysis and Economics (3.0 cr)
• EE 8741 - Power Electronics in Power Systems (3.0 cr)
• EE 8950 - Advanced Topics in Electrical and Computer Engineering (1.0 - 3.0 cr)

Outside Field Coursework
Outside field and the additional coursework credits may be chosen from this list. A maximum of 2 credits of the following may be applied: EE 5041, EE 8190, EE 8210, EE 8290, EE 8360, EE 8970, EE 8500, EE 8610, EE 8660, EE 8920, EE 8925, and EE 8940.

Take 12 or more credit(s) from the following:

• AEM 4203 - Aerospace Propulsion (4.0 cr)
• AEM 4295 - Problems in Fluid Mechanics (1.0 - 3.0 cr)
• AEM 4301 - Orbital Mechanics (3.0 cr)
• AEM 4303 - Flight Dynamics and Control [WI] (3.0 cr)
• AEM 4305 - Spacecraft Attitude Dynamics and Control (3.0 cr)
• AEM 4331 - Aerospace Vehicle Design (4.0 cr)
• AEM 4333 - Aerospace Design: Special Projects (3.0 cr)
• AEM 4495 - Problems in Aerospace Systems (3.0 cr)
• AEM 4501 - Aerospace Structures (3.0 cr)
• AEM 4502 - Computational Structural Analysis (3.0 cr)
• AEM 4511 - Mechanics of Composite Materials (3.0 cr)
• AEM 4561 - Mechanics of Solids (3.0 cr)
• AEM 4595 - Problems in Mechanics and Materials (1.0 - 3.0 cr)
• AEM 4601 - Instrumentation Laboratory (3.0 cr)
• AEM 4602W - Aeromechanics Laboratory [WI] (4.0 cr)
• AEM 5247 - Hypersonic Aerodynamics (3.0 cr)
• AEM 5253 - Computational Fluid Mechanics (3.0 cr)
• AEM 5333 - Design-to-Flight: Small Uninhabited Aerial Vehicles (3.0 cr)
• AEM 5401 - Intermediate Dynamics (3.0 cr)
• AEM 5501 - Continuum Mechanics (3.0 cr)
• AEM 5503 - Theory of Elasticity (3.0 cr)
• AEM 5581 - Mechanics of Solids (3.0 cr)
• AEM 5651 - Aeroelasticity (3.0 cr)
• AEM 8202 - Fluid Mechanics II (3.0 cr)
• AEM 8211 - Theory of Turbulence I (3.0 cr)
• AEM 8253 - Computational Methods in Fluid Mechanics (3.0 cr)
• AEM 8421 - Robust Multivariable Control Design (3.0 cr)
• AEM 8423 - Convex Optimization Methods in Control (3.0 cr)
• AEM 8495 - Advanced Topics in Aerospace Systems (1.0 - 4.0 cr)
• AEM 5023 - Process Control and Instrumentation (3.0 cr)
• BBE 5333 - Off-road Vehicle Design (4.0 cr)
• SSM 5413 - A Systems Approach to Residential Construction (4.0 cr)
• SSM 5416 - Building Testing & Diagnostics (2.0 cr)
• BBE 5733 - Renewable Energy Technologies (3.0 cr)
• BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
• BIOC 5527 - Introduction to Modern Structural Biology (4.0 cr)
• BIOC 5528 - Spectroscopy and Kinetics (4.0 cr)
• BIOL 4003 - Genetics (3.0 cr)
• BIOL 4004 - Cell Biology (3.0 cr)
• PMB 4121 - Microbial Ecology and Applied Microbiology (3.0 cr)
• BIOL 4850 - Special Topics in Biology (1.0 - 5.0 cr)
• BIOL 5272 - Applied Biostatistics (4.0 cr)
• BMEN 5001 - Advanced Biomaterials (3.0 cr)
• BMEN 5041 - Tissue Engineering (3.0 cr)
• BMEN 5101 - Advanced Bioelectricity and Instrumentation (3.0 cr)
• BMEN 5111 - Biomedical Ultrasound (3.0 cr)
• BMEN 5151 - Introduction to BioMEMS and Medical Microdevices (2.0 cr)
• BMEN 5201 - Advanced Biomechanics (3.0 cr)
• BMEN 5311 - Advanced Biomedical Transport Processes (3.0 cr)
• BMEN 5321 - Microfluidics in Biology and Medicine (3.0 cr)
• BMEN 5351 - Cell Engineering (3.0 cr)
• BMEN 5401 - Advanced Biomedical Imaging (3.0 cr)
• BMEN 5411 - Neural Engineering (3.0 cr)
• BMEN 5412 - Neuromodulation (3.0 cr)
• BMEN 5413 - Neural Decoding and Interfacing (3.0 cr)
• BMEN 5421 - Introduction to Biomedical Optics (3.0 cr)
• BMEN 5501 - Biology for Biomedical Engineers (3.0 cr)
• BMEN 5701 - Cancer Bioengineering (3.0 cr)
• BMEN 8001 - Polymeric Biomaterials (3.0 cr)
• BMEN 8041 - Advanced Tissue Engineering Lab (3.0 cr)
• BMEN 8101 - Biomedical Digital Signal Processing (3.0 cr)
• BMEN 8201 - Advanced Tissue Mechanics (3.0 cr)
• BMEN 8381 - Bioheat and Mass Transfer (3.0 cr)
• BMEN 8401 - New Product Design and Business Development (4.0 cr)
• BMEN 8402 - New Product Design and Business Development (4.0 cr)
• BMEN 8421 - Biophotonics (3.0 cr)
• BMEN 8501 - Dynamical Systems in Biology (3.0 cr)
• BMEN 8502 - Physiological Control Systems (3.0 cr)
• BMEN 8511 - Systems and Synthetic Biology (3.0 cr)
• BMEN 8900 - Special Topics in Biomedical Engineering (1.0 - 4.0 cr)
• CEGE 5211 - Traffic Engineering (3.0 cr)
• CEGE 5411 - Applied Structural Mechanics (3.0 cr)
• CHEM 4001 - Chemistry of Biomass and Biomass Conversion to Fuels and Products (4.0 cr)
• CHEM 4011 - Mechanisms of Chemical Reactions (3.0 cr)
• CHEM 4021 - Computational Chemistry (3.0 cr)
• CHEM 4066 - Chemistry of Industry (3.0 cr)

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program requires summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

This program is not admitting students.

The goal of the master of science in environmental restoration engineering and science is to produce graduates who will understand how to combine engineering with physical, biological, and social sciences in order to contribute to the process of prioritizing, designing, implementing, evaluating, and setting policy for environmental restoration projects. In short, the program aims to generate future leaders who will both succeed in practice and set the national agenda for restoring, maintaining, and sustaining the Earth-surface environment.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A baccalaureate degree in a field related to ecology, civil engineering, or environmental and earth sciences. Other degrees will be accepted based on relevant experience at the discretion of the DGS.

Other requirements to be completed before admission:
This program is not admitting students.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 16
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan C: Plan C requires 30 major credits and up to null credits outside the major. There is no final exam. A capstone project is required.

Capstone Project: Students complete the capstone project by undertaking a field research internship for 6 credits. Students will be required to document 100 hours of project-based work and will complement this work with a 10-minute oral presentation on the required Stream Restoration Practice course (CEGE 8602).

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

The program requires a minimum of 30 credits consisting of 9 credits in required core classes and 15 credits in elective courses chosen in consultation with advisor. The remaining 6 credits are met by undertaking a field-based internship.

Required Courses

- CEGE 8601 - Introduction to Stream Restoration (3.0 cr)
- CEGE 8602 - Stream Restoration Practice (2.0 cr)
- HORT 5071 - Ecological Restoration (4.0 cr)

Electives

Take at least 15 elective course credits, in consultation with the advisor.

Internship

Complete a 6-credit internship, in consultation with the advisor.

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 8
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The environmental restoration engineering and science minor is not currently admitting students.

The goal of the Environmental Restoration Engineering and Science program is to produce graduates who will understand how to combine engineering with physical, biological, and social sciences in order to contribute to the process of prioritizing, designing, implementing, evaluating, and setting policy for environmental restoration projects. In short, the program aims to generate future leaders who will both succeed in practice and set the national agenda for restoring, maintaining, and sustaining the Earth-surface environment.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
The environmental restoration engineering and science minor is not currently admitting students.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The required courses, CEGE 8601 and CEGE 8602, are also offered as EEB/ESCI 8601 and EEB/ESCI 8602. Students obtaining a degree in earth sciences, civil engineering, or ecology, evolution and behavior should register for these courses under a designator other than their major field.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Master's
Required Courses

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
CEGE 8601 - Introduction to Stream Restoration (3.0 cr)
CEGE 8602 - Stream Restoration Practice (2.0 cr)

Recommended Elective
Take at least 3 credits. Consult with the ERES director of graduate studies for other course options.

HORT 5071 - Ecological Restoration (4.0 cr)
**Twin Cities Campus**  
**Financial Mathematics M.F.M.**  
**School of Mathematics**  
**College of Science and Engineering**

- Program Type: Master's  
- Requirements for this program are current for Fall 2018  
- Length of program in credits: 32  
- This program does not require summer semesters for timely completion.  
- Degree: Master of Financial Mathematics

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of financial mathematics degree program helps students understand the underlying mathematics of quantitative finance. The program offers a range of courses, from theoretical to practical, including a mathematical course on stochastic processes, a practitioner's course offering hands-on application of financial software tools, and a programming course focusing on C# and MATLAB.

Courses are offered in the evenings to accommodate working professionals. The program is designed with the possibility for full-time students to complete all requirements in one year.

**Program Delivery**  
This program is available:  
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**  
A bachelor's degree from an accredited US university or foreign equivalent. The minimum undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:  
Applicants should have completed college level courses in single variable and multivariable calculus and linear algebra. Background in probability and familiarity with programming language are highly recommended.

**Special Application Requirements:**  
Applications are accepted for fall semester only. The application deadline is February 1. Additional information is available at math.umn.edu/mcfam/financial-mathematics.

Applicants must submit their test score(s) from the following:  
- GRE

International applicants must submit score(s) from one of the following tests:  
- TOEFL  
  - Internet Based - Total Score: 79  
  - Internet Based - Writing Score: 21  
  - Internet Based - Reading Score: 19

Key to test abbreviations (GRE, TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan C: Plan C requires 32 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.

The MFM requires 32 credits, consisting of four year-long course sequences. These sequences may be taken either in parallel or sequentially, following their numerical order, with the exception of FM 5091/5092, which is recommended to be taken as early as possible. In addition to the 32 required credits, students who either do not have a strong mathematics background or who need a refresher may be asked to take FM 5001/5002 - Preparation for Financial Mathematics.

Students may take the optional FM 5990 topics course, which is offered periodically.

Required Courses
- FM 5011 - Mathematical Background for Finance I (4.0 cr)
- FM 5012 - Mathematical Background for Finance II (4.0 cr)
- FM 5021 - Mathematical Theory Applied to Finance I (4.0 cr)
- FM 5022 - Mathematical Theory Applied to Finance II (4.0 cr)
- FM 5031 - A Practitioner's Course in Finance I (4.0 cr)
- FM 5032 - A Practitioner's Course in Finance II (4.0 cr)
- FM 5091 - Computation, Algorithms, and Coding in Finance I (4.0 cr)
- FM 5092 - Computation, Algorithms, and Coding in Finance II (4.0 cr)

Elective Course
- FM 5990 - Topics in Financial Mathematics (1.0 - 2.0 cr)
Twin Cities Campus

Fundamentals of Quantitative Finance Postbaccalaureate Certificate

School of Mathematics
College of Science and Engineering

Link to a list of faculty for this program.

Contact Information:
Director of Graduate Studies, School of Mathematics, University of Minnesota, 127 Vincent Hall, 206 Church Street S.E., Minneapolis, MN 55455 (612-624-6391; fax: 612-624-6702)
Email: mfmath@umn.edu
Website: http://www.math.umn.edu/finmath/

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 14
- This program does not require summer semesters for timely completion.
- Degree: Fundamentals of Quantitative Finance PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postbaccalaureate certificate in fundamentals of quantitative finance (FQF) is a 14-credit certificate with four required courses. The certificate is good preparation for the master of financial mathematics (M.F.M.) degree program.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
- completely online (all program coursework can be completed online)

Prerequisites for Admission
A bachelor's degree from an accredited US university or foreign equivalent. The minimum undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Applicants should have a good background in mathematics, but not necessarily at the level of a mathematics major. In particular, all applicants must have taken at least three semesters of college calculus, covering two semesters of single variable calculus and an additional semester of either multivariable calculus or linear algebra.

Special Application Requirements:
Applications are accepted for fall semester only. The application deadline is May 15. Additional information is available at math.umn.edu/mcfam/financial-mathematics/fqf.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 2.80 is required for students to remain in good standing.
Students must complete four courses in financial mathematics for 14 credits.

**Required Courses**
- **FM 5001** - Preparation for Financial Mathematics I (3.0 cr)
- **FM 5002** - Preparation for Financial Mathematics II (3.0 cr)
- **FM 5091** - Computation, Algorithms, and Coding in Finance I (4.0 cr)
- **FM 5092** - Computation, Algorithms, and Coding in Finance II (4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Geoengineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Emphases are in fundamental aspects of geomechanics and its applications. Research focuses on the use and development of discrete and continuum theories such as elasticity, plasticity, fracture mechanics, and poroelasticity for solving engineering problems. Numerical methods are being developed for obtaining solutions; experimental methods and novel apparatus are being developed for gathering physical evidence. Applications include processes of comminution, flow of granular materials, hydraulic fracturing, and nondestructive testing.

The master of geoenigineering (M.GeoE.) degree is for the practicing engineer who would like to obtain an advanced degree enrolling part-time or full-time. Students who intend to proceed to the PhD program, or who think they may later wish to be admitted to the PhD program, should apply for the master of science program. Students are expected to follow a coherent program of coursework selected with the help of a faculty advisor and approved by the director of graduate studies. Students also must demonstrate professional competence by carrying out and defending a design project or by taking a coursework-related final oral exam (without a project).

The degree typically takes 2-3 semesters (12-18 months) to complete on a full-time basis or 6-8 semesters on a part-time basis. Students interested in pursuing doctoral studies should see the PhD program in civil engineering.

**Program Delivery**

This program is available:
- via classroom (the majority of instruction is face-to-face)

**Prerequisites for Admission**

The preferred undergraduate GPA for admittance to the program is 3.00.

An ABET-accredited, four-year bachelor's degree in engineering is required for admission.

Other requirements to be completed before admission:
The application deadlines are December 3 for fall admission and August 31 for spring admission. All materials must be submitted to the online application. Additional information is available at [http://www.cege.umn.edu/prospective/graduate/how-to-apply.html](http://www.cege.umn.edu/prospective/graduate/how-to-apply.html)

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- IELTS
  - Total Score: 6.5
- MELAB

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

Plan C: Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.GeoE. requires a minimum of 30 credits and is offered under two plans. Plan A requires preparation of a thesis/design project. The thesis/design project must be carried out by the student in consultation with a faculty advisor. Plan C is a coursework-only degree program.

Required Courses

Any courses at the 5xxx and 8xxx level from the following programs may be used: AEM, AST, BBE, BMEN, CEGE, CHEM, CHEN, CSCI, EE, ESCI, IE, MATH, MATS, ME, PHYS, STAT. Use of 4xxx level courses must be approved by the director of graduate studies and a maximum of 9 credits may be included. The following 4xxx courses may not be used: CEGE 4121, 4311, 4501, and 4522. Six credits in a minor may be included in the course credit total.

Seminar

Students may count one seminar credit in the course credit total.

CEGE 8300 - Seminar: Geomechanics (1.0 - 3.0 cr)

Plan A

Plan A requires a minimum of 20 course credits and 10 thesis credits for the design project.

CEGE 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan C

Plan C requires 30 course credits and must include at least two courses at the 8xxx level. Students must also complete 100 hours of project work, give an oral presentation of no less than 10 minutes, and complete two hours of ethics training.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Emphases are in fundamental aspects of geomechanics and its applications. Research focuses on the use and development of discrete and continuum theories such as elasticity, plasticity, fracture mechanics, and poroelasticity for solving engineering problems. Numerical methods are being developed for obtaining solutions; experimental methods and novel apparatus are being developed for gathering physical evidence. Applications include processes of communication, flow of granular materials, hydraulic fracturing, and nondestructive testing.

The master of science (MS) degree balances education in engineering fundamentals and design with research and development. It is designed for students wishing to pursue a career in industry or to continue toward a PhD.

Students interested in pursuing doctoral studies should see the PhD program in civil engineering.

Program Delivery
This program is available:
  • via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in engineering, basic science, or mathematics is preferred.

Other requirements to be completed before admission:
Admission depends primarily on the applicant's academic record and letters of recommendation. Applicants who lack geoengineering training are often required to complete at least one appropriate course from the undergraduate program. Graduate degree credit is not awarded for such preparatory work.

Special Application Requirements:
The application deadlines are December 3 for fall admission and August 31 for spring admission. All materials must be submitted to the online application. Additional information is available at http://www.cege.umn.edu/prospective/graduate/how-to-apply.html

Applicants must submit their test score(s) from the following:
  • GRE

International applicants must submit score(s) from one of the following tests:
  • TOEFL
    - Internet Based - Total Score: 79
    - Internet Based - Writing Score: 21
    - Internet Based - Reading Score: 19

- Total Score: 6.5
MELAB
- Final score: 80

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral.

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The MS requires at least 30 credits and is offered under three plans. Plan A emphasizes research and preparation of a thesis; Plan B emphasizes coursework and a project; Plan C is coursework only. The Plan A thesis is written on a research project carried out in consultation with a faculty advisor. Under Plan B, students complete one to three Plan B papers as determined by the faculty advisor. Plan B papers can include computer programs, annotated bibliographies, field investigations, and analysis/design of special engineering problems. A program typically takes 18 to 24 months to complete.

**Required Courses**

Any courses at the 5xxx and 8xxx level from the following programs may be used: AEM, AST, BBE, BMEN, CEGE, CHEM, CHEN, CSCI, EE, ESCI, IE, MATH, MATS, ME, PHYS, STAT. Use of 4xxx level courses must be approved by the director of graduate studies and a maximum of 9 credits may be included. The following 4xxx courses may not be used: CEGE 4121, 4311, 4501, and 4522. Six credits in a minor may be included in the course credit total.

**Seminar**

Students may include one seminar credit in the course credit total.

**CEGE 8300 - Seminar: Geomechanics (1.0 - 3.0 cr)**

**Plan A**

Plan A requires a minimum of 20 course credits and 10 thesis credits.

**CEGE 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)**

**Plan B**

Plan B requires a minimum of 30 credits, which includes at least 27 course credits and a maximum of 3 credits of CEGE 8094 for the Plan B project.

**CEGE 8094 - Civil Engineering Research (1.0 - 4.0 cr)**

**Plan C**

Plan C requires 30 course credits and must include at least two courses at the 8xxx level. Students must also complete 100 hours of project work, give an oral presentation of no less than 10 minutes, and complete two hours of ethics training.

**Program Sub-plans**

A sub-plan is not required for this program.

Students may not complete the program with more than one sub-plan.

**Integrated B.GeoE./M.S. - Geoengineering**

The department offers an integrated Bachelor of Geoengineering (B.GeoE.) and master of science (MS) in geoengineering. The integrated B.GeoE./MS program offers students the opportunity to earn the bachelors and masters degree in five years. These programs offer several benefits: streamlined admissions from the undergraduate to the graduate program (GRE not required); flexibility...
in fulfilling required courses for both degrees during the senior year (up to 16 credits can be transferred to the graduate program); and eligibility for teaching and research assistantships.

Both the B.GeoE. and MS degrees must be completed in their entirety, with no courses shared between them. The graduate degree cannot be earned before the undergraduate requirements are satisfied. Admitted students who decide not to complete the MS degree are permitted to count credits originally planned for the graduate program toward their B.GeoE. technical electives.

Eligibility Requirements

Application to the combined program is open to geoengineering undergraduates who:

- Are within 32 credits of completing the requirements for the bachelors degree;
- Have a faculty advisor selected prior to admission; and
- Hold a cumulative GPA of 3.3 or higher.

Integrated B.C.E./M.S. - Geoengineering

The department offers an integrated bachelor of civil engineering (B.C.E) and master of science (MS) in geoengineering. Benefits, eligibility requirements, and degree-completion requirements outlined for the B.GeoE./MS integrated program also apply to the B.C.E./MS.

Integrated B.Env.E./M.S. - Geoengineering

The department offers an integrated bachelor of environmental engineering (B.Env.E.) and master of science (MS) in geoengineering. Benefits, eligibility requirements, and degree-completion requirements outlined for the B.GeoE./MS integrated program also apply to the B.Env.E./MS.

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30 to 32
• This program does not require summer semesters for timely completion.
• Degree: Master of Science in Industrial & Systems Engr

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The industrial and systems engineering (ISyE) program offers coursework and research in industrial and systems engineering, operations research, and human factors. Special emphasis is on methodologies for design, planning, and management of service and manufacturing systems. Examples of research applications include logistics, transportation, healthcare delivery systems, revenue management, and supply chain management.

The Department of Industrial & Systems Engineering offers an MS degree with three tracks: the Industrial Engineering track, the Systems Engineering track, and the Analytics track. A PhD degree is also offered. MS degree applicants must indicate which track they are applying for on the application form. Note that the admission requirements for the three tracks are different. In addition, the ISyE program also offers a dual MS in ISyE and Civil Engineering (Transportation Engineering focus) and an integrated bachelor's/master's program.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A baccalaureate degree in engineering or a closely related field is required.

Other requirements to be completed before admission:
Applicants to the systems engineering track are required to have at least two years of professional work experience in a technical field. Promising candidates with less experience will be considered under exceptional circumstances. Applicants must submit three letters of recommendation and a personal statement. In addition to the academic record, the professional record of the applicant and the letters of recommendation carry weight in admission decisions. A GRE score is not required.

Special Application Requirements:
All application materials should be submitted electronically through the ApplyYourself application system.

Applicants to the industrial engineering and analytics tracks must submit a GRE score. Letters of recommendation are not required, but are highly recommended if you want to be considered for financial aid.

Applications for the analytics track are accepted for fall semester only.

The application deadlines are February 15 for fall semester and October 15 for spring semester. Additional information is available at www.isye.umn.edu/apply/
Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A**: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B**: Plan B requires 16 to 24 major credits and 6 to 14 credits outside the major. The final exam is oral.

**Plan C**: Plan C requires 16 to 26 major credits and 6 to 16 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The Master of Science in Industrial and Systems Engineering (M.S.I.Sy.E.) is offered with three tracks.

The industrial engineering track has three options. Plan A (thesis) and Plan B (project) require 30 credits and Plan C (coursework) requires 32 credits. Plan A requires a minimum of 14 course credits in the major field, and Plan B or Plan C requires 16 course credits in the major field. All plans must include a minimum of 6 course credits in a minor or related field outside ISyE and 1 credit of graduate seminar. The remaining credits may be taken in the major field or any supporting field.

The systems engineering track is a coursework-only option (Plan C) requiring 30 credits. It requires a minimum of 14 course credits in the major field and 6 course credits in a minor or related field outside ISyE. The remaining 10 credits may be taken in the major or in any supporting field.

The analytics track is a coursework-only option (Plan C) requiring 30-32 credits. Students proceed through the program and advance as a cohort. The program requires 24 credits in core courses and a minimum of 6 credits in elective courses. In addition, non-native English speakers are required to take the 2-credit course ESL 5008.

Students may replace a required course with a qualifying replacement course if they have taken the equivalent of the required course elsewhere. A list of qualifying replacements is available on the ISyE program web page.

**Joint- or Dual-degree Coursework:** Dual M.S. in ISyE and Civil Engineering (Transportation Engineering Focus): Student may take a total of 15 credits in common among the academic programs.

**Program Sub-plans**

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Industrial Engineering**

**Plan A**

**Required Courses**
- IE 5531 - Engineering Optimization I (4.0 cr)
- IE 5532 - Stochastic Models (4.0 cr)
ME 8001 - Research Ethics and Professional Practice (0.0 cr)
Take 1 or more course(s) from the following:
• IE 5511 - Human Factors and Work Analysis (4.0 cr)
• IE 5545 - Decision Analysis (4.0 cr)
• IE 5551 - Production Planning and Inventory Control (4.0 cr)
Seminar
Take 1 seminar credit. The following may be used or consult with advisor for further options.
IE 8773 - Graduate Seminar (1.0 cr)
or IE 8774 - Graduate Seminar (1.0 cr)
Thesis Credits
Take 10 credits
IE 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Plan B or Plan C
Required Courses
IE 5531 - Engineering Optimization I (4.0 cr)
IE 5532 - Stochastic Models (4.0 cr)
ME 8001 - Research Ethics and Professional Practice (0.0 cr)
Take 2 or more course(s) from the following:
• IE 5511 - Human Factors and Work Analysis (4.0 cr)
• IE 5545 - Decision Analysis (4.0 cr)
• IE 5551 - Production Planning and Inventory Control (4.0 cr)
Seminar
Take 1 seminar credit. The following may be used or consult with advisor for further options.
IE 8773 - Graduate Seminar (1.0 cr)
or IE 8774 - Graduate Seminar (1.0 cr)
Project Requirement
Plan B students must either take the Plan B courses IE 8951/8953 (3 credits), or complete one to three Plan B papers, determined in consultation with the advisor.
IE 8951 - Plan B Course (1.0 cr)
IE 8953 - Plan B (2.0 cr)

Systems Engineering
This sub-plan is limited to students completing the program under Plan C.

Required Courses
IE 5111 - Systems Engineering I (2.0 cr)
IE 5113 - Systems Engineering II (4.0 cr)
IE 5541 - Project Management (4.0 cr)
IE 5553 - Simulation (4.0 cr)
ME 8001 - Research Ethics and Professional Practice (0.0 cr)

Analytics
This sub-plan is limited to students completing the program under Plan C.

Required Courses
IE 5531 - Engineering Optimization I (4.0 cr)
IE 5532 - Stochastic Models (4.0 cr)
IE 5561 - Analytics and Data-Driven Decision Making (4.0 cr)
IE 5773 - Practice-focused Seminar (1.0 cr)
IE 5801 - Capstone Project (4.0 cr)
STAT 5302 - Applied Regression Analysis (4.0 cr)
CSCI 5521 - Introduction to Machine Learning (3.0 cr)
or CSCI 5523 - Introduction to Data Mining (3.0 cr)

Electives
Additional courses may be approved by the Director of Graduate Studies.
Take 6 or more credit(s) from the following:
• IE 5441 - Financial Decision Making (4.0 cr)
• IE 5522 - Quality Engineering and Reliability (4.0 cr)
• IE 5541 - Project Management (4.0 cr)
• IE 5545 - Decision Analysis (4.0 cr)
• IE 5551 - Production Planning and Inventory Control (4.0 cr)
• IE 5553 - Simulation (4.0 cr)
• CSCI 5521 - Introduction to Machine Learning (3.0 cr)
**Integrated B.M.E./M.S.ISY.E.**
This sub-plan is optional and does not fulfill the sub-plan requirement for this program.

The Department of Industrial and Systems Engineering and the Department of Mechanical Engineering offer an integrated bachelor's/master's degree program. The program makes it possible for students to earn a bachelor's degree in Mechanical Engineering (B.M.E.) and a master's degree in Industrial & Systems Engineering (M.S.ISY.E.) in five years. The program has several benefits: a streamlined admissions process from the ME undergraduate program to the ISyE graduate program; graduate student status granted in the senior year; eligibility for teaching and research assistantships; and, flexibility in fulfilling required courses for both degrees simultaneously in the last two years of study. The integrated program is available only for the Industrial Engineering Track.

Both the BME and MSISYE degrees must be completed in their entirety, with no courses shared between them. The graduate degree cannot be earned before the undergraduate requirements are satisfied. Admitted students who decide not to complete the MSISYE degree are permitted to count credits originally planned for the graduate program toward their undergraduate technical electives.

**Eligibility Requirements:**
- Students must be enrolled in the Mechanical Engineering undergraduate program at the University of Minnesota, Twin Cities.
- Students who are within 32 semester credits completing the requirements for the BME degree are eligible to apply.
- Students with a GPA of 3.25 or greater are preferred. For students who have transferred from another institution, at least one semester must be completed at the University of Minnesota, Twin Cities before admission to the program will be granted.

Examples of research applications include logistics, transportation, healthcare delivery systems, revenue management, and supply chain management.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.
A baccalaureate degree in engineering or a closely related field is required.

Special Application Requirements:
All application materials should be submitted electronically through the ApplyYourself application system. Students whose native language is not English are required to submit scores from one of the following English proficiency examinations: TOEFL, MELAB, or IELTS. The GRE General Test is required for students applying to the PhD program.

The application deadlines are December 15 for fall semester and October 15 for spring semester. Additional information is available at www.isye.umn.edu/apply/

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements
32 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The PhD degree requires a minimum of 68 credits consisting of 16 required major credits, 12 course credits in a minor or a supporting program outside ISyE, 2 credits of graduate seminar, and 24 thesis credits. The remaining 14 course credits may be taken in the major or any supporting field.

Required Courses
Students may replace a required course with a qualifying replacement course if they have taken the equivalent of the required course elsewhere. A list of qualifying replacements is available on the ISyE program web page.

IE 8521 - Optimization (4.0 cr)
IE 8532 - Stochastic Processes and Queuing Systems (4.0 cr)
ME 8001 - Research Ethics and Professional Practice (0.0 cr)

Take 2 or more course(s) from the following:
• IE 5511 - Human Factors and Work Analysis (4.0 cr)
• IE 5545 - Decision Analysis (4.0 cr)
• IE 5551 - Production Planning and Inventory Control (4.0 cr)

Minor or Supporting Program
Take 12 credits in a minor or supporting program outside ISyE. The following courses may be used or consult with advisor for further options.

CSCI 5211 - Data Communications and Computer Networks (3.0 cr)
CSCI 5421 - Advanced Algorithms and Data Structures (3.0 cr)
CSCI 5521 - Introduction to Machine Learning (3.0 cr)
CSCI 8980 - Special Advanced Topics in Computer Science (1.0 - 3.0 cr)
ECON 8101 - Microeconomic Theory (2.0 cr)
ECON 8102 - Microeconomic Theory (2.0 cr)
ECON 8117 - Noncooperative Game Theory (2.0 cr)
ECON 8118 - Noncooperative Game Theory (2.0 cr)
ECON 8119 - Cooperative Game Theory (2.0 cr)
MATH 5615H - Honors: Introduction to Analysis I (4.0 cr)
MATH 5616H - Honors: Introduction to Analysis II (4.0 cr)
MATH 8601 - Real Analysis (3.0 cr)
MATH 8602 - Real Analysis (3.0 cr)
MATH 5485 - Introduction to Numerical Methods I (4.0 cr)
MATH 5486 - Introduction To Numerical Methods II (4.0 cr)
MATH 8651 - Theory of Probability Including Measure Theory (3.0 cr)
MATH 8652 - Theory of Probability Including Measure Theory (3.0 cr)
STAT 8501 - Introduction to Stochastic Processes with Applications (3.0 cr)

Seminar
Take 2 seminar credits. The following may be used or consult with advisor for further options.

IE 8773 - Graduate Seminar (1.0 cr)
IE 8774 - Graduate Seminar (1.0 cr)

Thesis Credits
Take 24 credits after passing preliminary oral exam

IE 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science in Infrastructure Sys Mgmt & Eng

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Students are no longer being accepted into this program. Program requirements below are for current students only.

The master of science in infrastructure systems management and engineering (MSISME) focuses on developing management and engineering tools that address issues in local, county, and state infrastructure. It is an interdisciplinary program offered through the College of Science and Engineering's Technological Leadership Institute. The two-year, professional-format program focuses on key knowledge areas of engineering, technology, and science; management of personnel, projects, and programs; communications; governance; and synthesis. Fields of application include transportation engineering/pavement management; water resources/environmental engineering; municipal engineering; construction and maintenance; computer applications/asset management; parks, recreation and open space. The degree is offered in a hybrid online format, with in-person residencies scheduled over the course of the program.

Program Delivery
This program is available:
- primarily online (at least 80% of the instruction for the program is online with short, intensive periods of face-to-face coursework)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Other requirements to be completed before admission:
Students are no longer being accepted into this program.

A BS degree in engineering, plus a minimum of one year of professional work experience in an infrastructure area, or a BS degree in a related science or technology field and a minimum of two years professional work experience in an infrastructure area are required.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.
Program Requirements

Plan B: Plan B requires 30 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The capstone integrates knowledge from courses in the master's program with job experience. Students will prepare a proposal, conduct the project and report the results in written and oral form. The project will involve some aspect of the design, management, and operation of some feature of infrastructure. Students must register for the capstone course ISME 8105 (3 cr).

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

Required Courses
ISME 5101 - Project Management (3.0 cr)
ISME 5112 - Infrastructure Systems Engineering Management (2.0 cr)
ISME 5201 - Pavement Management Maintenance and Rehabilitation (2.0 cr)
ISME 5202 - Traffic Engineering Management (2.0 cr)
ISME 5301 - Bridge Management Maintenance and Rehabilitation (2.0 cr)
ISME 5302 - Critical Infrastructure Security and Protection (2.0 cr)
ISME 5402 - Storm Water Management (2.0 cr)
ISME 5500 - Public Interactions (1.0 cr)
ISME 5503 - Financial Management in Public Organizations (2.0 cr)
ISME 5504 - Construction Law and Ethics (2.0 cr)

Capstone
Take a total of 3 credits.
ISME 8105 - Capstone Project (1.0 - 2.0 cr)

Electives
Choose at least 7 elective credits in consultation with the director of graduate studies.
Management of Technology M.S.M.O.T.
Technological Leadership Institute
College of Science and Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of science in the management of technology (MSMOT) program is administered by the College of Sciences and Engineering's Technological Leadership Institute (TLI). The two-year, executive-format program integrates the fields of technology and management and provides working engineers and scientists with management knowledge and skills needed to assume a technical leadership role within their organizations. The program focuses on management in technology-based environments in traditional and emerging industries. The curriculum includes technical and advanced management courses, such as pivotal technologies, technology forecasting, project management, management of innovation, intellectual property management, and strategic management of technology. The core management curriculum includes areas such as finance, marketing, accounting, strategic planning and decision making, and conflict management. Students proceed through the program and advance as a cohort, taking a prescribed sequence of courses together. Case studies, class discussions, and study-group interaction stimulate the learning process. Students also participate in off-campus residencies, including an international residency; complete individual and team projects; and develop final projects as part of a capstone course. Most students receive corporate financial support.

The program is offered in a format designed for full-time working professionals. Students take courses one day per week on alternating Fridays and Saturdays and complete the degree within two years.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in an engineering, science, or other technology-related field from an accredited program.

Other requirements to be completed before admission:
Applicants should have at least 5 years of professional experience in a technical field and have completed coursework (or show proficiency) in economics, mathematical modeling, statistics, and computer literacy.

In exceptional circumstances, promising candidates with less experience may be considered.

Special Application Requirements:
The program accepts applications on a rolling basis for fall semester of each year.

Applicants must submit three letters of recommendation, a resume, and a statement of purpose. Additional application information is available at mot.umn.edu

International applicants must submit score(s) from one of the following tests:
• TOEFL
Program Requirements

Plan B: Plan B requires 36 major credits and up to null credits outside the major. The final exam is oral. A capstone project is required.

Capstone Project: The capstone project consists of an independent, original investigation requiring between 110 and 130 hours of effort. Students use concepts and methods learned in the MOT program to research and develop an industry-based product, project, process, or venture. The capstone project enables students to directly apply their MOT education at work.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

Students attend the program as a cohort and complete their studies in four semesters.

Required Courses (33.5 Credits)
Take the following courses for a total of 33.5 credits:
- MOT 8111 - Marketing Management for Technology-based Organizations (2.0 cr)
- MOT 8112 - Accounting for Decision Making (1.5 cr)
- MOT 8113 - Operations Management for Competitive Advantage (1.5 cr)
- MOT 8114 - Strategic Technology Analysis (1.5 cr)
- MOT 8121 - Managing Organizations in a Technological Environment (2.0 cr)
- MOT 8122 - Financial Management for Technology-based Organizations (2.0 cr)
- MOT 8133 - Managerial Communication for Technological Leaders: Persuasive Writing and Speaking (2.0 cr)
- MOT 8212 - Developing New Technology Products (2.0 cr)
- MOT 8213 - Macroenvironment of Technology (1.5 cr)
- MOT 8214 - Technology Foresight and Forecasting (2.0 cr)
- MOT 8221 - Project and Knowledge Management (1.5 cr)
- MOT 8224 - Pivotal Technologies (1.0 cr)
- MOT 8232 - Managing Technological Innovation (2.0 cr)
- MOT 8233 - Strategic Management of Technology (2.0 cr)
- MOT 8501 - Leading Individual & Team Performance (1.5 cr)
- MOT 8502 - Innovation Leadership and Organizational Effectiveness (1.0 cr)
- MOT 8800 - Conflict Management (0.5 cr)
- MOT 8820 - Science and Technology Policy (1.5 cr)
- MOT 8940 - Managing Intellectual Property (1.0 cr)
- MOT 8950 - International Management of Technology Project (2.0 cr)
- Take MOT 8960 twice for a total of two credits.
- MOT 8960 - Seminars in Management of Technology (MOT) and Innovation (1.0 cr)

Capstone Project (2.5 Credits)
Take MOT 8234 for a total of 2.5 credits to complete the 36-credit requirement.

MOT 8234 - Capstone Project (0.5 - 2.5 cr)

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The management of technology minor program is administered by the Technological Leadership Institute (TLI) in the College of Science and Engineering. The program integrates the fields of technology and management, allowing students in science and engineering majors to develop understanding and expertise in business principles. The curriculum includes basic business knowledge, with an emphasis on technology-intensive organizations. Topics include strategy, finance, marketing, intellectual property, innovation, and technology planning. Each class will include exercises that inform students on those business topics, and give them an opportunity to practice the fundamental skills of communications, teamwork and project management.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in an engineering, science, or other technology-related field from an accredited program.

Special Application Requirements:
Applicants for the minor must be enrolled in a graduate-level degree program at the University of Minnesota and have director of graduate studies approval.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The MOT minor requires two core courses for a total of 4 credits. The remaining credits can be taken from the list of approved electives.

MOT minor courses cannot be counted towards the master of science in management of technology degree requirements.

Core Courses
MOT 5001 - Technological Business Fundamentals (2.0 cr)
MOT 5002 - Creating Technological Innovation (2.0 cr)
Program Sub-plans

Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters

Electives

Other courses may be chosen in consultation with the director of graduate studies.

Take 2 or more credit(s) from the following:

- MOT 5003 - Technological Business Planning Workshop (1.0 cr)
- ENTR 6020 - Business Formation (4.0 cr)
- ENTR 6036 - Managing the Growing Business (2.0 cr)
- HSCI 5401 - Ethics in Science and Technology (3.0 cr)
- HSCI 5421 - Engineering Ethics (3.0 cr)
- IDSC 6040 - Information Technology Management (2.0 cr)
- IDSC 6423 - Enterprise Systems (2.0 cr)
- IE 5111 - Systems Engineering I (2.0 cr)
- IE 5441 - Financial Decision Making (4.0 cr)
- IE 5541 - Project Management (4.0 cr)
- MBA 6110 - Leading Others (2.0 cr)
- MBA 6300 - Strategic Management (3.0 cr)
- ME 8221 - New Product Design and Business Development I (4.0 cr)
- ME 8222 - New Product Design and Business Development II (4.0 cr)
- MGMT 6004 - Negotiation Strategies (2.0 cr)
- MGMT 6040 - International Strategy and Organization (2.0 cr)
- MGMT 6084 - Management of Groups (2.0 cr)
- MGMT 6305 - The International Environment of Business (4.0 cr)
- MILI 5589 - Medical Technology Evaluation and Market Research (2.0 cr)
- OLPD 5607 - Organization Development (3.0 cr)
- PA 5711 - Science, Technology & Environmental Policy (3.0 cr)
- PA 5741 - Risk, Resilience and Decision Making (1.5 cr)

Doctoral

Electives

Other courses may be chosen in consultation with the director of graduate studies.

Take 8 or more credit(s) from the following:

- MOT 5003 - Technological Business Planning Workshop (1.0 cr)
- ENTR 6020 - Business Formation (4.0 cr)
- ENTR 6036 - Managing the Growing Business (2.0 cr)
- HSCI 5401 - Ethics in Science and Technology (3.0 cr)
- HSCI 5421 - Engineering Ethics (3.0 cr)
- IDSC 6040 - Information Technology Management (2.0 cr)
- IDSC 6423 - Enterprise Systems (2.0 cr)
- IE 5111 - Systems Engineering I (2.0 cr)
- IE 5441 - Financial Decision Making (4.0 cr)
- IE 5541 - Project Management (4.0 cr)
- MBA 6110 - Leading Others (2.0 cr)
- MBA 6300 - Strategic Management (3.0 cr)
- ME 8221 - New Product Design and Business Development I (4.0 cr)
- ME 8222 - New Product Design and Business Development II (4.0 cr)
- MGMT 6004 - Negotiation Strategies (2.0 cr)
- MGMT 6040 - International Strategy and Organization (2.0 cr)
- MGMT 6084 - Management of Groups (2.0 cr)
- MGMT 6305 - The International Environment of Business (4.0 cr)
- MILI 5589 - Medical Technology Evaluation and Market Research (2.0 cr)
- OLPD 5607 - Organization Development (3.0 cr)
- PA 5711 - Science, Technology & Environmental Policy (3.0 cr)
- PA 5741 - Risk, Resilience and Decision Making (1.5 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Materials Science And Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Graduate courses offered by the Chemical Engineering and Materials Science (CEMS) Department cover core areas of materials science and engineering (structure and symmetry of materials; thermodynamics and kinetics; electronic, optical, and magnetic properties of materials; and mechanical properties of materials). In addition, several specialized topics are offered, including rheology, coating process fundamentals, process control, finite element methods of computer-aided analysis, ceramics, polymers, materials design and performance, materials processing, corrosion, contact and fracture properties of materials, electron microscopy, thin films and interfaces, composites, electrochemical engineering, solid state reaction kinetics, electronic structure of materials, organic semiconductors, electronic ceramics, dislocations and interfaces, epitaxial thin film growth, and the science of porous media.

The master of materials science and engineering (M.Mat.S.E.), also known as the professional master's, is designed for working professionals who are interested in obtaining a master's degree part time. This degree requires a design project. Part-time students may also choose the M.S.Mat.S.E. Plan C, which is coursework only.

The CEMS department focuses on the PhD and does not generally admit students directly to the M.S.Mat.S.E. Plan A degree, which is a thesis based master's and is intended for current graduate students who choose not to seek a PhD.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in materials science or other related field.

Other requirements to be completed before admission:
The professional master's in engineering degree is designed for employees of local industries who wish to pursue their studies part-time. No financial support is available. Applicants should contact the program before applying for admission.

Special Application Requirements:
Applicants must submit scores from the General Test of the GRE; three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of official transcripts; and a clearly written statement of career interests, goals, and objectives. International students are required to provide TOEFL results.

Applications are accepted for fall semester only. December 15 is the application deadline; late applications are considered if space is available. More information is available at http://www.cems.umn.edu/graduate/admissions

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Program Requirements

Plan A: Plan A requires 12 to 14 major credits, 6 to 8 credits outside the major, and 10 thesis credits. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 2.80 is required for students to remain in good standing.

The M.Mat.S.E. requires 20 course credits and 10 thesis credits. The course credits must include 12 credits in MATS core courses, and a minimum of 6 credits outside the major. The remaining credits may be taken in the major or in any supporting field.

In addition to the coursework, M.Mat.S.E. students are required to complete a design project. The work-related M.Mat.S.E. design project consists of an in-depth study of an engineering design. It need not represent a publishable research project. While the amount of work should be the same as for a master's thesis, the project can contain elements that the thesis would not, such as economic considerations, design consultation, and social relevance. The written design report must be approved by a three-person faculty committee. The final exam consists of the written design report and an oral presentation to the faculty committee.

Core Courses

MATS 8001 - Structure and Symmetry of Materials (3.0 cr)
MATS 8002 - Thermodynamics and Kinetics (3.0 cr)
MATS 8003 - Electronic Properties (3.0 cr)
MATS 8004 - Mechanical Properties (3.0 cr)

Thesis Credits

10 thesis credits are required for the design project.
MATS 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

Electives

The remaining credits may be chosen from the following list. Consult with advisor for further options.

AEM 4201 - Fluid Mechanics (4.0 cr)
AEM 4511 - Mechanics of Composite Materials (3.0 cr)
AEM 5501 - Continuum Mechanics (3.0 cr)
AEM 5503 - Theory of Elasticity (3.0 cr)
AEM 8251 - Finite-Volume Methods in Computational Fluid Dynamics (3.0 cr)
AEM 8531 - Fracture Mechanics (3.0 cr)
BMEN 5001 - Advanced Biomaterials (3.0 cr)
BMEN 5041 - Tissue Engineering (3.0 cr)
BMEN 5151 - Introduction to BioMEMS and Medical Microdevices (2.0 cr)
BMEN 5201 - Advanced Biomechanics (3.0 cr)
BMEN 5501 - Biology for Biomedical Engineers (3.0 cr)
BMEN 8511 - Systems and Synthetic Biology (3.0 cr)
CEGE 8022 - Numerical Methods for Free and Moving Boundary Problems (3.0 cr)
CEGE 8401 - Fundamentals of Finite Element Method (3.0 cr)
CEGE 8402 - Nonlinear Finite Element Analysis (3.0 cr)
CEGE 8501 - Environmental Fluid Mechanics I (4.0 cr)
CEGE 8502 - Environmental Fluid Mechanics II (4.0 cr)
CEGE 8504 - Theory of Unit Operations (4.0 cr)
CEGE 8505 - Biological Processes (3.0 cr)
CHEM 5210 - Materials Characterization (4.0 cr)
CHEM 5755 - X-Ray Crystallography (4.0 cr)

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Graduate courses offered by the Chemical Engineering and Materials Science (CEMS) Department cover core areas of materials science and engineering (structure and symmetry of materials; thermodynamics and kinetics; electronic, optical, and magnetic properties of materials; and mechanical properties of materials). In addition, several specialized topics are offered, including rheology, coating process fundamentals, process control, finite element methods of computer-aided analysis, ceramics, polymers, materials design and performance, materials processing, corrosion, contact and fracture properties of materials, electron microscopy, thin films and interfaces, composites, electrochemical engineering, solid state reaction kinetics, electronic structure of materials, organic semiconductors, electronic ceramics, dislocations and interfaces, epitaxial thin film growth, and the science of porous media.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The minor must be approved by the director of graduate studies in materials science and engineering.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters
Core Courses
Take 2 or more course(s) totaling 6 or more credit(s) from the following:
- MATS 8001 - Structure and Symmetry of Materials (3.0 cr)
- MATS 8002 - Thermodynamics and Kinetics (3.0 cr)
- MATS 8003 - Electronic Properties (3.0 cr)
- MATS 8004 - Mechanical Properties (3.0 cr)
Doctoral

Core Courses
Take all 4 core courses for a total of 12 credits.

- MATS 8001 - Structure and Symmetry of Materials (3.0 cr)
- MATS 8002 - Thermodynamics and Kinetics (3.0 cr)
- MATS 8003 - Electronic Properties (3.0 cr)
- MATS 8004 - Mechanical Properties (3.0 cr)
Twin Cities Campus

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 57
- This program requires summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Graduate courses offered by the Chemical Engineering and Materials Science (CEMS) Department cover core areas of materials science and engineering (structure and symmetry of materials; thermodynamics and kinetics; electronic, optical, and magnetic properties of materials; and mechanical properties of materials). In addition, several specialized topics are offered, including rheology, coating process fundamentals, process control, finite element methods of computer-aided analysis, ceramics, polymers, materials design and performance, materials processing, corrosion, contact and fracture properties of materials, electron microscopy, thin films and interfaces, composites, electrochemical engineering, solid state reaction kinetics, electronic structure of materials, organic semiconductors, electronic ceramics, dislocations and interfaces, epitaxial thin film growth, and the science of porous media.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
A bachelor's degree in materials science or other related field.

Other requirements to be completed before admission:
Applicants must submit scores from the general test of the GRE, three letters of recommendation from persons familiar with their scholarship and research potential, a complete set of official transcripts, and a clearly written statement of career interests, goals, and objectives. International students are required to provide TOEFL results.

Special Application Requirements:
Applications are accepted for fall semester only. Submission of all application materials by December 15 is strongly encouraged to ensure priority consideration for fellowships and assistantships; late applications are considered if space is available. More information is available at http://www.cems.umn.edu/graduate/admissions

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 560
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80
Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
21 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

The PhD requires 33 course credits and 24 thesis credits. The course credits must include 12 credits in four core MATS courses, and a minimum of 12 credits outside the major. The remaining 9 credits may be taken in the major or in any supporting field.

Students must attend, but not enroll in, the departmental seminar for six semesters. Informal attendance will be done within the department.

Core Courses
- MATS 8001 - Structure and Symmetry of Materials (3.0 cr)
- MATS 8002 - Thermodynamics and Kinetics (3.0 cr)
- MATS 8003 - Electronic Properties (3.0 cr)
- MATS 8004 - Mechanical Properties (3.0 cr)

Thesis Credits
Take 24 credits after passing preliminary oral exam
- MATS 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Electives
The remaining credits may be chosen from the following list or consult with advisor for further options.
- AEM 4201 - Fluid Mechanics (4.0 cr)
- AEM 4511 - Mechanics of Composite Materials (3.0 cr)
- AEM 5501 - Continuum Mechanics (3.0 cr)
- AEM 5503 - Theory of Elasticity (3.0 cr)
- AEM 8251 - Finite-Volume Methods in Computational Fluid Dynamics (3.0 cr)
- AEM 8531 - Fracture Mechanics (3.0 cr)
- BMEN 5001 - Advanced Biomaterials (3.0 cr)
- BMEN 5041 - Tissue Engineering (3.0 cr)
- BMEN 5151 - Introduction to BioMEMS and Medical Microdevices (2.0 cr)
- BMEN 5201 - Advanced Biomechanics (3.0 cr)
- BMEN 5501 - Biology for Biomedical Engineers (3.0 cr)
- BMEN 8511 - Systems and Synthetic Biology (3.0 cr)
- CEGE 8022 - Numerical Methods for Free and Moving Boundary Problems (3.0 cr)
- CEGE 8401 - Fundamentals of Finite Element Method (3.0 cr)
- CEGE 8402 - Nonlinear Finite Element Analysis (3.0 cr)
- CEGE 8501 - Environmental Fluid Mechanics I (4.0 cr)
- CEGE 8502 - Environmental Fluid Mechanics II (4.0 cr)
- CEGE 8504 - Theory of Unit Operations (4.0 cr)
- CEGE 8505 - Biological Processes (3.0 cr)
- CHEM 5210 - Materials Characterization (4.0 cr)
- CHEM 5755 - X-Ray Crystallography (4.0 cr)
- CHEM 8011 - Mechanisms of Chemical Reactions (4.0 cr)
- CHEM 8152 - Analytical Spectroscopy (4.0 cr)
- CHEM 8201 - Materials Chemistry (4.0 cr)
- CHEM 8221 - Synthetic Polymer Chemistry (4.0 cr)
- CHEM 8321 - Organic Synthesis (4.0 cr)
- CHEM 8322 - Advanced Organic Chemistry (4.0 cr)
- CHEM 8361 - Interpretation of Organic Spectra (4.0 cr)
- CHEM 8551 - Quantum Mechanics I (4.0 cr)

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Mathematics offers a master of science (MS) in mathematics. Students may also earn the MS degree with emphasis in applied and industrial mathematics or with emphasis in mathematics education.

Special areas of research include ordinary and partial differential equations; probability; real, complex, harmonic, functional, and numerical analysis; differential and algebraic geometry; topology; number theory; commutative algebra; group theory; logic; combinatorics; mathematical physics; and applied and industrial mathematics, mathematical biology, and dynamical systems.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Undergraduate degree in mathematics or equivalent.

Other requirements to be completed before admission:
Applicants should have the prerequisite material of linear algebra, advanced calculus and differential equations, and should be ready for higher level courses in analysis and algebra. The GRE Math subject test is strongly recommended. To receive full consideration for financial support, international applicants should have a TOEFL score of at least 100 with a speaking score of at least 23.

Special Application Requirements:
Applications are accepted for fall semester only. The application deadline is February 1. Additional information is available at math.umn.edu/graduate.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Internet Based - Speaking Score: 18

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Program Requirements

**Plan A**: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B**: Plan B requires 15 to 30 major credits and 0 to 15 credits outside the major. The final exam is oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

**Plan A**
Plan A requires 14 credits in mathematics courses, 6 credits in a minor or related field, and 10 thesis credits. One sequence of two 8xxx-level mathematics courses in the student's concentration area must be included.

**Thesis Credits**
Take a minimum of 10 credits

- MATH 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

**Plan B**
Plan B allows more breadth; students complete a minimum of 30 course credits, half of which may be in a related area outside of Mathematics. Mathematics courses outside the student's major research area may be used toward the related field requirement.

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Mathematics offers a minor for both the master's and the PhD.

Special areas of research include ordinary and partial differential equations; probability; real, complex, harmonic, functional, and numerical analysis; differential and algebraic geometry; topology; number theory; commutative algebra; group theory; logic; combinatorics; mathematical physics; and applied and industrial mathematics, mathematical biology, and dynamical systems.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

The master's minor requires a minimum of 6 credits, consisting of two 5xxx- or 8xxx-level courses.

The PhD minor requires a minimum of 12 credits, consisting of four 5xxx- or 8xxx-level courses.

Courses must be completed with a grade of B or higher to satisfy the requirements. We recommend that you consult the director of graduate studies in Mathematics in advance for course approval.

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Masters Minor
Minor requires two 5xxx- or 8xxx-level mathematics courses. Minor programs must be approved by the director of graduate studies in the School of Mathematics.

Doctoral Minor
Minor requires four 5xxx- or 8xxx-level mathematics courses. Minor programs must be approved by the director of graduate studies in
the School of Mathematics.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 60
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The School of Mathematics offers a PhD in mathematics, and a PhD in mathematics with emphasis in applied mathematics.

Special areas of research include ordinary and partial differential equations; probability: real, complex, harmonic, functional, and numerical analysis; differential and algebraic geometry; topology; number theory; commutative algebra; group theory; logic; combinatorics; mathematical physics; and applied and industrial mathematics, mathematical biology, and dynamical systems.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Undergraduate degree in mathematics or equivalent.

Other requirements to be completed before admission:
Applicants should have the prerequisite material of abstract algebra, analysis, and topology. The GRE Math subject test is strongly recommended. To receive full consideration for financial support, international applicants should have a TOEFL score of at least 100 with a speaking score of at least 23.

Special Application Requirements:
Applications are accepted for fall semester only. The application deadline is December 15. Additional information is available at math.umn.edu/graduate.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Internet Based - Speaking Score: 18

Key to test abbreviations (TOEFL).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
24 credits are required in the major.
12 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

Language Requirement: French, German, Italian, or Russian

A minimum GPA of 3.00 is required for students to remain in good standing.

The PhD requires 24 credits in mathematics courses, 12 credits in a minor or in a supporting program, and 24 thesis credits. If a supporting program is chosen, it may consist partly or entirely of mathematics courses outside the student's major research area.

Students choose a program of coursework in consultation with their advisor and the director of graduate studies.

The PhD preliminary written examination, given twice each year, covers real analysis, complex analysis, algebra, and manifolds and topology. Students are expected to pass the written exam by the end of their second year; complete required coursework and pass the preliminary oral exam by the end of their fourth year; and pass the final oral exam and complete their dissertation by the end of the sixth year.

Reading proficiency is required in one of the following: French, German, Italian, or Russian

Thesis Credits
Take 24 credits after passing preliminary oral exam.
MATH 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
Twin Cities Campus

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science in Mechanical Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Coursework and research for all graduate degrees are offered in bioengineering; biomechanics; combustion; computer-aided design; computer-aided manufacturing; computer graphics; control systems; design; energy conservation; environmental control; environmental engineering; fluid mechanics; heat and mass transfer; history of science and technology; human factors engineering; industrial engineering; innovative methodologies; integration of structural and environmental systems; lubrication; manufacturing engineering; particle technology; plasma chemistry; plasma heat transfer; power, propulsion, and applied thermodynamics; socioeconomic systems; solar energy; solar processing and thermochemistry; statistics; structures; systems dynamics; technology assessment; thermal energy storage; thermal environmental engineering; thermodynamics; transportation; tribology; vibration; and interdisciplinary finite element methodology. Additional instructional and research programs can be formulated.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year BS degree in engineering, science, or mathematics.

Special Application Requirements:
The department offers two options for applying to the masters degree program. The standard application requires a full set of application materials and allows admission to any of the MSME degree options (Plan A, B, or C). The streamlined application offers an abbreviated application process and admission is only for the coursework-only masters degree (Plan C).

The GRE test is not required for applicants to the streamlined application. Students admitted through the streamlined process are not eligible for financial support from the department.

Applications are accepted for fall semester only. The standard application deadline is December 15 and the streamlined application deadline is April 15. Additional information is available at www.me.umn.edu/education/graduate/prospective/

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
Program Requirements

Plan A: Plan A requires 14 major credits, 6 credits outside the major, and 10 thesis credits. The final exam is oral.

Plan B: Plan B requires 14 major credits and 16 credits outside the major. The final exam is oral.

Plan C: Plan C requires 24 major credits and 6 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with advisor approval.

A minimum GPA of 2.8 is required for students to remain in good standing.

The MSME requires a minimum of 30 credits and is offered under Plan A (thesis), Plan B (project), and Plan C (coursework only). All three plans require completion of 1-2 graduate seminar credits and one research and professional ethics course. All courses, with the exception of seminars and the ethics course, must be taken on an A/F basis.

Major Course Credits

Any 5xxx or 8xxx level mechanical engineering course counts toward the major field credit requirement, with the exception of independent research courses. The following courses also meet the requirement for ME graduate course credits.

- AEM 5401 - Intermediate Dynamics (3.0 cr)
- AEM 5501 - Continuum Mechanics (3.0 cr)
- AEM 8201 - Fluid Mechanics I (3.0 cr)
- AEM 8202 - Fluid Mechanics II (3.0 cr)
- EE 5231 - Linear Systems and Optimal Control (3.0 cr)
- EE 8215 - Nonlinear Systems (3.0 cr)

Ethics Course

Take one research and professional ethics course. The following may be used or consult with advisor for further options.

- ME 8001 - Research Ethics and Professional Practice (0.0 cr)

Seminar

Take 1-2 seminar credits. The following may be used or consult with advisor for further options.

- ME 8773 - Graduate Seminar (1.0 cr)
- ME 8774 - Graduate Seminar (1.0 cr)

Supporting Program

The remaining course credits may be taken in the major or in any supporting field with significant scientific or engineering content, and may include 6 credits in a minor.

Use of 4xxx-level Courses

No more than six 4xxx-level course credits may be used for graduate-level credit. Only the following courses are acceptable.

- AEM 4511 - Mechanics of Composite Materials (3.0 cr)
- AEM 4581 - Mechanics of Solids (3.0 cr)
- CHEM 4502 - Introduction to Quantum Mechanics and Spectroscopy (3.0 cr)
- EE 4541 - Digital Signal Processing (3.0 cr)
- MATH 4512 - Differential Equations with Applications (3.0 cr)
- PHYS 4051 - Methods of Experimental Physics I (5.0 cr)
- PHYS 4101 - Quantum Mechanics (4.0 cr)
- PHYS 4201 - Statistical and Thermal Physics (3.0 cr)
- PHYS 4211 - Introduction to Solid-State Physics (3.0 cr)

Plan A

Requires 14 credits in the major, 6 additional graduate level credits, and 10 thesis credits.

- ME 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)
Plan B
Requires 14 credits in the major, 16 additional graduate level credits, plus completion of a project or 1-3 Plan B papers, determined in consultation with the advisor. Up to 4 credits of ME 8794, taken S/N, may be used for the Plan B project.
ME 8794 - Mechanical Engineering Research (1.0 - 4.0 cr)

Plan C
Requires 24 credits in the major and 6 additional graduate level credits. Up to 4 credits of ME 8794, taken S/N, may be applied to the degree requirements.
ME 8794 - Mechanical Engineering Research (1.0 - 4.0 cr)

Program Sub-plans
A sub-plan is not required for this program.
Students may not complete the program with more than one sub-plan.

Integrated B.M.E./M.S.M.E.
The Department of Mechanical Engineering offers an integrated bachelor's/master's degree program. The program makes it possible for students to earn a bachelor's degree (BME) and a master's degree (MSME) in Mechanical Engineering in five years. The program has several benefits: a streamlined admissions process from the undergraduate program to the graduate program; graduate student status granted in the senior year; eligibility for teaching and research assistantships; and flexibility in fulfilling required courses for both degrees simultaneously in the last two years of study.

Both the BME and MSME degrees must be completed in their entirety, with no courses shared between them. The graduate degree cannot be earned before the undergraduate requirements are satisfied. Admitted students who decide not to complete the MSME degree are permitted to count credits originally planned for the graduate program toward their undergraduate technical electives.

Eligibility Requirements:
- Students must be enrolled in the Mechanical Engineering undergraduate program at the University of Minnesota, Twin Cities.
- Students who are within 32 semester credits completing the requirements for the BME degree are eligible to apply.
- Students with a GPA of 3.25 or greater are preferred. For students who have transferred from another institution, at least one semester must be completed at the University of Minnesota, Twin Cities before admission to the program will be granted.
Twin Cities Campus
Mechanical Engineering Minor

Contact Information:
Mechanical Engineering and Industrial Engineering Graduate Programs, University of Minnesota, 1120 Mechanical Engineering, 111 Church Street S.E., Minneapolis, MN 55455 (612-625-2009; fax: 612-624-2010)
Email: gardn032@umn.edu, hogan108@umn.edu
Website: http://www.me.umn.edu

- Program Type: Graduate minor related to major
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Coursework and research for all graduate degrees are offered in bioengineering; biomechanics; combustion; computer-aided design; computer-aided manufacturing; computer graphics; control systems; design; energy conservation; environmental control; environmental engineering; fluid mechanics; heat and mass transfer; history of science and technology; human factors engineering; industrial engineering; innovative methodologies; integration of structural and environmental systems; lubrication; manufacturing engineering; particle technology; plasma chemistry; plasma heat transfer; power, propulsion, and applied thermodynamics; socioeconomic systems; solar energy; solar processing and thermochemistry; statistics; structures; systems dynamics; technology assessment; thermal energy storage; thermal environmental engineering; thermodynamics; transportation; tribology; vibration; and interdisciplinary finite element methodology. Additional instructional and research programs can be formulated.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Mechanical engineering courses at the 5xxx or 8xxx level may be used for the minor, with the following exceptions: ME 8773, ME 8774, and ME 8794.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Master's Minor
At least 6 credits in mechanical engineering are required for a master's minor.

Doctoral Minor
At least 12 credits in mechanical engineering are required for a doctoral minor.
Twin Cities Campus
Mechanical Engineering Ph.D.

- Program Type: Doctorate
- Requirements for this program are current for Fall 2018
- Length of program in credits: 62
- This program does not require summer semesters for timely completion.
- Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Coursework and research for all graduate degrees are offered in bioengineering; biomechanics; combustion; computer-aided design; computer-aided manufacturing; computer graphics; control systems; design; energy conservation; environmental control; environmental engineering; fluid mechanics; heat and mass transfer; history of science and technology; human factors engineering; industrial engineering; innovative methodologies; integration of structural and environmental systems; lubrication; manufacturing engineering; particle technology; plasma chemistry; plasma heat transfer; power, propulsion, and applied thermodynamics; socioeconomic systems; solar energy; solar processing and thermochemistry; statistics; structures; systems dynamics; technology assessment; thermal energy storage; thermal environmental engineering; thermodynamics; transportation; tribology; vibration; and interdisciplinary finite element methodology. Additional instructional and research programs can be formulated.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A four-year BS degree in engineering, science, or mathematics.

Special Application Requirements:
Applications are accepted for fall semester only. The application deadline is December 15. Additional information is available at www.me.umn.edu/education/graduate/prospective/

Applicants must submit their test score(s) from the following:
- GRE

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
- Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5

Key to test abbreviations (GRE, TOEFL, IELTS).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
Program Requirements
18 credits are required in the major.
20 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.0 is required for students to remain in good standing.

The PhD requires a minimum of 38 course credits, consisting of 18 credits in the major and 20 additional graduate level credits. Courses must be taken on an A/F basis, with the exception of seminars and the ethics course. A minimum of 12 course credits at the 8000-level are required (seminars and ethics courses may not be included). Students must complete 2-3 graduate seminar credits, and one research and professional ethics course. 24 thesis credits are also required.

Major Course Credits
Take 18 credits in any 5xxx or 8xxx level mechanical engineering courses. Independent research courses do not count toward the credit requirement. The following courses also meet the requirement for ME graduate course credits.

- AEM 5401 - Intermediate Dynamics (3.0 cr)
- AEM 5501 - Continuum Mechanics (3.0 cr)
- AEM 8201 - Fluid Mechanics I (3.0 cr)
- AEM 8202 - Fluid Mechanics II (3.0 cr)
- EE 5231 - Linear Systems and Optimal Control (3.0 cr)
- EE 8215 - Nonlinear Systems (3.0 cr)

Ethics Course
Take one research and professional ethics course. The following may be used or consult with advisor for further options.

- ME 8001 - Research Ethics and Professional Practice (0.0 cr)

Seminar
Take 2-3 seminar credits. The following may be used or consult with advisor for further options

- ME 8773 - Graduate Seminar (1.0 cr)
- ME 8774 - Graduate Seminar (1.0 cr)

Supporting Program
The remaining course credits may be taken in the major or in any supporting field with significant scientific or engineering content, and may include 12 credits in a minor.

Thesis Credits
Take 24 thesis credits after passing the preliminary oral exam

- ME 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Use of 4xxx-level Courses
No more than six 4xxx-level course credits may be used for graduate-level credit. Only the following courses are acceptable.

- AEM 4511 - Mechanics of Composite Materials (3.0 cr)
- AEM 4581 - Mechanics of Solids (3.0 cr)
- CHEM 4502 - Introduction to Quantum Mechanics and Spectroscopy (3.0 cr)
- EE 4541 - Digital Signal Processing (3.0 cr)
- MATH 4512 - Differential Equations with Applications (3.0 cr)
- PHYS 4051 - Methods of Experimental Physics I (5.0 cr)
- PHYS 4101 - Quantum Mechanics (4.0 cr)
- PHYS 4201 - Statistical and Thermal Physics (3.0 cr)
- PHYS 4211 - Introduction to Solid-State Physics (3.0 cr)

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 34
• This program does not require summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of science in medical device innovation (MDI) program is an interdisciplinary program administered by the College of Science and Engineering's Technological Leadership Institute (TLI). The program is comprised of courses in the core areas of technology innovation management and medical industry dynamics. Students experiences are enhanced through therapeutic area-based group activities and hands-on experiences in innovative biodesign through practicums at the Medical Devices Center. Students have the opportunity to specialize in an area of interest by taking 9 credits of electives in medical, technical, or business courses. The 14-month program draws upon the fields of technology innovation, product development, project and business management, intellectual property, regulatory affairs, clinical needs, entrepreneurship, emerging trends, globalization, reimbursement, and public policy. This program provides students with a full understanding of medical device innovation from start to finish. In doing so, it goes well beyond the traditional technology focus of most master's programs.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in a related field, such as biological or physical sciences, engineering, computer science, mathematics, or statistics.

Other requirements to be completed before admission:
Strong background in science, engineering, and math, with at least two to five years of work experience.

Special Application Requirements:
Applications are accepted on a rolling basis for the program's start in the summer of each year. The deadline for international students is March 15. Additional information is available at mdi.umn.edu.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

The preferred English language test is Test of English as Foreign Language

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan B: Plan B requires 28 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The capstone project is independent, original, and applied research on a relevant subject, problem, or issue in areas of medical device technologies, policy, business, or innovation. The capstone project is rooted in real-world topics in the industry, and is usually framed in cooperation with the students organization or employer. The capstone is the students opportunity to demonstrate mastery of the concepts and methods (quantitative as well as qualitative) that have been learned in the MDI program, and to apply them to an industry-based medical device technology, venture, process, or organizational challenge.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

Core Courses (26 Credits)

Take the following courses for a total of 26 credits. Take MDI for 1 credit.

- MDI 5001 - Technical Writing Essentials (0.0 - 1.0 cr)
- MDI 5002 - Technology Foresight and Forecasting (3.0 cr)
- MDI 5004 - Clinical Foundations of Medical Device Innovation (3.0 cr)
- MDI 5006 - Finance, Valuation, and Entrepreneurship (3.0 cr)
- MDI 5008 - Quality, Regulatory and Manufacturing Management (2.0 cr)
- MDI 5010 - Product Innovation & Development Management (3.0 cr)
- MDI 5012 - Medical Industry Macro Environment (3.0 cr)
- MDI 5013 - Medical Device Center Practicum I (2.0 cr)
- MDI 5014 - Medical Device Center Practicum II (2.0 cr)
- MDI 5015 - Medical Device Center Practicum III (2.0 cr)
- MDI 5050 - Interpersonal & Team Effectiveness (1.0 cr)
- MDI 5051 - Leading Innovation & Change (1.0 cr)

Electives (6 Credits)

Take six credits of electives from the following list. Other courses may be selected in consultation with the director of graduate studies.

- ABUS 4043 - Project Management in Practice (3.0 cr)
- ABUS 4509 - New Product Development (3.0 cr)
- BMEN 5001 - Advanced Biomaterials (3.0 cr)
- BMEN 5041 - Tissue Engineering (3.0 cr)
- BMEN 5101 - Advanced Bioelectricity and Instrumentation (3.0 cr)
- BMEN 5151 - Introduction to BioMEMS and Medical Microdevices (2.0 cr)
- BMEN 5201 - Advanced Biomechanics (3.0 cr)
- BMEN 5311 - Advanced Biomedical Transport Processes (3.0 cr)
- BMEN 5321 - Microfluidics in Biology and Medicine (3.0 cr)
- BMEN 5351 - Cell Engineering (3.0 cr)
- BMEN 5401 - Advanced Biomedical Imaging (3.0 cr)
- BMEN 5411 - Neural Engineering (3.0 cr)
- BMEN 5412 - Neuromodulation (3.0 cr)
- BMEN 5413 - Neural Decoding and Interfacing (3.0 cr)
- BMEN 5421 - Introduction to Biomedical Optics (3.0 cr)
- BMEN 5501 - Biology for Biomedical Engineers (3.0 cr)
- BMEN 5701 - Cancer Bioengineering (3.0 cr)
- BMEN 8101 - Biomedical Digital Signal Processing (3.0 cr)
- BTHX 5100 - Introduction to Clinical Ethics (3.0 cr)
ME 5223 - Materials in Design (4.0 cr)
ME 5341 - Case Studies in Thermal Engineering and Design (4.0 cr)
ME 8262 - Topics in Modeling and Analysis of Manufacturing Processes (4.0 cr)
ME 8381 - Bioheat and Mass Transfer (3.0 cr)
ME 8775 - Technical Communication (1.0 cr)
MGMT 5050 - Management of Innovation and Change (2.0 cr)
MGMT 6100 - Topics in Management (1.0 - 4.0 cr)
MILI 6235 - Pharmaceutical Industry: Business and Policy (2.0 cr)
MILI 6562 - Information Technology in Health Care (2.0 cr)
MILI 6589 - Medical Technology Evaluation and Market Research (2.0 cr)
MILI 6726 - Medical Device Industry: Business and Public Policy (2.0 cr)
MILI 6990 - The Health Care Marketplace (2.0 cr)
MILI 6991 - Anatomy and Physiology for Managers (2.0 cr)
MILI 6992 - Healthcare Delivery Innovations: Optimizing Cost and Quality (2.0 cr)
MILI 6995 - Medical Industry Valuation Laboratory (2.0 cr)
MGMT 5088 - Strategic Marketing (2.0 cr)
NEUR 5230 - Cerebrovascular Hemodynamics and Diseases I (4.0 cr)
NEUR 5240 - Cerebrovascular Hemodynamics and Diseases II (4.0 cr)
PDES 5701 - Creativity, Idea Generation, and Innovation (3.0 cr)
PDES 5702 - Concept Sketching and Rendering (3.0 cr)
PDES 5704 - Computer-Aided Design Methods (3.0 cr)
PHSL 5061 - Principles of Physiology for Biomedical Engineering (4.0 cr)
PHSL 5510 - Advanced Cardiac Physiology and Anatomy (2.0 - 3.0 cr)
PHSL 5525 - Anatomy and Physiology of the Pelvis and Urinary System (1.0 - 2.0 cr)
PSY 5065 - Functional Imaging: Hands-on Training (3.0 cr)
PUBH 6751 - Principles of Management in Health Services Organizations (2.0 cr)
PUBH 6752 - Economics of the Health Care System (3.0 cr)
PUBH 6862 - Cost-Effectiveness Analysis in Health Care (3.0 cr)
RSC 5101 - Mathematical Tools for Research Applications in Health, Rehab, and Human Movement Sciences (1.0 cr)
RSC 5106 - Introduction to Rehabilitation Science (1.0 cr)
RSC 5135 - Advanced Biomechanics I: Kinematics (3.0 cr)
RSC 5200 - Introduction to Neuromodulation (1.0 - 3.0 cr)
RSC 5231 - Clinical Biomechanics (2.0 - 5.0 cr)
RSC 5281 - Scientific Foundations: Exercise Theory (3.0 cr)
SCB 8181 - Stem Cell Biology (3.0 cr)
ST 8109 - Cybersecurity Foundations - Technology, Risk & Communication (2.0 cr)
ST 8110 - Security Science and Technology Foundations (3.0 cr)
ST 8111 - Methods, Theory, and Applications (2.5 cr)
ST 8113 - Information and Cyber Security (2.0 cr)
ST 8220 - Vulnerability, Risk and Threat Assessment and Management (3.0 cr)
ST 8330 - Critical Infrastructure Protections (3.0 cr)
ST 8331 - Dynamic Systems Modeling and Simulation Tools (2.0 cr)
ST 8513 - Cyber Threat Intelligence (2.0 cr)
ST 8661 - Securing Cyberspace (Fundamentals) (3.0 cr)
ST 8662 - Securing Cyberspace - Advanced (3.0 cr)
Students may choose a minor in human factors and ergonomics, but must have courses pre-approved by the director of graduate studies.

Capstone Project (2 Credits)
Take 2 credits of MDI 5020.
MDI 5020 - Medical Device Innovation Capstone (1.0 - 2.0 cr)
Twin Cities Campus

Neuroengineering Minor
Department of Biomedical Engineering
College of Science and Engineering

Link to a list of faculty for this program.

Contact Information:
Graduate Minor in Neuroengineering, 7-105 Nils Hasselmo Hall, 312 Church Street S.E., Minneapolis, MN 55455 (612-624-8396; fax 612-626-6583)
Email: bmengps@umn.edu
Website: http://neuroengineering.umn.edu/

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The graduate minor in neuroengineering (NE) is motivated by the notion that future breakthroughs in this rapidly-growing area of research will be made by engineers who understand the fundamental issues and principles of neuroscience that occur during neural interventions, and by neuroscientists who are truly competent in engineering concepts and tools. The minor trains doctoral students to develop the skills to revolutionize technologies for interfacing with the brain and to advance our understanding of the neuroscience processes that arise when we interface with and modulate the brain.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Enrollment in the neuroengineering minor is open to all currently enrolled PhD students in biomedical engineering, electrical engineering, mechanical engineering, and neuroscience. PhD students majoring in other programs may obtain approval from the neuroengineering director of graduate studies to participate in the minor program if they have the necessary science background to complete the coursework and are in good standing in their major program.

Students must officially declare the minor before taking the Oral Preliminary Examination (OPE).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Coursework must be approved by the neuroengineering director of graduate studies (DGS) - see http://neuroengineering.umn.edu/faculty.html.

For any course listed in multiple categories, students must choose which requirement that course will fulfill. A single course cannot be counted simultaneously toward multiple categories. The only exception is BMEn 8411 Neuroengineering Seminar, which must be taken once for the Seminar requirement and can be taken a second time to count as an Elective.

Students may not use any of their minor courses to satisfy the core course requirements for their major program (i.e., a Neuroscience student cannot count NSC 5561 as both a Neuroengineering Minor course and a core Neuroscience course).

Neuroengineering Seminar
BMEN 8411 - Neuroengineering Seminar (2.0 cr)
Engineering Core
It is strongly recommended that students take BMEn 5411 Neural Engineering, unless they have previously completed a neural engineering course. The Engineering Core course must be completed for a letter grade (A-F), and a minimum grade of B- is required for the course to count toward the minor.
Take 1 or more course(s) from the following:
• BMEN 5411 - Neural Engineering (3.0 cr)
• BMEN 5412 - Neuromodulation (3.0 cr)

Neuroscience Core
The Neuroscience Core course must be completed for a letter grade (A-F), and a minimum grade of B- is required for the course to count toward the minor.
Take 1 or more course(s) from the following:
• NSCI 5101 - Neurobiology I: Molecules, Cells, and Systems (3.0 cr)
• NSC 5561 - Systems Neuroscience (4.0 cr)

Electives
Additional coursework in engineering or neuroscience discipline is required - students must take enough elective credits to reach a total of 12 minimum for the minor. Additional courses may be approved as electives by the neuroengineering DGS. Elective Courses must be completed for a letter grade (A-F), and a minimum grade of B- is required for the course(s) to count toward the minor.
Take 1 or more course(s) from the following:
• BMEN 5401 - Advanced Biomedical Imaging (3.0 cr)
• BMEN 5411 - Neural Engineering (3.0 cr)
• BMEN 5412 - Neuromodulation (3.0 cr)
• BMEN 5413 - Neural Decoding and Interfacing (3.0 cr)
• BMEN 8101 - Biomedical Digital Signal Processing (3.0 cr)
• BMEN 8151 - Biomedical Electronics and Implantable Microsystems (3.0 cr)
• BMEN 8502 - Physiological Control Systems (3.0 cr)
• EE 5231 - Linear Systems and Optimal Control (3.0 cr)
• EE 5239 - Introduction to Nonlinear Optimization (3.0 cr)
• EE 5542 - Adaptive Digital Signal Processing (3.0 cr)
• EM 5281 - Analog and Digital Control (4.0 cr)
• EM 5286 - Robotics (4.0 cr)
• MPHY 5178 - Physical Principles of Magnetic Resonance Imaging (3.0 cr)
• MPHY 8147 - Advanced Physics of Magnetic Resonance Imaging (MRI) (3.0 cr)
• NSC 8111 - Quantitative Neuroscience (3.0 cr)
• NSC 8217 - Systems and Computational Neuroscience (2.0 cr)
• PSY 5036W - Computational Vision [WI] (3.0 cr)
• PSY 5038W - Introduction to Neural Networks [WI] (3.0 cr)
• PSY 5063 - Introduction to Functional MRI (3.0 cr)
• PSY 5065 - Functional Imaging: Hands-on Training (3.0 cr)

Program Sub-plans
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

Doctoral
Twin Cities Campus
Physics M.S.
School of Physics & Astronomy
College of Science and Engineering

Link to a list of faculty for this program.

Contact Information:
Director of Graduate Studies in Physics, School of Physics and Astronomy, University of Minnesota, 116 Church St. SE, Minneapolis, MN 55455 (612-626-5982; fax: 612-624-4578)
Email: grad@physics.umn.edu
Website: http://www.physics.umn.edu/grad

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program does not require summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Note: Students applying for a terminal MS degree are not admitted, unless they arrange for their own financial support. Students admitted to the PhD program are automatically eligible for the MS program.

Physics is the study of the fundamental structure and interactions of matter. Research areas in the program include experimental and theoretical studies in astrophysics and cosmology, biological physics, condensed matter physics, elementary particle physics, nuclear physics, space and planetary physics, and physics education research. Interdisciplinary study is also available with the programs in astrophysics, biological sciences, chemistry, chemical engineering and materials science, electrical and computer engineering, mechanical engineering, and the history of science and technology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.30.

Other requirements to be completed before admission:
Upper division courses in the core areas of classical mechanics, electricity and magnetism, quantum mechanics, and statistical and thermal physics are required. It is advisable to have taken an upper division course in experimental methods in physics.

Special Application Requirements:
Students admitted to the Ph.D. program are automatically eligible for the M.S. program. Students applying for a terminal M.S. degree are not admitted unless they arrange for their own financial support.

Applications are accepted for fall admission only. Application by December 15 is strongly encouraged. Additional application information is available at http://www.physics.umn.edu/grad/physics/application.html

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80
Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan A:** Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is oral.

**Plan B:** Plan B requires 30 major credits and 0 credits outside the major. The final exam is oral. A capstone project is required.

**Capstone Project:** The Plan B project is a self-contained research problem performed in conjunction with the student's advisor. Students register for 4 credits of Physics 8500: Plan B project, which count toward the program requirement of 30 credits. The project is described in a written paper. Examples of Plan B projects include carrying out a specific calculation, writing and documenting a computer program, analyzing a set of experimental data, designing and/or constructing experimental instrumentation, and designing and/or constructing an undergraduate laboratory experiment. The alternative to the Plan B project is writing 1-3 Plan B papers. The Plan B papers are related to three courses that the student has taken and do not require original research. It's expected that completion of either the project or the Plan B papers require a nominal three weeks of full-time effort.

**Plan C:** Plan C requires 30 major credits and 0 credits outside the major. There is no final exam.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

Physics 4001, 4002, 4101, 4201, and 4303 cannot be used to satisfy degree requirements.

To remain in good academic standing students must maintain a minimum GPA of 3.30.

Students completing the Plan C option must also pass the physics graduate written exam.

**Required Courses**

Plan A and Plan B students must complete either the quantum mechanics sequence or the classical physics sequence. Plan C students must complete both sequences.

**Quantum Mechanics Sequence**

- PHYS 5001 - Quantum Mechanics I (4.0 cr)
- PHYS 5002 - Quantum Mechanics II (4.0 cr)

**Classical Physics Sequence**

- PHYS 5011 - Classical Physics I (4.0 cr)
- PHYS 5012 - Classical Physics II (4.0 cr)

**Plan A**

Plan A requires 8 credits in a required sequence and an additional 12 course credits taken in the major or in a related field, including in a minor. Ten thesis credits are also required.

- PHYS 8777 - Thesis Credits: Master's (1.0 - 18.0 cr)

**Plan B**

Plan B requires 8 credits in a required sequence and an additional 22 course credits taken in the major or in a related field, including in a minor. Up to 4 credits of PHYS 8500 may be used for the Plan B project.

- PHYS 8500 - Plan B Project (4.0 cr)

**Plan C**

Plan C requires the two course sequences listed above (16 credits) and PHYS 5201 (3 credits). The remaining 11 credits may be taken in the major field or in a related field, including in a minor.

- PHYS 5201 - Thermal and Statistical Physics (3.0 cr)

**Electives**

Students may choose courses from this list or consult with their advisor for additional options.

**Atomic Physics and Optics**

- PHYS 8161 - Atomic and Molecular Structure (3.0 cr)

**Biophysics and Medical Physics**

- PHYS 5081 - Introduction to Biopolymer Physics (3.0 cr)
- PHYS 5401 - Physiological Physics (4.0 cr)

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 6
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Physics is the study of the fundamental structure and interactions of matter. Research areas in the program include experimental and theoretical studies in astrophysics and cosmology, biological physics, condensed matter physics, elementary particle physics, nuclear physics, space and planetary physics, and physics education research. Interdisciplinary study is also available with the programs in astrophysics, biological sciences, chemistry, chemical engineering and materials science, electrical and computer engineering, mechanical engineering, and the history of science and technology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
A physics minor requires a background in differential and integral calculus and one year of calculus-level college physics.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The master's minor requires a minimum of 6 credits in PHYS courses (including 5001 or 5012).
The doctoral minor requires a minimum of 12 credits in PHYS courses (including 5001 and 5002-or-5011 and 5012).

The following courses cannot be used to satisfy the requirements: Physics 4001, 4002, 4101, 4201, and 4303.

Elective Course Options
PHYS subject requirements can be met through a combination of any of the classes listed below (minimum 2 credits for MS minor after required course and minimum 4 credits for PhD minor after required courses)
Take 2 or more credit(s) from the following:
Atomic Physics and Optics
• PHYS 8161 - Atomic and Molecular Structure (3.0 cr)

Biophysics and Medical Physics
• PHYS 5081 - Introduction to Biopolymer Physics (3.0 cr)
or PHYS 5401 - Physiological Physics (4.0 cr)
or PHYS 5402 - Radiological Physics (4.0 cr)
or PHYS 8311 - Biological Physics of Single Molecules (3.0 cr)
or PHYS 8312 - Biological Physics of Macroscopic Systems (3.0 cr)
or PHYS 8300 - Seminar: Biological and Medical Physics (1.0 cr)

**Condensed Matter Physics**
- PHYS 4211 - Introduction to Solid-State Physics (3.0 cr)
or PHYS 5701 - Solid-State Physics for Engineers and Scientists (4.0 cr)
or PHYS 8702 - Statistical Mechanics and Transport Theory (3.0 cr)
or PHYS 8711 - Solid-State Physics I (3.0 cr)
or PHYS 8712 - Solid-State Physics II (3.0 cr)
or PHYS 8750 - Advanced Topics in Condensed Matter Physics (3.0 cr)
or PHYS 8700 - Seminar: Condensed Matter Physics (1.0 cr)

**Elementary Particle Physics**
- PHYS 4511 - Introduction to Nuclear and Particle Physics (3.0 cr)
or PHYS 8011 - Quantum Field Theory I (3.0 cr)
or PHYS 8012 - Quantum Field Theory II (3.0 cr)
or PHYS 8013 - Special Topics in Quantum Field Theory (3.0 cr)
or PHYS 8891 - Elementary Particle Physics I (3.0 cr)
or PHYS 8892 - Elementary Particle Physics II (3.0 cr)
or PHYS 8911 - Introduction to Supersymmetry (3.0 cr)
or PHYS 8890 - Seminar: Elementary Particle Physics (1.0 cr)

**Mathematical, Advanced Quantum, and Computational Physics**
- PHYS 5041 - Mathematical Methods for Physics (4.0 cr)
or PHYS 8001 - Advanced Quantum Mechanics (3.0 cr)
or PHYS 8301 - Symmetry and Its Application to Physical Problems (3.0 cr)

**Nuclear Physics**
- PHYS 8800 - Seminar: Nuclear Physics (1.0 cr)
or PHYS 8801 - Nuclear Physics I (3.0 cr)
or PHYS 8802 - Nuclear Physics II (3.0 cr)
or PHYS 8850 - Advanced Topics in Nuclear Physics (3.0 cr)

**Plasma and Space Physics**
- PHYS 4611 - Introduction to Space Physics (3.0 cr)
or PHYS 4621 - Introduction to Plasma Physics (3.0 cr)
or PHYS 8601 - Plasma Physics I (3.0 cr)
or PHYS 8602 - Plasma Physics II (3.0 cr)
or PHYS 8611 - Cosmic Rays and Plasma Astrophysics (3.0 cr)
or PHYS 8650 - Advanced Topics in Space and Plasma Physics (3.0 cr)
or PHYS 8600 - Seminar: Space Physics (1.0 cr)

**Relativity and Cosmology**
- PHYS 5011 - Relativity, Cosmology, and the Universe (4.0 cr)
or PHYS 8501 - General Relativity and Cosmology I (3.0 cr)
or PHYS 8502 - General Relativity and Cosmology II (3.0 cr)
or PHYS 8200 - Seminar: Cosmology and High Energy Astrophysics (1.0 cr)

**Physics Education**
- PHYS 5072 - Best Practices in College Physics Teaching (1.0 - 3.0 cr)
or PHYS 8100 - Seminar: Problems of Physics Teaching and Higher Education (1.0 cr)

---

**Program Sub-plans**
Students are required to complete one of the following sub-plans. Students may not complete the program with more than one sub-plan.

**Masters**
Students must complete a minimum of 6 credits in physics including either Physics 5001 or 5011.

**Required Courses**
- PHYS 5001 - Quantum Mechanics I (4.0 cr)
or PHYS 5011 - Classical Physics I (4.0 cr)

**Doctoral Minor**
Students must complete a minimum of 12 credits in physics, including either the classical physics sequence or the quantum mechanics
Required Courses

Quantum Mechanics Sequence
PHYS 5001 - Quantum Mechanics I (4.0 cr)
PHYS 5002 - Quantum Mechanics II (4.0 cr)

or Classical Physics Sequence
PHYS 5011 - Classical Physics I (4.0 cr)
PHYS 5012 - Classical Physics II (4.0 cr)

• Program Type: Doctorate
• Requirements for this program are current for Fall 2018
• Length of program in credits: 64
• This program does not require summer semesters for timely completion.
• Degree: Doctor of Philosophy

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

Physics is the study of the fundamental structure and interactions of matter. Research areas in the program include experimental and theoretical studies in astrophysics and cosmology, biological physics, condensed matter physics, elementary particle physics, nuclear physics, space and planetary physics, and physics education research. Interdisciplinary study is also available with the programs in astrophysics, biological sciences, chemistry, chemical engineering and materials science, electrical and computer engineering, mechanical engineering, and the history of science and technology.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.50.

Other requirements to be completed before admission:
Teaching assistantships and a few fellowships are available upon admittance to the School of Physics and Astronomy.

Applicants are required to submit three letters of recommendation from persons familiar with their scholarship and research potential; a complete set of transcripts; and a clearly written statement of career interests, goals, and objectives. Submission of GRE scores is strongly recommended. Fall semester entry is strongly recommended for all students. Application by December 15 is strongly encouraged to ensure priority consideration for fellowships awarded for the next academic year. Additional application information is available at http://www.physics.umn.edu/grad/physics/application.html

Special Application Requirements:
Courses at the upper division level in the core areas of classical mechanics, electricity and magnetism, quantum mechanics, and statistical and thermal physics are required. It is advisable to have taken an upper division course in experimental methods in physics.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 55
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

40 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.30 is required for students to remain in good standing.

Physics 4001, 4002, 4101, 4201, and 4303 cannot be used to satisfy the requirements.

Students whose financial support comes from TA assignments are also required to complete 3 credits of PHYS 5072 over two semesters. These credits count towards elective requirements.

Required orientation: Before the beginning of fall semester, new graduate students are expected to participate in the department orientation program. This includes TA orientation sessions, which are required if a student's financial support comes from TA assignments.

Requirement for international students: International students who want to teach as TAs must take CSE TALK, a workshop on American teaching culture and language skills, prior to the department orientation described above and achieve an ELP (English Language Proficiency) rating of 1. This includes passing an English test, which is given in late July and August. Students who do not achieve an ELP of 1 must take an English training course geared to their level of skills, such as GRAD 5105, GRAD 5102, or Foundations. These courses are given during the academic year and are required until the student achieves an ELP of 1.

**Required Courses**

- PHYS 5001 - Quantum Mechanics I (4.0 cr)
- PHYS 5002 - Quantum Mechanics II (4.0 cr)
- PHYS 5011 - Classical Physics I (4.0 cr)
- PHYS 5012 - Classical Physics II (4.0 cr)
- PHYS 5201 - Thermal and Statistical Physics (3.0 cr)

**Seminars**

Take 2 or more course(s) totaling 2 or more credit(s) from the following:
- PHYS 8100 - Seminar: Problems of Physics Teaching and Higher Education (1.0 cr)
- PHYS 8200 - Seminar: Cosmology and High Energy Astrophysics (1.0 cr)
- PHYS 8300 - Seminar: Biological and Medical Physics. (1.0 cr)
- PHYS 8600 - Seminar: Space Physics (1.0 cr)
- PHYS 8700 - Seminar: Condensed Matter Physics (1.0 cr)
- PHYS 8800 - Seminar: Nuclear Physics (1.0 cr)
- PHYS 8900 - Seminar: Elementary Particle Physics (1.0 cr)

**Electives**

Students may choose courses from this list or consult with their advisor for additional options.

Take 19 or more credit(s) from the following:

**Atomic Physics and Optics**
- PHYS 8161 - Atomic and Molecular Structure (3.0 cr)

**Biophysics and Medical Physics**
- PHYS 5081 - Introduction to Biopolymer Physics (3.0 cr)
- PHYS 5401 - Physiological Physics (4.0 cr)
- PHYS 5402 - Radiological Physics (4.0 cr)
- PHYS 8311 - Biological Physics of Single Molecules (3.0 cr)
- PHYS 8312 - Biological Physics of Macroscopic Systems (3.0 cr)
- PHYS 8300 - Seminar: Biological and Medical Physics. (1.0 cr)

**Condensed Matter Physics**
- PHYS 4211 - Introduction to Solid-State Physics (3.0 cr)
- PHYS 5701 - Solid-State Physics for Engineers and Scientists (4.0 cr)
- PHYS 8702 - Statistical Mechanics and Transport Theory (3.0 cr)
- PHYS 8711 - Solid-State Physics I (3.0 cr)
PHYS 8712 - Solid-State Physics II (3.0 cr)
PHYS 8750 - Advanced Topics in Condensed Matter Physics (3.0 cr)
PHYS 8700 - Seminar: Condensed Matter Physics (1.0 cr)

• **Elementary Particle Physics**
  • PHYS 4511 - Introduction to Nuclear and Particle Physics (3.0 cr)
  • PHYS 8011 - Quantum Field Theory I (3.0 cr)
  • PHYS 8012 - Quantum Field Theory II (3.0 cr)
  • PHYS 8013 - Special Topics in Quantum Field Theory (3.0 cr)
  • PHYS 8901 - Elementary Particle Physics I (3.0 cr)
  • PHYS 8902 - Elementary Particle Physics II (3.0 cr)
  • PHYS 8911 - Introduction to Supersymmetry (3.0 cr)
  • PHYS 8950 - Advanced Topics in Elementary Particle Physics (3.0 cr)
  • PHYS 8900 - Seminar: Elementary Particle Physics (1.0 cr)

• **Mathematical, Advanced Quantum, and Computational Physics**
  • PHYS 5041 - Mathematical Methods for Physics (4.0 cr)
  • PHYS 8001 - Advanced Quantum Mechanics (3.0 cr)
  • PHYS 8301 - Symmetry and Its Application to Physical Problems (3.0 cr)

• **Nuclear Physics**
  • PHYS 8801 - Nuclear Physics I (3.0 cr)
  • PHYS 8802 - Nuclear Physics II (3.0 cr)
  • PHYS 8850 - Advanced Topics in Nuclear Physics (3.0 cr)
  • PHYS 8800 - Seminar: Nuclear Physics (1.0 cr)

• **Plasma and Space Physics**
  • PHYS 4611 - Introduction to Space Physics (3.0 cr)
  • PHYS 4621 - Introduction to Plasma Physics (3.0 cr)
  • PHYS 8601 - Plasma Physics I (3.0 cr)
  • PHYS 8602 - Plasma Physics II (3.0 cr)
  • PHYS 8611 - Cosmic Rays and Plasma Astrophysics (3.0 cr)
  • PHYS 8650 - Advanced Topics in Space and Plasma Physics (3.0 cr)
  • PHYS 8600 - Seminar: Space Physics (1.0 cr)

• **Relativity and Cosmology**
  • PHYS 5022 - Relativity, Cosmology, and the Universe (4.0 cr)
  • PHYS 8501 - General Relativity and Cosmology I (3.0 cr)
  • PHYS 8502 - General Relativity and Cosmology II (3.0 cr)
  • PHYS 8200 - Seminar: Cosmology and High Energy Astrophysics (1.0 cr)

• **Physics Education**
  • PHYS 5072 - Best Practices in College Physics Teaching (1.0 - 3.0 cr)
  • PHYS 8100 - Seminar: Problems of Physics Teaching and Higher Education (1.0 cr)

**Thesis Credits**
Take 24 credits (maximum 14 credits per term) after passing preliminary oral exam.
PHYS 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)

Quaternary Paleoecology Graduate Program, University of Minnesota, John T. Tate Hall-Suite 150, 116 Church St. SE, Minneapolis, MN 55455 (612-624-7881; fax: 612-625-3819)
Email: qpminor@umn.edu
Website: http://lrc.geo.umn.edu/qpminor/index.html

- Program Type: Graduate free-standing minor
- Requirements for this program are current for Fall 2018
- Length of program in credits (Masters): 6
- Length of program in credits (Doctorate): 12
- This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The faculty of the graduate minor in quaternary paleoecology (QP) hold appointments in several departments. Students in this unique program benefit from the broad range of expertise and experience available at a large research university. From their coursework in the minor, graduate students learn techniques and approaches from other areas that can be applied to their own research.

The minor is available to master's (MA and MS) and doctoral students.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
Other requirements to be completed before admission:
Students must be enrolled in a graduate program (master's or doctoral) at the University of Minnesota.

Special Application Requirements:
Students apply by sending a letter of application to the director of graduate studies (qpminor@umn.edu) as well as a letter of endorsement from their major adviser. Application may be made at any time.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

The Quaternary Paleoecology minor curriculum is developed in consultation with the major advisor and the Quaternary Paleoecology director of graduate studies. Courses must be from relevant disciplines outside the major field.

Minor Courses
Masters students select at least 6 credits, and doctoral students select at least 12 credits from the following list. Alternative coursework can be applied to the minor with approval from the major advisor and Quaternary Paleoecology director of graduate studies.

- ANTH 4077 - Neanderthals: Biology and Culture of Humanity's Nearest Relative (3.0 cr)
- ANTH 4329 - Primate Ecology and Social Behavior (3.0 cr)
- ANTH 5009 - Human Behavioral Biology (3.0 cr)
- ANTH 5015W - Analysis of Stone Tool Technology (4.0 cr)

**Program Sub-plans**

Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters

Doctoral
Twin Cities Campus
Security Technologies M.S.S.T.
Technological Leadership Institute
College of Science and Engineering

Link to a list of faculty for this program.

Contact Information:
Security Technologies Graduate Program, Technological Leadership Institute, University of Minnesota, 290 McNamara Alumni Center, 200 Oak Street SE, Minneapolis MN 55455 (612-624-5474; fax: 612-624-7510)
Email: tliss@umn.edu
Website: http://tli.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 32
- This program requires summer semesters for timely completion.
- Degree: Master of Science in Security Technologies

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The master of science in security technologies (MSST) shapes tomorrow's analytical and risk management policy makers and innovators through a multi-disciplinary graduate program developed in response to growing demand in many levels of industry and government. During the 14-month program and through a multidisciplinary systems approach, the program synthesizes core learning in four areas: security methods and foundations; application expertise (including cyber, bio, food, infrastructure, global supply chains); systems science (interdependency among critical networks, components, human capital, organizational dimensions); and social and policy dimensions. Through elective courses, students also choose a learning track in either security systems technologies or security risk management. Students can further specialize through a range of elective courses. This program bridges disciplines to address local, regional, national, and global areas of need, seeding innovative capabilities while enabling interdisciplinary connections through direct links to industry, business, and government partners.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor’s degree in a related field, e.g. in biological or physical sciences, engineering, computer science, mathematics, statistics, social sciences, or public policy.

Other requirements to be completed before admission:
Applicants should have one year of calculus, probability/statistics, or two science or engineering courses.

Special Application Requirements:
Applications are accepted on a rolling basis for the program's start in the summer of each year. Additional information is available at msst.umn.edu.

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS
  - Total Score: 6.5
- MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).
For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan B: Plan B requires 26 major credits and 6 credits outside the major. The final exam is written and oral. A capstone project is required.

Capstone Project: The Plan B project is an independent applied investigation on a relevant issue in security technologies or homeland security.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.25 is required for students to remain in good standing.

The MSST program requires 32 credits in the fields of systems risk analysis, engineering (hardware and software), emerging technologies, economics, human factors, law, food and bio safety, and public policy to teach and investigate security technologies and address pertinent issues. The 32 credits consist of 24 credits in MSST core courses, 2 credits for the capstone course, and 6 credits in electives outside the major.

Core Courses

Take 0.5 credits of ST 8440
ST 8109 - Cybersecurity Foundations - Technology, Risk & Communication (2.0 cr)
ST 8110 - Security Science and Technology Foundations (3.0 cr)
ST 8111 - Methods, Theory, and Applications (2.5 cr)
ST 8113 - Information and Cyber Security (2.0 cr)
ST 8220 - Vulnerability, Risk and Threat Assessment and Management (3.0 cr)
ST 8221 - Communications of Risk and Security (1.0 cr)
ST 8330 - Critical Infrastructure Protections (3.0 cr)
ST 8331 - Dynamic Systems Modeling and Simulation Tools (2.0 cr)
ST 8440 - Security Practicum (0.5 - 2.0 cr)
ST 8510 - Psychology/Behavior Intelligence for Homeland Security (2.0 cr)
ST 8511 - Public Policy (1.0 cr)
ST 8512 - Partnership in Conflict Management: Security/Privacy Law, Social Responsibility and Ethics (2.0 cr)

Capstone Project

Take a total of 2 credits
ST 8620 - Capstone (0.5 - 2.0 cr)

Electives

Other courses may be selected in consultation with the director of graduate studies.

Take 6 or more credit(s) from the following:

• CI 5301 - Foundations of Computer Applications for Business and Education (3.0 cr)
• CSCI 5221 - Foundations of Advanced Networking (3.0 cr)
• CSCI 5271 - Introduction to Computer Security (3.0 cr)
• CSCI 5471 - Modern Cryptography (3.0 cr)
• CSCI 8715 - Spatial Data Science Research (3.0 cr)
• ESPM 5604 - Environmental Management Systems and Strategy (3.0 cr)
• FNRM 5131 - Geographical Information Systems (GIS) for Natural Resources (4.0 cr)
• GEOG 5561 - Principles of Geographic Information Science (4.0 cr)
• GEOG 5563 - Advanced Geographic Information Science (3.0 cr)
• GEOG 5564 - Urban Geographic Information Science and Analysis (3.0 cr)
• GIS 5574 - Web GIS and Services (3.0 cr)
• GIS 5577 - Spatial Database Design and Administration (3.0 cr)
• IDSC 6040 - Information Technology Management (2.0 cr)
• IDSC 6050 - Information Technologies and Solutions (2.0 cr)
• IDSC 6423 - Enterprise Systems (2.0 cr)
• IDSC 6444 - Business Analytics for Managers I (2.0 cr)
• IDSC 6481 - Managerial Decision Making (2.0 cr)
• IDSC 8003 - Accounting and Information Systems (4.0 cr)
• LAW 6022 - LL.M. Legal Writing and Legal Skills II (3.0 cr)

• Program Type: Graduate minor related to major
• Requirements for this program are current for Fall 2018
• Length of program in credits (Masters): 7
• Length of program in credits (Doctorate): 12
• This program does not require summer semesters for timely completion.

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The security technologies graduate program shapes tomorrow's analytical and risk management policy makers and innovators through a multi-disciplinary graduate program developed in response to growing demand in many levels of industry and government. Through a multidisciplinary systems approach, the program synthesizes core learning in four areas: security methods and foundations; application expertise (including cyber, bio, food, infrastructure, global supply chains); systems science (interdependency among critical networks, components, human capital, organizational dimensions); and social and policy dimensions. Through elective courses, students choose a learning track in either security systems technologies or security risk management. Students can further specialize through a range of elective courses. This program bridges disciplines to address local, regional, national, and global areas of need, seeding innovative capabilities while enabling interdisciplinary connections through direct links to industry, business, and government partners.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Special Application Requirements:
Applicants for the minor must be enrolled in a degree program at the University of Minnesota and must be interviewed for admission (in person or by telephone) by the DGS or designate, except in rare circumstances where this requirement may be waived.

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements
Use of 4xxx courses towards program requirements is not permitted.

Program Sub-plans
Students are required to complete one of the following sub-plans.
Students may not complete the program with more than one sub-plan.

Masters
Minor Courses
Take 7 or more credit(s) from the following:
• ST 8109 - Cybersecurity Foundations - Technology, Risk & Communication (2.0 cr)
• ST 8110 - Security Science and Technology Foundations (3.0 cr)
• ST 8111 - Methods, Theory, and Applications (2.5 cr)
• ST 8113 - Information and Cyber Security (2.0 cr)
• ST 8200 - Special Topics in Security Technologies (0.5 cr)
• ST 8220 - Vulnerability, Risk and Threat Assessment and Management (3.0 cr)
• ST 8221 - Communications of Risk and Security (1.0 cr)
• ST 8330 - Critical Infrastructure Protections (3.0 cr)
• ST 8331 - Dynamic Systems Modeling and Simulation Tools (2.0 cr)
• ST 8440 - Security Practicum (0.5 - 2.0 cr)
• ST 8510 - Psychology/Behavior Intelligence for Homeland Security (2.0 cr)
• ST 8511 - Public Policy (1.0 cr)
• ST 8512 - Partnership in Conflict Management: Security/Privacy Law, Social Responsibility and Ethics (2.0 cr)
• ST 8661 - Securing Cyberspace (Fundamentals) (3.0 cr)

Doctoral

Minor Courses
Take 12 or more credit(s) from the following:
• ST 8109 - Cybersecurity Foundations - Technology, Risk & Communication (2.0 cr)
• ST 8110 - Security Science and Technology Foundations (3.0 cr)
• ST 8111 - Methods, Theory, and Applications (2.5 cr)
• ST 8113 - Information and Cyber Security (2.0 cr)

Twin Cities Campus
Software Engineering M.S.S.E.
Computer Science and Engineering
College of Science and Engineering

Link to a list of faculty for this program.

Contact Information:
MSSE Program, Department of Computer Science and Engineering, College of Science and Engineering, 4-192 Keller Hall, 200 Union Street S.E., Minneapolis, MN 55455 (612-625-1381; msse@umn.edu)
Email: mssee@cs.umn.edu
Website: http://www.msse.umn.edu

- Program Type: Master's
- Requirements for this program are current for Fall 2018
- Length of program in credits: 30
- This program does not require summer semesters for timely completion.
- Degree: Master of Science in Software Engineering

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The Master of Science in Software Engineering (MSSE) program provides a thorough understanding of the fundamental issues related to software development and the software development process. The MSSE curriculum provides a solid grounding in theoretical methods, principles, and tools, and an examination of fundamental software development issues and processes. These concepts are explored using realistic and relevant case examples and projects to ensure that the theory works in practice. The MSSE program is an interdisciplinary program administered by the College of Science and Engineering's Department of Computer Science and Engineering.

The program is offered in a format designed for full-time working professionals. Students take courses one day per week (alternating Fridays and Saturdays) and move through the curriculum as a cohort, taking all classes together for four semesters.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

Prospective students should have an undergraduate degree in computer science or a closely related field.

Other requirements to be completed before admission:
Students with degrees in other fields may be considered for admission based on relevant work experience.

Prospective applicants must have a minimum of one year of professional experience working in the software industry.

Because the MSSE program is designed for full-time working professionals, international applicants typically hold an H-1B visa.

Special Application Requirements:
The early application deadline is March 31. The final deadline is July 1. Applications are accepted for fall semester only. Additional information is available at http://www.msse.umn.edu/how-to-apply

International applicants must submit score(s) from one of the following tests:
- TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
- IELTS

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of August 31, 2018
- Total Score: 6.5
- MELAB
- Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

**Program Requirements**

**Plan C:** Plan C requires 30 major credits and up to null credits outside the major. There is no final exam.

This program may not be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The MSSE requires 30 credits. The curriculum is fixed for the first three semesters. The fourth semester offers electives, including an optional independent project. Students take eight core courses, two industrial seminar courses, and 2 elective courses. The project requirement can be met by a combination of class projects or by an independent project elective.

**Core Courses**

- **SENG 5115** - Graphical User Interface Design, Evaluation, and Implementation (2.0 cr)
- **SENG 5707** - The Principles of Database Systems (3.0 cr)
- **SENG 5801** - Software Engineering I: Overview, Requirements, and Modeling (3.0 cr)
- **SENG 5802** - Software Engineering II: Software Design (3.0 cr)
- **SENG 5811** - Software Testing and Verification (2.0 cr)
- **SENG 5851** - Software Project Management (3.0 cr)
- **SENG 5852** - Quality Assurance and Process Improvement (3.0 cr)
- **SENG 5861** - Introduction to Software Architecture (3.0 cr)

**Industrial Seminar**

- Take twice for a total of 2 credits
- **SENG 5899** - Software Engineering Seminar (1.0 cr)

**Electives**

- Choose a minimum of 6 credits in SENG electives in consultation with adviser

Twin Cities Campus
Stream Restoration Science and Engineering Postbaccalaureate Certificate
CSENG Civil, Envrn & Geo-Eng (CEGE)
College of Science and Engineering

Link to a list of faculty for this program.

Contact Information:
Stream Restoration Graduate Certificate Program, National Center for Earth-surface Dynamics, Saint Anthony Falls Laboratory, 2 Third Avenue SE, Minneapolis, MN 55414 (612-624-4363)
Email: volle001@umn.edu
Website: http://www.nced.umn.edu/apply-certificate-program-stream-restoration

- Program Type: Post-baccalaureate credit certificate/licensure/endorsement
- Requirements for this program are current for Fall 2018
- Length of program in credits: 16
- This program does not require summer semesters for timely completion.
- Degree: Stream Rest. Science & Engineering PBacc Cert

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The postbaccalaureate certificate in stream restoration science and engineering is a three-semester program producing graduates who understand how to blend engineering, physical, biological, and social sciences in prioritizing, designing, implementing, and evaluating stream restoration projects. Two courses, including an introduction to stream restoration and a restoration design experience are required. The remaining courses are chosen from a specified list of relevant courses taught across a number of University departments.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.00.

A bachelor's degree in a field related to ecology, civil engineering, or environmental and earth sciences from an accredited US institution or its foreign equivalent.

Other requirements to be completed before admission:
In addition to the University's online application form, students must submit a program application and one letter of reference. The SRSE program application form and directions for submission can be found at nced.umn.edu/apply-certificate-program-stream-restoration.

Applications are accepted throughout the year.

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
• MELAB
  - Final score: 80

Key to test abbreviations (TOEFL, IELTS, MELAB).

Program Requirements
Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

Required Coursework
Foundation Course
The foundation course is also offered as EEB/ESCI 8601. Students pursuing a degree in earth sciences, civil engineering, or ecology, evolution and behavior should register for the foundation course under a designator other than that of their major.

CEGE 8601 - Introduction to Stream Restoration (3.0 cr)

Elective Coursework
Take 11 or more credit(s) from the following:

River and Floodplain Science and Engineering
Take 1 or more course(s) from the following:
• BBE 5513 - Watershed Engineering (3.0 cr)
• BBE 8513 - Hydrologic Modeling of Small Watersheds (3.0 cr)
• CEGE 4511 - Hydraulic Structures (3.0 cr)
• CEGE 4512 - Open Channel Hydraulics (4.0 cr)
• CEGE 4501 - Hydrologic Design (4.0 cr)
• CEGE 8511 - Mechanics of Sediment Transport (3.0 cr)
• FNRM 5114 - Hydrology and Watershed Management (3.0 cr)
• FNRM 5153 - Forest Hydrology & Watershed Biogeochemistry (3.0 cr)
• ESCI 4701 - Geomorphology (4.0 cr)

River and Floodplain Ecology
• CEGE 8508 - Ecological Fluid Mechanics (4.0 cr)
• EEB 5601 - Limnology (3.0 cr)
• FW 8465 - Fish Habitats and Restoration (3.0 cr)
• FW 8459 - Stream and River Ecology (3.0 cr)
• HORT 5071 - Ecological Restoration (4.0 cr)

Water Quality
• CEGE 5541 - Environmental Water Chemistry (3.0 cr)
• CEGE 8541 - Aquatic Chemistry (3.0 cr)
• CEGE 8561 - Analysis and Modeling of Aquatic Environments I (3.0 cr)
• CEGE 8562 - Analysis and Modeling of Aquatic Environments II (3.0 cr)
• ESCI 4702 - General Hydrogeology (4.0 cr)
• ESPM 5111 - Hydrology and Water Quality Field Methods (3.0 cr)

Water Policy and Management
Take at most 4 credit(s) from the following:
• ESPM 4295W - GIS in Environmental Science and Management [WI] (4.0 cr)
• ESPM 5061 - Water Quality and Natural Resources (3.0 cr)
• ESPM 5202 - Environmental Conflict Management, Leadership, and Planning (3.0 cr)
• ESPM 5703 - Agroforestry in Watershed Management (3.0 cr)
• WRS 5101 - Water Policy (3.0 cr)

Capstone Course
The capstone course is also offered as EEB/ESCI 8602. Students pursuing a degree in earth sciences, civil engineering, or ecology, evolution and behavior should register for the capstone course under a designator other than that of their major.

CEGE 8602 - Stream Restoration Practice (2.0 cr)

• Program Type: Master's
• Requirements for this program are current for Fall 2018
• Length of program in credits: 30
• This program requires summer semesters for timely completion.
• Degree: Master of Science

Along with the program-specific requirements listed below, please read the General Information section of the catalog website for requirements that apply to all major fields.

The mission of the Comparative and Molecular Biosciences (CMB) program is to train outstanding scientists in the basic mechanisms of animal and human health and disease. The CMB program embraces a One Health approach and investigates a wide range of species, including humans, laboratory animals, companion animals, and livestock species.

The CMB program is transdisciplinary, bringing together basic, applied, and clinical scientists from a number of departments to provide students with individualized, cutting-edge biomedical research training. Areas of emphasis include genetic and infectious diseases, and comparative aspects of biology and pathology across animal species and humans. Students receive scientific training that prepares them for careers as independent investigators and educators in academia, industry, and government.

The purpose of the master's degree is to provide technical training and scientific competence in the basic mechanisms of animal and human health and disease.

Program Delivery
This program is available:
• via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission
The preferred undergraduate GPA for admittance to the program is 3.25.

A bachelor's degree in a biological or basic science is required. Previous laboratory experience is strongly preferred.

Other requirements to be completed before admission:
Applicants must submit a C.V. or résumé; three letters of recommendation from persons familiar with their scholarship and research potential; and a statement of any research experience, as well as career interests, goals, and objectives.

Special Application Requirements:
Submission of all application materials by December 1 is required to ensure consideration for fall semester admission.

Applicants must submit their test score(s) from the following:
• GRE

International applicants must submit score(s) from one of the following tests:
• TOEFL
  - Internet Based - Total Score: 79
  - Internet Based - Writing Score: 21
  - Internet Based - Reading Score: 19
  - Paper Based - Total Score: 550
• IELTS
  - Total Score: 6.5
The preferred English language test is Test of English as Foreign Language.

Key to test abbreviations (GRE, TOEFL, IELTS, MELAB).

For an online application or for more information about graduate education admissions, see the General Information section of the catalog website.

Program Requirements

Plan A: Plan A requires 20 major credits, 0 credits outside the major, and 10 thesis credits. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The M.S. requires a minimum of 20 course credits and 10 thesis credits. The 20 course credits include 11 credits from CMB courses. A statistics course is required. A minimum of 5 additional course credits from the biological sciences are also required. A minimum GPA of at least 3.0 is required to maintain satisfactory progress and to graduate.

CMB Program Courses

A minimum of 11 course credits are required. CMB 8550 must be taken twice.
- **CMB 8134** - Ethical Conduct of Animal Research (3.0 cr)
- **CMB 8202** - Mechanisms of Animal Health and Disease II (3.0 cr)
- **CMB 8303** - Comparative Models of Disease (2.0 cr)
- **CMB 8550** - Comparative and Molecular Biosciences Seminar (1.0 cr)
- **CMB 8560** - Research and Literature Reports (1.0 cr)

Statistics

One of the following statistics courses is required.
- **CMB 5200** - Statistical Genetics and Genomics (4.0 cr)
- **or CMB 8910** - Statistical Principles of Research Design (3.0 cr)
- **or PUBH 6450** - Biostatistics I (4.0 cr)
- **or PUBH 6451** - Biostatistics II (4.0 cr)
- **or STAT 5021** - Statistical Analysis (4.0 cr)
- **or STAT 5031** - Statistical Methods for Quality Improvement (4.0 cr)
- **or STAT 5302** - Applied Regression Analysis (4.0 cr)
- **or STAT 5303** - Designing Experiments (4.0 cr)
- **or STAT 5421** - Analysis of Categorical Data (3.0 cr)

Additional courses

A minimum of 5 course credits required, primarily from the biological sciences. These courses can be selected from the following list or in consultation with the advisor.
- **MICA 8002** - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
- **or MICA 8003** - Immunity and Immunopathology (4.0 cr)
- **or MICA 8004** - Cellular and Cancer Biology (4.0 cr)
- **or MICA 8009** - Biochemical Aspects of Normal and Abnormal Cell Growth and Cell Death (2.0 cr)
- **or MICA 8010** - Microbial Pathogenesis (3.0 cr)
- **or BIOC 5361** - Microbial Genomics and Bioinformatics (3.0 cr)
- **or BIOC 6021** - Biochemistry (3.0 cr)
- **or BIOC 8002** - Molecular Biology and Regulation of Biological Processes (3.0 cr)
- **or BIOC 8216** - Signal Transduction and Gene Expression (3.0 cr)
- **or GCD 5036** - Molecular Cell Biology (3.0 cr)
- **or GCD 8008** - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
- **or GCD 8073** - Genetics & Genomics in Human Health (3.0 cr)
- **or GCD 8131** - Advanced Molecular Genetics and Genomics (3.0 cr)
- **or GCD 8151** - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
- **or GCD 8161** - Advanced Cell Biology and Development (3.0 cr)
or CMB 5200 - Statistical Genetics and Genomics (4.0 cr)
or CMB 5571 - Pathogenomics and Molecular Epidemiology - Learning to Fly (3.0 cr)
or CMB 5594 - Directed Research in Comparative and Molecular Biosciences (1.0 - 4.0 cr)
or CMB 5910 - Grantwriting: What Makes a Winning Proposal? (2.0 cr)
or CMB 8208 - Neuropsychopharmacology (3.0 cr)
or CMB 8344 - Mechanisms of Hormone Action (2.0 cr)
or CMB 8361 - Neuro-Immune Interactions (3.0 cr)
or CMB 8371 - Mucosal Immunobiology (3.0 cr)
or CMB 8481 - Advanced Neuropharmaceutics (4.0 cr)
or CMB 8571 - Pathogenomics and Molecular Epidemiology - Learning to Fly (3.0 cr)

Program Requirements
24 credits are required in the major.
0 credits are required outside the major.
24 thesis credits are required.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

A minimum GPA of 3.00 is required for students to remain in good standing.

The PhD requires a minimum of 24 course credits and 24 thesis credits. The 24 course credits include 15 credits of CMB program courses. A statistics course is required. A minimum of 6 additional course credits from the biological sciences are also required. In addition, all students are required to complete a teaching experience. A minimum GPA of at least 3.00 is required to maintain satisfactory progress and to graduate.

CMB program courses
A minimum of 15 course credits are required. CMB 8100 must be taken twice and CMB 8550 must be taken twice.

- CMB 5910 - Grantwriting: What Makes a Winning Proposal? (2.0 cr)
- CMB 8100 - Research Rotation in Comparative and Molecular Biosciences (1.0 cr)
- CMB 8134 - Ethical Conduct of Animal Research (3.0 cr)
- CMB 8202 - Mechanisms of Animal Health and Disease II (3.0 cr)
- CMB 8303 - Comparative Models of Disease (2.0 cr)
- CMB 8550 - Comparative and Molecular Biosciences Seminar (1.0 cr)
- CMB 8560 - Research and Literature Reports (1.0 cr)

Statistics
One of the following statistics courses is required.

- CMB 5200 - Statistical Genetics and Genomics (4.0 cr)
- CMB 8910 - Statistical Principles of Research Design (3.0 cr)
- PUBH 6450 - Biostatistics I (4.0 cr)
- PUBH 6451 - Biostatistics II (4.0 cr)
- STAT 5021 - Statistical Analysis (4.0 cr)

- STAT 5302 - Applied Regression Analysis (4.0 cr)
- STAT 5303 - Designing Experiments (4.0 cr)
- STAT 5421 - Analysis of Categorical Data (3.0 cr)

Additional courses
A minimum of 6 course credits are required, selected from the following list or in consultation with the advisor. Students may take GRAD 8101 OR GRAD 8200 but not both.

- MICA 8002 - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)
- MICA 8003 - Immunity and Immunopathology (4.0 cr)
- MICA 8004 - Cellular and Cancer Biology (4.0 cr)
- MICA 8009 - Biochemical Aspects of Normal and Abnormal Cell Growth and Cell Death (2.0 cr)
- MICA 8010 - Microbial Pathogenesis (3.0 cr)
- BIOC 5361 - Microbial Genomics and Bioinformatics (3.0 cr)
- BIOC 6021 - Biochemistry (3.0 cr)
- BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
- BIOC 8216 - Signal Transduction and Gene Expression (3.0 cr)
- GCD 5036 - Molecular Cell Biology (3.0 cr)
- GCD 8008 - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
- GCD 8073 - Genetics & Genomics in Human Health (3.0 cr)
- GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
or GCD 8151 - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
or GCD 8161 - Advanced Cell Biology and Development (3.0 cr)
or CMB 5200 - Statistical Genetics and Genomics (4.0 cr)
or CMB 5571 - Pathogenomics and Molecular Epidemiology - Learning to Fly (3.0 cr)
or CMB 8208 - Neuropsychopharmacology (3.0 cr)
or CMB 8344 - Mechanisms of Hormone Action (2.0 cr)
or CMB 8361 - Neuro-Immune Interactions (3.0 cr)
or CMB 8371 - Mucosal Immunobiology (3.0 cr)
or CMB 8394 - Research in Comparative Biomedical Sciences (1.0 - 6.0 cr)
or CMB 8481 - Advanced Neuropharmaceutics (4.0 cr)
or CMB 8571 - Pathogenomics and Molecular Epidemiology - Learning to Fly (3.0 cr)
or GRAD 8101 - Teaching in Higher Education (3.0 cr)
or GRAD 8200 - Teaching and Learning Topics in Higher Education (1.0 cr)

Thesis Credits
Take at least 24 doctoral thesis credits

Program Requirements

Plan A: Plan A requires 20 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is written and oral.

This program may be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

VMED Program Courses

Take the following courses for 9 credits. VMED 8550 must be taken twice.

VMED 5190 - Seminar and Presentation Development (2.0 cr)
VMED 5910 - Grant Writing: What Makes a Winning Proposal? (2.0 cr)
VMED 8134 - Ethical Conduct of Animal Research (3.0 cr)
VMED 8550 - Veterinary Medicine Seminar (1.0 cr)

Statistics

Take at least one statistics course. Two courses are recommended.

VMED 8910 - Statistical Principles of Research Design (3.0 cr)
or PUBH 6414 - Biostatistical Literacy (3.0 cr)
or PUBH 6450 - Biostatistics I (4.0 cr)
or PUBH 6451 - Biostatistics II (4.0 cr)
or STAT 5021 - Statistical Analysis (4.0 cr)
or STAT 5031 - Statistical Methods for Quality Improvement (4.0 cr)
or STAT 5302 - Applied Regression Analysis (4.0 cr)
or STAT 5303 - Designing Experiments (4.0 cr)
or STAT 5421 - Analysis of Categorical Data (3.0 cr)

8000-level courses

Take at least one additional 8000-level course in the biological sciences, in consultation with the advisor. CMB 8202 is recommended.

BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
or BIOC 8216 - Signal Transduction and Gene Expression (3.0 cr)
or GCD 8008 - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
or GCD 8073 - Genetics & Genomics in Human Health (3.0 cr)
or GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
or GCD 8151 - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
or GCD 8161 - Advanced Cell Biology and Development (3.0 cr)
or CMB 8202 - Mechanisms of Animal Health and Disease II (3.0 cr)
or CMB 8303 - Comparative Models of Disease (2.0 cr)
or CMB 8344 - Mechanisms of Hormone Action (2.0 cr)
or CMB 8571 - Pathogenomics and Molecular Epidemiology - Learning to Fly (3.0 cr)
or VMED 8192 - Dairy Health Management: Critical Thinking (3.0 cr)
or VMED 8193 - Welfare of Farmed Animals (1.0 cr)
or VMED 8394 - Research in Veterinary Medicine (1.0 - 3.0 cr)
or VMED 8492 - Seminar: Infectious Diseases and Swine Medicine (1.0 cr)
or VMED 8592 - Infectious Disease Journals: Critical Thinking (1.0 cr)

Additional biological sciences coursework

Take at least 7 additional course credits, in consultation with the advisor.

VPM 4131 - Immunology (3.0 cr)
or VMED 5165 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)
or VMED 5180 - Ecology of Infectious Disease (3.0 cr)
or VMED 5181 - Spatial Analysis in Infectious Disease Epidemiology (3.0 cr)
or VMED 5182 - Molecular biology for the Public Health Professional (2.0 cr)
or VMED 5190 - Seminar and Presentation Development (2.0 cr)

- VMED 8910 - Statistical Principles of Research Design (3.0 cr)
  or PUBH 6414 - Biostatistical Literacy (3.0 cr)
  or PUBH 6450 - Biostatistics I (4.0 cr)
  or PUBH 6451 - Biostatistics II (4.0 cr)
  or STAT 5021 - Statistical Analysis (4.0 cr)
  or STAT 5031 - Statistical Methods for Quality Improvement (4.0 cr)
  or STAT 5302 - Applied Regression Analysis (4.0 cr)
  or STAT 5303 - Designing Experiments (4.0 cr)
  or STAT 5421 - Analysis of Categorical Data (3.0 cr)

8000-Level Coursework Requirement
Take at least 3 8000-level biological sciences courses from the following list, or select others, in consultation with the advisor. CMB 8202 is recommended.
- BIOC 8002 - Molecular Biology and Regulation of Biological Processes (3.0 cr)
  or BIOC 8216 - Signal Transduction and Gene Expression (3.0 cr)
- GCD 8008 - Mammalian Gene Transfer and Genome Engineering (2.0 cr)
- GCD 8073 - Genetics & Genomics in Human Health (3.0 cr)
- GCD 8131 - Advanced Molecular Genetics and Genomics (3.0 cr)
- GCD 8151 - Cellular Biochemistry and Cell Biology (2.0 - 4.0 cr)
- GCD 8161 - Advanced Cell Biology and Development (3.0 cr)
- CMB 8100 - Research Rotation in Comparative and Molecular Biosciences (1.0 cr)
- CMB 8202 - Mechanisms of Animal Health and Disease II (3.0 cr)
- CMB 8303 - Comparative Models of Disease (2.0 cr)
- CMB 8344 - Mechanisms of Hormone Action (2.0 cr)
- CMB 8571 - Pathogenomics and Molecular Epidemiology - Learning to Fly (3.0 cr)
- VMED 8192 - Dairy Health Management: Critical Thinking (1.0 cr)
- VMED 8193 - Welfare of Farmed Animals (1.0 cr)
- VMED 8394 - Research in Veterinary Medicine (1.0 - 3.0 cr)
- VMED 8492 - Seminar: Infectious Diseases and Swine Medicine (1.0 cr)
- VMED 8592 - Infectious Disease Journals: Critical Thinking (1.0 cr)

Additional Coursework
Take additional courses from the following list, or select others in consultation with the advisor, to complete the minimum course credit
requirement.

VPM 4131 - Immunology (3.0 cr)

or VMED 5165 - Surveillance of Foodborne Diseases and Food Safety Hazards (2.0 cr)

or VMED 5180 - Ecology of Infectious Disease (3.0 cr)

or VMED 5181 - Spatial Analysis in Infectious Disease Epidemiology (3.0 cr)

or VMED 5182 - Molecular biology for the Public Health Professional (2.0 cr)

or VMED 5190 - Seminar and Presentation Development (2.0 cr)

or VMED 5442 - Quantitative Methods for Population Health (3.0 cr)

or VMED 5594 - Research in Veterinary Medicine (1.0 - 4.0 cr)

or VMED 5596 - Swine Diseases and Diagnostics (2.0 - 3.0 cr)

or VMED 5910 - Grant Writing: What Makes a Winning Proposal? (2.0 cr)

or VMED 5921 - Seminar in Food Protection and Defense (1.0 cr)

or CMB 5200 - Statistical Genetics and Genomics (4.0 cr)

or CMB 5571 - Pathogenomics and Molecular Epidemiology - Learning to Fly (3.0 cr)

or PUBH 6341 - Epidemiologic Methods I (3.0 cr)

or PUBH 6342 - Epidemiologic Methods II (3.0 cr)

or PUBH 6343 - Epidemiologic Methods III (4.0 cr)

or PUBH 6350 - Epidemiologic Methods III: Lab (1.0 cr)

or PUBH 6385 - Epidemiology and Control of Infectious Diseases (2.0 cr)

Thesis Credits
Take at least 24 doctoral thesis credits.

VMED 8888 - Thesis Credit: Doctoral (1.0 - 24.0 cr)
